(7) "Airman" means any individual who engages, as the person in command or as pilot, mechanic, or member of the crew, in the navigation of aircraft while under way; and (except to the extent the Secretary of Transportation may otherwise provide with respect to individuals employed outside the United States) any individual who is directly in charge of the inspection, maintenance, overhauling, or repair of aircraft, aircraft engines, propellers, or appliances; and any individual who serves in the capacity of aircraft dispatcher or air-traffic control-tower operator.

(8) "Air navigation facility" means any facility used in, available for use in, or designed for use in, aid of air navigation, including landing areas, lights, any apparatus or equipment for disseminating weather information, for signaling, for radio-directional finding, or for radio or other electrical communication, and any other structure or mechanism having a similar purpose for guiding or controlling flight in the air or the landing and take-off of aircraft.

(9) "Airport" means a landing area used regularly by aircraft for receiving or discharging passengers or cargo.

(10) "Air transportation" means interstate, overseas, or foreign air transportation or the transportation of mail by aircraft.

(11) "Appliances" means instruments, equipment, apparatus, parts, appurtenances, or accessories, of whatever description, which are used, or are capable of being or intended to be used, in the navigation, operation, or control of aircraft in flight (including parachutes and including communication equipment and any other mechanism or mechanisms installed in or attached to aircraft during flight), and which are not a part or parts of aircraft, aircraft engines, or propellers.

(12) "Board" means the Civil Aeronautics Board.

(13) "Citizen of the United States" means (a) an individual who is a citizen of the United States or of one of its possessions, or (b) a partnership of which each member is such an individual, or (c) a corporation or association created or organized under the laws of the United States or of any State, Territory, or possession of the United States, of which the president and two-thirds or more of the board of directors and other managing officers thereof are such individuals and in which at least 75 per centum of the voting interest is owned or controlled by persons who are citizens of the United States or of one of its possessions.

(14) "Civil aircraft" means any aircraft other than a public aircraft.

(15) "Civil aircraft of the United States" means any aircraft registered as provided in this chapter.

(16) "Conditional sale" means (a) any contract for the sale of an aircraft, aircraft engine, propeller, appliance, or spare part under which possession is delivered to the buyer and the property is to vest in the buyer at a subsequent time, upon the payment of part or all of the price, or upon the performance of any other condition or the happening of any contingency; or (b) any contract for the bailment or leasing of an aircraft, aircraft engine, propeller, appliance, or spare part, by which the bailee or lessee contracts to pay as compensation a sum substantially equivalent to the value thereof, and by which it is agreed that the bailee or lessee is bound to become, or has the option of becoming, the owner thereof upon full compliance with the terms of the contract. The buyer, bailee, or lessee shall be deemed to be the person by whom any such contract is made or given.

(17) "Conveyance" means a bill of sale, contract of conditional sale, mortgage, assignment of mortgage, or other instrument affecting title to, or interest in, property.

(18) "Federal airway" means a portion of the navigable airspace of the United States designated by the Secretary of Transportation as a Federal airway.

(19) "Foreign air carrier" means any person, not a citizen of the United States, who undertakes, whether directly or indirectly or by lease or any other arrangement, to engage in foreign air transportation.

(20) "Interstate air commerce", "overseas air commerce", and "foreign air commerce", respectively, mean the carriage by aircraft of persons or property for compensation or hire, or the carriage of mail by aircraft, or the operation or navigation of aircraft in the conduct or furtherance of a business or vocation, in commerce between, respectively—

(a) a place in any State of the United States, or the District of Columbia, and a place in any other State of the United States, or the District of Columbia; or between places in the same State of the United States through the airspace over any place outside thereof; or between places in the same Territory or possession of the United States, or the District of Columbia;

(b) a place in any State of the United States, or the District of Columbia, and any place in a Territory or possession of the United States; or between a place in a Territory or possession of the United States, and a place in any other Territory or possession of the United States; and

(c) a place in the United States and any place outside thereof;

whether such commerce moves wholly by aircraft or partly by aircraft and partly by other forms of transportation.

(21) "Interstate air transportation", "overseas air transportation", and "foreign air transportation", respectively, mean the carriage by aircraft of persons or property as a common carrier for compensation or hire or the carriage of mail by aircraft, in commerce between, respectively—

(a) a place in any State of the United States, or the District of Columbia, and a place in any other State of the United States, or the District of Columbia; or between places in the same State of the United States through the airspace over any place outside thereof; or between places in the same Territory or possession of the United States, or the District of Columbia;

(b) a place in any State of the United States, or the District of Columbia, and any place in a Territory or possession of the United States; or between a place in a Territory or possession of the United States, and a place in any other Territory or possession of the United States; and

(c) a place in the United States and any place outside thereof;

whether such commerce moves wholly by aircraft or partly by aircraft and partly by other forms of transportation.

(22) "Intrastate air carrier" means any citizen of the United States who undertakes, whether directly or indirectly or by a lease or any other arrangement, to engage solely in intrastate air transportation.

(23) "Intrastate air transportation" means the carriage of persons or property as a common carrier for compensation or hire, by turbojet-powered aircraft capable of carrying thirty or more persons, wholly within the same State of the United States.

(24) "Landing area" means any locality, either of land or water, including airports and intermediate landing fields, which is used, or intended to be used, for the landing and take-off of aircraft, whether or not facilities are provided for the shelter, servicing, or repair of aircraft, or for receiving or discharging passengers or cargo.

(25) "Mail" means United States mail and foreign-transit mail.

(26) "Navigable airspace" means airspace above the minimum altitudes of flight prescribed by regulations issued under this chapter, and shall include airspace needed to insure safety in take-off and landing of aircraft.

(27) "Navigation of aircraft" or "navigate aircraft" includes the piloting of aircraft.

(28) "Operation of aircraft" or "operate aircraft" means the use of aircraft, for the purpose of air navigation and includes the navigation of aircraft. Any person who causes or authorizes the operation of aircraft, whether with or without the right of legal control (in the capacity of owner, lessee, or otherwise) of the aircraft, shall be deemed to be engaged in the operation of aircraft within the meaning of this chapter.

(29) "Person" means any individual, firm, copartnership, corporation, company, association, joint-stock association, or body politic; and includes any trustee, receiver, assignee, or other similar representative thereof.

(30) "Propeller" includes all parts, appurtenances, and accessories thereof.

(31) "Possessions of the United States" means (a) the Canal Zone, but nothing herein shall impair or affect the jurisdiction which has heretofore been, or may hereafter be, granted to the President in respect of air navigation in the Canal Zone; and (b) all other possessions of the United States. Where not otherwise distinctly expressed or manifestly incompatible with the intent thereof, references in this chapter to possessions of the United States shall be treated as also referring to the Commonwealth of Puerto Rico.

(32) "Public aircraft" means an aircraft used exclusively in the service of any government or of any political subdivision thereof, including the government of any State, Territory, or possession of the United States, or the District of Columbia, but not including any government-owned aircraft engaged in carrying persons or property for commercial purposes.

(33) "Spare parts" means parts, appurtenances, and accessories of aircraft (other than aircraft engines and propellers), of aircraft engines (other than propellers), of propellers and of appliances, maintained for installation or use in an aircraft, aircraft engine, propeller, or appliance, but which at the time are not installed therein or attached thereto.

(34) The term "special aircraft jurisdiction of the United States" includes—

(a) civil aircraft of the United States;

(b) aircraft of the national defense forces of the United States;

(c) any other aircraft within the United States;

(d) any other aircraft outside the United States—

(i) that has its next scheduled destination or last point of departure in the United States, if that aircraft next actually lands in the United States; or

(ii) having "an offense", as defined in the Convention for the Suppression of Unlawful Seizure of Aircraft, committed aboard, if that aircraft lands in the United States with the alleged offender still aboard; and

(e) other aircraft leased without crew to a lessee who has his principal place of business in the United States, or if none, who has his permanent residence in the United States;

while that aircraft is in flight, which is from the moment when all external doors are closed following embarkation until the moment when one such door is opened for disembarkation or in the case of a forced landing, until the competent authorities take over the responsibility for the aircraft and for the persons and property aboard.

(35) "Supplemental air carrier" means an air carrier holding a certificate of public convenience and necessity authorizing it to engage in supplemental air transportation.

(36) "Supplemental air transportation" means charter trips, including inclusive tour charter trips, in air transportation, other than the transportation of mail by aircraft, rendered pursuant to a certificate of public convenience and necessity issued pursuant to section 1371(d)(3) of this title to supplement the scheduled service authorized by certificates of public convenience and necessity issued pursuant to sections 1371(d)(1) and (2) of this title. Nothing in this paragraph shall permit a supplemental air carrier to sell or offer for sale an inclusive tour in air transportation by selling or offering for sale individual tickets directly to members of the general public, or to do so indirectly by controlling, being controlled by, or under common control with, a person authorized by the Board to make such sales.

(37) "Ticket agent" means any person, not an air carrier or a foreign air carrier and not a bona fide employee of an air carrier or foreign air carrier, who, as principal or agent, sells or offers for sale any air transportation, or negotiates for, or holds himself out by solicitation, advertisement, or otherwise as one who sells, provides, furnishes, contracts or arranges for, such transportation.

(38) "United States" means the several States, the District of Columbia, and the several Territories and possessions of the United

States, including the territorial waters and the overlying airspace thereof.

Pub.L. 85-726, Title I, § 101, Aug. 23, 1958, 72 Stat. 737; Pub.L. 87-197, § 3, Sept. 5, 1961, 75 Stat. 467; Pub.L. 87-528, § 1, July 10, 1962, 76 Stat. 143; Pub.L. 90-514, § 1, Sept. 26, 1968, 82 Stat. 867; Pub.L. 91-449, § 1(1), (2), Oct. 14, 1970, 84 Stat. 921; Pub.L. 93-366, Title I, § 102, Title II, § 206, Aug. 5, 1974, 88 Stat. 409, 419.

Historical Note

1974 Amendment. Pars. (22) to (33). Pub.L. 93-366, § 206, added pars. (22) and (23). Former pars. (22) to (31) were redesignated (24) to (33), respectively.

Par. (34). Pub.L. 93-366, §§ 102, 206, redesignated former par. (32) as (34) and, as so redesignated, relettered former subpars. (c)(i) as (c) and (c)(ii) as (d)(i), added subpars. (d)(ii) and (e), and expanded time period when, for purpose of definition, aircraft is considered in flight.

Pars. (35) to (38). Pub.L. 93-366, § 206, redesignated former pars. (33) to (36) as (35) to (38), respectively.

1970 Amendment. Pars. (32) to (36). Pub.L. 91-449 added par. (32). Former pars. (32) to (35) were redesignated (33) to (36), respectively.

1968 Amendment. Par. (33). Pub.L. 90-514 expanded supplemental air transportation to include the conduct of inclusive tour charter trips but prohibited individually ticketed service by supplemental air carriers.

1962 Amendment. Pars. (32), (33). Pub.L. 87-528 added pars. (32) and (33). Former pars. (32) and (33) were redesignated (31) and (35), respectively.

Pars. (34), (35). Pub.L. 87-528 redesignated former pars. (32) and (33) as (34) and (35), respectively.

1961 Amendment. Par. (4). Pub.L. 87-197 substituted "operation or navigation of aircraft within" for "operation or navigation or aircraft within".

Change of Name. "Federal Aviation Administration" has been substituted for "Federal Aviation Agency" in par. (1) and "Secretary of Transportation" has been substituted for "Administrator of the Federal Aviation Agency" in pars. (7) and (18) pursuant to Pub.L. 89-670, Oct. 15, 1966, 80 Stat. 931, which created the Department of Transportation and a Federal Aviation Administration, headed by an Administrator, within such Department of Transportation and transferred all functions, powers, and duties of the Federal Aviation Agency and the Administrator and other offices and officers thereof to the Secretary of Transportation, with specific function thus transferred to be exercised by the Administrator of the Federal Aviation Administration. See section 1655(c) of this title.

Effective Date. Section 1505 of Pub.L. 85-726, provided that:

"The provisions of this Act [see Short Title note under this section] shall become effective as follows:

"(1) Section 301, section 302(a), (b), (c), (f), (i), and (k), section 303(a), section 304, and section 1502 [section 1311, section 1342, section 1343(a), (d), (g), and (i), section 1344(a), section 1345, and note set out under section 1341 of this title] shall become effective on the date of enactment of this Act [August 23, 1958]; and

"(2) The remaining provisions shall become effective on the 60th day following the date on which the Administrator of the Federal Aviation Agency [now Administrator of Federal Aviation Administration] first appointed under this Act [this chapter] qualifies and takes office."

The Administrator of the Federal Aviation Agency was appointed, qualified and took office on Oct. 31, 1958.

Short Title of 1974 Amendment. Section 101 of Pub.L. 93-366 provided that: "This title [which enacted sections 1514 and 1515 of this title and amended this section and sections 1471 to 1473 and 1487 of this title] may be cited as the 'Antihijacking Act of 1974'."

Short Title. Section 1 of Pub.L. 85-726, provided that Pub.L. 85-726, which enacted this chapter, amended sections 212, 485a, 485b, 1101, 1102, 1103, 1105, 1108, 1111, 1110, 1151, 1152, 1155, 1157 and 1160 of this title, sections 81, 82 and 90 of Title 14, Coast Guard, section 45 of Title 15, Commerce and Trade, section 7a of Title 16, Conservation, section 686 of Title 31, Money and Finance, section 474 of Title 40, Public Buildings, Property, and Works, sections 485, 485c and 485d of Title 48, Territories and Insular Possessions,

section 123 of Title 50, War and National Defense, and sections 1622 to 1622c of Appendix to Title 50, War and National Defense, repealed sections 171, 174 to 177, 179 to 184, 401 to 403, 421, 422, 423 to 427, 451 to 460, 481 to 485, 486 to 496, 521 to 524, 551 to 560, 581, 582, 601 to 603, 621 to 623, 641 to 649, 671 to 681, 701 to 705, 711 to 722, and 1211 to 1215 of this title, section 7 of 1940 Reorg.Plan No. III, section 7 of 1940 Reorg.Plan No. IV, and Reorg.Plan No. 10 of 1953, and enacted notes set out under this section and sections 486, 1321 and 1341 of this title, shall be popularly known as the "Federal Aviation Act of 1958".

Separability of Provisions. Section 1504 of Pub.L. 85-726, provided that: "If any provision of this Act [this chapter] or the application thereof to any person or circumstance is held invalid, the remainder of the Act [this chapter] and the application of such provision to other persons or circumstances shall not be affected thereby."

Savings Clause; Effect of Transfers, Repeals, and Amendments. Section 1501 of Pub.L. 85-726, provided that:

"(a) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, rates and privileges which have been issued, made, or granted, or allowed to become effective, by the President, the Department of Commerce, the Secretary of Commerce, the Administrator of Civil Aeronautics, the Civil Aeronautics Board, the Airways Modernization Board, the Secretary of the Treasury, the Secretary of Agriculture, or the Postmaster General, or any court of competent jurisdiction, under any provision of law repealed or amended by this Act [see Short Title note under this section], or in the exercise of duties, powers, or functions which, under this Act, are vested in the Administrator of the Federal Aviation Agency [now Federal Aviation Administration] or the Civil Aeronautics Board, and which are in effect at the time this section takes effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Administrator or the Board, as the case may be, or by any court of competent jurisdiction, or by operation of law.

"(b) The provisions of this Act shall not affect any proceedings pending at the time this section takes effect before the Secretary of Commerce, the Administrator of Civil Aeronautics, the Civil Aeronautics Board, the Chairman of the Airways Modernization Board, the Secretary of the Treasury, or the Secretary of Agriculture; but any such proceedings shall be continued before the successor agency, orders therein issued, appeals therefrom taken, and payments made pursuant to such orders, as if this Act had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Administrator, the Civil Aeronautics Board, the Secretary of the Treasury, or the Secretary of Agriculture or by operation of law."

"(c) The provisions of this Act shall not affect suits commenced prior to the date on which this section takes effect; and all such suits shall be continued by the successor agency, proceedings therein had, appeals therein taken, and judgments therein rendered, in the same manner and with the same effect as if this Act had not been passed. No suit, action, or other proceeding lawfully commenced by or against any agency or officer of the United States, in relation of the discharge of official duties, shall abate by reason of any transfer of authority, power, or duties from such agency or officer to the Administrator or the Board under the provisions of this Act, but the court, upon motion or supplemental petition filed at any time within twelve months after such transfer, showing the necessity for a survival of such suit, action, or other proceeding to obtain a settlement of the questions involved, may allow the same to be maintained by or against the Administrator or the Board."

Repeal of Inconsistent Laws. Section 1401(e) of Pub.L. 85-726, provided that: "All other Acts or parts of Acts inconsistent with any provision of this Act [this chapter] are hereby repealed."

Transfer of Functions. All functions, powers, and duties of the Federal Aviation Agency and of the Administrator and other offices and officers thereof, and all functions, powers, and duties of the Civil Aeronautics Board and of the Chairman, Members, offices, and officers thereof under subchapters VI and VII of this chapter were transferred to and vested in the Secretary of Transportation by Pub.L. 89-670, Oct. 15, 1966, 80 Stat. 931, which created the Department of Transportation. See sections 1655(c), (d) and 1657(f), (g), of this title.

Legislative History. For legislative history and purpose of Pub.L. 85-726, see 1958 U.S.Code Cong. and Adm.News, p. 3741. ---

1. Purpose

Purpose of this section providing that any person who causes or authorizes operation of aircraft shall be deemed to be engaged in operation of aircraft within meaning of this chapter was to subject classes of persons named equally with pilots to the rules, regulations and penalties provided in this chapter. Rogers v. Ray Gardner Flying Service, Inc., C.A. Tex.1970, 435 F.2d 1389, certiorari denied 91 S.Ct. 1255, 401 U.S. 1010, 28 L.Ed.2d 516.

Purpose of Air Commerce Act of 1926, former section 301 et seq. of this title, was to promote safety in aircraft flight by eliminating pilot fatigue resulting from aircraft duties. U. S. v. Ozark Air Lines Inc., D.C.Mo.1974, 371 F.Supp. 234, affirmed 506 F.2d 520.

This section is not intended to replace legal relationships created by state common law or statute with respect to tort liability and does not require that negligence of pilot-lessee of aircraft be imputed to lessor and sublessor. Rosdail v. Western Aviation, Inc., D.C.Colo.1960, 207 F.Supp. 681.

Policy behind the chapter is primarily to centralize power in the public interest so as to frame rules for the safe and efficient use of the nation's aeronautics facilities, as well as to provide an agency endowed with the authority to supervise airline rates and services. Trans World Airlines, Inc. v. Hughes, Del.Ch.1974, 317 A.2d 114.

2. State or local regulation and control

This section providing that any person who causes or authorizes operation of aircraft shall be deemed to be engaged in operation of aircraft within this chapter did not preempt Oklahoma bailment law that negligence of nonagent operator-lessee of airplane may not be imputed to owner-lessor and, as to deaths of passengers killed in crash of private airplane in Oklahoma, owner-lessors were not vicariously liable for negligence of the lessee pilot. Rogers v. Ray Gardner Flying Service, Inc., C.A.Tex.1970, 435 F.2d 1389, certiorari denied 91 S.Ct. 1255, 401 U.S. 1010, 28 L.Ed.2d 516.

The Texas Aeronautics Act, Vernon's Ann.Civ.St. art. 46c-1(a, i), does not conflict with federal law, and did not preclude application of this section defining operations of aircraft to an intrastate flight. Sosa v. Young Flying Service, D.C.Tex.1967, 277 F.Supp. 551.

This chapter preempted field of interstate air transportation in regard to routes and points to be served by interstate carriers to exclusion of conflicting regulation by state, and State Railway Commission lacked authority to compel carrier licensed by Civil Aeronautics Board to continue operations over intrastate segment of route which Board had authorized to be discontinued. Application of Frontier Airlines, Inc., 1963, 122 N.W.2d 476, 175 Neb. 501.

Federal government has not preempted field of economic regulation of air carriers and the states have power to act so long as there is no conflict with federal law. Texas Aeronautics Commission v. Braniff Airways, Inc., Tex.1970, 451 S.W.2d 199, certiorari denied 91 S.Ct. 244, 400 U.S. 943, 27 L.Ed.2d 247.

3. Air carrier

Absence of allegation that parties, who allegedly engaged in selling air transportation through bogus affinity group membership certificates, were acting in concert with air carriers did not preclude determination that they acted as indirect air carriers. C. A. B. v. Carefree Travel, Inc., C.A.N.Y.1975, 513 F.2d 375.

"Social club" whose real business was selling tours and air transportation on chartered aircraft, was an "indirect air carrier" within meaning of par. (3) of this section and thus was required to have in force a certificate issued by the Board. Monarch Travel Services, Inc. v. Associated Cultural Clubs, Inc., C.A.Cal. 1972, 466 F.2d 552, certiorari denied 93 S. Ct. 1444, 410 U.S. 967, 35 L.Ed.2d 701.

"Indirect air carrier" is one who holds out to public that it will undertake to transport property by air and enters into contracts with shippers wherein it binds itself to discharge such undertaking with respect to particular shipments. Railway Exp. Agency, Inc. v. C. A. B., 1965, 345 F.2d 445, 120 U.S.App.D.C. 228, certiorari denied 86 S.Ct. 102, 382 U.S. 870, 15 L.Ed.2d 120.

Firm which assembled and shipped air freight was an "air freight forwarder" or "indirect air carrier". Airborne Freight Corp. v. Civil Aeronautics Bd., 1958, 257 F.2d 210, 103 U.S.App.D.C. 206.

Defendant who owned, operated through his employees, maintained and offered services of airplanes to others who leased airplanes for exclusive use for passengers or cargo was a "carrier" of persons and property for hire within regulation providing that no person may engage in carriage of persons or property for hire in air commerce without, or in violation of commercial operator operating certificate. U. S. v. Bradley, D.C.Tex.1966, 252 F.Supp. 804.

A city which operated and managed a public airport through its commissioners, and a corporation which operated a restaurant and other facilities at the airport, were "air carriers," within this chapter. U. S. v. City of Montgomery, D.C.Ala.1962, 201 F.Supp. 590.

Airline which operated entirely within state of California and which was not engaged in air transportation involving interstate, overseas, or foreign air commerce or transportation of mail by aircraft, was not "air carrier" within meaning of former section 401(2) of this title. In re Airlines Transport Carriers, D.C. Cal.1955, 120 F.Supp. 670.

Airline to which Board had issued letter of registration and air carrier's operator certificate, and which carried passengers in interstate commerce, was "air carrier" within meaning of former section 401 of this title. Id.

4. Air commerce

The phrase "in the conduct or furtherance of a business or vocation" appearing in definition of "air commerce" in safety regulation provisions of this chapter had no application in construction of "air transportation" subject to economic regulation under this chapter and that resort hotel did not furnish air carriage in conduct or furtherance of business or vocation could not relieve it from economic regulation. Las Vegas Hacienda, Inc. v. C. A. B., C.A.9, 1962, 298 F.2d 430, certiorari denied 82 S.Ct. 1158, 369 U.S. 885, 8 L.Ed.2d 286.

That resort hotel operator was not primarily in transportation business and that furnishing of air transportation to and from city in another state was only incidental to promotion and operation of resort hotel and that it was assertedly not interested in profiting and did not profit directly from transportation did not require Board to hold that such carriage was outside of economic regulation coverage of this chapter. Id.

Under former section 101 of this title "air commerce" applied to operation of aircraft in foreign countries only where such operation involved commerce with United States, and United States licensed airplanes privately owned by defendant and flown by copilot in foreign country and having no contact with commerce moving between United States and that country were not subject to safety regulations. Hansen v. Arabian Am. Oil Co., D.C.N.Y.1951, 100 F.Supp. 183, affirmed 195 F.2d 682, certiorari denied 73 S.Ct. 31, 341 U.S. 828, 97 L.Ed. 645.

5. Air transportation

A flight between San Francisco, California, and Los Angeles, California, was not within definition of "air transportation," as limited to "interstate air transportation" within this chapter. Dower v. United Air Lines, Inc., C.A.Cal.1961, 329 F.2d 681.

"Free" flights included in package tours sold by hotel operator to all who wished to purchase them were no less common carriage because available only to members of public interested in patronizing such hotel, and such flights constituted "air transportation" as defined in this section and prohibited thereunder in absence of authorization from Board. M & R Inv. Co. v. C. A. B., C.A.9, 1962, 308 F.2d 49.

Board's conclusion that individuals engaged in physical operation of flights conducted by hotel operator without Board authorization were themselves engaged in "air transportation" within meaning of this chapter was not supported by the record. Id.

Under certificate authorizing air carrier to engage in air transportation with respect to property between points enumerated therein including Philadelphia and that the holder could regularly serve a point named therein through any airport convenient thereto, proposed service to Philadelphia by truck through the Newark airport was adequate air service within the meaning of the certificate. City of Philadelphia v. C. A. B., 1961, 289 F.2d 770, 110 U.S.App.D.C. 104.

Where certificate authorized air carrier to engage in air transportation for property between enumerated points including Philadelphia, order granting carrier authority to move Philadelphia freight by truck to and from the Newark airport where the transcontinental air journey began or ended was not invalid as not constituting "air transportation". Id.

Flower shipping cooperative, which was incorporated for purpose of consolidating shipments of members so they would receive a reduced shipping rate, was engaged indirectly in air transportation and Board did not abuse its discretion in requiring the cooperative to submit itself to the special limited regulations the Board had set up for air freight forwarders. Consolidated Flower Shipments-Bay Area v. Civil Aeronautics Bd., C.A.9, 1954, 213 F.2d 814.

This chapter brings within its regulatory scheme all those who compete in the commercial market in the business of offering air transportation to the public generally. U. S. v. Caribbean Ventures, Ltd., D.C.N.J.1974, 387 F.Supp. 1250.

"Air transportation", as used in former section 481(a) of this title prohibiting such transportation without a certificate from Board, means the carriage by aircraft in commerce of persons or property as a common carrier for compensation or hire or the carriage of mail by aircraft. Pacific Northern Airlines v. Alaska Airlines, 1948, 80 F.Supp. 592, 12 Alaska 65.

Since Honolulu International Airport is not point of destination of residents of another island homeward bound from elsewhere, interisland airline carrying such passengers is engaged in "air transportation" within this chapter, whether such passengers are preticketed or not. Application of Island Airlines, Inc., 1963, 381 P.2d 530, 47 Haw. 1, 87.

6. Common carrier

Record supported Board's conclusion that resort hotel operator selling package tours from city in another state, including "free" airplane rides on its craft, was a "common carrier for compensation or hire" within economic regulation provisions of this chapter. Las Vegas Hacienda, Inc. v. C. A. B., C.A.9, 1962, 298 F.2d 430, certiorari denied 82 S.Ct. 1158, 369 U.S. 885, 8 L.Ed.2d 286.

Whether an air carrier is a common carrier is determined by the same principles applicable in the cases of carriers by other means. Arrow Aviation, Inc. v. Moore, C.A.Neb.1959, 266 F.2d 188, 73 A. L.R.2d 337.

A carrier is a "common carrier" if it holds itself out to the public as willing to carry all passengers for hire indiscriminately, and holding out may either be by advertising or by actually engaging in the business of carriage for hire. Id.

Air carrier which operated planes for carriage of persons and property between Alaska and the United States, seeking and advertising for the traffic and carrying all offered to the limit of its capacity, for compensation, was, as to such operations a "common carrier". Pacific Northern Airlines v. Alaska Airlines, 1948, 80 F.Supp. 592, 12 Alaska 65.

While transportation under contract from the United States to Alaska of explosives and other property not generally or ordinarily carried by air and transportation of fresh fish from Alaska to the United States under contract were such as might in themselves be classed as special services which air carriers are permitted to render without regard to certificate, when considered in connection with predominant body of Alaskan air carrier's common carrier operations, they must be classified as common carriage. Id.

Corporation, which by advertising and later by conduct held itself out to public generally as a carrier of freight and passengers by air for hire, was a "common carrier" within subds. (10) and (21) of former section 401 of this title and required to obtain a certificate of public convenience and necessity, though corporation soon discontinued advertising, did not operate planes on schedule but under charter, usually on hourly rate basis, retaining, however, control of plane, and due to limited facilities served only a portion of public. Alaska Air Transport v. Alaska Airplane Charter Co., D.C.Alaska 1947, 72 F.Supp. 769.

Aircraft common carrier may at times and for certain purposes become a private carrier or bailee for hire, when as matter of accommodation or special engagement he undertakes to carry something which is not his business to carry. Executive Aviation, Inc. v. National Ins.

Note 6

Underwriters, 1971, 91 Cal.Rptr. 347, 10 C.A.3d 709.

7. Conveyance

Under former section 401(18) of this title defining "conveyance" as meaning a bill of sale, contract of conditional sale, mortgage, assignment of mortgage or other instrument affecting title to, or interest in, property, the phrase "or other instrument affecting title to, or interest in, property" referred to transactions similar in nature to those enumerated and an attachment was not tantamount to a conveyance. Marrs v. Barbeau, 1957, 140 N.E.2d 353, 336 Mass. 416.

8. Foreign air transportation

The provision of former section 401(21) of this title that common carrier by airplane between places in and outside United States might be deemed engaged in foreign air transportation for purpose of former section 401 et seq. of this title did not constitute a corporation operating aircraft between United States and contiguous foreign country a common carrier, but its status as such had to be determined outside such provisions or by applying principles of common law, in absence of statute. Pan Am. Airways, Inc. v. U. S., Cust.Ct.1957, 150 F.Supp. 509.

9. Interstate air commerce

Scheduled flights carrying persons or property between islands of Hawaii were in "interstate air commerce" through airspace over places outside state of Hawaii, within this chapter. C. A. B. v. Island Airlines, Inc., D.C.Hawaii 1961, 235 F. Supp. 990, affirmed 352 F.2d 735.

10. Interstate air transportation

The general principle of supremacy of federal control over interstate and high sea flights must prevail over the economic importance of interisland air transportation to Hawaii. Island Airlines, Inc. v. C. A. B., C.A.Hawaii 1965, 352 F.2d 735.

The high seas over which interisland flights flew while traveling among the various islands of Hawaii, were a "place" within this section defining jurisdiction of the Board over interstate air transportation which defines interstate commerce as transportation between points in the same state over a foreign country or high seas as well as over another state. Id.

Where certificate authorized air carrier to engage in air transportation between Pacific Coast terminal point, various intermediate points and Portland, Maine, and Philadelphia was an intermediate point enumerated in the certificate, carrier was authorized to engage in interstate air transportation of freight including movements between Philadelphia and the Pacific Coast as well as between Philadelphia and intermediate points. City of Philadelphia v. C. A. B., 1961, 289 F.2d 770, 110 U.S.App.D.C. 101.

Where certificate authorized air carrier to engage in air transportation with respect to property between points enumerated therein including Philadelphia and that the carrier could regularly serve a point named therein through any airport convenient thereto and the Board authorized service to Philadelphia by truck through the Newark airport if that airport was convenient to Philadelphia, requirement of the certificate was met. Id.

Under former section 401 et seq. of this title, air express and air freight are not different classes of traffic requiring separate authority for each class from the Board, but were both included within the "property" authorization of former section 401(21) of this title. Delta Air Lines, Inc. v. Civil Aeronautics Bd., C.A. 5, 1957, 247 F.2d 327.

"Place", within par. (21) (a) of this section defining interstate air transportation as flight between a place in United States and place in any other state or through airspace over any place outside thereof, refers to definite locality or specific area within definite physical limits, and, with respect to interisland transportation, refers to place which itself has boundaries, not international waters outside boundaries of any place. Application of Island Airlines, Inc., 1963, 381 P.2d 536, 47 Haw. 1, 87.

Par. (21)(a) of this section, extending federal jurisdiction to commerce between places in same territory was continued in force in Hawaii during the two-year transitional period which had not expired or been terminated. In re Island Airlines, Inc., 1961, 361 P.2d 390, 44 Haw. 631, rehearing denied 361 P.2d 390, 44 Haw. 683.

"Through the airspace over any place outside thereof", within par. (21) (a) of this section defining interstate transportation as flights between places in same state through airspace over any place outside thereof, denotes passage through airspace over another state or country having jurisdiction of airspace, not merely passage through airspace outside state without encountering sovereignty of any other state or country. Id.

Jurisdiction of Board over air commerce between places in State of Hawaii

Note 12

continued for two-year transitional period unless assumption of state re responsibility was advanced by state enactment. Id.

11. Operation of aircraft

Congress, in enacting provisions of this chapter including rental or leasing of airplanes within definition of "operation of aircraft" and making it illegal for any person to operate aircraft in careless or reckless manner so as to endanger life or property of another, merely intended to subject owners equally with pilot to rules, regulations, and penalties provided in this chapter, and not to make them civilly responsible for pilot lessee negligence. Sanz v. Renton Aviation, Inc., C. A.Wash.1975, 511 F.2d 1027.

Even though lease provided that construction company-lessee would take over operation of helicopter, which was licensed in restricted category, rather than standard category, and was therefore not authorized under Federal Aviation Administration regulations to operate for "compensation or hire," in view of fact that pilot had been chief pilot of certified helicopter operating company, and in view of fact that that company's president controlled that company and helicopter leasing company, and, indirectly, had substantial control over the record owner of helicopter, the lessor "operated" the aircraft within meaning of par. (28) of this section. Aircrane, Inc. v. Butterfield, D.C.Pa.1971, 369 F.Supp. 598.

This section providing that any person who authorizes operation of an aircraft in capacity of owner or otherwise shall be deemed to be engaged in operation of the aircraft was applicable to flight which resulted in death of lessee-pilot and his passengers, and constituted a basis for imputing negligence of pilot to owner, even though the fatal flight was entirely intrastate. Sosa v. Young Flying Service, D.C.Tex.1967, 277 F.Supp. 551.

Provision of this section stating that any person authorized in the operation of aircraft is deemed to be engaged in operating it within meaning of this chapter did not create for widow of deceased passenger a civil remedy against owner of aircraft based upon imputed negligence of pilot operating plane with owner's consent. Nachsin v. De La Bretonne, 1971, 95 Cal.Rptr. 227, 17 C.A.3d 637.

Intrastate operations of aircraft on a civil airway or which directly affect or endanger the safety of interstate, overseas, or foreign air commerce, are subject to the provisions of this chapter. 1941, 40 Op.Atty.Gen. 95.

12. Navigable airspace

Traversing airspace above another's land is not alone a trespass, and is lawful unless done under circumstances which cause injury. Pueblo of Sandia ex rel. Chaves v. Smith, C.A.N.M.1971, 497 F. 2d 1013.

Airspace above land acquired by municipality in adjacent town at end of runway was within meaning of "clear zone" as defined in federal regulation and, as part of the navigable airspace, was subject to federal regulation and orders of state court purporting to regulate flight of aircraft in the clear zone infringed on federal regulation of navigable airspace. U. S. v. City of New Haven, C.A.Conn.1974, 496 F.2d 452, appeal dismissed, certiorari denied 95 S.Ct. 218, 419 U.S. 958, 42 L.Ed.2d 174.

Neither par. (20) of this section nor section 1101 of this title would support action by passengers who were injured in airplane crash and who sought to impute negligence of lessee pilot to the owners-lessors of the airplane. McCord v. Dixie Aviation Corp., C.A.Utah 1971, 450 F.2d 1129.

Land near airport in sparsely settled community in Mojave Desert was not in a congested area for purposes of regulation fixing navigable airspace as commencing at 500 feet over uncongested and 1,000 feet over congested areas. Aaron v. U. S., Ct.Cl.1963, 311 F.2d 708, 160 Ct.Cl. 205.

Congress has declared a public freedom of transit through the navigable airspace, and has defined "navigable airspace" to include airspace needed to insure safety in takeoff and landing. Aaron v. City of Los Angeles, 1971, 115 Cal.Rptr. 162, 10 C.A.3d 171.

"Navigable airspace" means airspace above minimum altitudes of flight prescribed by applicable regulations, including airspace need to insure safety in takeoff and landing of aircraft. Johnson v. Airport Authority of City of Omaha, 1962, 115 N.W.2d 420, 173 Neb. 801.

Superadjacent airspace between 250 feet and 500 feet above property lying near to runway of aviation authority's airport was not within "navigable airspace" which Congress has placed in the public domain and owners of the property did not have to establish a private property right in such airspace to recover from authority compensation for damages sus-

Note 12

tained by owners because of landings and takeoffs of jet aircraft. Hillsborough County Aviation Authority v. Benitez, Fla.App.1967, 200 So.2d 194.

Provision of this section defining navigable airspace as meaning airspace above minimum altitudes of flight prescribed by regulations and as including airspace needed to insure safety in takeoff and landing of aircraft did not give carte blanche authority to municipalities to appropriate whatever airspace they desired to insure safety in takeoff and landing. Jackson Municipal Airport Authority v. Evans, Miss.1960, 191 So.2d 126.

13. Public aircraft

Where defendant operated its specially developed aircraft pursuant to its contract with National Aeronautics and Space Administration and made three flights transporting spacecraft components, aircraft was a "public aircraft" within meaning of that term as used in par. (32) of this section and regulations issued under section 1421(c) of this title and exempting from regulatory control and from rules and regulations relating to civil aircraft any aircraft used exclusively in service of government, and defendant was not required to obtain a commercial operator's certificate, and was not subject to civil penalties for engaging in air commerce using aircraft of more than 12,500 pounds maximum certified takeoff weight. U. S. v. Aero Spacelines, Inc., C.A.Cal.1966, 361 F.2d 916.

14. Supplemental air carrier

The Board rule authorizing supplemental air carriers to operate foreign originating travel group charters maintained substantial and vital differences between such service and conventional service available to individual traveler. Pan Am. World Airways, Inc. v. C. A. B., C. A.2, 1974, 517 F.2d 734.

Board's decision that stockholders of parent corporation of supplemental air carrier were not eligible for charter service was not so clearly arbitrary as to warrant court's intervention. Trans Intern. Airlines, Inc. v. C. A. B., 1970, 432 F.2d 607, 139 U.S.App.D.C. 174.

Board's determination that stockholders of parent corporation of supplemental air carrier were not eligible for charter service by carrier was within scope of power of agency to interpret regulations within framework of adjudicatory proceeding. Id.

15. Supplemental air transportation

The authorization within this section of supplemental air transportation does not prohibit charters from being solicited, directly or indirectly, from general public. Pan Am. World Airways, Inc. v. C. A. B., C.A.2, 1975, 517 F.2d 734.

16. Vessel

In view of provisions of former section 177 of this title, and former section 401 et seq. of this title, a "seaplane" is not a "vessel" within meaning of section 3 of Title 1, defining vessel as including water craft or other artificial contrivance used or capable of being used as a means of transportation on water. U. S. v. Peoples, D.C.Cal.1943, 50 F.Supp. 402.

§ 1302. Consideration of matters in public interest by Board

In the exercise and performance of its powers and duties under this chapter the Board shall consider the following, among other things, as being in the public interest, and in accordance with the public convenience and necessity:

(a) The encouragement and development of an air-transportation system properly adapted to the present and future needs of the foreign and domestic commerce of the United States, of the United States Postal Service, and of the national defense;

(b) The regulation of air transportation in such manner as to recognize and preserve the inherent advantages of, assure the highest degree of safety in, and foster sound economic conditions in, such transportation, and to improve the relations between, and coordinate transportation by, air carriers;

TRANSPORTATION

CHAPTER 20—FEDERAL AVIATION PROGRAM

SUBCHAPTER III—ORGANIZATION OF ADMINISTRATION; POWERS AND DUTIES OF ADMINISTRATOR

Sec.
1346a. Civil aviation information distribution program [New].
1350a. Security measures in foreign air transportation [New].
(a) Compensation of air carriers.
(b) Definitions applicable.
(c) Authorization of appropriations.
1358. Airport security in Alaska; exemptions from requirements [New].

SUBCHAPTER IV—AIR CARRIER ECONOMIC REGULATION

1388. Certificate for all-cargo air service [New].
(a) Application.
(b) Issuance and revocation of certificate.
(c) Exemptions.
(d) Air carrier status.

SUBCHAPTER I—GENERAL PROVISIONS

§ 1301. Definitions

As used in this chapter, unless the context otherwise requires—

[See main volume for text of (1) to (10)]

(11) "All-cargo air service" means—

(A) the carriage by aircraft of only (i) property as a common carrier for compensation or hire, or (ii) mail, or both, in commerce between a place in any State of the United States, or the District of Columbia, and a place in any other State of the United States, or the District of Columbia; or between places in the same State of the United States through the airspace over any place outside thereof; or between places in the same territory or possession of the United States, or the District of Columbia;

(B) the carriage by aircraft of only (i) property as a common carrier for compensation or hire, or (ii) mail, or both, in commerce between a place in any State of the United States or the District of Columbia and any place in the Commonwealth of Puerto Rico or the Virgin Islands or between a place in the Commonwealth of Puerto Rico and a place in the Virgin Islands;

whether such commerce moves wholly by aircraft or partly by aircraft and partly by other forms of transportation.

(12) "Appliances" means instruments, equipment, apparatus, parts, appurtenances, or accessories, of whatever description, which are used, or are capable of being or intended to be used, in the navigation, operation, or control of aircraft in flight (including parachutes and including communication equipment and any other mechanism or mechanisms installed in or attached to aircraft during flight), and which are not a part or parts of aircraft, aircraft engines, or propellers.

(13) "Board" means the Civil Aeronautics Board.

(14) "Citizen of the United States" means (a) an individual who is a citizen of the United States or of one of its possessions, or (b) a partnership of which each member is such an individual, or (c) a corporation or association created or organized under the laws of the United States or of any State, Territory, or possession of the United States, of which the president and two-thirds or more of the board of directors and other managing officers thereof are such individuals and in which at least 75 per centum of the voting interest is owned or controlled by persons who are citizens of the United States or of one of its possessions.

(15) "Civil aircraft" means any aircraft other than a public aircraft.

(16) "Civil aircraft of the United States" means any aircraft registered as provided in this chapter.

(17) "Conditional sale" means (a) any contract for the sale of an aircraft, aircraft engine, propeller, appliance, or spare part under which possession is delivered to the buyer and the property is to vest in the buyer at a subsequent time, upon the payment of part or all of the price, or upon the performance of any other condition or the happening of any contingency; or (b) any contract for the bailment or leasing of an aircraft, aircraft engine, propeller, appliance, or spare part, by which the bailee or lessee contracts to pay as compensation a sum substantially equivalent to the value thereof, and by which it is agreed that the bailee or lessee is bound to become, or has the option of becoming, the owner thereof upon full compliance with the terms of the contract. The buyer, bailee, or lessee shall be deemed to be the person by whom any such contract is made or given.

(18) "Conveyance" means a bill of sale, contract of conditional sale, mortgage, assignment of mortgage, or other instrument affecting title to, or interest in, property.

(19) "Federal airway" means a portion of the navigable airspace of the United States designated by the Secretary of Transportation as a Federal airway.

(20) "Foreign air carrier" means any person, not a citizen of the United States, who undertakes, whether directly or indirectly or by lease or any other arrangement, to engage in foreign air transportation.

(21) "Interstate air commerce", "overseas air commerce", and "foreign air commerce", respectively, mean the carriage by aircraft of persons or property for compensation or hire, or the carriage of mail by aircraft, or the operation or navigation of aircraft in the conduct or furtherance of a business or vocation, in commerce between, respectively—

(a) a place in any State of the United States, or the District of Columbia, and a place in any other State of the United States, or the District of Columbia; or between places in the same State of the United States through the airspace over any place outside thereof; or between places in the same Territory or possession of the United States, or the District of Columbia;

(b) a place in any State of the United States, or the District of Columbia, and any place in a Territory or possession of the United States; or between a place in a Territory or possession of the United States, and a place in any other Territory or possession of the United States; and

(c) a place in the United States and any place outside thereof; whether such commerce moves wholly by aircraft or partly by aircraft and partly by other forms of transportation.

(22) "Interstate air transportation", "overseas air transportation", and "foreign air transportation", respectively, mean the carriage by aircraft of persons or property as a common carrier for compensation or hire or the carriage of mail by aircraft, in commerce between, respectively—

(a) a place in any State of the United States, or the District of Columbia, and a place in any other State of the United States, or the District of Columbia; or between places in the same State of the United States through the airspace over any place outside thereof; or between places in the same Territory or possession of the United States, or the District of Columbia;

(b) a place in any State of the United States, or the District of Columbia, and any place in a Territory or possession of the United States; or between a place in a Territory or possession of the

United States, and a place in any other Territory or possession of the United States; and

(c) a place in the United States and any place outside thereof; whether such commerce moves wholly by aircraft or partly by aircraft and partly by other forms of transportation.

(23) "Intrastate air carrier" means any citizen of the United States who undertakes, whether directly or indirectly or by a lease or any other arrangement, to engage solely in intrastate air transportation.

(24) "Intrastate air transportation" means the carriage of persons or property as a common carrier for compensation or hire, by turbo-jet-powered aircraft capable of carrying thirty or more persons, wholly within the same State of the United States.

(25) "Landing area" means any locality, either of land or water, including airports and intermediate landing fields, which is used, or intended to be used, for the landing and take-off of aircraft, whether or not facilities are provided for the shelter, servicing, or repair of aircraft, or for receiving or discharging passengers or cargo.

(26) "Mail" means United States mail and foreign-transit mail.

(27) "Navigable airspace" means airspace above the minimum altitudes of flight prescribed by regulations issued under this chapter, and shall include airspace needed to insure safety in take-off and landing of aircraft.

(28) "Navigation of aircraft" or "navigate aircraft" includes the piloting of aircraft.

(29) "Operation of aircraft" or "operate aircraft" means the use of aircraft, for the purpose of air navigation and includes the navigation of aircraft. Any person who causes or authorizes the operation of aircraft, whether with or without the right of legal control (in the capacity of owner, lessee, or otherwise) of the aircraft, shall be deemed to be engaged in the operation of aircraft within the meaning of this chapter.

(30) "Person" means any individual, firm, copartnership, corporation, company, association, joint-stock association, or body politic; and includes any trustee, receiver, assignee, or other similar representative thereof.

(31) "Propeller" includes all parts, appurtenances, and accessories thereof.

(32) "Possessions of the United States" means (a) the Canal Zone, but nothing herein shall impair or affect the jurisdiction which has heretofore been, or may hereafter be, granted to the President in respect of air navigation in the Canal Zone; and (b) all other possessions of the United States. Where not otherwise distinctly expressed or manifestly incompatible with the intent thereof, references in this chapter to possessions of the United States shall be treated as also referring to the Commonwealth of Puerto Rico.

(33) "Public aircraft" means an aircraft used exclusively in the service of any government or of any political subdivision thereof, including the government of any State, Territory, or possession of the United States, or the District of Columbia, but not including any government-owned aircraft engaged in carrying persons or property for commercial purposes.

(34) "Spare parts" means parts, appurtenances, and accessories of aircraft (other than aircraft engines and propellers), of aircraft engines (other than propellers), of propellers and of appliances, maintained for installation or use in an aircraft, aircraft engine, propeller, or appliance, but which at the time are not installed therein or attached thereto.

(35) The term "special aircraft jurisdiction of the United States" includes—

(a) civil aircraft of the United States;

(b) aircraft of the national defense forces of the United States;

(c) any other aircraft within the United States;

(d) any other aircraft outside the United States—

(i) that has its next scheduled destination or last point of departure in the United States, if that aircraft next actually lands in the United States; or

(ii) having "an offense", as defined in the Convention for the Suppression of Unlawful Seizure of Aircraft, committed aboard, if that aircraft lands in the United States with the alleged offender still aboard; and

(e) other aircraft leased without crew to a lessee who has his principal place of business in the United States, or if none, who has his permanent residence in the United States;

while that aircraft is in flight, which is from the moment when all external doors are closed following embarkation until the moment when one such door is opened for disembarkation or in the case of a forced landing, until the competent authorities take over the responsibility for the aircraft and for the persons and property aboard.

(36) "Supplemental air carrier" means an air carrier holding a certificate of public convenience and necessity authorizing it to engage in supplemental air transportation.

(37) "Supplemental air transportation" means charter trips, including inclusive tour charter trips, in air transportation, other than the transportation of mail by aircraft, rendered pursuant to a certificate of public convenience and necessity issued pursuant to section 1371(d)(3) of this title to supplement the scheduled service authorized by certificates of public convenience and necessity issued pursuant to sections 1371(d)(1) and (2) of this title. Nothing in this paragraph shall permit a supplemental air carrier to sell or offer for sale an inclusive tour in air transportation by selling or offering for sale individual tickets directly to members of the general public, or to do so indirectly by controlling, being controlled by, or under common control with, a person authorized by the Board to make such sales.

(38) "Ticket agent" means any person, not an air carrier or a foreign air carrier and not a bona fide employee of an air carrier or foreign air carrier, who, as principal or agent, sells or offers for sale any air transportation, or negotiates for, or holds himself out by solicitation, advertisement, or otherwise as one who sells, provides, furnishes, contracts or arranges for, such transportation.

(39) "United States" means the several States, the District of Columbia, and the several Territories and possessions of the United States, including the territorial waters and the overlying airspace thereof.

As amended Pub.L. 95–163, § 17(b), Nov. 9, 1977 91 Stat. 1286.

1977 Amendment. Par. (11). Pub.L. 95–163, § 17(b)(2), added par. (11). Former par. (11) was renumbered (12). Pars. (12)–(39). Pub.L. 95–163, § 17(b)(1), renumbered former pars. (11) to (38) as (12) to (39), respectively.

Legislative History. For legislative history and purpose of Pub.L. 95–163, see 1977 U.S.Code Cong. and Adm.News, p. 5175.

Supplementary Index to Notes

Aircraft 4a
Charter 17

---

1. Purpose

By enactment of this chapter, Congress intended to impose duty on Federal Aviation Administration to promote maximum safety in use of nation's air space. Clemente v. U. S., D.C.Puerto Rico 1976, 422 F.Supp. 504, motion denied 426 F. Supp. 1.

2. State or local regulation and control

To extent that state law conflicts with any part of this chapter it is preempted by this chapter under Congress' power to regulate interstate commerce. Feldman v. Philadelphia Nat. Bank, D.C.Pa.1976, 408 F.Supp. 24.

Where state's law, as reflected by Uniform Commercial Code, did not conflict with this chapter, it was applicable to transactions involving aircraft. Id.

Recording provisions of this section do not remove transactions involving aircraft entirely from effect of state law. Id.

Despite comprehensive effect of federal regulation on air commerce, states and localities retain power to regulate ground activities not directly involving actual aircraft operation. Garden State Farms, Inc. v. Bay, 1975, 343 A.2d 832, 130 N.J. Super. 1, reversed on other grounds 370 A.2d 37, 146 N.J.Super. 438.

4a. Aircraft

Alleged failure of the Administrator of Federal Aviation Administration to determine that hang gliders were "aircraft" within meaning of this section was discretionary function so that suit thereon under Tort Claims Act, sections 1346(b) and 2671 et seq. of Title 28, was barred. Fielder v. U. S., D.C.Cal.1976, 423 F.Supp. 77.

8. Foreign air transportation

States and municipalities are without authority to regulate any operation or navigation of aircraft within limits of any federal airway or any operation or navigation of aircraft which directly affects interstate, overseas or foreign air commerce. Garden State Farms, Inc. v. Bay, 1975, 343 A.2d 832, 130 N.J.Super. 1. Reversed on other grounds 370 A.2d 37, 146 N.J.Super. 438.

17. Charter

Congress intended the word "charter," to be flexible term which Board is free to define in accordance with experience and changing circumstances as long as integrity of scheduled service traffic is not violated. Trans World Airlines, Inc. v. C. A. B., C.A.2, 1976, 545 F.2d 771.

§ 1302. Consideration of matters in public interest by Board

General factors for consideration

(a) In the exercise and performance of its powers and duties under this chapter, the Board shall consider the following, among other things, as being in the public interest, and in accordance with the public convenience and necessity:

(1) The encouragement and development of an air-transportation system properly adapted to the present and future needs of the foreign and domestic commerce of the United States, of the United States Postal Service, and of the national defense;

(2) The regulation of air transportation in such manner as to recognize and preserve the inherent advantages of, assure the highest degree of safety in, and foster sound economic conditions in, such transportation, and to improve the relations between, and coordinate transportation by, air carriers;

(3) The promotion of adequate, economical, and efficient service by air carriers at reasonable charges, without unjust discriminations, undue preferences or advantages, or unfair or destructive competitive practices;

(4) Competition to the extent necessary to assure the sound development of an air-transportation system properly adapted to the needs of the foreign and domestic commerce of the United States, of the United States Postal Service, and of the national defense;

(5) The promotion of safety in air commerce; and

(6) The promotion, encouragement, and development of civil aeronautics.

Factors for all-cargo air service

(b) In addition to the declaration of policy set forth in subsection (a) of this section, the Board, in the exercise and performance of its powers and duties under this chapter with respect to all-cargo air service shall consider the following, among other things, as being in the public interest:

(1) The encouragement and development of an expedited all-cargo air service system, provided by private enterprise, responsive to (A) the present and future needs of shippers, (B) the commerce of the United States, and (C) the national defense.

(2) The encouragement and development of an integrated transportation system relying upon competitive market forces to determine the extent, variety, quality, and price of such services.

(3) The provision of services without unjust discriminations, undue preferences or advantages, unfair or deceptive practices, or predatory pricing.

As amended Pub.L. 95–163, § 16(b), Nov. 9, 1977, 91 Stat. 1284.

1977 Amendment. Pub.L. 95–163 redesignated existing undesignated provisions as subsec. (a) and existing cls. (a) to (f) thereof as cls. (1) to (6), and added subsec. (b).

Legislative History. For legislative history and purpose of Pub.L. 95–163, see 1977 U.S.Code Cong. and Adm.News, p. 5175.

Supplementary Index to Notes

Promotion of competition 13

---

2. Purpose

Since central objective of this section is to promote regulated competition in air transportation industry and since primary means for achieving goal is certification process in which board must consider whether applicant is fit, willing and able and whether requested authority would serve public convenience and necessity, rigid constraints on board's ability to consider applications on their merits are generally disfavored. World Airways, Inc. v. C. A. B., 1976, 547 F.2d 605, 178 U.S.App.D.C. 398.

Clear intent on part of Congress in enacting this chapter was to provide against improper design and manufacture of aircraft. In re Paris Air Crash of March 3, 1974, D.C.Cal.1976, 399 F.Supp. 732.

4. Sovereignty of federal government

Doctrine of federal preemption of aviation law does not generally extend to

ARTICLE 1. PRACTICE BEFORE THE COMMISSION

Section
- 10. Ethical conduct
- 20. Former employees
- 30. Joint hearings with federal regulatory agencies

3 AAC 60.010. ETHICAL CONDUCT. (a) These canons are in furtherance of the purp of the commision's rules of practice which enjoin upon all persons appearing in proceedings before it to conform, as nearly as may be, to the standards of ethical conduct required of practitioners before the courts of the state of Alaska, and such standards are taken as the basis for these specifications, modified insofar as the nature of the practice before the commission requires.

(b) It is the duty of the practitioner to maintain towards the commission a respectful attitude, not for the sake of the temporary incumbent of the office, but for the maintenance of the importance of the functions he administers. In many respects the commission functions as a court, and practitioners should regard themselves as officers of that court and strive to uphold its honor and dignity. The commission, not being wholly free to defend

itself, is peculiarly entitled to receive the support of the practitioner against unjust criticism and clamor. Whenever there is proper ground for serious complaint of a member or employee of the commission, it is the right and duty of the practitioner to submit his grievances to the proper authorities. In such cases, but not otherwise, such charges should be encouraged and the person making them should be protected.

(c) It is the duty of the practitioner not only to his client, but also to the commission and to the public, to be punctual in attendance, and to be concise and direct in the trial and disposition of causes.

(d) It is unethical for a practitioner to attempt to sway the judgment of the commission by propaganda, or by enlisting the influence of intercession of members of the legislature or other public officers, or by threats of political or personal reprisal.

(e) Marked attention and unusual hospitality on the part of a practitioner to a commissioner, examiner, or other representative of the commission, uncalled for and unwarranted by the personal relations of the parties, subject both to misconstruction of motive and should be avoided. A self-respecting independence in the discharge of duty, without denial or diminution of the courtesy and respect due the official station is the only proper foundation for cordial personal and official relations between commission and practitioners.

(f) The selection of commissioners is a duty of the Governor with confirmation by the legislature. It is the duty of the practitioners insofar as they attempt to advise the appointing or confirming officers, to endeavor to prevent any consideration from outweighing fitness in the selection.

(g) No client, corporate or individual, however powerful, no cause, civil or political, however important, is entitled to receive, and no practitioner should render any service of advice involving disloyalty to the law or disrespect of its official ministers, or corruption of any person or persons exercising a public office or employment or private trust, or deception or betrayal of the public. In rendering any such improper service or advice the practitioner invites and merits stern and just condemnation. Correspondingly, he advances the honor of his calling and the best interests of his client when he renders service or gives advice tending to impress upon the client and his undertaking exact compliance with the strictest principles of moral law. He must also observe and advise his client to observe the statute law, although interpreted by competent adjudication, he is free and is entitled to advise as to its validity and as to what he conscientiously believes to be its just meaning and extent. But, above all, he will find his highest honor in a deserved reputation for fidelity to private trust and to public duty, as an honest man and as a patriotic and loyal citizen.

(h) In the disposition of contested proceedings the commission exercises quasi-legislative powers, but it is nevertheless acting in a quasi-judicial capactiy. It is required to administer the Act and to consider at all times the public interest beyond the mere interest of the particular litigants before it. To the extent that it acts in a quasi-judicial capacity, it is grossly improper for litigants, directly or through any counsel or representative, to communicate privately with a commissioner, examiner, or other representative of the commission about a pending cause, or to argue privately the merits thereof in the absence of their adversaries or without notice to them. Practioners at all times should scrupulously refrain in their communications to and discussions with the commission and its staff from going beyond *ex parte* representations that are clearly proper in view of the administrative work of the commission.

(i) It is the duty of a practioner at the time of retainer to disclose to the client all the circumstances of his relations to the parties, and any interest in connection with the controversy, which might influence the client in the selection of the person to represent or assist him.

(j) It is unethical to represent conflicting interests, except by express consent of all concerned given after a full disclosure of the facts. Within the meaning of this canon a practitioner represents conflicting interest when, in behalf of one client, it is his duty to contend

for that which duty to another client requires him to oppose.

(k) The obligation to represent the client with undivided fidelity and not to divulge his secrets or confidences forbids also the subsequent acceptance of retainers or employment from others in matters adversely affecting any interest of the client with respect to which confidence has been reposed.

(l) A client's proffer of the assistance of additional practitioner should not be regarded as evidence of want of confidence, but the matter should be left to the determination of the client. A practioner should decline association as colleague if it is objectionable to the practitioner first retained, but if the client should relieve the practitioner first retained, another may come to the case.

(m) When practitioners jointly associated in a cause cannot agree as to any matter vital to the interest of the client, the conflict of opinion should be frankly stated to him for his final determination. His decision should be accepted by them unless the nature of the difference makes it impracticable for the practitioner whose judgment has been overruled to cooperate effectively. In this event it is his duty to ask the client to relieve him.

(n) Efforts, direct or indirect, in any way to encroach upon the business of another practitioner are unworthy of those who should be brethern, but, nevertheless, it is the right of any practitioner, without fear or favor, to give proper advice to those seeking relief against an unfaithful or neglectful practitioner, generally after communication with the practitioner of whom the complaint is made.

(o) A practitioner should not in any way communicate upon the subject of controversy with a party represented by another practitioner except upon express agreement with the practitioner representing such party; much less should he undertake to negotiate or compromise the matter with him, but should deal only with the practitioner who represents the other party. It is incumbent upon the practitioner most particularly to avoid everything that may tend to mislead a party not represented by a practitioner, and he should not undertake to advise him as to the law.

(p) A practitioner should always treat adverse witnesses and suitors with fairness and due consideration, and he should never minister to the malevolence or prejudice of a client in the trial or conduct of a cause. The client cannot be made the keeper of the practitioner's conscience in such matters. He has no right to demand that the practitioner representing him shall abuse the opposing party or indulge in offensive personalities. Improper speech is not excusable on the ground that it is what the client would say if speaking in his own behalf.

(q) Attempts to influence the action and attitude of the members and examiners of the commission through propaganda, or through colored or distorted articles, in the public press, are more apt to react against than in favor of the parties resorting to such measures. On the other hand, it is not against the public interest or unfair to the commission that the facts of pending litigation shall be made known to the public through the press in a fair and unbiased manner and in dispassionate terms. Practitioners should, themselves, avoid, and should counsel their clients against, giving to the public press any press notices or statements of a nature intended to inflame the public mind, to stir up possible hostility toward the commission, or to influence the commission's course and judgment as to pending or anticipated litigation. When the circumstances of a particular case appear to justify a statement to the public through the press, it is to make it anonymously.

(r) The practitioner must decline to conduct a cause or to make a defense when convinced that it is intended merely to harass or to injure the opposing party, or to work oppression or wrong. But otherwise it is his right, and having accepted retainer, it becomes his duty, to insist upon the judgment of the commission as to the merits of his client's claim. His appearance should be deemed equivalent to an assertion upon his honor that in his opinion his client's case is one proper for determination.

(s) When a practitioner discovers that some fraud or deception has been practiced, which has unjustly imposed upon the commission or a party, he should endeavor to rectify it; first by

advising his client to forego any advantage thus unjustly gained and, if his client refuses, by promptly informing the injured person or his counsel (practitioner), so that appropriate steps may be taken.

(t) If any such person does not conform to such standards, the commission may decline to permit such person to appear in a representative capacity in any proceeding. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.141

3 AAC 60.020. FORMER EMPLOYEES. (a) No former employee of the commission may at any time after severing his employment with the commission appear in a representative capacity on behalf of other parties in a formal proceeding wherein he previously took an active part as a representative of the commission unless written permission by the commission is granted therefor.

(b) No former employee of the commission shall at any time after severing his employment with the commission appear, except with the written permission of the commission, as an expert witness on behalf of other parties in a formal proceeding wherein he previously took an active part in the investigation as a representative of the commission. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.141

3 AAC 60.030. JOINT HEARINGS WITH FEDERAL REGULATORY AGENCIES. In any proceeding wherein the commission participates jointly with the Interstate Commerce Commission, the Civil Aeronautics Board, the Federal Maritime Commission, or other federal regulatory agency, the rules of practice and procedure of such federal agency shall govern. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.141

ARTICLE 2. PLEADINGS

Section
- 40. Pleadings enumerated
- 50. Applications - contents
- 60. Formal complaints - contents
- 70. Petitions - contents
- 80. Answers
- 90. Replies
- 100. Intervention
- 110. Motions
- 120. Time for pleadings
- 130. Amended pleadings
- 140. Form and size
- 150. Filing, copies required
- 160. Service of pleadings and motions

3 AAC 60.040. PLEADINGS ENUMERATED. (a) Pleadings shall consist of applications, formal complaints, petitions, answers, replies, and motions.

(b) All pleadings except applications shall conform to and comply with secs. 40-160 of this chapter and shall have at the top of the page, *State of Alaska, Alaska Transportation Commission,* title of the case, title of the pleading and docket number, if any, as follows:

STATE OF ALASKA

ALASKA TRANSPORTATION COMMISSION

In the Matter of the Application of	)	
John D. Doe, d/b/a Doe's Flying Service, for an Air Commerce Certificate	)	Docket No.____
	)	TITLE OF PLEADING

(Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.050. APPLICATIONS - CONTENTS. (a) An application is a pleading which applies or prays for any right, power, privilege, or other authority under a statute or regulation requiring the filing of an application.

(b) Applications may be made at any time on a form provided by the commission. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.060. FORMAL COMPLAINTS - CONTENTS. (a) Complaints shall set forth the full name and address of each party complainant and of each party defendant.

(b) Complaints shall fully and clearly set forth concisely the specific act complained of, or the alleged grievance, so as to advise the parties and the commission completely of the facts constituting the grounds of the complaint, the injury complained of, and the exact relief requested.

(c) Complaints shall set forth a citation of the statutes or rules and regulations alleged to have been violated. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.070. PETITIONS – CONTENTS. (a) A petition is any other pleading praying for affirmative relief other than complaints, answers, replies, applications or motions and shall include requests for leave to intervene.

(b) A petition shall set forth all facts upon which the request for relief is based, with the dates of all occurrences which may be essential for the disposition of the matter, together with a citation of the statute and rules and regulations upon which the petition is based, and such other information as required by the commission's rules and regulations under which the specific type of petition is filed.

(c) In the case of petitions, the commission may require notice be given to interested parties and order a hearing. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.080. ANSWERS. (a) Any party against whom a complaint is directed or who desires to contest or make any representations in connection with an application or petition shall file with the commission an answer thereto within the time required by sec. 120 of this chapter.

(b) Answers shall be so drawn as to advise fully and completely the nature of the defense, contention, or representation, and shall admit or deny specifically and in detail all material allegations of the complaint or a protest to a tariff change as provided in sec. 190 of this chapter.

(c) Matters alleged by way of affirmative defense shall be separately stated and numbered. Any defense which challenges the jurisdiction of the commission over the subject matter of the proceeding shall be pleaded as an affirmative defense. Any defense based upon the existence of operating authority shall affirmatively allege such authority.

(d) In case a party fails to answer within the time specified in sec. 120 of this chapter, he shall be deemed in default, and all material allegations of the complaint, application, or petition may be deemed admitted and any further hearing waived. Thereafter, the proceeding may be disposed of without further notice to the defaulting party and without formal proceeding as to such party.

(e) The commission may, upon such terms as may be just, at any time after mailing of an order entered upon a default, relieve the party affected thereby where it appears the order was entered through mistake, inadvertence, surprise, or excusable neglect of such party. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.090. REPLIES. A party desiring to reply to an answer shall file the same with the commission within the time set forth in sec. 120 of this chapter. Failure to file a reply within said time shall be deemed a general denial. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.100. INTERVENTION. (a) Any person may petition the commission for permission to intervene in any proceeding in writing prior to the time of the hearing except as provided in (c) of this section. Any person can petition the hearing officer for permission to intervene orally or in writing at the time of the hearing. Such petition shall contain the following:

(1) the name and address of the party intervening and of his attorney, if any;

(2) the interest of such party in the proceeding; and

(3) the position of such party in the proceeding, including the name of the party in whose behalf such intervention is requested.

(b) Intervention shall not broaden the issues in the proceeding and may be allowed at the

discretion of the hearing officer at the hearing or the commission prior to the hearing.

(c) Intervention in any application proceeding shall be within the time specified in the notice of application as published in a newspaper of general circulation. (Eff. 12/28/69, Reg. 31)
Authority: AS 42.07.150

3 AAC 60.110. MOTIONS. Service of any motion, unless specified in these rules, shall be made on all other parties to the proceedings and the original and one copy shall be served on the commission and if the case has been given to the hearing officer, two copies thereof shall be given to the hearing officer. The commission or the hearing officer shall decide the motion with or without hearing. If the case is before the hearing officer, he will decide the motion and if the case is before the commission, the commission will decide the motion. (Eff. 12/28/69, Reg. 31)
Authority: AS 42.07.150

3 AAC 60.120. TIME FOR PLEADINGS. (a) A motion directed to a complaint must be filed before the answer is due; provided, however, a motion directed towards the legal sufficiency of a complaint to state a cause for relief may be made at any time.

(b) A motion directed to an answer must be filed before the reply is due; provided, however, that a motion directed to the legal sufficiency of any answer to state a cause of defense may be made at any time.

(c) A motion directed to a reply or to the legal sufficiency of a reply must be filed within 10 days after service of the reply.

(d) Answer, if made, must be filed within 20 days.

(e) Reply, if made, must be filed within 10 days after the service of the pleading against which it is directed.

(f) A motion directed to the legal sufficiency of an application or petition may be made at any time.

(g) Unless otherwise specified by these regulations, any reply to a motion shall be served within 10 days of the date of serving of the original motion.

(h) The commission may shorten or extend the time required to file any pleading on its own motion or on the motion of a party stating the reasons for the requested extension. (Eff. 12/28/69, Reg. 31)
Authority: AS 42.07.150

3 AAC 60.130. AMENDED PLEADINGS. Amendments to pleadings may be allowed at any time and upon such terms as may be deemed proper in the discretion of the commission. (Eff. 12/28/69, Reg. 31)
Authorityy: AS 42.07.150

3 AAC 60.140. FORM AND SIZE (a) Pleadings shall be fastened at the top, shall be typewritten on paper 8½ x 11 to 14 inches in size, and exhibits or appendices, annexed thereto, folded to that size. The impression shall be on one side of the paper only and shall be double spaced, except that footnotes or quotations shall be single spaced and indented.

(b) Reproduction of original document may be by any process, provided all copies are clear and permanently legible. (Eff. 12/28/69, Reg. 31)
Authority: AS 42.07.150

3 AAC 60.150. FILING, COPIES REQUIRED. (a) Upon the filing of an original complaint or amendment thereof, there must also be filed conformed copies equal in number to two more than the number of defendants named in the complaint.

(b) Published application and petition forms will be furnished upon request, and the original and one conformed copy shall be filed with the commission.

(c) Unless otherwise expressly provided in the rules and regulations governing a particular proceeding, an original and two conformed copies of all other pleadings shall be filed with the commission. (Eff. 12/28/69, Reg. 31)
Authority: AS 42.07.150

3 AAC 60.160. SERVICE OF PLEADINGS AND MOTIONS. (a) Service by commission: all complaints and final orders will be served by the commission. Service may be made by registered

United States mail, postage prepaid, addressed to recipient as his address appears in the records of the commission, or his agent of process. Service shall be deemed complete when said document is so deposited in the United States mail or hand delivered by an agent of the commission.

(b) Service by parties.

(1) all other pleadings shall be served by the pleader upon each other party to the proceeding or his attorney of record;

(2) service of pleadings by parties shall be made by delivering one copy to each party in person or by first-class mail, properly addressed with postage prepaid;

(3) when a party has appeared by attorney, service upon such attorney of pleadings and all decisions and order of the commission in the proceeding, will be deemed valid service upon the party;

(4) how service is made: whenever under these rules service is required or permitted to be made upon a party represented by an attorney, the service shall be made upon the attorney unless service upon the party himself is ordered by the commission; service upon the attorney or upon a party shall be made by delivering a copy to him or by mailing it to him at his last known address or, if no address is known, by leaving it with the commission; delivery of a copy within this rule means handing it to the attorney or to the party; or leaving it at his office with his clerk or other person in charge thereof; or, if there is not one in charge, leaving it in a conspicuous place therein; or if the office is closed or the person to be served has no office, leaving it at his dwelling house or usual place of abode with some person of suitable age and discretion then residing therein; service by mail is complete upon mailing; service, execution, and return based on a copy of any paper transmitted by telegraph or radio may be made by the person to whom directed with the same effect as if such copy were the original; in such case, the original shall be filed with the commission;

(5) service by mail: whenever a party has the right or is required to do some act within a prescribed period after the service of a notice or other paper upon him and the notice or paper is served upon him by mail, five days shall be added to the prescribed period except in time periods prescribed for tariff change proceedings; and

(6) there shall appear on the original of every pleading either an acknowledgement of service or certificate in substantially the following form:

> I hereby certify that I have this day served a true copy of the foregoing document upon all parties of record in this proceeding by mailing a copy thereof properly addressed with postage prepaid, to the following parties or attorneys of parties:
>
> _____
>
> _____
>
> _____
>
> Dated at _____ this _____ day of _____, 19____.
>
> (Signature) _____
>
> Of Counsel for _____

Where the method of service is other than by mail, there must be attached a certification by the person who made the service stating the method of service, upon whom service was made, the time, date, and place. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

350. Form of decision
360. Briefs
370. Oral arguments
380. Effective date
390. Reconsideration
400. Petition for reduction of penalty

3 AAC 60.170. HEARINGS. (a) Hearings may be ordered by the commission for applications, clarification of authority, transfers, investigations, tariff suspension, or other just cause not herein specified.

(b). The commission shall order the place of hearing at a place most convenient to all parties.

(c) All hearings shall be conducted by a hearing officer appointed by the commission. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.180. NOTICE. (a) The time and place of holding formal hearings will be set by the commission and notice served on all parties or their representative at least 30 days prior to the date of said hearing, by depositing said notice in the United States mail, postage prepaid, addressed to recipient as his address appears in the records of the commission. The commission may by order or in the notice of hearing require a hearing to be held on less than 30 days' notice.

(b) The commission shall compile a journal of all applications, petitions, complaints and other proceedings to be published regularly not less frequently than once a month. Notice to all carriers and the general public shall be accomplished by publication of the journal. Official notice is completed upon publication in the journal. Upon payment of the charge therefor, any person may subscribe to the journal which shall be mailed first class to his designated address. Copies of the journal shall be maintained for public inspection at the offices of the commission in Anchorage, Fairbanks and Juneau. (Eff. Reg. 31; am 10/4/73, Reg. 47)

Authority: AS 42.07.141

3 AAC 60.190. PROTESTS (a) Any protests to an application shall state the specific grounds for the protest on one or more of the following grounds:

(1) financial ability of the applicant;

(2) deficiency in experience or inability of applicant to perform the service;

(3) lack of necessity for proposed service; or

(4) proposed service would be detrimental to the public interest.

(b) Anyone filing a protest shall indicate therein whether or not they will be present at the hearing by stating

> "I hereby certify that I will/will not appear at the hearing and will/will not participate fully in any and all proceedings concerning this application."

(c) Any protest to a tariff change shall be filed at least 15 days prior to the effective date of the tariff change. Protests shall state the specific grounds for the protest and identify the specific tariff and portion thereof. Motions for the suspension of tariffs shall be filed in accordance with sec. 410 of this chapter. The commission shall file all protests with the originator of the tariff change. Answers to protests shall be filed with the commission at least five days prior to the effective date of the tariff change. The commission may order a formal hearing to consider the tariff change.

(d) Protests shall be postmarked not later than 15 days from the last day of publication. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.200. POSTPONEMENT OF HEARINGS. (a) Any party who desires a postponement shall, immediately upon receipt of notice of the hearing or as soon thereafter as facts requiring such postponement come to his knowledge, notify the hearing officer in writing at least 10 days before the date of the hearing,

stating in detail the reasons why such postponement is necessary.

(b) The hearing officer in passing upon a request for a postponement shall consider whether such request was promptly made. For good cause shown, the hearing officer may grant such a postponement and may, for good cause shown, order a postponement upon his own motion at least 10 days before the date of the hearing. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.210. CONTINUANCES. (a) During a hearing, if it appears that further evidence or argument should be received, the hearing officer may, in his discretion, continue the hearing for good cause shown.

(b) The date of such continued hearing may be fixed at time of hearing or by later written notice to the parties. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.220. CONSOLIDATION OF PROCEEDINGS. Proceedings may be consolidated for hearing in the discretion of the commission. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.230. CONFERENCES. (a) It is the policy of the commission, in order to make possible a more effective use of hearing time in formal proceedings, and otherwise to expedite the orderly conduct and disposition of such proceedings, to arrange for conferences between parties to such proceedings and the hearing officer to consider the following matters:

(1) simplification and clarification of the issues and elimination of irrelevant or immaterial issues;

(2) the possibilities for obtaining stipulations as to facts pursuant to sec. 240 of this chapter, authenticity of documents, admissibility of evidence, order of proof, and other matters to which stipulation might be expected to conserve hearing time; and

(3) such other matters as may aid in expediting the orderly conduct and disposition of the proceeding.

(b) In any proceeding the hearing officer may, in his discretion, call the parties together for a conference prior to the taking of testimony or may recess the hearing for such conference. The hearing officer shall state on record the results of such conference. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.240. STIPULATION AS TO FACTS. (a) Parties to any proceeding may, by stipulation of record, agree upon the facts or any portion thereof involved in the controversy, which stipulation shall be binding upon the parties thereto and may be regarded and used by the hearing officer as evidence at the hearing.

(b) Proof by evidence of the facts stipulated to may, however, be required, notwithstanding the stipulation of the parties, by the hearing officer or upon request of the parties, by the hearing officer or upon request of the commission, in either of which events notice will be given and an opportunity to produce afforded. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.250. SUBPOENAS. (a) The issuance of subpoenas, unless otherwise directed by the commission or the hearing officer on his own motion, shall be made in writing and include the name and address of the desired witness.

(b) Subpoenas duces tecum shall specify the particular document record, or part thereof, desired to be produced.

(c) Service of subpoenas shall be made as provided in civil suits in the Superior Court for the state of Alaska and the original shall be forthwith returned to the commission or the hearing officer.

(d) A subpoena issued under this section extends to all parts of the state and shall be served in accordance with the rules of civil procedure. No witness is obliged to attend at a place out of the election district in which he resides unless the distance is less than 100 miles from his place of residence, except that the commission, upon affidavit of a party showing that the testimony of the witness is material and necessary, may endorse on the subpoena an order requiring the attendance of the witness. A

witness who is not a party and who appears under a subpoena is entitled to receive

(1) fees, except a witness who is an officer or employee of the state or a political subdivision of the state;

(2) mileage in the same amount and under the same circumstances as prescribed by law for a witness in a civil action in a superior court; and

(3) an additional fee and mileage to a per diem compensation of $15 for expenses of subsistence for each day of actual attendance and for each day necessarily occupied in traveling to and from the hearing, if the witness attends a hearing at a point so far removed from his residence as to prohibit return to his residence from day to day.

(c) Fees, mileage, and expenses of subsistence shall be paid by the party at whose request the witness is subpoenaed. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.260. DEPOSITIONS. (a) Preliminary:

(1) the commission may either upon its own initiative, or for good cause shown by a party to a proceeding, issue an order to take a deposition;

(2) depositions shall be taken before an officer authorized to administer oaths by the laws of the State of Alaska;

(3) unless under special circumstances and for good cause shown, no deposition shall be taken within 10 days prior to the assigned date of the hearing in such proceeding.

(b) A petition requesting an order to take a deposition shall be filed with due regard to the time periods specified in (a) (3) of this section and shall set forth the name and address of the witness, the place where, the time when, the name and office of the officer before whom, and the cause or reason why such deposition should be taken.

(c) Order and interrogatories:

(1) if the petition requesting an order to take a deposition is granted, which action may be taken without awaiting the possible filing of a reply, the commission will serve upon the parties an order which will name the witness whose deposition is to be taken, and specify the time when, the place where, and the officer before whom the witness is to testify, but such time and place and the officer before whom the deposition is to be taken, so specified in the commission's order, may or may not be the same as set out in the petition;

(2) in lieu of participating in the oral examination, parties served with the order for taking of a deposition may promptly transmit written interrogatories to the officer, who shall propound them to the witness and record the answers verbatim.

(d) The officer before whom the deposition is to be taken shall observe the provisions requesting appearances, put the witness on oath, and shall personally, or by someone acting under his discretion and in his presence, record the testimony of the witness. The testimony shall be taken verbatim and transcribed unless the parties agree otherwise.

(e) All objections made at the time of the examination to the qualifications of the officer taking the deposition, or to the manner of taking it, or to the evidence presented, or to the conduct of any party, and any other objection to the proceedings, shall be noted by the officer upon the deposition. Evidence objected to shall be taken subject to the objections.

(f) When the testimony is fully transcribed or otherwise recorded, the deposition of each witness shall be submitted to him for examination and shall be read to or by him. Any changes in form or substance which the witness desires to make shall be entered upon the deposition by the officer with a statement of the reasons given by the witness for making them. The deposition shall then be signed by the witness, unless the parties by stipulation waive the signing or the witness is ill or cannot be found or refuses to sign. If the deposition is not signed by the witness, the officer shall state at the foot thereof the fact of the waiver or of the illness or absence of the witness, or the fact of the refusal to sign, together with the reason, if any, given thereof; and the deposition may then be used as fully as though signed, unless, on a

motion to suppress, the commission finds that the reasons given for the refusal to sign are sufficient to require rejection of the deposition in whole or in part.

(g) The officer shall certify on the deposition that the witness was duly sworn by him and that the deposition is a true record of the testimony given by the witness, and that the officer is not of counsel or attorney for any of the parties, and that he is not interested in the event of the proceeding.

(h) The officer shall securely seal the deposition in an envelope endorsed with the title of the proceeding and shall promptly send the original and one copy thereof, together with the original and one copy of all exhibits, by registered mail to the commission. The deposition must reach the commission not later than five days before the date of the hearing at which it is to be offered as evidence.

(i) Upon payment of reasonable charges therefor, the officer before whom the deposition is taken shall furnish a copy of it to any interested party or to the deponent.

(j) The party taking the deposition shall give prompt notice of its filing to all other parties.

(k) At the oral hearing, if one is held, the deposition may be offered in evidence by the party at whose instance it was taken. If not offered by such party, it may be offered in whole or in part by the adverse party. If only part of a deposition is offered in evidence by a party, an adverse party may require him to introduce all of it, which is relevant to the part introduced, and any party may introduce any other parts. Such deposition shall be admissible in evidence subject to such objections as to competency of the witness, or to the competency, relevancy, or materiality of the testimony as were noted at the time of taking of said deposition, or are made at the time it is offered in evidence. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.270. ORDER OF PROCEDURE. (a) The presentation of evidence as hereafter set forth shall be followed except as the hearing officer may otherwise change or modify such order of presentation

(1) upon formal complaints: complainant, defendant, commission's staff in proceedings in which the commission is not the complainant, and rebuttal by complainant;

(2) in investigation and/or suspension proceedings: respondent, commissions's staff, protestants against suspended schedules, interested parties, and rebuttal by respondent;

(3) upon applications and petitions: applicant or petitioner, protestants, interested parties, commission's staff, and rebuttal by applicant or petitioner.

(b) In hearings of several proceedings upon a consolidated record, the hearing officer shall designate the order of procedure.

(c) Interveners shall follow the party in whose behalf the intervention is made. In the event the intervention is not in support of either original party, the hearing officer shall designate when such interveners shall be heard. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.280. APPEARANCES. (a) Parties shall enter appearances at the beginning of the hearing by giving their names and addresses in writing to the reporter or hearing officer who will include the same in the record of the hearing.

(b) The hearing officer conducting the hearing may, in addition, require appearances to be stated orally so that the identity and interest of all parties present will be known to those at the hearing.

(c) An attorney who has appeared for a party in any matter pending for hearing before this commission may be permitted to withdraw as counsel for such party only as follows:

(1) for good cause shown upon motion and notice served on the other party not less than 10 days before the time specified for the hearing;

(2) where the party has other counsel ready to be substituted for the attorney who wishes to withdraw; or

(3) where the party expressly consents to the withdrawal of his attorney, orally to the hearing officer, or in writing.

(d) Any party who shall fail to appear at a scheduled conference or hearing, after being duly notified thereof shall be deemed to have waived the opportunity to participate in such conference or hearing, and shall not be permitted thereafter to reopen any matter determined at such conference or hearing, or to recall for further examination witnesses who were excused, unless the hearing officer shall determine that the failure to be represented was unavoidable or that the interests of the other parties and of the public would be prejudiced by not permitting such reopening or further examination.

(e) Every witness testifying in a proceeding before the commission shall under oath state or affirm that the testimony he gives is the truth and nothing but the truth. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.290. EVIDENCE. (a) Subject to the provision of this section, all relevant evidence is admissible when, in the opinion of the hearing officer

(1) it is the best evidence reasonably obtainable, having due regard to its necessity, availability, and trustworthiness; and

(2) relevant evidence shall be admitted if it is the sort of evidence on which responsible persons are accustomed to rely in the conduct of serious affairs regardless of the existence of a common law of statutory rule which makes improper the admission of evidence over an objection in a civil action.

(b) Oral evidence may be taken only on oath or affirmation. Each party may

(1) call and examine witnesses;

(2) introduce exhibits;

(3) cross-examine opposing witnesses on matters relevant to the issues, even though that matter was not covered in the direct examination;

(4) impeach a witness regardless of which party first called the witness to testify; and

(5) rebut the evidence against himself.

(c) The hearing officer may, in his discretion, either with or without objection, exclude inadmissible evidence or order cumulative evidence discontinued.

(d) If hearsay evidence is objected to, it may not be used by itself to support a finding unless it would be admissible over objection in a civil action. Hearsay evidence may be used, however, even over objection, to supplant or explain direct evidence.

(e) Parties objecting to the introduction of evidence shall state the grounds of such objection at the time such evidence is offered. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.300. OFFICIAL NOTICE. (a) In addition to matters concerning which courts of this state take judicial notice, official notice will be taken of the following matters:

(1) rules, regulations, administrative rulings and report of the commission and other governmental agencies;

(2) orders of the commission exclusive of findings of fact;

(3) contents of permits and licenses issued by the commission; or

(4) documents and records in the files of the commission which are required by law or by the rules of the commission so filed.

(b) In addition, the commission and hearing officer may at their discretion take official notice of the results of his own inspection of the physical conditions involved and may take official notice of the results of their previous experience in similar situations and the general information concerning the subject which goes to make up their fund of expert knowledge, including findings of fact in prior orders.

(c) Where official notice is taken of any matter, the findings of fact shall so specify.

(d) Whenever practicable, the hearing officer and commission shall notify the parties to the proceeding that official notice will be taken of any pertinent facts. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.310. RESOLUTIONS. (a) Resolutions, properly authenticated, of the governing bodies of cities, boroughs, or other governmental agencies, will be received in evidence if offered at the hearing by the head of the agency or governing body or by the secretary or other officer charged with the official custody of such records.

(b) Such resolutions shall be received subject to rebuttal by adversely affected parties as to either the authenticity of the resolution or the circumstances surrounding its procurement.

(c) Recitals of fact contained in resolutions shall not be deemed proof of these facts, and such resolutions shall only be recieved for the limited purpose of showing the expression of the official action of the resolving body with respect to the matter under consideration of the proceeding. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.320. EXHIBITS. (a) Exhibits prepared for the hearing shall be upon paper 8½ x 11 to 14 inches in size or folded in multiples thereof. The impression shall be one side of the paper only and shall be double spaced, except that footnotes or quotations shall be single spaced and indented.

(b) When exhibits apart from exhibits attached to an application are offered in evidence, copies must be furnished to all parties of record and two copies to the hearing officer, except when otherwise directed.

(c) When relevant and material matter offered in evidence by any party is embraced in a book, paper, or document containing other matters not material or relevant, the party offering the same must plainly designate the matter so offered. If other matter is in such volume as would necessarily encumber the record, such book, paper, or document will not be received in evidence but may be marked for identification, and, if properly authenticated, the relevant or material matter may be read into the record or, if the hearing officer so directs, a true copy of such matter in proper form shall be received as an exhibit and like copies delivered by the party offering the same to all other parties or their attorneys appearing at the hearing, who shall be afforded an opportunity to examine the book, paper, or document, and to offer in evidence in like manner other portions thereof found to be material and relevant.

(d) An official rule, report, order, record, or other document, prepared and issued by any governmental authority, when admissible for any purpose, may be evidenced by an official publication thereof; by a publication of a recognized reporting service deemed by the hearing officer to constitute a sufficient guaranty of trustworthiness; or by a copy attested by the officer having the legal custody thereof, or his deputy, if accompanied by a certificate that such officer has such custody, and authenticated by the seal of his office. When such official records, otherwise admissible, are contained in official publications or publication by recognized reporting services and are in general circulation and readily accessible to all parties, they may be introduced by reference, provided, however, that proper and definite reference to the record in question is made by the party offering the same.

(e) Papers and documents on file with the commission, if otherwise admissible, may be introduced by reference to number, date, or by any other method of identification satisfactory to the hearing officer. If only a portion of such paper or document is offered in evidence, the part so offered shall be clearly designated.

(f) The direct testimony of a witness may be presented in writing. Unless otherwise directed by the hearing officer, such testimony, when properly authenticated by the wirness under oath or affirmation, may be transcribed into the record or marked as an exhibit. Such written testimony shall contain a statement of the qualifications of the witness, and shall be accompanied by any exhibits to which it relates. Such written testimony shall be subject to the same rule of admissibility and cross-examination of the sponsoring witness as if it were presented orally in the usual manner. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.330. PREPARED TESTIMONY AND EXHIBITS IN RATE HEARINGS. (a) The commission may require any carrier subject to its jurisdiction, filing a tariff for a rate increase, to file all proposed testimony and/or exhibits with the commission before setting a date for hearing or rendering a decision. Such written testimony shall contain a statement of the qualifications of the witness, and shall be accompanied by any exhibits to which it relates. Such written testimony shall be subject to the same rules of admissibility and cross-examination of the sponsoring witness as if it were presented orally in the usual manner.

(b) Every person or party required or who desires to submit proposed testimony and/or exhibits shall file with the commission a minimum of four copies. Where additional parties have become known before the time required to file proposed testimony and/or exhibits, then additional copies may be required to be filed with the commission for every known party. In addition, a sufficient number of copies shall be made available for distribution to all parties of record at the time of hearing if parties have not already been furnished with copies.

(c) Duplication of testimony and/or exhibits shall comply with the requirements under sec. 320(2) of this chapter. Duplicate original copies shall be submitted in easily readable form. Where duplicate original copies do not meet the requirements of legibility, the commission may require the party to submit easily readable copies.

(d) A waiver of this section, as to the testimony or exhibits or a portion of the same of a particular witness, may be obtained ex parte from the commission prior to the hearing upon a showing of good cause.

(e) Whenever, in the circumstances of a particular case, it is deemed necessary or desirable, the commission or the hearing officer may direct that oral testimony and/or exhibits be reduced to exhibit form and be offered in the manner hereinbefore described. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.340. RECORDS IN OTHER PROCEEDINGS. In case any portion of any other proceeding is admissible for any purpose and is offered in evidence, a true copy of such portion shall be presented for the record in the form of an exhibit, unless

(1) the party offering the same agrees to supply such copies later at his own expense, if required by the commission or the hearing officer; or

(2) the portion is specified with particularity in such manner as to be readily identified; and

(3) the parties represented at the hearing stipulate upon the record that such portion may be incorporated by reference and that any portion offered by any other party may be incorporated by like reference. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.350. FORM OF DECISION. (a) A decision issued by a hearing officer or the commission shall be written and shall contain required findings of fact and/or conclusions of law.

(b) A decision in a primarily judicial proceeding has retroactive effect in the same manner as the decision of the state court. (Eff. 12/28/68, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.360. BRIEFS. (a) Briefs shall be bound on the top and shall be typewritten or reproduced by any process provided all copies are clear and permanently legible and shall be on paper 8½ x 11 to 14 inches in size.

(b) Briefs may be filed in any proceeding by any party within 20 days after mailing of the proposed decision by the hearing officer. Any party desiring to respond to a brief will do so within 10 days after mailing of brief. Briefs shall be filed by any party to a proceeding upon the request of the commission or hearing officer and within such time as shall be directed. The commission or hearing officer may require parties to file either separately or as a part of such brief proposed findings of fact and conclusions of law.

(c) The original and two copies of each brief shall be filed with the commission and copies

thereof shall be served on all parties in the case, or their counsel, and proof of such service furnished to the commission. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.370. ORAL ARGUMENTS. (a) In case matters require an immediate decision, the parties or their counsel may be required to present their arguments and authority orally at the close of the hearing instead of by written brief.

(b) Any party in any case may request oral argument before the commission.

(c) If oral argument is granted to a party or parties, the commission shall order the time, date, and place of oral argument and shall give the parties at least 10 days' notice except where good cause is shown for shorter time of notice. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3AAC 60.380. EFFECTIVE DATE. (a) A commission decision or order shall become effective on the date specified in the decision or order unless the commission allows or initiates a motion for reconsideration as specified in sec. 390(f) of this chapter.

(b) Effective dates specified in any commission order shall not be less than 30 days from the date of service except as noted in sec. 390(g) of this chapter.

(c) Should the commission allow or initiate a reconsideration, as specified in sec. 390(f) of this chapter, replies will be permitted until 30 days after the effective date of the original order. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.390. RECONSIDERATION. (a) A motion seeking any change in a decision, order, or requirement of the commission shall specify whether said motion is for rehearing, further hearing, reconsideration, or modification of the effective date.

(b) A rehearing may be initiated by the commission on its own motion or on a motion of any party if there is substantial evidence showing that the original hearing was conducted in violation of Alaska statutes or commission regulations in effect at the time of the original hearing.

(c) Further hearing may be initiated by the commission on its own motion or on the motion of any party to introduce evidence. The evidence to be adduced must be stated briefly and explanation must be given why such evidence was not previously adduced.

(d) Reconsideration may be initiated by the commission on its own motion or on the motion of any party on any matter claimed to have been illegally or erroneously decided. Such motion must specifically set forth alleged violations in the case of an illegal decision or proceeding, or specifically set forth an alleged error on the part of the commission which is not within the discretionary power of the commission.

(e) Effective dates may be changed by the commission on the motion of the commission or on the motion of any party if there is substantial evidence showing that the effective date is not in the public interest, works an unreasonable hardship on the applicant or protestant, or is based on an emergency circumstance not in evidence of record.

(f) Motions for rehearing, further hearing, reconsideration, or modification of the effective date of a commission decision, order, or requirement shall be filed at least 10 days prior to the effective date of the order. Commission initiation of, or action on, the motion will be made prior to the effective date of the order.

(g) Commission orders directing compliance with statutes or commission regulations are effective upon publication and are not subject to reconsideration until such time as compliance with the law or regulation has been made and the commission petitioned for reinstatement.

(h) All commission costs incurred as result of reconsideration will be borne by the party or parties moving for reconsideration unless otherwise determined by the commission. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.400. PETITION FOR REDUCTION OF PENALTY. The commission may, on petition filed by a carrier, reduce any penalty except that no petition requesting the vacation of an order or revocation will be considered by the commission. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

ARTICLE 4. SPECIAL PROCEDURES OF COMMISSION

Section
410. Tariff suspension
420. Investigation
430. Temporary authority
440 Transfers
450. Declaratory ruling
460. Investigations and audits
470. Commission meetings
480. Confidential files
490. Informal complaints
500. Petitions for rule making
510. Attachments and executions
520. Filing of complaint when tariff is not on file with the commission
530. Failure to file insurance
540. Other procedure
550. Application of rules to pending proceedings

3 AAC 60.410. TARIFF SUSPENSION. (a) In any case where the commission suspends a tariff, it can do so only for a period of not more than 180 days from the proposed effective date of the tariff that is suspended, except for the statutory period specified for bus tariff suspension.

(b) The commission can suspend tariffs on its own motion at any time prior to the proposed effective date or on the request of a protestant filed 15 days or more before the proposed effective date of the tariff.

(c) In all cases where the commission suspends tariffs it shall state in its order of suspension the reason for the suspension of the tariffs. Tariff suspension orders shall be published prior to the effective date of the proposed tariff change. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.420. INVESTIGATION. The commission may at the request of a party, or on its own motion, order an investigation and hold a hearing on an investigation, to determine whether the laws, rules, regulations, tariffs, classifications of a carrier are being complied with and may order that the carrier or group of carriers be deemed a respondent, and may order such responding carriers to furnish such evidence as the commission deems necessary in order to make any appropriate findings of fact or conclusions of law. The commission may not amend or alter any certificate of permit after an investigation, except after a responding carrier, subject to its regulations, has had notice and an opportunity to be heard. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.430. TEMPORARY AUTHORITY. (a) The commission shall notice all application for temporary authority in the manner provided in sec. 180 of this chapter, except that only one day's publication shall be required.

(b) Protests to the application shall be as provided in sec. 190 of this chapter, except that protests shall be postmarked not later than 10 days from the last day of publication.

(c) All applications for temporary authority must state the statute under which temporary authority is requested and shall be accompanied by affidavits, exhibits, or other evidence necessary for the commission to make a finding that temporary authority should be granted.

(d) The commission may require any other evidence which it deems necessary to make findings as to whether temporary authority should be granted and shall require notice to carriers or shippers and may require, by order a hearing if it deems one necessary. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.440. TRANSFERS. The commission shall notice all applications for a transfer in the same manner as provided in sec. 180 of this chapter. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.450. DECLARATORY RULING. (a) Any interested person may petition the commission for a declaratory ruling. The

commission shall consider the petition and within a reasonable time the commission shall

(1) issue a non-binding declaratory ruling; or

(2) notify the person that no declaratory ruling is to be issued; or

(3) set a reasonable time and place for a hearing on the matter and give reasonable notification to the person of the time and place for such hearing and of the issues involved.

(b) If a hearing is held, as provided in (a)(3) of this section, the commission shall within a reasonable time

(1) issue a binding declaratory rule; or

(2) issue a non-binding declaratory ruling; or

(3) notify the person that no declaratory ruling is to be issued.

(c) All declaratory rulings shall be kept on file with the commission in numerical order and made available to all interested parties. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.460. INVESTIGATIONS AND AUDITS. The commission may direct any commissioner or member of the staff of the commission or authorized agent to make investigation, audits, examine records, and all commission staff members shall have proper identification indicating that they are authorized agents of the commission. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.470. COMMISSION MEETINGS. The commission shall meet on Monday of every week at 2:00 p.m. at the commission office unless otherwise noticed. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.480. CONFIDENTIAL FILES. All files of the commission are public records except files of the commission relating to complaints, investigations, and personnel files of the commission. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.490. INFORMAL COMPLAINTS. (a) Matters presented by informal complaint may be taken up by the commission with the parties affected, through correspondence or otherwise, in an endeavor to bring about an adjustment of the subject matter of the complaint without formal hearing or order.

(b) Oral informal complaints will be considered only if written complaint follows.

(c) Informal procedure is recommended whenever practicable, but is designed only for the amicable adjustment of disputes and no mandatory or prohibitory order shall be issued in an informal proceeding. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.500. PETITIONS FOR RULE MAKING. Petitions for rule making shall be in the form required by AS 42.62.220. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.510. ATTACHMENTS AND EXECUTIONS. Upon service of legal attachments by authorized court of law in the State of Alaska, the commission will

(1) not transfer the permit; and

(2) reserve the right to revoke or suspend permit for just cause. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.520. FILING OF COMPLAINT WHEN TARIFF IS NOT ON FILE WITH THE COMMISSION. If proper tariffs are not on file with the commission, the commission will file a complaint. The defendant shall not have to answer, but shall be required to appear at the date set for the hearing of the complaint or file the required tariff. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.530. FAILURE TO FILE INSURANCE. If proper insurance is not on file with the commission, the commission may suspend the permit without hearing provided the commission serves a notice on the carrier whose insurance is being cancelled in a form as follows:

"The Alaska Transportation Commission has received a notice of cancellation of_____

_____

insurance. Unless proper insurance is on file with the commission before the effective date of the cancellation, your permit will be suspended for a period of 60 days, during which period a hearing will be held regarding your failure to file insurance. If no insurance is on file at the end of the 60-day suspension period, your permit may be revoked."

(Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.540. OTHER PROCEDURE. Where under a statute administered by the Alaska Transportation Commission, a procedure other than one prescribed by these regulations is authorized, the commission shall follow the procedure authorized by the statute. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.550. APPLICATION OF REGULATIONS TO PENDING PROCEEDINGS. All pending proceedings before the commission at the time of the adoption of these rules shall be conformed to these regulations of practice on application by interested parties. Parties shall have until March 1, 1967, to petition the commission for relief if they are substantially prejudiced by the adoption of these regulations. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.250

630. Definitions

3 AAC 60.560. APPLICABILITY OF REGULATIONS. (a) The general regulations of practice and procedure are for general application to proceedings and hearings before the commission.

(b) Special regulations involving methods of procedure may be adopted by the hearing officer or the commission when stipulated by all parties. These special regulations so adopted will govern throughout the proceeding. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.570. CONSTRUCTION AND WAIVER OF THE REGULATIONS. (a) These regulations shall be liberally construed to secure just, speedy and inexpensive determination of the issues presented.

(b) In special cases and for good cause shown the commission or hearing officer may allow deviations from or waiver of a particular regulation. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.580. ADDRESS FOR FILINGS. All pleadings or other written communications or documents shall be filed by presentation by mail, postage prepaid, to the Alaska Transportation Commission, 1000 MacKay Building, 338 Denali Street, Anchorage, Alaska 99501, or may be delivered in person to the Alaska Transportation Commission, Anchorage, Alaska. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.590. REMITTANCES. Remittances to the commission shall be by check, money order, bank draft or certified check payable to the Alaska Transportation Commission. Remittances in currency or coin are wholly at the risk of the remitter and the commission assumes no responsibility for loss thereof. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.600. FEES. Fees, when required by law, must be tendered with any application and no such application will be considered filed until such fees have been paid. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.610. REJECTION OF FILINGS. (a) Pleadings or other documents, other than tariffs, received by the commission which are not in substantial compliance with these regulations, the commission's orders or applicable statutes,

may be rejected and not accepted for filing at the discretion of the commission.

(b) Pleadings or other documents required ro be filed with the commission within a specified time or by a specified date but which fail to substantially comply with these rules, the commission's orders or applicable statutes, will be deemed conditionally filed, for the purpose of satisfying such filing date, on the date received by the commission.

(c) Conditionally received filings shall not be deemed filed or entered on the commission's docket until approved as being in substantial compliance with these rules, the commission's orders or applicable statutes. Conditionally received filings shall be rejected unless amended or supplemental filings in compliance with the conditions are received within the time granted by the commission.

(d) Rejected filings or conditionally received filings may be returned with an indication of the deficiencies therein and the reasons for rejection or conditional receipt, as the case may be; or, if a pleading or document omits information required by these regulations, the commission's orders or statutes, the commission may require an amendment or supplement containing such information.

(e) The commission may require the filing of additional information at any stage in the proceeding. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.620. COMMISSION STAFF AS A PARTY. The staff of the Alaska Transportation Commission shall be considered a party in every case before the commission except that the staff, when it actively participates in the case, must file a notice of appearance with the hearing officer prior to the hearing. The commission may order the staff to act as a party at any time for good cause shown. (Eff. 12/28/69, Reg. 31)

Authority: AS 42.07.150

3 AAC 60.630. DEFINITIONS. Unless the context indicates otherwise, in this chapter

(1) "applicants" means persons applying for any right, privilege, or other authority, under a statute requiring the filing of an application therefore;

(2) "carrier" means any person subject to the laws, rules and regulations administered by the Alaska Transportation Commission;

(3) "classification of parties" means parties to proceedings shall be styled applicants. complainants, petitioners, defendants, respondents, interveners, protestants, or interested parties according to the nature of the proceeding and the relationship of the parties thereto;

(4) "complainants" means persons who complain to the commission of any act or omission by any other person, and in any proceeding in which the commission on their own initiative files a complaint;

(5) "defendants" means persons against whom any complaint is filed;

(6) "interested parties" means all persons directly affected by an application or petition, and such person may file protests, complaints, petitions, and otherwise be given the right to appear in proceedings before the commission;

(7) "interveners" means persons permitted to intervene as provided in sec. 100 of this chapter;

(8) "person" or "party" when used in these regulations means any individual, copartnership, corporation, association, municipal organization, or other entity, and shall include the plural;

(9) "petitioner" means persons applying for permission to exercise any right or privilege under a statute requiring the filing of a petition or persons requesting a rehearing, reopening of the record, or other relief;

(10) "practitioner" means any person appearing pro persona, or the attorney for any party;

(11) "protestants" means the person who has authority to provide service or has an application for authority to provide service in the same area as the applicant and who objects on the grounds of a private or public interest to the approval of an application made to the

commission concerning the same area except as provided in (6) of this section; and

(12) "respondents" means persons designated in an investigation. (Eff. 12/28/69, Reg. 31)

3 AAC 64.010. LEASING. No vehicle shall be leased or the possession thereof transferred, other than by sale, by any person to any other person under any circumstances except in accordance with the provisions of this article. (Eff. 7/29/64, Reg. 15)

Authority: AS 42.10.010
AS 42.10.070
AS 42.10.080

3 AAC 64.020. WRITTEN LEASE REQUIRED. Where possession or use is transferred, other than by sale, of any motor vehicle, trailer or other transportation equipment, such transfers shall be made only by written lease. Oral agreements for such transfers

are prohibited. (Eff. 7/29/64, Reg. 15)

Authority: AS 42.10.010
AS 42.10.070
AS 42.10.080

3 AAC 64.030. WRITTEN LEASE REQUIREMENTS. The lease or other arrangement for the transfer of possession or use of any motor vehicle, trailer or other transportation equipment shall

(1) be made between the common or contract carrier and the owner of the equipment;

(2) be in writing and signed by the parties thereto, or by their regular employees or agents duly authorized to act for them in the execution of contracts, leases, or other arrangements;

(3) specify the period for which it applies which shall not be less than 10 days when the equipment is to be operated for the common or contract carrier by the owner, or an employee of the owner;

(4) provide during the term of the lease for the exclusive possession, control and use of the motor vehicle, trailer or other transportation equipment to be completely vested in the lessee in such way as to be good against all the world, including the lessor; for the complete assumption of responsibility in respect to the lease by the lessee; and for the operation of the leased equipment to be conducted under the supervision and control of the lessee;

(5) provide that during the period of the lease, contract or other arrangement the driver of the leased vehicle shall be to the lessee as servant to master and the driver shall be paid by the lessee;

(6) specify the compensation to be paid by the lessee for the rental of the leased equipment; and

(7) specify the time and date of the circumstances on which the lease or other arrangement begins and the time or the circumstance on which it ends. (Eff. 7/29/64, Reg. 15)

Authority: AS 42.10.010
AS 42.10.070
AS 42.10.080

3 AAC 64.040. PERIOD OF LEASING. No common or contract carrier shall lease from any person any vehicle for period of less than 30 days except any such carrier may lease only from another contract or common carrier having an Alaska permit a vehicle or vehicles for a period of not more than 14 days within any one 60-day period and any extension of the 14-day period is prohibited. The 60-day period shall commence on the date any such lease shall become effective. (Eff. 7/29/64, Reg. 15)

Authority: AS 42.10.010
AS 42.10.070
AS 42.10.080

3 AAC 64.050. COMMISSION APPROVAL AND AUTHORIZATION. No common or contract carrier shall lease any vehicle, extend any lease of any vehicle, or commence using any vehicle under any lease, from any person without obtaining prior written approval and authorization by the commission of such a lease or extension except no such prior commission approval and authorization is required for any lease less than 14 days as permitted under sec. 40 of this chapter. (Eff. 7/29/64, Reg. 15)

Authority: AS 42.10.010
AS 42.10.070
AS 42.10.080

3 AAC 64.060. LEASES BY COMMON OR CONTRACT CARRIERS. Common or contract carriers may lease vehicles, but may not lease any vehicle to any person other than a common or contract carrier. (Eff. 7/29/64, Reg. 15)

Authority: AS 42.10.010
AS 42.10.070
AS 42.10.080

3 AAC 64.070. COMPENSATION. The amount of compensation to be paid under a lease shall not be based upon a division of revenue, including but not limited to a percentage basis dependent upon gross receipts per trip or period of time. Compensation shall not include any arrangement whereby the lessee shall pay the lessor directly or indirectly for a driver or provide a rebate therefore unless otherwise ordered by the commission upon application therefore. (Eff. 7/29/64, Reg. 15)

FOREWORD

The Public Relations Council of the American Trucking Associations, Inc. is dedicated to providing trucking executives with the skills and information needed to carry out their function as highly professional spokesmen for the motor carrier industry. This booklet, "Issues and Answers" will be helpful in responding to the media, (Primarily TV and radio), legislators and public forums.

The trucking industry must work constantly for favorable publicity and media attention if the industry is to quell the myths about the motor carrier industry that pervade much of today's popular opinion. Spokesmen must be prepared with ready and honest answers to respond effectively to indictments.

The public is concerned about energy shortages, pollution, speeding, tailgating, rates and regulation vs. deregulation. By effectively responding to questions about the trucking industry from government and consumer critics as well as the media, the motor carrier executive can play a major part in bringing the message of his company and the industry to the public. He can present vital information about the trucking industry in a way which will produce better understanding and acceptance of the industry that moves America.

You may want to enlarge upon the response to a specific question . . . but remember that short answers are best for radio and TV and in public forums.

Approximate times are listed with our suggested answers. You may want to time yourself. Remember, answers as much as possible should be non-technical and in language laymen can understand. Your manner, and the image you create, is more important than slide rule responses.

You are always in control of your answers. Project! Convey! Enlighten! Frame your answers for public consumption, not for the questioners.

Joan Vinson
Executive Director
Public Relations Council

How large is the trucking industry?

Trucking receives about three out of every four revenue dollars spent for freight movement. In 1977, motor freight carriers did an estimated 130 billion dollars in business. This figure represents more than seven per cent of the country's gross national product. There are more than 16,000 trucking companies. There are also many privately owned trucks carrying freight for individual companies. The industry is one of the most diversified in the country.

(approximately 30 seconds)

How many people are employed by the trucking industry?

About 9 million for all trucking. This covers freight, service industries and utilities. About 2½ million of these are drivers. The payroll for this total is slightly more than 100 billion dollars annually. For motor freight carriers only the yearly payroll is between 65 and 78 billion dollars, or between 50 and 60 per cent of revenues.

(approximately 25 seconds)

Why are trucks always speeding and ignoring the 55 mph speed limit?

The regulated trucking industry, of which I'm a part, has waged a national campaign for compliance with the nation's speed limits. Over all, federal studies show trucks obey the 55 mile per hour limit more than automobiles. We know the 55 mph saves both lives and fuel.

The industry has road patrols that observe truck speeds and report violations to motor carrier management. We've told the federal government and state enforcement agencies that they have the full support of the industry for enforcement of speed limits.

(approximately 35 seconds)

Why do trucks cause so many accidents?

Accidents caused by trucks are very low compared to the number of accidents involving all types of vehicles. For 1976, the National Safety Council estimated there were 16,800,000 accidents involving drivers of all types of vehicles. The larger types of trucks, such as tractor semi-trailer, and other truck combinations, were involved in only 2.9% of those accidents. Even involvement doesn't mean that these trucks caused the accident. It has been reliably estimated that in 63% of the accidents involving a truck with another vehicle, the other vehicle is at fault. Actually, larger trucks cause less than 2% of all accidents.

(approximately 40 seconds)

What training is given to drivers to promote highway courtesy and safety?

The trucking industry has a variety of driver training and safety programs. There are special truck driver training schools. And driver trainers are utilized by motor carriers to monitor experienced drivers and to provide additional training if a driver has picked up bad habits. Safety meetings are conducted regularly to remind drivers of their safety responsibilities and to pass on new rules and regulations.

(approximately 25 seconds)

Is the trucking industry fighting deregulation to prevent competition?

Regulation of trucking isn't anti-competitive. For the most part, the industry is made up of small companies, many family owned. Only two industries in the United States show a more intense competitive picture than trucking. They are the manufacturers of miscellaneous machinery and the makers of women's clothing.

(approximately 15 seconds)

Don't the big carriers really dominate the business?

Not true. The four largest carriers account for just 10 per cent of the industry's total revenues, and the eight largest for only 14 per cent. Look at three other of America's prominent industries by contrast: In automobile manufacturing four companies account for 91 per cent of the volume. In steel, the four largest companies account for 47 per cent of the volume and in cigarette manufacturing the four largest companies account for 84 per cent. According to the latest Census of Manufacturers, trucking trails 415 other major industries in terms of the market share concentration of the eight largest firms. Most trucking companies are small businesses, grossing only about half a million a year.

(approximately 40 seconds)

A specific example for competition:

Between the city of Philadelphia and, say, Akron, Ohio, a shipper has 30 single line choices for moving freight. Even most small towns have two to a dozen or more.

(approximately 10 seconds)

Don't some segments of the industry favor deregulation?

The impetus for deregulation comes from a few large shippers and a handful of academicians. I should also throw in a few justice department anti-trust attorneys. The real experts in this field—economists, bankers and transportation executives—disagree. Some independent truckers who carry exempt farm commodities to market believe they should be allowed to carry back other freight. But, this would only shift freight from one truck to another. It wouldn't reduce the number of empty trucks.

(approximately 25 seconds)

What portion of the revenues of the trucking industry comes from the top five percent of the companies?

First of all, there are more than 16,600 regulated trucking companies. To take five percent of this number would be meaningless—as it would amount to more than 800 individual firms. It would be more appropriate to talk in terms of the top 50 motor carriers. Overall, the regulated trucking industry received about $30 billion in total (gross freight) revenues in 1977. Of this, the largest 50 companies accounted for $10.9 billion—or thirty-six percent of the total. Trucking is less concentrated in terms of any measurement than virtually any industry in the United States.

(approximately 35 seconds)

There's more and more congestion on the roads. Isn't this due to trucks?

No. The vast majority of vehicles are still autos, pick-up trucks and vans. Federal government statistics show that the number of tractor-trailer combinations, the big highway "rigs," was about 1.2 to 1.3 million in 1977. That's out of 144 million registered vehicles. A proportion of the remaining vehicles, called "straight trucks," are freight oriented, but this proportion is not easily determined. The total number of straight trucks was about 700,000 in 1977. Many of these are used for the pick-up and delivery of freight in urban areas.

(approximately 35 seconds)

Radio and Television Tips

- Be on time. A live show will go on with or without you. If you're late for a taped program, you'll tie up technicians, the host, and studio time. This means money to the station. Either way you will never be invited back.
- Be flexible. Broadcasters work in a constant state of tension. The more understanding of delays and interruptions, the better the chance you'll be invited back.
- Prepare ahead of time. You should know what you want to say and be forearmed for possible trouble areas. Broadcasters will be willing to give you a few minutes of free promotion for a few minutes of interesting conversation.
- Don't rely on the interviewer's questions to cover the points you want to make. You needn't answer only the question asked. Practice turning questions to subjects you want to discuss.
- Have four or five interesting stories prepared ahead of time. If the interview becomes too technical, tell a story.
- Ignore studio technicians. Concentrate on the host and other panelists. Remember you are playing to the audience, not the people in the studio.
- Don't worry about lighting, sound levels, and camera angles. That is the technicians' job.
- Never answer questions "yes" or "no". Questions that can be answered "yes" or "no" are leading questions seeking agreement with someone else's opinion. Make your own statements.
- Let opponents speak for themselves. Don't voluntarily agree with them.
- Most often, style is more important than substance. The impression left with the audience is more lasting than any one thing said.
- Broadcasting is an intimate medium. Speak as if someone is sitting next to you.
- Don't worry about dead air time. Dead air time is the broadcaster's problem, not yours. It is not your duty to fill it.

Television Tips Only

- Don't swivel in your chair. You'll look like a child on his first amusement park ride.
- Make soft, smooth gestures. Avoid quick, jerky motions.
- If you cross your legs, cross them at the knee. If you rest your foot on your leg, your knee will keep bobbing in and out of a close-up. This also sets up a barrier between you and the audience in a long shot.
- Look at the speaker. If the camera catches you when someone else is speaking, and you're looking around the studio or at the floor, the audience will think you're bored.
- Call hosts by their first names. Television is intimate. Since hosts are seen everyday, viewers look upon them as friends.
- Television is a visual medium. If visuals—props, slides, film, models—help tell your story, bring them to the studio. They will help the interview move along.
- Do not wear hats, shiney jewelry, or plaids. Hats shadow the face, shiney jewelry reflects into the camera lens, and plaids make the television screen dance.
- Don't worry about make-up. If it is needed, a technician familiar with the studio's lights will apply it. If it's suggested don't refuse. It's for your own good.
- If you're asked to sign a release, read it carefully and make sure you get a copy. The release will basically say that you agree to be filmed.
- Try to watch a program in advance of your appearance. This will give you a feel for the show and the type of material used. It will also help you choose clothing that complements the set.

Most people feel trucks tear up the highways. Why should motorists pay for trucks using the roads?

They don't. Trucks pay 38 per cent of all state and federal highway user taxes, but they account for only 18 per cent of the traffic. In 1976, for example, motor carriers paid 8 billion dollars out of the 21 billions collected in state and federal highway user taxes. Every recent study of the user taxes has found that trucks pay more than their fair share of the costs for construction and maintenance of the nation's highway system.

(approximately 30 seconds)

How about those big tractor-trailers?

Even when the question is narrowed to combination trucks, the largest intercity vehicles, the evidence indicates they are paying more than their fair share. All combination vehicles registered in the United States paid 18.9 per cent of all federal highway user taxes in 1975, the latest available year. This compares favorably to a finding in the most recent federal highway cost allocation study that combination vehicles were responsible for 18.6 per cent of highway costs.

(approximately 25 seconds)

What is the trucking industry doing to become more fuel efficient—not only now, but ten and twenty years in the future?

Trucking has, and is, devoting much of its technological know-how toward conserving energy. New engine and transmission designs, air deflectors on some types of equipment, radial tires, demand-actuated cooling fans have all enabled the motor carrier industry to operate much more efficiently in terms of fuel used than it did just a few short years ago. Better highways, better scheduling and further improvements in maintenance procedures have also helped. On down the road, we are looking toward much greater use of diesel engines in total and especially in the smaller city-type trucks, and still more refinements in the design of the large highway "rigs" to conserve even more fuel in the future.

(approximately 40 seconds)

Example of savings:

Secretary of Transportation Brock Adams said at a press conference held August 9, 1978 that the national truck fuel economy program has saved the nation more than 1.7 billion gallons of fuel since 1973.

(approximately 10 seconds)

I keep reading that railroads are more fuel efficient than trucks.

Railroads are not more energy efficient than trucks. While rails may be more efficient in hauling certain commodities, like coal, long distances, trucks are more efficient at hauling other types of freight, such as light and bulky general merchandise. Furthermore, railroads do not serve 60% of America's communities. These communities would cease to exist, as we know them, if trucks were precluded from hauling their freight.

(approximately 25 seconds)

The following specific test result can also be used:

A 1975 study conducted for the U.S. department of Transportation by Reebie Associates of Greenwich, Conn., found that twin trailers used less fuel than other modes of transportation in a test run between Portland, Ore. and Los Angeles, Calif. comparing fuel consumed in loading, transfer, pickup and delivery as well as that used in traversing the 950-mile route.

Fully expecting to find the railroads to be more efficient than trucks, and an improved intermodal system using both trucks and trains to be better than either, the Reebie researchers were surprised at the results of their study.

(approximately 38 seconds)

Why are empty backhauls allowed? They're inefficient.

Well, a good idea, which won't work, is to "eliminate empty backhauls." Quite correctly, trucks sometimes go back empty. But that problem can only be solved by more freight. A federal government study found that the chief reasons for empty trucks are the regional traffic imbalances inherent in our society and the use of specialized equipment such as auto carriers and tank trucks. Only about three per cent of the empty miles appeared to be avoidable in the study.

(approximately 25 seconds)

A specific example on backhauls:

You can't haul heating oil in a tank truck from Oklahoma City to Milwaukee and then haul milk back to Oklahoma City in the same tanker.

(approximately 10 seconds)

Isn't the ICC in the trucking industry's pocket?

The answer is "no". Emphatically "no." We find ourselves many times in ICC rulemaking proceedings opposing a particular rule or regulation. The industry has taken the ICC to court and argued that the commission has gone beyond the bounds of its statutory authority, or acted in an arbitrary manner.

While we don't always like how the commission regulates, we do recognize the need for an umpire between the carrier and the shipper with the overall public interest in mind. The ICC is there to determine what will "promote safe, adequate, economical, and efficient service and foster sound economic conditions in transportation" as required by the National Transportation Policy set forth by Congress in 1940.

(approximately 40 seconds)

Collective ratemaking is a rip-off of the consumer, isn't it?

Quite the contrary. The system protects the consumer from damaging forms of economic discrimination. Collective ratemaking reduces the chaotic to the manageable. There's a gross misunderstanding among those promoting deregulation that rate bureaus allow motor carriers to arbitrarily set rates in a secret and collusive manner. Actually there is nothing secretive or collusive about rate bureaus.

(approximately 22 seconds)

But, rate bureaus drive up costs.

Truck rates haven't risen as fast as other prices in the present inflation. Let's compare the relative price for motor carrier service with changes in the consumer price index. From a base of 100 in 1967, the revenue per ton mile for regulated for hire motor carriers rose to 166.2 in 1977. During the same period, the consumer price index rose from 100 to 181.5, or 15 points higher than the price of motor carrier service.

(approximately 30 seconds)

Examples of typical transportation costs:

A hammer retails in a Chicago hardware store for $8.23. Total cost for transportation by motor carrier from manufacturer in Farmington, Connecticut, to Chicago—6 cents.

A washing machine retails in Butte, Montana, for $311.78. Cost for shipment by motor carrier from Columbus, Ohio, for this heavy, expensive appliance—$18.37.

A stove retails in Los Angeles for $398.88. Cost of transportation by motor carrier from Mansfield, Ohio: $17.32.

A portable electric typewriter retails in a Chicago store for $249.47. It was manufactured in New York. Cost for motor carrier transportation from New York to Chicago--$1.74, or 7/10 of 1 percent of the total price.

A man's suit retails in Indianapolis for $94.01. Cost of transportation by motor carrier from Atlanta, Georgia—28 cents, or 20/100 of 1 percent.

(Note: These are truckload rates. Transportation charges are slightly higher for less than truckload shipments, based on a graduating scale dependent on weight of shipment.)

Why do trucking companies pay millions of dollars for operating certificates?

To get additional service points so they can expand their operations. Let me point out immediately, however, that the value of the certificates doesn't enter into the rate base for rate making purposes. Lately, the cost of authorities has taken a downhill trend because the ICC is approving approximately 95 per cent of new authorities sought. The decision to control entry is an involved issue, but basically it is to prevent excessive services resulting in an unhealthy and unstable transport industry clearly not in the public interest. The point is: If the public isn't underwriting sales of operating certificates and the certificates allow carriers to obtain easier financing for capital improvements, then the sales are a benefit to our transportation system.

(approximately 45 seconds)

Why are the trucking industry minority hiring practices so poor?

They're not. The trucking industry's minority hiring practices are good and have been for many years. The trucking industry is committed to a policy of affirmative action and equal employment. In 1967, the percentage of minorities employed in the trucking industry was 6.6 per cent. Only five years later the percentage was up to 11.3. It's now at 12 per cent. Since 1969, minority hiring in the trucking industry has outpaced minority employment in the American work force as a whole.

(approximately 30 seconds)

Isn't the household goods moving industry ripping off customers by weight bumping?

Absolutely not. There have been only two indictments in as many years for weight bumping. Only one of those cases has been successfully prosecuted and it is on appeal. The other never came to trial. What is important for the customer to know is that the moving industry does not knowingly tolerate within its ranks any person who cheats a customer.

The moving industry does everything in its power to encourage the ICC and the U.S. Attorney General to bring charges in a court of law and to prosecute anyone it finds who may be involved in any alleged wrongdoing.

The moving industry handles about 1.65 million interstate moves each year. There are some 2500 companies and some 50 to 60 thousand independent contractors (owner-operators) engaged in this high volume, intensive work.

(approximately 45 seconds)

Why do trucking companies always concede to Teamster economic demands?

The question implies that hard bargaining does not take place. This assumption simply is not true.

In the major trucking labor negotiations, hard bargaining always takes place. So does much compromise. In consideration for economic gains the companies seek to negotiate agreements which recognize industry requirements to improve productivity and efficiency. Uninterrupted service to the public at reasonable rates is really the only thing the motor carrier has to sell. In an excessive settlement there are no winners, and this is true for employers and employees alike.

(Approximately 30 seconds)

How much effect does organized crime have on trucking companies and the Teamsters?

Hopefully, not much. Management and union representatives, like all other people, may be honest, dishonest, likable, or unlikable people. The vast majority cannot be tarred with the same brush which has touched some officials with known criminal records or involvements.

Having a public service obligation, the trucking industry works hard to keep theft and pilferage out of its business. Its freight security programs are sophisticated, on-going, and have achieved a measure of success.

(approximatley 35 seconds)

This paper is the result of a study
commissioned by the following
motor-carrier associations:

Central and Southern Motor Freight Tariff Association, Inc.
Central States Motor Freight Bureau, Inc.
Eastern Central Motor Carrier Association

Introduction

The system by which motor freight rates are collectively established is a matter of no small importance to the public. Motor carriers, of course, have a vital stake in the way rates are determined for the transport services they supply. Equally, the shippers of goods transported have an important stake in the way rates are assessed for moving these goods. Over and above the interests of carriers and shippers is the interest of the general public. Motor-carrier freight rates enter into the prices of almost everything consumers buy, and rate levels and relationships can and do affect the economic well-being of industries and communities and the employment opportunities they provide. The public is entitled to assure itself that its interests are protected under the system by which those rates are established. The aim of this paper is to examine the rationale for the system of collective ratemaking in trucking in terms of its significance for the public interest.

• • • •

Under collective ratemaking, rates are established by joint consideration of the motor carriers serving a particular territory. Collective pricing action by competitors would, under ordinary circumstances, violate the antitrust laws. But when carried on in conformity with conditions specified in the Interstate Commerce Act, collective ratemaking in trucking, as in other surface transport modes, is "relieved from the operation of the antitrust

laws".[1]

A great deal of the controversy concerning collective ratemaking turns on the question of whether the reduction of rate competition among carriers, made possible by the antitrust exemption, is good or bad for the public. The basic misconception that must be overcome if clear thinking is to be applied to this question is the notion that the economic benefits ordinarily associated with competition are the only benefits that are important to the economic welfare of the public. Government policy in many cases recognizes that some restraints upon competition are necessary and desirable in the interest of achieving other economic benefits that are judged to be even more important to the public than those attributed to competition. In such cases, the application of the antitrust laws is waived. As Professor J. M. Clark has observed in his *Competition as a Dynamic Process:*

> Antitrust action, being directed against restraints of competition, may tend to develop an unspoken presumption that competition can be defective only in the direction of being too weak, never too severe ... [A]ttitudes expressed in other areas of governmental policy have in various ways sanctioned restraints on competition, on the assumption that it can be unduly severe, from the standpoint of the public interest.[2]

The principal economic benefits which are achieved by collective ratemaking in trucking relate to the avoidance of damaging forms of economic discrimination which, because of the structure and character of motor freight transport, would be inevitable under unrestrained competition. In the absence of collective ratemaking, it would be impossible to prevent rate differences which are not justified by any difference in cost or any other relevant economic consideration. It would be impossible to assure that all shippers, large and small, are treated in a nondiscriminatory way by carriers as a group, or to assure nondiscriminatory treatment among competitively-related commodities. Not only shippers, but communities and employees as well, would suffer unjustifiable economic hardship, economic resources would be misallocated, and economic efficiency would be impaired. With collective ratemaking, there exist the opportunity and the machinery for averting these consequences.

The collective ratemaking process provides the means for shippers to call the attention of motor carriers to inequities requiring remedy, and for motor carriers to act as a group in dealing with such inequities. Shippers are not guaranteed the relief they may feel is justified and carriers retain the freedom to act individually. But the forum provided for simultaneous exchange of views and information concerning proposed rate changes among all affected shippers and carriers, the important degree of insulation of the carriers from the pressures of large shippers in dealing with such proposals, and the opportunity of the carriers to act together where such action appears justified comprise a mechanism uniquely adapted to achieving as even-handed and nondiscriminatory a rate structure as the nature and organization of motor freight carriage practicably permit.

Collective price action involves by definition a restraint upon rate competition, but such a restraint does not mean that the competitive process itself is thereby undermined. Nor does an antitrust exemption automatically imply any undermining of antitrust policy. The principle involved has been neatly expressed by Professor Bastiann Fortman in his *Theory of Competition Policy:*

> It is not the purpose of antitrust policy to foster economic competition without qualification. The aim is not to maintain simply competition but to preserve competition only where it may be expected to produce desirable effects ... The exemptions concerning e.g. labour, transport and agriculture relate to specific structural conditions of demand and supply which

[1] Section 5a of the Interstate Commerce Act, 49 U.S.C. Section 5b.

[2] John M. Clark, *Competition as a Dynamic Process*, Brookings Institution, Washington, 1961, p. 48.

> render unrestricted operation of competition undesirable ... Prohibition of a certain way of competing such as price discrimination is not as such inconsistent with a policy to maintain open competition ... Preserving competition ... does not mean that all possible methods of competing in the economic process must be tolerated nor that all private economic regulation should be prohibited. [3]

As developed later in this paper, collective ratemaking in trucking co-exists with a substantial degree of price and non-price competition and is surrounded by strict provisions for government review and control to insure that the results serve the best economic interests of the public.

The collective ratemaking system in the motor-carrier industry operates through "rate bureaus". Organized according to the geographic areas their member carriers serve, these bureaus provide the administrative machinery by which carriers jointly consider, debate, decide, and publish the rates pertaining to the traffic they haul.

There are ten major territorial rate bureaus.[4] The membership of each bureau consists of carriers providing motor freight service within a particular territory or between territories. A carrier may voluntarily choose to belong or not to belong to any of the rate bureaus publishing rates covering territories applicable to its traffic. The combined motor freight services of the carriers comprising the major rate bureaus extend over the entire United States and between the United States and Canada.

[3] Bastiann de Gaay Fortman, *Theory of Competition Policy*, North-Holland Publishing Co., Amsterdam, 1966, pp. 244-246.

Proposals for rate changes are normally initiated by a carrier or a shipper. Consignors and consignees of traffic participate actively with the carriers in discussions related to rate proposals. In most of the bureaus, the initial recommendation on a proposal for a rate change is made by a committee of rate experts employed by the rate bureau. If no party objects to the recommendation, it is published for the carriers. However, if any party does object, or if the bureau machinery does not provide for a committee of employed rate-experts, a committee consisting wholly of carrier personnel considers and acts on the rate proposal and the final decision is made by a majority vote of that group.

Every rate-bureau member, either on its own volition or through election by the general membership, has the opportunity to designate an employee to serve on the bureau's carrier committee. Each such designee may vote on the rate proposals which come before the committee, whether or not his company directly participates in the traffic involved. The action of the committee on a rate proposal is made public, but confidentiality is preserved as to the vote of any individual carrier. Any carrier member of the rate bureau may at any time establish by independent action a rate which differs from that generally applicable.

Collective rate actions resulting from rate-bureau procedures are subject to all of the tests of lawfulness laid down by the Interstate Commerce Act. Any shipper, carrier, or other interested party may protest to the Commission that any such action fails to meet those tests. The Commission is authorized to suspend any such action, and after investigation may declare it unlawful and may prescribe the rates it determines to be proper.

In addition to the ten major rate bureaus (and numerous minor rate bureaus which operate in the same territories), the ratemaking process, as contemplated by the Interstate Commerce Act, utilizes a uniform freight classification for the hundreds of thousands of products moved by motor common carriers. For most of the traffic carried, this is achieved through the mechanism of the

National Motor Freight Traffic Association.[5] This organization operates in a manner generally similar to that of a rate bureau except that its function consists not of establishing rates but of categorizing all commodities carried by motor carriers into generally fifteen classes—differentiated broadly by shipping, handling, and value characteristics—so that commodity groups possessing similar characteristics may be similarly classified and bear similar rates. The system provides a continuous opportunity to reclassify existing products as their characteristics change and to classify new products as they are introduced into the market.

The basic practice is that the member carriers within each rate bureau establish class rates which are applied uniformly throughout its territory and which are so scaled that for all of the commodities grouped in a given class the rate for all shipments of the same size over the same distance will be the same. Differences in other transportation characteristics, such as shipment size or length of haul, will be reflected in correspondingly different rates which also will be generally uniform throughout the bureau's territory. The preponderance of motor-common-carrier traffic moves under these class rates. In special circumstances justifying a rate different from (and ordinarily lower than) that applicable to a general class, an exception to the class rate may be approved or a commodity rate, governing the traffic of a specific commodity between named points of origin and destination, may be established.

General rate increases are applied essentially across the board to all traffic. The special problems of equity as among shippers are typically resolved by lowering one or more rates. In terms of the numbers of rate-bureau actions, the vast majority of rate changes, whether the proponent is a carrier, a consignor or a consignee, involve rate reductions.

Given the enormous range of commodities to be carried, the almost limitless combinations of points to be served, the complexities of alternative routings, and the multiplicity of legal, economic, and transportation factors to be accommodated, it would be futile to expect the motor-carrier collective-ratemaking system to be ideal in all respects. The real question, however, is not whether the present system is ideal but whether, in practical terms, it serves the public interest by effectively meeting the transportation requirements of the nation. In order to answer that question, it is important to have some familiarity with the historical background of collective ratemaking in trucking and with the basic public-interest considerations underlying current practice.

[5] A separate classification, the Coordinated Freight Classification, is maintained by The New England Motor Rate Bureau, Inc. for traffic moving wholly within the New England territory.

II.

Historical Background

The issue of collective ratemaking in transportation has been a subject of recurring public discussion for more than a hundred years. Collective ratemaking in trucking grew out of the ratemaking system first developed in the late nineteenth century to meet practical problems of the railroad industry.

Sixty years before the 1935 enactment which brought motor carriers under Interstate Commerce Commission regulation, the railroads organized the first broad-based freight-rate bureau, covering the territory south of the Potomac and Ohio Rivers and east of the Mississippi. By the time of the passage in 1887 of the Act to Regulate Commerce, as the initial version of the present-day Interstate Commerce Act was known, some eleven such bureaus, covering virtually all the competitive railroad traffic of the country, were in operation.

A major reason for enacting the 1887 statute had been to achieve a reasonably uniform, stable, nondiscriminatory set of railroad rates in place of the flagrant practices of railroads in according preferential treatment to some shippers, localities, and types of traffic, to the serious detriment of the public. "Wild rate cutting, rate instability, personal favoritisms, sectional discriminations, and gross prejudices between localities, had brought many carriers and shippers and great industries to the point of ruin, and had created or fostered industrial monopolies." [1]

[1] *Regulation of Rate Bureaus, Conferences and Associations*, Hearings on H.R. 2536, United States Senate, Committee on Interstate Commerce, 79th Congress, 2nd Session, (1945). Testimony of ICC Commissioner Clyde B. Aitchison, p. 1133.

The remedy which the Act undertook to provide was to outlaw rates which were unjust or unreasonable or gave any shipper, locality, or particular type of traffic an undue preference or advantage to the prejudice of another. From the beginning the Commission supported the view that, because of inevitable and aggressive rivalries among competing carriers, shippers, and localities, the statutory objective of uniform, stable, and nondiscriminatory rates could not, as a practical matter, be achieved without cooperation among the carriers in the ratemaking process.

The earliest railroad rate bureaus had not only attempted to set rates in common but generally entered into pooling arrangements, involving the sharing of traffic, revenues, or earnings. The 1887 Act specifically prohibited pooling arrangements,[2] but was silent on the question of collective ratemaking as such. The ambiguity resulting from this silence was to create legal problems when Congress in 1890 passed the Sherman Antitrust Act, which prohibited every combination, contract or agreement in restraint of trade. It was not clear whether the Sherman Act was meant to apply to railroads at all, whether collective ratemaking by railroads fell within the scope of prohibited business conduct, or whether the intent of the Act to Regulate Commerce had been to reserve exclusive jurisdiction over railroad ratemaking to the Interstate Commerce Commission.

The Supreme Court in 1897 settled these questions by holding, in a case instituted by the Department of Justice against the Trans Missouri Freight Association, that the Sherman Act applied to the activities of all industries without exception, and that the agreement establishing the rate bureau was a restraint of trade in violation of the antitrust law.[3] An identical decision was handed down a year later in a case involving a similar rate bureau

[2] The Interstate Commerce Act was subsequently amended to permit pooling arrangements when explicitly approved by the Commission, but no rate bureau in operation today embodies any pooling or market-sharing arrangement.

[3] United States v. Trans-Missouri Freight Association, 166 U.S. 290 (1897).

agreement.[4]

Some modifications were made in rate-bureau agreements as a result of the Court decisions. The practical need for collective ratemaking, however, remained manifest. Aided by a helpful opinion from the Attorney General, collective ratemaking by railroads was permitted to continue. It was clear, and strongly emphasized by the Interstate Commerce Commission, that in the absence of joint action by the carriers in the establishment of rates many of the evils which had given rise to the interstate commerce law in the first place would reappear.

In its Annual Reports to Congress, the Commission described the practical situation:

> It is alleged ... that the interests of different lines of transportation, different localities, and different commodities cannot be properly adjusted, so that the rates shall be reasonable and non-discriminatory within the terms of the act, without the power to confer, discuss, and determine by mutual agreement what the rate shall be.
>
> There is great force in this claim ... It is extremely difficult to see how carriers can intelligently adjust their rates so as to fulfill the general requirements of the act without the right to organize in some form for the purpose of obtaining necessary information and applying that information as occasion requires. To one familiar with actual conditions it seems practically out of the question to establish rates that are relatively just without conference and agreement ... [5]
>
> * * * *
>
> ... [T]he decision of the United States Supreme Court in the Trans-Missouri Case and the Joint Traffic Association Case has produced no practical effect upon the railway operations of the country. Such associations, in fact, exist now as they did before those decisions, and with the same general effect ... [I]t is difficult to see how interstate railways could be operated, with due regard to the interest of the shipper and the railway, without concerted action of the kind afforded through these associations. [6]

One of the reasons that had been cited by the government in urging the Supreme Court to find rate-bureau agreements unlawful was that as a result of judicial interpretation of the 1887 Act the Commission was without truly effective powers to regulate rates.[7] In the Commission's own words: "The principles of this law ... are conceded to be sound and beneficent, but at present they amount to little more than the declaration of a sentiment ... The machinery for enforcing its substantive provisions is fatally defective." [8]

These defects were cured in substantial measure by the Hepburn Amendment of 1906, which empowered the Commission to prescribe maximum reasonable rates, and the Mann-Elkins Amendment of 1910, giving the Commission the power to suspend rates so as to afford opportunity for investigation and a determination of lawfulness before they could become effective.

Railroad rate bureaus again became the subject of Congressional interest in the early 1920's when, pursuant to a Senate resolution, an ICC investigation into the operations of a major rate bureau resulted in a reaffirmation by the Commission of the practical importance of the system of establishing rates through collective carrier action: "It is manifest that the Transcontinental Freight

[5] Annual Report of the Interstate Commerce Commission, 1898, pp. 15-16.

[6] Annual Report of the Interstate Commerce Commission, 1901, p. 16.

[7] "The common law requires that rates shall be reasonable and fair. So does the Interstate Commerce law. But this is a mere declaration, and there is no adequate remedy to enforce the right. The commission has no power to prescribe a reasonable rate and enforce it, or to declare that a rate is unreasonable and prohibit it." Argument of Solicitor General in United States v. Joint Traffic Association, 171 U.S. 505, 557 (1898).

[8] Annual Report of Interstate Commerce Commission, 1898, p. 22.

Bureau ... is of advantage to shippers as well as carriers. The need for some organization of this character is demonstrated upon the record ... It is abundantly shown that operation of the bureau tends to obviate or remove the discriminations, as between persons and localities, the law condemns." [9]

When motor carriers were brought within the regulatory jurisdiction of the Commission in 1935, the same basic considerations that had prompted shipper and ICC support of the railroad rate bureaus gave rise, again with shipper and ICC support, to joint action in the establishment of motor-carrier rates. The main provisions of the Interstate Commerce Act relating to railroad rate regulation were applied to the regulation of motor-carrier rates. Despite numerous economic differences between the two forms of transportation, it was felt that from the public's standpoint a stable, nondiscriminatory structure of rates that were equitable in relation to each other and based upon a uniform freight classification was as essential in trucking as in railroading. The practical feasibility of achieving such a structure of rates unless carriers were free to "confer, discuss, and determine by mutual agreement what the rates shall be" seemed remote. No specific mention of motor-carrier rate bureaus was made in the 1935 legislation, but their formation and operation along lines broadly similar to the railroad rate bureaus was taken for granted and naturally ensued.

The Interstate Commerce Act had, from its passage, suffered from the lack of a broad but explicit statement by Congress to serve as a guidepost to the Commission and the courts in determining what constituted the "public interest" in the field of transportation. That lack was remedied in 1940, when Congress prefaced the Act by a declaration of National Transportation Policy. As embodied in that declaration, among the most significant Congressional economic policy objectives related to the ratemaking process were these:

[9] In re Transcontinental Freight Bureau (1923), 77 ICC 252, 279.

1. promoting adequate, economical, and efficient service.
2. fostering sound economic conditions in transportation.
3. barring unjust discrimination, undue preferences or advantages, or unfair or destructive competitive practices.
4. achieving a coordinated transportation system to meet national needs.

The National Transportation Policy decreed by Congress to guide the interpretation, administration, and enforcement of all of the provisions of the Interstate Commerce Act became a vital part of the total statutory scheme for achieving a sound national transportation system and today plays a crucial role in the basic public policy concept that governs collective ratemaking in motor-carrier transport as in other modes.

Even after the enactment of the National Transportation Policy, the Interstate Commerce Act itself still contained no specific provision with respect to collective establishment of rates. The holdings of the Supreme Court in the *Trans-Missouri* and *Joint Traffic Association* cases that rate-bureau agreements violated the Sherman Act were still the last judicial word on that subject. Following long years of official inattention to the antitrust status of rate bureaus, a number of developments in the early 1940's led to a movement to give clear legislative sanction to collective ratemaking. These developments included various antitrust suits initiated by the Justice Department against railroad and motor-carrier rate-bureau activities. In addition, the State of Georgia had sued the Eastern railroads alleging freight rate discrimination, and a Supreme Court decision on the jurisdictional aspects of that suit, holding that "none of the powers acquired by the Commission since the enactment of the Sherman Act" legalized rate bureaus, raised serious questions about the vulnerability of collective ratemaking to antitrust attack.[10]

After extensive hearings marked by a great outpouring of

[10] State of Georgia v. Pennsylvania R.R., 234 U. S. 439, 457 (1945).

support by shipper and community organizations across the country for the functions performed by rate bureaus, Congress in 1948 enacted the Reed-Bulwinkle amendment, which became Section 5(a) of the Interstate Commerce Act. Approved over a Presidential veto by a large margin in both House and Senate, that amendment gave the Commission authority to approve rate-bureau agreements under which carriers of a particular mode could jointly consider and establish rates if such agreements were found by the Commission to be in furtherance of the National Transportation Policy, preserved the right of individual carriers to take action independent of the rate bureau with regard to any rate, and incorporated conditions or procedures prescribed by the ICC. Participation in rate-bureau discussions and decisions under any Commission-approved agreement was to be free from attack under the antitrust laws. The Reed-Bulwinkle amendment provides the statutory authorization for motor-carrier collective ratemaking today.

The case for collective ratemaking from the regulator's standpoint was summarized by Commissioner Joseph B. Eastman, whose practical knowledge and dedication to the public interest during a long career on the Commission place him high in the esteem of students of transportation and of economic regulation:

> ... [I]f the carriers of the country are to respond to the duties and obligations imposed upon them by the Interstate Commerce Act, and if the rate structure is to be reasonably free from unjust discrimination or undue preference and prejudice, as simple and consistent as may be, reasonably stable, and sufficient for the financial needs of private ownership and operation, the carriers must be in a position to consult, confer, and deal collectively ... [11]

[11] *Interstate Commerce Act of 1943 (Regulation of Rate Bureaus)*, Hearing on S. 942, United States Senate, Committee on Interstate Commerce, 78th Congress, First Session (1943), Part I, p. 875. Supreme Court Justice Brandeis is said to have called Eastman "the ideal public servant." (Charles D. Drayton, *Transportation Under Two Masters*, National Law Book Co., Washington, D. C., 1946, p. 114.)

In finally enacting specific legislation on the subject of collective ratemaking, Congress recognized that the paramount issue is how best to serve the public interest. On the one hand, it recognized that cooperative action in the making of rates deprives the public of the benefits normally associated with price competition among suppliers. On the other hand, it recognized that the circumstances in transportation are not typical of those in the economy generally and that there are special practical needs to be met in order to assure the public of the benefits intended by transport regulation, practical needs which are reflected in the statement of national transportation policy. The dilemma was how best to balance these considerations. Congress resolved the dilemma by authorizing the regulatory agency to examine each rate-bureau operation, case by case, in the light of the public-interest standards embodied in the National Transportation Policy viewed against the public-interest objectives reflected in the antitrust policy of unrestricted rate competition, and to decide how, on balance, the public interest would be best served.

> Under the standard in the bill Congress entrusts to the Commission the task of applying to particular cases the general formula which Congress finds is determinative of the public interest, and directs the Commission to determine whether the advantages to the public interest, through furtherance of the national transportation policy, are such as to outweigh the disadvantages to the public interest intended to be guarded against by the antitrust laws.[12]

This "formula" for the balancing of public-interest considerations by a regulatory agency charged with administering the will of the Congress is the principle under which collective ratemaking in trucking is carried on.

[12] H. R. Report No. 1100, 80th Congress, First Session, (1947), p. 14.

III.

Basic Considerations

At the heart of the present system of collective ratemaking in the motor-carrier industry is the opportunity for carrier members of rate bureaus to establish rates by joint action under conditions which make it possible to meet regulatory and commercial needs effectively without violating the antitrust laws. The basic public policy issue posed by the collective ratemaking system is whether the benefits which accrue to the public from uniformity, stability, and equitableness in the structure of motor-carrier rates outweigh any drawbacks flowing from limitations that collective rate action places upon the workings of competition.

By definition, the collective ratemaking system involves restrictions upon rate competition of a type which would normally be prohibited by the antitrust laws. As noted earlier, the Interstate Commerce Act now specifically provides for exemption from the antitrust laws for collective ratemaking activities carried on pursuant to rate-bureau agreements found by the Commission to be in furtherance of the public interest as reflected in the Congressional declaration of National Transportation Policy.

There is an extreme view, strongly pressed by the Department of Justice at the time of the Reed-Bulwinkle hearings and from time to time voiced in academic and consumer-advocacy circles,[1] that the public policy of unrestricted rate competition associated with the antitrust laws is the only means of protecting the public

[1] See, for example, George W. Hilton, *The Transportation Act of 1958*, Indiana University Press, Bloomington, Ind., 1969, and Robert Fellmeth, *The Interstate Commerce Commission*, Grossman, New York, 1970.

interest and that collective ratemaking tends to defeat rather than advance the public interest. Even adherents of this view generally recognize that where traffic moves between points over a combination of the routes of two or more carriers, those carriers must be permitted to confer in order to be able to establish joint rates applicable to such routes. All other forms of collective rate action by carriers, however, would be condemned.

It is traditional in the United States to look with favor upon competition as an effective prod for producers to operate efficiently, maintain high quality in the goods or services they offer, and hold prices down. As Wendell Berge, then head of the Antitrust Division, expressed the point thirty years ago: "[I]t is the underlying philosophy of the Sherman Act, and deeply ingrained in our American tradition, that the public has a right to a competitive price." [2]

But the general public policy presumption in favor of competition is not a commandment to apply a policy of unrestricted competition indiscriminately in all situations. The paramount consideration is always the pragmatic one of how best to serve the public interest. The same tradition which gives a high priority to a policy of unrestricted competition enforced by the antitrust laws recognizes that, in the interest of serving the public well, such a policy can not and should not be applied in wholesale fashion across the entire spectrum of economic activities of the nation.

Outside of transportation, an outstanding instance of Congressionally-authorized collective pricing occurs in connection with broad national farm policy. The Capper-Volstead Act permits agricultural producers to price and sell their output in common through cooperative marketing associations under immunity from the antitrust laws.[3] The Congressional rationale for the immunity

[2] *Regulation of Rate Bureaus, Conferences, and Associations*, Hearings on S. 110, United States Senate, Committee on Interstate and Foreign Commerce, 80th Congress, First Session (1947), p. 73.

[3] 7 U.S.C. Sec. 291, 292.

is that in this vital segment of the economy the public is better served by collective action than by unrestricted competition of producers.

Similarly, Congress has placed major areas of the economy under the primary jurisdiction of regulatory agencies which are authorized to approve transactions, such as consolidation, facilities-sharing, and other agreements among carriers, which might otherwise be condemned under antitrust standards but which are considered to be necessary to meet objectives deemed by Congress to be of higher significance for the public welfare than rigid maintenance of competition.

In most cases, the substitution of regulatory for antitrust jurisdiction is accompanied by strict standards and procedures applied by the regulatory agency. That is not always so, however. No specific regulatory standards or procedures are prescribed for the operations of agricultural marketing cooperatives. By contrast, in order for the antitrust exemption to apply to collective ratemaking in trucking, each motor-carrier rate-bureau agreement must be subjected to scrutiny by the Interstate Commerce Commission and must incorporate such conditions as the Commission specifies as essential to the public interest.

What are the public-interest considerations that justify the continuation of the present system of collective ratemaking in trucking and the antitrust waiver it entails?

There is first the need for adequate freedom for carriers to confer with each other so that the relationships of rates established by the entire group of carriers serving a territory can equitably balance the economic position of shippers, industries, markets, localities, points, or, in the catch-all phrase of the statute, of "any particular description of traffic." Transportation rates can be, and frequently are, a crucial element in the total production cost of an enterprise — or an industry — and can exert a decisive influence on its competitive position. The Interstate Commerce Act had its origins in a fundamental abhorrence — an abhorrence still deeply felt — of "discrimination in its various manifestations", discrimination spurred particularly by the ambitious striving of shippers seeking a decisive trade advantage over their competitors in the form of favored rate treatment. The impact of such favored treatment is felt not only by the disadvantaged shipper firms and their customers or suppliers, but by their labor force and, in some cases, by the entire economy of the communities in which they are located.

As the Supreme Court has stressed: "Discriminatory rates are one form of trade barrier. Their effect is not only to impede established industries but to prevent the establishment of new ones ... Nondiscriminatory class rates remove that barrier by offering that equality which the law was designed to afford. They insure prospective shippers not only that rates are just and reasonable per se but that they are related to those of their competitors." [4]

It is elementary that in the absence of collective ratemaking, giant shippers controlling large volumes of traffic would be in a position to gain more favorable rates than smaller shippers. Under collective ratemaking, the rate charged by all the carrier members of a rate bureau for a given movement under given conditions is the same regardless of the economic power of the shipper; a carrier serving a large shipper does not maintain a lower rate than that charged a smaller shipper by another rate-bureau carrier. As Commissioner Eastman once summed it up in a Congressional hearing: "If I know anything from experience with certainty, it is that if we rely upon competition as the governing factor in the determination of freight rates by all types or any type of carrier, the benefits will go to shippers in proportion to the size of the 'traffic club' that they wield." [5]

The problem of avoiding rate favoritism has many aspects. Collective ratemaking helps to insure, for example, that two competing producers located at point A and obtaining their raw materials from point B will receive equal treatment in trucking

[4] State of New York v. United States, 331 U.S. 284, 308 (1947).

[5] *Interstate Commerce Act of 1943 (Regulation of Rate Bureaus)*, Hearings on S. 942, United States Senate, Committee on Interstate Commerce, 78th Congress, First Session (1943), pp. 822-823.

rates even if they are served by different carriers between those same two points. Similarily, the two competitors will receive equal treatment in trucking rates in shipping their finished goods to a third point. Where there are various market destinations, the class rates from a given origin to the various market points will be uniform, on a scale adjusted for distance, for all carrier members of the rate bureau. Where the raw materials come from different geographic sources in the territory, the opportunity for equality of treatment is similarly assured. Equality of treatment in trucking rates for the movement of import or export traffic to or from competing ports is facilitated. Where commodities having different physical characteristics but similar transportation characteristics compete with each other, there is again an opportunity to establish equality of treatment in transportation rates.

In each of these situations, it is not enough that any one carrier abstain from rate discrimination. If an appropriate parity of rates is to be effectively achieved it must be reflected in the rates charged by other carriers as well. The collective ratemaking process affords the opportunity for, and helps to insure, such parity with respect to the rates charged by all carriers belonging to the rate bureau.

Collective rate action is the only practical means available for avoiding the evils of favored treatment and the disruptions and dislocations it causes. Given the thousands of motor carriers, tens of thousands of geographic points, literally billions of individual rates, as well as the numerous rivalries among competing origins, destinations, commodities, markets, and routes, the temptations and opportunities for discrimination in the absence of collective ratemaking seem more than any regulatory system could be expected to control if rates were made entirely through individual carrier competition. And, of course, the extent of rate regulation required for such a control effort would be far greater than that prevailing today.

It may be possible to postulate economic models of the trucking industry under which, given conditions of perfect competition, the

evils of rate favoritism, preference, prejudice, and the like can be theorized out of existence. But the very structure and character of motor-carrier operations preclude conformance to any textbook ideal, and a theoretical "long run" is for all practical purposes an infinity away to a firm, a locality, or a port which finds itself a victim of flagrant discrimination in the here and now.

The authority of the member carriers of the rate bureau to "confer, discuss, and determine by mutual agreement what the rates shall be" provides the means for sorting out the numerous and vexing complexities of ratemaking; for keeping all parties — shippers as well as carriers — informed; for creating opportunities for the gathering of relevant information and a forum for discussion, argument, and negotiation; for appeals to consideration of equity, logic, common sense; and, above all, for a judicious balancing of all these considerations, because the process requires the continual exercise of informed, experienced judgement as well as the compilation and weighing of facts with respect to both motor transport and the markets it serves.

In order for the collective ratemaking process to work well, it is essential that shippers be heavily involved. The present system insures ample opportunity for such involvement. Shippers play an active role in the motor-carrier rate bureaus in the discussion of rate changes before such changes are acted upon. They provide indispensable intelligence as to technological developments, changing market relationships, and current and prospective competitive conditions, all of which require close consideration in the making of nondiscriminatory rates. The present system permits a shipper to file a rate proposal in a single forum reaching carriers which provide total service covering his market throughout a given rate territory. In the absence of the rate bureaus, the typical shipper would have to deal with a great number of individual carriers to establish rates to all of the relevant destination points involved. And under collective ratemaking the shipper is assured of rates reasonably related to those enjoyed by his competitors, large or small.

From the standpoint of shippers, one of the most important values of the making of rates by collective as opposed to individual carrier action lies in the high degree of rate stability that collective action affords. Because of the crucial, practical need to plan their operations with a high degree of certainty as to their own transportation costs and the corresponding costs of their competitors, many shippers place even more importance upon the stability than upon the absolute level of rates they pay. "Shippers have a basis for planning ahead by relying on a coherent rate structure reflecting competitive factors."[6] Such stability undoubtedly is an important aid in the decision-making processes of business leading to plant expansion and market growth.

Under collective ratemaking, rate changes occur only after due notice to, and opportunity for deliberation by, all interested parties, and the centralization of tariff publication gives shippers immediate and reliable intelligence as to prevailing rates. One of the prices paid by shippers for unrestricted rate competition by individual carriers would be a high degree of rate instability and corresponding confusion and uncertainty concerning applicable rates.

The rate-bureau system makes possible an enormous reduction and concomitant savings in the administrative costs associated with the processing of tariff filings by the regulatory agency, because the give-and-take of carrier and shipper discussions before rate proposals are finally decided and submitted for regulatory review tends to minimize the number of protests requiring Commission action.

It is frequently overlooked that despite the lessening of rate competition which is inherent in the process of establishing rates by collective action there remains a substantial degree of competition in the motor-carrier field.

An important source of such competition arises within the rate bureau itself from the unequivocal right written into the law guaranteeing to every carrier member the opportunity and means of establishing its own rates independent of any rate-bureau action. The "free and unrestrained" right of such independent action is a significant limitation upon the establishment of rates by simple majority rule in circumstances where a particular carrier feels that its interests and the interests of the shippers it serves require a rate action different from that resulting from collective consideration. Under the rules of the Commission, such independent action may be taken at any time — before, during, or after a collective decision — and Commission records of the number of independent actions filed demonstrate that the right of such action is invoked with considerable frequency.

The competitive significance of the right of independent action, however, goes beyond the mere number of such actions filed. In the conferences, negotiations, and compromises that are an intrinsic part of the collective ratemaking machinery, an indication that a carrier may choose to back up a proposal for a specific rate reduction with an independent filing with the Commission may well impel other carrier members, in the interest of meeting the competition, to agree to match the reduction. A similar situation may occur where an individual carrier elects not to go along with all or part of a general increase proposed by the majority. For competitive reasons, the other carriers may be forced to forego the increase as originally proposed. The result in such cases is that competition has had its effect within the rate bureau even without the formalities of an official independent action.

Other forms of competition also exert influence upon the rates established by rate bureaus. There are common carriers serving a territory that choose not to belong to the rate bureau and are not party to its rate actions. There are contract carriers operating under specific Commission authority to haul the traffic of a shipper within a broad or narrow geographic area and under rates negotiated between the carrier and the shipper involved. There are large numbers of private carriers operating truck fleets ranging in size from the modest to the mammoth, fleets wholly owned by the shippers themselves and in a position to exercise powerful

[6] State of New York v. United States, 33, U.S. 284, 308 (1947).

pressure upon the rates charged by carrier members of rate bureaus. There are numerous other shippers which can and do exercise such pressure by dint of their evident resources and capacity to undertake private fleet operations if common carrier rates become excessive. And there is ever-present strong competition from other transport modes — from railroads with respect to truckload traffic, from United Parcel Service with respect to small package freight, and from airlines for intermediate types of traffic where speed of service is a significant factor.

The combination of the unfettered independent action of rate-bureau members and the rate pressures felt from non-members, from contract carriers, from private carriers, and from other modes of transportation represents a major offset to the restrictions upon pricing competition which are otherwise embraced in collective ratemaking.

Furthermore, collective rate actions by rate-bureau members in no way inhibit the vigor of their competition for traffic by devices other than pricing. The quality of equipment, efficiency of operations, speed and reliability of service, tailoring of service to the characteristics of the cargo, attentiveness to shipper needs in the many ways that make one carrier's service more economic and appealing than another — all of these forms of competition, highly prized by the shipping public, are prominent under collective ratemaking.

An argument is often made that the general level of motor-carrier rates under collective ratemaking must be higher than would be the case if unrestricted rate competition prevailed. There is no way of determining with any degree of sureness what would happen to rates in the absence of collective ratemaking. Some rates might be higher, some might be lower. To proceed much beyond conjecture in this realm would require a whole set of assumptions about many other aspects of industry regulation and organization. It is important to realize, however, that the carrier members of the rate bureaus have only the power to propose rates, not to rule on their lawfulness. Critics of the collective ratemaking system have at times characterized it as a form of "private government",[7] but the connotations of such a label are out of line with reality. The Commission has all the authority needed to make sure that the level of motor-carrier rates under collective ratemaking is not in excess of what is reasonable from a public-interest standpoint. All rates so established are subject to close review and regulation by the Commission. Every proposal for a general rate increase must be given wide publicity and must be accompanied by an extensive body of cost, traffic, and financial data stipulated by the Commission. The proposal must meet criteria as to revenue need, capital requirements, profit margins, rates of return, and similar factors used by the Commission to enable it to assure itself that the public is adequately protected. And the right of any party to appear before the Commission and to appeal a Commission decision to the courts is secure. These mechanisms provide the necessary assurance that the rate level is consistent with the public interest.

Another criticism heard is that because rate levels established collectively are designed to produce a reasonable margin of profit or rate of return based upon the costs of member carriers as a whole, such rate levels are too high in relation to the costs of the more efficient carriers and tend to protect the carriers with relatively high cost structures. The basic answer to this criticism is that the governing consideration from the standpoint of public policy is "to insure equality of rates as to all and to prevent favoritism."[8] The long history of the country with transportation rates has left the evidence and the conviction that unrestricted rate competition among carriers can not provide that insurance. Given the public-interest importance of guarding against "discrimination in all its forms," there is no alternative to the establishment of rate levels adequate to cover the total costs of providing the

[7] Arne C. Wiprud, *Justice in Transportation*, Ziff-Davis Publishing Co., Chicago and New York, 1948, p. 77.

[8] Chicago and Wisconsin Points Proportional Rates, 17 MCC 513, 578.

services required by all shippers. The public is protected so long as these rate levels as a whole are not unreasonably high in relation to such costs, including capital costs, even if those rate levels result in different rates of profitability for individual carriers.

It is worth adding, however, that many factors having nothing to do with operating efficiency as such — factors such as the handling characteristics of the commodities carried, the nature of the routes, or the density of the traffic — can affect the costs of individual carriers. Some carrier managements are undoubtedly more skillful operators than others. But there is nothing in the collective ratemaking process as such that deters efforts to improve efficiency. Nor does the process protect the inefficient operator. General rate levels established under the collective ratemaking process are geared to the average costs of the carriers as a group, not to the costs of the least efficient among them. Carriers which can not cover their operating and capital costs at the rate levels which are adequate for bureau members as a whole will fall by the wayside. There is, therefore, the strongest incentive for marginal carriers to reduce costs through improved efficiency. In fact, the ordinary forces of profit maximization insure that *all* carrier managements will strive to optimize their returns by serving shippers as efficiently and at as low a cost as possible — the less efficient carriers, in order either to remain in business or to approach the results of the more successful operators, and the more efficient carriers, in order to maintain or improve their advantage.

As pointed out earlier, a basic aspect of the present system of collective ratemaking in trucking is the right of any carrier member of a rate bureau to avail itself of the opportunity to serve on a carrier committee which represents the bureau membership in discussing and passing upon rate proposals coming before the committee. A member of such a committee acts on a proposed rate regardless of whether the rate involves a single-line or inter-line haul, or whether the carrier itself offers service between the specific points covered by the rate, or even whether it carries the specific commodity involved. Much of the controversy relating to the collective ratemaking process in recent years has involved efforts to impose limits as to which carriers are entitled to participate in deliberations and decisions on specific proposals. It is important to understand why present practice is an integral and indispensable part of the process.

Motor-carrier traffic between two points may move either by single-line service, where one carrier handles the movement from origin to destination, or by inter-line service, where a combination of two or more carriers handles the movement. It is common for a carrier to offer single-line service between two cities and at the same time to join with another carrier to offer inter-line service via a "through" route connecting at an intermediate point. In some cases, the same carrier may participate with various other carriers to form a number of alternative inter-line routes between the two cities. For competitive reasons, the rate must be the same whether the traffic is hauled in single-line service or via any of the inter-line alternatives.

It is commonly assumed by critics of motor-carrier collective ratemaking as presently practiced that a carrier with single-line operating authority between two cities will always prefer to carry the traffic entirely on its own route rather than share the traffic by inter-lining with another carrier. Another assumption frequently made is that inter-line service is less efficient than single-line service.

Such assumptions ignore many operating realities. Inter-lining is a significant aspect of achieving a coordinated national system of efficient motor transport. Traffic patterns and densities and the imperatives of efficient operation often dictate the choice of an inter-line over a single-line route. Where the traffic consists of considerable volumes of less-than-truckload traffic, for example, it can be advantageous for a carrier, despite its own single-line authority, to route a cargo via an interchange point with another carrier so that the original load can be broken down into various

shipments destined for differing cities and integrated with other shipments destined for those cities, some of which will be served by the originating carrier and some by the interlining carrier or carriers. In such cases, interlining can produce marked advantages of efficiency and expeditiousness of service over single-line movements, to the marked and mutual benefit of both shipper and carrier. Similar efficiency and expeditiousness can be achieved by two carriers, neither of which has single-line authority between the points, who join in an inter-line service which competes with the single-line service of another carrier.

One major dimension of the competition of motor carriers for traffic is clearly the competition among carriers offering either single-line service or inter-line service or both between a pair of cities. Another major dimension of the competition for traffic is the competition between carriers moving a particular commodity from a given origin to a given destination and other carriers moving that commodity from the same origin to a competitive destination or from a competitive originating point to the same destination. Still another major dimension of motor-carrier competition for traffic involves the movement of commodities which, while different in physical terms, are in active competition with each other for specific end uses, so that the transportation rates have strong competitive implications for the carriers as well as the shippers of those commodities.

The ability of rate committees to act in a capacity which is representative of the bureau membership as a whole would be seriously impaired if the carriers serving on such committees were not free to deal with all rate proposals affecting the rate structure throughout the entire bureau territory. Even more basically, competitive rate relationships in motor freight transport are closely interlaced: the fundamental objective of motor-carrier collective ratemaking to achieve equitable and nondiscriminatory rate structures could not as a practical matter be realized if single-line and inter-line rates were established in isolation from each other; if rates for one inter-line movement were established without heed to the rates for competitive inter-line movements; if rates between one pair of points were established without regard to rates to or from competitively related points; or if rates governing one commodity were established with no concern for the rates covering another commodity for which it was a competitive substitute.

IV.

Conclusion

How is the public interest affected by collective ratemaking in trucking? The brief answer is that the public gains advantages that are obtainable only through collective rate action and, while foregoing some of the benefits of rate competition among carriers, avoids the damage and inequities that unrestricted competition would bring.

Collective ratemaking reduces, but falls far short of eliminating, competition in trucking. Within the rate bureaus themselves, actual and potential independent actions by carrier members are reflected in downward pressures on rates. Similar pressures are felt from carriers of other modes, from motor common carriers in the territory who operate outside of the rate bureau, from contract motor carriers, and from private motor carriers. And there is active vying for traffic among rate-bureau members on the basis of every aspect of quality of service which is of value to shippers.

What collective ratemaking does eliminate, to a substantial extent, are the negative and destructive impacts which, notwithstanding the advantages of competition in principle, would inevitably accompany unlimited rate competition in trucking. The basic structure and character of motor carrier transportation — its multitude of carriers, points served, alternative routings, commodities carried, and shipper and market rivalries — make it certain that without joint consideration among carriers in the making of rates it would be impossible to avoid a whole catalogue of undesirable results: favored treatment to economically powerful shippers at the expense of those less powerful; inequities among competing market or producing centers; continuous rate fluctuations and concomitant uncertainty among shippers as to rates currently being paid by their competitors; needless waste, confusion, and inefficiency in tariff publication; great additional burdens upon the Commission as a result of a proliferation of protest actions demanding regulatory consideration; and a weakening of the complex of interline arrangements which have heretofore made possible an integrated national network of motor transport in line with the goal of a "coordinated transportation system to meet national needs" sought by the National Transportation Policy.

As a matter of public policy, there are good reasons for the reliance which, in most industries, is placed upon the competitive process as the way to protect the public interest. Valid as the general presumption favoring a policy of competition may be, however, doctrinaire adherence to the presumption can defeat that purpose. In fact, public policy has long recognized that there are several areas of the economy in which traditional competition policy would damage rather than promote the public interest. In those areas, an exception to the policy of competition is implemented by an exemption from the application of the antitrust laws.

Congress has gone to considerable lengths to make certain that in granting such an antitrust exemption in the case of collective ratemaking in trucking the public interest is thoroughly protected.

First, it has laid down a statutory rule that the advancement of the public interest, as reflected in the Congressional declaration of National Transportation Policy, shall be the prime standard applied by the Commission in determining whether collective ratemaking by a rate bureau shall be allowed at all. No rate-bureau agreement may be approved by the Commission except upon a specific finding that an antitrust exemption will further that policy.

Second, it has given the Commission broad authority to condition its approval of any rate-bureau agreement upon the incorpora-

tion of such terms and conditions as the Commission prescribes as necessary to insure that the public-interest standards of the National Transportation Policy are met.

Finally, to make sure that no carrier is bound by a collective rate determination unless it wishes to be, Congress has denied the Commission the power to approve any rate-bureau arrangement which fails to provide "the free and unrestrained right of independent action either before or after any determination." [1]

No other statute providing exemption from the antitrust laws is surrounded by safeguards so explicitly framed to protect the public interest.

Further, Commission approval of the organic agreement under which a rate bureau operates does not carry with it any commitment to approve any specific collective rate action the bureau may take. Every such action must meet the same standards of lawfulness under the Interstate Commerce Act as would be applied to a rate proposal of an individual carrier acting alone. The shippers of the country are well-organized, and any shipper, whether acting individually or through an organization, may protest a rate-bureau proposal. Whether or not protested, a rate-bureau action may be suspended and investigated by the Commission. Where a general increase is proposed, the proposal receives especially close regulatory attention, is subject to the same rights of protest that apply to changes of more limited application, and must satisfy all the tests the Commission sees fit to impose to insure that the resulting rate level is reasonable from the public's standpoint. Any interested party may institute a complaint against any rate-bureau action before the Commission. As an ultimate resort, appeal to the courts is always open.

In weighing collective ratemaking against a policy of unrestricted rate competition, the practical lessons of a hundred years of transportation history, the fundamental characteristics that differentiate motor-carrier ratemaking from pricing in most industries, and the importance of uniform, stable, and equitable rates to the well-being of the country are not to be lightly dismissed. The feeling of certainty that widespread discrimination would accompany unrestricted rate competition in trucking is not baseless alarmism. It reflects not only the views of the carriers who supply the trucking service, but the judgment of shippers — particularly shippers of limited resources and limited economic leverage — who use the service and know from hard experience not only the complexities of motor-carrier ratemaking but its potentials for rate favoritism. That same feeling of certainty that collective ratemaking is necessary in the public interest is expressed in the unwavering view of the regulatory commission which is charged by Congress with acquiring expert knowledge of the industry and with regulating it with the public interest as its overriding consideration

Against this background, it requires extraordinary, if not blind, faith in the therapeutic virtues of unrestricted competition as a universal medicine to give it serious consideration as a substitute for collective ratemaking in motor freight service. The present system of collective ratemaking in trucking does not fit the dogmatic view of an economic world in which unrestricted competition is unvaryingly the best policy. For that matter, no area of antitrust exemption fits that view. But the Congressional concept of the economic world is more pragmatic. It recognizes that the paramount purpose of antitrust, as of any other public policy, is how best to serve the public interest. Such a concept envisions special situations in which an unyielding insistence on the antitrust standard would be a disservice to the public. Congress accordingly makes provision for antitrust exemptions to apply in those situations.

Collective ratemaking in trucking is such a situation. Congress regards collective rate action as the only means of realizing the public-interest goals set forth in its declaration of national transportation policy. Congress provides the opportunity for such collective action and exempts it from antitrust restraints, but only

[1] Section 5a of the Interstate Commerce Act, 49 U.S.C. 5b.

under conditions carefully tailored to protect the public from abuse of the limitations upon competition that are inherent in collective establishment of rates.

It would be difficult to improve upon the statutory and regulatory scheme designed by Congress to make sure that the opportunity granted for collective rate action serves the public interest. It has written into the law an unqualified guarantee that any carrier may make its own rates independent of the actions of any rate bureau; it has specified criteria by which the public interest must be found to be furthered in order for a collective ratemaking arrangement to win approval; it has empowered the Commission to specify the provisions and procedures which must be embodied in a collective ratemaking arrangement in order to justify an antitrust exemption; and it has maintained intact regulatory supervision over all collective rate actions of the rate bureaus operating under such an exemption.

The economic logic for the statutory policy favoring collective ratemaking over rigid rate competition is as compelling today as when it was enacted almost thirty years ago. Motor transport is of greater importance in the economy now than it was then, reaching every community in the country, large or small, and making possible a national marketing and distribution system of high efficiency. The economic leverage of powerful shippers, the potential for rate discrimination in its many aspects, the need for equitable, stable, reasonably predictable rates — all are at least as important now as when Congress formally adopted a statutory policy authorizing collective ratemaking. Congress assigned to the Interstate Commerce Commission the responsibility for implementing that policy through effective regulation. The Commission can and should be held to strict account in carrying out its responsibility. But the basic Congressional policy of permitting collective ratemaking under conditions that benefit and protect the public interest remains sound.

Jesse J. Friedman, whose experience as a government official and a consulting economist has embraced almost every aspect of competition policy, heads the economic consulting firm of Jesse J. Friedman & Associates, which since its inception in 1954 has acted in an advisory capacity to business corporations and associations in a wide range of regulated and unregulated industries. On numerous occasions his work has involved the study of the implications of government and business policies for the public interest. He was staff director of a cabinet committee established by President Truman on problems of competition and monopoly and has served as economic consultant to the Antitrust and Monopoly Subcommittees of both the United States Senate and the House of Representatives, the Senate Committee on Interstate and Foreign Commerce, and the Department of Commerce, Department of Justice, and various state agencies. His studies published by Congressional Committees include *Concentration in American Industry*, *Corporate Mergers and Acquisitions*, and *Merger in a Regulated Industry*. In private consulting, he has made and directed studies and advised corporations and their counsel on the economic soundness of business policies affecting competition and on varied economic issues of antitrust and regulatory [illegible] including issues relating to pricing and competition in air, [illegible], rail, and water transportation. He is co-author of a study entitled *Relative Profitability and Monopoly Power*, published in the December 1972 issue of the Conference Board Record, and the author of a book entitled *A New Air Transport Policy for the North Atlantic*, published in 1976.

NIT LEAGUE REAFFIRMS SUPPORT FOR COLLECTIVE RATEMAKING IN TRUCKING, SUGGESTS WAYS TO CLARIFY POLICY

In a move that may aid opponents of congressional action to end the trucking industry's exemption from federal antitrust law for ratemaking purposes, one of the nation's major shipper organizations this week reaffirmed its support for the collective rate bureau method of setting the fees for trucking services.

STRONG "ENERGETIC" SUPPORT

Members of the National Industrial Traffic League voted in Florida at the group's annual meeting earlier this week to continue strong public support for the conference method of establishing motor carrier rates -- within the League's existing policy guidelines.

ENDORSEMENT A SETBACK FOR KENNEDY

Although the shipper group said it will clarify some of its own policies about how truck rates are set, the endorsement of collective ratemaking must be regarded as a setback of sorts for U.S. Sen. Edward Kennedy, D-Mass., who has indicated he will introduce legislation in the next Congress to end current collective ratemaking practices.

SINGLE-LINE RATE QUESTION

One of the policy clarifications approved by NIT League members involves rate bureau voting on single-line rates, an issue currently under consideration by the Interstate Commerce Commission.

ICC ISSUE

The ICC wants to apply to trucking the same prohibitions that now keep railroads from voting on single-line traffic in which they do not participate.

VOTING POLICY SPELLED OUT

What the NIT League said is it believes a carrier should be allowed to vote on a tariff for any single-line or joint-line traffic in a situation where he is elected to represent other carriers, and where he and those he represents are able to participate in that traffic -- even if they might not be doing so at the time.

(more)

WHEN CAN REPRESENTATIVES VOTE?

At the same time, however, the League said it would like the various rate bureaus to set up procedures for determining that a carrier representing other carriers is absolutely sure he can vote for them on any rate proposal.

INDEPENDENT ACTIONS

According to the League's policies, there would be no voting within a bureau on single-line proposals for accounts of only one carrier. The rates in those cases would effectively be the result of an independent action.

ONLY CARRIERS CAN PROPOSE

Another item reaffirmed by NIT League members is that only carriers -- and not the staff of a rate bureau -- have the authority to make any rate proposals on their behalf.

ICC ASKS OPEN MEETINGS

Although ICC Chairman Daniel O'Neal earlier this year called for making public all voting and discussion within collective ratemaking sessions, the NIT League did not wholeheartedly endorse that approach.

VOTING RECORD SUGGESTED INSTEAD

Instead, the shippers suggested that a record of carrier voting be maintained for a reasonable amount of time -- perhaps one year -- and that the record be furnished to the ICC whenever the agency should request it.

INTRASTATE RATE AUTHORITY

One final policy clarification the shippers recommended involves the ICC's authority to rule on intrastate truck rates. Present law permits the agency to rule on intrastate rail rates when the ICC considers them so high as to be a barrier to interstate commerce.

The ICC does not have the same authority for motor carrier rates, and the NIT League recommended action to change the law in order to give the commission that authority for all modes.

Despite the spate of policy statements, in the end NIT League members endorsed a strong public stance in favor of continuing the present collective ratemaking system for trucking.

SOME DO'S AND DON'TS AND
A WORD OF CAUTION ABOUT ANTILOCK

Comments and discussion at the recent ATA convention in New York indicate there is still some confusion about antilock in the wake of the U. S. Supreme Court's refusal to review a lower court decision voiding the antilock requirement of the federal 121 Brake Standard.

So we want to review for you one more time what you can and can't do as purchasers and operators, and to add a note of caution from our engineers about disengaging antilock from certain model year tractors.

DON'T ACCEPT ANTILOCK ON NEW TRUCKS

Purchasers: As purchasers you can now buy trucks -- tractors and trailers -- without antilock. The advice ATA's General Counsel Nelson Cooney gave in New York is that purchasers "stick to their guns". He noted that some manufacturers may have a rough time deciding just how to remove antilock in the safest way but, he said, "That is their problem."

CHECK PRIOR ORDERS

If you had an order in for new equipment prior to the Supreme Court ruling October 2, the advice is that you press for delivery of your new equipment without the antilock devices. You can argue strongly -- and correctly -- that the National Highway Traffic Safety Administration mandate for antilock no longer applies.

DISCONNECT EQUIPMENT

Operators: As operators of trucks currently equipped with antilock, you can now disconnect the antilock device if you haven't already done so.

In the past many operators did uncouple antilock because the agency charged with enforcing truck equipment standards, the Bureau of Motor Carrier Safety, never attempted to enforce the antilock requirement.

LIABILITY CONCERN FADES

Many operators, however, were wary of removing antilock because they were concerned about liability problems that might arise in an accident. In view of the court ruling that antilock is generally unsafe, it appears that this concern can be put aside.

DEALERS, MANUFACTURERS MAY ASSIST IN UNCOUPLING ANTILOCK

Moreover, you should note that in some cases the vehicle manufacturer may be willing to assist you in removing antilock. In the past, operators had to uncouple the device themselves. But in light of a NHTSA interpretation in 1977 that manufacturers could modify earlier vehicles to correspond with a revision in the standard at that time, it's possible manufacturers or their dealers may be persuaded to help in the current situation.

(over)

SOME CAUTIONS

Although operators shouldn't experience any serious problems in all of this, several notes of caution are in order.

DEALER COMPLIANCE REQUIRED

One has to do with having your dealer disconnect antilock. He must still certify that vehicles meet the parts of the standard still in effect.

STOPPING DISTANCE

The most critical requirement a dealer -- not you -- is still obliged to meet is the 60-foot stop with an unloaded truck on wet pavement from 30 mph -- without deviating from a 12-foot lane. We mention this because some earlier model trucks and tractors may not be capable of this without antilock.

AGGRESSIVE BRAKE PROBLEMS

The other note of caution involves the extremely aggressive front brakes on tractor and trailers built to conform to the 121 Standard in effect during 1975 through to mid-1976.

According to our engineers, these vehicles rely heavily on antilock to protect the driver from the aggressive braking, and if antilock is removed it should not be done without a concurrent downgrading of the steering axle brakes.

DOWNGRADING ADVISED

The engineers suggest either relining with relatively low coefficient or friction linings, or installing shorter slack adjusters or even smaller air chambers on '75-76 models.

CHECK MODULATOR VALVES

When disconnecting antilock, your dealer or maintenance section should also check modulator valves. They have air filters which can plug up and decrease or remove braking action. We suggest replacing them with relay valves or servicing them regularly.

CLEAR DASH LIGHTS

Some final notes: removing a fuse will not in all cases make the antilock inoperative. You must remove the power source. We also suggest that if you disconnect antilock you remove the dash warning light and, in fairness to your drivers, add a "disconnected" sign.

Trailer antilock systems may be disconnected with no other actions required.

PASS ALONG TO MAINTENANCE

Finally, we suggest you pass this information along to your maintenance section or use it in talking with dealers or manufacturers if they agree to help disconnect the antilock device.

FOR IMMEDIATE RELEASE

CONTINUED ECONOMIC REGULATION VITAL SAYS ATA OFFICIAL

WASHINGTON, Nov. 28 -- Continued economic regulation of the motor carrier industry is vital if consumers are to have a dependable supply of goods, an official of the American Trucking Associations, Inc. said here today.

Speaking before a meeting of the Washington chapter of the professional transportation society, Delta Nu Alpha, ATA Virginia State Vice President J. Harwood Cochrane also predicted financial problems for motor carriers if the industry is deregulated.

Cochrane, who is also chairman of the board of Overnite Transportation Co. of Richmond said:

"A sound and effective transportation system is essential to American business--it is essential to the consumer."

Cochrane also noted that persons advocating deregulating the industry often overlook the fact that the efficient, orderly system of ground transportation as developed under the Interstate Commerce Commission is essential to making sure all consumers have equal access to goods.

Noting that the trucking business was "shaky" in the days before coming under ICC control in 1935, Cochrane said:

"Regulation has changed all that. Today, the industry is looked upon by the financial community as stable, and necessary finances in most cases are available at rates enjoyed by the large manufacturers."

He added:

-more-

"But we have been warned by any number of financial experts that the deregulation of the system will result in a deterioration of this relationship. The money just will not be available."

Cochrane continued:

"For one thing, deregulation will make operating certificates worthless. For another, as one Wall Streeter put it recently, deregulation will re-introduce a climate of instability into the industry, and lenders are not known for advancing money for unstable enterprises."

Decisions and Orders

Commission Presents Detailed Review Of Regulation of Motor Carrier Entry

A detailed review of federal regulation of motor carrier entry and of developments leading to the recent adoption of regulations providing protest standards in application proceedings for operating authority was given by the Commission as background information in proposing a general policy statement under which it will give greater weight to the benefits of competition in reviewing motor carrier entry and acquisition cases and less weight to the Commission's "historic practice of protecting existing motor carriers."

The Commission's action drew a similarly detailed dissent from Commissioner George M. Stafford who, in brief, viewed the proposed policy statement as "the next logical step in the Commission's steady march toward elimination of entry controls in the trucking industry" (T.W., Dec. 4, p. 12).

Comments on the proposed statement of general policy are to be filed within 60 days of the publication of notice in the *Federal Register*. The case is Ex Parte MC-121, Policy Statement on Motor Carrier Regulation. The comments should be addressed to the ICC's Office of Proceedings at its offices in Washington, D.C. 20423.

The American Trucking Associations immediately asserted that the trucking industry is "completely opposed" to the proposed policy statement. The ICC, according to the ATA, "is administratively thwarting the intent of Congress. It is placing maximum participation in the industry ahead of exisiting carriers, which the Congress intended as a stabilizer for the industry."

In furnishing supplementary information about the proposed general policy statement on easing entry into the trucking business, the Commission said:

"Pertinent to the adoption of the policy statement are the regulations recently adopted by the Commission in Ex Parte No. 55, Sub. 26, *Protest Standards in Motor Carrier Appliation Proceedings*, 43 FR 50908 (1978) (T.W., Nov. 6, p. 117). Under the standards adopted there, the automatic right of one carrier to oppose the application of another carrier will be limited to cariers which, among other things, have performed service withic the scope of application. These are the carriers which would be in the best position to meet the burden of proof which, if the proposed policy statement is adopted, would be placed upon them. By the same token, it is anticipated that this policy statement would provide guidelines for determining whether carriers not having an automatic right to protest should be given leave to intervene in opposition to an application.

Background

"Federal regulation of motor carrier entry began with the passage of the Motor Carrier Act of 1935. The statutory test which the Commission must apply in determining whether to grant an application for new interstate motor common carrier authority—public convenience and necessity—has remained unchanged since the Act was passed. The test applied in deciding contract carrier applications—consistence with the public interest and the National Transportation Policy—was last modified legislatively in 1957.

"A number of factors combined to cause the Congress to bring motor carrier transportation under federal regulation in the 1930s. First, and probably most important, was the state of the economy itself. The worst economic depression in our history was at its height, and a great many, if not most, businesses were in serious financial difficulties. Intercity trucking, being young and just beginning to grow, suffered more problems than did most other businesses. Certainly, one of the principal purposes behind the 1935 act was to bring economic stability to an industry which was perceived by the Congress as one which would inevitably come to provide important and essential services for the public.

"There seems to have been no one who predicted the course which the motor carrer industry, under regulation, would take in the years following the passage of the Motor Carrier Act. Some observers believed that motor transportation would develop in much the same way as had the railroads, with a relatively small number of companies operating over fixed routes between major points, and a somewhat larger number of smaller companies feeding them traffic. Such large regular route carriers have indeed developed, but to a much greater extent, both in numbers and route structures, than anyone foresaw. Certainly, there was no anticipation that the highly specialized, truckload volume, irregular route trucking services which are so prevalent today would develop to the extent that they have. Nor, apparently, did anyone foresee the phenomenal growth of private transportation which has occurred and which now represents a major source of competition for the regulated carriers.

"After passage of the 1935 act, the Commission received and processed about 90,000 applications for 'grandfather' authority. Since that time, the Commission has both received and granted an increasing number of motor carrier authorities. In the first six months of fiscal year 1978, which began October 1, 1977, the Commission received an average of 950 new applications per month for permanent motor carrier authority. During the same period, of the applications for motor carrier authority which reached decision on the merits (that is, all those which were not either dismissed or withdrawn), 94.3 per cent resulted in a complete or partial grant of authority. The grant rate for June, 1978, was 98.2 per cent, and for July it was 96 per cent. The highest rate previously attained was 86.4 per cent in fiscal year 1975. The rate dropped to about 80 per cent in fiscal 1976, and rose again to 86 per cent in fiscal 1977.

"The Commission's policies for dealing with motor carrier applications have evolved gradually over the more than 40 years that regulation has been in effect. As the economy changed and the Commission's membership changed; as motor carrier technology developed and the industry became strong and more specialized; and as shipper distribution practices and techniques change, the Commission changed its policies gradually to meet what it perceived to be the needs of the shippers and the carriers.

"Thus, even though the statutory language which the Commission must follow in deciding motor carrier entry cases has remained the same for many years, the way the language has been interpreted and applied has changed over time in recognition of a constantly changing world. Over the years, the trend has been to make it easier for applicants to obtain new operating authority. What we have seen in the past year or two is an acceleration of that trend—a trend which reflects clearly discernible changes in the regulated industry and the national economy.

"The regulatory policies which became fixed in the 1930s and 1940s were characterized by a protectionist attitude which unquestionably reflected the national need for the development of a stable and profitable motor carier industry. When that industry was young and was faced with the economic disaster of the depression years—and then when it was growing stronger and developing in the post-war years—protection was necessary. Carriers needed to be protected from excess competition if they were to raise the capital, make the investments, and develop the operating patterns necessary to make them financially viable and to meet the public need for service. When stable and reliable bus and trucking services were the exception rather than the rule, and when the automobile and private truck had not yet become a practical alternative, the need for a strictly regulated motor carrier industry, upon which the common carrier obligation to serve could readily be enforced, was a necessity to travelers and shippers.

"Today, the motor carrer industry has arrived at a state of maturity characterized by routes and service patterns which blanket the nation; by financial prosperity; by the existence, side-by-side and competing, of hundreds of successful firms, meeting both new and old customer needs and earning healthy profits; and by generally highly competent managements which have developed sophisticated technologies, cost-control systems, and pricing structures. Obviously, all bus and truck companies are not uniformly well positioned or well managed. In particular, we have recognized the financial problems of the regular route sector of the bus industry.

"In the years since the Motor Carrier Act of 1935 was enacted, the regulated industry has matured into one of the most profitable, diverse, competitive, and best managed in the United States. New permanent operating authorities are being granted at the rate of almost 8,000 a year, but the nation's expanding economy continues to create an apparently never-ending need for new motor carrier services. Although the Commission has become more liberal in granting motor carrier applications, it has still, up to now, been following entry control policies which have changed but little since the advent of federal regulation. Today, the flood of applications has made it virtually impossible for the Commission to give more than passing attention to each, and has made well-informed, precise motor carrier entry regulation difficult, if not impossible.

"In responding to these changing conditions and developing service needs, the Commission has recently tended to give added weight to the needs and wishes of those supporting motor carrier applications. It has also given more weight to the benefits of competition, recognizing it as an effective force for regulating prices and service quality."

"In evaluating motor common carrier applications, the Commission has long followed the three-point test first established in *Pan America Bus Lines Operation*, 1 MCC 190, 203 (1936). That test provides that the Commission will consider an application for new authority in the light of the following criteria:

" 'Whether the new operation or service will serve a useful public purpose, responsive to a public demand or need; whether this purpose can and will be served as well by existing lines or carriers; and whether it can be served by applicant with the new operation or service proposed without endangering or impairing the operations of existing carriers contrary to the public interest.'

"Common Carriage—Today's conditions require a change in that test. The criteria are overly protective for a mature and financially healthy industry, and they tend to restrain healthy competition. The third part of the *Pan American* test, which provides existing carriers with protection from competition which would endanger their abilities to continue to perform service needed by the public, offers what we are convinced is a sufficient degree of protection to carriers already in a particular market. Obviously, only the existing carrier is in a position to show that a grant of the application will have this impact upon it, and it is, therefore, the protestant which will have to bear the burden of proof as to this test. We believe that the second of the three tests laid down in the *Pan American* case—that is, the test which, in effect, requires an applicant to prove that the service it proposes cannot be performed by existing carriers—has outlived its usefulness, and it will no longer be applied.

"In determining applications for *motor common carrer authority*, the Commission will henceforth apply the following test in deciding what service is required by the present and future public convenience and necessity:

" '(1) An applicant must demonstrate that the service proposed will serve a useful public purpose, responsive to a public demand or need.

" '(2) The Commission will grant common carrier authority commensurate with the demonstrated need unless it is established by those opposing the application that the entry of a new carrier into the field would endanger or impair the operations of existing common carriers contrary to the public interest.' "

"Contract Carriage—In determining motor contract carrier applications, the Commission must apply certain statutory tests. First, it must be shown that the service proposed is that of a contract carrier as defined in 49 USC section 10102(12) (formerly section 203(a)(15) of the Interstate Commerce Act). Under this provision, a contract carrier is defined as one which provides service 'under continuing contract with one person or a limited number of persons either (a) for the furnishing of transportation service through the assignment of motor vehicles for a continuing period of time to the exclusive use of each person served or (b) for the furnishing of transportation services designed to meet the distinct need of each individual customer.' The Commission must also consider each contract carrier application in connection with certain criteria contained in 49 USC 10923(b)(2) (formerly section 209(b) of the Act). They require that, in determining whether to issue a permit to a contract carrier, the Commission consider 'the number of shippers to be served by the applicant, the nature of the service proposed, the effect which granting the permit would have upon the services of the protesting carriers and the effect which denying the permit would have upon the applicant and/or its shipper and the changing character of the shipper's requirements.'

"In considering *motor contract carrier* applications, the Commision's policy will be to find that the effect of a grant of contract carrier authority upon protesting carriers will not be a significant factor unless the protestants themselves can establish that such a grant would endanger or impair their operations to the extent that they would be unable to continue to provide adequate service within the scope of their authorities."

"Emergency Temporary Authorities—The Commission is considering establishing, by rule, a category of short-term, non-renewable emergency temporary authorities which would be issued upon receipt of a prospective user's certification that an immediate and urgent need for additional transportation service exists. These authorities would be limited in some respect, perhaps, in terms of a time limit, or perhaps in terms of the number of loads or trips that the carrier could preform. Longer-term temporary authorities, including any renewal of a short-term authority, would be issued only after an informal record has been completed, following *Federal Register* publication and an opportunity for the filing of protests."

"The Commission is concerned that is present policies in deciding applications of motor carriers to control, merge with, or purchase the operating authorities of other motor carrier may lead unnecessarily to the reduction of effective competition, especially with respect to short-haul markets and service at smaller communities. It has become common for a long-haul carrier to purchase the authority of a short-haul carrier, and to use that new authority solely as a means of extending its long-haul service into another market. The result is that the shippers who had relied upon the vendor's service no longer have

that service available. Admittedly, they will instead have available the vendee's new single-line service for long-haul traffic, which may well be to their advantage. However, in the short-haul market formerly served by the vendor, the amount of motor carrier competition will have been diminished. It is our firm view that a purchase proceeding should not be used solely to provide for the extension of a motor carrier's service into new markets. In determining motor finance proceedings, the Commission will authorize an acquisition of operating authorities only if the acquiring carrier establishes that it will continue to perform service similar in scope and character to that authorized by the rights being acquired. If only a new service is intended, the proper vehicle is the filing of an application for new authority.

"The Commission is also concerned that it is spending an inordinate amount of its resources considering motor carrier finance proceedings which do not have a significant effect either on the motor carrier industry or on the markets in which the carriers operate. Guidelines are now being developed to identify those motor carrier transfers and consolidations that warrant close scrutiny and possible challenge. We plan to use the guidelines to avoid a routine examination of motor carrier financial transactions and to focus only on those transactions which have discernible public interest consequences.

"In order to carry out this policy, the Commission, in reviewing motor carrier finance applications, will concentrate most heavily on the potential competitive—or anticompetitive—aspects of the transaction. The parties will be expected to develop the record fully in this respect. For our part, we will make a positive effort to increase the expertise of our staff in antitrust and related matters."

In his dissent, Mr. Stafford continued:

"A false premise underlies this proposal and, in fact, is the touchstone of almost all current Commission thinking with regard to trucking regulation. The false premise of which I speak is the theory that regulatory policies beginning in the 1930s and 1940s 'were characterized by a protectionist attitude' toward the trucking industry.

"The premise is false because it implies that protection of existing carriers was the primary consideration in the Commission's decisional process. This is wrong. The truth is that the decisional process involved a balancing of competing interests. But always the need of the public (shippers and passengers) was the primary concern of this agency. The balancing of sometimes competing interests was what Congress envisioned in the Motor Carrier Act of 1935. Congress did not want and did not need 11 Commissioners and a staff of 2,000 to act as a rubber stamp.

"Nothing evidences historical Commission policy in favor of the shipper better than the *Pan American* case cited in the proposed statement. That landmark decision requires an applicant to show that the public needs a given transportation service. Showing that, the burden switches to existing carriers to show they can meet that public need. Then, the burden reverts to the applicant, to show that its service is in some way superior to that currently available. This is the balancing; but always the assurance of adequate, responsive transportation to the public is the ultimate concern in that decisional process."

Protectionism

"The proposed statement also claims that the industry has matured and grown so sophisticated during the last 40 years of regulation that it no longer needs the alleged 'protections' referred to above. Surely, there are many more large companies, and industry leaders are far larger than any thing ever envisioned in the early days. But the large carriers are still comparatively few in number and small carriers represent the great bulk of the industry. If there ever was a need to protect the small carriers, there is no reason to believe that that need is any less today than it was 30 or 40 years ago. It is the bigger carriers, not the smaller ones, that are so much more sophisticated.

"In fact, there can be little doubt that the persons that suffer most from relaxed entry standards are the small carriers. It is generally recognized that the larger carriers could survive equally well in a regulated or an unregulated environment. They have the size, the financial wherewithal, and technical experitse, to adjust prices and meet competition at all levels. The smaller carriers, however, already are probably operating on a shoestring, and do not have the financial or operational flexibility to adjust as well to new competition."

The Real Impact

"The proposed statement of policy takes on greater significance when read in conjunction with two other recent decisions, *Liberty Trucking Co., Ext.—General Commodities* 130 MCC 243 (decided October 6, 1978) and Ex Parte 55, Sub. 26, *Protest Standards in Motor Carrier Application Proceedings* (not printed) (decided October 10, 1978). Under the proposed statement, the adequacy of existing service issue (set forth in *Pan American*) will no longer be a consideration. The third *Pan American* criterion will apparently remain intact. In *Liberty*, however, it was made clear that this criterion, potential adverse impact on existing carriers, will be virtually impossible to prove and will rarely be given consideration.

"The proposed statement also modifies the criteria that will be considered in contract carrier licensing cases again by imposing an almost impossible burden of proof on protesting carriers. In the *Protest Standards* case, it was announced that henceforth common carriers would not be allowed to protest automatically a contract carrier application. By keeping our affected common carriers, there will be no effective opposition to contract carrier applications and those carriers who are allowed to intervene will never be able to prove their case."

Conclusion

"In summary, therefore, I offer the following: The majority premises its proposal on an inaccurate statement of the way regulation has been administered. Furthermore, assuming protectionism for the industry was once an important goal of regulation, there is nothing (other than some vague, conclusory comments) to prove that small trucking companies do not still need those same protections. The proposed changes, viewed in conjunction with other recent decisions indicate that henceforth opposition to a licensing case will be a futile act. I believe that even the majority would agree that meaningful entry control in trucking will no longer exist when this statement is ultimately adopted."

Barker's Wins Authority Without Vehicle Limit

The Commission has granted Barker's School Bus Service authority to provide what has been described as a more economical type of bus service in the transportation of passengers and their baggage, in round-trip charter operations, from and to points in Indiana and extending to points in Ohio, Kentucky, Wisconsin, Illinois, parts of Missouri, and parts of Michigan.

Acting in a decision served November 29 in MC-141600, Barker's School Bus Service, Inc., Common Carrier Application, the Commission also determined that a restriction limiting the authority to service in school buses was unnecessary. It withheld issuance of the certificate, however, subject to publication of the grant of authority in the *Federal Register*.

Commissioner George M. Stafford dissented from the majority on the ground that the potential financial harm to protestant carriers "far outweighs the need for an unenforceable and speculative 'economical' service."

Earlier in the proceeding, an ICC administrative law judge approved Barker's application to provide the service. But he restricted the authority service in school buses, in an apparent effort to protect the interests of protestant carriers. On appeal, Division 1 upheld the grant of authority but deleted the restriction.

The Commission, in the latest decision, ruled that the restriction is unenforceable, would make Barker's operations more difficult, does not

enforcement is not *de minimis*. The Board seeks enforcement of its entire order in each case, to which it is entitled.

Accordingly, a decree will be entered enforcing the Board's orders.[7]

William KUREK, Walter Durdle, Robert Togikawa, Edwin Jones, and Richard Hoadley, Plaintiffs-Appellants,

v.

PLEASURE DRIVEWAY AND PARK DISTRICT OF PEORIA, ILLINOIS, an Illinois political subdivision, George L. Luthy, John R. Canterbury, James A. Cummings, Bonnie W. Noble, Clyde West, Harold A. (Pete) Vonachen, Jr., Individually and as President and Members of the Pleasure Driveway and Park District of Peoria, Rhodell [illegible]vens, Individually and as Director of Parks and Recreation, Jack M. Fuller, Individually and as Administrative Assistant, Daniel B. Ohlemiller, Individually and as Business Administrator, Frank D. Borror, Individually and as Superintendent of Maintenance, William McD. Frederick, Individually and as Attorney of Pleasure Driveway and Park District of Peoria, Golf Shop Management, Inc., an Illinois corporation, and Gordon A. Ramsey, Defendants-Appellees.

No. 76-1791.

United States Court of Appeals, Seventh Circuit.

Argued Jan. 20, 1977.

Decided May 26, 1977.

Rehearing and Rehearing En Banc Denied Aug. 11, 1977.

Golf professionals, whose concession rights to operate pro golf shops at municipal golf courses had been terminated by city park district, filed complaint against park district, president and members of park district's board of trustees, board attorney, administrative staff members, current concessionaire of pro shops, and concessionaire's sole incorporator, alleging violations of federal antitrust laws and deprivations of their federal rights under color of state law. The United States District Court for the Southern District of Illinois, Robert D. Morgan, Chief Judge, dismissed complaint, and plaintiffs appealed. The Court of Appeals, Pell, Circuit Judge, held that: (1) complaint, alleging that threat of monopolistic license and demand for uniformly increased concession fees were used by defendants as means in broader conspiracy to coerce plaintiffs into raising and fixing their retail prices and that award of monopolistic concession license to defendant current concessionaire was made to punish plaintiffs for refusing to be so coerced, and further alleging that current concessionaire made economically unrealistic "sham" proposal, not actually to be put into effect, in concert with at least some park district officials, knowing that proposal would not be acted upon as indicated in bid invitation but would, instead, be used by park district to coerce plaintiffs into conduct violative of antitrust laws, was sufficient to state cause of action and (2) with respect to count II of complaint alleging deprivation of plaintiffs' civil rights under color of state law, district court's judgment dismissing park district as defendant would be affirmed, but, district court erred in dismissing that count with respect to remaining park district officials, on basis of previous state court adjudication.

Affirmed in part; reversed and remanded in part.

1. Federal Courts ⇐932

Although the Court of Appeals reached different conclusion on sufficiency of plaintiffs' complaint, it would not disturb district

7. We express no opinion with respect to Ohmite's contentions of compliance, which it is free to assert in any further proceedings before the Board or this court arising from these orders.

...rt's denial of plaintiffs' motion for par... summary judgment, notwithstanding ... that trial court's independent consider... of that motion was precluded by its ...rmination that no cause of action was ...ged in complaint, where plaintiffs, al...gh citing freely in their briefs to mate...ls tendered in support of motion and ...esting reversal of denial thereof, never...ess made no contention at oral argu...nt that they were entitled to summary ...gment on that record.

Municipal Corporations ⇐57

City park district was unit of local ...ernment within meaning of Illinois Con...ution, deriving its powers from various ...ois statutes. S.H.A.Ill.Const.1970, art. ... 1.

Federal Civil Procedure ⇐1163

On appeal from dismissal of complaint ...t by golf professionals who had former...y been granted concessions by city park ...strict to operate pro golf shops at munici...l golf courses, alleging federal antitrust ...olations by park district's demanding five ...rcent of gross sales as concession fee and ...quiring as condition of concession renewal ...at plaintiffs raise and fix their prices, the ...urt of Appeals would take judicial notice ... facts that 1970 Illinois Constitution pro...ed for abolition of personal property tax... and authorized Illinois General Assembly ...o provide replacement revenue sources for ...al government units and that Illinois ...neral Assembly had not exercised its ...wer to create substitute revenues for ...al park districts, which facts apparently ...d park district in 1973 to consider possibilities of obtaining greater revenues from its golf course pro shop concessions. S.H.A. Ill.Const.1970, art. 9, § 5; Sherman Anti-Trust Act, § 1 et seq., 15 U.S.C.A. § 1 et seq.

6. Monopolies ⇐28(6.2)

Complaint filed by golf professionals, who had previously been granted concessions by city park district to operate pro shops at municipal golf courses, against city park district and individuals associated with park district, alleging federal antitrust violations by park district's demand for uniformly increased concession fees and threat of award of monopolistic license as alleged means in broader conspiracy to coerce plaintiffs into raising and fixing their retail prices, and further alleging that award of monopolistic license to another was made to punish them for refusing to be so coerced, was sufficient to allege cause of action. Sherman Anti-Trust Act, §§ 1 et seq., 2, 15 U.S.C.A. §§ 1 et seq., 2.

7. Federal Civil Procedure ⇐1773

Complaint should not be dismissed for failure to state claim unless it appears beyond doubt that plaintiff can prove no set of facts in support of his claim which would entitle him to relief.

8. Monopolies ⇐12(1)

Acts which may be legal and innocent in themselves, standing alone, lose that character when incorporated into conspiracy to restrain trade. Sherman Anti-Trust Act, § 1 et seq., 15 U.S.C.A. § 1 et seq.

9. Monopolies ⇐12(1)

City park district, which had substantially less than statewide jurisdiction, and its officials, had no state mandate or authority, for purposes of falling within "state-action exemption" to Sherman Act, to engage in activities whereby it allegedly demanded from its competing concession licensees increased concession fees for operation of pro golf shops at municipal golf courses and allegedly threatened award of monopolistic license to single concessionaire as alleged means of broader conspiracy to coerce concessionaires into raising and fixing their retail prices, in alleged attempt to

impose hidden sales tax, and whereby it subsequently awarded monopolistic concession license as alleged punishment to concessionaires for refusing to be so coerced. Sherman Anti-Trust Act, § 1 et seq., 15 U.S.C.A. § 1 et seq.

10. Municipal Corporations ⇐57

Subordinate units of government, notwithstanding that they derive their powers from state, are not entitled to all of federalistic deference that state would receive. U.S.C.A.Const. Amend. 11.

11. Monopolies ⇐12(1)

Where there are numerous subordinate units of government of a given type, each of same status under state law, it is more difficult to say that actions of any one of them are undertaken pursuant to state's command, or that state as sovereign imposed any anticompetitive restraints resulting from such actions; accordingly, subordinate governmental unit's "state-action" defense to alleged violation of federal antitrust laws is less obviously justified than is same claim made by state government, and antitrust "immunity" in former case cannot be automatic. Sherman Anti-Trust Act, § 1 et seq., 15 U.S.C.A. § 1 et seq.

12. Monopolies ⇐12(1)

For purposes of "state-action" defense to alleged violations of federal antitrust laws, adequate state mandates for anticompetitive activities of subordinate governmental units may be demonstrated by explicit language in state statutes, or may be inferred from nature of powers and duties given to a particular government entity. Sherman Anti-Trust Act, § 1 et seq., 15 U.S.C.A. § 1 et seq.

13. Municipal Corporations ⇐721

Illinois statutes empowering park districts to construct, equip and maintain golf courses, as well as necessary facilities pertinent thereto, and empowering them to contract in furtherance of any other corporate purposes, authorized city park district to operate pro shops at its municipal golf courses or to make contracts or leases allowing outside parties to operate such shops. S.H.A.Ill. ch. 105, §§ 8-1(a), 8-10, 8-16, 9.1-1.

14. Monopolies ⇐12(1)

Fact that city park district's conduct, with respect to its demand for increased concession fees for operation of pro golf shops at municipal golf courses from competing concession licensees and its subsequent award of monopolistic license in alleged violation of federal antitrust laws, concerned its golf courses and involved its statutory powers under Illinois law to contract and/or to lease did not convert state's grant of such powers into state authorization or mandate to use them to force private competitors to violate antitrust laws. Sherman Anti-Trust Act, § 1 et seq., 15 U.S.C.A. § 1 et seq.; S.H.A.Ill. ch. 105, §§ 8-1(a), 8-10, 8-16, 9.1-1.

15. Monopolies ⇐12(1)

If it could be proven that intended incidence of increased concession fees demanded from competing concessionaires for operation of pro golf shops at municipal golf courses by city park district, which demanded as condition to renewal of concessions that concessionaires raise and fix their prices, would have operated as illegal sales tax, it would be extremely difficult, if not impossible, to find state mandate underlying park district's alleged conduct, for purposes of falling within "state-action" exemption to alleged violations of federal antitrust laws; however such proof would add nothing directly to merits of antitrust claims against park district and would be germane only to question of state mandate. Sherman Anti-Trust Act, § 1 et seq., 15 U.S.C.A. § 1 et seq.; S.H.A.Ill. ch. 105, §§ 6-1 et seq., 8-1(b).

16. Monopolies ⇐28(6.2)

Complaint filed by golf professionals, who had previously been granted concessions by city park district for operation of pro golf shops at municipal golf courses, against party subsequently granted monopolistic concession license, alleging that defendant made economically unrealistic "sham" proposal, not actually to be put into effect, in concert with at least some park

district officials, knowing that proposal would not be acted upon as indicated in bid invitation but would, instead, be used by park district to coerce plaintiffs into conduct violative of federal antitrust laws, was sufficient to state cause of action. Sherman Anti-Trust Act, § 1 et seq., 15 U.S.C.A. § 1 et seq.

17. Monopolies ⇐12(1)

Successful bidding does not violate federal antitrust laws substantively. Sherman Anti-Trust Act, § 1 et seq., 15 U.S.C.A. § 1 et seq.

18. Monopolies ⇐28(1.5)

If current concessionaire, which was granted monopolistic concession license for operation of pro golf shops at park district's municipal golf courses, made economically unrealistic "sham" proposal not actually to be put in effect in concert with at least some park district officials, knowing that proposal would not be acted upon as indicated in bid invitation but would, instead, be used by park district to coerce concessionaires with existing licenses into conduct violative of antitrust laws, *Noerr* doctrine, under which no violation of Sherman Act can be predicated upon mere attempts to influence passage or enforcement of laws, would provide no defense to current concessionaire's alleged violations of federal antitrust laws. Sherman Anti-Trust Act, § 1 et seq., 15 U.S.C.A. § 1 et seq.

19. Monopolies ⇐28(1.5)

It could not be concluded, upon sole proof that proposal was economically unrealistic, that proposal to obtain concession for operation of pro golf shops at municipal golf courses was "mere sham" made in alleged concert with some officials of city park district in alleged effort to coerce concessionaires with existing licenses into conduct violative of federal antitrust laws. Sherman Anti-Trust Act, § 1 et seq., 15 U.S.C.A. § 1 et seq.

20. Federal Courts ⇐927

Where plaintiffs, golf professionals who had previously been granted concessions by city park district for operation of pro golf shops at municipal golf courses, attacked on appeal dismissal of second count of complaint alleging deprivation of their civil rights under color of state law only with respect to complaint's charge that they were summarily terminated from their public employment positions by park district because they asserted their rights of petition and to due process by litigating their defenses to park district's forcible entry and detainer action against them, and plaintiffs agreed that park district was properly dismissed as defendant as to that count, district court's judgment insofar as it dismissed other allegations in count and dismissed park district as defendant with respect to that count would be affirmed. 42 U.S.C.A. § 1983.

21. Judgment ⇐823(3.37)

Finding of circuit court judge, in state action for damages brought by park district for golf professionals' alleged wrongful holding over of possession of pro golf shops at municipal golf courses following termination of their concession rights, that golf professionals were terminated in their employment because they insisted on remaining in possession of shops did not preclude, on basis of prior adjudication, golf professionals' subsequent claim filed in federal district court against park district officials for alleged deprivation of their civil rights under color of state law based on their summary termination from their employment by park district allegedly because they asserted their rights of petition and to due process by litigating their defenses to park district's prior forcible entry and detainer action. 42 U.S.C.A. § 1983; S.H.A. Ill. ch. 57, § 1 et seq.

22. Judgment ⇐828(3.32)

If finding of circuit court judge in state court action had disposed of claim asserted by plaintiffs in federal action based on alleged deprivation of their civil rights under color of state law, or if state court judge had determined adversely to plaintiffs a fact critical to success of claim, relitigation in federal courts would be barred; fact that some defendants in federal action were not parties or privies in state

court suit would make doctrine of res judicata inapplicable, but it would not preclude defendants' defensive reliance on collateral estoppel. 42 U.S.C.A. § 1983.

23. Judgment ⇐663

Federal rule is that pendency of an appeal does not suspend operation of otherwise final judgment as collateral estoppel, unless appeal removes entire case to appellate court and constitutes proceeding de novo.

24. Federal Courts ⇐712

Where record on appeal from federal district court's dismissal of complaint did not reflect pendency of appeal from judgment in state court which defendants claimed precluded instant federal action, but brief of defendants represented that to be case, the Court of Appeals would take that representation as judicial admission of facts.

25. Federal Courts ⇐951

Plaintiffs' request that provisions of circuit rule governing reassignment of remanded cases be applied on remand to district court of their action for alleged federal antitrust violations and alleged deprivations of their federal rights under color of state law would be granted in interests of justice. U.S.Ct. of App. 7th Cir. Rule 18, 28 U.S.C.A.

John E. Cassidy, Jr., Peoria, Ill., for plaintiffs-appellants.

Daniel W. Hardy, Gary S. Clem, Peoria, Ill., William V. Altenberger, Wm. McD. Frederick, Peoria, Ill., for defendants-appellees.

Before FAIRCHILD, Chief Judge, PELL, Circuit Judge, and FOREMAN, District Judge.*

PELL, Circuit Judge.

[1, 2] The district court dismissed Count I of plaintiffs' complaint (alleging federal antitrust violations and invoking 15 U.S.C. §§ 1, 2, 15 and 26) on the authority of *Parker v. Brown*, 317 U.S. 341, 63 S.Ct. 307, 87 L.Ed. 315 (1943); and *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc.*, 365 U.S. 127, 81 S.Ct. 523, 5 L.Ed.2d 81 (1961), and their progeny.[1] Count II of the complaint (alleging deprivations of federal rights under color of state law and invoking 42 U.S.C. § 1983 and 28 U.S.C. §§ 1331(a) and 1343) was dismissed on the grounds that one defendant was not a "person" within the meaning of 42 U.S.C. § 1983 and that the remaining defendants were protected by a previous state court adjudication. This appeal followed.

I

[3, 4] We assume, of course, the truth of the well-pleaded facts alleged in plaintiffs' complaint, which are, in material part, as follows: Plaintiffs are five golf professionals, accredited as such by the Professional Golfers' Association. Defendant Pleasure Driveway and Park District of Peoria (the

* District Judge James L. Foreman of the Eastern District of Illinois is sitting by designation.

1. In its decision and order dismissing the complaint, the district court also denied plaintiffs' motion for partial summary judgment. The court's determination that no cause of action was alleged *a fortiori* precluded independent consideration of this motion. Although we reach a different conclusion on the sufficiency of plaintiffs' complaint, we see no reason to disturb the district court's denial of partial summary judgment. Plaintiffs did in their briefs cite freely to materials tendered in support of their summary judgment motion and requested reversal of the district court's denial of the motion, but they made no contention at oral argument that they were entitled to summary judgment on this record. Moreover, "summary procedures should be used sparingly in complex anti-trust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged conspirators, and hostile witnesses thicken the plot. . . . Trial by affidavit is no substitute for trial by jury . . . ." *Poller v. Columbia Broadcasting System, Inc.*, 368 U.S. 464, 473, 82 S.Ct. 486, 491, 7 L.Ed.2d 458 (1962) (footnote omitted). We do not foreclose the possibility that summary judgment against or in favor of some or all of the defendants may eventually be justified, but we may say with confidence that the present record does not establish that all of the facts material to plaintiffs' complaint are uncontested.

Park District) is a unit of local government within the meaning of Article VII, § 1 of the Illinois Constitution, deriving its powers from various Illinois statutes which will be referred to hereinafter. The Park District owns and operates five municipal golf courses in Peoria, Illinois. Plaintiffs were, for varying periods aggregating 83 years, employed by the Park District to perform combined duties as golf course managers, greenskeepers, and golf professionals at the Park District's courses. Each plaintiff, while so employed, was granted a concession to operate a proprietary retail business (pro shop) selling golfing equipment at his golf course. In this proprietary function each plaintiff competed with each of the others, and between them they constituted the entire public market in Peoria for high quality "pro line" equipment. Eleven individual defendants are and at pertinent times were the President and members of the Park District's Board of Trustees, the Board Attorney, and administrative staff members of the Park District. Also defendants are Golf Shop Management, Inc., the current concessionaire of the pro shops at all five courses, and Gordon Ramsey the concessionaire's sole incorporator. For present purposes, these last two defendants may be treated together (GSM).

On January 19, 1974, the Park District terminated plaintiffs' concession rights, and on February 20 of that year the Park District terminated plaintiffs' employment. On January 22, 1974, GSM was awarded pro shop concession rights at all of the Park District's five golf courses. The reasons for these events, and the manner in which they came about, are at the heart of this lawsuit.

[5] The 1970 Illinois Constitution, Article IX, § 5, provided for the abolition of personal property taxes and authorized the Illinois General Assembly to provide replacement revenue sources for local government units. The General Assembly has not exercised its power to create substitute revenues for local park districts. These facts, which we may and do judicially notice, apparently led the Park District in 1973 to consider the possibilities of obtaining greater revenues from its golf course pro shop concessions.

Plaintiffs had, for some time, been paying small concession fees; each paid only $600 yearly, except for one who was assigned only a nine-hole golf course and who paid only $300. In the late summer and fall of 1973, the terms of the concession agreements for that calendar year were revised in a confusing and apparently less than harmonious series of negotiations, with the result that plaintiffs agreed to pay 1½% of their gross receipts as a fee.

Also during the fall of 1973, GSM and members of the Park District Board and Staff agreed that GSM would make an economically unrealistic "sham" proposal, which would not be performed, to pay $90,000 a year for concession rights at the five golf courses.[2] Public bidding specifications tailored exclusively for GSM's "sham" proposal were designed and advertised, and on December 17, 1973, GSM formalized its $90,000 proposal as a bid. A Park District Board meeting scheduled for December 19 for the purpose of acting on received bids was never held.

Instead, in the language of the complaint,

> [f]rom, and after, December 17, 1973, GSM's $90,000 per year proposal . . . was coercively laced with the threat of non-renewal of plaintiffs' 1973 "leases" and summary termination of their proprietary business rights and used to induce them to raise, fix and maintain their retail, rental and service prices and pay a 5% of gross concession or "lease" fee to the PARK DISTRICT.
>
> [The Park District defendants] used the GSM proposal, with GSM agreement, to

2. The plaintiffs do not explicitly allege an agreement or an understanding that GSM would not in fact pay an annual fee of $90,000. However, it is alleged that GSM would suffer net operating losses of at least $50,000 if it paid $90,000 yearly concession fees as promised. Also, the characterization of the proposal as being a "sham" would seem to imply a lack of bona fides insofar as an intent to carry out the terms and conditions of the proposal was concerned.

coerce plaintiffs into a 5% sales taxing and price raising/fixing scheme.

. . . . . .

On January 16, 1974 the PARK BOARD declared that unless plaintiffs agreed to raise their resale, rental and service prices and pay 5% of the gross receipts before 8 a. m., Saturday, January 19, 1974, their proprietary concession rights would be awarded to GSM, Inc.

. . . . . .

The plaintiffs and each of them were not summarily terminated from their proprietary business and local governmental employment rights because of the expiration of their 1973 "leases" but because, on January 19, 1974, they refused to be coercively induced into levying unlawful 5% sales tax levies on their business consumers and because they refused to contract, combine or conspire with the effect of raising, fixing and maintaining their proprietary resale, rental and service prices contrary to Illinois and Federal antitrust laws.

The complaint also alleges that plaintiffs, even after their proprietary terminations, remained in possession of the pro shops, that they litigated the Park District's state court forcible entry and detainer suit, and that this assertion of their "rights" was the cause of their employment terminations. The Illinois Appellate Court determined that plaintiffs' defenses in that suit were not germane to the narrow question of their right to possess the pro shops and that plaintiffs' rights of possession ended at the expiration of their concession agreements on December 31, 1973. *Pleasure Driveway and Park District of Peoria v. Kurek*, 27 Ill.App.3d 60, 325 N.E.2d 650 (1975). The Illinois Supreme Court denied leave to appeal. A subsequent state court damages action by the Park District sought redress for plaintiffs' allegedly wrongful holding over of possession of the pro shops, and a judgment in the Park District's favor in the amount of $127,605 is apparently pending on appeal.

As a result of the defendants' wrongful conduct, the golfing public of Peoria is alleged to have lost the benefits of competition, suffered increased prices and all of the evils of monopolistic practices without any corresponding governmental or other benefits. Substantial injury to plaintiffs is claimed. Count I (antitrust) seeks declaratory and injunctive relief against all defendants and treble damages from all defendants except the Park District. Count II (civil rights) seeks damages from all defendants except GSM.

. . . . . .

II

[6, 7] We turn to the question of whether Count I of the complaint fails to allege a cause of action under the antitrust laws. The standard we must apply is settled beyond dispute: "a complaint should not be dismissed for failure to state a claim unless it appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." *Conley v. Gibson*, 355 U.S. 41, 45-46, 78 S.Ct. 99, 102, 2 L.Ed.2d 80 (1957). This rule has particular force in this case, where plaintiffs' motion to amend their complaint by adding a third count, which refined their antitrust theories and made some additional factual allegations, was denied by the district judge in a short decision and order.[3]

Before considering the difficult questions which this case requires us to answer, we note briefly several background matters. First, of course, we intimate no views whatsoever on the likelihood that plaintiffs will be able to prove the allegations of the complaint.[4] Also, the district court's judgment

3. The district judge characterized plaintiffs' motion as an attempt to relitigate "antitrust and constitutional violations which simply do not exist" and dismissed the possibility that a conspiracy existed as "pure fancy," although a conspiracy is plainly alleged both in the complaint he dismissed and in the amended complaint he denied leave to file.

4. Nor do we consider the question of which, if any, of the asserted components of plaintiffs' damages will prove to be recoverable under the Supreme Court's recent decision in *Brunswick*

rests solely on the conclusion that the involvement of governmental action takes the case outside the scope of the antitrust laws. Without the benefit of a factual record, the district court's views, or briefing by the parties, we decline to address any broader question than that upon which the district court rested its decision.

[8] Moreover, this case does not present the question of whether a public agency may grant a monopolistic concession license without violating the antitrust laws, where no more is alleged or proved. Nor does the case simply involve a public agency's attempt to increase operating revenues by increasing concession fees uniformly to its competing concession licensees. The case does involve both of these elements, the defendants urge us to decide the case as if it involved no more, and the district court, in dismissing the case, apparently accepted this characterization of the issues raised. But more than this is alleged by the complaint, which charges that the threat of a monopolistic license to GSM and the demand for uniformly increased fees were used by the defendants as means in a broader conspiracy to coerce plaintiffs into raising and fixing their retail prices and that the award of the GSM license was made to punish plaintiffs for refusing so to be coerced. Acts which may be legal and innocent in themselves, standing alone, lose that character when incorporated into a conspiracy to restrain trade. *See Simpson v. Union Oil Co. of California*, 377 U.S. 13, 84 S.Ct. 1051, 12 L.Ed.2d 98 (1964); *Poller v. Columbia Broadcasting System, Inc.*, *supra*, 368 U.S. at 468-69, 82 S.Ct. 486.

III

[9] We must initially determine whether the district court correctly stated the law to be that the activities of the Park District are outside the scope of the Sherman Act, either as a general matter or, at least, in the circumstances of this case. The district court based its conclusion on the "so-called state-action exemption,"[5] *Goldfarb v. Virginia State Bar*, 421 U.S. 773, 788, 95 S.Ct. 2004, 44 L.Ed.2d 572 (1975), which was articulated in *Parker v. Brown*, *supra*, and its progeny.

In *Parker*, the state of California's program for prorating the state's raisin crop so as to reduce excess supply and stabilize prices, which program was found to be consistent with federal agricultural regulations and policy, was questioned as to its validity under the Sherman Act, 15 U.S.C. § 1 et seq. The defendants were some of those charged by law with operating the program. The Supreme Court, assuming that the program would violate the Act if it were implemented by private persons, concluded nonetheless that the Act was not intended to prohibit the prorate program, which

> derived its authority and its efficacy from the legislative command of the state and was not intended to operate or become effective without that command. We find nothing in the language of the Sherman Act or in its history which suggests that its purpose was to restrain a state or its officers or agents from activities directed by its legislature. In a dual system of government in which, under the Constitution, the states are sovereign, save only as Congress may constitutionally subtract from their authority, an unexpressed purpose to nullify a state's control over its officers and agents is not lightly to be attributed to Congress.
>
> The Sherman Act makes no mention of the state as such, and gives no hint that it was intended to restrain state action or official action directed by a state.

317 U.S. at 350-51, 63 S.Ct. at 313. The anticompetitive effects of California's pro-

Corporation v. Pueblo Bowl-O-Mat, Inc., 429 U.S. 477, 97 S.Ct. 690, 50 L.Ed.2d 701 (1977).

5. As the opinions of the Supreme Court, considered herein, have recognized, *Parker* announced no rule of antitrust *exemption* or *immunity*; rather, it determined that the Sherman Act was not intended to apply in the first place to the type of state-mandated activities there at issue. Other courts nevertheless have utilized the single-word shorthand references of "exemption" or "immunity."

rate program derived from "the state['s] command"; the state adopted, organized, and enforced the program "in the execution of a governmental policy." *Id.* at 352, 63 S.Ct. at 314. This fact was repeatedly emphasized by the Court in its brief discussion of the antitrust issue, and in its conclusion: "The state . . ., as sovereign, imposed the restraint as an act of government which the Sherman Act did not undertake to prohibit." *Id.*

Goldfarb v. Virginia State Bar, supra, presented the question "whether a minimum fee schedule for lawyers published by the Fairfax County [Virginia] Bar Association and enforced by the Virginia State Bar," 421 U.S. at 775, 95 S.Ct. at 2007, violated § 1 of the Sherman Act, 15 U.S.C. § 1. Because the Virginia State Bar was "a state agency by law," *id.* at 790, 95 S.Ct. 2004, (footnote omitted), the Supreme Court addressed the State Bar's claim, based on *Parker*, that the Sherman Act did not apply to it, and rejected the claim, without dissent. The Virginia legislature had empowered the Supreme Court of Virginia to regulate the practice of law and had authorized a role for the State Bar in that regulation as an administrative agency of the Supreme Court. The state Supreme Court had developed ethical rules for lawyers, and the State Bar was empowered to issue ethical opinions on the application of the rules. Two such opinions were an important part of the State Bar's role in enforcing minimum fee schedules.

An expansive reading of some of the language in *Parker* would have suggested that the Sherman Act could not be applied to the State Bar in these circumstances, but the Supreme Court took a closer look. Because no Virginia statute referred to lawyers' fees and the Supreme Court of Virginia had taken no action requiring the use of and adherence to minimum fee schedules, it could not be said that the anticompetitive effects of minimum fees were "compelled by direction of the State acting as a sovereign." *Id.* at 791, 95 S.Ct. at 2015. The State Bar, although it acted within the scope of its general powers, had "voluntarily joined in what [was] essentially a private anticompetitive activity," *id.* at 792, 95 S.Ct. at 2015, and was not executing the mandate of the state. The Court stated that the existence of sovereign compulsion was "[t]he threshold inquiry in determining if an anticompetitive activity is state action of the type the Sherman Act was not meant to proscribe" and there was, thus, no reason to take the matter any further. *Id.* at 790, 95 S.Ct. at 2015.

After the district court dismissed the present lawsuit, the Supreme Court decided *Cantor v. Detroit Edison Co.*, 428 U.S. 579, 96 S.Ct. 3110, 49 L.Ed.2d 1141 (1976), which also bears upon the issues in this case. In *Cantor*, an electric utility, regulated by the state of Michigan, operated a program which provided "free" light bulbs to electricity customers, the costs of the program being covered by the utility's general electricity rates. An independent seller of light bulbs charged antitrust violations, and the utility defended on the theory, based on *Parker*, that the light bulb program was included in its rate tariff filed with and approved by the state Public Service Commission and that state law required it to follow the terms of the tariff as long as it was in effect. Six Justices agreed that summary judgment for the utility, based on *Parker*, had been improperly entered.[6]

Cantor, of course, did not present the precise question addressed in *Parker* and at issue here, for in *Parker* state officials executing a state program were the defendants while in *Cantor* a private party sought to rely on state law to insulate its conduct from antitrust liability. The considerations applicable to each case are necessarily less than identical. While the Court did not develop a single opinion expressing the views of a majority of its members, *see* note 6 *supra*, a majority did agree that analysis of a private party's state law defense re-

6. Mr. Justice Stevens delivered the Court's opinion, joined in whole by Justices Brennan, White, and Marshall, and in substantial part by the Chief Justice. *Id.* at 603, 96 S.Ct. 3110; Mr. Justice Blackmun concurred in the result. *Id.* at 605, 96 S.Ct. 3110.

quires consideration of whether it would be fair to subject a party to antitrust liability when he may have been caught between inconsistent commands of his state and federal sovereigns, and of factors akin to those used to determine whether federal agency regulation of a business produces an implied antitrust immunity.

In deciding *Cantor*, the Court majority emphasized the facts that no Michigan statutes purported to regulate the light bulb industry, that neither the Michigan legislature nor the Public Service Commission had ever specifically looked into the question of the desirability of a "free" light bulb program, and that other utilities regulated by the Commission did not have such a program. The Court majority concluded therefrom that the Commission's approval of the utility's program did not "implement any statewide program relating to light bulbs" and that "the State's policy is neutral on the question whether a utility should, or should not, have such a program." 428 U.S. at 585, 96 S.Ct. at 3114. That conclusion was central to the Court's disposition of the case.

Because a private actor's state law defense is at least related to a governmental body's assertion of a "state action" defense, we think the *Cantor* Court's emphasis on the lack in that case of a "statewide program" or a state policy sheds some light on the present case. We also think that *Cantor*, read with *Goldfarb*, provides important general guidance on the question of what it means to find governmental action involved in the facts of an antitrust suit.

Cantor and *Goldfarb* demonstrate beyond serious questioning that the Supreme Court is not inclined any longer, if it ever was, to accept superficial and mechanical application of a *Parker*-based "rule" that antitrust inquiry ends upon such a finding of governmental actions or laws being involved. In the years after *Parker* and before *Goldfarb* and *Cantor*, there was a tendency in many of the reported decisions to apply *Parker* broadly and to use rather general language in so doing. For example, addressing the distinct question of whether persons may join together attempting to induce governmental action with anticompetitive effects, see part V of this opinion, *infra*, the Supreme Court stated as a building-block proposition that "where a restraint upon trade or monopolization is the result of valid governmental action, as opposed to private action, no violation of the [Sherman] Act can be made out." *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc.*, *supra*, 365 U.S. at 136, 81 S.Ct. at 529. In the same context, this court's opinion in *Metro Cable Co. v. CATV of Rockford, Inc.*, 516 F.2d 220, 227 (7th Cir. 1975), used similarly broad language. Neither case involved a claim of governmental action violative of the Sherman Act, the facts of both cases were meaningfully different than those presented here, and we have, thus, no occasion to question whether the language used accurately stated the law as applied to those cases. We point out, however, that *Goldfarb* and *Cantor* undercut the validity of any such simple one-sentence "rule" as a general proposition.

[10, 11] We turn, then, to the instant complaint, and conclude that *Parker* and its progeny do not support the district court's dismissal thereof. The fact that the governmental body sued here is a park district, with substantially less than statewide jurisdiction, has significance. First, it is clear that subordinate units of government—notwithstanding that they derive their powers from a state—are not entitled to all of the federalistic deference that the state would receive. *See, e. g.*, in the area of the Eleventh Amendment to the Constitution, *Edelman v. Jordan*, 415 U.S. 651, 667 n.12, 94 S.Ct. 1347, 39 L.Ed.2d 662 (1974). More specifically, where there are numerous subordinate units of government of a given type, each of the same status under state law, it is more difficult to say that the actions of any one of them are undertaken pursuant to "the state['s] command," *Parker, supra*, 317 U.S. at 352, 63 S.Ct. 307, or that "[t]he state . . . ., as sovereign" imposed any anticompetitive restraints resulting from such actions. *Id. Goldfarb* established that Sherman Act suits against

state agencies may be maintained unless the conduct challenged is "compelled by direction of the State acting as a sovereign," 421 U.S. at 791, 95 S.Ct. at 2015, and the numerosity and potential variety of practices of subordinate units of government may often suggest that "the State's policy is neutral" on any given practice and that there is no "statewide program" which would require the sort of comity-based respect evident in *Parker*. *See Cantor, supra*, 428 U.S. at 585, 96 S.Ct. 3110.

We surely do not wish to be understood as saying that park districts and other subordinate governmental units may no longer avail themselves of a *Parker* defense to antitrust suits. Rather, we advert to the fact that a subordinate governmental unit's *Parker* claim is less obviously justified than is the same claim made by a state government, and we conclude that antitrust "immunity" in the former case cannot be automatic. Both the Third and the Fifth Circuits have recently so held. *City of Lafayette, Louisiana v. Louisiana Power & Light Company*, 532 F.2d 431 (5th Cir. 1976), *cert. granted*, 430 U.S. 944, 97 S.Ct. 1577, 51 L.Ed.2d 791 (1977) (two cities); *Duke & Company Inc. v. Foerster*, 521 F.2d 1277 (3d Cir. 1975) (three municipal corporations and a county commissioner); and *cf. Hecht v. Pro-Football, Inc.*, 144 U.S.App. D.C. 56, 444 F.2d 931 (1971), *cert. denied*, 404 U.S. 1047, 92 S.Ct. 707, 30 L.Ed.2d 736 (1972) (unincorporated instrumentality of the District of Columbia)

We realize that in the case of *State of New Mexico v. American Petrofina, Inc.*, 501 F.2d 363, 370 n.15 (9th Cir. 1974), involving antitrust counterclaims against a state and some of its political subdivisions, the Ninth Circuit has held to the contrary. *State of New Mexico* was, however, decided before *Goldfarb* and *Cantor* and we do not believe its holding as to subordinate units of government survives the test of their analysis. We simply see little sense in automatically treating as state mandates the activities of local governmental units when these activities may vary substantially from unit to unit and may be wholly lacking in any express or implied state authorization or command.

[12] We agree with the Third and Fifth Circuits that an adequate state mandate for anticompetitive activities of subordinate governmental units "may be demonstrated by explicit language in state statutes, or may be inferred from the nature of the powers and duties given to a particular government entity." *Duke & Company Inc., supra*, 521 F.2d at 1280; *accord, City of LaFayette, supra*, 532 F.2d at 434-35. The latter case properly notes that "all evidence which might show the scope of legislative intent" should be considered. *Id.* at 435 (footnote omitted).

[13, 14] Nothing in the Illinois statutory provisions governing park districts even remotely suggests that Illinois has authorized, let alone compelled, park districts to attempt to enrich themselves by coercing horizontal retail competitors operating under concession licenses to fix retail prices in what would otherwise be plain violation of the Sherman Act. Park districts are, of course, empowered to "construct, equip and maintain . . . golf . . . courses," Ill.Rev.Stat.1975, ch. 105, § 8-10, as well as "necessary facilities pertinent thereto . . . ." *Id.*, § 9.1-1. Power is also given for park districts "to contract in furtherance of any of [their] corporate purposes," *id.*, § 8-1(a), and "to lease real estate," *id.*, § 8-16. We think these provisions fully authorize the Park District to operate pro shops at its golf courses or to make contracts or leases allowing outside parties to operate such shops. If the complaint in this lawsuit alleged no more than that the Park District had substantially reduced relevant competition by operating the shops itself, foreclosing others,[7] or by determining that the "corporate purposes" of the District would be best served by contracting with a single concessionaire for

7. *Ladue Local Lines, Inc. v. Bi State Development Agency of the Missouri-Illinois Metropolitan District*, 433 F.2d 131 (8th Cir. 1970); and *Continental Bus System, Inc. v. City of Dallas*, 386 F.Supp. 359 (N.D.Tex.1974), both relied upon by defendants, are cases of this type.

the operation of the shops,[8] the case for a *Parker* defense would be stronger than it is here. That the Park District's conduct concerned its golf courses and involved its statutory powers to contract and/or to lease surely does not convert Illinois' grant of such powers into state authorization or mandate to use them to force private competitors to violate the antitrust laws.

[15] This conclusion is strengthened by the complaint's allegations that the Park District, in demanding 5% of gross sales as a concession fee and requiring as a condition of concession renewal that plaintiffs raise and fix their prices, presumably to cover the 5% fee, was effectively attempting to impose on the Peoria golfing public a 5% hidden sales tax that is illegal under Illinois law. We note that the Park District's revenue powers are limited to the levying of various property taxes, Ill.Rev. Stat.1975, ch. 105, § 6-1 et seq., and the charging of fees for the use of District facilities, *id.*, § 8-1(h), and we are aware of no authority that would authorize the Park District effectively to double the sales taxes currently in force in Illinois. If it can be proven that the concession fee's intended incidence would have operated as an illegal sales tax, it would be extremely difficult, if not impossible, to find a state mandate underlying the Park District's alleged conduct.[9] For this reason and the others indicated, we believe the district court improperly dismissed the antitrust claim against the Park District.

IV

The analysis set out in part III of this opinion applies directly only to the Park District. In *Parker*, *supra*, and in some cases applying it, however, officials of governmental units were sued, as is the case here, and it has generally and sensibly been held that where the activities of a governmental unit are outside the scope of the antitrust laws, the officials charged with performing those activities enjoy the same protections. *See Parker*, *supra*, 317 U.S. at 350-51, 63 S.Ct. 307; *E. W. Wiggins Airways, Inc.*, *supra*, 362 F.2d at 56; *Murdock v. City of Jacksonville, Florida*, *supra*, 361 F.Supp. at 1093-94. Even in such cases, however, it has sometimes been recognized that an official's actions ultra vires or in bad faith might present a different question. *Id.*

Neither in the district court nor in this court have the individual defendants associated with the Park District made any argument that they should be entitled to protection from antitrust liability even if the District was not. We see no *a priori* reason to determine, at this stage in the litigation, that such additional protection would or would not be justified. *See Duke & Company Inc.*, *supra*, where the Third Circuit reversed a dismissal in favor of three municipal corporations *and* a county commissioner after determining that *Parker* did not protect the governmental unit defendants. Accordingly, we reverse the district court's judgment in favor of the individual Park District defendants. We do not mean to imply thereby that some or all of these defendants may not be able to establish some sort of good faith defense, for neither facts nor legal argument in support of such a defense are before us. Nor do we suggest, even if some sort of good faith defense might be cognizable in appropriate cases, that proof in support of the complaint's allegations of bad faith and official actions illegal under state law might not operate to vitiate the defense in this case.

8. *E. W. Wiggins Airways, Inc. v. Massachusetts Port Authority*, 362 F.2d 52 (1st Cir. 1966), *cert. denied*, 385 U.S. 947, 87 S.Ct. 320, 17 L.Ed.2d 226, and *Murdock v. City of Jacksonville, Florida*, 361 F.Supp. 1083 (M.D.Fla. 1973), fall into this category, and *Metro Cable Co.*, *supra*, while distinguishable, is analogous. Although these cases and those cited in n. 7 *supra* were all decided before *Goldfarb* and *Cantor*, we may assume without deciding that the Sherman Act does not apply to these types of less-than-statewide governmental action.

9. Such proof, of course, would add nothing directly to the merits of plaintiffs' antitrust claims and would be germane only to the question of state mandate.

V

[16] We turn to GSM's contention, accepted by the district court, that its involvement with the facts of this case was limited to seeking the award of a governmental contract and accepting its benefits and obligations once awarded, and that the doctrine of *Eastern Railroad Presidents Conference v. Noerr Motor Freight, Inc.*, *supra*, and its progeny, protects GSM from antitrust liability. In *Noerr*, the Supreme Court held that "no violation of the [Sherman] Act can be predicated upon mere attempts to influence the passage or enforcement of laws." 365 U.S. at 135, 81 S.Ct. at 528. Three reasons for this rule were articulated. First, the Court found no Congressional purpose to regulate "political activity," and noted that an "essential dissimilarity between an agreement jointly to seek legislation or law enforcement and the agreements traditionally condemned by § 1 of the Act" counseled against construing the Act to apply to the former case. *Id.*, at 136-37, 81 S.Ct. at 529. Second, antitrust liability in such a case could reduce the flow of information on which governments depend and could, thus, impair their ability to take actions that operate to restrain competition, which ability was recognized in *Parker*, *supra*. *Id.* at 137, 81 S.Ct. 523. Third, "such a construction of the Sherman Act would raise important constitutional questions" because it would impute to Congress an intent to invade the First Amendment right of petition. *Id.* at 138, 81 S.Ct. at 530. The Court recognized that Sherman Act liability might be justified where conduct "ostensibly directed toward influencing governmental action, is a mere sham to cover what is actually nothing more than an attempt to interfere directly with the business relationships of a competitor . . . ." *Id.* at 144, 81 S.Ct. at 533. Because the *Noerr* defendants were "making a genuine effort to influence legislation and law enforcement practices," *id.*, no such argument was possible in that case.

Noerr was followed in *United Mine Workers of America v. Pennington*, 381 U.S. 657, 85 S.Ct. 1585, 14 L.Ed.2d 626 (1965), where joint labor-management inducements to the Secretary of Labor and the Tennessee Valley Authority to take action injurious to small coal operators were involved. The Court stated that

> [j]oint efforts to influence public officials do not violate the antitrust laws even though intended to eliminate competition. Such conduct is not illegal, either standing alone or as part of a broader scheme itself violative of the Sherman Act.

Id. at 670, 85 S.Ct. at 1593.

In *California Motor Transport Co. v. Trucking Unlimited*, 404 U.S. 508, 92 S.Ct. 609, 30 L.Ed.2d 642 (1972), the Court extended the *Noerr-Pennington* rule to attempts to influence administrative agencies and judicial proceedings. Because, however, the motor carrier defendants used universal resistance to competitors' applications for new operating authority to achieve their primary purpose of deterring the making of such applications, thereby injuring competitors not through governmental action but directly, the case was held to fall within Noerr's "sham" exception.

[17] The district court accepted GSM's argument that its role in the case was solely that of the successful bidder for the Park District's pro shop concessions. We may assume arguendo that if the complaint alleged no more, GSM could not be found liable under the antitrust laws. We are inclined to the view that nonliability in such a case would flow from the fact that successful bidding does not violate the antitrust laws substantively, *cf. George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc.*, 508 F.2d 547 (1st Cir. 1974), *cert. denied*, 421 U.S. 1004, 95 S.Ct. 2407, 44 L.Ed.2d 673 (1975), rather than from the principles of *Noerr*, which seem to address a different question.[10] Perhaps more to the

10. *See Hecht v. Pro-Football, Inc.*, *supra*, 444 F.2d at 940-42; and *George R. Whitten, Jr., Inc. v. Paddock Pool Builders, Inc.*, 424 F.2d 25, 32-34 (1st Cir. 1970), *cert. denied*, 400 U.S. 850, 91 S.Ct. 54, 27 L.Ed.2d 88, both of which take the position that the rationale of *Noerr* and progeny is directed to attempts to influence some significant governmental policy determi-

point would be the decision of this court in *Metro Cable Co. v. CATV of Rockford, Inc.*, *supra*, substantially relied upon by GSM, where defendant obtained the first granted cable television license in a city and successfully induced the city council not to license a potential competitor; this court found that *Noerr* and its progeny foreclosed antitrust liability.

[18] Neither the successful bidder hypothetical nor *Metro Cable*, however, involve what is alleged here. The complaint asserts that GSM made an economically unrealistic "sham" proposal, not actually to be put into effect, in concert with at least some Park District officials, knowing that the proposal would not be acted upon as indicated in the bid invitation but would, instead, be used by the Park District to coerce plaintiffs into conduct violative of the antitrust laws. If these allegations can be proved, and we must assume at this point that they can, the *Noerr* doctrine would provide no defense. This is so for several reasons.

First, except for the fact that GSM's agreement and conduct were in conjunction with governmental officials it cannot be said that there is an "essential dissimilarity" of the sort that troubled the Court in *Noerr*, 365 U.S. at 136-37, 81 S.Ct. 523, between GSM's conduct and activities traditionally held violative of the Sherman Act. *Albrecht v. Herald Co.*, 390 U.S. 145, 88 S.Ct. 869, 19 L.Ed.2d 998 (1968), is illustrative.

In *Albrecht*, the defendant newspaper publisher had attempted to coerce plaintiff, one of its independent home delivery carriers, into compliance with a resale price fixing scheme violative of the Sherman Act. Defendant had argued, *inter alia*, that its actions, which included termination of the carrier, were wholly unilateral and did not establish any conspiracy or combination within the meaning of the Act. The Supreme Court disagreed, and overturned a jury verdict in defendant's favor because it was "clear that a combination in restraint of trade existed." *Id.* at 151, 88 S.Ct. at 874. The only combination presented by the record and considered by the Court is quite like that which, as pertinent to GSM, is alleged here. Specifically, to put pressure on the plaintiff carrier, the defendant hired a subscription solicitation company to seek customers from plaintiff's delivery route for a new route. Twenty-five percent of plaintiff's customers agreed to switch carriers. The defendant then gave these customers to another carrier who knew that he would have to follow defendant's resale price policies and that he might have to return the customers to plaintiff if plaintiff acceded to the policies. The defendant's combination with the solicitation company and the new carrier who lent their business efforts to defendant's attempts to coerce the plaintiff into an antitrust violation supported Sherman Act liability.[11] The parallel to this case is obvious, as is the conclusion that GSM's alleged conduct is not essentially dissimilar to activities the Sherman Act was meant to proscribe.

Nor is the fact that GSM combined or conspired with governmental officials dispositive, for both of *Noerr*'s premises with respect to that point are undercut by the factual setting of this case. Our determination that the Park District and its officials had no state mandate or authority to engage in the activities attacked here necessarily reduces the applicability of the reasoning of *Noerr* to the degree it is based on the need of governmental units for citizen input in making decisions that *Parker* holds to be outside the scope of the Sherman Act. *See Duke & Company Inc., supra*, 521 F.2d at 1282. The *Noerr* decision also rests on a refusal to impute to Congress an intent to

nation and not a government's actions as a commercial entity.

11. Of course, only the newspaper publisher was sued in *Albrecht*, and it is at least possible that had the solicitation company and the new carrier been sued a defense based on their "insubstantial . . . connection with the restraint" might have been established. *See Goldfarb, supra*, 421 U.S. at 791 n. 21, 95 S.Ct. 2004. On the present complaint, there is no occasion for us to decide if such a defense might be developed in subsequent proceedings here.

invade the constitutional "right of the people . . . to petition the Government *for a redress of grievances.*" U.S.Const., Amendment I (emphasis added). We have some difficulty understanding how a contract proposal to a governmental unit falls within the ambit of that right, *see* note 10 *supra*, but even if it does, we think it clear that agreement with government officials to pressure others into an antitrust violation does not.

[19] Alternatively, another basis for finding *Noerr* protections inapplicable at this stage of the proceedings is that facts provable under the complaint could well establish that GSM's concession proposal was a "mere sham" within the meaning of that decision. 365 U.S. at 144, 81 S.Ct. 523. We are not prepared to say that this conclusion would inexorably follow upon the sole proof that the proposal was economically unrealistic, *see Noerr, supra*, 365 U.S. at 140-42, 81 S.Ct. 523; *Metro Cable, supra*, 516 F.2d at 231; *but see Woods Exploration & Producing Company, Inc. v. Aluminum Company of America*, 438 F.2d 1286, 1296-98 (5th Cir. 1971), *cert. denied*, 404 U.S. 1047, 92 S.Ct. 701, 30 L.Ed.2d 736 (1972), but the economically unrealistic nature of the proposal, alleged to have been known to Park District officials, might support an inference that GSM was not "making a genuine effort," *Noerr, supra*, 365 U.S. at 144, 81 S.Ct. 523, to obtain the concession rights but was instead lending its support to the Park District's attempted coercion of plaintiffs' pricing policies. The complaint is somewhat inconsistent in this regard, alleging as it does both that GSM's purpose was to obtain monopolistic concession rights and that GSM knowingly made its proposal to pressure plaintiffs into agreements which, if made, would have foreclosed the concession rights to GSM. Proof of the latter assertion, however, could establish a sham and take the case out of the *Noerr* doctrine even if that doctrine applied, which we have decided it does not.[12]

VI

[20, 21] Count II of the complaint alleges deprivations of the plaintiffs' civil rights under color of state law and is based on 42 U.S.C. § 1983. The district court dismissed Count II because, in its view, previous state court decisions based on the same operative facts had resolved dispositive facts adversely to plaintiffs. On appeal, plaintiffs attack this dismissal only with respect to the complaint's charge that plaintiffs were summarily terminated from their public employment positions because they asserted their rights of petition and to due process by litigating their defenses to the Park District's forcible entry and detainer action. Moreover, plaintiffs agree that the Park District was properly dismissed out as a defendant even as to this charge. Accordingly, we affirm the district court's judgment insofar as it dismisses the other allegations in Count II and dismisses the Park District as a Count II defendant.

With regard to the employment termination claim against the President, trustees, attorney, and staff of the Park District, we must reverse. The district court based its dismissal of this claim on the following finding of Illinois Circuit Court Judge Iben in the Park District's damages lawsuit against the golf professionals:

> [T]he reason for their termination clearly appears to have been the Defendant's [sic] [plaintiffs herein] insistence on remaining in the golf shop premises. There is abundant evidence that they stubbornly and intractably insisted through litigation, and other ways, on this claim, spurning other avenues. They can have no doubt about the reason for their discharge, i. e., their refusal to give up the premises.

Pleasure Driveway and Park District of Peoria v. Kurek et al., No. 75 L 2893 (10th

12. Defendants' suggestion that the "sham" exception operates only in a judicial setting is specious. The Supreme Court articulated the exception in the context of the *Noerr* facts, which in no way involved judicial settings. Nor does this court's determination in *Metro Cable, supra*, 516 F.2d at 228, that the existence of a judicial setting authorizes a somewhat broader inquiry into the "sham" issue even remotely support such a proposition.

Judicial Circuit, Peoria County, Nov. 14, 1975). This finding was made with reference to the golf professionals' counterclaim allegation that their employments were summarily and unlawfully terminated.

[22] We have no quarrel with the proposition that if Judge Iben's finding had disposed of the claim made here or had determined adversely to plaintiffs a fact critical to success on this claim, relitigation in the federal courts would be barred. *See Reich v. City of Freeport*, 527 F.2d 666 (7th Cir. 1975); *Phillips v. Shannon*, 445 F.2d 460 (7th Cir. 1971). The fact that the remaining defendants under Count II were not parties or privies in the state court suit would, of course, make the doctrine of res judicata inapplicable, but it would not preclude defendants' defensive reliance on collateral estoppel. *See Blonder-Tongue Laboratories, Inc. v. University of Illinois Foundation*, 402 U.S. 313, 91 S.Ct. 1434, 28 L.Ed.2d 788 (1971).

[23, 24] Nor would it matter that Judge Iben's decision has apparently been appealed,[13] for

> the federal rule is that the pendency of an appeal does not suspend the operation of an otherwise final judgment as . . . collateral estoppel, unless the appeal removes the entire case to the appellate court and constitutes a proceeding de novo.

18 Moore's Federal Practice ¶ 0.416[3], at 2254 (2d ed. 1974); *Grantham v. McGraw-Edison Company*, 444 F.2d 210, 217 (7th Cir. 1971). Illinois follows the same rule. *Sixty-Third & Halsted Realty Co. v. Goldblatt Bros.*, 342 Ill.App. 389, 96 N.E.2d 838 (1951), *aff'd*, 410 Ill. 468, 102 N.E.2d 749.

We do not agree with the district court, however, that Judge Iben's finding disposed of plaintiffs' claim herein or of critical facts pertinent to it. Illinois' Forcible Entry and Detainer Act, Ill.Rev.Stat.1975, ch. 57, § 1 et seq., plainly gives a tenant the right to remain in possession of property while litigating the question of his possessory rights. Judge Iben's determination that plaintiffs were terminated in their employments because they insisted on remaining in possession of the pro shops implies, to some extent at least, that the employment terminations occurred because plaintiffs chose to litigate their rights to possession. In fact, the finding expressly refers to plaintiffs' insistence "through litigation, and other ways" on asserting their claims to possession. Nothing in this state court judgment supports the district court's conclusion that it had been previously adjudicated that "the exercise of the right to litigate issues" was not the reason for plaintiffs' employment discharges. No other issues pertinent to Count II of the complaint were decided below or asserted in this court, so we reverse the district court's judgment of dismissal insofar as it concerns the employment discharge claim against the individual Park District defendants.

[25] For the reasons stated herein, the judgment of the district court is affirmed in part, reversed in part, and remanded for further proceedings consistent with this opinion. Plaintiffs have requested that the provisions of Circuit Rule 18 be applied on remand. We believe that the interests of justice would best be served, in the circumstances of this case, by granting that request. It is so ordered.

AFFIRMED IN PART; REVERSED AND REMANDED IN PART.

13. Our record does not reflect the pendency of an appeal in the state court case, but the brief of the defendants who seek to rely on the state judgment represents this to be the case, and we take that representation as a judicial admission of the fact.

MT. HOOD STAGES, INC., dba Pacific Trailways, Plaintiff-Appellee,

v.

The GREYHOUND CORPORATION and Greyhound Lines, Inc., Defendants-Appellants.

No. 74-1282.

United States Court of Appeals, Ninth Circuit.

June 9, 1977.

Rehearing and Rehearing En Banc Denied Aug. 3, 1977.

Bus company brought suit against a competitor for violation of the Sherman Act. The United States District Court for the District of Oregon, Alfred T. Goodwin, J., rendered judgment on a jury verdict awarding treble damages in the amount of $13,146,090, and competitor appealed. The Court of Appeals, Browning, Circuit Judge, held that: (1) where routes were granted by the Interstate Commerce Commission to competitor, over the bus company's objection, on its representation that it would not engage in the forms of predatory conduct which it subsequently engaged in, the competitor's conduct was not immune from the antitrust laws; (2) the evidence that there was fraudulent concealment of the existence of the antitrust cause of action sufficient to toll the four-year statute of limitations was sufficient for the jury; (3) the government's intervention in ICC proceedings initiated by the bus company to require the competitor to live up to its representations tolled the running of the limitations period on the bus company's antitrust cause of action, and (4) the evidence on the issue of damages was sufficient for the jury.

Affirmed.

1. Monopolies ⇐16(1)

Where routes were granted by Interstate Commerce Commission to common carrier, over competitor's objection, on representations that it would not engage in forms of predatory conduct which it subsequently engaged in, its conduct was not immune from antitrust laws. Interstate Commerce Act, § 5(11), 49 U.S.C.A. § 5(11).

2. Monopolies ⇐12(16)

Conduct is not immunized from antitrust laws merely because it falls within jurisdiction of regulatory agency, and immunity is not implied merely because applicable regulatory standard requires agency to give weight to antitrust policies. Interstate Commerce Act, § 5(11), 49 U.S.C.A. § 5(11).

3. Monopolies ⇐28(8)

In antitrust action by bus company against competitor, district court's jury instructions on monopolization in context of regulated industry were not erroneous.

4. Monopolies ⇐28(7.3)

Trial judge must be accorded wide latitude in determining relevance of evidence in antitrust cases.

5. Monopolies ⇐28(7.3)

In antitrust action, admissibility of consent decree is matter committed to district court's discretion.

6. Monopolies ⇐28(7.3)

In antitrust action by bus company against competitor, district court did not err in allowing jury to consider antitrust consent decrees entered into by competitor and United States and competitor's conduct with respect to obeying or disobeying them in determining issues of competitor's intent and purpose and reasonableness of competitor's conduct.

7. Monopolies ⇐28(8)

In antitrust action by bus company against competitor, evidence that competitor fraudulently concealed existence of antitrust cause of action tolling four-year statute of limitations was sufficient for jury. Clayton Act, § 4B, 15 U.S.C.A. § 15b.

8. Monopolies ⇐28(4)

Statute of limitations on bus company's antitrust cause of action against competitor was tolled by government's intervention in Interstate Commerce Commission proceed-

ings in which bus company sought to compel competitor to live up to its representations that it would not engage in predatory conduct, which representations were made in obtaining routes from ICC. Interstate Commerce Act, § 5(9), 49 U.S.C.A. § 5(9); Clayton Act, § 5(i), as amended 15 U.S.C.A. § 16(i).

9. Monopolies ⇐28(7.6)

In antitrust action by bus company gainst competitor alleging that competitor acquired routes circling those of bus company and thereby deprived bus company of connecting traffic with purpose and effect of eliminating bus company as substantial competitor, evidence was sufficient to sustain jury award of treble damages in amount of $13,146,090. Sherman Anti-Trust Act, §§ 1, 2, 15 U.S.C.A. §§ 1, 2.

10. Monopolies ⇐28(9)

In antitrust action by bus company against competitor alleging that competitor acquired routes circling those of bus company and thereafter deprived bus company of connecting traffic with purpose and effect of eliminating bus company as substantial competitor, award of attorney's fees of $1,250,000 was not abuse of discretion.

William W. Schwarzer, San Francisco, Cal., argued, McColloch, Dezendorf, Spears & Lubersky, Portland, Or., for defendants-appellants.

Michael N. Khourie, argued, Broad, Khourie & Schulz, San Francisco, Cal., for plaintiff-appellee.

Appeal from the United States District Court for the District of Oregon.

Before BROWNING and WRIGHT, Circuit Judges, and LINDBERG,* District Judge.

* Honorable William J. Lindberg, Senior United States District Judge, Western District of Washington, sitting by designation.

BROWNING, Circuit Judge:

Greyhound Corporation and Greyhound Lines, Inc., appeal from a judgment entered on a jury verdict awarding damages to Mt. Hood Stages, Inc., for injuries resulting from violations of sections 1 and 2 of the Sherman Act, 15 U.S.C. §§ 1, 2.[1] We affirm.

I.

Immunity

Greyhound is the largest common carrier by bus of passengers and package express in the United States, moving more than 80 percent of this traffic in the western states and operating over routes throughout the country. Mt. Hood is one of Greyhound's small competitors, operating over routes in Oregon, Idaho, and Utah. The essence of Mt. Hood's antitrust claim is that Greyhound acquired bus companies whose routes circled those of Mt. Hood and thereafter deprived Mt. Hood of connecting or "bridge" traffic with the purpose and effect of eliminating Mt. Hood as a substantial competitor.

Greyhound does not deny the sufficiency of the evidence to establish a violation of sections 1 and 2 of the Sherman Act, assuming that statute applies. Its principal contention is that Mt. Hood bases its claim upon acquisitions approved by the Interstate Commerce Commission and implementation by Greyhound of control over the acquired companies, and that such activities are immune from antitrust attack by virtue of section 5(11) of the Interstate Commerce Act, 49 U.S.C. § 5(11), applied in light of the Supreme Court's analysis in *Hughes Tool Co. v. Trans World Airlines, Inc.*, 409 U.S. 363, 93 S.Ct. 647, 34 L.Ed.2d 577 (1973).

Section 5(2) of the Interstate Commerce Act, 49 U.S.C. § 5(2), provides that one carrier may acquire another with Commission approval; the Commission is required to grant such approval, subject to any terms and conditions it deems reasonable, if the acquisition "will be consistent with the

...rom 1947 to 1956 Greyhound acquired ...t bus companies operating in the area ...vant here. Each acquisition was ap...ved by the Commission pursuant to sec...n 5(2). Mt. Hood opposed four of the ...isitions. It argued that if the acquisi...s were approved, Mt. Hood would be ...rcled and Greyhound could route traffic ...and it, depriving the public of the most ...venient service and Mt. Hood of reve...s necessary to its survival. Mt. Hood's ...ument to the Commission thus foreshad...ed its present antitrust claim.

Greyhound responded by representing to ... Commission that the acquisitions ...uld not adversely affect connecting car...s; that arrangements with such carri..., including interchange of traffic and ...n gateways, would be maintained; that ...s not the policy of Greyhound to route ...sengers over circuitous routes; that its ...nts were instructed to quote the direct ...te as well as one Greyhound route and ... passengers their choice; and that ...yhound had always carried [Mt. Hood's] ...edules in its folders and cooperated in ...ery way to acquaint the public with its ...vice and thus promote additional traffic ...d business for their lines."[2] Greyhound also represented to the Commission that Greyhound would continue a joint through-bus arrangement with Mt. Hood.[3] As the Commission later found, Greyhound intended the Commission to rely upon these representations in determining whether the proposed acquisitions were in the public interest, and the Commission did in fact rely upon them in approving the acquisitions.

In 1964 Mt. Hood filed a petition with the Commission pursuant to section 5(9) of the Act, 49 U.S.C. § 5(9),[4] asking it to reopen the acquisition proceedings and enter a supplemental order requiring Greyhound to live up to its representations. The allegations in Mt. Hood's petition to the Commission were essentially the same as those Mt. Hood later made in this antitrust suit—namely, that Greyhound had cancelled the through-bus connection, had scheduled connecting service so as to preclude reasonable connections with Mt. Hood, had directed Greyhound's agents and independent joint ticket agents to send traffic by longer routes around those of Mt. Hood, and had interfered in various ways with the distribution of Mt. Hood's schedules and the quotation of Mt. Hood's rates and services, all with the intent of injuring Mt. Hood. The United States intervened in support of Mt. Hood.

After an extensive evidentiary hearing, a hearing examiner resolved all issues against Greyhound and recommended entry of the order sought by Mt. Hood. In April, 1968, the Commission issued an opinion sustaining the examiner's findings that Greyhound had made the representations alleged, that Greyhound had intended the Commission to rely on them, that the Commission had re-

2. The quotation is from the Commission's opinion in the section 5(9) proceedings, described later. *Mt. Hood Stages, Inc.*, 104 M.C.C. 449, 452 (1968).

3. This agreement, initiated in 1949, provided for a through-bus from San Francisco, California, to Spokane, Washington, using Mt. Hood's cutoff route between Klamath Falls and Biggs, Oregon. Revenue and expenses were shared according to the miles traveled over each company's route. The arrangement shortened the San Francisco-Spokane trip by 110 miles and several hours as compared with the all-Greyhound route via Portland. It provided better service to travelers and was profitable for both companies.

4. Section 5(9) reads:

> *Supplemental orders by Commission.*—The Commission may from time to time, for good cause shown, make such orders, supplemental to any order made under paragraph (1), (2), or (7) of this section, as it may deem necessary or appropriate.

lied on them in approving the acquisitions, that Greyhound had not fulfilled the representations, and that Greyhound's actions "were inspired by a desire to stifle competition" and "injure or destroy" Mt. Hood. *Mt. Hood Stages, Inc.*, 104 M.C.C. 449, 459–63 (1968). The Commission concluded that Greyhound's failure to abide by its commitment "constitutes destructive competition in contravention of the national transportation policy, is not consistent with the public interest, and provides good cause" for a supplemental order under section 5(9) of the Act. The Commission deferred entry of a supplemental order to allow voluntary negotiations between the parties. *Id.* at 462–63.

Two months later, in July, 1968, Mt. Hood filed this suit alleging violations of the antitrust laws and common law and statutory unfair competition. With respect to the antitrust violations the complaint alleged that, beginning in 1947 and continuing to the date of the complaint, Greyhound had restrained and monopolized commerce in the carriage of passengers and their luggage between points in Oregon, Idaho, and Utah by means essentially the same as those that were the subject of the Commission's proceeding; that is, the acquisition of independent bus lines with Commission consent obtained by the misrepresentations outlined by the Commission and thereafter engaging in the destructive competitive tactics found by the Commission. Greyhound sought, unsuccessfully, to eliminate these issues from the litigation on the ground that they fell within the exclusive jurisdiction of the Commission.

In the Commission proceedings, meanwhile, the efforts of the parties to agree upon an order failed. The Commission entered its own order requiring Greyhound to restore the practices and traffic patterns existing when the acquisitions at issue were authorized, and, specifically, to restore the joint through-bus service, to revise Greyhound's schedules to permit reasonable connections with Mt. Hood, to see that through routes and fares were quoted and quoted accurately, and to eliminate other destructive practices. *Greyhound Lines, Inc. v. United States*, 303 F.Supp. 1033, 1037 (N.D.Ill.1970). A three-judge district court affirmed the Commission and issued its own order in similar terms. *Id.* at 1040–41. Following entry of the district court order enforcing the Commission decision, Mt. Hood amended the complaint in this antitrust proceeding to eliminate the prayer for injunctive relief.

In June, 1971, the United States and the Commission filed petitions with the district court in the enforcement proceeding, asking that Greyhound be held in contempt for failing to comply with the court's order enforcing the Commission's decision. The court found Greyhound had willfully failed to comply with portions of the order and held Greyhound in criminal and civil contempt. *United States v. Greyhound Corp.*, 363 F.Supp. 525 (N.D.Ill.1973). The court imposed fines totaling $600,000, *United States v. Greyhound Corp.*, 370 F.Supp. 881, 883–85 (N.D.Ill.1974), ordered Greyhound to file semiannual reports of compliance efforts for five years, and granted members of the Department of Justice staff "visitorial and document examination rights . . . that they may further monitor Greyhound's compliance efforts," *id.* at 886. Because Greyhound appeared to be attempting to comply fully, no further injunctive relief was ordered.

While the proceeding to enforce the Commission's order was in progress, this antitrust case had come to trial and concluded with the verdict in Mt. Hood's favor. The opinion of the court in the enforcement proceeding noted that "many of Greyhound's actions that were found to be in violation of the order, were also found to be in violation of the antitrust laws" in this private suit. *Id.* at 884 n. 2. The enforcement court denied Mt. Hood's prayer for damages for expenses related to the contempt action and for injury to its business as a result of the contempt, on the ground that the damages awarded in this antitrust proceeding "will adequately compensate [Mt. Hood] for any damages it may have also suffered as a result of Greyhound's contempt. This is particularly true since

many of the same acts of Greyhound that were found to be contemptuous were also involved in the private antitrust case." *Id.* at 888. The court of appeals affirmed the criminal contempt convictions, stating, "the record of this case shows a flagrant disregard of a court order" that was intended "to insure that Greyhound would comply with representations it made at the acquisition hearings and cease its predatory practices toward Mt. Hood." *United States v. Greyhound Corp.*, 508 F.2d 529, 540-41 (7th Cir. 1974).

From this recital it is evident that the conduct underlying the regulatory proceedings and that underlying the antitrust suit are essentially the same. The Commission's authority to regulate this conduct is not challenged.

[1] Whether conduct Congress has made subject to administrative regulation is exempt from the antitrust laws depends upon Congress' intent. No direct evidence of a congressional intent relevant here has been cited.[5] The only applicable statutory language dealing with the question of antitrust immunity is that found in section 5(11), quoted above. The conduct charged in this action is not within the express exemption afforded by section 5(11), particularly because provisions of this kind are strictly construed.[6] Since the Commission approved the acquisitions in reliance upon Greyhound's commitment that the conduct underlying the antitrust complaint would not occur if the acquisitions were approved, it can hardly be argued that antitrust immunity for such conduct is "necessary" to enable Greyhound "to carry into effect the transaction so approved . . . and to hold, maintain, and operate any properties and exercise any control . . . acquired through such transaction."

The inclusion of this express exemption in the statute implies a congressional intention that conduct not within the exemption remains subject to the antitrust laws.[7] But this conclusion does not always follow; despite a grant of express immunity that does not cover the conduct charged, antitrust immunity may still be implied.[8]

[2] Because of the "fundamental national policies embodied in the antitrust laws," *Otter Tail Power Co. v. United States*, 410 U.S. 366, 374, 93 S.Ct. 1022, 1028, 35 L.Ed.2d 359 (1973), however, repeal of those laws is not lightly implied from congressional adoption of a regulatory scheme.[9] Conduct is not immunized merely because it falls within the jurisdiction of the regulatory

5. The subject of antitrust immunity was touched upon briefly during the House debates. 58 Cong.Rec. 8593-94 (1919). The scope of the immunity was not discussed. Representative Sanders assured other House members that the antitrust laws were not being "wiped out"—that a merger will only be allowed if it would benefit the public. *Id.*

6. *Federal Maritime Comm'n v. Seatrain Lines, Inc.*, 411 U.S. 726, 733, 93 S.Ct. 1773, 36 L.Ed.2d 620 (1973); *United States v. McKesson & Robbins, Inc.*, 351 U.S. 305, 316, 76 S.Ct. 937, 100 L.Ed. 1209 (1956).

7. *Carnation Co. v. Pacific Westbound Conference*, 383 U.S. 213, 216-17, 86 S.Ct. 781, 15 L.Ed.2d 709 (1966); *United States v. Borden Co.*, 308 U.S. 188, 201, 60 S.Ct. 182, 84 L.Ed. 181 (1939).

8. *See International Tel. & Tel. Corp. v. General Tel. & Elec. Corp.*, 518 F.2d 913, 918-19 & n. 24 (9th Cir. 1975). *Hughes Tool Co. v. Trans World Airlines, Inc.*, 409 U.S. 363, 93 S.Ct. 647, 34 L.Ed.2d 577 (1973), the decision relied upon most heavily by Greyhound, involved an express exclusion, and it is not entirely clear that the conduct that case held to be immunized from the antitrust laws was within the express exclusion, narrowly construed. The Court suggested as much when it noted, "a statutory scheme that does not create a total exception from antitrust laws may, nonetheless, in particular and discrete instances *by implication* grant immunity from an antitrust claim." *Id.* at 385 n. 14, 93 S.Ct. at 660 (emphasis added). The Supreme Court has twice cited *Hughes Tool* as a case in which immunity was implied. *See Gordon v. New York Stock Exch., Inc.*, 422 U.S. 659, 682, 95 S.Ct. 2598, 45 L.Ed.2d 463 (1975); *United States v. National Ass'n of Sec. Dealers, Inc.*, 422 U.S. 694, 734-35, 95 S.Ct. 2427, 45 L.Ed.2d 486 (1975).

9. *United States v. National Ass'n of Sec. Dealers, Inc.*, 422 U.S. 694, 719-20, 95 S.Ct. 2427, 45 L.Ed.2d 486 (1975); *United States v. Philadelphia Nat'l Bank*, 374 U.S. 321, 350-51, 83 S.Ct. 1715, 10 L.Ed.2d 915 (1963).

agency,[10] as it did in this case. Immunity is not implied merely because the applicable regulatory standard requires the agency to give weight to antitrust policy,[11] as it did in this instance.[12]

The applicable interpretative standard was restated by the Supreme Court in *Cantor v. Detroit Edison Co.*, 428 U.S. 579, 597, 96 S.Ct. 3110, 3120, 49 L.Ed.2d 1141 (1976): "The Court has consistently refused to find that regulation gave rise to an implied exemption without first determining that exemption was necessary in order to make the regulatory act work, 'and even then only to the minimum extent necessary.'"[13] As the Court had written in the preceding term, "Certain axioms of construction are now clearly established. Repeal of the antitrust laws by implication is not favored and not casually to be allowed. Only where there is a 'plain repugnancy between the antitrust and regulatory provisions' will repeal be implied." *Gordon v. New York Stock Exchange, Inc.*, 422 U.S. 659, 682, 95 S.Ct. 2598, 2611, 45 L.Ed.2d 463 (1975).[14]

Applying these standards, we find no reason to imply immunity here. No "plain repugnancy" exists between the Interstate Commerce Act and the Sherman Act as applied to Greyhound's conduct, and it is not necessary to exempt Greyhound's conduct from antitrust restraints "to make the [Interstate Commerce Act] work." This is evident from the course taken in the administrative and judicial proceedings under both statutes. Clearly there has been no conflict between the regulatory and antitrust regimes. On the contrary, they have accommodated and supplemented each other. The policies of both have been advanced. There has been initial resort to the Commission for an application of its expertise to the factual issues relevant to whether application of the antitrust laws would be incompatible with regulatory objectives, *see Ricci v. Chicago Mercantile Exchange*, 409 U.S. 289, 93 S.Ct. 573, 34 L.Ed.2d 525 (1973), and the Commission has unqualifiedly indicated that it has not approved and continues to disapprove Greyhound's conduct under regulatory standards applied in the light of antitrust principles. *See Mt. Hood Stages, Inc.*, 104 M.C.C. 449, 458, 460–63 (1968) (citing *Marnell v. United Parcel Service of America, Inc.*, 260 F.Supp. 391 (N.D.Cal.1966)).

The remedies afforded under the two statutes have also meshed. The injunction issued in enforcement of the regulatory determination was not duplicated in the antitrust proceeding. In assessing the penalty for contempt for violation of that injunction, the court was careful to avoid the possibility of double damages. *See United States v. Greyhound Corp., supra*, 370 F.Supp. at 888. The losses sustained by Mt. Hood during the contempt period (approximately February 5, 1970, to March 15, 1973, *see id.* at 884 n.2) were only a small part of the total damages Mt. Hood sustained from the inception of Greyhound's wrongful conduct in 1947. The remaining damages could be and were recovered only in the antitrust action. Trebling the damages—an effective support for the competitive policy reflected in both statutes—could be and was accomplished only in the antitrust

13. *Quoting Silver v. New York Stock Exch.*, 373 U.S. 341, 357, 83 S.Ct. 1246, 10 L.Ed.2d 389 (1963).

14. *Quoting United States v. Philadelphia Nat'l Bank*, 374 U.S. 321, 350–51, 83 S.Ct. 1715, 10 L.Ed.2d 915 (1963). *See International Tel. & Tel. Corp. v. General Tel. & Elec. Corp.*, 518 F.2d 913, 918–19 (9th Cir. 1975).

proceeding. Since the transactions involved affected the policies of both statutes and those policies were advanced and not impaired by the application of both statutes, it is reasonable to assume Congress would have intended both to apply.

Greyhound leans heavily upon *Hughes Tool Co. v. Trans World Airlines, Inc.*, 409 U.S. 363, 93 S.Ct. 647, 34 L.Ed.2d 577 (1973). From this decision Greyhound draws the general principle that when antitrust immunity is conferred by a statute upon participants in an acquisition approved by a regulatory agency, the immunity extends to conduct made possible by the acquisition, whether or not the conduct itself was approved, at least where the agency considered the possibility such conduct might occur and retained continuing jurisdiction to regulate it in the public interest.

But antitrust exemption is implied "*only* to the *minimum* extent necessary" to make the regulatory scheme work (emphasis added). Quoting this principle, and citing *Hughes Tool* and *Pan American World Airways, Inc. v. United States*, 371 U.S. 296, 83 S.Ct. 476, 9 L.Ed.2d 325 (1963), the Supreme Court recently wrote, "[W]e have implied immunity *in particular and discrete instances* to assure that the federal agency entrusted with regulation in the public interest could carry out that responsibility free from the disruption of conflicting judgments that might be voiced by courts exercising jurisdiction under the antitrust laws." *United States v. National Association of Securities Dealers, Inc.*, 422 U.S. 694, 734-35, 95 S.Ct. 2427, 2450, 45 L.Ed.2d 486 (1975) (emphasis added).

Greyhound's generalization may accommodate the facts of both *Hughes Tool* and the present case, but it omits the distinguishing particulars that made antitrust immunity appropriate in *Hughes Tool* and would make it inappropriate here. The crux of the distinction between the two cases is that, as the Supreme Court viewed the record in *Hughes Tool*, the regulatory agency involved had considered the type of conduct which underlay the antitrust complaint and had approved it as in the public interest;[15] a successful antitrust suit therefore necessarily would have been repugnant to operation of the regulatory scheme. The opposite is true in this case; the Interstate Commerce Commission did not contemplate Greyhound's challenged conduct as likely to occur and thus did not approve such conduct when it approved the acquisitions.[16] The Commission also subsequently disapproved that conduct.

In *Hughes Tool* the Civil Aeronautics Board issued orders approving acquisition of control of TWA by Hughes Tool Co. The applicable statute relieved persons affected by such an order from operation of the antitrust laws so far as necessary "to do anything authorized, approved or required by such order." Section 414, Federal Aviation Act, 49 U.S.C. § 1384. The agency-authorized control later ended, and an antitrust suit was brought by TWA against Hughes Tool Co. based upon transactions between the two during the period of Hughes Tool Co.'s control. The antitrust complaint alleged, in effect, that the controlling company had exercised its control to dictate the completion of the transactions in a way that injured the controlled company.

Hughes Tool Co.'s control of TWA was acquired in two steps—an initial acquisition of 45.6 percent of TWA's stock, and a later acquisition increasing Hughes Tool Co.'s holdings to 80 percent. Both acquisitions were approved by the Board. In hearings relating to the second acquisition the Board examined the manner in which Hughes Tool Co. had exercised its *de facto* control over TWA in the earlier period, particularly with respect to the acquisition of new flight equipment, which was the subject matter of the transactions on which the antitrust suit was based. The Board conceded allegations

15. *See In re REA Express, Inc.*, 412 F.Supp. 1239, 1261 (E.D.Pa.1976); *Air Freight Haulage Co. v. Ryd-Air, Inc.*, 408 F.Supp. 446 (S.D.N.Y. 1976).

16. *See Scroggins v. Air Cargo, Inc.*, 534 F.2d 1124, 1131 (5th Cir. 1976).

of abuse of the kind alleged in the antitrust complaint. Nonetheless, the Board concluded that continuation and enhancement of Hughes Tool Co.'s control was in the public interest. Moreover, the Board's order required that all substantial sales transactions between the two companies be submitted to the Board for approval, and, pursuant to this requirement, the transactions upon which the antitrust complaint rested were submitted to the Board and approved as in the public interest.

The Supreme Court noted that the subject matter of the Board's approval had been the acquisition and exercise by Hughes Tool Co. of control over the same kind of transactions as those at issue. *Hughes Tool, supra*, 409 U.S. at 386, 93 S.Ct. 647. By its approval the Board had determined that such control was in the public interest and consistent with the regulatory statute's prohibitions against monopoly and restraining competition. Sections 102(e) and 408(b), Federal Aviation Act, 49 U.S.C. §§ 1302(e) and 1378(b).[17] The Court further noted that the Board had also approved the very transactions underlying the antitrust suit as meeting the same standard. 409 U.S. at 379, 387, 93 S.Ct. 647.

An antitrust suit challenging these transactions, the Court said, would seek "to negate what the Board, after full investigation, had found consistent with § 408's anti-monopoly provision, consistent with § 102's competition standard, and consistent with the public interest." *Id.* at 388, 93 S.Ct. at 661. TWA's antitrust suit sought "to terminate a relationship the continuation of which the Board had found essential to both TWA and the public interest and to penalize the type of conduct which the Board expressly contemplated and preferred would continue unless and until a different order from the Board was forthcoming." *Id.*[18] The Court concluded that the transactions were exempt from suit under the Sherman Act.[19]

17. Acquisition of control of one company by another necessarily contemplates exercise by the parent of control over the internal business operations of the subsidiary. When the agency has approved acquisition of control, exclusive agency jurisdiction over its exercise is more readily implied. *See Hughes Tool Co. v. Trans World Airlines, Inc.*, 409 U.S. 363, 355 86, 93 S.Ct. 647, 34 L.Ed.2d 577 (1973), *citing Pan American World Airways, Inc. v. United States*, 371 U.S. 296, 83 S.Ct. 476, 9 L.Ed.2d 325 (1963), as such a case.

18. *See also Pan American World Airways, Inc. v. United States*, 371 U.S. 296, 309, 83 S.Ct. 476, 9 L.Ed.2d 325 (1963).

19. The Court summarized its holding in almost identical language at two points in the opinion:

At pages 387-88, 93 S.Ct. at page 661, the Court said:

> We repeat, however, what we said in the *Pan American* case that the Federal Aviation Act does not completely displace the antitrust laws. . . . But where, as here, the CAB authorizes control of an air carrier to be acquired by another person or corporation, and where it specifically authorizes as in the public interest specific transactions between the parent and the subsidiary, the way in which that control is exercised in those precise situations is under the surveillance of the CAB, not in the hands of those who can invoke the sanctions of the antitrust laws. As noted, the parent company which controls an air carrier is subject to pervasive control by the CAB. The control which the CAB is authorized to grant or to deny under § 408 involves an appraisal of the impact of that control in terms of monopoly and competition; and the ongoing supervision entrusted to the CAB by § 415 is broad enough to put all transactions between parent and subsidiary—as originally conceived or subsequently exercised—under CAB supervision.

And again at page 389, 93 S.Ct. at page 661-662:

> We by no means hold that the Federal Aviation Act completely displaces the antitrust laws. *Pan American*, 371 U.S., at 305, 83 S.Ct. at 482. But where, as here, the CAB authorizes control of an air carrier to be acquired by another person or corporation, and where the CAB specifically authorizes as in the public interest specific transactions between the parent and the subsidiary, the way in which that control is exercised in those precise situations is under the surveillance of the CAB, not in the hands of those who can invoke the sanctions of the antitrust laws. The control which the CAB is authorized to grant or to deny under § 408 involves an appraisal of the impact of that control in terms of monopoly and competition; and the ongoing supervision entrusted to the CAB by § 415 is broad enough to put all transactions between parent and subsidiary—as originally conceived or subsequently exercised—under CAB supervision.

In sum, in *Hughes Tool*, the propriety under the regulatory statute of the activity challenged in the antitrust suit (control by Hughes Tool Co. of the manner in which its TWA subsidiary acquired new aircraft) was the central issue presented to the agency for consideration in the exercise of its regulatory authority, and the agency had resolved the issue by approving such control as in the public interest. Exemption from the antitrust laws was implied because a successful application of the antitrust laws to the conduct would have negated the regulatory agency's determination and faced the regulated carrier with inconsistent governmental commands. In the present case, as has been seen, the premise of inconsistent regulatory and antitrust demands is absent. Also unlike *Hughes Tool*, the instant suit is not brought by a subsidiary against its parent and does not challenge the effect on the acquired company of the daily intercompany control that was integral to the acquisition. *See also Pan American World Airways v. United States*, 371 U.S. 296, 83 S.Ct. 476, 9 L.Ed.2d 325 (1963). Rather, the instant suit is brought by a third party to the approved acquisitions, challenging conduct with regard to the third party that not only was not integral to the Commission's acquisition approvals but was violative of specific representations made by Greyhound at the acquisition hearings. In these circumstances, Greyhound's conduct is not immune from antitrust strictures.

20. *See Gordon v. New York Stock Exch., Inc.*, 422 U.S. 659, 688, 95 S.Ct. 2598, 45 L.Ed.2d 463 (1975).

21. For example, Greyhound requested an instruction that since the Commission had approved the acquisitions, "the manner in which defendants have used or exercised the control of these carriers" was within the exclusive jurisdiction of the Commission, and therefore the jury "must exclude from [its] consideration all conduct by defendants involving exercise of control over the acquired bus companies." Greyhound also requested instructions referring to the specific conduct the Commission had condemned, and telling the jury that regulation of such conduct was within the exclusive jurisdiction of the Commission and could not be the basis of any findings by the jury. In addition, Greyhound requested an instruction essentially in the words of the statute, telling the jury that the antitrust laws did not apply to the approved acquisitions "or to anything done by defendants which was necessary to hold, maintain or operate the properties or operating rights obtained in these approved transactions." Since the scope of the immunity conferred by the statute was a legal question for the court to decide, this instruction was properly refused. *See* note 20, *supra*, and related text. The court's decision as to the scope of the statutory immunity shaped and conditioned the court's instructions spelling out what facts the jury must find before Greyhound could be held liable.

II.

Jury Instructions and Admission of Evidence

Many of Greyhound's assertions of error in evidentiary rulings and instructions rest upon Greyhound's theory of antitrust immunity and fall with it.

Greyhound complains of the district court's "failure to instruct on Section 5(11)." It is not clear precisely what Greyhound has in mind. The extent to which Greyhound's conduct was exempt from the antitrust laws by the Interstate Commerce Act was a legal question, not an issue of fact for the jury.[20] The instructions proposed by Greyhound were properly rejected for this reason and because they reflected Greyhound's uncompromising position that the acquisitions approved by the Commission and all conduct involving exercise of control over the acquired carriers were exempt from the antitrust laws and were not to be considered by the jury for any purpose whatever.[21]

[3] The court was required to provide the jury with standards to apply in determining whether Greyhound was liable under the antitrust laws, and it did so. The court defined the elements of monopolization, attempt to monopolize and unreasonable restraint of trade in the usual way, and Greyhound does not object to these instructions in themselves. The court also told the jury that the fact that Greyhound was reg-

ulated affected what activities of Greyhound were subject to the antitrust laws; that in a regulated industry the existence of monopoly power was not evidence of monopolization, but "use of monopoly power even if lawfully acquired, to foreclose or restrain competition, to gain a competitive advantage or to eliminate a competitor" was such evidence.[22] Under these instructions the jury could not base a finding of monopolization on the approved acquisitions themselves; improper use of the acquired power was required. This was at least as favorable to Greyhound as the law warranted.

Greyhound objects to the admission of evidence regarding the administrative and related court proceedings, and to jury instructions that this evidence could be considered "in determining the issue of Greyhound's motive, intent and purpose and reasonableness of its behavior." Greyhound objects on several grounds, but primarily on the basis of Greyhound's immunity argument, which we have rejected. Greyhound's other objections are also without merit.[23] The evidence was properly used for the purpose stated by the court.

The lengthy instructions contained two brief passages apparently inspired by *Walker Process Equipment, Inc. v. Food Machinery & Chemical Corp.*, 382 U.S. 172, 177, 86 S.Ct. 347, 15 L.Ed.2d 247 (1965), and *California Motor Transport Co. v. Trucking Unlimited*, 404 U.S. 508, 92 S.Ct. 609, 30 L.Ed.2d 642 (1972). Greyhound argues that these passages permitted imposition of liability if the jury found no more than that Greyhound had perpetrated a fraud on the Commission or had acted in bad faith in the administrative and related judicial processes, rendering those processes ineffective. Even considered alone, however, both passages also required the jury to find, as a condition of liability, that the fraud or abuse of process resulted in an administrative order that conferred a monopoly or an unreasonable competitive advantage upon Greyhound. At most, therefore, the only question raised by these passages is whether the doctrine of *Walker Process* applies outside the patent field.

When the passages are read in light of the parties' contentions, the evidence in the case, and the instructions as a whole, however, we do not believe they present even this issue. Mt. Hood did not contend that the acquisitions themselves or the power Greyhound gained through them, standing alone, constituted a violation of the antitrust laws. Mt. Hood relied instead upon Greyhound's exclusionary practices made possible by the acquisitions. The instructions were generally to the same effect. The jury was not instructed on any theory that Greyhound's purchase of other carriers might constitute the unlawful acquisition of monopoly power. On the contrary, as we have seen, the jury was told that in such a

22. The quoted portion of the instruction is settled law. *See Otter Tail Power Co. v. United States*, 410 U.S. 366, 377, 93 S.Ct. 1022, 35 L.Ed.2d 359 (1973); *United States v. Griffith*, 334 U.S. 100, 107, 68 S.Ct. 941, 92 L.Ed. 1236 (1948). Indeed, section 2 is violated if exclusionary tactics are used to maintain a lawfully acquired monopoly. *Industrial Building Materials, Inc. v. Interchemical Corp.*, 437 F.2d 1336, 1344–45 (9th Cir. 1970), *interpreting United States v. United Shoe Machinery Corp.*, 110 F.Supp. 295, 343 (D.Mass.1953), *aff'd per curiam*, 347 U.S. 521, 74 S.Ct. 699, 98 L.Ed. 910 (1954). *See also TV Signal Co. v. American Tel. & Tel. Co.*, 462 F.2d 1256, 1261 (8th Cir. 1972).

23. One of these additional grounds of objection warrants brief comment. Greyhound argues that the instructions permitting use of evidence of the administrative proceedings in determining Greyhound's intent and the reasonableness of its conduct "infringe" Greyhound's constitutional privilege to seek relief before administrative agencies, *citing Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc.*, 365 U.S. 127, 81 S.Ct. 523, 5 L.Ed.2d 464 (1961). But "[i]t is well settled that First Amendment rights are not immunized from regulation when they are used as an integral part of conduct which violates a valid statute." *California Motor Transport Co. v. Trucking Unlimited*, 404 U.S. 508, 514, 92 S.Ct. 609, 613, 30 L.Ed.2d 642 (1972). The antitrust laws have been applied in many factual contexts that included utilization of administrative processes by the antitrust violator. *See, e. g., Otter Tail Power Co. v. United States*, 410 U.S. 366, 93 S.Ct. 1022, 35 L.Ed.2d 359 (1973); *Aloha Airlines, Inc. v. Hawaiian Airlines, Inc.*, 489 F.2d 203 (9th Cir. 1973).

regulated industry the mere possession of monopoly power did not violate the Sherman Act, and that abuse of monopoly power to eliminate competition was required. The only fraud or abuse of process presented by the evidence was that Greyhound represented to the Commission that it was not using and would not use any of the acquired routes to engage in the predatory practices we have outlined earlier, and that Greyhound nonetheless did so. Since these same predatory practices underlay Mt. Hood's antitrust claim, since the instructions also conditioned liability upon a finding of monopolization or unreasonable restraint of competition defined in the usual way, and since the judge properly ruled without submitting the issue to the jury that Greyhound's challenged conduct was not immunized from antitrust attack, the passages amounted to no more than a reiteration in another form of the general instruction that unreasonable restraint of competition or use by Greyhound of monopoly power to foreclose or restrain competition would violate the antitrust laws.[24]

Greyhound attacks the use made at trial of two antitrust consent decrees entered into by Greyhound and the United States. The decrees, which were admitted in evidence, prohibited Greyhound from refusing to establish through-routes with competitors and from continuing other practices the same as or similar to those charged in this suit. The jury was told it could consider the decrees and Greyhound's conduct with respect to obeying or disobeying them in determining the issues of Greyhound's intent and purpose and the reasonableness of Greyhound's behavior.

[4-6] A trial judge must be accorded "wide latitude" in determining the relevance of evidence in antitrust cases. *Gray v. Shell Oil Co.*, 469 F.2d 742, 751 (9th Cir. 1972). The admissibility of a consent decree is a matter committed to the court's discretion. *See Control Data Corp. v. IBM Corp.*, 421 F.2d 323, 326 (8th Cir. 1970). *See also Vitagraph, Inc. v. Perelman*, 95 F.2d 142, 146 (3d Cir. 1938). There was no abuse of discretion here. The court warned the jury of the limitations implicit in decrees entered into by consent, and confined their use to a proper purpose.

Greyhound's claim that the jury should not have been asked to determine whether Greyhound had a dominant share of the market because Greyhound's market share resulted from ICC-approved transactions is but another reflection of Greyhound's rejected theory of immunity.

Other objections to the instructions regarding the relevant market are without merit. While it is true that the court did not refer to the "interchangeability of services" in those terms, the court accomplished the same purpose by use of illustrations and by instructing the jury that a "relevant" market must be one for a "distinct service" with "peculiar characteristics," serving "distinctive purposes," with "dissimilar" price characteristics, and relatively "insensitive to price variations," so that an increase in bus fares would not result in large numbers of customers switching to other forms of intercity transportation. If these indices of distinctness were not found, the jury was told, intercity bus transportation would not constitute a relevant market for antitrust purposes.[25]

III.

Statute of Limitations

The jury awarded Mt. Hood damages for injuries sustained from 1953 to 1973. The applicable statute of limitations, 15 U.S.C. § 15b, bars all claims on which suit is not commenced within four years after they accrue—in this case, all claims that accrued

24. Thus even if appellant was entitled to an instruction that "fraud" must be proven by "clear and convincing" evidence, as Greyhound urges, failure to give it was harmless under Fed.R.Civ.P. 61.

25. Greyhound contends the jury was instructed as to several contentions for which there was no evidentiary support. We have examined the record with respect to each of these issues and conclude that either there was sufficient evidence to justify an instruction or the instruction was harmless under Fed.R.Civ.P. 61.

before July 5, 1964, since Mt. Hood's suit was filed on July 5, 1968. However, Mt. Hood asserts that the running of the limitations period was suspended from 1953 to 1960 by Greyhound's fraudulent concealment of its wrongdoing, and from 1964 to the date of suit by the intervention and participation of the United States in the section 5(9) proceedings brought by Mt. Hood before the Commission.[26]

[7] In accordance with the universal rule, our circuit holds that fraudulent concealment of the existence of an antitrust cause of action tolls the four-year statute of limitations provided by section 15b.[27] The jury found Greyhound had fraudulently concealed its antitrust violations from 1953 to December 14, 1960, and that Mt. Hood neither knew nor should have known of these violations prior to December 14, 1960.

Greyhound does not deny the sufficiency of the evidence to show it attempted to conceal its conduct. It argues, however, that Mt. Hood had notice of Greyhound's activities long before December 14, 1960.

The record shows that Mt. Hood complained about quoting and routing practices of Greyhound agents on various occasions during the 1953-1960 period. The record also shows, however, that Greyhound continuously represented to Mt. Hood and to the Commission that these were isolated incidents not countenanced by Greyhound's management.[28]

The record shows that Mt. Hood suspected Greyhound of unlawful conduct prior to December 14, 1960, but "[s]uspicion will not substitute for knowledge of facts from which fraud could reasonably be inferred." *Friedman v. Meyers*, 482 F.2d 435, 439 (2d Cir. 1973).

There was evidence that Mt. Hood's president expressed concern over Greyhound's expansion by acquiring other carriers, and that he also stated his belief that the consent decrees were being violated. Awareness of Greyhound's growing dominance of the market was not equivalent to notice of monopolization, however, for the acquisitions were approved by the Commission and presumably immunized from the antitrust laws. Nor was knowledge of violations of the consent decrees equivalent to such notice, for, as Greyhound itself is careful to point out, violations of consent decrees are not in themselves violations of the antitrust laws.

Greyhound asserts that Mt. Hood was charged with the duty to investigate once it became aware of facts from which antitrust violations should reasonably have been inferred.[29] But in the face of Greyhound's assurances and denials of responsibility, we cannot say as a matter of law that Mt. Hood's awareness of the growth of Greyhound's power through acquisitions and of the commission of predatory acts by some of Greyhound's agents amounted to notice

26. *See* note 4, *supra*, and related text. The period of fraudulent concealment and the government intervention tolling period can be "tacked" or "bridged" to suspend the statute for the entire period since the time between the two did not exceed four years, albeit short by only a day. *See, e. g., City of Detroit v. Grinnell Corp.*, 495 F.2d 448, 460-61 (2d Cir. 1974); *Union Carbide & Carbon Corp. v. Nisley*, 300 F.2d 561, 567-72 (10th Cir. 1962); *Maricopa County v. American Pipe & Constr. Co.*, 303 F.Supp. 77, 84-86 (D.Ariz.1969), *aff'd*, 431 F.2d 1145 (9th Cir. 1970).

27. *Westinghouse Elec. Corp. v. Pacific Gas & Elec. Co.*, 326 F.2d 575 (9th Cir. 1964); *accord, Charlotte Telecasters, Inc. v. Jefferson-Pilot Corp.*, 546 F.2d 570 (4th Cir. 1976); *Dayco Corp. v. Goodyear Tire & Rubber Co.*, 523 F.2d 389 (6th Cir. 1975); *City of Detroit v. Grinnell Corp.*, 495 F.2d 448 (2d Cir. 1974); *Crummer Co. v. Du Pont*, 255 F.2d 425 (5th Cir. 1958).

28. Greyhound argues that such representations, denials, and other attempts at concealment are immaterial, citing such cases as *Foster & Kleiser Co. v. Special Site Sign Co.*, 85 F.2d 742, 752 (9th Cir. 1936); *Feak v. Marion Steam Shovel Co.*, 84 F.2d 670, 673 (9th Cir. 1936). But as these cases demonstrate, attempts at concealment lose their relevance only when they occur after plaintiff already knew or should have known of the unlawful conduct. In the present case the jury weighed the evidence and concluded that, in part because of Greyhound's attempts at concealment, Mt. Hood neither knew or should have known of Greyhound's antitrust violation.

29. *See* note 26, *supra*, and cases cited therein.

of potential antitrust claims against Greyhound.

We conclude, therefore, that the trial court properly refused to set aside the jury's determination that Greyhound fraudulently concealed its antitrust violation, and that Mt. Hood had neither actual nor constructive knowledge of the violation until December 14, 1960.

[8] Four years later, on December 14, 1964, one day before Mt. Hood's antitrust claim would have been barred, the United States intervened in the section 5(9) proceedings Mt. Hood had instituted before the Commission in October, 1964. The trial court held that, under the provisions of 15 U.S.C. § 16(i), the intervention and the subsequent participation by the United States in the Commission proceedings tolled the running of the statute of limitations until those proceedings terminated in 1974, well after the filing of the present suit.

Section 16(i) provides that running of the limitations period on a private cause of action is suspended during the pendency of "any civil or criminal proceeding . . . instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws."[30] Greyhound argues that section 16(i) is inapplicable because the administrative proceedings were not "instituted by the United States" and because they were not proceedings "to prevent, restrain, or punish violations of any of the antitrust laws."

The literal wording of section 16(i) is not controlling. Where one possible interpretation of the language would effect the congressional purpose and another defeat it, the former is to be adopted. *Minnesota Mining & Manufacturing Co. v. New Jersey Wood Finishing Co.*, 381 U.S. 311, 321, 85 S.Ct. 1473, 14 L.Ed.2d 405 (1965). The clearly expressed purpose of section 16(i) is to further effective enforcement of the antitrust laws by permitting private litigants to have the benefits that may flow from governmental antitrust enforcement efforts. *Id.* at 320, 85 S.Ct. 1473. This purpose would be served by interpreting section 16(i) to encompass the government's intervention and participation in the section 5(9) proceedings before the Commission—a reading the language readily permits.

The proceedings were of a kind likely to produce benefits to Mt. Hood as a plaintiff in a subsequent antitrust suit.[31] The issues, as we have seen, were largely the same. Governmental investigative and legal resources were made available to fully develop the facts and the law favorable to the common position of the government and Mt. Hood on these issues. The successful resolution of these issues was critical to the defeat of Greyhound's claim of antitrust immunity.

It would make form controlling to hold section 16(i) inapplicable merely because Mt. Hood rather than the United States instituted the proceedings. The United

30. 15 U.S.C. § 16(i) reads in part:

> Whenever any civil or criminal proceeding is instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws . . . the running of the statute of limitations in respect of every private or State right of action arising under said laws and based in whole or in part on any matter complained of in said proceeding shall be suspended during the pendency thereof and for one year thereafter: *Provided, however,* That whenever the running of the statute of limitations in respect of a cause of action arising under section 15 or 15c of this title is suspended hereunder, any action to enforce such cause of action shall be forever barred unless commenced either within the period of suspension or within four years after the cause of action accrued.

31. The question is not whether the government proceedings actually conferred benefits upon the private antitrust plaintiff, but whether the character of the proceedings was such that they were likely to do so. Thus in analyzing the issue the Supreme Court spoke of government action which "may aid the private litigant." *Minnesota Mining & Manufacturing Co. v. New Jersey Wood Finishing Co.*, 381 U.S. 311, 319, 85 S.Ct. 1473, 14 L.Ed.2d 405 (1965). If actual benefit were the test, it might be impossible to determine whether the government proceedings would toll the running of limitations until those proceedings were finally concluded. Private plaintiffs would be compelled to file their antitrust suits although government proceedings involving the same subject matter were still in progress.

States intervened little more than 60 days after the filing of Mt. Hood's petition and participated actively in all subsequent stages of proceedings that required nearly a decade to complete. Nothing would be gained, and a good deal of judicial and administrative time and efficiency would be lost, if the United States were compelled to institute a separate independent proceeding in district court under 15 U.S.C. § 26 to assure private treble damage litigants the benefits Congress intended they should have from the government's action. As the trial court concluded, "the Congressional intent behind [16(i)] is better served by treating intervention by Antitrust Division lawyers as the functional equivalent of a direct action by them."

In addition to relying on the language of the statute, Greyhound argues that section 16(i) applies only when the United States initiates rather than intervenes in a proceeding because of the Supreme Court's statement in *Minnesota Mining* that the purpose of section 16(i) is to permit private parties the benefit of *"prior government actions."* 381 U.S. at 320, 85 S.Ct. 1473 (emphasis by Greyhound). Obviously, the Court was referring only to actions occurring before the antitrust suit was commenced. Greyhound's argument epitomizes the kind of "grudging interpretation" which "would collide head-on with Congress' basic policy objectives." *Id.*

When the substance of the government's intervention and participation before the Commission is examined, it fall's fairly within the class of proceedings "to prevent, restrain, or punish violations of any of the antitrust laws" to which section 16(i) applies. It is not controlling that the government's action was taken in an administrative rather than judicial setting, *Minnesota Mining, supra*, 381 U.S. at 320, 85 S.Ct. 1473, nor that the proceedings were not brought under the antitrust laws, *Luria Steel & Trading Corp. v. Ogden Corp.*, 484 F.2d 1016, 1020–21 (3d Cir. 1973); *Rader v. Balfour*, 440 F.2d 469. 473 (7th Cir. 1971). The government action suspends the running of the limitation period under section 16(i) if it "is directed at alleged conduct which appears to involve an existing or incipient violation of the antitrust laws," *Rader v. Balfour, supra*, 440 F.2d at 473, for it is government participation in such a proceeding that is likely to produce the benefits that Congress intended plaintiffs in later private treble damage actions to have.

The government's petition to intervene demonstrates that its interest lay in the possibility of antitrust violations should Mt. Hood's allegations prove correct. To explain its interest in the proceedings and its desire to participate as a party, the government stated:

> The allegations of the petition of Mt. Hood Stages, Inc. make a serious charge: that Greyhound has been permitted through the series of acquisitions the Commission approved in these proceedings to extend its system in all directions around Mt. Hood; that Greyhound has now begun to route around Mt. Hood over all Greyhound routes traffic which it used to interchange with Mt. Hood or handle in through buses over shorter and quicker routes and to engage in numerous other acts and practices which as they are described in Mt. Hood's petition (pp. 8–9) have in the aggregate the appearance of a studied effort to force Mt. Hood out of business. . . .

The petition noted Mt. Hood's increasing vulnerability to and dependence on Greyhound. It referred to Greyhound's "predatory conduct" and to the possibility of Mt. Hood's "extinction at the hands of an infinitely more powerful rival." The petition concluded:

> Behind the immediate issues before the Commission are further issues of applicability of the antitrust laws. The Commission's approvals of the acquisitions relieved Greyhound and its officials from accountability under these laws only to the extent necessary to put the acquisitions into effect. While actions taken to give effect to the acquisitions are completely immune, exercise of economic power the acquisitions conferred so as to isolate and destroy a competitor is not.

As Greyhound itself admitted before the district court in its motion to dismiss the complaint, a purpose of the Justice Department's intervention was "to assure the adequate consideration of antitrust issues."

Antitrust issues were an appropriate part of the proceedings. The Commission was required to consider the anticompetitive effects of the section 5(2) transactions in framing, and modifying, its order.[32] Early in the proceedings Greyhound was reminded "that the antitrust laws and the national transportation policy . . . offer certain broad guidelines to be kept in mind in determining this proceeding." *Mt. Hood Stages, Inc., supra*, 104 M.C.C. at 451. The Commission rested its decision upon the conclusion that Greyhound's conduct "constitutes destructive competition in contravention of the national transportation policy." *Id.* at 462.[33] In sustaining the Commission's order the district court wrote:

> It is inconceivable to us that Congress intended that destructive practices made possible by acquisition approvals may not be corrected by supplemental order under Section 5(9), especially in light of the ICC's duty to take the antitrust policy of the United States into account in its decision making.

Greyhound Lines, Inc. v. United States, supra, 308 F.Supp. at 1038.

Because Congress' purpose in enacting section 16(i) will be served by this interpretation, and because the language of the section does not bar it, we conclude that the government's intervention in the section 5(9) proceedings on December 14, 1964, tolled the running of the limitations period from that date.[34] Accordingly, Mt. Hood's antitrust complaint was timely filed.

IV.

Damages and Attorneys' Fees

[9] Greyhound contends that Mt. Hood failed to offer adequate proof either that Mt. Hood was injured by Greyhound's conduct or of the amount of the damage. With respect to the fact of damage, Greyhound's claim is frivolous. The jury may infer the fact of damage if "plaintiff proves a loss, and a violation by defendant of the antitrust laws of such a nature as to be likely to cause that type of loss." *Continental Ore Co. v. Union Carbide & Carbon Corp.*, 370 U.S. 690, 697, 82 S.Ct. 1404, 1409, 8 L.Ed.2d 777 (1962). Mt. Hood offered evidence that its bridge traffic declined sharply during the relevant period.[35] Greyhound's conduct found to violate the antitrust laws was directed at creating precisely this kind of loss.[36] There was no indication of an alternative source of loss sufficient to negate an inference that Greyhound's violation was a material cause. *Zenith Radio Corp. v. Hazeltine Research,*

32. *Port of Portland v. United States*, 408 U.S. 811, 841, 92 S.Ct. 2513, 33 L.Ed.2d 723 (1972); *Northern Lines Merger Cases*, 396 U.S. 491, 511-16, 90 S.Ct. 705, 24 L.Ed.2d 709 (1970); *McLean Trucking Co. v. United States*, 321 U.S. 67, 83-87, 64 S.Ct. 370, 88 L.Ed. 544 (1944).

33. The Commission rejected Greyhound's argument that Greyhound's practices were not in themselves unlawful on the basis of the antitrust principle that "actions which are not in themselves unlawful may be unlawful when they are part of a plan to monopolize or restrain commerce." *Mt. Hood Stages, Inc.*, 104 M.C.C. 449, 458 (1968). The Commission cited the Sherman Act case of *Marnell v. United Parcel Service of America, Inc.*, 260 F.Supp. 391 (S.D.Cal.1966).

34. We need not reach Mt. Hood's contention that the statute was tolled to December 14, 1960, by virtue of Mt. Hood's commencement of the section 5(9) proceedings.

35. Mt. Hood offered evidence, for example, that Mt. Hood's bridge traffic consisted of 25,258 passenger trips, or approximately 44 percent of the total relevant bridge traffic, in 1963 and had fallen to 930 passenger trips, or approximately three percent of the total, by 1969.

36. As described previously, Mt. Hood alleged and offered substantial evidence to prove that Greyhound had cancelled the north-south through-bus connection arrangement on which Mt. Hood depended for a substantial portion of its traffic, scheduled its services so as to preclude reasonable connections with Mt. Hood, directed independent and joint ticket agents to long-haul traffic around Mt. Hood, and interfered with distribution of Mt. Hood schedules.

Inc., 395 U.S. 100, 114 n. 9, 89 S.Ct. 1562, 23 L.Ed.2d 129 (1969).

Mt. Hood's proof of the amount of damage was less certain, and necessarily so. What Mt. Hood's business volume and profits would have been except for Greyhound's antitrust violation is inescapably uncertain. *See Flintkote Co. v. Lysfjord*, 246 F.2d 368, 391 (9th Cir. 1957). In such a case, the amount of damages may be shown "as a matter of just and reasonable inference, although the result be only approximate." *Story Parchment Co. v. Paterson Parchment Paper Co.*, 282 U.S. 555, 563, 51 S.Ct. 248, 249, 75 L.Ed. 544 (1931).

The premise of Mt. Hood's calculation of lost profits was that 95 percent of bus passengers would have traveled Mt. Hood's shorter bridge routes if they had had that choice. Greyhound asserts that Mt. Hood's premise "defies the record as well as common sense and is untenable," and therefore the entire calculation of damage fails. There was ample evidence from which the jury could reasonably infer that the shortest bus route is generally fastest, including studies comparing Greyhound's and Mt. Hood's schedules from 1950 to 1970 with regard to mileage and time.[37] Mt. Hood also introduced evidence from which the jury could reasonably infer that as a general rule 95 percent of bus passengers would take the fastest route when given a choice.[38] It is of course true that the evidence did not demonstrate to a certainty that 95 percent of passengers would have traveled Mt. Hood's shorter routes absent the restraints imposed by Greyhound's violation, but in the nature of the case proof to a certainty is not possible and is not required.

Greyhound challenges virtually every other facet of Mt. Hood's proof of damage. We have examined each of Greyhound's objections in light of Mt. Hood's response and the evidence in the record. No useful purpose would be served by a tedious recapitulation of these materials. We are satisfied that the evidence offered by Mt. Hood permitted the jury to make a reasonable and just inference of the amount of Mt. Hood's damage.[39]

[10] We also sustain the award of attorneys' fees. Greyhound objects that the amount of the award divided by the number of hours devoted to the litigation by plaintiff's attorneys yields an exorbitant hourly rate. But as the experienced trial judge stated, "compensation at an hourly rate would be inadequate in a case of this kind," which "is, in many ways, unusual, . . . its complexity and difficulty set it apart from the common run of antitrust cases, if such a category in fact exists." The trial court based the award upon knowledge gained in four years' involvement in all aspects of the case, the evidence presented by the parties on this issue, and the factors prescribed in *Twentieth Century Fox Film Corp. v. Goldwyn*, 328 F.2d 190 (9th Cir. 1964). The award represented an appropriate exercise of the district court's discretion.

Affirmed.

37. These studies were part of a larger damage study commissioned by Mt. Hood. The study was supplemented by the testimony of three expert witnesses over a two-week period. The study was based on statistical computations verified by Arthur D. Little & Co., an independent management consulting firm. Mr. Jizmagian, Arthur D. Little & Co.'s representative who supervised the study, testified that maximum use was made of all available data supplied by Greyhound, and where such data was not available every assumption and method "and every use of statistics and every use of ratios was done . . . with standard statistical techniques and there was, in my opinion, no speculative use of numbers." He concluded that the study accurately reflected Mt. Hood's damages.

38. For example, Mt. Hood's damage study, *see* note 37, *supra*, included a comparison of passenger utilization of three available "'All Greyhound' routes from Oregon and Washington points to Los Angeles," showing that more than 95 percent of the bus passengers chose the shortest of the three available routes.

39. This holding also encompasses the damage awards for express traffic Mt. Hood lost between 1964 and 1971, and for local traffic it lost between 1964 and 1970.

KENNEDY TO SEEK ABOLITION OF COLLECTIVE RATEMAKING

Senator Ted Kennedy is going to introduce legislation to abolish collective ratemaking in the trucking industry.

At a jammed press conference on Capitol Hill January 22, Senators Kennedy (D-Mass.) and Howard Metzenbaum (D-Ohio), along with a host of supporters, announced plans to seek an amendment bringing truck and freight forwarder ratemaking under the Clayton Antitrust Act, and subsequently repeal the industry's exemption from the antitrust laws.

ATA responded immediately with a statment blasting the bill, saying that it "demonstrates a complete lack of understanding of the complexities of the system of freight transportation." Our full statement is attached.

QUESTIONS ON CARTER POSITION, COMMITTEE JURISDICTION

Two aspects of this development are exceedingly important. One is the apparent waffling of the Carter administration on whether it should support the Kennedy bill. The other is that Kennedy's initiative has precipitated a fight in the Senate over committee jurisdiction.

CONFLICTING STATEMENTS

The confusion over President Carter's position stems from conflicting statements from the administration and Kennedy. Just hours before the Kennedy press conference, President Carter told a delegation of motor carrier executives that he has not made up his mind on truck deregulation. At the same time, two top Carter advisors, Ambassador-at-large Robert Strauss and assistant to the President for Domestic Affairs and Policy Stuart Eisenstat, told the executives that the administration had no position on the Kennedy bill. But at his press conference later that day, Kennedy said Carter has endorsed the bill.

(more)

ATA TELEGRAM

ATA has telegrammed President Carter a summary of the conflicting statements, saying that if he does support the bill, then continued discussion on the administration's position is moot since effective regulation is not possible without collective ratemaking. A copy of the telegram is attached.

KENNEDY, CANNON FIGHT OVER JURISDICTION

The jurisdiction fight is between Kennedy, who is chairman of the Judiciary Committee, and Senator Howard Cannon (D-Nev.), chairman of the Commerce Committee. Each thinks the issue belongs in his own committee, and Cannon has told Senate Majority Leader Robert Byrd (D-W. Va.) that he will object to joint referral and will appeal sole referral to the Judiciary Committee.

Cannon told Byrd that no matter how the bill is drafted it will go to the heart of truck regulation and thus clearly falls into the jurisdiction of the Commerce Committee. He pointed out that the Reed-Bulwinkle Act of 1948, which exempts regulated trucking from the antitrust laws, originated in the Commerce Committee, and that it would be unprecedented for legislation passed by one committee be referred to a different committee for repeal. Asked about this, Kennedy said the bill belongs in his committee because it initially addresses a provision of the Clayton Antitrust Act rather than the Interstate Commerce Act or Reed-Bulwinkle.

CANNON COMMITTEE BEST FOR TRUCKING

The industry's best hope in this is that the matter gets referred to the Commerce Committee. Cannon may wind up supporting the bill, but at least his mind is open. Kennedy has already decided that trucking should be deregulated and any hearing conducted by him would be a stacked deck.

KENNEDY SUPPORTERS

A wide range of interests were represented by supporters of the bill at Kennedy's press conference. Among them were: Alfred Kahn, the President's counsellor on inflation, who said the bill is an important plank in the administration's fight against inflation; Esther Peterson, the President's consumer affairs advisor; John Shenefield, assistant attorney general for antitrust; Rep. Parren Mitchell (D-Md.), who endorsed the bill on behalf of minority interests; Rep. Millicent Fenwick (R-N.J.); Ralph Nader, who called for legal action against the "entrenched corruption" in trucking that is protected by the "puppet" ICC; and representatives of groups such as the National Association of Manufacturers, the American Conservative Union and the American Farm Bureau.

(more)

Kennedy said this bill is a first step in a larger effort to restore genuine competition to trucking. He laid the groundwork for his proposal over the last 16 months with extensive hearings on collective ratemaking and entry.

FOR IMMEDIATE RELEASE

AMERICAN TRUCKING ASSOCIATIONS STATEMENT

WASHINGTON, Jan. 22 -- The American Trucking Associations, Inc., has issued the following statement on the proposal made by Sen. Edward M. Kennedy (D-Mass.):

Introduction of legislation to repeal the antitrust exemption which permits shippers and truckers to openly discuss rate proposals and which allows truckers to collectively vote on rate proposals to be considered by the Interstate Commerce Commission demonstrates a complete lack of understanding of the complexities of the system of freight transportation.

Collective ratemaking is at the very heart of carrying out the National Transportation Policy under which we have developed the finest freight transportation system in the world. It is only through collective ratemaking that the ICC can exercise effective rate regulation. Without the present basic ratemaking procedures, there will be discrimination, preference and prejudice between communities, regions, shippers and commodities.

It will be an impossible task for the shipping public to know with any degree of certainty the transportation charges on thousands of commodities which the 16,000 ICC carriers regularly transport among 125,000 communities throughout the country. Chaos and confusion will be the result.

-more-

It's unfortunate that Senator Kennedy advocating his position, is misleading the American people into believing that elimination of collective ratemaking would save the consumers billions of dollars. To the contrary, his legislation will increase the inflationary pressures facing the nation's economy.

22/1/79

Telegram Sent to President Carter

We wish to express our appreciation for your taking time from your busy schedule to meet with us on the issues involved in truck regulation. We also appreciated your indication that although your Staff had made recommendations concerning truck regulation, you and your Administration had not reached a final position. Prior to your joining our meeting, the subject of the legislation which Senator Kennedy was to announce later in the day came up for discussion. Senator Kennedy's legislation which would repeal the antitrust exemption which permits truckers and shippers to discuss rate proposals and which gives truckers the right to collectively propose rates to the Interstate Commerce Commission goes to the very heart of effective truck regulation. Ambassador Strauss and Assistant to the President for Domestic Affairs and Policy Stuart E. Eisenstat assured us that the Administration would take no position on the Kennedy legislation at this time. Yet less than one hour after the conclusion of our meeting at which you assured us you had taken no position on truck regulation and two of your top advisors told us the Administration would not take a position on the Kennedy legislation, Senator Kennedy announced Administration support for the measure. In addition, two of your advisors, Dr. Alfred Kahn and Ester Peterson, who were present throughout our meeting with you, attended the Kennedy press conference. Dr. Kahn publicly announced that the legislation was a key plank in the Administration's program. At a subsequent press conference we stated we did not feel this was the White House position but press reports indicate that the statements

made by Senator Kennedy and Dr. Kahn were checked with the White House and the Administration does support the Kennedy legislation.

Mr. President, this either represents a complete lack of understanding of the import of Senator Kennedy's legislation by some of your advisors or a complete breach of faith with the statements which you and your advisors made to us at our meeting. We feel it is incumbent that this matter be reconciled. We would hope you would reaffirm the position which you took with us and the position which Ambassador Strauss and Stuart Eisenstat took as to the Administration's position on the Kennedy legislation. However, if indeed the Administration supports the legislation which Senator Kennedy has introduced, then continued discussion on the Administration's position on truck deregulation would be moot. Effective truck regulation is not possible without collective ratemaking.

truck line

The attached article, from the January 8 edition of Forbes, presents a forceful defense of economic regulation of trucking. This is the kind of cogent, unbiased support for the regulatory system that should be distributed far and wide. We have obtained permission to reprint the piece, and we urge you to contact us for copies to send to your shippers, chambers of commerce and congressional delegates.

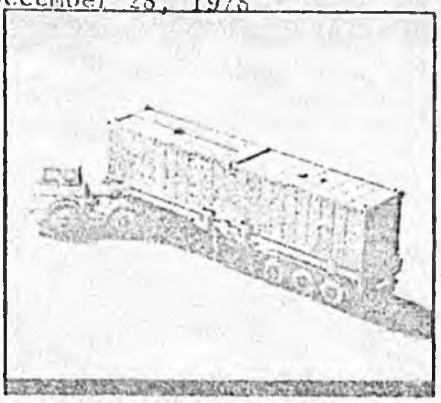
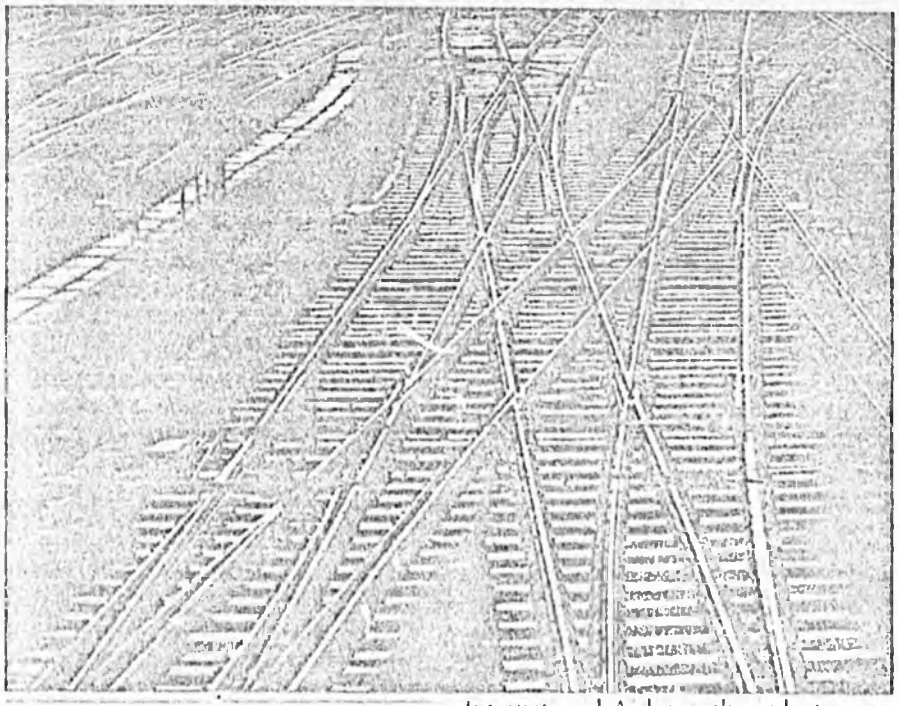
Attachment to Truck Line No. 153
December 28, 1978

Anyone who thinks deregulation will bring prosperity to the railroads and truckers as it did to the airlines had better think again.

Transportation





By James Cook

IT WAS A seemingly revolutionary, but in reality, almost stupefyingly elementary notion: What if you ended those controls on market entry and pricing the government had imposed on transportation for generations, and let carriers go about their business as they pleased? Cut prices or raise them, enter new markets or withdraw from old ones as sound business judgment would dictate? In short, what if you let competition do the job that regulation had attempted and never really succeeded very well in doing?

Academicians had talked of such things for years, but on taking over as chairman of the Civil Aeronautics Board 18 months ago, Alfred Kahn, Cornell University's regulatory guru, put them into effect. A good half of the airline industry was appalled. The result would be chaos: cutthroat price competition, sagging profits, disaster. But Kahn persisted, and before he moved on to become Carter's chief inflation fighter, the airlines were propelled—some of them kicking and screaming—into a new age.

Led by a maverick Texas outfit, Texas International Airlines, the industry was encouraged to offer sharply reduced fares to passengers who were prepared to fly at times when the industry's traditional customers didn't want to. One discount fare promptly followed another. Far from bankrupting the industry, competition proceeded to transform it. Air travel turned out to be an almost classically price-elastic market. And as the airlines began offering tickets at discounts of 50% and more, depending upon the circumstances, and filling planes that had long flown empty, they found themselves tapping a vast new market for low-priced, nonessential passenger service. Overall, demand boomed, soaring 18% in the first nine months of last year, profits expanded spectacularly and an industry that only a few years ago seemed nearly bankrupt found itself being deregulated into the biggest and best year in its history. The Forbes yardsticks make clear the impact: a breathtaking 24.8% return on equity in the latest 12 months, *vs.* a 10.5% five-year average.

From Kahn's point of view, the industry's newfound prosperity was really secondary. "One reason we wanted to move toward competition," he told Forbes, not long before taking his new job last November, "is that it will be beneficial to consumers. The other proviso is the implicit premise on our part that a competitive industry is capable of being financially healthy. It is entirely conceivable that deregulation will force people to become leaner, more efficient, more careful. They're not free to overacquire, enter markets that might not be logical for them to enter, secure in the knowledge the government will bail them out."

Congress was so impressed by Kahn's argument and the industry's performance that last fall it passed a bill enacting Kahn's notions into law—freeing the industry from control over its routes by 1982 and over fares, mergers and acquisitions by 1984. In the meantime the carriers were free to enter one new market a year, pull out of an old market on 90 days' notice, cut fares in noncompetitive markets by as much as 50% or raise them as much as 5% without CAB approval or 10% in markets where there were four or more carriers competing.

The airlines are understandably uneasy sometimes, because in slashing fares, they become vulnerable to a recessionary traffic slump. But in deregulating the industry Kahn never promised them a rose garden. Deregulation wasn't supposed to spare the industry the consequences of poor business judgment, any more than regulation itself had been able to protect it from the ruinous excess capacity poor management created twice in less than two decades.

Of course, the merits of airline deregulation haven't been proved by one summer's boom, but the first results were so spectacular that the Administration and Congress promptly began talking about doing the same thing for the rest of the carriers. President Carter hoped airline deregulation would be the precursor of deregulation in other overregulated industries, and deregulator Kahn argued there was even less reason to regulate trucking than airlines.

Maybe so, but success in airline deregulation doesn't guarantee success in the rest of the transportation business. For one thing, real reform is difficult in Washington. Airline deregulation was politically popular. The public loved the

lower fares, and the public votes. However, the general public does not much use trucks and railroads—except indirectly—and therefore, deregulation of these industries does not have the same political constituency.

And politics is only half the difference. By cutting prices, the airlines have induced more people to fly. But truckers and railroads move goods, mostly, not people. Cutting freight rates is not going to expand the size of the market. Cheaper shipping rates are unlikely to cause the appliance industry to produce more refrigerators, say, or the steel mills, more steel. Instead of expanding the market and lowering unit costs in transportation, lower prices are simply going to come out of the hides of the truckers and railroads. The ultimate result could be less competition, not more, as the weaker companies are forced under.

Congress had earlier attempted to deregulate the railroads' ratemaking in the so-called 4R Act of 1976, only to be thwarted by the Interstate Commerce Commission, which interpreted the act's market dominance provisions so narrowly as to leave a good 50% of the industry's traffic still under rigid control. The free market advocates are almost certain to try again, only this time with trucking. Senator Edward Kennedy expects to introduce legislation deregulating trucking later this year, and in November 1978 the ICC's Chairman Daniel O'Neal came up with a group of proposals that would in effect deregulate all but the common carrier truckers, ease entry even there and establish a range within which price changes would not be subject to ICC review.

The other members of the Commission greeted O'Neal's proposals with a notable lack of enthusiasm, but in November, ostensibly in the interest of saving fuel, the ICC took a major step toward deregulation by authorizing private carriers to solicit backhaul traffic from other shippers for the first time. By such means, the ICC could deregulate much of the trucking industry without any need for congressional action, just as the CAB had the airlines, but the American Trucking Association denied that the ICC had the option and took the matter to court.

Cheaper shipping rates are unlikely to cause the appliance industry to produce more refrigerators, or the steel mills, more steel. Instead of expanding the market and lowering costs, lower prices are going to come out of the hides of the truckers and railroads. The result could be less competition, not more.

Trucking will be a tough nut to crack. You would be hard put to find anybody in the regulated surface transport business who thinks that truck deregulation is a good idea—not the railroads certainly, who face the prospect of their unregulated truck competition growing worse; not the common carrier truckers, who long since have found the unregulated truckers the common enemy of all regulated carriers; and not the Teamsters Union, which wants to keep the trucking rates high so as to have a healthy cow to milk.

The airlines basically compete with each other and only to a small degree with buses and Amtrak. But the trucks, barges and railroads compete not only with one another but also with other trucks, rails and barges.

Regulation has kept the trucks and water carriers healthy and prosperous, but it has helped to bankrupt a good portion of the railroad industry—not simply the seven companies absorbed by Conrail, but the Boston & Maine, the Rock Island and the Milwaukee as well—and threatens such once-prosperous carriers as the Illinois Central Gulf and conceivably even the Seaboard Coast Line. The 5.3% five-year return on capital the railroads average on the Fortune yardsticks, as against the 13.1% of the motor carriers, understates the disparity. As the ICC calculates it, the railroads last year earned only 1.3% on their net investment, *vs.* 23.8% for the truckers, 21.07% for the water carriers.

That's why Kahn and Kennedy chose the trucks as their next target.

Deregulation is never going to bring any new competitors into the railroad

busin.ss--it costs too much. Who would invest new capital in an industry where its largest and most successful companies average less than 6% on their capital? But trucking is a different matter. In an industry where a driver can buy a $60,000 rig for maybe $9,000 down and go into business for himself, open entry could conceivably transform the industry. Thus deregulation will bring a rash of new competition into the trucking business: competitors who will price-cut their way into the market and set off a wave of mergers that will transform trucking into a far more concentrated business than it is now. The short haul and regional truckers may well be squeezed out, and the big national companies—outfits like Yellow Freight, Roadway Express, Consolidated Freightways and McLean Trucking—will come to dominate the industry. And it is likely that the same will happen with the entrenched companies in freight forwarding (Transway International) or contract leasing (Leaseway International).

Deregulating the truckers while leaving the railroads regulated could, in addition to disrupting trucking, come close to being fatal to the railroads, with newly deregulated truckers price-cutting into the railroads' remaining markets.

"I think," says ICC Chairman Daniel O'Neal, "the government will have to be concerned about the disruptive effect of changes in the system. Actions we take as far as motor carriers are concerned should be read in conjunction with how they affect the railroads. Some commodities carried by the railroads are vulnerable to motor carrier competition—agricultural commodities, anything that moves in full trucks. There's one reason for regulating the motor carriers: because of their threat to the railroad industry."

Sad to say, O'Neal has a point.

Deregulation isn't likely to produce anything like the boom conditions that airline regulation has. Freight transportation, unlike passenger traffic, is basically price inelastic. The volume of freight traffic is determined by the level of the economy. So what you may do by deregulating ratemaking is to divert traffic from one carrier or mode of transport to another.

All you really may accomplish is to reduce the general rate level of the carriers involved, a reduction that the railroads at least no longer have the financial resources to withstand.

And the truth is that, in terms of their costs, transportation rates are in general probably too low. Veteran rail analyst, Isabel Benham, head of Princeton, Kane Research, calculates that since the end of the 19th century the U.S. government has spent nearly $130 billion developing U.S. highways and waterways, as against $2 billion on railroads, and this indirect subsidy has enabled barges and truckers to price their services for less than they would have otherwise and to force the railroads, in competing with them, to underprice their services as well. The result has been a progressive dissipation of railroad capital and a corresponding inability to provide the service that in many transportation markets is far more important than costs. "The motor carriers," says ICC Chairman O'Neal, "are doing well because they provide pretty darned good service."

"Actions we take as far as motor carriers are concerned," says ICC Chairman O'Neal, "should be read in conjunction with how they affect railroads. Some railroad commodities are vulnerable to motor carrier competition. There's one reason for regulating motor carriers: because of their threat to the railroad industry."

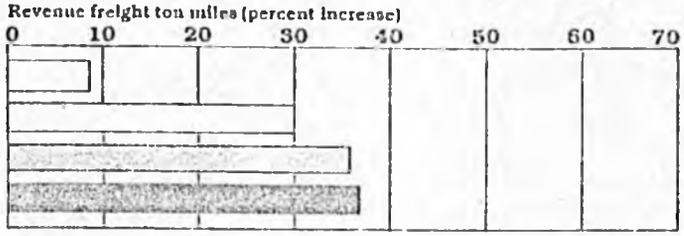
And they do. So good, in fact, that even with a rate level nearly five times that of the railroads they have easily walked off with the market. Transportation is a volume business, and the volume—the most profitable volume at that—has increasingly gone to the truckers and water carriers, leaving the railroads particularly vulnerable to the cost inflation of the Seventies. Railroad freight traffic has admittedly expanded 8% since 1970 but that compares with a 36% gain for the truckers, 37% for the barges. And the railroads, squeezed for the profits they need to keep going, have responded by increasing their rates far more rapidly than the truckers have—increasing them, over the past eight years, 60% on average *vs.* 40% for the truckers—a move that has probably cost them even more of the growth they might otherwise have been entitled to.

What the railroads obviously need is still higher rates—to restore their basic earning power—and greater flexibility in adjusting them up or down to suit the competitive environment. But ratemaking freedom is probably no longer enough. What the railroads need even more is the imposition of user charges on their competitors to even out the inequities created by government subsidized highways and waterways, and this would almost certainly mean that the rate level in both railroads and trucking would rise.

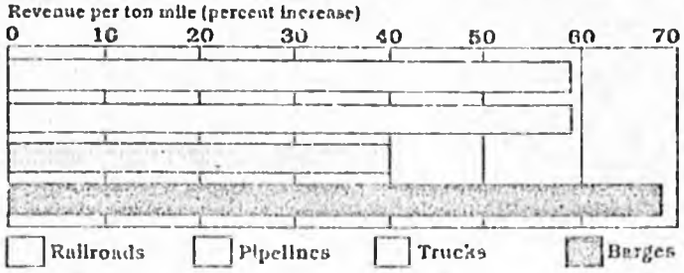
But even without user charges, Morgan Stanley's transportation expert Andras Peterey argues, long-term deregulation of trucks and rails is unlikely to produce the lower prices across the board the politicians dream about. It would only lessen competition in trucking, encourage prices to rise and could further weaken the railroad industry. "The curious effect," he says, "would probably mean many increases rather than decreases in freight rates. Once the weaker firms are squeezed out, prices will go up again." Deregulation in the air cargo in-

Growth rates & rate growth

Transportation may be a growth industry, but not everyone in it is growing at the same pace. Between 1970 and 1977, revenue ton miles increased only modestly for the once dominant railroads, but boomed for the competing oil pipelines, truckers and barges.



Over the same period the railroads magnified their competitive disadvantage by increasing their rates far faster than the truckers and increasing them nearly as fast as the lower cost barges and oil pipelines. The disadvantage is growing.



dustry may have got the air cargo business booming at last, but the result so far has been higher, not lower, fares. Kahn explains the anomaly by suggesting that fares were probably too low—just as they probably are throughout the surface transportation industry. So in the end deregulation may prove to be not the deflationary device some of its proponents suggest but an inflationary one—or if not that, one which encourages transportation to reflect its true costs for the first time in generations.

Deregulation is popular in Washington these days and *that* is good news for those who believe in free enterprise. But Congress would be wise to go slow on deregulating trucks and railroads because lower prices are not what the railroads need to survive. As things now stand, because freight rates may already be too low, the taxpayer subsidizes trucks and barges, and railroad stockholders and bondholders subsidize most railroads. If the aim of deregulation is to bring freight rates down, the result may be to increase the need for subsidies and to reduce rather than enhance competition. That's a sad thing to say but probably true.

If the politicians and bureaucrats still dream of the benefits of trucking deregulation, hardly anyone seriously suggests that this offers any solution for ocean shipping. Companies like Alexander & Baldwin (Matson Lines), Transway (Waterman Steamships), Seatrain Lines or Moore-McCormack have suffered too long at the hands of cut-rate foreign, and largely Russian, competition. What these carriers want is regulation in order to stay alive: rigid rate regulation in exchange for a secured market position. "You can't have a staunch allegiance to antitrust," says Transway's vice president-law, Lawrence Berman, "when the rules of the game are not controlled by the U.S. So pooling arrangements are the name of the game."

In short, there is no easy answer to the question of deregulation. Can one opt for inconsistency? Favor deregulation for the railroads, favor only restricted deregulation for the truckers? One probably can. What transportation needs is pragmatic, not ideological, solutions. The basic problem, of course, is how do you unscramble eggs. And the answer is, of course, you can't do it. All you can hope to do is stir them around so they don't get too lumpy.

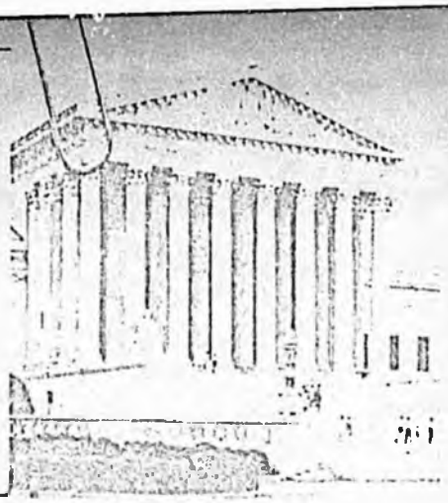
Supreme Court Report

by Rowland L. Young



ON JULY 6, a divided Court announced what appears to be a substantial limitation on the doctrine of *Parker* v. *Brown*, a 1943 decision holding that the Sherman Act does not apply to restraints on trade imposed by state law. The new decision seems to have narrowed *Parker* to a holding that only state officials, acting under state legislation, are exempt. The decision leaves the law in doubt, because only three justices joined in Justice Stevens's plurality opinion, with Chief Justice Burger and Justice Blackmun concurring only in the result. Justice Stewart's strong dissent, in which Justices Powell and Rehnquist join, points out that the new decision is not entirely consistent with some of the language in *Goldfarb* v. *Virginia State Bar*, 421 U.S. 773 (1975).

This month's report covers two other antitrust law cases, one holding that an allegation of a conspiracy to prevent the expansion of a proprietary hospital was closely enough connected with interstat commerce to raise a Sherman Act que tion, and the other dealing with the app' cation of the Robinson-Patman Act drugs sold to nonprofit hospitals at lower prices than to retail druggists.

On May 24, the Court refused to find an "act of state" in the refusal of Cuban authorities to return money mistakenly paid to confiscated Cuban businesses instead of to the former owners. The case is curious, both because of the complex factual situation and because only three justices (Chief Justice Burger, Justices Powell and Rehnquist) join in the major premise of Justice White's opinion for the Court—namely, that the act of state doctrine does not apply to commercial obligations of governments.

On June 21, the Court upheld a city ordinance that required voter approval of any changes in zoning restrictions. It also upheld a local school board's right to fire teachers who struck in defiance of state law. Other cases include one involving the constitutionality of a referendum on a zoning change and another on the validity of presidentially imposed licenses for the importation of crude oil.

State Sanction No Excuse for Sherman Act Violation

The first antitrust case was *Cantor* v. *Detroit Edison Company*, ___ U.S. ___, 49 L.Ed. 2d 1141, 96 S.Ct. 3110, 44 U.S.L.W. 5357, decided July 6. The decision held that action by a regulated public utility was not immune from Sherman Act liability even though the action in question was required by a state regulatory board.

Detroit Edison supplies the electricity for southeastern Michigan. It also furnishes about half of the light bulbs used in that area. Customers are billed for their electricity and are entitled to light bulbs at no additional charge. The bulb exchange program is included in the co. pany's tariff and could not be changed without the approval of the Michigan Public Service Commission.

Cantor, a druggist who also sells light bulbs, brought this Sherman Act suit against Detroit Edison, alleging that Edison's providing light bulbs was an unreasonable restraint of trade in violation of the Sherman Act. Both the district court and the Sixth Circuit held that the practice was exempt from federal antitrust laws under *Parker* v. *Brown*, 317 U.S. 341 (1943), a case that held that action by state officials under state legislation d.. not violate the Sherman Act. See 513 F. 2d 630 (1975).

In the new case, the Court reversed and remanded on the ground that the exemption created in *Parker* is limited to official action taken by state officials, and that here the only defendant was a private utility. The opinion of the Court was written by Justice Stevens. The Court reasoned that, while Detroit Edison could not maintain its lamp exchange program without the approval of the state commission and could not abandon it without permission, the option of having such a program was primarily the company's. "There is nothing unjust in a conclusion that respondent's participation in the decision is sufficiently significant to require that its conduct implementing the decision, like comparable conduct by unregulated businesses, conform to applicable federal law," the Court said.

The Court also rejected the argument that federal antitrust laws should not be applied in areas of the economy pervasively regulated by state agencies: "... [M]erely because certain conduct may be subject both to state regulation and to the fe leral antitrust laws does not necessarily mean that it must satisfy inconsistent standards," the Court declared. "second, even assuming inconsistency, we would not accept the view that the federal interest must inevitably be subordinated to the State's; and finally, even if we were to assume that Congress did not intend the antitrust laws to apply to areas of the economy primarily regulated by a State, that assumption would not foreclose the enforcement of the antitrust laws in an essentially unregulated area such as the market for electric light bulbs." Enforcement of the Sherman Act here would not interfere with Michigan's regulation of its electric utilities, the Court added.

The Court added that *Eastern Railway Presidents Conference* v. *Noerr*, 365 U.S. 127 (1961), was not applicable. That case held that lobbying by railroads against legislation favorable to motor carriers was not a violation of the Sherman Act. *Noerr*, said the Court, "did not involve any question of either liability or exemption for private action taken in compliance with state law."

To grant an exemption here, the Court contended, would "give a host of state regulatory agencies broad power to grant exemptions from an important federal law for reasons wholly unrelated either to federal policy or even to any necessary significant state interest."

The chief justice concurred in the judgment and in Parts I and III of Justice Stevens's opinion. He disagreed, however, with the plurality's assertion that the *Parker* exemption is limited to suits against state officials.

Justice Blackmun concurred in the judgment in an opinion that took the position that the Sherman Act generally supersedes inconsistent state laws and

that "at least for now" a "rule of reason" should be applied that "state-sanctioned anti-competitive activity must fall like any other if its potential harms outweigh its benefits."

Justice Stewart, joined by Justices Powell and Rehnquist, dissented, arguing that the Court was "trivializing" *Parker* to the point of overruling that decision. The dissent took the position that *Parker* had held that the Sherman Act did not undertake to prohibit restraints of trade imposed by a state and that the Court's distinction between "the exemptive force of mandatory state rules adopted at the behest of private parties and those adopted pursuant to the State's unilateral decision is flatly inconsistent with the rationale of *Noerr*." "Today's holding will not only penalize the right to petition but may very well strike a crippling blow at state utility regulation," the dissent asserted.

Conspiracy against Hospital Covered by Sherman Act

In another antitrust case, *Hospital Building Company* v. *Trustees of Rex Hospital*, 425 U.S. 738, 48 L.Ed. 2d 338, 96 S.Ct. 1848, 44 U.S.L.W. 4683, decided May 24, a unanimous Court held that a complaint of a conspiracy to prevent the expansion and relocation of a propriety hospital was a complaint upon which relief could be granted under the Sherman Act. Both the district court and the Fourth Circuit dismissed on the ground that the complaint did not adequately allege a "substantial effect" on interstate commerce. See 511 F. 2d 678 (1975).

The complaint was filed by a proprietary hospital in Raleigh, North Carolina, alleging that the trustees and officers of a private, tax-exempt hospital, along with the executive secretary of the local agency responsible for making recommendations on the need for additional hospital facilities, had acted together to block a planned relocation and expansion of the proprietary hospital. The petitioner's complaint alleged that it purchased 80 per cent of its medicines and supplies from out-of-state sellers, spending $112,000 in this manner in 1972. It also stated that a substantial number of its patients come from out of state and that a large proportion of its revenue comes from out-of-state insurance companies or from the federal government.

The Supreme Court reversed and remanded in an opinion by Justice Marshall. The Court cited prior cases holding that "[W]holly local business restraints can produce the effects condemned by the Sherman Act," that, as long as the restraint in question "substantially and adversely affects interstate commerce," the nexus required for Sherman Act coverage is established. "If it is interstate commerce that feels the pinch, it does not matter how local the operation which applies the squeeze," the Court declared.

The Court said that, "The complaint, fairly read, alleges that if respondents and their coconspirators were to succeed in blocking petitioner's planned expansion, petitioner's purchases of out-of-State medicines and supplies as well as its revenues from out-of-State insurance companies would be thousands and perhaps hundreds of thousands of dollars less than they would otherwise be."

Robinson-Patman Covers Drugs Purchased by Hospitals

Abbott Laboratories v. *Portland Retail Druggist Association*, 425 U.S. 1, 47 L.Ed. 2d 537, 96 S.Ct. 1305, 44 U.S.L.W. 4394, decided March 24, was a third antitrust case. The decision dealt with the construction of the phrase "purchases of their supplies for their own use" in the Nonprofit Institutions Act, which exempts purchases by hospitals and other charitable institutions from the Robinson-Patman Act.

The Robinson-Patman Act makes it unlawful to discriminate in price between different purchasers of like commodities when "the effect of such discrimination may be substantially to lessen competition." The Nonprofit Institutions Act exempts from Robinson-Patman some purchases made by hospitals and other charitable institutions. The issue before the Court was the meaning of "purchases of their supplies for their own use" in the case of medicines purchased by hospitals.

The suit was brought by an Oregon nonprofit corporation against twelve manufacturers of pharmaceutical products, alleging, among other counts not before the Court, that they had discriminated between nonprofit hospitals and retail druggists. The pharmaceutical manufacturers pleaded the exemption granted by the Nonprofit Institutions Act as an affirmative defense. The district court ruled that the medicines in question were purchases by nonprofit hospitals "for their own use," which were covered by the exemption. On an interlocutory appeal the Ninth Circuit vacated and remanded. 510 F. 2d 486 (1974).

The Supreme Court vacated and remanded in an opinion by Justice Blackmun. The Court found ten categories of dispensation of drugs by hospitals, three of which it said were clearly for the hospital's "own use" and therefore within the exemption: drugs for inpatient use, for emergency room use, and for outpatients for use on hospital premises. The Court decided that drugs for inpatients' personal use upon release and for outpatients' personal use away from the hospital premises also fell within the exemption, but not refills of such prescriptions. Drugs for the personal use of hospital employees and students and for physicians were held to be within the exemption so long as they were for the personal use of the employee, student, or physician, or their dependents, but not when they were to be used by anyone else. The Court said that drugs sold to the so-called "walk-in" buyer at the hospital pharmacy were not within the exemption.

Justice Marshall wrote a concurring opinion to emphasize his view that he did not read the Court's opinion "as foreclosing hospitals—or other exempted institutions—from expanding their charitable activities in highly untraditional ways and still qualifying for the exemption."

Justice Stewart, joined by Justice Brennan, dissented, arguing that the decision of the Ninth Circuit was correct.

No "Act of State" in Repudiation of Debts

On May 24, the Court held that there was no "act of state" in the failure of Cuban authorities to return to an American-based firm funds mistakenly paid for cigars sold to it by Cuban firms whose businesses were appropriated by the Cuban government. The case was *Alfred Dunhill of London* v. *Republic of Cuba*, 425 U.S. 682, 48 L.Ed. 2d 301, 96 S.Ct. 1854, 44 U.S.L.W. 4665.

In 1960, the Communist Cuban government seized five Cuban cigar manufacturing firms whose owners fled to the United States. The Cuban government appointed "interventors" to run the businesses, and the interventors continued to ship cigars to foreign purchasers. At the time of intervention, three firms owed some $477,600 for cigars shipped before the intervention.

The suit began when both the former owners of the seized businesses and the interventors asserted the right to some $700,000 due from the importers for shipments made after the intervention. The district court held that the act of state doctrine required it to give full effect to the 1960 confiscation and that the interventors were entitled to the postintervention sales proceeds. It held, however, that the situs of the preintervention sale proceeds was the United States and that the 1960 seizures did not reach those accounts, even though they had been mistakenly paid to the interventors. The district court held that the importers were entitled to set off the amounts they had mistakenly paid against the amounts due for their postintervention purchases. Two of the importers owed more than the interventors were obligated to them, and so they were satisfied, but Dunhill was

MOTOR CARRIERS, RATE BUREAU MANAGERS DEFEND COLLECTIVE RATE MAKING BEFORE SENATE SUBCOMMITTEE

Eliminating the trucking industry's antitrust immunity for collective rate making would force freight transportation costs up for hundreds of towns and destroy the coordinated shipping network the nation enjoys, witnesses told the Senate Judiciary Subcommittee on Antitrust earlier this week.

TWO DAYS OF HEARINGS

Testifying before the subcommittee on March 10 and 13 were panels of motor carrier executives and rate bureau managers as well as representatives of other trucking organizations and the Teamsters Union.

KENNEDY QUESTIONS RATE MAKING

Since last fall the subcommittee, chaired by U.S. Sen. Ted Kennedy, D-Mass., has been conducting an inquiry into the trucking industry's collective rate making practices.

RATES SET IN "CLOSED MEETINGS"

"We know that most trucking companies charge the same rates for their services," Kennedy said at the opening of Friday's hearing. "We know that these rates are set in closed meetings by the carriers themselves. And we know that the Interstate Commerce Commission can give only minimal scrutiny to the thousands of rates filed with it every day."

COMPETITION AN ISSUE

According to Kennedy, concentration in the trucking industry is accelerating, and it's not clear that ICC regulation has had a marked effect in stemming this concentration in a "naturally competitive industry.

"By allowing carriers to set rates collectively and by authority, the ICC may well have made matters worse," Kennedy suggested.

(over)

RATE MAKING NEEDED FOR "EQUAL TREATMENT"

However, Gene T. West of Consolidated Freightways Corp., Menlo Park, Cal., disputed Kennedy's allegation and said that without collective rate making "there could be no such thing as a fair, nondiscriminatory, nonpreferential rate structure under which shippers could receive equal treatment in the transportation of their supplies, materials, goods and products" regardless of location.

TRANSPORT SYSTEM WOULD FALL APART

Noting that fully one-third of Consolidated Freightways' shipments involve joint-line service with over 1,200 connecting carriers, West said the "voluntary, integrated system of transportation which exists today" would fall apart without collective rate making.

Shippers would have to work out arrangements with all the separate carriers that move their freight, West said.

SHEER LOGISTICS DEMAND RATE MAKING

"Sheer logistics," said James T. Hite, III, of Interstate Motor Freight System, Grand Rapids, Mich., is another reason why collective rate making can't be eliminated without altering many other facets of the society and the economy.

BILLIONS OF INDIVIDUAL RATES

He said the collective rate making process "maintains and organizes in a structured manner rate information that is a multiple of thousands of carriers, tens of thousands of geographical points, and literally billions of individual rates."

It would be logistically impossible, he continued, for the ICC or some federal agency to approve literally billions of prices or rates on an individual basis every time one was changed for whatever the reason.

SMALL FIRMS HELPED

Danville, N. Y., motor carrier Timothy L. Shay of Shay's Service Inc., also told the subcommittee that rate making on a collective basis makes it possible for smaller trucking firms to compete.

LACK EXPERTISE TO FIGURE RATES

Small firms simply don't have the time, the financial resources and the expertise to cost out all of their own rates, and as a result they rely on rate bureaus, he explained.

NOT A ONE-WAY STREET

Collective rate making is not a one-way street oriented for motor carriers, Gerald Cole of Coles Express said. Cole, whose company operates out of Bangor, Me., said: "All shippers or receivers, or for that matter, any interested parties, are afforded adequate opportunity to participate in the rate making process."

Another panelist, William J. Jones of Wilson Trucking Co. in Fisherville, Va., charged that small carriers would suffer most from the loss of collective rate making. "Large carriers don't dominate rate bureaus, as the experience of my company shows," he said.

PROTECTS SMALL SHIPPERS TOO

Shay added that rate bureaus help small trucking firms price their services yet "we have no problem setting an independent rate." He also said his participation in a rate bureau helps protect small shippers who aren't sophisticated enough to know if rates are fair.

TOWNS RECEIVE SERVICE

Answering a question from Sen. Kennedy about a 1975 DOT study that shows fifty percent of small towns are not served by carriers who have authority, Hite explained that just because every carrier with authority to serve a town doesn't provide that service still doesn't mean the town isn't served by regulated carriers through interlining or other arrangements.

EXEMPT TRANSPORTATION DEBATED

West also refuted an allegation about the stability of exempt transportation by pointing out that the U.S. Department of Agriculture is considering some form of regulation to save small companies hauling agricultural commodities.

TEAMSTERS SUPPORT

Testifying for the Teamsters Union was Lucien Boutin of Boston, Mass., who said that eliminating collective ratemaking would seriously affect the union's wage base because it is the only protection they appear to have.

RATE BUREAUS PARTICIPATE

In addition to James Harkins, who testified on behalf of the National Classification Board, four rate bureau executives appeared to testify on how rate bureaus operate. They were Vernon Farriba, Southern Motor Carriers Rate Conference; John Womack, Central and Southern Motor Freight Tariff Association; James T. Henry, Eastern Central Motor Carriers Association; and Samuel Herold, Middle Atlantic Conference.

(over)

IMMUNITY IS NOT TO FIX PRICES

They explained that "the immunity granted to carriers by the commission is not an immunity to fix transportation rates and prices. It is strictly limited to an immunity from the antitrust laws to permit carriers to initiate, discuss and agree upon proposals which will be submitted to the commission for its regulatory review."

Additional hearings are planned by the subcommittee March 23 in Chicago and March 24 in Denver, and April 4 and 18 in Washington, D. C.

Yet to be heard from in the hearings are shipper groups, several of which are scheduled to testify April 18.

Re: Anit-trust legal developments

Dear Ben:

I was unable to find in the printed law reports, the Court of Appeals case which I mentioned to you, but I think that I did find two others that I think are very significant. One is Mount Hood Stages v. Greyhound which deals with the implied anti-trust exemption for regulatory activities and Kurek v. Pleasure Driveway and Park District of Peoria which again limits the imply exemption under the state anti-trust laws. Both of these cases I think should be kept by you and illustrate the importance of further clarifying the exemption that I believe the Alaska Carriers presently have a third case is Motor Carriers Traffic Assn. v. United States which decides the appropriateness of Ex Parte 297. Undoubtedly, Wayne has this although I am sending him a copy of this letter for his information. I think it is apparent that there is going to continue to be a concentrated effort to reduce the anti-trust immunity extended to various motor carrier rate bureaus. It behooves us to get a clear statement, if possible, by the Alaska Legislature or by the Transportation Commission of the status of these agreements.

Very truly yours,

Andrew E. Hoge

that the pilferage was from penalize stealage from an interstate movement or interstate storage, but the *presumption* would not apply to any taking save one from a pipeline system.

The 1966 amendments, as discussed by the majority, sharply make the differentiation. They did not even purport to enlarge the presumption; they simply expanded the types of container embraced in the enactments. In this addition Congress was careful to enumerate each of them separately, manifesting that the legislators were preserving their several identities. With these identifications in mind, "pipeline system" was included for the first time and the presumption was confined to a pipeline system. Obviously, it was not intended to apply elsewhere.

The reason for this inclusion is obvious: a pipeline system runs for thousands of miles and Congress needed to cover every foot of it. It wished protect transportation by pipeline, a somewhat recent utility. Interestingly, the presumption provision was written by the Department of Justice and engrossed ipsissimis verbis within the law.

The Federal Government has no reason for being here.

Nos. 76-1329, 76-1425 and 76-1426.

United States Court of Appeals, Fourth Circuit.

Argued Dec. 7, 1976.

Decided July 21, 1977.

Proceedings were instituted to review Interstate Commerce Commission's approval of agreements establishing transportation industry rate bureaus. The Commission entered order directing that rate bureau agreements would not be accorded antitrust immunity under certain specified conditions, and various motor carrier rate bureaus and carrier members of rate bureaus appealed. The Court of Appeals, Mr. Justice Clark, sitting by designation, held that: (1) motor carrier rate bureaus did not have constitutional right to file protests

with respect to independent action proposals of any of their member carriers, and Commission was authorized to reverse itself and prohibit rate bureaus from making such protests as a precondition to granting bureaus immunity from antitrust laws; (2) Commission had authority to enter order prohibiting carriers that were in any way affiliated with a shipper from serving on rate bureau's board of directors, general rate committee or any other committee having an effect, either direct or indirect, upon rate-making function of bureau, without specific prior Commission approval, and (3) Commission had authority to prohibit motor carrier rate bureaus from operating as profit-making entities.

Affirmed.

Widener, Circuit Judge, concurred in part and dissented in part and filed opinion.

1. Commerce ⇐85.33

Motor carrier rate bureaus did not have constitutional right to file protests with respect to independent action proposals of any of their member carriers, and Interstate Commerce Commission was authorized to reverse itself and prohibit rate bureaus from making such protests as a precondition to granting bureaus immunity from antitrust laws. Interstate Commerce Act, §§ 5a(2, 7), 216, 216(e), 49 U.S.C.A. §§ 5b(2, 7), 316, 316(e); U.S.C.A.Const. Amend. 1.

2. Commerce ⇐85.33

Interstate Commerce Commission had authority to enter order prohibiting motor carriers that were in any way affiliated with a shipper from serving on a rate bureau's board of directors, general rate committee or any other committee having an effect, either direct or indirect, upon rate-making function of the bureau, without specific prior Commission approval; such order had rational basis, and was valid. Interstate Commerce Act, §§ 5a, 5a(7), 49 U.S.C.A. §§ 5b, 5b(7).

3. Commerce ⇐85.33

Action of Interstate Commerce Commission in proceeding to review its prior approval of agreements establishing transportation industry rate bureaus constituted rule making. 5 U.S.C.A. § 551(4); Interstate Commerce Act, §§ 5a, 5a(7), 49 U.S.C.A. §§ 5b, 5b(7).

4. Commerce ⇐85.33

Interstate Commerce Commission had authority to prohibit motor carrier rate bureaus from operating as profit-making entities. Interstate Commerce Act, §§ 5a, 5a(7), 49 U.S.C.A. §§ 5b, 5b(7).

MOTOR CARRIERS

Mr. Justice CLARK:

These three consolidated ap the Interstate Commerce Comm to set aside, in part, Orders th tered by the Commission in E 297, *Rate Bureau Investigation*, a broad scale study of the regu portation industry's various coll making organizations, known a reaus".

The history of collective rate forts by surface transportation the United States is both long versial. See: *United States v. souri Freight Assn.*, 166 U.S. 2 540, 41 L.Ed. 1007 (1897); *Unite Joint Traffic Association*, 171 U S.Ct. 25, 43 L.Ed. 259 (1898); *Pennsylvania R. Co.*, 323 U.S. 4 716, 89 L.Ed. 1051 (1945); *West Assn.—Agreement*, 276 I.C.C. The Congressional action took the Reed-Bulwinkle Act of 194 472, Section 5a of the Interstate Act (49 U.S.C. § 5b). Congress the problem was one of reconcil mands of the Nation's transpo tem with the policies of the ant This Act left "the antitrust law with full force and effect to car except as to such joint agreem rangements between them as been submitted to the Interstate Commission and approved by upon a finding that, by reason ance of the national transportati declared in the Interstate Com relief from the antitrust laws granted." H.R.Rep.No.1100, 80th Sess., at 5, U.S.Code Cong.Ser 1844, 1848. Surface carriers th ties to agreements concerning related matters can submit s ments to the Commission for ap if approved, the parties to the are relieved from the operation

1. 49 U.S.C. §§ 5b(4), (5), and (6) proval of agreements which:

(1) are among carriers of differ classes and are not limited to mat to transportation under joint ra through routes;

Mr. Justice CLARK:

These three consolidated appeals from the Interstate Commerce Commission seek to set aside, in part, Orders that were entered by the Commission in Ex Parte No. 297, *Rate Bureau Investigation*, which was a broad scale study of the regulated transportation industry's various collective rate-making organizations, known as "rate bureaus".

The history of collective rate-making efforts by surface transportation carriers in the United States is both long and controversial. See: *United States v. Trans-Missouri Freight Assn.*, 166 U.S. 290, 17 S.Ct. 540, 41 L.Ed. 1007 (1897); *United States v. Joint Traffic Association*, 171 U.S. 505, 19 S.Ct. 25, 43 L.Ed. 259 (1898); *Georgia v. Pennsylvania R. Co.*, 324 U.S. 439, 65 S.Ct. 716, 89 L.Ed. 1051 (1945); *Western Traffic Assn.—Agreement*, 276 I.C.C. 183 (1949). The Congressional action took the form of the Reed-Bulwinkle Act of 1948, 62 Stat. 472, Section 5a of the Interstate Commerce Act (49 U.S.C. § 5b). Congress decided that the problem was one of reconciling the demands of the Nation's transportation system with the policies of the antitrust laws. This Act left "the antitrust laws to apply with full force and effect to carriers . . . except as to such joint agreements or arrangements between them as may have been submitted to the Interstate Commerce Commission and approved by that body upon a finding that, by reason of furtherance of the national transportation policy as declared in the Interstate Commerce Act, relief from the antitrust laws should be granted." H.R.Rep.No.1100, 80th Cong., 1st Sess., at 5, U.S.Code Cong.Serv.1948, pp. 1844, 1848. Surface carriers that are parties to agreements concerning rates and related matters can submit such agreements to the Commission for approval and, if approved, the parties to the agreements are relieved from the operation of the antitrust laws with regard to the same. 49 U.S.C. § 5b(2). The Act mandates the Commission to approve the agreement only if it finds that the agreement is in furtherance of the national transportation policy and is not prohibited by 49 U.S.C. §§ 5b(4), (5), and (6).[1] The Commission, in carrying out this directive of Congress is the creator of the rate bureau since without immunity from the antitrust laws, it cannot operate. Indeed, the Act requires that rate bureaus operating under approved agreements must maintain and keep open for inspection accounts and records and to file such reports as the Commission requires. 49 U.S.C. § 5b(3). The Commission is also given authority to investigate and determine whether any previously approved agreement, or any terms or conditions upon which the approval was granted, are in conformity with the standards of 49 U.S.C. § 5b(2), and further, the Commission is given the power to terminate or modify its prior approval in order to insure compliance with the standards of the Act. 49 U.S.C. § 5b(7).

Pursuant to 49 U.S.C. § 5b, the Commission has from time to time approved rate bureau agreements. See, e.g., *Western Traffic Assn.—Agreement, supra; Rocky Mountain Carriers—Agreement*, 302 I.C.C. 569 (1958); *Motor Carriers Traffic Assn., Inc.—Agreement*, 301 I.C.C. 781 (1957); *Eastern Tank Carriers—Agreement*, 301 I.C.C. 359 (1957); *Middle Atlantic Conference—Agreement*, 283 I.C.C. 683 (1951).

It was to review its approval of such prior Agreements that Ex Parte No. 297 was instituted in 1973, posing twenty-eight areas of inquiry, as specifically authorized by 49 U.S.C. § 5b(7). Numerous parties indicated an intention to participate in the proceedings; consequently, by Order dated November 15, 1973, the Commission directed the Bureau of Enforcement "to file and

1. 49 U.S.C. §§ 5b(4), (5), and (6) prohibit approval of agreements which:

(1) are among carriers of different specified classes and are not limited to matters relating to transportation under joint rates or over through routes;

(2) which involve "pooling" under § 5(1) of the Act (49 U.S.C. § 5(1)); or

(3) which do not accord to each party the "free and unrestrained right to take independent action either before or after any determination arrived at through such procedure."

serve a statement of verified facts and of argument setting forth the matters developed in the field investigations, as well as from other sources, regarding the conduct of the carrier rate bureau as a catalyst for the subsequent submission of initial statements of facts, arguments and opinion by the respondents and other interested parties." *First Report*, 349 I.C.C. at 816. Several hundred initial and reply statements were filed in response. The Orders of the Commission arising out of this survey directed that the agreements of rate bureaus would not thereafter be accorded antitrust immunity under 49 U.S.C. § 5b; (1) if such bureaus protest the independent action proposals of any of their member carriers; (2) if such carrier members are affiliated with shippers, unless the agreements of the bureau prohibit such carriers from serving on the bureau's Board of Directors, general rate committees or any other committees which have an effect directly or indirectly upon the rate-making function of the bureau, without prior Commission approval; and, finally, (3) if the bureaus involved are operating as profit-making entities.

The petitioners include Motor Carrier Traffic Association, Inc. (MCTA), a motor carrier rate bureau operating for profit, which challenges the withdrawal of antitrust immunity from bureaus which operate for profit; Rocky Mountain Motor Traffic Bureau, Inc. (Rocky Mount), a motor carrier rate bureau challenging the restrictions on carrier members of bureaus affiliated with shippers; and All Island Delivery Service, Inc., Pinter Bros., Inc., Troiano Express Co., Inc., Feuer Transportation, Inc., and John A. Jungerman Son, Inc., individual carrier members of the Middle Atlantic Conference, a rate bureau, challenging the provisions of Ex Parte 297 which withdraw antitrust immunity from rate bureaus protesting independent action proposals of member carriers before the Commission. Additionally, several organizations interested in the outcome have intervened. Respondents are the Interstate Commerce Commission and the United States (statutory respondent under 28 U.S.C. § 2344). This court's jurisdiction to review lies under 28 U.S.C. §§ 2321 and 2341 *et seq.*

The questions raised by the petitioners range from First Amendment rights to a charge of "arbitrary and capricious conduct" on the part of the Commission. None of the claims are meritorious, as we will briefly show below. In so finding, we uphold the Orders of the Commission.

[1] 1. At the outset we note that Section 5a(2) of the Act (49 U.S.C. § 5b(2)) authorizes the Commission to approve an agreement made under the provisions of the Section "if it finds that, by reason of furtherance of the national transportation policy declared in this Act, the relief provided in paragraph (9) . . . . should apply with respect to the making and carrying out of such agreement; otherwise the application shall be denied." The Commission followed this procedure and, in approving the applications, provided that they were subject to "such [general] terms and conditions as the Commission may prescribe". In addition we note that Section 5a(7) of the Act (49 U.S.C. § 5b(7)) specifically authorizes the Commission "to investigate and determine whether any agreement previously approved by it under this section . . . is not or are not in conformity with the standards set forth in paragraph [5a(2), 49 U.S.C. § 5b(2)]"—in "furtherance of the national transportation policy." In addition, Section 5a(7) provides:

> . . . after such investigation, the Commission shall by order terminate or modify its approval of such an agreement if it finds such action necessary to insure conformity with such standard, and shall modify the terms and conditions upon which such approval was granted to the extent it finds necessary to insure conformity with such standard . . .

Despite these clear and unequivocal words, petitioners say that under the First Amendment and Section 216 of the Act, 49 U.S.C. § 316, the rate bureaus have a constitutional right to file such protests. Section 216(c) of the Act, 49 U.S.C. § 316(c), does provide that "Any person, State board, organization, or body politic may make com-

plaint in writing to the C
any such rate, fare, charge

Fifth Circuit has said: "ma

plaint in writing to the Commission that any such rate, fare, charge, classification, rule, regulation, or practice, in effect or proposed to be put into effect, is or will be in violation of this Section or of Section 217 (49 U.S.C. § 317). . . ." It may be that under Section 216 or 217 individual protests may be filed but, strangely enough, only Section 5a deals with "agreements concerning rates and related matters", and it requires prior approval of the Commission in order for the parties to the agreements to escape the penalties of the antitrust laws. To permit a rate bureau to protest the proposals of a member individually so chills the individual proposal that it stands little chance of adoption, while providing the opportunity for misuse of the bureaus as policing agencies against individual action. We agree with the Commission that "it is necessary to limit the bureaus' right to protest in order to foster independent action. The right of independent action is paramount to maintaining the integrity of the grant of antitrust immunity." The interpretation pressed by the petitioners would operate to repeal Section 5a, the very heart of the Act, leaving the bureaus without statutory authorization as well as antitrust immunity.

Petitioners urge that the Commission cannot reverse itself and now impose restrictions on the bureaus and that such action is arbitrary and capricious. The short answer is, of course, that reversal of views is no anomaly in democratic societies. In fact, it is the principal tool by which improvement is effected. The Supreme Court itself not only engages in the practice but has approved of its use by the Commission. See: *American Trucking Assns., Inc. v. Atchison T. & S.F. Ry. Co.*, 387 U.S. 397, 416, 87 S.Ct. 1608, 18 L.Ed.2d 847 (1967). Further, there is nothing irrational about the new rule that the Commission intends to put into effect. In fact, the new rule is in the true tradition of our free enterprise system which has been the keystone of our economic accomplishment for nearly a century. The Commission, in so acting, exercises its legislative function, and, as the Fifth Circuit has said: "may look beyond [the record] and draw upon its own expertise and experience." *General Telephone Co. v. United States*, 449 F.2d 846, 862 (1971). Based upon its experience, the Commission found that, as usual, more goes on than meets the eye. The paucity of formal bureau protests does not adequately reflect the number of threatened protests, nor has the mere existence of the right to protest had a significant anti-competitive impact, both Commission findings. Certainly the purpose of the Commission was to stimulate competition by removing the inhibitions against the filing of independent actions, a move not only in the spirit of Section 5a of the Act but in furtherance of the national transportation policy which is the essence of this case.

[2] 2. We now reach the challenge to the order prohibiting carriers that are in any way affiliated with a shipper from serving on a bureau's board of directors, general rate committee or any other committee which has an effect, either directly or indirectly, upon the rate-making function of the bureau, without specific prior Commission approval. It is said that this requirement is beyond the Commission's statutory authority and is also arbitrary and capricious. As we have already indicated, Section 5a(7) of the Act, 49 U.S.C. § 5b(7), grants the Commission full and complete authority to act as it did, and we shall not discuss the point further. See: *United States v. Chesapeake & Ohio Ry. Co.*, 426 U.S. 500, 96 S.Ct. 2318, 49 L.Ed.2d 14 (decided June 17, 1976); *United States v. Allegheny-Ludlum Steel*, 406 U.S. 742, 755, 92 S.Ct. 1941, 32 L.Ed.2d 453 (1972). Nor does the Commission's Order violate a legislative policy favoring rate bureau organizations. The Order does not destroy the basic purpose of the bureaus, contrary to the bureaus' claim, as the restrictions are not absolute—the Order itself permits exceptions. Moreover, we note that the Congress directed that the Commission should weigh the conflicting demands of the antitrust laws and the surface transportation system, resolving the same by the application of a standard involving the National Transpor-

tation Policy. H.R.Rep.No.1100, 80th Cong. 1st Sess. at 5, U.S.Code Cong.Serv.1948, p. 1844. Such a resolution requires consideration, not only of efficiency but of competitive impact. See: *McLean Trucking Co. v. United States*, 321 U.S. 67, 87, 64 S.Ct. 370, 88 L.Ed. 544 (1944).

Nor do we believe that the action of the Commission in this regard lacked a rational basis. Our study of the problem shows that the possibility of a conflict of interest is self-evident, although none was actually shown. In such a state of the record, it appears rational for the Commission to prohibit shipper-affiliated carrier participation in those activities where the possibility of a conflict of interest is high, but to permit exemptions through Commission approval of bureau applications. The Commission adopted a stance which in effect, is a case by case disposition, rather than a general rule. We find that this procedure overcomes the petitioners' objection.

The remaining contentions regarding this rule are frivolous and require no discussion.

[3] 3. The final issue presented is the question of rate bureau profit-making activities. It is contended that prohibiting profit-making is beyond the power of the Commission and that the action involved here should be classified as adjudication, rather than rule-making. As we have indicated, *supra*, we consider the action of the Commission in Ex Parte 297 to constitute rule making—and, we add, all of the petitioners, save one, agree. Under the Administrative Procedure Act "'rule' means the whole or a part of an agency statement of general or particular applicability and future effect designed to implement, interpret, or prescribe law or policy . . . ." 5 U.S.C. § 551(4). Petitioner points to no applicable provision of law which requires a full-dress hearing here, nor have we found any.

[4] The petitioner finally claims that the Commission has no power to prohibit profit-making and to do so is an unconstitutional deprivation of property, but does not support this view with authority. In fact, to the contrary, the Commission found the rate bureaus to be service organizations "financed by fee assessments of the members, and not entrepreneurial. As such, the element of profit has been attacked as not compatible with the strict service function of organizations operating with antitrust immunity." *First Report*, 349 I.C.C. at 826. The bureaus act as agents for the carriers and would be in violation of the antitrust laws without the immunity bath furnished by the Commission. All of the expenses of the bureaus are passed on to the shippers and ultimately to the public. If there are services to the public, reimbursement should be on a compensatory basis. The cost of the bureaus as profit-making organizations chargeable to the shipper and the public is inconsistent with the public interest. If this drives the bureaus out of business, so be it. The public will not be saddled with their profits and at the same time afford them antitrust immunity. The orders of the Commission are

Affirmed.

WIDENER, Circuit Judge, concurring and dissenting:

I concur in the opinion of the court in Nos. 76-1329 and 76-1425. But, in No. 76-1426, I respectfully dissent.

In deciding to prohibit rate bureaus from protesting independent action proposals of member carriers, the Interstate Commerce Commission quotes language from *Arbet Truck Lines, Inc. v. Central States Motor Freight*, 321 I.C.C. 460, 471, stating that "[i]t is necessary to harmonize Section 5a [49 U.S.C. § 5b] and Sections 216(e) and (g) [49 U.S.C. §§ 316(e) and (g)] of the Act."

49 U.S.C. § 5b relieves parties to an approved agreement (rate bureaus) from the operation of the antitrust laws. 49 U.S.C. § 316(e) provides in pertinent part:

"Any person, State board, organization, or body politic may make complaint in writing to the Commission that any such rate, fare, charge, classification, rule, regulation, or practice, in effect or proposed to be put into effect, is or will be in violation of this section or of section 317 of this title."

For a number of years th effect to both parts of the ed by Congress. *Central Common Carriers—Agree* 773 (1957); *Southern M Agreement*, 297 I.C.C. 6 *Atlantic Conference—A* I.C.C. 683, 689 (1951).

In *Southern Motor Carri* monized the two sections in way:

"The right to take indepe conference members i from, and does not co equally established right ence, or any other perso to protest or complain of After a carrier takes ind the action taken stands o same footing with respe ence, in its efforts to foste stable rate structure in th members as a whole, as taken by a carrier not a m ber. To interpret sectio would not only contraven of section 216, paragraph stated, and of the national policy, but would jeopardi free hearing so necessary the development of comp proceedings before the Co the foregoing reasons, we cord with the protestants i that the agreement be m hibit the conference from the suspension of member participating in complai before the Commission." 616.

But now, in spite of its fin practice of rate bureaus in has been conducted in a m generally fair and devoid of and in spite of its statem have not found evidence of abuse by rate bureaus in the right to protest," the ICC de rate bureaus' right to protest ordinated" to the right of i tion.

For a number of years the ICC has given effect to both parts of the statute as enacted by Congress. *Central States Motor Common Carriers—Agreement*, 299 I.C.C. 773 (1957); *Southern Motor Carriers—Agreement*, 297 I.C.C. 603 (1956); *Middle Atlantic Conference—Agreement*, 283 I.C.C. 683, 689 (1951).

In *Southern Motor Carriers*, the ICC harmonized the two sections in the following way:

> "The right to take independent action by conference members is distinguished from, and does not conflict with, the equally established right of the conference, or any other person or body politic to protest or complain of any such action. After a carrier takes independent action, the action taken stands upon exactly the same footing with respect to the conference, in its efforts to foster a sound and stable rate structure in the interest of its members as a whole, as any such action taken by a carrier not a conference member. To interpret section 5a otherwise would not only contravene the provisions of section 216, paragraphs (e) and (g), as stated, and of the national transportation policy, but would jeopardize the full and free hearing so necessary and essential to the development of complete records in proceedings before the Commission. For the foregoing reasons, we are not in accord with the protestants in their request that the agreement be modified to prohibit the conference from petitioning for the suspension of member-carrier rates or participating in complaint proceedings before the Commission." 297 I.C.C. at 616.

But now, in spite of its findings that "the practice of rate bureaus in protesting rates has been conducted in a manner that is generally fair and devoid of base motives," and in spite of its statement that "[w]e have not found evidence of any flagrant abuse by rate bureaus in the exercise of the right to protest," the ICC declares that the rate bureaus' right to protest must be "subordinated" to the right of independent action.

The statistical background, however, which in this case must speak with more authority than mere feelings, does not show a threat to independent action; indeed I submit the contrary is shown. Of the 7,468 independent actions in 1973, the seven bureaus protested 199, only 2.66 percent. Middle Atlantic, for example, protested 46 of 1,064 independent actions in its tariffs in the twelve months ending May 31, 1973. Thirty-four of the 46 protested tariffs were rejected, suspended, or withdrawn. In 1973, Rocky Mountain Tariff Bureau protested 6 of 320 independent actions in its tariffs. Four of the six protested tariffs were suspended or withdrawn. Southern Motor Carriers Rate Conference protested 26 of the 2,914 independent actions in its tariffs. Thirteen of the 26 protested tariffs were suspended. The low percentage of bureau protests and the high percentage of their success indicate to me that the system is working as Congress intended, that is, as an "advantage and aid to the Commission in the administration of the act and the prevention of destructive rate cutting" in a situation where "[i]t is manifestly impossible, as a practical matter, for the Commission to scrutinize each and all of the multiplicity of tariffs and rate changes that are constantly being filed." *Middle Atlantic Conference*, 283 I.C.C. at 689.

For these reasons, I would preserve the rate bureaus' right to protest as Congress established it in code §§ 316(e) and (g).

Because I rely on the statutory provisions, I find no need to discuss, and express no opinion on, the first amendment issues raised in this appeal and somewhat persuasively presented under the *Noerr-Pennington* doctrine. *Ashwander v. T.V.A.*, 297 U.S. 288, 346, 56 S.Ct. 466, 80 L.Ed. 688 (1935) (Brandeis, J., concurring). See *Eastern R.R. Presidents Conference v. Noerr Motor Freight, Inc.*, 365 U.S. 127, 81 S.Ct. 523, 5 L.Ed.2d 464 (1961); *United Mine Workers v. Pennington*, 381 U.S. 657, 85 S.Ct. 1585, 14 L.Ed.2d 626 (1965); *California Motor Transport Co. v. Trucking Unlimited*, 404 U.S. 508, 92 S.Ct. 609, 30 L.Ed.2d 642 (1971).

lowing deductions for income tax, is a step in the direction of creating a true divorce between ownership and control and of undermining the basic nature and character of our society. It is a step away from an individualistic society and toward the corporate state.

Chapter IX

+

Occupational Licensure

THE OVERTHROW OF the medieval guild system was an indispensable early step in the rise of freedom in the Western world. It was a sign of the triumph of liberal ideas, and widely recognized as such, that by the mid-nineteenth century, in Britain, the United States, and to a lesser extent on the continent of Europe, men could pursue whatever trade or occupation they wished without the by-your-leave of any governmental or quasi-governmental authority. In more recent decades, there has been a retrogression, an increasing tendency for particular occupations to be restricted to individuals licensed to practice them by the state.

These restrictions on the freedom of individuals to use their

resources as they wish are important in their own right. In addition, they provide still a different class of problems to which we can apply the principles developed in the first two chapters.

I shall discuss first the general problem and then a particular example, restrictions on the practice of medicine. The reason for choosing medicine is that it seems desirable to discuss the restrictions for which the strongest case can be made—there is not much to be learned by knocking down straw men. I suspect that most people, possibly even most liberals, believe that it is desirable to restrict the practice of medicine to people who are licensed by the state. I agree that the case for licensure is stronger for medicine than for most other fields. Yet the conclusions I shall reach are that liberal principles do not justify licensure even in medicine and that in practice the results of state licensure in medicine have been undesirable.

UBIQUITY OF GOVERNMENTAL RESTRICTIONS ON ECONOMIC ACTIVITIES MEN MAY ENGAGE IN

Licensure is a special case of a much more general and exceedingly widespread phenomenon, namely, edicts that individuals may not engage in particular economic activities except under conditions laid down by a constituted authority of the state. Medieval guilds were a particular example of an explicit system for specifying which individuals should be permitted to follow particular pursuits. The Indian caste system is another example. To a considerable extent in the caste system, to a lesser extent in the guilds, the restrictions were enforced by general social customs rather than explicitly by government.

A widespread notion about the caste system is that every person's occupation is completely determined by the caste into which he is born. It is obvious to an economist that this is an impossible system, since it prescribes a rigid distribution of persons among occupations determined entirely by birthrates and not at all by conditions of demand. Of course, this is not the way the system worked. What was true, and to some measure still is, was that a limited number of occupations were reserved to members of certain castes, but not every member of those

castes followed those occupations. There were some general occupations, such as general agricultural work, which members of various castes might engage in. These permitted an adjustment of the supply of people in different occupations to the demand for their services.

Currently, tariffs, fair-trade laws, import quotas, production quotas, trade union restrictions on employment and so on are examples of similar phenomena. In all these cases, governmental authority determines the conditions under which particular individuals can engage in particular activities, which is to say, the terms on which some individuals are permitted to make arrangements with others. The common feature of these examples, as well as of licensure, is that the legislation is enacted on behalf of a producer group. For licensure, the producer group is generally a craft. For the other examples, it may be a group producing a particular product which wants a tariff, a group of small retailers who would like to be protected from competition by the "chiseling" chain stores, or a group of oil producers, of farmers, or of steel workers.

Occupational licensure is by now very widespread. According to Walter Gellhorn, who has written the best brief survey I know, "By 1952 more than 80 separate occupations exclusive of 'owner-businesses,' like restaurants and taxicab companies, had been licensed by state law; and in addition to the state laws there are municipal ordinances in abundance, not to mention the federal statutes that require the licensing of such diverse occupations as radio operators and stockyard commission agents. As long ago as 1938 a single state, North Carolina, had extended its law to 60 occupations. One may not be surprised to learn that pharmacists, accountants, and dentists have been reached by state law as have sanitarians and psychologists, assayers and architects, veterinarians and librarians. But with what joy of discovery does one learn about the licensing of threshing machine operators and dealers in scrap tobacco? What of egg graders and guide dog trainers, pest controllers and yacht salesmen, tree surgeons and well diggers, tile layers and potato growers? And what of the hypertrichologists who are licensed in Connecticut, where they remove excessive and

unsightly hair with the solemnity appropriate to their high sounding title?"[1] In the arguments that seek to persuade legislatures to enact such licensure provisions, the justification is always said to be the necessity of protecting the public interest. However, the pressure on the legislature to license an occupation rarely comes from the members of the public who have been mulcted or in other ways abused by members of the occupation. On the contrary, the pressure invariably comes from members of the occupation itself. Of course, they are more aware than others of how much they exploit the customer and so perhaps they can lay claim to expert knowledge.

Similarly, the arrangements made for licensure almost invariably involve control by members of the occupation which is to be licensed. Again, this is in some ways quite natural. If the occupation of plumbing is to be restricted to those who have the requisite capacity and skills to provide good service for their customers, clearly only plumbers are capable of judging who should be licensed. Consequently, the board or other body that grants licenses is almost invariably made up largely of plumbers or pharmacists or physicians or whatever may be the particular occupation licensed.

Gellhorn points out that "Seventy-five per cent of the occupational licensing boards at work in this country today are composed exclusively of licensed practitioners in the respective occupations. These men and women, most of whom are only part-time officials, may have a direct economic interest in many of the decisions they make concerning admission requirements and the definition of standards to be observed by licensees. More importantly, they are as a rule directly representative of organized groups within the occupations. Ordinarily they are nominated by these groups as a step toward a gubernatorial or other appointment that is frequently a mere formality. Often the formality is dispensed with entirely, appointment being made directly by the occupational association—as happens, for example, with the embalmers in North Carolina, the den-

[1] Walter Gellhorn, *Individual Freedom and Governmental Restraints* (Baton Rouge: Louisiana State University Press, 1956). Chapter entitled "The Right to Make a Living," p. 106.

tists in Alabama, the psychologists in Virginia, the physicians in Maryland, and the attorneys in Washington."[2]

Licensure therefore frequently establishes essentially the medieval guild kind of regulation in which the state assigns power to the members of the profession. In practice, the considerations taken into account in determining who shall get a license often involve matters that, so far as a layman can see, have no relation whatsoever to professional competence. This is not surprising. If a few individuals are going to decide whether other individuals may pursue an occupation, all sorts of irrelevant considerations are likely to enter. Just what the irrelevant considerations will be, will depend on the personalities of the members of the licensing board and the mood of the time. Gellhorn notes the extent to which a loyalty oath was required of various occupations when the fear of communist subversion was sweeping the country. He writes, "A Texas statute of 1952 requires each applicant for a pharmacist's license to swear that 'he is not a member of the Communist Party or affiliated with such party, and that he does not believe in and is neither a member of nor supports any group or organization that believes in, furthers or teaches the overthrow of the United States Government by force or any illegal or unconstitutional methods.' The relationship between this oath on the one hand and, on the other, the public health which is the interest purportedly protected by the licensing of pharmacists, is somewhat obscure. No more apparent is the justification for requiring professional boxers and wrestlers in Indiana to swear that they are not subversive . . . A junior high school teacher of music, having been forced to resign after being identified as a Communist, had difficulty becoming a piano tuner in the District of Columbia because, forsooth, he was 'under Communist discipline.' Veterinarians in the state of Washington may not minister to an ailing cow or cat unless they have first signed a non-Communist oath."[3]

Whatever one's attitude towards communism, any relationship between the requirements imposed and the qualities

[2] Ibid. pp. 140–41.
[3] *Ibid.*, pp. 129–30.

which the licensure is intended to assure is rather far-fetched. The extent to which such requirements go is sometimes little short of ludicrous. A few more quotations from Gellhorn may provide a touch of comic relief.[4]

One of the most amusing sets of regulations is that laid down for barbers, a trade that is licensed in many places. Here is an example from a law which was declared invalid by Maryland courts, though similar language can be found in statutes of other states which were declared legal. "The court was depressed rather than impressed by a legislative command that neophyte barbers must receive formal instruction in the 'scientific fundamentals for barbering, hygiene, bacteriology, histology of the hair, skin, nails, muscles and nerves, structure of the head, face and neck, elementary chemistry relating to sterilization and antiseptics, disease of the skin, hair, glands and nails, haircutting, shaving and arranging, dressing, coloring, bleaching, and tinting of the hair'."[5] One more quotation on the barbers: "Of eighteen representative states included in a study of barbering regulations in 1929, not one then commanded an aspirant to be a graduate of a 'barber college,' though apprenticeship was necessary in all. Today, the states typically insist upon graduation from a barbering school that provides not less (and often much more) than one thousand hours of instruction in 'theoretical subjects' such as sterilization of instruments, and this must still be followed by apprenticeship."[6] I trust these quotations make it clear that the problem of licensing of occupations is something more than a trivial illustration of the problem of state intervention, that it is already in this country a serious infringement on the freedom of individuals to pursue activities of their own choice, and that it threatens to become a much more serious one with the continual pressure upon legislatures to extend it.

Before discussing the advantages and disadvantages of licensing, it is worth noting why we have it and what general political problem is revealed by the tendency for such special legislation to be enacted. The declaration by a large number of different state legislatures that barbers must be approved by a committee of other barbers is hardly persuasive evidence that there is in fact a public interest in having such legislation. Surely the explanation is different; it is that a producer group tends to be more concentrated politically than a consumer group. This is an obvious point often made and yet one whose importance cannot be overstressed.[7] Each of us is a producer and also a consumer. However, we are much more specialized and devote a much larger fraction of our attention to our activity as a producer than as a consumer. We consume literally thousands if not millions of items. The result is that people in the same trade, like barbers or physicians, all have an intense interest in the specific problems of this trade and are willing to devote considerable energy to doing something about them. On the other hand, those of us who use barbers at all, get barbered infrequently and spend only a minor fraction of our income in barber shops. Our interest is casual. Hardly any of us are willing to devote much time going to the legislature in order to testify against the iniquity of restricting the practice of barbering. The same point holds for tariffs. The groups that think they have a special interest in particular tariffs are concentrated groups to whom the issue makes a great deal of difference. The public interest is widely dispersed. In consequence, in the absence of any general arrangements to offset the pressure of special interests, producer groups will invariably have a much stronger influence on legislative action and the powers that be than will the diverse, widely spread consumer interest. Indeed from this point of view, the puzzle is not why we have so many silly licensure laws, but why we don't have far more. The puzzle is how we ever succeeded in getting the relative freedom from government controls over the productive activities of individuals that we have had and still have in this country, and that other countries have had as well.

[4] In fairness to Walter Gellhorn, I should note that he does not share my view that the correct solution to these problems is to abandon licensing. On the contrary, he thinks that while licensing has gone much too far it has some real functions to perform. He suggests procedural reforms and changes that in his view would limit the abuse of licensure arrangements.

[5] *Ibid.*, pp. 121–22.

[6] *Ibid.*, p. 146.

[7] See, for example, Wesley Mitchell's famous article on the "Backward Art of Spending Money," reprinted in his book of essays carrying that title (New York: McGraw-Hill, 1937), pp. 3–19.

The only way that I can see to offset special producer groups is to establish a general presumption against the state undertaking certain kinds of activities. Only if there is a general recognition that governmental activities should be severely limited with respect to a class of cases, can the burden of proof be put strongly enough on those who would depart from this general presumption to give a reasonable hope of limiting the spread of special measures to further special interests. This point is one we have adverted to time and again. It is of a piece with the argument for the Bill of Rights and for a rule to govern monetary policy and fiscal policy.

POLICY ISSUES RAISED BY LICENSURE

It is important to distinguish three different levels of control: first, registration; second, certification; third, licensing.

By registration, I mean an arrangement under which individuals are required to list their names in some official register if they engage in certain kinds of activities. There is no provision for denying the right to engage in the activity to anyone who is willing to list his name. He may be charged a fee, either as a registration fee or as a scheme of taxation.

The second level is certification. The governmental agency may certify that an individual has certain skills but may not prevent, in any way, the practice of any occupation using these skills by people who do not have such a certificate. One example is accountancy. In most states, anybody can be an accountant, whether he is a certified public accountant or not, but only those people who have passed a particular test can put the title CPA after their names or can put a sign in their offices saying they are certified public accountants. Certification is frequently only an intermediate stage. In many states, there has been a tendency to restrict an increasing range of activities to certified public accountants. With respect to such activities there is licensure, not certification. In some states, "architect" is a title which can be used only by those who have passed a specified examination. This is certification. It does not prevent anyone else from going into the business of advising people for a fee how to build houses.

The third stage is licensing proper. This is an arrangement under which one must obtain a license from a recognized authority in order to engage in the occupation. The license is more than a formality. It requires some demonstration of competence or the meeting of some tests ostensibly designed to insure competence, and anyone who does not have a license is not authorized to practice and is subject to a fine or a jail sentence if he does engage in practice.

The question I want to consider is this: under what circumstances, if any, can we justify the one or the other of these steps? There are three different grounds on which it seems to me registration can be justified consistently with liberal principles.

First, it may assist in the pursuit of other aims. Let me illustrate. The police are often concerned with acts of violence. After the event, it is desirable to find out who had access to firearms. Before the event, it is desirable to prevent firearms from getting into the hands of people who are likely to use them for criminal purposes. It may assist in the pursuit of this aim to register stores selling firearms. Of course, if I may revert to a point made several times in earlier chapters, it is never enough to say that there *might* be a justification along these lines, in order to conclude that there *is* justification. It is necessary to set up a balance sheet of the advantages and disadvantages in the light of liberal principles. All I am now saying is that this consideration might in some cases justify overriding the general presumption against requiring the registration of people.

Second, registration is sometimes a device to facilitate taxation and nothing more. The questions at issue then become whether the particular tax is an appropriate method to raise revenue for financing government services regarded as necessary, and whether registration facilitates the collection of taxes. It may do so either because a tax is imposed on the person who registers, or because the person who registers is used as a tax collector. For example, in collecting a sales tax imposed on various items of consumption, it is necessary to have a register or list of all the places selling goods subject to the tax.

Third, and this is the one possible justification for registration which is close to our main interest, registration may be a means to protect consumers against fraud. In general, liberal principles

assign to the state the power to enforce contracts, and fraud involves the violation of a contract. It is, of course, dubious that one should go very far to protect in advance against fraud because of the interference with voluntary contracts involved in doing so. But I do not think that one can rule out on grounds of principle the possibility that there may be certain activities that are so likely to give rise to fraud as to render it desirable to have in advance a list of people known to be pursuing this activity. Perhaps one example along these lines is the registration of taxicab drivers. A taxicab driver picking up a person at night may be in a particularly good position to steal from him. To inhibit such practices, it may be desirable to have a list of names of people who are engaged in the taxicab business, to give each a number, and to require that this number be put in the cab so that anyone molested need only remember the number of the cab. This involves simply the use of the police power to protect individuals against violence on the part of other individuals and may be the most convenient method of doing so.

Certification is much more difficult to justify. The reason is that this is something the private market generally can do for itself. This problem is the same for products as for people's services. There are private certification agencies in many areas that certify the competence of a person or the quality of a particular product. The *Good Housekeeping* seal is a private certification arrangement. For industrial products there are private testing laboratories that will certify to the quality of a particular product. For consumer products, there are consumer testing agencies of which Consumer's Union and Consumer's Research are the best known in the United States. Better Business Bureaus are voluntary organizations that certify the quality of particular dealers. Technical schools, colleges, and universities certify the quality of their graduates. One function of retailers and department stores is to certify the quality of the many items they sell. The consumer develops confidence in the store, and the store in turn has an incentive to earn this confidence by investigating the quality of the items it sells.

One can however argue that in some cases, or perhaps even in many, voluntary certification will not be carried as far as individuals would be willing to pay for carrying it because of the difficulty of keeping the certification confidential. The issue is essentially the one involved in patents and copyrights, namely, whether individuals are in a position to capture the value of the services that they render to others. If I go into the business of certifying people, there may be no efficient way in which I can require you to pay for my certification. If I sell my certification information to one person, how can I keep him from passing it on to others? Consequently, it may not be possible to get effective voluntary exchange with respect to certification, even though this is a service that people would be willing to pay for if they had to. One way to get around this problem, as we get around other kinds of neighborhood effects, is to have governmental certification.

Another possible justification for certification is on monopoly grounds. There are some technical monopoly aspects to certification, since the cost of making a certification is largely independent of the number of people to whom the information is transmitted. However, it is by no means clear that monopoly is inevitable.

Licensure seems to me still more difficult to justify. It goes still farther in the direction of trenching upon the rights of individuals to enter into voluntary contracts. Nonetheless, there are some justifications given for licensure that the liberal will have to recognize as within his own conception of appropriate government action, though, as always, the advantages have to be weighed against the disadvantages. The main argument that is relevant to a liberal is the existence of neighborhood effects. The simplest and most obvious example is the "incompetent" physician who produces an epidemic. Insofar as he harms only his patient, that is simply a question of voluntary contract and exchange between the patient and his physician. On this score, there is no ground for intervention. However, it can be argued that if the physician treats his patient badly, he may unleash an epidemic that will cause harm to third parties who are not involved in the immediate transaction. In such a case, it is conceivable that everybody, including even the potential patient and physician, would be willing to submit to the restriction of the practice of medicine to "competent" people in order to prevent such epidemics from occurring.

In practice, the major argument given for licensure by its proponents is not this one, which has some appeal to a liberal, but rather a strictly paternalistic argument that has little or no appeal. Individuals, it is said, are incapable of choosing their own servants adequately, their own physician or plumber or barber. In order for a man to choose a physician intelligently, he would have to be a physician himself. Most of us, it is said, are therefore incompetent and we must be protected against our own ignorance. This amounts to saying that we in our capacity as voters must protect ourselves in our capacity as consumers against our own ignorance, by seeing to it that people are not served by incompetent physicians or plumbers or barbers.

So far, I have been listing the arguments for registration, certification, and licensing. In all three cases, it is clear that there are also strong social costs to be set against any of these advantages. Some of these social costs have already been suggested and I shall illustrate them in more detail for medicine, but it may be worth recording them here in general form.

The most obvious social cost is that any one of these measures, whether it be registration, certification, or licensure, almost inevitably becomes a tool in the hands of a special producer group to obtain a monopoly position at the expense of the rest of the public. There is no way to avoid this result. One can devise one or another set of procedural controls designed to avert this outcome, but none is likely to overcome the problem that arises out of the greater concentration of producer than of consumer interest. The people who are most concerned with any such arrangement, who will press most for its enforcement and be most concerned with its administration, will be the people in the particular occupation or trade involved. They will inevitably press for the extension of registration to certification and of certification to licensure. Once licensure is attained, the people who might develop an interest in undermining the regulations are kept from exerting their influence. They don't get a license, must therefore go into other occupations, and will lose interest. The result is invariably control over entry by members of the occupation itself and hence the establishment of a monopoly position.

Certification is much less harmful in this respect. If the certified "abuse" their special certificates; if, in certifying newcomers, members of the trade impose unnecessarily stringent requirements and reduce the number of practitioners too much, the price differential between certified and non-certified will become sufficiently large to induce the public to use non-certified practitioners. In technical terms, the elasticity of demand for the services of certified practitioners will be fairly large, and the limits within which they can exploit the rest of the public by taking advantage of their special position will be rather narrow.

In consequence, certification without licensure is a half-way house that maintains a good deal of protection against monopolization. It also has its disadvantages, but it is worth noting that the usual arguments for licensure, and in particular the paternalistic arguments, are satisfied almost entirely by certification alone. If the argument is that we are too ignorant to judge good practitioners, all that is needed is to make the relevant information available. If, in full knowledge, we still want to go to someone who is not certified, that is our business; we cannot complain that we did not have the information. Since arguments for licensure made by people who are not members of the occupation can be satisfied so fully by certification, I personally find it difficult to see any case for which licensure rather than certification can be justified.

Even registration has significant social costs. It is an important first step in the direction of a system in which every individual has to carry an identity card, every individual has to inform authorities what he plans to do before he does it. Moreover, as already noted, registration tends to be the first step toward certification and licensure.

MEDICAL LICENSURE

The medical profession is one in which practice of the profession has for a long time been restricted to people with licenses. Offhand, the question, "Ought we to let incompetent physicians practice?" seems to admit of only a negative answer. But I want to urge that second thought may give pause.

In the first place, licensure is the key to the control that the medical profession can exercise over the number of physicians. To understand why this is so requires some discussion of the structure of the medical profession. The American Medical Association is perhaps the strongest trade union in the United States. The essence of the power of a trade union is its power to restrict the number who may engage in a particular occupation. This restriction may be exercised indirectly by being able to enforce a wage rate higher than would otherwise prevail. If such a wage rate can be enforced, it will reduce the number of people who can get jobs and thus indirectly the number of people pursuing the occupation. This technique of restriction has disadvantages. There is always a dissatisfied fringe of people who are trying to get into the occupation. A trade union is much better off if it can limit directly the number of people who enter the occupation — who ever try to get jobs in it. The disgruntled and dissatisfied are excluded at the outset, and the union does not have to worry about them.

The American Medical Association is in this position. It is a trade union that can limit the number of people who can enter. How can it do this? The essential control is at the stage of admission to medical school. The Council on Medical Education and Hospitals of the American Medical Association approves medical schools. In order for a medical school to get and stay on its list of approved schools it has to meet the standards of the Council. The power of the Council has been demonstrated at various times when there has been pressure to reduce numbers. For example, in the 1930's during the depression, the Council on Medical Education and Hospitals wrote a letter to the various medical schools saying the medical schools were admitting more students than could be given the proper kind of training. In the next year or two, every school reduced the number it was admitting, giving very strong presumptive evidence that the recommendation had some effect.

Why does the Council's approval matter so much? If it abuses its power, why don't unapproved medical schools arise? The answer is that in almost every state in the United States, a person must be licensed to practice medicine, and to get the license, he must be a graduate of an approved school. In almost every

state, the list of approved schools is identical with the list of schools approved by the Council on Medical Education and Hospitals of the American Medical Association. That is why the licensure provision is the key to the effective control of admission. It has a dual effect. On the one hand, the members of the licensure commission are always physicians and hence have some control at the step at which men apply for a license. This control is more limited in effectiveness than control at the medical school level. In almost all professions requiring licensure, people may try to get admitted more than once. If a person tries long enough and in enough jurisdictions he is likely to get through sooner or later. Since he has already spent the money and time to get his training, he has a strong incentive to keep trying. Licensure provisions that come into operation only after a man is trained therefore affect entry largely by raising the costs of getting into the occupation, since it may take a longer time to get in and since there is always some uncertainty whether he will succeed. But this rise in cost is nothing like so effective in limiting entry as is preventing a man from getting started on his career. If he is eliminated at the stage of entering medical school, he never comes up as a candidate for examination; he can never be troublesome at that stage. The efficient way to get control over the number in a profession is therefore to get control of entry into professional schools.

Control over admission to medical school and later licensure enables the profession to limit entry in two ways. The obvious one is simply by turning down many applicants. The less obvious, but probably far more important one, is by establishing standards for admission and licensure that make entry so difficult as to discourage young people from ever trying to get admission. Though most state laws require only two years of college prior to medical school, nearly 100 per cent of the entrants have had four years of college. Similarly, medical training proper has been lengthened, particularly through more stringent internship arrangements.

As an aside, the lawyers have never been as successful as the physicians in getting control at the point of admission to professional school, though they are moving in that direction. The reason is amusing. Almost every school on the American Bar

Association's list of approved schools is a full time day school; almost no night schools are approved. Many state legislators, on the other hand, are graduates of night law schools. If they voted to restrict admission to the profession to graduates of approved schools, in effect they would be voting that they themselves were not qualified. Their reluctance to condemn their own competence has been the main factor that has tended to limit the extent to which law has been able to succeed in imitating medicine. I have not myself done any extensive work on requirements for admission to law for many years but I understand that this limitation is breaking down. The greater affluence of students means that a much larger fraction are going to full time law schools and this is changing the composition of the legislatures.

To return to medicine, it is the provision about graduation from approved schools that is the most important source of professional control over entry. The profession has used this control to limit numbers. To avoid misunderstanding let me emphasize that I am not saying that individual members of the medical profession, the leaders of the medical profession, or the people who are in charge of the Council on Medical Education and Hospitals deliberately go out of their way to limit entry in order to raise their own incomes. That is not the way it works. Even when such people explicitly comment on the desirability of limiting numbers to raise incomes they will always justify the policy on the grounds that if "too" many people are let in, this will lower their incomes so that they will be driven to resort to unethical practices in order to earn a "proper" income. The only way, they argue, in which ethical practices can be maintained is by keeping people at a standard of income which is adequate to the merits and needs of the medical profession. I must confess that this has always seemed to me objectionable on both ethical and factual grounds. It is extraordinary that leaders of medicine should proclaim publicly that they and their colleagues must be paid to be ethical. And if it were so, I doubt that the price would have any limit. There seems little correlation between poverty and honesty. One would rather expect the opposite; dishonesty may not always pay but surely it sometimes does.

Control of entry is explicitly rationalized along these lines only at times like the Great Depression when there is much unemployment and relatively low incomes. In ordinary times, the rationalization for restriction is different. It is that the members of the medical profession want to raise what they regard as the standards of "quality" of the profession. The defect in this rationalization is a common one, and one that is destructive of a proper understanding of the operation of an economic system, namely, the failure to distinguish between technical efficiency and economic efficiency.

A story about lawyers will perhaps illustrate the point. At a meeting of lawyers at which problems of admission were being discussed, a colleague of mine, arguing against restrictive admission standards, used an analogy from the automobile industry. Would it not, he said, be absurd if the automobile industry were to argue that no one should drive a low quality car and therefore that no automobile manufacturer should be permitted to produce a car that did not come up to the Cadillac standard. One member of the audience rose and approved the analogy, saying that, of course, the country cannot afford anything but Cadillac lawyers! This tends to be the professional attitude. The members look solely at technical standards of performance, and argue in effect that we must have only first-rate physicians even if this means that some people get no medical service—though of course they never put it that way. Nonetheless, the view that people should get only the "optimum" medical service always lead to a restrictive policy, a policy that keeps down the number of physicians. I would not, of course, want to argue that this is the only force at work, but only that this kind of consideration leads many well-meaning physicians to go along with policies that they would reject out-of-hand if they did not have this kind of comforting rationalization.

It is easy to demonstrate that quality is only a rationalization and not the underlying reason for restriction. The power of the Council on Medical Education and Hospitals of the American Medical Association has been used to limit numbers in ways that cannot possibly have any connection whatsoever with quality. The simplest example is their recommendation to various

states that citizenship be made a requirement for the practice of medicine. I find it inconceivable to see how this is relevant to medical performance. A similar requirement that they have tried to impose on occasion is that examination for licensure must be taken in English. A dramatic piece of evidence on the power and potency of the Association as well as on the lack of relation to quality is proved by one figure that I have always found striking. After 1933, when Hitler came to power in Germany, there was a tremendous outflow of professional people from Germany, Austria and so on, including of course, physicians who wanted to practice in the United States. The number of physicians trained abroad who were admitted to practice in the United States in the five years after 1933 was the same as in the five years before. This was clearly not the result of the natural course of events. The threat of these additional physicians led to a stringent tightening of requirements for foreign physicians that imposed extreme costs upon them.

It is clear that licensure is the key to the medical profession's ability to restrict the number of physicians who practice medicine. It is also the key to its ability to restrict technological and organizational changes in the way medicine is conducted. The American Medical Association has been consistently against the practice of group medicine, and against prepaid medical plans. These methods of practice may have good features and bad features, but they are technological innovations that people ought to be free to try out if they wish. There is no basis for saying conclusively that the optimum technical method of organizing medical practice is practice by an independent physician. Maybe it is group practice, maybe it is by corporations. One ought to have a system under which all varieties can be tried.

The American Medical Association has resisted such attempts and has been able effectively to inhibit them. It has been able to do so because licensure has indirectly given it control of admission to practice in hospitals. The Council on Medical Education and Hospitals approves hospitals as well as medical schools. In order for a physician to get admission to practice in an "approved" hospital, he must generally be approved by his county medical association or by the hospital board. Why

can't unapproved hospitals be set up? Because under present economic conditions, in order for a hospital to operate it must have a supply of interns. Under most state licensure laws, candidates must have some internship experience to be admitted to practice, and internship must be in an "approved" hospital. The list of "approved" hospitals is generally identical with that of the Council on Medical Education and Hospitals. Consequently, the licensure law gives the profession control over hospitals as well as over schools. This is the key to the AMA's largely successful opposition to various types of group practice. In a few cases, the groups have been able to survive. In the District of Columbia, they succeeded because they were able to bring suit against the American Medical Association under the federal Sherman antitrust laws, and won the suit. In a few other cases, they have succeeded for special reasons. There is, however, no doubt that the tendency toward group practice has been greatly retarded by the AMA's opposition.

It is interesting, and this is an aside, that the medical association is against only one type of group practice, namely, prepaid group practice. The economic reason seems to be that this eliminates the possibility of engaging in discriminatory pricing.[8]

It is clear that licensure has been at [illegible] of the restriction of entry and that this involves a heavy [illegible] cost, both to the individuals who want to practice medicine but are prevented from doing so and to the public deprived of the medical care it wants to buy and is prevented from buying. Let me now ask the question: Does licensure have the good effects that it is said to have?

In the first place, does it really raise standards of competence? It is by no means clear that it does raise the standards of competence in the actual practice of the profession for several reasons. In the first place, whenever you establish a block to entry into any field, you establish an incentive to find ways of getting around it, and of course medicine is no exception. The rise of the professions of osteopathy and of chiropractic is not unrelated to the restriction of entry into medicine. On the contrary, each of these represented, to some extent, an attempt to find a

[8] See Reuben Kessel, "Price Discrimination in Medicine," *The Journal of Law and Economics*, Vol. I (October, 1958), 20–53.

way around restriction of entry. Each of these, in turn, is proceeding to get itself licensed, and to impose restrictions. The effect is to create different levels and kinds of practice, to distinguish between what is called medical practice and substitutes such as osteopathy, chiropractic, faith healing and so on. These alternatives may well be of lower quality than medical practice would have been without the restrictions on entry into medicine.

More generally, if the number of physicians is less than it otherwise would be, and if they are all fully occupied, as they generally are, this means that there is a smaller total of medical practice by trained physicians—fewer medical man-hours of practice, as it were. The alternative is untrained practice by somebody; it may and in part must be by people who have no professional qualifications at all. Moreover, the situation is much more extreme. If "medical practice" is to be limited to licensed practitioners, it is necessary to define what medical practice is, and featherbedding is not something that is restricted to the railroads. Under the interpretation of the statutes forbidding unauthorized practice of medicine, many things are restricted to licensed physicians that could perfectly well be done by technicians, and other skilled people who do not have a Cadillac medical training. I am not enough of a technician to list the examples at all fully. I only know that those who have looked into the question say that the tendency is to include in "medical practice" a wider and wider range of activities that could perfectly well be performed by technicians. Trained physicians devote a considerable part of their time to things that might well be done by others. The result is to reduce drastically the amount of medical care. The relevant average quality of medical care, if one can at all conceive of the concept, cannot be obtained by simply averaging the quality of care that is given; that would be like judging the effectiveness of a medical treatment by considering only the survivors; one must also allow for the fact that the restrictions reduce the amount of care. The result may well be that the average level of competence in a meaningful sense has been reduced by the restrictions.

Even these comments do not go far enough, because they consider the situation at a point in time and do not allow for

changes over time. Advances in any science or field often result from the work of one out of a large number of crackpots and quacks and people who have no standing in the profession. In the medical profession, under present circumstances, it is very difficult to engage in research or experimentation unless you are a member of the profession. If you are a member of the profession and want to stay in good standing in the profession, you are seriously limited in the kind of experimentation you can do. A "faith healer" may be just a quack who is imposing himself on credulous patients, but maybe one in a thousand or in many thousands will produce an important improvement in medicine. There are many different routes to knowledge and learning and the effect of restricting the practice of what is called medicine and defining it as we tend to do to a particular group, who in the main have to conform to the prevailing orthodoxy, is certain to reduce the amount of experimentation that goes on and hence to reduce the rate of growth of knowledge in the area. What is true for the content of medicine is true also for its organization, as has already been suggested. I shall expand further on this point below.

There is still another way in which licensure, and the associated monopoly in the practice of medicine, tend to render standards of practice low. I have already suggested that it renders the average quality of practice low by reducing the number of physicians, by reducing the aggregate number of hours available from trained physicians for more rather than less important tasks, and by reducing the incentive for research and development. It renders it low also by making it much more difficult for private individuals to collect from physicians for malpractice. One of the protections of the individual citizen against incompetence is protection against fraud and the ability to bring suit in the court against malpractice. Some suits are brought, and physicians complain a great deal about how much they have to pay for malpractice insurance. Yet suits for malpractice are fewer and less successful than they would be were it not for the watchful eye of the medical associations. It is not easy to get a physician to testify against a fellow physician when he faces the sanction of being denied the right to practice in an

"approved" hospital. The testimony generally has to come from members of panels set up by medical associations themselves, always, of course, in the alleged interest of the patients.

When these effects are taken into account, I am myself persuaded that licensure has reduced both the quantity and quality of medical practice; that it has reduced the opportunities available to people who would like to be physicians, forcing them to pursue occupations they regard as less attractive; that it has forced the public to pay more for less satisfactory medical service, and that it has retarded technological development both in medicine itself and in the organization of medical practice. I conclude that licensure should be eliminated as a requirement for the practice of medicine.

When all this is said, many a reader, I suspect, like many a person with whom I have discussed these issues, will say, "But still, how else would I get any evidence on the quality of a physician. Granted all that you say about costs, is not licensure the only way of providing the public with some assurance of at least minimum quality?" The answer is partly that people do not now choose physicians by picking names at random from a list of licensed physicians; partly, that a man's ability to pass an examination twenty or thirty years earlier is hardly assurance of quality now; hence, licensure is not now the main or even a major source of assurance of at least minimum quality. But the major answer is very different. It is that the question itself reveals the tyranny of the status quo and the poverty of our imagination in fields in which we are laymen, and even in those in which we have some competence, by comparison with the fertility of the market. Let me illustrate by speculating on how medicine might have developed and what assurances of quality would have emerged, if the profession had not exerted monopoly power.

Suppose that anyone had been free to practice medicine without restriction except for legal and financial responsibility for any harm done to others through fraud and negligence. I conjecture that the whole development of medicine would have been different. The present market for medical care, hampered as it has been, gives some hints of what the difference would have been. Group practice in conjunction with hospitals would

have grown enormously. Instead of individual practice plus large institutional hospitals conducted by governments or eleemosynary institutions, there might have developed medical partnerships or corporations—medical teams. These would have provided central diagnostic and treatment facilities, including hospital facilities. Some presumably would have been prepaid, combining in one package present hospital insurance, health insurance, and group medical practice. Others would have charged separate fees for separate services. And of course, most might have used both methods of payment.

These medical teams—department stores of medicine, if you will—would be intermediaries between the patients and the physician. Being long-lived and immobile, they would have a great interest in establishing a reputation for reliability and quality. For the same reason, consumers would get to know their reputation. They would have the specialized skill to judge the quality of physicians; indeed, they would be the agent of the consumer in doing so, as the department store is now for many a product. In addition, they could organize medical care efficiently, combining medical men of different degrees of skill and training, using technicians with limited training for tasks for which they were suited, and reserving highly skilled and competent specialists for the tasks they alone could perform. The reader can add further flourishes for himself, drawing in part, as I have done, on what now goes on at the leading medical clinics.

Of course, not all medical practice would be done through such teams. Individual private practice would continue, just as the small store with a limited clientele exists alongside the department store, the individual lawyer alongside the great many-partnered firm. Men would establish individual reputations and some patients would prefer the privacy and intimacy of the individual practitioner. Some areas would be too small to be served by medical teams. And so on.

I would not even want to maintain that the medical teams would dominate the field. My aim is only to show by example that there are many alternatives to the present organization of practice. The impossibility of any individual or small group conceiving of all the possibilities, let alone evaluating their merits,

is the great argument against central governmental planning and against arrangements such as professional monopolies that limit the possibilities of experimentation. On the other side, the great argument for the market is its tolerance of diversity; its ability to utilize a wide range of special knowledge and capacity. It renders special groups impotent to prevent experimentation and permits the customers and not the producers to decide what will serve the customers best.

Chapter X

The Distribution of Income

A CENTRAL ELEMENT IN the development of a collectivist sentiment in this century, at least in Western countries, has been a belief in equality of income as a social goal and a willingness to use the arm of the state to promote it. Two very different questions must be asked in evaluating this egalitarian sentiment and the egalitarian measures it has produced. The first is normative and ethical: what is the justification for state intervention to promote equality? The second is positive and scientific: what has been the effect of the measures actually taken?

THE ETHICS OF DISTRIBUTION

The ethical principle that would directly justify the distribution of income in a free market society is, "To each according to

INDEPENDENT VIEW

Carl Smiley

Deregulation: Safety's Role

The objectives of government planners in different agencies are often so varied that a single policy can't meet the goals of all concerned. A prime example is the call for deregulation of the trucking industry by some members of the Council of Economic Advisors and officials of some past administrations. While these people have been mainly concerned with operation of the free enterprise system and the lowest possible consumer prices, other branches of government have been spending a lot of time—and truck buyers' dollars—trying to make highways safer.

A recent study by Dr. D. Daryl Wyckoff of the Harvard Graduate School of Business indicates that these two philosophies are not compatible in actual practice. Dr. Wyckoff distributed an extensive four-page questionnaire to drivers last December, and about 10,500 were filled out and returned. About half the responses were made by company drivers for private and common carriers and the balance were from independent contractors and exempt independents.

□ □ □

For those familiar with the trucking industry, the answers contain few surprises. They only support the contention that truckers with the least assurance of an adequate income drive faster and have more accidents and moving violations. In all three of those categories, company or independent carriers of exempt commodities vied for the doubtful distinction of ranking first. Here are some results of the survey:

Type of Operation	Cruising Speed mph	Moving Violations 100,000 mi. per yr.	Reportable Accidents 100,000 mi. per yr.
exempt, company	63.00	1.32	0.24
exempt, contractor	62.55	1.33	0.70
private	61.72	0.87	0.24
contract, contractor	60.95	0.74	0.33
common, contractor	60.26	0.77	0.31
contract, company	59.39	0.76	0.26
common, company	58.85	0.41	0.19

The number of moving violations almost perfectly parallels the average speed of various types of drivers. The number of reportable accidents is not necessarily an indication that drivers for private carriers and exempt haulers have fewer accidents. The Bureau of Motor Carrier Safety has repeatedly charged that those truckers do not report accidents unless they are major crashes.

The data in this survey supports that charge; exempt contractors admitted to having a greater number of reportable accidents than any of the regulated carrier drivers, whether on payroll or under lease. BMCS statistics, based on voluntary reports of accidents where damage exceeds $200, indicate that regulated carriers have a much higher number of accidents in relation to miles driven.

Cheating on hours of service also follows a common pattern in the survey. Here are survey results in that category:

Type of Operation	% Using Multiple Logs	% Falsifying Logs	% Driving Over 10 hrs.
exempt, company	32.74	39.28	45.98
exempt, contractor	27.37	44.94	43.87
private	9.56	29.36	25.06
contract, contractor	10.22	33.56	27.23
common, contractor	11.89	33.91	11.30
contract, company	1.87	29.26	13.05
common, company	4.90	4.27	2.48

It seems clear from the results of this survey that many exempt carriers pay little or no attention to safety regulations. Whether this is a matter of economics or simply a "Go-to-hell" attitude isn't clear. But exempt carriers as a group tend to resist rate regulation.

"Picky, picky, picky . . ."

Interestingly enough, some major rule changes have been made or are pending that coincide closely with the results of the survey. One is the new detention rule. A few days ago a common carrier executive told me: "I can't argue with the intent of the rule. But it simply doesn't take reality into account. We have a long, profitable run to our eastern terminus but only one authority on the return trip. Contractors loved it because it paid well both ways. But they often have to lay over 12 to 24 hours to get loaded out. None ever minded because the haul was profitable even considering the lost time.

"Now comes the new detention rule," he said, "and we charge the customer $18 per hour detention. He calls us and says that while he likes our service two local carriers will drop him trailers at no cost. Our contractors are perfectly willing to go on as they have. After all, they're making money on the round trip. But we can't afford to lose a certificate by waiving detention.

"We have two choices: drop the account and deadhead our contractors back, or set up a trailer pool so we can drop trailers. Problem is about 60% of our contractors own their own trailers so they aren't happy about that either."

This is one of those instances where a well-intentioned rule can hurt more than it helps. The carrier is urged by contractors to forget detention—just get them the loads. But he points out that becoming the first case in court under the new rule is hardly one of his goals.

The pending changes in the hours of service regulation are another example of the same type of situation. The survey of Dr. Wyckoff indicates that only common carrier company drivers pay any attention to hours of service as regulations are now written. Most flagrant violators are those hauling exempt commodities. If nearly half the latter can't live with present hours of service, why are they not protesting the still more stringent hours of service regulations sought by the Teamsters?

□ □ □

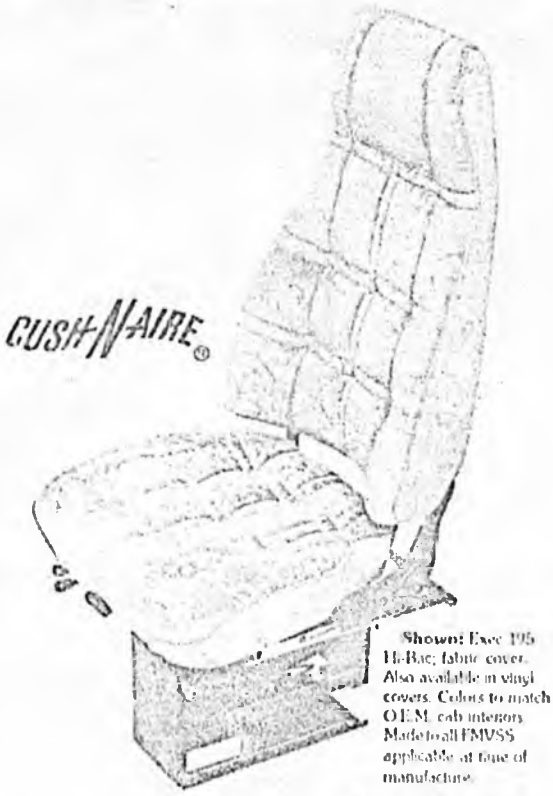
In a sense of the word this thumbing the nose at regulations has contributed to the chaos of the trucking industry. If a shipper doesn't like rates or delivery schedules of legitimate carriers, he only has to contact a hot freight artist who will take it across the country non-stop at half the cost. But the same people who accept those types of loads are the ones who cry loudest about the restrictions of regulation and the difficulties of surviving in the business.

The carrier who called me probably reflects a widespread opinion among legitimate carriers when he said, "All these new regulations are placing a burden of enforcement on the carrier. I for one am not going to tolerate falsified logs because BMCS will think of auditing regulated carriers first. It's about time contractors and independents either fight rule changes that take money out of their pockets or learn to live with them. I think we may be headed toward an enforcement situation that gives them no other choice."

The record of compliance with safety regulations has such a direct bearing on the amount of economic regulation that truckers live with that I begin to suspect there are two worlds in trucking: those who largely obey the law and are reasonably well rewarded for their efforts, and those who have trouble surviving even though they break every safety regulation on the books.

That fact alone is mute testimony that independents and contractors need to make their opinions heard. The attitude that BMCS safety regulations were only written to be broken is bringing on an enforcement attitude that could spell disaster for many in trucking.

NOW! EXEC SERIES



Shown: Exec 195 Hi-Back; fabric cover. Also available in vinyl covers. Colors to match O.E.M. cab interiors. Made to all FMVSS applicable at time of manufacture.

Here's the totally operator-oriented air seat series from National Cush-N-Aire. It can match any man to his machine. We call it the EXEC SERIES because it does more – it puts him in charge.

Now there's the built-in smooth riding Chugger-Snubber with Positive Lock-Out. Standard on models 95 and 195.

There's the modified backrest that allows extra room at the belt line and increased lumbar support. Improved seat cushion for even more comfort than before. Both backed with resilient webbing to help operators stay relaxed, alert and productive.

Also, there are all the great things like air-suspension, contoured cushions and the broad range of seat adjustments that have made Cush-N-Aire the best selling air seat

Ask for National Cush-N-Aire EXEC SERIES by name for a remarkably comfortable, virtually maintenance free ride.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

OFFICE OF THE COMMISSIONER

POUCH Z
JUNEAU, ALASKA 99811
(TELEX 45-328)

RE: Senate Bill 60,
Relating to Enforcement Authority

Honorable Brad Bradley
Chairman, Senate Commerce Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Bradley:

The Department of Transportation and Public Facilities offers the following comments on Senate Bill 60.

The amendments proposed by this bill are in consonance with actions by National and other States' regulatory authorities for surface and air carriers, to reduce safety violations and other infractions of carrier regulations.

The debate on carrier deregulation, especially for the trucking industry, is intense at the National and State levels. Attached for your information are reports on the subject. Please note the report by the American Trucking Association, Inc., "Against Deregulation".

As discussed with the Alaska Transportation Commission, the amendments will provide the legal authority needed for enforcement of the ATC's regulations.

Sincerely,

Richard A. Holden
Deputy Commissioner

Mr. Bill Bulley, Secretary
Chairman, Highway Transport Subcommittee
Washington Department of Transportation
Transportation Building
Olympia, Washington 98504

Dear Mr. Bulley:

The Task Force on Trucking Deregulation met on December 28, 1978, at which time we reviewed and discussed the material we had been able to accumulate at that time.

Enclosed are three reports which we feel give accurate views on the pros, cons and middle ground to this issue. Although we do not feel we will have a draft position paper prior to the Policy Committee meeting in Fort Worth on January 23, we do feel it would be most helpful if the enclosed material were reviewed by the Policy Committee prior to our meeting.

One important matter we believe must be addressed by the Policy Committee prior to our position on this issue is Section III of the AASHTO National Transportation Policy as adopted by the Policy Committee, November 16, 1975, St. Louis, Missouri. It appears that a position toward deregulation would be in conflict with the present policy.

Sincerely,

John R. Tabb

FOR DEREGULATION

Regulation of Entry and Pricing in Truck Transportation

Edited by Paul W. MacAvoy
and John W. Snow

Ford Administration Papers on
Regulatory Reform

American Enterprise Institute for Public Policy Research
Washington, D.C.

As Analyzed and Edited
By
Task Force Committee on Trucking Deregulation

INTRODUCTION

- Motor Carrier Industry - large, complex.
- Exact number of intercity trucking firms is unknown.
  - Best total estimate in excess of 100,000 individual firms.
  - 15,000 motor carriers are regulated by ICC.
    18,000
- Trucking Industry hauls literally thousands of commodities to tens of thousands of U. S. communities.
- Total expenditures of industry in 1974 - $48.8 Billion.
- Accounts for 23% of all intercity freight transport measured in ton-miles or 64% measured in terms of transportation expenditures.
- Industry employs approximately 1.2 million people.
- Labor force heavily organized - principally by Teamsters Union.
- Despite large number of carriers, individual shipper of regulated commodities has limited choice available to him.
- No ICC-regulated carrier authorized to carry freight to any place in the U.S.
- Shipments between large cities - perhaps dozen or more carriers available.
- For smaller cities - particularly in growth areas since regulation of motor carriers began - perhaps one or two.
- In most instances - no carrier has authority to serve both the shipping and receiving points.
- Thus, two or more carriers must combine efforts to provide service required.
- Regulated carrier profits comparable with the rest of the U. S. economy.
- No information on exempt carriers - apparently good since that portion of industry continues to attract new capital. Operate good equipment - provide reliable service.
- Corporate turnover rate comparable to similar industries.
- All sectors of industry - regulated and unregulated - are affected by the regulatory system.
  - Common carriers must provide service to anyone, but cannot enter into contracts with their customers and are limited to certain commodity hauling and places served.

- Contract carriers - service by contract only and to a limited number of customers.

- Private carrier may haul goods for own company, but not for any other company - including its own corporate affiliates and subsidiaries.

- Agricultural carriers exempt from federal regulations, but are limited to unprocessed agricultural products - wheat, cabbage, corn, livestock, etc.

REGULATED CARRIERS

- Common and Contract Carriers.

  - Account for about 40% of total intercity truck freight in ton-miles.

  - ICC regulates rates of common carriers - commodities carried and routes of operation.

- Entry by new firms - limited.

- Most ICC operating authorities referred to as "grandfather rights" - in existence before 1935 Act.

- New entry granted, generally, only when ICC determines existing carriers not adequate to serve demands for truck transport.

- Expansion of existing carriers into new routes generally requires purchase of another carrier's operating authority.

- Firms regulated in one of two ways -

  - As to commodities carried, but latitude as to routes - "Specialized Commodity Carriers."

  - As to where they may operate, but latitude as to commodities carried - "General Freight Carriers."

- Specialized Commodity Carriers - generally smaller firms - specialize in truckload shipments, but do not require use of terminals.

- General Freight Carriers - 2/3 of total revenue of ICC - regulated industry.

- Truckload shipment carriers compete with railroads.

- Rates apply to both truckload (TL) and less than truckload (LTL), but affects general freight most.

- Rates determined by rate bureaus sanctioned by ICC.

- Result - LTL shippers have only one rate available - no competition.

- Private carriers and railroads provide competition for truckload rates. In fact, most TL rates are negotiated individually between shipper and carrier.

UNREGULATED CARRIERS

- Nonregulated sector of trucking industry accounts for 60% of all traffic.

- Consists for most part of exempt and private carriers.

- Unregulated carriers must not carry regulated commodities on a for-hire basis.

- Though not directly subject to economic regulation, they are severely restricted by it.

  - Example: A carrier hauling wheat to a flour mill cannot haul processed flour back to wheat growing area.

  - Example: A private trucking company may not haul goods on a for-hire basis for another company, even though it is entirely owned by the other company.

  - Example: Private carriers may not lease their trucks and drivers to regulated carriers for periods of less than thirty days. Thus, they cannot lease their trucks on a back-haul basis. Result - unnecessary empty truck mileage - higher costs to consumers.

PASSENGER CARRIERS

- Intercity Bus Industry subject to economic regulation like trucking industry.

- 1067 regulated intercity bus firms in 1973 with $884 Million in revenue.

- Bus industry dominated by two firms which account for 70% of total revenue.

- Most routes dominated by one carrier.

- Most heavily traveled routes have two to no more than three carriers at best.

- Entry tightly restricted and rates tightly regulated.

MOTOR CARRIER RATES - Description of Present System

- Rate regulation particularly affects LTL general freight traffic.
- LTL rates initiated by associations of carriers called Rate Bureaus and are granted antitrust immunity by ICC.
- Almost all LTL shipments move under these rates.
- Individual carriers permitted to file independent rates - but the important rates are almost always set by rate bureaus. If an important rate is set by independent rate filing, the ICC routinely suspends the rate pending a hearing on ultimate lawfulness of the rate.
- ICC has broad powers to supervise rates through authority to find a rate unlawful. But instead, its powers usually exercised in enforcing the price-fixing of rate bureaus - rather than promoting price competition in rate making.
- Most LTL traffic moves under Categorical Class Rates. Commodities grouped into broad classes and rates are average rates based on average costs which are published for each class.
- Placement of a commodity in a class can substantially affect the shipping rate. Not unusual for several commodities with same transportation characteristics to move under different rates because of artificial grouping into different classes.
- Classification of Commodity based on characteristics of transportation and value of the commodity.
  - Example: A product may be placed in different classes based on the method of production.
- Class rates loosely related to industry-wide or system-wide average costs.
- No allowance made for the quality of the service provided under a rate.
- Rates not affected by balance of traffic or seasonal factors.
- Fronthaul and backhaul rates; peak and off-peak rates are same. Result - little inducement to utilize space on backhaul or to ship in off-peak time.
- TL (truckload) shipments frequently move under contract based on rates reflecting actual costs of required movements.

ECONOMIC EFFECTS OF RATE MAKING

- Rates are:
  - Too high.
  - Too inflexible.

- Irrational.
- Discriminatory.

Rates too High

- Unnecessary regulatory restrictions cause less efficient operation than when based on competition.

- Regulation causes carriers to use circuitous routes and empty backhauls.

- Costs are inflated by regulation, thus rates must be higher than otherwise to compensate for such costs.

- Since LTL rates are collectively set by rate bureaus, there is no incentive for competition.

- Firms will use power to set rates to their own advantage and therefore, price-fixing is illegal in almost all other industries.

- Nothing unique about the physical or economic attributes of trucking industry to justify anti-competitive practices such as collective pricing.

- In mid-1950's fresh and frozen poultry and frozen fruits and vegetables were changed from regulated to exempt commodities. Result - "before" and "after" studies by U. S. Dept. of Agriculture showed rates dropped by 33% on poultry and 19% on fruits and vegetables. Service improved dramatically as well.

- The same study found private carriage dropped significantly after commodities were exempted.

- The ATA (American Trucking Association) states that operating rights have great value and that value increases with time. The ATA statement to the ICC indicated that recent acquisitions in the motor carrier industry indicate that amounts paid for operating authorities amount to 15% to 20% of the annual revenues produced by those authorities. This is strong evidence that the present regulatory system works to the disadvantage of the consumers.

- Operating rights would only have value if carriers were able to earn higher than competitive returns on motor carrier service.

- Studies on why firms turn from common to private carriers show they do so because they (private carriers) can provide the same service at lower cost. This can be true only if common carriers were inflated or otherwise distorted, since private carrier costs are essentially the same as common carrier costs for the same operation - and private carriers are not allowed to solicit traffic for backhauls.

- Because regulated carrier rates are too high, shippers' distribution costs are too high. Result - consumers pay more for goods than they should.

- In certain markets, carriers with stifled price competition engage in wasteful service competition. Since they are unable to compete for traffic by lowering

rates, they compete by adding more frequent service than they otherwise would. This results in increased truck costs because the trucks run less fully loaded than they otherwise would. This fuels higher rates, because rates are based on average costs.

RATES AND SERVICE INFLEXIBLE

- Since rates are not allowed to vary, service quality is constrained. Carriers are prevented from charging premium rates to offset costs of superior service.

- Considerable evidence that users of motor carrier services want a diversity of price and service-quality alternatives, but they are prevented from it by the rate regulation system.

- A DOT survey showed that about 50% of industrial shippers used private carriers.

- Reasons given by 70% of those shippers cited dissatisfaction with common carrier service.

- There are numerous examples of shippers who are willing to pay premium prices for superior service, but unable to obtain such service from common carriers.

Rates are Irrational

- No rational relation between rates charged and service rendered.

- Rates for groups of towns further from a point of origin may be charged less than those nearer. (Example: Dallas & Houston to Colorado towns).

- Rates may be different even if traveling the same route. (Rocky Mountain Study - Nine States).

Rates are Discriminatory

- ICC requires all carrier rates be reasonable and not unjustly discriminatory. ICC has decided this means the same rates apply to all shippers moving similar traffic between specific points. When costs differ, the concept of equal is actual discrimination. Some shippers are charged more than the cost of their traffic and some charged less. Result - inequitable discrimination which breeds economic inefficiencies.

- Where traffic is greater in one direction than in the other, rates should be higher on the prime haul and lower on the backhaul. This is true simply because of lower costs associated with availability of excess capacity. ICC and the industry have resisted application of lower backhaul rates because such action inevitably leads to opening most of U. S. shipping to competitive pricing.

- A serious consequence is that shippers' long-run locational decisions are distorted. Were rates related to costs, manufacturers would have economic incentives to locate in the direction of the prevailing backhaul.

Rate Structure too Complex

- Endless artificial distinctions are strictly a product of regulatory systems.

- Given a choice, customers would not tolerate present system.

- Industry claims complexity results from needs to develop rates for so many different commodities traveling to so many destinations. But many other industries, unregulated, offer product lines to millions of customers. They do so without creating demand for specialized services such as rate audit firms to "ensure that customers receive the correct price", etc.

Restrictions on Entry

- Must have a certificate from ICC.

- Obtained in one of two ways:

  - Grandfather clause of 1935 Act - 18,000 plus firms in existence at time of passage of the Act.

  - Statutory test of "Public convenience and necessity."

- PC&N tough to meet since ICC has decided statute means new carriers should not be certified as long as existing carriers have "potential" to provide adequate service for traffic under consideration. (The inequity of denying individuals the opportunity to engage in the business of their choice in order to protect the interests of existing carriers is not considered at all.)

- In recent years approximately 80% of all applications have been granted, but few of the certificates were for new carriers, and of this small number very few were for authority broader than one commodity or one place.

Economic Effects

- Market Concentration and Monopoly Power.

  - One result of severe limits on new entry is to convert a naturally competitive industry into one in which there are numerous instances of monopoly (or oligopoly) power.

  - Best evidence is market value of operating rights.

  - In 1972 the top four of the top eight firms' shares of total operating income were 17% and 23% respectively. This is low compared to most manufacturing industries, but it must be viewed in the view of individual routes. Since even the largest firms have limited authority and are unable to serve the entire market, concentration on individual routes is much higher.

- Operating Inefficiencies

  - Certificate restrictions not only limit competition, they cause regulated carriers to operate less efficiently than they could if they were free to manage their own internal operations.

  - About 30% of all commodity-restricted authorities provide only one-way authority. Result - wasted resources.

  - Route-restricted authorities specify the route carriers must travel. Result - unnecessary mileage - wasted resources.

  - No single carrier able to carry a shipment its entire journey.

- Inequities

  - Grandfathered firms were awarded, free of charge, valuable property rights. ATA estimated that by 1970 about $300 Million in operating rights had been transacted. This represents a small fraction of total because only those authorities that have actually been sold are in the figure.

  - Other individuals have been prevented from engaging in the business of their choice.

  - Others, wanted to enter or to expand, have been forced to pay huge sums to those who already possessed operating rights.

Service to Rural Communities

- Supporters of present regulatory system contend that unless competition is restricted, motor carrier service to small rural communities will deteriorate. Without the "obligation" to serve, it is contended that small rural towns would not receive service because there would be no incentive to serve them.

- A U. S. DOT study concludes that the current regulatory policies actually impair rural motor carrier service. Rural towns would be better served by a regulatory program which placed greater reliance on competitive market forces and which eliminated unnecessary and wasteful operating restrictions - lower costs result in lower rates for service.

Myths Used to Oppose Motor Carrier Regulatory Reform

- Market Chaos

  - It is argued that any reduction in regulation will result in chaotic motor carrier service. Carriers, it is said, will rush around without direction, entering and leaving markets, or concentrating on large, high-density markets. Most markets are unregulated and these markets function in a generally efficient way. Firms make long-range commitments and customers are able to secure services. It is the supplier's interest to give orderly and dependable service

While it is true that a product needs transportation, transportation without products to transport would be useless - the supplier has a deep interest in planning.

- Regulatory Reform will Lead to Monopoly.

  - For industry concentration to lead to monopoly abuses, surviving firms would have to bar new entrants. Other than by regulatory barriers, there are no effective ways to bar entry in open competition. No unusual management skills are required. Trucks and drivers are available. Capital needs are modest compared to manufacturing industries. Currently, the exempt sector of the industry has thousands of carriers with no evidence of dominance by a few large carriers.

- Predatory Practices.

  - Some opponents to regulatory reform contend it will lead to predatory price cutting as firms try to drive their competitors out of the market. Predatory competition, at best, is a short-term risk. A rational firm would engage in such a practice only where there was a likely prospect of obtaining monopoly profits by reduction of the number of competitors or by disciplining the market. The predator firm would need superior resources and real staying power. There would need to be strict barriers to entry to enable the predator firm to recoup its loss. Where entry or reentry can occur relatively easily whenever prices return to levels at or above cost, the incentive in such behavior is eliminated. Experience in the exempt sector confirms the absence of predatory behavior in an unregulated environment. Besides, other laws that operate in other industries are available to protect against predatory behavior.

- Motor Carriers are Like Public Utilities.

  - The traditional argument for public utility regulation is the industry is a natural monopoly. This argument requires there be long-run economies of scale in the industry. If this is true, the industry will inevitably become concentrated in one or a few large firms unless there are legal constraints against that. Increasing returns to scale will give larger firms a competitive advantage over others in the industry. Unit costs will be lower so that they can underprice smaller firms, thus driving those out of the market. This argument is not applicable as justification for regulation of the motor carrier industry because motor carriers are not subject to increasing returns to scale. Large firms have no competitive advantage simply from being large. There is no tendancy toward natural monopoly. A related argument is regulation is justified for the industry because, like a public utility, the industry has an obligation to provide service. To balance the burdens of this obligation, it is argued the industry should be sheltered from competition by restricting entry. This argument is based on the "cart before the horse" theory. Public utilities are regulated because they <u>are</u> natural monopolies. Because of this monopoly they are required to provide service to all customers and prices are regulated. Saying it another way, utilities are not regulated because they are required to serve; they are regulated <u>and</u> required to serve because they are monopolies.

- Price Discrimination.

  - Without safeguards under the existing system, it is argued that carriers would practice price discrimination against shippers. Under the system all shippers are charged the same rate for the same movement.

    Only a monopoly is equipped to practice price discrimination. The current system causes price discrimination against shippers because rates are not based on the specific costs of service.

- How Can Rates Drop if Costs Do Not Drop?

  - Rates will decrease with regulatory reform, not because the costs of inputs will go down, but because resources will be used more efficiently. Costs will increase if inflation continues, but not inconsistent with the rest of the economy.

- Liberalized Entry Will Lead to Increased Truck Traffic on the Highways.

  - It is argued that regulation holds down the number of trucks on the highways. This argument confuses an increase in the number of firms with increased numbers of trucks on the highways. The latter is determined by the amount of cargo to be shipped. Regulatory reform should increase efficiency in the use of resources. Result - slower increase in total number of trucks necessary to provide service - thus, less truck traffic increase on highways.

- Impact on Railroads.

  - Regulatory system applies to LTL carriers - railroads do not compete in this field.

- Recreate the Conditions of the 1930's.

  - The 1930's was a period of severe depression and not a representative period in American life. The principal proponents of motor carrier regulation in the 1930's were the railroads who wanted to impose restrictions on a growing competitor. The "chaos" of the 30's were small truckers in a severe depression seeking to stay employed.

Motor Carrier Regulation — The Issue in Perspective

To: Newspaper and Magazine Editors
Radio and Television News Directors and Assignment Editors
Columnists
Commentators
News Analysts
Reporters

Since 1935, the interstate motor carrier freight system in the United States has been subject to economic regulation under the jurisdiction of the Interstate Commerce Commission.

Basically, this regulation has set controls over entry into the field and has established supervision over the rates charged.

When the regulation first went into effect, there were those who said it would never work. It has, but still over the years there have been voices raised against it — few in number and representing for the most part the isolated, detached views of economists, academic theorists and Justice Department attorneys, plus a few of the largest shippers in the country.

Lately, however, what began as a few whispers now has become a more persistent campaign, though one still supported in the main by a handful of theoreticians, whether they be in government, a university or an editorial office.

For our part, we have always believed — and still want to believe — that the vast majority of those working in the news media take their responsibilities to the public seriously and want, always, to be on the side of truth, fairness and justice.

We also believe that it is virtually impossible to know the truth about this complicated subject without first acquiring some basic knowledge and understanding about the forces that brought about this regulation in the first place and knowledge and understanding about the forces at work that make this regulation just as necessary and valid today.

In the interest of fairness, objectivity and truth, we ask you to take a few minutes to read this Background material, prepared especially for you who work in the news media. You are free, of course, to use all or any part of it, if you desire, but our purpose is to give you background.

If you have any questions concerning this report, the regulatory issue or any other matters relating to the trucking industry, we at American Trucking Associations will be pleased to assist you.

Motor Carrier Regulation — A Red Herring? 13

Summary: What's a Transportation System For? 15

On August 9, 1935, President Franklin D. Roosevelt signed into law the Motor Carrier Act, a landmark in transportation legislation which placed the interstate motor carrier freight business under economic regulation by the Interstate Commerce Commission.

Today, despite more than forty years of phenomenal growth and progress by what is universally hailed as the finest transportation network in history, this legislation is under attack by a small but influential assortment of critics.

Certain Senators and Congressmen, a few economists, a handful of government figures, some segments of the news media and a few big shippers have been assailing the regulatory system with a barrage that is virtually all heat and no light.

"We need more competition in trucking," they say.

"Regulation is costing American taxpayers billions of dollars a year," they say.

"Trucks are forced to run around empty because of regulation," they say.

"Trucking is a closed industry that won't allow in new blood," they say.

That is what they say — but the facts show otherwise.

Generally, three basic premises underlie the deregulation rhetoric:

(1) There is a terrible mess in truck transportation that needs correcting.

(2) The solution is simple.

(3) The trucking industry is no different than manufacturing or any other industry and should be subject to the same economic ground rules.

The first premise — that there is a terrible mess in our motor carrier system — is an essential tenet for all who favor deregulation. One could not possibly cry out for "meaningful motor carrier reform," unless one actually believed that such reform was necessary; ergo, things must be in a pretty sad state of affairs.

But are they?

When is the last time you were personally inconvenienced by a breakdown in the surface freight transportation system? If you are a member of the news media, you may give the subject of freight transportation some thought on occasion in the context of a news issue — you may comment on it, you may criticize it, you may report on it. But off the job you probably don't give it a moment's consideration. You just go through your daily routine, buying what you want to buy when you want to buy it, taking for granted it will be there, and thus in your personal life giving the lie to the charge that there is a "mess" that needs correction.

In making your purchases do you ever concern yourself with the cost of transportation that is built into the retail price? Most likely you do not. The general public does not. In fact, the average consumer in the United States takes freight transportation for granted. That is the highest tribute that can be paid to the regulatory system. But if there were a mess, as the critics contend, nobody would be taking the system for granted, and truck transportation would be the butt of the same kind of jokes comedians tell about the mail service.

The second premise — that the solution is simple — points up the lack of understanding of the freight transportation system and regulation. Every critic of the regulatory transportation system has oversimplified the matter.

And finally, the oversimplification always takes the form of comparing the trucking industry with other industries, with the clear implication that there is something unethical or un-American about any industry that can avoid what is referred to as "the competition of the market place."

The plain fact is the trucking industry is *not* the auto industry; the trucking industry is *not* the steel industry; the trucking industry is *not* the chemical industry. Transportation is *not* manufacturing and is not subject to the same economic laws as manufacturing.

Transportation is as special as telephone or electric power service and cannot be left completely to "the competition of the market place," without jeopardizing the public right to such service at an equitable rate. This is not to say there is not competition in trucking. In fact competition within the regulated trucking industry is intense. But admittedly, it is competition within the limits of a federally supervised structure. But it works and it works well.

Why Regulation?

The establishment of economic regulation of surface freight transportation was no accident. Nor was it something introduced in a hasty or cavalier fashion. Economic regulation of America's surface freight system was established by an Act of Congress only after a lengthy and deliberate investigation brought on by a torrent of complaints from the shipping public.

(It is significant that such complaints are not being heard today. General R. Rosen brought out this point in the August, 1977, issue of Dun's Review. ". . . there is no grassroots pressure for it," Rosen wrote referring to trucking deregulation. ". . . freight rates do not interest the average voter.")

Back in 1885, following complaints about inadequate or discriminatory freight service, a Senate Committee, the Cullom Committee, conducted hearings in various parts of the country, taking more than 2,000 pages of testimony. This Committee, whose members all would have been labeled "economic conservatives," finally reported:

"It is the deliberate judgment of the Committee that upon no public question are the people so nearly unanimous as upon the proposition that Congress should undertake in some way the regulation of interstate commerce."

The Committee Report zeroed in on the need for regulation, a necessity that still is valid today and will be valid so long as there is a general public need for freight transportation service:

"The paramount evil chargeable against the operation of the transportation system of the United States, as now conducted, is unjust discrimination between persons, places, commodities and particular descriptions of traffic."

Thus, the seller of transportation service had it within his power to favor this shipper to the detriment of that shipper, to serve this locality and ignore that locality, to carry this freight and refuse that freight.

". . . it was a common observation," the Cullom Report said, "even among those who might hope for special favors, that a system of rates, open to all and fair as between localities, would be far preferable to a system of special contracts in which so large a personal element entered or was commonly supposed to enter. Permanence of rates was also seen to be of very high importance to every man engaging in business enterprises, since without it business contracts were lottery ventures."

The report said that not only were manufacturers ruined by transportation discrimination, but even whole towns disappeared because of it.

And thus the Interstate Commerce Commission was established, not to protect the railroads, but to protect the shipper and to assure the small community of equitable service. The Interstate Commerce Act was the public's response to the retort, "The public be damned." Anyone wishing to understand the complexities of transportation regulation must first of all understand that this federal control was born of consumerism, not special interest lobbying.

Those favoring the elimination of these controls contend that times have changed, that the railroads had a monopoly on transportation in the 1880's and that there is no longer any need for regulation.

A half a century after the railroads were brought under the ICC, the Congress found it necessary to bring in the burgeoning motor carrier industry also. The Supreme Court referred to the pre-regulation era of the trucking industry while rendering a decision on leasing regulations in 1953 in this manner:

"Then (prior to 1935) the industry was unstable economically, dominated by ease of competitive entry and a fluid rate picture. And as a result, it became overcrowded with small economic units which proved unable to satisfy even the most minimal standards of safety or financial responsibility."

Moreover, the great competitive spirit seen rising between railroads and trucks in a deregulated system is more myth than reality. Such competition is limited to begin with. Under a non-regulated system, rails could charge whatever they'd like for hauling trainloads of coal from the mine to the generating plant hundreds of miles distant. No trucking company could handle that job at *any* rate. On the other hand, rails are not suitable for hauling the less-than-carload freight, the smaller shipments they long ago abandoned to the motor carriers.

Truck-rail competition has other natural limits, including the limited number of localities served by rails. According to the Rand McNally Commercial Atlas and Marketing Guide, of the 61,000 communities in the United States, 64 percent or virtually two out of three have no rail service whatsoever. Even those which do have rail service are dependent on trucks for most of the goods imported and for door-to-door transportation on those commodities brought in by rails.

We emphasize this difference between truck and rail service because there is a noted tendency among the uninitiated to think of these modes as generally interchangeable and thus offering the public a competitive choice not known in pre-trucking days.

Why, then, one might ask, is economic regulation necessary in the freight transportation industry? Why is the New York Times in error when it states flatly, "There is no more economic justification for restricting entry or allowing price-fixing in trucking than there is in the auto or steel or chemical industry?"

The reason is that trucking has more in common with telephone service, electric power service, and natural gas service than manufacturing. Like these other regulated service industries, freight transportation has the following properties not found in the auto, steel, chemical or other manufacturing industries:

1. It is a service, not a manufactured object, and is basically the same for everyone.

2. It is essential to the public welfare and must be available on an uninterrupted basis. Just as we need continuous water service and electric power, we need continuous freight service. The major reason these services are regulated is to see that we get them under fair and equitable conditions.

3. It has a limited demand. The demand for freight service is dependent on the amount of freight to be moved. Bringing in new trucking companies will not create one additional pound of freight.

4. It entails the movement from place of origin to consumer. Thus, an entirely new dimension is introduced, one of movement across fixed lines, be they pipelines, electric wires, rail lines, air routes, air frequencies (as in the case of radio and television), or highways. Experience shows that such movements require some kind of supervision to avoid confusion and even chaos, of which the public at large would be the chief victim.

So the greatest mistake being made by those favoring deregulation is to place freight transportation in the same category as manufacturing. It is a mistake the Justice Department has been making for years in its relentless drive to place trucking under anti-trust laws, even though Congress specifically exempted the motor carrier industry from certain anti-trust restrictions in 1948 by passing the Reed-Bulwinkle amendment, which become Section 5(a) of the Interstate Commerce Act.

It is ironic that of all the public-utility type of industries, only freight transportation is broad enough and variable enough to allow for meaningful competition. Yet freight transportation is the only one singled out for attack on the grounds that it is not competitive.

Not one deregulator has suggested that regulation be removed from electric power so as to allow free entry and price competition into that business.

Lack of competition is one of three major charges levied at the regulated motor carrier system. The other two are high costs and unnecessary empty mileage. Not one of the charges can stand up to close scrutiny, as we shall see.

Truck Competition: How Many Is Enough?

Competition thrives in trucking.

This statement flies in the face of the oft-repeated charge that a relaxation of entry is needed to bring in more competition. How much competition are these critics talking about? How many trucking companies would be enough to satisfy their definition of competion? And once a number is arrived at, how do they propose to maintain it without some kind of regulation?

It is highly ironic that the Department of Justice has been arguing for years that more competition is needed in trucking and the best way to get it is to do away with entry and rate controls and let the Justice Department's Antitrust Division take over.

Let's take a look at some numbers:

There are now more than 18,000 transportation companies of all kinds under ICC regulation. More than 16,000 of these are trucking companies. Of these 16,000 motor carriers regulated by the ICC, more than 12,000 — three out of four — are small businesses, having annual gross revenues of less than $500,000.

The four largest motor carriers account for just 10 percent of the total revenue volume; and the eight largest companies account for only 14 percent. For the most part, trucking is made up of small, family-owned and operated businesses.

By contrast, let's take a look at the competition in three of America's most prominent industries — motor vehicle manufacturing, steel manufacturing and cigarette manufacturing — all of which come under the jurisdiction of the Justice Department's Antitrust Division.

In the motor vehicle manufacturing industry, the four largest companies account for 91 percent of the volume; the eight largest for 97 percent!

In steel manufacturing, the four largest companies account for 47 percent of the volume; the eight largest for 65 percent!

In the cigarette manufacturing industry, the four largest companies account for 84 percent of the total; the eight largest for virtually all of the business!

In trucking, the business is spread out among 16,000 regulated interstate carriers, not to mention the tens of thousands of companies hauling freight within the borders of a single state.

Only two industries can show a better competitive picture than ICC-regulated trucking. Of the top 35 major industries in terms of value added by manufacture, the only ones with a greater distribution of the business than trucking are the manufacturers of miscellaneous machinery and the makers of women's clothing.

Within the regulated trucking industry, competion among carriers is as fierce as in any field of endeavor. An executive of a motor carrier hauling forzen foods out of Texas says: "Not one pound of freight we move is not in competition with some other carrier."

The head of a general commodities carrier operating in the Northeast says: "We have got to be on our toes all the time. If we don't give the service, there's three or four other companies ready to jump in and take it away from us."

Phil Cochran, President of Lyons Transportation Lines, a carrier of common commodities out of Erie, Pa., put it this way at a recent symposium sponsored by the Traffic Club of Cleveland:

"The concept of easy entry creating lower rates and, therefore, reducing costs to the general public is a myth. The competitive forces within the regulated industry accomplish this purpose . . .

"There are 42 major carriers in Erie, Pennsylvania, a city of some 200,000. When I was new in this business there were probably 5 or 6 major carriers serving Erie and we've watched them come in year after year. Believe me, folks, the economy of Erie isn't growing that fast. We're all taking less. But we're competing. No competition in the trucking industry? Those guys aren't talking to the right people."

The myth of a lack of competition in the trucking industry springs from the fact that there is a control over entry. Anyone wishing to enter the business of hauling freight across state lines must make an application for authority with the Interstate Commerce Commission. The traditional criteria for the granting of this authority has been public convenience and necessity — in short, a demonstrated need for the service.

The ICC for some years has been approving applications for new operating authority at the rate of 80 percent or more.

To abolish such control would leave the reliable existent carriers fair game for the destructive competition that would inevitably follow. As the ICC put it in its White Paper on regulation in September, 1974:

"To have a sound and growing transportation system, capable of meeting challenges of our times, there must be substantial carrier investment in operating equipment and fixed property.

The costs of purchasing and maintaining both equipment and facilities are extremely high; and, properly, the industry must be given some economic inducement to invest its monies in the expansion of its facilities. This inducement comes from the knowledge that to the extent they serve the public on a reasonably satisfactory basis, carriers will not have their profits drained by unwarranted or destructive competition. This was a major reason why regulation was necessary in the 1920s and 1930s and why it remains that way today.

"Here it must be emphasized that we do not stifle competition. We promote productive competition and foster growth of strong competitors. Indeed, it would be hard to find a significant shipper or sizable area anywhere in the country dependent on only one carrier licensed to haul its traffic."

If there were a lack of competition in freight transportation, then there also would be poor service. And yet the regulated motor carrier system has an enviable reputation among America's shippers and the general public for good, reliable, efficient service.

In a survey conducted by the Department of Transportation in 1973 and 1974 among industrial shippers, 66 percent of the shippers surveyed — two out of three — labeled motor carrier service either excellent or quite good, while another 31 percent rated it adequate. The study was extensive, involving the responses of 193 industrial manufacturers in 19 major metropolitan areas, each employing more than 100 persons.

The results of that survey were not surprising. Time and again, shippers have publicly supported ICC regulation of trucking because they know it assures them of good service at reasonable rates. Here are just a few comments by shipper representatives on the subject:

"The closer people are to the transportation business, the less likely they are to support total deregulation." — Frederick W. West, Jr., President, Bethlehem Steel Corporation.

"Total deregulation would result in chaos where only the large and powerful companies would survive. Like atomic warfare, there would be only survivors, not winners." — George C. Bush, General Traffic Manager, Youngstown Sheet and Tube Company.

"Under the right of free entry, there appears to be nothing that would prevent large shippers getting together for joint enterprises on round trip truck load movements. With complete balance achieved, their costs would be lowered to the point where the most attractive tonnage would be lost to the common carrier. With the cream gone, what would be the survival rate for those who would try to exist on the skim milk?" — Edwin P. Mundy, Vice President-Traffic, National Biscuit Company.

"This economic regulation of rates and services became necessary way back in 1887 simply to protect the public against railroads' discriminatory practices. Later it was found necessary to include trucking, barge companies, express operations and pipelines. Airplanes were also regulated under the C.A.B.

"After all these years, are we now saying discriminatory practices would disappear? Does anyone believe antitrust laws can provide protection to the public? Does this mean a shipper or receiver of freight must go to the courts every time he feels he has been discriminated against? What a cumbersome, time consuming and costly system this would be is anybody's guess." — D. G. Ploetz, General Traffic Manager, Harnischfeger Corporation, Milwaukee.

The shippers — with the exception of a few giants who could make deregulation work to their advantage -- have every reason to fear the dismantling of the system that has served them so well. The few giants who would benefit from deregulation (and whose private fleets rival some of the large common carriers) have been very active on the deregulation front. Numbering only about a dozen in all, they banded together in an organization set up expressly to help bring about the lessening of regulatory controls. The organization now goes by the name of CURRENT — for the Committee Urging Regulatory Reform for Efficient National Trucking — and its members include such conglomerates as General Mills, Green Giant and Carnation. Sears, Roebuck and Company, once the driving force behind the organization, recently dropped out, believing it could be more effective operating through other channels.

The feelings of the general public, the consumers, toward the trucking industry were made clear in a survey conducted by U.S. News and World Report. According to the survey, conducted in 1976, the public ranked the trucking industry third behind the airlines and banking (also under some form of economic regulation) in service among 30 industries.

It is the need of all shippers, particularly the smaller ones, for dependable service at an equitable cost that is at the heart of economic regulation of trucking.

Regulation does not bestow on the trucker the unfettered right to carry the goods he wants to carry for the shippers he wants to serve to the locations he chooses. To the contrary: Regulation imposes on the trucker the obligation to serve all of the public within the limits of his authority without discrimination.

And if the obligation were to be removed (and how could one expect established carriers to continue to transport the less profitable freight while incoming carriers were not so obligated?) then service would deteriorate. Small towns in particular would suffer.

This was brought home recently in a number of studies. An independent study commissioned by the Department of Transportation and conducted by a research team at George Washington University showed that small-town residents regard their truck service as adequate and are concerned that such service would suffer under deregulation. That came as a revelation to the researchers who said they had expected to find truck service to small towns to be poor.

In another independent study, three University of Miami professors concluded: "If free entry and free exit is made the public policy, the result will be cessation of for-hire motor carrier service at reasonable rates to thousands of small communities and other places or routes of light traffic density. The general pattern of what was formerly common carrier service in medium density markets will become unstable; the service pattern will oscillate widely, and the oscillation will be continuous, extensive, quite erratic, and will exact a severe penalty in terms of shipper uncertainty and associated problems of shipper inventory levels and related problems."

(Shipper inventories are another key to understanding how well the regulated motor carrier service works. Thanks to this dependable service, industrial America has no need to stockpile large inventories, which has given trucking the title of "warehouses on wheels.")

Regulated motor carriers, themselves, were asked if they would suspend service to one or more points if no longer obligated to serve them, and 62 percent of those responding said they would.

This survey, conducted by American Trucking Associations among more than 3,000 Class I and II carriers, showed that on the average, carriers, relieved of the obligation to serve, would reduce the average number of towns they serve from the present 84 to an estimated 58.

As noted by the University of Miami team — Drs. Nicholas A. Glaskowsky, Jr., Brian F. O'Neil and Donald R. Huddleson — common carriage is dependent on some kind of entry control. "We also note that the concept of permitting uncontrolled entry into and exit from common carriage is a contradiction in terms," their report said. "The moment there is free entry and free exit of carriers there will no longer be common carriage because common carriage includes the obligation to serve in a reliable, constant, and consistent manner."

The inescapable conclusion is that the weakening or elimination of entry control will not enhance competition — which is already plentiful — but will instead destroy the common carrier system, disrupt service to the smaller towns, open the gates to widespread discrimination and, in the long run, eliminate all but the largest and most powerful carriers.

Then, the very people now calling for deregulation will be in the forefront of a movement to impose regulation. It may then be too late.

Transportation Cost: The Price Is Right

While the lack of competition is a charge frequently leveled at the regulated motor carrier industry, the second charge — regulation increases costs — is one that has a natural appeal.

It is equally groundless.

But groundless or not, it has been repeated often enough over the last few years to take on the aura of undisputed economic fact.

Critics, some of them respected economists, have thrown out such outlandish figures as $10 billion . . . $15 billion . . . and $16 billion. The Ford Administration made a flat statement that was given wide, supportive publicity, that government regulation (of all kinds, not just transportation) was costing Americans $2,000 per family a year, but when asked to substantiate the figure, a White House spokesman admitted the figure was not to be taken literally. On another occasion, a well-known economist conceded that the multi-billion-dollar figure he liked to use regarding the "cost" of transportation regulation had no basis in fact either.

Just what are the facts and how does one arrive at them?

For one thing, the total freight revenue for all Class I, II and III motor carriers, railroads, along with all ICC-regulated water carriers and pipelines, plus the airlines, for 1975 was an estimated $41 billion.

To suggest that deregulation would cut that bill by $16 billion, or even $10 billion, is an absurdity.

But the allegations are more than just exaggerations; they are absolute distortions. Because, far from costing consumers an excessive amount of money, the regulated transportation service in America is a real bargain in today's marketplace.

Consider that from 1972 through the third quarter of 1977, the wholesale price index rose 64 percent, while the cost of motor carrier transportation, based on revenues per mile, went up only 41 percent.

To get things in perspective, let us take a look at some typical transportation costs:

A hammer retails in a Chicago hardware store for $8.23. Total cost for transportation by motor carrier from manufacturer in Farmington, Connecticut, to Chicago — 6 cents.

A washing machine retails in Butte, Montana, for $311.78. Cost for shipment by motor carrier from Columbus, Ohio, for this heavy, expensive appliance — $18.37.

A stove retails in Los Angeles for $398.88. Cost of transportation by motor carrier from Mansfield, Ohio: $17.32.

A portable electric typewriter retails in a Chicago store for $249.47. It was manufactured in New York. Cost for motor carrier transportation from New York to Chicago — $1.74, or 7/10 of 1 percent of the total price.

A man's suit retails in Indianapolis for $94.01. Cost of transportation by motor carrier from Atlanta, Georgia — 28 cents, or 20/100 of 1 percent.

(Note: These are truckload rates. Transportation charges are slightly higher for less than truckload shipments, based on a graduating scale dependent on weight of shipment.)

And what about food, life's basic essential and a product that has been particularly affected by inflation? According to a Department of Agriculture study, the cost of intercity transport of 17 common foods making up a typical market basket is just 5.3 percent of the total retail cost.

And what should be paramount to any consideration of the regulatory question is the fact that this reasonable cost for transporting goods is extended to all, regardless of location. Thus, a resident of Spearville, Kansas, can purchase the things he or she needs and wants for the same relative price paid by the resident of downtown Manhattan or uptown Chicago.

Example: A 25-inch color television console, manufactured in Indianapolis, retails in Spearville for $629.00. Cost of transportation by motor carrier from Indianapolis to Spearville: $29.90 — less than 5 percent of the total and only 2 percent more than the Kansas state sales tax. That comes to less than 4 cents a mile for a distance of 800 miles for a bulky, space consuming, delicate luxury item. An that is in Spearville, Kansas, population 742, more than 125 miles from the nearest population center of at least 20,000.

The Spearville resident does not pay a higher rate for the transportation of that set than the resident of Wichita (population 300,000) or of Kansas City (1.5 million).

That is what regulation is all about.

Rate Bureaus

There is a gross misunderstanding among those promoting motor carrier deregulation concerning rate bureaus, what they do, and how they operate. The charge most often leveled against rate bureaus is that they allow motor carriers to arbitrarily set rates in a secret and collusive manner and that rates, therefore, are on the high side.

Actually, there is nothing secretive or collusive about rate bureaus, and the net result of their activities is to keep rates low, not high, and to keep rates from being used in a discriminatory way to the benefit of certain shippers, localities and kinds of freight and to the detriment of others.

There are ten major regional rate bureaus in the United States. Ted B. Alfriend, a transportation consultant and former head of the Middle Atlantic rate bureau, described the operation of a rate bureau before a house Subcommittee as follows:

"Any person may propose an increase or a reduction in any rate or rates. Public notice of the proposal is given either in a trade journal such as Traffic World, or in weekly bulletins of the bureau to which anyone may subscribe. Thereafter, there is a public hearing on the proposal at which any person may make his views known, orally or in writing. Following the public hearing the proposal is either approved or disapproved or modified and public notice of the action taken is given. If this process results in a decision to change a rate or rates, the change is published in a tariff which is filed with the ICC.

"Section 217(a) of the Interstate Commerce Act provides that changes in rates published in tariffs filed with the ICC cannot be made effective sooner than 30 days following the filing of the tariff absent special permission by the ICC . . . Any person may protest any changed rate to the ICC. In the event protests are filed they are referred to the Board of Suspension of the ICC. The board analyzes the changed rate, considers the facts in the protests and in any replies thereto. If the board cannot conclude that the changed rate is in fact just, reasonable and otherwise lawful, it suspends the use of the rate for a period of seven months and institutes a formal investigation of its lawfulness. If the board declines to issue an order of suspension and investigation any protestant may appeal to Division 2 of the commission itself. Division 2, which consists of three commissioners, reviews the matter and if it disagrees with the board, issues an order of suspension and investigation."

Such collective rate making does not preclude any carrier from making its own rates. Such independent actions are common. For example, the Middle Atlantic Conference reported that for the year ending May 31, 1977, 1,138 rate change proposals were independent actions — 28 percent of the total.

Here are some other most significant data covering that period of activity at the Middle Atlantic bureau, as described by the bureau's general manager, Christian A. Henriott:

"In the 12 months ended May 31, 1977, the Standing Rate Committee acted on 2,859 proposals: 31 percent were reductions in LTL (Less Than Truckload) rates and 56 percent were reductions in truckload rates. The balance or 13 percent involved various types of territorial adjustments such as changes in rules, grouping of places, distance factors, etc., the majority of which were reductions. It approved, in whole or in part, 2,641 proposals, or 92 percent of those acted on, thereby reducing thousands of rates and charges.

"In the same period there were 1,138 independent actions: 26 percent were reduced LTL rates; 57 percent were reduced truckload rates; and 17 percent were changes in rules, such as allowances and arbitraries, or exceptions ratings, most of which were reductions.

"Again, the result was the establishment of thousands of reduced rates and charges. Committee approval of practically all the proposed reductions demonstrates that the collective ratemaking process neither stifles rate reductions nor is confined to increases such as is typical of a cartel."

Congress, by passage of the Reed-Bulwinkle Amendment now known as Section 5(a) of the Interstate Commerce Act, authorized this collective ratemaking and made it immune from antitrust laws. Congress took the action in 1948 following extensive hearings which were marked by a great outpouring of support for the measure from shipper and community organizations across the country.

In a recent study of collective ratemaking, Jesse J. Friedman, an economic consultant, made this observation:

"The principal economic benefits which are achieved by collective ratemaking in trucking relate to the avoidance of damaging forms of economic discrimination which, because of the structure and character of motor freight transport, would be inevitable under unrestrained competition. In the absence of collective

rate differences which are not justified by any difference in cost or any other relevant economic consideration. It would be impossible to assure that all shippers, large and small, are treated in a nondiscriminatory way by carriers as a group, or to assure treatment among competitively-related commodities. Not only shippers, but communities and employees as well, would suffer unjustifiable economic hardship, economic resources would be misallocated, and economic efficiency would be impaired. With collective ratemaking, there exists the opportunity and the machinery for averting these consequences."[1]

And here is what the Supreme Court said about discriminatory rates while rendering a decision in 1947:

"Discriminatory rates are one form of trade barrier. Their effect is not only to impede established industries but to prevent the establishment of new ones . . . Nondiscriminatory class rates remove that barrier by offering that equality which the law was designed to afford. They insure prospective shippers not only that rates are just and reasonable per se but they are related to those of their competitors . . ."

Collective rate making reduces the chaotic to the manageable. Consider the hundreds of thousands of commodities, now reduced to 23 classification ratings, traveling between more than 117,000 points and places in the United States, and the need for some kind of stabilizing system becomes apparent. The alternative would be thousands of separate carriers setting rates for hundreds of thousands of commodities between 13.7 billion combinations of places.

No shipper would know one day to the next what his rates or the rates of his competition would be. The paperwork would be overwhelming. In short, business would be reduced to a lottery.

As the House Committee on Interstate and Foreign Commerce put, it in explaining its support of the Reed-Bulwinkle Act:

"It is recognized by all who are familiar with the problems of transportation that the carriers subject to the Interstate Commerce Act cannot satisfactorily meet their duties and responsibilities thereunder, and the basic purposes of that act cannot be effectively carried out, unless such carriers are permitted to engage in joint activities to a substantial extent. The public interest will not be served if there is permitted to continue the existing state of uncertainty as to the extent to which carriers may engage in joint activity without risk of violating the antitrust laws . . . The carriers cannot effectively meet the requirements of the law, or provide the type of transportation that the public has come to expect and demand of them, if each is to be compelled to go it alone without a reasonable degree of consultation and agreement with other carriers."

[1] Jesse J. Friedman, "Collective Ratemaking in Trucking: The Public Interest Rationale," a study commissioned by 11 rate bureaus, 1977.

The Empty Mileage Argument

While the accusations that economic regulation of the motor carrier industry stifles competition and runs up costs are error-ridden from start to finish, the allegations concerning empty backhauls or empty mileage are downright ludicrous.

The charge, "trucks are forced to run around the country empty because of ICC regulations," has a simplistic, emotional appeal. When the charge is made by someone in authority, the tendency is to believe it without question.

But a moment's reflection makes it quite clear that only in some kind of fantasy world, where the impossible becomes the rule, could we find a transportation system where all vehicles could travel loaded at all times.

The plain fact is that empty mileage is nothing more than a simple fact of transportation life. What little there is, is for the most part unavoidable.

In a recent study, made jointly by the ICC, the Productivity Commission, the Office of Management and Budget, and the Council on Wage and Price Stability, it was found that only 20.4 percent of truck miles are empty. (The figure is substantially lower for regulated motor carriers of common commodities.) The study found that the chief reasons for empty trucks are the regional traffic imbalances inherent in our society and the use of specialized equipment such as auto carriers and tank trucks. Only about 3 percent of the empty miles appeared to be avoidable, according to the study.

Picture, if you will, the freight going into Michigan's automobile manufacturing and assembly plants — ore, metal, hardware, etc. Then picture what comes back out — completed motor vehicles being hauled on special carriers.

Naturally, those trucks carrying nuts and bolts and rubber gaskets in will not be carrying automobiles out; while the autmobile carriers will not be carrying anything in.

You would not haul heating oil in a tank truck from Oklahoma City to Milwaukee and then haul milk back to Oklahoma City in the same tanker.

Some places, like Washington, D.C., import virtually everything that is needed and export practically nothing. Florida exports orange juice and frozen meats, but imports most of its manufactured goods.

There has been great sympathy expressed lately for the exempt hauler, who carries exempt agricultural products to metropolitan centers but must return empty to his home base. Critics of regulation say he should be allowed to pick up regulated freight for his return haul.

But while one may sympathize with the problem of the exempt hauler, the question persists: Just where is he going to get that regulated freight for his return haul? As was mentioned earlier, you cannot increase the amount of freight available to be carried. One man's backhaul is another man's front haul.

To create a society in which all trucks would move into all areas with full loads and would also come out of those areas with full loads is an impossible dream. It might be easier to create a society in which every community grew and manufactured everything it needed and wanted, thus eliminating the need for transportion altogether.

Motor carriers are well aware of their empty mileage and work constantly at keeping it to a minimum. They recognize — more so than anyone outside the business — that empty mileage does not bring in revenue. But they can also distinguish between reality and idealistic fantasy. Motor carriers have to operate in the real world.

Regulation Means Conservation

In this particular era, when the Nation acutely needs to conserve energy, there is an additional reason for maintaining economic regulation of the motor carrier industry: Regulation saves energy.

Under regulation, the motor carrier industry has proven itself to be an efficient user of fuel in terms of freight carried and service performed. Deregulation and the weakening of entry controls would lead to inefficient operations, greater empty truck mileage, more trucks on the highways and a waste of fuel.

As more and more carriers entered the field, there would be a general breakdown in all-around efficiency. Empty mileage would increase greatly. Many of the new companies, operating on shoestrings, could not afford even minimal investment in maintenance, which at present is a major facet of the regulated trucking industry. And a good part of that maintenance effort is directed at fuel savings.

Regulation Means Safety

An economically regulated motor carrier system is a safe motor carrier system.

Though accidents continue to happen and some involving trucks are the sensational, headline-grabbing variety, the record clearly shows that the regulated motor carrier industry is a responsible user of the nation's highways.

But that safety record is no accident.

Millions of dollars are spent annually — by American Trucking Associations, its member state associations and conferences, and individual carriers — on safety. Proper vehicle maintenance, an extensive safety program under the direction of a safety director or supervisor, road patrols, driver training and incentive programs all are important parts of the regulated motor carrier's operation.

The regulated motor carrier industry has given its support to the national speed limit of 55 mph and has backed up that support with intense public relations and industry relations programs aimed at bringing about driver compliance.

The savings in lives, injuries and property damage resulting from the safety efforts of the regulated trucking industry cannot even be estimated, but they must be tremendous.

But such a large investment would not — and could not — be made under a non-regulated system. Deregulation would mean excessive competition, much of it from economically disadvantaged and irresponsible entrepreneurs; a loss of the effective safety controls inherent in a government licensing system, and an overall dissolution of the stability that now marks the regulated industry. There would most certainly be a substantial lessening of safety investment.

There would no winners — only losers.

Motor Carrier Regulation— A Red Herring?

The economic regulation of the motor carrier industry is under particular fire these days because of the general dissatisfaction with Big Government and Big Government Regulation.

Motor carrier executives share that dissatisfaction.

Presidents, one after another, have decried the bureaucratic Big Brotherism that is threatening to smother business under an avalanche of red tape and paperwork. Everyone has heard of the bizarre lengths to which some bureaucracies have gone under the misguided belief they are carrying out their particular mandates.

And with the growing bureaucracy has come a growing fear that the basic freedoms that have made America the envy of the world are being snuffed out by all of this Big Brother concern for health, safety and welfare.

Dr. Milton Friedman, the highly reputable economist from Chicago, voiced the fear in these words following a meeting of concerned business and finance leaders and scholars:

"Too many of us tend to think the threat to our freedom is somewhere in the indefinite future. It's not in the future, it's here! A large fraction of our freedom has already been eroded, and to a large extent ours is already a controlled society."

And so the executive of a regulated motor carrier cannot help but be particularly frustrated and outraged when he sees the economic regulation of trucking under the ICC being placed in the category of this mushrooming Big Brotherism, which also victimizes him.

If overregulation by government is a serious problem in this country — and we agree that it is — then, the ICC doesn't even belong on a list of agencies needing investigation for exercising too much authority.

And yet, the ICC is frequently singled out as an example — sometimes as the primary example — of such Big Brotherism, though strangely enough, few complaints are being heard from the 16,000 motor carriers under ICC jurisdiction.

One can only conclude that those linking the economic regulation of trucking to the problem of excessive government regulation either are operating from sheer ignorance or are throwing a red herring into the issue to keep the public's mind off the true threats to freedom — the agencies operating in the fields of social welfare.

[illegible] professor and writer, is one who understands the distinction, as he made clear in one of his columns in The Wall Street Journal:

"The movement for 'de-regulation' may seem to be a healthy reaction against what Walter Lippman called 'the sickness of an over-governed society.' But in actuality it is not really anthing of the sort. It is a movement directed almost exclusively against *some* of the activities of the *older* regulatory agencies — e.g., the Interstate Commerce Commission, the Civil Aeronautics Board, the Federal Power Commission, the Securities and Exchange Commission, et al. Not *all* such agencies, it is interesting to note. There seems to be little urge to dismantle the Food and Drug Administration or the Federal Trade Commission. And there appears to be no impulse whatsoever to apply 'deregulation' to the activities of the *newer* regulatory bodies — the Environmental Protection Agency, the Occupational Safety and Health Administration, or the Consumer Products Safety Commission. On the contrary: the bureaucracy and red tape of these other agencies calmly and inexorably multiply, attracting little controversy, even as the movement for 'de-regulation' grows more popular.

"So, while 'de-regulation' sounds as if it means debureaucratization, it turns out not to have that meaning at all. Or, more precisely: it is a very selective kind of debureaucratization. And there is reason to believe that it is the wrong kind — one whose ultimate consequences will be more government control over the economy rather than less."

Agencies which are continuously expanding their control over the people are marked by a corresponding expansion of their own facilities as seen in the increasing numbers of their workforces.

The Environmental Protection Agency had more than 11,000 employees in 1976 — up 2,000 in just three years. The Equal Employment Opportunity Commission, which was organized in 1965, had an authorized staff in 1970 of 579. Seven years later, in 1977, that staff had quadrupled to 2,300. The Occupational Safety and Health Administration, created in 1971, had in 1973 a total of 1,239 employees. Four years later it had doubled its size to 2,565 employees.

These, like the ICC, are agencies and do not begin to reflect the growth of Big Government as more clearly shown in the burgeoning of the big departments, like the Department of Health, Education and Welfare, which in 17 years has expanded from 61,641 to 141,213 employees.

But these mushrooming agencies do give an accurate comparison with the ICC, which at end of 1977 had only 2,044 employees — 300 fewer than in 1960!

In fact, unlike any federal agency working in the social welfare fields, the ICC has been marked over the years by a stability in numbers employed and monies spent. It is not and never has been an agency seeking to exercise more and more control over the public; in fact, its lines of authority are clearly drawn in the IC Act, are restricted to interstate surface transportation and to the relatively narrow economic segment of that area.

To attempt to hold up this innocuous area of limited regulation as an example of Big Brotherism run rampant is far more than an injustice to the ICC and the regulated trucking industry; it is a serious distortion that takes away the heat and the light from where they rightfully should be directed. While the movement to deregulate trucking picks up more momentum, the real culprits in the expanding authoritarianism continue to grow unimpeded.

SUMMARY OF: A Performance Review of the Alaska Transportation Commission.

PURPOSE OF THE REVIEW

In accordance with the provisions of Alaska Statutes 24.20.271(1), 44.66.010, and 44.66.050 (sunset legislation), a review of the Alaska Transportation Commission (ATC) was conducted to determine if the Commission has been operating in an effective and efficient manner. The functions reviewed included the Commission's executive, administrative, enforcement, rates/tariff analysis, and records/docketing functions.

REPORT CONCLUSION

In our opinion, the Alaska Transportation Commission should continue to regulate the transportation industry pending a comprehensive transportation study. The economic consequences of regulation or deregulation need to be determined in order to fully evaluate the public need for this agency.

However, certain changes need to be implemented in order for the Alaska Transportation Commission to effectively accomplish its statutory purposes which are: (1) to provide shippers and receivers with a stabilized rate structure; (2) to foster sound economic conditions among the carriers which will guarantee transportation in the public interest; and (3) to promote adequate, economic services and reasonable charges.

The Commission has been hampered by the following problems in meeting these purposes. The statutes and regulations which affect the Commission are overdue for revision in many areas. The Commission staff is burdened with additional work due to obsolete legislation such as the Ferry Act as well as dump truck and recreational air carrier regulatory sections.

Improvement is needed in the manner in which ATC approaches its economic regulation mandate and its enforcement responsibilities. Operating data must be obtained from a regulated carrier and properly audited and analyzed. ATC must enforce the provisions of the various transportation acts. Consistently suspending civil penalties levied against carriers is not a useful deterrent in that connection.

Applications for authority have not been processed in a timely fashion which is a disservice to the public. Moreover, communicating operating authority to carriers by telegram, before findings of fact and conclusions of law have been drafted, is contrary to statute and has been successfully appealed to the Superior Court.

The ATC Commissioners have not complied with the statutory requirement for providing notice and opening their meetings to the public. Further, the meetings have not been held weekly as is required. In addition we have recommended both Commissioners and the staff decline any future free offers of transportation from regulated carriers.

There has been a serious disregard of the prohibitions against ex parte communication by both the Commissioners and the staff. This is evidenced by phone calls to Commissioners from attorneys representing parties to a case before the Commission and orders written by staff members on cases to which they were a party. Also, it appears the Governor, through the Commissioner of Administration, has attempted to influence the judgement of the Commissioners.

Improvements in the efficiency of order writing and decision making would result from compiling a complete and accurate index of all prior orders and court decisions. Improvements in attorney and tariff analyst services should result from a transfer to ATC of the assistant attorney general and tariff analyst currently assigned to the Department of Law.

The primary goals of the Commission are to regulate air and motor commerce to ensure economically sound carriers and a stabilized rate structure. In general, the ATC does not have the necessary information on carriers' profit, volume or growth of traffic, or trends in population, to make informed decisions on applications for authority or rate changes. ATC is mandated by statute to complete a statewide air commerce study and such a study, including all modes of transportation, has been started by the Department of Transportation in Southeast Alaska. The results of this study, as well as a similar study of other areas in the State should enhance ATC's ability to accomplish their primary goals.

In conclusion, the Alaska Transportation Commission should analyze and evaluate the methods of the Commission and take the necessary actions needed to perform and fulfill their responsibilities to the public.

THE LEGISLATURE

BUDGET AND AUDIT COMMITTEE

JUNEAU, ALASKA 99811

January 22, 1979

To: Presiding Officer of Both Houses

From: Legislative Budget and Audit Committee
George Hohman, Chairman

Subject: Forwarding of Sunset Audits with Discussion of Legislative Oversight Responsibilities

Enclosed are Sunset Audit Reports of 13 boards and commissions that will terminate June 30, 1979. We are forwarding these reports to you so that they may be distributed to the appropriate standing committees you will designate to perform the legislative oversight function.

According to AS 44.66.050 the standing committee of legislative jurisdiction, as provided in Rule 20 of the Uniform Rules of the Legislature, shall hold one or more hearings to receive testimony from the public and other parties that have associated responsibilities or interests. In addition the Committee shall consider Legislative Audit's report, the agencies proposed budget, the agencies program performance report and any other tools that might assist them in evaluating the conduct and activities of the agency being terminated.

It is important to note that the terminating agency shall have the burden of demonstrating a public need for its continued existence during the public hearings.

The determination of "public need" for continued existence shall take into consideration the following factors set out in AS 44.66.050(c):

(1) the extent to which the board, commission or program has operated in the public interest;

(2) the extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters;

31-GILH

(3) the extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest;

(4) the extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided;

(5) the extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions;

(6) the efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved;

(7) the extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public;

(8) the extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest; and

(9) the extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

The Legislative Audit reports have addressed these issues individually but only to the extent allowed by restricted audit scopes detailed within the reports.

The Law further states that the committee of reference shall, not later than the 60th day of the legislative session, submit a report to the presiding officer of each house. The report is to include a summary of findings as to compliance with the "public need" factors enumerated above together with recommendations as to each of the following:

(1) an identification of the problems or the needs that the programs and activities of the board, commission or agency are intended to address;

(2) a statement, to the extent practicable, of the objectives of the program of the board, commission, or agency program, and its anticipated accomplishments;

(3) an identification of any other programs having similar, conflicting or duplicate objectives;

(4) an assessment of alternative methods of achieving the purposes of the program;

(5) an assessment of the consequences of eliminating the board, commission or program and consolidating its activities with another program, or of funding it at a lower level;

(6) a justification for the recommended continuation or extension of the board, commission or program, and an explanation of the manner in which it avoids duplication of or conflict with other efforts; and

(7) any other information which, in the opinion of the committee, would improve the performance of the board, commission or agency with respect to its representation of and responsiveness to the public interest.

The committee of reference may introduce a bill providing for the reorganization or continuation of the agency being terminated as stipulated in AS 44.66.050(e).

In addition, the Law requires the Legislative Budget and Audit Committee to designate, not later than March 1, 1979, programs or activities in the general government, public protection and administration of justice budget categories, which shall be subject to termination in the next fiscal year. It is anticipated that the Legislative Budget and Audit Committee will be recommending six to nine programs for termination which will be submitted to you in the form of bills by the required deadline.

STATE OF ALASKA

ALASKA TRANSPORTATION COMMISSION

In the Matter of Wrecker or Tow-truck Operations subject to AS 42.10) Ruling No. 2

DECLARATORY RULING

Upon request of the Alaska Transportation Commission's staff the Commission hereby renders this Declaratory Ruling with respect to the operations of wreckers and tow-trucks when such operations are conducted on the public highways of the State of Alaska, and are subject to the provisions of the Alaska Motor Freight Carrier Act.

1. A motor carrier permit is not required for the operations of a wrecker or tow-truck when such operations are being performed as a private carrier as defined in AS 42.10.420(7).1/

Examples of such operations are as follows:

(a) No permit is required for the operations of a wrecker or tow-truck which is owned and operated by a automotive repair shop or service station wherein he transports disabled vehicles to his place of business for service or repair.

+ Ambiguous why call no permit when permitted is available

(b) No permit is required to assist or move a wrecked, damaged, or disabled vehicle which is on the roadway creating a traffic hazard to the nearest location at which the vehicle may be placed off the traveled portion of the roadway in a safe position.

SAME AS ABOVE

(c) No permit is required to assist or move a vehicle back onto the roadway from a point alongside the roadway.

2. A motor carrier permit is required when wreckers or tow-trucks are used to transport the property of others for compensation and not in connection with some other established private primary business. AS 42.10.130 2/

1/ No common carrier, contract carrier, or temporary carrier may operate for the transportation of property in intrastate commerce for compensation in the state without a permit . . .

2/ "private carrier" is:
(A) a person who transports by motor vehicle, with or without compensation, property which is owned or is being bought or sold by him, or property of which he is the seller, purchaser, lessee or bailee, and the transportation is incidental to and in furtherance of some other primary business conducted by the person in good faith.

Examples of such operations are as follows:

(a) A permit is required when a wrecker or tow-truck is used to transport an impounded or repossessed vehicle whether or not such vehicles are wrecked, damaged, or disabled.

(b) A permit is required when a wrecker or tow-truck is used to transport vehicles whether or not such vehicles are wrecked, damaged or disabled to a destination other than the wrecker or tow-truck operators own place of business.

NOTICE OF PROPOSED ADOPTION IN THE REGULATIONS

OF THE ALASKA TRANSPORTATION COMMISSION

Notice is hereby given that the Alaska Transportation Commission, under authority vested in AS 42.07.141(a) and (b) proposes to adopt, regulations in Title 3 of the Alaska Administrative Code to implement AS 42.07.121 and AS 42.10.110 as follows:

Section 420(2) in Chapter 10 of Title 42 (The Alaska Motor Freight Carrier Act) includes "Forwarder" as a common carrier, but no further descriptions have been made and published and no regulations have been published to afford guidelines under which this class of carrier may operate.

The Proposed Regulation:

3 AAC 64.546 FORWARDERS

Provides for concise definition, the basis for rates and charges, billing and collecting procedures, the class of service in which the carrier may operate and requirement for filing a bond.

Notice is also given that any person interested may present written statements or arguments relevant to the action proposed at the Alaska Transportation Commission, 1000 MacKay Building, 338 Denali Street, Anchorage, Alaska 99501 before 4:30 p.m. on March 12, 1979.

Copies of the Proposed Regulation are available at the offices of the Alaska Transportation Commission in Anchorage, Fairbanks and Juneau.

Findings, effect upon operation in public interest.

the Panama Canal, with which the applicant does or may compete for traffic, if the Commission shall find that the continuance or acquisition of such ownership, lease, operation, control, or interest will not prevent such common carrier by water or vessel from being operated in the interest of the public and with advantage to the convenience and commerce of the people, and that it will not exclude, prevent, or reduce competition on the route by water under consideration: *Provided*, That if the transaction or interest sought to be entered into, continued, or acquired is within the scope of paragraph (2) (a), the provisions of paragraph (2) shall be applicable thereto in addition to the provisions of this paragraph: *And provided further*, That no such authorization shall be necessary if the carrier having the ownership, lease, operation, control, or interest has, prior to the date this section as amended becomes effective, obtained an order of extension under the provisions of paragraph (21) of this section, as in effect prior to such date, and such order is still in effect.

—effect on competition on water route.

Applicability of sec. 5 (2). Saving clause, when order of extension obtained.

AGREEMENTS BETWEEN CARRIERS

62 Stat. 472.

SEC. 5a. [*June 17, 1948.*] [*49 U. S. C. § 5b.*]

(1) For purposes of this section—

"Carrier" defined.

(A) The term "carrier" means any common carrier subject to part I, II, or III, or any freight forwarder subject to part IV, of this Act; and

"Antitrust laws" defined.

(B) The term "antitrust laws" has the meaning assigned to such term in section 1 of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914.

(2) Any carrier party to an agreement between or among two or more carriers relating to rates, fares, classifications, divisions, allowances, or charges (including charges between carriers and compensation paid or received for the use of facilities and equipment), or rules and regulations pertaining thereto, or procedures for the joint consideration, initiation or establishment thereof, may, under such rules and regulations as the Commission may prescribe, apply to the Commission for approval of the agreement, and the Commission shall by order approve any such agreement (if approval therof is not prohibited by paragraph (4), (5), or (6) if it finds that, by reason of furtherance of the national transportation policy declared in this Act, the relief provided in paragraph (9) should apply with respect to the making and carrying out of such agreement; otherwise the application shall be denied. The approval of the Commission shall be granted only upon such terms and conditions as the Commission may prescribe as necessary to enable it to grant its approval in accordance with the standard above set forth in this paragraph.

Application for approval of agreements.

Terms and conditions of approval.

(3) Each conference, bureau, committee, or other organization established or continued pursuant to any agreement approved by the Commission under the provisions of this section shall maintain such accounts, records, files, and memoranda and shall submit to the Commission such reports, as may be prescribed by the Commission, and all such accounts, records, files, and memoranda shall be subject to inspection by the Commission or its duly authorized representatives.

Accounts, records, files, inspection.

(4) The Commission shall not approve under this section any agreement between or among carriers of different classes unless it finds that such agreement is of the character described in paragraph (2) of this section and is limited to matters relating to transportation under joint rates or over through routes; and for purposes of this paragraph carriers by railroad, express companies, and sleeping-car companies are carriers of one class; pipe-line companies are carriers of one class; carriers by motor vehicle are carriers of one class; carriers by water are carriers of one class; and freight forwarders are carriers of one class.

Carriers of different classes.

(5) The Commission shall not approve under this section any agreement which it finds is an agreement with respect to a pooling, division, or other matter or transaction, to which section 5 of this Act is applicable.

Pooling, division.

(6) The Commission shall not approve under this section any agreement which establishes a procedure for the determination of any matter through joint consideration unless it finds that under the agreement there is accorded to each party the free and unrestrained right to take

Sec. 5a

Independent action.

independent action either before or after any determination arrived at through such procedure.

(7) The Commission is authorized, upon complaint or upon its own initiative without complaint, to investigate and determine whether any agreement previously approved by it under this section, or terms and conditions upon which such approval was granted, is not or are not in conformity with the standard set forth in paragraph (2), or whether any such terms and conditions are not necessary for purposes of conformity with such standard, and, after such investigation, the Commission shall by order terminate or modify its approval of such agreement if it finds such action necessary to insure conformity with such standard, and shall modify the terms and conditions upon which such approval was granted to the extent it finds necessary to insure conformity with such standard or to the extent to which it finds such terms and conditions not necessary to insure such conformity. The effective date of any order terminating or modifying approval, or modifying terms and conditions, shall be postponed for such period as the Commission determines to be reasonably necessary to avoid undue hardship.

Investigation.

Approval modified or terminated.

Effective date.

Hearing.

(8) No order shall be entered under this section except after interested parties have been afforded reasonable opportunity for hearing.

(9) Parties to any agreement approved by the Commission under this section and other persons are, if the approval of such agreement is not prohibited by paragraph (4), (5), or (6), hereby relieved from the operation of the antitrust laws with respect to the making of such agreement, and with respect to the carrying out of such agreement in conformity with its provisions and in conformity with the terms and conditions prescribed by the Commission.

Antitrust laws, relief from.

(10) Any action of the Commission under this section in approving an agreement, or in denying an application for such approval, or in terminating or modifying its approval of an agreement, or in prescribing the terms and conditions upon which its approval is to be granted, or in modifying such terms and conditions, shall be construed as having effect solely with reference to the applicability of the relief provisions of paragraph (9).

Limitation.

Sec. 5a–6

NOTE.—Clayton Antitrust Act, see Title 15, infra.

Quotations, tenders, of rates, for United States Government, agreement approved under § 5a, see § 22 (2), infra.

Section 204 of the Emergency Railroad Transportation Act, 1933, 49 U. S. C. § 5a, June 16, 1933, provides: "The provisions of the Interstate Commerce Act, as amended, and of all other applicable Federal statutes, as in force prior to the enactment of this title, shall remain in force, as though this title had not been enacted, with respect to the acquisition by any carrier, prior to the enactment of this title, of the control of any other carrier or carriers." The U. S. Code renumbers § 5a of the act of June 17, 1918, as § 5b.

SCHEDULES AND STATEMENTS OF RATES, ETC., JOINT RAIL AND WATER TRANSPORTATION

SEC. 6. [*Amended March 2, 1889. Following section substituted June 29, 1906. Amended June 18, 1910, August 24, 1912, August 29, 1916, February 28, 1920, August 9, 1935, September 18, 1940, August 2, 1949.*] [*49 U. S. C. § 6.*] (1) That every common carrier subject to the provisions of this part shall file with the Commission created by this part and print and keep open to public inspection schedules showing all the rates, fares, and charges for transportation between different points on its own route and between points on its own route and points on the route of any other carrier by railroad, by pipe line, or by water when a through route and joint rate have been established. If no joint rate over the through route has been established, the several carriers in such through route shall file, print and keep open to public inspection as aforesaid, the separately established rates, fares and charges applied to the through transportation. The schedules printed as aforesaid by any such common carrier shall plainly state the places between which property and passengers will be carried, and shall contain the classification of freight in force, and shall also state separately all terminal charges, storage charges, icing charges, and all other charges which the Commission may require, all privileges or facilities granted or allowed and any rules or regulations which in any wise change, affect, or determine any part or the aggregate of such aforesaid rates, fares, and charges, or the value of the service rendered to the pas-

Ex Parte No 297

APPENDIX A

Ultimate conclusions and findings of prior report, 349 I.C.C. 811

1. Rate bureaus assist the making of appropriate rates.
2. Procedural changes would foster actions more favorable to bureau members, shippers, and the general public; such changes being contained in the body of the report.
3. The right of independent action does not adversely affect the rate structure.
4. A system need not be established by the Commission to monitor public hearings before rate bureaus, but that formal minutes, and not verbatim transcripts, are required of rate committee proceedings.
5. Commission representatives may attend all rate bureau meetings; but that copies of correspondence and documents concerning all rate bureau meetings need not be filed with the Commission.
6. A uniform system of accounts for rate bureaus will be promulgated.
7. Rate bureaus are not prohibited from furnishing technical and professional services to other bureaus or nonmembers provided that the limitations expressed in the report are observed.
8. Rate bureaus may not invest in another commercial business, whether related or unrelated to its primary function of processing and publishing rates and related matters for member carriers.
9. Rate bureaus are prohibited from acquiring other rate bureaus without prior Commission approval.
10. Rate bureaus should not be profitmaking enterprises.
11. A carrier member of a bureau, which carrier is affiliated in any way with a shipper, may not serve on a bureau's board of directors, general rate committee, or any other committee which has an effect, either directly or indirectly, on the ratemaking function of the bureau without specific prior Commission approval.
12. A maximum period of 120 days should be prescribed for the processing of proposals to final disposition.
13. Public notice of proposals need not identify the proponent.
14. Rate bureaus are prohibited from broadening the territorial or commodity scope of an individual rate proposal without prior adequate notice.
15. Adoption of shortened special procedures involving proposals covering special docket applications are not warranted in this proceeding.

16. Section 22 quotations require special bureau procedures limiting notification to members and the governmental agency.
17. Docketing of rate bureau proceedings with respect to general rate increase proposals need not be mandatory.
18. The Commission need not obtain and publish reports of the deliberations within the industry concerning the matter of general increases.
19. The various rate bureaus need not join in seeking general rate increases.
20. The various rail rate bureaus are not required to substantiate general increases on a regional basis only, but their regional costs should be presented in a more explicit manner.
21. Rate bureaus are prohibited entirely from protesting proposals of carrier members, and are not merely limited to instances in which the proposed rate is less than long-term variable cost or any other specific instance.
22. Rate bureaus should be prohibited from discouraging independent action proposals of member carriers in any way, including the protesting of the filing of any rates pursuant to such action.
23. Rate bureaus should be prohibited from discouraging members from publishing individual tariffs.
24. Immunity from antitrust laws shall be continued.
25. Immunity from the antitrust laws shall continue to be extended to agreements with respect to proposals of single-line movements.
26. Additional legislation is not necessary, and need not be sought, to better effect the goals for which section 5a was enacted.

NEW RATE MAKING AGREEMENTS

ICC Administrative Law Judge has specified issues to be considered in each of three Section 5 agreements for collective agreements. The following issues posed as questions were listed for consideration and in my opinion probably foretells the issues which any revised 5A agreement by ACA will have to face.

1. Do the amended articles of organization and procedure comply with all applicable provisions of Section 5 of the interstate commerce act.

2. Does the agreement comply with all applicable requirements in Ex Parte 297, Rate Bureau Investigation, 349 ICC 811, and 351 ICC 437.

3. What is the anti-trust immunity for a member of a rate bureau of committee, and the rail members representatives, in discussing proposals with respect to which the member cannot vote or agree under section 5b(5)(a) of the act.

4. What is the meaning of the statutory language which provides that only carriers which can "practicably participate in a particular interline movement" are permitted to vote.

5. What procedural requirements are necessary to insure compliance with the restrictions on rate bureau agreements contained in section 5b. E.g., should the Commission require that rate bureaus keep verbatim transcripts of all meetings. Should each carrier voting on a rate proposal be requried to show that it can practicably participate in the movement under question.

6. Does the Agreement properly limit the scope of participation by members with respect to matters relating to interline movements.

7. What is meaning of the statutory language "general rate increase or decreases".

8. Is not the provision in the Agreement which limits a carrier's right to withdraw from a filed joint rate inconsistent with a carrier's right of independent action.

9. Does the Commission's statement in Ex Parte 297, that "public notice of recommended final dispositions should contain the reasons for the action taken", apply to conference ratemaking .

10. Is seven days sufficient notice to the public with respect to any proposed rule, rate, or change.

11. Should any party proposing a rate increase or decrease be identified.

12. Should the members be permitted to collectively protest any rate, fare or charge.

13. Does the Agreement contain provisions for which no anti-trust immunity can lawfully be given.

14. Should two or more carriers who are not members of the same section 5b ratemaking agreement be permitted to discuss and establish rates on independent notice without section 5b arrangements.

15. What is the appropriate role of a rate bureau discussing, agreeing to or voting on intra-state rates.

16. Should Agreement be amended or modified.

March 14, 1979

The Honorable Terry Gardiner
Speaker of the House
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. Speaker:

Your House Commerce Committee has had under consideration for "Sunset" review the Alaska Transportation Commission, pursuant to your referral under AS 44.66.010 and 44.66.050.

In accordance with the statutory requirements, a public hearing was held on the review of this commission. The hearing extended over a period of three days, during March 1-3, 1979 and included over twenty hours of hearings and deliberations by the committee. During that time, testimony was heard from the Deputy Commissioner of the Department of Commerce and Economic Development representing the Commissioner (in accordance with the statute), from all members of the commission itself, and substantial public testimony from interested individuals and from representatives of the private sector affected by the regulatory scheme, representing all aspects of Alaskan transportation. The last few hours of the March 3 hearing extended into the early hours of March 4, during which members of the committee asked extensive questions of the members of the commission about various matters that came to light during the "Sunset" review. Extensive use was made of the Legislative teleconferencing network, which allowed the participation by witnesses and observers in Fairbanks, Barrow, Nome, Kotzebue, Anchorage, Kodiak, Sitka and Ketchikan. Other stations may have had listeners or observers on the line but did not check in.

The committee considered the proposed budget of the Alaska Transportation Commission for FY 1980, and particularly examined the performance audit of the activities of the commission prepared by the Legislative Audit Division. Representatives of the Audit Division were present at all hearings and participated in the considerations with the committee and followed up inquiries that had begun during the audit.

Guided in part by the report prepared by the Legislative Audit Division, the committee took into consideration the factors required under AS 44.66.050(c).

Your Commerce Committee thereby makes the following findings:

The committee concurs in the nine findings made by the Division of Legislative Audit in considering the factors required under 44.66.050(c), as they appear on pages 23-25 of the Performance Review of the Alaska Transportation Commission prepared by the Division of Legislative Audit, dated October 24, 1978, which are hereby incorporated by reference as though fully set out herein. However, to the extent that the findings stated there refer to report conclusions or recommendations made within the audit, the committee drew some, but not all of the same conclusions, and will make somewhat different recommendations. However, the findings of fact anticipated by 44.66.050(c) contained within pages 23-25 of the audit report, without regard to those recommendations, are justified by our hearings and are reaffirmed by the committee. In fact, the members of the commission indicated that they had no major disagreements with the findings of the Legislative Audit Division.

The Alaska Transportation Commission exists to provide certain protections to the public with regard to the conduct of the transportation industry in the state of Alaska and to assure a viable economic climate for those parties who participate within that industry. The objective or goal is, theoretically, to have a stable and reliable private transportation system, both surface and air, available to Alaskans, with services provided at prices that are not unreasonable according to certain familiar and traditional regulatory standards. There are not any other State programs which have similar, conflicting, or duplicating objectives, in short of arguable deregulation, there appear no alternative methods of achieving the purposes of the program. This excludes consideration of relevant Federal regulation which does impact upon the transportation industry in Alaska. Some Alaskan surface carriers are certificated and regulated by the Interstate Commerce Commission, and some Alaskan air carriers are regulated by the Civil Aeronautics Board. All Alaskan air carriers are subject to the regulations of the Federal Aviation Agency, particularly as to air safety and flying practices.

During our hearings, substantial questions were raised about the need for regulation of certain industries in light of competitive factors which would normally exist and the predominant Federal regulatory scheme, particularly as it relates to air commerce. In light of these considerations, it appears that some reduction in the jurisdiction of the Alaska Transportation Commission is appropriate. This deregulation of certain areas of transportation, tied to a two-year renewal of the Alaska Transportation Commission under the "Sunset" law, will give Alaskans and their public officials an opportunity to compare certain branches of the transportation industry which remain regulated with those which become deregulated under State law. This and only this, in the opinion of the committee, can fully answer the questions raised by the Alaskan "Sunset" law and by the current inquiries into deregulation which are popular on a national level.

The above recommendations and summary comply with the requirements of 44.66.050(d), to the extent that they relate to the Alaska Transportation Commission.

The Committee on Commerce of the Alaska State House of Representatives will soon be introducing a bill which will provide for a limited two-year extension of the life of the Alaska Transportation Commission; accomplish certain reforms in the practices of the Alaska Transportation Commission as recommended by the Division of Legislative Audit in its report and as recommended by some of the witnesses who testified before the committee; provide for partial deregulation of one or more elements of the Alaskan transportation industry; provide for total State deregulation of other elements of the Alaska transportation industry. Consideration will be given to the resources of the commission, possible inclusion of a staff lawyer or law member of the commission, and consideration of the relationship of the Alaska Transportation Commission's regulatory jurisdiction to other relevant State law.

It is hoped that some of the (apparently valid) criticisms of the Alaska Transportation Commission by the Division of Legislative Audit and the witnesses can be addressed if the commission's resources are applied in more limited and concentrated areas of regulation after deregulation of certain activities. This may give the commission an opportunity to demonstrate that it can function in the public interest and that the regulatory scheme is working and is not antiquated or inappropriate.

The two-year continuation (rather than the four-year continuation anticipated by the "Sunset" law) is dictated by the questionable nature of the commission's present activities and by the substantial questions about its public justification which were raised in the committee hearings and in the report of the Division of Legislative Audit.

The committee is particularly concerned with the conduct of some of the commissioners, both as related in the report of the Audit Division and as it appeared to the committee during the hearings. The commissioners should remember that, like judges, they must not only be acting properly, they must appear to be acting properly. The confidence of the public should not be lost on the basis of some extraordinary action of a commissioner (whether accepting a free ride from a certificated carrier, or using unusual lobbying practices during "Sunset" review), even if there is available a justification or an adequate explanation. The appearance remains the same and undermines the confidence of the public in the regulatory scheme, to the same extent that it would undermine the confidence of the public in the judiciary if such actions were to be taken by a judge. Admittedly, because of the large economic stakes involved in the regulation of an industry such as the transportation industry in Alaska, the pressures upon the members of the commission are no doubt severe, and their present regulatory load is substantial. However, these pressures should not result in conduct which, even though thoroughly explainable,

might by its mere appearances call into question the integrity of the commission and of the regulatory scheme. The commission is not a political body under the law: It is a quasi-judicial regulatory agency.

Corresponding legislation will be introduced soon to accomplish the goals of this report.

Respectfully submitted,

Rep. Fred Brown

Re: Tow Truck Regulations

As you know, we wrote the other day to the Auto Clubs in Oregon and Washington asking for information about laws in their States pertaining to towing. We phoned them today. We talked to Arthur J. Lambo, General Counsel for the Automobile Club of Washington and to L. R. Knepper, General Manager of the Automobile Club of Oregon.

Mr. Lambo says Washington has no tow truck law. He says the City of Seattle has an insurance coverage requirement, but, that is the only regulation of the road service industry. He says discussions have come up from time to time at Olympia, but, each time, it has been determined any State regulations would simply be restrictive, would discourage free-enterprise and discourage the small operator, encourage inefficient operations.

Mr. Knepper told us a tow truck law went into effect in 1947 in Oregon. It was repealed in 1948. Within just 12-months it was found monopolistic practices and higher prices for the public came into being. The Oregon PUC removed the law from the records. The only reference in Oregon law today is that a disabled vehicle under tow does not come under any State regulation. On the other hand, a non-disabled vehicle under tow or being carried by truck comes under PUC motor freight restrictions.

We have been asked to testify February 13 - 15 at Juneau with Senator Brad Bradley's Senate Commerce Committee hearings on the Performance Review of the Alaska Transportation Commission. It would be important if one or more of you people or representatives of your Associations would schedule a trip to Juneau during the hearings. We have a copy of the October 24, 1978 Performance Review of the Alaska Transportation Commission in our office for your information. To schedule a time for testimony at Juneau, contact Mr. Christian Bassler of Senator Bradley's Senate Commerce Committee, State of Alaska, Pouch V, Juneau, Alaska 99801, Phone 465-3748.

Mr. Henry J. Allen
1545 South Hoyt - Space #74
Anchorage, Alaska 99504

Dear Mr. & Mrs. Allen,

We are most sorry we let you down on your request for service this morning. The driver took the wrong road and ended up wandering around in the parking lot of the School District Building, apparently.

And, then, we found ourselves up against the Alaska State law concerning what our Contract Stations can and cannot do. The law says they can only tow to their own station and not to another point.

We are happy to learn that due to the fact your car is still under warranty with Alaska Sales & Service you are not confronted with an expensive service call that should rightfully be covered by your membership dues with Alaska State Auto Club.

We do have a reimbursement provision for members. If Alaska Sales and Service should happen to charge you for the towing service, submit your application for refund to us along with the paid receipt from them and you are entitled to reimbursement in an amount up to $25.

We are enclosing a copy of a letter addressed to us from the Alaska Transportation Commission which mentions a move to deregulate Tow Truck Operations. We met Tuesday with Al Davis of the ATC staff and are advised the law will surely be changed just as soon as the Attorney General's office and the legislature can enact changes in regulation.

We have written to Auto Clubs in Washington, Oregon and California for copies of the law in their States. We will be providing input of our needs to the ATC, the Attorney General and to our legislative delegation.

Please feel free to call us anytime for services. That is the only reason we are here.

Cordially,

Robert M. Scott

Re: AS 42.10 Tow-Truck Operations

Dear Al,

Furthering our conversation of the other day, our problem has again risen so we were unable by law to properly serve our members.

We are hopeful the deregulation process might relieve us of the restrictions, but, we know the process takes time. In the meantime, would you kindly take another look at the law and determine if there is an interpretation possibility that our Contract Stations would qualify as Contract Carriers and then let us know the procedure we must follow so that designation could be established.

Many thanks for your interest and with all best wishes.

Re: STATE TOW TRUCK STATUTES

Gentlemen:

We wish to ask each of you a favor, if we may. Our Alaska Administration, Attorney General and our Transportation Commission are looking at deregulation of the Tow Truck Industry. We would like to have the benefit of regulations in your States as we let our State authorities know of our needs. Would you be so kind as to send us a copy of your local statutes for our guidance.

In many cases, current statutes result in an inconvenience for our members and the public at large, Service stations with tow trucks and our Contract Stations are restricted to only certain types of service. We understand it is the intent to eliminate those restrictive provisions and yet assure availability of service, financial responsibility and safety compliance.

The "road-map" of your experiences in your three States would be most helpful.

Many thanks and with all best wishes.

Re: Alaska Transportation Commission
Tow Truck Statutes

Dear Mr. Basler,

Mr. Bernie Bylsma, Contract Station operator for Emergency Road Service for the Alaska State Auto Club and an active member of the Chevron Dealers Association is flying to Juneau today to appear at the Senate Alaska Transportation Commission Review hearing. He will present exhibits we have accummulated from Automobile Associations of Oregon, California, Nevada and Wisconsin as part of his testimony.

In meetings of tow-truck operators here in Anchorage on February 10th and February 13th, the operators discussed public needs for vehicle disablement service. Mr. Bylsma's testimony will reflect consensus from those meetings.

Our experience and that of Auto Clubs in other States indicate free competition protects and best serves the public need.

The Alaska State Troopers who are constantly in the motor-vehicle arena, could easily integrate safety regulation and public liability insurance certification of all those who would provide vehicle disability assistance along our highways. The Department of Motor Vehicles could continue to license the vehicles which are equipped to provide roadside vehicle disability as in the past. We feel these to be the only requirements to assure service and protection the general public needs.

By way of a copy of this letter and copies of the various exhibits Bernie Bylsma is submitting to the February 15th Senate Hearing on tow-truck deregulation, we are advising Mr. Allen D. Blume of Representative Fred Brown's House Commerce Committee of our recommendations for the March 1st House hearing. We do not know if any tow-truck operators will be submitting direct testimony at that time, but, we will be happy to answer or arrange to answer any questions.

Many thanks for your interest and with all best wishes.

ATC - TRANSPORTATION
no answer needed

Dear Senator Bradley,

In regard to AS42.10, State of Alaska, Alaska Transportation Commission Policy #2.

Why is it that a company such as a Service Station and Private Carrier is not allowed to be issued a permit to tow or haul any where except to their own place of business. I have been told that only the major wrecking yards are allowed these permits.

If this is true, it seems to me that the major wrecking yards want a monopoly on the towing business or are afraid of a little competition.

As a Service Station manager I am forced to turn my own customers over to the major wrecking yards when they need their vehicle towed to a body shop or major garage for repairs.

We in the service station business as private carriers are not interested in removing wrecks from the highway or impound business, but are only interested in serving our customers when they request our service for a wrecker.

Enclosed you will find several signatures on a petition requesting that the Legislature look into this matter and take necessary action to de-regulate that part of AS42.10 to allow private carriers the right to tow anywhere that they may be requested to, by the customers of their business.

Senator Bradley, please look into this matter and if it be true, I feel assured you will take any action you deem necessary to bring this before the house.

Thank you for your time and any help you may give us in this matter.

Yours truly,

Mark Leonetti

Re: ALASKA TRANSPORTATION COMMISSION
TOW TRUCK STATUTES

Dear Mr. Basler,

Service Stations in the Anchorage area, some of them Contract Stations to the Alaska State Auto Club, have been compiling signatures on petition forms for de-regulation of Tow Trucks. We are enclosing, herewith, petitions with 333 names of people who signed the following statement:

> "We, the undersigned, request freedom to choose any motor-vehicle towing service we wish to move our automobile to any location we wish, at our convenience. We request the legislature de-regulate Tow-Truck operations as part of the Alaska Transportation Commission Sunset Legislative Review".

We are providing these to you in entirety, in the original. We are sending a copy of this letter to Mr. Allen D. Blume in the event he would also like to review the petitions and could ask you for access to them.

We believe the testimony of Mr. Bernie Bylsma and the various exhibits we have provided to your committee fully justify de-regulation of the Tow Truck operators on the basis we have suggested. If your committees feel there is a need for further testimony, we will be happy to comply.

Many thanks and with all best wishes.

Cordially,

Robert M. Scott
MT. McKINLEY ALASKA GLACIER TOURS

cc: Allen D. Blume
Contract Stations

BOARD OF DIRECTORS:
James E. Johnson, *Chairman;* Robert M. Scott, *President;* Frank A. Seymour, *Secretary/Treasurer;* Ervin L. Brody, *Executive Committee. Members:* Connel L. Murray; William J. Sheffield; John V. Munroe; C.R. 'Steve' Hafling; Robert E. Baer; Joe D. Blackard; Charles K. Cranston.

A PETITION TO THE LEGISLATURE

OF THE STATE OF ALASKA

We, the undersigned, request freedom to choose any motor-vehicle towing service we wish to move our automobile to any location we wish, at our convenience. We request the legislature de-regulate Tow-Truck operations as part of the Alaska Transportation Commission Sunset Legislative Review.

A PETITION TO THE LEGISLATURE

OF THE STATE OF ALASKA

We, the undersigned, request freedom to choose any motor-vehicle towing service we wish to move our automobile to any location we wish, at our convenience. We request the legislature de-regulate Tow-Truck operations as part of the Alaska Transportation Commission Sunset Legislative Review.

Dear Mr. McDonald:

As a result of our phone conversation last week, I am sending you a copy of the Performance Review of the Alaska Transportation Commission. It was the basis on which the Senate Commerce Committee held hearings for two weeks. As a result of these hearings,a report was written indicating the Senate Commerce Committee's recommendations for future conduct of the Alaska Transportation Commission. (Also enclosed please find a copy of Senate Bill 97, Committee Substitute for Senate Bill 60 amended, and Senate Bill 236.)

You may want to contact the House Commerce Committee for any current action being taken by that body, on matters concerning the Alaska Transportation Commission. Fred Brown is the Chairman and can be contacted in Room 206 Assembly Building, Juneau, Alaska 99811 (Telephone: 465-3834).

If you have any further questions, please feel free to call or write. (My telephone number is 465-3748.)

Sincerely,

Christian Basler

Commerce Committee
Pouch U
Juneau, Alaska 99811

Senator Brad Bradley & Commerce Committee:

A continuation of the Alaska Transportation Commission will again be reviewed by your committee in the coming months. It is my opinion that the trucking industry should be required to provide the public with (1) safe operating equipment and (2) insurance or bonding to cover the value of the cargo carried. It seems to me these two functions can best be handled by the Department of Public Safety and perhaps the insurance commissioner.

The transportation commission is a regulatory body to control (harass) the trucking industry and does not serve a useful purpose. The commission adds to the public's cost of transportation by dampening free enterprize which made this country great in the first place.

Except for items 1 and 2, above, I see no reason for government controls on trucking anymore than opening a shoe store, a consulting service or any other business where one may enter or leave the marketplace at will. The airline deregulation has been successful in allowing free enterprize to govern the marketplace and if you will allow the Alaska trucking industry the same opportunity, the public will be well served. Additionally, the funds required to staff and operate the commission would be a significant step in reducing government costs and bureaucracy.

February 22, 1979

Senator Bradley
Pouch V
Juneau, Alaska 99811

Dear Senator:

On February 15, 1979 I testified before your committee reviewing the performance of the Alaska Transportation Commission and spoke out against deregulation on behalf of Douglas Trucking, Inc. Douglas Trucking is a young, Juneau based class 2 carrier. The purpose of this letter is to highlite the areas we feel strongest about.

Most importantly, through regulation and enforcement, a network has been established to provide to the general public a transportation system unequaled in service anywhere in the world. Regulation has established a framework in which schedules are set up and maintained, interlines with other carriers established, and has provided for tariffs open to public inspection. Enforcement of regulations by a commission is necessary to insure that these services are made available to all individuals and businesses. With regulation, Douglas Trucking can guarantee service to the general public in the area we serve, with connections with reasonable dispatch to anywhere in the U.S. and most foreign countries! Without regulation, we would not be able to do this because interlines with connecting carriers and tariffs would not remain stable.

It is recognized that the general public and this state require an organized transportation system. It also recognized that the basis of this country is the free enterprise system and that the individual or small business must be able to operate along with big business and goverment. We at Douglas Trucking believe that through regulation and enforcement (the commission), both systems can be maintained.

Douglas Trucking, as it is today, was able to start as three individuals who with very limited funds were able to enter the trucking business and operate successfully. The Alaska Transportation Commission review their application weighing several factors including the general public's intrest and approved their

application. Douglas Trucking is proof that even an individual can start and survive in Transportation in Alaska. Entry and exit from the transportation system requires applicants to prove some financial responsabilities and operational abilities to serve the public and to ensure a responsive transportation system. A strong commission is needed to police the network we all depend on.

Deregulation is not a cure for a commission that needs more strength. The Alaska Transportation Commission must be given the necessary support in all areas including Law, Economics, and Statistics to effectively protect the intrest of the general public. Senate Bill 60 is a step in the right direction. Douglas Trucking favors a strong commission.

The State of Alaska is very dependent on its thin lines of transportation, and is in an extremely poor position to experiment with the effects of deregulation. A wrong decision would have very serious effects for this state. The "Lower 48" has a much more concentrated system and if any experimenting is to be done, it should be there. The State of Alaska would lose nothing, and could very possibly save a lot if we would just "wait and watch" for the time being.

Best Personal Regards,

W. Van Alstine

W. 'Buzz' Van Alstine

Senator W.E. Bradley, Chairman
Senate Commerce Committee
Alaska State Legislature

Dear Senator Bradley,

I, as a commercial pilot in the Bethel Area since Jan 1959, suport the deregulation of Air Taxis. This I believe to be a benefit to the publick as all Air Taxis in the business now cater to their own clientele, so the general publick is unable to find an aircraft to charter. I believe economics would neglect the type and amount of aircraft. As the people only fly with the pilots that they know and trust, this would hinder newcomers and draw the old and reliable pilots back into the area.

Inclosed is a letter from Eddy Hoffman, President of Alaska Village Presidents, supporting deregulation of Air Taxis.

Sincerely,

John W. Haroldsen

Alaska State Senate

Re: Alaska Transportation Commission

Dear members:

I have been a state certificated fixed base operator at Birchwood Airport since 1969. I have state-wide authority for fixed wing aircraft and also have helicopter authority. I support deregulation because I cannot see one single thing the ATC has done for my company or the taxpayer of the State of Alaska.

1. The ATC and some of its supporters speak of ATC's importance in the safety aspect of aircraft and pilot capabilities. The ATC has no safety inspection for aircraft or pilots. The safety of all commercial and private flight operations is overseen by highly qualified FAA personnel. For authority to fly for hire whether it be a single pilot operation or a large fixed base operator, the applicant must meet the qualifications of the FAA safety inspectors before commercial operator specifications are issued to a company.

a. Aircraft are inspected by FAA maintenance personnel and listed on the operating specifications according to type and conditions under which the aircraft are authorized to fly commercially.

b. Pilots are tested by an FAA flight proficiency inspector who then issues, if the test is satisfactorily completed, an 135.138 authorization listing the aircraft the pilot may fly and under which conditions, such as VFR, night and so on. This is renewed each year by another flight check for VFR, and every six months for IFR conditions.

c. Proof of insurance must be on file with the Civil Aeronautics Board for all Part 135-licensed FAA commercial operators. The minimum liability insurance requirements for commercial operators by CAB exceed the minimum requirements by ATC.

2. With deregulation some operators and public officials are concerned about outside operators and new operators. These operators will, and must now, meet all safety requirements of FAA. The pilots must also meet the minimum pilot requirements established by the person or company for which they are flying. All contracts I have seen and bid on issued by the State of Alaska, oil companies, mining companies, etc. have minimum pilot requirements of 500 hours or more Alaska time. All federal government contracts also have minimum pilot requirements which equal or exceed the above minimums, but anyone can bid these jobs or perform these charters are not regulated by ATC in any case.

Outside and new operators will be self-regulated due to competition and available space at airports. At almost all state-operated airports lease lots available are already occupied such as Anchorage International, Merrill Field, Birchwood, Bethel, St. Mary's, Aniak, Dillingham, to mention a few

3. The $1.4 million tax dollars now spent on regulation could be better spent elsewhere. The taxpayer is now getting nothing whatsoever for his money.

I see no reason for further study on ATC. The past 10 years' record at the commission has shown that ATC can only deteriorate Alaska aviation. Our country was founded on free enterprise. I would like to see the islands of monopoly within our free system cut out.

Ralph Doyle,

Chugiak Aviation

Shaw Flight Service, Inc.

CHAIRMAN
Senate Commerce Committee
State of Alaska

February 21, 1979

Gentlemen.

The Alaska Transportation Commission is a totally unnecessary government agency. Your review under the Sunset Law of its value and public need should consider the following:

1. The Federal Aviation Administration provides more than adequate operational controls and Public safety through their certification procedures and their governing regulations and enforcements thereof. Their primary concern is that of Public Safety with particular emphasis upon aircraft, personnel and air carrier operations, and all navigation systems and airports.

2. The ATC functions are contrary to the Free Enterprize system, the foundation of our Nation.

3. The ATC promulgates and fosters monopolies in Aviation and restricts competition. Many of our Alaskan cities and villages are at the mercy of a single large Air Carrier. Small towns are denied the services of large aircraft needed for outsized cargo. Numerous examples can be made available upon request.

4. The United States Congress has recognized the imminent death of the Air Transportation industry like that of the Railroads, under the strangleholds of the Civil Aeronautics Board. They have acted by deregulation and the elimination of the CAB. All greatly to the benefit of the American Public.

5. In the Airline Deregulation Act of 1978, CAB authority, in the case of Alaska has been delegated to the State. This action in effect creates a new all powerful bureaucratic monster. With former CAB authority and present ATC authority this agency will slowly stifle and deteriorate Alaskan Aviation.

In event you hold hearings in Anchorage or desire documentation of the above I will be most happy to supply it. I hope you take the view of the Public Interest, heed small business, avoid large aviation monopolies and Unions, and let the ATC die a natural death. It is an agency no longer needed.

Sincerely,

Robert E. Gay

Robert E. Gay

Chairman
Senate Committee Hearing
On Alaska transportation Commission

I favor deregulation of air taxi Certificates for Bush planes

I would think that any Charter Operators Now flying to my 57 AVCP should be permitted to fly if the Village People want to fly with them. They Know who is safe and dependable.

The safety record of the Operator as judged by the Village People and not by Some boards someplace. I belive in Competion not regulation

Edward Hoffman
Chairman A.V.C.P.

STATEMENT FOR SENATE COMMERCE COMMITTEE
ON SUNSET LEGISLATION CONCERNING
THE ALASKA TRANSPORTATION COMMISSION

SEA-LAND FREIGHT SERVICE BELIEVES THE LEGISLATURE SHOULD CAREFULLY WEIGH THE ADVANTAGES OR DISADVANTAGES OF ANY DEREGULATION IN LIGHT OF THE FOLLOWING FACTS:

1. TRANSPORTATION IS A VITAL LIFELINE TO COMMERCE IN ALASKA. MOTOR CARRIERS ARE ADEQUATELY PROVIDING FOR THE NEEDS OF ALASKA CITIZENS. DEREGULATION MAY HAVE AN ADVERSE EFFECT ON SUCH A SYSTEM.
2. MOTOR CARRIERS ARE UNDERGOING SEVERE FINANCIAL DIFFICULTIES AT THE PRESENT TIME. ARCTIC MOTOR FREIGHT, AR-DEES, KAPS TRANSPORT, ETC. IN CHAPTER XI BANKRUPTCY. WEAVER BROS. HAVE SHUT THEIR DOORS. INDUSTRY MUST RECEIVE SOME REGULATORY PROTECTION IN ORDER TO REMAIN VIABLE.
3. LACK OF REGULATION WOULD PROVIDE OPEN ENTRY FOR CARRIERS WHICH WOULD SIPHON OFF PROFITABLE OIL FIELD RELATED FREIGHT FROM EXISTING CARRIERS. RESULTING DRAIN IN REVENUES WOULD HAVE SEVERE IMPACT ON CARRIERS SERVING THE GENERAL PUBLIC AS WELL AS THE OIL INDUSTRY.

SEA-LAND STRONGLY FEELS THAT ATC SHOULD CONTINUE TO EXIST AS REGULATORY AGENCY. WE URGE THE ADMINISTRATION TO SUPPORT SUCH CONTINUANCE BEFORE THE LEGISLATURE. WE FEEL AT THE SAME TIME THAT THE ATC SHOULD BE IMPROVED IN THE FOLLOWING MANNER:

1. THE ENFORCEMENT POWERS OF THE ATC MUST BE STRENGTHENED THROUGH LEGISLATIVE ACTION. ILLEGAL OPERATORS ARE OPERATING WITH IMPUNITY WHILE ATC STANDS BY HELPLESSLY.
2. ATC MUST HAVE ADEQUATE STAFFING OF QUALIFIED KNOWLEDGEABLE PERSONNEL WHO CAN FULFILL THEIR LEGISLATIVE MANDATE.
3. THE ADMINISTRATION AND IN PARTICULAR THE ATTORNEY GENERAL'S OFFICE MUST GIVE GREATER ASSISTANCE TO THE ATC IN HELPING THEM FULFILL THEIR MANDATE. WE BELIEVE THERE IS A DEFINITE LACK OF NECESSARY SUPPORT AT THIS TIME.

SEA-LAND ALSO BELIEVES THAT ANTI-TRUST IMMUNITY MUST BE GUARANTEED FOR ALASKA CARRIERS ASSOCIATION. THIS BELIEF IS BASED UPON FOLLOWING:

1. ACA PROVIDES A VITAL FORUM FOR SHIPPERS AND CARRIERS ALIKE TO DISCUSS RATES AND MUTUAL TRANSPORTATION PROBLEMS.
2. ACA PROVIDES FOR RIGHT OF INDEPENDENT ACTION FOR INDIVIDUAL CARRIERS TO INITIATE THEIR OWN RATE ACTIONS. CONSEQUENTLY THERE IS NO RESTRAINT OF TRADE.
3. LACK OF ANTI-TRUST IMMUNITY COULD HAVE SEVERE IMPACT UPON MOTOR CARRIER INDUSTRY ALREADY HAVING SEVERE ECONOMIC DIFFICULTIES.

IN CLOSING WE WISH TO THANK THE SENATE FOR PROVIDING SEA-LAND WITH THE OPPORTUNITY OF BEING HEARD.

In re: Alaska Transportation Commission Hearing

Dear members:

This letter is intended to document my view that the transportation industry in Alaska should be deregulated.

I have been a pilot in Alaska for the past 12 years and am a resident by birth. I have worked for four certificated air taxis and have been involved in regulatory matters of two of them. I am currently a licensed general contractor. I operate a flight school in Palmer. Additionally, I am a civil engineer.

In 1973 I applied for and received certification by the Alaska Transportation Commission for a bus line linking the Matanuska Valley to Anchorage. I am therefore familiar with certification requirements.

I have reviewed the Performance Review of the Alaska Transportation Commission, completed by the Division of Legislative Audit. I have some problems with the findings of that report.

1. The report purports to evaluate the necessity of the ATC. However, in context it seems to accept the current regulatory goals pursuant to further study. I don't believe further study is needed based on the ongoing.

   a. National studies have concluded that there is no economic justification to consumer or producer for regulating the transportation industry.

   b. It is intuitive that the presence of regulation increases the costs of operation to both producer and consumer, mainly through the costs of managing required reports etc. Additionally, regulation has attached a monetary value to saleable existing certificates. A new operator must include an amortization of his certificate cost in his rates. Prices of certificates for air carriers vary in the range of $25,000 to over $100,000, depending on location, authority and other variables. Additionally, taxes to support the regulatory agency add indirectly to transportation costs.

   c. The presence of regulation and accompanying lack of sound economic judgements coupled with the absence of free enterprise create prices that can exceed fair market values of the free enterprise system.

   d. There would be no safety penalty in air commerce due to the effective presence of the Federal Aviation Administration.

2. The report does not contradict economically unsound philosophies of the present commission.

   a. The report states that the commissioners considered fair rates to be determined by a fair return on investment, although they could

not define what a fair rate was. This is an incorrect incentive for a regulated entity, although it is quite typical. Prices set by investment and cost relationships in an isolated supply-demand environment leads to inefficient rate base padding (unneeded or extravagant expenditures for the purpose of building the base for rate increases). To effectively control this sort of thing requires that regulators staff sufficiently to evaluate and correct the internal efficiencies of each regulated entity.

3. The report fails to identify several major deficiencies that currently exist.

a. In granting new certificates, the Commission frequently imposes operation radii on air carriers that are absurd and destroy the economic viability of the operators' intent. There are cases of radii of 25 miles on new air taxis. This is ludicrous in Alaska. One operator's airspace includes only about 100 square miles of land and the rest is open water. These area limitations are imposed by the Commission without consulting the operator.

In essence, the basic goals of the existing regulatory body are not economically sound. Additionally, as the report states, the present goals are not pursued with management effectiveness. It would be in the public interest to let the free enterprise system prevail.

Re: AS 44.66.010(a)(2)
Termination of Alaska Transportation Commission

Dear Ben:

I have reviewed the above-referenced statute and the applicable legislative history. As you are aware, AS 44.66 was a new chapter added to the statutes by the Legislature in 1977 as the result of Chapter 149, Session Laws of Alaska. I am enclosing a copy of the chapter as adopted.

You will note that under AS 44.66.010(a)(2), the Alaska Transportation Commission will terminate on June 30, 1979, unless the Commission is continued or reestablished by the Legislature for a period not to exceed four years (AS 44.66.010(c)). Before the termination of the Commission, a committee of reference of each house must hold one or more hearings to receive testimony from the public and must consider the proposed budget of the Commission and the performance audit of the activities of the Commission (AS 44.66.050(a)). During the public hearing, the agency (Commission) has the burden of showing a public need for its continued existence (AS 44.66.050(b)).

The committee of reference must then, not later than the 60th day of the legislative session, submit a report to the presiding officer of the House (AS 44.66.050(d)), containing a summary of the findings of the committee and the recommendations. The committee may introduce a bill to provide for the reorganization or continuation of the Commission (AS 44.66.050(e)).

The statute is clear as to the legislative method for determining the propriety of the continuation of the Commission, and I have enclosed a draft of a bill apparently for referral

to any committee of reference to perpetuate an agency. You will note each agency must be perpetuated by its own bill. I would suggest you indicate to the presiding officer of the respective body of the Legislature that the committee report must be submitted within 60 days of the beginning of the session, and this is after the requisite public hearing so the process can begin.

Very truly yours,

Andrew E. Hoge

Juneau, Alaska 99811

Dear Mr. Pegues:

Enclosed are SENATE BILLS 37, 43, 44, and 60.

I would appreciate your comments/position papers on this SENATE BILL to include a fiscal note, if appropriate. If you decide that a fiscal note is not required, please make such a statement in your reply. If your Department recommends specific changes, in addition to general comments, I would prefer that they be keyed to page and line numbers.

If you know of other departments or agencies that have an interest in this legislation, please let me know so that I may get the benefits of comments from all knowledgeable and interested parties.

In consideration of a productive and expeditious session, we request that your comments/position be returned to the Senate Commerce Committee within 10 days.

Sincerely,

Brad Bradley

SEALAND REPRESENTATIVES UNABLE TO ATTEND MEETING WITH GOVERNOR HAMMOND TODAY DUE TO UNAVOIDABLE CIRCUMSTANCES. WOUD APPRCIATE YOUR CONVEYING SEA-LAND POSITION ON DEREGULATION TO GOVERNOR AS WELL AS PRESENTING HIM A COPY OF THIS THELEGRAM.

SEA-LAND FREIGHT SERVICE BELIEVES THE ADMINISTRATION SHOULD CAREFULLY WEIGH THE ADVANTAGES OR DISADVANTAGES OF ANY DEREGULATION IN LIGHT OF THE FOLLOWING FACTS:

1. TRANSPORTATION IS A VITAL LIFELINE TO COMMERCE IN ALASKA. MOTOR CARRIERS ARE ADEQUATELY PROVIDING FOR THE NEEDS OF ALASKA CITIZENS. DEREGULATION MAY HAVE AN ADVERSE EFFECT ON SUCH A SYSTEM
2. MOTOR CARRIERS ARE UNDERGOING SEVERE FINANCIAL DIFFICULTIES AT THE PRESENT TIME. ARCTIC MOTOR FREIGHT, AR-DEES, KAPS TRANSPORT, ETC. IN CHAPTER XI BANKRUPTCY. WEAVER BROS. HAVE SHUT THEIR DOORS. INDUSTRY MUST RECEIVE SOME REGULATORY PROTECTION IN ORDER TO REMAIN VIABLE.
3. LACK OF REGULATION WOULD PROVIDE OPEN ENTRY FOR CARRIERS WHICH WOULD SIPHON OFF PROFITABLE OIL FIELD RELATED FREIGHT FROM EXISTING CARRIERS. RESULTING DRAIN IN REVENUES WOULD HAVE SEVERE IMPACT ON CARRIERS SERVING THE GENERAL PUBLIC AS WELL AS THE OIL INDUSTRY.

SEA-LAND STRONGLY FEELS THAT ATC SHOULD CONTINUE TO EXIST AS REGULATORY AGENCY. WE URGE THE ADMINISTRATION TO SUPPORT SUCH CONTINUANCE BEFORE THE LEGISLATURE. WE FEEL AT THE SAME TIME THAT THE ATC SHOULD BE IMPROVED IN THE FOLLOWING MANNER:

1. THE ENFORCEMENT POWERS OF THE ATC MUST BE STRENGTHENED THROUGH LEGISLATIVE ACTION. ILLEGAL OPERATORS ARE OPERATING WITH IMPUNITY WHILE ATC STANDS BY HELPLESSLY.
2. ATC MUST HAVE ADEQUATE STAFFING OF QUALIFIED KNOWLEDGEABLE PERSONNEL WHO CAN FULFILL THEIR LEGISLATIVE MANDATE.
3. THE ADMINISTRATION AND IN PARTICULAR THE ATTORNEY GENERALS OFFICE MUST GIVE GREATER ASSISTANCE TO THE ATC IN HELPING THEM FULFILL THEIR MANDATE. WE BELIEVE THERE IS A DEFINATE LACK OF NECESSARY SUPPORT AT THIS TIME.

SEA-LAND ALSO BELIEVES THAT ANTI-TRUST IMMUNITY MUST BE GUARANTEED FOR ALASKA CARRIERS ASSOCIATION. THIS BELIEF IS BASED UPON FOLLOWING:

1. ACA PROVIDES A VITAL FORUM FOR SHIPPERS AND CARRIERS ALIKE TO DISCUSS RATES AND MUTUAL TRANPORTATION PROBLEMS.
2. ACA PROVIDES FOR RIGHT OF INDEPENDENT ACTION FOR INDIVIDUAL CARRIERS TO INITIATE THEIR OWN RATE ACTIONS. CONSEQUENTLY THERE IS NO RESTRAINT OF TRADE.
3. LACK OF ANTI-TRUST IMMUNITY COULD HAVE SEVERE IMPACT UPON MOTOR CARRIER INDUSTRY ALREADY HAVING SEVERE ECONOMIC DIFFICULTIES.

SEA-LAND BELIEVES THAT SOME MEMBERS OF THE ATTORNEY GENERALS STAFF ARE CAUSING DIFFICULTY IN OBTAINING NEEDED ANTI-TRUST IMMUNITY. WE BELIEVE THAT THOSE MEMBERS OF THE ATTORNEY GENERALS STAFF ARE NOT FULL COGNIZANT OF THE URGENT NEED FOR ANTI-TRUST IMMUNITY AND SUGGEST THAT THEY OPEN LINES OF COMMUNICATION WITH CARRIERS AND ACA TO RESOLVE THE QUESTIONS THEY HAVE.

IN CLOSING WE WISH TO THANK GOVERNOR HAMMOND FOR PROVIDING THE CARRIERS THE OPPORTUNITY OF MEETING WITH HIM. WE ALSO EXPRESS OUR APPRECIATION FOR HIS EFFORST IN KEEPING THE NORTH SLOPE ROAD OPEN.

WE LOOK FORWARD TO MEETING WITH HIM IN THE NEAR FUTURE EITHER INDIVIDUALLY OR COLLECTIVELY AS A GROUP OF CARRIERS TO FURTHER DISCUSS THE FUTURE OF TRANSPORTATION AND REGULATION IN THE STATE.

Dear Bob:

I have been meaning to write you for some time, because as a longtime friend, lawyer, legislator and one concerned for the well being of the free enterprise system, I know you are interested in anything that will improve governmental administrative agencies operations, particularly those who are performing quasi-judicial functions involving commerce generally.

I am particularly concerned with two agencies, the Alaska Transportation Commission (ATC) and the Alaska Public Utilities Commission (APUC), as to certain activities and functions by which they operate.

My main thesis is Alaska badly needs regulatory reforms. At the outset, let me first establish that I believe both of these administrative agencies should be continued and not disbanded under the so-called "Sunset Law". However, let me be quick to say that a balancing factor is needed, and their regulatory powers should be spelled out with more clarity and definitiveness. As noted hereinafter, within a different framework, both agencies need technical assistance. I am sure you and other legislators must know many in the private sector have serious problems with the present systems.

Write many aviation & trucking businesses for comments

The two matters that most concern me with respect to the two agencies are as follows:

1. The need to restructure both agencies so that the Commission is properly staffed; but, in addition, there should be an attorney, an economist and other technicians to represent the public interest. Such persons should be allowed to operate independently, and on behalf of the

public without having to answer to the Governor, the Attorney General's office or to the Commissioners. I find it difficult to understand how a staff, such as operates for the Public Utility Commission, can operate on behalf of the public and at the same time advise the Commission. It is not unlike the District Attorney representing the public, and simultaneously advising the Judge who is hearing the case. I have heard it said from good authority that APUC Commissioners have suggested to the staff what their reports should contain, which recommendations then conveniently correspond with the Commission's ruling. The relationship particularly in the APUC, is badly blurred. I think a total divorcing of a staff, who will represent the public is critical.

It is also my view and opinion that the ATC needs a much stronger technical staff. At this time, the ATC does not employ a single economist or accountant and has the services of only one attorney. An agency with such poor staffing, in my opinion, cannot regulate effectively.

Businesses subject to regulatory agency decisions are severely threatened under the present structure. An overhaul within the agencies or new corrective legislation is mandatory. Either that, or totally deregulate carriers and truckers and follow the practice of the new Airline Deregulation Act of 1978 (49 USCA 1301 et seq.).

Get copy (2)

The APUC has other problems besides those listed above. Recently, the APUC Commissioners made a determination that was clearly not within the public interest. In fact, it will cost the Fairbanks residents over $400,000 a year more for cable service because of the Commission's action, or lack of action. Because this matter is in litigation, for the moment I will only make limited comment in regard thereto.

2. A second point of concern is the lack of insulation from political influences the individual commissioners are subject to, direct or otherwise. In other words, administrative agency commissioners have as delicate a job in the decisions they have to make as superior court judges or supreme court judges. Yet the rumble and street talk is that commissioners and hearing officers are frequently

contacted ex-parte by persons in government regarding proceedings that are pending before the commissioners or the hearing officers. It should be and must be totally prohibited. I am seriously considering making this an issue in one matter and deposing certain Commissioners and staff.

Both of these regulatory bodies are hearing cases that involve literally millions of dollars and far more than the major portion of cases in the courts. Yet and unless something is done to better assure the independence of these decision makers and their ability to truly resolve causes in accordance with the evidence under clearly established standards set by law, real harm will result. Indeed, it will create hardships on companies who have large investments and interests in businesses being mandatorily regulated by these agencies.

Furthermore, I am absolutely appalled at the lack of legal understanding of their responsibilities by some of the commissioners. In a recent proceeding before the APUC, one of the commissioners was far more of an advocate for a particular applicant (there were six applicants) than most of the attorneys involved in the case. He hardly maintained himself as an unbiased, independent arbitor. As a trial practitioner I am sure you readily appreciate how this thwarts both the fairness of the proceedings and due process of law.

I am not an advocate of government regulation of any industry; but if regulations are to be, they should be consistently and fairly applied. I do not expect business to be unrealistic towards regulatory agencies; but in the same vein, regulatory agencies need to be more realistic towards business.

In simple terms, business needs to make money to provide the jobs, facilities, etc., and to give the stockholders a reasonable return on their investment. At this point in time, a regulatory analysis by an independent body is definitely needed because regulatory reform is critical.

It is my understanding that there will be names coming from Governor Hammond's office nominating persons to serve as Commissioners on these Commissions within the next 20 days. It is also my understanding that the legislative

performance audit of the ATC will be presented during this upcoming session. In addition, I am told there may be legislation involving both these agencies. I expect the legislature will be much more involved in the appointment process because of these upcoming events. But for both, I would appreciate being given a sufficient amount of notice beforehand so that I may personally appear and testify before any legislative committee who would be involved in considering or approving commissioners or legislation relating to the above.

Have Don comment on audit

Notify Camarot to comment & testify

I am sending Governor Hammond a copy of this letter because I am sure the matters discussed herein will also be of interest to him.

Personal regards,

MERDES, SCHAIBLE, STALEY
& DeLISIO, INC.

Linder Quits APUC Post

After only three months on the job, Ronald G. Linder has resigned his $43,400-a-year position as executives directing of the Alaska Public Utilities Commission because he believes the agency's control of utility businesses is excessive.

Linder also says the commission's staff has no independence and that commissioners routinely interfere with the staff's work.

A retired Air Force colonel and five-year Alaska resident, Linder was selected for the position after a four-month search attracting more than 50 applicants. He took office Oct. 8.

"The commission seems to want to take over management prerogatives of the utilities," he said Monday. "All they're left with is meeting the payroll."

He said when the federal government is moving to less regulation of airlines, the trucking industry and broadcasting, the commission here insists on more.

"More regulation costs more," Linder said.

(See Page 2 Col. 2)

Call Ron to testify

Resignation

Excessive Control Of Utilities Prompts Linder's

(Continued from Page 1)

He said the state's utilities, from the smallest on up, were being suffocated in paperwork and that staff morale was poor because staffers were called on to do too much.

"Many times when they get paperwork in, they've told me they don't know what to do with it so they just throw it in the file," Linder said.

He said the staff has to get commissioners' approval "even on the smallest items." Some other states, he said, have the utility regulatory agency's staff completely separated from the commissioners.

Marvin Weatherly, engineering member of the commission, said Linder is a "great guy. We were sorry to see him go. We asked him to reconsider."

He said Linder had objected to requiring a small cable television company serving several Aleutian villages to obtain a certificate.

Linder said he did not believe cable television should be regulated at all, since it is not a necessity. He objected to the state's "moving into regulating pay television and creating monopolies."

In Anchorage, he said, several companies should be given the opportunity to compete. If problems arise, he said, they should be solved at the municipal level.

Robert Stoller, assistant attorney general assigned to the commission, said Linder is "an excellent man who had extraordinary rapport with the staff. He was a humanist; we'll miss him. But no one is indispensable."

The commission has already moved to replace Linder, offering the job over the weekend to Cale Herry, a New Mexico resident who Weatherly said came in second in the search.

Herry is also a retired military man. He came to Anchorage Friday, Linder's last day, was interviewed by the commissioners and accepted the job. He will begin work in February.

Weatherly said Herry's interview contained questions on his philosophy of utility regulation.

Linder, Weatherly said, was driven to resign because of "a philosophical difference as to what regulation is all about."

This came out of the January 9, 1979 "Anchorage Times". Thought it might be of added interest.

February 21, 1979

Dear Brad.
~~Gentlemen~~

I heard that you are considering the continuance of the Alaska Transportation Commission under the Sunset Law. This is one government agency that would never be missed by anyone. I ask that you do not reinstate it. The only results of its demise will be a revitalization of Air Commerce, a great increase in services to the People, and lower fares that result from greater competition.

In many cases there is no question of competition but just an air carrier wanting a chance to serve the Public. This is denied by the ATC because of unwillingness to take action and their adherence to the wishes of big business. My company is a classic example. In 1972 we applied for Air Taxi authority in Cordova and Yakutat. Two and one half years later the ATC granted provisional authority, not to just our company but to about eight. They actually solicited applications in this case. My company had helicopters in 1972 and 1973 but was forced to sell them in early 1974 because of no authority to operate. The belated temporary ATC certificate in late 1974 was too late.

Now in 1979 we see that Yakutat has no air service and Cordova has lost Parkair. The other operator closes down all winter. In general all the communities in the Gulf have lost air services because the ATC granted authority to everyone in locations where the market would not support it. Of course this was done after many expensive hearings and years later. They have no business trying to regulate the economics of air commerce.

In 1970 as President of Gay Airways, Inc. we applied for authority to operate Air Taxi from Deadhorse, Alaska, a service then in critical need. The ATC after three years of expensive hearings finally granted us authority, again along with about seven other companies. Today all are out of business except the monopoly ERA Helicopters, Inc. and SEAIR. That market cried for one or perhaps two operators but could not support seven, five at Deadhorse and two close by. Again the poineer, Gay Airways, Inc. got shot down for early efforts to serve the Public need.

CORDOVA, ALASKA 99574
(907) 424-7429

Please consider the precedent of Congress in the Airline Deregulation Act of 1978. What is good for the other 49 States should certainly be good for Alaska, the State most dependent upon Air Transportation. This in spite of Senator Ted Stevens who excepted Alaska at the behest of Reeve Aleutian Airways, Wein Airways, and Alaska Airlines who wish to retain their monopolies. Now the ATC has been delegated all CAB power which creates an even worse situation. Alaskan Air Carriers are limited by the size of aircraft and by the locations they may serve both of which are detrimental to the Public.

Many of our towns can be served only by aircraft under 12,500 pounds. This denies them large cargo by air because the airlines do not serve them and the ATC will not let Alaskan Air Carriers do it. The size of aircraft used by an operator is very effectively regulated by the Federal Aviation Administration. Their is no need for arbitrary control by the ATC.

I would like an opportunity to testify in event you or the House Committee hold hearings in Anchorage. Please call if I may provide further information.

Sincerely yours,

Robert E. Gay
President

Robert E. Gay

Shaw Flight Service, Inc.
Box 6003, International Airport • Anchorage, Alaska 99502 • 907-243-1573

CHAIRMAN
Senate Commerce Committee
State of Alaska

February 21, 1979

Gentlemen.

The Alaska Transportation Commission is a totally unnecessary government agency. Your review under the Sunset Law of its value and public need should consider the following:

1. The Federal Aviation Administration provides more than adequate operational controls and Public safety through their certification procedures and their governing regulations and enforcements thereof. Their primary concern is that of Public Safety with particular emphasis upon aircraft, personnel and air carrier operations, and all navigation systems and airports.

2. The ATC functions are contrary to the Free Enterprize system, the foundation of our Nation.

3. The ATC promulgates and fosters monopolies in Aviation and restricts competition. Many of our Alaskan cities and villages are at the mercy of a single large Air Carrier. Small towns are denied the services of large aircraft needed for outsized cargo. Numerous examples can be made available upon request.

4. The United States Congress has recognized the imminent death of the Air Transportation industry like that of the Railroads, under the strangleholds of the Civil Aeronautics Board. They have acted by deregulation and the elimination of the CAB. All greatly to the benefit of the American Public.

5. In the Airline Deregulation Act of 1978, CAB authority, in the case of Alaska has been delegated to the State. This action in effect creates a new all powerful bureaucratic monster. With former CAB authority and present ATC authority this agency will slowly stifle and deteriorate Alaskan Aviation.

In event you hold hearings in Anchorage or desire documentation of the above I will be most happy to supply it. I hope you take the view of the Public Interest, heed small business, avoid large aviation monopolies and Unions, and let the ATC die a natural death. It is an agency no longer needed.

Sincerely,

Robert E. Gay
General Manager

February 27, 1979

Honorable W. E. "Brad" Bradley
Chairman,
Senate Commerce Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Bradley:

I would like to apologize for requesting input into the Sunset Legislation as regards the Alaska Transportation Commission at this late date. I was just elected President of the Alaska Air Carriers Association February 24. At that time I was not sure what our prior input was but feel very strongly that the Transportation Commission is needed for the best interest of the traveling public.

As you are aware, much of this state is completely dependent on aircraft support -- much different than states with no Transportation Commission. The Number One Priority of everyone should be safety. There is absolutely no question in my mind that safety is directly related to regulation of the industry. If you open it up there will be numerous little guys with beat-up Cessna 180's wanting to make a fast buck and since they will be operating on shoestrings, they will cut corners on maintenance, training and pushing to complete the trip to make the buck.

We are not concerned about the long run as individual operators. In my own company, which is Peninsula Airways, Inc., at King Salmon, we now operate 18 aircraft with annual revenues exceeding Two Million Dollars. I built my company over the last 25 years in the face of a lot of competition. The unfortunate thing is that the shade tree operators, before they go bankrupt or kill themselves, are liable to take some of the innocent general public with them.

We are not saying the Alaska Transportation Commission is perfect. In fact, there are some serious problems but it seems this should be the ideal opportunity to correct some of these problems. In particular, we would like to see Senate Bill 60 passed, giving the Commission cease and desist powers and giving the Commissioners more control over the hearing examiner. In fact, we think the report by the Legislative Audit Committee contained a lot of good recommendations and could be used as a guide. There was one recommendation that would not be too practical, that being that the Alaska Transportation Commission gather profit and loss figures and regulate those also. We feel that is a very big job, far beyond practical budget considerations at this time.

In summation, we strongly urge the retention of the Alaska Transportation Commission and that it be endowed with the power to provide competition in markets where needed but also able to keep out the "fast buck" operators. Such action can only provide safer, more dependable service to the general public.

Sincerely,

ALASKA AIR CARRIERS ASSOCIATION, INC.

Orin Seybert
President

ATC HEARINGS

-Bernie Bylsma (Turnigan Chevron, Wrecker)
also. . . Alaska State Auto Club and some other service station dealers and operators.

. . . I am here to ask for the deregulation of tow trucks. The Consumer, I think, should be able to have who he wants tow his vehicle. We believe that. The consumer wants it. How many times we have to turn away people who want us to tow their vehicles but due to regulations, we arent' allowed to do it. The public has to pay some times as much as three and four times more to a licensed tower than we can do it for. Those three or four times are rare cases and basically those cases would come only under the state automobile club where there are set rates, for instance; if you have a brand new car that you just bought and you get 4 miles away from the dealer and it goes dead and you call the Alaska Auto Club of which you are a member, you should be able to get the car towed back for twelve dollars ($12) is what the tower charges the auto club, the contract towers for the auto club for that distance where it would cost just about 4 times as much and the auto club has to simply say "we can't do it" and then of course, the auto club member is all up in the air, he's paid his dues and can't do it. It keeps membership out of the auto club, it keeps the auto club from growing, there have been a number of cases where people have asked for their dues back because that has happened. Convenience is often less as far as convenience, what I mean is, they get there quickly. I'll give that an example in a minute. License operators basically have a monopoly on the towing, there's no. . . uh, and with that monopoly comes <u>inefficiency</u>. Their ability to charge the rates that basically they have set up and they have to be called so it only makes for inefficiency on their part. Towing in the states of Washington, Oregon, and California is unregulated. I've got a . . . I wanted to read this from. . . uh . . . it's a letter to us from our state auto club who was in contact with the auto clubs

in Oregon and California. It concerned Arthur Lamboldt from Washington, and L. R. Nepper from Oregon. Mr. Lamboldt said Washington has no tow truck law, the City of Seattle has an insurance coverage requirement but that is the only regulation of the road service industry. He says, discussions have come up from time to time at Olympia, but each time it has been determined any state regulations would simply be restricted would discourage free enterprise and would discourage the small operator and encourage inefficient operations. Mr. Nepper told us a tow truck law went into effect in 1947 in Oregon, it was repealed in 1948 within just 12 months it was found monopolistic practices and higher prices where the public came into being. The Oregon PUC removed the law from the records. The only reference in Oregon law today is that a disabled vehicle under tow does not come under any state regulation. On the other hand, a non-disabled vehicle under tow or being carried by truck comes under their freight restrictions. And in California, this is directly from the California State Automobile Assn., except for accident towing on inter-state and state highways, the state of California does little to regulate the towing industry. For these relatively few calls, the California highway patrol has set up a zone system. They inspect and improve tow operators from within the zone who are then called out on a rotation basis as the need arises. For the most part, the towing industry is relatively clean in California. Active competition keeps it that way. They go on about saying they have it in Nevada, where they have the auto club there has great difficulty with them one place we do encounter government control is in the state of Nevada where the entire towing industry is regulated by the state public service commission. Frankly it's a headache. The law requires that anyone who does towing for hire must have a certificate of

.of public convenience and necessity and so forth as much as we do. I wanted to give a few specific examples of what happens. This is a couple things that have happened to myself. We had towed a mustang into our place of business to repair. Now we are allowed to do that . . . to tow it to our own pl .e. When we told him how much the repairs were, he said it wasn't worth it, it was an old car. They sold it to somebody in Fairbanks as a relic or something and wanted it shipped it up there. We could not tow it from our place of businesss to the railroad yard. The price of our tow would have been $32.50 had we done it. It cost them $51.00 to do it with a licensed company. There was a case just about a month ago where there was an accident less than a half a mile from where my business is. There were two cars involved, state troopers called us, I guess the customer had asked that we tow his car away, the state troopers called us, we answered the call, licensed operator was there to tow the other one away and he said "no, we can't take that one, it's against the regulations." They called me on my driver called me on the radio and I said "ask him to call his dispatcher, if its alright, we can do it if his dispatcher says no leave it alone, even though the state troopers wanted us to take it away. But they said no so I told the driver to come on back. It took him 45 minutes to geth another wrecker there to tow that vehicle away. That is not convenience, by any means. We had a one of my collegues in the business, another station were called by the state troopers, there had been an accident at Tooter and the new Seward Highway, the same thing happened except he picked the car up and towed it away. Even though he was called by the state troopers, he picked the car up and towed it away and he was cited by the ATC for doing it and given a $150.00 fine suspended or something like that. We have another case, these cases come up all the time.

I think a couple weeks ago, Al Davis from the Transportation, he's on the commission made some remarks to us in a meeting about that Globe Automotive had a car that they discovered that they towed in was under warranty and the customer wanted it taken to Alaska Sales and Service. Globe called the Trans/Comm. and they gave him permission, said that it was alright to do that, so by so doing Al Davis told us at this meeting that that type of thing was alright if we had towed it in, had worked on it, found we couldn't do it, we could tow it some place else. Yet, two years ago I was cited and fined, again suspended, for exactly the same violation. It's a controversial type of thing, evidently they don't know what they're doing themselves. Al Davis also made a remark that he didn't want to see alot of unsafe record drivers alot of 16 year old kids pulling cars out of ditches and so forth and he cited a time when I guess near Glennallen somewhere in that area he was going down the highway just in time saw a cable across the road with a car in a snow bank on one side and somebody to anchor their vehicle had driven off the other side and had a cable stretched across the road. Certainly, it is extremely dangerous but theres no law now, theres nothing to keep that driver from pulling it out the way it is now. It is a safety hazard, theres no regulation to keep that driver or that wrecker from pulling that vehicle out onto the road. There are certainly laws against what he did. He was merely breaking the law and anybody would do that I don't think it was valid thing to say that because someone did that because anyone with a four-wheel drive vehicle pulls people out off the side of the road constantly that are stuck in the and can't get out. They're private individuals helping each other. They're still responsible for what they do but they don't take adequate precautions they certainly would have the responsibility.

We're not asking for towing that involves more than two parties. Deregulation of that, the two parties being the vehicle operator, the owner of the vehicle and the tow truck operator. In any case that involves impounding, repossession that involves a third, like the state or anyone else, there should be some regulation of that and we aren't asking for that we are only asking that we be able to tow a vehicle from one place to another and not being. . . and . . . uh. . . to be able to do it legally. The state of Oregon has . . . that any disabled vehicle does not come under freight cargo, or they don't have it in their regulations, or their exempt from the Trans/Com regulations. That's about it. Unless you have any questions.

(Brad)

Yes, we have situations in numerous states in the lower 48 which . . . Washington, Oregon state and california, Bernie. What would you think about having various classifications of certificates maybe one for your level whereby you could have a Class C or A which ever way you might want to go. You could tow in smaller cars with a small wrecker that you might have. You couldn't have the big jobs of course.

(Blysma)

Well, certainly, but is there a need for it? I'm not going to tow in a large vehicle with my small one ton wrecker. It's inconceivable that I do it.

(Brad)

The reason I asked that is because we've had the other sides

testimony and they claim that if you don't have a certificate that you can't make them come up to any particular standards and too, sometimes they will wench out or tow out a vehicle and do damage to the car because they do a little more than they're capable of or possibility of not properly maintaining the towing equipment or a cable may break or they don't have torches to put on the highway and they don't have a lot of the safety requirements or don't satisfy those who have expensive equipment and do have to come up to certain standards but they maintain quality service. I have discussed this with some of the others that testified from the other side and they thought it might be a good idea. Of course, your certificate would'nt be quite as expensive, and it wouldn't permit you to do the big jobs that you probably wouldn't do anyway.

(Bernie)

True, anybody that pulls a vehicle out though, is gonna have to accept responsibility of the vehicle that he is pulling out. I think that about three times in the last twelve that I have had a tow truck that we have damaged a vehicle. One time it was an inexperienced operator drug it along the bank and damaged the side another time an inexperienced operator had a cable where he shouldn't have, the people should have stopped but he had the road blocked and they thought they saw a way to shoot through it they shot through and caught the cable. But, we assumed the responsibility for it. We assume the responsibility for our damages and if somebody is grossly negligent, certainly they have to assume the responsibility. We discussed this with a group of operators last week and we came to conclusion that really . . . uh what really is the necessity of it. And it's just alot more work and regulation and costly, time consuming

work to regulate them that way when what really is the necessity?

(Brad)

I'm not trying to give you the impression that I am an advocate of regulation because I am a firm believer in competitive free enterprise system and as much deregulation as possible. .

(Bylsma)

We came to that conclusion really how much good does it do to classify if you classify them you have to do a lot of regulations and handle the regulations and is it really necessary?

SENATE COMMERCE - ATC HEARINGS - 2/15/79

Mr. Buzz VanAlstein (Douglas Trucking, Juneau, General Manager)

Speaking for Douglas Trucking, we would like to go on record as saying that we are not in favor of deregulation per se simply because we feel there too many advantages to the consumer being offered that we don't think would be available especially in the smaller towns like Juneau and I think it would affect the smaller communities in the state and in the bush communities also simply because there is with the system we have not, there is a network where people can ship long distances regularly and consistently that we don't feel would be available or as good if they were deregulated. Simply by having the certificates we have, we are obligated, and it says so right on the certificate, convenience and necessity for the general public. We have to serve all of the people within the scope of our authority thoroughly and equally and I think that as far as the larger carriers are concerned it would affect them even more because the large communities are usually the easiest ones to serve, however, the small communities I think with deregulation, would not be getting the service. There would be several people handling the larger communities point to point and there would be quite a problem with the smaller communities. The reason I bring up the smaller community thing is because we live in one of them. Of course, we are a smaller trucking company and our scope of authority is basically within 50 miles. But with the network that is set up here we have a structure and framework with which we can work with other carriers so when a customer comes to us and wants to ship to the lower 48 overseas, if necessary, or anywhere else in the state, we have the connections with the other carriers

who also have a scope of authority that is well defined, a tariff structure and a schedule where we can tell this customer with a reasonable amount of satisfaction that we can deliver those goods in a timely manner consistently. For the individual consumer as well as the businessman. The farther the busines· or person is away from the trade centers, the more important this is. The farther you go the harder it is. Especially in this state. . . smaller communities are entitled to the same service if possible that the larger communities have. With the structure we have here now we can provide a schedule and a network and we feel that especially from a smaller companys standpoint that having the structure to work in for we can go to whatever carrier that would be or would have the authority that would interline with us. We could serve this community better because our authority is only within 50 miles but if we want to serve customers in this city and offer them service and as you know, the transportation lines into this state are quite long. It's not like shipping from Seattle to San Francisco that's quite easy to do. . . it's not so here. Harder business here we rely on some of the bigger carriers to interline with, whose business <u>is</u> interline transport, where·: ours is the local community we know the community, we know where things are at here, we know the individual problems some of the people have just getting their goods in and out of the city itself. Our business is not long distance transportation, however, there are other carriers whose business is this. But the network we've got I think we can provide a very good service because we can combine those two things and help those people move their goods in a timely manner . . . if we don't there is a structure set up for entry and exit into this market and it is a regulated market, but it will not support the poor operator . . . it's just a matter of time just like in any business,

but we feel that . . . uh . . . with the structure provided with the system we've got, we can provide a better service. There's a tariff structure where the rates are published. We feel that with deregulation, and less emphasis on a published rate that a businessman could get a nipment in, people delivering the load could say "by-the-way, next week it goes up 20%" This makes it awful hard for a businessman to plan strategy in his market and for him to survive because there's nothing for him to count on consistently at least with the tariff structure we have now there is a time frame in there where you have to publish a notice and people can be made aware of it, it's public record, there's a time limit in there, that once it's been reviewed and it's kind of a cushion on the market for these people. We feel that without some sort of regulation . . . there's no protection from companies you've never heard of before. With the system we've got, there's a policing agency there that if I didn't get my money, there is someone I can go talk to, a commission that's going to go over there and talk to that carrier and have the ability to level fines, and in general, polices public interest. We are in favor of a strong commission because they have got to be a go between between the general public and the carrier. Deregulation will eliminate alot of this and alot of the control and we don't feel it would be in the best interests of the public. I feel that one of the areas where it would hurt the most . . . of course if you get the shippers that ship alot of stuff, like the major business's they're used to the shipping rules and regulations and can work with anything because they do alot of it, but I think the part that hurts the most and what most people listen to and what we have to listen to also is to the individual. Small shipments going long distances . . . what assurance does he have that this

is going to be done at all and that he is going to be treated fairly. Without the network, without the system with regulation I don't think that this person would be able to say 'I can ship from Juneau, Alaska to San Francisco' with any amount of security that that shipment is going to get there. And if it doesn't, where do I go to find out about it? It does not restrict free enterprise, I think it is ensuring the public with the system that they can move in and with a certain amount of satisfaction, without it we're in trouble. SB 60 is going in this direction and I am in favor of it.

(Senator Stimson)

How do you feel about the way the trans/commission is presently regulating the industry?

(Van Alstein)

I think the commission is in a position to control the industry which it should, and the 's always room for improvement in anybodys position as far as I have ever seen but I think that they are. . . have given us the guidelines and some kind of a framwork that we can expect to work in and the limits of their authority are pretty spelled out and how they want to use it is up to them. Frankly, as far as Douglas Trucking is concerned, we feel that the commissin has been fair we've certainly enjoyed all the decisions they've made but that's the case then I 'd have to say they weren't far. The commission has been fair. . .....

(Senator Stimson)

You made the reference a number of times to the need for a stronger commission . . . do you consider this a strong commission?

(Van Alstein)

I feel the commission for what has begun and where it's going I think it is definately positive. I hope it continues and can be made stronger through things such as this bill and so on . . . to where they can be even stronger. We would very definately be in favor of that. That's going to be the arbitrator. Basically, from where we stand is that it will give the commission some bigger teeth to enforce. If your'e going to reprimand a company or fine a business for operating illegally no matter what industry their in, the fine has got to be of enough magnitude to make any business in any line of work they're in, to think twice about entering any illegal action. This will help.

(Brad)

Do you think its possible for a man with very moderate means that has a desire to go into the trucking business possible for him to get into the trucking business, get a certificate, get approved by the commission?

(Van Alstein)

I'm glad you asked that question, I really do, because the company I work for is a classic example of that. One of the owners,

was to inherit his fathers business when his father died and because of several things did not. He was working as an employee for Orme Transport (father's business) and he just at one point finally quit and obtained a certificate because there was a piece of authority on the market not being fully utilized, he was being worked but nothing to his capacity for sure and with a couple of other people that he is with association with now bought this piece of authority and is now we feel one of the major carriers in Juneau. You can buy a piece of authority, you can apply for a piece of authority and its for the commission to view and rule on.

(Brad)

Suppose you only had the means to purchase only a couple of trucks to go into a small trucking business, is the system so constructed that its possible for that individual to get into the system and compete against some of the big guys?

(Van Alstein)

Yes, I think so. With hard work , it can be done and I believe quite successfully. I think the entry in and out of the market is quite open. One must realize that a poor operator will not and should not survive.

(Brad)

Have you ever gone before the commission to testify for or against someone else who is trying to get licensed or certificated to operate

a trucking company?

(VanAlstein)

Yes, we had a case here in Juneau to sit in on hearings on the transfer of authority.

(Brad)

I know you are not into the towing and wrecking business, and I have a good general understanding of that business plus the trucking business, but do you think that there's as much necessity for regulating the towing and wrecking business as it is the trucking business?

(VanAlstein)

Well, I don't think that I am very qualified to answer that because my exposure to the towing and wrecking business is quite limited. I've frankly, never even had to use one and I've not ever talked to any people in that part of the industry. I'm really not in a position to say.

(Brad)

One reason I asked the question, is because most states regulate trucking, but all states don't regulate towing and wrecking.

Burt Wagnon (Dep. Commissioner, CED)

The ATC occupies the position of very limited line of authority with the Dept. of Commerce & Economic Development. I do have a few things I would like to mention to you and answer any questions you may have, but I'll keep them very brief. We have reviewed the audit and we are generally in agreement with most of these findings. One exception would be item 14 pertaining to positioning of attny. general's staff within the ATC. The attny. general has a 4-page letter in there that is quite self-explanatory and if you'll permit, we'll just let that letter stand as it is. There are alot of questions and problems raised by the audit that need to be addressed. As I said, we are generally in agreement, but I'd wish to temper that with the fact that the state is in a financial position now where funds are a very limited resource so to speak. And, I would hope, that as we go through the hearing process we keep in mind the money problems we have we evaluate very carefully how much do we spend to correct certain problems and cost benefits related to them? Deregulation and regulation review are very strong topics. We're generally in favor of deregulation, but also have a concern for the consequences that might come about. I wish to take a few minutes to expand upon that, if I may. There are certain factors that have come about recently that we feel may complicate the picture somewhat. The recent airline deregulation has raised some questions concerning air service to small communities. We are concerned that if the ATC were sunsetted, what consequences this may have on air transportation to the bush communites. The CAB is going commence holding hearings in the state of Alaska shortly and will come up with a position I understand not long thereafter. There are alot of questions that we feel are unanswered about what would be the consequences

SENATE COMMERCE COMMITTEE
February 22, 1979
3:00 p.m., Capitol Bldg. Room 209

Sen. Bradley: Performance review hearings on the Alaska Transportation Commission and the first one to testify is Mr. Benedicktsson.

Benedicktsson: Mr. Chairman, for the record I am Ben Benedicktsson, managing director of the Alaska Trucking Association. I would like to take this opportunity even though I have already testified to testify on behalf of one of my board of directors members, Mr. Robert C. Moskal, Sea-Land Freight and Service, Inc. I have provided copy of the written testimony, if I may read into the record and then as much as I can respond to your questions. (See written testimony) If there are any questions, sir, I would like to

Senator Kelly: You're concerned with the deregulation of the ATC, is that still mainly in the highway transportation area?

Benedicktsson: That's true. I can't speak for the air carriers. I don't represent them. I have no background in air carrier equipment. I speak for the motor carriers.

Sturgulewski: Can you respond, Ben, regarding the tow truck operators and some of the bulk haulers?

Benedicktsson: I certainly can. First of all, we are opposed to any deregulation, for a couple of reasons.

Sturgulewski: Now would you state for whom?

For tow trucks?

Sturgulewski: Well, would you say you oppose deregulation?

Benedicktsson: The Alaska Trucking Association, on behalf of our board of directors, in order to keep the record clear. Let me pose you a problem if I may. Suppose, as part of the wreckers and towers, suppose you were travelling through Fairbanks in the middle of the night in February, snowing or whatever you want to have it, you go off the road and you don't happen to know the corner, guy who owns the corner Chevron station, you are going to have to go to someone to pull you out of the ditch. I used this example before... With the present system the regulated wrecker and tower operator is flat required to come out and haul you out of the ditch. He may not be able to do it for a couple of hours, what with problems or whatever, but he has someone on duty 24 hours a day. Second case in point, suppose one of my...uhhh tractor trailer combinations belongs to one of you, turns over and blocks the road. You're going to have to have specialized equipment that the corner Chevron is not going to have to move that. You simply cannot go to the small wrecker. I think in testimony earlier a wrecking tower of the capabilities we're talking about runs in the terms of $100,000 to $110,000 to buy. Somebody has to go out here to support that operation and the guy on the corner is not going to do it. As far as the bulk commodity people are concerned, here it's as much a matter of principle as anything else. We just don't feel that if you deregulate anybody, open the

door, who'll come in it. It would tend to hurt the whole industry to have anyone deregulated.

Sturgulewski: If I could explore that just a little bit, there is a hue and cry across the country for the extraordinary amount of regulations and what we tended to do is create economic boxes when we regulate it, and there seems to be a great deal of hue and cry if we talk about on a specific basis of deregulating. Would you care to share a little philosophy with us?

Benedicktsson: I kind of feel that people who talk about deregulation are putting themselves in the boxes you mentioned earlier. . . Those who don't read history are going to have relive it. The r ason we have regulation is because the shippers and the carriers together demanded regulation. Uhhh as an example, the .....Bullwinkle Act of 1947 was guarenteed ....nationally with immunity from heavy trucks, provisions for collective rate-making was passed resoundingly over .....Truman's veto.....no question about it, because the shipper, the national industrial transportation....NIT.... NIT League recently has come solidly and resoundingly behind regulations.....going to have it. These are in essence the people who ship, the people who receive, the .....they could be ....happens if you disturb, seriously disturb, the stability of the transportation system that is required to keep our market economy going, and if we don't do this work, we don't retain the stability every-body's in trouble, not <u>just</u> the trucking industry.

Senator Kelly: You said when talked about they were ....deregulation, are you talking ....big national carriers....Alaska .....big carriers. The problem seems to be....that Brad talks about all the time and I've heard this at home, too. The problem seems to be with the little guy who can't get a foot in the door.

Benedicktsson: Whose the little guy....rhetorical.... Nationally there are 15,000 carriers who handle the ....or common authority. Uhhh, the top 50 using a market analysis, represent only 10% of that total value of uhhh money to be spent on transportation and .... So, really we are talking about existing. Nationally uhhmm something like 94% of .....authority.... The objective, one of the objectives, of both the ITC and ATC is to insure that the number of trucks out there equals the amount of trade. You have to have that. So when someone comes in and says I'm a little guy, I want a trucking outfit, I requested authority, and has not been granted it, probably because for good and solid reasons there was not enough traffic to warrant one more trucking ....That's the way the system is, designed,.....

Sen. Bradley: As has been explained, they have to have a quorom in the other committee, too, and we've got one excused today uhh, Senator Stimson, so it makes it little hard he's on both committees. So we can continue now since we've had a quorom. One, two questions, Ben, and that is ..uhhh. How do you justify uhhh eight towing and wrecking certificates in

Fairbanks with approximately 60,000 population and only five in the greater Anchorage area with approximately 250,000.

Benedicktsson: Economies of scale, I think is what the answer is because in Anchorage with the five enterprises you have, they are are larger, their capacity meets the necessities for towing and wrecking..uhhh the organizations in Fairbanks, I know, are considerably smaller, so it's not a matter of how many firms, but what the capacity is and the capacity meets ....

Sen. Bradley: Is Anchorage Towing and Wrecking that has 14 vehicles of every size to take of, has the capability of taking care of all types of wrecks, accidents, towing,..... and 12 drivers is that the largest in Anchorage, most capable?

Benedicktsson: Uhhh, I don't know if the most capable or not, but I think they are the largest.

Sen. Bradley: Does Fairbanks have one with similar capabilities?

Benedicktsson: Gee, I don't believe so.

Sen. Bradley: The one we had testifying.

Benedicktsson: He's from Glennallen. Jeff Moore.

Sen. Bradley: Uhhh, I was talking about Mr. Gillespie.

Benedicktsson: Ohh, I'm sorry, Mr. Gillespie, I would have to hold off and give you some answers after I go back and check on it, but as far as I know they seem to be smaller.

Sen. Bradley: Assuming that we are over-regulated, suppose we dere-regulated all modes of transportation for a year.... see if it would work better. What good or damage do you think we would have?

Benedicktsson: Let me draw an analogy with New York City...What would happen if you closed every corner drug store in the city of New York tomorrow? My answer was probably in .....immediate medical care of one type or another. You'd probably notice the difference.

Sen. Bradley: Uhhh, we are not closing the trucking, we're just deregulating it.

Benedicktsson: ......If the trucking industry were deregulated in this state, then I think you would find that the .... out from the Anchorage, Fairbanks, Kodiak,....whatever areas, would really start to suffer. It's very simple.

Sen. Bradley: But, we wouldn't be closing, it's not a good comparison. We wouldn't be closing the railroads down, we just de-regulating them.

Benedictsson: But with all due respect, we, the American Trucking

Association, conducted a survey a couple of years ago and we asked our members, what would you do in terms of your ....operating authority if they were deregulated and the answer of 82% was to stop serving the smaller communities.

Sen. Bradley: Well, what about, what is it? Twenty-six of the major airlines were deregulated and they haven't stopped.

Benedicktsson: According to our figures, however, 67 communities in the United States a few months ago were without air transportation they had before.

Sen. Bradley: Won't that enable the smaller operation like we have around here and in Anchorage to get some of that business.

Benedicktsson: Only if they are able to react on a fast enough basis. And it's not our feeling that they are. But you can't all of a sudden insert a trucking company and pull it out .....whatever without disturbing the flow of commerce.

Sen. Bradley: You mean a big trucking company will just stop operating and go bankrupt possibly if we deregulate?

Benedicktsson: No sir. They would stop serving the small community. There is a certain social costing involved in transportation. Anchorage tends to support Glennallen to a

small extent, Eagle River, and the likes. Uhh, if the analogy I use at the University when I .....it's the little old lady in Osh-Kosh had to pay for her hundred baby chicks ....she probably couldn't afford it. Instead that costing is spread across the larger communities and this is very simply the way the system is developed. and it's made ...

Sen. Bradley: Senator Ferguson has now joined us. Well, don't you think that maybe uhhh these big companies, these big trucking outfits that didn't or wouldn't serve the couldn't economically serve the small communities, don't you thi k that would enable a lot of these areas to have to spring up little trucking firms to take care of their communities, ...in the line of free enterprise?

Benedicktsson: Yes sir. Given time, if they have the time. But I don't feel that. We are talking about 20% and probably more than that.... But 20% of gross national product goes to transportation. Of that figure probably about uhhh 12 to 15% goes to trucking. My figures may be a little high on the 12%, let's be conservative and say 7%. That's a lot of bucks and that's a lot of ....for the suburban areas, for the Glennallen, for the Osh-Kosh, or whatever, unless you have that very basic underpenny of the economic fabric that we have developed, then you may be will tend to get back to the middle ages. I making a really strange statement.

We'll all gather around the moat. How are you going have the.... How are you going to have shopping centers? If I go into a shopping center and I pick out refrigerator that I would like to have and there happens to be the only one on the floor that is green and purple with orange polka dots or whatever. I recognize that's what I really have to have. Well, let me check. Let's see where, we have one back in the warehouse. He calls back and you know they always have one in the warehouse, but you know what they can't deliver it until next Tuesday. Well, it's not coming from the warehouse, it's coming from the central distribution point, by virtue of having a stable transportation system, that the shipper can depend on, he knows what it's going to cost next Tuesday. ... He knows that it's going to be delivered. If it isn't and we find out about it, the Alaska Transportion Commission finds out about it, we can pull the guy's permit.

Sen. Bradley: But don't you think uhh you know if you had a complete free enterprise, unregulated system, regulate only for say insurance and safety ....and so on....Sears is going to take the guy that gives them the quickest service and the best price and when he doesn't respond properly they are going to get somebody else who wants that business. So whether you regulate it or not they're still going to know what the price is going to be, because if you switch that price suddenly, they're going to have a little hassle and they're either get back and standardize that price or you're going to get somebody else that wants his business.

Benedicktsson: Well, a couple of alternate things could happen. One, especially in Anchorage and in Alaska, you'll have the people coming in from the outside. The trucker from Texas with his one truck operating out of a motel room somewhere. Comes in for the summer and then leaves. Leaving your stable companies that are here year-round to in essence handle the ... of the trade and the wintertime trade. The second possibility and one that we have seen happen nationally though not to my knowledge in Alaska is that a large company can go to the small ....firms and say, "We'll give you 100% of our business, if we can charge it." That will be probably....probably be something that is ....if not perhaps...compensatory costs. In which case the guy is faced with a cash flow problem. Either he gives into the big shipper or he's put in a position where he has to comprise on the very things you talked about, safety and maintenance or whatever. In order to keep a cash flow going to the point you can make a living. Uhhh this is one of the protections .....

Sen. Bradley: Senator Ferguson do you have any questions? Thank you very much, Mr. Benedicktsson.

Benedicktsson: Thank you, Mr. Chairman, on behalf of both Sea-Land and Alaska Trucking Association.

Sen. Bradley: Okay, Mr. Miller. Timothy Miller.

Tim Miller: My name is Tim Miller. I am represenging myself as an owner operator, and I am in strong favor of deregulating the trucking industry. ....feel free to ask any questions as I go along. I've operated trucks both in Alaska and outside and parts of Canada. I've delivered freight from the Artic Ocean to the Gulf of Mexico. Uhhm, I have no operating authority, except as a private carrier and I have run trucks both as for private carriers and for common carriers. I've operated trucks common carriers who have ATC rights and I feel because of these rights I was lost $80,000 that was never paid to me because of the regulations. I have hauled for both private carriers but you have. See the reason I lost $80,000 was that I was put in the same position of hauling for a private carrier which I said was illegal for me to do that and I know a number of people that do it. ... that when I delivered a freight for a private carrier and he doesn't pay the money, I can take his freight put a lien on it. ... Now as a common carrier since he does not own that freight he just stalls and you've got no recall,that's due to the regulations. I feel that in a free society market forces and not governments dictates should regulate transportation to a community. I also feel that in a free society the government should not discriminate between one class of people and another class. Meaning that they're

discriminating with the truckers with authority and giving them preferential treatment to the truckers without authority. I also feel that if the industry was deregulated better service at a lower cost would be provided to the consumer. I have a case in point the construction on the Trans-Alaskan Pipeline. The common carriers they had beat up equipment at the time at the start of the construction, they could not deliver the freight. They had to lease owner-operators. Uhhh, the freight, if would had been deregulated at that time the freight would have been delivered cheaper, and faster. I would have been delivered cheaper because the owner-operators who were delivering it the freight had run on percentage of the tariff. The majority in run on percentage of tariffs, some ran on mileage but it was also they run on someone else's authority, the trucking permit, the trucking companies were taking their cut and still making money off of it. So we were making money, too. We're making money at running at a lower tariff. We could deliver the freight faster, if it had been deregulated, we'd have delivered the freight faster because the inefficiencies of you had to pick up like I ran out of Fairbanks. Fairbanks to Prudhoe Bay. They had to pick up the freight at the pipeline yard, that was where the oil companies, Alyeska's yard, pipe terminal, they deliver to the terminal, individual trucking company's terminal and there it was redispatched going north. Sometimes it set in the trucking terminal for two weeks waiting to be dispatched. Now if it had

been deregulated we could have just through contract carrier or other ....gone directly to the oil company, picked up the freight at the pipeline and we would have delivered it north, and I say it. I was at the time running at 70% of the tariff. At 30% less costs we would delivered the freight. Okay. Also the large companies here because of the regulations I feel were very, very inefficient. They had, that one outfit that I ran for there during the time of the pipeline, we had 40 drivers and 45 nondrivers, either rate and tariff men, people who are out hustling freight, uhh mechanics, uhh, you know, big overhead and in a trucking business a driver is a production and he's the guy that makes the bucks. It's not just these people that are sitting on the desk. You know if you have that kind of overhead, you are bound to go broke. I feel that if long-haul trucking was deregulated and safer. If every truck driver knows that's ever driven a truck, knows that each truck handles differently. A cabover handles differently than a conventional model truck. ...two identical trucks...sitting up there, they can have both identical component parts and you get in each one, they are going to drive differently, they're going to handle differently. It's a dangerous and what happens to large trucking outfits is that they practice hot....they take a hotseating is a term used for when a driver is assigned a different truck for every trip. It's a very dangerous situation.

They do not know. You know you are running an Alaskan road. You run into mud and slick roads...one time I was running in mud that was up to my knees. You know chained up and everything else. You are coming down off mountains and it's very slick. But as an owner-operator with a small, we call them jippos, the owner-operator if they can run a truck, you run the same truck and know that truck and they take care of that truck. They know everything about that truck. I got two trucks and I know everything about both them trucks. I can take them over any roads, any condition, and I'm sure I wouldn't wreck it and I proved that over the pipeline. I made trip, after trip, and ran it for two years, on the Haul Road and all those accidents were taking going on, I was off the road one time and I ran in the ditch forced off by a company driver. I took the ditch. I was out in fifteen minutes, but anybody that's seen the trucking operation on the pipeline, I think you've heard about it, accidents upon accidents. One time I drove from Fairbanks to Prudhoe Bay and I counted on trip which I made in about three days to deliver that load on that trip I counted 18 wrecks on that road. Uhh I don't want to give any names, but I would if it was asked. I wish also that a study by the State of Alaska was on during the pipeline construction would take a study on who caused the accidents, but whether it was the company drivers, company ran equipment, or whether it was independently owned trucks that caused the accidents. I through my own observation, I would

come to the conclusion that the company ran equipment, company truck and company drivers were the cause of the majority of the accidents. This also jacked up all our insurance rates. I think that safety is the only part of this industry that should be regulated. I think that the safety of the vehicle and the competency of the driver should be the only thing and uhhh the only thing and that could be handled by the Department of Public Safety and not have a separate committee to do it.

Sen. Bradley: What about insurance?

Tim Miller: Insurance, I think that if it was deregulated, hopefully it will be deregulated, that each operator should have to get a performance bond, like any contractor. Get a performance bond and carry insurance. ...posted per-performance bond. I think that would eliminate people from flocking in from the outside. To become bonded you have to be stable and you have to have a stable business. I think that's the only thing that would be required that you have to be bonded and you know, like I say let the free market control services. Don't ... it seems so ridiculous that we have uhhh, all this ... you ....on regulation so that places like Glennallen or Copper Center, or Nenana can get two boxes of freight delivered uhh twice a year or something. It's to me, it's absurd. I also feel that those communities would be served. Cause it's probably ...economically viable

for a small outfit to go in and service them. But, the way it's set up right now, my personal opinion is that due to this regulation the state is giving indirect subsidies to the large operators, people with money. And I've heard testimony in here before saying that it's easy to get rights. I'm saying that we shouldn't have to get rights. I'm saying that we should have the right to operate, you know, you should not have to file any paperwork. After when you spend like myself, I probably got ohhh, replacement value on my equipment would be close to $200,000. Why should I have to spend that kind of money and then have to go through this bureaucracy to get rights to operate it. Now, I just don't feel that just .....Hell, I can't push a pencil, I have to drive a truck. You know, that's the way things are. I would like to say in conclusion that if the money was spent the same they spend it on regulating us, was put into highway construction that we would all have much better transportation system. You know, I hope you have questions, because I would like to really get into it.

Sen.Bradley: Do you have any questions Senator Ferguson? Hey, you've answered a lot. Such good testimony, I don't have any either.

Tim Miller: Can I add some more? Thank you. Is that saying that the freight will not be delivered is I just can't believe it. I know too many independent operators who would

like myself. I've got two trucks, if there is freight going have to be delivered. Even right today, now it's illegal for me to haul for a private carrier, the only time I can haul is for my own self. Even today, you know, someone wants, I'll take the chance. Someone wants to pay me money to go to Fairbanks or go to from Juneau go to Fairbanks and pick up freight, I'll go pick up his freight and I'll work out my rates and tariffs. I'll work out over the phone. I won't have to have a rate and tariff man to sit down and do it. You know, and I'll figure out what it's going to cost me and I'll put a markup on it, like any other business. I think that's the way the system should be. It's just that I can't believe in a free enterprise society that they if you are competent to do the job they won't let you. I'm quite upset about it and hopefully that things will change in ....

Sen. Bradley: You think it will be better if we deregulate rather than regulate.

Tim Miller: I think that the consumer, the taxpayer, everybody will benefit, including us, the people that actually do the work. That's the guys that drive the trucks. Everybody will benefit. The consumers will get a much better service, they'll get at a much cheaper rate and they'll get I mean faster services. That's like getting back to the pipeline, I could deliver that freight but it probably took a week on an average to deliver a load

of freight, I could ....deliver in two and a half days that's from Fairbanks to Prudhoe Bay, the Fairbanks pipeline camp. You know, you just can't believe the amount because of the regulation the mass amount of paper work, the system is set up so, there are so many paper shufflers in it that, and I consider them nonproductive. It's part of ....but it's still as a mass of bureacracy there, just protecting it. I think the most important man for a trucking company today is the rate and tariff man, you know, what's .....he can interpret the tariff if he's sitting down. I mean he doesn't probably the next most important man will be an attorney to make sure that they can keep all the competitions out, ...keep it out. You know, if it was deregulated I would be advertising in the morning. Advertising in the morning, I'd be setting up a network. I think also that if it was the ....of market. The market is not there. I'm saying that if it was deregulated we would get out and develop our own market, that individuals truckers would go out and develop their own market. There's markets that probably have never going to be touched or haven't been touched. People you know it's like certain people don't know if they need this service. That's where advert'sing comes in. You've got to explain to them that they actually do need this service. That they would basically that your freight can be delivered as fast by truck as it can by airplane or almost. .....you can do it cheaper you know you just gotta ...but I think that

the market is there and could be developed if it was deregulated. So I'm saying that we would have better services.

Sen. Bradley: Any questions by any other members? Okay, ...to hear the other side. From an individual who has experienced a lot of the trials and tribulations advantages and disadvantages.

Tim Miller: I'm saying that the world would not come to an end if the trucking industry was deregulated.

Sen. Bradley: Some of the members have knocked around what about deregulating for a year or so. No decisions have been made, you know. Would that be a better way of doing it rather than I could assume I suppose from your testimony that you would be willing to deregulate ....to see if things improved or got worse. I may be wrong.

Tim Miller: Sure, I mean at least.

Sen. Bradley: I'm not making decisions. I'm not cause anybody to assume anything but ...we just knocked it around.

Tim Miller: Loose systems that are set up in the outside are almost like deregulation...okay, like you are saying that they have ....truck terminals in Alaska. You know that you got truck terminals, Sea-Land has

truck terminals, Weaver Brothers alway got an outfit ...have truck terminals in that they are...there point. Another in the outside, you can have a they have such a thing as you can trip ....in the State of Alaska you can't ...trip permit. In the State of Alaska you can only lease a truck for a minimum of thirty days. And it doesn't take thirty days to make a trip in the State of Alaska, you know, and in the outside you have to pay a trip permit and they have brokers. If you want to pick up a load and let's say if you are in Oklahoma City and you are heading for Seattle or something like that you have a broker...who hustle freight, they do nothing but hustle. They are out there and they are calling different places and they got phone banks there and they have permits, permits can ....for ...rights in one or two states you don't ....all fifty if you want to go that way. What they will do is they'll charge you roughly $30 a load for hustling their freight. What they've got is they have their own terminal set up. You know it's the brokers that are doing this. You know phone banks and they're moving a lot of freight to.....owner-operators running outside. That's the way they are doing it. Some are running leased to common carriers and others are hauling illegal freight or you know going through ....you have what they call a bingo card on the outside. They call bingo card and what it is you have a different company ...authority to go to different states, hauling in different in

states and if you have the a card has all fifty states on it and you have a stamp on it. If a police officer asks you for the card and you're ...out of state you better have a stamp on that. Well, I did pick up a load once in Oklahoma and I delivered it in Idaho and he give me a bingo card and I have two stamps. One in Oklahoma and one in New Mexico, but the freight was delivered with no problem, but that the brokers you know are hedging on the law a bit.

Sen. Bradley: I don't have any further questions, do you Senator Ferguson? Thank you very much. We appreciate it very immensely. Okay, Mr. Doyle. Wait. Mr. Hurlbert. I'm sorry Ralph. We're trying to get out here in 100 days and it will probably be 110 or 120, let's let these legislators get back to the job.

Rep. Hurlbert: Mr. Chairman, I am Representative Hurlbert, and uhh I represent district 18 out in western Alaska and I'm also an air taxi pilot. Primarily for Western Alaska. I've got about 8,000 hours out there. Uhhh I want to support deregulation for the air taxi. Now I am not getting into the trucking industry, that's their own argument. I do know that there's substantial inequities in the air taxi ....as it stands and I ....being regulated by ATC would be allotment of air taxi certificates under the tariffs that are alloted by the ATC and I just like to go into it briefly.

Now I've been involved personally myself with trying to get an air taxi certificate out in the Bethel area several years ago. Uhhh It was a very big shoot out in that if you when you boil it down to a situation when you've got other people deciding whether you ought to get a certificate or not the cards are more or less stacked. It boils down to a situation of the haves or the have nots. There's established air craft. They can stack the cards in their favor by the mere fact that they are in business. It's all predicated on a need for the server, the financial ability of a newcomer into the business and so forth and so on. Well, I have seen in the particular instance there was need for new air taxis, uhhh at the same time there was a heck of a need. This particular instance before the hearing was come up air taxis in the area would stack a whole bunch of leased airplanes and show a big surplus of pilots. All this it was stacked more or less to where they could show that it was being crowded. Consequently, they had an argument in their case and it was put out. Of course, after the claim was denied it went back to the same old ballgame on an economic basis. They finally dropped the airplanes and delivered them back. I have seen the instances where (some of them are in the house here now) ....lived in the Bethel area, flew out there for twenty years, 20,000 hours or more, denied good .....accident free ....was denied certificates on that very basis alone. When we get into the area of tariffs you are ....it builds a monopolistic atmosphere whenever you are

certain individuals to perform a service.and they've got complete control over them. Not complete control because they are regulated, but I mean they have the entity within itself, nobody can compete with them from an outside source Right? So they apply for tariffs for to go from point A to point B and back. They have hourly rates, hours tariff on the aircraft, I've been involved in this as a pilot and seen how exactly they fly from point A to point B on a point to point tariff and at the same time some ....at an hourly rate to go to point A to point B to pick up another person to go to point C or point B, all this time gathering revenue under their supposedly hourly and then point to point on these other rates and it accumulates way and above what they are supposed to be gathering to start with. Simply through ....on this where it's noncompetitive really. It is competitive in the fact that there's other air taxis, but not really on a scale that we know competion. The safety, we are already regulated in the area of FAA. ....when it comes into safety ATC does not go into the area of safety as we know it. Now there has been an instance where they ....knocked out an air taxi strip...under the auspices of safety where there was accidents over ....You probably know what I am talking about, but primarily most of your all of your safety factors come under the FAA inspection so really as far as the regulatory powers it's all on an economic rather than safety when you come into the ATC. Safety is already regulated by the FAA. Okay,

....so consequently if you're regulated by two source ...economic and one on safety, the enterprising aspect should be regulated by itself on its on merit.... the safety end is already there ...the regulations for you... I have one other item, I didn't write it down. Anyway that's my argument, I would like also reiterate that there's people that in back here that are coming forward that ....namely Haroldson and they've been through this whole ball of wax out in western Alaska and they know what they are talking about. I like to ...very clear to you.

Sen. Bradley: Thank you very much Rep. Hurlbert. Let's take about a two minute break. We'll continue right on. Anybody needs the washroom its the first room on your left past the elevator. Mr. Doyle.

Ralph Doyle: I'm Ralph Doyle. I own and operate ....I have statewide (See written testimony.)

Sen. Bradley: Next one is Mr. Rebische. Sli Rebische.

Sli Rebische: I'm for deregulation for the simple reason that I think that we can get better service, faster service, cheaper service. But the way it is now I order something that a big outfit has to bring out me. (I'm in the block business. They wait until they get damned good and ready to get it to me. I've got three men

tied up waiting for a load of blocks. For instance, if I can't get them until Thursday, this is Monday I'm losing a whole weeks time. If it was deregulated I could go to any dude I wanted to and get them to bring out the day I wanted them. And to me it's hurting me doing it. And these guys are afraid these fly-by-nighters from the outside. I welcome them in the block business. Because if I'm there ten years in the block business and some dude comes alongside and out-bids me it just proves that I've been taking the public. I've been fleecing them. So I don't I'm fleecing the guy, they could bring ten block layers in my area, I say all the more power to them. I'll work for them, against them, anyway I want to. But I not afraid to lose my business. I'm not taking people now. And I don't see how these fly-by-nighters can even get a foot hold, unless the company has got tied up today or is giving them the shaft to start with. So I'm strictly for deregulation and give it a chance, if it don't work you can always come back to it. So anybody that is worry about outside help as far as I'm concerned or somebody taking their business, they are screwing the public today or they wouldn't be worrying about it. Thank you.

Sen. Bradley: May the best man win.

ALASKA TRUCKING ASSOCIATION, INC.

3443 Minnesota Drive • Anchorage, Alaska 99503 • Phone (907) 276-1149

STATEMENT ON REGULATION OF THE
INTRASTATE TRUCKING INDUSTRY
IN ALASKA

I AM BEN BENEDIKTSSON, MANAGING DIRECTOR OF THE ALASKA TRUCKING ASSOCIATION. MY ASSOCIATION IS COMPRISED OF SOME 450 MEMBER COMPANIES. THE TRUCKING INDUSTRY IN THIS STATE WHICH WE REPRESENT, EMPLOYEES SOME 17,000 EMPLOYEES AND ACCOUNTS FOR BETWEEN 15 AND 20 PERCENT OF THE STATE'S GROSS NATIONAL PRODUCT.

WE HAVE AN ASSOCIATION MOTTO THAT SAYS, "IF YOU GOT IT, IT CAME BY TRUCK." WITH THE STATE'S VERY LIMITED TRANSPORTATION NET WORK, I DON'T THINK THAT THERE IS ANY QUESTION THAT OUR MOTTO IS TRUE.

THE SYSTEM OF REGULATION WHICH HAS LED TO PRESENT INTER AND INTRA STATE ECONOMIC CONTROL OF THE TRUCKING INDUSTRY, IS BY NO MEANS A NEW CONCEPT. FOR EXAMPLE, THE IDEA OF THE COMMON CARRIER COMES DOWN TO US THROUGH BRITISH COMMON LAW FROM THE TIME OF CHAUCER. THE REQUIREMENT TO SERVE ALL WITHOUT DISTINCTION WHICH WAS IMPOSED ON THE MILLER AND THE INNKEEPER IN CHAUCER'S DAY VARIES LITTLE FROM THAT REQUIRED OF A COMMON CARRIER IN TODAY'S SOCIETY.

ON A NATIONAL LEVEL, THE ECONOMIC REGULATION OF THE TRUCKING INDUSTRY DERIVES FROM THE INTERSTATE COMMERCE ACT OF 1887, AMENDED MANY TIMES SINCE THEN. ONE OF THE MAJOR AMENDMENTS

WAS THE MOTOR CARRIER ACT OF 1935, WHICH PUT THE MOTOR CARRIER INDUSTRY UNDER THE INTERSTATE COMMERCE COMMISSION FOR ECONOMIC AND OPERATIONAL CONTROL. AS IT CURRENTLY STANDS, EVERY STATE IN THE UNION, AND THE FEDERAL GOVERNMENT, HAS A REGULATORY AGENCY WHICH PROVIDES ECONOMIC REGULATION FOR THE TRUCKING INDUSTRY. IN OUR OWN STATE, OF COURSE, THE ALASKA TRANSPORTATION COMMISSION FULFILLS THAT FUNCTION.

REGULATION INVOLVES A THREE WAY PARTNERSHIP AMONG THE STATE, THE TRUCKING INDUSTRY AND THE GENERAL PUBLIC. EACH HAS A SUBSTANTIAL PART TO PLAY IN THE REGULATORY PROCESS. THE COMMON CARRIER AGREES TO SERVE ALL WITHOUT DISTINCTION WITHIN THE GEOGRAPHICAL AREA WHICH HE SERVES AND WITHIN THE LIMITS OF ANY SPECIALIZED SERVICE WHICH HE MIGHT OR MIGHT NOT HAVE TO PROVIDE. THE STATE, THROUGH THE MEDIUM OF THE REGULATORY AGENCY, WILL THEN LIMIT THE NUMBER OF TRUCKS ON THE ROAD TO MATCH THE AMOUNT OF TRAFFIC AVAILABLE. THE REGULATORY AGENCY ALSO ASSUMES ANTI-TRUST PROTECTION FOR THE GENERAL PUBLIC IN REGARD TO THE COLLECTIVE AND INDIVIDUAL RATES WHICH ARE MADE BY THE TRUCKING INDUSTRY. THE GENERAL PUBLIC, AS THE THIRD PARTNER, HAS THE BENEFITS OF A STABLE, SOUND TRANSPORTATION SYSTEM. IN THE AREA OF RATE MAKING, THE GENERAL PUBLIC ALSO HAS THE BENEFIT OF A READILY AVAILABLE RATE STRUCTURE KNOWN IN ADVANCE. THE ALTERNATIVE IN THIS REGARD WOULD BE TO FORCE THE SHIPPING PUBLIC TO EXAMINE THE RATES AVAILABLE OF LITERALLY HUNDREDS OF COMPANIES.

INTERESTING ENOUGH, IT WAS THE LACK OF A STABLE TRUCKING OPERATION AND A STABLE RATE STRUCTURE WHICH FORCED THE PASSAGE OF THE MOTOR CARRIER ACT, AND LATER, THE REED/ BULWINKLE ACT OF 1947, PERMITTING COLLECTIVE RATE MAKING. IT WAS THE SHIPPERS WHO DEMANDED CONTROL.

THERE IS ONE OTHER BENEFIT TO THE GENERAL PUBLIC FROM THE REGULATORY PROCESS THAT IS NOT TOO OFTEN DISCUSSED. TRANSPORTATION PLANNING MUST DERIVE ITS NEEDS FOR EXPANSION AND MAINTENANCE ON A TRAFFIC DATA BASE. IN THIS STATE, THAT DATA BASE IS DEVELOPED BY THE ALASKA TRANSPORTATION COMMISSION. WITHOUT IT, THERE IS NO OTHER PRESENTLY EXISTING METHOD FOR THE STATE DEPARTMENT OF TRANSPORTATION TO OBTAIN THE DATA ON WHICH THEY BUILD THEIR LONG RANGE PLANNING.

THE LEGISLATIVE BUDGET AND AUDIT COMMITTEE, OPERATING UNDER THE PROVISIONS OF ALASKA STATUTES 24 and 44, (THE SUNSET LEGISLATION), CONDUCTED REVIEW OF THE ALASKA TRANSPORTATION COMMISSION. THE STATES INTENT OF THE REVIEW WAS TO DETERMINE IF THE COMMISSION IS OPERATING IN AN EFFECTIVE AND EFFICIENT MANNER. THAT STUDY HAS BEEN COMPLETED AND THE REPORT ISSUED TO THE LEGISLATURE. THE ALASKA TRUCKING ASSOCIATION CONCURS WITH [redacted] SUPPORTS THE BASIC CONCLUSIONS PUBLISHED IN THE PERFORMANCE REVIEW BY THE BUDGET AND AUDIT COMMITTEE. WE STRONGLY AGREE THAT THE ALASKA TRANSPORTATION COMMISSION SHOULD CONTINUE TO REGULATE THE TRANSPORTATION INDUSTRY. WE ALSO AGREE THAT THE ECONOMIC CONSEQUENCES OF

REGULATION OR DEREGULATION NEED TO BE DETERMINED IN ORDER TO FULLY EVALUATE THE PUBLIC NEED FOR THIS AGENCY. IN THE INTERIM, HOWEVER, THERE ARE CERTAIN RECOMMENDATIONS MADE BY THE BUDGET AND AUDIT COMMITTEE WHICH SHOULD BE ADOPTED. THE ENFORCEMENT RESPONSIBILITIES OF THE ALASKA TRANSPORTATION COMMISSION HAVE NOT BEEN PURSUED AS STRONGLY AS THEY SHOULD BE. IN THIS REGARD, THE ATC IS HAMPERED BY A VERY CUMBERSOME ENFORCEMENT PROCESS AND A LACK OF ABILITY TO ASSESS FINES WHICH ARE MEANINGFUL. ~~[illegible]~~

IT IS OUR CONTENTION THAT IF THE TRUCKING INDUSTRY, WERE IT TO BE DEREGULATED, AS HAS BEEN ADVOCATED BY SOME, WOULD RESULT IN THE GENERAL POPULACE FINDING ITSELF FACING THE SAME CHAOTIC CONDITIONS WHICH BROUGHT ABOUT REGULATION IN THE FIRST PLACE. SMALLER COMMUNITIES SIMPLY WOULD NOT BE SERVED. THERE WOULD BE NO WAY THAT THE SHIPPING PUBLIC COULD EITHER DEPEND ON SERVICE OR ON RATES, BUT INSTEAD, WOULD BE FORCED TO NEGOTIATE ONE ON ONE WITH A VERY LARGE NUMBER OF CARRIERS. OUTSIDERS COULD COME INTO THE STATE FREELY DURING OUR HIGH TRAFFIC MONTHS, TAKING OFF THE CREAM OF THE BUSINESS, AND THEN DISAPPEARING, LEAVING THE PUBLIC WITH A VERY DIMINISHED TRUCKING CAPACITY. THIS, OBVIOUSLY, ALSO WOULD NOT BE AT ALL

GOOD FOR THE TRUCKING INDUSTRY OR ITS EMPLOYEES.

THE AIRLINE INDUSTRY IS BEING POINTED OUT BY PROPONENTS OF DEREGULATION AS A SUCCESSFUL EXPERIMENT IN EXTENSIVE DEREGULATION. WE ARE NOT PREPARED TO ARGUE THE MERITS OF AIRLINE DEREGULATION EXCEPT TO COMMENT THAT THE DEREGULATION PROCESS AND ITS IMPACTS HAVE NOT YET BEEN FULLY EVALUATED. FURTHER, THERE IS NO WAY TO COMPARE PASSENGER TRAVEL AND COMMODITY MOVEMENT. THEY SIMPLY DO NOT REFLECT OR REACT TO THE SAME PROCESSES. REDUCING FARES MAY SIGNIFICANTLY INCREASE AIR TRAVEL. SIGNIFICANT REDUCTIONS IN TRANSPORTATION COSTS FOR COMMODITIES ON THE OTHER HAND, WILL NOT INCREASE THE AMOUNT OF COMMODITIES USED. WE CONSIDER IT VERY DOUBTFUL THAT DEREGULATION WOULD LEAD TO REDUCED TRANSPORTATION COSTS FOR COMMODITIES. THIS CERTAINLY HAS NOT BEEN THE CASE WITH AIR FREIGHT DEREGULATION.

THE REGULATORY SYSTEM IS NOT PERFECT. THERE ARE AREAS WHERE IMPROVEMENT COULD BE ACCOMPLISHED. WE FEEL THAT DOING AWAY WITH THE ENTIRE PROCESS, HOWEVER, WOULD BENEFIT NO ONE.

P. W. BENEDIKTSSON,
MANAGING DIRECTOR

Value of insurance $30,000

THINGS TO CONSIDER ON NON-REGULATED TOWING:

1. Non-regulated tow trucks have no insurance requirements - e.g. adequate limits of BI & PD; Cargo insurance - most have insurance that covers a service car, but not a tow truck.

2. Non-regulated towers are not obligated to take tow calls - e.g. inclement weather; small hours of the morning; old abandoned cars blocking or impeding traffic; bad road conditions, etc.

3. Very few non-regulated tow trucks are properly equipped - e.g. flares; scotch blocks; lighting; tie straps; tools to unlock steering gears and transmissions, or knowledge of how to use these tools.

4. Very few (if any), receive information on procedures for towing new model cars, and bulletins from manufacturers on those vehicles that cannot be towed without causing major damage: (Corvettes, Saab, Mercedes, Mercury Capri, pickup campers, motor homes, Fiat, late model VW, and many others).

5. I do not know of any non-regulated tower that has equipment to handle vehicles that cannot be towed by a regular tow truck.

6. Very few non-regulated towers have a driver that is fully trained on all types of towing and recovery. Safety

7. Most non-regulated towers have just one small truck - no large wrecker and no slide-back.

8. Very few non-regulated towers have a secured storage facility for damaged or disabled vehicles. w/ dogs

9. Non-regulated towers charge what they feel like, depending on conditions. We are much busier when cold, snowing and windy.

Alaska Towing & Wrecking

Senator Bradley, Chairman
Senate Commerce Committee
Alaska State Legislature

Gentlemen:

I have been in the trucking business in Alaska since 1955, which was several years prior to any regulation by the Alaska Transportation Commission.

When the A.T.C. came into being I was forced to comply with its regulations or go out of business. As I had grandfather rights it was no problem to get a contract carriers permit. I was upset about the formation of the ATC however as it seemed to be a government tool to restrain free competition. Over the years I have paid out thousands of dollars to help support the A.T.C. Dollars which ultimately come from the consumers in the form of higher prices.

I have carefully read the 40 some page report, "Performance Review of the A.T.C." dated October 24, 1978, which was compiled by the Commissioner of the Dept. of Commerce & Economic Development. It clearly reveals that the A.T.C. has operated since its conception in utter confusion, with regulations already being enforced by other agencies. The A.T.C. is of doubtful benefit to the firms it regulates and does the public a great disservice by creating monopolistic kingdoms where the public becomes the looser.

The free enterprise system is what made our country the most productive on earth. I think it is about time we dare to trust it again. It will not only eliminate meaningless, expensive, chaotic and duplicated control, but it will benefit the general public, which is what it is all about.

If you have any doubt about the past efficiency of the A.T.C. just study the Performance Report mentioned previously.

As a permit-holder, I concur with it's findings.

The A.T.C. has been around for too many years to the benefit of a few with a vested interest. It should NOT be allowed to survive another year to try to get its act together. The A.T.C. has been a case of the blind leading the blind since its creation.

Let's give the Alaskan people credit for being intelligent enough to know what is in their best interest. They don't need the A.T.C. to "protect" them.

Sincerely,

Til Wallace

Comment by State of Alaska Att General on - - - 1978

SB 166 essentially allows the Alaska Transportation Commission (ATC) to regulate price fixing and other varieties of agreements between common carriers. Such agreements are generally prohibited by § 1 of the Sherman Act, 15 USCA § 1, and AS 45.52.010, but certain exemptions from the ambit of the antitrust laws have been accorded to regulated industries. The purpose of SB 166, as stated by its proponents, is to bring the Alaska Motor Freight Carrier Act into conformity with certain provisions of its federal counterpart - particularly, § 5a, 49 USCA 5b, of the Interstate Commerce Act - by allowing parallel antitrust exemptions. The principal beneficiaries of SB 166 would be the rate bureaus, which collectively organize and publish joint and individual rates for its members, in that they would be immunized from the force of the antitrust laws. Rate bureaus are currently operating in Alaska and elsewhere, but recent federal action demonstrates conclusively that they are subject to antitrust attack. (See United States v. Southern Motor Carriers Rate Conference, et al., 61,555 CCH 72, 174).

The problem confronted here is essentially one of attempting to balance two aspects of the public interest; on the one hand, there is the necessity of stable, consistent, and rational public transportation, and unrestricted price-cutting and destructive competition are inimical to this goal; on the other hand, is the public desire for the lowest rates possible and this mitigates in favor of competition. The remedy sought by this bill should thus be directed towards defining the antitrust exemption as narrowly as possible so as not to eliminate healthy competition as well as destructive competition.

Congressional action in this area has taken the form of the Reed-Bullwinkle Act of 1948, and that act attempts to reconcile the demands of the national transportation system with the policies of the antitrust laws. The

166. It provides for, among other things, collusive rate-making when such action is in the furtherance of the national transportation policy and it thus provides the basis for rate bureaus, since without antitrust immunity bureaus cannot operate.

The Interstate Commerce Commission (ICC) has authority to approve the establishment of rate bureaus and grant them antitrust immunity under the terms of Reed-Bullwinkle. The ICC also has authority to review previously approved agreements to determine whether the agreements have continued to be in the national interest and, should the ICC find that they have not, the Commission is empowered to terminate or modify their prior approval. The ATC would enjoy similar powers under § 1(i) of SB 166. In furtherance of this power to review previously approved agreements, the ICC instituted an investigation in 1973 to determine whether the scope of the antitrust immunity granted to rate bureaus should be more narrowly defined. In 1976, following extensive field investigations and hearings, the Commission issued Order Ex Parte 297, which directed that the agreements of rate bureaus would no longer be accorded antitrust immunity; (1) if such bureaus protest the independent action proposals of any of their member carriers; (2) if such carrier members are affiliated with shippers, unless the agreements of the bureau prohibit such carriers from serving on the bureau's board of directors, general rate committees, or any other committees which have an effect directly or indirectly upon the rate-making function of the bureau, without prior Commission approval; and, finally, (3) if the bureaus involved are operating as profit-making entities. These rule changes were challenged by the bureaus, but were upheld in Motor Carriers Traffic Association, Inc. v. United States, decided July 21, 1977 by the United States Court of Appeals, Fourth Circuit.

It is these changes, based on nearly thirty years of ICC experience in regulating rate bureaus and upheld by

the federal courts, that I suggest be added to SB 166 in order to more nearly balance the two possibly conflicting aspects of the public interest in stabalizing the transportation industry and preserving competition.

The proposed amendments are as follows:

(e)(1) No conference, bureau, committee, or other organization established under (e) of this section may file a protest or appear as a party before the commission in opposition to any independant action taken by a member carrier.

(e)(2) No conference, bureau, committee, or any other organization established under (e) of this section shall in any way discourage member carriers from publishing individual tariffs or proposing independent action.

The right of indivisual members to file tariffs independently is guaranteed by SB 166, AS 42.10.350(e), however, to permit rate bureaus to protest the proposals of a member so chills the individual proposal that it stands little chance of adoption, while providing the opportunity for misuse of the bureaus as policing agencies against individual action. It is the position of the ICC that unless independant action is protected there can be no antitrust immunity.

(e)(3) A conference, bureau, committee, or other organization established under (e) of this section may not allow any carrier which is in any way affiliated with a shipper to serve on the board of directors, general rate committee or any other committee which has an effect, either directly or indirectly, upon the rate-making function of

one user of the transportation system pays less, another user must pay more. This proposal simply keeps carriers which have a compromised interest in rates, by dint of their control by a shipper, from taking a leadership role in rate-making. It is, in other words, designed to remedy a possible conflict of interest.

> (e)(4) A conference, bureau, committee, or other organization established under (e) of this section may not be a profit-making organization.
>
> (e)(5) No conference, bureau, committee, or any other organization established under (e) of this section shall invest in any commercial business, whether related or unrelated to their primary function of processing and causing to be published rates and related matters for member carrier, nor may any such organization acquire other rate bureaus without prior commission approval.

Rate bureaus are financed by assessing fees from their member carriers and these costs are passed along to the public in the form of increased rates. Obviously, profit-making is incompatible with service organizations which operate under an antitrust immunity.

In addition, the language in section (c) should be modified so that it parallels that which is used by the ICC:

> (c) Agreements between or among carriers of different classes may only be concerned with matters relating to joint rates or through routes and may only be approved if the policy declared in sec. 10 of this chapter is advanced and approval is consistent with the

public interest. For purposes of this section, carriers by motor vehicle are carriers of one class; carriers by water are carriers of one class; carriers by railroad are carriers of one class; carriers by air are carriers of one class; and freight forwarders are carriers of one class.

Finally, in order that the ATC might monitor the operation of the rate bureaus, I would suggest the addition of a section which parallels 49 USCA § 5b(3) which provides:

> Each conference, bureau, committee, or other organization established or continued pursuant to any agreement approved by the commission under the provisions of this section shall maintain such accounts, records, files, and memoranda and shall submit to the commission such reports, as may be prescribed by the commission.

I would add to this provision the requirement that rate bureaus be required to keep formal minutes of all rate committee proceedings and make such minutes available for inspection by the commission. This addenda is consistent with Ex Parte 297.

Re: APUC/Sunset Review

Dear Mr. Malone:

My name is Sky Carver. I am the manager of two Class II ($100,000 to $250,000) refuse utilities owned by Burton Carver & Co., Inc.; a family held corporation which is involved mainly with transportation.

Our entrance to the refuse business typifies the problems faced by small utilities who deal with the APUC. Both refuse utilities we purchased were owned by individuals who never had received an increase in rates and were on the brink of bankruptcy.

One of these companies, Homer Refuse, located in Homer and who's permit extends to Soldotna, had tried twice unsuccessfully to get an increase. The other, Alpine Refuse, located in Hope and who's permit covers the northern Kenai Peninsula and north of Turnagain Arm to Anchorage, to my knowledge had never applied for an increase. These companies had gone four and five years respectively without increases. Compare this to Anchorage Refuse which files a rate case every six months.

The reason these companies had never received rate increases was the lack of cash needed to hire a utility specialist. After purchasing Homer Refuse in 1977, we made two attempts in four months to get an increase. Our CPA firm prepared the case, but the first case was rejected because of insufficient data. For the second case we asked the staff of APUC for forms that would help us present the necessary information. We were given incorrect and outdated forms.

In the spring of 1978, Alpine Refuse temporarily went out of business. It's one truck broke down and the overflowing garbage dumpsters this caused brought about the Quality of Service Investigation that Commissioner Guess spoke of at the December 17 hearing.

Attention: Mr. Allen Blume

Dear Mr. Blume: December 21, 1979

In accordance with the expressed wishes of the Co-Chairpersons at the Performance Review of the Alaska Public Utilities Commission Hearing held on December 17, 1979, there is attached a copy of the outline which I utilized in presenting my testimony to the Commerce Committee. I would be most grateful if you would see that all members of both the Senate and the House Committees were provided with a copy of this material.

In addition to the points set out in the outline of my presentation, there were certain additional points made during subsequent questioning which I believe might provide clarification on certain portions of my testimony. They are:

1. In response to an inquiry of Senator Sturgulewski, I indicated it was my belief that the distinction made between economic regulation and regulation for the purpose of certification might be an improper distinction. It was suggested that perhaps the regulation associated with certification should be ongoing in the area of quality of service provided by the certificated utility. This would result in economic regulation looking only at the level of rates and rate design. It would appear that such clarification could be provided through concise definitions in any legislation which might result from the performance review.

2. In response to Representative Brown's questions concerning the use of hearing officers, it was suggested that hearing officers could be reasonably expected to utilize their expertise in the regulation of divergent utilities. The basic underlying principles of utility regulation should be readily applicable by a hearing officer for regulation not only of telecommunications but also electric, pipeline, transportation utilities, etc. I was in agreement with the Chairman of the committee that in certain highly technical areas a specific hearing officer might be required to preside because of his expertise in the area of telecommunication separations, peak load pricing for electric utilities, etc. Additionally, it is possible that staff support for one area of regulation could provide needed assistance in another area of regulation.

I wish to express my gratitude to the Chairpersons and each of the members of the committee for allowing me the opportunity to testify before them and for their sincere expression of interest and concern in this area.

Very truly yours,

ALASCOM, INC.

John E. McGill, Director
Regulatory Affairs

JEM:bl
Attachment: Testimony Outline

12-19-79

TESTIMONY OF ALASCOM, INC. REGARDING THE PERFORMANCE REVIEW OF THE PUBLIC UTILITIES COMMISSION. DECEMBER 17, 1979

I. Alascom is a regulated utility providing long lines communications within the state and between Alaska and other points in the world.

   A. Regulation of utilities is designed to protect the public interest; an elusive and sometimes difficult goal which by its very nature must consider conflicting claims.

   B. Alascom has willingly submitted to regulation and recognizes the need for such submission.

   C. Alascom supports continued regulation by the APUC in those activities subject to its jurisdiction.

II. Alascom shares the concerns of the APUC regarding the merger of the three regulatory bodies with one Commission.

   A. Unclear that work load can be accommodated with one Commission.

   B. Other states, having one Commission, are functioning in a mature circumstance while Alaska continues to be in its adolescence from a utility development point of view.

   C. We do not oppose the consolidation of three Commissions into one, provided that it results in more efficient and effective regulation.

III. Alascom does not oppose the recommendations of the report to de-regulate CATV; refuse collection; telephone and electric cooperatives or small utilities with less than $100 K gross

revenes. There are, however, a few considerations we would offer:

A. Some regulation should be retained concerning pole attachment agreements between CATV operators and other utilities.

B. As a partner with telephone cooperatives and small telephone companies in the provision of communications, it is important for Alascom to be able to approach the Commission with matters disputed between Alascom and the operating telephone company. Such matters could include:

1. Level and quality of service.
2. Settlements between the companies.
3. Charges for through private line services.

The removal of such companies from economic regulation appears to indicate that they would be relieved of regulation as to rates, rate design and quality of service.

C. Although the de-regulated telecommunications company may be small or controlled by its own members, it can have a substantial impact on state-wide service if the quality and level of service is substandard.

IV. Alascom supports the need to clarify the statute and administrative code presently used by the APUC.

A. Although we recognize the validity of the particular recommendation in the legislative audit, we believe there are other areas requiring review.

B. We recommend that the Commission, through its staff, conduct a thorough review of AS 42.05 and 3AAC48 to further the benefits of this recommendation. We would

hope that members of the regulated industries would have an opportunity to participate in this review and recommend up front various amendments. An Industry Task Force with the APUC staff would be effective.

V. Alascom supports the recommendation that professional salaries be reviewed to determine whether they are adequate to attract and retain professional staff.

A. We would urge a comparable review of Commissioner's salary levels.

1. Alascom as a responsible public utility, constantly reviews its salary grades for various professional and/or exempt employees in order to assure itself that it offers compensation competitive in the labor market. These reviews lead us to believe that the Commissioner's salaries, in the present labor market may not be competitive enough both to attract and retain qualified personnel.

VI. Alascom does not believe it is proper for it to comment on the internal administration of the APUC. However, we do believe it is necessary to clearly delineate the statutory role of the Commission staff. On page 24 of the Audit Report there is mention of ex parte communications between the staff and the Commission when the staff assumes the role of a party to Commission proceedings.

A. When the staff is indeed a party to a proceeding (e.g. a rate case) the Commission does not have available to it

the necessary support and assistance the Commission would normally expect from its staff.

b. Solution

Alascom would support limiting the role of the staff to one of support for the Commission without designation as a party to proceedings. The staff would prepare material for the Commission to be used in conducting proceedings. The Commission would be expected, through this collective expertise to represent the public interest. Alascom would favor this solution.

VII. Alascom offers no opinion as to implementation of a time management system or collocation codes.

VIII. General Observations

A. The Performance Review does not comment on the level of staffing at the APUC. It is Alascom's opinion that the Commission is understaffed and unable to deal with the many questions brought before it in a timely manner. Nor does the Commission staff possess expertise in all areas adequate to evalute major policy questions in all of their facets. Too often telecommunications policy is formulated by default rather than by design. The public interest is not best served by this circumstance.

B. Alascom believes that it is necessary to limit regulatory lag statutorily. Such a limitation would be beneficial not only to the utility but also the ratepayer. Additionally, Alascom would suggest that consideration be given to utilization of hearing officers under the guidance of the Administrative Procedures Act.

MASTER FILE COPY

February 4, 1980 HOUSE COMMERCE COMMITTEE

Aaron

Representative Fred Brown
Assembly Building Room 206-207
Pouch V
Juneau, Alaska 99801

Dear Representative Brown:

The rate hike requested by GVEA disgusts me--10 times Seattle rates, 5 times Anchorage rates, and 40% above permanent rates. I personally have seen my bill go from $25.00 (summer rate) to $73.00 (highest winter rate). My husband and I have conserved and have knocked the GVEA bill back down to $54.00 and will continue to do whatever we can. This reduction in our bill is no thanks to GVEA; the reduction is something we have done.

I requested the APUC to not allow any rate hike through a note taken to them when they were in Fairbanks giving more detail than I am giving you. So, APUC decides that GVEA needs a higher rate hike. I believe that GVEA and APUC should be replaced by organizations that will truly bring us the cheapest rates possible as is GVEA's slogan and purpose.

If GVEA's rate hike is due to government intervention and regulation, I suggest that GVEA prove the regulations to be unnecessary and get government off GVEA's back. This matter between GVEA and EPA should be settled before GVEA is granted any rate hike.

Why are businesses and government so quick to just pass any monetary increases on to the public? It seems to me that either GVEA has a problem or the government has a problem. Why pass this on to me?

I have not even had a cost of living allowance increase since 1978!

Thanks for your time and patience.

Sincerely,

Karen Flesher

RURALITE ARTICLE
May 1977 Issue

Dear Members:

The lack of a needed right-of-way easement could hold up your service for months--it's happened more than once already and things are not getting better.

When MEA was just starting back in 1942, the cooperative's biggest worry was getting the poles up with wire and transformers hung on them. But, now, the right-of-way acquisition job threatens to be the largest and most costly problem, taking longer than either engineering or construction. One five-mile line project MEA recently did required three years of work to get the easements. We recall numerous service extensions run last summer that were delayed anywhere from a few days to many months--some never got built at all because of right-of-way problems!

Why is this? There's many reasons, maybe the owner lives in Mexico, Florida, or Saudi Arabia, or possibly right in Anchorage at an unknown address. Maybe he won't answer his mail or stalls if we call on the long distance telephone or just plain turns us down when at long last we locate the land owner. Maybe we can find an alternate route and start the process all over again. Maybe we can't! While we go through all the easement work, an impatient and often desperate customer fumes over the delay while he waits, but we dare not go ahead without the easement. If we do, we're certain to be sued as a result of the most minor encroachment.

More and more owners of land whom we contact are tightening the restrictions they place on us as conditions for granting the easement. Access is being limited, the amount and method of clearing are conditional, and right-of-way widths are being reduced so that construction and maintenance gets more difficult and costly. Rights-of-way are often so narrow and tree cutting is so restricted that line security is in jeopardy every time it storms!

More people get in the act everyday. We now find that we must deal with private landowners, many non-residents. There are all kinds of organizations, including corporations or developers, State and National parks, National monuments, State and National forests, public lands held by the Borough, State and Federal government, mental health lands, school lands, Indian lands, withdrawn lands, and Native land selections. The list goes on and on, including environmental groups.

We have to deal with cities, boroughs and divisions of the State, such as Department of Highways, Department of Fish and Game, sometimes the State clearing house, Division of Aviation, Division of Lands, Division of Parks and the Department of Environmental Protection. Federal agencies include the Bureau of Land Management, National Park Service, National Forest Service, Corps of Engineers,

Alaska Railroad, Federal Aviation Agency, and more!

Right now we are applying to the State Division of Lands for a right-of-way permit for a transmission line that's desperately needed to furnish the electric needs of residents in a major portion of MEA's system. Three months have rolled by with no real sign of progress. The outlook, if it's granted at all, is continued delay that will see construction delayed for at least a year--a delay almost certain to see MEA members exposed to sub-standard service conditions and MEA construction crews working on a costly crash program to prevent serious consequences.

This immensely complicated right-of-way problem has become frightfully costly! The burden of this skyrocketing cost is right on the pocketbook of every one of us every time we pay a light bill--that's where the money comes from in the end! No relief will come until private individuals and all public officials recognize this fact and adopt a realistic approach to the need for adequate rights-of-way free of the cost burden now placed on your Rural Electric Coop.

- - - - -

NOTICE--MEA is currently advertising for an electrical engineer to fill the Manager of Engineering Services position. Applicants must have a B.S. degree in Electrical

Engineering, a minimum of five years of electrical utility design, construction supervision, and operation experience. Must have demonstrated ability to plan, organize, and manage at the departmental level. Interested and qualified persons should contact or send resume to me at the above address.

Senator BRAD BRADLEY
Representative TIM KELLEY
Representative SAM COTTON
Representative RANDY PHILLIPS
Representative BOB BRADLEY

Hi,

Enclosed is a copy of Matanuska Electric Association's Managers letter for May publication in the Ruralite magazine. I am sending this to you to call attention to a very real obstacle hindering Electric Utilities in Alaska at present. Hopefully, a little Legislator involvement with the State Agencys may do much to alleviate the excessive time delays spoken of on page three of the letter.

Also another subject: Member owned utility Associations (Cooperatives) are under a certain amount of fiscal control by the Rural Electrification Administration in Washington, D.C. User/Members also have the opportunity every year or two to elect new Directors should they believe new leadership favoring another policy or direction is advisable. Thus, members have a stronger voice in controling their Co-ops than have users of Municipal owned utilities.
During the next ten or so years the cost of electricty is predicted by experts to increase more than six times over present costs due both to inflation and to the Federally required changes in generation fuel from gas and oil to coal. This will require numerous rate increases which, if under P.U.C. requirements, will cost Matanuska Electric Association alone well in excess of $100,00.00 just in preparing rate studies for presentation to the P.U.C. This, in my opinion, is totally a waste of the consumer's money especially since utility Co-ops are of a non-profit nature anyway.

I would propose that the Legislature remove Co-ops from rate regulation by the Alaska Public Utility Commission. They should, however, retain the power to determine and control territorial boundaries of all Utility Co.

Sincerely

Robert C Johnson

FOR PRESENTATION AT TELECOM CONFERENCE:

TO: State Senate Committee

FROM: Vincent O'Reilly
Mayor

RE: Combining Alaska Public Utilities Commission, Alaska Transportation Commission, etc.

The City of Kenai has benefitted from the regulatory methods as regards refuse collection inside the City.

First: no complaints as to service, rates or collection procedures have been brought to Council or City attention.

Second: The Council had the responsibility of selecting refuse collectors and was not performing at optimum in this regard due to inexperience of technical matters, lack of knowledge on comparability and inability to choose between two or more local proposers.

Third: The refuse problem is of an area-wide nature and should be dealt with by an area-wide agency experienced and competent in this field.

I would recommend continuation of the present regulatory arrangement.

This matter has not been brought to full Council consideration but are my views of the sense of Council.

Gentlemen:

Reference is made to your teleconferencing public hearing scheduled for December 17, 1979. By letter dated November 26, 1979, Gordon J. Zerbetz, Chairman of the Alaska Public Utilities Commission, indicated written testimony in lieu of oral testimony at the hearing could be sent to you at the above address.

Please find enclosed written testimony I would appreciate being entered of record for the above hearing.

If you should have any questions on this written testimony, please feel free to bring your request to my attention.

Sincerely yours,

ANCHORAGE REFUSE, INC.

John P. Culhane

John P. Culhane, President

JPC/csn

WRITTEN TESTIMONY OF JOHN P. CULHANE, PRESIDENT
ANCHORAGE REFUSE, INC. FOR THE DECEMBER 17, 1979
HOUSE COMMERCE COMMITTEE HEARINGS
REGARDING THE REFORMATION OF THE
ALASKA PUBLIC UTILITIES COMMISSION

Anchorage Refuse, Inc. is a utility regulated by the Alaska Public Utilities Commission serving most of the area outside of the old city limits of Anchorage within the Municipality of Anchorage. Anchorage Refuse, Inc. has been in operation for several years and was regulated by the Alaska Transportation Commission prior to the 1973 legislative amendments that placed refuse regulation under the Alaska Public Utilities Commission.

It appears that it is not in the public interest to deregulate the service area or rates of refuse companies or to change the service area regulation or rate regulation from the APUC to the municipalities. If you deregulate the service area, the public will find:

(1) Increased frequency of refuse trucks on residential streets. There will be the same amount of refuse containers on the streets to pick up, however, there will now be more trucks from different refuse companies to provide the service. This could provide a safety hazard, noise pollution and considerable inconvenience

to the residents of the area where the refuse is being collected.

(2) The times during any given week of collecting the refuse from a certain area will not be consistent by each of the companies operating in the area. This will cause refuse containers to be placed on the sides of the streets in a given area more than the once or twice a week required when one refuse company is serving the area. This would be unsightly and could provide unhealthy conditions.

(3) The type of equipment that would collect the refuse could not be the modern refuse truck. The refuse business would be relatively easy to enter by any person wishing to purchase unsafe, unsanitary and inefficient equipment. You could find dump-type equipment used in the collection of refuse. Safe, sanitary and efficient compactor truck equipment are relatively expensive.

(4) In the refuse business it would be just as easy to abandon your customers as

it would be to acquire customers. Such abandonment of the service by a refuse company could provide considerable inconvenience to the abandoned customers until another refuse company was able to start service to the effected customers.

It does not appear to be in the public interest to have economic deregulation while at the same time maintaining area regulation. Basically, this would give a monopoly the right to charge what the market will bear. The considerable inconvenience to persons hauling their own refuse would probably dictate a high rate in the market if the rate was not regulated.

Regulation of refuse companies should be maintained at the Alaska Public Utilities Commission. Placing such regulation with municipalities will require most municipalities to create a new structure to handle such regulation. This new structure will increase the demand upon the municipal budgets. It appears more economical to have one centralized structure handling many utilities to be responsible for regulating refuse companies rather than having many smaller regulating structures spread through the municipalities of the State of Alaska. A slight increase in the Alaska Public

Utilities Commission's budget to handle refuse company matters may be more economical to the residents of the State than having each municipality hiring experts to regulate only one or two refuse utilities in the municipality. The public might also save by having the Alaska Public Utilities Commission regulate refuse because of the experience of the Alaska Public Utilities Commission in regulating utilities. This experience insures that the refuse company will make no less and no more than a reasonable rate of return. A municipal government inexperienced in the complicated rate regulation concepts would be more likely to err in establishing rates. A rate too low would severely injure the services of the refuse company which would not be in the public interest and a rate too high would result in the public paying more than is necessary for this type of service.

Finally, it should be noted that we have had very few customer complaints concerning the regulation of refuse companies or the services of our company. It does not appear necessary to change the process that the public appears to be satisfied with because of a desire by some to have the Alaska Public Utilities Commission budget be dedicated to regulation in other areas. Rather than

disturb something that is workable, it is suggested that if necessary, the budget of the Alaska Public Utilities Commission be increased to add new staff members so that all utilities can be properly and expeditiously regulated, including refuse utilities.

SUBJECT: SB 259
Municipality Utilities Regulation

Attached, for your information, is a copy of a memorandum to the Anchorage Municipal Assembly from Richard E. Hanger, President of Automated Communications, Inc.

The attached memorandum outlines the facts in favor and against both methods of regulating the Utilities.

ACI

Automated Communications, Inc.

Legal Monopoly not a question of regulation but who regulates

March 17, 1977

TO: ANCHORAGE MUNICIPAL ASSEMBLY
FROM: RICHARD E. HANGER, PRESIDENT
AUTOMATED COMMUNICATIONS, INC.

SUBJ: UTILITY REGULATION

As I indicated at your meeting of March 8, 1977, our expertise is only in the area of ATU.

The purpose of this letter is to objectively give each of you what we consider facts in favor and against both methods of regulating the Utilities.

Assembly Regulation of the Utilities

Pro

1. More citizens attend and participate in Assembly meetings than attend PUC hearings. ACI has been the only participants and formal parties at the ATU hearings throughout the past 15 months, at the PUC.

2. Assemblymen are elected officials and are directly accountable to the people.

3. The Assembly may have fewer legal restrictions affecting their judgement and decisions.

Con

1. Tariffs are complex and difficult to understand. In order for the Assembly to effectively "judge", it will necessitate many hours of "homework".

2. Being elected could make it difficult to make good business decisions if decisions would be unpopular politically.

3. The Assembly would have to add additional staff with expertise in tariffs, legal, and accounting. No citizen's committee could spend the time necessary to handle this job.

4. The Municipality would be subject to far more legal suits, -- class action, individual, and special interest groups.

5. Must contend with the morality of the "Board of Directors" regulating their own company, which is a legal monopoly.

6. ATU is tied to a state-wide network, as well as to the "south 48". This automatically involves regulations of the FCC and PUC for inter and intra state activities. The Assembly would have to inter-relate with those agencies.

PUC Regulation of the Facility

Pro

1. Appointed officials are normally less likely to be influenced politically or by special interest groups.

2. Specializes in utility tariffs.

3. Required by law to:

   a. Protect the financial viability of the Utility.
   b. Assure them a fair rate of return.
   c. And determine that tariffs are fair, just, non-discriminatory, non-preferential, and compensatory.

4. Already have a staff, on the Public payroll, who specialize in Utility matters.

5. Have access and experience with the other Utilities throughout Alaska, National Trade Associations (NARUC) etc., to compare requests and filings.

Con

1. Are required by law to adhere to "Due Process" which necessitates formal hearings and notice to the Public.

Miscellaneous "Grey Areas"

1. ATU spent over $400,000 on rate cases in the past 15 months. Some of that was attributable to deficient filings and questionable appeals, and some was attributable to the PUC being excessively lenient with ATU. If filings were better prepared and the regulating body were firmer, there would definitely be savings. Question -- Would the Assembly be more decisive than the PUC, thereby shortening the process?

2. With Assembly control -- They and the Mayor would have direct control over the cash, profits, charges, and where the money was used. Is this good or bad?

3. Would the taxpayers be paying for a second level of government staff, or would the PUC reduce their staff in proportion to that added to the Assembly?

4. The major motivations for the pending Resolution and changes to AS 77-59 Utilities seem to be:

   a. the excessive costs of recent rate cases.
   b. the over-ruling by the PUC of the Municipal Ordinance which would have returned 100% of the profits to the original City Service Area.
   c. the dismissal of a rate structure that would have increased cash flow and income in initial years, but left expenses and costs to be absorbed by future rate payers.
   d. the refund of 1.2 million that is pending per PUC and Court Order, and which is being contested by ATU.

   Are these valid motivations, and would they have arisen if ATU had been regulated by the Assembly rather than the PUC is a question which should be addressed.

5. Chairman Rose and Assemblyperson Sturgulewski have suggested amendments which would allow the Assembly to monitor and prejudge filings before they go to the PUC. This would seem to be a "safe" way to arrive at some of the answers to the above questions.

ACI, as the only formal participant from the private sector in the past 15 months of hearings, feels qualified and willing to answer any questions of either side.

ACI, being in the telephone business and regulated by the free enterprise system and competition, rather than a regulatory body, feels we should abstain from taking sides. On behalf of our 200 business subscribers, we would need to poll them prior to speaking for them.

Sincerely,

ANCHORAGE ASSEMBLY

April 4, 1977

Honorable Ed Willis
Vice Chairman, Community and Regional
Affairs
Pouch V
Juneau, Alaska 99811

Dear Ed:

The draft of the minutes of the Assembly meetings regarding Resolution No. AR 77-7 were available this morning. Since Senate Community and Regional Affairs has scheduled a hearing on SB 259 on Tuesday, April 5, I am sending this information via special carrier.

Many entities are involved in utility regulation. Charter provisions calling for profits of the utilities to accrue to the old City Service Area for a period of five years dictate complex considerations. It seems to me that before de-regulation is seriously considered, we must develop locally a specific method for handling utility rates and service areas.

Please understand this letter states my individual concern.

Very truly yours

Arliss Sturgulewski

November 20, 1979

Senator W.E. Bradley
P.O. Drawer 8-Q
Anchorage, Ak. 99508

Dear Senator Bradley:

Alaska is facing many energy related issues on which decisions need to be made soon. Last month, the managers of the electric utilities in the state were invited to sit down informally and discuss from their individual perspectives the issues which affect their utilities. A two day conference ensued, and the enclosed "Statement Toward a State Energy Policy" is a product of that meeting.

We know that the collective decisions made by Alaskans on these issues in the relative near future will profoundly affect the state for a long time to come. We submit this brief document to you in the hope that our views will be considered as you deal with these issues.

Sincerely,

Dave

David Hutchens
Executive Director

DH:ra

Chris,

Notify Dave Hutchens to testify on APUC - I feel APUC + the Municipal Licensing + Control Bd will be our "triggers".

DEMOCRACY IN ACTION

We need to get these going

STATEMENT TOWARD A STATE ENERGY POLICY

On October 24th and 25th, 1979, an ad hoc group of ten electric utility managers, hosted by the Alaska Rural Electric Cooperative Association, met in Anchorage. We discussed the energy situation in Alaska and the probable impact of various state policy decisions which could be made. The following statement does not attempt to be encyclopedic, but it represents the majority view of the participants. We urge that this statement be considered in the formulation of a state energy policy.

I. Energy problems exist in every region of Alaska.

Rural villages face current costs so staggering that economic development is effectively precluded, the availability of energy to maintain bare existence is in question in some areas, and the people are suffering real hardship. The regional trade centers enjoy modest economies of scale, but energy costs there are rising so rapidly that their future, projected from present trends, approximates the conditions which exist in the villages today. The energy problems of both villages and regional trade centers come from their dependence on oil which is rapidly rising in cost.

Interior Alaska finds it uneconomic to further develop its use of coal because of the Clean Air Act Amendments of 1978. This federal legislation is not satisfied with achieving objective standards in protecting air quality, but insists that "best availble control technology" be used regardless of the quality of coal that is used.

The production of Cook Inlet natural gas for liquifaction and export will certainly raise the price and possibly threaten the supply of natural gas for southcentral Alaska. The long-term energy supply for this region is further threatened by the Powerplant and Industrial Fuel Use Act of 1978. This federal law prohibits the use of oil or natural gas in new powerplants. Although exemptions from this Act are possible, there is no certainty that natural gas can be used in new powerplants in the future, even if it is available.

II. We must strive for the optimum use of energy.

It must be recognized that because of climate and geography, life in Alaska will always be contingent on a relatively high per capita energy use. There is a direct relationship between the productive use of energy and the productivity of an economy. In the rural villages, the productive use of energy

is so low that a great deal of desirable economic activity is prevented. In this kind of situation, we must encourage increases in the productive use of energy.

It must also be recognized that energy conservation can and should be encouraged. Every region within this state can improve its efficiency in using energy, and in some instances, the appropriate use of insulation and weatherization can reduce the energy consumption of an individual consumer enough to prevent personal hardship. The State, through the Division of Energy and Power Development, must be encouraged to continue to lead and coordinate efforts to insulate and weatherize existing buildings which have a remaining useful life of reasonable duration.

III. An efficient energy delivery system must be encouraged by actions of public agencies.

To encourage economies of scale, the State must confirm as its policy that all public agencies and institutions under its authority will purchase their electricity from the public utilities certificated to serve that area. The State could then cease the unnecessary expense of duplicating in its own facilities the generating capacity which already exists in the community. Federal agencies and institutions operating in Alaska should be requested to take similar action.

IV. The rise in oil prices has dramatically increased revenues to the State of Alaska.

As a major landowner, second only to the U.S. Government, the State of Alaska controls much of the energy wealth of this state. Revenues from energy production which the State receives either in its capacity as landowner or taxing sovereign now account for more than 81% of total revenues received by the State.

The State has pursued a policy of maximizing revenues from State owned resources. The world market for petroleum now has prices administered by the Organization of Petroleum Exporting Countries. With each new price increase by OPEC, state revenues increase. While these price increases cause a permanent and increasing drain on the people of Alaska, the state government is awash in new revenues. If 1979 taxing and spending policies remain unchanged, tremendous surplus revenues will accumulate in 1980, and for a number of years thereafter.

V. The State must assist in solving Alaska's energy problems.

The State may well decide to distribute "energy dividends" to its citizens, reduce taxes, or refine and sell oil to its citizens at less than market price. All of these proposals would help, and none of them would be in

conflict with the following policies which we urge the State to adopt and implement:

1. A portion of this state's oil and gas reserves adequate to meet the needs of Alaskans must be retained for consumption within the State. The State should not commit future production of royalty oil and gas to the export market without call back provisions adequate to meet in-state needs.

2. A major effort must be directed toward developing our hydroelectric and other renewable or long-term energy resources. Alaska has a great opportunity to use revenues from depletable resources to develop our renewable resources. Innovative financing and power marketing arrangements for these projects must be developed and used by the Alaska Power Authority. When it is necessary, the State should assist with the front end costs of these long-term solutions to our energy problems so they can be accepted without hardship by the first consumers served by them.

3. The State must promptly develop an energy plan which includes a list of the energy projects suitable for development. This inventory must show estimated costs, estimated output, deliverability of energy produced, estimated time for construction, and indicate the reasonable environmental issues which must be considered. All utilities and other power generators - private, state and federal - will need to participate in this study. This inventory of resources should be completed within one year.

4. The State must promptly consider and make a decision on all pending energy projects. When the lead agency has determined that a project should be developed, all other state agencies must be required to cooperate in promptly resolving any remaining concerns within their jurisdiction.

5. While these long-term solutions are being developed, the State should provide interim direct subsidies to electric utilities with above average fuel costs to offset the tremendous increases they have experienced in their fuel costs, provided that continuing best efforts are being made toward long-term solutions.

The following utility managers may individually differ with specific items in this statement but participated in its formulation:

Thomas Stahr, Anchorage Municipal Light and Power
Loyd Hodson, Alaska Village Electric Cooperative
LeRoy J. Schultz, Chugach Electric Association
James Palin, Copper Valley Electric Association
Douglas Bechtel, Cordova Electric Cooperative
Robert Hufman, Golden Valley Electric Association
W.C. Rhodes, Homer Electric Association
Malcolm Cheek, Matanuska Electric Association
David Bouker, Nushagak Electric Cooperative
Robert Martin, Tlingit/Haida Regional Electrical Authority

3-3-80

DEAR SIR,

I AM OPPOSED TO THE HISTORY OF CONTINUED RATE INCREASES GRANTED TO GOLDEN VALLEY ELECTRIC ASSOCIATION. I AM A MEMBER OF ~~THAT~~ ~~ASSOCIATION~~ AND FEEL THE INCREASES ~~ARE~~ NOT JUSTIFIED.

THERE MUST BE OTHER ALTERNATIVES OTHER THAN CONTINUOUS RATE INCREASES. FOR EXAMPLE, STAFF REDUCTIONS, LIQUIDATION OF ASSETS, CONSOLIDATION OF DEPARTMENTS, REDUCING FIXED OR VARIABLE EXPENSES.

I URGE YOU TO REQUIRE G.V.E.A. PROVE BEYOND A REASONABLE DOUBT THEY HAVE DONE EVERYTHING POSSIBLE BEFORE THEY ~~HRE~~ GRANTED A RATE INCREASE.

THANK YOU FOR LISTENING.

SINCERELY,

Mark R. Townsend

Dear Representative Bettisworth:

Enclosed is a compilation of 1979 unaudited gross revenue figures for all regulated utilities. As you can see, a number of utilities did not respond to our initial request. As a result, the Commission has initiated a second request to these utilities requesting this information. Hopefully, it will be forthcoming within the next month. In the meantime I wanted you and the Commerce Committee to have the results of our inquiries to date.

Sincerely,

Dec. 10, 1979
FOR IMMEDIATE RELEASE
Commerce Committee to begin "Sunset Review" of APUC

Rep. Fred Brown, Chairman of the House Commerce Committee announced today that joint hearings between the House and Senate Commerce Committees would be held on the "Sunset Review" of the Alaska Public Utilities Commission.

"We will be convening at the Anchorage Legislative Information Office at 11:00 A.m., December 17 to take public, industry and regulated utility testimony on the Legislative Audit of the Commission," Brown said.

Use of the Legislative Teleconference Network is planned for Fairbanks, Anchorage and Juneau. Other sites may be activiated as demand warrants.

"There are significant areas of public policy involved in this review, not the least of which is the possible transfer of some utility authority from the state to local government entities. Further the audit recommends the combination of the Commission with the Alaska Transportation Commission and the Pipeline Commission,

State Senator Arliss Sturgelewski, of Anchorage, Vice-Chair of the Senate Commerce Committee will preside along with Brown.

The committee is seeking preliminary testimony from groups affected by the APUC regulatory authority, as a first step to the formal hearings planned during the legislative session in Juneau.

Persons wishing to testify are urged to obtain copies of the audit report titled A Performance Review of the Alaska Public Utilities Commission, dated August 1, 1979. This report is available from the Division of Legislative Audit, Pouch W, Juneau, Alaska 99811, State Legislative Information Offices, and is on file with the Public Utilities Commission, and may be reviewed during regular business hours.

For further information, contact the House Commerce Committee, P. O. Box 1370, Fairbanks, Alaska 99707, Attention: Allen D. Blume, or telephone 456-8370. In Anchorage, contact Christian Basler, 1016 W. Sixth Ave., Suite 201, telephone 278-1581.

Re: Alaska Public Utilities Commission;
Sunset Bill Hearings

Dear Chairmen Brown and Bradley:

In connection with the Sunset Bill hearings regarding the Alaska PublicUtilities Commission, it is my understanding that a proposal has been made that municipal corporations split the jurisdiction over certain truckers, namely solid waste haulers and carriers, with the Alaska Public Utilities Commission.

As I understand it, the Alaska Public Utilities Commission would act in an appellate capacity on appeal from the municipal corporation's legislative body.

This is to advise you that the Kenai Peninsula Borough is strongly opposed to any such split jurisdiction because it not only creates another layer of government regulation, but more importantly it places the primary jurisdiction to regulate these carriers in the municipal corporation which has neither the expertise nor the administrative set up nor the budget to undertake this highly technical regulation. It would take considerable amount of investigation and the establishment of other

machinery in order to effectuate such primary jurisdiction at the municipal level. In view of the highly specialized nature of this matter of regulating private enterprise, the Alaska Public Utilities Commission must either be permitted to exercise efficient and qualified expertise, and resume its lawful jurisdiction, but this attempt to split the regulation between jurisdictions would only be duplicative, cost inefficient and a pragmatic approach which would further compound the problem and not assist it in anyway.

Yours very truly,

Donald E. Gilman

Donald E. Gilman
Borough Mayor

DEG/tb

3/11/80

SB 577

"AN ACT CONTINUING THE EXISTENCE OF THE ALASKA PUBLIC UTILITIES COMMISSION AND AMENDING THE STATUTES RELATING TO ITS RESPONSIBILITIES; AND PROVIDING FOR AN EFFECTIVE DATE"

1. THIS BILL IS THE RESULT OF THE "SUNSET" REVIEW LEGISLATION AS 44.66.010 AND 44.66.050.

2. THIS BILL PROVIDES FOUR NEW EXEMPTIONS FROM ECONOMIC REGULATION BY THE APUC:

(A) THE FIRST EXEMPTION IS AVAILABLE TO ALL UTILITIES AND PROVIDES FOR RATE DEREGUALTION FROM THE APUC. THE TELEPHONE AND ELECTRIC UTILITIES WITH GROSS REVENUES OF UP TO $250,000 AND ALL OTHER UTILITIES WITH GROSS REVENUES OF UP TO $100,000 HAVE THE OPTION OF POLLING THEIR SUBSCRIBERS ONCE EVERY 2 YEARS BY A BALLOT PROCEDURE.

A BALLOT MAY BE INITIATED BY THE UTILITY OR BY A PETITION OF 10 PERCENT OR MORE OF ITS SUBSCRIBERS. TO ELEC. AN EXEMPTION, 51 PERCENT OF THOSE ELIGIBLE TO VOTE MUST VOTE AND A MAJORITY OF THOSE VOTES MUST BE FOR AN EXEMPTION.

(B) THE SECOND EXEMPTION IS FOR ELECTRIC AND TELEPHONE COOPERATIVES. THESE ORGANIZATIONS MAY ELECT ECONOMIC DEREGULATION BY THE SAME BALLOT PROCEDURES ALREADY MENTIONED FOR THE UTILITIES.

(C) THE THIRD EXEMPTION IS FOR ECONOMIC DEREGULATION FOR CABLE TELEVISION, WHICH IS PRESENTLY EXEMPTED FROM REGULATION BY APUC, BUT WILL BE REVIEWED PRIOR TO JULY 1, 1983. IF THE LEGISLATURE FAILS TO EXTEND THE EXEMPTION PRIOR TO THAT DATE, CABLE TELEVISION THEN WILL BE REGULATED BY APUC.

IN EACH OF THESE THREE CASES, THE EXEMPTION IS FROM

ECONOMIC REGULATION BY THE APUC, BUT CERTIFICATION WILL REMAIN WITH APUC.

(D) THE FOURTH EXEMPTION IS FOR REFUSE UTILITIES. THIS EXEMPTION WILL ALLOW EITHER APUC OR THE MUNICIPALITY TO REGULATE RATES AND BE RESPONSIBLE FOR CERTIFICATION franchise. HOWEVER, A REFUSE UTILITY THAT IS COMPLETELY OUTSIDE THE BOUNDARIES OF A MUNICIPALITY WILL BE REGULATED BY THE APUC.

3. THESE CHANGES IN THE STATUTE HAVE THE CONCURRENCE OF THE APUC, DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS, AND ALL UTILITIES INVOLVED.

4. MR. PRESIDENT, I RECOMMEND CONTINUING THE EXISTENCE OF THE APUC AND AMENDING ITS RESPONSIBILITIES AS I HAVE SUMMARIZED AND WHICH ARE EXPLAINED IN DETAIL IN THE SECTION-BY-SECTION ANLAYSIS PLACED ON YOUR DESK YESTERDAY.

APUC

MR. CHAIRMAN - MEMBERS OF THE COMMITTEE. MY NAME IS ROY PASCHAL. THANK YOU FOR THE OPPORTUNITY TO TESTIFY TODAY. I APPEAR AS PRESIDENT OF THE ALASKA CABLE TELEVISION ASSOCIATION.

WE ARE OPPOSED FIRST OF ALL TO COMBINING THE PUBLIC UTILITIES COMMISSION WITH SEVERAL OTHER COMMISSIONS THAT PRESENTLY REGULATE OTHER INDUSTRIES. THE EXPERTISE THE PRESENT VARIOUS PUBLIC UTILITIES COMMAND FROM THE ALASKA PUBLIC UTILITIES COMMISSION IS SPREAD THIN ENOUGH NOW AND TO EXPAND THE FIELDS COVERED BY THE COMMISSION WOULD APPEAR TO ONLY REDUCE EFFICIENCY.

WE ARE OPPOSED TO COMPLETE REMOVAL OF ALASKA PUBLIC UTILITIES COMMISSION REGULATION FROM CABLE TELEVISION. ALTHOUGH CABLE DOES NOT IN TRUTH MEET THE CRITERIA OF A TRUE PUBLIC UTILITY THERE ARE ASPECTS OF THIS BUSINESS THAT ARE BETTER COORDINATED BY A STATEWIDE BODY THAN ON A LOCAL LEVEL. THE MAIN ONES ARE THOSE OF ALLOCATION OF SERVICE AREAS AND SETTING STANDARDS OF PERFORMANCE. THEREFORE WE ARE OPPOSED TO COMPLETE REMOVAL OF ALASKA PUBLIC UTILITIES COMMISSION REGULATIONS.

CABLE IS ONLY PARTIALLY REGULATED TODAY IN ALASKA. FEDERAL LAW HAS PREVENTED THE ALASKA PUBLIC UTILITIES COMMISSION FROM REGULATING "PREMIUM" SERVICES, SUCH AS HBO, SHOWTIME, MADISON SQUARE GARDEN, ETC.

WE DO BELIEVE THAT REMOVING RATE REGULATION IS IN THE PUBLIC INTEREST. IT HAS BEEN NECESSARY TO GO THROUGH A VERY COMPLICATED, LENGTHY AND EXPENSIVE ACCOUNTING AND LEGAL PROCEDURE TO OBTAIN RATE INCREASES THAT WERE VERY EVIDENTLY NEEDED SIMPLY BY LOOKING AT THE FINANCIAL STATEMENTS. IT WAS NECESSARY TO COMPLETELY RE-DO THE ACCOUNTING SYSTEMS, ONES THAT WERE ACCEPTABLE TO THE IRS BUT NOT TO THE ALASKA PUBLIC UTILITIES COMMISION.

JUST TO PAY FOR THE RATE CASES AMOUNTED TO APPROXIMATELY A 7 1/2 PERCENT INCREASE TO EACH SUBSCRIBER, AND THIS PERCENTAGE WOULD INCREASE DRASTICALLY AS THE SYSTEM DECREASES IN SIZE. WE BELIEVE THE MARKET PLACE WOULD HOLD CABLE TV RATES TO A REASONABLE AMOUNT BETTER THAN REGULATION. TO THE BEST OF OUR KNOWLEDGE EVERY SINGLE CABLE TV RATE INCREASE THAT HAS BEEN REQUESTED FROM THE ALASKA PUBLIC UTILITIES COMMISSION HAS EVENTUALLY BEEN GRANTED TO WITHIN A FEW CENTS PER MONTH OF THE REQUEST. IN MOST CASES IF THE FULL RATE REQUESTED HAD BEEN GRANTED SERVICE WOULD HAVE BEEN EXPANDED AND AT AN EARLIER DATE.

IN CONCLUSION WE SUGGEST:

1. THE ALASKA PUBLIC UTILITIES COMMISSION NOT BE MERGED WITH ANY OTHER COMMISSION.
2. THAT THE ALASKA PUBLIC UTILITIES COMMISSION CONTINUE TO REGULATE CABLE TV IN ISSUANCE OF CERTIFICATES OF PUBLIC CONVENIENCE AND TO DETERMINE AREAS OF SERVICE.
3. CONTINUE AS A "WATCHDOG" OVER PUBLIC COMPLAINTS ABOUT SERVICE WITH THE POWER TO LEVY CIVIL PENALTIES AND REMOVE CERTIFICATES.
4. ELIMINATE ECONOMIC REGULATION.

I ESTIMATE THE ELIMINATION OF ECONOMIC REGULATION OF CABLE TV WOULD REDUCE THE PORTION OF THE ALASKA PUBLIC UTILITIES COMMISSION BUDGET ALLOCATED TO CABLE TV BY 95 PERCENT.

ELIMINATION OF ECONOMIC CONTROLS WOULD SAVE CUSTOMERS "PASSED ALONG COSTS" OF EXPENSIVE AND UNNECESSARY RATE HEARINGS.

WE ARE MORE THAN WILLING TO WORK WITH THE COMMITTEE IN DRAFTING PROPOSED LEGISLATION AND OFFER ANY ASSISTANCE THAT THE COMMITTEE OR STAFF MIGHT REQUIRE.

THANK YOU AGAIN FOR THIS OPPORTUNITY TO TESTIFY.

Box 1081
Petersburg, Ak 99833
13 Mar 1980

Senator Bradley
Senate Commerce Committee
Pouch V
Juneau, AK 99811

Dear Senator Bradley;

I wish to comment on the actions or rather non-actions of the Alaska Public Utilities Commission.

Over one month ago I sent a letter to the Chairman of the Commission expressing my concern over the way the commission allowed Alascom to refund the excess rate increases.

So far I have not even received an acknowledgement of receipt from the commission. On Capitol 80 I saw some of their replies to questions from the public and surely financial constraints cannot be so pressing that a letter of reply is too costly.

The reason that I wrote to the commission is that at least two weeks of January has gone past before I was informed about the "Great consumer refund" policy which Alascom was allowed. Lower phone rates in Alaska during the months of January and February. If I had not accidently bought a paper I would not have known about the refund at all. At the very least the commission should have made Alascom wait until it had informed the public via our usual monthly bills. I felt that the very secretive way Alascom was allowed to refund to its customers did not benefit the public at all. I thought one of the commissions duties was to safeguard the interests of the public.

Sincerely yours,
T Osborne
Timothy Osborne

APUC SUNSET REVIEW

CERTIFICATION:

Before a utility may operate in the State of Alaska application for a Certificate of Public Connvenience and Necessity must be made to the APUC as prescribed in AS 42.05.221 - 281. The Commission reviews the application and may reject, modify, or award a Certificate to the applicant. The Certificate may be as broad or as specific as the Commission chooses to issue and this is stated on the face of the Certificate.

AS 42.05 is quite specific as to the types of endeavors that are classified as utilities. Although, CATV is not mentioned in the statute the definition of telecommunications (AS 42.05.701 (2A and 8) states; "the transmission and reception of messages, impressions, pictures and signals by means of electricity." This clearly indicates that CATV meets the criteria of an utility and is subject to the provisions of AS 42.05.221 (Certification) to protect the public interest.

Therefore, the APUC may judge the qualifications of an operator on criteria established by the Commission. Due to the fact that the language used on the face of the Certificate, is prescribed by the Commission, an operator is subject to that criteria. Since no utility may operate without a Certificate the APUC has ultimate control as to the qualifications of an operator.

In other language contained in AS 42.05.221 - 281 no Certificate may be transferred without making application to the Commission. Once again, the APUC has complete control over new or existing services.

Since such a structure is in place to protect the public interest it does not make sense to remove the Certification of CATV from the APUC who is best equipted to handle it.

RATE REGULATION:

It is interesting to note that the language contained in AS 42.05 (Ch 113 SLA 1970) is permissive vs. mandatory regarding the regulation of utilities. The rate regulation and proceedings have evolved through regulations adopted and decrees of the Commission. Since the rate proceedings have become more complicated, during this evolution, they have also become longer and more costly. After the passage of ten (10) years, since the enabling legislation (SCSCS HB 202 am (S); CSHB 202 am, passed the House 30-7-3, April 9, 1969; SCSCSHB 202 am (S), passed the Senate 16-4, April 22, 1970; the House concurred in the Senate amendment) it is appropriate that the Legislative Audit and the Legislature's Sunset Review of the APUC is under consideration.

Rate deregulation of the Cable TV industry is an interesting concept due to the fact that an operators revenues are divided

between regulated rates and non-regulated rates and that may vary from a 20% - 80% split to a 50% - 50% split. Thus, two systems with gross receipts annually of $1,000,000 may be broken down as follows:

System J	
Gross Receipts	$1,000,000
80% non-regulated	$800,000
20% regulated	$200,000
System K	
Gross Receipts	$1,000,000
50% non-regulated	$500,000
50% regulated	$500,000

This indicates a disparity of $300,000 of revenue on regulated rates when the actual reason for the difference is purely economics based on agressive marketing and the variety in programing offered to the public and to the public's taste in viewing matter.

Another factor of economics that applies, is that the cost of a rate proceeding is passed through to the consumer. This is by decree of the APUC. An example would be that the operator of system "K" feels that due to economic conditions (i e. renegotiated labor contracts, increase in energy costs, inflation, etc.) a rate increase of $1.00 per month per subscriber in in order. He makes application to the Commission for this increase and the proceedings goes forth. With the time involved and the special consultants, auditors and legal counsel the pass through, varies but, could make the increase granted $1.50 per month or a 50% increase over the original request and/or higher. This 50% is not reflective of expanded or improved service but just the cost of the rate proceeding that the consumer must pay.

Rate deregulation would save the consumer the cost of the proceeding and would let the economic conditions and consumer demand establish the rate charged for service provided. In most cases this would mean no increase or an increase that would be less than in the regulated circumstance. Under the regulated rate structure there is not a difference in proceedings according to the size of the operator's system. Thus, the system in a small community is subject to the same proceeding as a system in a large metropolitan area. And the small system may be less able to afford the cost as would the larger operator.

CONCLUSIONS:

It could be concluded that the public interest is best served by the APUC retaining the function of Certification and evaluating the operators and systems qualifications and rate deregulation to eliminate the disparity of controlled vs. noncontrolled revenues and the added expense to the consumer of the rate proceeding. It should be noted that the controlled and noncontrolled rates are first subject to the approval of the

FCC and this circumstance exisits because of an order by the FCC.

Applying this set of criteria to the Cable TV industry would allow the APUC full control over the operation of a system, through its authority under AS 42.05, and allow the market place, through economic conditions, to establish the rate. Provision should be made that after a period of time (3 to 5 years) the Legislature (perhaps through Legislative Audit) have an overview of the Commission and the industry to evaluate the workings of these circumstances and offer a further check and balance.

Another benefit would be the cost saving to the Commission. Those public funds (now used for rate regulation) could be applied to other functions, that APUC is charged with, and staff time would be available for other purposes.

In conclusion it is noted that AS 42.05 is specific in definition and procedure for Certification of a cable system where as the rate regulation provisions are not as specific and the public would be best served by rate deregulation of Cable TV by the Legislature.

SUBJECT: SB ~~556~~ 577 - APUC Sunset Legislation

TO: Senate Commerce Committee
ATTN: Frank Lee

FROM: Thomas A. Sofo
Legislative Counsel TAS

Under the most recent version of this bill, those utilities which might be exempted from APUC regulation by an amendment to AS 42.05.711 (pp. 5 and 6) are potentially exposed to municipal regulation by virtue of an existing statute, AS 29.-48.060. If further review of this area convinces you that municipal regulation, or the potential thereof, is undesirable, the following amendment should be offered:

page 3, line 4:

Insert "or exempt under AS 42.05.711(e) - (h)" after "AS 42.05".

March 13, 1980

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Your Senate Commerce Committee has had under consideration for "Sunset" review the Alaska Public Utilities Commission, pursuant to your referral under AS 44.66.010 and AS 44.66.050.

In accordance with the statutory requirements, a public hearing was held on the review of this commission. An additional hearing was held on March 13, 1980, as the Committee Chairman had been notified that additional witnesses wished to testify regarding the Alaska Public Utilities Commission.

Guided in part by the report prepared by the Legislative Audit Division, the Committee took into consideration the factors required under AS 44.66.050(c).

Your Commerce Committee thereby makes the following findings:

The Committee finds some merit in recommendation number one which recommends that the Alaska Public Utilities Commission, the Alaska Transportation Commission and the Alaska Pipeline Commission should be combined into a single regulatory commission. However, this will require considerable further study. The Committee finds it is not in the public's interest to do so at this time.

In recommendation number two, the Legislative Audit Division recommends that AS 42.05 should be amended to allow the Alaska Public Utilities Commission to cease all certification and regulation of cable television. The Committee does not concur. Cable systems in Alaska, particularly in the remote areas, do not serve a mere entertainment function. Cable television in some areas of Alaska is the only source of information and entertainment. It is felt that regulation

should continue in these areas. In urban areas, where alternative forms of entertainment and information are available, the Committee agrees that certification and regulation may not be necessary. Recent legislation passed in the state of California provides a formula that the Committee believes will, with modification, provide for deregulation of the cable systems in major urban areas of Alaska while providing regulatory protection for Alaska's rural population.

Recommendation number three asks that AS 42.05 should be amended to allow the Alaska Public Utilities Commission to cease certification and regulation of those utilities furnishing collection and disposal service of garbage, refuse, trash and other waste materials. In both the Legislative Audit Report and the public hearing, the reason most often heard for this deregulation was that "We don't have the staff to do this." An assertion is made in the Performance Review that the refuse industry is not capital intensive and that competition in this industry would not be as detrimental to the public's interest as competition among more capital intensive industries.

However, it has also been argued to the Committee that there should be some limited activity by the Alaska Public Utilities Commission in this area. Contentions have been made in favor of the Commission having appellate authority over local government units which may assume the regulatory function; and it has also been argued that the APUC be allowed to have jurisdiction "by consent," when a municipality and a utility have both agreed to that jurisdiction. While the Committee tends to agree with the recommendations of the Legislative Auditor about deregulation in this area it will consider these arguments about very limited jurisdiction during the preparation of the Committee's legislation.

Recommendation number four asks that AS 42.05 be amended to allow nonprofit telephone and electric cooperatives to petition for withdrawal from APUC economic regulation. It further recomends that the membership of the cooperatives, by a vote of a majority of the members, be given an opportunity on a utility by utility basis to determine whether their cooperative should remain under APUC regulation. The Committee finds several problems in considering deregulation of the

cooperatives. One, as pointed out by the Performance Review, is the large number of consumer complaints received by the APUC against cooperatives. The second, which was brought out in public hearing, is that the annual meetings of the cooperative associations have a less than representative number of members present. Before the Committee can consider deregulation of the utilities by vote of the membership, the Committee would have to be assured that the vote in fact represented a majority of the actual members as opposed to a majority of the members present at any given annual meeting, or that similar safeguards are provided.

With this modification, the Committee's legislation will reflect this recommendation.

The Committee in general concurs with recommendation number five that asks that AS 42.05 be amended to exempt from economic regulation all utilities with annual gross revenues not exceeding $100,000. We agree with the Legislative Audit Division that the cost of regulation "on a percentage basis" to a small utility may outweigh the potential benefits. However, when considering regulation of a utility we must look not only to the cost factor but also to the factors of public safety that are involved. Many of these small utilities provide vital needs to communities, for instance, water utilities. The Committee while including deregulation for these utilities in its legislation, will attempt to include some triggering device that would submit the utility to regulation if serious consideration of public health and safety should warrant such action.

The Committee concurs with recommendation number six that the statutes and regulations governing the Alaska Public Utilities Commission should be revised, and will work with the Commission to accomplish this.

The Committee concurs with recommendation number seven that salary levels for the professional and technical support staff should be upgraded. If salaries are not competitive with private industry in Alaska, we cannot expect qualified personnel to work for the APUC on an extended basis: The Commission will only become a training ground for industry.

The Committee concurs with recommendation number eight that the APUC should implement a time management system. We

were informed during the public hearing that new concepts are being implemented by the Executive Director and the situation is improving. If this is accomplished within a reasonable length of time, no legislative action will be necessary.

Recommendations number nine, ten, and eleven address "housekeeping" functions of the APUC. It is our understanding, as a result of testimony by the Alaska Public Utilities Commission, that action is being taken on these recommendations. If this action proceeds in a timely manner, it is felt that no legislative action will be necessary in this area.

Recommendation number twelve urges that the Office of the Governor keep the appointment of the Chairman of the Alaska Public Utilities Commission current. Complaints that the Office of the Governor has been slow in making appointments to boards and commissions have appeared often in the Performance Reviews. It is hoped that the Governor's Office will make timely appointments to boards and commissions in the future.

Corresponding legislation will be introduced soon to accomplish the goals of this report.

Respectfully submitted,

Brad Bradley

Senator Brad Bradley
Chairman
Senate Commerce Committee

In the Matter of the Application of PACOM, INC., a Wholly Owned Subsidiary of PACIFIC POWER & LIGHT COMPANY for Authority to Acquire a Controlling Interest in RCA ALASKA COMMUNICATIONS, INC.	U-79-11 ORDER NO. 2

ORDER CHANGING HEARING LOCATION

Subsequent to the issuance of Order No. 1 in these proceedings which scheduled, and established procedures for the conduct of, a public hearing with respect to this application, the Alaska State Court System has made available to the Commission a court room in the Boney Memorial Court Building in which to conduct the scheduled public hearing. In view of the widespread interest in this matter, the Commission believes that the facilities available in the court building would be more suitable for the conduct of this hearing than those in the Commission's office in the MacKay Building. Accordingly, the hearing scheduled for 9:00 a.m., Monday, March 19, 1979, will be held in Courtroom "K" (Room 201) of the Boney Memorial Court Building, instead of the hearing room in the Commission's office in the MacKay Building.

ORDER

THE COMMISSION FURTHER ORDERS, That, the location of the public hearing concerning the application of PACOM, Inc.,

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PH 2HE 276.6222

for authority to acquire a controlling interest in RCA Alaska Communications, Inc., is changed from the hearing room in the Commission's Office, 1100 MacKay Building, 338 Denali Street, Anchorage, to Courtroom "K" (Room 201), George Boney Memorial Building, 303 "K" Street, Anchorage, Alaska. The time and date of the hearing are not changed by this Order.

DATED AND EFFECTIVE at Anchorage, Alaska, this 7th day of March, 1979.

MEMORANDUM March 5, 1980

TO: Representative Fred Brown

FROM: Elaine Mitchell, Research Analyst

RE: California Deregulation of Cable TV
Research Request No. 83

Background

California Assembly Bill 699 was signed into law September 28, 1979, deregulating cable TV rates under specified conditions. The bill was introduced by Assemblyman Bruce Young at the request of the industry. In its original form, the bill would have prohibited a city, county, or city and county from regulating the rates imposed by a franchise or licensee on individual subscribers, but would have allowed proposed subscriber rates to be made a condition to the granting of a franchise or license. It was expected that Governor Brown would veto the bill.

Legislative Action:

During the course of legislative consideration, the California Department of Consumer Affairs proposed amendments which would have given the Public Broadcasting Commission an intensive regulatory overview role. This was unacceptable to the California Community TV Association.

The bill progressed to a conference committee where negotiations between the industry and the Administration resulted in a compromise bill which passed the legislature and was signed into law.

Negotiations:

Monroe Price, a lawyer representating the cable industry, worked out the compromise bill. He told us that the basic points in the negotiations were:

1. to avoid intensive regulations by the Public Broadcasting Commission, and

2. to avoid monopolistic situations which might arise for any cable TV operation.

Under provisions of the law, before deregulation may occur, the cable companies must show that they have met the following criteria:

1. deliver 20 or more channels;

2. have a satellite earth station to receive satellite signals;

3. are located in an area with three significantly viewed stations (viewable by a certain percentage of homes) or two significantly viewed stations and an education station; and,

4. provide a community services channel program.

Rates are completely deregulated for systems which are subscribed to by less than 70 percent of homes passed by the cable meeting these requirements. For systems with more than 70 percent subscribers, certain restrictions are placed on increasing rates. This is the key provisions designed to avoid monopolies.

According to Mr. Price, the cable TV industry wished to modernize, but needed added assurances of returns on investments that they felt deregulation would bring. Under the new law, deregulation has not been fully realized, because the possibility offered by deregulation has given the industry added leverage in negotiations with local governments on regulated rate increases.

Attached are the bills as originally introduced and the bill as passed. If you desire more information, please let us know.

CALIFORNIA LEGISLATURE—1979–80 REGULAR SESSION

ASSEMBLY BILL No. 699

Introduced by Assemblyman Young

March 1, 1979

REFERRED TO COMMITTEE ON FINANCE, INSURANCE, AND COMMERCE

An act to amend Section 53066 of the Government Code, relating to community antenna television.

LEGISLATIVE COUNSEL'S DIGEST

AB 699, as introduced, Young (Fin., Ins., & Com.). Community antenna television: subscriber rates.

Under existing law, the governing body of a city or county or city and county may authorize by franchise or license the construction of a community antenna television system. The law presently imposes maximum limitations on the amounts of fees for the granting of such a franchise or license and permits the award of a franchise to be made on the basis of, among other things, the rates to the subscriber.

This bill would prohibit a city, county, or city and county from regulating the rates imposed by a franchisee or licensee on individual subscribers but would allow proposed subscriber rates to be made a condition to the granting of a franchise or license.

Vote: majority. Appropriation: no. Fiscal committee: no. State-mandated local program: no.

The people of the State of California do enact as follows:

SECTION 1. Section 53066 of the Government Code is amended to read:

53066. *(a)* Any city or county or city and county in the State of California may, pursuant to such provisions as may be prescribed by its governing body, authorize by franchise or license the construction of a community antenna television system. In connection therewith, the governing body may prescribe such rules and regulations as it deems advisable to protect the individual subscribers to the services of such community antenna television system. The award of the franchise or license may be made on the basis of quality of service, rates to the subscriber, income to the city, county or city and county, experience and financial responsibility of the applicant plus any other consideration that will safeguard the local public interest, rather than a cash auction bid. The maximum franchise fee for any franchise or license hereafter awarded pursuant to this section or pursuant to any ordinance adopted under authority of this section by any city or county or city and county shall be 5 percent of the grantee's gross receipts from its operations within such city or county or city and county. Any cable television franchise or license awarded by a city or county or city and county pursuant to this section may authorize the grantee thereof to place wires, conduits and appurtenances for the community antenna television system along or across such public streets, highways, alleys, public properties, or public easements of said city or county or city and county. Public easements, as used in this section, shall include but shall not be limited to any easement created by dedication to the city or county or city and county for public utility purposes or any other purpose whatsoever.

(b) The rates imposed by a franchisee or licensee on individual subscribers shall not be subject to regulation by a city, county, or city and county; provided, however, that proposed subscriber rates may be made a condition to the award of a franchise or license.

O

CHAPTER 1086

(Assembly Bill No. 699)

An act to add Section 53066.1 to the Government Code, relating to community antenna television.

[Approved by Governor September 27, 1979. Filed with Secretary of State September 28, 1979.]

LEGISLATIVE COUNSEL'S DIGEST

AB 699, Young. Community antenna television: subscriber rates.

Under existing law, the governing body of a city or county or city and county may authorize by franchise or license the construction of a community antenna television system. The law presently imposes maximum limitations on the amount of fees for the granting of such a franchise or license and permits the award of a franchise to be made on the basis of, among other things, the rates to the subscriber.

This bill would, upon request of the franchisee or licensee, modify local regulation by the franchisor, under specified conditions, of the rates, charges, and rate structures of a franchisee or licensee if such franchisee or licensee provides a community antenna television system, as defined, which provides a community service channel program, as specified.

It would permit the franchisor to act as a public trustee of such community service channel or channels, as specified. It would exempt a franchisee or licensee from liability for acts arising from the use of the community service channel by others.

It would prescribe a complaint system with respect to such a franchisee's or licensee's services and provide for the levying of certain penalties for failure to remedy a complaint, as specified.

The bill would cease to be operative on January 1, 1984, except a provision would remain in effect beyond that date requiring that rates then in effect shall not be subject to reduction by local authorities below the average rate in the state for the class of service provided.

Finally, the bill would require the California Public Broadcasting Commission to make a specified report by April 15, 1982, regarding the effect of the bill, and would impose specified filing requirements upon cable television systems.

The people of the State of California do enact as follows:

SECTION 1. Section 53066.1 is added to the Government Code, to read:

§ 53066.1. (a) Notwithstanding the provisions of Section 53066, any cable television system which:

(1) Provides 20 or more channels to the cable television subscriber,

(2) Receives or has contracted to receive television signals by satellite earth receiving station,

(3) Has a subscriber penetration ratio of less than 70 percent certified by the cable television system, subject to review by the franchisor or licensor,

(4) Is located in a county or portion of a county which has available three significantly viewed television stations, as defined by the Federal Communications

Commission, or two significantly viewed television stations and an educational television station, and

(5) Is providing or has agreed promptly to provide a community services channel program as defined in subdivision (d),

shall, upon election by the cable television system and upon the filing of a declaration to that effect with the franchisor, be exempt from regulation or control by a city, county, city and county, or other authority as to rates, charges and rate structures, except for the first year following the date of delivery of service pursuant to the initial grant of a franchise.

(b) Notwithstanding the provisions of Section 53066, any cable television system which:

(1) Otherwise meets the requirements of subdivision (a) except for the requirement of paragraph (3) of subdivision (a), or

(2) Provides between 12 and 20 channels of television service in a franchise area with fewer than 3,500 subscribers in a community of less than 20,000 in population, and otherwise meets the requirements of paragraphs (4) and (5) of subdivision (a),

may, upon election by the cable television system and declaration filed with the franchisor, adjust its rate by an amount not to exceed 75 percent of the percentage increase in the Consumer Price Index for the period since the date of the last previous rate increase, or December 31, 1975, if there have been no increases since December 31, 1975. A system may make a rate adjustment under the preceding sentence only for the period occurring within three years from the date a system would be entitled under such sentence to make an adjustment. A cable television system which, prior to January 1, 1980, had 12 or fewer channels, and subsequently rebuilds its system to 20 or more channels, may raise its rates to a level, within three years of completion of the rebuild, not to exceed the statewide average rate for those cable television systems having 20 or more channels.

(c) (1) Prior to April 15, 1982, the California Public Broadcasting Commission shall report to the Legislature concerning the effect upon subscribers and upon the telecommunications policy of the state of the rate adjustments by cable television systems as a consequence of this section, including such recommendations for legislative modification as may appear desirable. Each cable television system adjusting its rates pursuant to this section shall file with the California Public Broadcasting Commission prior to September 15, 1981, the rates of the system on January 1, 1980, and all subsequent adjustments, and information concerning number of subscribers and services provided. After the required filing on September 15, 1981, all systems shall promptly file any subsequent rate adjustments with the California Public Broadcasting Commission.

(2) This section shall cease to be operative on January 1, 1984, unless on or before such date its operative date is extended by the Legislature, except that rates in effect on January 1, 1984, shall not be subject to reduction by local authorities having rate reduction authority in their franchise below the average rate in the state on that date for the class of service provided.

(d) A cable television system shall be deemed to be offering a community service channel program if the system does all of the following:

(1) (A) Provides for those systems which furnish between 12 and 20 channels, a dedicated channel for local community, public access, educational and government access purposes, except that the one channel may be a composite containing the functional equivalent of a single community service channel; or (B) provides for those systems which furnish more than 20 channels, in addition to the first dedicated channel, a second such channel if the first channel is in use during 80 percent of the weekdays for 80 percent of the time during any consecutive 13-hour period for 10 consecutive weeks, except that for systems with 24 or fewer channels

the second channel, if required, may be a composite containing the functional equivalent of a single community service channel; or (C) provides, if such system furnishes more than 30 channels, a third channel if the second channel is in use during 80 percent of the weekdays for 80 percent of the time during any consecutive 13-hour period for 10 consecutive weeks.

(2) Participates in a statewide cooperative program, administered by an association of cable operators, with the advice of potential users, that: (A) provides instruction and training for individuals, groups, entities and agencies interested in using community services channels, (B) furnishes guidelines for the use and allocation of such channels, and (C) creates a foundation for community service channels, with an independent board of directors, including representatives of local nongovernmental user groups and public agencies. Such foundation shall have grant-making authority to users and shall have, as its primary purpose, the promotion and encouragement of use of community service channels.

(3) Provides fifty cents ($0.50) per subscriber per year to the foundation established pursuant to paragraph (2) of subdivision (d).

(4) Provides to individuals, groups, and entities using community service channels technical advice by local program staff and reasonable access to local studio facilities, if such facilities and staff are part of the local system.

(5) Cooperates with courses and programs in secondary schools, community colleges and elsewhere which furnish training in the uses of community service channels.

(6) Has available for use without charge tape playback facilities for entrance into the system.

(7) Provides through display information on community service channels, and by other means, including written notice to subscribers, information to potential users of the opportunity to have access to community service channels.

(8) Unless the franchisor elects to act as trustee for the community channel or channels, consults with the franchisor in establishing policies for the use of community service channel or channels.

(9) Provides to government and educational agencies reasonable access to earth station facilities for the receipt of programming for the community service channel.

(10) Regularly provides to the foundation for community service channels and to the public and public agencies information containing the name, address and telephone number of the system, the name of the system manager, and the status and utilization of the community access channels.

(e) The franchisee or licensee may utilize any community service channel which is not used for community service programming so long as community service programming is given scheduling priority.

(f) The franchisor may elect to act as public trustee or appoint a delegate reporting to the franchisor, to act as public trustee of the community service channel, to ensure the use of such channel or channels for public access, state or local government or education access purposes.

(g) The franchisee or licensee, or such delegate as is appointed a trustee of such community service channels, shall not be liable for acts arising from the use of such channel or channels by persons other than the franchisee or licensees. The franchisee or licensee shall establish regulations governing the use of such channels which provide uniform and nondiscriminatory standards, ensure adequate opportunity for participation by local nongovernmental users and incorporate restrictions on libelous or slanderous or illegal programs.

(h) The California Public Broadcasting Commission, in cooperation with the California Arts Council, the Office of Appropriate Technology, the State Depart-

ment of Education and the State Department of Consumer Affairs, and such other agencies as requested by the commission, shall undertake efforts to encourage state and local government and educational use of the community service channel or channels and shall prepare a report by January 1, 1983, indicating the uses that government and educational agencies and community organizations have made of such channel or channels.

(i) The Regents of the University of California, if it so elects, the Trustees of the California State University and Colleges, the Board of Governors of the California Community Colleges and the State Department of Education shall negotiate with representatives of cable television systems providing community service channels concerning appropriate provision for access to the community services channel or channels for educational agencies using such channels and shall implement by segment, or collectively, a program for the use of such community service channel or channels for educational purposes. Each of the agencies named in the preceding sentence shall report to the Legislature on or before June 15, 1981, concerning the extent to which there has been use of television, including satellite interconnection, to fulfill the mission of each agency and actual use of community service channel and other cable and broadcast facilities. Such report shall also indicate the prospect for additional uses of such interconnected facilities and shall make recommendations for such legislation as may be needed to assure appropriate use of such channels.

(j) For purposes of this section, the following definitions shall apply:

(1) "Cable television system" means a community antenna television system serving a franchise area or two or more contiguous franchise areas.

(2) "Class of service" means a category as described in subdivision (a), or in paragraphs (1) or (2) of subdivision (b).

(3) "Consumer Price Index" means the consumer price index published at the end of the month following the rate adjustment by the United States Bureau of Labor Statistics for the area in which the cable television system is located or the nearest area for which such index is published.

(4) "Satellite earth receiving station" means any structure or device utilized to receive signals from a satellite.

(5) "Subscriber penetration ratio" means the number of subscribing residences divided by the total number of residences having cable available.

(k) In addition to any other penalty provisions in the franchise or license, if a franchisee or licensee files a declaration pursuant to subdivision (a) or (b) the franchisor or licensor may unilaterally amend the franchise or license to provide that if a subscriber files in writing with the franchisor a complaint for a service problem which is preventable and reasonably within the franchisee's or licensee's control, and if such franchisee or licensee fails within a reasonable period following receipt of written notice by the franchisor to remedy the problem, the franchisor may levy a penalty of up to five hundred dollars ($500) for any occurrence or series of related occurrences, unless the franchisee or licensee has fewer than 5,000 subscribers, in which case the penalty shall not exceed two hundred dollars ($200). If the franchisee or licensee objects to the penalty in writing to the franchisor, the franchisee or licensee and franchisor shall conduct arbitration in accordance with the rules of the American Arbitration Association. The decision of the arbitrator shall be final.

Such amendment to the franchise or license shall provide that the franchisee or licensee shall provide written notice to each subscriber at intervals of not more than one year, of the sanctions provided in this section, and of the procedure for reporting and resolving subscriber complaints, including the subscriber's right to complain in writing to the franchisor of the franchisee's failure to resolve a service complaint which is preventable and reasonably within the franchisee's or licensee's

control. The proper address of the franchisor or licensor to which complaints may be directed shall be included in such notice.

SEC. 2. If any provision of this act or the application thereof to any person or circumstances is held invalid, such invalidity shall not affect other provisions or applications of the act which can be given effect without the invalid provision or application, and to this end the provisions of this act are severable.

HISTORY: A.B. 699, approved September 27, 1979, filed September 28, 1979.

McCAW
COMMUNICATIONS
COMPANIES

February 28, 1980

The Honorable W.E. Bradley
Chairman, Senate Committee on Commerce
The Legislature of the State of Alaska
Pouch V
Juneau, Alaska 98111

Dear Senator Bradley:

I am vice president and one of the principal stockholders of Frontier ColorCable, Inc., which operates a cable television system in Fairbanks, Frontier began construction in June 1979 and now has approximately 3,200 customers. We expect to complete the 1980 phase of construction by October and to have 5,000 customers by the end of 1980. Frontier received its certificate from the Commission late last year after lengthy hearings, and competition from four other applicants. During and since the hearings, I have had extensive contact with the Commission and its staff and therefore believe that I am qualified to comment on the recommendations contained in the legislative audit of the Commission.

I am also the vice president and a major shareholder of Radio Communications Engineering, Inc., which has reached an agreement with Communications Engineering, Inc., to purchase all of its assets. Communications Engineering, Inc., is a public utility which offers radio-telephone and paging service in the Mat Valley-Anchorage-Kenai area.

I have more than ten years of experience in the cable television and telecommunications business. My comments, based on that experience and my contact with the APUC are:

Recommendation No. 1 - Combine the APUC with the Transportation Commission and the Pipeline Commission.

I feel that there are no "economies of scale" and the expertise required of the staff and commissioners is substantially different for each of the three commissions. It has been recommended that fewer commissioners preside at hearings. The effect of this

situation seems detrimental for two reasons: While I can only speak of matters pertaining to the APUC, the commissioners are much overworked as it is, making attending additional hearings an impossibiliy; and fewer commissioners at each hearing would greatly reduce the scope and depth of expertise at each hearing. As it is at present, each commissioner, while being well rounded, is a specialist in one aspect of the jurisdiction.

I do not believe, as suggested by the review, that one staff is capable of staying abreast of all of the issues of several industries which differ greatly. I think a survey would indicate that most individuals have enough trouble keeping up with changing regulations and complexities of one industry let alone three. Please note that it was the Commissioners in "one commission" states that responded that Commissioners could develop enough expertise to serve all three functions. It would be interesting to hear how the regulated utilities in those states would have responded to the same question.

Recommendation No. 2 - Stop all regulation of cable television.

Certification of Cable Television Companies in Alaska is a necessary and important function of the APUC. In the lower 48 and Hawaii, franchising or certification is under the jurisdiction of state, city or county in 99.9% of all cases. This aspect of regulation is vital to consumers and cable companies alike.

If the APUC were removed from the jurisdiction of cable television companies, the consumer would have no recourse if dissatisfied with its service. At present if a company ceases to be fit, willing and able to provide quality service, the APUC has the power to reprimand and if necessary, to remove the Certificate of Public Convenience and Necessity from the existing operator and grant it to an operator who is fit, willing and able to provide quality service. The overview of the APUC covers many areas including consumer protection, reliablity of service, quality and diversification of programming and consumer complaints.

APUC jurisdiction of certification also provides an important service to cable operators. Without APUC involvement, there would be no protection from exorbitant pole attachment rates. If these rates are arbitrarily raised to unreasonable levels, the cable operator has no choice but to pass on the costs to the subscriber in the form of rate increases. Arbitrary pole attachment rate increases are not an unfounded fear since it has been a severe problem in many communities in the lower 48. In addition, the APUC provides protection against duplication of services of high fixed-cost

utilities, which would result in artificially high prices for the consumer.

It is important that the certification of cable utilities remain under the jurisdiction of qualified and impartial professionals. If the APUC is deprived of it's regulatory power, cities and boroughs will regulate unless specifically prohibited from doing so. Therefore, if it is determined that deregulation is good, alternative regulation by others must be precluded by legislation.

Rate regulation of cable television utilities by the APUC is not necessary and in some cases detrimental to subscribers. Effective in 1976 the FCC removed the obligation of state and local franchising authorities to regulate rates for basic cable service. Furthermore, it actually prohibited rate regulation of "pay television" i.e., services such as HBO, Showtime, Star Channel, etc. Even though I believe rate control is advisable in some small communities where there are not alternate entertainment sources and there is a captive audience; the subscriber in larger communities has may forms of entertainment available such as free network and public television, movie theatres and radio, which compete with cable television. In communities which fit the latter description, the free market influences rates and forces the operator to provide quality service at a reasonable price.

Deregulation of rates would encourage and facilitate the introduction of new services and development of cable television in Alaska. The high cost of rate studies and paperwork involved in changes of any kind place a burden on the cable operators and the resources of the APUC.

The marketplace can and will regulate rates effectively in those markets which have a variety of entertainment sources. Deregulation of the larger cities can only speed the advancement of cable innovation in Alaska.

Recommendation No. 7 - Upgrade salary levels for staff.

I strongly support a well educated, motivated and adequately compensated professional support staff. The APUC should have the resources to pay whatever salaries are necessary to attract and retain such a staff. In addition, it has been my observation that the APUC does not have sufficient staff to process its present workload on a timely basis.

Recommendation No. 9 - APUC should develop an index and cross-reference to its orders and decisions.

The introduction of a professionally designed and implemented index and cross-reference system would greatly benefit both the APUC and the utilities. At present it is very time consuming and expensive to track down relevant court decisions and precedents set by Commission decisions.

I would like to thank the Committee on Commerce for giving me this opportunity to voice my opinions. I would be happy to come to Juneau to give additional testimony or answer questions on this written testimony, if the committee so wishes.

Sincerely,

John E. McCaw, Jr.

Senator Brad Bradley
Chairman Senate Commerce Committee
Pouch 5, P.O. Box 3100
Juneau, Alaska 99811

Dear Senator Bradley: March 05, 1980

This is written with regard to the proposed hearing to be held on March 11, 1980 for the purpose of reviewing the activities of the Alaska Public Utilities Commission. On December 17, 1979 I made a statement on behalf of Alascom, Inc. before a Performance Review Hearing co-chaired by Senator Sturgulewski and Representative Fred Brown.

Rather than burden the Senate Commerce Committee with further duplicative testimony, there is attached a copy of the outline used in the presentation of the Company's testimony at that earlier hearing as well as a letter containing further clarification in response to specific questions of the Committee members. This material is being provided to each of the members of the Senate Commerce Committee as well as to Mr. Jon Mathison.

If you or any members of the Committee have any questions regarding this material please feel free to contact me.

Very truly yours,

ALASCOM, INC.

John E. McGill

Fairbanks, Alaska 99707

Attention: Mr. Allen Blume

Dear Mr. Blume: December 21, 1979

In accordance with the expressed wishes of the Co-Chairpersons at the Performance Review of the Alaska Public Utilities Commission Hearing held on December 17, 1979, there is attached a copy of the outline which I utilized in presenting my testimony to the Commerce Committee. I would be most grateful if you would see that all members of both the Senate and the House Committees were provided with a copy of this material.

In addition to the points set out in the outline of my presentation, there were certain additional points made during subsequent questioning which I believe might provide clarification on certain portions of my testimony. They are:

1. In response to an inquiry of Senator Sturgulewski, I indicated it was my belief that the distinction made between economic regulation and regulation for the purpose of certification might be an improper distinction. It was suggested that perhaps the regulation associated with certification should be ongoing in the area of quality of service provided by the certificated utility. This would result in economic regulation looking only at the level of rates and rate design. It would appear that such clarification could be provided through concise definitions in any legislation which might result from the performance review.

2. In response to Representative Brown's questions concerning the use of hearing officers, it was suggested that hearing officers could be reasonably expected to utilize their expertise in the regulation of divergent utilities. The basic underlying principles of utility regulation should be readily applicable by a hearing officer for regulation not only of telecommunications but also electric, pipeline, transportation utilities, etc. I was in agreement with the Chairman of the committee that in certain highly technical areas a specific hearing officer might be required to preside because of his expertise in the area of telecommunication separations, peak load pricing for electric utilities, etc. Additionally, it is possible that staff support for one area of regulation could provide needed assistance in another area of regulation.

I wish to express my gratitude to the Chairpersons and each of the members of the committee for allowing me the opportunity to testify before them and for their sincere expression of interest and concern in this area.

Very truly yours,

ALASCOM, INC.

JEM:bl
Attachment: Testimony Outline

12-19-79

TESTIMONY OF ALASCOM, INC. REGARDING THE PERFORMANCE REVIEW OF THE PUBLIC UTILITIES COMMISSION. DECEMBER 17, 1979

I. Alascom is a regulated utility providing long lines communications within the state and between Alaska and other points in the world.

A. Regulation of utilities is designed to protect the public interest; an elusive and sometimes difficult goal which by its very nature must consider conflicting claims.

B. Alascom has willingly submitted to regulation and recognizes the need for such submission.

C. Alascom supports continued regulation by the APUC in those activities subject to its jurisdiction.

II. Alascom shares the concerns of the APUC regarding the merger of the three regulatory bodies with one Commission.

A. Unclear that work load can be accommodated with one Commission.

B. Other states, having one Commission, are functioning in a mature circumstance while Alaska continues to be in its adolescence from a utility development point of view.

C. We do not oppose the consolidation of three Commissions into one, provided that it results in more efficient and effective regulation.

III. Alascom does not oppose the recommendations of the report to de-regulate CATV; refuse collection; telephone and electric cooperatives or small utilities with less than $100 K gross

revenes. There are, however, a few considerations we would offer:

A. Some regulation should be retained concerning pole attachment agreements between CATV operators and other utilities.

B. As a partner with telephone cooperatives and small telephone companies in the provision of communications, it is important for Alascom to be able to approach the Commission with matters disputed between Alascom and the operating telephone company. Such matters could include:

1. Level and quality of service.
2. Settlements between the companies.
3. Charges for through private line services.

The removal of such companies from economic regulation appears to indicate that they would be relieved of regulation as to rates, rate design and quality of service.

C. Although the de-regulated telecommunications company may be small or controlled by its own members, it can have a substantial impact on state-wide service if the quality and level of service is substandard.

IV. Alascom supports the need to clarify the statute and administrative code presently used by the APUC.

A. Although we recognize the validity of the particular recommendation in the legislative audit, we believe there are other areas requiring review.

B. We recommend that the Commission, through its staff, conduct a thorough review of AS 42.05 and 3AAC48 to further the benefits of this recommendation. We would

hope that members of the regulated industries would have an opportunity to participate in this review and recommend up front various amendments. An Industry Task Force with the APUC staff would be effective.

V. Alascom supports the recommendation that professional salaries be reviewed to determine whether they are adequate to attract and retain professional staff.

A. We would urge a comparable review of Commissioner's salary levels.

1. Alascom as a responsible public utility, constantly reviews its salary grades for various professional and/or exempt employees in order to assure itself that it offers compensation competitive in the labor market. These reviews lead us to believe that the Commissioner's salaries, in the present labor market may not be competitive enough both to attract and retain qualified personnel.

VI. Alascom does not believe it is proper for it to comment on the internal administration of the APUC. However, we do believe it is necessary to clearly delineate the statutory role of the Commission staff. On page 24 of the Audit Report there is mention of ex parte communications between the staff and the Commission when the staff assumes the role of a party to Commission proceedings.

A. When the staff is indeed a party to a proceeding (e.g. a rate case) the Commission does not have available to it

the necessary support and assistance the Commission would normally expect from its staff.

b. Solution

Alascom would support limiting the role of the staff to one of support for the Commission without designation as a party to proceedings. The staff would prepare material for the Commission to be used in conducting proceedings. The Commission would be expected, through this collective expertise to represent the public interest. Alascom would favor this solution.

VII. Alascom offers no opinion as to implementation of a time management system or collocation codes.

VIII. General Observations

A. The Performance Review does not comment on the level of staffing at the APUC. It is Alascom's opinion that the Commission is understaffed and unable to deal with the many questions brought before it in a timely manner. Nor does the Commission staff possess expertise in all areas adequate to evalute major policy questions in all of their facets. Too often telecommunications policy is formulated by default rather than by design. The public interest is not best served by this circumstance.

B. Alascom believes that it is necessary to limit regulatory lag statutorily. Such a limitation would be beneficial not only to the utility but also the ratepayer. Additionally, Alascom would suggest that consideration be given to utilization of hearing officers under the guidance of the Administrative Procedures Act.

APUC SUNSET REVIEW

CERTIFICATION:

Before a utility may operate in the State of Alaska application for a Certificate of Public Connvenience and Necessity must be made to the APUC as prescribed in AS 42.05.221 - 281. The Commission reviews the application and may reject, modify, or award a Certificate to the applicant. The Certificate may be as broad or as specific as the Commission chooses to issue and this is stated on the face of the Certificate.

AS 42.05 is quite specific as to the types of endeavors that are classified as utilities. Although, CATV is not mentioned in the statute the definition of telecommunications (AS 42.05.701 (2A and 8) states; "the transmission and reception of messages, impressions, pictures and signals by means of electricity." This clearly indicates that CATV meets the criteria of an utility and is subject to the provisions of AS 42.05.221 (Certification) to protect the public interest.

Therefore, the APUC may judge the qualifications of an operator on criteria established by the Commission. Due to the fact that the language used on the face of the Certificate, is prescribed by the Commission, an operator is subject to that criteria. Since no utility may operate without a Certificate the APUC has ultimate control as to the qualifications of an operator.

In other language contained in AS 42.05.221 - 281 no Certificate may be transferred without making application to the Commission. Once again, the APUC has complete control over new or existing services.

Since such a structure is in place to protect the public interest it does not make sense to remove the Certification of CATV from the APUC who is best equipted to handle it.

RATE REGULATION:

It is interesting to note that the language contained in AS 42.05 (Ch 113 SLA 1970) is permissive vs. mandatory regarding the regulation of utilities. The rate regulation and proceedings have evolved through regulations adopted and decrees of the Commission. Since the rate proceedings have become more complicated, during this evolution, they have also become longer and more costly. After the passage of ten (10) years, since the enabling legislation (SCSCS HB 202 am (S); CSHB 202 am, passed the House 30-7-3, April 9, 1969; SCSCSHB 202 am (S), passed the Senate 16-4, April 22, 1970; the House concurred in the Senate amendment) it is appropriate that the Legislative Audit and the Legislature's Sunset Review of the APUC is under consideration.

Rate deregulation of the Cable TV industry is an interesting concept due to the fact that an operators revenues are divided

between regulated rates and non-regulated rates and that may vary from a 20% - 80% split to a 50% - 50% split. Thus, two systems with gross receipts annually of $1,000,000 may be broken down as follows:

System J	
Gross Receipts	$1,000,000
80% non-regulated	$800,000
20% regulated	$200,000
System K	
Gross Receipts	$1,000,000
50% non-regulated	$500,000
50% regulated	$500,000

This indicates a disparity of $300,000 of revenue on regulated rates when the actual reason for the difference is purely economics based on agressive marketing and the variety in programing offered to the public and to the public's taste in viewing matter.

Another factor of economics that applies, is that the cost of a rate proceeding is passed through to the consumer. This is by decree of the APUC. An example would be that the operator of system "K" feels that due to economic conditions (i.e. renegotiated labor contracts, increase in energy costs, inflation, etc.) a rate increase of $1.00 per month per subscriber in in order. He makes application to the Commission for this increase and the proceedings goes forth. With the time involved and the special consultants, auditors and legal counsel the pass through, varies but, could make the increase granted $1.50 per month or a 50% increase over the original request and/or higher. This 50% is not reflective of expanded or improved service but just the cost of the rate proceeding that the consumer must pay.

Rate deregulation would save the consumer the cost of the proceeding and would let the economic conditions and consumer demand establish the rate charged for service provided. In most cases this would mean no increase or an increase that would be less than in the regulated circumstance. Under the regulated rate structure there is not a difference in proceedings according to the size of the operator's system. Thus, the system in a small community is subject to the same proceeding as a system in a large metropolitan area. And the small system may be less able to afford the cost as would the larger operator.

CONCLUSIONS:

It could be concluded that the public interest is best served by the APUC retaining the function of Certification and evaluating the operators and systems qualifications and rate deregulation to eliminate the disparity of controlled vs. noncontrolled revenues and the added expense to the consumer of the rate proceeding. It should be noted that the controlled and noncontrolled rates are first subject to the approval of the

FCC and this circumstance exisits because of an order by the FCC.

Applying this set of criteria to the Cable TV industry would allow the APUC full control over the operation of a system, through its authority under AS 42.05, and allow the market place, through economic conditions, to establish the rate. Provision should be made that after a period of time (3 to 5 years) the Legislature (perhaps through Legislative Audit) have an overview of the Commission and the industry to evaluate the workings of these circumstances and offer a further check and balance.

Another benefit would be the cost saving to the Commission. Those public funds (now used for rate regulation) could be applied to other functions, that APUC is charged with, and staff time would be available for other purposes.

In conclusion it is noted that AS 42.05 is specific in definition and procedure for Certification of a cable system where as the rate regulation provisions are not as specific and the public would be best served by rate deregulation of Cable TV by the Legislature.

FCC: Federal Communications Commission

STATE OF ALASKA

JAY S. HAMMOND, Governor

ALASKA PUBLIC UTILITIES COMMISSION
DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT

1100 MacKay Building
338 Denali Street
Anchorage, Alaska 99501

Phone (907) 276-6222

March 24, 1980

Senator W. E. "Brad" Bradley
Chairman, Senate Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Bradley:

As a follow-up to the Sunset Review of the Alaska Public Utilities Commission I am enclosing supporting documentation for additional Commission staff in order to carry out our existing responsibilities in a timely manner.

As the audit verified, the present level of staffing is inadequate to meet the responsibilities mandated to the Commission under AS 42.05. Testimony from utilities and ARECA during the public hearings of both the Senate and House Commerce Committees support this fact.

To summarize the contents of the enclosed package, 15 additional personnel would be needed if the APUC is to continue its ongoing responsibilities in a more responsive and efficient manner, i.e., the way "we would like to do the state's business". These personnel would be assigned to the following sections:

Engineering - (4)

- Engineer II - cable television
- Engineer II - energy
- Engineer I - energy
- Engineer I - telecommunications

Utility Financial Analysts - (3)

- UFA III
- UFA I
- UFA I

Tariff Analyst - (1)

TA III - (new classification)

Communications Carrier Section - (3)

Economist II

Research Analyst II

Clerk Typist III

Administrative Support for above personnel - (4)

Word Processing Supervisor

Word Processing Operator

Clerk Typist III

Clerk Typist I

The approximate salaries of these individuals is $603,000. Our current budget which is before the Finance Committees is approximately $1.6 million. This does not include an increase to raise the professional staff salaries to a comparable level; if that occurs, and the Commission is optimistic that it will, an additional $60,000 would be added to our current budget.

In order to give your committee an idea of the impact of the deregulation recommendations, the Commission provides the following observations: (all elimination of positions refer to the 15 additional positions and not existing positions)

Sunset Recommendation 2 - total deregulation of cable-television utilities: - eliminate one engineering position.

Sunset Recommendation 3 - total deregulation of garbage and refuse utilities: eliminate one financial aralyst.

Sunset Recommendation 4 - deregulation of telephone and electric cooperatives: if the 12 electric cooperatives and 7 telephone cooperatives elected deregulation by September 1, 1980, eliminate 1 financial analyst and 1 Engineer II.

Sunset Recommendation 5 - economic deregulation of all small utilities grossing less than $100,000: This would not materially affect personnel requirements.

Whether or not which, if any, adminstrative support positions could be eliminated would depend on the implementation of Sunset Recommendations #2 - #5.

In summary, 4 of the 15 additional professional personnel would not be required if the legislature deregulated cable-television, and garbage, and if all REA co-ops elected deregulation by September 1, 1980.

Sincerely,

Carolyn S. Guess
Commissioner

Enclosure
CSG/rt

ALASKA PUBLIC UTILITIES COMMISSION

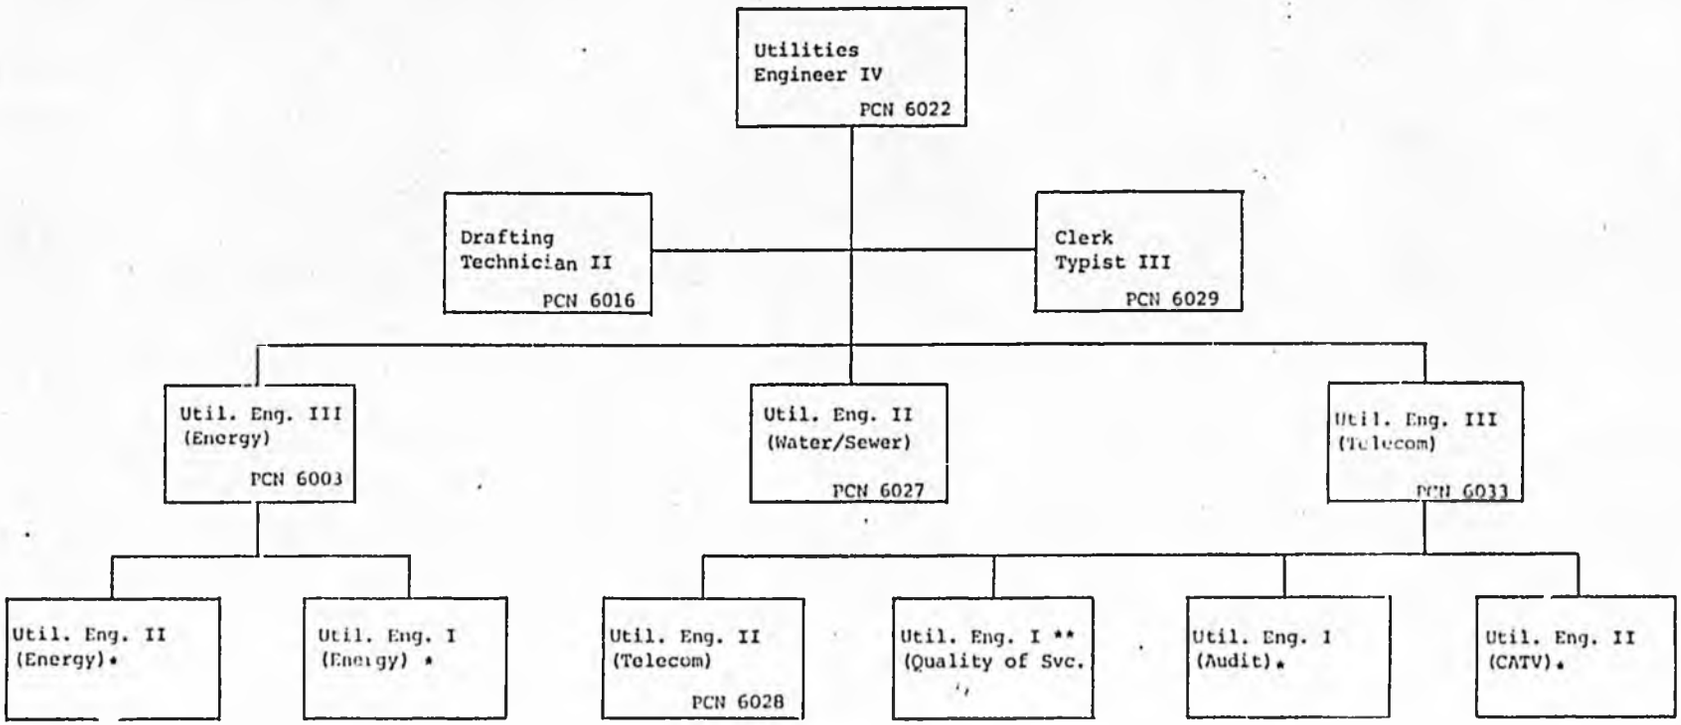
ENGINEERING ORGANIZATION CHART



*New position requested

**New position requested in Governor's FY81 Budget Request

Principal Programs in Engineering

Rate Base

1. Audit Continuing Property Records and determine whether plant is used and useful.

This involves auditing on a sampling basis and requires the use of layout drawings and staking sheets to determine the actual location of the equipment. Physical testing of telephone equipment (amplifiers, etc.) may be required to assure that particular equipment is actually in use.

2. Determine if rate base is reasonable or unduly inflated due to poor decisions.

Work done on occasional basis at the Commission has revealed that some utilities do not have sufficient control over the rate base. Examples include: 1) Plans based on outdated forecasts done in the lower 48 which also ignored higher Alaskan labor rates have resulted in uneconomical additions to plant and 2) projects placed in limbo before they materialize accumulate excessive engineering labor hours before they became active.

3. Audit of Work Orders and associated accounting.

This is necessary to establish the reasonableness of material, engineering, labor, supply and overhead charges to determine the proper allocation between capital and expense costs, and to insure prompt capitalization and retirement of property.

4. Review depreciation rates and studies.

In many locations of Alaska, depreciation rates may differ from industry norm due to the unique conditions encountered.

Rate Design/Tariffs

1. Review allocation studies.

This involves detailed studies of equipment and of the effort involved to put it into service which will determine a fair and reasonable allocation of charges to the various types of services offered by utilities. In telecommunications utilities tend to assign excessive costs to noncompetitive services.

2. Review reasonableness of material, engineering and labor rates used to develop individual tariffs. Work is similar to that described in 1 above and may include the witnessing of actual installations.

3. Approve portions of tariff text that is related to equipment and engineering.

Quality of Service

1. Develop and update service standards.

To date, only telecommunications service standards have been promulgated (3 AAC 52.200-3 AAC 52.340). Standards should be developed for electric, water/sewer, and other utilities. Once developed, standards must be updated to keep current with changing conditions.

2. Field Testing

Only actual on site testing can determine the quality of service provided. It is planned to have an Engineer I "on the road" about 40% of the time who will use specialized test equipment and will audit outage logs to determine the level of service provided by utilities. The engineer will also analyze service problems and determine whether they are caused by faulty or insufficient equipment or poor management control. Emphasis will be placed in telecommunications which is particularly sensitive to service problems where localized minor problems often affect the entire network. For example, poor operator answer time, aside from irritating customers, causes needless use of long distance circuits for the sole purpose of ringing the operator. This in turn distorts usage data and leads to major expenditures for unnecessary equipment additions. Another example is the underprovision of low cost terminal equipment which causes backups in the satellite network.

3. Review of service reliability and contingency plans. Age and reliability of primary and backup equipment will be considered to determine their adequacy. It is planned to study the economic feasibility of providing equipment diversity. Commission involvement seems also necessary to encourage utilities to develop and maintain contingency plans for emergency situations.

4. Review adequacy of system design.

On site review of existing and planned additions to facilities frequently reveal bottlenecks and weak spots which require urgent correction. Besides on site review, it is planned to maintain usage trend data of principal equipment and facilities to pinpoint potential deficiencies.

5. Test accuracy of long distance billing.

Long distance billing is performed by equipment that is integral with central office switching machines. For this reason, the testing of the accuracy of this billing lies with the APUC rather than the Weights & Measures Section.

6. Investigation of Quality of Service Complaints.

This work consists in conducting special investigations related to specific customer complaints.

Management Review

1. Evaluation of Utility Construction Programs.

Construction programs will be reviewed to determine whether they are adequate to meet current and future service needs. Work will consist in ferreting out weak points and in determining whether plans are compatible between utilities. Included will be discussion with utilities whether corrective action is practical and a review regarding practical implementations of new or alternate technologies (e.g, energy sources). It is expected that economic studies will be made or reviewed where alternate courses of actions are possible. It is believed that Commission review of construction programs is especially necessary when such programs are dictated by parent companies in the lower 48 without much regard or appreciation of Alaskan needs.

2. Productivity Studies.

Labor costs and productivity will be examined for reasonableness. This will include a comparison of productivity rates between companies and include a careful review of cases where productivity rates in Alaska deviate from those in the lower 48.

3. Maintenance Programs.

Utility maintenance programs will be evaluated through examination of records and routine maintenance procedures.

4. Investigation of Management Trcublespots.

Programming is now underway to establish computer auditing of utility annual reports. It is planned to have computerized ratio and trend analysis pinpoint possible management trouble spots which subsequently will be investigated (e.g., strong deviations from the mean of General & Administrative expenses per customer; excessive uncollectibles per customer, etc.).

Certification/Transfers

Applications for, or transfers of a certificate of public convenience and necessity require an investigation in the applicant's fitness, willingness and ability to operate the contemplated utility service. Engineering applies this criterion to the review of the applicant's plans, of his management, engineering and operational strengths, and coordinates with the finance section in determining financial fitness.

Special Projects

These will primarily consist in the establishment of new methods and procedures for the engineering section.

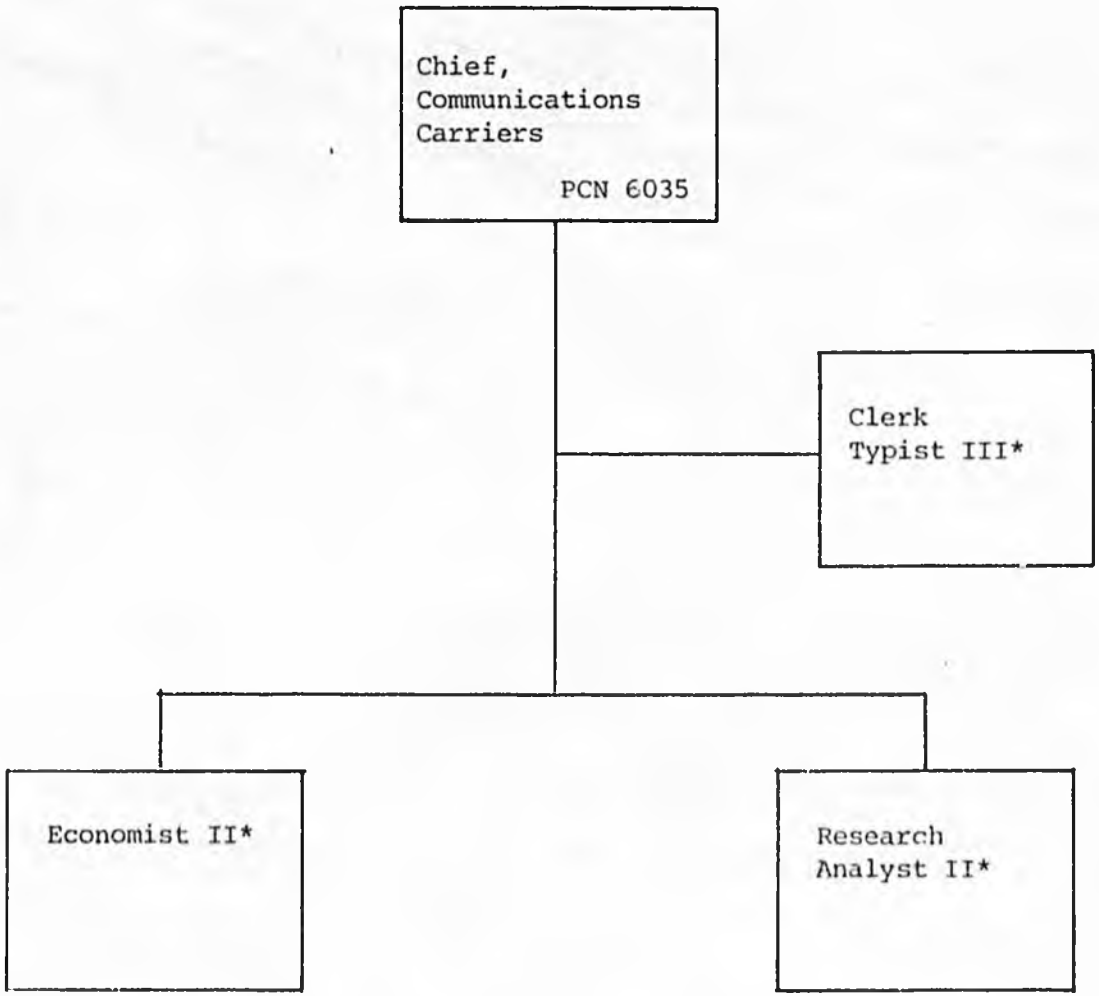
ALASKA PUBLIC UTILITIES COMMISSION

COMMUNICATIONS CARRIERS ORGANIZATION CHART



*New position requested.

PRINCIPAL PROGRAMS IN COMMUNICATION CARRIERS

COMMUNICATIONS ACT REWRITE

Congress and the Administration are currently considering amending the Communications Act of 1934, the legislation that created the Federal Communications Commission. Four bills have been introduced, two in the Senate and two in the House, and the Administration is aggressively promoting its own proposal through the National Telecommunications and Information Agency.

Some of the proposals would drastically alter the arrangements under which telephone companies are interconnected. Specifically at issue is the division of toll revenue between long distance companies and local companies. One proposal is that the present system of toll settlements be replaced by a system of "access charges".

Just as the viability of telephone service in Alaska is sensitive to specific toll settlement arrangements, it would be similarly sensitive to specific access charge or other arrangements. It is essential that the APUC monitor rewrite progress and provide input as appropriate.

TOLL RATE DESIGN

In considering Alascom's request for a permanent general rate increase (Docket U-78-4) the APUC has elected to separate the issue of toll rate design and first consider the

question of an "across the board" rate increase. The first phase of the proceeding is expected to reach a conclusion in the near future and the Commission will soon begin consideration of rate design.

Rate design is the process whereby, having determined the utility's overall revenue requirement, the Commission determines specific rates for specific services. Toll rate design answers such questions as whether a call from Anchorage to Iliamna should cost more than a call from Anchorage to Juneau, considering that the distance is smaller but the cost of completing the call may be greater.

Toll rate design is a very complex matter and will require a great deal of attention by the Section as well as the services of one or more consultants.

RURAL TELEPHONE DEVELOPMENT

Although telephone service is generally available to all Alaskans, many villages are served by only a single telephone. In the past few years, few companies have applied to the APUC for certification to provide local exchange service in villages, and a small number of villages are presently receiving such service.

Local exchange operation in a village is, unfortunately, an economically marginal operation. The viability of a local exchange company is very sensitive to the toll settlements arrangements (or access charge arrangements that may be instituted by a

Communications Act rewrite) in effect. To insure continued rural telephone development, it is essential that the Commission, through this Section, monitor the progress of rural telephone developments and the economic health of the small local exchange companies.

STATE NETWORK DEVELOPMENT

As the State's telecommunications needs grow, so its telecommunications network must grow to meet those needs. The network must provide a sufficient number of circuits of adequate quality, and in addition, the circuits must be reliable.

The network will meet needs only if it is developed in accordance with good engineering practice. To insure proper network development, the Section must, with the support of the Engineering Section, monitor the process.

D. Finance Section

- Organization Chart

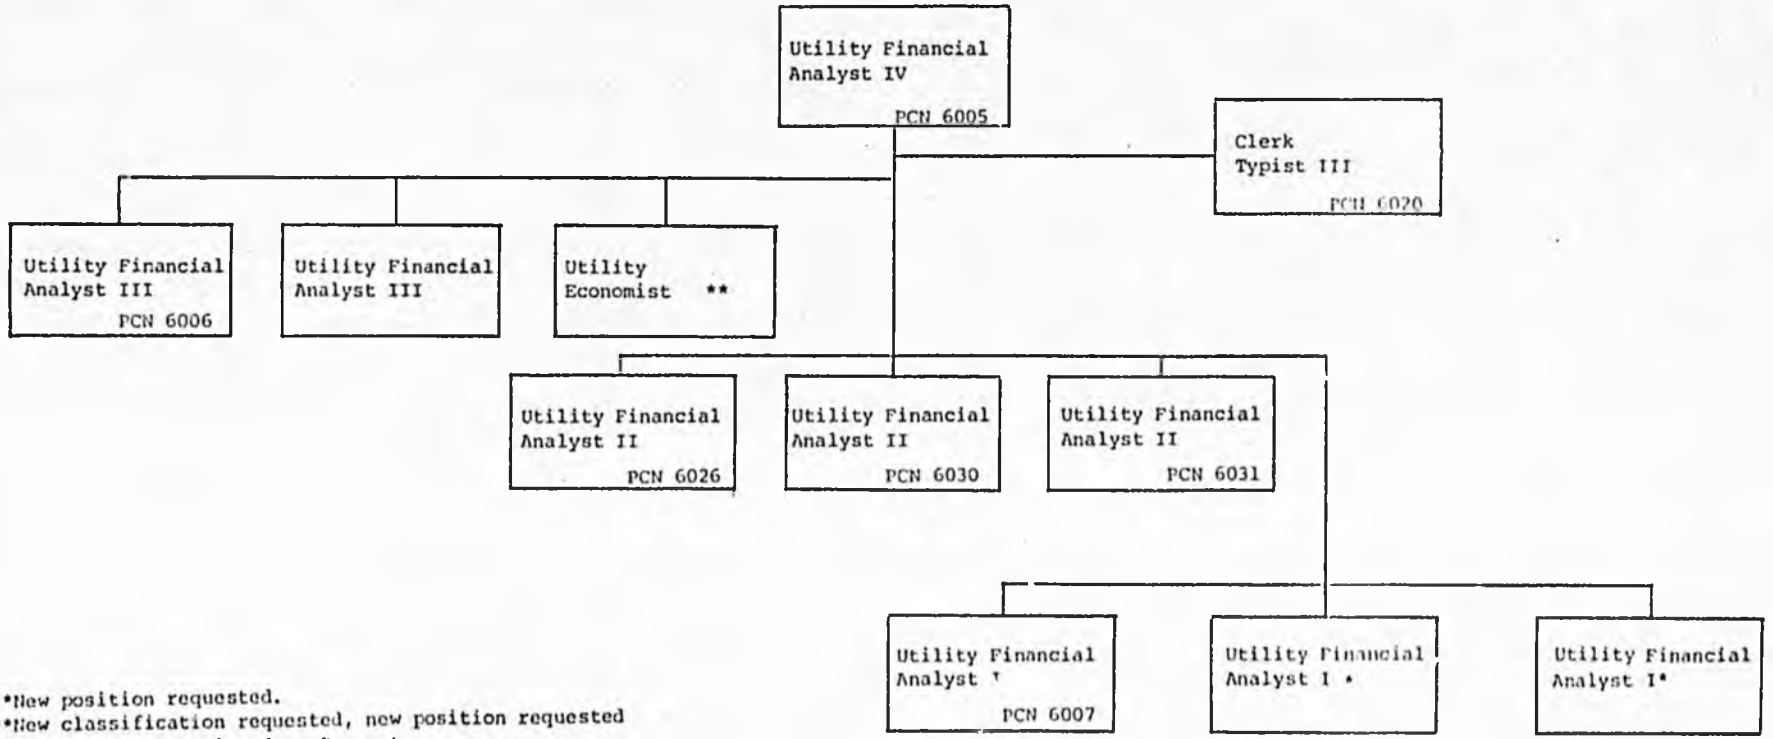
- Adjusted FY 81 Budget

ALASKA PUBLIC UTILITIES COMMISSION

FINANCE ORGANIZATION CHART



*New position requested.
**New classification requested, new position requested in Governor's FY81 Budget Request.

PRINCIPAL PROGRAMS IN FINANCE

Interim Rate Requests

1. Review filing for compliance with 3 AAC 48.275.

2. Review comparative balance sheets and income statements, tracing amounts shown to annual report filings.

3. Review filing for mathematical accuracy and consistency of figures used in all schedules.

4. Review previous rate request filing granted by the Commission for the same utility and review available history of the utility.

5. Review utility surcharge history, if any, and effect of its incorporation in present filing.

6. Note any discrepancies found in performing steps 1 through 4 and investigate to the extent possible without on-site audit.

7. Review utility determined revenue requirement and remove items traditionally disallowed by this Commission.

8. Compute revenue requirements; compute revenue deficiency; and determine whether there is a prima facie showing by the utility that its present rates are confiscatory.

9. Write tariff action memorandum on utility request, explaining results of steps 1 through 8.

10. Write interim order expressing Commission action on filing.

Permanent Rate Requests

1. Follow steps 1 through 6 as shown under "Interim Rate Requests".

2. Write tariff action memorandum on utility request, explaining results of step 1.

3. Write order suspending permanent rates or expressing other Commission action on filing.

4. Based on steps 1 through 3, determine scope of on-site audit necessary.

5. Perform on-site audit.

   a. Follow-up on discrepancies found in step 1.
   b. Follow-up on particular Commission concerns.
   c. On a sample basis, verify balance sheet (except plant), income statement and revenue requirement figures shown in filing by tracing final figures to source documents.
   d. Verify that proforma adjustments are known and measurable.
   e. Verify compliance of accounting records with Uniform System of Accounts prescribed for the utility.
   f. Note general condition and operating environment of the utility.
   g. Investigate elements of revenue requirement traditionally disallowed by the Commission. Revenue requirement analysis includes operating expenses, taxes, depreciation, rate base, cost of debt, and return on equity or TIER. Rate base includes net plant and a working capital component.

6. Compute revenue requirement, revenue deficiency, and percentage across-the-board increase required by the utility, based upon the results of steps 1 through 5.

7. Write Staff pre-filed testimony, presenting Staff position on the case and explaining the results of steps 1 through 6.

Rate Design

1. Review cost-of-service study prepared by utility in support of its proposed rate design.

2. Audit, as necessary, to verify cost allocations.

3. Research, as necessary, to determine validity and appropriateness of utility cost-of-service and rate design methodology.

4. Perform cost-of-service study when necessary.

5. Write Staff pre-filed testimony, presenting Staff position on the case and explaining the results of steps 1 through 4.

Rate Development - Telephone

1. Review rate development worksheets for conformance with acceptable Commission methods; and analyze appropriateness of any new method.

5. Perform on-site audit.

   a. Follow-up on discrepancies found in step 1.
   b. Follow-up on particular Commission concerns.
   c. On a sample basis, verify balance sheet (except plant), income statement and revenue requirement figures shown in filing by tracing final figures to source documents.
   d. Verify that proforma adjustments are known and measurable.
   e. Verify compliance of accounting records with Uniform System of Accounts prescribed for the utility.
   f. Note general condition and operating environment of the utility.
   g. Investigate elements of revenue requirement traditionally disallowed by the Commission. Revenue requirement analysis includes operating expenses, taxes, depreciation, rate base, cost of debt, and return on equity or TIER. Rate base includes net plant and a working capital component.

6. Compute revenue requirement, revenue deficiency, and percentage across-the-board increase required by the utility, based upon the results of steps 1 through 5.

7. Write Staff pre-filed testimony, presenting Staff position on the case and explaining the results of steps 1 through 6.

Rate Design

1. Review cost-of-service study prepared by utility in support of its proposed rate design.

2. Audit, as necessary, to verify cost allocations.

3. Research, as necessary, to determine validity and appropriateness of utility cost-of-service and rate design methodology.

4. Perform cost-of-service study when necessary.

5. Write Staff pre-filed testimony, presenting Staff position on the case and explaining the results of steps 1 through 4.

Rate Development - Telephone

1. Review rate development worksheets for conformance with acceptable Commission methods; and analyze appropriateness of any new method.

2. Review rate development factor methodology for conformance with acceptable Commission methods; and analyze appropriateness of any new method.

3. Trace components of rate development factor computations to utility's most current operating results; investigate any discrepancies.

4. Review application of elements in steps 1 through 3 in deriving rates for service and equipment; reconcile differences between Staff and utility rates derived.

5. Write tariff action memorandum or pre-filed testimony, presenting Staff position on the case and explaining the results of steps 1 through 4.

Certifications

1. Review applicants for financial fitness by reference to source and cost of financing, equity structure, form of organization, and financial history of prospective owners.

2. Review pro forma rates for reasonableness based on knowledge of utility type (and inherent costs) weighted cost of capital, and elements allowed by this Commission in setting rates.

3. Write memorandum or pre-filed testimony, presenting Staff position on financial fitness of applicant.

Certificate Transfers

1. Review applicants for financial fitness by reference to form of organization and financial history of prospective owners.

2. Write memorandum or pre-filed testimony presenting Staff position on financial fitness of applicant.

Other

1. Perform financial and statistical analyses, accounting and regulatory research, and investigations as necessary.

2. Review utility annual report filings for unusual items and to determine the return on rate base earned from operations.

3. Compile information from utility annual reports and rate increases granted for incorporation into the APUC annual report of operations.

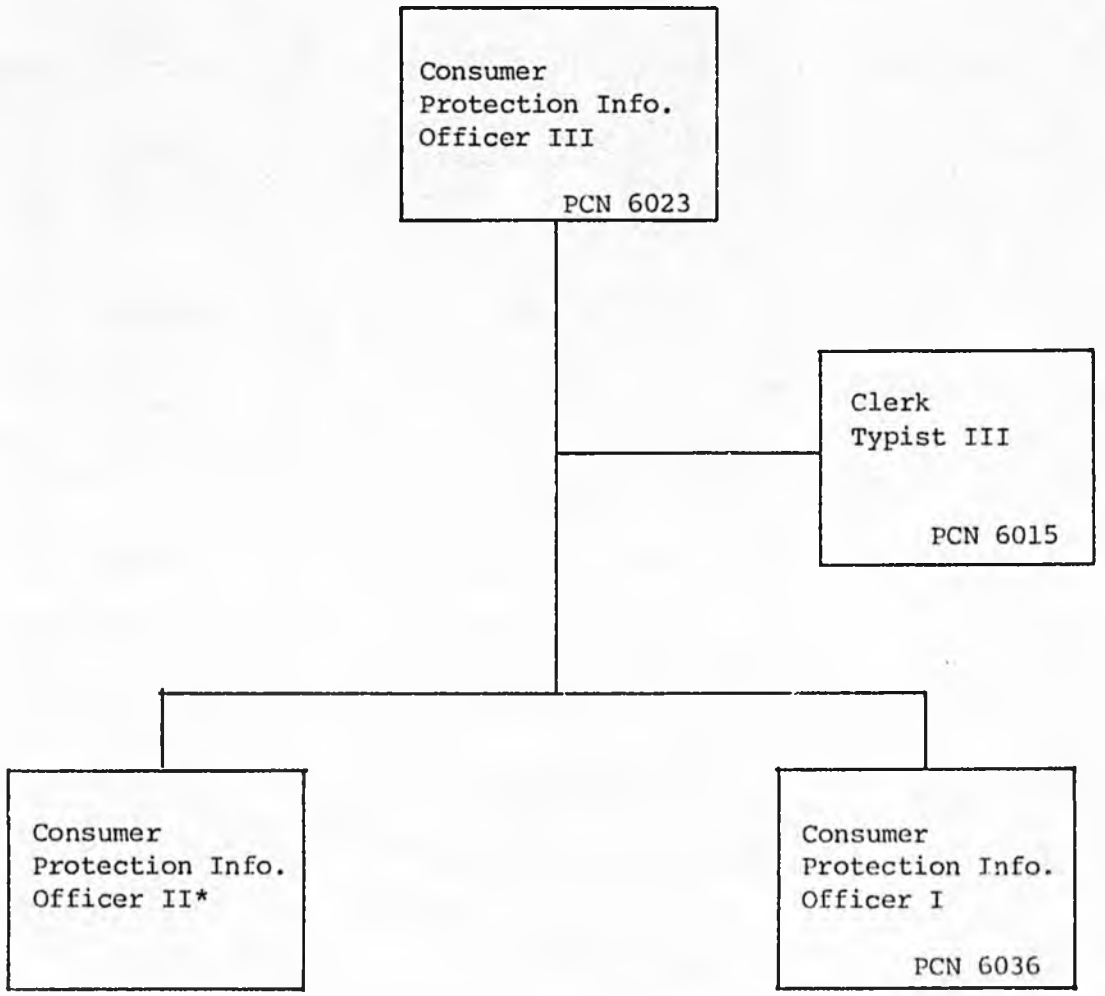
F. Consumer Protection

- Organization Chart
- Principal Programs
- Adjusted FY 81 Budget

ALASKA PUBLIC UTILITIES COMMISSION

CONSUMER PROTECTION ORGANIZATION CHART



*New position in FY81 Governor's Budget Request.

PRINCIPAL PROGRAMS
FOR
CONSUMER PROTECTION SECTION

Informal Complaints

It is a primary function of this section to provide a forum for utility customers to air their grievances. Also, it must resolve or attempt to resolve these complaints informally rather than bringing matters formally before the Commission unnecessarily.

Through the implementation of toll-free calling and the strengthing of this section, customers of the regulated utilities throughout the State will have increased access to the Commission. While the number of complaints received will increase, the overall length of time required to respond and resolve customer complaints will be compressed. Thus, those customers with complaints which require timely action will be accommodated. Also, the development of a broader information base regarding consumer issues will occur from which the Commission may make decisions.

Under this program, the Commission will receive complaints from a broader base of utility customers. As a result, the insight which the Commission has into utility customer problems will be expanded and its knowledge base supplemented. From this additional information, the section will be better able to define problems and develop recommendations to meet immediate and future needs. In other words, Staff's diagnostic and prescriptive capabilities will be enhanced.

This program will take into account the increased number of substantive informal complaints being received. Many of the consumer issues which are evolving are not necessarily resolved by either current or historic standards. More time will be allocated to the investigative process which will result in the proposal or negotiation of equitable solutions based on current conditions.

Formal Proceedings

This section must from time to time recommend to the Commission that formal action be instituted when warranted by the circumstances. Under this program, additional time will be allocated to prepare for participation in proceedings which are instituted as a result of the section's recommendation. Also, time will be available for review of utility tariff filings which seek to change or implement the rules and regulations under which utility services are offered to the public. Additional time will be used to meet with the utilities and applicants to provide assistance in the evaluation of their tariffs and to propose both formally and informally those revisions or rules reflective of both utility and customer requirements.

This section's participation in the rule-making process will increase. This activity will include researching and drafting of proposed rules as well as the other phases of their promulgation, including hearings.

Education and Information

Consumer reaction to the ever increasing financial impact that utility services have on their daily lives has created a need for a clearer understanding by the public of utility operation and regulatory matters. By increasing its informational programs and implementing educational projects, the public will be better able to wisely use those services offered by the utilities.

The first year of the educational program will consist primarily of identifying target areas and the means by which they may effectively be approached.

Although the Commission has an on-going public information program, its regularity must be reinstituted and its substance revitalized. This will be accomplished at the time the section is strengthened.

RECEIVED
OCT 5 1979
LEGISLATIVE AUDIT

October 5, 1979

Mr. Gerald L. Wilkerson
Legislative Auditor
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

The following is the response of the Alaska Public Utilities Commission to the Performance Review of the Alaska Public Utilities Commission by the Division of Legislative Audit.

Recommendation No. 1

The Alaska Public Utilities Commission, the Alaska Transportation Commission and the Alaska Pipeline Commission should be combined into a single regulatory commission.

The Alaska Public Utilities Commission (referred to hereinafter as APUC or Commission) believes it is appropriate to re-evaluate the merits of a single commission mode of regulating utilities. At this time, however, the APUC cannot unequivocably state that the three regulatory commissions should be combined into a single agency because no documentation that would support that conclusion has been made available to the Commission. The Commission believes it is misleading to make a recommendation of this significance solely on the basis of a comparison of "schemes" used by other states. Certainly the dominant regulatory framework in other states lends credence to the proposition that it is timely to reassess the value to the Alaska public to continue three separate regulatory agencies.

A tabular comparison of various regulatory frameworks is presented to support this recommendation. While informative, the Commission does not believe this analysis is sufficient

documentation on which to base this substantive recommendation. As the analysis indicates, the number of Commissioners has a direct relationship to the number and type of professional Staff. This, in turn, is influenced by its methods of operation, the scope of a Commission's statutory responsibilities, and the number of utilities subject to regulation.

The Commission offers the following comments regarding the advantages postulated by the auditors of a single regulatory agency.

(1) The Commission concurs that a single regulatory agency could result in a reduction in the number of regulatory Commissioners. However, someone must preside at hearings; and, therefore, the establishment of hearing officer positions would be required to offset the diminution in Commissioners. There are jurisdictions that utilize hearing officers to conduct public hearings and to draft proposed decisions for Commissioners' review and determination. The APUC Commissioners hear cases and write substantive orders without the benefit of such Staff* assistance.

(2) Because of the specialization required of the Commission's professional Staff, i.e., expertise in telecommunications, electric, gas, sewer and water utilities, the Commission questions the degree of flexibility that would exist with a combined Staff. The Commission believes that the interchangeability of staff could be limited in practice to emergency-type situations. An analysis of the regulatory responsibilities of the Alaska Pipeline Commission and the Alaska Transportation Commission should provide more factual information in this regard. The Commission does agree that a combined clerical support Staff could provide more flexibility and create a more efficient flow of paperwork.

(3)(4)(5) The Commission believes that joint hearing and reproduction facilities and a shared publications library would provide for more efficient services, not only for a consolidated regulatory body but also for the existing regulatory Commissions. To this end, the Commission has recommended in its last two budgets that the three Commissions be physically co-relocated to a facility that would permit realization of these economies.

---

*The average regulatory commission in the United States has approximately 200 Staff members as contrasted with 32 Staff assigned to the APUC.

(6) The Commission does not have enough firsthand experience with sophisticated word-processing equipment to comment on this possible reduction.

The APUC strongly supports the concept that adequate human resources, whether in the form of commissioners, hearing officers or other staff, must be provided if the regulatory duties and responsibilities delegated by the Legislature are to be performed in an efficient and effective manner. Moreover, sufficient resources to perform the job are as important under the existing regulatory configuration as they would be in a prospective consolidation into one agency.

Reliance on outside regulatory formulae to support a merger should also be tempered by recognition of circumstances which make regulation unique in Alaska. For example, the APUC is still actively involved in the certification of utilities, in marked contrast to most jurisdictions in the "Lower 48" which have been fully carved up into utility service areas. This is especially pertinent not only to rural Alaska which is in a developmental stage in the utility arena but also extends to the State's largest metropolitan areas where telecommunications utilities have been the subject of recent certification proceedings. While not commanding the newspaper headlines generated by rate increases, the certification process is critical to the public protection function of regulation because it establishes the foundation for a utility's future service and rates.

The APUC believes that concurrent with the sunset review of the Alaska Pipeline Commission, the Division of Legislative Audit or an independent consulting firm should perform a cost-benefit analysis of combining the three regulatory commissions into one. The study should examine both the existing and alternative regulatory frameworks to identify the potential operational and financial gains and losses to be realized under a single consolidated agency.

If the desirability of implementing this recommendation is affirmed by such an in-depth analysis, the Commission strongly believes that the Legislature should assess the scope of the existing responsibilities of the three regulatory commissions before the decision to merge is made. Should the Alaska Transportation Commission continue to regulate dumptrucks and helicopters? Should the APUC continue to regulate

garbage and cable television utilities? What will be the magnitude of the workload of the Pipeline Commission after the TAPS case is completed? Resolution of these and other policy issues would facilitate the Legislature's efforts to define the appropriate regulatory framework for Alaska inasmuch as a determination of whether one commission would better serve the public interest than the existing three do is, in part, dependent on what responsibilities would reside with the single successor agency.

It may be difficult to divorce the mechanics of a merger from any assessment of its practicality and desirability. In this regard affirmative action to consolidate the existing regulatory agencies should include a detailed implementation plan with a realistic timetable which acknowledges that preservation of pending, current, and past decisions of each Commission is critical to the successful transition to one regulatory agency.

The fundamental purpose of the Alaska Public Utilities Commission is to protect the public by awarding certificates of public convenience and necessity to qualified providers of utility services and to ensure that certificated utilities, except where exempted by statute, provide adequate, efficient, and safe services and facilities to the public at just and reasonable rates, terms, and conditions. These two major functions are broadly defined as certification and economic regulation. It should be noted that the consumer protection function of the Commission falls within the broad definition of economic regulation.

The following four recommendations have a common theme. They propose to reduce the scope of the Commission's duties and responsibilities under AS 42.05 by deregulating certain types and sizes of public utilities. These recommendations reflect the audit team's awareness of the acute strains that the APUC's current workload places on its limited resources and ability to competently perform the responsibilities delegated by the Legislature. Additionally, it represents some of the current thinking regarding the necessity and desirability of regulation. After consideration of these

factors, the auditors identified those utilities where they perceived deregulation would have the least detrimental impact on the Alaskan public.

The Legislature faces the choice, implicit in the audit, of prioritizing the responsibilities of the APUC by deregulation of certain utilities or the allocation of adequate resources to the agency to fulfill its statutory assignments. The ultimate policy determination of which, if any, utilities should be exempt from regulation resides exclusively within the purview of the Legislature as the sole source of the Commission's authority. If the deregulation course is elected, it is the Commission's position that the audit team's priorities are generally acceptable with some specific exceptions. These exceptions and the Commission's view of the potential impact of deregulation in the recommended areas are provided to ensure that the ultimate decision is made with the experience and information of the APUC in concert with input from the private sector and the consuming public.

Recommendation No. 2

AS 42.05 should be amended to allow the Alaska Public Utilities Commission to cease all certification and regulation of cable television.

The Commission believes that the definition of telecommunications as found in AS 42.05.701(8) mandates the certification and regulation of cable television (CATV).

The Commission believes that certification should be required for CATV utilities providing service to 10 or more customers. This provides certain minimal protection to the public with respect to the fitness and ability of the serving utilities as more fully discussed in the response to Recommendation #5. More importantly, certification is necessary to assure the orderly development of basic telecommunications services throughout Alaska in light of nationwide technological developments and regulatory trends.

Current legislation before Congress and a more liberal regulation policy by the Federal Communications Commission indicate that telephone companies will shortly be in the position to offer broadband communications* which could

*Broadband communication includes the full range of communication information including, but not limited to, basic telephone, data, and television.

include facilities for television distribution. Ultimately, basic telephone and television service could become so commingled that the economic viability of regulated communication services could be affected.

In some jurisdictions, municipalities award a franchise to a CATV utility. While on the surface this appears to be an attractive alternative to state regulation, the record in recent CATV certification proceedings involving Anchorage and Fairbanks indicates that in the "Lower 48" there has been political abuse of this process and that municipalities which do not have technical and rate-making expertise are unduly burdened by the responsibility to assess which applicant best serves the public interest. In place of economic regulation, municipal bodies have in some instances substituted a shortening of the franchise period, hoping to influence the franchise holder to charge reasonable rates and provide adequate service -- a practice that could backfire and leave the consumer without any service.

The APUC has determined that the public interest is not necessarily served by economic regulation of small cable television utilities and has exempted small CATV's from regulation in a number of instances. These are Eielson Air Force Base, Metlakatla, Craig, Klawock and Thorne Bay. While independently assessing the "nonessential" quality of cable television services, the Legislature should be aware that the APUC files are replete with complaints against CATV utilities, particularly from rural parts of Alaska where there is a captive audience with no alternative form of entertainment and where the entities providing the service have their base of operations outside the State of Alaska.

Recommendation No. 3

AS 42.05 should be amended to allow the Public Utilities Commission to cease certification and regulation of those utilities furnishing collection and disposal service of garbage, refuse, trash, and other waste material.

The Commission supports the elimination of regulation of garbage utilities from its responsibilities and agrees with the economic justification articulated by the sunset auditors.

The Commission would be remiss, however, if it failed to apprise the Legislature of its concerns regarding deregulation

of this public utility service. Based on Commission experience there is a need for some governmental entity to oversee garbage, refuse and disposal operations. Garbage and refuse disposal has long been considered an essential public health and sanitation service, more frequently than not owned, operated or contracted for by municipal governments. The impact of deregulation in this area would be felt primarily by a small percentage of consumers residing outside municipal boundaries. The Commission believes it would be in the public interest to ensure that the municipalities have sufficient extraterritorial jurisdiction under AS 29.48.037 and AS 29.48.040 to oversee the entirety of these operations.

The Commission would also point out to the Legislature that the Department of Environmental Conservation (DEC) currently issues permits for sanitary landfill use and promulgates regulations governing solid waste management. In this regard, the Legislature may wish to consider the DEC as an alternative to municipal regulation of garbage and refuse. The adequacy and availability of a sanitary landfill to a garbage utility is frequently a significant problem which has been brought to the Commission's attention. Because of DEC's current responsibilities in this area, it is appropriate to consider this alternative which would provide end-to-end regulation of garbage utility services.

If a legislative determination is made that garbage utilities should come under the jurisdiction of a state regulatory commission, it may be more in keeping with transportation regulatory practices for the Transportation Commission to resume this function.

Recommendation No. 4

AS 42.05 should be amended to allow non-profit telephone and electric cooperatives to petition for withdrawal from APUC economic regulation.

The Alaska Public Utilities Commission will concur with this recommendation. However, it is the Commission's experience that consumers of electric and telephone cooperatives frequently perceive little difference between co-ops and other public utilities, even though the members own the business and elec the board of directors. The Commission believes that if AS 42.05 is amended to incorporate this recommendation, it would be desirable to promulgate regulations establishing

an orderly procedure for withdrawal from economic regulation by cooperatives.

To further expand AS 42.05.711(b) to allow cooperatives that have withdrawn from economic regulation to subsequently return to the full regulatory jurisdiction of the Commission, while a desirable safeguard of the public interest, could have a detrimental effect on the ability of the APUC to administer and finance its on-going functions. For example, relevant Commission experience is the refusal of the Rural Electrification Administration to provide additional loan monies to the Tlingit-Haida Regional Electric Authority (THREA) until it submitted to APUC jurisdiction. THREA acceded to the jurisdiction of the APUC in December, 1978, because of its financial crises. Significant concerns of the THREA ratepayers and the mayors of the respective villages in which the utility is located has required the Commission to expend dollars for consultant services that would otherwise have been available to fund other existing responsibilities of the agency. Realizing that the decision to return to economic regulation will likely occur only when the cooperative is experiencing significant difficulty, the Commission believes it would be necessary and appropriate to minimize any impact on its existing workload by promulgating regulations governing reinstatement of full regulation after such an election.

It should also be noted that an unregulated telephone cooperative could cause unnecessary expansion of toll facilities of the long lines carrier. A local telephone cooperative not only has an impact on its primary customers but on those who utilize one or two communication networks desiring access to the local exchange. For example, a small deficiency in an unregulated telephone central office switch can deny access to 10 percent of incoming toll calls. It is uneconomical to have a telephone call cross the lower 48 states and be transmitted to the satellite and an Alaska terrestrial facility only to be denied at the terminating central office.

Recommendation No. 5

AS 42.05 should be amended to exempt from economic regulation all utilities with annual gross revenues not exceeding $100,000.

The Commission concurs with this recommendation.

However, the Commission believes it is in the public interest to continue to require certification of all utilities providing service to 10 or more customers, irrespective of annual gross revenues.

A certificate of public convenience and necessity from a qualified independent agency assures the consuming public that a utility is fit, willing and able to provide service. In addition, a certificate provides economic protection to the small business from unauthorized or potentially ruinous competition. The Commission believes that certification is particularly important to protect the public interest when a small utility will be physically tied to a larger utility network, such as the case of a local exchange telephone company interconnected to the long lines telecommunications carrier or an electric grid system connecting more than one power utility.

Based on the APUC's 1978 Annual Report, 13 utilities currently subject to economic regulation would become exempt if this amendment were approved with the $100,000 cutoff level. The majority of the 13 utilities are small water companies which historically have generated numerous consumer complaints. These complaints have required a significant commitment of time by the APUC Consumer Protection Section for its investigation and possible resolution and by Commissioners and Staff in public hearings. The Commission would be remiss if it did not point out to the Legislature that the volume of complaints received from the consumers of these relatively small utilities indicates reliance on the public protection provided by regulation for adequate service. Because water service is a necessity, some entity, be it legislative or administrative, will inherit the consumer protection function that the APUC has provided.

The comments of the APUC's Chief of Finance are germane and the Commission believes they should be drawn to the attention of the legislature:

"Water bills have a tendency to be lower than electric or telephone. Therefore, I question whether a gross revenue standard is a fair reflection of the number of people involved. I do not believe the same gross revenue cutoff should be applied to all types of utilities. I think the deregulation of electric and telephone under $100,000 gross revenues is a good recommendation. Water and sewer should have a different standard.

Some of our most difficult and demanding cases are water utilities. The filings are often poor and inaccurate and accounting records are often nonexistent or in 'shoe-boxes.' We truly protect the public in our review of these utilities. Any given case may require a great deal of time on our part, but I feel it is time well spent. Unlike garbage collection, water service is definitely a necessity."

Recommendation No. 6

The statutes and regulations governing the Alaska Public Utilities Commission should be revised.

The Commission agrees that its statutes and regulations should be revised. The following comments are offered in response to the specific examples delineated by the auditors.

(1) The two cases cited by the auditors "mix apples and oranges." In one, Docket U-75-95 a Commission decision has been upheld in Superior Court that disallowed unamortized rate case expense in a utility's rate base. At issue in the other, Docket U-76-66, was the protection of the public from duplicative utility expenses. Both of these issues are matters of regulatory policy over which the APUC needs discretion and flexibility to respond to current theories and to individual cases.

The Commission believes, however, that regulations establishing guidance for supporting documentation required to justify both internal and external rate case expense are necessary and desirable. The Commission's posture for four years has been reactive. Unfortunately, its workload, mandated by other statutory requirements, has preempted the time necessary to notice, consider and adopt regulations that would allow the regulatory process to function more efficiently.

(2) The Commission concurs that the promulgation of industry performance standards for all regulated utilities is necessary and desirable, but it is also a function of available resources to establish the standards and to enforce them. At the present time the APUC has no operational budget to enforce the existing telephone service standards.

(3) The Commission has requested clarification of its

statute regarding the transfer of certificates of public convenience and necessity. (HB675, 1978 Session.) More interest was generated in the existing statutory ambiguity as a result of PACOM's announced intentions to acquire a controlling interest in RCA ALASCOM. However, the statute remains; and, to date, affected utilities have acceded to Commission jurisdiction in this matter in accordance with the Commission's interpretation of its statute and regulations. Nonetheless, the Commission continues to support clarifying legislation.

(4) The Commission plans to eliminate the discrepancies between its statute and regulations by January 1, 1980.

Recommendation No. 7

The APUC should seek upgrading of salary levels for professional support staff.

There is no question that the most frustrating, expensive and time-consuming problem in the Commission's operation has been the vacancy factor and turnover of its professional Staff as a result of the compensation level.

A salary survey performed by the Division of Personnel in 1977 compared salaries of the Commission's professional Staff to salaries paid by regulatory commissions in other states with a cost-of-living additive. This did not and does not consider reality. The Commission loses its professional people to consulting firms and utilities operating in Alaska, not outside of Alaska. In addition, the Commission has experienced turnover because other State agencies offer a higher salary for the same qualifications and experience. Effective protection of the public interest and efficient utilization of its financial resources dictate that the APUC compensate its professional Staff at a level which attracts and retains qualified and experienced personnel.

Recommendation No. 8

The APUC should implement a time management system.

The Commission concurs that a time management system is a useful administrative tool. The Commission's experience in filling successive vacancies in the Executive Director position has not allowed institution of such a system to date. However, the Commission anticipates that the new

administrative Staff will implement such a system as rapidly as time, knowledge, and experience permit.

Recommendation No. 9

The APUC should develop a cross-reference system for Commission orders and decisions by the courts.

The cross-reference system suggested by this recommendation is desirable and necessary. With adequate funding the computer capability of the Commission could provide the foundation of a cross-reference system for current Commission actions. To recover the decisions of the first eight years of the Commission requires time and budget that is non-existent at present. The Commission plans to dedicate a portion of the time of its newly classified paralegal position to this assignment.

Recommendation No. 10

The Commissioners of the APUC should restrict their involvement in the administrative function of the agency.

The theory behind this recommendation is sound but its strict application must be tempered by reality. As one Staff section head stated in response to this recommendation, "Until we have written policies, a topical reference system and a knowledgeable, interested, hard-working executive director, I don't see how the Commissioners can be expected to restrict their involvement in the administrative function of this agency."

It is the goal of the Commissioners to be relieved of their direct involvement in the administration of the APUC. History dictates this is an evolutionary process. Reality dictates that the Commissioners are ultimately responsible for the public perception of the APUC. Their oversight responsibilities and input in administrative matters will continue as an informative tool for the Staff's managers.

It should be noted that the Commissioners have no independent professional staff and must rely on existing staff personnel for technical expertise and advice only when it does not compromise the independence of the parties in proceedings.

Recommendation No. 11

The APUC should seek to establish separate collocation codes for each section of the Commission.

It may be that the implementation of this recommendation is desirable.

The Commission does have some reservations in this regard due to the small size of its sections, ranging from one to six people. In the past the budget has been earmarked to the workload confronting the Commission. In most proceedings at least two staff sections, the Commission's legal personnel and the Commissioners are involved. Budgeting has been a matter of compromise, cooperation, and re-prioritizing to address the situation at hand.

The Commission will explore with the auditors the perceived benefits to be gained through section collocation codes.

COMMENTS ON ANALYSIS OF PUBLIC NEED

II. "There is also a need for statutory and regulatory amendments to allow for more effective case management and to avoid court appeals of Commission decisions (see Recommendation No. 2 through No. 6).".

It is overly simplistic to assume that statutory and regulatory amendments will eliminate court appeals of APUC decisions. Regulatory and administrative law are evolutionary elements in the system of common law applicable to Commission proceedings. Also, the volatility of regulatory theory and policy combined with the likelihood of a dissatisfied party is conducive to litigation in some instances. Given the nature and scope of APUC activity during recent years, there has been a relatively small number of Commission orders that have been appealed to the Superior Court.

An appeal of a Commission decision, per se, is not an undesirable result of Commission action. In certain instances it is in the public interest to have the case law and statutes clarified and amplified through the appeal process.

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

The APUC has been actively involved in reacting to substantive

pieces of legislation proposed by others in the past few years. In addition, the Commission has served as a resource to both the Governor's office and the legislative branch of government in the energy and telecommunications fields. And, it well may be more fruitful for deregulation recommendations to come from without rather than from within the Commission.

The Alaska Public Utilities Commission believes that the audit conducted by the Division of Legislative Audit was a constructive exercise for the Commission and commends the auditors for the performance of their responsibilities in a thoughtful and unobtrusive manner.

Respectfully submitted,

Gordon J. Zerbetz, Chairman

Marvin R. Weatherly, Commissioner

Carolyn S. Guess, Commissioner

Susan M. Knowles, Commissioner

Stuart C. Hall, Commissioner

RE: Jurisdiction of APUC over rates of municipally owned utilities

Please refer to your memorandum of October 1972 wherein you request an Attorney General's opinion on two questions. The first question deals with the general application of AS 42.05.711 (b) and is based on the facts set forth in your memorandum. The Fairbanks Municipal Utility System (FMUS) applied for a certificate of public convenience and necessity under the grandfather rights of AS 42.05.221 to provide electrical service in the Fairbanks area. In the same area Golden Valley Electric Association, Inc. (GVEA) had a certificate of public convenience and necessity to furnish identical electrical service. On August 11, 1972 the APUC issued two decisions, one which granted the FMUS a certificate of public convenience and necessity to supply electrical service in an area which would not compete with the GVEA.

Your opinion request is based on several assumptions. In your request you assume the competition between FMUS and GVEA has been eliminated. You also assume that there is no competition between the other FMUS utilities and any other public utility and that FMUS until the elimination of competition was clearly under the complete jurisdiction of the APUC.

Based upon these facts and assumptions it is our opinion that the rates charged by the Fairbanks Municipal Utility System for electrical service cannot be regulated by the Alaska Public Utilities Commission in light of AS 42.05.711 (b).

AS 42.05.711 (b) provides:

> Public utilities owned and operated by a political subdivision of the state and none of whose utilities is in competition with an other utility, are exempt from the provisions of this chapter, other than the provisions of §§ 221-231 of this chapter, unless such an owner and operator elects to be subject to all provisions of this chapter.

It is clear from this provision [illegible] operated by a political subdivision of the State is not in competition with any other utility it is exempt from the Alaska Public Utilities Act except for the provisions dealing with certificates of public convenience and necessity found at AS 42.05.221-281.1/ No ambiguity is found with respect to this part of the statute and where a statute is unambiguous the statute expresses the legislative intent without the necessity of aids from the legislative history. Alaska Mines and Minerals, Inc. v. Alaska Industrial Board, 354 P. 2d 376, 379 (Alaska 1960); City of Seward v. Wisdom, 413 P. 2d 931, 936 (Alaska 1966); Homer Electric Assn., Inc. v. City of Kenai, 423 P. 2d 285, 289 (Alaska 1967). The legislative intent , however, is supported by the legislative history of the exemption provision.

A review of this legislative history would not be complete without first reviewing the statutory history of regulating the rates of municipally owned utilities. When the Alaska Public Service Commission Act first became law in 1959 municipal utilities except for water and sewer were regulated pursuant to AS 42.05.640(2). In 1963 this provision was amended to entirely exclude municipally owned utilities from Public Utilities Commission regulation. This statutory history is explored in detail in Homer Electric Assn., Inc. v. City of Kenai, 423 P. 2d 285 (Alaska 1967).

In the 1971 Legislature, Senate Bill 128 was introduced into the Senate by the Senate Rules Committee at the request of former Governor Keith H. Miller. The requested legislation was accompanied by an introductory executive message2/which provided with respect to municipalities as follows:

> Municipally owned and operated utilities are exempted from regulation only in certain respects. These are specified in subsections AS 42.05.631 (b)-(d). In brief, a municipal utility would be exempt from rate regulation for services provided within the city boundaries. Services which it provides outside the municipal

---

1. For discussions of the ramifications and policies of exempting municipally owned utilities from the various forms of Public Utilities Commission regulations see State Supervision Over Municipally Owned Utilities, 49 Col. L.R. 180 (1949); State Regulations of Municipally Owned Electric Utilities, 7 Geo. Wash. L.R. 557 (1939); State versus Local Control of Municipally Owned Utilities, 41 Yale L.J. 121 (1931).

2. "... it is an accepted method of determining legislative intent to look to introductory executive messages." Homer Electric Assn., Inc. v. City of Kenai, 423 P. 2d 285, 289 (Alaska, 1967)

> boundaries would not be exempt. Municipal utilities would also be exempt en toto from Sections AS 42.05.491 - 511 concerning financial and management regulation, and from Section AS 42.05.641 concerning regulatory fees. [1969 Senate Journal, p. 84].

It is apparent that municipal utilities under the bill introduced by the Governor would be exempt from rate regulation of its utilities located within the city boundaries.

In the same Legislature, House Bill 202 was introduced into the Alaska House of Representatives. The legislative history of this bill in the House includes the following from the House Judiciary Committee report on the Public Utilities Act:

> AS 42.05.711. In its comparable section, SB 128 provided for the exemption of municipally owned and operated utilities from the provisions regarding the regulation of rates, financial management regulations, and the requirement of a regulatory fees. (Cf. present AS 42.05.645 and Pa. Stat., Title 66, sec. 1141.) The original HB 202 deleted the exemption regarding rates. [1969 House Journal, Supplement No. 4 (4/9/69), p. 7]

From this it appears that the original House Bill contemplated the regulation of rates charged by municipally owned utilities. This was changed, however, by an amendment on the floor of the House. This amendment read as follows:

> Municipally owned utilities (except those consenting to all provisions of this chapter) are exempt from the provisions of this chapter if there is no other utility in the integrated economic area or in an adjacent service area competing or having the potential to compete with any other of the municipally owned utilities. [1969 House Journal, p. 705]

House Bill 202 with this amendment passed the House of Representatives and was forwarded to the Senate. It is clear from this amendment that the House of Representatives also intended that the rates of a municipally owned utility should not be regulated except where competition was present. No legislative history was found which would indicate any ambiguity in AS 42.05.711(b) or indicate that the legislature intended that the rates of municipal utilities not in competition with other utilities be regulated by the APUC.

Your second question requests an opinion from this office on the issue of whether the Fairbanks Municipal Utility System is "in competition" as that phrase is used in AS 42.05.711 (b) where FMUS is attempting to gain authority from the Commission to supply terminal equipment (such as teletype, telex units and other more sophisticated hardware) in the Fairbanks area and in the same proceedings before the Commission, prevent RCA-Alascom from continuing to provide such terminal equipment. It appears from the facts of this situation that the FMUS is merely applying and attempting to gain the authority to compete with RCA-Alascom or to exclusively provide the terminal equipment in the Fairbanks area. Apparently the FMUS is not presently providing such terminal equipment in the Fairbanks area. RCA-Alascom is now providing that terminal equipment. The matter is a dispute over which of the two entities has the authority from the APUC to install terminal equipment.

Under this set of facts it is the opinion of this office that by entering into this dispute the FMUS is not "in competition with any other utility" as that phrase is used in AS 42.05.711 (b). This results in the APUC not being able to regulate the rates, services and facilities, accounts records and reports, and financial and management regulations of the FMUS.

In construing what the Legislature intended by the phrase "in competition with any other utility" a basic fundamental rule of statutory construction requires that the legislative purpose or intent in using the subject phrase be extracted from the entire Public Utilities Act. In other words since this phrase in not defined in the definitional section of the enactment (113 SLA 1970) the other sections in the enactment should be looked at to determine the legislative intent of the phrase. In re Delinquent Tax Role, 16 Alaska 286, 295 (D. Alaska 1956); State v. American Can Co., 362 P. 2d 291, 296 (Alaska 1964); 2 Sutherland, Statutory Construction, (3 Rd. ed.) §§ 4703, 4704.

In 113 SLA 1970 the only other provision which discusses "competition" between public utilities is found in AS 42.05.221 (d). This provision provides:

> (d) In an area where the commission determines that two or more public utilities are competing to furnish identical utility service and that this competition is not in the public interest, the commission shall take appropriate action to eliminate the competition and any undesirable duplication of facilities. This appropriate action may include, but is not limited to, ordering the competing utilities to enter into a contract which, among other things would:
>
> (1) delineate the service area boundaries of each in those areas of competition;

(2) eliminate existing duplication and paralleling to the fullest reasonable extent;

(3) preclude future duplication and paralelling;

(4) provide for the exchange of customers and facilities for the purposes of providing better public service and of eliminating duplication and paralleling; and

(5) provide such other mutually equitable arrangments as would be in the public interest.

From this it appears that the legislature intended the use of the word competition to mean actual competition. A mere dispute before the Alaska Public Utilities Commission does not constitute such competition. AS 42.05.221 indicates that competition exists where two or more public utilities are furnishing identical utility service in a designated area and where these two utilities have authority for duplication and paralleling of facilities. No other statutory provision was found in 113 SLA 1970 which would shed any light upon the meaning of competition as used in AS 42.05.711 (d).

Our opinion is further supported by another statutory construction rule which dictates that statutes must be given their reasonable meaning.

If a public utility owned by a political subdivision is subject to rate regulation by the APUC each time the political subdivision requests extended authority or has a dispute with another utility with respect to the extent of either of the utilities authority then an unreasonable result may occur because the utility owned by the political subdivision would probably be under the rate regulation of the APUC only until the dispute or request for extended authority is resolved by the APUC. Such resolution could take place in a short period of time. The present fact situation appears to present a case which could reach this unreasonable result. If the rates of the FMUS were to be regulated by the APUC during the pendency of the dispute between FMUS and RCA-Alascom it appears that those rates would be regulated only for a short period of time. Once the dispute was resolved the FMUS would again be in a position of not having its rates regulated by the APUC unless the APUC were to grant competing authority to both FMUS and RCA-Alascom, or the FMUS elected to be regulated.

Additionally, the common usage of the words "in competition with any other utility" indicates that the political subdivision owned utility must be furnishing identical facilities or service as another utility in the same authorized area before it can be considered in competition with that utility.

March 19, 1980

Senator Brad Bradley, Chairman
Senate Commerce Committee
Pouch V Mail Stop 3100
Juneau, AK 99811

Dear Senator Bradley:

My name is Cavin Philbin and I am representing Pelican Utility Company (PELCO).

The following is written testimony reflecting PELCO's opinions and attitudes toward the Alaska Public Utilities Commission's past performance. This testimony is subsequent to testimony given in front of the Senate Sunset Legislative Review Board by Mr. Charles N. Drennan, an attorney from the law firm of Faulkner, Banfield, Doogan & Holmes and PELCO's representative. PELCO encourages the Sunset Legislation Committee to take into consideration this testimony to aid in the evaluation of the Alaska Public Utilities Commission (APUC).

PELCO is in support of Recommendation No. 5 of the August 1979 review. The company feels that by exempting utilities with gross revenues of $500,000 or less (instead of $100,000), the commission would be allowed additional time and revenue to protect a larger percentage of the public interest by concentrating on larger utilities that serve the majority of Alaska's citizens.

PELCO feels it is disproportionate for a utility of its size to pay the same price for complying with APUC rate case requirements as larger utilities. The high cost of preparing a rate case is passed on to the customer in the form of higher rates which means that a utility customer of a smaller utility has to bear the brunt of higher regulation costs than a customer of a larger utility company.

With the increase in the cost of fuel, utility companies will be forced to file rate cases more frequently to maintain a rate of return allowed by the Commission. APUC is presently offering assistance to utilities in the form of a fuel rate adjustment clause which allows utilities to increase rates proportionate to the increase in fuel. Despite the fuel rate adjustment clause, electric utilities still must file rate cases after the price of fuel increases by 30%. Progressively increasing fuel and regulation costs will continue to outweigh any benefits derived from regulation in its present form.

It may well be that the Commission will require approval of an exempted utility's rate increase. If this is the case, PELCO recommends using a shortened, single page form for supplying a regulatory board with pertinent rate case information. Utility costs, past KWH production, the utility's customer base, rate of return information and other necessary information could be listed "in house" on a form similar to a tax return. This would cost the utility less to compile and the regulatory board less to analyze. The expense for complying with cost of service studies and rate case requirements should be relative to the gross revenue and customer base of the utility. If this is not possible, the regulatory agency should pay the cost of supplying such burdensome information.

PELCO is not in favor of the statute now in effect by APUC stating that if 25% of the customer base of a utility sign a petition protesting the utility's exemption from regulation, the utility is automatically regulated by APUC.

PELCO has a customer base of 64 people living in an area of approximately one square mile. This has always been a problem for PELCO. With Pelican Cold Storage Company (Pelican Utility Company) as the major employer in such a small village, even a slight rate increase is highly controversial. The present statute states that 16 protests are all that are required to cancel or defeat a PELCO exemption, but even with a single protest, the review of a rate case or special request can come to a standstill.

The management at PELCO invites customer input in determining the extent of company regulation, but feels the decision should lie with a State Regulatory Board and not a few citizens. For instance a percentage of customers could request a state commission to review a utility's performance but a state review board should be responsible for determining the utility's degree of regulation.

Attached to this testimony is a copy of a diary kept by Mr. J. G. Ferguson, President of PELCO, during our last approved electric rate case. As the diary illustrates, rate case proceedings began on April 20, 1975 and although the diary was not carried through to the time the final rates were approved on August 1, 1976, it can be seen that it is especially costly and time consuming for a utility of Pelican's size to comply with the myriad of information required by APUC, especially relative to the utility's customer base.

Since the 1976 electric rate case, PELCO has filed for a new water rate and a Petition for Exemption for a new Cable Television System.

PELCO initiated the water rate case in November of 1977 and was granted the rates on February 14 of 1980. In that 26 month period, having our attorney compile the necessary information cost the utility $50.00 an hour in legal fees for a total cost of $3,424.00. A minimum of three hours a week was needed in that period of time for Seattle administrative personnel to produce information for this particular case. This cost PELCO $2,000.00 a year, not to mention the time that was needed for the PELCO staff in Alaska to supply the Seattle office with additional support information. With a gross water utility sales revenue of $6,450.00 for FY 1978 and 1979, the cost to comply with APUC information requirements for these years totaled roughly 60% of the water utility's sales revenue.

For the Cable Television Petition for Exemption, it took over a year to obtain a certificate to operate. The legal expense in that period for Cable Television was $1,250.00.

In closing, PELCO encourages the Sunset Review Committee to do anything within its power to decrease Commission staff turnover. It has been our experience in rate cases that each time an APUC staff member quits, the replacement invariably requires information that has already been supplied. This is burdensome to the utility and adds to the inefficiency of APUC.

Respectfully,

Cavin W. Philbin
Utility Administrator

13 Mar 1980

Senator Bradley
Senate Commerce Committee
Pouch V
Juneau, AK 99811

Dear Senator Bradley;

I wish to comment on the actions or rather non-actions of the Alaska Public Utilities Commission.

Over one month ago I sent a letter to the Chairman of the Commission expressing my concern over the way the commission allowed Alascom to refund the excess rate increases.

So far I have not even received an acknowledgement of receipt from the commission. On Capitol 80 I saw some of their replies to questions from the public and surely financial constraints cannot be so pressing that a letter of reply is too costly.

The reason that I wrote to the commission is that at least two weeks of January has gone past before I was informed about the "Great consumer refund" policy which Alascom was allowed. Lower phone rates in Alaska during the months of January and February. If I had not accidently bought a paper I would not have known about the refund at all. At the very least the commission should have made Alascom wait until it had informed the public via our usual monthly bills. I felt that the very secretive way Alascom was allowed to refund to its customers did not benefit the public at all. I thought one of the commissions duties was to safeguard the interests of the public.

Sincerely yours,
T. Osborne
Timothy Osborne

Alaska State Legislature

Senate

Committee on Commerce

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

March 13, 1980

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Your Senate Commerce Committee has had under consideration for "Sunset" review the Alaska Public Utilities Commission, pursuant to your referral under AS 44.66.010 and AS 44.66.050.

In accordance with the statutory requirements, a public hearing was held on the review of this commission. An additional hearing was held on March 13, 1980, as the Committee Chairman had been notified that additional witnesses wished to testify regarding the Alaska Public Utilities Commission.

Guided in part by the report prepared by the Legislative Audit Division, the Committee took into consideration the factors required under AS 44.66.050(c).

Your Commerce Committee thereby makes the following findings:

The Committee finds some merit in recommendation number one which recommends that the Alaska Public Utilities Commission, the Alaska Transportation Commission and the Alaska Pipeline Commission should be combined into a single regulatory commission. However, this will require considerable further study. The Committee finds it is not in the public's interest to do so at this time.

In recommendation number two, the Legislative Audit Division recommends that AS 42.05 should be amended to allow the Alaska Public Utilities Commission to cease all certification and regulation of cable television. The Committee does not concur. Cable systems in Alaska, particularly in the remote areas, do not serve a mere entertainment function. Cable television in some areas of Alaska is the only source of information and entertainment. It is felt that regulation

should continue in these areas. In urban areas, where alternative forms of entertainment and information are available, the Committee agrees that certification and regulation may not be necessary. Recent legislation passed in the state of California provides a formula that the Committee believes will, with modification, provide for deregulation of the cable systems in major urban areas of Alaska while providing regulatory prctection for Alaska's rural population.

Recommendation number three asks that AS 42.05 should be amended to allow the Alaska Public Utilities Commission to cease certification and regulation of those utilities furnishing collection and disposal service of garbage, refuse, trash and other waste materials. In both the Legislative Audit Report and the public hearing, the reason most often heard for this deregulation was that "We don't have the staff to do this." An assertion is made in the Performance Review that the refuse industry is not capital intensive and that competition in this industry would not be as detrimental to the public's interest as competition among more capital intensive industries.

However, it has also been argued to the Committee that there should be some limited activity by the Alaska Public Utilities Commission in this area. Contentions have been made in favor of the Commission having appellate authority over local government units which may assume the regulatory function; and it has also been argued that the APUC be allowed to have jurisdiction "by consent," when a municipality and a utility have both agreed to that jurisdiction. While the Committee tends to agree with the recommendations of the Legislative Auditor about deregulation in this area it will consider these arguments about very limited jurisdiction during the preparation of the Committee's legislation.

Recommendation number four asks that AS 42.05 be amended to allow nonprofit telephone and electric cooperatives to petition for withdrawal from APUC economic regulation. It further recomends that the membership of the cooperatives, by a vote of a majority of the members, be given an opportunity on a utility by utility basis to determine whether their cooperative should remain under APUC regulation. The Committee finds several problems in considering deregulation of the

cooperatives. One, as pointed out by the Performance Review, is the large number of consumer complaints received by the APUC against cooperatives. The second, which was brought out in public hearing, is that the annual meetings of the cooperative associations have a less than representative number of members present. Before the Committee can consider deregulation of the utilities by vote of the membership, the Committee would have to be assured that the vote in fact represented a majority of the actual members as opposed to a majority of the members present at any given annual meeting, or that similar safeguards are provided.

With this modification, the Committee's legislation will reflect this recommendation.

The Committee in general concurs with recommendation number five that asks that AS 42.05 be amended to exempt from economic regulation all utilities with annual gross revenues not exceeding $100,000. We agree with the Legislative Audit Division that the cost of regulation "on a percentage basis" to a small utility may outweigh the potential benefits. However, when considering regulation of a utility we must look not only to the cost factor but also to the factors of public safety that are involved. Many of these small utilities provide vital needs to communities, for instance, water utilities. The Committee while including deregulation for these utilities in its legislation, will attempt to include some triggering device that would submit the utility to regulation if serious consideration of public health and safety should warrant such action.

The Committee concurs with recommendation number six that the statutes and regulations governing the Alaska Public Utilities Commission should be revised, and will work with the Commission to accomplish this.

The Committee concurs with recommendation number seven that salary levels for the professional and technical support staff should be upgraded. If salaries are not competitive with private industry in Alaska, we cannot expect qualified personnel to work for the APUC on an extended basis: The Commission will only become a training ground for industry.

The Committee concurs with recommendation number eight that the APUC should implement a time management system. We

were informed during the public hearing that new concepts are being implemented by the Executive Director and the situation is improving. If this is accomplished within a reasonable length of time, no legislative action will be necessary.

Recommendations number nine, ten, and eleven address "housekeeping" functions of the APUC. It is our understanding, as a result of testimony by the Alaska Public Utilities Commission, that action is being taken on these recommendations. If this action proceeds in a timely manner, it is felt that no legislative action will be necessary in this area.

Recommendation number twelve urges that the Office of the Governor keep the appointment of the Chairman of the Alaska Public Utilities Commission current. Complaints that the Office of the Governor has been slow in making appointments to boards and commissions have appeared often in the Performance Reviews. It is hoped that the Governor's Office will make timely appointments to boards and commissions in the future.

Corresponding legislation will be introduced soon to accomplish the goals of this report.

Respectfully submitted,

Brad Bradley

Senator Brad Bradley
Chairman
Senate Commerce Committee

GENERAL MANAGER'S MESSAGE

Welcome to MEA. You are now a part of Alaska's oldest REA cooperative, organized in 1941. Whether you are a "Cheechako" or a "Sourdough," I am sure you'll be interested in a few facts about MEA.

Our service area is large – 3,360 square miles (twice the size of the entire state of Delaware). Growth has been a real factor at MEA, as we have experienced the fastest growth-rate in the state and have been one of the fastest growing areas in the country during the past several years. We now serve over 13,000 consumers in the Matanuska-Susitna and Anchorage boroughs.

The material contained in this owner's manual will provide you with valuable and interesting information about your electric cooperative. It defines your rights and responsibilities; answers questions; gives you information and phone numbers, and will help you to understand MEA.

One of the important processes we have is the annual membership meeting. There, directors are elected, the business of the past year discussed, and a future outlook given. It is an important part of your Co-op membership that you attend and participate. Notices are published three weeks in advance of the meeting which is in April each year.

I hope you will take a few minutes to become familiar with the information in this manual. It will not only help you understand MEA's operation and service policies, but it will also make reporting outages simple, and finding answers to your questions easier.

Again, welcome to membership in MEA. Welcome to the MEA service area. Let's work together for the future of Alaska and its heartland – Southcentral.

Malcolm Cheek
General Manager

Part 2 MEA IS

MEA is a Rural Electrification Administration cooperative, a type of business which belongs to the people who use its services, its members. Matanuska Electric Association, Inc. is the oldest REA cooperative in Alaska. Since 1941, you, our members have controlled the business of providing rural power supplies. The annual election of directors who represent you and consider your wishes when setting policy by which the cooperative business is conducted, gives you a voice in the operation of your electric utility.

MEA is a business which consumers operate to obtain electric power, one which began when no other utility entity would invest in rural society and provide power. When you become a member of MEA you join 12,000 consumer-members who have built an association providing power to 3,360 square miles of south-central Alaska. From Eagle River to Hurricane, south to north, and Sheep Mountain to Petersville, east to west, MEA, your Co-op, is truly on the "cutting edge of progress."

Part 3 REA IS

REA is the Rural Electrification Administration which was established by President Franklin D. Roosevelt by executive order in 1935. REA and Rural Electric Cooperatives brought power to the rural residents across the country . In 1935 only 10.9 per cent of farms in the country had electric power. In 1969, 98.4 per cent of all farms were energized with electricity. REA does not subsidize rural electric co-ops, but it is a banker and regulator, making loans to co-ops and insuring sound business practices are followed.

Part 4 YOUR ROLE AS A MEMBER–OWNER

One of the more important facts about REA cooperatives is that they are controlled by the people they serve. MEA, as a member-owned business, gives you the unique opportunity of participating in both the role of an owner and role of consumer. The typical MEA consumer-owner . . .

*Pays energy bills on time.
*Gives easement for construction and service of electric facilities on his property
*Cooperates with

Got an idea for improving the Co-op? Share it with us, we listen.

right-of-way brush control programs

*Notifies Co-op of any system damages and service interruptions

*Keeps informed by reading *Ruralite* and energy related articles

*Attends Association community and annual meetings

*Offers suggestions for improved service

*Serves on special Co-op committees

*Observes the Co-op's rules, regulations and by-laws

*Cooperates during storm emergency situations

*Helps provide transportation to inaccessible areas

*Votes for directors to guide the Association

*Notifies Association of electric power diversions and equipment misuse or theft

*Participates in wise energy use programs and uses energy wisely

The annual membership meeting is an important part of being a REA co-op member.

Part 5

TARIFF

MEA operates under a tariff approved by the Alaska Public Utilities Commission (APUC). This tariff covers rates as well as service rules and regulations. Copies of the current tariff may be inspected at MEA offices in Eagle River, Palmer and Mile 51, Parks Highway at the Big Lake Office.

The following are some of the important items in our tariff:

MEA will provide electric service to customer premises that are utilized on a seasonal basis as provided in the applicable rate schedules.

MEA may require the customer to sign a contract guaranteeing a certain minimum level of revenue for a specified period of time, prior to new construction.

The customer shall use electricity from the Association (MEA) exclusively at the premises designated by his order and shall not generate or cause to be generated any electricity which is or may be connected to Association service.

The Association (MEA) will read all meters monthly. If, for any reason, reading cannot be obtained for any particular period, the billing may be based on an estimated energy use and demand.

MEA will, at its own expense, inspect and test its meters as required to insure a high standard of accuracy. Each meter is tested before it is installed.

Additional tests at request of customer will be made, and if the meter is found to register within 2 per cent (2%) of accuracy the customer shall pay the test fee as determined by Tariff Rule 9 and the Schedule of Fees.

Part 6 MANAGEMENT'S ROLE

MEA's Manager is entrusted by its members and directed by the board to provide electrical power at the lowest possible costs and to engage in accepted business practices which will produce the necessary power economically and with fairness to all members. As the tariff provides, MEA is responsible for and may:

*Make service charges as outlined in the schedule of fees.
*Assess a four ($4.00) handling charge for dishonored checks
*Refuse to connect and will disconnect service for violation of service policies.
*Temporarily suspend service to make repairs and improve the system.
*Provide construction service to a consumer-member meeting cost specifications as agreed upon. This is a temporary service limited to 90 days.
*Provide underground service for primary voltage when consumer pays difference between overhead and underground installation costs.
*Provide underground service for secondary service or voltages for a minimum charge when consumer digs his own trench, and fills it, according to specifications, after MEA installs cable.
*Provide line extension for a minimum monthly charge based on the estimated cost of construction of a line.
*Review line extension contracts on an annual basis (calendar year) to determine status of gross revenue from extension contracts.
*Terminate extension contracts when gross revenue derived from the extension exceeds required return on the investment in construction costs.

Part 7 MEA IDEALS

We believe that:

it is the right of persons to provide for themselves a vitally needed service, in the form of an Electric Co-op;

the Association exists primarily to serve its consumer-owners;

the Association exists for the mutual benefit of its member-owners, directors, employees and the public;

the Association must provide the highest quality electric service at a cost consistent with sound business practices;

the opportunities in the enterprise carry with them both economic and social

responsibilities;

the ability of the Association to continue providing this essential service depends upon its attracting and retaining capable employees;

the natural resources of this country should be developed to provide an abundance of power consistent with other resource development needs;

the economic future of the State of Alaska depends upon its having an abundance of electric power available to persons who can use it;

the Association must exemplify leadership in the community by doing all things essential to good management;

attaining these ideals will require our constant and untiring efforts.

"I warned Elrod I was going to get him to an annual meeting—one way or another."

MEA OBJECTIVES

TO OPERATE the Association as a non-profit enterprise on a continuing and progressive basis;

TO ASSURE the availability of a constantly high quality of central station service to members;

TO KEEP the member-owners fully informed on the affairs, problems, and methods of the Association;

TO DEVELOP among members, through democratic processes of participation, a recognition of member-ownership and accountability;

TO ENHANCE the Association's reputation for fair dealings, prompt and efficient service, dependability, integrity, courtesy, productive ability, and technical competence;

TO STRIVE constantly for ever higher standards of service through progressive management;

TO STIMULATE and support rural development programs, especially those which will increase and stabilize the economic level of the Association's service area;

TO DEVELOP, operate and maintain the system at optimum performance;

TO PROVIDE the means whereby the member-consumers can build and maintain the Association by contributing a reasonable amount of essential capital;

TO RECOGNIZE that our greatest assets are our human assets;

TO OBTAIN acceptance of the ideals which emphasize the obligations involved in doing a job well;

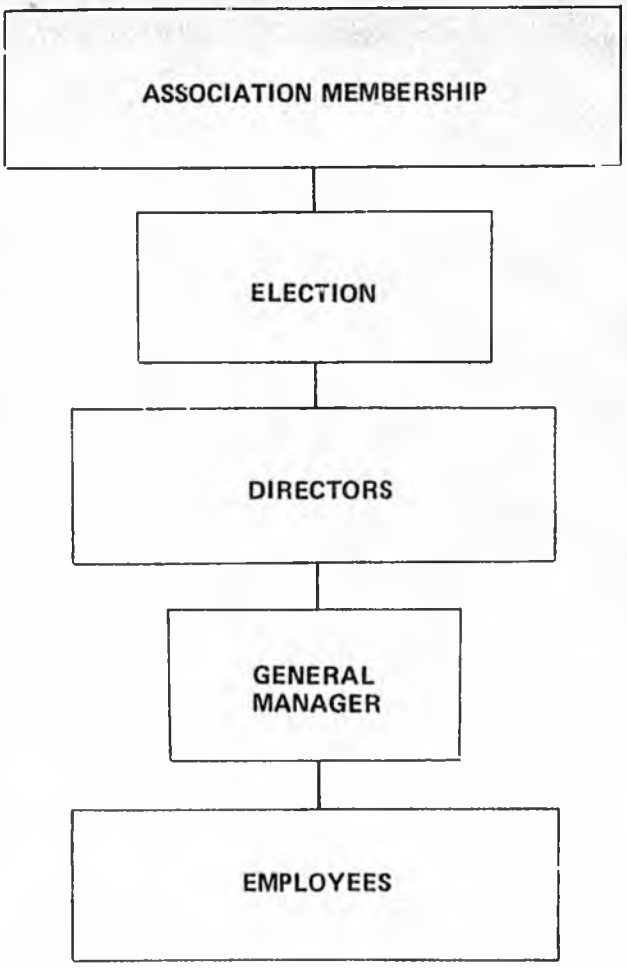
TO REWARD, encourage progress, inform, train, develop and properly assign all employees;

TO DEVELOP understanding, acceptance, and support of the Association's objectives, plans and programs, and

TO PROVIDE leadership and to cooperate with other community and civic groups.

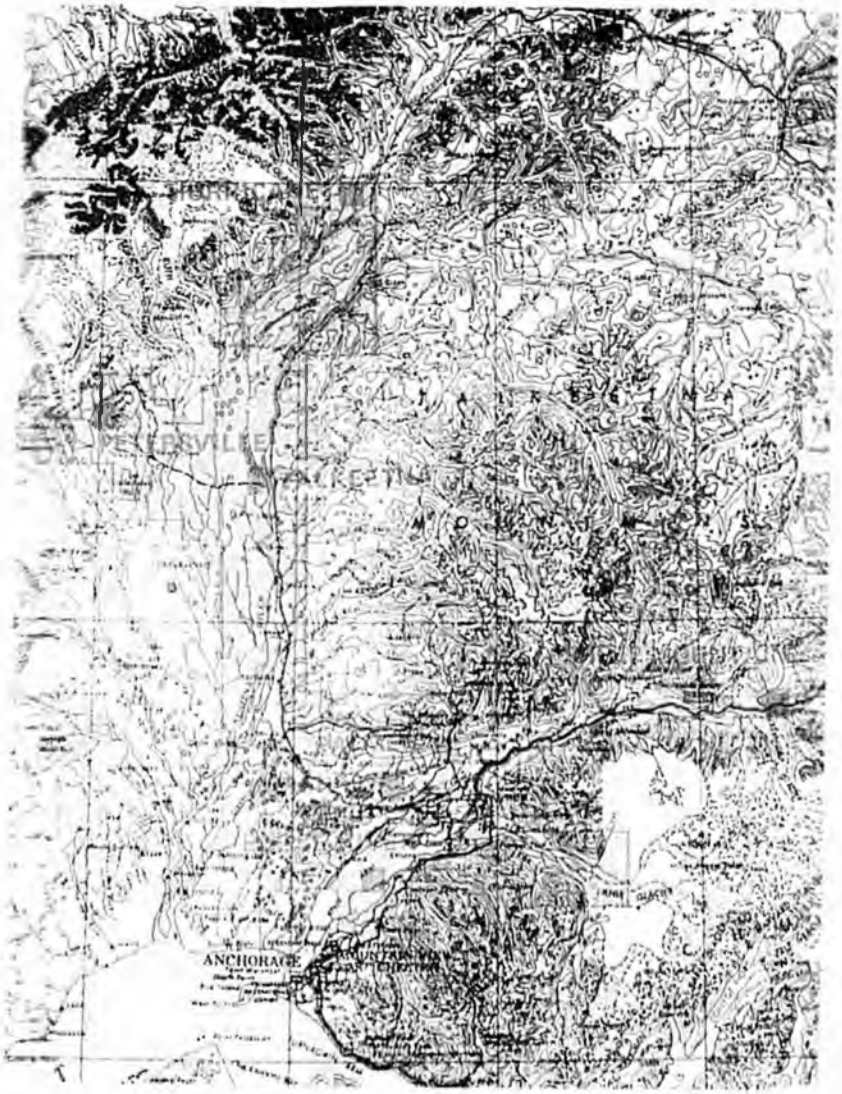
Kick out the old! Bring in the new! MEA is dedicated to bettering the lifestyle of its members.

ORGANIZATION CHART



This organization chart of the Matanuska Electric Association, Inc. indicates the valuable role each member plays in the operation of the Association. Members, attending the annual meeting each spring, elect the board of directors which in turn set the policies, hire the general manager, and oversee the operation of the Association as your representative. The board of directors meets once a month. It is not paid a salary but is given travel pay and per diem for meetings it or its members must attend to further the business of operating the Association.

SERVICE AREA MAP



The MEA service area includes 3,360 square miles of south central Alaska. It is three times larger than Rhode Island, twice as large as Delaware and 3/5ths the size of Connecticut.

*85% to 88% of MEA's consumers keep their accounts current with timely payments.

*Consumers who do not pay their accounts on time increase the operating expense for the entire membership.

*It costs your Association as much as 25% of the billed amount to collect delinquent accounts–as much as $10.00 to collect $40.00

*Consumers with serious financial problems who are unable to make a payment on time should contact MEA to discuss possible arrangements to help bring an account up to date.

MEA'S BILLING PROCEDURE

*Meters are read and billed monthly at regular intervals.

*Bills are due within 2 weeks of the billing date, and a delinquent date is indicated on each bill.

*If payment has not been received within 2 weeks, a $2.00 late charge is added to the account, and a "Past Due" notice is mailed.

*If payment has not been received within 20 days from the original billing date, a "Disconnect Notice" is mailed stating the disconnect date.

*If payment has not been received within 24 days from the original billing date, a "Disconnect Order" is issued to field personnel.

*A $10.00 service charge is made for delinquent account disconnects.

*Member-Consumers will be given the opportunity to pay their account in full at the time of disconnect if they are on the premises. The total amount due must be paid in full in order to stop the disconnect order.

*IMPORTANT: If you are leaving your residence for an extended period of time, 3 weeks or longer, be sure to arrange with MEA billing section for the payment of your energy bill and continuation of service during your absence. To reduce energy consumption during extended absences, unplug all appliances not required, turn thermostat down to minimum temperature, and shut lights off. In winter, care should be taken to protect your home water system from cold winter temperatures. MEA recommends you drain your home water system prior to extended winter absences.

Paying your energy bill on time helps your Co-op save money.

Part 13 SCHEDULE OF FEES AND CHARGES

You may receive upon request a copy of the Schedule of Fees and Charges as appears in the approved tariff. The schedule states rules for determining account deposits, fees for disconnects, reconnects, meter test, service call, late payments, dishonored checks, service relocation and etcetera. Copies of the schedule are available at any MEA office.

"We think of it as early American with just a touch of the modern."

RETAIL RATES

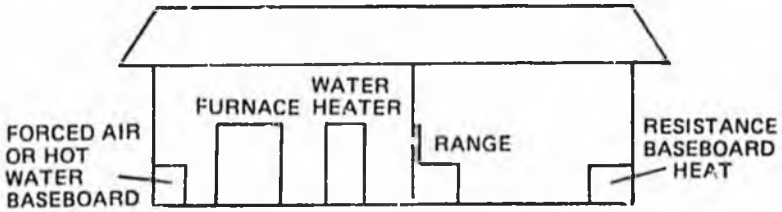
You will receive, along with this copy of the Owner's Manual, a Retail Rate Notice, which will give you the current rates charged for electrical energy purchased through your Association. If you did not receive one you should ask for a copy the next time you visit one of your Association's offices. A copy of the rate notice can be mailed to you upon request.

Supplying energy efficiently, quickly, at low costs, that's our job!

In all homes most of the electricity is used to generate heat, in one form or another, for hot water, cooking, drying or space heating for comfort. The highest use of electricity, even in homes with oil or gas furnaces is by the furnace heat circulating system. The balance is used for non-heat items such as televisions, stereos, lights, refrigerators, freezers, vacuums, microwave ovens and so on.

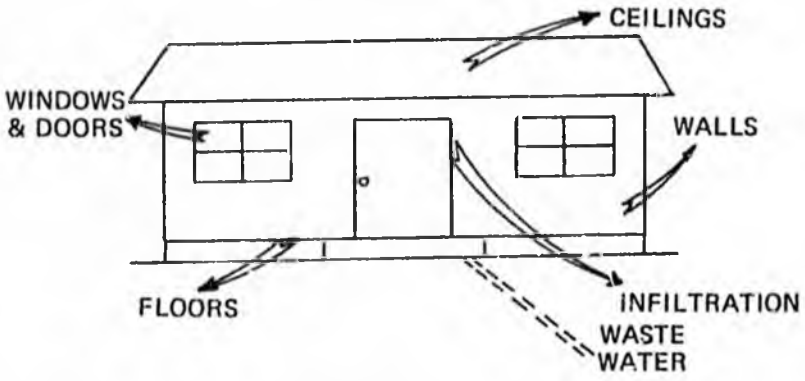
"Insulation doesn't cost, it pays."

HEAT SOURCES



The heat that has been produced is lost out of the home at a rate that is dependent on the outside temperature and the construction of the home.

HEAT LOSSES



INSULATION CHART

TYPE OF INSULATION	R-VALUE per INCH	ADVANTAGES	DISADVANTAGES
Fiberglass Batts or Blankets	3.7	1. Do it yourself installation 2. Stable R-value 3. Non-corrosive; non-flammable 4. Does not expand or contract after installation.	1. Can be irritable to the skin 2. Can leave empty space if care is not taken on installation.
Cellulose (Blown)	3.5	1. Inexpensive 2. Seals itself guarding against empty spaces	1. Has a tendency to settle which lowers R-Value 2. May be flammable or corrosive depending on manufacturer 3. Greatly affected by air currents
Urethane Foam	6.7 (ave)	1. High R-Value upon installation 2. Forms tight bond to building materials.	1. Expensive 2. Flammable 3. Loses R-Value as it ages 4. Releases deadly cyanide gas when it burns 5. Has a tendency to expand with age after curing.
Urea-Formaldehyde Foam	4.6 (ave)	1. High R-Value	1. If not properly mixed will release formaldehyde fumes (health hazard) 2. Has reputation of shrinking with age. 3. Cure time must be strictly controlled

RECOMMENDED R-VALUES FOR MEA SERVICE AREA

CEILINGS	R-38
WALLS	R-19
FLOORS	R-22
WINDOWS	TRIPLE GLAZED

These Values Apply Whether You Heat With Oil, Gas, Coal, Wood, or Electricity.

APPLIANCE GUIDE

Following are approximate wattage ratings for typical appliances and estimated kilowatt-hour usage per month for an average family of four.

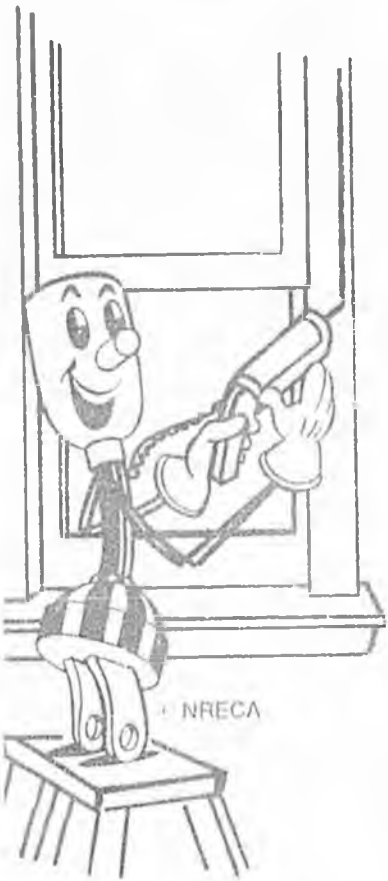
MAJOR ELECTRICAL APPLIANCES	Average Wattage	Est. KWHs consumed monthly
Water Heater	4,500	500
Refrigerator/Freezer (14 cu.ft)	325	112
Refrigerator/Freezer (frost-free 14 cu.ft.)	600	150
Freezer (15 cu.ft.)	350	135
Freezer (frost-free 15 cu.ft.)	440	17[illegible]
Range	12,200	93
Self-Clean Cycle	4,000	4
Microwave Oven	1,450	15
Clothes Dryer	6,000	120
Clothes Washer (incl.hot water)	500	9
Dishwasher (incl. hot water)	1,000	30
ELECTRICAL HOUSEWARES		
Coffeemaker	800	12
Blender	350	1
Fry Pan	1,150	15
Crock Pot	240	8
Toaster	1,150	5
Toaster Oven	1,500	8
HOME ENTERTAINMENT		
Radio	60	7
Record Player	160	10
Television/B&W	200	36
Television/B&W (solid state)	55	10
Television/Color	350	63
Television/Color (solid state)	200	36
OTHER SERVICES		
Clock	2	1
Bed Covering	190	15
Hair Dryer Blower	1,000	65
Portable Heater	1,300	14

"YOU CAN FIGURE IT OUT"

Use the information provided in the Appliance Guide to compute your estimated kilowatt-hour usage per month.

Average Wattage	X	hrs./mo. usage	=	÷ 1,000	=	KWHs used/mo.
Television/Color						
350 watts	x	128 hrs./mo.	=	44,800	÷	1,000 = 45Kwh

If you take the time to develop a good energy consciousness, you can save. Put your conservation efforts where they count.



Warm air can escape into arctic cold through the tiniest crack with chilling efficiency.

WATER HEATER

Operate food disposers with cold water.

Operate dishwasher and clothes washers with full loads only.

Wash clothes in a cold or warm water wash.

Install a flow restrictor in your shower head.

A 3-minute shower uses less energy than a full tub bath.

REFRIGERATOR-FREEZERS

Frost should be removed when it is ¼-inch thick.
When frost gets thicker the refrigerator becomes less efficient and uses more electricity.

Be sure your refrigerator door is air tight. Check gaskets.

Avoid opening the refrigerator door more frequently than necessary.

LIGHTING

The amount of light a bulb gives off is measured in lumens. The most efficient light is one that gives off the most lumens per watt. Carefully study bulb packages.

Turn lights off in unused rooms or when leaving a room.

Fluorescent tubes are more economical to operate than incandescent. Fluorescent lamps produce up to five times as much light for the same energy, and last up to ten times longer.

Utility bills can also be affected by your electric energy use and one or more of the following:

CONDITIONS BEYOND YOUR CONTROL OR KNOWLEDGE

- Seasons of the year
- Light and weather
- Daylight Saving Time
- Five-weekend months
- Longer billing periods
- Defective house wiring
- The number of days between meter readings sometimes varies

CHANGES IN NORMAL LIVING CONDITIONS

- Size of family
- Average age of family
- Visiting relatives
- Children – new babies
- Changes in living habits
- Spring cleaning
- Vacations
- Repairs or renovations
- Roomers
- Hired help
- Sickness or convalescence
- Special diets
- Therapeutics
- Guests and entertainment
- Sporting or special events on television

APPLIANCES

- New appliances installed
- Additional use of older appliances
- Frost on refrigerator unit
- Defective appliances –shortage of refrigerant
- Inefficient use –oven for househeating
- Excessive use of hot water
- Leaking hot water faucets
- Exposure of hot water pipes to air
- –clogged air filters in furnace
- Excessive househeating –thermostat control setting

NEW HOME OR APARTMENT

- Larger than former home
- Windier or colder location
- More heat leakage through windows
- Less weatherstripping, fewer draperies
- Larger heating equipment
- Manual heating controls
- Larger water heater
- Ceilings not adequately insulated

© NREGA

Dial down to save energy and money.

CONSUMER'S TEST SUGGESTIONS for Part 16 SHORTS, HIGH BILLS, and SHOCKS

MEA recommends that a consumer arrange to have a qualified electrician check their electrical wiring should there be an indication of short circuits or shocks. However there are a few checks the homeowner can make safely.

Step 1: Turn **off** all circuit breakers including the mains usually found directly below the meter. The meter should stop completely without making another revolution.

Step 2: With **all circuit** breakers **off** turn on the mains. The meter should remain stopped. If the wheel turns, even slightly, it would indicate some leakage between the mains and the circuit panel. Call your electrician to replace wiring.

Step 3: With the mains on proceed to turn each circuit on separately with all the others still off. If one should make the meter move determine what that circuit's for and disconnect, if possible, any appliances. With nothing apparent on and the meter is still turning it could be an indication of a partial short. Whenever the wheel in your meter is turning it indicates electrical current is flowing somewhere.

Step 4: If all the circuits appear to be correct at this point, high use or shocks could be caused by faulty appliances. Check anything that works automatically such as water pumps, water heaters, heat tapes, freezers and refrigerators, and electric heaters such as well house, car, or small room heaters. Other things to consider would be frost build-up in wall outlets and switches, uninsulated hot water pipes, anti-sweat valves on toilets that can cause excessive use of hot water, or anything that has recently not been functioning as it should.

Not all electrical problems are easy to find. If you have any further questions on any of the above don't hesitate to call your electrician or MEA offices: Palmer 745-3231, Eagle River 694-2161, and Big Lake 892-6021. Remember, be careful around any electrical wiring.

FUSES AND BREAKERS ARE SAFETY VALVES

A blown fuse or a tripped circuit breaker is a signal that something has gone wrong with your electrical system and should not be ignored. If it happens frequently, it could run up your electric bill, cause appliances to give poor service, or set fire to your house.

There are four types of circuit failure. The following will tell you how to identify and correct each type.

WHY DO CIRCUITS FAIL?

1. Loose connection. A screw may be loose in the socket into which the fuse is inserted. If the **bottom** of the fuse is severely discolored or pitted, you have a loose connection. After making certain that the main switch is disconnected, tighten screw in bottom of fuse socket.

2. Improperly seated fuse. If the fuse window shows no evidence of a blown fuse or if bottom of fuse is not pitted or discolored, the fuse is either not seated properly or is not long enough to make contact. Replace with another fuse that will make contact.

3. Short circuit. If the window of the blown fuse is discolored, you have a short circuit. This means that somewhere on this circuit, a bare wire is touching another bare wire or other metal. In circuits protected by circuit breakers or by cartridge-type fuses, there is no visible clue as to what might be at fault but the procedure to follow is the same.

(A) Unplug all lights and appliances served by the blown circuit—in other words, all lights and appliances that don't work.

(B) When the circuit is clear, replace fuse or flip the circuit breaker switch back on.

(C) Turn each lamp or appliance on one at a time. When you reach the faulty lamp or appliance, the new fuse will blow or circuit breaker will trip. Examine the lamp or appliance and you will probably find the bare wire in a frayed cord or in the wiring of the appliance. Repair it and your problem should be solved.

(D) If the new fuse blows or the circuit breaker trips when the circuit is completely clear, there is a short in the wiring of the circuit itself, and the wiring will have to be repaired or replaced.

4. Overloaded circuit. If the window of the blown fuse is clear, you have an overloaded circuit. This is the most common cause of circuit failure. In circuits protected by breakers or cartridge-type fuses, there is no visible clue but the procedure to follow is the same. There are two types of overloads—

(1) TEMPORARY OVERLOAD. The typical temporary overload exists when a motor kicks on because, during starting, an electric

motor will draw about three times its normal current. You can remedy this by using a time-delay fuse of the correct size (either 15 or 20 amp.). Its purpose is to absorb temporary overloads without blowing. If it does not blow with everything on the circuit turned on, then you had a temporary overload and the problem has been corrected. In circuit breaker systems, the breakers will absorb temporary overloads without tripping.

(2) CONSTANT OVERLOAD. If you determine from your tests that the overload is not temporary and continue to experience circuit failure, you can either shift some appliances from the overloaded circuit to another circuit or add a new circuit or circuits to your system.

It is advisable at this point to make a survey of all circuits so that you know how big a wattage load each is carrying. Number each fuse or circuit breaker number 1, number 2 etc., then follow this procedure:

(a) Turn on all of your lights and be sure all bulbs are burning. Remove fuse number 1 and go through the house marking a No. 1 on the chart for every light that's out. Do the same for all wall outlets, using a night light to make sure which receptacle outlets are on the circuit being tested.

(b) Make a list of the wattages of everything served by this circuit and list them in the column for the number 1 fuse. The wattage of an appliance is usually shown on the name plate or underside. If amperes is shown instead of wattage, multiply amperes by 120 to convert to wattage (example: .75 amp. X 120 volts = 90 watts). If only a horsepower figure is given, multiply horsepower by 746 (1 horsepower equals 746 watts).

(c) Repeat steps (a) and (b) for each circuit. Don't overlook closets or tools and appliances that are not permanently on such as fans, furnace motors, sump pumps, air conditions, etc.

(d) Add up the wattages of the lights and appliances on each circuit and figure the various appliances that might be plugged in at one time. If, for example, you find you have a circuit with a 15 amp. fuse and 14-gauge wire with an estimated load of over 1650 watts, you have an overloaded circuit. A circuit using a 20-amp. fuse and 12-gauge wire should not carry more than 2200 watts.

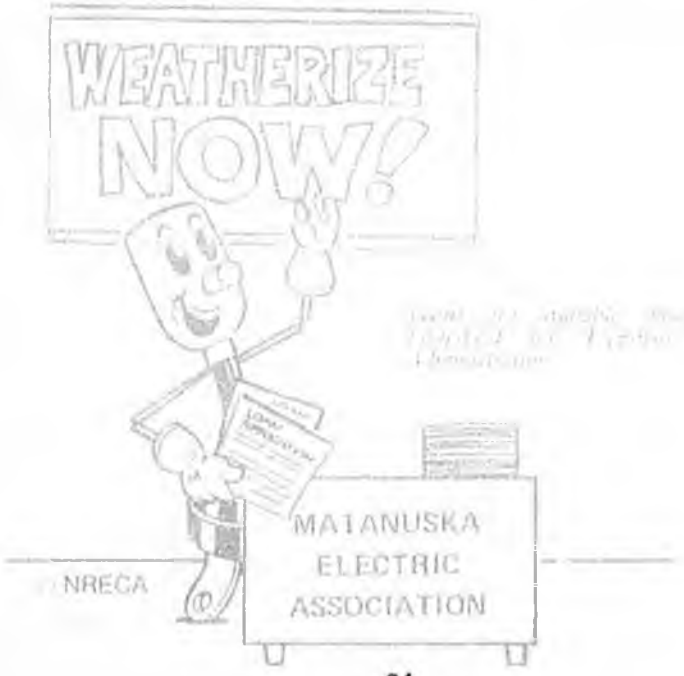
Circuit breaker switch. When overloads or shorts occur, it will switch off automatically. Reset it immediately after correcting trouble.

How ordinary fuse works

This is a standard plug-type fuse. The current passes through the metal strip running across face of fuse. It is designed to protect the circuit against shorts and overloading.

Fuse blown by short circuit. Metal strip is instantly heated to an extremely high temperature, causing it to vaporize. Fuse window discolors.

Fuse blown by overload. Metal strip overheats and melts at the weakest point, breaking flow of current to circuit. Fuse window remains clear.



Every so often we, at MEA, have something happen along an electric line right-of-way that serves to remind us that there is often confusion in someone's mind as to what the actual significance of an easement is, what rights it grants to MEA, and what rights are retained by the land owner or grantor.

When a property owner grants an easement to MEA for the purpose of constructing an electric distribution line, he is only giving MEA the right to enter the property, remove obstacles such as brush and trees, place its electric lines or cables on or under the land surface, and perpetually maintain the facilities. The land owner agrees in granting the easement not to place anything that would interfere with the operation of an electric line or cable. Examples of things that could interfere are buildings, TV antennas, or high signs and fences.

The owner reserves and retains all the other rights to the land and is free to do with it as he wishes. He can improve it, till and farm it, or anything else that doesn't interfere physically with the line or its maintenance and operation.

Some persons are under the impression that when MEA enters the land on the strength of an easement that the Association has acquired the right to do as it pleases to the exclusion of the control of the owner. This is not true. For example, contrary to the belief of many, no one but MEA has the right to enter the owner's land. The line right-of-way is not a public access route! This mistaken belief has been the source of controversy and has resulted in what amounts to acts of trespass and violation of the rights of the land owner. We strongly emphasize this point. Pole line easements on private property do not create public access and no one has the right to enter the property without the approval of the property owner. Everyone is cautioned that the land owner retains the right to control his land against trespass by anyone who does not have permission from the owner.

Historically, during its more than 35 years of service to the membership, MEA has relied heavily on easements to provide rights-of-way for its distribution lines. Free easements granted by land owners, most of whom are also members, have been a major factor in the continuing effort to keep costs down. Continued violations and acts of trespass upon the properties of private owners will result in increased reluctance by the property owner to grant easements to MEA for new lines in the future and will work to drive everyone's cost of service up.

Q. Why do I have to become a member to have electricity?

A. The by-laws of this electric cooperative require that each person receiving electric service from the cooperative be a member. A membership in the cooperative is similar to a share of stock in a corporation.

Q. Does this mean that I am part owner of the cooperative?

A. Yes. This cooperative is owned by the people it serves.

Q. Does my membership entitle me to a dividend?

A. No. The cooperative operates as a non-profit organization and dividends to its members are paid in the form of low-cost electricity and capital credits. (See MEA Bylaws, Article VII, Appendix B to this manual).

Q. Am I required to pay a deposit in addition to my membership?

A. Yes. Your cooperative requires an account deposit.

Q. Are memberships and deposits refundable?

A. Yes. Membership and deposits are 100 per cent refundable after the payment of your final electric bill. However, no interest is paid on any deposit.

Q. Are consumers who pay energy bills late disconnected?

A. Yes, after a due process, service is disconnected if the account is not paid.

Q. When the electric cooperative representative visits to collect late payment, are there extra charges?

A. Yes, a fee is charged for a visit made by a Co-op representative to collect or disconnect a consumer.

Q. Where can I pay my electric bill?

A. At a cooperative office: Eagle River, on Old Glenn Highway; Big Lake, Mile 51, Parks Highway; Palmer on Industrial Way; and at all Matanuska Valley Federal Credit Union offices. MEA offices are equipped with night depositories for the convenience of consumers.

Q. Can I pay by mail?

A. Yes, you may mail your check or money order. However your payment must be received by the due date marked on your bill so mail early.

Q. What should I do if my electricity goes off?

A. Call your neighbor to see if they are without service. If their power is still on, it could be your fuses or circuit breakers. Check to see if your fuses are good.

Q. Whom should I call if my electricity is off and I have found my fuses to be good?

A. Call the local MEA office and give the message to the person who answers. If it is after office hours, call one of the after hours numbers listed herein.

Q. Where does the Cooperative get the money to construct its buildings and lines?

A. We borrow money from the Rural Electrification Administration on long-term notes. This money must be repaid to REA with interest. The system is used as security on these loans. Additional money is borrowed from the National Rural Utilities Cooperative Finance Corporation.

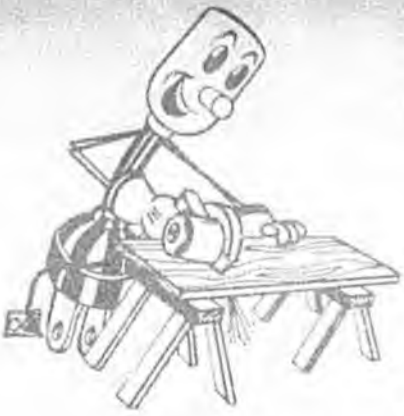
Q. I have heard that cooperatives do not pay taxes. Is this true?

A. No. Cooperatives pay all taxes that are applicable to any business. But, because your cooperative is operated as a non-profit organization, there is no income tax payable. A gross receipts tax is paid to the State based upon gross revenues.

Q. Do we build underground distribution lines?

A. Yes. Underground electric services are available for residential, commercial and industrial accounts. Member-consumers requiring underground service must pay the construction cost difference between overhead and underground hook-ups.

Winter storms can mean MEA employees must use snowshoe or use tracked vehicles to reach work areas.



NRECA

Temporary service for construction is available from MEA; there is a 90 day limit on it.

Q. How can I know that my electric meter is accurate?

A. The cooperative considers them to be accurate if they are within two per cent plus or minus when tested. Meter tests will be made at the request of the consumer for a nominal charge. All meters are tested prior to initial installation.

Q. What is required in the way of electrical wiring?

A. MEA has published a Service Assembly Guide which gives requirements for service construction. All wiring on the owner's side of the meter is the responsibility of the service owner. We suggest close attention be given to wiring to insure safe conditions exist.

Q. Is temporary electric service available?

A. Yes. Provisions have been made to provide temporary electric service for consumers who have a need for it. Full details on this can be obtained from the offices.

Q. If the current goes off, is the Cooperative liable for damages that might be incurred as a result of the power interruption?

A. No. Because the Cooperative cannot guarantee one hundred per cent continuity of electric service. Forces beyond the control of the company such as automobile wrecks, storms and freezing rain and other acts of God make it impossible to operate without some power interruptions.

Q. Am I responsible for the Cooperative's property?

A. All meters, service connections and other equipment furnished by the cooperative shall be, and remain, the property of the cooperative. The member shall provide a space for and exercise proper care to protect the property of the cooperative on his premises; and in the event of loss or damage to the cooperative's property arising from neglect of members to care for same, the cost of the necessary repairs or replacement may be billed to the member.

Q. If for some reason I feel the service is unsatisfactory, what can I do?

A. The member should notify the cooperative immediately

if the service is unsatisfactory for any reason, or if there are any defects, trouble or accidents affecting the supply of electricity. Such notices, if oral, should be confirmed in writing.

Q. Must I notify the cooperative when I move?

A. Whenever a change of occupancy or of legal responsibility takes place on any premises, written notice of such change must be given to the office within a reasonable time prior to the date of such change, or the outgoing member will be held responsible for all service supplied until such notice has been received by the cooperative.

Q. Should I inform the cooperative when I add a new load?

A. The member should inform the cooperative if possible of any unusual or additional load in advance of installation. This will enable the cooperative to upgrade facilities when necessary for the continuance of dependable, uninterrupted service.

Q. Must I furnish an easement?

A. Each member is asked to sign an easement giving the cooperative the right to construct the necessary facilities.

Q. What are the rights of your electric cooperative to members' premises?

A. The cooperative shall have the right to enter upon the premises of the member at all reasonable times for the purpose of reading, inspecting, repairing or removing the metering devices, appliances and wiring of the cooperative. The member shall not permit access to such devices to other than authorized representatives of the cooperative. The member shall obtain and grant all necessary permission to enable the cooperative to install the service and carry out its contracts.

NRECA

Pulling the drapes is pulling for energy conservation, pulling for U.S. energy independence, and pulling less money out of your pocket to pay your electric bill.

Part 20 STATEMENT OF NON–DISCRIMINATION

Matanuska Electric Association, Inc. has filed with the federal government a Compliance Assurance in which it assures the Rural Electrification Administration that it will comply fully with all requirements of Title VI of the Civil Rights Act of 1964 and the Rules and Regulations of the Department of Agriculture issued thereunder, to the end that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination in the conduct of its program and the operation of its facilities. Under this Assurance, this organization is committed not to discriminate against any person on the grounds of race, color or national origin in its policies and practices relating to applications for service or any other policies or practices relating to treatment of beneficiaries and participants including rates, conditions and extension of service, use of any of its facilities, attendance at and participation in any meetings of beneficiaries and participants or the exercise of any rights of such beneficiaries and participants in the conduct of the operations of this organization.

Any person who believes himself, or any specific class of individuals, to be subjected by this organization to discrimination prohibited by Title VI of the Act and the Rules and Regulations issued thereunder may, by himself or a representative, file with the Secretary of Agriculture, Washington, DC 20250, or this organization, or all, a written complaint. Such complaint must be filed not later than 90 days after the alleged discrimination, or by such later date to which the Secretary of Agriculture or the Rural Electrification Administration extends the time for filing. Identity of complainants will be kept confidential except to the extent necessary to carry out the purposes of the Rules and Regulations.

Matanuska Electric Association, Inc.
P.O. Box 1148
Palmer, Alaska 99645

APPENDIX A

ARTICLES OF INCORPORATION
OF
MATANUSKA ELECTRIC ASSOCIATION, INC.

(As Amended April 27, 1974)

We, the undersigned, being natural persons of the age of twenty-one years or more and citizens of the United States of America and residents of the State of Alaska, do hereby associate ourselves together for the purpose of forming a non-profit cooperative association under and by virtue of Articles VII, Chapter XI of the Compiled Laws of Alaska, 1933 and all laws amendatory thereof and supplemental thereto, and do hereby adopt the following articles of association:

ARTICLE I

The name of the Corporation is MATANUSKA ELECTRIC ASSOCIATION, INC.

ARTICLE II

The object or objects and purpose or purposes for which the Corporation is formed are:

(a) to generate manufacture, purchase, acquire and accumulate electric energy; to transmit, distribute, furnish, sell and dispose of such electric energy; and to construct, erect, purchase, lease as lessee and in any manner acquire, own, hold , maintain, operate, sell, dispose of, lease as lessor, exchange and mortgage plants, buildings, works, machinery, supplies, apparatus, equipment and electric transmission and distribution lines or systems necessary, convenient or useful for carrying out and accomplishing any or all of the foregoing purposes;

(b) to acquire, own, hold, use, exercise, sell, mortgage, pledge, hypothecate and in any manner dispose of franchises, rights, privileges, licenses, rights of way and easements necessary, useful, or appropriate to accomplish any or all of the purposes of the corporation;

(c) to purchase, receive, lease as lessee, or in any other manner acquire, own, hold, maintain, use, convey, sell, lease as lessor, exchange, mortgage, pledge or otherwise dispose of any and all real and personal property or any interest therein necessary, useful or appropriate to enable the corporation to accomplish any or all of its purposes;

(d) to assist its members to wire their premises and install therein electrical and plumbing appliances, fixtures, machinery, supplies, apparatus and equipment of any and all kinds and character (including, without limiting the generality of the foregoing, such as are applicable to water supply and sewage disposal) and, in connection therewith and for such purposes, to purchase, acquire,

lease, sell, distribute, install and repair electrical and plumbing appliances, fixtures, machinery, supplies, apparatus and equipment of any and all kinds and character (including, without limiting the generality of the foregoing, such as are applicable to water supply and sewage disposal) and to receive, acquire, endorse, pledge, guarantee, hypothecate, transfer or otherwise dispose of notes and other evidences of indeptedness and all security therefore;

(e) to borrow money, to make and issue bonds, notes and other evidences of indebtedness, secured or unsecured, for money borrowed or in payment for property acquired, or for any of the other objects or purposes of the corporation; to secure the payment of such bonds, notes or other evidences of indebtedness by mortgage or mortgages, or deeds or deeds of trust upon, or by the pledge of or other lien upon, any or all of the property, rights, privileges and permits of the corporation, wheresoever situated, acquired or to be acquired;

(f) to do and perform any and all acts and things, and to have and exercise any and all powers, as may be necessary or convenient to accomplish any or all of the foregoing purposes or as may be permitted by the act under which the corporation is formed;

ARTICLE III

Section 1. The Corporation is formed without any purpose of pecuniary profit to itself and shall have no capital stock.

Section 2. Each member shall be entitled to one (1) vote and no more upon each matter submitted to a vote at a meeting of the members. At all meetings of the members at which a quorum is present, all questions shall be decided by a vote of a majority of the members voting thereon in person, except as otherwise authorized by law and provided in the Bylaws. If a husband and wife hold a joint membership, they shall jointly be entitled to one (1) vote and no more upon each matter submitted to a vote at a meeting of the members.

ARTICLE IV

Section 1. Except as limited elsewhere in these Articles or in the Bylaws of the corporation, the business and affairs of the corporation shall be vested in and managed and controlled by a Board of Direcotrs; and the Officers of the corporation shall be a President, a Vice-President, a Treasurer, and a Secretary. The offices of Secretary and Treasurer may be held by the same person.

Section 2. The officers of the corporation shall be elected annually by and from the Board of Directors. When a person holding any such office ceases to be a director, he shall cease to hold such office. Any officer may be removed from office and his successor elected in the manner prescribed in the Bylaws.

Section 3. The number of directors of the corporation shall not be less than five (5), each of whom shall be a member of the corporation or of another cooperative which is a member thereof. The Bylaws shall prescribe the number of directors, their qualifications other than those prescribed by law, the manner of holding meetings of the Board of Directors, and of electing successors to directors who shall resign, die or otherwise be incapable of acting. At each annual meeting of the members, directors shall be elected by the members to fill the position of directors whose terms have expired or are expiring, to hold office during the term to which they are elected or until their successor shall have been elected and qualified. The Bylaws shall provide for the removal of directors from office and for the election of their successors.

Section 4. The Bylaws may provide for the division of the territory served or to be served by this corporation into two or more districts for any purpose, including without limitation, the nomination and election of directors and the election and functioning of district delegates. Such delegates, who shall be members, may nominate and elect directors. The Bylaws shall prescribe the boundaries of the districts or the manner of establishing such boundaries, the manner of changing such boundaries, and the manner in which such district shall function. No member at any district meeting and no district delegate at any meeting shall vote by proxy or by mail.

Section 5. Directors shall not receive any salaries for their services as directors and, except in emergencies, shall not receive any salaries for their service in any other capacity without the approval of the members. The bylaws may, however, prescribe a fixed fee for attendance at each meeting of the Board of Directors and may provide for reimbursement of actual expenses of attendance.

ARTICLE V

Section 1. (Repealed April 27, 1974)
Section 2. (Repealed April 27, 1974)
Section 3. (Repealed April 27, 1974)

Section 4. Bylaws may be adopted, amended or repealed by the affirmative vote of a majority of those members voting thereon at a meeting of the members. The notice of such meeting shall have contained a copy of the proposed adoptions, amendments or repeal.

Section 5. The Bylaws of the Corporation may define and fix other duties and responsibilities of the members and prescribe other terms and conditions upon which members shall be admitted to and retain membership in the Corporation, make provisions for annual and special meetings of members and directors and notices thereof, provide for methods of voting, quorum requirements, and any other matters relating to the internal organization and management of the Corporation, provided that such provisions shall not be inconsistent with these Articles of Incorporation or the laws of the State of Alaska.

ARTICLE VI

The term of existence of the Corporation shall be perpetual.

ARTICLE VII

The principal place of business of the Corporation shall be at Palmer, Alaska.

ARTICLE VIII

The Corporation may amend, alter, change or repeal any provisions contained in these Articles of Incorporation in the manner now or hereafter prescribed by law.

ARTICLE IX

The names and addresses of the incorporators who shall constitute the first Board of Directors are as follows:

Walter E. Huntley	Palmer, Alaska
Ross L. Sheely	Palmer, Alaska
Laurence Arndt	Palmer, Alaska
C. Earl Albrecht	Palmer, Alaska
Edward I. Wineck	Palmer, Alaska

IN WITNESS WHEREOF, we have hereunto set our hands in quadruplicate this FIRST day of MARCH, 1941.

Walter E.Huntley, Ross L.Sheely, Laurence Arndt, C.Earl Albrecht, Edward I.Wineck

APPENDIX B

BYLAWS
OF
MATANUSKA ELECTRIC ASSOCIATION, INC.

(As Amended April 27, 1974)

ARTICLE I

MEMBERSHIP

SECTION 1. Requirements for Membership. Any person, partnership, firm, association, corporation, or body politic or subdivision thereof will become a member of Matanuska Electric Association, Inc. (hereinafter called the "Association") upon receipt of electric service from the Association, provided that he or it has first:

(a) Made a written application for membership therein;

(b) Agreed to purchase from the Association electric energy as hereinafter specified;

(c) Agreed to comply with and be bound by the articles of incorporation and bylaws of the Association and any rules and regulations adopted by the Board; and

(d) Paid the membership fee hereinafter specified.

No member may hold more than one membership in the Association, whether held by an individual person or held jointly by husband and wife, and no membership in the Association shall be transferable, except as provided in these Bylaws.

SECTION 2. (Repealed April 22, 1972.)

SECTION 3. Joint Membership. A husband and wife may apply for a joint membership and, subject to their compliance with the requirements set forth in Section 1 of this Article, may be accepted for such membership. The term "member" as used in these Bylaws shall be deemed to include a husband and wife holding a joint membership and any provisions relating to the rights and liabilities of membership shall apply equally with respect to the holders of a joint membership. Without limiting the generality of the foregoing, the effect of the hereinafter specified actions by or in respect of the holders of a joint membership shall be as follows:

(a) The presence at a meeting of either or both shall be regarded as the presence of one member and shall constitute a joint waiver of notice of the meeting;

(b) The vote of either separately or both jointly shall constitute one joint vote;

(c) A waiver of notice signed by either or both shall constitute a joint waiver;

(d) Notice to either shall constitute notice to both;

(e) Expulsion of either shall terminate the joint membership;

(f) Withdrawal of el r shall terminate the joint membership; and
(g) Either but not both may be elected or appointed as an officer or board member, provided that both meet the qualifications for such office.

SECTION 4. Conversion of Membership. (a) A membership may be converted to a joint membership upon the written request of the holder thereof and the agreement by such holder and his or her spouse to comply with the Articles of Incorporation, Bylaws, and Rules and Regulations adopted by the Board.

(b) Upon the death of either spouse who is a party to the joint membership, such membership shall be held solely by the survivor. However, the estate of the deceased shall not be released from any debts due the Association.

SECTION 5. Membership Fee. The membership fee shall be five (5) dollars.

SECTION 6. Purchase of Electric Energy. Each member shall, as soon as electric energy shall be available, purchase from the Association all electric energy used on the premises specified in his application for membership and shall pay therefor at rates which shall from time to time be fixed by the Board. It is expressly understood that amounts paid for electric energy in excess of the cost of service are furnished by members as capital and each member shall be credited with the capital so furnished as provided in these bylaws. Each member shall pay to the Association such minimum amount regardless of the amount of electric energy consumed, as shall be fixed by the Board from time to time. Each member shall also pay all amounts owed by him to the Association as and when the same shall become due and payable.

SECTION 7. Termination of Membership. (a) Any member may withdraw from membership upon compliance with such uniform terms and conditions as the Board may prescribe. The Board may, by the affirmative vote of not less than two-thirds of all the members of the Board, expel any member who fails to comply with any of the provisions of the Articles of Incorporation, Bylaws, or Rules and Regulations adopted by the Board, but only if such member shall have been given written notice by the Association that such failure makes him liable to expulsion and such failure shall have continued for at least ten days after such notice was given. Any expelled member may be reinstated by vote of the Board or by vote of the members at any annual or special meeting. The membership of the member who has ceased to purchase energy from the Association may be cancell l by resolution of the Board.

(b) Upon the withdrawal, death, cessation of existence or expulsion of a member, the membership of such member shall thereupon terminate. Termination of membership in any manner shall not release a member or his estate from any debts due the Association.

(c) In case of withdrawal or termination of membership in any manner, the Association shall repay to the member the amount of the membership fee paid by him, provided, however, that the Association shall deduct from the amount of the membership fee the amount of any debts or obligations owed by the member to the Association.

ARTICLE II

RIGHTS AND LIABILITIES OF MEMBERS

SECTION 1. Property Interest of Members. Upon dissolution, after

(a) All debts and liabilities of the Association shall have been paid, and

(b) All capital furnished through patronage shall have been retired as provided in these bylaws, the remaining property and assets of the Association shall be distributed among the members and former members in the proportion which the aggregate patronage of each bears to the total patronage of all members during the ten (10) years next preceding the date of the filing of the certificate of dissolution, or, if the Association shall not have been in existence for such period, during the period of its existence.

SECTION 2. Non-liability for Debts of the Association. The private property of the members shall be exempt from execution or other liability for the debts of the Association and no member shall be liable or responsible for any debts or liabilities of the Association.

ARTICLE III

MEETING OF MEMBERS

SECTION 1. Annual Meeting. The annual meeting of the members shall be held during the month of April of each year beginning with the year 1969 at any place served by the Association, as selected by the Board and which shall be designated in the notice of the meeting, for the purpose of electing board members, passing upon reports for the previous fiscal year and transacting such other business as may come before the meeting. It shall be the responsibility of the Board to make adequate plans and preparations for the annual meeting. Failure to hold the annual meeting at the designated time shall not work a forfeiture or dissolution of the Association.

SECTION 2. Special Meetings. Special Meetings of the members may be called by resolution of the Board, or upon a written request signed by any three board members, by the President, or by ten per centum (10%) or more of all the members, and it shall thereupon be the duty of the Secretary to cause notice of such meeting to be given as hereinafter provided. Special meetings of the members may be held at any place served by the Association as designated by the Board and shall be specified in the notice of the special meeting.

SECTION 3. Notice of Members' Meetings. (a) Written or printed notice stating the place, day and hour of the meeting and, in case of a special meeting or an annual meeting at which business requiring special notice is to be transacted, the purpose or purposes for which the meeting is called, shall be delivered not less than twenty (20) days nor more than forty (40) days before the date of the meeting, either personally or by mail, by or at the direction of the Secretary or upon a default in duty by the Secretary, by the persons calling the meeting, to each member. If mailed, such notice shall be deemed to be delivered when deposited in the United States mail, addressed to the member at his address as it appears on the records of the Association with postage thereon prepaid. The failure of any member to receive notice of an annual or special meeting of the members shall not invalidate any action which may be taken by the members at any such meeting.

(b) The membership books of the Association shall be closed by order of the Board not more than thirty-one (31) days prior to the time of the members' meeting, for the purpose of giving notice of such meeting. Any member accepted for membership after such closing of the books shall not be entitled to participate in such meeting.

SECTION 4. Quorum. While the Association has more than one thousand (1,000) members, a quorum for the transaction of business at all meetings of the members shall be fifty (50) members, present in person. If at any time the Association has less than one thousand members, a quorum for the transaction of business shall be five per centum (5%) of total number of members, present in person. If less than a quorum is present at any meeting, a majority of those present in person may adjourn the meeting from time to time without further notice.

SECTION 5. Voting. (a) Each member shall be entitled to only one vote upon each matter submitted to a vote at a meeting of the members. All questions shall be decided by a vote of a majority of the members voting thereon in person except as otherwise provided by law, the Articles of Incorporation or these Bylaws.

(b) The vote of a member which is a partnership, firm, association, corporation, or body politic or subdivision thereof, shall be cast by no person except an owner, officer or employee of such member, whose authority to act for such member shall be in writing, duly authorized and signed by the governing authority of such member or by some officer empowered to do so. Such written authority, which shall be filed with the Secretary or other designated officer at each

meeting, shall constitute a certificate of authority to act for such member and in nowise shall be deemed a 'proxy' within the spirit and meaning of these Bylaws.

SECTION 6. Order of Business. The order of business at the annual meeting of the members and, so far as possible, at all other meetings of the members, shall be essentially as follows, except as otherwise determined by the members at such meeting:

1. Report on the numbers of members present in person in order to determine the existence of a quorum.
2. Reading of the notice of the meeting and the certificate of the Secretary or some other officer of the Association that due notice of the meeting has been given to each qualified member in accordance with the provisions of the Bylaws of the Association.
3. Reading of unapproved minutes of previous meetings of the members and the taking of necessary action thereon, unless the members vote to dispense with such reading.
4. Presentation and consideration of reports of officers, directors and committees.
5. Election of board members.
6. Unfinished business.
7. New business.
8. Adjournment.

ARTICLE IV

BOARD MEMBERS

SECTION 1. General Powers. The business and affairs of the Association shall be managed by a board of five (5) members which shall exercise all of the power of the Association except such as are by law, the Articles of Incorporation or these Bylaws conferred upon or reserved to the members.

SECTION 2. Election and Tenure of Office. Directors shall be elected by ballot, by the members, at the annual meetings of the members, for terms of two years or until their successors are elected and qualified, subject to the provisons of these Bylaws with respect to the removal of directors. The terms of Directors shall be staggered so that two shall be elected in even-numbered years and three shall be elected in odd-numbered years. If an election of board members shall not be held on the day designated herein for the annual meeting, or at any adjournment thereof, a special meeting of the members shall be held for the purpose of electing board members within a reasonable time thereafter. Board members shall be elected by a plurality vote of the members.

SECTION 3. Qualifications. No person shall be eligible to become or remain a board member of the Association who:

(a) is not a member and bona fide resident in the area served by the Association; or

(b) is in any way employed by or financially interested in a competing enterprise or a business selling electric energy, or supplies to the Association, or a business primarily engaged in selling electrical or plumbing appliances, fixtures or supplies to the members of the Association.

Upon establishment of the fact that a board member is holding the office in violation of any of the foregoing provisions, the Board shall remove such board member from office.

Nothing contained in this section shall affect in any manner whatsoever the validity of any action taken at any meeting of the Board.

SECTION 4. Nominations. It shall be the duty of the Board to appoint, not less than forty (40) days nor more than sixty (60) days before the date

of a meeting of the members at which Board members are to be elected, a committee on nominations consisting of not less than five (5) nor more than eleven (11) members who shall be selected from different sections so as to insure equitable representation. No member of the Board may serve on such committee. The committee, keeping in mind the principle of equitable representation, shall prepare and post at the principal office of the Association at least thirty (30) days before the meeting a list of nominations for board members which shall include at least two candidates for each board position to be filled by the election. The Secretary shall be responsible for mailing with the notice of the meeting, or separately, but at least twenty (20) days before the date of the meeting, a statement of the number of board members to be elected and the names and addresses of the candidates nominated by the committee on nominations. Any fifteen or more members acting together may make other nominations by petition and the Secretary shall post such nominations at the same place where the list of nominations made by the committee is posted. Nominations made by petition, if any, received at least fifteen (15) days before the meeting shall be included on the official ballot. Later nominations by petition shall be treated as nominations from the floor. The chairman shall call for additional nominations from the floor. No member may nominate more than one candidate.

SECTION 5. Removal of Board Member by Members. Any member may bring charges against a board member and, by filing with the Secretary such charges in writing together with a petition signed by at least ten per centum (10%) of the members or 300, whichever is the lesser, may request the removal of such board member by reason thereof. Such board member shall be informed in writing of the charges at least twenty (20) days prior to the meeting of the members at which the charges are to be considered and shall have an opportunity at the meeting to be heard in person or persons bringing the charges against him shall have the same opportunity. The question of the removal of such board member shall be considered and voted upon at the meeting of the members and any vacancy created by such removal may be filled by vote of the members at such meeting without compliance with the foregoing provisions with respect to nominations.

SECTION 6. Removal of Board Member by Board of Directors. Directors absent from three (3) consecutive regular board meetings without leave of absence granted by the Board of Directors may be summarily removed from office by the Board. The Board, in its discretion, shall take such action by declaring the office vacant and proceeding forthwith to fill such vacancy in accordance with the provisions of Article IV, Section 7, of these Bylaws, provided, however, that written notice of such contemplated action has been given to and received by all the Directors at least twenty-four (24) hours before the time of the meeting at which such action is to be considered.

SECTION 7. Vacancies. Subject to the provisions of these Bylaws with respect to the filling of vacancies caused by the removal of board members by the members, a vacancy occurring in the Board shall be filled by the affirmative vote of a majority of the remaining board members for the unexpired portion of the term.

SECTION 8. Compensation. Board members shall not receive any salary for their services as such, but shall, however, be paid the sum of twenty dollars ($20.00) for attendance at each meeting of the Board. If authorized by the Board, board members may also be reimbursed for expenses actually and necessarily incurred in carrying out Association business or granted a reasonable per diem allowance by the Board in lieu of detailed accounting for some of these expenses. No board member shall receive compensation for serving the Association in any other capacity, nor shall any close relative of a board member receive compensation for serving the Association, unless the payment and amount of compensation shall be specifically authorized by a vote of the members or the service by the board member or his close relative shall have been certified by the Board as an emergency measure.

ARTICLE V

MEETINGS OF BOARD

SECTION 1. Regular Meetings. A regular meeting of the Board shall be held without notice, immediately after, and at the same place as, the annual meeting of the members. A regular meeting of the Board shall also be held monthly at the principal business office of the Association, at such time as designated by the Board. Such regular monthly meeting may be held without notice other than such resolution fixing the time thereof.

SECTION 2. Special Meetings. Special meetings of the Board may be called by the President or by any three board members, and it shall thereupon be the duty of the Secretary to cause notice of such meeting to be given as hereinafter provided. The President or board members calling the meeting shall fix the time and place for the holding of the meeting.

SECTION 3. Notice of Board Meeting. Written notice of the time, place and purpose of any special meeting of the Board shall be delivered to each board member either personally or by mail, by or at the direction of the Secretary, or upon a default in duty by the Secretary, by the President or the board member calling the meeting. If mailed, such notice shall be deemed to be delivered when deposited in the United States mail addressed to the board member at his address as it appears on the records of the Association, with postage thereon prepaid, at least five days before the date set for the meeting.

SECTION 4. Quorum. A majority of the Board shall constitute a quorum, provided, that if less than such majority of the Board is present at said meeting, a majority of the Board present may adjourn the meeting from time to time; and provided further, that the Secretary shall notify any absent board members of the time and place of such adjourned meeting. The act of a majority of the board members present at a meeting at which a quorum is present shall be the act of the Board, except as otherwise provided in these Bylaws.

ARTICLE VI

OFFICERS

SECTION 1. Number. The officers of the Association shall be a President, Vice President, Secretary, Treasurer, and such other officers as may be determined by the Board from time to time. The offices of Secretary and Treasurer may be held by the same person.

SECTION 2. Election and Term of Office. The officers shall be elected by ballot, annually by and from the Board at the meeting of the Board held immediately after the annual meeting of the members. If the election of officers shall not be held at such meeting, such election shall be held as soon thereafter as conveniently may be. Each officer shall hold office until the first meeting of the Board following the next succeeding annual meeting of the members or until his successor shall have been elected and shall have qualified. A vacancy in any office shall be filled by the Board for the unexpired portion of the term.

SECTION 3. Removal of Officers and Agents by the Board. Any officer or agent elected or appointed by the Board may be removed by the Board whenever in its judgment the best interests of the Association will be served thereby. In addition, any member of the Association may bring charges against an officer, and by filing with the Secretary such charges in writing together with a petition signed by ten per centum (10%) of the members or 300, whichever is the lesser, may request the removal of such officer. The officer against whom such charges have been brought shall be informed in writing of the charges at least ten (10) days prior to the Board meeting at which the charges are to be considered and shall have an opportunity at the meeting to be heard in person or by counsel and to present evidence in respect of the charges; and the person or persons bringing the charges against him shall have the same opportunity. In the event the Board does not remove

such officer, the question of his removal shall be considered and voted upon at the next meeting of the members.

SECTION 4. President. The President shall:

(a) be the principal executive officer of the Association and, unless otherwise determined by the members of the Board, shall preside at all meetings of the members and the Board;

(b) sign, with the Secretary, any deeds, mortgages, deeds of trust, notes, bonds, contracts or other instruments authorized by the Board to be executed, except in cases in which the signing and execution thereof shall be expressly delegated by the Board or by these Bylaws to some other officer or agent of the Association, or shall be required by law to be otherwise signed or executed; and

(c) in general perform all duties incident to the office of the President and such other duties as may be prescribed by the Board from time to time.

SECTION 5. Vice President. In the absence of the President, or in the event of his inability or refusal to act, the Vice President shall perform the duties of the President, and when so acting shall have all the powers of and be subject to all the restrictions upon the President. The Vice President shall also perform such other duties as from time to time may be assigned to him by the Board.

SECTION 6. Secretary. The Secretary shall be responsible for:

(a) keeping the minutes of the meetings of the members and of the board in books provided for that purpose;

(b) seeing that all notices are duly given in accordance with these bylaws or as required by law;

(c) the safekeeping of the corporate books and records and the seal of the Association and affixing the seal of the Association to all documents, the execution of which on behalf of the Association under its seal is duly authorized in accordance with the provisions of these bylaws;

(d) keeping a register of the names and post office addresses of all members;

(e) signing, with the President, certificates of membership, the issue of which shall have been authorized by the board or the members;

(f) keeping on file at all times a complete copy of the Articles of Incorporation and Bylaws of the Association containing all amendments thereto (which copy shall always be open to the inspection of any member) and at the expense of the Association, furnishing a copy of the Bylaws and of all amendments thereto to any member upon requests; and

(g) in general performing all duties incident to the office of Secretary and such other duties as from time to time may be assigned to him by the Board.

SECTION 7. Treasurer. The Treasurer shall be responsible for:

(a) custody of all funds and securities of the Association;

(b) the receipt of and the issuance of receipts for all monies due and payable to the Association and for the deposit of all such monies in

the name of the Association in such bank or banks as shall be selected in accordance with the provisions of these Bylaws; and

(c) the general performance of all the duties incident to the office of Treasurer and such other duties as from time to time may be assigned to him by the Board.

SECTION 8. Manager. The Board may appoint a manager who may be, but who shall not be required to be, a member of the Association. The manager shall perform such duties and shall exercise such authority as the Board may from time to time vest in him.

SECTION 9. Bonds of Officers. The Treasurer and any other officer or agent of the Association charged with responsibility for the custody of any of its funds or property shall be bonded in such sum and with such surety as the Board shall determine. The Board in its discretion may also require any other officer, agent or employee of the Association to be bonded in such amount and with surety as it shall determine.

SECTION 10. Compensation. (a) The powers, duties and compensation of officers, agents and employees shall be fixed by the Board subject to the provisions of these Bylaws with respect to compensation for a board member.

(b) No close relative of a Director shall receive compensation as an employee or for otherwise serving the Association unless such employment or service shall be specially and specifically authorized by vote of the members of the Association. "Close relative," as herein used, shall include but in nowise shall be limited to wife, husband, son, daughter, father, mother, brother, sister, step-father, step-mother, step-son, step-daughter, step-brother, step-sister. Candidates for the office of director having close relative in the employ or service of the Association shall disclose the fact to the Secretary prior to the printing of the notice of the next meeting at which Directors are to be elected and said notice shall state the fact and the relationship of the parties. If such candidate is elected, the members having been previously notified as aforesaid, then the fact of such election shall constitute a conclusive presumption that the members have approved the payment of compensation to the new Director's relative.

SECTION 11. Reports. The officers of the Association shall submit at each annual meeting of the members reports covering the business of the Association for the previous fiscal year. Such reports shall set forth the condition of the Association at the close of such fiscal year.

ARTICLE VII

NON-PROFIT OPERATION

SECTION 1. Interest or Dividends on Capital Prohibited. The Association shall at all times be operated on a cooperative non-profit basis for the mutual benefit of its patrons. No interest or dividends shall be paid or payable by the Association on any capital furnished by its patrons.

SECTION 2. Patronage Capital in Connection with Furnishing Electric Energy. In the furnishing of electric energy the Association's operations shall be so conducted that all patrons will through their patronage furnish capital for the Association. In order to induce patronage and to assure that the Association will operate on a non-profit basis the Association is obligated to account on a patronage basis to all its patrons for all amounts received and receivable from the furnishing of electric energy in excess of operating costs and expenses properly chargeable against the furnishing of electric energy. All such amounts in excess of operating costs and expenses at the moment of receipt by the Association are received with the understanding that they are furnished by the patrons as capital. The Association is obligated to pay by credits to a capital account for each patron all such amounts in excess of operating costs and expenses. The books and records of the Association shall be set up and kept in such a manner that at the end of each fiscal year the amount of capital, if any, so furnished by each patron is clearly reflected and

credited in an appropriate record to the capital account of each patron, and the Association shall within a reasonable time after the close of the fiscal year notify each patron of the amount of capital so credited to his account. All such amounts credited to the capital account of any patron shall have the same status as though they had been paid to the patron in cash in pursuance of a legal obligation to do so and the patron had then furnished the Association corresponding amounts for capital.

All other amounts received by the Association from its operation in excess of costs and expenses shall, insofar as permitted by law, be (a) used to offset any losses incurred during the current or any prior fiscal year and (b) to the extent not needed for that purpose, allocated to its patrons on a patronage basis and any amount so allocated shall be included as part of the capital credited to the accounts of patrons, as herein provided.

In the event of dissolution or liquidation of the Association, after all outstanding indebtedness of the Association shall have been paid, outstanding capital credits shall be retired without priority on a pro rata basis before any payments are made on account of property rights of members. If, at any time prior to dissolution or liquidation, the Board shall determine that the financial condition of the Association will not be impaired thereby, the capital credited to patrons' accounts may be retired in full or in part. Any such retirements of capital shall be made in order of priority to the year in which the capital was furnished and credited, the capital first received by the Association being first retired.

Capital credited to the account of each patron shall be assignable only on the books of the Association pursuant to written instruction from the assignor and only to successors in interest or successors in occupancy in all or a part of such patron's premises served by the Association unless the Board, acting under policies of general obligation, shall determine otherwise.

Notwithstanding any other provisions of these Bylaws, the Board, at its discretion, shall have the power at any time upon the death of any patron, if the legal representatives of his estate shall request in writing that the capital credited to any such patron be retired prior to the time such capital would otherwise be retired under the provisions of these Bylaws, to retire capital credited to any such patron immediately upon such terms and conditions as the Board, acting under policies of general application, and the legal representatives of such patron's estate shall agree upon; provided, however, that the financial condition of the Association will not be impaired thereby.

The patrons of the Association, by dealing with the Association, acknowledge that the terms and provisions of the Articles of Incorporation and Bylaws shall constitute and be a contract between the Association and each patron, and both the Association and the patrons are bound by such contract, as fully as though each patron had individually signed a separate instrument containing such terms and provisions. The provisions of this article of the Bylaws shall be called to the attention of each patron of the Association by posting in a conspicuous place in the Association's office.

ARTICLE VIII

DISPOSITION OF PROPERTY

SECTION 1. The Board of Directors shall have full power and authority to sell, mortgage, lease or otherwise dispose of or encumber, any of the following property of the Association:

(a) Personal property acquired for resale.

(b) Services of all kinds, including electric energy.

(c) Property which in the judgment of the Board of Directors neither is nor will be necessary or useful in operating and maintaining the Association's system and facilities; provided, however, that all sales of such property shall not in any one year exceed in the aggregate ten per centum (10%) of the value of all of the property of the Association.

SECTION 2. The Board of Directors shall have full power and authority to authorize the execution and delivery of a mortgage or mortgages, or a deed or deeds of trust of any and all of the property, rights, privileges, licenses, franchises and permits of the Association, whether acquired or to be acquired, and wherever situated, as well as the revenues therefrom, all upon such terms and conditions as the Board of Directors shall determine, to secure any indebtedness of the Association.

SECTION 3. The Association may not otherwise sell, lease, or otherwise dispose of all or a substantial portion of the Association's property unless such sale, lease, or other disposition is authorized by the affirmative vote of not less than the majority of all the members of the cooperative; provided, however, the Board of Directors may, upon the authorization of the majority of those members of the Association present at a meeting of its members, sell, lease, or otherwise dispose of all or a substantial portion of its property to another cooperative or to the holder or holders of any notes, bonds, or other evidence of indebtedness issued to the United States of America or any agency or instrumentality thereof.

ARTICLE IX

SEAL

The corporate seal of the Association shall have inscribed thereon the name of the Association and the words "Corporate Seal" and "State of Alaska."

ARTICLE X

FINANCIAL TRANSACTIONS

SECTION 1. Contracts. Except as otherwise provided in these Bylaws, the Board may authorize any officer or officers, agent or agents to enter into any contract or execute and deliver any instrument in the name and on behalf of the Association, and such authority may be general or confined to specific instances.

SECTION 2. Checks, Drafts, etc. All checks, drafts, or other orders for the payment of money, and all notes, bonds or other evidences of indebtedness issued in the name of the Association shall be signed by such officer or officers, agent or agents, employee or employees of the Association and in such manner as shall from time to time be determined by resolution of the Board.

SECTION 3. Deposits. All funds except petty cash of the Association shall be deposited from time to time to the credit of the Association in such bank or banks as the Board may select.

SECTION 4. Change in Rates. Written notice shall be given to the Administrator of the Rural Electrification Administration of the United States of America not less than ninety days prior to the date upon which any proposed change in the rates charged by the Association for electric energy becomes effective.

ARTICLE XI

MISCELLANEOUS

SECTION 1. Membership in Other Organizations. The Association shall not become a member of or purchase stock in any other organization without an affirmative vote of the members at a duly held meeting, the notice of which shall specify that action is to be taken upon such proposed membership or stock purchase, provided, however, that the Association may upon the authorization of the Board, purchase stock in or become a member of any corporation or organization organized on a non-profit basis for the purpose of engaging in or furthering the cause of rural electrification, or with the approval of the Administrator of REA, of any other corporation for the purpose of acquiring electric facilities.

SECTION 2. Waiver of Notice. Any member or board member may waive in writing any notice of a meeting required to be given by these Bylaws. The attendance of a member or board member at any meeting shall constitute a waiver of notice of such meeting by such member or board member, except in case a member or Board member shall attend a meeting for the express purpose of objecting to the transaction of any business on the ground that the meeting has not been lawfully called or convened.

SECTION 3. Policies, Rules and Regulations. The Board shall have power to make and adopt policies, rules and regulations, not inconsistent with law, the Articles of Incorporation, or these Bylaws, as it may deem advisable for the management of the business and affairs of the Association.

SECTION 4. Accounting System and Reports. (a) The Board shall cause to be established and maintained a complete accounting system which, among other things, and subject to applicable laws and rules and regulations of any regulatory body shall conform to such accounting system as may from time to time be designated by the Administrator or the Rural Electrification Administration of the United States of America. The Board shall also after the close each fiscal year cause to be made by a certified public accountant a full and complete audit of the accounts, books and financial condition of the Association as of the end of such fiscal year. A report of such audit, in condensed form, shall be submitted to the members at the next following annual meeting.

(b) The audit report shall be available to the members upon compliance with the policies, rules and regulations promulgated by the Board.

SECTION 5. Area Coverage. The Board shall make diligent effort to see that electric service is extended to all unserved persons within the Association's service area who (a) desire such service, and (b) meet all reasonable requirements established by the Association as a condition of such service.

SECTION 6. Rules of Order. The rules contained in the latest edition of Robert's Rules of Order shall govern the Association in all cases to which they are applicable and in which they are not inconsistent with law, the Articles of Incorporation, or these Bylaws.

ARTICLE XII

AMENDMENTS

SECTION 1. Amendment, Repeal, or Adoption. These Bylaws may be amended, repealed, or new bylaws adopted by the affirmative vote of a majority of those members voting thereon at a meeting of the members, provided that the notice of such meeting, whether regular or special, shall have contained the proposed amendment, repeal or new bylaws.

SECTION 2. Placement of Proposed Amendment on Official Notice by Member. A member may have a proposed amendment of the bylaws placed on the official notice to the members by one of the following procedures:

(a) Filing the proposed amendment in writing together with a petition signed by at least ten per centum (10%) of the members or 300, whichever is the lesser, with the Secretary of the Association at least thirty (30) days before the meeting; or

(b) Filing the proposed amendment in writing with the Board of Directors at least thirty (30) days before the meeting for its consideration and decision for placement on the official notice; or

(c) Motion from the floor at a membership meeting, duly seconded and carried by majority vote of those members present at the meeting, for placement on the official notice of the next scheduled meeting of the members.

COLD WEATHER OUTAGE

IF THE POWER IS OFF FOR AN EXTENDED PERIOD:

Picture this: It's cold, very cold. All of a sudden you realize that it is getting cold inside the house too. You have no heat. Would you know what to do to protect yourself and your house?

If the heat should go off, it is important to have emergency heating equipment. A wood burning stove and plenty of firewood is perfect. But you can get by with a small camp stove, the tent heating type, as long as you have adequate ventilation.

To keep yourself warm in the unheated house, wear several layers of clothes. Since the body loses between half and three-quarters of its heat through the head, wear a warm hat—even in the house and especially when you are sleeping in an unheated house. Use several blankets for sleeping rather than one heavy one. The air trapped between them is excellent insulation.

When the temperature inside the home falls to 40°, it is time to drain your water system to keep distribution pipes from freezing and bursting. In order to accomplish this task your water system must have a draining feature built-in and you must be aware of the procedure to follow to drain it. During bad winter storms, with power outages, knowing how to drain your water system can save you money!

If your home has a hot water heating system, be sure to have it adequately protected with liquid anti-freeze

HOW TO LIVE WITH A SERVICE INTERRUPTION!

Interruptions in your electric service may occur from time to time.

There are four rules to follow when you experience a service interruption:

NUMBER 1. Check and, if necessary, replace your fuses or reset your circuit breakers. If you are still without power,

NUMBER 2. Check your nearest neighbors to determine if they too are experiencing a power loss. If so,

NUMBER 3. Report the service interruption to Matanuska Electric Association and be prepared to supply the following information:

a. Your name and address.

b. Whether your neighbors have service

c. Your pole number (service location) and phone number.

d. Time power was interrupted.

e. The cause of the interruption if you know it.

NUMBER 4. Call these numbers to report a service interruption:

	8:00 a.m. - 5:00 p.m.	After Hours
Palmer Headquarters	745-3231	745-3235
Eagle River Branch	694-2161	694-2161
Big Lake Branch	892-6021	745-3235

Collect calls will be accepted from Talkeetna.

SUMMARY OF TESTIMONY PRESENTED BY MALCOLM CHEEK, GENERAL MANAGER, MATANUSKA ELECTRIC ASSOCIATION, INC., BEFORE THE SENATE COMMERCE COMMITTEE REGARDING THE ALASKA PUBLIC UTILITIES COMMISSION

As discussed in the Performance Review of the Alaska Public Utilities Commission dated August 1, 1979, recommendation no. 4, MEA feels that non-profit electric cooperatives should be removed from economic regulation by the APUC upon an affirmative vote of the majority in attendance at the cooperative's annual membership meeting.

1. Existing APUC economic regulation is unnecessary and costly.

2. MEA spent over $100,000 in 1978 rate case with APUC. These expenses were in addition to costs which would have been required without dealing with the APUC.

3. MEA has spent over $20 00 in its 1980 tariff rules and regulations revision. Again, these costs are those which have been required due to APUC procedures.

4. In addition to high costs, utilities must wait out the backlogged APUC calendar. These months of delay cost dearly.

5. Reports such as the APUC Annual Report are voluminous and costly to prepare.

6. It is a matter of record that non-profit cooperatives have consistently requested less than could have been justified from the APUC.

7. Board of Directors elected by the consumer members are very sensitive to the economic conditions of their neighbors and are very careful with the cooperatives finances.

8. The nature and structure of a cooperative affords ample protection of consumer interests.

9. REA and CFC provide significant financial and operating controls over utility operations on a regular basis. In addition, an annual CPA audit is required.

10. REA makes loans to cooperatives in 46 states. In 28 of the 46 states the cooperatives are regulated in at least one area. In 18 states they are not subject to any state commission regulations.

It has been suggested that cooperatives are not responsive to their consumers. This is not true.

1. Consumers have ready access to the cooperative's management and Board of Directors. (see attached MEA policies)

2. Cooperatives have established procedures for handling complaints efficiently. (see attached MEA Form and Policy)

3. Board members are sensitive to consumer requests. As a practical matter board members can be replaced reasonably easily as a few organized voters can influence an annual meeting election.

4. Board members take seriously the ideals and objectives under which non-profit cooperatives operate. (see attached MEA ideals and objectives)

5. REA has influence over cooperative's operating policies, especially with regard to services, area coverage, postage stamp rates, etc.

The case of Tlinget-Haida Regional Electrical Authority has been

cited as a reason for keeping cooperatives under APUC economic regulation. I believe that the particulars of this case have been confused and do not support continued regulation of cooperatives.

1. As the REA Field Representative in Alaska at the time THREA applied for additional funding and REA took the position that APUC regulation would be necessary, I made this recommendation for exactly the reasons which would have made it unnecessary had THREA been a cooperative.

2. THREA is NOT a cooperative! The consumers do not have the ability to elect their Board Members. They do not have ready access to the governing Board which is appointed by the Central Council of the Tlinget-Haida Indians.

3. THREA also did not have good operating policies at that time or procedures to deal with consumer complaints and inquiries.

4. THREA was a small, new, inexperienced utility.

MEA supports the need for continued territory regulation. The certification process is necessary. However, economic regulation for a non-profit electric cooperative is not needed and is a waste of consumer's and taxpayer's money.

Management Policy No. 202-50

CONSUMER COMPLAINTS AND INQUIRIES

All consumer complaints and inquiries are to be handled promptly and recorded in accordance with this policy.

1. All complaints and inquiries are to be recorded on MEA form "MSD Form 02--MEA 11/73" which is to be completed in full and routed to the appropriate Department or Section.

2. The original of the above form is to be routed directly to the appropriate individual handling the particular type of inquiry in question:

   Management: General Manager (Malcolm Cheek)

   Operations and Maintenance:
   Manager, Electric Operations (Bud Fritz)

   Engineering, Voltage: Distribution Engineer (Jim Cadden)

   Damage Requesting Payment:
   Consumer Services Section (Dale Wahlen)

   Right of Way and Clearing:
   Real Estate & Properties Officer (Dave Ingalls)

   Consumer Billing: Consumer Accounts Supervisor (Mary Davis)

   Energy Use: Energy Use Advisor (Jerry Deems)

   New Services: Chief, Consumer Services Section (Dale Wahlen) or appropriate Branch Manager

   Branch Offices: Branch Manager (Bill Foster or Frank Smith)

3. The carbon copy of each MEA Form 02 is to be routed to Consumer Services for recording and follow-up action. If there is any question on the disposition of the original of this form, route to Consumer Services along with the carbon copy.

4. When possible, inquiries should be routed to Consumer Services when received. Consumer Services will, then, complete MEA Form 02 and route the inquiry. If it is not possible to route the initial inquiry to Consumer Services, obtain the necessary information to complete MEA Form 02 and advise the consumer that the inquiry will be turned over to Consumer Services for action.

5. All complaints and inquiries should be given immediate attention.

All action taken should be recorded on MEA Form 02 under "Comments," and Consumer Services must be advised (by phone or copy of said form) of any action taken including routing to another individual for additional work.

6. Consumer Services will prepare a weekly report listing all active complaints and inquiries. This report will be prepared each Monday and will show the status of all outstanding complaints and inquiries as of the close of business the preceding week. This weekly report will be forwarded to the General Manager. In addition, Consumer Services will prepare a monthly summary for the information of the Board of Directors.

7. All questions on this policy should be addressed to Consumer Services Section.

MATANUSKA ELECTRIC ASSOCIATION, INC.
Palmer, Alaska

STATEMENT OF IDEALS

Matanuska Electric Association, Inc., was established by its member-owners to provide themselves with a vitally needed service not otherwise available which would improve their economic and social standards with significant long-range benefits to the well-being of the various communities in which it operates.

WE BELIEVE:

1. That it is the right of persons to provide for themselves a vitally needed service and that the Association effectively provides this service in a manner consistent with the highest objectives of free enterprise.

2. That the Association exists primarily to serve its consumer-owners and that the services it provides are essential to the people of our area, of the Matanuska Valley, of the State of Alaska, and of our Nation.

3. That the Association exists for the mutual benefit of its consumer-owners, directors, employees, and of the public and recognized that full participation, understanding and support by each of these groups is necessary for its continued success.

4. That the Association must provide the highest quality electric service at a cost consistent with sound business practices and necessary to assure its continued existence and viability.

5. That the opportunities in the enterprise carry with them both economic and social responsibilities; our obligations and responsibilities as a local business enterprise are to the community, the public, and to our employees, as well as to our members, and those groups other than members also will benefit from leadership in economic and social development within and adjacent to the service area of the Association.

6. That the ability of the Association to continue providing this essential service depends upon its attracting and retaining capable employees who must be paid adequately and given every opportunity for personal development and for advancement within the limits of their demonstrated capabilities.

7. That the natural resources of this country should be developed to provide an abundance of power consistent with other resource development needs and at a cost which is equitable for all who benefit from such development.

STATEMENT OF IDEALS

8. That the economic future of the State of Alaska depends upon its having an abundance of electric power available to persons who can use it and that organizations engaged in the generation or distribution of electricity have the responsibility of cooperating fully with each other to make certain that this is accomplished by the most efficient means possible.

9. That the Association must exemplify leadership in the community by doing all things essential to good management, including proper organization, sound financing, leader development, adequate research, and by continuing a high quality of electric service.

10. That the attaining of these ideals will require our constant and untiring efforts.

MEA, STATEMENT OF IDEALS
APPROVED BY THE BOARD OF DIRECTORS
OCTOBER, 1977

REAFFIRMED DECEMBER, 1979

MATANUSKA ELECTRIC ASSOCIATION, INC.
Palmer, Alaska

STATEMENT OF OBJECTIVES WITH MEMBER-OWNERS

1. TO OPERATE the Association as a non profit enterprise on a continuing and progressive basis in strict accordance with its corporate documents and other legal and contractual requirements.

2. TO ASSURE the availability of a constantly high quality of central station service to its members and at a cost consistent with sound management of the Association and necessary to assure its continued existence and viability.

3. TO KEEP the member-owners fully informed on the affairs, problems, and methods of the Association; TO OBTAIN their understanding, acceptance, and support; TO PROVIDE every reasonable means through which the feelings and wants of the member-owners can be expressed and acted upon if appropriate; and TO EXPECT them to act intelligently and constructively in their support of the Association, its ideals, and its objectives.

4. TO DEVELOP among members, through democratic processes of participation, a recognition of member-ownership and accountability which will create the desire and feeling of obligation to participate in programs and services and benefit the membership as a whole.

5. TO ENHANCE the Association's reputation for fair dealings, prompt and efficient servide, dependability, integrity, courtesy, productive ability, and technical competence.

6. TO STRIVE CONSTANTLY for ever higher standards of service through progressive management, utilization of new equipment and techniques, and improved methods of operations.

7. TO STIMULATE AND SUPPORT rural area development programs, especially those which will increase and stabilize the economic level of the Association's service area by adding value to the raw materials and products supplied and processed, by providing job opportunities for its people, and by furnishing goods and services required but not now available within or immediately adjacent to the area which the Association serves.

8. TO DEVELOP, OPERATE, AND MAINTAIN the system at optimum performance, both electrical and physical, as to assure the quality of service the members want while maintaining investment at a reasonable level and minimizing premature obsolescence.

9. TO PROVIDE the means whereby the meber-owners can build and maintain the Association by contributing a reasonable amount of essential capital.

WITH EMPLOYEES

1. TO RECOGNIZE that our greatest assets are our human assets and that these must be developed and improved as a matter of moral obligation as well as one of material advantage.

2. TO OBTAIN acceptance of the ideals which emphasize the obligations involved in doing a job well.

3. TO REWARD, ENCOURAGE PROGRESS, INFORM, TRAIN, DEVELOP, AND PROPERLY ASSIGN all employees in order to attract and keep in its service those who seek a career with the Association so that their lives and work will be given meaning, dignity, satisfaction, and purpose both on and off the job.

WITH THE PUBLIC

1. TO DEVELOP understanding, acceptance, and support of the Association's objectives, plans, and programs.

2. TO FOSTER AND DEVELOP the acceptance of the Association as an effective citizen and as a respected member of the business community.

3. TO PROVIDE LEADERSHIP AND TO COOPERATE with other community and civic groups in furthering programs of mutual interest.

PURPOSE AND SCOPE OF REVIEW

Purpose

In accordance with the provisions of Alaska Statutes 24.20 .271(1) and 44.66.050 (sunset legislation), a review of the Alaska Public Utilities Commission (hereinafter referred to as APUC or the Commission) was conducted to determine whether there is a demonstrated need to continue utility regulation in its present form. To determine that need, we reviewed Commission activities to see if the Commission has been operating in an efficient and effective manner.

AS 44.66.010(4) specifies that the Alaska Public Utilities Commission will terminate on June 30, 1980 but will continue until June 30 of the following year for the purpose of concluding its affairs. This report shall be considered during the legislative oversight function in determining whether the Commission should be allowed to terminate, be reestablished in its present form or be reestablished in a modified form.

Scope

The functions reviewed included commissioner activity, administrative, financial/tariff analysis, engineering, consumer complaints and information, and records/docketing. Our review consisted of analyzing and evaluating the following:

1. Applicable statutes and regulations;
2. interviews with, and a questionnaire to, the Commissioners;
3. interviews with staff members;
4. questionnaires sent to other states' utility regulatory agencies;
5. questionnaires sent to APUC regulated electric and telephone nonprofit cooperative corporations;
6. questionnaires sent to attorneys who practice before the Commission;
7. observation of Commission meetings and several types of hearings held before the APUC;
8. interviews with Assistant Attorney Generals assigned to APUC;

9. interviews with general managers of several large utilities;

10. interviews with representatives of the Rural Electrification Administration;

11. interviews with representatives of the Federal Communications Commission;

12. interview with the president of the Alaska Rural Electric Cooperatives Assosication;

13. tests of APUC records and documents;

14. tests of records and documents of the Office of the Governor on appointments to the APUC;

15. correspondence with the Commissioners of the Alaska Transportation Commission and the Alaska Pipeline Commission; and

16. a review of studies and major Alaska Superior and Supreme Court decisions affecting the Commission, and complaints filed with the Ombudsman's Office.

ORGANIZATION AND FUNCTION

Prior to the creation of the Alaska Public Utilities Commission in 1970, utilities were regulated by the Alaska Public Service Commission (PSC). The PSC was established in 1959 as a part-time three-member commission responsible for all fixed utility regulation including generation, transmission or distribution of electric power, heat, water, natural or manufactured gas, oil or other petroleum products (except by pipeline); and the furnishing of telephone or telegraph communications, and community sewer services.

In 1960, the PSC gained responsibility for regulating transportation utilities with the passage of the Alaska Motor Freight Carriers Act and the Alaska Air Commerce Act. The transportation regulation duties were transferred to the Alaska Transportation Commission upon its creation in 1966. The 1960 legislation eliminated the PSC and created the APUC as a full-time three-member commission. That legislation also changed the definition of public utility to include those furnishing the following types of services for compensation: electrical; telecommunications; water, steam or sewer; transmission or distribution of natural or manufactured gas; and petroleum or petroleum products when no competition exists. A 1973 amendment added collection and disposal service of garbage, refuse, trash or other waste to the definition.

AS 42.05.040 requires one member to be a law school graduate, one to be a university graduate with a major in engineering, and one to be a university graduate with a major in finance, accounting or business administation. Two additional positions were added to the Commission in 1975 for which no special qualifications have been established. All members are appointed for six-year terms by the Governor and confirmed by the Legislature. The Commission may hire an executive director, who may be a member of the Commission.

Under AS 42.05, the Alaska Public Utilities Commission Act, the APUC is charged with the responsibility to assure the furnishing of adequate service to all public utility patrons, without discrimination, and at the lowest reasonable rates consistent with the interests both of the public and the utility. Statutory provisions direct the Commission, after determining an applicant is fit, willing and able to provide utility service, to issue that applicant a Certificate of Public Convenience and Necessity (CPCN). After issuance of a CPCN the Commission then regulates the rates, classifications, rules, regulations, practices, services and facilties of a public utility. The Commission has the authority to adopt regulations and to hold formal, quasi-judicial hearings to accomplish these purposes.

The staff of the APUC, in addition to the support staff of the Commissioners, is divided into five major functions: administration, engineering, communications carriers, consumer protection and information and financial/tariff analysis. A brief description of the services provided by those functions follows:

Administration. An Executive Director, hired by the Commission, is responsible for directing all staff functions and acts as liason between staff and Commissioners. He is assisted by a Deputy Director who has responsibility for records/document management. They are assisted in these duties by an administrative assistant, document processing personnel and other clerical support staff.

Engineering. The Engineering Section consists of a section chief, four utilities engineers, a draftsman and a clerical support person. This section is responsible for investigation of utility procedures and practices affecting quality of service; review of legal descriptions for service areas, plans for plant expansion, and plant-in-service and depreciation schedules. This section presents its evaluations in proceedings before the Commission.

Communications Carriers. This section was established by 1976 legislation to develop, recommend and administer policies and programs with respect to the regulation of rates, services, accounting and facilities of communications common carriers within the State involving the use of wire, cables, radio and space satellites. There is one position in this section and it is currently vacant.

Consumer Protection and Information. This function is carried out by a section chief and an information officer. The major responsibilities are investigation and resolution of consumer complaints, and public relations/information functions.

Financial/Tariff Analysis. Activities carried out by this section include: examination, analysis and evaluation of financial statements submitted with tariff filings; audits of financial records of utilities; examination of financial information comprising historical operating year and proforma adjustments; and presentation of these analyses at proceedings before the Commission. In addition to the section chief, there are five utility financial analysts and two research analysts authorized for this section.

REPORT CONCLUSION

Policy Issues

This review contains policy issues raised as a result of our evaluation of various Commission practices. The final policy decisions affecting these practices are not within the scope of this review but require legislative consideration. In debating these decisions, the legislative oversight committees should take into consideration the findings and alternatives presented in this report, so that the potential impact of the policy changes can be evaluated.

Report Conclusion

In our opinion, the Alaska Public Utilities Commission should continue to regulate public utilities. We believe that the public interest is being served by requiring public utilities to be certifiated by the APUC. This process stabilizes demand for the utility service by eliminating competition and thereby allowing economies of scale (declining unit costs with increased outputs) to operate. Economic regulation by the Commission, in place of that competition, ensures that the utilities provide adquate service at the lowest reasonable rates.

However, certain changes need to be implemented for the Commission to more effectively execute its mandated responsibilities. A number of factors have caused an increase in workload at the APUC which have diluted its ability to effectively regulate all utilities within its jurisdiction. Those factors include, but are not limited to, increases in the number of applications for certificates for which there are competing applicants, and more frequent rate increase requests due to spiraling costs, particularly for fuel.

We therefore evaluated the workload of the Commission for areas of regulation which could be eliminated or limited with the least public impact, and would allow the APUC to devote its limited time and resources on areas of greater import. This Division has now completed performance reviews under AS 44.66.050 of two of the three regulatory commissions in Alaska. We also evaluated them from an overview position, the entire utility regulatory scheme in Alaska.

In keeping with the intent of the Sunset Law which attributed public disenchantment with State government to a proliferation of that government, we recommend the Alaska Public Utilities Commission, the Alaska Transportation Commission and the Alaska Pipeline Commission be combined into a single regulatory commission. This recommendation stems from a comparison of

Alaska with the other forty-nine states in which we learned that Alaska is one of only three states utilizing three utility regulatory commissions and employs the second largest number of commissioners to staff those agencies (see Recommendation No. 1).

Areas of regulation which we recommend be eliminated from APUC's jurisdiction are cable television and garbage collection. Cable television service is an entertainment service, not a monopoly or a necessity, and deregulation of this service would not be detrimental to the public interest (see Recommendation No. 2). Services providing collection and disposal of garbage are not fixed, capital intensive utilities for which competition should be eliminated, as is necessary in the other utilities regulated by APUC. This industry should be regulated at the local level as a transportation utility (see Recommendation No. 3).

Areas of APUC regulation which we recommend be limited involve nonprofit telephone and electric cooperative corporations and utilties with gross annual revenues of less the $100,000. AS 42.05 should be amended to allow the membership of the cooperatives, by vote of a majority of the members, to be given an opportunity on a utility by utility basis, to determine whether their cooperative should remain economically regulated by the APUC. This action would allow members of cooperatives who feel their board of directors is sufficiently responsive to the membership to withdraw from regulation, while those who feel their board is not responsive may appeal to the APUC (see Recommendation No. 4).

AS 42.05 should also be amended to exempt all certificated utilities with gross annual revenues of less than $100,000 from economic regulation. This exemption would delete a minimum of 26 utilities or 20 percent of the current number of certificated economically regulated utilities under APUC. This action would not be contrary to the Commission's responsibility to protect the public interest because the cost of regulation as a percentage of operating costs for small utilites may outweigh the benefits of regulation, and because Commission time could be devoted to larger utilities serving a larger number of customers (see Recommendation No. 5).

The ability of the Commission to effectively regulate utilities has been hampered by omissions and inconsistencies in the Statutes and regulations. To allow for more effective case management and to avoid court appeals of Commission decisions, the APUC should promulgate regulations to accomplish the following: (1) to clarify the reporting and accounting requirements of utilities desiring to include rate case expense in their rate base; and (2) to prescribe industry performance standards to allow the Commisssion to effectively

monitor and enforce the quality of service being provided by utilities. A statutory amendment is needed to clarify whether transfer of certificates of public convenience and necessity from one utility to another through transfer of the controlling interest in the corporate stock is subject to APUC approval (see Recommendation No. 6).

The Commission's effectiveness has also been hampered by difficulties in recruiting and retaining employees for the Utility Financial Analysis Section and Utilities Engineering Section. Increasing compensation levels for those positions to a competitive level with employers in the Anchorage area and similar positions in the State government should allow recruitment and encourage retention of qualified experienced staff (see Recommendation No. 7).

Improvement in the efficiency of Commission operations would result from: (1) development of a topical cross-reference system for Commission orders (see Recommendation No. 9); (2) implementation of a time-management system to assist the Commission in prioritizing, planning and scheduling future workloads, and monitoring work in progress (see Recommendation No. 8); (3) establishment of separate collocation codes for budgeting and recording expenses of each function of the Commission (see Recommendation No. 11); and (4) restriction of Commissioner involvement in the administrative function of the Commission (see Recommendation No. 10).

A review of Commission appointment activity performed by the Office of the Governor showed that the chairmanship term of the present APUC chairman expired November 30, 1977 and, to date, a period of 20 months, no new appointment or reappointment to this position has been made. The Office of the Governor should make appointments in a timely manner.

Subsequent Event

The present Chairman of the APUC was reappointed to the chairmanship on July 31, 1979. That term will expire November 30, 1981.

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Alaska Public Utilities Commission, the Alaska Transportation Commission and the Alaska Pipeline Commission should be combined into a single regulatory commission.

During our review process we compared the utility regulatory scheme utilized in Alaska with the schemes utilized in the other forty-nine states. This analysis revealed that Alaska is one of only three states utilizing three utility regulatory commissions and employs the second largest number of commissioners as shown below:

Regulatory Scheme	States Used By No.	%	Commissioners No. On Comm.	No. Of States	%	Employees Range Hi	Lo	Avg.
One Regulatory Commission	42	84%	1	1	2%	976	11	164
			3	29	69%			
			5	10	24%			
			7	2	5%			
				42	100%			
Two Regulatory Commissions	5	10%	6	5	100%	726	87	242
Three Regulatory Commissions	3	6%	8	1	33%	762	71*	419
			11*	1*	33%			
			12	1	33%			
				3	100%			

*Alaska

From: The 1977 Annual Report on Utility and Carrier Regulation of the National Association of Regulatory Utility Commissioners.

A brief history of the development of Alaska's three regulatory commissions follows. The Alaska Public Service Commission (PSC) was established in 1959 as a part-time three-member commission responsible for all fixed utility regulation. In 1960 the PSC gained responsibility for regulating transportation utilities with the passage of the Alaska Motor Freight Carrier Act and the Alaska Air Commerce Act. The transportation regulation duties were transferred to the full-time three-member Alaska Transportation Commission (ATC) at its creation in 1966, and 1970 legislation eliminated the PSC and created the Alaska Public Utilities Commission (APUC) with jurisdiction over fixed utilities. That legislation established the APUC

as a full-time three-member commission, but the composition was increased to five members in 1975. In 1972 the Alaska Pipeline Commission came into existence as a separate, full-time three-member commission.

The advantages of a single regulatory agency over separate agencies are numerous and include: (1) reduction in number of commissioners needed to preside at hearings; (2) a combined professional staff which would allow for more flexible staffing (i.e. temporary reassignments between regulatory disciplines to handle fluctuating workloads on a more timely basis); (3) joint hearing facility; (4) joint copying/ reproduction facility; (5) joint publications library; and (6) possible reduction in word processing equipment and personnel.

In a survey questionnaire distributed to utility regulatory commissions in other states (Appendix B) we found that:

(a) Twenty-six of the responding thirty-two states (81%) felt the advantages of a single regulatory agency outweigh the cost of maintaining two or three separate agencies. Some of the advantages noted were: centralization of expertise; cost savings due to economies of scale and elimination of unnecessary duplication; in general a more efficient use of resources.

(b) Twenty-eight of the responding states (87%) felt commissioners can realistically develop the expertise to render decisions in fixed, transportation and/or pipeline utility cases.

In keeping with the legislative intent of the Sunset law which found "...that the substantial increase in the number of State agencies, boards and commissions, and the proliferation of rules and regulations which each has adopted have contributed to a public disenchantment with the operation of State government..." (Ch 149 SLA 1977), it is appropriate to consider the merits of a single commission mode of regulating utilities.

This recommendation should, however, only be considered in concert with a plan for deregulation of some of the industries currently regulated by the three commissions. Combining the commissions without decreasing the present workload would cause serious processing time delays. Recommendation No. 2 through No. 5 of this report indicate areas of APUC regulations which could be curtailed or limited without harmful impact on the public. We further recommend that the internal structure and staffing levels be set only after deregulation decisions have been made so that a realistic analysis of responsiblities and workload can be made.

Recommendation No. 2

AS 42.05 should be amended to allow the Alaska Public Utilities Commission to cease all certification and regulation of cable television.

The Alaska Public Utilities Commission Act, AS 42.05, mandates the APUC to regulate all public utilities including those furnishing telecommunications service to the public for compensation. Telecommunications is defined in AS 42.05.701(8) as "... the transmission and reception of messages, impressions, pictures and signals by means of electricity, electromagnetic waves and any other kind of energy, force variations or impulses whether conveyed by cable, wire, radiated through space, or transmitted through other media within a specified area or between designated points." The APUC has interpreted this Statute to include cable television (CATV) and has been issuing Certificates of Public Convenience and Necessity (CPCNs) and has been providing economic regulation since 1970.

Regulation of cable television has varied widely among states. Ten states do not consider CATV within their definition of a public utility, while eight others, including Alaska, regulate franchising and regular subscriber rates. The remaining states fall somewhere in the middle by regulating utility pole attachment rates and settling disputes between cable companies and utilities.

There are currently no federal requirements for rate regulation of CATV. There are in fact prohibitions imposed on states by the FCC against certain types of rate regulation. The delineation of rate regulation responsibility began with the following FCC pronouncement issued in 1974.

> In Section 76.31(a)(4)(of 47 C.F.R.) we require that cable systems, in order to receive a Certificate of Compliance, must have a franchise providing for franchisor approval of initial charges for installation and regular subscriber service. We have intentionally limited rate regulation responsibilities to the area of regular subscriber service, and we will continue to do so. We have defined "regular subscriber service" as that service regularly provided to all subscribers. This would include all broadcast signal carriage and all our required access channels including origination programming. It does not include specialized programming for which a per-program or a per-channel charge is made. The purpose of this rule was to clearly focus the regulatory responsibility for regular subscriber rates. It was not meant to promote rate regulation of any kind.

The FCC deleted the requirement of franchisor approval of rates for subscriber service effective September 1976, thereby removing all requirements of the franchisor for rate regulation. From a report of the Connecticut Cable Television Association we learned that "...as soon as the notice of the FCC action was publicized, many communities throughout the country dropped their own rate setting requirements." We feel that Alaska should also restrict its activity in this area.

A commonly accepted definition among economists of what distinguishes public utilites from other sectors of business is that public utilities are natural monopolies (operating with government approval as such), and supply a service which is indispensable to modern living. Cable television is an entertainment service, not a monopoly or a necessity. If subscribers are charged more than they feel services are worth they may disconnect and seek an alternative form of entertainment such as radio, movies, newspapers or books.

Deregulation of CATV in Alaska could possibly result in increased development of cable television in rural Alaska. The 1974 FCC pronouncement quoted earlier also stated:

> After considerable study of the emerging cable industry and its prospects for introducing new and innovative communications services, we have concluded that, at this time, there should be no regulation of rates for such services at all by any governmental level. Attempting to impose rate regulation on specialized services that have not yet developed would not only be premature but would in all likelihood have a chilling effect on the anticipated development.

It does not appear that deregulation of this industry would have a detrimental impact on the Alaskan public and could, in fact, provide an incentive for development in rural Alaska and allow the Alaska Public Utilities Commission to devote its limited time and resources towards more important issues.

Recommendation No. 3

AS 42.05 should be amended to allow the Public Utilties Commission to cease certification and regulation of those utilities furnishing collection and disposal service of garbage, refuse, trash and other waste material.

Responsibility for certificating and regulating utilities furnishing collection and disposal service of garbage, refuse, trash and other waste material was added to the Alaska Public Utilities Commission Act by a 1973 amendment. Prior to that time those utilities fell under the jurisdiction of the Alaska Transportation Commission. There are currently 29 private refuse utilities certificated and regulated by the APUC and one municipal system certificated but not regulated.

Considering the Public Utilities Commission's heavy workload and limited resources, the public interest would be best served by allowing the Commission to cease certification and regulation of this industry. The economic justification for this action is twofold.

(1) The refuse industry is not capital intensive as are the fixed utilities regulated by the APUC. The largest capital expense is in the vehicles and this expense is lessened since, as staff of the APUC has indicated, a majority of refuse utilities lease, rather than purchase, those vehicles. Sanitary landfills (dumps) are not allowed into the rate base, and therefore are not considered part of the capital investment of the utility.

(2) Competition in this industry would not be as detrimental to the public's interest as competition among more capital intensive industries. Refuse collection and disposal is a transportation utility not a fixed utility. The economic theory and practice of transportation regulation originally was to restrict competition to encourage capital investment in a growing industry and provide a healthy utility to serve the public's needs not to eliminate competition entirely as is the theory in the fixed utility regulation by the APUC.

The results of a review of refuse collection and disposal service regulation in other states also support this recommendation. From our questionnaire to regulatory commissions in the other forty-nine states and the District of Columbia we learned the following:

Number of states responding:	32
Number of states not regulating refuse utilities:	29
Percentage of respondents not regulating:	91%

We were unable to determine in how many states this service is regulated at the local government level but are aware that it is in some states. AS 29.48.033 provides municipalities in Alaska the authority to regulate at the local level but this authority is superseded by the APUC.

Local governments in Alaska already exercise a great deal of control over the level and quality of service and rates charged by the private utilities through special contracts with those utilities. Therefore, the impact of deregulation would be felt primarily by those consumers residing outside municipal boundaries, a small percentage of the total number of consumers currently receiving these services.

Recommendation No. 4

AS 42.05 should be amended to allow non-profit telephone and electric cooperatives to petition for withdrawal from APUC economic regulation.

The APUC currently certificates and regulates eleven electric utilities and six telephone utilities in Alaska organized under AS 10.25, the Electric and Telephone Cooperative Act. Statutory requirements of the cooperatives under that act include: each consumer of the cooperative is a member and members elect the board of directors; they must hold an annual meeting of the membership at which a quorum (as established by the bylaws) must be in attendance to conduct business; the meeting must be adequately noticed to the public; and, most importantly:

> A cooperative shall be operated on a nonprofit basis for the mutual benefit of its members and patrons. The bylaws of a cooperative or its contracts with members and patrons shall contain such provisions relating to the disposition of revenues and receipts as may be necessary and appropriate to establish and maintain its nonprofit and cooperative character (AS 10.25.380).

In the first session of the Eleventh Legislature a bill was considered which, as originally introduced, would have exempted cooperatives organized under AS 10.25 from economic regulation (regulation as to rates, regulations, and quality of service) but retained the certification requirements. An amendment to this bill limited the exemption to electric cooperatives.

A review of all revenue requirement requests by nonprofit cooperatives in the past three years, of which there were nine, reflected the following. Of those nine, six received exactly what they requested, two had immaterial variances and one was granted approximately two percent less than it requested. It appears that the integrity of the boards of directors of the cooperatives in keeping revenue requirement requests minimal has been demonstrated and provides an adequate control over this facet of utility rate setting.

However, the large number of consumer complaints received by the APUC against cooperatives indicates there are problems in the boards' responsiveness to their members, particularly in the areas of billing practices, rates and charges, quality of service and line extension or service availability. It appears, therefore, that even though a theoretical mechanism exists for ensuring adequate service at reasonable rates there is sufficient reason to doubt its reliability in some cases. We therefore recommend that the membership of the

cooperatives, by vote of a majority of the members, be given an opportunity on a utility by utility basis to determine whether their cooperative should remain under APUC regulation. A statutory provision should be made to allow cooperatives to come back under regulation, again by vote of a majority of the members, should they so desire.

Recommendation No. 5

SB 61

AS 42.05 should be amended to exempt from economic regulation all utilities with annual gross revenues not exceeding $10,000. $500,000 APUC prefers $200,000

Pursuant to AS 42.05.711(e), effective since 1970, electric and telephone utilities with annual gross revenues not exceeding $25,000 are exempt from regulation by the APUC. The exemption should be increased to $100,000 and extended to all utilities. This exemption is from economic regulation only. All utilities regardless of size should be certificated by the APUC. Critical staffing problems and an increasing case backlog require the APUC be divested of the responsibility for the smaller utilities in order to effectively manage the larger utilities which have a greater impact on the public.

Legislation was introduced in the 1979 Session to increase the exemption. The final amended version provided for total deregulation of all utilities with annual gross revenues less than $50,000 as well as providing for economic deregulation as to rates, rate design and quality of sevice of those utilities with annual gross revenues less than $500,000. In the latter case, the Commission would only involve itself in the certification process, determining whether a utility is fit, willing and able to provide utility service. The effect of this legislation and various other exemption levels have been measured, utilizing gross revenue data from either the 1977 or 1978 utility's annual report, whichever was most current.

Table I provides a list of utility groups and their regulatory status as of December 31, 1978:

Table I

Utility Group	Certified	Regulated	Unregulated
Electricity	48	30	18
Telephone	25	22	3
Cable TV	18	17	1
Water	54	22	32
Sewer	31	6	25
Gas	5	4	1
Steam	1	0	1
Garbage	28	28	0
	210	129	81

There were 39 regulated utilities for which annual reports were not obtainable with the majority, 28, coming from the garbage utilities which are not required to file, leaving 90 utility annual reports available for testing. Of those 90 utilities we were able to determine annual gross revenues for, 53 (58.9%) would be exempted from economic regulation by the proposed legislation. This number appears excessive when added to the 28 garbage utilities and the cable television company also recommended for deregulation, with revenues in excess of $500,000.

Table II shows the minimum number of utilities which would be exempted from economic regulation a varying thresholds:

Table II

Annual Gross Revenue	Minimum* No. Exempted	% (Total Regulated = 129)
$500,000	53	41.1%
$250,000	41	31.8%
$100,000	26	20.2%
$ 50,000	17	13.2%

* Minimum because we were only able to determine annual gross revenues for 90 of the 129 regulated utilities.

Table III is a distribution of this data over the individual utility groups.

Table III

	Under $50,000	$50,000 to $100,000	$100,001 to $250,000	$250,001 to $500,000	Over $500,000	Unknown	Total
Electric	0	1	7	3	18	1	30
Telephone	2	3	4	3	10	0	22
Cable TV	2	2	3	4	1	5	17
Water	11	3	0	1	3	4	22
Sewer	2	0	1	0	2	1	6
Gas	0	0	0	1	3	0	4
Garbage	0	0	0	0	0	28	28
	17	9	15	12	37	39	129
Within Groups	13.2%	7.0%	11.6%	9.3%	28.7%	30.2%	
Cumulative	13.2%	20.2%	31.8%	41.1%	69.8%	100.0%	

Given present staffing levels, and the associated shortcomings, we believe the elimination of an additional 26 small utilities at the $100,000 level would not be contrary to the Commission's responsibility to protect the public interest. Additional time could be devoted to larger utilities serving a larger number of customers. In addition, the cost of regulation on a percentage basis to a small utility may outweigh the potential benefits. This action, along with the deregulation of garbage utilities (28 total) and cable television utilities (17 total) would reduce the number of economically regulated utilities to 62, a 52% decrease.

Recommendation No. 6

The statutes and regulations governing the Alaska Public Utilities Commission should be revised.

We determined through interviews, questionnaires, and review of records on file at the APUC Offices that sections of the statutes and regulations governing the APUC are conflicting, vague, obsolete and inadequate to carry out the Commissions mandated responsibilities. Several examples received from the Commissioners, staff, and attorneys who practice before the Commission are described in detail below:

1. Regulations should be promulgated clarifying the reporting and accounting requirements of utilities desiring to include rate case expense in their rate base. The Commission has had at least one decision appealed to Superior Court for departing from precedents set in previous decisions rendered on treatment of rate case expense. The Commission acknowledged the need for such regulations in the final order on docket U76-66 issued in May of 1977 where they stated "...the Commission plans to promulgate regulations which will clearly delineate the reporting and accounting requirements that utilities will have to satisfy in order to secure all rate case expenses, derived from both in-house personnel and independent consultants or counsel." To date, however, no action has been taken. Such regulations could be used to promote the Commission favored policy of encouraging utilities to develop rate cases in-house rather than rely exclusively on costly consultants, a procedure which could result in savings for utility rate payers.

2. Regulations should be promulgated establishing industry performance standards for all regulated industries. AS 42.05.291 requires public utilities to "...furnish and maintain adequate, efficient and safe service and facilities" and gives the

APUC the authority to"... prescribe adequate and reasonable standards for the measurement of quantity, quality, pressure, initial voltage, or other conditions pertaining to the supply of the service of public utilities." To date, however, the only standards prescribed are telephone service standards. The development of those standards were prompted by a utility challenge in court of APUC's right to enforce "acceptable industry performance" standards when none existed. The court decision favored the utility. Promulgation of regulations on performance standards would avoid the occurrence of such a court challenge in the future and allow the Commission to effectively monitor and enforce the quality of service being provided by utilities.

3. A statutory amendment is needed to clarify whether transfer of Certificates of Public Convenience and Necessity from one utility to another through transfer of the controlling interest in the corporate stock is subject to APUC approval. The Commission has construed existing sections of the Alaska Public Utilities Commission Act as providing statutory authority for such action, but a definitive statement of jurisdiction is needed. The Commission requested such action in 1978 but the legislation did not pass.

4. Discrepancies between statutes and regulations should be eliminated. AS 42.05.421 allows the Commission to suspend the operation of a tariff filing for an initial period not longer than six months beyond the time it would otherwise go into effect. 3 AAC 48.300(b)(4) states they may suspend the filing for a maximum period not longer than six months beyond the date it would otherwise become effective. The Commission has in practice suspended for multiple six-month periods which is within their statutory right but clearly contrary to the regulation which was promulgated in 1973.

   AS 42.05.411(a) states that a utility may not put new or revised rates, charges, rules or regulations into effect except after 45 days notice to the Commission. The 45-day period was increased from a previously required 30-day period by a 1975 amendment. However, many sections of the regulations including 3 AAC 48.060(i), 3 AAC 48.070(b), 3 AAC 48.300 and 3 AAC 48.310 still refer to the 30-day period and should be changed to reflect the statutory amendment.

Recommendation No. 7

The APUC should seek upgrading of salary levels for professional support staff.

The Alaska Public Utilities Commission has been hindered for the past nine years by difficulties in recruiting and retaining employees for the Utility Financial Analysis Section and Utilities Engineering Section. The average length of time vacancies exist before Utility Financial Analyst (UFA) positions can be filled is nine months and Utilities Engineer (UE) positions can be filled is eleven months. One UFA III position was created in July of 1975 and has not been filled to date. Discussions with Commission personnel indicated that qualified applicants for the UFA III position have been discouraged by the salary range and have been able to obtain employment with utility companies for higher salaries.

The difficulty in recruiting highly qualified personnel for positions such as the UFA III led the Commission to reclassify several higher level positions to entry level positions. This action was taken to allow the Commission to provide in-house training for less experienced individuals for advancement into the more demanding positions. The Commission's experience, however, has been that persons receiving the in-house training remain an average of only one year. We were again told by Commission personnel that these individuals, having received APUC training, are then qualified for positions with utility companies offering higher salaries.

In recognition of the recruitment and retention problems at APUC, Arthur Young & Co., investigated the compensation levels as part of their 1978 Management Audit of the Commission. They reviewed the January 1978 study on salary levels done by the Division of Personnel which concluded that salary adjustments were not justified at that time. Arthur Young & Co. found that study incomplete in that it compared APUC salary levels with similarly titled positions in other states and with a Fairbanks utility, but did not include a survey of positions in the Anchorage area.

Arthur Young & Co. did conduct a survey in Anchorage and, although they couldn't determine the true prevailing wage rates for the area because of the limited response rate, they were able to identify material pay differences. "... with four major employers within the Anchorage area which, historically, have consistently competed with the APUC in recruiting for and retaining individuals in professional positions in the Commission (specifically, Utility Engineers and Utility Financial Analysts)." The percentage difference between the weighted average of the responses and the state salary range midpoint revealed a deficiency in the state range from 25.5% to 43.5%.

As part of our investigation into this problem we compared job descriptions for the UFA III position at APUC and the Tariff Specialist position at the Alaska Transportation Commission. Even though the description of duties for these two positions are very similar, there is a difference of three salary ranges or a deficiency of 25%.

In addition to the creation of a work backlog, the staffing problem has resulted in recruitment and reliance on less experienced personnel or contracts with expensive consultants. UFA I and UFA II personnel have been required to perform the job requirements of UFA III's including testifying at formal Commission proceedings. During those proceedings attorneys representing utilities have, on occasion, reduced the credibility of Commission employees as expert witnesses during cross examination by reviewing their credentials on the record. If the public interest is to be effectively protected by the Alaska Public Utilities Commission, compensation levels should be established which will allow recruitment and encourage retention of qualified, experienced staff.

Recommendation No. 8

The APUC should implement a time management system.

As part of their 1978 Management Audit of APUC, Arthur Young & Co. developed a time management system to assist the Commission in prioritizing, planning, and scheduling work, monitoring work in process and work accomplished; and establishing functional and position objectives. Our discussions with Commissioners and staff and a review of processing time for Commission actions demonstrate a continuing need for implementation of such a system.

An effective time management system could alleviate delays in processing tariff filings. Our tests showed that the review process, from receipt of application to final order by the Commission, averages 13 months. This has resulted in an increasing need to suspend tariffs for more than a single six month period. Long range planning of Commissioner and staff time and resources would allow for more effective and efficient use of time and resources and the rendering of Commision decisions in a more timely fashion. This is particularly important in a time of spiraling costs when delays in Commission decisions have a confiscatory effect on utilities.

Recommendation No. 9

The APUC should develop a cross-reference system for Commission orders and decisions by the courts.

The APUC currently files Commission orders by docket number and in a chronological order file and maintains reference cards by utility name, but does not maintain a topical

cross-reference system. Decisions from the courts on appeals of Commission decisions are filed with the related docket by docket number.

Currently the best catalog of prior Commission decision is in the memories of individual Commissioners and staff members. Access to this unwritten catalog is not always possible, at best time consuming for all parties, and becomes less reliable with the passage of time. A cross-reference system of orders and decisions by major issues involved and/or precedents set would provide efficient access to past decisions to allow analysis by staff and decisions by Commissioners to be made consistently from case to case and in accordance with relevant court decisions. It could also reduce application processing and hearing time by allowing any applicant's attorney to review prior decisions and cases which are similar to his/her client's case.

Recommendation No. 10

The Commissioners of the APUC Should restrict their involvement in the administrative function of the agency.

Arthur Young & Co., in their management audit of September 1978, delineated the responsibilities of the Commissioners and Executive Director in the following way: the Commissioners, through the Chairman, should prescribe the limitations of authority of the Executive Director regarding policies, expenditures, and personnel actions; the Executive Director should provide central leadership, direction, administration and control over the Commission's operational and administrative functions within the limits as set out by the Commissioners. We recommend the Commissioners restrict their involvement in administrative matters to setting policy, and delegate to the Executive Director authority for carrying out the necessary actions to employ that policy.

The Commissioners became involved in administrative matters several years ago to carry on the management responsiblities of an Executive Director who was absent for extended periods of time due to illness. There have been several vacancies since that time due to resignations or dismissal of individuals in the Executive Director position, and during the majority of those vacancies, a Commissioner acted as Executive Director. Through discussions with staff and personal observation we learned that the involvement of the Commissioners in administrative functions has extended to times when the Executive Director position was filled. This duplication of authority has confused reporting relationships within the agency and consumed the Commissioners' time unnecessarily.

In addition to being an inefficient use of time, the direct involvement of Commissioners in the daily management of agency operations is inappropriate. Because the staff of

the APUC is a party to most of the formal proceedings heard before the Commission, the Commissioners are prohibited from ex parte communications (discussion of a proceeding without all parties to that proceeding being present). Supervision of staff activities by any Commissioner could, therefore compromise the independence of the staff/Commissioner relationship.

Recommendation No. 11

The APUC should seek to establish separate collocation codes for each section of the Commission.

Allocations and expenditures for all operating costs of the APUC are channelled through a single collocation code. Establishment of separate collocation codes would provide the Commission with an effective management tool for efficient use of funds.

There are competing needs for funds in all object groups and no method of assuring all needs are treated adequately. There are such competing needs, for example, in the travel category. The Commissioners require travel funds for holding public hearings and formal proceedings outside of Anchorage to provide easier access by the affected consumers. They also require funds to participate in meetings held outside Alaska which provide education in utility regulatory processes and information on trends in national policy. Staff financial analysts and engineers require travel funds to perform field audits on utilities seeking certification or a tariff change from the Commission. Commission administration requires travel funds to provide employee training and development. All these needs are of sufficient merit to necessitate budgeting by section to assure no one use depletes funds needed for other uses.

Recommendation No. 12

The Office of the Governor should keep the appointment of Chairman of the Alaska Public Utilities Commission current.

AS 42.05.020(b) states "The governor shall designate one member of the commission as chairman of the commission. This member shall serve as chairman for a term of four years, but may be appointed for successive terms." The term of the present chairman of the APUC expired November 30, 1977 and, to date, a period of 20 months, no new appointment or reappointment to this position has been made.

We recommend that the Office of the Governor appoint a new chairman or reappoint the existing chairman of the APUC as soon as possible and in the future make such appointments in a timely manner.

Subsequent Event

The present chairman of the APUC was reappointed to the chairmanship on July 31, 1979. That term will expire November 30, 1981.

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses of Commission activities relate to the public need factors defined in AS 44.66.050. These analyses are not intended to be all inclusive, but address those areas we were able to cover within the scope of our review.

I. The extent to which the board, commission or program has operated in the public interest.

The Commission has performed in a dedicated, conscientious manner to ensure that utilities are fit, willing and able to provide utility services, and to regulate them in such a manner as to provide adequate service to Alaskan consumers at the lowest reasonable rates. However, the Commission's effectiveness and efficiency in performing mandated responsibilities have been limited by a burgeoning workload and internal management problems (see Recommendation No. 2 through No. 5, No. 7 through No. 11).

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

The operation of the Alaska Public Utilities Commission has been impeded by current statutes and regulations. The definition of public utility is too broad and should be limited to allow the Commission to devote its limited time and resources to regulation of utilities of sufficient import. There is also a need for statutory and regulatory amendments to allow for more effective case management and to avoid court appeals of Commission decisions (see Recommendation No. 2 through No. 6).

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

The Commission has recommended few statutory changes in the past five years. They have not actively sought any changes which would limit the number or type of utilities which are currently regulated even though aware such an action would improve their effectiveness while still serving the public interest (see Recommendation No. 2 through No. 6).

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

All formal proceedings are properly and timely noticed and open to the public. The Commission has held public hearings and formal proceedings within the service areas of the utilities before them to facilitate public attendance and participation.

V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

As stated under criteria IV, proceedings are properly and timely noticed and open to the public. Additionally, any interested person or party may intervene in a formal Commission proceeding if their intervention will be conducive to the ends of justice and will not unduly delay the conduct of such a proceeding.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

The Commission adopted regulations in 1973 for informal and formal complaint procedures. Procedures for informal complaints, include a requirement that the complaint be made first with the utility before being filed with the Commission. If the complaint cannot be resolved informally, formal complaint procedures may be used including, if good cause is shown, a formal investigation. The Consumer Protection Section Chief of the APUC estimates that of the approximately 1,500 informal complaints received annually, 2-6 end up as formal complaints. The Office of the Ombudsman received approximately 12 complaints and all were pending action or satisfactorly resolved by the APUC.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

The Commission, prior to granting a Certificate of Public Convenience and Necessity to a public utility, is required to determine that the applicant is fit, willing and able to provide the utility services applied for. APUC employs Utility Financial Analysts and Utilities Engineers to perform the necessary analyses to make this determination. However, recruitment and retention problems with those positions have impeded the Commission's ability to perform those duties (see Recommendation No. 7).

VII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

We found no evidence of hiring practices or Commission appointments that are contrary to the State personnel practices.

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please refer to the previous section, Findings and Recommendations.

APPENDIXES

APPENDIX A

ALASKA PUBLIC UTILITIES COMMISSION REVENUES COMPARED TO EXPENDITURES
Fiscal Year 1978

UNAUDITED[1]

Revenue Collected	$40,174.63
Expenditures	($1,751,317.29)
Excess of Expenditures Over Revenues	($1,712,142.66)

SCHEDULE 1
COLLECTED REVENUES

Revenue Type	Amount	Collection Time
Injunction and Monetary Sanction	$1,000/violation day up to $200,000	When assessed
Civil Penalties	Up to $100/violation	When Assessed
Application Fee	$50.00	Upon Application
Expenses of Hearing	As provided in AS 42.05.651	When assessed
Sale of Public Documents	Varies by type of document	When assessed

Note 1

The records were not audited by us and accordingly we do not express an opinion on them. The source of the revenues was the Prior Year (FY '78) Unrestricted Receipt Balances. The source of the expenditures was the Prior Year (FY'78) Authorization Balances.

APPENDIX B

QUESTIONNAIRE SENT TO OTHER STATES' UTILITY REGULATORY AGENCIES

1. Does your agency regulate:

   a. fixed utilities only? *12%*

   b. fixed and transportation utilities only? *22%*

   c. fixed and pipeline utilities only? *12%*

   d. fixed, transportation and pipeline utilities? *54%*

2. What are the advantages and disadvantages of an agency regulating more than one group of utilities?

   advantages: *centralization of expertise; cost savings; economics of scale; flexibility of staff; less duplication of personnel and functions; none.*

   disadvantages: *hard to employ sufficient staff to cover all utilities, some utilities may be ignored, lack of coordination, none.*

3. Do you feel that the advantages outweigh the cost of maintaining two or three separate agencies?

   Yes *81%* No *9%* No Opinion *9%*

   Comments: *Overall operating cost is considerably less for one agency than for several agencies; favor separate agency to regulate transportation; key is in adequate staff; one agency would expedite and save duplications.*

4. Can a commissioner/board member or administrative officer realistically develop the expertise to render decisions in fixed, transporation and/or pipeline utility cases?

   Yes *88%* No *6%* No Opinion *6%*

   Comments: *If technically trained and experienced staff is available to provide him with the proper background and assistance it will require time and dedication as well as integrity.*

5. If your agency is administered by a Board or Commission:

   a. How many commissioners/board members serve? *3 (60%)*
   5 (31%)
   7 (9%)

   b. How long are their terms? *6 yr. (67%), 4 yr. (21%), 3 yr. (3%), 5 yr. (3%), 8 yr. (3%), 10 yr. (3%)*

   c. Is there a limit to the number of consecutive terms they may serve? *no (97%) yes (3%)*

   (If yes, please state what the limit is.) *12 years*

6. How many full-time staff members are employed by your agency? *average 206*

7. What was your final fiscal year 1978 budget? *avg. $5,480,148*

8. How many of the following types of fixed utilities does your agency regulate? Note: If none, please indicate why (i.e. a. no such utility operates in the state; b. that type of utility is regulated by another state agency; or c. utility is exempt from state regulation).

utility	number	if none, why
electric	*avg. (32 states)=33*	
gas	*avg. (31 states)=20, none: 1 state*	*b (1 state)*
telecommunication	*avg. (32 states)=49*	
sewer	*avg. (30 states)=60, none: 11 states*	*c (11 states)*
water	*avg. (30 states)=167, none: 2 states*	*c (2 states)*
CATV	*avg. (3 states)=36, none: 29 states*	*a (1 state), unspec. (1 state) b (5 states), c (22 states)*
garbage	*avg. (3 states)=526, none: 29 states*	*a (1 state), unspec. (1 state c (27 states)*

9. Are all utilities regulated for the following?

   a. authority to operate — Yes *91%* No *6%* No response *3%*

   b. fair and reasonable rates — Yes *91%* No *9%*

   c. rate design — Yes *94%* No *6%*

   d. service area — Yes *97%* No *3%*

   e. quality of service — Yes *100%* No ____

If no, please explain which utilities are exempt, and from what facet of regulation.

Practices of municipal utilities not subject to our jurisdiction, municipal utilities exempt from rate regulation, mutual and cooperative telephone companies with less than 2000 main stations, gas and electric by franchises, elect coops and municipals, municipal water utilities.

10. Are the following types of utilities regulated for fair and reasonable rates?

a. utilities owned and operated by a political subdivision of the state? Yes *25%* No *75%*

b. nonprofit cooperative corpora tions?

Yes *38%* No *56%** No Response *3%* N/A *3%*

11. If a utility is exempt from economic regulation what mechanism is used to ensure adequate service at reasonable rates?

*The market mechanism, political process, municipal authorities for municipal utilities, REA board members ensure reasonable rates for cooperatives, public pressure on elected officials, city governing body for municipal utilities, local units of government, local board for coops, courts. *members of cooperatives may petition for regulation*

12. Have small utilities been exempted from regulation through adoption of a threshold of gross revenue or output capacity? If yes, please state the amount of threshold.

utility	no	yes	N/A	threshold
electric	*100%*	*0*	*0*	
gas	*94%*	*3%*	*3%*	*10 customers (3)**
telecommunications	*100%*	*0*	*0*	
sewer	*60%*	*9%*	*31%*	*10 customers (3)** *100 customers (2)**

13. Are there any conditions under which a utility under the threshold for regulation might still be regulated?

(1) upon petition of ratepayers or by legislative action, (2) no, (3) by request of company, (4) if they request regulation or if the Legislature mandates it, (5) if majority of customers petition, upon petition, regulation shall be for one year or so long as the Commission or a majority of customers desire.

14. Is your agency or state legislature currently considering deregulation of any category of public utilities?

yes: 31% no: 69%
transporation, air carriers, charter party carriers, sightseeing and tour buses, warehousemen, water and sewer, household goods, water coops carriers, new PBX systems, radiotelephone utilities, some classes of motor carriers, water carriers and certain types of motor buses; cooperative telephone companies; sand & gravel trucks; public movers & refuse companies.

15. Is there a program used to spotcheck the performance and/ or rates of the utilities through unannounced inspections or audits?

yes: 65% no: 44%
all rate applications, random audits of telecommunications regarding quality of service, financial audits at least once every 2 years, management audits, unannounced safety and service inspections, testing of meters; announced inspections only.

If yes:

(a) How often are such checks made?

Random; varies widely; each months fuel cost is checked; other items are done periodically; annual announced audit of major companies; annually, service and safety more frequently:

(b) What percentage of the regulated utilities are checked each year?

10-20%; 35-40%; majority; between 75-100%; 30-40%; 50-80%; 80% larger utilities 100%, smaller utilities varies; all utilities once yearly.

16. In evaluating a rate application:

(a) What factors does the agency consider in determining a rate base?

Orginal costs, reconstruction costs, depreciation, advances in aid of construction, contributions in aid of construction, limited CWIP, income tax deferrals, materials and supplies, inventory, prepaid items, special deposits and cash working capital; average plant in service, land & property held for future use must meet test of reasonableness and are determined on a case by case basis;

(b) What factors does it exclude from consideration?

Number of responses in ( )

None: (3), customer deposits, advances: (3), plant held for future use: (1) CWIP: (8), contributed property: (2), compensating bank balances: (1), not used or useful: (4), contributions in aid of construction: (3), depreciation reserve: (2), deferred investment tax credit: (2), advances in aid of construction: (2), preliminary land & survey transaction: (1), advertising: (1)

17. For each of the fixed utilities, what does the agency consider to be a fair rate of return on investment:

Utility	rate of return (range)	average
electric	*5.0-10.0 (coops), 8.5-14.5*	*10.87*
gas	*8.5-14.5*	*10.93*
telecommunications	*8.0-14.5*	*10.24*
sewer	*5.0-16.0*	*9.75*
water	*5.0-16.0*	*10.52*
CATV	*13.5-15.0*	*14.06*
garbage	*11.8*	

18. Do you require audited financial statements from all utilities?

Yes *56%** No *41%* No Response *3%*

If yes, how often? *annually: 56%, every rate case: 6%, monthly: 6%*

* *several noted that annual financial statements were required but need not be audited.*

19. Does your staff perform a thorough analysis of rate packages or rate design?

yes: 97%
cometimes: 3%
no: -0-

APPENDIX C

QUESTIONNAIRE SENT TO APUC REGULATED ELECTRIC AND TELEPHONE NONPROFIT COOPERATIVE CORPORATIONS

(1) Are you aware of Senate Bill 133 (attachment 1), and the proposed substitute to that bill (attachment 2) introduced during the current legislative session, which would have exempted nonprofit cooperative corporations from economic regulation by the Alaska Public Utilities Commission?

Yes *100%* No *-0-*

(2) Did you support the passage of:

(a) SB 133 as originally introduced:

Yes *88%* No *12%*

(b) The proposed substitute for SB 133?

Yes *63%* No *25%* No answer *12%*

(3) What do you feel would be the advantages to the utility and its membership of the passage of such a bill ?

Number of responses in ( )
reduction of regulatory cost (7),
reduce time lag, able to adjust rates on more timely basis (5),
cut unnecessary red tape (1),
reduce workload (1),
more realistic revenue estimates (1),

(4) What do you feel would be the disadvantages to the utility and its membership of the passage of such a bill?

added local responsibility, more "heat" on board and management (2)
APUC requires utility to be fair to all consumer classes (1)
lack of ability to establish certified service areas (1)
APUC provides advice on operational & financial problems (1)
none (2)

(5) If you do not support SB 133 or its proposed substitute, are there any changes to the existing statutes or regulations of the APUC you feel should be made?

Yes *25%* No *-0-* No Response *75%*

Number of responses in ( )

(5) Please explain:

APUC should be required to file statement of estimated cost to consumers of any proposed rules: (1)
Change reporting requirements to conform with REA reporting requirements: (1)

(6) If your utility is exempted from economic regulation by the APUC, what mechanism would be used to ensure that your consumers receive adequate service at reasonable rates?

Board of Directors: (5), REA: (5), Members: (5), Management: (3), independent auditor: (1), employment of competent rate consultants: (1), constant computer review of rate of return: (1), National Rural Utilities Cooperative Finance Corporation: (1)

(7) Does this mechanism exist now or would it need to be implemented?

Already exists: (4)
Beginning stages of implementation: (1)

(8) How many members currently belong to your cooperative?

avg. 4576

(9) Please indicate when your last three general membership meetings were held and indicate whether a quorum was constituted for each meeting.

Meeting Date	Quorum

	Yes	*76%*	No	*12%*	No. Ans.	*12%*
	Yes	*76%*	No	*12%*	No. Ans.	*12%*

(10) Please indicate when your last three board of directors meetings were held and indicate whether a quorum was constituted for each meeting.

Meeting Date	Quorum	
varied	Yes *100%*	No *-0-*
	Yes *100%*	No *-0-*
	Yes *100%*	No *-0-*

(11) What has been the cost of APUC regulation for your utility for each of the years listed below:

Year	Actual	Allowed by APUC
1978	*varied*	*same or pending*
1979	*varied*	*same or pending*

(12) What is your current procedure for handling consumer complaints?

investigated by staff, if unresolved referred to general manager, if unresolved referred to board of directors: (6)
investigated by staff, investigated by management if serious, directed to board if general or political in nature: (1)
investigated by general manager, if unresolved referred to board: (1)

(13) How many consumer complaints were received:

(a) Three years ago? *avg. of 6* responses=102*

(b) Two years ago? *avg. of 6* responses=37*

(c) last year? *avg. of 6* responses=60*

* *there were 8 responses, however, 2 stated they do not maintain records of this information*

(14) What is the average length of time from when a complaint is received until it is resolved?

if resolved by employees 0-5 days, by board 30-60 days: (1)
2 days: (1)
0-2 days: (1)
2-3 hours: (1)
usually 2 days, sometimes 1-2 weeks: (1)

(15) Do you believe that the Alaska Public Utilities Commission has operated in the publics best interests?

Yes *37%* No *25%* No Response *38%*

Comments: *APUC does not have proper staff: (1), burden consumers with unnecessary regulatory costs: (1), delaying rate increase requests for maximum allowable time causes serious depletion in member-owners equity and placed coops in precarious financial straits: (2), consumer complaints officer has been helpful: (1)*

(16) Do you have any complaints concerning the service provided by the Commissioners or the staff of the APUC?

Yes *76%* No *12%* No Response *12%*

Please explain: *require excess amount of data: (1), provided misdirection of requirements: (1), takes forever to get anything done: (1), Commission's news releases are often an insult to the integrity and professionalism of the utility: (1), full-time legal council should be retained.*

(17) Additional Comments?

gotten hide bound with rigid regulation: (1); some Commissioners and staff are very dedicated: (1), poorly managed: (1), revolving door employee turnover compromises APUL competence: (1), Management Audit of Commission was waste of money; (1), REA coops are very responsive to their memberships demands: (1)

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

RECEIVED
OCT 5 1979
LEGISLATIVE AUDIT

October 5, 1979

Mr. Gerald L. Wilkerson
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, Alaska

Dear Mr. Wilkerson:

We have reviewed the Alaska Public Utilities Commission's response to your preliminary audit report of the Commission as of August 1, 1979.

We are forwarding the Commission's response for your information. The Executive Branch of Alaska Government; however, reserves the right to make additional reviews and analyses concerning the advisability of combining the Alaska Public Utilities Commission, the Alaska Transportation Commission, and the Alaska Pipeline Commission into a single regulatory commission. Additionally, the Office of the Governor has noted your Recommendation No 12 - to keep the appointment of Chairman of the APUC current.

Sincerely,

Richard A. Smith
State Internal Auditor

RAS/PJA/mjc
Enclosure

JAY S. HAMMOND, Governor

ALASKA PUBLIC UTILITIES COMMISSION
DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT

338 Denali Street
Anchorage, Alaska 99501

Phone (907) 276-6222

RECEIVED
OCT 5 1979
LEGISLATIVE AUDIT

October 5, 1979

Mr. Gerald L. Wilkerson
Legislative Auditor
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

The following is the response of the Alaska Public Utilities Commission to the Performance Review of the Alaska Public Utilities Commission by the Division of Legislative Audit.

Recommendation No. 1

The Alaska Public Utilities Commission, the Alaska Transportation Commission and the Alaska Pipeline Commission should be combined into a single regulatory commission.

The Alaska Public Utilities Commission (referred to hereinafter as APUC or Commission) believes it is appropriate to re-evaluate the merits of a single commission mode of regulating utilities. At this time, however, the APUC cannot unequivocably state that the three regulatory commissions should be combined into a single agency because no documentation that would support that conclusion has been made available to the Commission. The Commission believes it is misleading to make a recommendation of this significance solely on the basis of a comparison of "schemes" used by other states. Certainly the dominant regulatory framework in other states lends credence to the proposition that it is timely to reassess the value to the Alaska public to continue three separate regulatory agencies.

A tabular comparison of various regulatory frameworks is presented to support this recommendation. While informative, the Commission does not believe this analysis is sufficient

documentation on which to base this substantive recommendation. As the analysis indicates, the number of Commissioners has a direct relationship to the number and type of professional Staff. This, in turn, is influenced by its methods of operation, the scope of a Commission's statutory responsibilities, and the number of utilities subject to regulation.

The Commission offers the following comments regarding the advantages postulated by the auditors of a single regulatory agency.

(1) The Commission concurs that a single regulatory agency could result in a reduction in the number of regulatory Commissioners. However, someone must preside at hearings; and, therefore, the establishment of hearing officer positions would be required to offset the diminution in Commissioners. There are jurisdictions that utilize hearing officers to conduct public hearings and to draft proposed decisions for Commissioners' review and determination. The APUC Commissioners hear cases and write substantive orders without the benefit of such Staff* assistance.

(2) Because of the specialization required of the Commission's professional Staff, i.e., expertise in telecommunications, electric, gas, sewer and water utilities, the Commission questions the degree of flexibility that would exist with a combined Staff. The Commission believes that the interchangeability of staff could be limited in practice to emergency-type situations. An analysis of the regulatory responsibilities of the Alaska Pipeline Commission and the Alaska Transportation Commission should provide more factual information in this regard. The Commission does agree that a combined clerical support Staff could provide more flexibility and create a more efficient flow of paperwork.

(3)(4)(5) The Commission believes that joint hearing and reproduction facilities and a shared publications library would provide for more efficient services, not only for a consolidated regulatory body but also for the existing regulatory Commissions. To this end, the Commission has recommended in its last two budgets that the three Commissions be physically co-relocated to a facility that would permit realization of these economies.

---

*The average regulatory commission in the United States has approximately 200 Staff members as contrasted with 32 Staff assigned to the APUC.

(6) The Commission does not have enough firsthand experience with sophisticated word-processing equipment to comment on this possible reduction.

The APUC strongly supports the concept that adequate human resources, whether in the form of commissioners, hearing officers or other staff, must be provided if the regulatory duties and responsibilities delegated by the Legislature are to be performed in an efficient and effective manner. Moreover, sufficient resources to perform the job are as important under the existing regulatory configuration as they would be in a prospective consolidation into one agency.

Reliance on outside regulatory formulae to support a merger should also be tempered by recognition of circumstances which make regulation unique in Alaska. For example, the APUC is still actively involved in the certification of utilities, in marked contrast to most jurisdictions in the "Lower 48" which have been fully carved up into utility service areas. This is especially pertinent not only to rural Alaska which is in a developmental stage in the utility arena but also extends to the State's largest metropolitan areas where telecommunications utilities have been the subject of recent certification proceedings. While not commanding the newspaper headlines generated by rate increases, the certification process is critical to the public protection function of regulation because it establishes the foundation for a utility's future service and rates.

The APUC believes that concurrent with the sunset review of the Alaska Pipeline Commission, the Division of Legislative Audit or an independent consulting firm should perform a cost-benefit analysis of combining the three regulatory commissions into one. The study should examine both the existing and alternative regulatory frameworks to identify the potential operational and financial gains and losses to be realized under a single consolidated agency.

If the desirability of implementing this recommendation is affirmed by such an in-depth analysis, the Commission strongly believes that the Legislature should assess the scope of the existing responsibilities of the three regulatory commissions before the decision to merge is made. Should the Alaska Transportation Commission continue to regulate dumptrucks and helicopters? Should the APUC continue to regulate

garbage and cable television utilities? What will be the magnitude of the workload of the Pipeline Commission after the TAPS case is completed? Resolution of these and other policy issues would facilitate the Legislature's efforts to define the appropriate regulatory framework for Alaska inasmuch as a determination of whether one commission would better serve the public interest than the existing three do is, in part, dependent on what responsibilities would reside with the single successor agency.

It may be difficult to divorce the mechanics of a merger from any assessment of its practicality and desirability. In this regard affirmative action to consolidate the existing regulatory agencies should include a detailed implementation plan with a realistic timetable which acknowledges that preservation of pending, current, and past decisions of each Commission is critical to the successful transition to one regulatory agency.

The fundamental purpose of the Alaska Public Utilities Commission is to protect the public by awarding certificates of public convenience and necessity to qualified providers of utility services and to ensure that certificated utilities, except where exempted by statute, provide adequate, efficient, and safe services and facilities to the public at just and reasonable rates, terms, and conditions. These two major functions are broadly defined as certification and economic regulation. It should be noted that the consumer protection function of the Commission falls within the broad definition of economic regulation.

The following four recommendations have a common theme. They propose to reduce the scope of the Commission's duties and responsibilities under AS 42.05 by deregulating certain types and sizes of public utilities. These recommendations reflect the audit team's awareness of the acute strains that the APUC's current workload places on its limited resources and ability to competently perform the responsibilities delegated by the Legislature. Additionally, it represents some of the current thinking regarding the necessity and desirability of regulation. After consideration of these

factors, the auditors identified those utilities where they perceived deregulation would have the least detrimental impact on the Alaskan public.

The Legislature faces the choice, implicit in the audit, of prioritizing the responsibilities of the APUC by deregulation of certain utilities or the allocation of adequate resources to the agency to fulfill its statutory assignments. The ultimate policy determination of which, if any, utilities should be exempt from regulation resides exclusively within the purview of the Legislature as the sole source of the Commission's authority. If the deregulation course is elected, it is the Commission's position that the audit team's priorities are generally acceptable with some specific exceptions. These exceptions and the Commission's view of the potential impact of deregulation in the recommended areas are provided to ensure that the ultimate decision is made with the experience and information of the APUC in concert with input from the private sector and the consuming public.

Recommendation No. 2

AS 42.05 should be amended to allow the Alaska Public Utilities Commission to cease all certification and regulation of cable television.

The Commission believes that the definition of telecommunications as found in AS 42.05.701(8) mandates the certification and regulation of cable television (CATV).

The Commission believes that certification should be required for CATV utilities providing service to 10 or more customers. This provides certain minimal protection to the public with respect to the fitness and ability of the serving utilities as more fully discussed in the response to Recommendation #5. More importantly, certification is necessary to assure the orderly development of basic telecommunications services throughout Alaska in light of nationwide technological developments and regulatory trends.

Current legislation before Congress and a more liberal regulation policy by the Federal Communications Commission indicate that telephone companies will shortly be in the position to offer broadband communications* which could

*Broadband communication includes the full range of communication information including, but not limited to, basic telephone, data, and television.

include facilities for television distribution. Ultimately, basic telephone and television service could become so commingled that the economic viability of regulated communication services could be affected.

In some jurisdictions, municipalities award a franchise to a CATV utility. While on the surface this appears to be an attractive alternative to state regulation, the record in recent CATV certification proceedings involving Anchorage and Fairbanks indicates that in the "Lower 48" there has been political abuse of this process and that municipalities which do not have technical and rate-making expertise are unduly burdened by the responsibility to assess which applicant best serves the public interest. In place of economic regulation, municipal bodies have in some instances substituted a shortening of the franchise period, hoping to influence the franchise holder to charge reasonable rates and provide adequate service -- a practice that could backfire and leave the consumer without any service.

The APUC has determined that the public interest is not necessarily served by economic regulation of small cable television utilities and has exempted small CATV's from regulation in a number of instances. These are Eielson Air Force Base, Metlakatla, Craig, Klawock and Thorne Bay. While independently assessing the "nonessential" quality of cable television services, the Legislature should be aware that the APUC files are replete with complaints against CATV utilities, particularly from rural parts of Alaska where there is a captive audience with no alternative form of entertainment and where the entities providing the service have their base of operations outside the State of Alaska.

Recommendation No. 3

AS 42.05 should be amended to allow the Public Utilities Commission to cease certification and regulation of those utilities furnishing collection and disposal service of garbage, refuse, trash, and other waste material.

The Commission supports the elimination of regulation of garbage utilities from its responsibilities and agrees with the economic justification articulated by the sunset auditors.

The Commission would be remiss, however, if it failed to apprise the Legislature of its concerns regarding deregulation

of this public utility service. Based on Commission experience there is a need for some governmental entity to oversee garbage, refuse and disposal operations. Garbage and refuse disposal has long been considered an essential public health and sanitation service, more frequently than not owned, operated or contracted for by municipal governments. The impact of deregulation in this area would be felt primarily by a small percentage of consumers residing outside municipal boundaries. The Commission believes it would be in the public interest to ensure that the municipalities have sufficient extraterritorial jurisdiction under AS 29.48.037 and AS 29.48.040 to oversee the entirety of these operations.

The Commission would also point out to the Legislature that the Department of Environmental Conservation (DEC) currently issues permits for sanitary landfill use and promulgates regulations governing solid waste management. In this regard, the Legislature may wish to consider the DEC as an alternative to municipal regulation of garbage and refuse. The adequacy and availability of a sanitary landfill to a garbage utility is frequently a significant problem which has been brought to the Commission's attention. Because of DEC's current responsibilities in this area, it is appropriate to consider this alternative which would provide end-to-end regulation of garbage utility services.

If a legislative determination is made that garbage utilities should come under the jurisdiction of a state regulatory commission, it may be more in keeping with transportation regulatory practices for the Transportation Commission to resume this function.

Recommendation No. 4

AS 42.05 should be amended to allow non-profit telephone and electric cooperatives to petition for withdrawal from APUC economic regulation.

The Alaska Public Utilities Commission will concur with this recommendation. However, it is the Commission's experience that consumers of electric and telephone cooperatives frequently perceive little difference between co-ops and other public utilities, even though the members own the business and elect the board of directors. The Commission believes that if AS 42.05 is amended to incorporate this recommendation, it would be desirable to promulgate regulations establishing

an orderly procedure for withdrawal from economic regulation by cooperatives.

To further expand AS 42.05.711(b) to allow cooperatives that have withdrawn from economic regulation to subsequently return to the full regulatory jurisdiction of the Commission, while a desirable safeguard of the public interest, could have a detrimental effect on the ability of the APUC to administer and finance its on-going functions. For example, relevant Commission experience is the refusal of the Rural Electrification Administration to provide additional loan monies to the Tlingit-Haida Regional Electric Authority (THREA) until it submitted to APUC jurisdiction. THREA acceded to the jurisdiction of the APUC in December, 1978, because of its financial crises. Significant concerns of the THREA ratepayers and the mayors of the respective villages in which the utility is located has required the Commission to expend dollars for consultant services that would otherwise have been available to fund other existing responsibilities of the agency. Realizing that the decision to return to economic regulation will likely occur only when the cooperative is experiencing significant difficulty, the Commission believes it would be necessary and appropriate to minimize any impact on its existing workload by promulgating regulations governing reinstatement of full regulation after such an election.

It should also be noted that an unregulated telephone cooperative could cause unnecessary expansion of toll facilities of the long lines carrier. A local telephone cooperative not only has an impact on its primary customers but on those who utilize one or two communication networks desiring access to the local exchange. For example, a small deficiency in an unregulated telephone central office switch can deny access to 10 percent of incoming toll calls. It is uneconomical to have a telephone call cross the lower 48 states and be transmitted to the satellite and an Alaska terrestrial facility only to be denied at the terminating central office.

Recommendation No. 5

AS 42.05 should be amended to exempt from economic regulation all utilities with annual gross revenues not exceeding $100,000.

The Commission concurs with this recommendation.

However, the Commmission believes it is in the public interest to continue to require certification of all utilities providing service to 10 or more customers, irrespective of annual gross revenues.

A certificate of public convenience and necessity from a qualified independent agency assures the consuming public that a utility is fit, willing and able to provide service. In addition, a certificate provides economic protection to the small business from unauthorized or potentially ruinous competition. The Commission believes that certification is particularly important to protect the public interest when a small utility will be physically tied to a larger utility network, such as the case of a local exchange telephone company interconnected to the long lines telecommunications carrier or an electric grid system connecting more than one power utility.

Based on the APUC's 1978 Annual Report, 13 utilities currently subject to economic regulation would become exempt if this amendment were approved with the $100,000 cutoff level. The majority of the 13 utilities are small water companies which historically have generated numerous consumer complaints. These complaints have required a significant commitment of time by the APUC Consumer Protection Section for its investigation and possible resolution and by Commissioners and Staff in public hearings. The Commission would be remiss if it did not point out to the Legislature that the volume of complaints received from the consumers of these relatively small utilities indicates reliance on the public protection provided by regulation for adequate service. Because water service is a necessity, some entity, be it legislative or administrative, will inherit the consumer protection function that the APUC has provided.

The comments of the APUC's Chief of Finance are germane and the Commission believes they should be drawn to the attention of the legislature:

"Water bills have a tendency to be lower than electric or telephone. Therefore, I question whether a gross revenue standard is a fair reflection of the number of people involved. I do not believe the same gross revenue cutoff should be applied to all types of utilities. I think the deregulation of electric and telephone under $100,000 gross revenues is a good recommendation. Water and sewer should have a different standard.

Some of our most difficult and demanding cases are water utilities. The filings are often poor and inaccurate and accounting records are often nonexistent or in 'shoe-boxes.' We truly protect the public in our review of these utilities. Any given case may require a great deal of time on our part, but I feel it is time well spent. Unlike garbage collection, water service is definitely a necessity."

Recommendation No. 6

The statutes and regulations governing the Alaska Public Utilities Commission should be revised.

The Commission agrees that its statutes and regulations should be revised. The following comments are offered in response to the specific examples delineated by the auditors.

(1) The two cases cited by the auditors "mix apples and oranges." In one, Docket U-75-95 a Commission decision has been upheld in Superior Court that disallowed unamortized rate case expense in a utility's rate base. At issue in the other, Docket U-76-66, was the protection of the public from duplicative utility expenses. Both of these issues are matters of regulatory policy over which the APUC needs discretion and flexibility to respond to current theories and to individual cases.

The Commission believes, however, that regulations establishing guidance for supporting documentation required to justify both internal and external rate case expense are necessary and desirable. The Commission's posture for four years has been reactive. Unfortunately, its workload, mandated by other statutory requirements, has preempted the time necessary to notice, consider and adopt regulations that would allow the regulatory process to function more efficiently.

(2) The Commission concurs that the promulgation of industry performance standards for all regulated utilities is necessary and desirable, but it is also a function of available resources to establish the standards and to enforce them. At the present time the APUC has no operational budget to enforce the existing telephone service standards.

(3) The Commission has requested clarification of its

statute regarding the transfer of certificates of public convenience and necessity. (HB675, 1978 Session.) More interest was generated in the existing statutory ambiguity as a result of PACOM's announced intentions to acquire a controlling interest in RCA ALASCOM. However, the statute remains; and, to date, affected utilities have acceded to Commission jurisdiction in this matter in accordance with the Commission's interpretation of its statute and regulations. Nonetheless, the Commission continues to support clarifying legislation.

(4) The Commission plans to eliminate the discrepancies between its statute and regulations by January 1, 1980.

Recommendation No. 7

The APUC should seek upgrading of salary levels for professional support staff.

There is no question that the most frustrating, expensive and time-consuming problem in the Commission's operation has been the vacancy factor and turnover of its professional Staff as a result of the compensation level.

A salary survey performed by the Division of Personnel in 1977 compared salaries of the Commission's professional Staff to salaries paid by regulatory commissions in other states with a cost-of-living additive. This did not and does not consider reality. The Commission loses its professional people to consulting firms and utilities operating in Alaska, not outside of Alaska. In addition, the Commission has experienced turnover because other State agencies offer a higher salary for the same qualifications and experience. Effective protection of the public interest and efficient utilization of its financial resources dictate that the APUC compensate its professional Staff at a level which attracts and retains qualified and experienced personnel.

Recommendation No. 8

The APUC should implement a time management system.

The Commission concurs that a time management system is a useful administrative tool. The Commission's experience in filling successive vacancies in the Executive Director position has not allowed institution of such a system to date. However, the Commission anticipates that the new

administrative Staff will implement such a system as rapidly as time, knowledge, and experience permit.

Recommendation No. 9

The APUC should develop a cross-reference system for Commission orders and decisions by the courts.

The cross-reference system suggested by this recommendation is desirable and necessary. With adequate funding the computer capability of the Commission could provide the foundation of a cross-reference system for current Commission actions. To recover the decisions of the first eight years of the Commission requires time and budget that is non-existent at present. The Commission plans to dedicate a portion of the time of its newly classified paralegal position to this assignment.

Recommendation No. 10

The Commissioners of the APUC should restrict their involvement in the administrative function of the agency.

The theory behind this recommendation is sound but its strict application must be tempered by reality. As one Staff section head stated in response to this recommendation, "Until we have written policies, a topical reference system and a knowledgeable, interested, hard-working executive director, I don't see how the Commissioners can be expected to restrict their involvement in the administrative function of this agency."

It is the goal of the Commissioners to be relieved of their direct involvement in the administration of the APUC. History dictates this is an evolutionary process. Reality dictates that the Commissioners are ultimately responsible for the public perception of the APUC. Their oversight responsibilities and input in administrative matters will continue as an informative tool for the Staff's managers.

It should be noted that the Commissioners have no independent professional staff and must rely on existing staff personnel for technical expertise and advice only when it does not compromise the independence of the parties in proceedings.

Recommendation No. 11

The APUC should seek to establish separate collocation codes for each section of the Commission.

It may be that the implementation of this recommendation is desirable.

The Commission does have some reservations in this regard due to the small size of its sections, ranging from one to six people. In the past the budget has been earmarked to the workload confronting the Commission. In most proceedings at least two staff sections, the Commission's legal personnel and the Commissioners are involved. Budgeting has been a matter of compromise, cooperation, and re-prioritizing to address the situation at hand.

The Commission will explore with the auditors the perceived benefits to be gained through section collocation codes.

COMMENTS ON ANALYSIS OF PUBLIC NEED

II. "There is also a need for statutory and regulatory amendments to allow for more effective case management and to avoid court appeals of Commission decisions (see Recommendation No. 2 through No. 6).".

It is overly simplistic to assume that statutory and regulatory amendments will eliminate court appeals of APUC decisions. Regulatory and administrative law are evolutionary elements in the system of common law applicable to Commission proceedings. Also, the volatility of regulatory theory and policy combined with the likelihood of a dissatisfied party is conducive to litigation in some instances. Given the nature and scope of APUC activity during recent years, there has been a relatively small number of Commission orders that have been appealed to the Superior Court.

An appeal of a Commission decision, per se, is not an undesirable result of Commission action. In certain instances it is in the public interest to have the case law and statutes clarified and amplified through the appeal process.

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

The APUC has been actively involved in reacting to substantive

pieces of legislation proposed by others in the past few years. In addition, the Commission has served as a resource to both the Gcvernor's office and the legislative branch of government in the energy and telecommunications fields. And, it well may be more fruitful for deregulation recommendations to come from without rather than from within the Commission.

The Alaska Public Utilities Commission believes that the audit conducted by the Division of Legislative Audit was a constructive exercise for the Commission and commends the auditors for the performance of their responsibilities in a thoughtful and unobtrusive manner.

Respectfully submitted,

Gordon J. Zerbetz, Chairman

Marvin R. Weatherly, Commissioner

Re: Bell Telephone. v. A.P.U.C.
Superior Case No. 76-2838

Dear Senator Willis:

I have now received a report from Presiding Judge Moody pertaining to the above-entitled case. I am enclosing the a self-explanatory copy of Judge Moody's letter and a copy of Judge Arnold's letter to Ms. Thoms. Similar inquiries to that of Ms. Thoms were received from other residents of Eagle River, and it is my understanding that each has been answered in full.

Thank you for calling this matter to my attention.

Sincerely yours,

Robert Boochever
Chief Justice

Re: Bell Telephone v. A.P.U.C.,
No. 76-2338--Administrative Appeal

Dear Mr. Chief Justice:

Only after considerable investigation were we able to reconstruct what has, or rather, what has not happened in this particular case.

From the attached copies, you can see that we have answered every inquiry, with the exception of Senator Willis' which was addressed to you, explaining the situation.

In addition to insuring no more unnecessary delays in this particular case, I have directed the Area Court Administrator to research every pending administrative appeal to see if others may need special attention at this time.

Although it appears that the court was, in part, responsible for this inexcusable delay, it would not have occurred if the attorneys had actively pursued an early disposition.

We are now working under the activity and pressures of over 8,000 pending civil cases in the Anchorage Trial Courts, and each day that number increases. Nevertheless, we will certainly try to prevent a reoccurrence of this type of problem.

Sincerely,

Ralph E. Moody
Presiding Judge

JAMES E. ARNOLD
Area Court Administrator

April 7, 1977

Ruth J. Thoms
Box 236
Eagle River, AK 99577

Dear Ms. Thoms:

I will commence by apologizing for the delay in answering your letter of March 13, 1977 to Mr. Arthur Snowden, II, which was referred to me. The delay was caused by my investigating and determining just what happened in this particular case.

I have found that Bell Utilities and Development, Inc. appealed from a decision of the APUC denying it a rate increase. The notice was filed on April 13, 1976. On April 26, 1976, Judge Lewis granted Bell a preliminary injunction allowing it to collect the increased rate pending the disposition of the appeal. Bell was ordered to deposit the collected increase in a special interest-bearing account.

On April 26, 1976, Judge Lewis signed an order setting administrative appeal procedures, dealing principally with the preparation of the agency record for the Court's review. Paragraph 3 of the Order required the record to be filed with the Court within sixty (60) days of the service of the Order. This Order was served by mail on May 5, 1976.

For reasons that do not appear in the Court file, the agency record was not delivered to the Court until December 3, 1976. Bell also supplemented the record by filing additional documents on January 10, 1977.

Judge Lewis retired in February 1977, and through error and the enormous press of the business of the Court, this matter lay unnoticed and unattended until you, and other interested citizens, brought the matter to our attention.

Upon learning of the problem, I requested and obtained authority from the Chief Justice for an assignment for Judge Lewis to return and complete

this matter. The matter has been scheduled and calendared before Judge Lewis on April 12, 1977 at which time I presume he will issue an Order setting a schedule for briefing and allowing the parties to notice the matter for oral arguments, if they so desire.

The Presiding Judge and I will monitor the future progress of this matter, and will insure that there are no more unnecessary delays in a resolution of this dispute.

Please contact me if I can be of any further assistance in this or any other matter.

Sincerely,

James E. Arnold

James E. Arnold

STATE OF ALASKA

ALASKA PUBLIC UTILITIES COMMISSION

DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT

JAY S. HAMMOND, Governor

1100 MacKay Building
338 Denali Street
Anchorage, Alaska 99501

Phone (907) 276-6222

March 24, 1980

Senator W. E. "Brad" Bradley
Chairman, Senate Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Bradley:

As a follow-up to the Sunset Review of the Alaska Public Utilities Commission I am enclosing supporting documentation for additional Commission staff in order to carry out our existing responsibilities in a timely manner.

As the audit verified, the present level of staffing is inadequate to meet the responsibilities mandated to the Commission under AS 42.05. Testimony from utilities and ARECA during the public hearings of both the Senate and House Commerce Committees support this fact.

To summarize the contents of the enclosed package, 15 additional personnel would be needed if the APUC is to continue its ongoing responsibilities in a more responsive and efficient manner, i.e., the way "we would like to do the state's business". These personnel would be assigned to the following sections:

Engineering - (4)

- Engineer II - cable television
- Engineer II - energy
- Engineer I - energy
- Engineer I - telecommunications

Utility Financial Analysts - (3)

- UFA III
- UFA I
- UFA I

Tariff Analyst - (1)

TA III - (new classification)

Communications Carrier Section - (3)

Economist II

Research Analyst II

Clerk Typist III

Administrative Support for above personnel - (4)

Word Processing Supervisor

Word Processing Operator

Clerk Typist III

Clerk Typist I

The approximate salaries of these individuals is $603,000. Our current budget which is before the Finance Committees is approximately $1.6 million. This does not include an increase to raise the professional staff salaries to a comparable level; if that occurs, and the Commission is optimistic that it will, an additional $60,000 would be added to our current budget.

In order to give your committee an idea of the impact of the deregulation recommendations, the Commission provides the following observations: (all elimination of positions refer to the 15 additional positions and not existing positions)

Sunset Recommendation 2 - total deregulation of cable-television utilities: - eliminate one engineering position.

Sunset Recommendation 3 - total deregulation of garbage and refuse utilities: eliminate one financial analyst.

Sunset Recommendation 4 - deregulation of telephone and electric cooperatives: if the 12 electric cooperatives and 7 telephone cooperatives elected deregulation by September 1, 1980, eliminate 1 financial analyst and 1 Engineer II.

Sunset Recommendation 5 - economic deregulation of all small utilities grossing less than $100,000: This would not materially affect personnel requirements.

Whether or not which, if any, adminstrative support positions could be eliminated would depend on the implementation of Sunset Recommendations #2 - #5.

In summary, 4 of the 15 additional professional personnel would not be required if the legislature deregulated cable-television, and garbage, and if all REA co-ops elected deregulation by September 1, 1980.

Sincerely,

Carolyn S. Guess
Commissioner

Enclosure

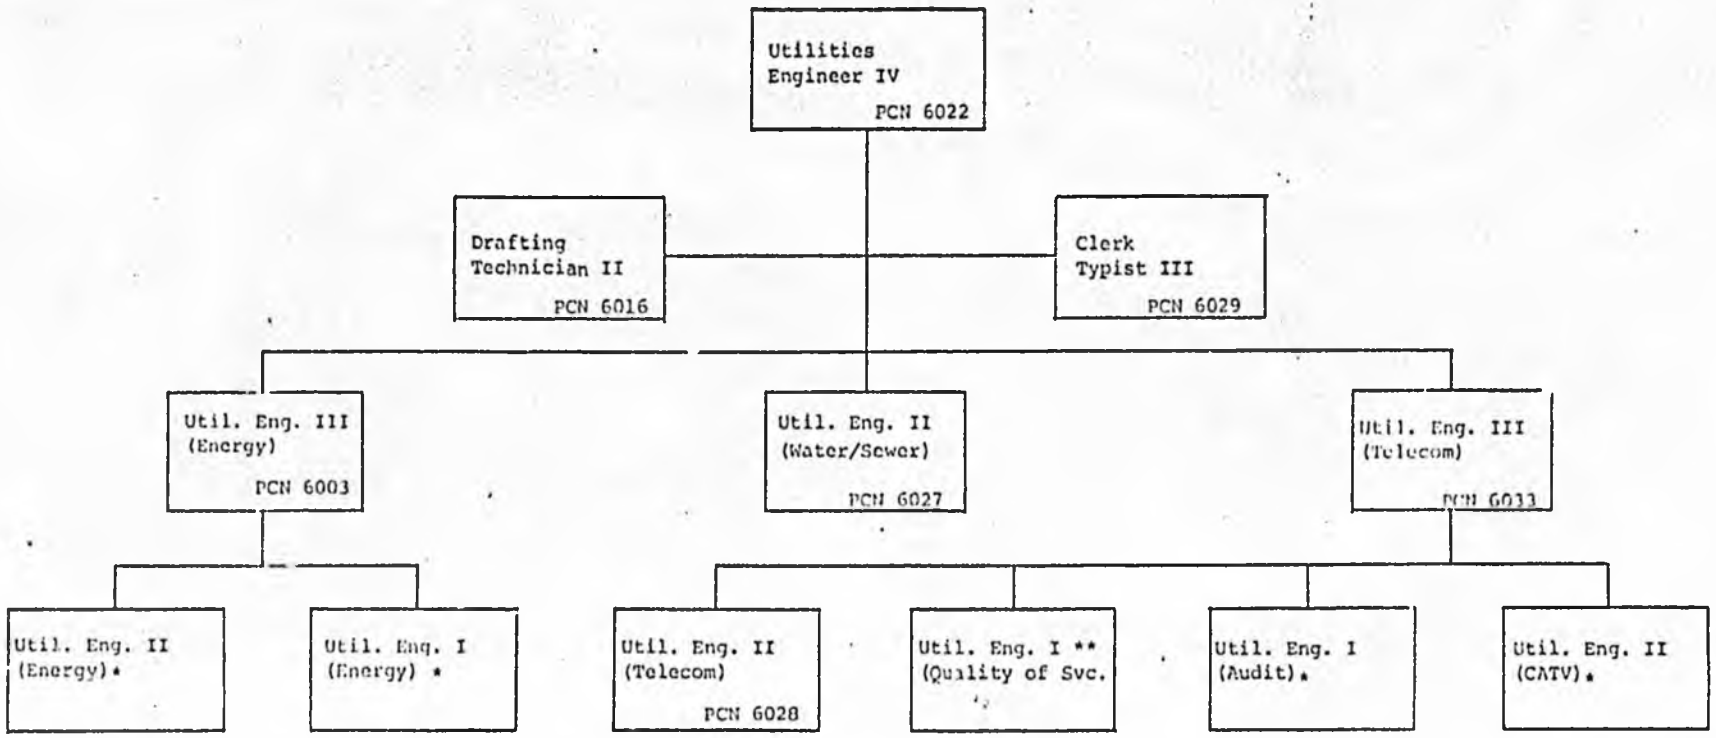
ENGINEERING ORGANIZATION CHART



*New position requested
**New position requested in Governor's FY81 Budget Request

Principal Programs in Engineering

Rate Base

1. Audit Continuing Property Records and determine whether plant is used and useful.

This involves auditing on a sampling basis and requires the use of layout drawings and staking sheets to determine the actual location of the equipment. Physical testing of telephone equipment (amplifiers, etc.) may be required to assure that particular equipment is actually in use.

2. Determine if rate base is reasonable or unduly inflated due to poor decisions.

Work done on occasional basis at the Commission has revealed that some utilities do not have sufficient control over the rate base. Examples include: 1) Plans based on outdated forecasts done in the lower 48 which also ignored higher Alaskan labor rates have resulted in uneconomical additions to plant and 2) projects placed in limbo before they materialize accumulate excessive engineering labor hours before they became active.

3. Audit of Work Orders and associated accounting.

This is necessary to establish the reasonableness of material, engineering, labor, supply and overhead charges to determine the proper allocation between capital and expense costs, and to insure prompt capitalization and retirement of property.

4. Review depreciation rates and studies.

In many locations of Alaska, depreciation rates may differ from industry norm due to the unique conditions encountered.

Rate Design/Tariffs

1. Review allocation studies.

This involves detailed studies of equipment and of the effort involved to put it into service which will determine a fair and reasonable allocation of charges to the various types of services offered by utilities. In telecommunications utilities tend to assign excessive costs to noncompetitive services.

2. Review reasonableness of material, engineering and labor rates used to develop individual tariffs. Work is similar to that described in 1 above and may include the witnessing of actual installations.

3. Approve portions of tariff text that is related to equipment and engineering.

Quality of Service

1. Develop and update service standards.

To date, only telecommunications service standards have been promulgated (3 AAC 52.200-3 AAC 52.340). Standards should be developed for electric, water/sewer, and other utilities. Once developed, standards must be updated to keep current with changing conditions.

2. Field Testing

Only actual on site testing can determine the quality of service provided. It is planned to have an Engineer I "on the road" about 40% of the time who will use specialized test equipment and will audit outage logs to determine the level of service provided by utilities. The engineer will also analyze service problems and determine whether they are caused by faulty or insufficient equipment or poor management control. Emphasis will be placed in telecommunications which is particularly sensitive to service problems where localized minor problems often affect the entire network. For example, poor operator answer time, aside from irritating customers, causes needless use of long distance circuits for the sole purpose of ringing the operator. This in turn distorts usage data and leads to major expenditures for unnecessary equipment additions. Another example is the underprovision of low cost terminal equipment which causes backups in the satellite network.

3. Review of service reliability and contingency plans. Age and reliability of primary and backup equipment will be considered to determine their adequacy. It is planned to study the economic feasibility of providing equipment diversity. Commission involvement seems also necessary to encourage utilities to develop and maintain contingency plans for emergency situations.

4. Review adequacy of system design.

On site review of existing and planned additions to facilities frequently reveal bottlenecks and weak spots which require urgent correction. Beside on site review, it is planned to maintain usage trend data of principal equipment and facilities to pinpoint potential deficiencies.

5. Test accuracy of long distance billing.

Long distance billing is performed by equipment that is integral with central office switching machines. For this reason, the testing of the accuracy of this billing lies with the APUC rather than the Weights & Measures Section.

6. Investigation of Quality of Service Complaints.

This work consists in conducting special investigations related to specific customer complaints.

Management Review

1. Evaluation of Utility Construction Programs.

Construction programs will be reviewed to determine whether they are adequate to meet current and future service needs. Work will consist in ferreting out weak points and in determining whether plans are compatible between utilities. Included will be discussion with utilities whether corrective action is practical and a review regarding practical implementations of new or alternate technologies (e.g, energy sources). It is expected that economic studies will be made or reviewed where alternate courses of actions are possible. It is believed that Commission review of construction programs is especially necessary when such programs are dictated by parent companies in the lower 48 without much regard or appreciation of Alaskan needs.

2. Productivity Studies.

Labor costs and productivity will be examined for reasonableness. This will include a comparison of productivity rates between companies and include a careful review of cases where productivity rates in Alaska deviate from those in the lower 48.

3. Maintenance Programs.

Utility maintenance programs will be evaluated through examination of records and routine maintenance procedures.

4. Investigation of Management Troublespots.

Programming is now underway to establish computer auditing of utility annual reports. It is planned to have computerized ratio and trend analysis pinpoint possible management trouble spots which subsequently will be investigated (e.g., strong deviations from the mean of General & Administrative expenses per customer; excessive uncollectibles per customer, etc.).

Certification/ ransfers

Applications for, or transfers of a certificate of public convenience and necessity require an investigation in the applicant's fitness, willingness and ability to operate the contemplated utility service. Engineering applies this criterion to the review of the applicant's plans, of his management, engineering and operational strengths, and coordinates with the finance section in determining financial fitness.

Special Projects

These will primarily consist in the establishment of new methods and procedures for the engineering section.

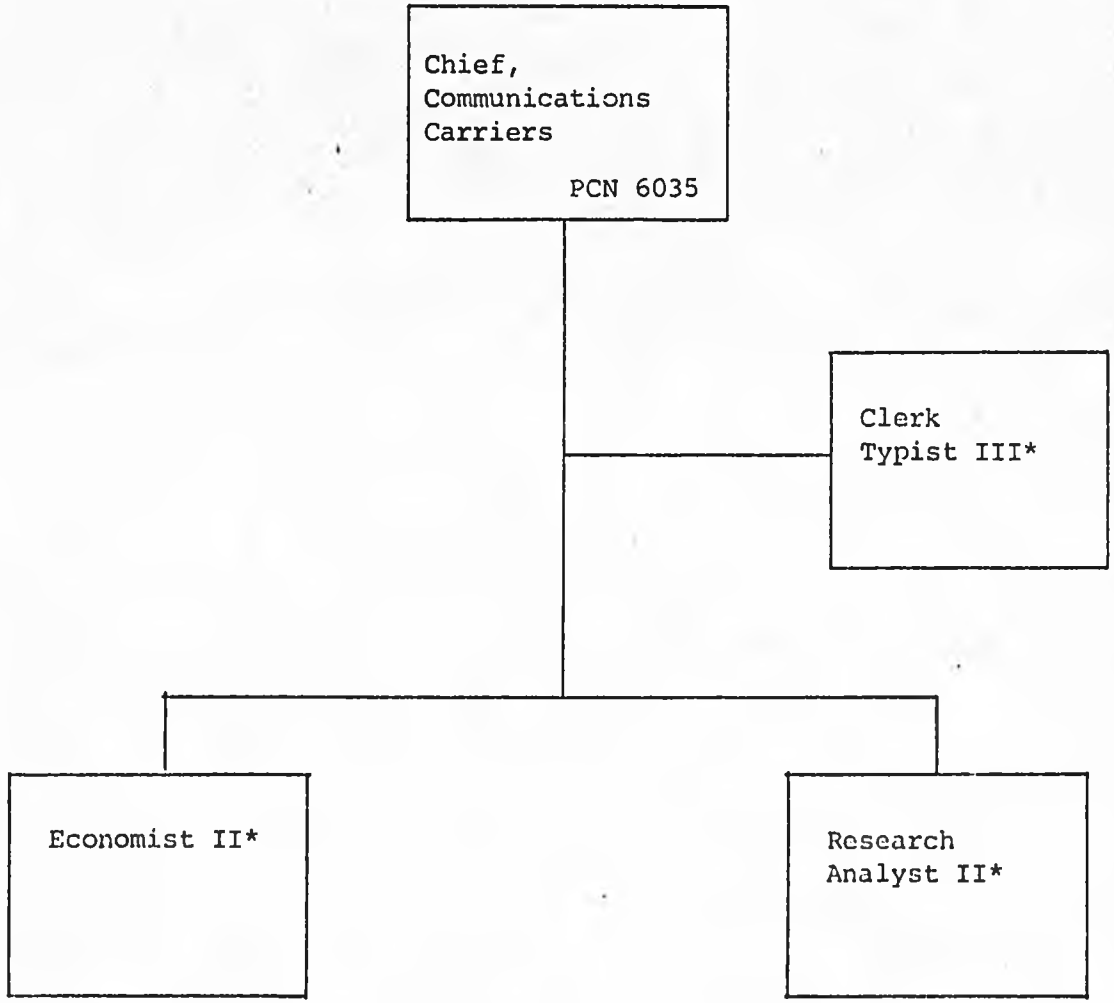
ALASKA PUBLIC UTILITIES COMMISSION

COMMUNICATIONS CARRIERS ORGANIZATION CHART



*New position requested.

PRINCIPAL PROGRAMS IN COMMUNICATION CARRIERS

COMMUNICATIONS ACT REWRITE

Congress and the Administration are currently considering amending the Communications Act of 1934, the legislation that created the Federal Communications Commission. Four bills have been introduced, two in the Senate and two in the House, and the Administration is aggressively promoting its own proposal through the National Telecommunications and Information Agency.

Some of the proposals would drastically alter the arrangements under which telephone companies are interconnected. Specifically at issue is the division of toll revenue between long distance companies and local companies. One proposal is that the present system of toll settlements be replaced by a system of "access charges".

Just as the viability of telephone service in Alaska is sensitive to specific toll settlement arrangements, it would be similarly sensitive to specific access charge or other arrangements. It is essential that the APUC monitor rewrite progress and provide input as appropriate.

TOLL RATE DESIGN

In considering Alascom's request for a permanent general rate increase (Docket U-78-4) the APUC has elected to separate the issue of toll rate design and first consider the

question of an "across the board" rate increase. The first phase of the proceeding is expected to reach a conclusion in the near future and the Commission will soon begin consideration of rate design.

Rate design is the process whereby, having determined the utility's overall revenue requirement, the Commission determines specific rates for specific services. Toll rate design answers such questions as whether a call from Anchorage to Iliamna should cost more than a call from Anchorage to Juneau, considering that the distance is smaller but the cost of completing the call may be greater.

Toll rate design is a very complex matter and will require a great deal of attention by the Section as well as the services of one or more consultants.

RURAL TELEPHONE DEVELOPMENT

Although telephone service is generally available to all Alaskans, many villages are served by only a single telephone. In the past few years, few companies have applied to the APUC for certification to provide local exchange service in villages, and a small number of villages are presently receiving such service.

Local exchange operation in a village is, unfortunately, an economically marginal operation. The viability of a local exchange company is very sensitive to the toll settlements arrangements (or access charge arrangements that may be instituted by a

Communications Act rewrite) in effect. To insure continued rural telephone development, it is essential that the Commission, through this Section, monitor the progress of rural telephone developments and the economic health of the small local exchange companies.

STATE NETWORK DEVELOPMENT

As the State's telecommunications needs grow, so its telecommunications network must grow to meet those needs. The network must provide a sufficient number of circuits of adequate quality, and in addition, the circuits must be reliable.

The network will meet needs only if it is developed in accordance with good engineering practice. To insure proper network development, the Section must, with the support of the Engineering Section, monitor the process.

~~PRESIDENT~~ JERRY L. HOOK

OWNER JERRY L. HOOK

ASCE strongly supports efforts to assure the public health, safety, and welfare through the competent practice of engineering, but we do not recommend mandatory additional requirements for relicensing at this time. We believe that such a requirements at this time would not result in overall strengthening of the system of engineering licensing and could be counterproductive.

There is no record proving that the present licensing procedures are not providing adequate protection for the public.

Our licensing requirements successfully measure the qualification of registrants to offer services to the public in accordance with the Model Law and Model Rules. However, the competence of the applicant depends on how he or she uses those qualifications. This is much more difficult to evaluate. We rely on:

a. the registrants' integrity and ethics not to accept those assisgnments for which the engineer is not competent; and
b. on the profession to monitor the engineer's performance, and
c. on the registrantion boards to consider license revocations for unethical and unprofessional work.

This is as it should be and these processes are serving the public's best interest.

Re-examining the engineer in fundamentals will not establish competence. Also, keeping a record of the number of hours devoted to professional development will not establish competence. Adequate procedures for determining the registrant's competence and use of sound judgment are very complex. To administer such complex procedures would be extremely difficult, if not actually impossible.

Although ASCE does not favor additional requirements for renewal of licenses at this time, we currently support licensing of engineers and insuring their competence in the following ways:

a. Nearly 90 percent of ASCE members in the United States are licensed as Professional Engineers or Engineers-in-Training.

b. Licensure is a requirement for admission to membership in ASCE at the grade of Fellow.

c. A four-year degree in engineering is a requirement for advancement to higher grades of membership in ASCE.

an important hallmark of a profession is acceptance by the members of that profession of responsibility for the education and training of those people preparing to enter its practice, as well as for their continuing professional development.

In view of this responsibility and the special requirements of civil engineering practice, the American Society of Civil Engineers acknowledges the need to devote a substantial portion of its energy and resources to civil engineering education. In addition, as members of the American Society of Civil Engineers, it is the responsibility of individual practitioners to participate directly in both on-campus and off-campus educational activities and to provide substantial economic and other support for professional education and training.

e. ASCE designs and conducts Continuing Education courses for engineers and issues Continuing Education Units of credit to those who complete the courses.

f. ASCE sponsors and conducts innumerable educational conferences for engineers annually.

g. ASCE publishes 15,000 journal pages of new civil engineering literature annually for the continuing education of engineers.

We are convinced that the membership of ASCE would experience no difficulty in meeting requirements which might be established for demonstrating continuing competence as a criteria for relicensure. This matter does not give us reason for concern. However, we are concerned with the fact that only about one-third of the total engineering population hold valid professional licensure. And while about 65 percent of the civil engineering population are licensed, only about 28 percent of the remaining engineering population are licensed. We believe it is in the public interest that all practicing engineers be licensed and that priorities in improving registration laws be given to:

1. modifying the Model Law so that persons who are responsible for performing professional engineering work in industry and public and private institutions and agencies are required to be registered in the state of their residence;

2. increasing efforts to license all practicing engineers; and

3. increasing efforts toward the enforcement of Engineering Practice Acts as they now exist.

We believe that increasing the percentage of engineers who are licensed is more important to the public welfare than adding more requirements for those currently licensed. As the above steps are effected, the demonstration of continuing proficiency for relicensing should be considered as a refinement to engineering registration laws.

d. Responsible charge of engineering work is a requirement for advancement to higher grades of membership in ASCE.

e. ASCE designs and conducts Continuing Education courses for engineers and issues Continuing Education Units of credit to those who complete the courses.

f. ASCE sponsors and conducts innumerable educational conferences for engineers annually.

g. ASCE publishes 15,000 journal pages of new civil engineering literature annually for the continuing education of engineers.

We are convinced that the membership of ASCE would experience no difficulty in meeting requirements which might be established for demonstrating continuing competence as a criteria for relicensure. This matter does not give us reason for concern. However, we are concerned with the fact that only about one-third of the total engineering population hold valid professional licensure. And while about 65 percent of the civil engineering population are licensed, only about 28 percent of the remaining engineering population are licensed. We believe it is in the public interest that all practicing engineers be licensed and that priorities in improving registration laws be given to:

1. modifying the Model Law so that persons who are responsible for performing professional engineering work in industry and public and private institutions and agencies are required to be registered in the state of their residence;

2. increasing efforts to license all practicing engineers; and

3. increasing efforts toward the enforcement of Engineering Practice Acts as they now exist.

We believe that increasing the percentage of engineers who are licensed is more important to the public welfare than adding more requirements for those currently licensed. As the above steps are effected, the demonstration of continuing proficiency for relicensing should be considered as a refinement to engineering registration laws.

IV SUNSET LAWS

1. History and Current Status

"Probably no single act has had a more profound influence on the present status of engineering and land surveying Boards than the enactment during the past two years of the Sunset Laws." These were the words used in a report of the Public Information Committee of the National Council of Engineering Examiners (NCEE) to express their concern over legislation which has been enacted in 30 states, as of July 1978.

A Sunset Law is a state statute specifically aimed at improving the accountability of state agencies through mandatory periodic review. Should an agency (which would include entities such as departments, divisions, bureaus, commissions, councils, and boards) fail to justify its continued existence, its programs would automatically terminate unless recreated by legislative action.

Proliferation of the Sunset Laws has been a response to the public's disillusionment with the continued existence of defunct agencies with their attendant costs. The positive results anticipated by these laws are: 1. forcing a legislature to perform its often-neglected oversight responsibility; 2. shifting the burden of proof to an agency to show that it is truly performing a public service; 3. requiring public hearings on extending agencies so that citizen and consumer groups may have a voice; 4. providing for the automatic termination of those agencies which don't measure up.

Engineering is but one of the many professions, trades, and commissions affected by the Sunset Laws. While their enactment and proper implementation are admirable there is a latent concern over whether some deleterious effects may be experienced by the engineering community. NCEE's Public Information Committees also has this to say:

"It is clear that with the advent of Sunset Legislation, it will be incumbent upon regulatory agencies to justify their existence. While it is not anticipated that engineering registration boards will encounter difficulty in convincing legislators of the need for their continuance, there is much concern about inadvertent lapses, abolishment of old laws and their replacement by new ones, and the impact on 'grandfather' clauses and comity among the states."

ENGINEERS MAY BE AFFECTED

Of greatest interest and concern to engineers is that the regulation of engineering may be swept along with the current legislative tides and that engineers will become increasingly embroiled with:

(a) The definition of professional engineering as defined in the NCEE "Model Law",

(b) The need of proof of continued competence as a requirement for license renewal,

(c) Zero-based budgeting for the State Boards of Examiners,

(d) Federal licensing as a possible answer to comity.

At this time of Sunset Law generation and application in certain stages, it is imperative for engineering managers and the practicing engineer to be aware of the potential effects these laws may have on the technical operations of both the corporate and private practice of engineering. Some aspects of the implications of these laws follow.

A BROADER DEFINTION

A typical Sunset Law is a state statute which has as its fundamental concept the improvement in accountability of the various agencies and entities through which state government is conducted. The laws generally provide for a periodic review and performance audit of the group with automatic termination unless there is re-authorization by the State Legislature.

The format of these laws is generally similar: purpose of the statute, identification of the agencies to be audited, dates of automatic termination, nature of the audit and time between audits, e.g. life-span of the agency. Many statutes cite the authorizing statute for the agency, which automatically terminates at the time the agency ceases to exist.

HISTORY OF SUNSET LEGISLATION

April 22, 1976, was the date of the first Sunset Law. This was passed in the 50th General Assembly of the State of Colorado. Other states followed in quick order: Florida, June 17, 1976; Louisiana, July 30, 1976; Alabama, August 24, 1976. The movement proliferated to the extent that as of June, 1978, a total of 30 states had enacted similar laws.

In drafting the Sunset Statutes some states grasped the opportunity to apply zero-based budgeting to their agency operations. In effect, the budgets should not automatically be continued, but should be built from scratch each year with every item justified. Additionally, legislation was directed in some states toward a requirement of continuing education courses as proof of competency for license renewal. (Note: Iowa already has such a requirement in its statute regulating the practice of professional engineering. Iowa Senate Bill 312, New Laws 1977, page 217.

A wide range of agencies and occupations is covered under the various Sunset Laws. Colorado, for example, put 39 agencies under its Sunset Law including those responsible for chiropractors, cosmetologists, collection agencies, and short-hand reporters. Other states have fewer agencies covered, many have more. Indiana includes 395 under its law! With professional engineering being but a tiny part of the whole that occupies the attention of the legislator, the need for close monitoring of these laws is apparent.

COMMON ELEMENTS IN THE LAWS

While the 30 state statutes have differing language, most have common elements such as the following:

1. The Automatic Termination of the Agency. Usually the terminal dates are staggered by groups of agencies.

2. The Performance Audit. The audit is usually performed by various means; by a House-Senate committee, or by an oversight or standing committee. The burden of proof rests with the board or agency which must justify its existence to show that it is performing a vital public service.

3. Public Hearings. Testimony is received from (a) the public; (b) a department responsible for regulating the agencies; (c) the agency itself. The key words in most legislation read to this effect: "(the agency) shall have the burden of demonstrating a public need for its continued existence and extent to which a change in type or transfer may increase the efficiency of administration or operation of the agency."

4. Legislative Action. The legislature is forced to join in the procedure to perform its often previously neglected oversight responsibilities.

5. Fixed Agency Life. Provisions are made for the maximum life of the entity between reviews - typically 6 years.

Note should be made that most states provide for orderly shutdown and disposal of the assets of those agencies which are not reinstated.

A SAMPLE OF AN AUDIT

Criteria for the performance audit vary significantly from state to state, but Florida's statute has often been used as a good example:

Section 5. In determining whether to reestablish a program or function, the Legislature shall consider the following criteria:

(1) Would the absence of regulation significantly harm or endanger the public health, safety, or welfare?

(2) Is there a reasonable relationship between the exercise of the state's police power and the protection of the public health, safety, and welfare?

(3) Is there another less restrictive method of regulation available which could adequately protect the public?

(4) Does the regulation have the effect of directly or indirectly increasing the costs of goods or services involved, and if so, to what degree?

(5) Is the increase in cost more harmful to the public than harm which could result from the absence of regulation?

(6) Are all facets of the regulatory process designed solely for the purpose of, and having as their primary effect, the protection of the public?

Other measures that are mentioned are:

(7) What is the efficiency of the formal complaint action?

(8) What is the extent to which changes are necessary in the existing laws to adequately comply with the above factors?

There is the political consideration in any administration of these laws. Specifically, there are fees of various sorts related to the licensing procedure and since these are income-producing entities, that in itself will no doubt have a bearing on decisions.

Sunset Laws represent a new legislative concept, and it is too early to predict with any degree of certainty the effect they may have on existing engineering registration boards. In Colorado, which had the first Sunset Law, engineering has not been audited. Two agencies in the state were abolished; two were combined; two transferred; two reactivated; and five extended for one year. Both the Courts and the Governor became involved in some of the decisions leading to the foregoing. In Nevada, meanwhile, the Legislature failed to reinstate the engineering law and enacted a new law in lieu thereof. The old board was consequently abolished and the Governor subsequently appointed a new Nevada board.

A review by a Montana state legislative committe in late 1978 concluded that engineering and land surveying registration functions should be continued, pro tem.

Perhaps a better idea of what may be expected may be seen in the words of the Sunset Research Director, Department of Regulatory Agencies, State of Colorado: "Probably the major useful effect of Sunset is the agencies' anticipation of the potentially critical reports the process can produce. Files suddenly become better organized, records better kept; meetings are longer and more oriented to the public interest. The threat of termination is not very real. We think that the Sunset process is an effective way of improving legislation, but it seems to be happening more internally on agency and executive branch initiative than through major legislative changes."

IMPLICATIONS FOR THE PRACTICE OF ENGINEERING

The impact that these laws may have on the profession of engineering were touched upon by J.G. Johnstone in addressing the February, 1978, NSPE Intersociety Meeting on Registration in Chicago. He stated, "The problem with Sunset review is the same problem that has been faced by other inadeuqately comprehended 'systems' with a catchy name. The essence of Sunset review is evaluation - program evaluation and organizational and administrative evaluation of an agency in an holistic context. The real risk is that governments will adopt the name Sunset but leave out its essence, and thereby discredit the name as other systems have been discredited.

"There is no doubt that consumer-advocate and government reform-oriented organizations such as Common Cause and the United States Chamber of Commerce will continue to press unrelentingly for Sunset Legislation. It is imperative, therefore, that the State Engineering Registration Boards be prepared to submit to state reviewing authorities a comprehensive report justifying and supporting their continued existence. Failure to do so may result in the deregulation of the professional practice of engineering and land surveying, which course of action may operate to the detriment of the public."

It appears that four key areas will play a part in determining whether examining boards are re-established:

- Zero-based Budgeting
- Continuing Education
- Adoption of NCEE "Model Law"
- Federal Licensing in Answer to Comity

Zero-based budgeting was a cornerstone promise of the present Federal Administration and was endorsed by Governor after Governor. Involved here is a delicate balance of income vs. service to the public and political considerations will play an important role.

Continuing education is being considered as proof of continued professional competence. The concept of such a proof as a prerequisite to renewal of licensing has been argued for years. The NCEE Public Information Committee report emphasizes the point that continuing pressures will force consideration of proof of competence into the Sunset Law audits. The State of Iowa has taken steps in this direction. In 1977 it adopted a continuing education law which mandates continuing education as a requirement for license renewal for all state licensing boards. A "blueprint" for implementing this legal requirement has been prepared and was reported upon by John M. Littschwager in the Annual Conference Proceedings - 1978, American Society for Engineering Education.

The major problems in the mandatory continuing education approach fall into two areas.

- The difficult attempt to express continuing education requirements in terms of widely-recognized and uniform measurement units.
- The need to establish guidelines, including guidelines for the monitoring of licensee participation, and for the approval of programs that qualify under the continuing education requirements proscribed.

The approach to a solution has been to conceive the "Professional Development Hour" (PDH). This unit is then defined in recognized educational units such as university credit, Continuing Education Units (CEU), professional practice, etc. Record keeping, multiple branch registration, and many other variables are covered. There are several implications in the continuing education approach:

Implication for Industry - This plan could be adopted by many states and spread like wildfire. Industry would be forced to allocate resources - dollars and time - to meet such an engineering competence requirement.

Implication for technical societies - They would have to get aboard the bandwagon by getting their continuing education programs legally sanctioned.

Implication for the practing engineer - He would have to allocate time and effort to satisfy the legal requirements.

Adoption of NCEE "Model Law" - The definition of professional engineering under the "Model Law" includes the work done on consumer products. Adoption of such a defintion would negate the so-called "manufacturers, exemptions" in the state statutes that have such exemption and/or would be tantamount to mandatory registration by those professional engineers in industry and education who would fall within the defintion.

Only one state - Montana - has such a statute at the present time and enforcement has been minimal since its administration is so complex. Industry - in general - is opposed to the adoption of the Model Law Definition. The appeal at the time of a Sunset Audit may be on the side of mandatory registration or licensing of professional engineers.

Federal Licensing in Answer to Comity - Uniformity among the state board requirements for licensing is practically non-existent since the wording of the statutes varies so much. Uniform examinations are almost "universal" but other requirements show no such uniformity. While this may be only a distant threat, the Sunset Law Audits will focus upon and amplify these differences so that the "Appeal" of Federal regulation (licensing) will become more acceptable to those concerned with comity and multiple licensing. The problems a corporation has in moving engineering personnel from state-to-state would be eliminated with Federal licensing.

TRACKING THE FUTURE WITH EPIC

The Sunset Laws are the result of legislative pressures and actions - largely consumer-oriented. The laws vary and action is not static. Being aware of these is a first order of business and a tabulation has been maintained by EJC to provide a ready reference. Meanwhile, miscellaneous bills are still in various legislative hoppers. The EJC Engineering Practices Information Center will continue to track the status and action on Sunset Laws and related education.

NOTE: The information in Section 1, above is quoted from the EJC Engineering Practices Information Center Bulletin #1, August 1978, with the addition of information concerning review results in Montana. The following tabulation, supplementing this report, is also taken from this source.

(6) **Indiana**—Governor may delay the date on which any agency program is abolished for one year.

(7) **Kansas**—Very complex law

(8) **Louisiana**—Termination noted since Engineering Board is under Dept. of Transportation & Development. Zero base budget.

(9) **Maine**—Chapt. 683 P.L. 1978 House Bill 2229 repeals MRSA Sec. 505 enacted by P.L. 1977 Chapt. 554, Sec. 1.

(10) **New Mexico**—Chapt. 189-Laws 1978-H.B. 237, P. 621—Renews State Board of Registration for Professional Engineers for a period of 6 years beginning July 1, 1978. Approved March 6, 1978. *Continuing education* considered as a requirement. The Board could not agree on procedures.

(11) **Oklahoma**—Adds 20 Agencies to be reviewed with Legislature at time of new term for Governor.

(12) **Rhode Island**—Hearings must be 3 months prior.

(13) **South Dakota**—House Bill 1355-New Laws 1978-Page 339 applies "Sunset" principles to rules and regulations.

(14) **Virginia**—Very complex requirements. Final Termination 7/1/87.

DEFINITIONS

1. **Agency**—shall mean to include all departments, divisions, bureaus, commissions, councils and boards, or like governmental units or subunits regulatory in nature or otherwise.
2. **Comity**—kindly courteous behavior; the informal and nonmandatory courtesy sometimes referred to as a set of rules to which the courts of one sovereignty often defer in determing questions (as of jurisdiction or applicable precedent) where the laws or interests of another sovereignty are involved.
3. **Lead time**—Time at which review or audit shall begin prior to next meeting of legislature or termination date of the agency.
4. **Performance audit**—shall mean the same as operational audit.
5. **Termination**—shall mean the end, abolishment or annulment of any agency or the act of causing the existence to cease.

2. Justification for State Registration Laws

A Position Paper Proposed by the Committee on Registration of Engineers. Adopted by the Board of Direction October 15, 1978.

Since Wyoming adopted a law in 1907 to register professional engineers, all states have enacted similar legislation to establish a relatively uniform registration process. The Board of Direction of the American Society of Civil Engineers, on October 27, 1973, approved a policy by which it, "endorses, supports, and promotes the registration of Professional Engineers, as being in the best interest of the public." The Society agrees that the purpose of registration laws is the protection of public health, safety, and welfare; that this purpose is best served by requiring a demonstration of education, special knowledge and skill, and experience as the necessary qualifications for the practice of engineering and land surveying. Since the public does not ordinarly have the ability to judge the competence of engineers and land surveyors, it has elected to delegate this responsibility to the individual State Boards of Registration.

A growing number of State Legislatures have enacted laws, called Sunset Laws, which have the general purpose of abolishing outmoded and unneeded governmental agencies and programs. Boards of Registration for Engineers and Land Surveyors, by inclusion in this group of agencies and programs, must justify their existence.

The ASCE supports, in principle, the process of periodic review of government agencies and programs including Boards of Registration of Professional Engineers and Land Surveyors. The Society is confident that the engineering profession, together with the individual State Boards, will demonstrate to State Legislatures that registration is in the best interest of the public; in fact, that it is essential to the protection of the public health, safety and welfare in matters pertaining to engineered works and systems.

Therefore, the Society encourages all its members to actively assist and support Boards of Registration in their efforts to demonstrate the value to the public of the Registration Laws. The intent of the laws is not to protect the profession but to identify those who possess the necessary qualifications to practice Engineering and Land Surveying. While it is essential for the states to exercise their authority through the legislatures and the courts, and to view the consequences of their laws, they are not in a position to set standards of technical competence, or control the various levels of practice, nor is the general public able to exercise

this responsibility. It is incumbent upon the members of the Engineering Profession to demonstrate that they are qualified to set standards of education and experience for registration, that they can impose rules of professional conduct and that they are in the best position to maintain a continuing watch over the technical competence of practicing engineers and land surveyors, in the best interest of the public.

Therefore, it is the position of The American Society of Civil Engineers that:

1. Professional registration is for the sole purpose of protecting the public safety, health and welfare;

2. Benefits do accure to the public from registration laws and consumer protection is provided by maintenance of standards of competence and rules for professional conduct;

3. Registration laws promote efficiency in the regulation of engineering and land surveying practice;

4. Direct use of the courts or membership in engineering societies do not provide comparable coverage and effectiveness as do registration laws;

5. The costs of regulation by State Boards of Registration are more than offset by the fees, and, therefore, the Society reaffirms its policy of October 27, 1973 on Registration of Engineers, and urges all its members to assist State Boards of Registration in demonstrating to their Legislatures the value and necessity of continuing the individual state registration laws in the public interest.

Issues Related to Licensing of Architects, Engineers and Land Surveyors

Ralph E. Fadum
Dean Emeritus
North Carolina State University
at Raleigh

January 1979

1. Should there be legal requirements to regulate the practice of architecture, engineering and land surveying?

Recognizing that any law that regulates one's right to work abridges a fundamental freedom, we understand that there must be compelling reasons to establish boards of registration the purposes of which are to discriminate between those judged to be competent and those not to be so, and thus, to regulate one's right to practice. Foremost among such reasons is the objective to protect the safety, health and welfare of the general public by excluding from among those who represent themselves to be practitioners, those who are competent and those who are not so.

The lay public does not in general have the capability of determining whether or not a person who represents himself to be a practitioner in these fields is, indeed, qualified and competent to render the required service. The consequences of retaining an incompetent practitioner can result in the impairment of the health, safety and welfare of the client. Because of improper design a structure may collapse, because of faulty surveys properties may not be properly recorded, and because of improper planning aesthetic values of the environment may be lost. Thus, there is a need to maintain boards of registration to regulate the practice of architects, engineers and land surveyors.

Our investigation has assured us that there is strong support for the continuance of the N.C. State Board of Registration for Professional Engineers and Land Surveyors and for the N.C. State Board of Registration for Architects. This support comes from those affected by the authority of these agencies in North Carolina as well as throughout our fifty states and five territories in each one of which a similar board exists, and with many of which we have reciprocal and comity agreements. Indeed, North Carolina would be greatly disadvantaged in securing competent professional services from practitioners from other states and territories and practitioners from North Carolina would find it much more difficult to practice outside our state borders if it unilaterally abolished our licensing boards in these fields.

Therefore, we strongly recommend that the Board of Registration for Professional Engineers and Land Surveyors and the Board of Registration for Registered Architects be continued.

2. Should there be a legal requirement for determining professional competence for relicensure?

In addressing this issue, it appears desirable first to distinguish between registration or licensure and certification, both of which are used in the credentialing process. It is our understanding that licensure is a process by which a state certifies those persons who may practice, the purpose being to protect the public from unqualified practitioners. Certification on the other hand is a process by which professional societies identify practitioners of the specialties served by those societies. Certification has no legal basis while licensure has. Here, we are concerned only with licensure and, in particular, relicensure.

For entry into a profession as a licensed practitioner, the candidate submits to examinations primarily designed to determine whether or not he is qualified by knowledge and experience to meet minimum requirements to practice. These examinations cannot determine his competence. The very best formal education does not guarantee competence. Competence depends on how one uses his qualifications and this is very difficult to measure objectively.

There is no debate concerning the need for a professional to maintain his competence. The issue is whether or not there should be a legal requirement with respect to insuring this. An examination of the issues concerning legal requirements to seek to insure that a licensed practitioner has maintained his competence and entailing some form of testing or record keeping leads us to conclude the following.

Competence is a very subjective matter and it is very difficult to measure. It is difficult if not impossible to legislate learning. The amount of formal education, the number of short courses attended, and the number of books read give no assurance of the benefits gained by these activities. Thus, a record of these activities would not be very useful as a measure of one's competence.

To establish a legal requirement for relicensure would discriminate against the licensed practitioner who represents a relatively small percentage of all practitioners. Thus, it might deter some who are not registered from registering. This would be counterproductive in our effort to increase the percentage of practitioners who are licensed. We believe that increasing the percentage of practitioners who are licensed is more important to the public welfare than adding more requirements for those currently licensed.

There is no evidence to demonstrate that there is a need to establish legal requirements for relicensuring. A practitioner knows

that it is in his own self-interest, not only to maintain his competence, but also to improve on it. His livelihood depends on it. He therefore, has a great deal of incentive voluntarily to maintain and improve his competence.

We believe the public interest is best served when the practitioner accepts as he does now responsibility for his own professional development. Our educational institutions and professional societies have a good record of providing opportunities for practitioners to maintain and update their competence. Practitioners on the whole have made good use of these opportunities for professional growth. If the extent of the voluntary effort that is being made by practitioners to keep abreast of developments were known, it is most likely that one would conclude that there is no justifiable need for establishing legal requirements for relicensure.

Administering mandatory standards to insure professional competence would be most difficult because of the great variety of specialties in which these professions are engaged. For example, it has been estimated that there are over one hundred different engineering degree programs offered by U.S. engineering colleges alone. Here it should be noted that it is only because there are many common bodies of knowledge required for entrance into these professions that the initial examinations are valid. As time goes on, however, the degree of commonality diminishes and the point is reached when examinations become meaningless.

It should be noted that state licensing statutes give boards extensive disciplinary control through the exercise of the police powers of the state. We are persuaded that the present disciplinary provisions provided by the statutes as well as those prescribed by professional organizations serve to protect the public to the maximum extent practical and affordable.

In consideration of these observations, it is our recommendation that legal requirements for relicensure not be enacted. We believe that the public interest is best served when the architectural, engineering and land surveying professions accept, as they do now, responsibility for their own professional development.

3. Should exceptions be made to allow certain categories of practice to be exempt from compliance with licensure requirements?

The current law provides that "any person who shall practice or offer to practice engineering, land surveying or architecture in North Carolina without first being registered in accordance with the provisions of the law shall be guilty of a misdemeanor." After having established this requirement, however, the statutes provide for the following exceptions by stating that nothing in the statute shall be construed to prevent or affect a number of categories of practice. These categories include practice by members of the armed forces or employees of the government of the United States while engaged in practice solely

for the government on government owned works and projects, engaging in practice under the responsible charge of a professional or registered engineers, the practice of so called internal engineering by a person, firm, or corporation engaged in manufacturing, processing, or producing a product including the activities of public service corporations, public utility companies and authorities, state agencies, railroads or membership cooperatives, etc. Because of exclusions such as these, we find nationwide, in engineering that approximately 30% of engineers are licensed. Twenty percent voluntarily obtain licenses, whereas ten percent obtain licenses in order to comply with legal requirements relating to their practices. Thus, it can be seen that because of exceptions that are made only a relatively small number of engineers are required to be licensed in order practice their profession.

We believe that the principle that unqualified persons should be prevented from practicing is sound and in the public interest. Establishment of an effective licensing program is a means toward that end. Accordingly, we recommend that registration be required of all individuals performing architectural, engineering and land surveying functions or using titles that represent them to be architects, engineers or land surveyors. In substance, it is recommended that all exemptions be removed so that those who are responsible for performing professional architecture, engineering or land surveying in industry and public and private institutions and agencies be required to be registered in the state of their residence.

4. What, if any, division or spheres of responsibility should be delineated for the architect and engineer?

Engineering involves a great variety of specialty fields including for example, electrical engineering; civil engineering including sanitary engineering, transportation engineering, structural engineering, soil mechanics and foundation engineering; nuclear engineering; industrial engineering; and, mechanical and aerospace engineering. Indeed, some two dozen specialty fields of engineering are commonly recognized. Furthermore, within each of these fields, engineers perform a great variety of functions, including planning, design, production or construction, operations, maintenance and technical sales. Architecture, likewise, includes not only different specialty fields but functions, such as planning, design, supervision of construction, etc.

Some of the specialty fields in which architects and engineers are engaged do overlap. Others fall clearly within the responsibility of one or the other group. Similarly, some of the functions performed by the architect and engineer are common. Others are unique to each profession. In those fields and functions that involve joint participation by the architect and engineer, a decision needs to be made as to who should have prime responsibility. In such instances, we recommend that any legal provisions be made flexible and that it be left to the professionals involved to determine which of the professions should have prime responsibility.

With respect to licensing procedures, clearly the architectural profession should be responsible for establishing requirements for registration for architects just as engineers should be required to establish qualifications for registration for engineers.

Abstracts of Reference Materials Related to Issues Concerned with Relicensing of Professional Engineers for the N.C. Governmental Evaluation Commission

---

1. Memorandum from Charles Willis, P.E., Secretary Consulting Engineer Council of North Carolina (an affiliate of the American Consulting Engineers Council) to Paul Vick, Chairman, N.C. Governmental Evaluation Commission dated October 18, 1978.

   As related to continuing education for relicensure the emphasis should be placed on continuing professional competence rather than on "continuing education." Education in itself is not sufficient to insure competence, and it is unrealistic to lead the public to believe that their interests are protected by requiring continuing education.

2. Memorandum from B.A. Harrell, Counsel for PENC to PENC Officers, undated.

   Continuing Education courses should not be a pre-requisite to renewal of licenses.

3. Paper entitled "Continuing Education - A Requirement for Recertification," by Monroe W. Kriegel, P.E., Oklahoma State University (prepared for a Southern Zone Meeting of N.C.E.E.) dated April 7, 1978.

   Registration or licensure is a process by which individual states identify persons for inclusions in their registers of professional engineers and certify that they may practice engineering. The purpose is to protect the public from unqualified practitioners. Certification is a relatively new process by which some technical societies identify individuals as practitioners of the specialties served by those societies. Registration has a well defined educational base as an entry point into the profession. Certification, on the other hand, is a process to define specializations of practice and to identify for the public and employers qualified practitioners of that specialty. Recertification is a service of the society and serves as an additional credential of the individual. The motivation for recertification is peer recognition. Certification and recertification have no legal basis while licensure and relicensure have. Thirteen engineering related societies operate certification and recertification programs. The admission requirements are almost always below those of the minimum educational requirements for entering the registration process. (None of the founder societies such as ASCE, ASME, IEEE, etc. have

certification programs, but several have this matter under consideration.)

The big question is how to establish a basis for measuring continued professional competence as a justification for relicensure. The real issue is whether or not the registrant has remained professionally competent. Continuing formal education is the first but only one aspect of maintaining continued competence. The problem with continuing education is the lack of an acceptable unit of measurement. (A CEU equals ten contact hours of participation in an organized continuing educational activity under responsible sponsorship, capable direction and qualified instruction.) The second basis for relicensure would involve furnishing a set of credentials. This would be difficult to quantify. A third method for relicensure would be to simply accept the requirements for recertification as established by the professional engineering societies as a basis for relicensure. The examination and recordkeeping would be difficult and expensive. It could be recalled, however, that only a very few societies have these certification programs.

There is one certification program that has been long established. This is the specialty certification in environmental engineering offered by the American Academy of Environmental Engineers. The basis requirements for certification are:

1. Engineering degree or equivalent

2. Engineering license

3. Eight years of environmental engineering experience following graduation

4. Written examination

5. Oral tests

A fourth method, which Kriegel feels has great merit, is the one under study by the American Institute of Architects. A person must be a registered professional architect in order to be qualified for membership in the American Institute of Architects. Thus, he has essentially satisfied the licensure and basic certification requirements when he enters the Institute. AIA is working hard on the development of a recertification program providing a mechanism for permitting an architect to remain a member of AIA but not being a requirement for a renewal of his license. Although continuing education is a large part of the requirement, there are other aspects involving self-studies, meeting attendance and demonstrated knowledge of recent "tools of the trade" in each person's particular area of specialty. What will finally come out is a jointly developed program in which certain interested educational institutions will be involved in providing facilities for retraining but actual teaching will be done by a combination of practitioners and

faculty. It is Kriegel's feeling that engineering needs to follow somewhat the same pattern but probably on an individual state basis rather than on a national basis. The leadership should be taken by the practicing professional engineers because they are the ones that have the most at stake.

In concluding his statement, Kriegel advises that NCEE should continue to resist pressures to legalize relicensure requirements. He points out that it can be well documented that professional engineering societies including all of the Founder Societies have large and rapidly growing continuing education programs that help members maintain professional competence. Universities also provide opportunities for professional growth. All of these programs reach both registered and non-registered engineers.

4. N.C.E.E. Preliminary Position Paper on "Continuing Professional Competence," dated August 1978.

Competence in the present context is referred to as being attained through basic ability and education, and then being developed by experience and continuing training and education, either formal or informal. The central questions are to what extent, if any, would mandatory CPC benefit the public, what would this cost the public, and if the public knew the true facts, would they vote to pay the cost? We should make clear at the outset that N.C.E.E. completely supports continued education and professional development and other aspects of CPC. It is our considered opinion, however, that no significant numbers of incompetent practitioners will be eliminated by mandatory CPC.

A great majority of professionals must continually develop their competence to survive in the market place.

There is no doubt that all professions need continuous upgrading. However, we believe that most engineers are doing this on a large and highly successful scale under the present voluntary system. If the magnitude of the voluntary effort were fully realized, it is likely that the public might well conclude that there is no justifiable need to increase their costs by creating new laws and regulations which would be required if we were to attempt to mandate and legally enforce CPC under the law. Indeed, it might have a negative effect due to the resentment and large scale dropping of licensing.

Another problem with mandating CPC is that engineering is such a diverse profession. Administering mandatory standards would be almost impossible. There are well over 100 different engineering degree programs offered by U.S. engineering colleges alone. Engineering is a vastly more fragmented profession than others, such as medicine, law, teaching, etc.

Another separate but inextricable related issue is the potential discrimination against licensed engineers. Of the approximately one

million engineers in the United States only 300,000 are registered by the state regulatory agencies. This low percentage is due to the exemption clauses written into the state statutes. The present system is a political fact of life. It represents the best current political solution which the public and legislatures have been able to develop. It would therefore seem discriminatory to apply further strictures on the approximately 30% of engineers who already take the trouble to become licensed, 20% voluntarily and 10% for private practice while imposing none of the 70% who remained unlicensed. To prevent such discrimination would require imposing CPC mandates on all engineers not just those who are licensed. Since the public at this point has not even seen fit to require licensing of all engineers, it is doubtful given all the facts they would want to spend the money to enforce additional mandatory CPC requirements on all engineers. This becomes even more doubtful if the public were truly informed on the probable cost of extending such a philosophy to cover all other licensed vocations and professions.

It should be noted that state licensing statutes give boards entensive disciplinary control through the exercise of the police powers of the state. We are persuaded that the present disciplinary provisions serve to protect the public to a maximum extent practical and affordable. A currently popular statement goes "if it ain't broke, don't fix it." Based on the foregoing discussion the following recommendations are offered:

1. Engineering societies should mandate for themselves a strong and intensive research and public relations program on CPC. A vigorous effort should then be launched on both the state and national level to disseminate the information to the public, to the consumers and to the state legislatures.

2. The societies should investigate and analyze the potential of programs under which one on a voluntary basis can obtain Continuing Educational Units through their journals.

3. The ECPD is the most logical entity to develop and implement an evaluation and monitoring system for the CEU value of CPC programs because of their long experience and status in this field.

This position paper will be sent to presidents of all engineering societies with a request that they place the topic on the agenda for their respective next board of director's meeting and give N.C.E.E, the benefit of their current thinking on the subject.

5. PENC Talking Paper on "Should Continuing Education be a Requirement for Renewal of Registration as a Professional Engineer or Land Surveyor?" dated September 26, 1978.

No system has yet been developed through which the requirement under the law will guarantee that the professional engineer or land surveyor

has done enough study to maintain specified degree of progress in his field. Systems under discussion have generally been considered impractical for several reasons. They are difficult and costly to implement. They rely on either self-evaluation or on an elaborate structure for assigning values to a multitude of educational programs and monitoring and recording progress and they still do not appear to guarantee competence. It is only because there are many common denominators in the initial process leading up to entrance into the profession that the early examinations are applicable. At later stages in the professional's career the differences in kinds of competence become greater. As time goes on the degree of commonality diminishes and the point is reached at which any examination becomes meaningless. We believe that the public interest is best served when the engineer accepts as he does now responsibility for his own professional development. The evidence that this is working well lies in the multitude of seminars, workshops and short courses that are sponsored by professional and technical societies, universities, community colleges, commercial organizations and attended by design professionals.

6. Paper entitled "The Mandatory Continuing Education Bandwagon - Should Professional Engineers Climb Aboard?" by Dr. Benjamin Shimberg, Associate Director, Center for Occupational and Professional Assessment, Educational Testing Services, publication not identified.

I think most professions would prefer to rely on the professional's own sense of responsibility for designing his own areas of competence. If one looks at what it would cost to mount and really carry out a comprehensive program of reassessment, the cost would certainly be staggering and perhaps prohibitive. The most incompetent, the least ethical, the most unprofessional practitioner would have no real difficulty staying in business because it is easy for him to meet mandatory continuing education requirements, and once he has done so, the law says he is competent. I would like to say that if you do not already have a mandatory continuing education law in your state, do not accept such a law as inevitable. Ask yourself: Do we need a mandatory continuing education law, and if such legislation is proposed, should we as a board work for its passage? A great deal of needless pain and suffering can be spared by seeking to discourage mandatory continuing education until the existence of a serious problem has been documented, and it has been determined that an education solution offers the best way of dealing with that problem. It is difficult if not impossible to legislate learning and its subsequent application.

7. Article entitled "Perils of Credentialism," by John Alden, New Engineer, October/November 1978.

Movements are building within engineering to promote various forms of credentialism. Most commonly advocated are specialty certification and changes in professional registration including eliminating the industrial exemption, permitting registration in specialties not now specifically covered by state laws, and requiring periodic re-

examination and registration on the basis of demonstrated continuing education or professional development.

Registration or licensing is the process by which governmental bodies at the state level in the United States qualify individuals to practice certain occupations and professions including engineering. The groups to be qualified are determined on the basis of their relationship to the health, safety or general welfare of the public.

Certification is somewhat similar to registration except that it is carried out by private professional organizations rather than by states.

Underlying credentialism in all of its forms, however, is the desire to protect the interest of the credentialed group by reserving certain kinds of work to it alone - and controling the entry of outsiders.

I am convinced that credentialist efforts to monopolize the kinds of work we now know as engineering are restricting those jobs to registered professional engineers and they will lead ultimately to the designation of a small number of positions legally reserved for professional engineers and the elimination of many jobs now carrying the engineering title.

Another way in which I can see credentialism backfiring is in the increased vulnerability of individual engineers to liability suits. Today, except in cases of gross negligence, it is the corporation that is liable and individual engineers are protected by industrial exemption.

The profession should also recognize the financial burden both registration and certification will have on the individual engineers. Requirements to participate regularly in formal continuing education would add appreciably to the engineer's cost in time and money.

8. Paper entitled "Continuing Education: Boon or Boondoggle," by Roy L. Baber, Jr., Executive Director, PENC, The Professional Engineer, November/December 1978.

Continuing education is a must for any professional but the need to require it for licensing is questionable.

Until we have evidence that the public is not being served well by the present system or until the authorities who are trying to develop a satisfactory and well accepted control system for continuing education succeed, it would seem best that we do not attempt to mandate continuing education standards as a condition for license renewal.

We should determine in precise terms how the present system fails to protect the public, what additional protection is needed, feasible and cost effective, and whether mandatory continuing education can provide that protection, and if so, the details of the plan that should be enacted by the legislature.

9. Letter from C.E. Vick, President, Kimley-Horn and Associates to Paul Vick, Chairman, N.C. Governmental Evaluation Commission, dated December 4, 1978.

I endorse the concept that the protection of the health, safety and welfare of the public requires that professional engineers and land surveyors maintain their competence. To my knowledge this is happening under the present system. If there is a problem (real or perceived), we need to identify the specifics and design a course of action to specifically meet the identified problem. If this evaluation commission feels strongly about continuing education, I would suggest that the legislature establish a study commission made up of members of the legislature, the board of registration, the professional at large, and the public. This study commission would have a specific charge to identify the problem or potential problems of the existing system and recommend specific changes to GS 89 C to correct the problem areas. Continuing education is an extremely complicated matter and should be treated with great care.

10. Letter, dated November 7, 1978 from Eugene Zwoyer, Executive Director, ASCE, in response to a letter from R. E. Fadum dated October 25, 1978.

ASCE has not developed positions on specialty fields versus broad, general P.E. registration, inclusion of public members on boards or combined versus separate boards of the various design disciplines. I believe that we would find widely diversified opinions within the membership on these subjects.

ASCE advocated professional registration as a requirement for all individuals performing engineering functions or using engineering titles regardless of employment in the private sector or private industry or public service.

11. Paper entitled, "Remarks to N.C.E.E. on the Occasion of Their 57th Annual Meeting," by Eugene Zwoyer, Executive Director, ASCE, August 6-9, 1978.

ASCE strongly supports efforts to assure the public health, safety and welfare through the competent practice of engineering, but we do not recommend mandatory additional requirements for licensing at this time. We believe that such requirements at this time would not result in overall strengthening of engineering licensing and it could be counterproductive.

There is no record proving that the present licensing procedures are not providing adequate protection for the public.

Our licensing requirements successfully measure the qualification of registrants to offer services to the public in accordance with the model law and model rules. However, the competence of the applicant depends on how he uses these qualifications. This is much more difficult to evaluate. We rely on the registrant's integrity and ethics not to

accept those assignments for which the engineer is not competent and on the profession to monitor the engineer's performance and on the registration boards to consider license revocations of unethical and unprofessional work. Re-examining the engineer in fundamentals will not establish his competence. Also, keeping a record of the number of hours he devotes to professional development will not establish his competence. Adequate procedures for determining the registrant's competence and use of sound judgment are very complex. To administer such a complex procedure would be extremely difficult if not actually impossible.

We believe that increasing the percentage of engineers who are licensed is more important to the public welfare than adding more requirements to those currently licensed.

We urge modification of the model law to remove all exemptions so that persons who are responsible for performing professional engineering work in industry and public and private institutions and agencies are required to be registered in the state of their residence.

12. Letter dated December 7, 1978 from Donald G. Weinert, P.E., Executive Director, NSPE, in response to a letter from R. E. Fadum dated October 25, 1978.

We are all anxiously awaiting the experience which will emerge from the Iowa approach, but it will probably be a year or more before that procedure can be evaluated. Iowa is the only state to date to have enacted a mandatory recertification continuing education procedure. NSPE concurs that it is a must for engineers to keep up-to-date in their fields of practice in order to serve and protect the public interest. However, our current policy is that this responsibility should be met on a voluntary basis with input from the professional and technical societies to assist the members in meeting this requirement. I enclose NSPE Policy No. 122-A to reflect our position. The practical administration problems in a mandatory program are enormous and costly.

13. NSPE Professional Policy Statement Number 122-A, Continuing Professional Development.

NSPE Professional Policy Statement 122-A on continuing professional development includes the statement "NSPE favors personal acceptance of responsibility by the engineer for professional development and is opposed to legislation that would require a licensed professional engineer to pass a written examination or to submit evidence of continuing education activities as a condition for a license renewal. Such legal requirements are not necessary to protect the public, are impractical, difficult and costly to implement and ineffective as a means of assuring competence to practice engineering."

14. Paper entitled, "Continuing Education - Boon or Boondoggle," by Milton F. Lunch, General Counsel, NSPE, Consulting Engineer, June 1978.

The theory behind the mandatory education program for lawyers, doctors, and now proposed for engineers is philosophically sound, but the author implies that there are practical matters that need to be considered. For example, what course content is acceptable, who would decide and how whether an engineer who attended a seminar learned from it or dozed the time away. A mandatory continuing education law cannot take into account the most important single methods whereby professionals obtain their competence - their day to day work. Is the cost of administering, controlling and enforcing a mandatory continuing education program worth the cost? In spite of all these questions and doubts, however, the basic theory that the professions have an obligation to prevent unqualified persons from practicing is still sound. There is a far simpler and more effective way to reach that goal. To do it, the state boards need the moral support of the profession and the financial means to support an effective enforcement program through a team of trained investigators.

15. Michigan Society of Professional Engineers Policy with respect to Continuing Education, unpublished.

MSPE encourages all professional engineers to maintain their competency through active practice and continuing education activities, including professional meetings and self-education efforts. MSPE believes that a mandatory continuing education program as a condition of re-licensing, is not cost effective nor in the public interest and will seriously divert resources from needed enforcement activities and to meaningless bureaucratic data gathering efforts.

16. Paper entitled, "Qualifications for Continued Practice," by Francis E. Holland, P.E., member, Iowa State Board of Engineering Examiners, contained in a compilation entitled "Trends in Engineering Education," NSPE - Intersociety Conference on Engineering Registration, Chicago, February 7-8, 1978 and published by NSPE.

In 1977, the Iowa legislature enacted the first mandatory continuing education law for all state licensing boards. The law directs that each board including the Iowa State Board of Engineering Examiners develop a plan and program to implement the requirements which become effective on January 1, 1980.

In general, requirements are expressed in terms of Professional Development Hours (PDH). One hour of acceptable professional development equals one professional development hour. It goes on to equate 400 hours of practice to 10 PDHs; one semester of university credit to 45 PDHs, etc. It then stipulates that 80 professional development hours are required each year, etc.

17. Letter dated January 2, 1979 to Ralph E. Fadum, P.E. from Morton S. Fine, P.E., L.S., Executive Director, N.C.E.E., in response to an earlier letter requesting comments concerning various issues related to the "Sunset Law."

With respect to recertification, the official position is reflected in the enclosed statement. This position paper (reference no. 4) has recently been circulated to all engineering societies who are members of ECPD, EJC, and ACE for their comments. Few responses have been received to date, but when all responses have been received and evaluated the N.C.E.E. Board of Directors will probably issue a revised or final paper on this matter which I am sure you will see in due course.

18. "The Registration of Professional Engineers and Land Surveyors in the United States," N.C.E.E., 1978.

This is a very good compilation of matters related to registration in general. Included is the following statement concerning continuing professional development.

At the present time, state boards and engineering societies are discussing continuing education/professional development as a requirement for registration renewal. Discussions in this area have centered on whether basic requirements should be established for continued practice and whether, if established, the requirements should be mandatory or voluntary. Also, under discussion is the determination of a uniform method of measuring, evaluating, and reporting continuing professional development activities.

Iowa is the only state which has enacted legislation requiring the state board to implement continuing education/professional development requirements for licensure. The Iowa Board is currently studying methods for implementing this legislation. N.C.E.E. has offered to assist state boards in establishing uniform guidelines for continuing education/professional development criteria in the interest of maintaining uniform procedures among the state boards.

Quoting further from this document, there is a statement "It may be said that engineers and land surveyors have the finest professional registration system in the world." N.C.E.E. will continue to serve its member boards in the engineering profession by providing an organization through which state boards may "act and council together to better discharge their responsibilities in regulating the practice of engineering and land surveying for the protection of the public welfare and safeguarding life, health and property."

19. "Engineering Registration and the Law - A Review of Engineering Registration in 1977 - How the System Operates, What State Laws Require a Look into the Future," Morton S. Fine, P.E., L.S., IEEE Spectrum, October 1977.

Mandatory requirements for license renewal had been discussed for three or four years before the first mandatory statute was enacted in Iowa in July 1977. The statute mandates the state board to set up rules and regulations to implement the statute within a given time frame. N.C.E.E. hopes to coordinate with the Iowa Board so that guidelines can

be set up for the permissive use of all member boards of N.C.E.E. thereby retaining all the benefits of reciprocity/comity gained after so many years. It is anticipated that the passage of additional state statutes may accelerate in the future.

Finally, the adoption of mandatory degree requirement for licensure has moved slowly into the statutes but appears to be accelerating. Six states, Illinois, Kentucky, Michigan, Ohio, South Carolina, and Missouri, either have already implemented such requirements or have set dates for so doing.

PURPOSE AND SCOPE OF THE REVIEW

Purpose

In accordance with the intent of Alaska Statutes 24.20 .271(1) and 44.66.050 (sunset legislation), a review of the Board of Registration for Architects, Engineers and Land Surveyors was conducted to review Board activities and accomplishments to determine if the Board has been operating in an effective, efficient and economical manner.

As required by legislative intent, this report shall be considered during the legislative oversight function in determining whether the Board will be reestablished. The law currently specifies that this Board will terminate on June 30, 1980, but will continue until June 30, 1981 for the purpose of concluding its affairs.

Scope

The major areas reviewed were the Board's operations and its licensing, examination, administration, complaint and affirmative action functions. Our review consisted of analyzing and evaluating the following:

(1) Applicable statutes and Board regulations;

(2) discussions with the Board and questionnaires sent to Board members;

(3) tests of records and documents of the Board and the Division of Occupational Licensing (OL), Department of Commerce and Economic Development, for the years 1976-1978;

(4) interviews with OL employees;

(5) complaints filed with OL, the Ombudsman's Office, Consumer Affairs Agency and the Human Rights Commission during the period 1976 - 1978;

(6) questionnaires sent to State registered architects, engineers and land surveyors; and

(7) questionnaires sent to individuals whose applications were not approved.

Scope Constraints

This review was hampered by the following constraints:

(1) The Board has not established and reported financial and program plans as required by AS 37.07.050 nor has it developed and reported performance information regarding its effectiveness and accomplishments as required by AS 37.07.090 and AS 08.48.071.

(2) OL has not adequately collected, recorded and maintained pertinent files and statistics relating to the Board to effectively and efficiently carry out its administative responsibilities.

ORGANIZATION AND FUNCTION

Architects, engineers and land surveyors have been licensed in Alaska since 1939, when the Territorial Board of Engineers and Architects Examiners was established. The structure and statutes that relate to today's Board date from Ch 179 SLA 1972, in which the Alaska State Board of Registration for Architects, Engineers and Land Surveyors was created.

As stipulated in AS 08.48, the Board has nine members consisting of two civil engineers, one land surveyor, one mining engineer, two engineers from other branches of the engineering profession and three architects. Members are appointed by the governor and serve staggered six-year terms. Board meetings are held at least four times a year.

The responsibilities of the Board include:

a. The adoption of regulations enabling it to carry out the purposes of AS 08.48;

b. the publication of a code of ehtics;

c. the formulation and administation of examinations;

d. the review of applications; and

e. enforcing the provisions of AS 08.48, through disciplinary actions or other procedures deemed necessary and in accordance with the Administrative Procedures Act (AS 44.62).

Except for specific exemptions provided for in AS 08.48.331, the practice of architecture, engineering or land surveying within Alaska is prohibited unless the practitioner is currently registered with the State. Although the statutes do not distinguish between the various branches of engineering, the Board has interpreted "professional engineering" to include chemical, civil, electrical, mechanical, mining and petroleum engineering. Accordingly, engineers are registered in the specific field for which they apply and are approved. In addition, corporate authorizations are required for corporations practicing architecture, engineering or land surveying within Alaska.

REPORT CONCLUSION

Policy Issues

This review contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting these practices are not within the scope of this review but require legislative consideration. In debating these issues, the legislative oversight committees should consider the findings and alternatives presented in this report in reaching their decisions.

Report Conclusion

In our opinion, the Board of Registration for Architects, Engineers and Land Surveyors should be continued. For the following reasons, we believe the regulation and licensing of architects, engineers and land surveyors is desirable to protect the public's health, safety and welfare:

A. These professions involve structures and activities that could result in severe physical and financial harm if practiced by incompetent persons. Potential harmful results include collapsed structures, fires, pollution and extensive litigation, as well as large economic loss.

B. The general public as well as the individual consumer is often directly affected by the professional's work. For example, the users of public buildings have as vital an interest in the structural integrity of a building as the owner does. Also, neighbors and subsequent land owners are impacted by inaccurate surveys or poorly designed structures or communities.

C. Registered architects and engineers are involved not only with the construction but with the original design of structures, facilities and processes. Their seals on blue prints and building plans certify their approval of those plans, and accordingly assign them a good deal of professional and legal responsibility.

D. In order to protect the public without unduly restricting individual rights, AS 08.48.331 exempts a wide variety of persons, activities and structures from requiring the services of a registered architect, engineer or land surveyor.

While the reasons above indicate that the Board should continue to license and regulate architects, engineers and land surveyors, certain changes need to be implemented in order for the Board to more effectively serve the public.

The make-up of the Board should be reviewed to provide better representation of the regulated professions and the general public. At least two lay members should serve on the Board (see Recommendation No. 1).

The procedures for the preparation and grading of the Alaska portion of the land surveying examination should be revised (see Recommendation No. 2).

The Board should continue its efforts to make the statutes and regulations more relevant and workable (see Recommendation No. 3).

Legislation should be introduced which will require continuing education for architects, engineers and land surveyors. Continuing education will assist in avoiding professional obsolescence and keep practitioners aware of changes taking place in the field (see Recommendation No. 4).

The Board should prepare annual reports of its objectives and activities, and OL should incorporate this information into its budget documents. This will better enable the Governor's Office, Legislature and other interested parties to evaluate the Board's performance (see Recommendation No. 5).

FINDINGS AND RECOMMENDATIONS

Findings and Recommendations No. 1 through No. 5 are addressed to the Board of Registration for Architects, Engineers and Land Surveyors. Findings and Recommendations No. 6 and No. 7 are addressed to the Division of Occupational Licensing (OL), and should be read in conjunction with "A Performance Review of the Division of Occupational Licensing, Department of Commerce and Economic Development, October 30, 1978".

Recommendation No. 1

In order to ensure that the Board adequately represents the regulated professions and the general public, the qualifications and conditions of Board membership should be reviewed and amended.

AS 08.48.011-.031 creates the State Board of Registration for Architects, Engineers and Land Surveyors, specifies the qualifications and professions of the nine Board members and establishes the members' terms of office. In order that the Board better represent the regulated professions and general public, these statutory provisions should be reevaluated. Some specific areas are addressed below:

A. Of the 23 boards established under AS 08, fifteen have at least one member who has no direct financial interests in the profession(s) regulated by that particular board. The State Board of Registration for Architects, Engineers and Land Surveyors is one the eight boards without lay representation.

   In general, lay members can and should contribute to policy formulation and enforcement decisions. Their expanded roles, particularly in technical evaluations and discussions, will have to be defined for this particular board. However, it should be recognized that the public is the ultimate interest group. We recommend that at least two lay members be included on or added to the Board.

B. The following table shows the relative percentages of professions registered through the Board and the statutory representation afforded each profession.

Profession	As % of All Registrants		Statutory Board Representation
Architects	12%		3
Electrical Engineers	8%		A
Mechanical Engineers	9%		A
Civil Engineers	43%		2
Mining Engineers	2%		1
Chemical Engineers	1%		A
Land Surveyors	21%		1
Petroleum Engineers	1%		A
Corporate Authorizations	3%		-
	100%		7
Representatives from other branches of engineering		A	+ 2
			9

The table illustrates some interesting comparisons: A) Mining engineers, who make up only 2% of all registrants, are guaranteed Board representation. Electrical and mechanical engineers are not, although together they make up 17% of all registrants. B) Architects, who represent 12% of the registrant population, are granted three Board memberships. Land surveyors, representing 21% of all registrants, are only granted one.

Although in actual fact the current Board does have an electrical engineer, a mechanical engineer and the civil engineer members are also registered land surveyors, the law allows for a much less representative membership. We recommend that the professional make-up of the Board, as required by AS 08.48.011, be reevaluated to more accurately reflect the regulated professions and the public.

In addition, the Board is relatively large and the feasibility of a smaller membership should be considered. We recognize, however, that three professions are being regulated and that considerable time is already demanded of Board members.

Recommendation No. 2

The Board should revise its procedures for the Alaska portion of the land surveying exam.

For several years the four-hour land surveying exam on Alaska law and practice has been prepared and graded by a single individual. It is not the auditor's intent to in any way discredit this individual and the Board is rightfully very appreciative of his competence and efforts. However, no one person should have so much input to the determination of whether an applicant is to become a registered land surveyor.

We recognize that the Board has taken preliminary steps to develop alternative procedures for the Alaska portion of the land surveying exam, and recommend that it continue and formalize its efforts. Until such time as the new methods for preparation of the exam are effected, basic control procedures - e.g., ensuring the anonymity of the examinee to the grader - should be followed.

Recommendation No. 3

The Board should continue its efforts to make the statutes and regulations more relevant and workable.

In September, 1978 the Board adopted major revisions to its administrative regulations, 12 AAC 36. These revisions were the culmination of several years' efforts and significantly improve the clarity and applicability of the regulations.

AS 08.48, through which the Board is created and empowered to regulate the professions of architecture, engineering and land surveying, should also be subjected to a review and revision process. In addition, some areas of 12 AAC 36 still need improvement. Some specific areas warranting review are listed below (this list is not intended to be inclusive):

A. AS 08.48.011-.021. As discussed in Recommendation No. 1, Board make-up should be reevaluated.

B. AS 08.48.091. Written exams are required to be held at least twice a year. In the case of the Architecture-Qualifying and the Architecture-Professional exams, which are national tests each of which is offered once a year, this is not possible. The statute should be reworded accordingly.

C. AS 08.48.11. One cause for reprimand is a "crime involving moral turpitude." This is vague and should be eliminated or more precisely defined.

D. 12 AAC 36.010. One of the public need criteria for the continued existence of a board is the extent to which State personnel practices, including affirmative action requirements, have been complied with by the board. 12 AAC 36.010 requires that applicants submit photographs with their applications. We found no evidence of discrimination based on photographs, but the potential for discrimination or charges of discrimination exists. Therefore, we recommend that photographs be used for identification purposes only and that they not be affixed to the application at the time it is reviewed for acceptance.

Recommendation No. 4

Legislation should be introduced requiring continuing education for architects, engineers and land surveyors.

Architects, engineers and land surveyors must demonstrate a high degree of educational and practical competence before they can become registered in Alaska. However, renewal of certificates is not dependent upon evidence of a professional's continued competence.

In our questionnaire to registered professionals, 93% of the architects, 78% of the engineers and 64% of the land surveyors responding reported that they had attended courses and/or seminars in the last two years. Most were concerned, however, that continuing education requirements would be too narrowly defined or too difficult to satisfy. To address these concerns, there must be active involvement by individuals and professional societies in the development of continuing education standards.

Architects, engineers and land surveyors are acutely aware of the public's trust that they maintain their professional competency. Required continuing education is one means of fulfilling that trust. In addition, a program of continuing education will assist in avoiding professional obsolescence and keep practitioners aware of changes taking place in the profession.

Recommendation No. 5

The Board should develop reports and procedures that will enable the legislative and executive branches to evaluate its performance.

A. Under sunset legislation each licensing board will have the burden of demonstrating a public need for its continued existence. As part of this process a board will be expected to establish formal

objectives with, so far as is practicable, quantifiable measures. Without identifiable and measurable objectives, neither the Legislature, the Executive Branch nor the board itself can effectively evaluate performance.

The Division of Occupational Licensing submits annual budget documents in which it establishes its own objectives and evaluates the previous year's performance. Similar reports should be prepared for each board and OL should include these in its annual budget package (see the OL Performance Audit Report).

B. Although required to by AS 08.48.071, the Board has not prepared annual reports to the Governor's Office. As discussed in part A above, there must be some mechanism for evaluating the Board's performance. Furthermore, many registered professionals have expressed an interest in receiving Board reports or newsletters.

We recommend that the Board's annual report include, at a minimum, the following information:

1. Board's purpose, goals and measures;

2. receipts and disbursements related to the Board's operations;

3. Board member participation;

4. new regulations and statutes; and

5. significant developments or concerns of the Board.

Recommendation No. 6

The Division of Occupational Licensing should collect, record and maintain for five-year periods files and statistics of licensing and testing applicants and related workload of the licensing examiner.

The Division needs relevant facts and statistics for evaluating the performance of its personnel and the Board. Many past records have not been maintained or compiled in a usable form, such as:

1. Number of architects, engineers and land surveyors newly registered or renewed in past years;

2. statistics on the pass/fail rates for examinations;

3. number of applicants for examinations or registration as well as number of applicants not approved;

4. breakdown of receipts by fee types; and

5. correspondence workload of licensing examiner.

6. Files for at least 27 registered architects, engineers or land surveyors have either been misplaced or sent to Archives without the necessary cross-reference documents being maintained by OL.

It is to the advantage of the Division to keep these records in order to support its budget request, evaluate its personnel and keep the Board informed as to its progress. Also, feedback from the Board and the public should be encouraged to determine whether staff performance is adequate (see the OL Performance Audit Report).

Recommendation No. 7

The Division of Occupational Licensing should handle investigations in a more comprehensive and timely manner.

As discussed in Legislative Audit's OL Performance Audit Report, OL's investigative performance was not sufficient to provide adequate public protection from abuse by regulated occupations.

In our review of OL complaint files relating to architects, engineers and land surveyors, we also noted the following exeptions:

1. 20% of the cases opened since January, 1975 and subsequently closed were not satisfactorily resolved but were closed due to age.

2. 78% of the cases open as of December, 1978 had not been investigated in a thorough or timely manner. In fact, 64% of the cases had been open for at least six months but had not yet been investigated.

In our October, 1978 audit of OL, we recommended that the Division's investigative unit be transferred to Public Safety. The 1979 legislature did not elect this option, but did approve an additional investigator position (there are currently three OL investigators). The Director of OL has indicated, however, that due to budget restraints the new position will not be filled until October, 1979.

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analysis of Board activities relates to the public need factors defined in the "Sunset" law. This analysis is not intended to be all inclusive, but addresses those areas we were able to cover within the scope of our review.

I. The extent to which the board, commission or program has operated in the public interest.

1. The Board has adopted revisions to the Code of Ethics which clarify and strengthen the professional's responsibility to the public.

2. During the last four years the Board has initiated or referred approximately 30 investigations to OL.

3. In our testing and observations we found the Board to be conscientious in its review of applications and performance of other administrative duties.

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

1. The Division of Occupational Licensing (OL) has not maintained updated statistics for Board use (see Recommendation No. 6 and OL Performance Audit Report).

2. OL has not handled investigations of complaints in a timely and effective manner (see Recommendation No. 7 and OL Performance Audit Report).

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

1. Although the statutes and regulations governing Board activities should be subjected to further review, the Board recently adopted major revisions to its administrative regulations, 12 AAC 36, that significantly improve their clarity and applicabilitity (see Recommendation No. 3).

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

1. Individuals who contact Board members or the licensing examiner and wish to present information, ask questions or register complaints are encouraged to attend Board meetings.

V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

1. Board meetings are held at least five times a year and are advertised in Juneau, Ketchikan, Fairbanks and Anchorage. However, neither meetings nor examinations have been advertised in a timely manner (see the OL Performance Audit Report).

2. During the process of revising its regulations, and in accordance with the Alaska Administrative Procedures Act, the Board invited interested persons and groups to offer written or oral testimony.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

1. During the past three years, four complaints concerning the Board's activities were filed with the Ombudsman's Office. The cases involved the Board's evaluation of applicants' experience, the assessment of registration fees and the Board's failure to investigate. All cases were resolved to the Ombudsman's satisfaction.

2. OL has only one complaint file relating to the Board's activities. This was prompted by a letter written to the Governor and forwarded to OL, and concerned a Board member's outspoken criticism of a landscape architecture exhibit. No formal complaint was filed, and the matter was satisfactorily resolved.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

1. Complaints against registered architects, engineers and land surveyors are indications of the quality of practice in the State. During the last four years, only about a dozen complaints were filed with OL charging registered professionals with unethical or unprofessional conduct.

2. Architects, engineers and land surveyors are not required to demonstrate their continued competence through a continuing education or retesting program (see Recommendation No. 4).

3. During the last three years, approximately 100 architects, 500 engineers and 100 land surveyors were accepted for initial registration. OL has not developed summary data by which we could readily determine the number of renewals processed during this same period.

VIII. The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.

1. Photographs are required to be submitted with applications for examinations and/or professional registrations. This requirement does not comply with affirmative action standards (see Recommendation No. 3).

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please refer to the previous section, Findings and Recommendations.

APPENDIXES

APPENDIX A

BOARD OF REGISTRATION FOR ARCHITECTS,
ENGINEERS AND LAND SURVEYORS
REVENUES COMPARED WITH EXPENDITURES
Fiscal Year 1978
(UNAUDITED)

Average Revenue (See Schedule 1, Notes 1 and 2)	$70,964
Expenditures (See Note 3)	58,786
Excess of Revenues over Expenditures	$12,178

Schedule 1
Types of Revenues (See Note 2)

Revenues	Amount	Collection Time
Individual Application Fee	$50	With Application
Corporate Authorization Application Fee	$100	With Application
Reexamination Fee	$50	With taking of examination
Individual Registration Fee	$15/year	Renewals paid biennially; new registrants pay $15/year for balance of biennial period.
Corporate Authorization Registration Fee	$50/year	Renewals paid biennially; new registrants pay $50/year for balance of biennial period.
Amendment to Corporate Authorization	$20	With amendment
Delinquent Renewal Fee	$30	With reinstatement
Late Fee Fine	$10	With late payment

Note 1

Renewal registration fees are collected once every two years and cause revenues inone year to be significantly greater than revenues collected in the next year. Therefore, we calculated and reported an average of the revenues collected

in Fiscal Year 1977 and 1978 in order to obtain an accurate representation of collected revenues.

Note 2

12AAC 36.170, which outlines fee types and amounts, was revised in October 1978. Application fees were raised and fees for registration certificates were eliminated. The fees in Schedule 1 reflect the current fee structure.

Note 3

Expenditures include those made by Board members, such as travel and per diem and an allocated percentage (estimated) of total administrative expenses of OL. They do not include expenditures for efforts of other departments, such as the Department of Law, that may be assisting the Board and OL.

APPENDIX B

ADMINISTRATIVE STATISTICS

Registered Architects, Engineers and Land Surveyors	As of January 1, 1979 Number	As % of Total
Architects	339	12%
Engineers (Note 1)	1,848	64%
Land Surveyors	624	21%
Corporate Authorizations	99	03%
	2,910	100%

Board Meetings in Calendar Years 1975-1978

Average number of meetings per calendar year (excluding telephone conferences)	5 meetings
Average number of days per meeting	2 days

Examinations	Dates Given Each Year
Engineer-In-Training	November, April
Professional Engineering	November, April
Land Surveying	November, April
Architecture-Qualifying	June
Architecture-Professional	December

Note 1

Engineers are registered in the separate fields of civil, chemical, electrical, petroleum, mechanical and mining engineering. The numbers of engineers registered in each field as of January 1, 1978 has not been determined. However, the percentage break-downs calculated using July, 1978 figures and illustrated in Recommendation No. 1 should be relatively unchanged.

APPENDIX C

QUESTIONNAIRE SENT TO BOARD MEMBERS

1. What do you believe to be the goals and objectives of the Board of Registration for Architects, Engineers and Land Surveyors?

Description	*Number of Board Members' Responses (See Notes 1 and 2)*
To ensure only persons who have demonstrated their ability may practice.	*1*
To ensure minimum level of competency among practitioners.	*3*
To monitor professions as prescribed in AS 08.48.	*1*
To protect health, safety and welfare of consumers as well as general public who use structures.	*3*
To ensure minimum standards of conduct.	*2*

2. Do you believe that the Board is achieving its goals as you perceive them in question number 1? Please show how the goals and objectives are or are not being achieved.

Description	*Number of Board Members' Responses*
In most cases, but problems with enforcement.	*2*
Successful in ensuring that registered professionals meet minimum standards.	*2*
No, because:	
a) Complaints not followed up by OL;	*3*
b) Board losing credibility because of (a);	*1*
c) municipal and State agencies not requiring compliance with statutes and regulations;	*1*
d) legal opinions vary from one administration to another;	*1*
e) budget restricts necessary travel and frequency of meetings.	*1*

3. Is the staff from the Department of Commerce and Economic Development and/or other departments adequate to perform all the administrative and enforcement duties necessary for the operation of the Board? What staff support services are provided adequately/inadequately?

Description	*Number of Board Members' Responses*
No, Because:	
a) Board needs an executive secretary;	*2*
b) quarterly newsletter should be sent to registered professionals;	*1*
c) OL investigation procedures not adequate or timely;	*6*
d) administrative duties of licensing examiner handled well but insufficient to fill Board needs.	*4*

4. Do you think that the absence of regulations for architects, engineers and/or land surveyors would be detrimental to the public's best interests?

Description	*Number of Board Members' Responses*
Yes, because:	
a) Alaska's hostile environment requires special knowledge for safe construction;	*2*
b) absence of statutes would encourage growth of incompetence;	*2*
c) energy conservation is very important and requires specialized training;	*1*
d) poorly designed communities and structures might develop, hurting both consumers and the general public.	*3*

5. Are there any statutes that you believe to be obsolete, vague, unduly restrictive and/or inadequate to provide the Board with the responsibility and power to properly meet its objectives? Please list and explain.

Description	Number of Board Members' Responses
Board has worked diligently to revise and improve regulations.	*1*
Statutes generally adequate; but difficult to enforce or to operate effectively within budget.	*3*
State employees should not be exempted from registration requirements (AS 08.48.331(4)).	*1*
Other exemptions are vague and subject to several interpretations (AS 08.48.331).	*1*

6. Do you think that continuing education requirements should be adopted for architects, engineers and/or land surveyors?

Description	Number of Board Members' Responses
Not yet because of cost and administrative time required.	*1*
Desirable but difficult to regulate - progressive individuals will do on their own and competition will eliminate those who don't.	*2*
Yes, but standards should first be established on national basis.	*2*
No - so far only one state requires it.	*1*
Yes - need to ensure continued competence.	*1*

7. Do you believe that the residency, experience or professional requirements for Board membership are valid and/or adequate?

Description	Number of Board Members' Responses
Yes - adequate as minimum requirements. Experience requirement needed for member to evaluate applicants, and residency requirement needed for member to fully appreciate Alaska's unique problems.	6

8. What changes could be made to the Board which would improve its service to the public?

Description	Number of Board Members' Responses
Employ an executive secretary.	2
Publish a quarterly or semi-annual newsletter to keep public, State and registrants informed of Board activities.	1
Need more direct authority to enforce statutes and regulations.	4
Assign an investigator to the Board.	1
Provide adequate funding so that meetings could be held as needed and so members could attend necessary national and/or regional meetings.	1
Provide adequate investigative support to process complaints within a month of receipt.	1
No changes needed to Board itself.	1

9. Please add any other comments or suggestions that you believe would enable us to better evaluate the public need for the Board.

Description	*Number of Board Members' Responses*
Revenues generated by Board would cover cost of executive secretary as well as Board's share of State service costs.	*2*
Need to keep registration so that Alaska's standards are comparable to other states and to ensure interstate flow of professionals.	*2*
Survey needed of building officials, municipal and State agencies, etc., to determine their awareness of and compliance with statutes.	*1*
Public has the right to know that structures and facilities are safe.	*1*
An area that should be looked into is the development of professional intern programs.	*1*

Note 1

Number of Board Members	9
Number of Board Members Responses	6
Response Rate	67%

Note 2

Each Board member responded to each question with several answers. Therefore, total responses to a question may exceed the number of Board members.

QUESTIONNAIRE SENT TO REGISTERED ARCHITECTS ENGINEERS AND LAND SURVEYORS

The following questionnaire was sent to registered architects, engineers and land surveyors (see Note 1). For each question on the questionnaire we have noted the percentage of yes and no responses. We have also shown the most typical written comments for each question as compiled from the questionnaire (see Note 2).

	% of Responses (See Note 1)								
	Architects			Engineers			Land Surveyors		
	Yes	No	No Opinion	Yes	No	No Opinion	Yes	No	No Opinion
1. Have you ever had any contact with the Board of Registration for Architects, Engineers and Land Surveyors?	61%	39%	0%	49%	51%	0%	57%	43%	0%
If so, was it concerning:									
A. New regulations?	22%			18%			29%		
B. Board policy?	43%			21%			36%		
C. New legislation?	22%			12%			25%		
D. Investigations?	18%			12%			11%		
E. Other? (please specify)	18%			27%			25%		

Registration; preparing, proctoring or grading exams; enforcement; availability of courses; proposed registration of landscape architects.

2. Alaska statutes require Board membership to consist of two civil engineers, one land surveyor, one mining engineer, two engineers from other branches, and three architects.									
A. Do you think the Board is: too large?	11%			10%			07%		
too small?	04%			11%			0%		
OK?	71%			55%			61%		
No opinion?	14%			24%			32%		
B. Do you think all professions are adequately represented?	82%	11%	07%	55%	29%	16%	54%	29%	07%

Comments:

No - Each profession should have its own board.
No - All fields of engineering should be represented.
No - Landscape architects should be registered.

	% of Responses (see Note 1)								
	Architects			Engineers			Land Surveyors		
	Yes	No	No Opinion	Yes	No	No Opinion	Yes	No	No Opinion
C. Are any professions over represented?	07%	68%	25%	38%	45%	17%	43%	46%	11%
Comments:									
Yes - Too many architects (30% of engineers and land surveyors responding added this comment);									
- too many civil engineers.									
D. Should the public (non-professionals) be represented on the Board?	18%	75%	07%	14%	78%	08%	07%	86%	07%
Comments:									
No - Unable to understand technical issues; Board members already represent public.									
Yes - But not as voting member; should be one or two representatives from industry or government.									
3. Do you believe that it is necessary to register architects, engineers and/or land surveyors in order to protect the public's health, safety and welfare?	89%	07%	04%	97%	03%	0%	100%	0%	0%
Comments:									
Yes - To establish minimum standards which consumer cannot assess;									
- particularly with Alaska's harsh environment and land issues;									
- however, if regulations not enforced it is better to have no regulations at all.									
4. If so, do you think Alaska's certification requirements are necessary and/or adequate?	75%	14%	11%	90%	07%	03%	89%	07%	04%
Comments:									
Yes - Comparable to national standards.									
No - Should require more experience;									
- should require college degree;									
- should not exempt government employees.									
Is the requirement that architects and engineers demonstrate knowledge of construction under sub-arctic conditions a valid and/or reasonable requisite to professional practice in Alaska?	89%	11%	0%	82%	15%	03%	N/A	N/A	N/A

	Architects			Engineers			Land Surveyors		
	Yes	No	No Opinion	Yes	No	No Opinion	Yes	No	No Opinion
4 (Cont'd.)									

Comments:

No - No more valid than requiring knowledge of other climate types;
- very little work is done under Arctic conditions.
Yes - Should also demonstrate knowledge of earthquakes and energy conservation;
- but Board should define topic requirements better.
- Architects' thesis requirements should not be stiffer than engineers.
- Arctic Engineering courses aimed at Engineers not Architects.

Do you feel that the examination required for registration is a fair and reasonable test of professional knowledge and ability?	68%	25%	07%	69%	12%	19%	68%	11%	21%

Comments:

No - Exams do not adequately test legal knowledge, design skills, reasoning ability or professionalism;
- there should be more emphasis on a professional interim program.

5. In the last two years, have you attended any classes or seminars directly relating to your professional skills?	93%	07%	0%	78%	21%	01%	64%	36%	0%

If so, how many hours of classes have you had?

No meaningful average available because responses were in terms of seminars, credit hours, contact hours, etc.

6. Do you believe continuing education should be required for renewal of certificates?	50%	46%	04%	38%	54%	08%	46%	50%	04%

Comments:

No - Active practice sufficient to stay current;
- course offerings too limited in Alaska;
- no national standards have been established;
- continuing education is a gimmick by educators to create classes.

Board should encourage independent continuing education and should help organize seminars and classes.

	% of Responses (see Note 1)								
	Architects			Engineers			Land Surveyors		
	Yes	No	No Opinion	Yes	No	No Opinion	Yes	No	No Opinion
7. Do you think that the State should issue temporary certificates?	04%	86%	10%	14%	77%	09%	14%	82%	04%

If so, under what conditions should they be issued?

Only if - Shortage of registered professionals;
- Required to post bonds or Board reviews individual cases for public's best interests.
No - State would be inundated with carpet baggers and consumer would have not redress after temporary licensees left State.
Yes - To juniors or apprentices;
- to persons from states with comparable requirements.

8. In your opinion, has the Board of Registration for Architects, Engineers and Land Surveyors operated in the public's best interests?	68%	14%	18%	82%	04%	14%	68%	04%	28%

Comments:

Board has not policed the profession.
Meetings should be held more often.
Yes - By revising regulations;
Yes - but Board is under-funded.

9. Do you think that any of the statutes under which architects, engineers and land surevyors are regulated are obsolete, vague, unduly restrictive and/or inadequate?	29%	29%	42%	16%	46%	38%	18%	39%	43%

If so, please list and explain:

Yes - State employees and other exemptions should be reviewed (AS 08.48.331);
- statutes should better define incompetence, negligence and distinctions among the professionals;
- there should be a land surveyor-in-training exam;
- the Board has little real authority.

10. Have you any complaints concerning the support services provided by the staff of the Division of Occupational Licensing, Department of Commerce and Economic Development?	21%	61%	18%	16%	75%	09%	25%	64%	11%

	Architects			Engineers			Land Surveyors		
	Yes	No	No Opinion	Yes	No	No Opinion	Yes	No	No Opinion
10. (Cont'd.)									
If so, please specify:									
Yes - Board is inadequately funded and cost of services too high for services rendered. Inadequate services evidenced by no executive secretary, no yearly rosters, no newsletters, difficulty in obtaining renewal information, delays in registration process, and insufficient investigative support.									
11. Are you aware of any discriminatory practices involving the registration and certification of any particular individual or minority groups?	04%	92%	04%	03%	95%	02%	0%	96%	04%

Comments:

Yes, in Board's interpretation of requirements that experience must be under registered professional.
In general, persons without college degree are discriminated against through stiffer experience requirements.

12. Please add comments or suggestions you feel are relevant.

Many persons, particulary government employees, are unable to get breadth of experience; Board should consider breaking CE into several disciplines;
Board should encourage Bureau of Land Management to give mineral surveyors test more often.
Comity applicants should not have to furnish references and college transcripts.
Persons with active applications on file should be notified of regulation changes that affect them.
Board should be allowed to hire an executive secretary and hire direct legal services.
Board should utilize the services and expertise of other State agencies, such as the Division of Lands.

Note 1

	Architects	Engineers	Land Surveyors
Number of questionnaires sent to registered professionals	51	165	61
Number of responses	31	115	35
Response Rate	61%	70%	57%

Note 2

Comments were all reviewed and considered in the performance of our audit, and are briefly summarized in this appendix.

STATE OF ALASKA
DIVISION OF LEGISLATIVE AUDIT

APPENDIX E

QUESTIONNAIRE SENT TO APPLICANTS NOT ACCEPTED FOR EXAMINATION OR COMITY

Questionnaires were sent to some of the individuals whose applications to take examinations or to become registered by comity were turned down by the Board:

	Applicants for Examination	Applicants for Registration by Comity
Number of Questionnaires Sent	16	11
Number of Responses	8	8
Response Rate	50%	73%

Questionnaires are not reproduced in this report but all responses were reviewed and considered in the performance of our audit.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF COMMERCE &
ECONOMIC DEVELOPMENT

OFFICE OF THE COMMISSIONER

POUCH D
JUNEAU, ALASKA 99811

June 18, 1979

Mr. Gerald Wilkerson, CPA
Division of Legislative Audit
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

The following comments are in response to the Performance Review of the Board of Registration for Architects, Engineers and Land Surveyors, as submitted by the Division of Legislative Audit.

Recommendation No. 1: We agree that statutory provisions for board membership should be reevaluated. The requirement for one mining engineer appears unwarranted, while one land surveyor may be insufficient. At this time the board is representative of all fields and, in our opinion, is performing in an excellent manner. We would support inclusion of public members on the board while not increasing its overall size. The subjects of board composition and public membership have been under discussion by the board and it is expected that the board will support this recommendation.

Recommendation No. 2: Agreed. The board has been discussing this matter for some time and is currently investigating alternatives which will maintain examination integrity and quality.

Recommendation No. 3: Agreed. The board, in conjunction with the division, is addressing statutory and regulatory clarification.

Recommendation No. 4: Agreed. The board has discussed this subject and is generally in support of mandatory continuing education. However, care should be taken as to approval of courses to meet such requirements and with respect to possible exemptions.

Recomendation No. 5: Agreed. All boards have been contacted for input into the division's budget for FY '81. This information will address board goals and objectives as well as its financial needs. All boards have also been contacted regarding the requirement for performance reporting. The board is currently preparing its annual report for 1978.

08-H2LH

Recommendation No. 6: Agreed. The division has implemented record maintenance for all boards and commissions under its jurisdiction.

Recommendation No. 7: Agreed. Complaints received against all regulated professions should be handled on a timely basis. Budgetary restraints have mandated priortization of investigations.

I appreciate the time and efforts expended by your staff and the opportunity to provide these comments.

Sincerely,

Charles R. Webber
Commissioner

CRW/sa2/5

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DIVISION OF OCCUPATIONAL LICENSING

POUCH D
JUNEAU, ALASKA 99811

June 25, 1979

Mr. Gerald L. Wilkerson, CPA
Legislative Auditor
Division of Legislative Audit
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

Re: Comments on the Sunset Review Preliminary Legislative Audit Report.

Board members have reviewed the preliminary audit report that you submitted by letter dated June 6, 1979 and have several comments to the recommendations presented by the report. Several of the board members have submitted their comments as individuals because your cover letter was not clear regarding the method in which responses should be submitted; however, as per our telephone conversation, I will attempt to combine all board members' comments in this one letter.

First, I would like to state that the intent of the Sunset legislation, as I understand it from reading "Sunset Legislation in the United States" by Dan R. Price, is to evaluate present bureaucratic effectiveness and efficiency and to deter unnecessary bureaucratic growth. The same publication also states that evaluation and not termination is the primary purpose of Sunset. From this, I would conclude that the Legislature's intent is to improve the relationship between the board and the public by making changes to our statutes and regulations when or if such legislation is necessary to meet that end. I can assure you that such legislative action would be welcomed by all members of this board and, although the following comments may be contrary to the recommendation in the preliminary audit report submitted by your office, the board feels that through these comments it also will obtain the Sunset intent.

Following is the board's response to the recommendations contained in the performance review of the Board of Registration for Architects, Engineers, and Land Surveyors prepared by the Division of Legislative Audit.

-H8LH

Recommendation No. 1

In order to ensure that the board adequately represents the regulated professions and the general public, the qualifications and conditions of board membership should be reviewed and amended.

A. Addition of Lay Members to the Board

Reply a. Addition of Lay Members to the Board. I disagree with the recommendation to add two lay members to the Board. The tasks performed by the Board, in almost all instances, require technical knowledge of the professions regulated. A lay member, by definition, would not have the necessary background to intelligently act on the technical matters. Secondly, there is no evidence that the Board has failed to act in the best interests of the public and consequently I see no demonstrated need to further increase the size of the Board and to thus increase the costs of Board operations.

(Seven Members Agree with this Statement)

Reply b. It has become more apparent that lay members are being appointed to public regulation boards throughout the country. I would be in favor of adding two lay members to the board providing that the number of professional members, currently nine, is not reduced.

(Two Members Agree with this Statement)

B. Re-evaluation of Professional Make-up of the Board

The table showing relative percentages of professions registered is misleading. I call to your attention, Section 08.48.011 of the Alaska Statutes which states, "There is created the State Board of Registration for Architects, Engineers and Land Surveyors." It further states that the Board consists of two civil engineers, and one land surveyor, one mining engineer and two engineers from other branches of the profession of engineering. A further investigation of the statute will identify that we register Professional Engineers, Professional Architects and Professional Land Surveyors, reference to Section 08.48.221. The identification of a specific expertise within the Professional Engineering registration is specifically for the health protection and welfare of the public.

With reference to these three professions, the Board of Registration for Architects, Engineers and Land Surveyors does, in fact, have lay members on the Board, as each separate profession is a lay member relative to the other two.

Of the fifty-five boards registering professionals throughout the nation, thirty-nine of these boards are made up of only architects, and represent only the architectural profession. Of the sixteen boards representing combined professions each of the boards was chaired by a registered professional architect prior to recent officer elections on these boards.

Of the fifty-five boards nationally thirty-eight of these boards have Executive Secretaries or Executive Directors. These individuals are not members of the board and do not represent a professional registration.

On some boards serving the combined professions all members are registered professional architects. I would call to the committee's attention the fact that most projects to be constructed, which affect the health, safety and welfare of the public, have a single prime professional responsibility to the client. For virtually all commercial construction projects involving buildings housing the public or serving the public, the architect is the prime consultant identified by contract. Mechanical, electrical, civil and other engineering services are subcontracted to the architect for coordination and management. This of course does not apply to pure engineering projects such as roadways, bridges and utility services. Perhaps representatives of the audit committee should review State contracts through the Department of Transportation and Public Facilities, to determine how many contracts are awarded to engineers and how many contracts are awarded to architects. It is specifically through this contractual relationship between consultant and owner that the prime responsibility for the protection of the public's health and welfare is established.

If representation is desired for each separate branch of the professional engineering registration and for additional branches recognized in the future, I would offer the suggestion that the State of Alaska consider separate boards of registration for architects and engineers, as thirty-nine other states and districts have done in the past.

Such a separation of boards would respond to the review comment that the board is relatively large and the feasibility of a small membership should be considered.

(Nine Members Agree with this Statement)

Recommendation No. 2

The Board should revise its procedures for the Alaska portion of the land surveying exam.

I agree with the recommendation of the audit that procedures must be undertaken to develop alternative procedures for the Alaska portion of the land surveying exam. At the last board meeting we met with the individual who has been making up and grading the land surveying exam and we are in the process of revising those procedures to insure security of the exam and the anonymity of the individual, or individuals, involved in preparing that examination.

(Nine Members Agree to this Statement.)

Recommendation No 3.

The Board should continue its efforts to make statutes and regulations more relevant and workable.

A. Board make-up. Discussed in Recommendation No. 1.
B. Architectural Exams. I concur.
C. Definition of moral turpitude. I agree.
D. Photographs. No comment other than to question the desirability of increasing the cost and effort involved in identifying applicants for no valid reason.

(Nine Members Agree with this Statement.)

Recommendation No. 4

Legislation should be introduced requiring continuing education for architects, engineers and land surveyors.

In my judgement, mandatory continuing education is not appropriate at this time. The National Council of Engineering Examiners and the National Council of Architectural Registration Boards is addressing this matter and it would appear prudent to delay any action on mandatory continuing education until the Council has completed its study and come up with a recommended system that can uniformly be adopted by State Registration Boards. The problems in uniformity of evaluating continuing education units, accreditation of institutions offering continuing education opportunities, record keeping and comity registration requirements are extensive. Solutions to these problems can best be obtained through the application of uniform requirements developed through the National Councils.

(Nine Board Members Agree with this Statement.)

Recommendation No. 5

The Board should develop reports and procedures that will enable the legislative and executive branches to evaluate its performance.

I concur with the recommendations to develop reports and establish procedures and to enable the legislative and executive branches to evaluate the board's performance. During recent years, however, we have been advised that funding is limited and to limit expenditures where possible. This includes the additional days of meetings required to prepare reports.

We have been advised in the past that the preparation of budgets is not necessary as we are a portion of a larger budget and will receive a pre-established share of funding from the Division of Occupational Licensing, regardless of predefined goals and objectives or the amount of revenue generated by the professional registrants represented by collected.

(Nine Members Agree with this Statement.)

Recommendation No. 6.

> The Division of Occupational Licensing should collect, record and maintain for five-year periods files and statistics of licensing and testing applicants and related workload of the licensing examiner

I am in agreement with Recommendation No. 6 and as a Board we have been trying to have this information and statistical data made available. We have found it virtually impossible to even obtain an alphabetical listing of the registrants, or the ability to have a listing of registrants numerically. If our data storage system cannot provide this type of information, it appears that we are going to have a great deal of difficulty providing the types of information recommended in Recommendation No. 6. This information is not difficult to compile, it's a matter of having the clerical support and the computer program to provide it.

(Nine Members Agree with this Statement.)

I would like to thank you on behalf of the nine members that make up the Board of Architects, Engineers and Land Surveyors for the opportunity to make comments to your preliminary report. If you have any questions concerning these comments, please feel free to contact me at my work number (364-3280) or at my home (789-7814).

Very truly yours,

Wallace I. Deboff, P.E.

Reference: Preliminary Audit Report on a Performance Review of the Board of Registration for Architects, Engineers and Land Surveyors, May 11, 1979

Dear Mr. Wilkerson:

I have reviewed the above report and offer the following comments:

Recommendation No. 1:

A. It has become more apparent that lay members are being appointed to public regulation boards throughout the country. I would be in favor of adding two lay members to the board providing that the number of professional members, currently nine, is not reduced.

B. Even through your table illustrates that there is a disparity in the representation of the board members to the various categories of professions, it is my recommendation that if there is to be a change in the required make-up of the board, that the architects continue to be represented by three members. Even though they represent only 12% of the total registrants, their requirements for registration and their educational backgrounds are somewhat different than those for engineers and land surveyors; therefore, it requires knowledgeable professionals to evauate and pass on candidates for registration as architects. However, the mix of electrical, mechanical, civil, mining, chemical and petroleum engineers is really not that critical inasmuch as our educational background and the requirements for registration are the same. I would have no problem in the law being revised to reflect that at least three of the six engineers serving on the board must also be also registered as land surveyors, or that at least one individual registered solely as a land surveyor must be on the make-up of the board.

I do not agree that a smaller board is feasible. There are a large number of applicants to screen at most of our meetings; it takes a great deal of time to thoroughly analyze the applicants; and we require that at least three board members review each applicant. I think the additional cost in per diem and travel is well worth having a nine-member professional board.

Recommendation No. 2:

I agree with the recommendation of the audit that procedures must be undertaken to develop alternative procedures for the Alaska portion of the land surveying exam. At the last Board meeting we met with the individual who has been making up and grading the land surveying exam and we are in the process of revising those procedures to insure security of the exam and the anonymity of the individual, or individuals, involved in preparing that examination.

Recommendation No. 3:

I agree with Recommendation No. 3 as it pertains to Items A, B, C and D. As the report points out, we are in continual discussions each meeting on revisions to the regulations. Because of the statutory requirements pertaining to regulations and the time involved in making changes, we have normally waited until there were a number of changes to be made before initiating the process of public hearings, etc. Our current position is to wait until we have determined what specific portions of the current statute and regulations need to be revised as a result of Sunset Legislation before starting the revision procedure. We certainly recognize changes to both the statute and regulations are in order.

Recommendation No. 4:

I am in agreement with the philosophy of continuing competence. The problem that Alaska is faced with, as well as the other boards throughout the United States, is a means by which to monitor continuing education requirements that will meet the needs of all of the states while allowing individuals registered and practicing in more than one state to meet the same requirements in each state with minimal effort. The current thinking is to provide a means through the National Council of Engineering Examiners to provide for continuing competence on a national basis. This will be one of the topics discussed at the National Convention of NCEE in August. I am sure the Alaska Board would endorse a national program of continuing competence that is endorsed by all 50 states and maintained by a national central depository. Until this is accomplished monitoring and administering a program on a state level would be prohibitive.

Recommendation No. 5:

I am in complete agreement with Paragraphs A and B. One of the problems that the board members have indicated to the audit group is the lack of clerical support by the Division of Occupational Licensing. It is virtually impossible for the board, as such, to prepare this information on a timely basis without the assistance of a qualified individual such as an executive director. It is virtually impossible to comply with this recommendation without help that has expertise in engineering, land surveying and architecture. The secretary to the board, while totally dedicated and willing, has never been more than a secretary or stenographer, totally untrained in the professional areas that we regulate.

Recommendation No. 6:

I am in agreement with Recommendation No. 6 and as a Board we have been trying to have this information and statistical data made available. We have found it virtually impossible to even obtain an alphabetical listing of the registrants, or the ability to have a listing of registrants numerically. If our data storage system cannot provide this type of information, it appears that we are going to have a great deal of difficulty providing the types of information recommended in Recommendation No. 6. This information is not difficult to compile, it's a matter of having the clerical support and the computer program to provide it.

Recommendation No. 7:

This area is probably the most important and most difficult area to control. As the response to your questionnaire indicates, this is the one area that is most visible to the public. If there is one particular area that the Board is criticized for, it is the lack of enforcement of the regulations and statute. In addition, it is probably the most frustrating to the Board members. All of the Board members would like the authority, that we have been denied by various Assistant Attorney General's Opinions, to informally investigate and, if necessary, reprimand individuals in violation of our statutes and regulations. A vast majority of complaints could be delt with and eliminated in this manner. The more flagrant and serious complaints and violations could be handled in accordance with the more formal procedures. However, in order for even formal complaints and violations to be effective, they must be investigated and handled in a timely manner. This has not been the case inasmuch as our Board has received a much lower priority on complaints than those in the health sciences. Because of the lack of investigators and the direction they have been given, our complaints have either gone unheeded or are so low in priority that they are usually

dismissed or forgotten before any investigative effort is started. I feel a staff consisting of an executive director, secretary, and investigator would not only increase the ability of the Board to perform their duties, but would allow the complaint procedure to be handled in a timely and proper fashion.

I am pleased for the opportunity to respond to the audit and feel that the information it contains has been fairly presented.

Yours truly,

Loren H. Lounsbury, P.E.

LHL/sw

June 20, 1979

Mr. Gerald L. Wilkerson
Legislative Auditor
Division of Legislative Audit
Pouch "W" - Alaska Office Bldg.
Juneau, Alaska 99811

Dear Mr. Wilkerson:

The following statements are in response to your letter of June 6, 1979 and the preliminary review of the Board of Registration for Architects, Engineers and Land Surveyors.

My comments respond to the numbered recommendations of the Findings and Recommendations of your report.

Recommendation #1 (A) Lay Members

This evaluation compares boards within this State and does not respond to National statistics. This may not be a concern, but I provide the following statistics for the fifty-five boards registering architects, engineers and land surveyors throughout the nation.

Eleven, of the fifty-five registration boards nationally, have lay members. The average public representation on those boards is 26%. Of these eleven boards six have only one member, four have two members and California has five members.

I believe that selected lay members could provide advantages in the interest of the public. I do not believe however, that adding lay members simply to have lay members on boards will provide for the health protection and welfare of the public.

Lay members can and should contribute to policy formulation and enforcement except where those decisions require an understanding of the professions. As our board is a board representing special training and experience I see the lay members limited in their ability to perform truly serviceable functions to the public.

Recommendation #1 (B)

The table showing relative percentages of professions registered is misleading. I call to your attention, Section 08.48.011 of the Alaska statutes which states, "There is created the State Board of Registration for Architects, Engineers and Land Surveyors". It further states that the board consists of two civil engineers, one land surveyor, one mining engineer and two engineers from other branches of the profession of

engineering. A further investigation of the statute will identify that we register Professional Engineers, Professional Architects and Professional Land Surveyors, reference to Section 08.48.221. The identification of a specific expertise within the Professional Engineering registration, is specifically for the health protection and welfare of the public.

With reference to these three professions, the Board of Registration for Architects, Engineers and Land Surveyors does in fact have lay members on the board, as each separate profession is a lay member relative to the other two.

Of the fifty-five boards registering professionals throughout the nation, thirty-nine of these boards are made up of only architects, and represent only the architectural profession. Of the sixteen boards representing combined professions each of the boards was chaired by a registared professional architect prior to recent officer elections on these boards.

Of the fifty-five boards nationally thirty-eight of these boards have Executive Secretaries or Executive Directors. These individuals are not members of the board and do not represent a professional registration.

On some boards serving the combined professions all members are registered professional architects. I would call to the committees attention the fact that most projects to be constructed, which affect the health safety and welfare of the public, have a single prime professional responsibility to the client. For virtually all comercial construction projects involving buildings housing the public or serving the public, the architect is the prime consultant identified by contract. Mechanical, electrical, civil and other engineering services are subcontracted to the architect for coordination and management. This of course does not apply to pure engineering projects such as roadways, bridges and utility services. Perhaps representatives of the audit committee should review State contracts through the Department of Transportation and Public Facilities, to determine how many contracts are awarded to engineers and how many contracts are awarded to architects. It is specifically through this contractual relationship between consultant and owner that the prime responsibility for the protection of the public's health and welfare is established.

If representation is desired for each separate branch of the professional engineering registration and for additional branches recognized in the future, I would offer the suggestion that the State of Alaska consider separate boards of registration for architects and engineers, as thirty-nine other States and Districts have done in the past.

Such a separation of boards would respond to the review comment that the board is relativly large and the feasibility of a smaller membership should be considered.

Recommendation #2

No comment.

Recommendation #3

I concure with the suggestion that continued efforts should be made to make the statutes and regulations more relevant and workable. This is especially important in specific definations relating to the differences between architecture and engineering. Until these differences are fully interpreted for the use by governmental agencies to determine improper professional practices and the public will continue to suffer from individuals who are not qualified to provide specific services, but whose work is accepted by the reviewing agencies issuing approvals and building permits.

Recommendation #4

I concure with the recommendation for continuing education requirements. If these requirements are required I believe it is the responsibility of the State of Alaska to fund such seminars and special education classes as required to establish the availability of services to meet the requirements.

Registered professionals who are principals of a firm or who practice as a sole proprietorship have the opportunity and finances generally to attend seminars and special education clsses relating to the professions. Employees, however, may not be able to afford the hundreds of dollars required for a week of travel to other parts of the nation, to fulfill continuing education requirements. If this requirement is to truly serve the public we must have access to the educational services which were available to the bulk of the nation.

The committee might consider discusing the daily routines of the architect, engineer and land surveyor to establish the quality of continuing education which exists through the hundreds of items received and reviewed by the professional each month.

Organizations providing a continuous flow of new and revised material include the Sweets Catalog System, the Construction Specifications Institute, the American Institute of Architects, the Council for Educational Facility Planners International, Educational Facilities Lab, the Wood Institute, the Door and Hardware Institute, the National Fire Protection Association, the International Conference of Building Officials, and a mulititude of professional and technical magazines and associations. The individual professionals representing the various

disciplines of architecture, land surveying and the branches of engineering, also provide a continuous flow of new technical information to professionals.

These are but a few sources of continuing education and apply primaraly to my own professional registration, architecture. Within the field of architecture, the American Institute of Architects and the National Council of Architects Registration Boards is pursuing the concept of continuing education and preparing for this inevitable and logical requirement for registered professionals. I would suggest that the Committee consider seeking response from the various national professional associations represented by the architectural, engineering and land surveying registrants of this State.

I would call to the attention of the Committee that the board members seeking to better prepare themselves to serve the public through the board of registration should be attending regional and national workshops, seminars and conventions dealing specifically with Sunset Legislation and all of its ramifications. To date we are denied the necessary travel expenses to fully participate on a regional and national level.

Speaking from personal experience, I recently declined to participate on a regional committee of the National Council of Architectural Registration Boards, because the State of Alaska could not fund my attendance. This situation developed at a meeting in November 1978, in Portland, where I attended an WCARB Executive Committee meeting, to discuss, among other things, the Sunset Legislation, continuing education, national exams and the grading system for examining these. My attendance to that particular conference was paid for by the Western Council of Architectural Registration Boards, a region of NCARB.

Recommendation #5

I concure with the recommendations to develop reports and establish procedures and to enable the legislative and executive branches to evaluate the boards performance. During recent years, however, we have been advised that funding is limited and to limit expenditures where possible. This includes the additional days of meetings required to prepare budgets, develop goals and objectives and prepare reports.

We have been advised in the past that the preparation of budgets is not necessary as we are a portion of a larger budget and will receive a pre-established share of funding from the Department of Occupational Licensing, regardless of predefined goals and objectives or the amount of revenue generated by the professional registrants represented by collected.

Recommendation #6

The performance of services suggested will require additional staff services for our board. It is my personal opinion that if the Legislative Audit Committee desires a more indepth review and management

procedure from the Board of Registration for Architects, Engineers and Land Surveyors, serious consideration be given to the following possibilities.

1. Provide a full time executive director for the A/E & LS board.

2. Provide a second full time license examiner or administrative secretary to assist in the administrative management of board functions.

3. Provide a full time investigator to generate rapid responses to complaints and concerns of the public. If we are unable to respond in a timely manner, the public will not be served.

4. As an alternative to the growth of the board I suggest that the separation of Architects from the Engineers and Land Surveyors be considered, and that each of the boards be expanded by lay members. The work load is thus separated and the management difficulties of a large board are reduced.

Recommendation #7

The State does not provide a sufficient staff of investigators to serve the public interests. Thus, complaints are not reviewed in a timely manner and the professionals become reluctant to participate in the policing of the industry. In the past, when I have personally discussed this at meetings of the American Institute of Architects and at meetings of engineering societies, the most common response is "why should we file complaints on violations we know are happening when we also know that nothing will be done about these complaints by the division of occupational licensing or the attorney generals office."

It is my opinion that this attitude must be altered and that it can only be improved by greater support from the legislature, the attorney generals office, the governors office, the division of occupational licensing, the board of registration and especially by the state and municipal reviewing agencies who have the authority and responsibility to approve or reject projects for construction.

The reviews of documents for the issuance of building permits by municipal building officials and the review of State projects by the various State approving agencies do not always include a requirement for compliance with the States statutes as a part of the review process. This should become State and Municipal policy.

It is my opinion that the State of Alaska, through its waiver of requirements for registered personnel within the Department of Transportation and Public Facilities were job descriptions require registration, is misuse of governmental privilege. It is my opinion, that

those job descriptions requiring registered professionals are being changed, a process in the works at this time, the elimination of the States requirements for registered professionals in positions of authority dealing with professional services to the public is a misuse of government authority.

If the State denies its own obligation for registered professionals in State positions or avoids this by reducing the job description, how can the health, welfare and protection of the public be provided. It is my personal opinion that the Department of Transportation and Public Facilities, as the State agency in charge of the development of professional contracts for services involving the public, should be the leader in demanding compliance with the State statutes. It, in fact, is not and policies are being established to further reduce the requirement for registered professionals in positions of authority with the Department of Transportation and Public Facilities.

The comments presented are my personal opinions and are not intended to reflect official board policy. I would be pleased to meet with the Legislative Audit Committee or its representatives at any time to discuss my comments or provide additional information for the committee.

Very truly yours,

Jim L. Bridges
Architect, AIA

SENATE COMMERCE COMMITTEE
SENATOR BRAD BRADLEY, CHAIRMAN

RE: STATE BOARD OF REGISTRATION OF ARCHITECTS, ENGINEERS AND LAND SURVEYORS

DATE: MAY 6, 1980

SB 572 and HB 1005 are identical bills. At the last Senate Commerce Committee hearing it was felt that a CS for SB 572 should be introduced.

The only change is in Section 2, AS 08.48.091 (page 3, lines 20 and 21). Attached is a copy of CSSB 572 indicating the above-mentioned change.

3/4/80

CS FOR SENATE BILL 572

BOARD OF REGISTRATION FOR ARCHITECTS, ENGINEERS AND LAND SURVEYORS

MR. PRESIDENT, I MOVE THE ADOPTION OF THE CS FOR SB 572, WHICH IS IDENTICAL AT THIS POINT, TO THE HOUSE BILL FOR THE SAME BOARD. WE HAVE WORKED JOINTLY TO TRY TO PREVENT AN UNNECESSARY AND OFTEN TIME-CONSUMING FREE CONFERENCE COMMITTEE. NOT TOO MANY CHANGES WERE MADE TO THIS BOARD BECAUSE IT HAS BEEN OPERATING BETTER THAN MOST.

(SEC. 08.48.071)
P. 2, LS. 5/25

SECTION 1, SUBSECTION (c) PERTAINING TO RECORDS AND REPORTS, IS AMENDED SO THAT THE REPORT WHICH THE BOARD IS REQUIRED TO SUBMIT TO THE GOVERNOR ANNUALLY WILL ALSO BE SUBMITTED TO THE LEGISLATURE. THIS REPORT MUST INCLUDE THE FOLLOWING ADDITIONAL ITEMS:

(1) DATA AS TO THE ATTENDANCE OF MEMBERS OF THE BOARD AT MEETINGS;

(2) A LIST OF REGULATIONS ADOPTED, AMENDED, OR REPEALED;

(3) THE CURRENT PURPOSES AND GOALS OF THE BOARD;

(4) AND SIGNIFICANT DEVELOPMENTS IN THE FIELD OF ARCHITECTURE, ENGINEERING, AND LAND SURVEYING OF CONCERN TO THE BOARD.

THE DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT IS REQUIRED TO PRESERVE RECORDS OF THE BOARD'S PROCEEDINGS FOR FIVE YEARS AND MUST ASSEMBLE STATISTICS RELATING TO THE PERFORMANCE OF ITS STAFF AND THAT OF THE BOARD INCLUDING

(1) THE NUMBER OF ARCHITECTS, ENGINEERS AND LAND SURVEYORS REGISTERED OVER A FIVE-YEAR PERIOD.

(2) THE RATE OF PASSAGE OF EXAMINATIONS.

(3) THE NUMBER OF PERSONS APPLYING FOR REGISTRATION.

(4) AN ACCOUNT OF REGISTRATION FEES COLLECTED, AND

(5) A MEASURE OF THE CORRESPONDENCE WORK-LOAD OF THE LICENSING EXAMINER.

(SEC. 08.48.091)
P. 3, LS. 14/20

SECTION 2 IS AMENDED BY ALLOWING AN EXAMINATION TO BE GIVEN ONCE EACH YEAR, IF IT IS A NATIONAL EXAMINATION WHICH IS ONLY PREPARED ONCE EACH YEAR. THE WRITTEN EXAMINATION IS CURRENTLY HELD AT LEAST TWICE EACH YEAR. FURTHERMORE THE EXAMINATION FEE FOR APPLICANTS SHALL BE ESTABLISHED BY THE BOARD AND THE AMOUNT NOT ESTABLISHED BY LAW.

(SEC. 08.48.111)
P. 3, L. 23

SECTION 3 STATES THAT THE BOARD MAY NO LONGER TAKE DISCIPLINARY ACTION AGAINST A PERSON OR CORPORATION WHO IS FOUND GUILTY OF A CRIME INVOLVING MORAL TURPITUDE, SINCE THIS IS AN EXTREMELY VAGUE STANDARD.

(SEC. 08.48.171)
P. 4, L. 16

SECTION 4 LIMITS THE BOARD'S DISCRETION TO REQUIRE EVIDENCE OF MORE THAN EIGHT YEARS OF ANY COMBINATION OF EDUCATION, EXPERIENCE OR TRAINING FROM AN APPLICANT FOR REGISTRATION AS A LAND SURVEYOR.

(SEC. 08.48.221)
P. 4, L. 26

SECTION 5 REQUIRES THE BOARD TO ADOPT REGULATIONS GOVERNING THE USE OF SEALS BY A REGISTRANT UNDER THIS CHAPTER.

(SEC. 08.03.010(c))
P. 5, L. 8

SECTION 6 ESTABLISHES JUNE 30, 1984, AS THE TERMINATION DATE FOR THE BOARD OF REGISTRATION FOR ARCHITECTS, ENGINEERS AND LAND SURVEYORS.

(SEC. 08.03.010 (B)(6))
P. 5, L. 11

SECTION 7 REPEALS THE JUNE 30, 1980 SUNSET PROVISIONS FOR THE BOARD.

P. 5, L. 12

SECTION 8 PROVIDES THAT THIS ACT TO TAKE EFFECT JULY 1, 1980, ONE DAY AFTER THE BOARD IS SCHEDULED TO TERMINATE UNDER EXISTING LAW.

Alaska State Legislature

Senate

Committee on Commerce

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

March 13, 1980

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Your Senate Commerce Committee has had under consideration for "Sunset" review the Board of Registration for Architects, Engineers and Land Surveyors pursuant to your referral under AS 44.66.050 and AS 08.03.010.

In accordance with the statutory requirements, a public hearing was held on the review of this board, at which written and oral testimony was received. Members of the board testified in person or by teleconference. The Committee considered the proposed budget of the board for FY 1981 and particularly examined the performance audit of the activities of the board prepared by the Legislative Audit Division.

Guided, in part, by the report prepared by the Legislative Audit Division the Committee took into consideration the factors required to be considered under AS 44.66.050(c).

Your Commerce Committee thereby makes the following findings: The Commerce Committee concurs in part in the findings made by the Division of Legislative Audit in considering the factors required for consideration under AS 44.66.050(c), as they appear on pages 9 through 14 of the Performance Review of the Board of Registration for Architects, Engineers and Land Surveyors prepared by the Division of Legislative Audit, dated May 11, 1979, which is hereby incorporated by reference as though fully set out herein.

In brief, we do not concur in recommendation number one that the board have lay representation. We feel the public is adequately represented by having three separate professions

on the board, although some adjustment of membership allocation may be necessary.

We concur in recommendation number two that the board should revise its procedures for the Alaska portion of the land surveying examination, and concur in recommendation number three that the board should continue its efforts to make the statutes and regulations more relevant and workable.

We do not concur in recommendation number four requiring continuing education for architects, engineers and land surveyors, although the board should take such action as it can to encourage voluntary continuing education. With so many different professions included under this board, it would be too unwieldy for the board to promulgate specific regulations as to continuing education for each profession, particularly considering the current workload of the board. The marketplace will also assure professionalism in this area: in these highly technical and ever-changing fields, ongoing education is necessary for the economic survival of the architect, engineer or land surveyor.

We concur in recommendation number five that the board should develop reports and procedures that will enable the legislative and executive branches to evaluate its performance.

We concur in recommendation number six that the Division of Occupational Licensing should collect, record and maintain for five-year periods files and statistics of licensing and testing applicants and related workload of the licensing examiner.

We concur in recommendation number seven that the Division of Occupational Licensing should handle investigations in a more comprehensive and timely manner. We feel very strongly about this and have received testimony that the lack of speedy investigations has hampered all of the boards which we have had under "Sunset" review.

Therefore, pursuant to AS 44.66.050(d) the Committee on Commerce of the Alaska State Senate offers the following summary and recommendations:

The Board of Registration for Architects, Engineers and

Land Surveyors addresses a real need in protecting public safety and property rights. The nature of the professions involved is highly advanced and complex, and members of the lay public cannot easily judge basic competence in these fields. Therefore, we do not think it appropriate to eliminate this board.

We have found that this board has engaged to some degree in "turf protecting," that is limiting the entrance of applicants into at least one of these fields. Specifically, we believe the experience (as an equivalent to formal education and experience) required to take the land surveyor's examination, set by the board at 12 years, is too long. We believe there should be a statutory requirement of eight years' experience with three years experience in charge of the work, and that other similar and related requirements should be addressed by statute, not regulation. We believe the net effect of limiting entry into the surveying field will increase costs and slow down the transfer of public lands into private ownership, at a time when the Legislature has specifically provided for transfer of land interests for various private uses.

We further find that the requirement for inclusion of a photograph with the application for licensure is unnecessary and could be used to discriminate against certain persons because of race, sex, etc. The board should remove this requirement.

Furthermore, it is the belief of this committee that a separate Alaska examination is not necessary for surveyors licensed in another state which has licensing requirements equivalent to those of the State of Alaska, and which has a "public lands" history similar to Alaska's. We feel these surveyors should be licensed by simple endorsement. In the engineering field, we believe that more specialties should be recognized. For instance, Alaska has a particular interest in the licensing of competent and professional petroleum engineers.

Statutory changes are needed to provide for licensing by endorsement for those engineering specialties for which the State of Alaska has no exams.

Therefore, the Committee feels that it has adequately addressed the recommendations and categories required under

AS 44.66.050(d), and offers several further recommendations.

The Commerce Committee recommends that with the changes stated in this report the Board of Registration for Architects, Engineers and Land Surveyors continue for another four years, that is, that the repealer with regard to the activities of that board be amended to read 1984.

A bill will be introduced by the Commerce Committee facilitating the changes and recommendations in this report.

Respectfully submitted,

Senator Brad Bradley
Chairman
Senate Commerce Committee

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M April 30, 1980

SUBJECT: Section-by-section analysis of HB 1005 continuing the Board of Registration for Architects, Engineers, and Surveyors. (Work Order Number 8533)

TO: Senator Brad Bradley
Chairman, Senate Commerce Committee

FROM: Tamara Brandt Cook TBC
Legislative Counsel

You have requested a section-by-section analysis of Senate Bill 572 entitled: "An Act continuing the existence of the State Board of Registration for Architects, Engineers and Land Surveyors and amending the statutes relating to its powers and responsibilities; and providing for an effective date."

Section 1. Subsection (c) is amended so that the report which the board is required to submit to the governor annually will also be submitted to the legislature. This report must include the following additional items: data as to the attendance of members of the board at meetings; a list of regulations adopted, amended, or repealed; the current purposes and goals of the board; and significant developments in the field of architecture, engineering, and land surveying. The Department of Commerce and Economic Development is required to preserve records of the board's proceedings for five years and must assemble statistics relating to the performance of its staff and that of the board covering such things as the number of architects, engineers and land surveyors registered over a five year period, the rate of passage of examinations, the number of persons applying for registration, an account of fees collected and data concerning the correspondence work load of the licensing examiner.

Section 2. The existing law provides that the examination shall be given twice a year. The amendment allows an examination to be given once each year, if it is a national examination which is only prepared once each year.

Section 3. This section deals with the power of the board to take disciplinary action in certain circumstances. It is amended so that the board may no longer take disciplinary action against a person or corporation who is found guilty of a crime involving moral turpitude, since this is an extremely vague standard.

Section 4. The existing law requires an applicant to be of good character and reputation, and submit evidence of education, training and experience. The amendment limits the board's discretion to require evidence of more than 8 years of any combination of education, experience or training from an applicant for registration as a land surveyor.

Section 5. The board is required to adopt regulations governing the use of seals by a person registered under this chapter. Existing law provides that final drawings, specifications, surveys, plats, plates, reports and similar documents must be stamped with a seal.

Section 6. June 30, 1984 is the new termination date for the State Board of Registration for Architects, Engineers, and Land Surveyors.

Section 7. The provision which terminates the board as of June 30, 1980 is repealed.

Section 8. The effective date of this act is July 1, 1980, one day after the board is scheduled to terminate under existing law.

If you have any further questions, please contact me.

Alaska Society of Professional Land Surveyors

P.O. BOX 2106
ANCHORAGE, ALASKA 99501

March 19, 1980

Brad Bradley, Chairman
Senate Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Mr. Bradley:

The purpose of this letter is to inform you of the wishes and desires of the Alaska Society of Professional Land Surveyors as they relate to professional registration being sought by the Alaskan Chapter of the American Society of Landscape Architects. In order that this letter might, in fact, reflect a consensus of those individuals currently registered as professional land surveyors, within the State of Alaska, a poll was undertaken. The results of this poll, to be further herein enumerated, overwhelmingly indicate a desire that landscape architects not be granted professional status by inclusion as an additional discipline within the registration act governing architects, engineers, and land surveyors.

Four hundred sixty copies of the polling questionnaire were sent to professional land surveyors registered to practice within the State of Alaska and seventy-four responses were received, indicating a response of 16.1%. Following are those questions contained in the questionnaire and the responses elicited:

1) Have you read the proposed registration act for landscape architects, herewith, enclosed?

   Yes, 98.6% No, 1.4%

2) Do you feel registration of landscape architects would compliment your endeavors?

   Yes, 7.1% No, 88.6% Undecided, 4.3%

   Indicating that those with a definite opinion were:

   Yes, 7.5% No, 92.5%

3) Do you feel registration of landscape architects would compromise your endeavors?

Yes, 57.1% No, 32.9% Undecided, 10.0%

Indicating that those with a definite opinion stated:

Yes, 63.5% No, 36.5%

4) Would you favor registration of landscape architects if a "grandfather" clause was included pertaining to land surveyors acquiring registration as landscape architects, at least as pertains to subdivision design?

Yes, 17.1% No, 75.7% Undecided, 7.2%

Indicating that those with a definite opinion were:

Yes, 18.5% No, 81.5%

5) If landscape architects do acquire registration, do you favor their representation on the Board of Registration for architects, engineers, and land surveyors?

Yes, 32.9% No, 65.7% Undecided, 1.4%

Indicating that those with a definite opinion were:

Yes, 33.3% No, 66.7%

6) Would you favor landscape architects registration if any work done by them on subdivision design were required to be done in concert with a land surveyor?

Yes, 14.3% No, 80.0% Undecided, 5.7%

Indicating that those with a definite opinion were:

Yes, 15.2% No, 84.8%

7) Do you feel the responsibility therein should be established by the affixing of their seal to the subsequent subdivision plat?

Yes, 22.9% No, 68.6% Undecided, 8.5%

Indicating that those with a definite opinion were:

Yes, 25.0% No, 75.0%

8) Do you now favor registration of landscape architects?

Yes, 10.0% No, 84.3% Undecided, 5.7%

Indicating that those with a definite opinion were:

Yes, 10.6% No, 89.4%

9) Are you adamantly opposed to the registration of landscape architects?

Yes, 71.4% No, 25.7% Undecided, 2.9%

Indicating that those with a definite opinion were:

Yes, 73.5% No, 26.5%

10) Would you favor registration of landscape architects if same could be accomplished without compromising your present position as a land surveyor, particularly as relates to the design of subdivisions?

Yes, 27.1% No, 65.7% Undecided, 7.2%

Indicating that those with a definite opinion were:

Yes, 29.2% No, 70.8%

In addition, the questionnaire contained question number eleven; Under what conditions or changes in the registration act would you favor registration of landscape architects? The overwhelming response to this particular question was, "none", indicating that no changes would be desirable nor would registration of landscape architects be desirable.

In addition, question number twelve asked; If the foregoing questions do not clearly describe your feelings on this subject, please respond in essay following. The overwhelming consensus of those responding in essay indicated that present statutes cover those areas in which landscape architects purport to be concerned, further, that registration of landscape architects would result in further cross discipline jurisdictional disputes, and would result in unnecessary additional expense to the general public and may, in fact, create a situation wherein the public welfare might be compromised rather than reinforced.

In summation, it is the feeling of the Alaska Society of Professional Land Surveyors that registration of landscape architects is neither necessary nor desirable.

Respectfully yours,

W. Ray Niemi

Senator W. E. Bradley, Chairman
Senate Commerce Committee
1016 West Sixth Avenue, Suite 201
Anchorage, Alaska 99501

Dear Senator Bradley:

Thank you for the opportunity to testify on behalf of the Board of Registration for Architects, Engineers and Land Surveyors. I feel that it is very important that this Board be continued, as the regulation of the professions under the purview of this Board helps to protect the people of the state of Alaska in two primary ways. First, it protects the consumers of services rendered by architects, engineers and land surveyors to insure that they are not victimized by incompetent or dishonest professionals. Secondly, regulation protects the public at large. The primary responsibility of architects, engineers and land surveyors is to design facilities or projects that are safe, durable and meet reasonable environmental standards. In other words, the results of faulty design may be injurious not only to the person who engages the professional, but also to third parties. Specifically, regulation of these professions helps protect life, health, safety, and economic well being of the residents and visitors of the state.

In Alaska, applicants for registration must demonstrate not only an understanding of the fundamentals of the profession, but must demonstrate a minimum understanding of specific Alaska conditions, such as arctic and sub-arctic construction and seismic forces.

A recommendation of the legislative auditors was to reconsider the Board composition and size. They felt that the total number of members, the current professional representation and the absence of public members should be investigated. I would like to point out that this Board is actually three boards regulating three separate professions, combined into one entity for greater efficiency. I see no reason to separate the Board into three individual agencies since I do not feel that this type of move would result in either improved efficiency or effectiveness.

p.o. box 310, juneau, alaska 99802 (907) 586-1070

In the audit report a comparison was drawn to create a statistical relationship between the number of registrants in each profession and the number of Board members from each profession. I think that this relationship is meaningless and what should be considered instead is the number of professions regulated and the minimum number of Board members required to act on matters relating to each profession. Consideration must also be given to the similarities and differences in regulating the various branches of each profession. In particular, with the profession of architecture, the education, examination and training requirements are completely different from engineers or land surveyors. Whereas among various branches of engineering, many of these criteria are identical or very similar. My point is that for the regulations of architecture to be undertaken democratically, a minimum of three members from the profession must serve on the Board.

The auditors also recommend that public members be added to the Board; I have no objection to this recommendation. I am, however, concerned that the addition of public members not result in the decrease in the number of professionals on the Board for the same reasons I previously stated. I believe public members could be very effective in formulating policy and in the enforcement function of the Board, but that they would be less effective and often unqualified in reviewing applications, arctic and sub-arctic treatises, or examinations. In summary, I would like to see one public member added to the Board, but I feel that it is very important that this public member not be an advocate for special interests or have an inherent conflict of interest due to his profession or avocation, for instance a building contractor or supplier.

Since these professions are traditionally involved in interstate commerce and since members of the profession tend to move from state to state, it is very important that regulation of these professions be consistent with other states' regulations. Speaking primarily for the profession of architecture, in the past individual states had reciprocity agreements to allow architects registered in one state to be able to be registered in other states. With the increasing number of jurisdictions and the impossible task of each state board having to review the requirements and examinations of every other state, this process became unwieldy and impractical. Today the Alaska Board is a member of the National Council of Architectural Registration Boards (NCARB) which is a national clearing house for registration activities. The member boards, as a group working through the NCARB, study and recommend standards for training, education, and examination, which when adopted by the member boards individually, become the standards for registration. All states use the national examinations developed by NCARB and all states recognize the NCARB

certificate as evidence of an applicant's qualifications to practice. This process makes comity registration much more equitable. As you can see, with this Board's relationship to the national organization, we cannot operate on a strictly statewide basis. Approximately 60% of all architects who are holding current registration in the state, reside in other states, and all of the professionals received their formal education in institutions outside the state. Therefore, in order for Alaska to have any appreciable input into the standards governing registration, education, examination and training, we must participate actively in the national organizations at committee meetings, regional conferences and national meetings. Our ability to do this in recent years has been severely curtailed by lack of funding support to enable Board members to attend these important events. According to the legislative audit report, the AELS Board is one of the few boards operating in the "black." We therefore do not feel that increasing our budget only slightly to cover these travel expenses is an unreasonable request. The Board has always sought to relieve the state of any financial burdens for regulating these professions by keeping fees in line with operating expenses. We think that a closer relationship between the Board's budget and Board's revenue would help to provide better regulation of these professions. Again, I feel that it is imperative that the Alaska Board continue to be involved with the national registration organizations since our Board has adopted these national standards and is a member of these organizations. If I can make an analogy, restricting this Board's participation by not allowing direct participation at the regional and national level is similar to a legislator being elected to represent his district, but not being allowed to attend the legislative session in the Capitol.

Again, I appreciate this opportunity and look upon the sunset review process as a means of improving our Board's effectiveness.

Sincerely,

Wayne Jensen
AELS Board Member
WJ:do

October 22, 1979

Honorable Brad Bradley, Chairman
Senate Commerce Committee

Dear Senator Bradley:

I have previously replied to the Division of Legislative Audit performance review of the Board of Registration for Architects, Engineers and Land Surveyors and have found that there is a question concerning the Board's reply to the audit report recommendation No. 1. I wish at this time to make it clear that the Board absolutely does not wish to form three boards from the three discipline boards we now have. The reference to three boards in my reply to the audit report was to suggest an alternative solution to the equitable board representation of all licensed branches. This alternative is not an economical solution and therefore would not be satisfactory to any of the Board members. The Board has found that the present board make-up works very well and has drawn no complaints from the public sector or from the professional sector whom we register. The present board is made up of nine members: because of dual registration four of these members represent land surveyors, three of these four also represent civil engineers and one represents mining engineers, the other five members with single registration consist of one mechanical engineer, one electrical engineer and three architects. The Board has found that this arrangement performs very satisfactorily and also provides us with members who would be lay persons to the other two professions on the Board.

I appreciate the opportunity to participate in the Senate Commerce Committee sunset hearing and will answer any questions that I can concerning the Board's activity.

Very truly yours,

W. I. DeBoff
President
Board of Architects,
Engineers and Land Surveyors

Subj: Sunset Review of Board of Registration for Architects, Engineers and Land Surveyors

Dear Mr. Bradley:

The following is a recap of the presentation given by Michael E. Plunkett, AIA, President of the Alaska Professional Design Council:

The APDC represents six Professional Design Societies consisting of: Architects, Engineers, Land Surveyors, 1/3 are in private practice, 1/3 work in government, and 1/3 work in construction and other related fields.

The membership comprises some 1,200 individuals. This represents a vast majority of the 1,531 registered Alaska resident architects, engineers and land surveyors.

Each society received a copy of the Performance Review of May 11, 1979, and was asked to respond to the important points which more or less follow the key recommendations made in the report.

The APDC recommends continuance of the Board.

Regarding the recommendations, the APDC has the following comments:

Recommendation 1: A. There was no objection to one additional lay member on the Board.

B. Five of the six societies feel the present composition of the Board regarding architects, engineers and land surveyors should not change.

C. The sixth society wanted a slight change, that being that the Land Surveyer position would not be a dual registrant.

D. Definitely not a smaller board because there are three different professions being regulated.

Recommendation 2: Agree as written.

Recommendation 3: Agree as written.

Recommendation 4: Continuing education as a requirement. There was a unanimous agreement that statuatory requirement for continuing education should not be introduced. The importance of continuing education is well known and recognized. It is felt the professional societies present ongoing continuing education programs at National, Regional, and the Alaskan levels to provide an adequate dissemination of professional knowledge to all registered and intern professionals.

Pragmatically, until complaints of existing requirements are properly investigated and resolved, it seems pointless to add another echelon of regulations which at present would be unenforcable.

Practitioners have a better understanding of changes taking place in professions.

Recommendation discussed public trust versus public health and welfare. Questioned whether continuing education is necessary for the public health and welfare to maintain an acceptable level of professional competence. It is, however, certainly very important to public interest. The need for an additional law is questioned.

Recommendation 5: Regarding reports and procedures, no objection was raised. APDC is unanimous in supporting increase in AELS Budget to more or less be equal to income received from registrants. There is presently quite a disparity between income received and the amount budgeted to AELS.

Such an increase (and fee increase if necessary) would allow for a part-time or full-time executive director who could fulfill the reporting requirements of this recommendation.

Recommendation 6: No objection to this recommendation. The executive director could assist with this record maintenance.

Recommendation 7: Investigations should be accomplished in a more comprehensive and timely manner. Unamimous agreement that this process must be accelerated and revamped.

The executive director suggested above could handle a great deal of preliminary investigative work on complaints and allegations and could probably dispose of a great many of the complaints. They could then be handled with dispatch.

The present Ombudsmen's organization is one example of a workable and exigent method of dealing with complaints.

Finally, the fifth point solicited concerns a current practice that may be allowed by Statute but for which certain Statuatory revisions may be required.

Current Statute allows State agencies' personnel holding professional positions not to require registration unless job description specifically requires registration. Waivers are possible.

State DOTPF is currently changing job descriptions to eliminate requirement for registration.

As a result, design accomplished by State agencies are not stamped by disciplines as required by professionals in private or Municipal sector.

One example is the new Juneau Douglas Bridge which according to our understanding has no professional seals attached. Were this structure designed by a consulting team, at least five different seals would appear on the documents and as many as seven might appear depending on the elements included as a part of the design.

In short, State agencies should be required to have professional registration and stamped documents just as others.

This concludes the APDC's testimony.

Sincerely,

Michael E. Plunkett, AIA
President

Subject: Performance Review of the Board of Registration for Architects, Engineers and Land Surveyors

Gentlemen:

The Alaska Society of Professional Land Surveyors has reviewed the report of the Division of Legislative Audit entitled "A PERFORMANCE REVIEW OF THE BOARD OF REGISTRATION FOR ARCHITECTS ENGINEERS AND LAND SURVEYORS" dated May 11, 1979. We have the following comments concerning the auditor's findings and recommendations as set forth in the report:

A. Recommendation No. 1

A.S.P.L.S. supports the auditor's recommendations concerning the makeup of the Board of Registration for Architects, Engineers and Land Surveyors subject to the following provisions:

1. No additional professions will be included within the Board's jurisdiction.

2. The present number of licensed Board members will not be reduced.

3. At least one licensed land surveyor who does not hold dual registration will be included on the Board.

4. Not more than two lay members may be added to the Board.

5. Functions of lay members of the Board shall be restricted to matters of policy. They shall not participate as voting members in technical activities.

B. Recommendation No. 2

A.S.P.L.S. supports the auditor's recommen- concerning revision of the land surveying examination procedures. Further, the society is willing to provide a committee to develop examination questions, to assist in grading and to otherwise support the Board with respect to the land surveying examination.

Recommendation No. 3

A.S.P.L.S. supports the auditor's recommendation concerning efforts to make the statutes and regulations more relevant and workable.

D. Recommendation No. 4

A.S.P.L.S. supports the concept of continuing education to be carried out under existing regulatory authority but objects to introduction of legislation establishing statutory requirements.

E. Recommendation No. 5

A.S.P.L.S. does not oppose the auditor's recommendations concerning development of reports and procedures for evaluation of the Board's performance.

F. Recommendation No. 6

A.S.P.L.S. does not oppose the auditor's recommendations concerning retention of records of the Board.

G. Recommendation No. 7

A.S.P.L.S. supports the auditor's recommendations concerning the handling of investigations by the Division of Occupational Licensing.

The Alaska Society of Professional Land Surveyors believes that the Board of Registration for Architects, Engineers and Land Surveyors performs a very essential service in protecting the health, welfare and safety of the public and in regulating the professions. We further believe that the Board should be strengthened through authorization, by statute, of an Executive Director to assist in day-to-day Board activities as well as to make it more effective in the enforcement of the licensing statute and regulations. We commend the Board for its past activities and strongly urge the Legislature to assure its continuing existence.

Very truly yours,

Alaska Society of Professional
Land Surveyors

Joseph C. Burch

Juneau, Alaska

Dear Senator Bradley:

I would like to thank you for your support on the current issue concerning Alaska's Board of Examiners for Architects, Engineers and Land Surveyors.

As the House Commerce Committee reviews the actions of the professional boards, the delegated authority of this particular board must be closely examined.

As you are aware, the requirements set forth by the Board necessary to engage in the practice of Land Surveying are overly stringent and unjustified. All but three states in the U.S. define the Professional Examination requirements in their State Statutes, rather than delegating the power to the Board to arbitrarily regulate as they see fit.

The recent changes in experience requirements, coupled with necessary scholastic achievements, have affected many Alaskans who are or should be in a position to apply for professional status.

We have brought to light our concerns via recent tele-conferences, letters and personal representation in Juneau and feel your endorsement in our behalf will play a vital role in correcting the misuse of authority reflected in these proceedings.

Yours truly,

Robert Palmer

Robert Palmer

Land Surveyor

The Honorable W.E."Brad[illegible]
Chairman, House Commerc[illegible]e
Pouch V
Juneau, Ak. 99811

Dear Senator Bradley,

I would urge you to support the Bill coming out of the House Commerce Committee limiting the power of the Board of Architects, Engineers and Land Surveyors to set minimum educational and experience requirements; and to revise the experience only qualifications from twelve years to six years which is close to the national average.

Sincerely,

Morris L. Wendte
3500 E.42nd Ave.

AMENDMENT

Mr. Pres.: I move the adoption of the ~~Senate Substitute~~ amendment

By: Senate Commerce

OFFERED IN THE SENATE:

To: _____ SENATE BILL No. _____

HOUSE BILL No. 1005

PAGE: 3 LINE: 20 and 21

Delete the words after board, "in an amount not to exceed $50"

REASON: This was a drafting error. It was not intended that the board (be required to) (the commission) would limit fees to $50.

MIKE:

This amendment and bill is identical to the (Senate) one [redacted]

[redacted]

Architects

AMENDMENT #1

OFFERED IN THE SENATE: BY: Senate Commerce

To: _____ SENATE BILL No. _____

HOUSE BILL No. 1005

PAGE: 3 LINE: 20 and 21

Delete the words after board, "in an amount not to exceed $50"

~~HOUSE~~ BILL ~~NO.~~ 1005

BOARD OF REGISTRATION FOR ARCHITECTS, ENGINEERS AND LAND SURVEYORS

MR. PRESIDENT, I MOVE THE ADOPTION OF THE ~~CS FOR SB~~ amendment; ~~IDENTICAL AT THIS POINT, TO THE HOUSE BILL FOR THE SAME BOARD. WE HAVE WORKED JOINTLY TO TRY TO PREVENT AN UNNECESSARY AND OFTEN TIME-CONSUMING FREE CONFERENCE COMMITTEE.~~ NOT TOO MANY CHANGES WERE MADE TO THIS BOARD BECAUSE IT HAS BEEN OPERATING BETTER THAN MOST. ~~DOES IT? I DON'T KNOW! NOT RECOMMENDED BY AUDIT DIV. TO BE TERMINATED!~~

(SEC. 08.48.071) P. 2, Ls. 5/25

SECTION 1. SUBSECTION (c) PERTAINING TO RECORDS AND REPORTS, IS ~~AMENDED~~ changed SO THAT THE REPORT WHICH THE BOARD IS REQUIRED TO SUBMIT TO THE GOVERNOR ANNUALLY WILL ALSO BE SUBMITTED TO THE LEGISLATURE, ~~THIS~~ and that the REPORT MUST INCLUDE THE FOLLOWING ADDITIONAL ITEMS:

(1) DATA AS TO THE ATTENDANCE OF MEMBERS OF THE BOARD AT MEETINGS;

(2) A LIST OF REGULATIONS ADOPTED, AMENDED, OR REPEALED;

(3) THE CURRENT PURPOSES AND GOALS OF THE BOARD; and

(4) ~~AND~~ SIGNIFICANT DEVELOPMENTS IN THE FIELD OF ARCHITECTURE, ENGINEERING, AND LAND SURVEYING OF CONCERN TO THE BOARD.

THE DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT IS REQUIRED TO PRESERVE RECORDS OF THE BOARD'S PROCEEDINGS FOR FIVE YEARS AND MUST ASSEMBLE STATISTICS RELATING TO THE PERFORMANCE OF ITS STAFF AND THAT OF THE BOARD INCLUDING

(1) THE NUMBER OF ARCHITECTS, ENGINEERS AND LAND SURVEYORS REGISTERED OVER A FIVE-YEAR PERIOD.

(2) THE RATE OF PASSAGE OF EXAMINATIONS.

(3) THE NUMBER OF PERSONS APPLYING FOR REGISTRATION.

(4) AN ACCOUNT OF REGISTRATION FEES COLLECTED, AND

(5) A MEASURE OF THE CORRESPONDENCE WORKLOAD OF THE LICENSING EXAMINER.

(SEC. 08.48.091) P. 3, Ls. 14/20

SECTION 2 IS AMENDED BY ALLOWING AN EXAMINATION TO BE GIVEN ONCE EACH YEAR, IF IT IS A NATIONAL EXAMINATION WHICH IS ONLY PREPARED ONCE EACH YEAR. THE Current State WRITTEN EXAMINATION IS CURRENTLY HELD AT LEAST TWICE EACH YEAR. FURTHERMORE, THE EXAMINATION FEE FOR APPLICANTS SHALL BE ESTABLISHED BY THE BOARD AND THE AMOUNT NOT ESTABLISHED BY LAW. (This is a result of the C.S.)

(SEC. 08.48.111) P. 3, L. 23

SECTION 3 STATES THAT THE BOARD MAY NO LONGER TAKE DISCIPLINARY ACTION AGAINST A PERSON OR CORPORATION WHO IS FOUND GUILTY OF A CRIME INVOLVING MORAL TURPITUDE, SINCE THIS IS AN EXTREMELY VAGUE STANDARD. (The BOARD CODE OF ETHICS COVERS MORAL CHARACTER WELL ENOUGH).

(SEC. 08.48.171) P. 4, L. 16

SECTION 4 LIMITS THE BOARD'S DISCRETION TO REQUIRE EVIDENCE OF MORE THAN EIGHT YEARS OF ANY COMBINATION OF EDUCATION, EXPERIENCE OR TRAINING FROM AN APPLICANT FOR REGISTRATION AS A LAND SURVEYOR.

(SEC. 08.48.221)
P. 4, L. 26

SECTION 5 REQUIRES THE BOARD TO ADOPT REGULATIONS GOVERNING THE USE OF SEALS BY A REGISTRANT UNDER THIS CHAPTER.

(SEC. 08.03.010(c))
P. 5, L. 8

SECTION 6 ESTABLISHES JUNE 30, 1984, AS THE TERMINATION DATE FOR THE BOARD OF REGISTRATION FOR ARCHITECTS, ENGINEERS AND LAND SURVEYORS.

(SEC. 08.03.010 (B)(6))
P. 5, L. 11

SECTION 7 REPEALS THE JUNE 30, 1980 SUNSET PROVISIONS FOR THE BOARD.

P. 5, L. 12

SECTION 8 PROVIDES THAT THIS ACT TO TAKE EFFECT JULY 1, 1980, ONE DAY AFTER THE BOARD IS SCHEDULED TO TERMINATE UNDER EXISTING LAW.

Mr. Pres., I urge the passage of this bill.

Bradley

BOARD OF ARCHITECTS, ENGINEERS & LAND SURVEYORS

August 24, 1978

Mr. L. E. Breeding
1343 H Street
Anchorage, Alaska 99501

Dear Mr. Breeding:

Your letter of July 12, 1978 to Mr. Douglas Ackley was given to me since Mr. Ackley is no longer a member of the Board of Architects, Engineers and Land Surveyors.

Your complaint against Mr. Charles E. Overton was turned over to the investigator and I'm sorry to say we are as much in the dark as you are. We have requested a status review of your complaint from the investigation and you will be informed as soon as we hear from them.

Sincerely,

Wallace DeBoff

The Alaska Society of Professional Engineers

Address Reply To:

September 29, 1978

H. Phillip Hubbard, Commissioner
Department of Commerce and
Economic Development
State of Alaska
Pouch D
Juneau, Alaska 99811

Dear Commissioner Hubbard:

Further reference is made to a complaint by Mr. James P. Sheldon to the Division of Occupational Licensing against Mr. Charles Overton. The Alaska Society of Professional Engineers has been requested by one of its members to inquire as to the status of action on Mr. Sheldon's complaint against Mr. Overton. Enclosed for your further reference is the following:

1. Copy of the complaint, undated.

2. Copy of a letter from Mr. L.E. Breeding dating December 27, 1977 to the Board of Architects, Engineers and Land Surveyors.

3. A copy of a letter from Mr. L.E. Breeding dated July 12, 1978 to the Board of Architects, Engineers and Land Surveyors.

4. A copy of a letter from Mr. Wallce Debaugh, President, Board of Architects, Engineers and Land Surveyors, dated August 24, 1978 to Mr. L.E. Breeding.

Feeling little satisfaction from his previous efforts, Mr. Breeding has requested the ASPE to lend its assistance in determining what action is being taken on this complaint. ASPE feels obligated to both professional engineers practicing in the State of Alaska and to the general public to provide assistance in legitimate complaints regarding the practice of engineering. It is to this end I am writing this letter.

Mr. Breeding has been unable to determine if any action is being taken to resolve this complaint. I advised the Board of Architects, Engineers and Land Surveyors of ASPE's concern in this matter at their meeting in Anchorage on September 21st. I was advised by the board of the large number of complaints in the Attorney General's Office submitted by several of the Boards within Occupational Licensing some of which, I understand, have been pending for quite some time. The board was unable to shed any additional light on the disposition of this particular complaint.

Because we feel that it is so vitally important that the design profession take an active concern in such matters I would very much appreciate any information you can provide me regarding this complaint. I appreciate your interest and concern in this matter.

Very truly yours,

Kenneth B. Walch

To: Sunset Laws Hearing Committees

The Sunset Law legislation appears to be an attempt to take a step in the right direction to cut expenses in governmental bureaucracy. The thought is commendable. But the mechanism instigated in this legislation can wreak havoc on the welfare of the general public if good judgment is not used by the legislature in evaluating the benefits of the existence of these boards of registration. These boards came into existence originally in an attempt to protect the general public. Some method was required to prevent the unqualified person from misrepresenting his abilities and thus "ripping off" the general public. The State set up certain requirements and tests that attempted to ascertain that the individual that fulfilled these requirements set down by the State was, in the eyes of the State, qualified to sell their services in the particular field of endeavor. It also put a responsibility on the licensed individual to perform his services satisfactorily or be subject to the withdrawal of his license to practice. This responsibility and duty placed upon the licensee is the factor that attempts to guarantee the welfare of the general public.

To best illustrate the benefits of the existence of boards of registration, let us take the negative approach and assume that all boards were abolished. What would be the results? Think of a society in which no registration was required for medical doctors, and anyone who wished could practice as a doctor or a surgeon, with no guarantee of any required qualifications. Think of the effect of this on the welfare of the general public and the havoc that would result. If the pseudo doctor made a mistake, he could bury it, and go on practicing on other patients. This example with the medical profession is probably the most extreme example of proficiency required, and all of us would agree that the medical profession should require licensing. But all of the various boards in the professional fields perform some benefits in protecting the welfare of the general public. Otherwise it is doubtful that they would have been organized originally. If they furnish any benefit to protecting the public against fraud and misrepresentation, then they are beneficial and should be retained. Most of the boards support themselves with fees from licensing. In fact, there should be more boards or licensing required of trades and professions to try to guarantee that the general public will not get exploited by unqualified personnel misrepresenting their proficiency. It would be a happy day if the public could with confidence hire a trade or profession and know that the work would be satisfactory and first quality. The threat of

the possibility of loss of licensing and thus the loss of the right to practice the profession does much to insure that satisfactory work will be done.

My particular field is engineering. It is unthinkable to me to imagine what would be the results if the board of Architects, Engineers, and Land Surveyors were abolished. Anyone could then design a public building, with no qualifications required. If the building fell down or burned down or was detrimental to the occupants health because of inadequate design, where would the responsibility lie? How many banks or lending agencies would loan monies for construction on a design done by unqualified personnel? What would the insurance companies charge for premiums when there was question as to the adequacy of the design? Right! They would back off. The stamp on the construction documents is a guarantee of a level of proficiency, and this level is accepted by lending agencies, insurance companies, and plan review agencies. The owners and the occupants of the buildings would be the loosers if registration were not a requirement for design of public buildings.

Better enforcement of the existing laws and regulations is required. Infractions of the existing regulations go unpunished because of lack of adequate enforcement personnel. Therefore the benefits to the general public exhibited by this board are not as great as they should be. They could be much better with better enforcement. The codes and laws were made and enacted by the State of Alaska for all to follow. Enforcement agencies have been set up by the State to see that all work is done according to the current codes, such as the building code, fire code, plumbing code, electrical code, mechanical code, etc. Yet the State of Alaska agencies are one of the worst offenders of their own codes. Excuses such as "not enough monies available" or "not enough time" are not accepted by the State for the private sector, but are used by the State in their own construction forces. So the work is installed not in compliance with current codes which the public sector must follow. This is double standards, and should be stopped. The State of Alaska should be the example of compliance with their own codes. The present laws require that all design for public structures and buildings be done by a person registered in the State and qualified in the particular field, and that the drawings bear his stamp and be signed by him. Yet the State of Alaska does design work, done by some unregistered personnel, and it does not bear the registration stamp. A typical example is the new Juneau-Douglas bridge design done by the State of Alaska. Again this is an example of double standards. This board needs some method of getting better enforcement of our existing statutes. Without adequate enforcement, the statutes are worthless. We have been hampered for many years with this lack, and cannot perform our function to the general public as we should. If the State cannot furnish adequate enforcement, then give us the power to do our own enforcement. Many complaints of infractions of the statutes have been entered for this board in the past, but they die of old age in someone's HOLD basket.

In summary, if there is any doubt as to the benefit of a board of registration to the general public welfare, leave it. The boards usually pay their own way from fees from licensing, so they are no large drain on the budget. If they do not pay their own way, then the licensing could be increased. Secondly, increase the enforcement of the existing statutes. Public confidence is destroyed by exhibits of double standards and partial enforcement. Let the individual board do its own enforcement. They are the experts in that field, and know what is required.

Cordially,

Vernon Akin

Vernon Akin, PE

PROFESSIONAL ENGINEERS IN PRIVATE PRACTICE

- Alaska Chapter -

October 23, 197)

Senator Bradley, Chairman
and Members
Senate Commerce Committee

Re: Sunset Hearing - Board of Registration for
Architects, Engineers and Land Surveyors

Gentlemen:

The points and opinions being offered in this testimony are from PEPP, Professional Engineers in Private Practice, and are supported and endorsed by the members of the Alaska Section. At its last regular meeting, October 10, 1979, a motion was passed endorsing the testimony stated herein via committee concurrence as representative of the general view of the members.

I believe it is essential to state at the outset that a Board of Registration for Architects, Engineers and Land Surveyors must not only be maintained, but strengthened. It is timely that the committee sit and consider the relevancy of this board at a time when its importance to the public welfare could not have greater impact.

The professionals this board has regulated in the past and must continue to monitor in the future have all been charged with the responsibility to protect the safety, health, property and welfare of the public in the discharge of their professional duties. This responsibility correlates directly with existing Board regulations.

As we all are aware, times are forever changing and technology has advanced to the degree that the lay person, the public in this case, is being overwhelmed by the technological changes around him. In the hands of the proper professional, the public's well being will be considered, enhanced and preserved. On the contrary, a misapplication of this technology by those not fully understanding the tools in their hands, would leave an unsuspecting and vulnerable public at the mercy of the incompetent. Alaska shares many potential problems with the South '48, but has many more of its own due to the uniqueness of this State and its environment.

A Practice Section of the Alaska Society of Professional Engineers
Box 833 • Anchorage, Alaska • 99501

NATIONAL SOCIETY OF PROFESSIONAL ENGINEERS

Coupled with our own set of problems that require specific understanding and experience, we add energy shortages, increased awareness of life safety and a multitude of changing regulations, codes, statutes and agencies. The net result is that our basic life styles are being complicated by advances and change.

The changes require the competent to handle, understand and safely apply; the professional who now, and more so in the future will have to call on his training, experience and judgment to deal with those items that affect the public's safety, health, property and welfare. It will be the Board's responsibility to monitor the professional during these increasingly difficult periods. To do so, the Board will need greater strength and operational flexibility than it has had in the past.

There has been a tendency to dilute the power of the Board in the past few years while the need has actually been the opposite. Certainly the public welfare demands a Board that is operationally strong, filled with competent members.

In our perspective, the future Board of Registration Law should be patterned after the general objectives of the present one with some strengthening to keep in tune with the future problems it will have to face. We recommend the following items be considered:

1. The authorization by statute of an Executive Director to assist in the day-to-day Board activities and to make it more effective in the enforcement of the licensing statute and regulations.

2. The budget of the Board should be markedly increased, both to accommodate (1) above and to provide funds for enforcement and prosecution.

3. That the Attorney General of the State may be consulted as a legal advisor; but that the Board be authorized to retain other counsel in lieu of the Attorney General in the pursuit of Board policies and objectives.

4. The present Law in Sec. 08.48.261 makes certain statements about the head of each principal department of the State with positions necessitating the use of registered personnel. Due to the increased demands on professionalism in the future, it is incumbent that the statute be retained or strengthened. The State departments must adhere to this regulation. It is contradictory to the times and needs to relax the qualifications of State employees. Persons of equal responsibility and presumed professionalism, both inside and outside government agencies or departments must comply with the same standard of qualifications.

The items above are key points for consideration. There are many others. However, if the major objectives are met, the key supporting phrases and regulations will become obvious in most instances.

In summary, we must emphasize the necessity for a Board of Registration for Architects, Engineers and Land Surveyors and then the importance of strengthening the Board so that it has the means to deal with the harsh problems of the future.

Just about everything of material substance that surrounds us, this building, the roads we drive on, the airport we land at, the hotel we stay in, the pipelines that carry our oil, gas and fuel, have been designed in whole or part by the persons this Board must regulate. We cannot relax the necessity for professional competency; we, therefore, must have a strong Board of Registration.

Thank you for your consideration.

Sincerely,

PROFESSIONAL ENGINEERS IN PRIVATE PRACTICE (PEPP)

Walter E. Steige, P.E.,
Chairman

WES:tms

REVIEW OF BOARD OF ENGINEERS, ARCHITECTS, AND LAND SURVEYORS BOARD OF REGISTRATION

OUTLINE OF TESTIMONY

I. Introduction

John Horan, Land Surveyor (not registered) from Wasilla. Representing myself specifically, and several hundred potential registered land surveyors in effect.

II. Purpose and Scope of Testimony

A. To bring to the attention of the committee issues relevant generally to the "public interest" question of the Board's functioning

b. To bring to the attention of the committee possible legal questions as to the Boards' statutory authority and abuse thereof, and the possible improper delegation of authority to the Board by the legislature

C. To propose revisions in the statutory authority of the Board

d.. To propose realistic and fair regulations based on the national standard

III. Public Interest

A. In 1978 the Board held public hearings, etc., and approved a revision of AS 12AAC36. I would suggest that the committee review the public testimony in the following areas:

1. Board answers to reason for regulatory change, Attorney General's request for clarification of vagueness, ambiguities, etc.
2. Negative testimony (majority) to the regulations generally and to 12 years specifically
3. Consumer pressure to increase the "professional standard" when in fact absolutely nothing was done to that effect, the converse is more true.

    a. APIRG testmony to that effect
    b. "Turf protection" not in consumer interest
    c. 12 year effect of limiting number of land surveyors
    d. Legislative Audit's recommendations of continuing education to "upgrade professional standards".

Discussion: If the board sincerely wishes to upgrade professional services why haven't they:

1. Elimintated the incompetents, reference Legislative Audit
2. Provided for re-examination and or upgrading education
3. Required errors and ommission insurance or bonding
4. Required tougher examinations

Prospective registered land surveyors are required to take an extremely difficult 16 hour set of exams, have 3 years responsible charge and be recommended by 3 registered land surveyors therefore, what is the purpose of the remaining 9 years except to create a monopolistic self serving system.

I submit that the Board has been guilty of a gross misuse of their delegated authority, has not acted in the public interest but only for those in their special interest group.

IV. Legal Questions (Request that committee obtain opinion of legislative legal staff on these questions).

1. Abuse of statutory authority to set specific time limits without legislative approval. In most states the legislature sets minimum time standards and does not delegate that power.

2. Legal question of 12 years being excessive, oppressive, discriminatory, and arbitrary.

a. 6 year national average, 5.93 public land domain states
b. Educational situation where accepted standard everywhere (all states are maximum 1 year education for 1 year experience). Under current regulations it ranges from 1 year education for 2 or 3 years experience

3. Further Alaskans access to vocational training of the type required is the poorest in the nation, giving rise to the situation that the state with the greatest emphasis on educational requirements has the least available is a further restriction unfairly imposed.

V. Proposals

1. The Legislature, in its bill providing for continuation of the Board:

a. Require compliance with legislative audit recommendations
b. in addition withdraw the power to set minimum standards
c. set minimum standards as follows;

experience only	6 yrs.	(3 yrs. responsible charge)
education and experience	6 yrs.	
survey education, yr. for yr.,	up to 4 yrs.	(2 yrs. responsible charge)
applied or theoretical sciences	up to 3 yrs.	(3 yrs. responsible charge)

BARBER EXAM.

SENATE COMMERCE COMMITTEE

HEARING MINUTES

OCTOBER 22, 1979

The meeting was called to order by Chairman Senator Brad Bradley at 9:00 a.m. The meeting was held in Room 262, Consortium Library, University of Alaska, Anchorage, 3211 Providence Drive, Anchorage, Alaska. Other committee members present were Senator Arliss Sturgulewski; Senator Tim Kelly; and Licia Piceno, Administrative Assistant to Senator Stimson. Representative Terry Martin was also in attendance and participated in the proceedings. Committee staff members in attendance were Christian Basler and Janet Seitz.

Attached is a transcript of the hearing taken from a taped recording. Also attached are copies of written testimony presented and witnesses that testified.

BOARD OF BARBER EXAMINERS

BRADLEY: The Commerce Committee will come to order. First I would like to introduce the Commitee members and the people that are representing members. I'll start with the Vice-Chairman, Senator Arliss Sturgulewski, on my right; Senator Tim Kelly; and Licia Piceno, who represents Senator Terry Stimson. On my left is Representative Terry Martin, who is with us today and he is in Commerce on the House Side. I see we have six people testifying today. Have any others come in that haven't signed in? I guess not. Judy, how many people do we have testifying from Fairbanks? Three? Juneau, one? Does anybody in here disagree with having the teleconference individuals testify first or is someone in a big hurry? If someone is in a hurry to go someplace else, we'll take them first. All right. We'll take the teleconference individuals at the various locations, Fairbanks and Juneau first, if there is no disagreement with that. Judy, could we have -- which one is available first, Fairbanks or Juneau? All right. Does any member of the Committee disagree with going ahead and getting all of the teleconference invidiuals that are to testify, including the hairdressers although that was scheduled for this afternoon. I think we can probably change. Okay, we'll go ahead with all the teleconference. Maybe you can do other things, too, Judy. We may have to continue after lunch. So we'll start with either Fairbanks or Juneau? Fairbanks, go ahead please with the first one to testify. This is for the Board of Barber Examiners. Over.

FAIRBANKS MODERATOR: Our first witness is Bill Keyse.

KEYSE: My name is William Keyse. I'm a resident of Fairbanks and I've been a barber in Alaska for 24 years. I will be brief but I would like to say that for the most part this audit report seems to more than imply that the Barber Board does little more -- looking over a memorandum, which I have here, to the Legislature (SOUND OUT)

(SOUND OUT FROM KEYSE'S TESTIMONY FROM FAIRBANKS THROUGH RICK THORNTON'S TESTIMONY FROM FAIRBANKS. WRITTEN TESTIMONY HAS BEEN REQUESTED FROM WITNESSES KEYSE, GRANT, BRANSON, KEUBER AND THORNTON.)

THORNTON: I just have one question for the Board. That is, if the Barber Board was omitted, what happens to the licensing? Who is going to be in charge of licensing?

BRADLEY: Mr. Thornton, it could be done by the Department of Commerce, more specifically, the Division of Occupational Licensing. They could issue the license or they could given an examination, some standard examination and issue the license. There are some alternatives. Not that that is what we will approve but there's some alternatives. Any further questions, over?

THORNTON: Yes. I would just like to say one thing for the Barber Board. That is if the Committee would keep in mind that if the licensing is omitted that you are going to be putting products in the hands of non-professional people and I think that this is more dangerous to the consumer and I think that the Board should look at this very seriously.

BRADLEY: That's a quite valid comment, Mr. Thornton, and I'd like for everybody listening in to understand that just because the Audit Division recommended that this Board be terminated doesn't mean that it will be. That's just their opinion. Over.

THORNTON: Okay. Well again, I thank you for your time and, again, if the Board will just keep in mind that by putting professional products in the hands of those that are not qualified to use them I think that the public is more in danger than the Barber Board itself.

BRADLEY: Thank you very much, Mr. Thornton. Any other witnesses?

FAIRBANKS MODERATOR: We have no further witnesses for the Board of Barbers; however, we do have several for the Board of Hairdressers. Would you like us to wait with those?

BRADLEY: Juneau, do you have any witnesses to testify concerning the Barber Examiners Board? Over.

JUNEAU MODERATOR: Yes, Mr. Chairman. We have one lady here who would like to speak on behalf of the Barbers. Her name is Yvonne DeVatos and she is ready to speak now.

BRADLEY: Go ahead, Yvonne.

DEVATOS: My name is Yvonne DeVatos and (UNDISCERNABLE) Barber Board (UN - DISCERNABLE). I agree with many of the recommendations of the Legislative Audit and would like to enunciate on certain areas of it. There is a need for professionalism in our business of haircutting. That could come from various areas. Such as in the schooling or through organized ways of testing people, such as apprenticeship program or in case of having the Barbering Board in effect at this point, that is a way of testing them also. I do feel that after a person has gone through nine months of schooling, they should, if they can pass all the schooling, be ready to be in business, either working with somebody or opening up their own business. If there is a need for licensing, it can happen in various departments and not necessarily only in the Barber Board department. If there is a testing, I think that the testing needs to be updated. A lot of new concepts have come into action in haircutting but people are not being testing for it at the time of the Barber Board testing. I don't know that the testing as it is now is an accurate means of seeing whether that person is able to go out and practice but if there is a need for testing then let's upgrade it and let's do what is needed for today. I have to think a minute of what else to say. I guess I will stop at that. Thank you.

BRADLEY: Thank you, Yvonne. The Chairman of Commerce Committee and members need a haircut real bad. We miss your haircuts up here. You think you might could arrange a trip up to Anchorage?

DEVATOS: Well, we could see about. I don't know, I would have to look at my schedule.

BRADLEY: And those massages, too. They're worth a lot. That's sort of a fringe benefit. Any questions by members of the Committee? Thank you, Yvonne. They're no questions. We know what you can do.

JUNEAU MODERATOR: Mr. Chairman, this is Juneau. We have no further witnesses here for the Barbers.

FAIRBANKS MODERATOR: Mr. Chairman, this is Fairbanks. I'd like to ask you a question. We have several people that wish to testify for

the Board of Hairdressing. They are not here at the moment. They will be called when you are ready. Are you going to be ready for them within the next half hour or so?

BRADLEY: You just read my mind. I was getting ready to say that since we had scheduled the Hairdreesers for this afternoon, contrary to what I said earlier, it might be better to hold most of the hairdressers this afternoon unless this one hairdresser in Juneau, I believe, is in some big hurry. Most of them will probably be available in the afternoon. That's the way they were notified. The one hairdresser in Juneau, course there will probably be more, we'll hold your testimony until we finish the Barbers. We've had quite a few people to come in after we convened and I think probably some of these people will be expected to be back on their job in the afternoon. So we'd best take care of these now.

JUNEAU MODERATOR: Mr. Chairman, this is Juneau.

BRADLEY: Yes, Juneau. Over.

JUNEAU MODERATOR: We have at least five people who wish to speak on behalf of the hairdressers at this point, but we will stand by.

BRADLEY: Since we notified the hairdressers that it would be in the afternoon, I think that, in all due respect to the people that are the barbers to testify that are here this morning and I'm sure they expect maybe not to be here this afternoon, we'd better proceed with the barber testimony and then upon finishing it, we'll take up the hairdressers whether it is afternoon or morning, if they are available. Over.

JUNEAU MODERATOR: We have people here who are listening to you, Mr. Chairman, and they will be standing by.

BRADLEY: Thank you very much. Fairbanks, do you have any more barbers that wish to testify that may have come in later?

FAIRBANKS MODERATOR: No, we don't.

BRADLEY: And Juneau?

JUNEAU MODERATOR: No, we do not, Mr. Chairman.

BRADLEY: Thank you very much. We'll proceed with those that we have in the room before us from Anchorage.

ANCHORAGE MODERATOR: Stand by, please.

BRADLEY: First one we will have to testify is Judy Dixson.

ANCHORAGE MODERATOR: For your information, Ms. Dixson is passing out some information and will be presenting her testimony in a moment.

BRADLEY: Go ahead with your testimony, Judy. Judy Dixson.

DIXSON: My name is Judy Dixson and I'm speaking as one of a member of a large body of Anchorage barbers who are very concerned about maintaining the standards of our profession. And. Barber laws have been on the Alaska books since Statehood and this should be an indication as to the concern, public as well as professional, regarding the guarantee of a safe and sanitary service when the public goes into a barber shop. We barbers agree that many changes must be made in the Board of Barber Examiners and we've addressed some of these in the report that we made and there are more changes that we would like to see made given more time. We haven't had as much notice as we'd like. We've evaluated the performance review and found valid recommendations and we also came up with our recommendations that you have before you (SEE WRITTEN DOCUMENTS SUBMITTED). The one thing that the majority did agree on was that there must be State licensing of barbers and the most qualified individuals to oversee this licensing are Board of Barber Examiners comprised of experienced and professional peers. Over the years, barber styling has progressed into a huge industry that reaches almost everyone on a personal level and because of the standards established by examination and State licensing, we can all pretty much rest assured that we will get the quality of service that we want when we go to a barber styling establishment. Without the peer review of the Barber Board and without a practical examination to weed out incompetents, all the professional standards we have worked so hard to establish would be shattered. Due to the overall high quality of basic barbering training that is required in just about every state, the spread of contagious skin and scalp diseases, such as ringworm, have been virtually eradicated. If there were little or no requirements involved in becoming a barber, there would be must less impetus to seek out and receive the necessary training, which includes those basics of sanitation and bacteriology that have contributed to the control of these contagious diseases. I'ms sure that none of us present today would relish the sight of an untrained practitioner determining our appearance without the knowledge of the correct processes involved. This is too personal a service to leave to chance. As professionals, we see this sunset review as yet another way to upgrade our standards, but we also have come to the conclusion that this can only be done by continuing to make the Board of Examiners a cornerstone in our foundation. If you'd like, I could go over this report that we have. Maybe give you just a few of the highlights that we found. This is strictly on the Legislative Audit Review and after speaking with the House Commerce Committee the other day a lot, I found out some thing that, you know, have opened new areas that need to be covered now, but apparently we will have some more time to work on these things. Along with these recommendations, one of the most important things that we'd like to see done between now and the time that action is taken on our particular board is have a comprehensive set of barber laws included in any legislation that might be going through because our laws need to be upgraded; they do need to be broadened because they are very limited right now and there are a lot of areas that need to be covered and the laws are very old and we have tried several times in the past to get laws passed and to get things straightened out and it's been very difficult. So we see this as an excellent opportunity to work with our legislators to help us get some action in this area. Okay? I don't know. Let's see, I think you all have copies of the performance review. I believe the, just the recommendations begin on page 9, I believe, and, okay. Rather than read off the questions and the statements made and the recommendations,

I'll just address them. If you have any questions at any time, please feel free to ask them. Okay, the report states that the examination unnecessarily restricts entry of qualified personnel into the profession. The questions we are dealing with here, the two parts in review, are reciprocity with other states and that students are issues permits if from Alaska when the Outsiders must produce a license from their state. Okay -- reciprocity. Due to widely varying standards of education in different states, reciprocity is not possible at this time. States requiring 2,000 hours do not accept an Alaska license as we only require 1,500 hours, and that's not even on the books at this point. We don't even have that, although that is the minimum requirement that we have here in our schools. And Alaska can't accept an Outside license, they shouldn't, that requires only 1,200 hours. Until there are federal standards that cover barbering in all states and all the requirements are the same and who knows how long it will be before that happens, if it ever does, or if it should, the only way the reciprocity is going to be possible is through private agreements between individual states. And this could be possible for Alaska only if our Barber Board was allocated the funds to attend the National Association of Barber Examiners convention where these problems can be discussed with outher professionals. If we have no means of communication with the other states then, yes sir?

BRADLEY: Representative Martin?

MARTIN: Miss Dixson, why is it necessary for a private organization or private individuals like yourself to depend on the government to give you funds to upgrade yourself by going to national meetings or even regional meetings? There are many professional groups that do it on their own.

DIXSON: At this point, we don't have a strong enough group in Alaska to allow for these funds and since the Board is a State -- you know, they are appointed by the State. They are not private individuals, you know, doing this on their own. They are appointed by the State and since they are part of a State agency at this point, then we'd like to see those funds allocated. We're one of the, probably one of the cheapest boards you have. Our total cost is right around $11,000 and I think over $6,000 of that is strictly costs to Division of Occupational Licensing that they've broken down over all the boards. The actual cost of our board is about $3,200 for the per diem and for the travel expenses of all of our members and to ask for a very small amount of additional funds for one or maybe two Board members to go would be definitely worth the public wile and probably one of the cheapest investments for a good return that they could make.

MARTIN: Miss Dixson, do you have a state association, professional association outside the Board, and does the state have meetings periodically?

DIXSON: We do have a barbers' union that is active in Anchorage. Mr. Newman is going to be speaking on behalf of the union. He could give you more information than I could. It's small membership at this time and that is, as far as I am aware, the only professional organization that we do have although we are very strongly talking about -- we'd like to see a good strong professional organization that will be coming up in the future, too, we hope, and that won't be dependent upon any sort of state aid or state funds. Okay, as far as the second recommendation

of test materials. The group of concerned barbers in Anchorage have come up with a slightly different format than one that is implemented now although the one that is implemented now has been no problem up until now but since they recommended a different format, we thought that this would be something that would be very fair and that would be just totally -- a person would have to try really hard to fail this one. And the way the points are distributed and it would be just a very, very equal test for all applicants and the breakdown is there. Seventy-five out of 100 points and that includes all the practical and written. So a person would only need 75 overall. Something that was brought up as far as when a person goes in to get their work permit before they take their exam, apparently it has not been made clear, or they feel it hasn't been made clear, what is going to be on the test. That's one of the big complaints that we've tested on. And something that we've suggested that would be a very important thing would be to include some kind of a guideline sheet with the test application packet that would include the text books from which the test will be taken and subjects that will most likely be covered and requirements that you must bring your own tools and that there will be time limits and so they will know all the information that is pertinent. That's something we'd like to see done and the Board could be responsible for. As far as limiting the term of Board members, this would probably be a good idea except that they are appointed and that as the administration change, appointments do change. So it would be rather difficult to make a very standard set up unless the appointments were changed. The public member on the Board should be appointed. That's a very good idea and we'd like to see that done and we'd be more than happy to accept that idea. And as far as recommendation number 5, the Board inspection of health. As far as that goes, the health inspections are the province of the Health Department and we don't see where the Board would need to be inspecting for health purposes. The only inspection that we'd like to see is the inspection of new schools to insure that the facilities and equipment were adequate for the proper teaching of barbering and also to insure that the curriculum is adequate and that standard textbooks are used and that a certain amount of classroom time is allocated so that the students receive the preparation for their written exam that they need. That's all that I have to say on this at this time. And if you'd like to look at that in more depth at your own leisure, I'd certainly appreciate it. Any more questions?

STURGULEWSKI: Mr. Chairman?

BRADLEY: Senator Sturgulewski.

STURGULEWSKI: Judy, I know you have done a lot of talking to a lot of people and a lot of thinking about this. I guess this kind of comes under a philosophical question and I think in a sense that that is almost the kind of a decision that we are going to have to make. There's a great deal of, throughout the country, trend toward regulation as being inhibiting business and keeping people from getting jobs and making profits and all of the rest. And yet we have here from profession after profession as we've reviewed the boards under sunset really a great push for the profession itself saying that there is a need for professionalism that it's in the public interest. And I'd really like you to speak to is it in the public interest or is it in the best interest of the, of your profession and for those members within it to be regulated. I really think I'd like some comment on how is the public served by the continuation of the professional licensing and so on. I think it's important to note

that there are obviously several ways that you could go. You could continue as it is with certain changes; it could be taken over, all of the functions, by Occupational Licensing; or, as basically has been suggested, not to do any regulation at all. So, if you could speak kind of on that philosophical point, I'd appreciate it.

DIXSON: There's been a lot of other people who have testified this morning that have brought up valid points that are part of that. Some of the things that I've brought up myself. Once again, okay, the spread of contagious diseases. If you've never been to school and never learned to recognize these things, and I saw them in school and I learned to recognize them and I know that all of the fellow barbers I went to school with have all seen that. If you've never seen it and you don't understand it and you have no knowledge of it, then there is no way that you can know what to do when you do see it and you won't be able to recognize it and deal with it appropriately and I'm sure that this training could be had -- you know, you could take the textbook home and try to figure it out for yourself and you could try just cutting people's hair and just see what happens but I think the public would probably suffer from that. First of all, by looking awful and personal appearances -- you know, would any of you here just decide to cut each other's hair and take that chance. I wouldn't let any of you cut my hair, afraid not. So that's -- it seems, it may not be a big matter of safety although we do use some tools. You know, the straight razor is nothing to be laughed at. I've cut myself very well a few times in the process of learning how to use it and if you're not aware of how to use it on somebody's face or somebody's hair properly then you can really get yourself into trouble because you're working around ears and eyes and it's not an easy thing to learn. It took me a good six months before I felt comfortable using it and that was every day in school. I suppose, I'm not saying it's impossible
(END TAPE 1, SIDE A)
(BEGIN TAPE 1, SIDE B)
and everyone of those hours was necessary and I don't feel that if a person did not go to school and did not have the experience and training and somebody watching over them, teaching them the proper methods of cutting the hair and sanitation and sterilization, they would be doing the public a great disservice by cutting on them. Also a point that Mr. Thornton brought out about barbers as well as beauticians using chemicals -- perms, dyes, things like that -- that can be very harmful to somebody's hair and scalp and can be just down right damaging. Those are things that a person needs training for before they're allowed to use on the public and I think that's very important.

STURGULEWSKI: Mr. Chairman, if I could continue? It's interesting to me that with the barbers there is no professional organization apart from the Board. We've seen some criticisms in the reports that have come that have been on the action of (1) on the part of the Board, some deficiencies with Occupational Licensing and with the ability to handle complaints and so on. I think again we have seen this as we have reviewed, as you know, ten of the major health boards last year and we have another series of which this is one for the coming year. But, what responsibility do you see, as a professional, to see (1) that the Board is doing its job, to address some of these questions, to address the regulations, to address needed statute changes, to do some action as far as getting OL on its, on the stick. It seems to me that there has been until this came along perhaps not enough interest to see that some of these questions were addressed. What responsibility do you feel toward some of the things that have been brought out here? As a member of this profession, do you

think that if the Board were to be continued that we would see any difference? Would we be back in another three year situation with the same complaints before us and perhaps, you know, the same thing coming out in an audit report? What do you think should happen out of this and what would the responsibility be of those members of the profession that are not on the Barber Board?

DIXSON: Oh, I think you'd see a lot of changes, a lot of changes for the good. All the recommendations that we've made just off of the performance review, I don't know about a lot of the other people, but I know there are several of us that are very interested and would really be quite interested to make sure that these things were, were done. And I know I've spoken to the Board members and they are also very concerned and very interested in seeing changes made. There are a lot of changes that they would like to have seen made because it has been impossible because there hasn't been enough attention paid, you know, who cares, so you're just the Barber Board. This is a real good opportunity -- out of this, like I said, we could get some laws passed that we need quite badly and I assume that you would find that as a positive movement and that is just very important to us. And I think the Board could stand quite a bit more organization. It's done very well with what it has had on the very limited amount of money and limited amount of time. They only meet for two days twice a year and there is only so much work you can get done in that time. But, they have, they do have problems being as they are scattered all over the State with some of the organization that could definitely stand to be improved but if they could formulate a good statement of goals and objectives and formulate a good procedure to follow instead of leaving so much of it to chance and well, what do you think we should do now, then I think that would make it a lot more efficient and if some of the testing is maybe a little more standardized and improved, I see nothing but improvements. As far as the alternatives, I haven't really -- I've heard a lot of different possibilities to the Board. I think more than the Board itself I think peer review is the important part here. Now whether it is done by a group titled "Board of Barber Examiners" or a group of barbers hired by the Occupational Licensing to do it, it doen'st make sense to me to throw out one group of peers to pick out another group of peers and go through all the paperwork and problems involved to do that. If there was no licensing whatsoever, is that a possibility from what I've understood? No licensing at all? I can't see how that would even be dreamed of as far as opening up competition, etc., etc. Of everybody that I know that is a barber, I don't know anybody that wants to be a barber that isn't working as one. Anybody who hasn't had the small amount of get-up-and-go that is required to go to school and get your license. Just like any other professiona, it takes training and its takes time. I see nothing but improvement coming from this. And enough of the barbers I have spoken to are concerned that I think it would happen if it happened fairly fast.

STURGULEWSKI: Thank you.

BRADLEY: Representative Martin?

MARTIN: Thank you, Senator Bradley. I have a battery of questions thought up and I'd like to add to Senator Sturgulewski -- what she said. Last (UNDISCERNABLE)

FAIRBANKS MODERATOR: Mr. Chairman, this is Fairbanks. We can't hear the speaker.

MARTIN: Last year I was quite concerned with some of the professional groups that were abolished as a board but at the same time they had professional groups, like the veterinarians and the chiropractors and physcial therapists and these people were having classes throughout the year, they were attending professional meetings on their own not because (UNDISCERNABLE) They paid it on their own. Yet they were blackmarked, so to speak, because they didn't accept the State monies. So, you know, it seems like our review board is going to get you one way or the other, but that's their problem. The thing is, I'm a little surprised right now to find out that the barber group is not really a professional group. What is to assure the public today, you say if we continue this we are going to have everything right in the future, and I'm somewhat surprised that we don't have it now. For instance in your report and the report from Juneau, they heavily stress the medical aspect and the health aspect and the reason why disorders of the human bodies and handling and recognizing contagious disease. Well, I doubt if any of you know what a (UNDISCERANBLE) disease is. Of course, dermatologists don't know that. How much medical schooling do you have and if you do have medical schooling, why is it determined on a board that is sanctioned from the State? Why doesn't the profession itself continue your own schooling, if you have any schooling at all? Is there a continuation? You have a minimum here of 1500 hours. Is there any continuation?

DIXSON: That's up to the individual. Like I said, barbering is a very big industry in this country and there are a lot of professional -- there's a lot of professional training available once you've gotten your license and gotten your basic barbering out of the way. As far as any of the medical training we get -- it's limited. It certainly doesn't qualify you to treat any diseases but, like I said, it at least qualifies you to recognize them and in the 1500 hours, which is one of the laws we'd like to see passed. At this point, we have no hour requirement. Most states do require a certain number of hours. Anywhere from 1200 to 2000 hours of school and a certain portion of that is classroom training as well as practical. We have a lot of private companies that, oh, say companies that we by our products from, that offer franchisees and that offer continual training all through the states. The barbers, as individuals, attend these training sessions at their own discretion. Now it is up to the individual; there are no requirements. But if you want to be a good barber and you want to be an established professional, you do attend these trainings. I, myself, have paid my own way, not affiliated with any state organization, to go down to the states and receive training. And just about every barber that I know of has done so repeatedly and invested thousands and thousands of dollars in furthering our knowledge of our profession. And this was with no backing from any state association or any state agency. We just have done it on our own. And as far as the state association, like I said we do have the union. Many of us have chosen not to join this particular union. We may form an additional group. We may join the union. At this time, I can't speak for the other barbers. I know that enough people have been concerned over this and have gotten together over this that we're enough of a unified body that we can at least work towards something that we feel is this important. What we are concerned about -- like I said before, we want to see the Board continued because we feel that this is the best way to move our licensing procedure economically and swiftly. But what we want, we want to keep our licensing. We want to keep basic requirements and if the Board if the best method of doing this and, you know, we

feel it is and, you know, like I said the cost is minimal for what we get. We feel that we get a lot for the small amount of money..

BRADLEY: Senator Sturgulewski?

STURGULEWSKI: Judy, one further question. There is a present exemption in the law as to the more rural parts of Alaska. What kind, if any, interchange have you had there? How reasonable is it to expect some of the very rural communities to be able to say handle this question of coming to a center to receive their training. Have you addressed this problem at all?

DIXSON: At our school here in Anchorage, we've had several people from the Bush that have come in and they've received state aid and private help from Native -- and, you know, aid from their Native corporations, municipal funds and there are student loans available for schooling also since we are licensed by the State -- the school is -- and there's been. There's one person who has completed the course and graduated and is a practicing licensed barber in Juneau at this time. And there is another fellow who is also in school right now and is doing extremely well and will be graduating soon. And these people have not found it any problem to get the necessary financial aid from the various avaiable sources and it has been quite easy for them to do that. Now, a person could always open a barber school some place in the Bush if that was a good idea. But that once again, the barber schools are private. They're not public. So it is up to the owner's discretion as to where they want to put a school. Anybody who has wanted to from the Bush hasn't had any problem up until now as far as we know we people have done it and been successful.

BRADLEY: Any other questions from members of the Committee? If not, Judy, I have one. Are you in private practice or are you a teacher at the Barber College?

DIXSON: I'm in private practice right now. I just received my instructor's license (UNDISCERNABLE)

BRADLEY: Appreciate your testimony. You've done a lot of homework. You know we did our best to have combined meetings between the House and the Senate Commerce Committees to save people a lot of inconvenience in having to testify twice but we couldnt' get with the House and suddenly they throw theirs in before ours and we had our scheduled before and we did most of the coordinating with them. So, we were a little distrubed about that. Suddenly they throw in theirs on Saturday. Do you think it is beneficial that you have one and then the other? Maybe you learn a little something from one that you can benefit by in your testimony, by testifying the second time? Just as a matter of interest?

DIXSON: Well, personally, I did. But I'm not saying that I would have enjoyed being able to spend all day Saturday at work instead of having to take time out to go there. I think that the questions, the questions that were asked by the Representatives on the Commerce Committee were pertinent and would probably have been brought up today also. So, either way was fine.

BRADLEY: It doesn't make all the difference in the world. But I think it would be much better to have them both together. Do it once rather than twice. Okay, you know we've had some bills concernied the barber profession. We had one during not the last session but the previously legislature. And it

wasn't pushed and it had in their moral character and so forth. Many of our professional boards have this requirement -- moral character. I know it is a personal interpretation. How important do you think that is? Your personal interpretation.

DIXSON: Well, as a member of the barbers' group that we formed and legislative committee of that group, we agreed in the recommendations that it was too subject to personal interpretation and should be deleted. My personal feelings on this are a little bit different but I'm speaking more or less for the group so I'll just leave it at that. It is too difficult to judge that. What we were trying to do is to keep (UNDISCERNABLE) people working while they were intoxicated and that is a common problem and if the Board if is aware of a person who is intoxicated and who is practicing then this clause would allow them to say "Hey, you'd better go home and sober up before you start taking your shears to people's heads." But once again everybody's standards are a little bit different and some people's vary quite widely and it's really difficult to say you have goo moral character and you don't so therefore it should probably be deleted. I knew where to point.

BRADLEY: I guess maybe I'd better leave that question. But I think it probably rather than just have it as a requirement, good moral character, I think you'd need some explanation in that many people are probably are very good barbers but maybe their off-duty moral character may not be just so but it has nothing to do with their efficiency as a barber. But anything as obvious as intoxication or an alcoholic, I think maybe we need, in my opinion, it needs to be included but explained. Incidentally, anybody prefers any coffee, we made sure we had enough for everybody. I don't like to drink coffee with everybody else not drinking coffee and I haven't got up to get mine but I will soon. So feel free to get up and get a cup of coffee whenever you like, members included. Thank you very much for your well-prepared testimony, Judy. I think I learned a little something.

FAIRBANKS MODERATOR: Mr. Chairman, this is Fairbanks.

ANCHORAGE MODERATOR: Go ahead, Nancy.

FAIRBANKS MODERATOR: Do I understand that we will for sure be waiting until 1:30 p.m. Anchorage time for the testimony from the hairdressers.

ANCHORAGE MODERATOR: Nancy, my understanding is that when the testimony of the barbers is completed if we're still in the morning hours, we'll start taking testimony from the hairdressers. What is your witness situation there now as far count?

FAIRBANKS MODERATOR: We have two witensses and then somebody who is waiting to call others who will be here when we know what the time the meeting, they'll be taking testimony.

ANCHORAGE MODERATOR: The Committee definitely will be taking testimony from the hairdressers at 1:00 p.m.

FAIRBANKS MODERATOR: One o'clock Anchorage time?

ANCHORAGE MODERATOR: That's correct. Juneau?

JUNEAU MODERATOR: Juneau has four witnesses with one possible for the Board of Hairdressing.

ANCHORAGE MODERATOR: Fairbanks. Do you have any additional witnesses on the Barber Board?

FAIRBANKS MODERATOR: No, we don't.

ANCHORAGE MODERATOR: And Juneau, have you?

JUNEAU MODERATOR: We have no further witnesses on the Barber Board.

ANCHORAGE MODERATOR: Okay. And Debbie, how many did you say you had on the Hairdressers?

JUNEAU MODERATOR: We have four definite and one possible.

ANCHORAGE MODERATOR: Okay. Fine. Thank you.

BRADLEY: Very well. Thank you for that check, Judy. Do we have anybody that wishes to testify that hasn't signed the sheet? Okay, the next one is Mr. James Newman. In case it's not verified to everyone, as soon as we are finished with all the barber testimony, we'll take the hairdressers. Go ahead, James.

NEWMAN: Thank you, Mr. Chairman. James Newman representing Local 56 of the Barbers, Beauticians and Allied Industries, the Anchorage affiliate. I have in front of me a report presented by the Legislative Affairs Agency and there are a great number of factors in here that need to be brought to the attention of the Committee. One of them, which we just talking about, was moral character. There is a very good definition in the back as to moral character. Conviction of a felony. Gross malpractice or incompetence. Continual practice while knowingly carrying a communicable disease. Habitual drunkedness or addiction to the use of narcotics or other habit forming drugs. Those are the type of things that within our professional could be considered immoral character. Because of those factors, the immoral character clause should be left in but should be very definitely defined. The State of Alaska had renewal of 209 licenses in 1978. We have approximately 200,000 male members of our population. That gives us approximately 1,000 male customers per barber. Now that is a good ratio. That enables the customers to receive adequate service at the same time allowing the professional to earn an adequate living. Many states have a far lower average. This is years ago, this report that I have here is based on a great number of years ago. Going through this, you'll find that some states have as low as 600, even as low as 500 potential customers per barber. This is fantastic for the waiting line to get in to get your hair cut; however, it is not indictive to a good healthy practice. I have taken a great deal of my education in the State of California twenty years ago. At that time we were cutting hair at a price that was almost impossible to make a living. The State of California induced a minimum price law. The minimum price law was based on the amount of time an individual would need to practice per customer in order to maintain sanitary benefits. As far as the question of having a licensing law in the State of Alaska and as to whether the potential benefits equal the deficit to the general public, are rather easily understood in the fact that 48 of the 50 states now require licensing, including the State of Alaska. If no license was required or it was not important that we have a license, why have all the 48 of the 50 states said "License the barber." If education was not

important, why is the average number of hours required throughout the United States 1,438 hours? That is an average throughout the United States. If an apprentice law was not required, why is it that only two states do not have apprentice laws? If apprenticeship was not important to the general public, why is the average number of months spent in apprenticeship throughout the United States 18.4 months? If edcuation, minimum education, is not important, why is the average throughout the United States requirement of 9.5 years primary education? Eighty-six percent of the states do not require a residency requirement in order to be eligible to take the state test. Of those that do require it, the average is six months. The State of Alaska does have a temporary permit situation. It is applicable in our State due to the fact that our Board meets but twice a year for the purpose of examing. Many incidents, my own included -- I arrived approximately thirty days after the Board in the year that I arrived in 1972. Had it not been for the permit situation, I would have been unable to make a living for five months. But because of the permit situation, I was allowed to go to work. Now there are two ways to deal with that. Eliminate the permit and increase the frequency of the Board examinations and in so doing increase the costs of maintaining a Board. Continue to issue the permits, maintain the number of Board meetings that we have now and maintain very low costs. According to the summary report, the expenditure above and beyond per diem, transportation costs for our Board is approximately $6,000 -- between $6,000 and $7,000. I would like to be able to buy the kind of insurance for the public at any insurance company in the world for $6,000. That's what our Board, our education requirements are. They are a very inexpensive but a very important part of an insurance policy for the public and the State of Alaska. The last page of the consumer's report consisted of a letter written by Local 56, page 51(d), and it brings out that due to the action, due to the repeated efforts of barber boards throughout the United States certain diseases have been virtually eliminated. Impentigo is one of them. Ringworm is something that is almost of the past. Many of us who are older remember ringworn all too well. Many of us came in contact with impentigo all too well. But because of the requirements in our education which, who can better determine that than a Board of Barber Examiners? Those diseases have been almost wiped out and with continued perservance will be totally eliminated from this society. This is something to look forward to.

BRADLEY: Thank you, Jim.

STURGULEWSKI: Mr. Chairman?

BRADLEY: Senator Sturgulewski.

STURGULEWSKI: Mr. Newman, not only you yourself but others have spoken to the issue of the training that you have in various kinds of scalp disease and have indicated that there has been a reduction in that. Okay. So I come in and I've got a problem. What do you do about it? What do others do about it?

NEWMAN: In answer to that, my training in medical field is nothing more than diagnostic work. We are taught to recognize diseases of the hair, of the scalp and of the skin. In most states, however unfortunately our laws do not cover it though we have tried many, many years to upgrade our laws, I have copies that go clear back into the 60s. By most state laws, I am prohibited to work on a customer that has a communicable disease unless that customer is under the direct care of a physician. So the way

it is dealt with is that upon recognizing or suspecting a communicable disease that customer is advised to attend a physician and return.

BRADLEY: Any other questions from members of the Committee? Representative Martin.

MARTIN: Thank you, Mr.Chairman. Sir, once again on the education aspect. Perhaps I misunderstood you, but you said there is an average eighteen month apprenticeship required and you alluded to nine years of education requirement but I didn't know what you meant by that because one report here that Ms. Dixson presented showed that in Alaska we need 1500 hours, which is approximately forty work weeks, and in some places they have 2000 hours, which is approximately fifty-two work weeks. Could you explain the big difference there?

NEWMAN: Okay. What I was referred to there is the average primary education or gradeschool/high school requirement to be eligible to enter into barber college is and then the average numbers of -- the eighteen months is the average apprenticeship program which is recommended in most of the states or 48 out of the 50. I will leave this report with the Board to give them an opportunity to go over it and possibly if they can find it within their scope, include this, recognition of this, for the apprenticeship program within the laws of the State of Alaska. I do, and for this I apologize, I did neglect to extend the last page of this which covers exemptions. And I think that this might shed a lot of light on our situation. Exempt persons from licensing that are allowed to do barber work in most states are persons authorized by law to practice medicine, surgery; commissioned medical and surgical officers in the United States Army, Navy, and Public Health Services; undertakers, embalmers and morticians. Those are the people that are exempt in most states from having a barber license and those are people that have already been educated in the possible spread of diseases. Those are the only exemptions in most states requiring the barber law.

BRADLEY: Senator Sturgulewski? Mr. Martin has another question.

MARTIN: Thank you, Senator. Just two other questions, Senator. You were talkingabout moral character and you mentioned that you would probably uphold a standard that you read off there and encourage the continuation (UNDISCERNABLE). We are talking about a felony. I do believe in rehabilitation but felonies come in different characters and in different qualities and in different crimes. If a person has been rehabilitated, so to speak, in our society, what would be wrong with allowing him to become a barber later? Also, you were talking about communicable diseases. There are a number of diseases that people can have and are taking treatment for it but still are carriers of it and why should we condemn them. For instance, tuberculosis which used to be very prevalent in the state. A person can have it and it can be active but yet they can be taking medication for it and it would not be contagious to the other person. (UNDISCERNABLE)

NEWMAN: In answer to that. When they have taken -- when a person is under medication even though they are a carrier of tuberculosis or of another disease, the statement is carrying a communicable disease. Now if they are under treatment, they cannot give that disease to an individual so that takes it out of the category of being communicable. In this report that I am going to be leaving with you, it states that those persons convicted of felonies and take training while in a correctional

would not be eliminated because of the felony record. It also recommends the hours for work that they do while in the correctional institution be credited toward hours required for receiving, being eligible to take the license. As far as convicted -- being convicted of a felony, being a controlling factor on that, I think that would depend on the particular felony. Surely in to heaven you could not consider a person who had possibly gone to sleep because he had driven too many miles that day, many hours that night, and dozed off for a moment and while he was in a dozed status clipped somebody, a pedistrian, not realizing it, but was convicted for a felony hit and run. You could not necessarily include that individual as being an immoral character. But for a person that had gone out and had gotten totally wiped out on alcohol or drugs and hit a pedistrian and knowingly drove off, that would be an immoral character. So there would have to be -- that would have to be defined by the members of the Board as to include in there that they would have grounds to refuse, suspend or revoke licenses. I think all of us know what is moral and immoral when it comes to a felony situation. Gross malpractice, that is easy enough to handle. You end up somebody paying out a half a million dollars on a malpractice lawsuit, that's pretty well gross malpractice. Incompetency, again, if we have testing to determine whether or not people that will serve the public are competent professionals, we have very little worry about incompetency.

BRADLEY: Senator Sturgulewski?

JUNEAU MODERATOR: Mr. Chairman, Juneau is having difficulty in hearing the witness.

ANCHORAGE MODERATOR: We've asked our witnesses to speak more closely to the microphone.

STURGULEWSKI: Mr. Chairman. Mr. Newman. Judy Dixson in her paper addresses a question of reciprocity. One of the things, as sort of a personal statement, I think we should do whatever we can to make people coming from other areas to be able to fit into the job market. I don't believe in exclusionary practices. I guess this is one of the reasons I'm surprised that there has not been a professional organization working toward a standardization of requirements throughout the country. I'm wondering, is your union, does that across the country more or less take the place of professional societies in barbers or are there generally barbers associations, professional associations, apart from the union? Hows does that work just as a matter of your particular trade?

NEWMAN: Okay. There are basically two organizations within the profession of barbering. There is the International Union of Barbers, Beauticians & Allied Industries. There is another organization known as the AMBBA -- that's the American Barbers and Beauticians, the American Master Barbers and Beauticans. Yes, we are pretty well throughout the United States. Currently have approximately 27,000 members. We are a small union. As to why we do not have a more standard or have a tighter knit between state to state on reciprocity, unfortunately, we as barbers do not make the laws. The laws are made by congressional groups of each state. In order to have a reciprocity situation within our state with other states, we would also have to have a standardized system of laws between each of the states and again this goes right back in to your own laps of the law-making body. As far as reciprocity is concerned, with the current system where permits are given, reciprocity is not in reality a necessity. But

let's take that one step further. As we probably all noticed this morning on the way in, there was a slight nip in the air. Now if I had a California license and knew that I could go down there and go to work, I might well be packing my things up to head south just like the birds do. And many others would be doing the same thing. So come winter time we end up in a situation where it is almost impossible to find a barber. Come spring time and the fish start running, we all know what that means. Every barber in the Lower 48 would want to be coming up here fishing which would result in a starvation situation for the barbers. Let's extend that one step further because I know how good I am and I know how good the people within this room are. They're all good; they're all going to make a living. So the people would be coming up, say now wait a minute. These people have got an established clientele; how am I going to take that away from them. They start cutting the prices -- reducing the prices to an extreme low. This is fine for the consumer excepting that in order to do so that barber would eliminate washing his hands, not worry about cleaning his chair between customers; as a result, create a gross negligence in sanitation and health to the public. So this is the way that I would answer whether or not reciprocity should or should not be included. On the recommendation of Local 56, it is definitely "No."

BRADLEY: Any further questions from members of the Committee? If not, Jim, I have one. And that is in regard to what you were just discussing concerning migration of barbers up during the summer and migration the other direction during the winter, and that's true in many type of jobs and professions in this State, do you think we should have a residency requirement for licensing? And do you prefer more frequent examinations or the permit law?

NEWMAN: Is that personally or as a representative of Local 56?

BRADLEY: Both..

NEWMAN: Okay. I had to clarify that because the answer on both clauses are identical. This way I can get to speak for both myself and Local 56 so I get to speak twice. We prefer the system as is with the permit system and the frequency of the test every six months. Looking at the reports as to how many were tested, in '77, '78, '79, you're averaging out fifteen to sixteen and this is twice a year. There is no way that I or anyone else could justify increasing the frequency of the meetings. The best alternate is to use the permit system because at least the State and the Board have some idea of who other than those licensed are practicing within the State of Alaska.

BRADLEY: Question -- how many barbers have been suspended for not living up to the standards required on malpractice, say in the last year and then in the last five years?

NEWMAN: To my knowledge, none. However, that is not information that is readily available to the practitioner in the field. This is something that the Board could probably answer a little bit better. Due to the fact that we do have a Board at large, unless there is a complaint filed by an individual within the profession, the Board has no way of knowing about any incorrect behavior of a barber or member of the profession because being barbers at large they do not and cannot afford to take time away from their chair to go out and spend one week a month doing the type of inspection that we are talking about. This is the main reason that even

though at one time the Board had the authority to do health inspections, they deemed it more applicable to turn that over to the Department of Health and where it has remained ever since.

BRADLEY: Senator Kelly.

KELLY: Yeah. Getting back to this permit thing. I don't quite understand how the permit system operates up here. Secondly, does your union as a national union have any kind of regulations or rules pertaining to inter travel between states?

NEWMAN: Okay. The way the permit system works currently. I will take my own incident and make it maybe a little easier for you to understand. I arrived in November '72. Presented to, at that time, a member of the Board, a copy of my California license. Acquired the required sized photograph; obtained a money order payable to the State of Alaska for the amount of $25.00, which is the cost of being tested; presented them to the Board member; he immediately had me mail those to the Department of Commerce and wrote me a permit which was good until the next Board meeting. This is the normal way that a permit is issued or upon showing a diploma or completion of the required number of hours in a school, again due to the fact that the Board meets twice a year and a person could graduate from school with the required number of hours shortly after a Board has met, like within the next week. They would have five months to wait before they would be eligible for a Board. As far as inter travel within the union system, to my knowledge and I haven't done any extensive research on this, the union does not recommend reciprocity one state to another; they do not abide a guideline for reciprocity; however, they do offer something that I also neglected before the Board reflecting back to questions that was asked of Ms. Dixson about continuing education. Currently, residing here or waiting here in the State of Alaska to visit our barber college and to visit some of the shops is an international guest artists, the 1979 Hairstylist of the Year, whose transportation to the State of Alaska was paid for by the international union. He is an educator so there is an ongoing system of education through the international union.

(TAPE 2, SIDE A)

MARTIN: Sometimes when I go to different cities and even with in Anchorage at the time I'm in a hurry to get a hair cut and some shops I look at them from the outside and then I'll go to another shop that looks pretty good from the outside and then go in. Has there been any talks with the union and/or perhaps a professional group developing some kind of shield that would teel the consumer "Hey, this is quality here." Regardless of whether you have a piece of paper that says "I, barber, in the State" or not. This is what I am getting to in helping your own professional to recognize its peer group and to help the customer say "Hey look this is a professional group shield. I know I can get quality there."

NEWMAN: Yes, there's been a great deal of thought about that but then you run in to one particular situation. I personally drive a Ford because to me that's the best vehicle there is. I've got a friend that drives a Cadillac because he thinks that is the best vehicle there is. I've got another friend that drives a Chevy. Now, who sets the standards in your mind as to what is the best. I know some people that swear one particular barber is the best barber in the entire city of Anchorage and I know other people who have gone to that same barber and have said "Boy, I wouldn't

let him cut my dog's hair." Because the individual requirement of the customer differs so much that it would be virtually impossible to establish a criteria as to what would be the requirements for having a shield of performance and so on and so forth. And as far as to the exterior of the building, whether you say that is going to be a good shop or that is going to be bad shop, that is usually left up to the landlord to control the exterior of it and only to the shop owner as far as the interior.

BRADLEY: Any other questions from members of the Committee? If not, I have some real quick ones. Are you in private practice, Jim, or are you an instructor at the barber college or both?

NEWMAN: I am in private practice. I do have an instructor's license which I am not using at this time.

BRADLEY: In regard to barbers not making laws, you're right but also wrong in that people do influence the making of laws and those that put out an effort and lobby and write the most letters and make the most noise usually get the most laws passed. So that's one reason that the bill that I had, you know, some time back in the committee, last legislature, didn't go anywhere. And it didn't say very much either. It didn't do much good, I think, even if we would have passed that one. So, if you think there are some things that you do need, there are ways of getting it but you've got to sort of get organized. Nobody ever got anything without getting organized. Now, from your experience, what do you -- do you think that the Department of Health inspections are adequate? I've sat around a lot of barber shops. I've got my barber expert friend here so I know he's the best and that shop but, as you say, you like a Ford and I like a Chevrolet and so on. So I've seen some things, like a barber would shave or cut hair from one to another and never sterlize any instruments. The Department of Health can't be there all the time. So, just your comments in that regard.

NEWMAN: The Department of Health does as well as they possibly can, unfortunately there is no system that is totally adequate in inspection. From what I understand, we have only one hospital in the State of Alaska that is certified as being totally sanitary. You know, we have a great number of hospitals in the State. The best way to insure the sanitation that is required in the shop again goes back to education because the one most susceptible to the disease is the one that spends eight or nine hours a day in that environment. So the education of the practitioner would be the best way to maintain a sanitary condition.

BRADLEY: Any other questions? Thank you very much, Jim. Thanks immensely. Very good testimony.

ANCHORAGE MODERATOR: Stand by just a moment please.

BRADLEY: I'd like to notify the teleconference network that we currently have only six people to testify concerning

BRADLEY: I'd like to notify the teleconference network that we currently have only six people to testify concerning the barbers, the Barber Examiners Board. Just so you know maybe how long you will have to wait. Go ahead, Bud.

SMITH: My name is Maurice Smith and I am the newest member elected to the Barber Board as of March of 1979. Does the Board have any questions at this time to ask me?

BRADLEY: We'll proceed with questions unless you prefer to give your testimony

and then answer questions. Would you like to answer questions immediately, Bud?

SMITH: Well, I would like to go over some of the testimony that has been given so far. It's really be covered quite clearly, I think.

BRADLEY: Why don't you go ahead and do that, Bud, and that may stimulate some questions.

SMITH: Just a second while I run over these notes, please.

BRADLEY: While Mr. Smith is going over his notes, does any member of the Committee have any questions they would like to ask? Mr. Martin.

MARTIN: Thank you, Senator. Mr. Smith, I was told some time ago and I was waiting for this committee to have hearings to ask this question of one of the members that there is a considerable turf protection in the sense that isn't their one barber college in town that is owned by an individual that is on the Board that somehow individuals that need licenses or accreditation need to go to his facility and is that the only outlet? This is just one complaint from one barber and it is strictly going to you as I heard it so could you enlighten me as to what is available for a person that must be licensed?

SMITH: Yes, there is one college at the time in this State and it is here in Anchorage and it is owned by Manual Norat, who is a Board member. I don't know if Mr. Norat is going to speak today but he has informed us, the other members of the Board, that he will be dropping soon from the Board. He has other engagements (UNDISCERNABLE) very tightly that way and there will be another set open on that Board. But I'd like to clarify something. I've worked as a Board member on the, I've set in on the last two testings, last April and this October. The procedure, I feel, that Mr. Norat's way is very good as far as if we have a student coming from his college, he automatically disqualifies himself and will not grade that person. I think this is a very fair way of doing it and I also had two people that took the last test that are working among my shops and I disqualified myself from grading them also. So we're trying to cut down any discrepancies whatsoever there. I think that's a very good system.

MARTIN: Thank you, sir. How do people from Fairbanks, sir, and Juneau or other sections of our state get qualified if they cannot go to a or at least get the education? Is it possible for a person in the northern part of our state to meet the minimum requirements without having to come to Anchorage to the barber college?

SMITH: No, sir. At the present time to enter this profession one must go to an accredited barber college. I feel that that is the way it should be in any state. The instructors at that college are very well qualified. I have examined the college myself and am very impressed with their procedures. I have lived in six states in all and I have licenses in four and the procedures in this college are actually above most other colleges that I have participated in.

STURGULEWSKI: Mr. Chairman?

BRADLEY: Senator Sturgulewski.

STURGULEWSKI: Bud, you've heard not only at this meeting but at others the need for practic act or statute and regulatory change. How do you, as a Board member, see your responsibility to bringing those? Do you just see you responding to the bureaucracy or the Legislature or do you see your Board moving ahead to address some of these issues that have been raised? Okay, if you're continued in other words, what's your responsibility, what's your role?

SMITH: Well, as a Board member, I am acutally open to all comments in all directions. As far as other barbers, I want them to come forward and I've stated that way since I was elected to the Board at different meetings and things that I'm open at all times to any suggestions from my profession. As far as goals, I'll be sending in a report of what I'd like to do this coming year and what I'd like to accomplish and it's going to be quite lengthy. Like I said, I've just been appointed to the Board and it takes time really to get these things done. You can't do it over night. We've got a tremendous amount of changes in legislation coming up and I hope legislators go over these legislation and do it very closely and help us in this respect.

STURGULEWSKI: Mr. Chairman. Just to continue a bit but do you see that as your direct responsibility to see that those changes are developed and put into legislation. I mean are you waiting for somebody to come with something so you react or do you see you taking a positive action to develop those needed changes. I think I'm looking for accountability. Whose responsibility is it to address a number of the concerns that have been raised?

SMITH: Yes, ma'm. Personally, I'm going to monitor this right up until these bills are served. This is one of my goals. We have set up a legislative committee, the barbers here in this town, and they've come up with a tremendous amount of changes on our laws to date and I think you're going to find that all these changes are needed for many years. You're going to find (UNDISCERNABLE)

STURGULEWSKI: Thank you.

BRADLEY: Anyone else on the Committee have a question? If not, Bud, I know you are relatively knew and you may have heard, are you aware of any license being suspended or being revoke as a result of malpractice or not living up to the standards of the Board?

SMITH: Not at the moment, Sir, I'm not.

BRADLEY: You know, one of the criticisms by the audit which was alluded to and implied in the report and then by some of those who testified that conducted the audit during the Budget & Audit Committee meeting that they weren't doing anything. If they weren't doing anything, we don't need them. There are two ways to go, I think, there. Either terminate or appoint new members that do something. So that's just a comment. Normally I refrain from giving personal opinions during these testimonies but I think it's admirable of Manuel Norat to drop from the Board because I've got the same complaint from numerous people, too, but everybody who has done anything has got a conflict of interest. If you haven't done anything, you don't have a conflict of interest. So you have to depend on the integrity of some people. But that might be a good thing to do. Having a barber shop and then the barber college and then being on the Board does subject

him to criticism so I think it's admirable of him to consider that. Your comments regarding that particular thing are most appropriate, too, and they might be good to keep in mind but it has been a common complaint from people who have called and written letter.

SMITH: Yes. I find that very true, sir, going over the minutes of the last few years.

BRADLEY: Any other questions? If not, Bud, thank you very much.

ANCHORAGE MODERATOR: Stand by just a moment please.

(UNDISCERNABLE - TESTIMONY FROM DONALD MORRIS, ANCHORAGE)

MORRIS: There is a definite need in my belief find the paramont duties of the barbers to prevent the spread of disease and to give a good commodity to the public, general public. The duty, as I see it, of the Board of Barbers is to see that they have the proper facilities, proper education, the proper testing, examing, licensing, so that we are assured that the barbers in the profession have been trained thoroughly, have been examined and are capable of rendering this service in protecting the general welfare. Otherwise, I am in complete agreement with what Judy said. We worked on the same committee. I am in agreement with what the gentlemen before Jim said with its reciprocity permits. We are the only state that allows people to work with a permit until the Board convenes again so that they can be examined. There is no other state. If you do not have their license, you do not work in their State until you have been examined and, therefore, I think this permit is very fair to someone from the Outside coming in. Really, that's all I have to say except to answer some questions.

BRADLEY: Then what do you recommend -- that we keep the permit situation as it is although no other state has such?

MORRIS: Well, with the Board only convening unless they want to change and have the Board convene more often, the permit situation seems to be the only solution. Now, Judy, we have recommended, this committee that I'm working with, that students coming out of school only be allowed to work in a shop, be issued a permit only working under the direct supervisions of a master barber, who is already a master barber in the state, until the time that the Board convenes so that they can be exempt.

BRADLEY: What about somebody coming from the Outside? Does anybody investigate? How do you know he didn't just leave barber school down there?

MORRIS: I don't know the workings of the State Barber Board right now but if they have a license, they are given a permit but as far as coming out of school, I don't know. I personally, myself, don't believe that they should be given a permit until they have been tested.

BRADLEY: Well, the reason I mentioned that is (UNDISCERNABLE)

ANCHORAGE MODERATOR: Stand by, please.

BRADLEY: If anybody has any comments to make although you're not on these sheet, maybe as a result of some of the testimony stimulated, might want to make two or three comments.

MOHR: My name is George Mohr, spelled M-o-h-r. I live 4824 Queens Court, Anchorage. Yes, I will fill this in. I would like to ask the members of this hearing, if I am, I'm fairly familiar with the provisions that a sunset law involves when it goes into effect. Doesn't it mean for the consumer, and I am a consumer -- I'm a customer; I'm not a barber and I know nothing about unions and permitting procedures. Doesn't it mean that there would be no qualification tests or procedures at all if the sunset law takes effect? In other words, if the current supervision over the qualification of people who cut my hair is abandoned is then there no more standard for performing the art properly available in the State of Alaska? Is that a correct assumption?

BRADLEY: It need not necessarily be that way. You know like some states give an examation and you pass it or you don't pass it. You go to school or

MOHR: Do we have that now?

BRADLEY: We have the school right now. We have one of these that was grandfathered in. And how it will be if we decide to terminate this Board, we don't know right. Maybe they'll just issue a license. Maybe they'll have to take some standard examination before it will be issued?

MOHR: So there will be some assurance. I'm asking for this reason, I've been here 28 years and when I came to the Territory, the availability of proper barber services was very limited on a hit or miss basis you had to find out who was good, which, of course, is okay in many things in the open market places. You find out who is good and who can serve you and if not you don't, you don't patronize them. Excuse me. With the development to which Anchorage and the rest of the State is coming now, this is a shocking experience that it happens to you that you get a very bad treatment and then what you do to remedy the situation? At least for the next four weeks. If you have an important engagement here. That is the deal and if this is a real obstacle and hazard. I mention this because it happened to me and I wasn't very pleased when I knew that the barbers were eventually allowed to practice in the metropolitan area here are well qualified and I have not had a bad experience. But I did have my bad experience before this went into effect. So that's my concern is that something should be there. I have no technical understanding of the medical hazards that might arise if any qualification procedures are dropped but I'm, and of course I hope they are maintained. I'm concerned with the state of the art. Okay?

BRADLEY: Thank you very much, George. I'm glad we got a consumer here. We put the advertisements in the paper and what not but sometimes you just get the professionals and not the consumers. Judy, when two people are pressing the button at the same time, only one talking, is it okay? Same time? Do you have any further comments to make?

MOHR: No, not at all. As I say, I only hope that whatever I'm able to enjoy here as far as barbering (UNDISCERNABLE) something or another how a Board or any other commission is run. I've got to rely on some

BRADLEY: Regulation but not overregulation?

MOHR: Okay, it is exactly that.

BRADLEY: We'll have some protection. Okay. Thank you very much. Is there anyone else wishes to make some comments. Yes, Dick?

EVANS: I'm Dick Evans. I'd like to comment about the law. I view it like the driver's license. All the drivers aren't too good but if we didn't have a law, they'd be a whole lot worse. I hate to see Manual quit the Board. He cares and we need people who care. That's it.

BRADLEY: Okay, Dick, thanks. Any questions? I agree. I think it's going to be a loss, too, and I think a lot of people complain because, you know, they find an excuse to complain. You know, I've put in a few bills, too, that I've got criticized for because I had a conflict of interest. Well, I've done away with my conflict of interest. By golly, if you've done anything, you've got a conflict of interest. It's going to be a loss. I agree. Had enough initiative and get up and go and drive to start a barber college, to set some standards, to protect me -- I've got scalped quite a few times -- kind of like the barber asking you "how do you want it?" It's better to take off too little than too much. Can't put it back on. And good barbers do that. But that is a common complaint and for the good of the profession I think it's admirable for Norat to -- he can still do the same thing he's doing. Probably even influence the Board because a lot of people have respect for him. Yes, Bud? Bud Smith. If you speak loudly will it pick up, Judy? Okay, I'll repeat it. Please, please come back. This will be Mr. Maurice "Bud" Smith making additional comments for his initial testimony. Just, we're all home folks here.

SMITH: In summing up, I would like to say a few points here that at the present time, I am trying to get a state barbers' association started in this state and my goal is January 1980 to get this underway. Another respect, I'd like to see a limit to the Barber Board members. What I would like to see is two three-year terms at the most and have them rotating so that we'd have a new member coming on the Board as one goes off. Another respect I'd like to run over here is our products. Now we've been told by our insurance companies -- most all of us carry malpractice insurance -- and if there's no examining Board to qualify licensed barbers, all these insurance companies are going to drop our malpractice.

BRADLEY: Bud, can I interupt just a minute. Is there anyone here that is from the hairdressers that wishes to testify? It looks like we are going to be through with the barbers' testifying soon so we could probably start with some of those if you like. I just thought I would make that comment. Go ahead.

SMITH: Another thing I would like to clarify too as being on the Board -- procedure of permits. This is quite an issue, I can see by listening to the testimony. The way it is set up right now, anybody coming in from another state wishing to obtain a license in our state, we, as Board members, examine their credentials, we have to see a copy or the diploma from an accredited barber college or a license for barbering in another state. Upon this we can write a permit for them to go to work until the test is given. Now, once the test is given, we pick up that permit and it is no longer good. It is up to this individual to have done his homework and pass this test. While we are on the testing, I would like to bring up the point that if you

review our results in this past test in October, you will find it quite good. What we did there is we went through a new procedure that has never been done before to my knowledge. What we did, our chairman of the examining board, Mr. Jim Rossi, gave us, the Barber Board members, certain areas in one particular book that we are using only in the State -- this will be on the law coming up also with the name of the book. I, myself, was assigned to an in bacteriology and sterilization and sanitation. I made up questions from this area. I sent in my questions to Occupational Licensing. All Board members were assigned different categories in this book and we sent in all to Occupational Licensing and it was up to them to sit down and pick out a hundred questions out of what we sent in. The examination, we were handed these questions and we served them. I, myself, have been a great believer in doing away with 100% essay questions. I feel that this is not fair to people no matter what profession you are in because of the hard grading system on an essay question. I made recommendations prior to this test to other Board members that we should keep it very simple -- either fill-ins, true or false, and multiple choice. I, myself, prefer multiple choice. We had 75 questions of multiple choice. Twenty-five were essay questions which were quite easy, I must say. I don't have right with me at the present moment the percentage that passed the test and did not but I am sure that it was quite high that passed the test. Another thing I'd like to bring to your attention is that chairman Jim Rossi has moved from Soldotna to Anchorage. Now we've had problems in the past working with Jim Rossi. It would either have to be telephone at our expense or letters because no teleconference there from Soldotna. I find myself having Mr. Rossi still the chairman of this Board and located in our town here, I find myself that we are going to be able to work much closer and upgrade the Board in that respect. I, myself, hope to have Mr. Rossi over to my house many evenings that way and go over different aspects of what we are talking about here today and different laws and other Board members if they possibly can make it. Another thing I would like to try, I don't think it's ever been tried in this State before, on my own, I would like to put a newspaper ad in the local paper to see what the public feelings are on our profession. We ask people daily different criteria that way behind the chair but nevertheless I want something in writing. I want to be able to show you legislators what the feelings are of the people on the street. Another thing I would like to do as a Board member, I would like to try to set up a national law criteria with other states. This has never been accomplished before and I don't believe that it has ever been tried. Two weeks ago I spent two days, approximately 23 hours, reading material from other states and I find tremendous difference in laws and I find that there is too much difference. I, myself, would like to go to the national board meeting next year, even if I have to pay my own expense, I would like to do it and I think I will. While we are on that point, I think there are areas where we might be able to come up with our own financing that way and myself, speaking as myself and not a Board member at the present moment, I don't think it is up to the State, personally, to send us anywhere in the United States. I think it is up to us Board members to come up with the money anyway we possibly can.

BRADLEY: As a result of association dues? As in many professions.

SMITH: I think that pretty well sums up what I have to say here. Listening to testimony this morning it really covered an awful lot of material and I don't want to duplicate it and take your time but I can reassure you as a new

Board member that there are a tremendous amount of changes coming up in laws and whatever in our profession and I would like to have you judge us on more or less that merit -- the changes that we are hoping to do and not phase us out.

STURGULEWSKI: Mr. Chairman?

BRADLEY: Senator Sturgulewski.

STURGULEWSKI: A comment. I think it is one of the helpful things on the whole sunset review even if we don't eliminate a good number of the boards is for people to get their act together and if we've got barriers either through staffing problems in the state or the individual board members not doing their job, I think that is the time that we start to address some of those things and there is a responsibility of the people in the profession not just the Board. I would like to have later for the record, obviously we are not going to take any action until the Legislature is in session, we can't, but you made a comment regarding malpractice insurance. If at all possible, I wish you would get some firm to make some statements regarding just what the procedure is for handling malpractice as far as this profession goes. What are the kind of rates? What kind of problems do we get into and, in fact, how would they look at it if there were no standards? What kind of liability are we talking about? In other words, I'm not informed about that. I think your point is interesting and I'd like to see some information on it. If you could supply that to me, I'd certainly welcome the information.

SMITH: Yes, ma'm. I certainly will.

BRADLEY: Any other questions? Well, Bud, I personally, and I think I can speak for the Board, appreciate your interest and attitude as a Board member. I think that is what the Board needs. I think we'd better check with the teleconference network and see if any latecomers have come in from Fairbanks or Juneau. Fairbanks, do you have any people that might have come in later that would prefer to testify concerning the Barber Examiners Board? Over.

FAIRBANKS MODERATOR: No, we don't have any.

BRADLEY: Juneau? Over.

JUNEAU MODERATOR: No, not at this time, Mr. Chairman.

BRADLEY: Thank both Fairbanks and Juneau for your cooperation for the testimony concerning the Barber Examiners Board. And, at this time we will take a two or three minute stretch break and decide what we will do from this point on. I suppose we will take, the Committee will agree to take those hairdressers that are available now up to lunch and the remainder of them after lunch. All right Judy, make your network check.

ANCHORAGE MODERATOR: Fairbanks, how many hairdressers or

FAIRBANKS: Others will be returning in awhile and they do all wish to speak later.

ANCHORAGE MODERATOR: Would you judge sort of informally that the people who are there in the room waiting to testify now will probably want to hear all of the testimony and might prefer to wait until one o'clock to present theirs?

BOARD OF BARBER EXAMINERS

CENTRALIZED LICENSING STATUTE, AS 08.01.

BARBER ACT, AS 08.12.

****

DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT

DIVISION OF OCCUPATIONAL LICENSING

POUCH "D"

JUNEAU, ALASKA 99811

S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

March 11, 1980

Honorable W.E. "Brad" Bradley
Chairman
Senate Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Bradley:

Re: Regulation of Barbers and Beauticians

Enclosed are this committee's recommendations concerning the Boards of Barber Examiners and Hairdressing and Beauty Culture Examiners. We realize these recommendations are coming to the committee at a late stage of the "Sunset" review process, however, we offer them for your consideration.

Sincerely,

Committee on Regulatory Reform
Bob Palmer, Special Projects Coordinator
Charles R. Webber, Commissioner Commerce & Economic Development
Ernst W. Mueller, Commissioner Environmental Conservation

Enclosures

Pursuant to the objectives and function of this committee, we have reviewed the functions of the above referenced boards and the licensing of the above referenced occupations. During the review, we have kept in mind the Governor's policy theme which stated the need and desire "to improve the ability of the private market system to provide needed goods and services," "encourage private sector competition," "to reduce unnecessary governmental intervention," "reduce restrictions on new business formation," and "to provide government services in an efficient manner."

Accordingly, the following is recommended:

1. The Board of Barber Examiners and the Board of Hairdressing and Beauty Culture Examiners; Cosmetologists, should be combined into a single five-member board consisting of four members from the profession and one member from the general public who is not involved in the profession.

2. Those that practice in these occupations that offer only the services of cutting or trimming hair and/or beards and/or mustaches and/or washing or shampooing the hair with water and prepared commercial shampoos should not be required to be licensed to practice such occupation.

3. Those who give facial and scalp massages or treatments with oil, creams, lotions or other preparations either by hand or mechanical devices or singe, dress, dye, bleach, color, or wave the hair utilizing cosmetic preparations, anitseptics, tonics, lotions or creams with the hands or with a mechanical or electrical apparatus shall be licensed and regulated by the State.

4. The requirement for "good moral character" should be deleted.

5. Examination should be waived for those who hold either a bona fide license issued by another territory, state or country, or a diploma from an accredited barber college or beauty school.

6. Any requirement for a high school diploma should be deleted.

7. Delete manicurist from any regulation.

April 9, 1980

Senator Brad Bradley,

This letter offers comments on HB 978. Passage of HB 978 would deal a serious blow at cosmetologists as the word is used in the beauty culture field and by legislatures elsewhere, which includes hairdressers, as opposed to barbers. We believe that it would also be of real concern to the customers who would have no way of knowing whether an operator (licensee) is a person trained in one area or the other.

The bill appears to be a great one for barbers, but a sad one for hairdressers. There are several areas that need to be taken under great consideration:

1. The definition of cosmetology used (A.S. 08.13.220 (3)) does not follow the meaning of the word generally adopted throughout the nation or by the writer in the subject.

2. "Hairdressing" is not defined.

3. No legislative guideline or standard is given for schools other than requiring regulations as to "curriculum, minimum hours of instruction, physical condition of the facilities, and financial responsibility of the owner." (A.S. 08.13.110). Nothing is provided regulating or establishing standards for teachers, or student-teacher ratio, minimum equipment required, supplies, reports, required filings, or standards for approval, disapproval suspension, or revocation.

4. No standards are provided for shops.

5. No inspection of shops or schools is provided, except for health and sanitation enforcement by Health and Social Services who has had a dismal performance of the same authority in the past.

6. This bill lumps barbers and cosmetologists together so that the board may be totally controlled by one profession, the barbers.

7. Grandfather rights are provided for barbers by A.S. 08.13.150, but none are provided for cosmetologists.

In conclusion, the bill, as written, appears to be in need of considerable revision.

Very truly yours,

Alice Tomk

Attn: The Honorable Senator Bradley, Chairman

Dear Senator Bradley:

This letter offers comments on HB 978. On behalf of the Alaska Hiardressers and Cosmetologists Association, it is submitted that the bill does not meet the desires of the thousands of consumers who have submitted statements to your committee, or the substance of the testimony at hearings held by your committee. The consolidation of the two existing boards, Barbers and Hairdressing and Beauty Culture, does not require the combining of the professions or the domination of the new agency by barbers, as the new bill proposes.

Passage of HB 978 would deal a serious blow at cosmetologists as the word is used in the beauty culture field and by legislatures elsewhere, which includes hairdressers, as opposed to barbers. We believe that it would also be of real concern to the customers who would have no way of knowing whether an operator (licensee) is a person trained in one area or the other.

While other states such as California have expanded the role of boards of cosmetology as reflected by the bill proposed by the Association, and require continuing professional eduction as a condition of renewal of licenses for the protection of the using public, HB 978 appears to be a step backwards from consumer protection and a lowering of professional requirements.

The bill appears to be a great one for barbers, but a sad one for hairdressers.

1. The definition of cosmetology used (A.S. 08.13.220(3)) does not follow the meaning of the word generally adopted throughout the nation or by the writers in the subject.

2. "Hairdressing" is not defined.

3. "Hairdresser" is not defined.

4. No legislative guideline or standard is given for schools other than requiring regulations as to "curriculum, minimum hours of instruction, physical condition of the facilities, and financial responsibility of the owner." (A.S. 08.13.110). Nothing is provided regulating or establishing standards for teachers, or student-teacher ratio, minimum equipment required, supplies, reports, required filings, or standards for approval, disapproval suspension, or revocation.

5. No standards are provided for shops.

6. No inspection of shops or schools is provided, except for health and sanitation enforcement by Health and Social Services who has had a dismal performance of the same authority in the past. California has resorted to inspectors under Board of Cosmetology supervision for the purpose, the same here would combine health, sanitation and compliance with other standards such as display of licenses, equipment used, checking personnel, professional supervision, etc. As licensees are required to demonstrate knowledge in these areas, they should be well qualified, and inspector qualifications can be higher.

7. Historically, as far back as ancient history, barbers and cosmetologists have been separate professions. They have separate associations. But this bill lumps them together so that the board may be totally controlled by one profession. As set out by Section 6, the five members of the existing Board of Barbers are to be voting ex-office members, thus assuring control of the new Board by Barbers to the exclusion of cosmetologists. Even without it, three "Hairdressers" may be all barbers! Only one cosmetologist is assured.

8. Grandfather rights are provided for barbers by A.S. 08.13.150, but none are provided for cosmetologists.

9. A "barber" license is provided by A.S. 08.13.150 and 010(b)(1) no definition is offered as to what is a barber, except by reference to A.S. 08.12 and regulations thereunder, but that statute is repealed by Section 5, and all regulations thereunder are repealed by implication, as they rely upon A.S. 08.12 for their validity. Thus, once A.S. 08.12 is repealed, any interested person would have to search statutes and regulations

no longer published to attempt to find the meaning of the new statute. That is both unfair, unjust and unduly expensive and time consuming.

10. The only licenses contemplated by A.S. 08.13.070 are (1) for hairdressing or cosmetology, and (2) to organize, open or conduct a school. None appears to be provided for "barbers" or for teachers.

11. Qualifications under A.S. 08.13.080 require successful completion of all courses required to be taught by a school of hair design, but does not include any mention of a school of cosmetology. Furthermore, these provisions appear contrary to A.S. 08.13.090 which contemplates examination "within the field of practice for which the applicant is seeking a license", and to A.S. 08.13.100(b) which provides that "A license shall state the areas of practice the practitioner is qualified to perform." Again, that section provides for a designation as "barber", "hairdresser" or both, but neither is defined by the bill. Surely, if one is to be licensed in a limited area of practice, then one should not be required to successfully complete all courses offered.

12. It appears that A.S. 08.13.120 permits practice "outside of a place of business", but provides no criteria for such itenerant practice, particularly in the area of sanitation, and would appear to make it virtually impossible to subject such itenerant practitioner to any form of inspection, thus negating the intent.

13. If licensing and regulation of hairdressers and cosmetologists is deemed desirable for the protection of the consumers of the service, there appears to exist no logical reason for excluding from that protection communities of less than 1,000 people as provided by A.S. 08.13.150(b). The further question arises as to the status of an unlicensed practitioner in such a community who, after a period of some years of such practice, moves to a more populated area, or the area in which such person practices increases in populaiton from 999 to 1,000. Would such a practitioner be suddenly illegal, or would he or she be somehow "grandfathered in"? There appears to be no reason why such a practitioner should not be required to be examined and licensed initially. The subsection should be eliminated.

14. While A.S. 08.13.150(b) appears to create an exemption, the misdemeanor provisions of A.S. 08.13.180 contain no exception. Clarification would be helpful.

15. Page 8, line 10, "affect" is apparently intended to be "effect".

16. The loose definition of "cosmetology" in A.S. 08.13.220 may, conceivably, include manicurists, cosmeticians, and electrologists, but appears to be intended to cover only cosmeticians, although the phrase, "similar work" is subject to widely varying interpretations, and what is intended by "the human body" is likewise vague. For example, it could include pedicure, or even the occupation engaged in by massage parlors, erotic or otherwise. On may also wonder whether the head and the limbs are intended to be included in "the human body", or whether the phrase includes only the torso.

17. Although the minimum requirements of A.S. 08.13.082 [one year under (a), and six months under (b)] are understandable, the maximum requirements are not. If the language is changed to "not more than" instead of "not less than", the meaning is clearer, but the result would appear highly inequitable if the apprentice had to interrupt education for a period of time, such as for illness, resulting is going over the limitation. If A.S. 08.13.170 is intended to cure the problem such is not indicated by 082.

18. A number of states are requiring continuing professional education as a condition of license renewal. The bill proposed by the Alaska Hairdressers and Cosmetologists Association contained such a provision because customers should be entitled to know that new procedures, products, styles and safety provisions are known to the practitioner. This bill has no such provision, but it should.

19. The administrative disciplinary powers conferred upon the Board include only suspension and revocation of licenses. The harshness of the provisions often result in their failure of enforcement, or undue litigation efforts and expense on the part of the threatened licensee who needs to protect his right to earn a livelihood. Again, the bill proposed by the Association provided for the assessment of civil penalties or fines, which can often accomplish the desired result much more equitably,

efficiently, and economically for the state as well as for the licensee. A specific power to issue orders to show cause might well speed up and facilitate the Board's administration of its disciplinary authority.

The attached draft statement for use by the various state chapters of the National Hairdressers and Cosmetologists Association discusses the wide differences between the professions which are not addressed by HB 978.

In conclusion, the bill, as written, appears to be in need of considerable revision if it is to accomplish the desired purposes equitably, with clarity, in the interest of the public, and without undue discrimination against cosmetologists who are considerably more numerous than barbers.

Very truly yours,

ROSE & BREEZE, P. C.

STATEMENT BY THE

[STATE] HAIRDRESSERS AND COSMETOLOGISTS ASSOCIATION

CONCERNING THE MERGER OF THE

[STATE] BOARDS OF COSMETOLOGY AND BARBERING

For the past [number] years, the [State] Hairdressers and Cosmetologists Association has represented the concerns of the now more than [number] licensed cosmetologists in [state] and has been committed to ensuring high standards of professionalism among the practitioners of beauty culture. To this end, the [State] Hairdressers and Cosmetologists Association has sought to expand and intensify the curriculum of beauty schools and has supported an active role for the [state] board of cosmetology. However, because of such activities and because the officers of the [State] Hairdressers and Cosmetologists Association are themselves practicing cosmetologists, the [State] Hairdressers and Cosmetologists Association is vitally aware of the uniqueness of this profession and particularly the specialized skills required to service the patrons of beauty salons.

It is because of the distinctiveness of this profession that the [State] Hairdressers and Cosmetologists Association opposes the merger of the [state] boards of cosmetology and barbering. The qualifications and characteristics of these two professions are so diverse as to make it infeasible and therefore inappropriate for cosmetologists to serve on a board

which examines the qualifications of graduates of barber schools and conversely for barbers to evaluate the competency of graduates of beauty schools. It would be equally difficult for cosmetologists to fairly evaluate whether a barber's license should be suspended or revoked as it would be similarly infeasible to expect a barber to be able to judge the performance of a licensed cosmetologist. Therefore, the merger of these traditionally separate boards would do a disservice to both professions and would hinder the respective board members' ability to effectively fulfill their statutory obligations.

Moreover, there are limitations on a legislature's power to classify or merge various occupations with respect to licensure. In order to be lawful, the classification of occupations must be reasonable; accordingly, different classes must be regulated by different administrative bodies. Although the differences among the established classes must be "substantial" to warrant separate administration, it is clear that they do not have to be "great" to require individual licensing.

The disparity between the cosmetology profession and the barbering profession clearly requires separate and distinct licensing requirements and separate and distinct regulatory boards. The disparity is most noticeably reflected in the diversity of the services each renders to its particular clientele. Since the cosmetologist primarily serves female patrons, fashion is a critical factor in the performance of the art of hairdressing. It

is not enough to know how to cleanse and cut hair. A licensed cosmetologist must be an expert in hairstyling and be able to cut, set and comb out a patron's hair so that it not only reflects the latest trends in hair fashion but also suits the personality and physiognomy of the customer.

Since women can wear their hair short or long, straight or curly, twisted into French knots or corn rows, plain or adorned with ribbons, hairpieces, combs or barretts, it is obvious that the hairdresser requires different skills than the barber who remains essentially immune from the vagaries of hair fashion. In order to achieve certain effects, the hairdresser must be trained in finger-waving, wigology, curling, singeing, thinning, tinting, streaking, bleaching, rinsing, permanent waving, hair straightening, pin and roller curling as well as iron curling. Many of these skills would be of little service in a barber shop.

In addition, because the salon owners service a female clientele, the licensed cosmetologist must be skilled in the application of cosmetics. Not only do hairdressers need to understand the use and advantages of such cosmetics as eyeshadow, rouge and nail polish, but they must also be able to arch and tint eyebrows as well as remove facial hair by the use of tweezers, wax, depilatories and electricity or camouflage such superfluous hair by bleaching, again employing techniques not required by barbers who service their clients more appropriately by shaving off facial hairs.

Because cosmetologists and barbers provide different services to their patrons, they generally rely on different instruments and tools. It is the rare occasion at most that a barber would be called on to use hair pins, bobby pins, clips, curlers, rollers, hair nets, curling irons, hair dryers or eyebrow tweezers. It would be equally unusual for a cosmetologist to wield a straight razor during the course of a traditional day's practice.

Such diversity in the services performed and the implements used are reflected in the differences in the curriculum provided and often required by statute in schools that train future cosmetologists and barbers. The very fact that there are beauty schools which are separate and distinct in ownership and operation from barber schools underscores the separateness of the two professions. A perusal of the subjects offered in beauty schools indicates that cosmetologists emphasize clinical instruction and receive extensive training in hair styling, permanent waving (a service which barbers are prohibited by law from offering in California and several other states), cosmetics, hair coloring and lightening as well as the care and styling of wigs.

In addition, a survey of the hours of training required for cosmetologists and barbers reveals that cosmetologists in 29 states were required by law to have considerably more instruction than student barbers. In another 13 states, both professions have an equal number of training

hours, leaving only 8 states where cosmetologists receive less instruction than barbers. In fact, cosmetologists generally receive 1,000 to 2,500 hours of training in contrast to barbers who receive from 0 to 2,000 hours. Further, not only are cosmetologists' apprenticeship training periods generally longer than in the barber apprenticeship programs, but the minimum educational qualifications for admission to beauty schools are higher than the requirements for acceptance in barber schools.

Finally, the existence of two separate and distinct professions is confirmed by the fact that there are now and traditionally have been two separate trade associations, the National Hairdressers and Cosmetologists Association, Inc., which represents the concerns of the licensed cosmetologist and the Associated Master Barbers and Beauticians Association which represents the practicing barber. Each explores the interests and deals with the problems unique to its membership. Although there is informational exchange between the two groups, each association works to service the particular needs and express the views of their individual members.

Thus, it is imperative that the [state] board of cosmetology and the [state] board of barbering continue to function as two separate entities. The cosmetologist and the barber serve different clients, perform different services, use different implements, study different courses and have different interests as reflected in the existence of their separate

trade associations. The [State] Hairdressers and Cosmetologists Association therefore cpposes the merger of these two distinctive licensing boards so that applicants and practitioners alike can be evaluated by those best suited to judge their capabilities and their performance.

BOARD OF BARBER EXAMINERS SUNSET

KEY TO REFERENCES:

(Y) - (yellow cover) - State of Alaska Sunset Review, 1979, Prepared by The Division of Occupational Licensing.
(B) - (blue cover) - Division of Legislative Audit Performance Review.
(W) - (white cover) - Senate Commerce Committee Public Hearing testimony, October 22, 1979.

1. The Barber Examiners Board should not be continued.
   (Y) - p. 1, par. 2.
   (B) - p. 8, par. 4.

If The Board of Barber Examiners is to be continued then the following changes/recommendations are suggested:

A. The Board should review its examination procedures and develop a valid, consistent examination and grading standard.
   (Y) - p. 5, par 1; p. 6, par 3; p. 7, par 2; p. 9, par 3; p. 12, par 5; p. 13, par 5.
   (W) - p. 2, p. 6, p. 8.
   (B) - p. 10, recommendation #2.

B. There should be an inclusion of two public members on the board without increasing its overall size. (5)
   (Y) - p. 11, par. 3; p. 13.
   (W) - p. 6, par. 1.
   (B) - p. 11, recommendation #4; p. 12, last par.

C. The five (5) year Alaska License restriction for Board members should be deleted. (08.12.020)
   (Y) - p. 9, par. 5; p. 13. par. 4.
   (B) - p. 12, par. 3 (definition of the statute in question)

D. Board Membership should be limited to two consecutive terms.
   (Y) - p. 13, par. 4.
   (W) - p. 23.
   (B) - p. 11, last par.; p. 12, par. 5 & last par.

E. Statutory authority for reciprocity should exist for obtaining a license. Presently, licensure is by examination only.
   (Y) - p. 9, par. 4; p. 13, par. 4.
   (B) - p. 7, par. 4; p. 9, par. 4; p. 10, par. 1.

F. Section 08.12.270 should be repealed. (applies to a person engaged in barbering in a community having more than 1,000 persons, etc.)

BOARD OF BARBER EXAMINERS

(Y) - p. 9, par. 4; p. 10, par. 3; p. 13, par. 4.

G. Section 08.12.180 should be repealed. (Licensing of person barbering before 1957 without examination.)
(Y) - p. 13, par. 3. (this is now obsolete. If a person in this category does not have a license by now he never will. Formality.)

H. Change Fees - Board recommendation
Section 08.12.080. [EXAMINATION] FEES. An applicant [FOR EXAMINATION] shall submit with his application a [AN EXAMINATION] fee as follows:

(1) examination for apprentice barber registration [LICENSE]..... $25

(2) annual apprentice registration fee [EXAMINATION FOR BARBER TEACHER LICENSE].... $10 [$75]

(3) annual barber license fee.... $15

(4) annual barber teacher license fee.... $50

(5) annual barber school or college license fee.. .. $150

(6) examination for barber teacher license.... $75

GENERAL COMMENTS:

The Board of Barber Examiners should establish formal goals, objectives, and quantifiable measures which should be included in the Division of Occupational Licensing's budget document.

THE BOARD DOES NOT HAVE A STATEMENT OF GOALS AND OBJECTIVES TO DATE ACCORDING TO THE O. L. REPORT (Y). (B) - p. 14, recommendation #7.

The testimony of the Barber Examiners hearing on October 22, 1979 said very little regarding significant changes and recommendations.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT

OFFICE OF THE COMMISSIONER

POUCH D
JUNEAU, ALASKA 99811

October 19, 1979

Alaska State Legislature:

Transmitted herewith, pursuant to AS 44.66.050, are the reports of the Alaska State Board of Barber Examiners and Board of Hairdressing and Beauty Culture Examiners.

This evaluation, supplemental to the Department's testimony before the Legislature, serves to focus attention upon the questions of whether or not the boards are best serving the interests of the public. Data as provided by the Division of Occupational Licensing, the board members, licensees and members of the public has been received, reviewed and evaluated.

Yours truly,

Charles R. Webber
Commissioner

CRW/kkk3/15

STATE OF ALASKA
Board of Barber Examiners
July, 1979

Findings

The Board of Barber Examiners was created in 1957. Members of this profession, and the Board, are regulated under AS 08.12; control over health and sanitation of facilities is with the Department of Health and Social Services (AS 08.12.030(2) and AS 18.05.040(9)).

Alternatives to the present operation of the Board and to State regulation of the barbering profession are discussed in this review; however, we believe that the review indicates termination of the Board and licensing.

I. General Information

A. Regulated Parties

1. Barbers

B. Definitions

"Barbering includes the following practices when performed for hire or reward:

(1) shaving or trimming the beard or cutting the hair;

(2) giving facial and scalp massages or treatments with oils, creams, lotions or other preparations either by hand or mechanical appliances;

(3) singeing, shampooing, dressing or dyeing the hair or applying hair tonics." (AS 08.12.280)

C. Nature and Composition of Board

1. Board members and terms:

(No specified length of term and no restrictions regarding consecutive terms or numbers of terms.)

Don A. Noll
Manual Norat
James Russi
Elmo Kienbaum
Maurice Smith

2. Representation:

Profession = 5 (by statute)
Public = 0

3. Qualifications:

Four members shall be from separate major senatorial districts and the fifth from the district having the largest number of practicing licensed barbers. Each member shall be a practicing barber who has engaged in barbering the State for at least five years prior to his appointment.

D. Licensing Data

Currently licensed:

in-State	=	204	
out-of-State	=	40	
	Total	244	(July, 1979)

E. Fees

1.	barber license exam	$25.00
2.	teacher license exam	75.00
3.	annual relicensure	10.00
4.	annual teaching relicensure	50.00
5.	annual school/college fee	150.00
6.	temporary permit	25.00

F. Board Revenues and Expenditures

	FY '76	FY '77	FY '78	FY '79
Receipts	$4,087.00	$5,005.54	$4,410.18	$4,369.00
-Refunds	-	35.00	10.00	95.00
Total	4,087.00	4,970.54	4,400.18	$4,274.00
Expenditures				
Per Diem	1,152.50	1,714.50	1,297.75	1,227.50
Transportation	586.93	583.61	723.22	1,647.25
Phone	20.75	74.20	84.30	464.86
Printing, Adver. & Postage	558.61	425.96	228.49	272.78
Fees & Services	170.40	115.00	300.00	35.00
Rents, Leases & Other	-	-	300.00	725.65
Total	$2,489.19	$2,913.27	$2,933.76	$1,498.29
Surplus	$1,597.81	$2,057.27	$1,466.42	$2,775.71
Deficit	-	-	-	-

(EXCLUDES DIVISION OF OCCUPATIONAL LICENSING ADMINISTRATIVE OVERHEAD)

G. Complaints

Eight of the twelve complaints filed with the administrative agency from January, 1976 through June, 1979 were complaints against the Board regarding its examination procedures. The remaining four cases consisted of complaints that individuals were practicing barbering without a license. Although these were filed in 1976 and 1977, only one has been closed. All complaints against the Board (filed in 1978) remain open.

H. Professional Qualifications

None. Most states require barber training or schooling as a prerequisite to licensure.

II. Analysis

A. To what extent has the Board of Barber Examiners operated in the public interest?

The Board is statutorily required to issue licenses and permits to qualified individuals or schools, to examine applicants for a barber teacher license, and to regulate conduct and standards of teaching facilities. The Board also has general powers which it may exercise: (1) adoption of examinations in accordance with nationally recognized standards; (2) adoption of reasonable rules and regulations relative to sanitation - ultimate control over health and sanitary conditions is expressly cited as being with the Department of Health and Social Services; (3) suspension of licenses for failure to maintain sanitary standards; (4) inspection of shops; (5) adoption of rules concerning Board operations; (6) delegation of examination, inspection and enforcement powers; and (7) other acts and things necessary to carry out the purposes of AS 08.12.

The Board of Barber Examiners has experienced several problems with its past examinations and procedures. Eight of twelve complaints filed with the administrative agency from January, 1976, through June, 1979, were complaints against the Board regarding its examination.

All applicants for licensure must take an examination. No statutory authority exists by which the Board may license through endorsement or reciprocity. In addition to the written portion of the examination, a practical portion is given consisting of four parts: haircut, shampoo, shave and massage. A passing grade of 75% must be attained on the written portion and on all parts of the practical portion. If any part of the practical is failed, the applicant must retake all four parts.

The written examination given by the Board in the past has contained a variety of types of questions (i.e., multiple choice, short essay, fill-in-the-blank). No key was utlized by the Board in grading which appears to have resulted in some inconsistencies. The test utilized in April, 1979, was provided by the National Board of Barber Examiners of America. Two out of twelve applicants passed that examination and complaints were received regarding the relevancy of some questions. The Board is currently developing a pool of test questions, with answers, from which the Division of Occupational Licensing can formulate future examinations. In this way standard procedures will be established yet each exam will be different in content.

Administration of the practical examination has also met with considerable criticism. In August of 1978 a meeting was held with the Board, representatives of the Department of Law and Division of Occupational Licensing and a representative from the Office of the Governor. The purpose of the meeting was to review allegations of impropriety on the part of the Board and to develop guidelines to assist the Board in its future operations. One Board member, who owns a barber school in the State, was advised to refrain from grading students of his facility.

The member has complied with this advice, however, he has participated in grading of other applicants. Because scores are averaged, such a procedure could work to the disadvantage of "nonstudents." A review of files of applicants who have been licensed since mid-1974 (and are still active) indicate that a significant percentage (84%) were given exactly the same passing grade (75) on all parts of the practical examination by one member of the Board. In a few of these instances the proportionate points given did not total 75 and in one case proper addition would have failed the applicant.

Past Board procedure has been to review the examinations the day after they are given. Scores on some examination papers have been changed either at the time of scoring or during the Board review process. The Board has been made aware of the potential problems this procedure could generate and has been advised to discontinue this practice. The Board has also been advised to establish standard grading criteria for its own benefit as well as that of the applicants.

The Board has adopted regulations for the conduct of the practice of barbering in accordance with reasonable standards of sanitation. However, it does not inspect facilities or ensure that the regulations are being adhered to. Standards for barber schools and colleges also have been established by regulations as have application procedures and some examination information. AS 08.12.030(2) specifically provides that the Department of Health and Social Services have "ultimate control over health and sanitary conditions for all licensees under this chapter..." At its April, 1979, meeting the Board resolved not to involve itself in inspection activities but rather to leave this to other agencies.

The Board may suspend licenses for failure to maintain sanitation standards. There is no record of such an instance having come before the Board in recent years.

Applicants for licensure must submit evidence of good moral character (certified attestation by two parties), a health certificate, and "other information required" by regulation. There is no requirement that an applicant have attended barber school or training, or that (s)he have barbering experience. The Board has proposed statutory amendments which would establish an apprentice program and which would require either 1,500 hours or two years of schooling and/or training.

Statutory exemptions from licensure are licensed cosmetologists, persons engaged in barbering within a military reservation and persons barbering in a community of less than 1,000 persons, or more than 25 miles from such a community. (In analyzing the need for regulation of this profession, one may note that the public in small isolated communities apparently does not need protection.) The Board has also requested a statutory amendment which would delete the latter exception from licensure.

Temporary permits "shall" be issued by the Board to persons entering the State or transferrring from exempt status who have either a barber college diploma or a license issued by another jurisdiction. While new graduates from another state may be issued a temporary permit, none is provided for in-State graduates. The Board has, however, been issuing permits to these individuals. Permits are valid until the next examination and are nonrenewable (except that those failing the April, 1979 examination were reissued permits).

We believe that termination of the Board of Barber Examiners and cessation of State regulation of this profession would not have any significant impact on public well-being. No complaints have been received from the public or regarding any threat to public safety. Barbers do not utilize strong chemical agents. Monetary costs of services to the consumer are relatively minor. A bill was introduced during the 1979

Legislative session, SB 215, which would abolish the Board and relevant statutes (See Appendix A). This bill is now in the Senate Commerce Committee.

B. To what extent has the operation of the Board of Barber Examiners been impeded or enhanced by existing statutes, procedures and practices which it has adopted, or any other matter, including budgetary, resource and personnel matters?

The greatest impediment to efficient Board operation has been its examination procedures. As previously noted, this has been discussed with the Board and suggestions were made to correct past deficiencies. The fact that the Board can license only by examination has created problems when individuals have demanded licensure by endorsement or reciprocity.

The Board has indicated that it feels the statutory exemption for barbers in small outlying communities is inappropriate. It has also requested that barber schooling or training be made a statutory requirement for licensure.

There is no term of membership provided for board members. The restriction on Board membership for only persons who have been licensed in the State for five years should be reexamined.

The Board of Barber Examiners has experienced some difficulty with respect to personnel and budgetary restrictions. Support staff is provided by the Division of Occupational Licensing and is presently adequate to serve Board needs; however, past employee turnover has impeded continuity and follow-up on Board requests. Fees and revenues for all boards and commissions under the jurisdiction of the Division of Occupational Licensing are collected through the Division and are deposited into a general fund. Monies deposited and withdrawn are identified by codes so that direct Board revenues and expenses may be determined.

The Board has encountered the same difficulties as have all other boards and commissions with respect to investigative services provided by the administrative agency. During FY'78 two investigator positions were vacant; as a result, one position was abolished by the Legislature. At the present time, two investigators are located in Anchorage with a Chief Investigator located in Juneau. An additional investigator position was approved in the FY '80 budget but will probably not be filled immediately due to vacancy factors incorporated into the personal service category of the budget. Procedural constraints of the administrative adjudication article of the Administrative Procedure Act (AS 44.62.330-630), while necessary, restrict timely disposition of litigation. Prioritization based on time, staffing and nature of alleged offense results in pursuit of only the most flagrant and potentially injurious licensing complaints. The administrative agency will continue to address the need for initial assessment and follow through on complaints with emphasis on magnitude of offense as it relates to public safety.

C. To what extent has the Board of Barber Examiners recommended statutory changes which are generally of benefit to the public interest?

No amendments of consequence have been made to AS 08.12 since 1960.

If regulation of the profession is determined to be of benefit to the public interest, the following amendments requested by the Board would further those interests: (1) provisions for apprenticeship programs; (2) requirements for schooling or training as licensure qualifications; and (3) deletion of exemption for persons barbering in a community having less than 1,000 persons, or more than 25 miles from such a community.

D. To what extent has the Board of Barber Examiners encouraged interested persons to participate in and report to it concerning the making and effect of its regulations and decisions, or to report to it concerning the effectiveness, economy, and availability of service which it has provided?

Notices of pending meetings and new or amended regulations are published in newspapers in the State by the administrative agency. Board regulations have not been amended since 1964. Meeting minutes for the past three years indicate no interest or participation by other than persons seeking examination privileges from the Board.

Public interests would be furthered by the presence of public members on the Board. "In recent years a number of states have added one or more public members (citizens with no particular interest in the occupation or profession governed by the board) to licensing boards in an effort to ensure that the interest of the public would be represented in decision-making."[1] The State of California, which provides for a one-third public membership on health care boards and a public majority on others has indicated that its experience with public members has been highly rewarding.

---

[1] Shimberg, B. and Roederer, D., Occupational Licensing: Questions a Legislator Should Ask, The Council of State Governments, Lexington, Kentucky, March, 1978, p. 20.

E. How efficiently are public inquiries or complaints regarding the activities of the Board of Barber Examiners processed and resolved?

Twelve compliants were filed with the administrative agency from January, 1976, through June, 1979; eight were from applicants regarding Board examination procedures, and four involving unlicensed activity were initiated by the agency. One of these cases had been closed (in September of 1978) as of June 30, 1979.

The administrative agency has been addressing investigative procedures and the need for timely disposition of complaints.

F. To what extent does the Board of Barber examiners present qualified appicants to serve the public?

The only method the Board has of assuring qualification is the examination procedure. Applicants are not required to have schooling, training or experience and the Board is unable to accept verification of licensure in another jurisdiction for licensure without examination in Alaska. Past examination procedures, however, have not proved satisfactory as measurements of ability either. The administrative agency and the Board will continue to work toward valid examination and grading standards.

G. To what extent have State personnel practices, including affirmative action requirements, been complied with by the Board of Barber Examiners in its own activities, and in its area of activity or interest?

Board staff consists of the support services of a licensing examiner employed by the Division of Occupational Licensing (also responsible for

four other regulated professions) who is hired through the State Personnel System and is subject to affirmative action requirements.

Affirmative action requirements are not applicable to statutory criteria for licensure.

H. To what extent are statutory, budgetary or other changes necessary to enable the Board of Barber Examiners to better serve the interests of the public?

If the board is reestablished, the following statutory amendments are suggested: (1) deletion of the requirement that Board members come from separate senatorial districts and the five year Alaska license restriction, length of terms should be established and number of consecutive terms limited, § 010; (2) inclusion of public members on the Board while not increasing overall size, § 020; (3) requirements for schooling or training as a condition of licensure, § 070; (4) biennial rather than annual license fees, §§ 090, 100 and 110; (5) requirement of health certification as a condition of renewal; (6) provisions for issuance of temporary permits to in-State graduates pending examination, § 160; (7) endorsement of applicants licensed in another jurisdiction with similar qualifications; (8) repeal of § 180; (9) repeal of exemption for persons barbering in a community with less than 1,000 persons, or more than 25 miles from such a community, § 270; and (10) provisions for apprentice programs.

The Board should establish examination and grading standards. It should work to solicit the interest and participation of those it regulates. Temporary permits should be issued only in accordance with statutory authority until and unless an amendment is made.

Board and administrative expenses outweigh revenues collected through regulation of this profession. Fees collected are not adequate to cover transportation and per diem for meetings and examinations, and Division of Occupational Licensing overhead such as staff salaries and investigative services.

Introduced: 2/13/79
Referred: Commerce

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

SENATE BILL NO. 215

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act abolishing the Board of Barber Examiners."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010(2), AS 08.03.010(b)(2), AS 08.12, and AS 44.-62.330(a)(1) are repealed.

Chapter 12. Barbers

Article
1. Board of Barber Examiners (§§ 08 12.010-08.12.050)
2. Examination and Licensing (§§ 08.12.060-08.12.190)
3. Barber Schools and Colleges (§§ 08.12.200-08.12.240)
4. Unlawful Acts and Penalties (§§ 08.12.250-08.12.260)
5. General Provisions (§§ 08.12.270-08.12.280)

Article 1. Board of Barber Examiners.

Section
10. Creation and membership of board
20. Qualifications of board members
30. General powers of board
40. Meetings and examinations
50. Board expenses

Sec. 08.12.010. Creation and membership of board. There is created the Board of Barber Examiners, referred to in this chapter as the board, composed of five members appointed by the governor. Four members of the board shall be from separate major senatorial districts. The fifth member shall be appointed from the district having the largest number of practicing licensed barbers. The members serve at the pleasure of the governor. (§ 1 art II ch 68 SLA 1957; am § 1 ch 168 SLA 1960)

Sec. 08.12.020. Qualifications of board members. Each member of the board shall be a practicing barber who has engaged in barbering in the state for at least five years prior to his appointment. Engaging in the practicing of barbering within a military reservation is not qualifying experience. (§ 2 art II ch 68 SLA 1957)

Sec. 08.12.030. General powers of board. The board may

(1) adopt examinations in accordance with standards provided by any nationally recognized manual of barber science and examine applicants for licenses to engage in the practice of barbering;

(2) adopt rules and regulations for the conduct of the practice of barbering in accordance with reasonable standards of sanitation which do not derogate from the ultimate control over health and sanitary conditions for all licensees under this chapter which is in the Department of Health and Social Services;

(3) suspend licenses for failure to maintain standards of sanitation prescribed by the board;

(4) conduct inspections of barber shops to insure that standards of sanitation are being maintained, except that the board may not

conduct a second inspection of the same shop within 90 days after the first inspection;

(5) adopt rules of procedure for its own organization and conduct of its meetings, examinations, and inspections;

(6) delegate its powers of examination, inspection, and enforcement to a member of the board to be exercised in the judical district in which he resides;

(7) do such other acts and things necessary to carry out this chapter. (§ 3 art II ch 68 SLA 1957; am § 2 ch 168 SLA 1960; am § 6 ch 104 SLA 1971)

Sec. 08.12.040. Meetings and examinations. The board shall meet as often as necessary to conduct its business but shall hold at least one examination in each year in which applications for a license have been filed. (§ 4 art II ch 68 SLA 1957)

Sec. 08.12.050. Board expenses. Members of the board receive no salary, but are entitled to per diem and expenses authorized by law. (§ 5 art II ch 68 SLA 1957)

Article 2. Examination and Licensing.

Section
60. License required
70. Application
80. Examination fees
90. License fee for barbers
100. License fee for barber teachers
110. License fee for barber schools
120. Licenses
130. Display of licenses
140. [Repealed]
150. Reinstatement of lapsed license
160. Temporary permit
170. Issuance of temporary permit
180. License for certain resident barbers
190. Deposit of receipts

Sec. 08.12.060. License required. No person may engage in the practice of, or attempt to practice, barbering without a license or permit issued by the board. (§ 1 art III ch 68 SLA 1957)

Sec. 08.12.070. Application. A person wishing to practice barbering shall apply to the board by submitting

(1) evidence of his good moral character;

(2) a certificate of health from a physician; and

(3) other information required under regulations adopted by the board. (§ 2 art III ch 68 SLA 1957)

Sec. 08.12.080. Examination fees. An applicant for examination shall submit with his application an exmaination fee as follows:

(1) examination for barber license.....$25

(2) examination for barber teacher license.....$75
(§ 3 art III ch 68 SLA 1957; am § 3 ch 168 SLA 1960)

Sec. 08.12.090. License fee for barbers. The annual fee for a license to engage in barbering is $10. (§ 5 art III ch 68 SLA 1957; am § 6 ch 168 SLA 1960; § 3A art III ch 68 SLA 1957; added by § 4 ch 168 SLA 1960)

Sec. 08.12.100. License fee for barber teachers. The annual fee for a license to engage in the teaching of barbering is $50. (§ 3A art III ch 68 SLA 1957; added by § 4 ch 168 SLA 1960)

Sec. 08.12.110. License fee for barber schools. The annual fee for a license to conduct a barber school or college is $150. (§ 2 art V ch 68 SLA 1957; am § 8 ch 168 SLA 1960; § 3A art III ch 68 SLA 1957; added by § 4 ch 168 SLA 1960)

Sec. 08.12.120. Licenses. Licenses shall be issued by the board to any applicant who passes the examination and who possesses the other necessary qualifications. Each license and temporary permit shall have a photograph of the licensee attached. (§ 4 art III ch 68 SLA 1957; am § 5 ch 168 SLA 1960)

Sec. 08.12.130. Display of licenses. Every licensee or permittee shall display his license or permit in a conspicuous place in his place of business. Owners, operators, and managers of shops and schools are responsible for the display of all licenses held by their employees. (§ 4 art III ch 68 SLA 1957; am § 5 ch 168 SLA 1960)

Sec. 08.12.140. Duplicate license or permit. Repealed by § 7 ch 94 SLA 1968.

Sec. 08.12.150. Reinstatement of lapsed license. A lapsed license may be reinstated if it has not remained lapsed for more than five years. (§ 5 art III ch 68 SLA 1957; am § 6 ch 168 SLA 1960; am § 4 ch 94 SLA 1968)

Sec. 08.12.160. Temporary permit. Any person entering the state or transferring from a practice exempt under the provisions of § 270 of this chapter, and who desires to engage in barbering who has (1) a diploma from a barber college accredited by the board or (2) a bona fide license issued by another territory or state, shall be issued a temporary permit, valid until the next examination given by the board. (§ 6 art III ch 68 SLA 1957)

Sec. 08.12.170. Issuance of temporary permit. A temporary permit may be issued by any member of the board upon application under terms and conditions established by regulations of the board, and upon the receipt of an application fee of $25. The fee shall be credited to the temporary permittee, who shall be permitted to take an examination for a regular license without any additional fee. Upon taking the examination, the holder shall surrender the temporary permit to the board or the committee conducting the examination. (§ 7 art III ch 68 SLA 1957)

Sec. 08.12.180. License for certain resident barbers. The board shall issue a license without examination to a person who was engaged in the practice of barbering in the state, before March 18, 1957. Application for a license shall be accompanied by payment of a fee of $25, an affidavit that the applicant qualifies for a license under this section, and a certificate of health from a physician that the applicant has no contagious or infectious disease. (§ 8 art III ch 68 SLA 1957)

Sec. 08.12.190. Deposit of receipts. All money received by the board shall be paid into the general fund of the state. (§ 9 art III ch 68 SLA 1957)

Article 3. Barber Schools and Colleges

Section
200. Regulation by board
210. License required
220. Application
230. Examination
240. School license

Sec. 08.12.200. Regulation by board. The board shall provide for the conduct and supervision of barber schools and colleges in the state. The board shall adopt regulations establishing standards of sanitation and skill for barber schools and colleges and the teachers and instructors. (§ 1 art V ch 68 SLA 1957; am § 8 ch 168 SLA 1960)

Sec. 08.12.210. License required. No person may operate a barber school or college, or teach in a barber school or college, without a barber teacher license issued by the board. (§ 2 art V ch 68 SLA 1957; am § 8 ch 168 SLA 1960)

Sec. 08.12.220. Application. A person wishing to operate a barber school or college or teach in a barber school or college shall apply for examination and licensing to the board and submit

(1) evidence of his good moral character satisfactory to the board;

(2) a certificate of health from a physician;

(3) a diploma from a nationally accredited barber school or college offering a course in barber science evidencing the applicant's qualifications as a barber teacher;

(4) such other information as may be required by regulations adopted by the board. (§ 3 art V ch 68 SLA 1957; am § 8 ch 168 SLA 1960)

Sec. 08.12.230. Examination. Each applicant for a barber teacher license shall demonstrate to the board by passing an examination in theory and practice that he has the ability to instruct barber students in subjects necessary to qualify them as competent barbers. (§ 4 art V ch 68 SLA 1957; am § 8 ch 168 SLA 1960)

Sec. 08.12.240. School license. No person may operate a barber school or college without a license issued by the board. The board shall issue a license if it finds that the school or college is properly staffed with licensed barbers and the premises and equipment are sufficient, sanitary, and proper. (§ 5 art V ch 68 SLA 1957; am § 8 ch 168 SLA 1960)

Article 4. Unlawful Acts and Penalties.

Section
250. Failure to possess license
260. Suspension of license

Sec. 08.12.250. Failure to possess license. A person who practices, or attempts to practice barbering or operates a barber school or college or teaches in a barber school or college without a license is guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $500, or by imprisonment for a period of not more than 30 days, or by both. (§ 1 art IV ch 68 SLA 1957; am § 7 ch 168 SLA 1960)

Sec. 08.12.260. Suspension of license. The board may suspend the license or permit of a person who violates any provision of this chapter. The board shall suspend the license of a person who, by his acts, gives evidence that he is not of good moral character, or who uses narcotics or overindulges in the use of alcoholic beverages while practicing his profession, until it is satisfied that he will conduct his profession in a proper manner. (§ 2 art IV ch 68 SLA 1957)

Article 5. General Provisions.

Section
270. Application of chapter
280. Barbering defined

Sec. 08.12.270. Application of chapter. This chapter applies to a person engaged in barbering in a community in the state having a population of more than 1,000 persons, or within 25 miles of such a community. Persons engaged in barbering entirely within a military reservation and licensed cosmetologists are excepted from this chapter. (§ 2 art I ch 68 SLA 1957)

Sec. 08.12.280. Barbering defined. Barbering includes the following practices when performed for hire or reward:

(1) shaving or trimming the beard or cutting the hair;

(2) giving facial and scalp massages or treatments with oils, creams, lotions or other preparations either by hand or mechanical appliances;

(3) singeing, shampooing, dressing or dyeing the hair or applying hair tonics. (§ 1 art I ch 68 SLA 1957)

STATE OF ALASKA

BOARD OF HAIRDRESSING AND BEAUTY CULTURE EXAMINERS

June, 1979

Findings

This Board was created in 1957 and, until the past year, has met annually to conduct its affairs. Members of this profession are regulated by AS 08.28; control over health and sanitation is with the Department of Health and Social Services (AS 18.05.040). Alternatives to the present operation of the Board and to regulation of this profession are discussed in this review.

I. General Information

A. Regulated Parties

1. Schools
2. School owners
3. Instructors
4. Operators
5. Shop owners
6. Shop managers
7. Demonstrators
8. Consultants
9. Apprentices
10. Manicurists

B. Definitions

"(10)" 'practice of hairdressing and beauty culture' is engaging, for compensation or other reward, in any of the following practices: (A) arranging, dressing, curling, waving, cleansing, singeing, bleaching, coloring, or similar work on a wig or hair piece of artificial or human hair, or upon the hair of a living person by any means; (B) trimming hair, as a part of hairdressing; (C) utilizing cosmetic preparations, antiseptics, tonics, lotions, or creams, with the hands or with a mechanical or electrical apparatus, in massaging, cleansing, stimulating, manipulating, exercising, or beautifying the scalp, face, neck, arms, hands, bust, or upper part of the body of a person, for the purpose of beautification;" (08.28.320)

C. Nature and Composition of Board

1. Board members and terms:

Three-year term (no restrictions regarding consecutive terms or number of terms).

Hester Pumphrey,	Ends June 15, 1978
Ione Lambert, Chairman	Ends June 15, 1979
Maria Dunham	Ends June 15, 1980
Dennis Milhouse	Ends June 15, 1981

2. Representation:

Profession	=	5	(by statute)
Public	=	0	

3. Qualifications:

Board members must be adults, United States citizens and Alaska residents. Four members must have at least five years' experience as an operator, manager-operator, or owner-operator, and one member must have at least three years' experience as the owner, manager, or instructor of a licensed beauty school. All members must remain active and shall take an oath of office. (AS 08.28.030)

D. Licensing Data

Current Licenses

in-State	=	1,466	
out-of-State	=	328	
TOTAL	=	1,794	(through May, 1979)

E. Fees

1.	schools	
	registration and initial license fee	$500.00
	biennial Renewal	200.00
2.	school owner	
	registration and initial license fee	40.00
	biennial renewal	30.00
3.	instructor-operator:	
	registration and initial license fee	40.00

(EXCLUDES DIVISION OF OCCUPATIONAL LICENSING ADMINISTRATIVE OVERHEAD)

G. Complaints

As of June 1, 1979, five complaints remain open in agency files and six are pending closure on Board approval. Sixty-seven were purged in 1978 and are pending closure due to lack of jurisdiction or age of the complaint. One of the open cases has been on-going since

1972 with continual infractions and complaints from a number of sources. Another case alleges physical injury to a member of the public (received a year after the alleged incident).

H. Professional Qualifications

All states require vocational training as a prerequisite to licensure.

II. Analysis

A. To what extent has the Board of Hairdressing and Beauty Culture Examiners operated in the public interest?

Statutory powers and duties of the Board include examining applicants and issuing licenses. The written portion of the examination is a national test, composed and graded by the national organization. The Board is considering inclusion of a jurisprudence portion into this examination. A six-to-seven hour practical examination is also administered to newly graduated students. Monitoring and grading is done by the Board. Applicants must achieve a score of 75% in all portions of the examination and must retest in only the area(s) failed. The examination process is designed to demonstrate competency in a profession and helps to ensure that individuals are qualified to practice.

The Board also has responsibility for regulating and licensing schools of hairdressing and beauty culture. Four such schools exist in the State, one in Fairbanks, and three in Anchorage. The Board reviews and approves school layout, its curriculum, student-teacher ratios, necessary equipment, and other matters pertaining to training of students. Inspections of schools are conducted by the Board and by the State Department of Health and Social Services. 7 AAC 22.390 outlines the criteria by which the Department of Health and Social Services deter-

mines the sanitary status of establishments. The Board routinely inspects schools in Anchorage during the period in which it holds a scheduled meeting. It has not conducted inspections in Fairbanks; however, a board member was assigned this responsibility at the May, 1979, Board meeting. It should be noted also that the Board has consistently found infractions in one particular school which has been the subject of numerous complaints from a variety of sources since 1972. Although the school has been admonished regarding its practices, no definitive action has been taken. The Board has the authority to suspend or revoke a license for good cause.

The Board may promulgate rules and regulations necessary to carry out the purposes of AS 08.28. It is now in the process of revising and updating current regulations and adding provisions concerning application procedures, qualifications, requirements for schools, and examination and grading procedures. Members of the profession have exhibited interest in the regulation making activity.

Most licenses are issued without examination to applicants who are already licensed in another jurisdiction. This practice facilitates entry into the profession as does that of issuing temporary licenses pending examination. A review of applicant files indicates that out-of-state applicants are usually licensed about 4-5 weeks from the date of application. The Board has been relying on its examiner from the Division of Occupational Licensing to verify qualifications and issue licenses. The Board has formally authorized this procedure at its May, 1979, meeting and will review and ratify licensures during a regularly scheduled meeting.

Applicants for licensure must be at least 17 years of age, of good moral character, have completed two years of high school or its equivalent, and have the required training or work experience. These items are addressed on application forms but are not verified. No school transcripts are required; although applicants are required to list three

character references, in no case has this information been checked or used for any purpose. Also included on the application are questions regarding such matters as length of residency in Alaska and future job prospects. The Board should review its applications and procedures for licensing.

Schools are required to submit quarterly reports to the Board on student or apprentice achievement and to notify the Board of enrollments and terminations. These records are maintained by the administrative agency as are all Board and licentiate files. The agency is in the process of implementing improved file and data maintenance procedures for all boards.

Barbers are excluded from the provisions of AS 08.28.

The Board has been discussing the advantages and disadvantages of continuing education requirements but has not yet formulated a position other than to agree that members of the profession should take every opportunity to upgrade their skills. The Board has recognized additional fields of beauty culture (i.e., shampooists, facialists, manicurists) and has expressed a desire to address these specifically through applicable guidelines and procedures. While it was stated as past policy that apprenticeships would not be allowed in towns where schools are located, the Board reversed this position at its May, 1979, meeting. It also rescinded a previous action which required the Division to release student examination scores to schools.

The Board and regulation of the beauty culture profession could be allowed to terminate on June 30, 1980, as provided by law, probably without significant adverse impact on the consuming public. Another alternative would be termination of the Board and assumption of the licensure functions by the administrative agency. Or practitioners could simply be registered by the administrative agency.

The Board could also be reestablished for another four years or less. If it is reestablished and/or regulation of this profession continues, consideration should be given to the suggestions for efficient operation noted in this review.

B. To what extent has the operation of the Board of Hairdressing and Beauty Culture Examiners been impeded or enhanced by existing statutes, procedures and practices which it has adopted, or any other matter, including budgetary, resource and personnel matters?

Practices and policies which utilize standard examinations, standard endorsement procedures and the issuance of temporary permits are felt to facilitate entry of qualified applicants into the profession and to promote availability of services. Student and apprenticeship programs also function to provide career opportunities and services in the State.

The Board of Hairdressing and Beauty Culture Examiners has experienced some difficulty with respect to personnel and budgetary restrictions. Support staff is provided by the Division of Occupational Licensing and is presently adequate to serve Board needs; however, past employee turnover has impeded continuity and follow-up on Board requests. Fees and revenues for all boards and commissions under the jurisdiction of the Division of Occupational Licensing are collected through the Division and are deposited into a general fund. Monies deposited and withdrawn are identified by codes so that direct board revenues and expenses may be determined.

The Board has encountered the same difficulties as have all other boards and commissions with respect to investigative services provided by the administrative agency. During FY '78 two investigator positions were

vacant; as a result, one position was abolished by the Legislature. At the present time, two investigators are located in Anchorage with a Chief Investigator located in Juneau. An additional investigator position was approved in the FY '80 budget but will probably not be filled immediately due to vacancy factors incorporated into the personal service category of the budget. Procedural constraints of the administrative adjudication article of the Administrative Procedure Act (AS 44.62.330-.630), while necessary, restrict timely disposition of litigation. Prioritization based on time, staffing and nature of alleged offense results in pursuit of only the most flagrant and potentially injurious licensing complaints. The administrative agency will continue to address the need for initial assessment and follow through on complaints with emphasis on magnitude of offense as it relates to public safety.

Regulations concerning applications for licensure and examination procedures are being promulgated. A review of Board statutes indicates that changes should be considered either by the Board or by the Legislature.

The term "good moral character" should be either defined or deleted from the statutes.

AS 08.28.030 requires that all Board members also be members of the profession. Public members should be allowed on this Board, although an increase in total membership is not advocated. Members have not taken an oath of office as required.

In reference to § 090, the Board has not promulgated regulations specifically for apprentices, however, this is not mandatory. Formal procedures have been established.

The Board has requested draft legislation which would repeal § 150, admission of shop owner without examination. This statute allows a shop

owner to practice hairdressing or beauty culture without a license as long as he employs a licensed manager-operator. §§ 240, 250 and 260, all grandfather clauses, are recommended to be repealed.

C. To what extent has the Board of Hairdressing and Beauty Culture Examiners recommended statutory changes which are generally of benefit to the public interest?

1976 amendments added to the powers and duties of the Board and included general items of a "housekeeping" nature.

Board minutes from 1976 reflect the Board's recommendation for legislation for shampooists, facialists and manicurists. There is no record of any recommendations by the Board for statutory changes that would be of specific benefit to the public.

D. To what extent has the Board of Hairdressing and Beauty Culture Examiners encouraged interested persons to participate in and report to it concerning the making and effect of its regulations and decisions, or to report to it concerning the effectiveness, economy, and availability of service which it has provided?

The bulk of participation at Board meetings and hearings has come from the profession. Substantial professional interest is generated by promulgation of regulations, by enforcement activities, and by quality of training facilities. Very little general "public" concern with Board functions has been demonstrated. Notices of pending meetings and new or

amended regulations are published in major newspapers in the State. Positive steps could be taken by the Board and the Division to heighten public awareness, such as public service radio announcements or utilization of other media.

Public interests would be furthered by the presence of public members on the Board. "In recent years a number of states have added one or more public members (citizens with no particular interest in the occupation or profession governed by the board) to licensing boards in an effort to ensure that the interests of the public would be represented in decision-making."[1] The State of California, which provides for a one-third public membership on health care boards and a public majority on others, has indicated that its experience with public members has been highly rewarding.

E. How efficiently are public inquiries or complaints regarding the activities of the Board of Hairdressing and Beauty Culture Examiners processed and resolved?

Five open complaints regarding this profession were on file with the administrative agency as of June, 1979. One of these alleged physical injury to a consumer; however, it is worth noting that the complaint was referred by another division and had been received by them a year after the alleged incident occurred. Six additional cases are pending Board approval for closure and sixty-seven were purged in 1978 due to age and/or lack of jurisdiction (also pending closure). The administrative agency has been addressing the need for investigative procedures and for timely disposition of complaints.

---

[1]Shimberg, B. and Roederer, D., Occupational Licensing: Questions a Legislator Should Ask, The Council of State Governments, Lexington, Ketucky, March, 1978, p. 20.

One complaint against the Board is on file but Board records indicate this issue has been resolved.

F. To what extent does the Board of Hairdressing and Beauty Culture Examiners present qualified applicants to serve the public?

Individuals wishing to practice must submit fees and application to the administrative agency with relevant information regarding qualifications. 12 AAC 24.020 provides that examinations for licensure be given on a quarterly basis. Applicants who are statutorily qualified and who demonstrate the required level of knowledge and proficiency are issued a license.

Current Board practices which allow for licensure by endorsement and the issuance of temporary work permits are conducive to entry into the profession by qualified persons.

G. To what extent have State personnel practices, including affirmative action requirements, been complied with by the Board of Hairdressing and Beauty Culture Examiners in its own activities, and in its area of activity or interest?

Board staff consists of the support services of a licensing examiner employed by the Division of Occupational Licensing (also responsible to four other regulated professions), who is hired through the State Personnel System and is subject to affirmative action requirements.

Licenses in this profession are issued on the basis of specific statutory criteria. Affirmative action requirements are not applicable to licensure qualifications.

H. To what extent are statutory, budgetary, or other changes necessary to enable the Board of Hairdressing and Beauty Culture Examiners to better serve the interests of the public?

Public members should be included on the Board. Statutory amendments should be introduced which would repeal §§ 150, 240, 250 and 260.

The Board should explore methods of informing the general public of its existence and functions. It also should assume a more active roll in regulation and inspection of schools. The administrative agency will continue to address the need for assessment and follow through on complaints as well as record keeping procedures.

The Board should review and revise its application forms and procedures.

Board and administrative expenses outweigh revenues collected through regulation of this profession. Fees collected are not adequate to cover transportation and per diem for meetings and examinations, and Division of Occupational Licensing administrative overhead such as staff salaries, examination expenses, and investigative services.

Chapter 28. Cosmetologists and Hairdressers.

Article
1. Board of Hairdressing and Beauty Culture Examiners (§§ 08.28.010-08.28.090)
2. Licenses (§§ 08.28.100-08.28.260)
3. Miscellaneous Provisions (§§ 08.28.270-08.28.290)
4. General Provisions (§§ 08.28.300-08.28.320)

Article 1. Board of Hairdressing and Beauty Culture Examiners.

10. Creation and membership of Board of Hairdressing and Beauty Culture Examiners
20. Term of office and removal
30. Qualifications of board members
40. Powers and duties of the board
50. Meetings of the board
60 -70. [Repealed]
80. Standards for regulations
90. Special regulations

Sec. 08.28.010. Creation and membership of Board of Hairdressing and Beauty Culture Examiners. There is created a Board of Hairdressing and Beauty Culture Examiners, referred to in this chapter as the board. The board consists of five members appointed by the governor. (§ 3(1) ch 52 SLA 1957)

Sec. 08.28.020. Term of office and removal. Members serve a term of three years and at the pleasure of the governor. (§ 3(1) ch 52 SLA 1957)

Sec. 08.28.030. Qualifications of board members. (a) To qualify for membership on the board, a member must be an adult, a citizen of the United States, and a resident of the state.

(b) The governor shall appoint persons so that four members have at least five years' experience as an operator, manager-operator, or owner-operator, and one member has at least three years' experience as the owner, manager, or instructor of a beauty school licensed under this chapter. To remain on the board, a member must remain active in an activity that would qualify him for appointment under this subsection.

(c) Each member shall take the oath provided by law for public officers. (§ 3(1) ch 52 SLA 1957; am § 1 ch 101 SLA 1963)

Sec. 08.28.040. Powers and duties of the board. The board shall exercise general control over the vocations of hairdressing and beauty culture within the state. The board

(1) shall examine applicants and issue licenses;

(2) shall issue licenses for schools of hairdressing or beauty culture;

(3) may suspend or revoke a license;

(4) may promulgate rules and regulations relating to hairdressing or beauty culture, and hairdressing or beauty culture schools, necessary to effectuate the purposes of this chapter;

(5) except as provided in § 280 of this chapter, may inspect schools and shops in order to enforce the provisions of this chapter;

(6) may, on its own motion, and shall, upon receipt of a written complaint, investigate the practices of a person, shop, or school licensed under this chapter. (§ 3(2) ch 52 SLA 1957; am § 1 ch 104 SLA 1976)

Sec. 08.28.050. Meetings of the board. The board shall meet at least once each year for the conduct of its business. The annual meeting shall be held at the place designated by the majority of the board members.

The board shall, at its annual meeting, elect a president, vice-president and secretary-treasurer from its members. Board members serve without pay. However, each member is entitled to transportation and per diem allowances authorized by law. (§ 3(3) ch 52 SLA 1957)

Sec. 08.28.060. Duties of secretary-treasurer. Repealed by § 3 ch 59 SLA 1966.

Sec. 08.28.070. Salary of secretary-treasurer. Repealed by § 3 ch 59 SLA 1966.

Sec. 08.28.080. Standards for regulations. The board shall adhere as closely as possible to the rules, regulations, and standards prescribed and recommended by the "Allied Cosmetology Council of State Board, Schools, and Shops." (§ 13 ch 52 SLA 1957)

Sec. 08.28.090. Special regulations. The board may prescribe special rules and regulations for apprentices whose job training is supervised by the Department of Education under a vocational rehabilitation program. However, these apprentices, to become licensed, shall pass the standard licensing examination given by the board. (§ 14 ch 52 SLA 1957)

Article 2. Licenses

Section
100. License required
110. Qualifications of applicants
120. Examination and other requirements
130. Temporary license
140. Out-of-state licenses
150. Admission of shop owner without examination
160. [Repealed]
170. Fees
180. School license
190. Display of license
200 - 210. [Repealed]
220. Lapsed license
230. Grounds for revocation or suspension of license
240. Application of license provisions to existing operators
250. Application of license provisions to beauty schools
260. Credit to students for prior study

Sec. 08.28.100. License required. No person may engage in the practice of hairdressing or beauty culture or organize, open, or conduct a school of hairdressing and beauty culture without a license. (§ 2 ch 52 SLA 1957)

Sec. 08.28.110. Qualifications of applicants. An applicant for a license as an operator, manager-operator, demonstrator or consultant, owner-operator, or instructor-operator shall

(1) be at least 17 years of age;

(2) be of good moral character;

(3) have completed two years of high school or its equivalent;

(4) have training at least 2,000 hours, extending over a school term of not less than 50 weeks in a school of hairdressing or beauty culture approved by the board, or service as an apprentice under a licensed operator in a shop approved by the board or completed training and working experience as a hairdresser in another state or country which the board finds to meet the minimum requirements of this state. (§ 4(1) ch 52 SLA 1957; am § 2 ch 112 SLA 1959; am § 2 ch 104 SLA 1976)

Sec. 08.28.120. Examination and other requirements. An applicant shall pass an examination given by the board. The examination shall cover subjects designated by the board. The board shall fix the time and place for examination and shall give at least one examination each year. The board may delegate the power of examination to a committee of the board or a board member. The board may prescribe additional requirements for a license. (§ 4(2) ch 52 SLA 1957)

Sec. 08.28.130. Temporary license. The board may issue a temporary license or working permit to a graduate of an approved school of hairdressing or beauty culture or to an apprentice who has received on-the-job training which complies with the rules and regulations of the board. A temporary license or working permit is valid until the results of the examination given to the student or apprentice are announced. (§ 4(3) ch 52 SLA 1957)

Sec. 08.28.140. Out-of-state licenses. A person holding a current valid license from a board of cosmetology and hairdressing in another state or country is entitled to a license under this chapter without examination if he applies, accompanying his application with

(1) proof of a foreign license;

(2) proof that he has completed at least 2,000 hours of training in a hairdressing and beauty culture school or service as an apprentice under a licensed hairdresser in a shop approved by the board or completed training and working experience as a hairdresser which the board finds to meet the minimum requirements of the state;

(3) payment of an investigation fee. (§ 4(4) ch 52 SLA 1957; am § 3 ch 112 SLA 1959; am § 2 ch 101 SLA 1963; am § 1 ch 2 SLA 1965; am § 1 ch 46 SLA 1968; am § 3 ch 104 SLA 1976)

Sec. 08.28.150. Admission of shop owner without examination. A shop owner may be licensed without examination but, unless licensed as an operator, he shall not engage in the practice of hairdressing or beauty culture without employing a licensed manager-operator. (§ 4(4) ch 52 SLA 1957; am § 3 ch 112 SLA 1959)

Sec. 08.28.160. Examination fee. Repealed by § 3 ch 46 SLA 1968.

Sec. 08.28.170. Fees. The following fees shall be imposed under this chapter when applicable

(1) schools:

registration and initial license fee.....	$500
biennial renewal.....	200

(2) school owner:

registration and initial license fee.....	40
biennial renewal.....	30

(3) instructor-operator:

registration and initial license fee.....	40
biennial renewal.....	30

(4) owner-operator:

registration and initial license fee.....	25
biennial renewal.....	20

(5) owner only, beauty shop:

registration and initial license fee.....	25
biennial renewal.....	20

(6) manager-operator:

registration and initial license fee.....	25
biennial renewal.....	20

(7) demonstrator or consultant:

registration and initial license fee.....	40
biennial renewal.....	30

(8) operator:

registration and initial license fee.....	15
biennial renewal.....	10

(9) apprentice or student:

registration and one-year permit fee.....	5
annual renewal.....	3

(10) manicurist:

registration and initial license fee.....	15
biennial renewal.....	10

(11)	examination fee.....	15
(12)	investigation fee.....	25

(§ 4(5) ch 52 SLA 1957; am § 4 ch 112 SLA 1959; am § 2 ch 46 SLA 1968; am §§ 4, 5 ch 104 SLA 1976)

Sec. 08.28.180. School license. The board shall prescribe rules and regulations for the licensing of schools of hairdressing and beauty culture. The rules and regulations shall include the financial respon-

sibility of the owner, details of the curriculum, minimum hours of instruction, and physical condition of the school premises and facilities. (§ 5 ch 52 SLA 1957)

Sec. 08.28.190. Display of license. Every licensee shall display his license in a conspicuous place in his place of business or in his working booth. Each shop owner or manager is responsible for the display of licenses held by employees in their shops. (§ 6(1) ch 52 SLA 1957)

Sec. 08.28.200. License year. Repealed by § 3 ch 59 SLA 1966.

Sec. 08.28.210. Duplicate licenses. Repealed by § 3 ch 46 SLA 1968; § 7 ch 94 SLA 1968.

Sec. 08.28.220. Lapsed license. A lapsed license may be reinstated, if the license has not been lapsed for a period of more than five years, and all renewal and delinquent fees for the period during which the license has been lapsed are paid. (§ 6(4) ch 52 SLA 1957)

Sec. 08.28.230. Grounds for revocation or suspension of license. The board may suspend or revoke a license for failure to comply with this chapter, or a rule, regulation, or order of the board. (§ 8 ch 52 SLA 1957)

Sec. 08.28.240. Application of license provisions to existing operators. A person holding a valid license as an operator issued before March 16, 1957, is not required to obtain a new license, but shall nevertheless comply with all other provisions of this chapter. (§ 12 ch 52 SLA 1957)

Sec. 08.28.250. Application of license provisions to beauty schools. Hairdressing and beauty culture schools shall comply with the licensing provisions of this chapter and with rules and regulations issued under it. Upon application and payment of the fee by a beauty school which has been in operation and teaching a course of not less than 2,000 hours for one year before January 1, 1957, the board shall issue a license for its operation. (§ 12 ch 52 SLA 1957)

Sec. 08.28.260. Credit to students for prior study. A student of a hairdressing and beauty culture school shall receive credit for hours of instruction completed before March 16, 1957, if the school substantially met the minimum standards for curricula, the qualification of instructors, and other rules and regulations established by the board under this chapter. If the school met the prescribed minimum standards for a period of six months or more preceding March 16, 1957, all students who have satisfactorily completed the course of instruction shall receive credit for the entire period of instruction. (§ 12 ch 52 SLA 1957)

Article 3. Miscellaneous Provisions.

Section
270. Record of achievement
275. Advertising
280. Control of health and sanitary conditions
290. Applicability of Administrative Procedure Act

Sec. 08.28.270. Record of achievement. Each licensee who supervises a student or apprentice shall submit quarterly to the board a record of achievement of the student or apprentice. (§ 3 ch 52 SLA 1957)

Sec. 08.28.275. Advertising. No person, shop, or school engaged in the practice of hairdressing or beauty culture may knowingly use false or deceptive statements in advertising its services. A hairdressing or beauty culture school representing itself to be approved or accredited shall indicate the organization or agency issuing the approval or accreditation. (§ 6 ch 104 SLA 1976)

Sec. 08.28.280. Control of health and sanitary conditions. Control over health and sanitary conditions in shops and schools licensed under this chapter is in the Department of Health and Welfare. (§ 7 ch 52 SLA 1957)

Sec. 08.28.290. Applicability of Administrative Procedure Act. Procedures and rules and regulations adopted under this chapter shall comply with the Administrative Procedure Act (AS 44.62). (§ 10 ch 52 SLA 1957; am § 5 ch 112 SLA 1959)

Article 4. General Provisions.

Section
300. Barbers excluded
310. Penalties
320. Definitions

Sec. 08.28.300. Barbers excluded. This chapter does not apply to barbers exclusively engaged in the occupation of barbering. (§ 11 ch 52 SLA 1957)

Sec. 08.28.310. Penalties. A person who engages in the practice of hairdressing or beauty culture without obtaining a license, or any person who organizes, opens or conducts a school of hairdressing or beauty culture, without obtaining a license, is guilty of a misdemeanor and upon conviction is punishable by imprisonment for a period of not more than 90 days, or by a fine of not more than $300, or by both. (§ 9 ch 52 SLA 1957)

Sec. 08.28.320. Definitions. As used in this chapter, unless the context otherwise requires,

(1) "apprentice" is a person at least 17 years of age who has completed two years of high school or equivalent education, who receives on-the-job training on licensed premises and who does not receive a wage or commission, and for whose work no charge is made until the apprentice has received at least 350 hours of training;

(2) "demonstrator" or "consultant" is a person who practices hairdressing and beauty culture upon a person acting as a subject or model when the demonstration is performed before students, operators, manager-operators, instructors or individuals, shop owners, school owners, or any other public gathering;

(3) "instructor-operator" is a person who gives instruction in the practice of hairdressing or beauty culture in a school, who has passed the qualifications of an owner-operator or manager-operator, and who has passed an examination and holds an instructor-operator license;

(4) "manager-operator" is a person of legal age who operates or manages a hairdressing or beauty culture shop or school;

(5) "manicurist" is a person who practices beauty culture by treating the hands and nails;

(6) "operator" is a person who engages in any practice defined in (10) of this section;

(7) "owner" is a person owning a hairdressing or beauty culture shop;

(8) "owner-operator" is a person who owns a hairdressing or beauty culture shop or school who is qualified under this chapter to practice the art of hairdressing and beauty culture or who is a licensed cosmetologist;

(9) "person" includes a corporation, copartnership, or unincorporated association;

(10) "practice of hairdressing and beauty culture" is engaging for compensation or other reward, in any of the following practices:

(A) arranging, dressing, curling, waving, cleansing, singeing, bleaching, coloring, or similar work on a wig or hair piece of artificial or human hair, or upon the hair of a living person by any means;

(B) trimming hair, as a part of hairdressing;

(C) utilizing cosmetic preparations, antiseptics, tonics, lotions, or creams, with the hands or with a mechanical or electrical apparatus, in massaging, cleansing, stimulating, manipulating,

exercising, or beautifying the scalp, face, neck, arms, hands, bust, or upper part of the body of a person, for the purpose of beautification;

(11) "school of hairdressing" or "school of beauty culture" is a place where a person operates and maintains a class to teach hairdressing or beauty culture;

(12) "shop" is a building or structure, or part of a building or structure, other than a school, where the practice of hairdressing or beauty culture is conducted;

(13) "student" is a person at least 16 years of age who has completed two years of high school or equivalent education, attends a licensed beauty school and does not receive a wage or comission, and for whose work no charge is made until the student has received at least 350 hours of training;

(14) "board" means the Board of Hairdressing and Beauty Culture Examiners;

(15) "department" means the Department of Commerce and Economic Development. (§ 1 ch 52 SLA 1957; am § 1 ch 112 SLA 1959; am § 1 ch 17 SLA 1966; am §§ 60, 61 ch 127 SLA 1974; am §§ 7, 8 ch 104 SLA 1976)

The Honorable Arliss Sturgulewski
Senate Commerce Committee
2957 Sheldon Jackson Drive
Anchorage, AK 99504

Dear Senator Sturgulewski:

The Senate Commerce Committee will convene at 9:00 a.m. on October 22, 1979, for the purpose of holding public "Sunset" hearings on the Board of Barber Examiners and the Board of Hairdressing and Beauty Culture Examiners. The hearings will be held in Room 262 of the Consortium Library, University of Alaska, 3211 Providence Drive, Anchorage, Alaska, and will be teleconferenced to Juneau and Fairbanks.

The Juneau teleconference will begin at 11:00 a.m. (Juneau time) in the Butrovich Room (Room 207), Capitol Building, Juneau, Alaska.

The Fairbanks teleconference will begin at 9:00 a.m. (Fairbanks time) in Room 250, Building F, Legislative Information Office, 101 College Road, Fairbanks, Alaska.

The Senate Commerce Committee will also hold a public "Sunset" hearing on the Board of Registration for Architects, Engineers, and Land Surveyors on October 23, 1979. The time, places and teleconferencing will be the same as for the October 22, 1979, hearings.

The following Audit Reports are available at the local Legislative Information Offices:

A Performance Review of the Board of Registration for Architects, Engineers, and Land Surveyors. May 11, 1979.

A Performance Review of the Board of Hairdressing and Beauty Culture

Examiners. July 11, 1979.

A Performance Review of the Board of Barber Examiners. March 31, 1979.

If you have any questions, contact Christian Basler at 278-1581.

Sincerely,

Brad Bradley

Juneau, Alaska 99811

Gentlemen: Re: My goals in 1980 as Barber Examiner

At the present time, we have sat down and updated our barber laws, and I will be introducing a lot of legislation this year which I hope the legislators will help me with. I think our past laws are very outdated, and there are areas in which we need new legislation, not available before. Reviewing other States and their laws, I found many areas that would help us out tremendously; also, I would like to work out a system with Occupational Licensing that we can fill you in on our business as we conduct it. I am proposing that we adopt as Barber Examiners, two workshops a year beyond what we now have. I find that half a day, after the test, is not sufficient time to conduct the business that is needed. I will ask for two days for each workshop, in which we will, with other committees, discuss the aspects of the barber profession.

Also, as a new Board member, I find we need to work out a better system wherein you could give us a little more time to reply to any material and reports sent out by you. I have found in the past, that quite often the material you sent to us is deadlined within a day or two, and this is too short a notice. I think this can be overcome very easily. Any re-reports sent out by you that are deadlined by a certain date to be turned in, it would be best that we Board members send it by registered mail.

Sincerely,

Bud Smith

January 15, 1980

Legislature of the State
of Alaska
Capitol Building
Juneau, Alaska 99811

Gentlemen:

As Barber Board Examiner, these are my goals for 1980. At the present time, I am working on a system to upgrade our testing material: both written exam and practical exam, of which I hope the other Board members will adopt.

Second, I would like to make several changes in our laws. I find by going over our laws in the past there is a lot of material that is extremely outdated. I would like to be able to introduce some new legislation which I think would benefit our profession greatly.

I would also like to see our Board members join the National Board of Barber Examiners. On a national level, I think we could do a much better job for our own State. Also, I would like to see our Board adopt workshop periods; for instance, two shop periods per year when we could sit down and go over material more thoroughly, and stay updated. I find in this manner we would be able to correspond with other States, and unify our laws more closely. A better system should be worked out with occupational licensing to keep up to date with what exactly, barber examiners are doing. One problem we have at the present time with occupational licensing is that we were sent reports that needed to be filled out and returned within only one or two days. I don't know if the problem lies in Juneau, or if it lies within the mail service on this end. But, nevertheless, we need to work out a better system than we have now.

In 1979, I was sent a report to make out and send back into the Division of Audit. I sent my report in and even called the person in charge of the department, and told them my report was in the mail, but yet, looking at the performance record in the legislative audit, they did not receive nor record my reports. I am unaware of what ever became of this report, but nevertheless I did send it, and as stated above, called to advise the report was in the mail. By looking at

the Division of Legislative Audit, a questionnaire was sent out last year for comments, I am not too satisfied with their system. I definitely think that everyone in this profession should have been sent these questionnaire forms, so we could get a true, accurate report. As the system has been in the past we Board members meet twice a year. I find this is not sufficient enough time to get all of our business taken care of to update our material at that time. I feel, with the population increasing, and the change necessary to keep up to date, we need at least two workshops beyond the two regular meetings that we now have. I think these workshops would be extremely beneficial to barbers and the public.

In closing, I would like to say that the sunset law review has opened our eyes tremendously in this profession, and has brought to our attention that we must stay up to date at all times. All of us in this profession have expressed the need for a Barber Examining Board, and I, as a Barber Examiner, newly elected would definitely like to see this Board continue. Most States that have gone through the sunset review have reinstated their Barber Boards. I have put a new State program together which will be called the Master Barber Association. All barbers I have contacted in Anchorage are deeply concerned in a State association. Also, people in Fairbanks have beencontacted and other areas who are more than willing to help me get this association off the ground and going. This has never been done before, and we would be affiliated with our national barber associations.

At this time I am asking you legislators to please reinstate this Board of Barber Examiners for at least two years so we can prove how efficient our new committees can be in helping our barber laws to become updated. I would like to thank you all at this time.

Sincerely,

Bud Smith

Sunset Review (Barbers) Feb. 7, 1980

Mr Chairmen:

Thank you for granting this time to me to testify on behalf of the Barber Board.

There are many areas I would like to cover but I will keep my testimony to being as brief as possible

1st I would like to draw to your attention the great strides we have made since our Sun Set Review. I and many others have spent a great deal of time reviewing other State Barbering Laws to try and bring our state laws up to the highest of standards. I think you will see we have made a substantial difference from what we have had in the pass to what we have propose for the future. I know I have spent enormous amount of weekends and nights working on this review and I hope in the long run I have done some good for both my profession and the Public.

2nd In the pass we have had enormous problems with OL which I am sure we can work-out in time to come with our new programs.

3rd We have adopted new advisory committees that will help us substantially and at the present time, I am in the misses of setting up other committees from Fairbanks and Southeast Alaska. I think this will be a exceptional advantage over what we have had in the pass.

II

Sunset Review (Barbers) Feb 7, 1980

4. I am working with mr. Vern Hurlbert on a apprenticeship program which I hope to have all the bugs worked out soon. this program is taken a bit longer then I had hope for but I am sure we will have it real soon.

5. On our last written test, we revised a great deal of material and made the exam more understandable. I hope this coming test in April we will have Total True & false and multiple choice questions only, doing away with all short essay questions (All written exam's must be cleanified fully)

6. I would like to bring it to your attention one of the biggest problems the board has had in the pass is a board member owned the only barber college in the State, this person is no longer a board member. I am sure this will bring less problems to the board and state in future.

7. at this Time I would like to take just a moment and go over some of our new purposals with you.

8. I think now by going over these purposals you can clearly see the major difference from our old programs and our new programs. I myself, is very confident of the outcome of our future if we work together.

— in conclusion —

Without our Barber Board, there would be no professional standards. I am sure you and the public would see diseases spread enormously and a lot of persons would also be affected by harm conflicted by poor barbering work.

III

Sun Set Review (Bankers) Feb 7, 1980

This just can not be aroud Laddies and gentlemen. We must keep our standards as high as possible Please don't set our profession back so far in Time by Taken away this Banker Board. It is greatly needed in any and every State. I am Sure you can clearly see this.

Thank you vary much for your Time.

Bud Smith

ARTicle 3 Barber School and Colleges

sec 08.12.220 Application

A person wishing to operate a barber school or college or Teach in a barber school or College shall apply for examination and licensing to the board and submit

(1) a certificate of health from a physician;

(2) a diploma from a nationally accredited barber school or college offering a course in barber science evidencing the applicant's qualifications as a barber teacher;

(3) such other information as may be required by regulations adopted by the board.

(sec 3 art. V ch 68 SLA 1957; am sec 8 ch 168 SLA 1960)

By the Board

Amend

ARTICLE 1

Sec 08.12.030 General Powers of board.

The board may

(1) adopt examinations in accordance with standards provided by any nationally recognized manual of barber science and examine applicants for licenses to engage in the practice of barbering;

(2) adopt rules and regulations for conduct of the practice of barbering in accordance with reasonable standards of sanitation which do not derogate from the ultimate control over health and sanitary conditions for all licenses under this chapter which is in the Department of health and Welfare;

(3) suspend licenses for failure to maintain standards of sanitation prescribed by the board;

(4) adopt rules of procedure for its own organization and conduct of its meetings, examinations, and inspections;

By the Board

Amend

ARticle 2

Sec 08.12.171 Barber Technicians

Every Barber technician, in order to avail himself of this Chapter, shall, before entering employment as a barber technician, file with the Division of Occupational Licensing, on forms which shall be provided by the board, the name and place of business of the employer, the date on which employment will be commenced and the barber technician's full name and age. That age shall not be less than 16 years. The forms shall be accompanied by a registration fee of $10.00. Any barber technician who shall change his place of employment shall promptly notify the Division of Occupational Licensing and furnish it with the name and place of business of the new employer and the date of the change.

The Division of Occupational Licensing shall furnish to each barber technician a certificate of registration, certifying that the holder is a barber technician. It shall be the duty of the holder of such a certificate of registration to post it in a conspicuous place where it may readily be seen by all persons, on or before the first day of January in each year. The fee for such a certificate shall be $10.00 in the first instance and $20.00 for each biennial renewal thereof.

(OVER)

No barber technician may independently practice barbering but may, as a barber technician, do only the following acts constituting the practice of barbering: Shampooing and drying of hair, and manicuring.

A barber technician shall not be considered an apprentice nor shall any time which he has been registered and been employed as a barber technician count toward training for eligibility to obtain a certificate of registration as a barber.

Judy Dixon

BARBERS LEGISLATIVE COMMITTEE REVIEW ON FINDINGS AND RECOMMENDATIONS OF LEGISLATIVE AUDIT

RECOMMENDATION I.

The report states that examination unnecessarily restricts entry of qualified personnel into the profession. The questions we are dealing with here are: (1) reciprocity with other states, and (2) students are issued permits if from Alaska when outsiders must produce a license from their state.

1. Reciprocity--Due to widely varying standards of education in different states, blanket reciprocity is not possible. States requiring 2,000 hours do not accept an Alaska license as we only require 1,500 hours, and Alaska cannot accept an outside license that requires only 1,200 hours. Until there are federal standards that cover barbering in all states, reciprocity will only be available through private agreements between individual states. This could be possible for Alaska only if our barber board was allocated funds to attend National Association of Barber Examiners conventions where these problems can be discussed in depth with other professionals.

One other consideration is that if reciprocity were established, there could well be a seasonal shortage or overabundance situation, particularly for Alaska. With reciprocity, Alaskan barbers and others from cold states would head south each winter, causing a shortage here and overabundance in the warmer areas. Come summer, the northern areas would overflow and the south could be short of barbers.

2. A valid point has been brought up in the fact that outside barbers must produce a license while students graduated from Alaskan schools can obtain a permit upon completion of their hours.

A viable solution would be to allow students to apply for a work permit upon completing 1,500 hours only if it can be guaranteed that they will work under direct supervision of a licensed barber. This can be done through a process of sponsorship where the licensed barber will be obligated to supervise the student's work until the next examination comes up and the student passes it. (The fine points of this program can be worked out and put into a comprehensive barber law.) As for outside applicants producing a license this is the only way that we can verify that individuals have indeed received basic barber training and at least meet minimal standards, as all states require some schooling and an exam before issuing a state license. This minimal standard in order to be issued a permit will insure that unfit practitioners will not be turned on the public between examinations. Issuing a permit (or license) on testimony of past experience is not reasonable--this would be the equivalent of issuing permits and licenses on hearsay, and has no validation to back it up.

RECOMMENDATION II.

1. Test Material--We are in agreement that written examinations should be upgraded. Less emphasis should be put on anatomy and physiology, although some basics should still be included. Sanitation, sterilization, and a basic knowledge about and recognition of contagious deseases should continue to be stressed. Open-ended questions are subject to personal interpretation and should be deleted. The written examination should be multiple choice--true/false in format to allow for specific grading criteria.

Suggested grading format for entire exam:

20 points written
25 points haircut
10 points oral
10 points shave
10 points sanitation
5 points application (use of tools)
5 points scalp massage
5 points facial
5 points time
5 points shampoo
100 points/75 passing

2. Administration of Examination

a. Grading criteria should be clarified for practical examination. There will always be some personal interpretation possible on grading work, but with five experienced board members an agreement can be made if guidelines are made and followed. Guidelines for board grading could be compiled by the board and distributed with packet for examination application, so that all applicants know what is expected of them. Guideline sheet with pertinent information should be compliled by the board and distributed to applicants with the examination application packet.

b. Time limits are at present set. We agree that they must be either followed more closely or adjusted accordingly.

c. This information on two authorized textbooks on which the test is based is available through school and through board members when applications for exams are turned in. This information should be available on a guideline sheet included in application for exam packet.

d. Guideline sheet should state that applicant should be responsible for own tools, as it would be too costly to keep adequate supply of extras on hand for all applicants.

e. Agreed--Admittance to exam area should be limited to those required to be there.

RECOMMENDATION III.

Agree that owners only need not be licensed; instructors must be licensed. School facilities and curriculum should be examined by the board to insure that appropriate and adequate education was being provided by each school.

RECOMMENDATION IV.

1. Limiting term of board members:
 a. Agreed that a length of term should be established and members should be limited to two consecutive terms.
 b. One public member on the board should be appointed and would serve as a watchdog.

RECOMMENDATION V.

Board inspection legislation should be repealed to reduce duplication of effort. Health inspections are the province of the Health Dept. The only inspection necessary would be board inspection of new schools to insure adequate facilities, along with review of curriculum to insure appropriate education of student barbers.

RECOMMENDATION VI.

"Good Moral Character" is too subject to personal interpretation as written, and should be deleted.

RECOMMENDATION VII.

This must be done primarily by board members as they know better than anyone what the goals of the board should be.

RECOMMENDATION VIII.

Agreed that board members should improve minutes.

Christian Basler
Administrative Assistant
Senate Commerce Committee

Thank you for informing me of the mechanical problems involving the testimony on the "Board of Barber Examiners". I will address my reply to "Findings & Recommendations of the Division of Legislative Audit Page 9

Rec # I

A Grant reciprocity to the holder of a Master Barber License from another state if the person has earned his or her livlihood by Barbering, prior to coming to Alaska.

B. I do not agree with the Attorney General ruling of 1976 (See P 49A - reply by Don Hall) A Diploma from a school only means that School hours have been completed, Many people fail the PRATICAL test at this point

C I personally have tried to get three people into the Barber school in Anchorage. they all qualified for the G.I Bill, but could not

use those Educational Benefits, because the school is not G.I accredited and the Instructer their informed me it was quote " to much hassle and paper work"

I feel this is important to get Alaskan people into school, Barbers from Outside dont have a history of staying long.

Rec. # 2

1. test Material.
   A Should not contain Essay type questions
   B Multiple Choice or True or False questions only

the Division of Legislative Audit is either uninformed or somewhat perverse, in their recommendation on upgrading of written Test Material (See also ETS Reply Page 46-47)

All Barber Science text books are almost Identical in their Content. having gone thru four different Books, I found One disagreement in one book as compared to the other three.

To comply with findings of ETS would mean writing a new

text Book.

I would suggest, the Board and the Instructor of the school make an attempt to comply with the provisions of C&S by emphasizing those chapters of the text books that are more pertinent, (Sanitation Diseases, etc) and so inform all prospective examinee, s

Rec. #3 The present school puts enough Barbers into the field, I would suggest a study be done to find out, how many of the Anchorage Barber school graduates, remain in the industry. And why many of the Rehabilitation students do not remain.

I would further suggest that any Instructor in any vocational school have Teacher Certification

Rec. #4 Four Barber Board members should be, ~~One each from~~ one from each of the four largest population Areas of the State, to be voted on by the Board of Barbers in that Area, One lay person from any of the four Areas

qualifications

A Board member should be a practicing Barber for a period of five years and resided in and practiced within the State for the immediate past three years.

Should not have any interest in any Barber school.

Lay person should be a resident for three years

Rec # 5. agreed.

the Board should upgrade the form for inspection of Barber Shops by Public Health

Public Health Inspections, do not protect the public from spread of disease, the Barber must have Sanitation knowledge to accomplish this.

Rec. # 6 agreed

Rec. # 7 Objections of the Barber Board should simply be to fulfill obligations that the State Statutes dictate

Rec. # 8

Agreed
Would only add that each Board member should have on file minutes of Board meetings, and make these available to Barbers upon request

Marse Kueber
#21 Wedgewood Manor
Fairbanks, AK 99701

Dear Mr. Kueber:

Thank you for your testimony regarding the Board of Barber Examiners, which you gave before the Senate Commerce Committee on October 22, 1979.

Due to mechanical problems with the recording system, we were unable to record your testimony for the Committee's records. This defect was not discovered until recently when transcription work was begun on this hearing. The system was operating and had been checked out prior to the hearing; however, it blanked out most of the Fairbanks testimony.

If possible, therefore, the Committee would appreciate it if you could submit either a copy of your testimony, if you were speaking from prepared text, or a summation of your views regarding this matter in order that your feelings might be made a part of the Committee's record.

We apologize for any inconvenience and we look forward to receiving your written testimony and/or exhibits concerning the Board of Barber Examiners. We would like to receive this testimony as soon as possible and should we be able to assist you, please do not hesitate to contact our offices.

Sincerely,

Christian Basler

SB 215

February 28, 1979

The Honorable Brad Bradley
Alaska State Senator
Pouch "V"
Juneau, Alaska 99811

Dear Senator Bradley:

I am writing in response to your letter regarding abolishing the Board of Barber Examiners. There are several reasons I feel it is imperative to have a Board of Barber Examiners.

1. This Board helps maintain and improve the quality of the existing profession.

2. It insures adequate quality control of influx of barbers from out of state, making sure they have the necessary skills.

3. It protects the existing profession from unskilled, untrained barbers.

4. It helps keep inadequately trained persons out of the profession. Training is necessitated for disease recognition and control, sanitation and other indirectly related facets.

5. It protects the citizen from unskilled barbering practices. Barbering laws are set up to protect the consumer.

The high barbering standards taken for granted in this state are a direct result of action by the Barber Board. With the resources at hand, I am not aware of any state without an active Barber Board. Some states are reorganizing their Boards (Washington, Oregon, Idaho) to include hairstyling since their professions so closely overlap. In these states the Barber Board gives separate exams to barbers and hairstylists and sets regulations for each. Contacts that can be made in Washington State are Mr. Al Pehl and Mr. Leland, both of Spokane.

I wish to thank you for your interest and hope you will support action to help us continue to upgrade our profession. Many barber laws are obsolete and need to be revised, but abolishing the Board would be a grave mistake in my opinion.

Sincerely,

Elmo O. Kienbaum /lt

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM

SUBJECT: Apprentice Programs for Barbers (W.O. 3179)

TO: Senator

FROM: Alexander Hoke, AH
Research Analyst

In response to your request for a summary of legislation in other states regarding apprentice programs for barbers, two research reports published by the National Association of Barber Schools, Inc., are attached to supplement our recommendations for legislative measures necessary to establish a quality apprentice program for barbers in this state. For the purposes of this analysis, the statutes of the following states, believed to constitute a representative sample of 50 states, were scrutinized for all details of barbering apprenticeship programs: Oregon, California, New York, Michigan, North Carolina, Connecticut, New Mexico and Ohio.

The two research reports assembled by the National Association of Barber Schools, Inc., were published in July, 1972. It is our belief that the critically relevent information (statistics of state barber laws) is essentially an accurate picture of the present law in a national perspective. All data, checked against present statutes, have been verified to have remained essentially unaltered since the 1972 compilation.

Two parenthetical remarks might be made concerning research report No. 6A, Barber School, Barber Students and Barber Statistics. First, only one school of barbering is in operation in Alaska (Anchorage, Alaska School of Barbering). A catalog of procedures and operations is enclosed. Second, it is a significant fact that Alaska has, by far, the highest ratio of population per barber - 1,087, while the mean ratio of the 50 states is 713 persons per barber.

From the research report No. 3A, State Barber Laws, you will quickly notice that only Alaska and Alabama have no apprentice law (in fact, Alabama has no state barber law whatsoever). Furthermore, reading from the column at the left, Alaska compares with the remainder of the United States in the following ways (by category):

(1) While Alaska requires 1,500 hours of study at an approved barber school or college prior to making application for practice as a barber, the mean number of hours required

in the other states is 1,438 hours.

(2) With 78% of the states (including Washington, D. C.) requiring some minimum education level for prospective barber students, the mean grade level of education requisite in the states is 9.5 years (or 9th grade level plus 1/2 years). Alaska has no education requirement.

(3) 89.8% of the states (including Alaska) require students in barbering colleges and schools to pass a satisfactory examination in order to receive a diploma.

(4) With 75% of the states collecting a fee for apprentice examination, the average of the fees collected is $16.71. Alaska has no apprentice law.

(5) With 86% of the states collecting a fee for apprentice licensing, the average of the fees collected is $7.28.

(6) Only Alaska and Alabama required no apprenticeship period; the average number of months required by the remaining states is 18.4.

(7) 88% of the states require that an apprentice pass a satisfactory examination after completing his/her apprenticeship practice. Alaska has no apprentice law.

(8) While only Alabama and Tennessee do not require an examination fee for the privilege of taking the barber examination, the average fee collected is $23.08. Alaska collects $25.

(9) Of the states which collect a renewal fee for barber certification (only Alabama collects no fee) the average renewal fee is $9.72 annually. Alaska collects $10 annually.

(10) With 84% of the states defining a specific time limit for the restoration of an expired barber license, the average restoration period is 3.03 years. Alaska restoration period is five years.

(11) The average restoration fee collected by the states is $16.29. Alaska collects $10 plus lapsed fees.

The remainder of the statistics apply to out-of-state applicants:

(12) To qualify for application to practice as a registered barber, 86% of the states do not require a period of residency in the state. Of those that do require a period

of residency, six months is the most common period. Alaska has no residency requirement.

(13) In 26 states, students from out-of-state barber shcools are eligible to take the apprentice examination; in 17 states these students are not eligible; in 7 states there is no exam.

(14) 31 states give credit for out-of-state apprentice experience; 18 do not give credit.

(15) 12 states (including Alaska) offer a temporary permit to out-of-state barbers who are waiting for the examination to be scheduled by the board; 38 states do not offer temporary permits.

In our view, legislation on both the barber school and the registration aspects of our state law would be required in order to construct an effective and comprehensive apprenticeship program. If you wish to pursue the initiation of an apprenticeship program, we would suggest focusing on the following areas:

I. Qualifications: students, apprentices, barbers
II. Credit for training in state correctional institutions
III. Out-of-State applicants
IV. License fees
V. Exemptions and General Provisions

It should be noted that some of these categories (exemptions for example) are not universally adopted by all the state statutes examined. Their inclusion is aimed at exploring all areas of thought relative to legislation of the barbering profession. Underlined numbers indicate quantitative values believed to be commensurate with the standards observed in other state statutes.

I. Qualifications: students, apprentices, barbers

A. In most states, qualifications applicable to students of barbering take the form of qualifications imposed on schools and colleges of barbering seeking state approval under the Barber Act. The statutes, of the states examined, require that approved colleges accept students with a minimum 10th grade education or an equivalent education as determined by the state board of barber examiners (hereinafter referred to as the board). Additionally, approved barber schools must require for graduation, a minimum of 1,500 hours of instruction to be completed within 18 months, at the rate of not more than eight hours in any one working day. A student may, however, complete a service in process, with time credit, but not

to exceed 30 additional consecutive minutes per day, with the total hours per week not to exceed 42-1/2 hours, including accumulated service in process completion time.

Many states define the fundamentals of a proper course of instruction for those schools and colleges seeking approval of the board. A copy of California's barber college instruction essentials is attached for your perusal.

B. The statutes of the states examined in this study defined a person qualified to receive a certificate of registration as a registered apprentice as one who:

1. Has a 10th grade education or the equivalent to be determined by the board.

2. Is at least 17-1/2 years of age.

3. Is of good moral character and temperate habits.

4. Is a graduate of a school or college of barbering approved by the state board of barber examiners.

5. Has passed a satisfactory examination conducted by the board to determine his fitness to practice as a registered apprentice.

6. Produces a certificate from a physician licensed by the state that he is free of contagious or infectious disease.

There exist many variations of procedures to be followed in the event that an applicant fails the examination of his fitness to be registered as an apprentice. The most common procedures permit the applicant to take a second examination within 90 days of his first examination. Upon a second failure, or lapse of the 90-day period, an additional 350 hours of study, at an approved school or college of barbering is required before the applicant is again eligible for examination. Again, time constraints are placed on the period of additional study. Usually, the additional 350 hours must be completed within three months with no more than eight hours in any working day, except for the above allowance for completion of service in process. The total hours of study per week is limited to 48 hours.

Further statutorial restrictions include a limitation of three years for the maximum length of time any person may practice as a registered apprentice. Moreover, no one shall work as an apprentice more than six months after completion of the working requirements of apprenticeship, without applying for and taking the examination for a certificate to practice as a registered barber.

C. In most states, a person is qualified to receive a certificate to practice as a registered barber if he:

1. Is qualified under the provisions for a registered apprentice.

2. Is at least 18 years of age.

3. Is of good moral character and temperate habits.

4. Has practiced as a registered apprentice for at least 18 months.

5. Has passed a satisfactory examination to determine his fitness to practice as a registered barber.

6. Produces a certificate of health from a physician licensed by the state that he is free of contagious or infectious disease.

An applicant who has failed the barber examination may, within 30 days of the expiration of his apprentice license, renew his license for 90 days and apply to take the next scheduled examination. A registered apprentice may apply for and take the examination of fitness to practice as a registered barber no more than three times.

II. Credit for Training in State Correctional Institutions

The statutes of all states studied grant credit for instruction received in state correctional institutions to applicants of certificates to practice as registered apprentices or registered barbers. A qualified applicant must have successfully completed a course of training which complies with the standards established for approved barber colleges or schools and:

A. He must meet the minimum age and grade school education requirements.

B. He must pass a satisfactory examination to determine his fitness to practice as an apprentice or barber (depending upon the certificate for which he is applying).

C. He must produce a certificate from a licensed physician that he is free of contagious and infectious disease.

D. He must have demonstrated good moral character and temperate habits subsequent to the granting of his parole or discharge from the correctional institution.

III. Out-of-State Applicants

A certification of an out-of-state applicant to practice as a registered apprentice in most states is granted if all qualifications for a registered apprentice have been met and either:

A. He produces a valid certificate of registration as an apprentice in another state or country which has substantially the same requirements for registration, or

B. He produces at least two affidavits that he has practiced as an apprentice in another state or country for at least six months within the preceeding two years.

Upon passing the examination, a certificate to practice as a registered apprentice is granted and the time spent as an apprentice in the other state or country is credited to his requirements to qualify for application to take the barber examination.

A person who practiced legally as a barber out-of-state may receive a license to practice as a barber in this state if he:

A. Has practiced as a registered apprentice or registered barber or both for at least five years and furnishes two affidavits in proof.

B. Is presently a qualified barber in the state or country in which experience is claimed.

C. Passes a satisfactory examination to determine his fitness to practice as a registered barber.

D. Meets the requirements for a registered barber in this state.

IV. Fees

License Fees:

Apprentice	$10.00
Barber	10.00

Renewal Fees:

Apprentice	$10.00
Barber	10.00

Restoration Fees:

Apprentice	$10.00 plus lapsed fees
Barber	10.00 plus lapsed fees

Examination Fees:

Apprentice	$20.00
Barber	25.00

V. Exemptions and General Provisions

A. In most states, the following general provisions apply:

Persons are explicitly forbidden to serve or attempt to serve as an apprentice to a registered barber without a certificate of registration as a registered apprentice issued by the board of barber examiners.

Moreover, no registered apprentice may practice barbering independently, but he may perform all the functions of barbering under the direct supervision of a registered barber, except that as much as 1.5 hours may be unsupervised in any working day.

In any barber shop, no more than one apprentice may be employed for each registered barber practicing in the shop.

No registered apprentice may practice barbering for more than three years on an apprentice license, except that extensions may be granted by the board for good cause, i.e., illness, accident, service in the Armed Forces of the United States.

Examinations for prospective barber students, apprentices and registered barbers shall be conducted at least four times each year and is to be scheduled and announced to applicants at least 30 days in advance. The examinations shall consist of practical demonstrations and written and oral tests which embrace the subjects usually taught in approved barber schools and colleges.

Renewals of certificates for every registered barber, registered barber teachers and registered apprentice who continues in active practice or service shall, annually, on or before July 1 of each year, renew his certificate of registration and pay the required fee. The board may vary the dates of registration renewal by giving the applicant written notice of the renewal date and by making prorated adjustments in the renewal fee. Every certificate of registration which has not been renewed within 30 days of expiration may be renewed by paying the required restoration fee.

Grounds for refusal, suspension or revocation of registration include:

1. Conviction of a felony.

2. Gross malpractice or incompetency.

3. Continual practice while knowingly carrying a communicable disease.

4. Advertising by deceptive statements.

5. Habitual drunkenness or addiction to the use of narcotics or other habit forming drugs.

6. Immoral or unprofessional conduct.

7. Where the applicant has received any part of his course of instruction in barbering at a state correctional institution, the requirements of 1, 5 and 6 (above) shall be determined solely upon the conduct of the applicant after the granting of his parole or discharge from the institution.

B. Exemptions in many states include the following persons while in the proper discharge of their professional duties:

1. Persons authorized by law to practice medicine and surgery in this state.

2. Commissioned medical and surgical officers of the United States Army, Navy or Public Health Service.

3. Registered Nurses.

4. Persons authorized by the law of this state to practice cosmetic therapy.

5. Undertakers, embalmers and morticians.

C. The provisions of this apprenticeship proposal would not be applicable to:

1. Persons engaged in the acts of barbering for a member of his immediate family.

2. Persons licensed as registered barbers in this state at the time this act becomes effective.

PURPOSE AND SCOPE OF THE REVIEW

Purpose

In accordance with the intent of Alaska Statutes 24.20.271 (1) and 44.66.050 (sunset legislation), an audit of the Board of Barber Examiners was conducted to review Board activities and accomplishments to determine if the Board has been operating in an effective, efficient, and economical manner.

As required by legislative intent, this report shall be considered during the legislative oversight function in determining whether the Board of Barber Examiners should be reestablished. The law currently specifies that this Board will terminate on June 30, 1980, but will continue until June 30, 1981, for the purpose of concluding its affairs.

Scope

The major areas reviewed were the Board's operations and its licensing, examination, administration, complaint and affirmative action functions. Our review consisted of analyzing and evaluating the following:

(1) Applicable statutes and Board regulations;

(2) interviews with Board members and questionnaires sent to the Board;

(3) interviews with health agencies and professional associations;

(4) tests of records and documents of the Board and the Division of Occupational Licensing (OL), Department of Commerce and Economic Development;

(5) interviews with OL employees;

(6) complaints filed with OL, the Ombudsman's Office, Consumer Affairs Agency, and the Equal Employment Opportunity Office;

(7) questionnaires sent to 119 State licensed barbers; and

(8) questionnaires sent to 28 applicants who have failed the Barber Examination, 1976 - 1978.

Scope Constraints

This review was hampered by the following constraints:

(1) The Board has not established and reported financial and program plans as required by AS 37.07.050 nor has it developed and reported performance information required by AS 37.07.090.

(2) OL has not adequately collected, recorded and maintained pertinent files and statistics relating to the Board to effectively and efficiently carry out its administrative responsibilities.

ORGANIZATION AND FUNCTION

The Board of Barber Examiners was established by the 1957 Session Laws of Alaska. The Board consists of five licensed barbers appointed by the Governor. Board members serve until they resign or are removed by the Governor.

The Board is organized under the Department of Commerce and Economic Development, Division of Occupational Licensing (OL). OL provides the Board with licensing and investigative support. The licensing section processes applications, maintains license files, answers inquiries and provides other administrative help to the Board.

The function of the Board is primarily regulatory, mandated by AS 08.12. Accordingly, the Board has the authority to examine and issue licenses to qualified applicants, establish or amend rules and regulations necessary and desirable to enforce statutes, and to hold hearings to suspend or deny the license of a person violating the barber statutes and regulations.

REPORT CONCLUSION

Policy Issues

This review contains policy issues raised as a result of our evaluation of various Board practices. The final policy decisions affecting these practices are not within the scope of this review but require legislative consideration. In debating these issues, the legislative oversight committees should take into consideration the findings and alternatives presented in this report, so that the potential impact of policy changes can be evaluated.

Report Conclusion

The primary purpose of a board is to protect the public through regulation of licensure.

Licensure is necessary when:

1. The unlicensed practice of an occupation poses a serious risk to consumers' life, health and safety, or economic well-being;

2. potential users of the occupational service cannot be expected to possess the knowledge needed to properly evaluate the qualifications of those offering services; and

3. benefits to the public clearly outweigh any potential harmful effects such as a decrease in availability of practitioners, higher costs of goods and services.

In order to find out whether or not the regulation of the practice of barbering satisfies these criteria, we reviewed the Board's activity in the areas of licensing, examination, inspection, administration and complaints. Our conclusions as to the Board's effectiveness follow:

1. Licensing: The Board does not grant licensure by endorsement or reciprocal agreement. Thus applicants who are otherwise qualified must wait to take the Alaska Board examination before they can obtain a license.

2. Examination: The examinations developed by the Board contain questions which are not job related and contain questions, the answers to which are subject to interpretation. The Board has not established sufficient procedures or consistently applied existing procedures for administration of

examinations. We found that most Board related complaints were concerning either the examination or the methods the Board used to administer the examination.

3. Inspection: The Board does not perform inspections. The Department of Health and Social Services is authorized under AS 18.05.040(9) to perform health and sanitation inspections. Therefore, it would be a duplication of effort for the Board to conduct similar inspections. There is no record that the Board ever conducted a compliance inspection of Alaska's only Barber School in accordance with 12 AAC 08.310.

4. Administration and Board Proceedings: The Board has not developed and reported program plans and performance information required by AS 37.07; the Board has no public members, and statutes, rules and regulations need to be reviewed and updated.

5. Complaints: Of 24 complaints reviewed, two were consumer related and minor in nature. The majority of complaints were made by applicants against the Board.

The practice of barbering does not meet the regulatory criteria described above. The Board of Barber Examiners should be allowed to terminate on June 30, 1980.

However, if the Board is not terminated and/or licensing of barbers is continued, then the following recommendations should be considered.

FINDINGS AND RECOMMENDATIONS

Recommendation No. 1

The Board of Barber Examiners should revise regulations to encourage entry of all qualified individuals as barbers.

The Board currently allows applicants to be licensed by examination only and allows applicants to practice in the interim in accordance with Sec. 08.12.160 of the Alaska Statutes which states:

> Sec. 08.12.160. Temporary permit. Any person entering the state or transferring from a practice exempt under the provisions of § 270 of this chapter, and who desires to engage in barbering who has (1) a diploma from a barber college accredited by the board or (2) a bona fide license issued by another territory or state, shall be issued a temporary permit, valid until the next examination given by the board. (§ 6 art III ch 68 SLA 1957)

Consequently, applicants who are otherwise qualified would be denied licensure as they have not passed the Alaska Board examination; for example:

> An applicant who has been licensed and practiced as a barber in another state for a period of years would be required to take the Alaska Board examination.

The effect of granting licensure by examination only unnecessarily restricts entry of qualified individuals into the profession.

In addition, applicants who have not demonstrated that they have met the minimum qualifications are allowed to practice in the interim; for example:

> Applicants who seek licensure as a result of receiving a diploma from an accredited barber college are allowed to practice in the interim without first being tested for minimum competency. Consequently, there is a potential for unqualified applicants being allowed to serve the public.

The Board should revise regulations:

To allow licensure by endorsement and reciprocal agreement, whereby, an applicant can demonstrate that:

A. His work has been accepted by the public through a history of work experience; and

B. the requirements of the state in which the barber was previously licensed are generally in accordance with those requirements established by the Board.

Recommendation No. 2

The Board of Barber Examiners should improve procedures for: 1) Selection of test material to be included in the Barber written and practical examination; and 2) administration of the Barber written and practical examination.

Test Material

We requested through the Division of Occupational Licensing that copies of recent exams and answers given by the Board be sent to the Educational Testing Service (ETS) for evaluation. The results of the evaluation are included as Appendix G. We are in basic agreement with ETS and would encourage the Board to update the examination material accordingly.

The Board currently administers a State constructed examination.

Administration of the Examination

There have been a number of complaints concerning the methods the Board uses to administer the examinations. Most of the complaints result from inconsistent application or the absence of formal Board procedures in dealing with individual applicants. The following are areas where the Board could improve to reduce the number of complaints in the future:

1. Grading criteria should be clarified and given to applicants before the examination. For example, applicants should know if more weight is given to certain test areas.

2. Time limits for the examinations should be announced before the examination and should be adhered to.

3. Applicants should be informed that the barber regulations specifically authorized two barber textbooks for their use.

4. The Board should have a limited number of tools to lend applicants who have forgotten some of their tools. We realize that this may be contrary to the regulation that requires each applicant to furnish his own tools. Tools have been lent in the past and if it is Board policy to lend tools, then it should be done so consistently and understood by all applicants.

5. Admittance to the examination should be limited to those who are required to be there.

Recommendation No. 3

The Board of Barber Examiners should introduce legislation to amend AS 08.12.210 to encourage entry of barber schools to help provide an adequate supply of qualified barbers to serve the public.

Alaska Statute Section 08.12.210 states:

> Sec. 08.12.210. License required. No person may operate a barber school or college, or teach in a barber school or college, without a barber teacher license issued by the board. (§ 2 art V ch 68 SLA 1957; am § 8 ch 168 SLA 1960)

According to a Board member and the personnel at the Division of Occupational Licensing, the term "to operate" includes ownership and/or management of a barber school.

Ownership and/or management of a barber school does not require that the owner and/or manager is required to teach. The requirement to be licensed as a barber teacher should apply only to those who are to instruct students.

AS 08.12.210 limits entry of those who are otherwise qualified to operate a barber school.

Increasing the number of barber schools in Alaska should be encouraged to increase the source of qualified barbers to serve the public.

Recommendation No. 4

The Board of Barber Examiners should submit legislation to: 1) Establish a term and to limit the length of service for Board members to two consecutive terms; and 2) require public members on the Board of Barber Examiners.

Alaska Statute Section 08.12.010-020 concerning creation, membership, and qualifications of Board members states:

> Sec. 08.12.010. Creation and membership of board. There is created the Board of Barber Examiners, referred to in this chapter as the board, composed of five members appointed by the governor. Four members of the board shall be from separate major senatorial districts. The fifth member shall be appointed from the district having the largest number of practicing licensed barbers. The members serve at the pleasure of the governor. (sec 1 art II ch 68 SLA 1957; am sec 1 ch 168 SLA 1960)
>
> Sec. 08.12.020. Qualifications of board members. Each member of the board shall be a practicing barber who has engaged in barbering in the state for at least five years prior to his appointment. Engaging in the practicing of barbering within a military reservation is not qualifying experience. (sec 2 art II ch 68 SLA 1957)

Currently AS 08.12.010 which creates the Board does not define the term and the number of terms a Board member may serve.

Limiting appointments to two consecutive terms would, over the years, permit a broader spectrum of professional background combined with increased opportunities for new members and ideas. This should make the Board more responsive to public needs and less subject to criticism.

AS 08.12.020 which establishes qualifications for the Board requires all five members of the Board to be representatives of the regulated profession.

The public, which is the group that the barber licensure laws were to protect, does not have representation on the Board.

In recent years, criticism of regulatory boards that only have representatives of the regulated profession as board members has increased. The public has lost confidence in these boards because they feel the profession's interest may be placed before that of the public's.

The Board should submit legislation to:

1. Establish a term and to limit the length of service for Board members to two consecutive terms.

2. Require public members on the Board.

Recommendation No. 5

The Board of Barber Examiners should introduce legislation to repeal Board inspection regulations to reduce duplication of effort.

The Board does not conduct health and sanitation inspections as authorized by Section 08.12.030(2) and (4) which states:

> Sec. 08.12.030. General powers of board. The board may
>
> (2) adopt rules and regulations for the conduct of the practice of barbering in accordance with reasonable standards of sanitation which do not derogate from the ultimate control over health and sanitary conditions for all licensees under this chapter which is in the Department of Health and Social Services;
>
> (4) conduct inspections of barber shops to insure that standards of sanitation are being maintained, except that the board may not conduct a second inspection of the same shop within 90 days after the first inspection;

Health and sanitation inspections are performed by the Alaska Department of Health and Social Services which has ultimate control over health and sanitary conditions for barbers in accordance with AS 18.05.040(9).

Health and sanitation inspections are performed to protect the public from contagious diseases.

Regulations for the Board to make inspections are unnecessary and if carried out would be a duplication of effort.

Regulations authorizing the Board to make inspections should be repealed.

Recommendation No. 6

The Board of Barber Examiners should introduce legislation deleting "good moral character" as a requirement for licensure.

The Barber Law currently requires evidence of "good moral character" for licensure. AS 08.12.070(1) and AS 08.12.220(1) state:

> Sec. 08.12.070. Application. A person wishing to practice barbering shall apply to the board by submitting
>
> (1) evidence of his good moral character;

Sec. 08.12.220. Application. A person wishing to operate a barber school or college or teach in a barber school or college shall apply for examination and licensing to the board and submit

(1) evidence of his good moral character satisfactory to the board;

The Board has not defined the requirement "good moral character". Without definition this requirement cannot be interpreted and enforced in a consistent manner.

The Board should either define what "good moral character" is or introduce legislation to delete it as a requirement for licensure.

Recommendation No. 7

The Board of Barber Examiners should establish formal goals, objectives and quantifiable measures which should be included in the Division of Occupational Licensing's budget document.

The Board does not have a statement of goals and objectives.

Objectives describe what an agency or board is seeking to accomplish during a specific year. Well formulated objectives are capable of measurement and should include numerical targets so that actual accomplishments can be compared with stated targets. Without goals and objectives, the Board's performance cannot be adequately evaluated and analyzed.

The Division of Occupational Licensing established its own budget goals and objectives. The budget documents do not include any goals or measures for individual boards. Without the Board's goals and measures being identified or measured, neither the Governor's Office nor the Legislature can evaluate the Board's performance (see the Division of Occupational Licensing Performance Audit Report).

Recommendation No. 8

The Board of Barber Examiners should improve formal Board minutes.

Board minutes are not complete and in enough detail to recreate what happened at the Board meetings.

Board minutes are the official public record of all proceedings of a board meeting and the only means a board has to formally state its actions. Therefore, it is essential that all minutes be detailed, accurate, and complete.

To improve the quality of all Board minutes, we recommend that the Board establish procedures that include the following requirements.

1. All Board proceedings, except for executive sessions, should be tape recorded to allow for a more accurate and detailed transcription;

2. tapes should be retained for a reasonable period of time following transcription;

3. minutes should include Board member attendance, absence and public attendance;

4. minutes should reflect more detail of discussions during the meeting and identification of the person speaking;

5. minutes should include an accurate quote of all motions and resolutions whether carried or not and an accurate breakdown of the membership's voting;

6. attachments to Board minutes should include any documents adopted, lists of applicants approved and denied for licensure or examination; and

7. minutes should be properly approved, signed and ratified in a timely manner.

ANALYSIS OF PUBLIC NEED

Limited Analysis

The following analyses indicate both positive and negative attainments as Board activities relate to the public need factors defined in the "Sunset" law. These analyses are not intended to be comprehensive in nature, but address those areas we were able to cover within the scope of our review.

I. The extent to which the board, commission or program has operated in the public interest.

1. The Board provides a State constructed examination twice a year in Anchorage.

2. The Board holds at least two meetings a year in Anchorage.

3. The Board is reviewing regulations written by the Attorney General's Office for adoption.

II. The extent to which the operation of the board, commission, or agency program has been impeded or enhanced by existing statutes, procedures, and practices which it has adopted, and any other matter, including budgetary, resource, and personnel matters.

1. The Division of Occupational Licensing (OL) has not maintained updated records and statistics for Board use (see the OL Performance Audit Report).

2. The OL investigative section has not provided adequate investigative support necessary for the enforcement of the law (see the OL Performance Audit Report).

3. Appointments to the Board have not been made in a timely manner. The Board had been operating for more than nine months with only four members.

4. Statutory requirements for operating a barber school are unnecessarily restrictive by requiring a barber teacher license.

5. The Board does not have a statement of goals and objectives.

6. The Board issues temporary permits in an inconsistent manner.

III. The extent to which the board, commission or agency has recommended statutory changes which are generally of benefit to the public interest.

We found no evidence to indicate that the Board has recommended statutory changes.

IV. The extent to which the board, commission or agency has encouraged interested persons to report to it concerning the effect of its regulations and decisions on the effectiveness of service, economy of service, and availability of service which it has provided.

1. No documentation was available to us to determine the extent of the Board's solicitation of interested party input to its regulatory effects.

V. The extent to which the board, commission or agency has encouraged public participation in the making of its regulations and decisions.

As required by statute, the Board has published notices of its meetings in Anchorage, Fairbanks, Juneau and Ketchikan. However, such notices have not been published in a consistent and timely manner.

VI. The efficiency with which public inquiries or complaints regarding the activities of the board, commission or agency filed with it, with the department to which a board, or commission is administratively assigned, or with the office of the ombudsman have been processed and resolved.

1. The OL investigative section has not provided adequate investigative support necessary for the enforcement of the law (see the OL Performance Audit Report).

2. Six complaints were filed with the Office of the Ombudsman. One complaint has been closed. Three complaints are going into hearing, and two complaints are being investigated.

VII. The extent to which a board or commission which regulates entry into an occupation or profession has presented qualified applicants to serve the public.

1. The Board has issued 15 temporary permits and 62 barber licenses in the last 3 years.

2. There are 14 complaints against the Board on file with OL for denial of licensure.

3. All barber examinations are given in Anchorage. This places an unnecessary hardship on barber applicants from other areas of the State.

4. The Board has initiated regulations in the following areas:

   a. A barber must be a resident of the State to become licensed.

   b. At this time an applicant does not need to go to school for licensure. However, proposed new regulations require 1,500 hours of school for licensure.

   c. At examinations, Board members shall not communicate with applicants except to the extent necessary to implement the examination itself.

   d. No Board member may pass upon an applicant for licensure if there is a conflict of interest.

5. The Board has the statutory authority to grant reciprocity, but has not established any reciprocal agreements with other states (see Recommendation No. 1).

VIII. <u>The extent to which state personnel practices, including affirmative action requirements, have been complied with by the board, commission or agency to its own activities and the area of activity or interest.</u>

We did not note any discriminatory practices performed by the Board. One complaint filed with the Human Rights Commission concerning discrimination due to sex was found to be unsupported. However, barber license applications require unnecessary information such as date and location of birth, social security number, and a photograph of the applicant. These application requirements - if not justifiable by the Board - may be in violation of Equal Employment Opportunity requirements (see the OL Performance Audit Report).

IX. The extent to which statutory, regulatory, budgeting or other changes are necessary to enable the agency, board or commission to better serve the interests of the public and to comply with the factors enumerated in this subsection.

Please refer to the previous section, Findings and Recommendations for detail on recommended changes to enable the Board to better serve the public interest.

APPENDIXES

APPENDIX A

BOARD OF BARBER EXAMINERS
REVENUES COMPARED WITH EXPENDITURES
Fiscal Year 1978
(UNAUDITED)

Average Revenue (see Note 1 and Schedule 1)	$ 4,686
Expenditures (see Note 2)	11,243
Excess of Expenditures over Average Revenues	$(6,557)

Schedule 1
Types of Revenues

Revenues	Amount	Collection Time
Examination Fees		
Barber	$ 25	With Application
Barber Teacher	75	With Application
Temporary Permit (see Note 3)	25	With Application
Annual Licensure Fees		
Barber	10	Biennial
Barber Teacher	50	Biennial
Barber School	150	Biennial

Note 1

A significant portion of revenues are composed of license renewal fees. The renewal date is June 30 of the odd numbered year which causes revenues to be unequal from year to year. Therefore, we took an average of the revenues collected in Fiscal Year 1977 and 1978 in order to obtain a representative amount of collected revenues.

Note 2

Expenditures include those made by Board members, such as travel and per diem, and an allocated percentage (estimated) of total administrative expenses of OL. They do not include expenditures for efforts of other departments, such as the Department of Law, that may be assisting the Board and OL.

Note 3

The temporary permit fee is used as a credit toward the $25 fee for the barber examination

APPENDIX B

EXAMINATION STATISTICS

Examination Date	Administered (Note 1)	Failed (Note 1)	Passed (Note 1)	Percentage Pass Rate
April, 1976	17	4	13	76.5
October, 1976	8	2	6	75.0

Note 2

Division of Occupational Licensing started to renew licenses biennially in 1968.

APPENDIX D

QUESTIONNAIRE FOR MEMBERS OF THE BOARD OF BARBER EXAMINERS

1. What do you believe to be the goals and objectives of the Board of Barber Examiners?

Upgrade barber laws.

Develop a hairstylist examination.

Develop methods of inspection for shops.

Upgrade sanitation laws in barbering.

Develop an apprenticeship law of 1-2 years.

To revise, update and upgrade barbering in our State.

2. Should the number of years a Board member may serve on the Board be limited? If so, how many?

No. The more experience a member has the better job he/she does.

Depending on individual performance of each and every Board member.

3. How does the Board measure its progress in meeting its goals and objectives?

By going over progress and problems at each Board meeting and discussing how well current examinees are developing whenever possible.

4. Is the staff from the Department of Commerce and/or other departments adequate to perform and enforce all laws and regulations relating to the Board of Barber Examiners? What staff support services are provided adequately? Inadequately?

They need to be checking outlying areas for health certificates and licenses since Board members cannot do this.

It is helpful having your representative at each Board meeting as you currently do to take minutes, etc.

At most, yes. Depending on the interest of the office holder at the time.

5. Are the barber procedures used in the practical examination pertinent and relevant to the barber profession being regulated? Are the questions on the written examination pertinent and relevant? Please mention any studies and/or other support backing your opinion.

I feel both examinations are adequate. The barbers who pass the examination are helping build the profession.

Yes, except excessive anatomy and physiology.

6. What evidence exists demonstrating that the absence of barber regulations and/or the Board would be detrimental to the public's best interest?

Without a Board there would be no professional standards. Skin diseases, etc. would be spread. It would set barbering back hundreds of years. We need to continually upgrade barbering as a profession and establish higher standards.

Shops in the State at present. Board needs more authority in supervision of shops, sanitation and sterilization.

7. Are there any statutes or regulations that you believe to be obsolete, vague, unduly restrictive, and/or inadequate to provide the Board with the responsibility and power to properly govern the purpose and activities of the Board? Please list and explain.

I believe the Board should be allowed to inspect all barber shops to see that they use proper sanitation, that they are clean and do not use excessive alcohol and/or drugs while working.

They should be revised.

8. What changes could be made to the Board which would improve its service to the public?

Update obsolete barber laws. Give the Board the responsibility of checking to see that barbers in our respective areas have current licenses, current health certificates and proper sanitation.

The Board at present is too easily incriminated by anyone's feelings, like causing trouble over any emotion they may have can and without profit. One should have to prove cause by evidence proving their statements beyond reasonable doubt before any other action is taken.

9. What is the difference between a hairdresser and a barber.

A hairdresser has advanced training in styling, hair straightening, coloring, etc.

Methods and atmosphere in establishments.

10. Any additional comments.

Need for more and closer supervision in shops. More emphasis on sanitation and sterilization and less on anatomy. Also more participation of Board members for inspection of licenses.

The Board of Barber Examiners for the State of Alaska requires 1,500 hours in a barber school before taking the examination. The beauticians have their own examination.

Neither should be able to cross into the other's field without the basic schooling such as beauticians taking the Barber Board with only the requirements filled for beauty school or vice versa.

These two boards are definitely different in application and technique and should be kept so.

Note 1

Number of Board members sent questionnaires	4
Number of responses	2
Percent responses	50%

Note 2

Some Board members responded to each question with several answers. Therefore, total responses for each question may exceed the number of Board members who responded.

APPENDIX E

QUESTIONNAIRE SENT TO BARBERS
(See Notes 1 and 2)

		Yes	No
1.	Do you feel that it should be necessary for the following to be licensed by the State:		
	A. Barber?	*41*	*0*
	B. Barber Teacher?	*39*	*2*
	C. Barber School?	*40*	*2*
2.	Do you believe Alaska's requirements for permanent licensure as a barber are beneficial for the:		
	A. Profession?	*33*	*2*
	B. Public interest?	*34*	*3*
3.	Do you feel that temporary permits are in the best interests of the public?	*25*	*16*

Comments	*Times Encountered*
1. Applicants should be allowed to have a temporary permit more than once.	*1*
2. The Board should not issue temporary permits.	*1*
3. The Board should only be used in schools.	*1*
4. Applicants should have a current license for temporary permits.	*1*
5. There are too many bad barbers in Alaska.	*1*

4. What contact have you had with the Board of Barber Examiners?

Comments	Times Encountered
1. None (by mail, very little, etc.).	6
2. Examination.	21
3. Know or worked for Board member.	7
4. Board member.	2
5. Meetings.	2

	Yes	No
5. Do you believe the Board has operated in the public's best interest?	34	6

Comments	Times Encountered
1. The Board restricts competition	1
2. Depends on how bad they need barbers.	1

	Yes	No
6. Would the absence of the Board be detrimental to the public's best interest?	36	4

Comments	Times Encountered
1. The Board plays a vital role.	1
2. The Board needs to tighten regulations.	1

	Yes	No
7. Are there any statutes or regulations for the Board that you consider to be obsolete, vague, unduly restricitve?	6	27

Comments	Times Encountered
1. The Board is not fair.	1
2. Give more pay and authority to the Board.	1

7. *Comments (Cont'd.)*

		Times Encountered
3.	*The Board should make inspections.*	*1*
4.	*Upgrade to modern times.*	*1*

APPENDIX F

QUESTIONNAIRE SENT TO APPLICANTS WHO FAILED THE BARBER EXAMINATION, 1976-1978
(See Notes 1 and 2)

		Yes	No
1.	Do you feel that it should be necessary for the following to be licensed by the State:		
	A. Barber?	9	0
	B. Barber Teacher?	9	0
	C. Barber School?	9	0
2.	Do you believe Alaska's requirements for permanent licensure as a barber are beneficial for the:		
	A. Profession?	7	1
	B. Public interest?	5	3

Comments	*Times Encountered*
1. Requirements must meet professional standards.	*1*
2. The basic idea in relation to the public is sanitation requirements.	*1*

		Yes	No
3.	Do you feel that temporary permits are in the best interests of the public?	7	2

Comments	*Times Encountered*
1. Also the applicant for barber license.	*1*
2. Only if requirements are met.	*1*
3. Permits should be issued by non-board members.	*1*

4. What contact have you had with the Board of Barber Examiners?

Comments	*Times Encountered*
1. Examination.	*7*
2. Met Board or Board members.	*1*
3. For temporary permits.	*4*
4. Complaint.	*1*
5. Work for Board member.	*2*
6. Licensure.	*1*
7. None.	*1*

	Yes	No
5. Do you believe the Board has operated in the public's best interest?	*2*	*6*

Comments	*Times Encountered*
1. The Board is not involved with the shops.	*1*
2. Sanitation should be main concern.	*1*
3. Board only tests applicants.	*1*

	Yes	No
6. Would the absence of the Board be detrimental to the public's best interest?	*7*	*3*

Comments	*Times Encountered*
1. Board must be interested in individual members of the profession.	*1*
2. Board must not be merely interested in self-interest.	*1*

	Yes	No
7. Are there any statutes or regulations for the Board that you consider to be obsolete, vague, unduly restrictive?	5	2

Comments	*Times Encountered*
1. Practical exam is purely personal opinion, no guidelines on test and grading.	*2*
2. Laws vague.	*2*
3. Instructors should not be allowed to judge.	*1*
4. Out-of-State barbers must retest.	*1*
5. Practical exam out-of-date.	*2*
6. Written exam unbelievable.	*1*

	Yes	No
8. Do you believe that the examination given by the Board is a fair and reasonable test of a barber's professional knowledge and ability?	2	7

Comments	*Times Encountered*
1. Written exam given to out-of-State applicants at different time than residents.	*1*
2. Alaska exam has many unimportant questions.	*2*
3. Obtain from tape.	*1*
4. Practical exam material out-of-date.	*2*
5. Board members use up exam time.	*2*
6. Board grades without actual knowledge.	*1*
7. Board gives special treatment to some applicants.	*1*

8. Cont'd

Comments		*Times Encountered*
8.	*Some parts of the exam are vague, giving the Board the opportunity to discriminate.*	*1*
9.	*For what they teach in school, the Board is fair.*	*1*
10.	*Exam should be true-false and multiple choice, not essay.*	*1*

9. Do you think the Board of Barber Examiners should be made up of:

		Number
A.	A majority of barbers?	*4*
B.	An equal number of barbers and public members?	*4*
C.	A majority of public members?	*0*

Please circle one.

	Yes	No
10. Are you aware of any discriminatory practices involving licensing or investigations of the Board?	*6*	*1*

Comments		*Times Encountered*
1.	*Board regulates competition.*	*1*
2.	*Board not interested in professional achievements.*	*1*
3.	*Yes.*	*1*
4.	*Out-of-State applicants checked more closely and harshly.*	*2*
5.	*See conversation.*	*1*

	Yes	No
11. Do you believe that consumer complaints should be handled by the Board of Barber Examiners.	1	8

Comments	Times Encountered
1. Board gets uptight over complaints.	1
2. Professional investigator should handle complaints.	2
3. Conflict of interest (members are shopowners).	2
4. This gives the Board power to be discriminatory.	2
5. No help from OL.	1
6. Should only complain about professional conduct or if someone was hurt.	1
7. Shop owners should handle complaints.	1

	Yes	No
12. Do you have any complaints concerning the service provided by the staff support of the Division of Occupational Licensing, Department of Commerce and Economic Development?	2	6

Comments	Times Encountered
1. Information not reliable.	1
2. Some students given exam questions.	1
3. Didn't do anything.	1
4. Most helpful.	1

	Yes	No
13. Do you believe continuing education should be required for your profession?	7	2

Comments	Times Encountered
1. *Allows person to improve oneself.*	2
2. *Without continuing education barbering would not exist as a profession.*	1
3. *Standardize profession in relation to exam.*	2
4. *Only if more than basic barbering.*	2
5. *Optional.*	2
6. *Training before licensure.*	1
7. *Minimum education (12th Grade).*	1

	Yes	No
14. Would you favor combining the Board of Barbers with the Board of Hairdressing and Beauty Culture Examiners?	1	8

Comments	Times Encountered
1. *Look at Oregon.*	1
2. *Fine for beautician but not barber.*	1
3. *If they teach both in school they should be able to work at both.*	1
4. *Two different professions.*	5
5. *Ok for Board members but not for licensees.*	1
6. *Why learn some profession you don't plan on using.*	2
7. *Only if barbers upgrade to level of hairdresser.*	1
8. *Barbers losing out to better organized beauticians.*	1

		Yes	No
15.	Do you hold a current Alaska license?	2	7
16.	Do you recommend any changes to the Board to improve services to the public? The profession?	7	1

Comments	*Times Encountered*
1. Board members must show competency.	*1*
2. Board needs better relationship with licensees.	*1*
3. Conflict of interest.	*1*
4. Change Board members.	*1*
5. Update laws.	*1*

		Yes	No
17.	Should the number of years a Board member may serve on the board be limited? If so, how many?	8	2

18. What do you believe to be the reason or reasons you failed the Barber Examination?

Comments	*Times Encountered*
1. You get more for your school money Outside.	*1*
2. Refer to my transcript at OL.	*2*
3. What text will exam material be from?	*2*
4. Did not study.	*1*
5. Listen to tape.	*1*
6. Hard to find model who wears that out dated style.	*1*
7. Instructor present.	*1*
8. Special consideration for some.	*1*

18. Cont'd

EDUCATIONAL TESTING SERVICE PRINCETON, N.J. 08541

(609) 921-9000
CABLE: EDUCTESTSVC

CENTER FOR OCCUPATIONAL
AND PROFESSIONAL ASSESSMENT

January 29, 1979

Mr. Don Hostak
State of Alaska
Department of Commerce &
Economic Development
Division of Occupational Licensing
Pouch D
Juneau, AK 99811

Dear Mr. Hostak:

A test development specialist and I have quickly reviewed the written tests you sent last week. We are of the opinion that they are similar in content, style and quality to other state barbering tests which we have reviewed in detail and found to be neither job related or developed using currently acceptable measurement techniques.

While we will not make comments about specific test questions, we generally do not agree with some of the answers provided for many of the questions. Our work in the barbering field indicates that only those items dealing with the health, safety and protection of the public are important from a licensing and testing standpoint. Memorization of medical terminology or even a casual acquaintance with details of the nervous, skeletal, digestive or muscular systems do not meet the licensing criteria.

We do not encourage the use of open-ended questions on licensing examinations. Open-ended questions allow a great variety of responses, many of which could have several meanings. As a result, this type of question is difficult to grade. We recommend multiple-choice type questions which require only one answer that is not subject to interpretation by the person grading the test.

We note that the board requires a minimum of 75 out of 100 questions answered correctly for licensure and it is impossible to determine the validity of this cutscore in the absence of supporting data.

Our review indicates that an extensive effort by subject-matter experts, licensing officials and measurement specialists should be considered. Job analysis is needed to identify critical/important tasks of barbers and tests should be built to reflect the findings of the job analysis.

Thank you for thinking of ETS for your measurement needs. I am enclosing several publications which you may find useful. If I can provide further assistance please do not hesitate to call.

Sincerely,

C. J. Teryck
Program Director

July 30, 1979

RECEIVED
AUG 1 1979
LEGISLATIVE AUDIT

Mr. Gerald Wilkerson, CPA
Division of Legislative Audit
Pouch W
Juneau, Alaska 99811

Dear Mr. Wilkerson:

The following comments are in response to the Performance Review of the Board of Barber Examiners, as submitted by the Division of Legislative Audit.

The Department of Commerce and Economic Development concurs with the Division of Legislative Audit's suggestion that the Board of Barber Examiners be allowed to terminate on June 30, 1980. Existence of the Board and regulation of the profession does not appear to meet the criteria by which public need or protection is determined.

Thank you for the opportunity to respond to this report and for the time and effort expended by you and your staff.

LEGISLATIVE
AUDIT

July 27, 1979
604 2ND Graehl
Fairbanks, Alaska 99701

Division Of Legislative Audit
Pouch W-Alaska Office Building
Juneau, Alaska 99811

Dear Sirs:

I have read your Performance Review of the Board of Barber Examiners, and have prepared the following response.

Recommendation No. 1

I agree that Sec. 08.12.160 leaves alot to be desired, and it is a fact that the Board did not issue permits to people with diplomas from out of state barber colleges until August, 1976. At that time I had denied a permit to Veda Vaughn. She wrote to the Attorney General's Office and I later received a letter from the Attorney General stating that in his opinion I could be held personally responsible for denying Mrs. Vaughn the right to work. A permit was then issued.

The Committee recommendation to allow licensure by reciprical agreement is not a valid one. A large number of people who have been licensed find they have not developed the skill necessary to compete in the trade. These people move on to other endeavors, keep their license current and try again under different circumstances, only to find that they have lost some of the dexterity they did have.

Allowing licensure by endorsement is a farce as it would be no problem for a person to get a recommendation from someone in another state.

Allowing applicants who have not demonstrated minimum qualifications to practice barbering seems to be the only weakness of Sec. 08.12.160. It does not deny qualified barbers the right to work as they may practice barbering with a permit until the next examination date. A remedy to this situation would be for the Division Of Occupational Licensing to allow for more frequent examinations.

Recommendation No. 2

Work is presently in progress to revise and update test material. This work will be completed before the next scheduled examination.

All test questions are weighted equally and a State set requirement of 75% is needed to pass the exam, which all applicants are made aware of.

A time limit is announced to all applicants at the time of the exam, however all applicants are allowed more time if needed.

All applicants are informed of the two barber text books authorized by barber regulations.

In the 14 years I have served on the Board of Examiners, I am sure that no applicant has been denied the use of a tool he or she may have forgotten.

Admittance to the examination IS limited to those who are required to be there.

Recommendation No. 3

I am in strong disagreement with the Committee's recommendation regarding AS 08.12.210. Presently the school in Anchorage is providing more than an adequate number of qualified barbers. There is no reason to train more people than the industry can absorb.

Another aspect to consider as far as licensing a school, owner, or instructor is this. A student pays tuition to the school and receives no compensation for work done while training. This gives an unscrupulous person the opportunity to operate a cut-rate barber shop without paying any wages. This has happened on many occasions throughout the country and on one occasion in Alaska. Thus by requiring the licensure of operators the Board is able to prevent this from happening. (I am sure the Committee did not do its homework on this one.)

Recommendation No. 4

I am in agreement that sufficient service of Board member would be two four year terms. Further I would recommend that appointments be made at staggered two year intervals.

I fail to see the value of a public member on the Board of Examiners. It is my experience that the Board acts primarily in the public interest for the public is from whom the industry derives its livelyhood. Furthermore, that is why we have the Budget and Audit Committee to look into these things.

Recommendation No. 5

I am in agreement with the committee that Sec. 08.12.030 (2) and (4) should be repealed. However I would like to point out that in regards to the barber school in Anchorage, that all examinations take place there and that any substandard conditions would be noted and orders to correct the situation would be given immediatly.

Recommendation No. 6

Agreed

Recommendation No. 7

I agree with the Committee's recommendation that the Board prepare a statement of goals and objectives. However, here again we run into the problem of time. The Board is allowed four days a year to conduct its business. Usually the Board takes two days each in April and Oct-

ober. At each meeting we hold examinations, both written and practical for an average of 15 applicants. We typically finish late on the second day. This leaves no time to hash out formal goals and objectives.

Besides more frequent meetings, funding should also be provided to allow the Chairman of the Board to attend the National Association Of Barbers Examiners Convention each year. I think it would be agreeable to a majority of the barbers in the state to raise license and renewal fees to cover this cost.

Recommendation No. 8

Agreed

Conclusion

It is my opinion that there is a need for the licensing function of the Board of Barber Examiners. It performs a much needed service to both the industry and the public. Both consumers and employers should be able to expect that a barber is fully qualified for his job.

The Board has submitted recommendations of change for both regulations and statutes. We feel there should be a minumum of 2000 hours required for training in barber school as well as a two year apprenticeship program. It is unreasonable to expect that a person can attain a journeyman's level of competence with only 1500 hours of training. We have suggested allowing more time for the Board to conduct its business. This would help alleviate our biggest shortcomings. However to accomplish these things we need the support of the Division of Occupational Licensing.

It is not for lack of knowledge of the trade, nor lack of conscientious effort toward bettering the trade for both the industry and the public that we do not appear to meet "regulatory criteria". It is the lack of resources made available to us to perform our jobs.

Thank you for the opportunity to clarify my stand on the issue.

Very Truly Yours,

Don Noll

Reply to Findings and Recommendations as request by Division of Legislative Audit.

Reply to Recommendations No. 1 - to No. 8

No. 1. No. 1.

Add to Sec. 08.12.160 State Law to read.

Reciprocity = For any applicant who has practiced as a Barber in another state for a period of 24 months within the past 36 months and has a Reg. Current Barbers license from another state or county and providing that state or county has Reciprocity with the State of Alaska and he in said page the required license fee. Shall be issued a license to practice in this state.

No. 2 Recomend that the Recommendations be combine as listed here in.

To combine the writing and practical exams.

Written Exam. To consist of 50 questions for a total score of 35 points to be completed in 45 minutes.

The Practical examination to consist of a

Hair cut, Scalp Massage, Shampoo shave and facial.

Consisting of 1 Hour 15 minutes
for a total of 65 points
for a combine total of 100 point with 75 points needed to pass the test

For any applicant consuming any additional time he or she shall lose 2 points for every additional 5 minutes consumed. from their total score.

Every applicant should received a notice from the division office of the date, time, ~~place~~ and place of the examination. The letter should also include the following information & sequence of the test =

Writing test of 50 questions
time = allowed 45 minutes
Points that can be granted if all are correct 35

Practical test consisting of -
(1) Hair cut
(2) scalp massage
(3) shampoo
(4) shave
(5) Facial

To be given as listed & be completed in 1 Hour 15 minutes For a total of 65 points

For a combined total of 100 points

Writing Test 35 points
Practical Test 65 points

Needed to pass the Test 75 point or Better

Also state the Text books used Practice and Science of Standard Barbering, ~~Publishers~~ published by Milady Publishing Corp. Bronx N.Y.

I suguest that all text and medels be the responsibility of the applicants.

M.3.

Add to Sec. 13.12-210 a

Any person may own or manage a Barber School or Barber College providing that a licensed teacher on Barbering is in attendance and supervising at all times

Also the Falling conditions must be meet

A certificate to operate a Barber school or College should be granted to any qualified applicant provide the location of the school or college shall

a population of 115 thousand people in the City, Brough or municipality and 50 thousand population for eg. additional school or college.

Every prospective owner of a Barber School or college shall submit to the Boards and pertenent agencies a Blue print of the proper school or college as to the, eg. ~~Ext~~ Doctags, size of class room, size of work area, type of floor and location, all equipment to be used in the school or College.

Also the prospective owner shall submit proof of his or her finances to found said school or college for a period of 1 year. Lien. Rent, sale ade. substitution ect.

No. 4 Limiting the terms of Board members would be undesirable, because experience is needed for adequate performance.

Add to Sec. 08.12.010
A Public member shall be appointed by the Governor.

a Public member would be desirable and beneficial.

No. 5. Barber Board members should be required to inspect all new Shops and school or colleges before said shops or schools are licenced by the State or municipality. To ensure proper requirements for sanitation

No 6. Deleting moral character would be in my opinion opening the door for undesirable in the barber profession. Example

Excess use of Alcohol
using and selling of Drugs
sex molestors, ~~&~~ Habitual Criminals
ect. ect.

By the retention of this wording good moral Character, we can only help to discourage undesirable in the Barber profession and Shops or schools

No. 7 The Board

The goals of the Barber Board have been limited due to the lack of budget with proper budgeting a statement of goals and objectives could be established

No. 8 Approved as stated in your report

Would request that the Lic. Examiner Secretary type recorder and tapes and paraphernalia needed as recommended.

Very truly yours

Paul A. Stout

RECE

LEGISLATIVE
AUDIT

July 25, 1979

Gerald Wilkerson, CPA
Legislative Auditor
Pouch WF - State Capitol
Juneau, Alaska 99811

Dear Mr. Wilkerson:

I am writing in response to the Performance Review of the Board of Barbers Examiners dated March 31, 1979.

FINDINGS & RECOMMENDATIONS

Recommendation No. 1 (Page 9)

Many barber schools (as in many vocational schools) do not meet satisfactory standards. In order to maintain a high level of skills in Alaska, we feel each applicant should be tested. Applicants need to prove their competency. There is really no other way to assure the State of Alaska of "qualified individuals".

Recommendation No 2 (Page 10)

Currently being done. (1) Potential barbers should be well versed in all phases of barbering even though it may not appear on the test. Naturally, if told they will be tested on specific areas - the remainder of important material will be left unlearned even though it is essential for high standards. (2) As for time limits, these are set and adhered to, but if extra time is needed students are always allowed this because the board realizes the amount of stress the applicants are experiencing during the exam. (3) (Page 11) This is currently being done. (4) This shows irresponsibility and would mean board members would have to travel with all their own tools. This, we feel, is the applicant's responsibility.

Recommendation No. 3 (Page 11)

Currently being done

Recommendation No. 4 (Page 11)

(1) Many barbers are not interested in serving, and those who do serve as board members should have several years of experience before being appointed. Young, inexperienced barbers are not qualified. Board members should also be well versed in Alaska laws and therefore should have lived in Alaska for a number of years to qualify. (2) How can a consumer grade an applicant on his/her haircut, shave or shampoo?

Recommendation No. 5 (Page 13)
If Health & Social Services would perform regular inspections, this would be satisfactory

Recommendation No. 6 (Page 13)
What happens if a dope addict, alcoholic or prostitute applies? This has happened and these people in no way should be allowed to serve the public. It is impossible to screen out every individual, but by suppling character witnesses, at least we can handle some of the problem areas.

Recommendation No 7 (Page 14)
At one of our recent meetings goals were discussed and set. (See Appendix D, Page 25) Also see Page 18 of Analysis No. 4a

Recommendation No. 8 (Page 14)
Minutes are taken by the secretary of the Department of Licensure. Possibly these need to be taped.

ANALYSIS OF PUBLIC NEED

II. 3. Page 16 Appointments to the Board have always been made by the Governor. In Southeast Alaska we were without a board member (although I had written to the Governor's office on several occasions and had had several prominent citizens write to the Governor regarding appointment) for several years. And at one time had a member on the board who found it difficult to attend meetings and therefore were not represented much of the time.

III. Because of limited budget for travel, etc. we have been unable to meet with legislative body. This would be extremely helpful in making statutory changes.

V. Only when there is an applicant in that area is the notice published. This was recommended by the Department of Commerce as a cost effective measure.

VII 3. This is done because of cost since most applicants and most examiners are in the Anchorage area.

VII 4. These were some goals that have been made and instituted.

VII 5. Refer to Recommendation 4 on Page 11.

VIII This does need revision

In summary, In Appendices D, E and F you will note that the majority of barbers, board members and applicants (even though these are ones who failed the exam) feel we DO need a board of barber examiners; they feel there are changes to be made but that this is a vital board to the welfare of the State of Alaska and the welfare of the public and the profession of barbering.

I am appalled at the lack of response you had to your questionnaires and feel, as in most professions, the majority of barbers don't realize the importance of getting involved but if anything doesn't go their way will be the first to complain.

I am enclosing a copy of a letter to the editor in the Anchorage paper recently. This letter does represent the viewpoint of many barbers but does include more than those who are in the union.

I do encourage you, as you study your reports, to pay particular notice to what barbers throughout the state are saying through the answers they have given in their questionnaires. I have tried to make my response as brief as possible, answering only those areas that I felt most important and skipping a few points that probably should have been dealt with a bit more completely.

If I can be of any further help to you or your committee, please do not hesitate to contact me.

Sincerely,

Elmo O. Kienbaum

Letters to the Editor

Dear Editor

On April 1 1979 a barbers test was given for the state licensing of barbers here in Anchorage.

A gross injustice was done by the Department of Commerce who took it upon themselves to override the board and bring in their own written examination in which more than half was nonconforming and totaly irrelevant to barbering.

In our opinion this is just one example of more injustices that will come if Juneau and our Commerce Dept. has their way in eliminating the boards of not only the barbers but of the other professions such as Doctors, Dentists, Attorneys, Chiropracters and many others whos function directly protect the public.

We of the Barbers Union Local 56 are abhorred with the dictatorial attitude of our Dept. of Commerce which has been going on for years in regard to the professions.

The Alaskan people need these boards to insure that persons in these professions are equipped to protect the public in the areas of health, safety and sanitation.

Would you go to a doctor that had taken an electritions test or hire an electition that had taken a doctors exam , or a dentist that had been given a welders exam or a barber given an exam totaly unrelated to his or her field we dought it.

If not then it is apparent that the public must get involved in regard to this so called Sunset Act which would eliminate the boards whos purpose is to protect the public.

These tests will be put togather by people totaly lacking knowledge in the field for which theyo are testing and further all practical examinations could be eliminated if these boards are discontinued.

Because of the boards,contagious disease of the face and head, such as ringworm and impentigo have been virtually eliminated , Would you want these and many others contagious diseases returned to our society ? We Wouldn't.

The Honorable W. "Brad" Bradley
Chairman, Senate Commerce Committee
Pouch V
Juneau, AK 99811

Dear Senator Bradley:

The enclosed proposed bill was intended to have reached you sooner, but was inadvertently sidetracked. It has been basically patterned after the California Statute, with some adjustments from Florida and from Alaska law which, we believe, fit the local situtation better. As indicated by its title, the bill proposes to terminate the existence of the Board of Hairdressing and Beauty Culture Examiners, and replacing it with the Board of Cosmetology. Its contents are the result of the work product of the Alaska Hairdressers and Cosmetologists Association. On the behalf of the Association, I respectively urge you to recommend the passage of the proposed bill, or one as closely patterned after it as possible. It it considerably more comprehensive than what has been provided by statute in Alaska in the past, and covers such fields as electrology and cosmeticians which were heretofore ommitted.

If I can be of any assitance in answering questions on the proposed bill, or obtaining answers to questions for your committee, please feel free to call upon me at the above address or phone number.

Very truly yours,

ROSE & BREEZE, P. C.

By: Nissel A. Rose

Enclosure
Nar:pj

A BILL FOR AN ACT

Relating to occupational licensing; creating new provisions; amending ORS 293.110, 345.010 and 431.130; repealing ORS chapters 690 (1973 Replacement Part) and 691 (1975 Replacement Part); appropriating money; and declaring an emergency.

Be It Enacted by the People of the State of Oregon:

SECTION 1. As used in sections 1 to 26 of this Act:

(1) "Board" means the State Board of Barbers and Hairdressers.

(2) "Certificate" means a certificate of registration, issued in accordance with this Act, authorizing the holder to practice hair design, cosmetology or manicure in accordance with the provisions of this Act.

(3) "Cosmetology" means the use of the hands, mechanical or electrical apparatus or appliances, cosmetic preparations, antiseptics, tonics, lotions or creams in massaging, cleansing, stimulating, manipulating, exercising, beautifying or similar work performed on the human body for cosmetic purposes and not for the treatment of disease or physical or mental ailments, and when done for payment either directly or indirectly for the public generally.

(4) "Hair design" means, when done upon the human body for cosmetic purposes and not for the treatment of disease or physical or mental ailments, and when done for payment either directly or indirectly for the public generally, any one or more of the following practices:

(a) Shaving, trimming or cutting of the beard.

(b) Arranging, styling, dressing, curling, temporary waving, permanent waving, relaxing, cutting, singeing, bleaching, coloring, dyeing, cleansing, shampooing, conditioning, applying hair tonics or similar work upon the hair of an individual.

(5) "License" means a license to operate a shop issued under the provisions of this Act.

(6) "Manicure" means cutting, trimming, polishing, coloring, tinting, cleansing, or otherwise treating the nails of the hand or massaging, cleansing, treating or beautifying the hands performed for cosmetic purposes and not for the treatment of disease or physical or mental ailments, and when done for payment either directly or indirectly for the public generally.

(7) "Practitioner" means a person certified and registered to practice hair design, cosmetology or manicure under the provisions of this Act.

(8) "School of hair design" means an establishment operated for the purpose of teaching hair design and licensed under ORS chapter 345.

(9) "Shop" means an establishment operated for the purpose of engaging in the practice of hair design, cosmetology or manicure and licensed under the provisions of this Act.

SECTION 2. This Act does not apply to:

(1) Services performed without compensation in case of emergency or in domestic administration.

(2) The following persons while in the proper discharge of their professional duties:

(a) Persons authorized by the law of this state to practice medicine, osteopathy, surgery or dentistry.

(b) Registered nurses.

(c) Persons licensed by the State Board of Pharmacy, merchants or other individuals when demonstrating apparatus or supplies for purposes of sale.

(d) Commissioned medical and surgical officers of the United States Army, Navy or Marine Hospital Service.

(3) A student attending a school licensed to teach hair design, cosmetology or manicure under ORS chapter 345 nor is such person required to obtain a license under this Act to perform within the scope of his training.

SECTION 3. No person shall:

(1) Practice or attempt to practice hair design, cosmetology or manicure without a certificate as a practitioner issued pursuant to this Act.

(2) Operate a shop unless it is at all times under the direct supervision and management of a practitioner.

(3) Display a sign or in any way advertise or hold himself out as a practitioner, barber or hairdresser or as being engaged in the practice or business of hair design, cosmetology or manicure without first obtaining a certificate or license as provided in this Act.

(4) Knowingly make a false statement on an application for a license, certificate or permit or for the renewal of a license, certificate or permit issued under the provisions of this Act.

(5) Permit any person in his employ or under his supervision or control to practice hair design, cosmetology or manicure without a certificate as required by this Act.

(6) Obtain or attempt to obtain a certificate, license or permit by fraudulent means.

(7) Permit the fraudulent use of his certificate by another person.

SECTION 4. A person desiring to obtain a license or certificate shall apply in writing to the board on a form provided by the board. Each application shall be

accompanied by evidence under oath or affirmation and satisfactory to the board that the applicant possesses the necessary qualifications.

SECTION 5. (1) To be issued a certificate as a practitioner, each applicant shall:

(a) Pass the certification examination given by the board pursuant to section 7 of this Act;

(b) Pay the examination fee and application fee determined by the board; and

(c) If the applicant is applying for a certificate to practice hair design have successfully completed all courses a school of hair design is required to teach to be licensed under ORS chapter 345; or

(d) If the applicant is applying for a certificate to practice cosmetology or manicure, have successfully completed all courses a school permitted to teach cosmetology or manicure is required to teach to be licensed under ORS chapter 345.

(2) An applicant who holds a currently valid license or certificate to perform hair design, cosmetology or manicure issued by a licensing agency of another state or territory of the United States shall not be required to comply with paragraph (c) or (d) of subsection (1) of this section.

(3) An applicant shall not be required to comply with paragraph (c) or (d) of subsection (1) of this section if the applicant is the graduate of a hair design, cosmetology or manicure school in another state or territory or in a state correctional institution and the requirements for successful completion of training at the school are determined by the Superintendent of Public Instruction to meet the minimum requirements for licensing a school of hair design or a school permitted to teach cosmetology or manicure under ORS chapter 345.

(4) The board shall issue to each qualified applicant a certificate. A certificate shall be valid for one year. The certificate shall be prima facie evidence of the right of the holder to practice in the field of practice for which the holder has qualified and to represent himself as a practitioner.

(5) At the request of any applicant who has qualified to perform hair design under this section, the board shall issue a certificate designating its holder as either a "barber" or "hairdresser," or both, as the applicant requests.

(6) A certificate shall state the areas of practice the practitioner may perform.

SECTION 6. (1) To be issued a license for a shop, each applicant shall:

(a) Be 18 years of age.

(b) Comply with the rules of the board concerning health, safety and sanitation.

(c) Comply with the applicable health and safety laws and rules of the Health Division and any other state agencies.

(d) Pay the application fee determined by the board.

(2) The board shall issue to each qualified applicant a license. A license shall be valid for one year. The license shall be prima facie evidence of the right of the owner of the shop to operate a shop and to advertise as offering the services for which the shop is licensed.

(3) A shop issued a license under the provisions of this Act must at all times be under the direct supervision and management of a practitioner. If hair design is practiced in the shop, the practitioner who supervises the shop must have a certificate to practice hair design.

SECTION 7. (1) Examinations shall be given at such times and places as the board may determine, but in no instance less often than once every month.

(2) Examinations shall be written or oral tests and shall test the applicant's knowledge of sanitary practices and safety for all procedures permitted and in the use of all instruments, equipment or chemicals permitted within the scope of a license and certificate in the field of practice for which the applicant is seeking certification.

SECTION 8. The board may refuse to issue or may suspend or revoke any certificate or license for any one or more of the following causes:

(1) Continued performance of hair design, cosmetology or manicure by a person knowingly having an infectious or communicable disease.

(2) Violation of ORS 646.608 in the conduct of a hair design, cosmetology or manicure business.

(3) Violation of any of the provisions of this Act.

SECTION 9. (1) Except as otherwise provided by this Act, all certificates and licenses issued under sections 1 to 26 of this Act shall expire one year after the date of issue, unless renewed within 30 days of the expiration date by payment of the required renewal fee and compliance with other requirements for renewal. The board, however, may vary the date of certificate and license renewal by giving to the applicant written notice of the renewal date being assigned and by making prorated adjustments in the renewal fee.

(2) Any license or certificate not renewed before it expires may be renewed within one year by payment of the required renewal fee, compliance with other requirements for renewal and payment of a late renewal fee set by the board.

(3) A certificate that has not been renewed for more than one year, and less than five years, after the date of expiration may be renewed and restored upon payment of one year's renewal fee.

(4) A certificate that has not been renewed for a period of five years after date of expiration may be renewed and restored if the applicant:

(a) Satisfactorily passes the examination required by section 7 of this Act.

(b) Pays one year's license fee in advance.

SECTION 10. (1) Every holder of a certificate shall display it in a conspicuous place adjacent to or near his work chair. If he has no work chair, the certificate shall be displayed in a conspicuous place within the shop.

(2) Every holder of a license shall display it in a conspicuous place within the shop.

SECTION 11. (1) A person not certified under this Act who wishes to practice, demonstrate and teach hair design, cosmetology or manicure, or perform any one or more of such functions, temporarily and primarily for educational purposes and is otherwise qualified as determined by the board shall first obtain a permit from the board.

(2) The permit shall specify:

(a) The purpose for which it is granted.

(b) The period during which the person is permitted to practice, demonstrate and teach, which period shall not exceed 10 days.

(c) The time and place of exercising the privilege granted by the permit.

(3) A person may be granted a permit under subsection (1) of this section if he:

(a) Makes application to the board for the permit.

(b) Is currently licensed or certified to practice or teach hair design, cosmetology or manicure in another state and presents satisfactory evidence of that fact to the board, or is otherwise qualified as determined by the board.

(c) Describes the purpose for which the permit is sought.

(d) Pays the required permit fee.

SECTION 12. (1) A person who wishes to temporarily operate any premises for teaching hair design, cosmetology or manicure shall first obtain a temporary premises license from the board.

(2) A person may be granted a license under subsection (1) of this section if he:

(a) Makes application to the board.

(b) Describes the purpose for which the license is sought.

(c) Identifies the location of the premises to be licensed.

(d) States the time and dates for which the license will be issued.

(e) Pays the required license fee.

(3) The license shall specify:

(a) The times, dates and location.

(b) The purpose for which the license is granted.

(c) The person to whom the license is issued. The person specified shall be responsible for the adherence to board rules governing health and sanitation.

(4) The period during which the premises shall be licensed shall not exceed five days.

(5) A temporary premises license is not required and shall not be issued if the educational activity is conducted in a licensed school of hair design, cosmetology or manicure.

SECTION 13. (1) A practitioner who practices outside of or away from a place of business shall carry with him a certificate of identification which must be shown to a person upon whom the work is being performed. The certificate shall contain the signature of the practitioner, his post-office address, the number and date of his certificate.

(2) The board shall, without charge, issue such certificates upon demand by any practitioner who practices away from his place of business on persons who are physically unable to visit a licensed shop.

SECTION 14. (1) There is created within the Department of Commerce a State Board of Barbers and Hairdressers consisting of seven members appointed by the Director of Commerce. Each member of the board shall serve for a term of three years and until his successor is appointed and qualified. At all times the membership of the board shall be so constituted that:

(a) Six members of the board shall be practitioners licensed under the provisions of this Act.

(b) One member shall be a public member not licensed under this Act.

(2) A person is not eligible for appointment as a member of the board if:

(a) He is associated, directly or indirectly, in the manufacture of cosmetic or barber appliances or supplies or their rental, sale or distribution to licensees.

(b) He has previously served two terms.

(3) A member of the board serves at the pleasure of the Director of Commerce. Vacancies shall be filled by the Director of Commerce, by appointment for the unexpired term.

SECTION 15. (1) Notwithstanding the qualifications of members of the board specified in section 14 of this Act, the first practitioner members appointed to the board shall be:

(a) Three persons currently licensed to practice as barbers under ORS chapter 690.

(b) Three persons currently licensed to practice as hairdressers under ORS chapter 691.

(2) Notwithstanding the terms of office specified in section 14 of this Act, of the members first appointed to the board:

(a) Three shall serve for terms ending June 30, 1978.

(b) Two shall serve for terms ending June 30, 1979.

(c) Two shall serve for terms ending June 30, 1980.

SECTION 16. The board shall elect a chairperson. The board shall prescribe rules to govern the proceedings of the board. The board shall hold meetings at such times and places as it determines. A majority of the members of the board shall constitute a quorum.

SECTION 17. Each member of the board is entitled to compensation and expenses as provided in ORS 292.495.

SECTION 18. (1) The Director of Commerce shall fix the qualifications of and appoint an administrator for the board who shall not be a member of the board. Subject to the applicable provisions of the State Merit System Law, the director shall fix the compensation of the administrator, who shall be in the unclassified service.

(2) The Director of Commerce shall provide the board with such services and employes as the board requires to carry out its duties under the provisions of this Act.

SECTION 19. The board shall keep a record of its proceedings relating to the issuance, refusal, suspension and revocation of certificates. This record shall also contain the name, place of business and the date of each certificate and license issued by the board. The records of the board shall at all reasonable times be open to inspection by the public.

SECTION 20. (1) The board has authority to make reasonable rules for the administration of the provisions of this Act and prescribe sanitary and safety requirements for shops. Sanitary requirements for shops shall be subject to the approval of the Health Division. A copy of the rules adopted by the board shall be furnished by the board to the owner or manager of each shop.

(2) Notwithstanding subsection (1) of this section, the board may not prohibit the use of the shop for domestic purposes if the part devoted to domestic purposes is in a

completely separate room not used by customers, with walls extending from floor to ceiling and with any connecting doors kept closed while the shop is in actual operation.

SECTION 21. In addition to the powers otherwise granted by this Act, the board shall have the power:

(1) To determine whether applicants to practice hair design, cosmetology or manicure meet the qualifications under section 5 or 6 of this Act, to conduct examinations, and to grant certificates and licenses to qualified applicants upon compliance with this Act and the rules of the board.

(2) To establish sanitary and safety standards for the practice of hair design, cosmetology or manicure, and to enforce the standards.

(3) To prescribe and furnish forms for applications for examinations, certificates, licenses and permits.

(4) To do any act necessary or proper to effect and carry out the duties required of the board by this Act.

SECTION 22. (1) Where the board proposes to revoke or suspend or refuse to issue or renew a certificate, permit or license, opportunity for hearing shall be accorded as provided in ORS chapter 183.

(2) Any rules adopted by the board shall be adopted in accordance with the procedures set forth in ORS chapter 183.

SECTION 23. Fees required to be paid shall be paid in amounts determined by the board and approved by the Director of Commerce, except that no fee shall exceed the following:

(1) The filing of an application for an original certificate as a practitioner, $15.

(2) An annual renewal of a certificate as a practitioner, $15.

(3) Each examination for a certificate as a practitioner, $15.

(4) A temporary permit issued under section 11 of this Act, $5.

(5) A shop license, $50.

(6) An annual renewal for a shop license, $25.

(7) A temporary premises license, $25.

(8) A duplicate or replacement of any certificate, license or permit, $5.

(9) A late renewal fee, $5.

SECTION 24. All fees and other funds received by the Department of Commerce under this Act shall be paid into the Commerce Administration Account. The payments shall be credited to a separate subaccount, and are continuously appropriated for the purpose of administering sections 1 to 26 of this Act.

SECTION 25. Violation of section 3 of this Act is a Class B misdemeanor.

SECTION 26. (1) In addition to any other duties prescribed by law, the Director of Commerce shall establish within the Department of Commerce a program to provide for the inspection of shops licensed under sections 1 to 26 of this Act and of schools licensed to teach hair design, cosmetology or manicure under ORS chapter 345.

(2) Inspections conducted under this section shall determine whether the shops comply with the sanitary and safety requirements under sections 1 to 26 of this Act and rules adopted thereunder and whether the schools comply with the sanitary and safety requirements under ORS chapter 345 and rules adopted thereunder. Upon completion of each school inspection the Director of Commerce shall cause a report of the results of the inspection to be submitted to the Superintendent of Public Instruction.

Section 27. ORS 345.010 is amended to read:

345.010. As used in ORS 345.010 to 345.370, subsection (1) of 345.990 and ORS 345.992 to 345.997:

(1) "Agent" means any person owning an interest in, employed by or representing for remuneration a vocational school within or outside this state who, by solicitation in any form in this state enrolls or seeks to enroll for remuneration a resident of this state for instruction or training offered by the vocational school, or offers to award educational credentials on behalf of the vocational school, or who holds himself out to residents of this state as representing a vocational school for any purpose stated in this subsection.

(2) "Board" means the State Board of Education.

(3) "Cosmetology" has the meaning given in section 1 of this 1977 Act.

(4) "Hair design" has the meaning given in section 1 of this 1977 Act.

(5) "Manicure" has the meaning given in section 1 of this 1977 Act.

[(3)] **(6)** "Superintendent" means Superintendent of Public Instruction.

[(4)] **(7)** "Vocational school" means any private proprietary vocational, technical, home study, correspondence, business, professional or other school instruction, organization or person that offers any instruction or training for the purpose or purported purpose of instructing, training or preparing persons for any vocation or profession.

SECTION 28. Sections 29 to 35 of this Act are added to and made a part of ORS 345.010 to 345.370.

SECTION 29. In addition to the other requirements of this chapter, rules adopted by the board to regulate schools teaching hair design, cosmetology or manicure:

(1) Shall be set out separately from other rules adopted by the board.

(2) Shall, if the rules concern cleanliness, sanitary practices or use of instruments in the school, be adopted only after the board consults with the Health Division to assure that such rules are consistent with the requirements of the Health Division.

(3) May include any rule the board considers necessary to protect the economic or physical health and safety of the public or of the students attending the school.

(4) Shall include rules that set standards for teachers teaching in schools licensed to teach hair design, cosmetology or manicure pursuant to this chapter.

SECTION 30. In addition to the requirements for issuance of a license under ORS 345.040, for schools seeking a license to teach hair design, cosmetology or manicure, the board shall, by rule, require the schools to teach, and require for graduation from the school, courses that meet minimum standards set by the board on sanitary practices and safety for all procedures permitted and in the use of all instruments, equipment or chemicals permitted within the respective field of practice.

SECTION 31. (1) For the purposes set forth in subsection (2) of ORS 345.330, the superintendent shall appoint an advisory committee for vocational schools teaching hair design.

(2) The membership of the advisory committee shall be so constituted that:

(a) Four members shall be owners of schools licensed under this chapter to teach skills required for hair design.

(b) Two members shall be practitioners, certified under sections 1 to 26 of this 1977 Act, who are graduates of schools licensed under this chapter to teach hair design and who have graduated within one year of the time appointed.

(c) Two members shall be practitioners licensed under sections 1 to 26 of this 1977 Act who have practiced for more than one year preceding appointment.

(d) Two members shall be owners of shops licensed under sections 1 to 26 of this 1977 Act.

(e) One member shall be from the general public.

(3) Each member of the advisory committee shall serve for a term of four years ending June 30.

(4) The members of the advisory committee shall be entitled to compensation as provided in subsection (3) of ORS 345.330.

SECTION 32. (1) Notwithstanding the qualifications of members of the advisory committee specified in section 31 of this 1977 Act, the members of the committee first appointed need not be licensed under ORS chapter 345, graduates of a school licensed

under ORS chapter 345 or certified under sections 1 to 26 of this 1977 Act but may be persons currently holding a valid license or certificate under ORS chapter 690 or 691. Of the practitioner members first appointed to the advisory committee:

(a) Two shall be barbers currently licensed to practice under ORS chapter 690.

(b) Two shall be cosmeticians currently licensed in the class of cosmetic therapy of hairdresser under ORS chapter 691.

(2) Notwithstanding the terms of office specified in section 31 of this 1977 Act, of the members first appointed to the advisory committee:

(a) Three shall serve for terms ending June 30, 1978.

(b) Three shall serve for terms ending June 30, 1979.

(c) Three shall serve for terms ending June 30, 1980.

(d) Two shall serve for terms ending June 30, 1981.

SECTION 33. In addition to the other duties of the Superintendent of Public Instruction prescribed by law, the superintendent shall, at the request of the State Board of Barbers and Hairdressers, determine whether a school teaching hair design, cosmetology or manicure that is not licensed under the provisions of this chapter meets the minimum requirements set by the board for licensing of a similar school under this chapter.

SECTION 34. Sanitary and safety inspections performed in schools licensed under this chapter to teach hair design, cosmetology or manicure shall be conducted by the Department of Commerce.

SECTION 35. (1) In addition to the fees required by ORS 345.080, before issuing any license under this chapter to a school teaching hair design, cosmetology or manicure, the superintendent shall collect a nonrefundable annual inspection fee of $100.

(2) The inspection fee collected under subsection (1) of this section shall be transferred to the Department of Commerce for inspections performed under section 34 of this 1977 Act.

Section 36. ORS 293.110 is amended to read:

293.110. (1) All payments of money into the State Treasury by virtue of any statute providing for, creating, authorizing or continuing any of the funds enumerated in subsection (2) of this section shall be paid into and become a part of the General Fund.

(2) The following funds shall be a part of the General Fund:

[*(a) Board of Barber Examiners' Fund.*]

[*(b)*] (a) Board of Dental Examiners' Fund.

[*(c)*] (b) Forest Patrol Fund.

[*(d)*] (c) Motor Vehicle Fund.

[*(e)*] (d) Oregon State Veterinary Medical Fund.

[*(f)*] (e) State Banking Fund.

[*(g)*] (f) State Institutional Betterment Fund.

[*(h)*] (g) State Library Contingent Fund.

[*(i)*] (h) State Library School Library Fund.

[*(j)*] (i) Tumalo Maintenance Fund.

[*(k)*] (j) All other funds created by law which are not trust funds.

Section 37. ORS 431.130 is amended to read:

431.130. (1) The Health Division shall, in accordance with the provisions of ORS chapter 183, make such rules and regulations as, in its judgment, are necessary for carrying out subsection (2) of ORS 276.990, ORS 418.405 to 418.455, 418.505, 418.515 to 418.530, 418.855, 431.010 to 431.040, 431.060, 431.110 to 431.150, 431.160 to 431.18[illegible], 431.310, 431.330 to 431.350, 431.410, 431.420 to 431.460, 433.005, 433.010, 433.106 to 433.155, 433.205, 433.216, 433.220, 433.230, 433.255 to 433.270, 433.340 to 433.390, 433.705, 433.715, subsection (6) of 433.990, ORS 434.260, 434.270, 437.010, subsection (2) of 437.040, ORS 437.140, 437.410 to 437.500, 448.215 to 448.250[,] and 482.141 [*and 690.200*], including rules and regulations concerning the control of venereal diseases and the care, treatment and quarantine of persons infected therewith.

(2) The Health Division may enforce the rules and regulations for the control of any of the communicable diseases by quarantining or by the adoption of such other reasonable measures as seem best for limiting the spread of communicable diseases and for the preservation of the public health.

SECTION 37a. If Senate Bill 83 (1977) becomes law, then section 37 of this Act is repealed.

SECTION 38. (1) Any valid license, certificate or permit to practice as a barber or hairdresser or to practice cosmetology or manicure or to operate a shop that has been issued by the State Board of Cosmetic Therapy or the Board of Barber Examiners under ORS chapter 690 or 691 shall remain valid as issued and subject to the provisions of ORS chapter 690 or 691 and rules adopted thereunder as effective on the effective date of this Act and as enforced by the State Board of Barbers and Hairdressers and the Department of Commerce. When the license, certificate or permit expires and is subject to renewal, the State Board of Barbers and Hairdressers shall renew the license,

certificate or permit in accordance with the provisions for the renewal of licenses and certificates under sections 1 to 26 of this Act.

(2) Any student enrolled in a school regulated by ORS chapter 690 or 691 on the effective date of this Act may, at the election of the student and upon the completion of the training at the school, apply for a certificate as provided in sections 1 to 26 of this Act or may qualify for a certificate by complying with the provisions of ORS chapter 690 or 691 and rules adopted thereunder as the statutes and rules exist on the effective date of this Act.

(3) Any person serving as an apprentice under ORS chapter 690 on the effective date of this Act shall be issued, without charge, a certificate as a practitioner as provided in sections 1 to 26 of this Act.

(4) For purposes of this section, the State Board of Barbers and Hairdressers shall apply the appropriate provisions of ORS chapters 690 and 691 and rules adopted thereunder, as the statutes and rules exist on the effective date of this Act, as necessary.

SECTION 38a. (1) Notwithstanding any other provision of this Act, any school licensed to teach barbering under the provisions of ORS chapter 690 on the effective date of this Act may continue, at the election of the school, to operate under the provisions of ORS chapter 690 and any rules adopted thereunder as effective on the effective date of this Act and as administered by the Superintendent of Public Instruction. If a school elects to become subject to the provisions of this section all aspects of the operation of the school shall become subject to regulation under this section, including, but not limited to, the course of study, admission requirements, teacher requirements and qualifications, teacher licensing and license renewal, requisites for graduation, work station requirements, curriculum and all other requirements for the school.

(2) If a school elects to be regulated according to the provisions of this section, it is not subject to regulation pursuant to any other provision of this Act. Any student attending a school regulated according to the provisions of this section and any teacher teaching in the school are subject to the requirements of ORS chapter 690 and any rules adopted thereunder only while attending or teaching in the school.

(3) No school shall be regulated according to the provisions of this section unless the school so elects before the effective date of the rules adopted by the State Board of Education pursuant to section 39 of this Act. Any school electing to operate according to

this section may at any later time elect to withdraw from the provisions of this section and become regulated as otherwise provided by this Act.

(4) Any license or certificate to teach barbering issued by the Board of Barber Examiners pursuant to ORS chapter 690 before the effective date of this Act shall remain valid and may be renewed according to the provisions of ORS chapter 690 and rules adopted thereunder as effective on the effective date of this Act so long as the holder teaches at a school regulated according to this section.

(5) The Superintendent of Public Instruction shall administer the provisions of this section.

SECTION 39. (1) The State Board of Education shall adopt rules for the regulation and licensing of schools teaching hair design, cosmetology or manicure. The rules shall become effective not later than July 1, 1978.

(2) Until the effective date of rules adopted pursuant to subsection (1) of this section, the Superintendent of Public Instruction shall regulate schools holding valid licenses to teach under ORS chapter 690 or 691 in accordance with the provisions of the statutes and rules in effect on the effective date of this Act.

(3) Students graduating from schools regulated by the Superintendent of Public Instruction under the provisions of this section shall be considered to have graduated from a licensed school for purposes of sections 1 to 26 of this Act.

SECTION 40. (1) Nothing in this Act relieves a person of an obligation to pay a fee or charge or any other liability, duty or obligation owed to the State Board of Cosmetic Therapy or the Board of Barber Examiners. The State Board of Barbers and Hairdressers may undertake the collection or enforcement of such fee, charge, liability, duty or obligation.

(2) The rights and obligations of the State Board of Cosmetic Therapy and the Board of Barber Examiners legally incurred under contracts, leases and business transactions, executed, entered into or begun before the effective date of this Act, are transferred to the State Board of Barbers and Hairdressers. For the purpose of succession to these rights and obligations, the State Board of Barbers and Hairdressers is considered to be a continuation of the State Board of Cosmetic Therapy and the Board of Barber Examiners and not a new authority, and the State Board of Barbers and Hairdressers shall exercise those rights and fulfill those obligations as if they had not been transferred.

SECTION 41. (1) The unexpended balances of amounts authorized to be expended by the State Board of Cosmetic Therapy and the Board of Barber Examiners, from

revenues dedicated, continuously appropriated, appropriated, collected or otherwise available for the purpose of administering and enforcing duties, functions and powers, are appropriated and transferred to the Commerce Administration Account and are available for expenditure by the Department of Commerce.

(2) The Department of Commerce may expend moneys received under subsection (1) of this section for the purpose of administering and enforcing its duties, functions and powers and for the payment of expenses lawfully incurred by the State Board of Cosmetic Therapy and the Board of Barber Examiners to the extent that the money is unexpended on the effective date of this Act.

(3) The Department of Commerce shall assume and pay all outstanding obligations the State Board of Cosmetic Therapy and the Board of Barber Examiners lawfully incurred before the effective date of this Act to the extent that the obligations are properly charged against amounts authorized by this section to be expended by the Department of Commerce.

SECTION 42. ORS chapters 690 (1973 Replacement Part) and 691 (1975 Replacement Part) are repealed.

SECTION 43. This Act being necessary for the immediate preservation of the public peace, health and safety, an emergency is declared to exist, and this Act takes effect July 1, 1977.

(1)

C-Engrossed

House Bill 3167

Ordered by the Senate June 24
(Including Amendments by House April 22 and by Senate June 1 and June 24)

Sponsored by COMMITTEE ON BUSINESS AND CONSUMER AFFAIRS

SUMMARY

The following summary is not prepared by the sponsors of the measure and is not a part of the body thereof subject to consideration by the Legislative Assembly. It is an editor's brief statement of the essential features of the measure.

Modifies provisions on registration and licensing of barbers, cosmetologists and barber and beauty shops and schools. Requires persons engaging in hair design, cosmetology or manicure for payment to obtain certificate or license from board upon written application, payment of fee, completion of school of hair courses design if applicant seeks certificate to practice hair design and successful completion of certification examination. Requires applicant for shop license to be 18 years of age, pay fee and comply with health, safety and sanitation rules and laws. Authorizes issuing temporary permits for persons wishing to demonstrate hair design for educational purposes. Defines "cosmetology", [*and*] "manicure" and "hair design".

Abolishes State Board of Barber Examiners and State Board of Cosmetic Therapy, replacing with seven-member State Board of Barbers and Hairdressers appointed by Director of Commerce.

Requires licensee to annually renew license and pay fee. Requires licensees who retire for more than five years to take regular examination and pay one year's license fee in advance. Requires displaying certificate of registration near barber's or cosmetologist's work chair.

(Continued on next page)

* 7 members State Board of Barbers & Hairdressers

NOTE: Matter in bold face in an amended section is new; matter [*italic and bracketed*] is existing law to be omitted; complete new sections begin with SECTION.

Requires hair design, cosmetology and manicure schools to post sign indicating work is done by students. Requires barber schools to be licensed and meet minimum sanitary and safety practices established by State Board of Education. Requires Director of Commerce to establish inspection program for hair design, cosmetology and manicure shops and schools to insure that they comply with sanitary and safety laws and rules. Requires State Board of Education to consult with Health Division in adopting rules regarding sanitary regulations of hair design, cosmetology and manicure schools. Authorizes Superintendent of Public Instruction to collect annual inspection fee of $100 and requires transfer of these funds to Department of Commerce. Requires superintendent to appoint advisory committee for vocational schools teaching hair design, cosmetology and manicure. Establishes barber , hairdresser, cosmetology and manicure practitioner, shop and school license fees. **Authorizes use of shop for domestic purposes conducted in separate room. Authorizes barber schools to elect continued regulation under ORS chapter 690 rather than this Act.**

Punishes by Class B misdemeanor operating hair design shop or practicing hair design, cosmetology or manicure without license.

Declares emergency. Effective July 1, 1977.

Amended to resolve conflicts.

A BILL FOR AN ACT

Relating to occupational licensing; creating new provisions; amending ORS 293.110, 345.010 and 431.130; repealing ORS chapters 690 (1973 Replacement Part) and 691 (1975 Replacement Part); appropriating money; and declaring an emergency.

Be It Enacted by the People of the State of Oregon:

SECTION 1. As used in sections 1 to 26 of this Act:

(1) "Board" means the State Board of Barbers and Hairdressers.

(2) "Certificate" means a certificate of registration, issued in accordance with this Act, authorizing the holder to practice hair design, cosmetology or manicure in accordance with the provisions of this Act.

(3) "Cosmetology" means the use of the hands, mechanical or electrical apparatus or appliances, cosmetic preparations, antiseptics, tonics, lotions or creams in massaging, cleansing, stimulating, manipulating, exercising, beautifying or similar work performed on the human body for cosmetic purposes and not for the treatment of disease or physical or mental ailments, and when done for payment either directly or indirectly for the public generally.

(4) "Hair design" means, when done upon the human body for cosmetic purposes and not for the treatment of disease or physical or mental ailments, and when done for payment either directly or indirectly for the public generally, any one or more of the following practices:

(a) Shaving, trimming or cutting of the beard.

(b) Arranging, styling, dressing, curling, temporary waving, permanent waving, relaxing, cutting, singeing, bleaching, coloring, dyeing, cleansing, shampooing, conditioning, applying hair tonics or similar work upon the hair of an individual.

(5) "License" means a license to operate a shop issued under the provisions of this Act.

(6) "Manicure" means cutting, trimming, polishing, coloring, tinting, cleansing, or otherwise treating the nails of the hand or massaging, cleansing, treating or beautifying the hands performed for cosmetic purposes and not for the treatment of disease or physical or mental ailments, and when done for payment either directly or indirectly for the public generally.

(7) "Practitioner" means a person certified and registered to practice hair design, cosmetology or manicure under the provisions of this Act.

(8) "School of hair design" means an establishment operated for the purpose of teaching hair design and licensed under ORS chapter 345.

(9) "Shop" means an establishment operated for the purpose of engaging in the practice of hair design, cosmetology or manicure and licensed under the provisions of this Act.

SECTION 2. This Act does not apply to:

(1) Services performed without compensation in case of emergency or in domestic administration.

(2) The following persons while in the proper discharge of their professional duties:

(a) Persons authorized by the law of this state to practice medicine, osteopathy, surgery or dentistry.

(b) Registered nurses.

(c) Persons licensed by the State Board of Pharmacy, merchants or other individuals when demonstrating apparatus or supplies for purposes of sale.

(d) Commissioned medical and surgical officers of the United States Army, Navy or Marine Hospital Service.

(3) A student attending a school licensed to teach hair design, cosmetology or manicure under ORS chapter 345 nor is such person required to obtain a license under this Act to perform within the scope of his training.

SECTION 3. No person shall:

(1) Practice or attempt to practice hair design, cosmetology or manicure without a certificate as a practitioner issued pursuant to this Act.

(2) Operate a shop unless it is at all times under the direct supervision and management of a practitioner.

(3) Display a sign or in any way advertise or hold himself out as a practitioner, barber or hairdresser or as being engaged in the practice or business of hair design, cosmetology or manicure without first obtaining a certificate or license as provided in this Act.

(4) Knowingly make a false statement on an application for a license, certificate or permit or for the renewal of a license, certificate or permit issued under the provisions of this Act.

(5) Permit any person in his employ or under his supervision or control to practice hair design, cosmetology or manicure without a certificate as required by this Act.

(6) Obtain or attempt to obtain a certificate, license or permit by fraudulent means.

(7) Permit the fraudulent use of his certificate by another person.

SECTION 4. A person desiring to obtain a license or certificate shall apply in writing to the board on a form provided by the board. Each application shall be

accompanied by evidence under oath or affirmation and satisfactory to the board that the applicant possesses the necessary qualifications.

SECTION 5. (1) To be issued a certificate as a practitioner, each applicant shall:

(a) Pass the certification examination given by the board pursuant to section 7 of this Act;

(b) Pay the examination fee and application fee determined by the board; and

(c) If the applicant is applying for a certificate to practice hair design have successfully completed all courses a school of hair design is required to teach to be licensed under ORS chapter 345; or

(d) If the applicant is applying for a certificate to practice cosmetology or manicure, have successfully completed all courses a school permitted to teach cosmetology or manicure is required to teach to be licensed under ORS chapter 345.

(2) An applicant who holds a currently valid license or certificate to perform hair design, cosmetology or manicure issued by a licensing agency of another state or territory of the United States shall not be required to comply with paragraph (c) or (d) of subsection (1) of this section.

(3) An applicant shall not be required to comply with paragraph (c) or (d) of subsection (1) of this section if the applicant is the graduate of a hair design, cosmetology or manicure school in another state or territory or in a state correctional institution and the requirements for successful completion of training at the school are determined by the Superintendent of Public Instruction to meet the minimum requirements for licensing a school of hair design or a school permitted to teach cosmetology or manicure under ORS chapter 345.

(4) The board shall issue to each qualified applicant a certificate. A certificate shall be valid for one year. The certificate shall be prima facie evidence of the right of the holder to practice in the field of practice for which the holder has qualified and to represent himself as a practitioner.

(5) At the request of any applicant who has qualified to perform hair design under this section, the board shall issue a certificate designating its holder as either a "barber" or "hairdresser," or both, as the applicant requests.

(6) A certificate shall state the areas of practice the practitioner may perform.

SECTION 6. (1) To be issued a license for a shop, each applicant shall:

(a) Be 18 years of age.

(b) Comply with the rules of the board concerning health, safety and sanitation.

(c) Comply with the applicable health and safety laws and rules of the Health Division and any other state agencies.

(d) Pay the application fee determined by the board.

(2) The board shall issue to each qualified applicant a license. A license shall be valid for one year. The license shall be prima facie evidence of the right of the owner of the shop to operate a shop and to advertise as offering the services for which the shop is licensed.

(3) A shop issued a license under the provisions of this Act must at all times be under the direct supervision and management of a practitioner. If hair design is practiced in the shop, the practitioner who supervises the shop must have a certificate to practice hair design.

SECTION 7. (1) Examinations shall be given at such times and places as the board may determine, but in no instance less often than once every month.

(2) Examinations shall be written or oral tests and shall test the applicant's knowledge of sanitary practices and safety for all procedures permitted and in the use of all instruments, equipment or chemicals permitted within the scope of a license and certificate in the field of practice for which the applicant is seeking certification.

SECTION 8. The board may refuse to issue or may suspend or revoke any certificate or license for any one or more of the following causes:

(1) Continued performance of hair design, cosmetology or manicure by a person knowingly having an infectious or communicable disease.

(2) Violation of ORS 646.608 in the conduct of a hair design, cosmetology or manicure business.

(3) Violation of any of the provisions of this Act.

SECTION 9. (1) Except as otherwise provided by this Act, all certificates and licenses issued under sections 1 to 26 of this Act shall expire one year after the date of issue, unless renewed within 30 days of the expiration date by payment of the required renewal fee and compliance with other requirements for renewal. The board, however, may vary the date of certificate and license renewal by giving to the applicant written notice of the renewal date being assigned and by making prorated adjustments in the renewal fee.

(2) Any license or certificate not renewed before it expires may be renewed within one year by payment of the required renewal fee, compliance with other requirements for renewal and payment of a late renewal fee set by the board.

(3) A certificate that has not been renewed for more than one year, and less than five years, after the date of expiration may be renewed and restored upon payment of one year's renewal fee.

(4) A certificate that has not been renewed for a period of five years after date of expiration may be renewed and restored if the applicant:

(a) Satisfactorily passes the examination required by section 7 of this Act.

(b) Pays one year's license fee in advance.

SECTION 10. (1) Every holder of a certificate shall display it in a conspicuous place adjacent to or near his work chair. If he has no work chair, the certificate shall be displayed in a conspicuous place within the shop.

(2) Every holder of a license shall display it in a conspicuous place within the shop.

SECTION 11. (1) A person not certified under this Act who wishes to practice, demonstrate and teach hair design, cosmetology or manicure, or perform any one or more of such functions, temporarily and primarily for educational purposes and is otherwise qualified as determined by the board shall first obtain a permit from the board.

(2) The permit shall specify:

(a) The purpose for which it is granted.

(b) The period during which the person is permitted to practice, demonstrate and teach, which period shall not exceed 10 days.

(c) The time and place of exercising the privilege granted by the permit.

(3) A person may be granted a permit under subsection (1) of this section if he:

(a) Makes application to the board for the permit.

(b) Is currently licensed or certified to practice or teach hair design, cosmetology or manicure in another state and presents satisfactory evidence of that fact to the board, or is otherwise qualified as determined by the board.

(c) Describes the purpose for which the permit is sought.

(d) Pays the required permit fee.

SECTION 12. (1) A person who wishes to temporarily operate any premises for teaching hair design, cosmetology or manicure shall first obtain a temporary premises license from the board.

(2) A person may be granted a license under subsection (1) of this section if he:

(a) Makes application to the board.

(b) Describes the purpose for which the license is sought.

(c) Identifies the location of the premises to be licensed.

(d) States the time and dates for which the license will be issued.

(e) Pays the required license fee.

(3) The license shall specify:

(a) The times, dates and location.

(b) The purpose for which the license is granted.

(c) The person to whom the license is issued. The person specified shall be responsible for the adherence to board rules governing health and sanitation.

(4) The period during which the premises shall be licensed shall not exceed five days.

(5) A temporary premises license is not required and shall not be issued if the educational activity is conducted in a licensed school of hair design, cosmetology or manicure.

SECTION 13. (1) A practitioner who practices outside of or away from a place of business shall carry with him a certificate of identification which must be shown to a person upon whom the work is being performed. The certificate shall contain the signature of the practitioner, his post-office address, the number and date of his certificate.

(2) The board shall, without charge, issue such certificates upon demand by any practitioner who practices away from his place of business on persons who are physically unable to visit a licensed shop.

SECTION 14. (1) There is created within the Department of Commerce a State Board of Barbers and Hairdressers consisting of seven members appointed by the Director of Commerce. Each member of the board shall serve for a term of three years and until his successor is appointed and qualified. At all times the membership of the board shall be so constituted that:

(a) Six members of the board shall be practitioners licensed under the provisions of this Act.

(b) One member shall be a public member not licensed under this Act.

(2) A person is not eligible for appointment as a member of the board if:

(a) He is associated, directly or indirectly, in the manufacture of cosmetic or barber appliances or supplies or their rental, sale or distribution to licensees.

(b) He has previously served two terms.

(3) A member of the board serves at the pleasure of the Director of Commerce. Vacancies shall be filled by the Director of Commerce, by appointment for the unexpired term.

SECTION 15. (1) Notwithstanding the qualifications of members of the board specified in section 14 of this Act, the first practitioner members appointed to the board shall be:

(a) Three persons currently licensed to practice as barbers under ORS chapter 690.

(b) Three persons currently licensed to practice as hairdressers under ORS chapter 691.

(2) Notwithstanding the terms of office specified in section 14 of this Act, of the members first appointed to the board:

(a) Three shall serve for terms ending June 30, 1978.

(b) Two shall serve for terms ending June 30, 1979.

(c) Two shall serve for terms ending June 30, 1980.

SECTION 16. The board shall elect a chairperson. The board shall prescribe rules to govern the proceedings of the board. The board shall hold meetings at such times and places as it determines. A majority of the members of the board shall constitute a quorum.

SECTION 17. Each member of the board is entitled to compensation and expenses as provided in ORS 292.495.

SECTION 18. (1) The Director of Commerce shall fix the qualifications of and appoint an administrator for the board who shall not be a member of the board. Subject to the applicable provisions of the State Merit System Law, the director shall fix the compensation of the administrator, who shall be in the unclassified service.

(2) The Director of Commerce shall provide the board with such services and employes as the board requires to carry out its duties under the provisions of this Act.

SECTION 19. The board shall keep a record of its proceedings relating to the issuance, refusal, suspension and revocation of certificates. This record shall also contain the name, place of business and the date of each certificate and license issued by the board. The records of the board shall at all reasonable times be open to inspection by the public.

SECTION 20. (1) The board has authority to make reasonable rules for the administration of the provisions of this Act and prescribe sanitary and safety requirements for shops. Sanitary requirements for shops shall be subject to the approval of the Health Division. A copy of the rules adopted by the board shall be furnished by the board to the owner or manager of each shop.

(2) Notwithstanding subsection (1) of this section, the board may not prohibit the use of the shop for domestic purposes if the part devoted to domestic purposes is in a

completely separate room not used by customers, with walls extending from floor to ceiling and with any connecting doors kept closed while the shop is in actual operation.

SECTION 21. In addition to the powers otherwise granted by this Act, the board shall have the power:

(1) To determine whether applicants to practice hair design, cosmetology or manicure meet the qualifications under section 5 or 6 of this Act, to conduct examinations, and to grant certificates and licenses to qualified applicants upon compliance with this Act and the rules of the board.

(2) To establish sanitary and safety standards for the practice of hair design, cosmetology or manicure, and to enforce the standards.

(3) To prescribe and furnish forms for applications for examinations, certificates, licenses and permits.

(4) To do any act necessary or proper to effect and carry out the duties required of the board by this Act.

SECTION 22. (1) Where the board proposes to revoke or suspend or refuse to issue or renew a certificate, permit or license, opportunity for hearing shall be accorded as provided in ORS chapter 183.

(2) Any rules adopted by the board shall be adopted in accordance with the procedures set forth in ORS chapter 183.

SECTION 23. Fees required to be paid shall be paid in amounts determined by the board and approved by the Director of Commerce, except that no fee shall exceed the following:

(1) The filing of an application for an original certificate as a practitioner, $15.

(2) An annual renewal of a certificate as a practitioner, $15.

(3) Each examination for a certificate as a practitioner, $15.

(4) A temporary permit issued under section 11 of this Act, $5.

(5) A shop license, $50.

(6) An annual renewal for a shop license, $25.

(7) A temporary premises license, $25.

(8) A duplicate or replacement of any certificate, license or permit, $5.

(9) A late renewal fee, $5.

SECTION 24. All fees and other funds received by the Department of Commerce under this Act shall be paid into the Commerce Administration Account. The payments shall be credited to a separate subaccount, and are continuously appropriated for the purpose of administering sections 1 to 26 of this Act.

SECTION 25. Violation of section 3 of this Act is a Class B misdemeanor.

SECTION 26. (1) In addition to any other duties prescribed by law, the Director of Commerce shall establish within the Department of Commerce a program to provide for the inspection of shops licensed under sections 1 to 26 of this Act and of schools licensed to teach hair design, cosmetology or manicure under ORS chapter 345.

(2) Inspections conducted under this section shall determine whether the shops comply with the sanitary and safety requirements under sections 1 to 26 of this Act and rules adopted thereunder and whether the schools comply with the sanitary and safety requirements under ORS chapter 345 and rules adopted thereunder. Upon completion of each school inspection the Director of Commerce shall cause a report of the results of the inspection to be submitted to the Superintendent of Public Instruction.

Section 27. ORS 345.010 is amended to read:

345.010. As used in ORS 345.010 to 345.370, subsection (1) of 345.990 and ORS 345.992 to 345.997:

(1) "Agent" means any person owning an interest in, employed by or representing for remuneration a vocational school within or outside this state who, by solicitation in any form in this state enrolls or seeks to enroll for remuneration a resident of this state for instruction or training offered by the vocational school, or offers to award educational credentials on behalf of the vocational school, or who holds himself out to residents of this state as representing a vocational school for any purpose stated in this subsection.

(2) "Board" means the State Board of Education.

(3) "Cosmetology" has the meaning given in section 1 of this 1977 Act.

(4) "Hair design" has the meaning given in section 1 of this 1977 Act.

(5) "Manicure" has the meaning given in section 1 of this 1977 Act.

[*(3)*] **(6)** "Superintendent" means Superintendent of Public Instruction.

[*(4)*] **(7)** "Vocational school" means any private proprietary vocational, technical, home study, correspondence, business, professional or other school instruction, organization or person that offers any instruction or training for the purpose or purported purpose of instructing, training or preparing persons for any vocation or profession.

SECTION 28. Sections 29 to 35 of this Act are added to and made a part of ORS 345.010 to 345.370.

SECTION 29. In addition to the other requirements of this chapter, rules adopted by the board to regulate schools teaching hair design, cosmetology or manicure:

(1) Shall be set out separately from other rules adopted by the board.

(2) Shall, if the rules concern cleanliness, sanitary practices or use of instruments in the school, be adopted only after the board consults with the Health Division to assure that such rules are consistent with the requirements of the Health Division.

(3) May include any rule the board considers necessary to protect the economic or physical health and safety of the public or of the students attending the school.

(4) Shall include rules that set standards for teachers teaching in schools licensed to teach hair design, cosmetology or manicure pursuant to this chapter.

SECTION 30. In addition to the requirements for issuance of a license under ORS 345.040, for schools seeking a license to teach hair design, cosmetology or manicure, the board shall, by rule, require the schools to teach, and require for graduation from the school, courses that meet minimum standards set by the board on sanitary practices and safety for all procedures permitted and in the use of all instruments, equipment or chemicals permitted within the respective field of practice.

SECTION 31. (1) For the purposes set forth in subsection (2) of ORS 345.330, the superintendent shall appoint an advisory committee for vocational schools teaching hair design.

(2) The membership of the advisory committee shall be so constituted that:

(a) Four members shall be owners of schools licensed under this chapter to teach skills required for hair design.

(b) Two members shall be practitioners, certified under sections 1 to 26 of this 1977 Act, who are graduates of schools licensed under this chapter to teach hair design and who have graduated within one year of the time appointed.

(c) Two members shall be practitioners licensed under sections 1 to 26 of this 1977 Act who have practiced for more than one year preceding appointment.

(d) Two members shall be owners of shops licensed under sections 1 to 26 of this 1977 Act.

(e) One member shall be from the general public.

(3) Each member of the advisory committee shall serve for a term of four years ending June 30.

(4) The members of the advisory committee shall be entitled to compensation as provided in subsection (3) of ORS 345.330.

SECTION 32. (1) Notwithstanding the qualifications of members of the advisory committee specified in section 31 of this 1977 Act, the members of the committee first appointed need not be licensed under ORS chapter 345, graduates of a school licensed

under ORS chapter 345 or certified under sections 1 to 26 of this 1977 Act but may be persons currently holding a valid license or certificate under ORS chapter 690 or 691. Of the practitioner members first appointed to the advisory committee:

(a) Two shall be barbers currently licensed to practice under ORS chapter 690.

(b) Two shall be cosmeticians currently licensed in the class of cosmetic therapy of hairdresser under ORS chapter 691.

(2) Notwithstanding the terms of office specified in section 31 of this 1977 Act, of the members first appointed to the advisory committee:

(a) Three shall serve for terms ending June 30, 1978.

(b) Three shall serve for terms ending June 30, 1979.

(c) Three shall serve for terms ending June 30, 1980.

(d) Two shall serve for terms ending June 30, 1981.

SECTION 33. In addition to the other duties of the Superintendent of Public Instruction prescribed by law, the superintendent shall, at the request of the State Board of Barbers and Hairdressers, determine whether a school teaching hair design, cosmetology or manicure that is not licensed under the provisions of this chapter meets the minimum requirements set by the board for licensing of a similar school under this chapter.

SECTION 34. Sanitary and safety inspections performed in schools licensed under this chapter to teach hair design, cosmetology or manicure shall be conducted by the Department of Commerce.

SECTION 35. (1) In addition to the fees required by ORS 345.080, before issuing any license under this chapter to a school teaching hair design, cosmetology or manicure, the superintendent shall collect a nonrefundable annual inspection fee of $100.

(2) The inspection fee collected under subsection (1) of this section shall be transferred to the Department of Commerce for inspections performed under section 34 of this 1977 Act.

Section 36. ORS 293.110 is amended to read:

293.110. (1) All payments of money into the State Treasury by virtue of any statute providing for, creating, authorizing or continuing any of the funds enumerated in subsection (2) of this section shall be paid into and become a part of the General Fund.

(2) The following funds shall be a part of the General Fund:

[*(a) Board of Barber Examiners' Fund.*]

[*(b)*] (a) Board of Dental Examiners' Fund.

[*(c)*] (b) Forest Patrol Fund.

[*(d)*] (c) Motor Vehicle Fund.

[*(e)*] (d) Oregon State Veterinary Medical Fund.

[*(f)*] (e) State Banking Fund.

[*(g)*] (f) State Institutional Betterment Fund.

[*(h)*] (g) State Library Contingent Fund.

[*(i)*] (h) State Library School Library Fund.

[*(j)*] (i) Tumalo Maintenance Fund.

[*(k)*] (j) All other funds created by law which are not trust funds.

Section 37. ORS 431.130 is amended to read:

431.130. (1) The Health Division shall, in accordance with the provisions of ORS chapter 183, make such rules and regulations as, in its judgment, are necessary for carrying out subsection (2) of ORS 276.990, ORS 418.405 to 418.455, 418.505, 418.515 to 418.530, 418.855, 431.010 to 431.040, 431.060, 431.110 to 431.150, 431.160 to 431.180, 431.310, 431.330 to 431.350, 431.410, 431.420 to 431.460, 433.005, 433.010, 433.106 to 433.155, 433.205, 433.216, 433.220, 433.230, 433.255 to 433.270, 433.340 to 433.390, 433.705, 433.715, subsection (6) of 433.990, ORS 434.260, 434.270, 437.010, subsection (2) of 437.040, ORS 437.140, 437.410 to 437.500, 448.215 to 448.250[,] and 482.141 [*and 690.200*], including rules and regulations concerning the control of venereal diseases and the care, treatment and quarantine of persons infected therewith.

(2) The Health Division may enforce the rules and regulations for the control of any of the communicable diseases by quarantining or by the adoption of such other reasonable measures as seem best for limiting the spread of communicable diseases and for the preservation of the public health.

SECTION 37a. If Senate Bill 83 (1977) becomes law, then section 37 of this Act is repealed.

SECTION 38. (1) Any valid license, certificate or permit to practice as a barber or hairdresser or to practice cosmetology or manicure or to operate a shop that has been issued by the State Board of Cosmetic Therapy or the Board of Barber Examiners under ORS chapter 690 or 691 shall remain valid as issued and subject to the provisions of ORS chapter 690 or 691 and rules adopted thereunder as effective on the effective date of this Act and as enforced by the State Board of Barbers and Hairdressers and the Department of Commerce. When the license, certificate or permit expires and is subject to renewal, the State Board of Barbers and Hairdressers shall renew the license,

certificate or permit in accordance with the provisions for the renewal of licenses and certificates under sections 1 to 26 of this Act.

(2) Any student enrolled in a school regulated by ORS chapter 690 or 691 on the effective date of this Act may, at the election of the student and upon the completion of the training at the school, apply for a certificate as provided in sections 1 to 26 of this Act or may qualify for a certificate by complying with the provisions of ORS chapter 690 or 691 and rules adopted thereunder as the statutes and rules exist on the effective date of this Act.

(3) Any person serving as an apprentice under ORS chapter 690 on the effective date of this Act shall be issued, without charge, a certificate as a practitioner as provided in sections 1 to 26 of this Act.

(4) For purposes of this section, the State Board of Barbers and Hairdressers shall apply the appropriate provisions of ORS chapters 690 and 691 and rules adopted thereunder, as the statutes and rules exist on the effective date of this Act, as necessary.

SECTION 38a. (1) Notwithstanding any other provision of this Act, any school licensed to teach barbering under the provisions of ORS chapter 690 on the effective date of this Act may continue, at the election of the school, to operate under the provisions of ORS chapter 690 and any rules adopted thereunder as effective on the effective date of this Act and as administered by the Superintendent of Public Instruction. If a school elects to become subject to the provisions of this section all aspects of the operation of the school shall become subject to regulation under this section, including, but not limited to, the course of study, admission requirements, teacher requirements and qualifications, teacher licensing and license renewal, requisites for graduation, work station requirements, curriculum and all other requirements for the school.

(2) If a school elects to be regulated according to the provisions of this section, it is not subject to regulation pursuant to any other provision of this Act. Any student attending a school regulated according to the provisions of this section and any teacher teaching in the school are subject to the requirements of ORS chapter 690 and any rules adopted thereunder only while attending or teaching in the school.

(3) No school shall be regulated according to the provisions of this section unless the school so elects before the effective date of the rules adopted by the State Board of Education pursuant to section 39 of this Act. Any school electing to operate according to

this section may at any later time elect to withdraw from the provisions of this section and become regulated as otherwise provided by this Act.

(4) Any license or certificate to teach barbering issued by the Board of Barber Examiners pursuant to ORS chapter 690 before the effective date of this Act shall remain valid and may be renewed according to the provisions of ORS chapter 690 and rules adopted thereunder as effective on the effective date of this Act so long as the holder teaches at a school regulated according to this section.

(5) The Superintendent of Public Instruction shall administer the provisions of this section.

SECTION 39. (1) The State Board of Education shall adopt rules for the regulation and licensing of schools teaching hair design, cosmetology or manicure. The rules shall become effective not later than July 1, 1978.

(2) Until the effective date of rules adopted pursuant to subsection (1) of this section, the Superintendent of Public Instruction shall regulate schools holding valid licenses to teach under ORS chapter 690 or 691 in accordance with the provisions of the statutes and rules in effect on the effective date of this Act.

(3) Students graduating from schools regulated by the Superintendent of Public Instruction under the provisions of this section shall be considered to have graduated from a licensed school for purposes of sections 1 to 26 of this Act.

SECTION 40. (1) Nothing in this Act relieves a person of an obligation to pay a fee or charge or any other liability, duty or obligation owed to the State Board of Cosmetic Therapy or the Board of Barber Examiners. The State Board of Barbers and Hairdressers may undertake the collection or enforcement of such fee, charge, liability, duty or obligation.

(2) The rights and obligations of the State Board of Cosmetic Therapy and the Board of Barber Examiners legally incurred under contracts, leases and business transactions, executed, entered into or begun before the effective date of this Act, are transferred to the State Board of Barbers and Hairdressers. For the purpose of succession to these rights and obligations, the State Board of Barbers and Hairdressers is considered to be a continuation of the State Board of Cosmetic Therapy and the Board of Barber Examiners and not a new authority, and the State Board of Barbers and Hairdressers shall exercise those rights and fulfill those obligations as if they had not been transferred.

SECTION 41. (1) The unexpended balances of amounts authorized to be expended by the State Board of Cosmetic Therapy and the Board of Barber Examiners, from

revenues dedicated, continuously appropriated, appropriated, collected or otherwise available for the purpose of administering and enforcing duties, functions and powers, are appropriated and transferred to the Commerce Administration Account and are available for expenditure by the Department of Commerce.

(2) The Department of Commerce may expend moneys received under subsection (1) of this section for the purpose of administering and enforcing its duties, functions and powers and for the payment of expenses lawfully incurred by the State Board of Cosmetic Therapy and the Board of Barber Examiners to the extent that the money is unexpended on the effective date of this Act.

(3) The Department of Commerce shall assume and pay all outstanding obligations the State Board of Cosmetic Therapy and the Board of Barber Examiners lawfully incurred before the effective date of this Act to the extent that the obligations are properly charged against amounts authorized by this section to be expended by the Department of Commerce.

SECTION 42. ORS chapters 690 (1973 Replacement Part) and 691 (1975 Replacement Part) are repealed.

SECTION 43. This Act being necessary for the immediate preservation of the public peace, health and safety, an emergency is declared to exist, and this Act takes effect July 1, 1977.

Mr. Robert Aaron
c/o House Commerce Committee
Pouch V
Juneau, AK 99811

Dear Bob,

I appreciated your courtesy and interest in calling me on Sunday, March 31, 1980, to alert me about HB 978. Unfortunately, it seems that I caught you at a bad time when I called on April 4, 1980 after meeting with John Mathison.

Bob, I was called on short notice to attend a meeting of beauty shop owners on April 2, 1980. Without any exaggeratio., I have never met with a group of people as unhappy and frustrated over a bill. A number of them expressed the thought that it would be better to have no bill than HB 978. No one expressed any dissent from that view. It is their feeling that if that were to occur, they would have the opportunity for a better bill to be prepared between now and next January; have the opportunity to speak to the candidates and legislators during the same time; have the bill pre-filed for the next legislature; and, hopefully have it passed during the 1981 session.

Since talking to you, I have received the Oregon statute and regulations, and the comments of the President of the Association, Oregon chapter. It is true that they are satisfied with their law and regulations, but it is obvious that the Oregon statute is considerably better than HB 978.

Under the Oregon law, the board is totally different from that in HB 978. The only itenerant practitioner is one who practices on persons physically unable to visit a licensed shop, and for that, the practitioner receives a special certificate of identification.

The Oregon law empowers the Board to control and enforce safety and health standards, to inspect, etc. the bill does not.

The Oregon law is clear on school attendance and certification, the bill is not.

The Oregon law provides for an administrator, the bill does not.

The Oregon law requires certification of manicurists, the bill does not.

The Oregon law has no exemption for communities less than 1,000 people, the bill does.

The Oregon law does not have the abolished barber board members as voting, ex-officio members of the new board; the bill does.

The Oregon law provides standards for shops and schools; the bill does not.

The Oregon law provides grandfather rights for all licensees, the bill does not.

The Oregon law sets up an advisory committee for the regulation of schools by the Superintendent of Schools; the bill does not.

Basically, the Oregon law permits barbers to continue as such, and otherwise abolishes the profession prospectively. It abolished the old barber apprentice provisions, and made all new licensees, in effect, hairdressers. Thus, the higher standards of the hairdressers and cosmetologists were met, school standards were raised, and apprenticeship disappeared. Under the bill, on the other hand, exceptions are created, apprenticeship has no standards for teachers or instructors, and all the substantive aspects of shop and schools are left to regulation, subject to challenge as to statutory authority or sufficiency of guidelines.

It appears to me that the hairdressers and cosmeticians of Alaska would be satisfied with the Oregon law, although it will probably be subsequently further clarified by amendment, except that the Alaska Association would prefer to add a requirement for continuing professional education as a condition of renewal of licenses.

The addition to the board of the power and authority to assess civil penalties (fines) in addition to suspension and revocation would be a further improvement, along with a provision for orders to show cause.

Electrology is a growing field, and could well be included also, as it, too, involves health, sanitation and safety.

It is sincerely hoped that you accept these comments as constructive criticism, and not as picky argument.

Very truly yours,

ROSE & BREEZE, P. C.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M April 16, 1980

SUBJECT: Analysis of objection to HB 978 submitted by Nissel A. Rose (Work Order Number 8453)

TO: House Commerce Committee
Attn: Bob Aaron, A.A.

FROM: Tamara Brandt Cook
Legislative Counsel

You have asked for an analysis of the issues presented in a letter dated April 2, 1980 to the House Commerce Committee by Nissel A. Rose. This memo will address each objection to the bill in the order in which it appears in the letter, and will identify the issue raised according to its number in the letter.

1. Mr. Rose objects to the definition of cosmetology as it appears in HB 978. This definition, although somewhat shorter, is substantially the same as the definition used in the Oregon statute provided to me as a model. I have no basis on which to judge Mr. Rose's assertion that the definition does not follow the meaning of the word generally adopted throughout the nation.

2. Mr. Rose objects to the fact that "hairdressing" is not defined in the bill. "Hairdressing" is not defined in the Oregon bill upon which HB 978 was modeled. However, AS 08.-13.100(b) provides that a person who is qualified to perform hair design may be designated as a "hairdresser" on his license. Therefore, it seems clear that "hairdressing" involves the practice of "hair design." "Hair design" is defined in this bill. However, for the sake of clarity, I would recommend that the word "hairdressing" which appears only once in this bill, in section 08.13.030(c)(2) be replaced by the words "hair design."

3. Mr. Rose suggests that "hairdresser" should be defined. I believe that section 08.13.100(b) which provides that a person licensed to perform hair design may be designated as a "hairdresser" on his license is an adequate definition of the term.

4. Mr. Rose objects to the fact that no standards are set for schools, for teachers, or for curricula. HB 978 provides that the board may set by regulation, standards for curriculum, minimum hours of instruction, physical condition of the facilities, and financial responsibility of the owner. Mr. Rose is correct that the board is given complete discretion in this matter and not provided with any legislative guidelines. The Oregon bill also leaves these matters to the discretion of the occupational board but it also provides that the board must consult with the Health Division and an advisory committee on vocational training exists in Oregon to offer suggestions for standards to the board. Since this bill requires that health and sanitary conditions in schools are to be supervised by the Department of Health and Social Services, I see no need to require the board to consult with that department in adopting regulations for standards applicable to schools. A policy decision must be made as to whether the board should continue to have the discretion to regulate standards for schools and for teaching. If the legislature wishes to impose particular standards, these can be included within this bill.

5. Mr. Rose objects also to the fact that no legislative standards have been provided for the licensing and operation of shops. AS 08.13.070(3) requires that a shop be under the direct supervision of a licensed practitioner. AS 08.13.200 provides that health and sanitary conditions in shops shall be supervised by the Department of Health and Social Services. The Oregon statute provides for licensing of shops but imposes, essentially, only these two standards also. It would seem that requiring a shop to be under the direct supervision of a licensed practitioner would be adequate to protect the public; however, this bill could be changed to incorporate additional standards for shops and to require the licensing of shops.

6. Mr. Rose suggests that the bill is deficient because no inspection of shops or schools is provided for except through the Department of Health and Social Services. The

board currently has no staff to conduct inspections. The Department of Commerce and Economic Development is authorized to conduct investigations for all occupational boards upon its own motion. If the legislature feels that this is not adequate protection for the public, an investigator could be assigned to the Board of Barbers and Hairdressers.

7. Mr. Rose raises questions concerning the composition of the Board of Barbers and Hairdressers. This is essentially a policy issue not a legal issue to be considered by the legislature.

8. Mr. Rose objects to the fact that grandfather rights are provided for barbers but not for cosmetologists. He is correct in this observation, and grandfather rights could also be provided for cosmetologists. This is a matter of policy. However, it is my understanding that cosmetologists were specifically excluded from the clause dealing with grandfather rights because current licensure requirements for cosmetologists substantially meet those set out in HB 978 and, therefore, cosmetologists would presumably have no difficulty in meeting the licensure requirements of this act.

9. Mr. Rose objects to the fact that there is no definition set out for the term "barber" and that barbers licensed originally under AS 08.12 would continue to be subject to that chapter even after it is repealed, which Mr. Rose considers to be unfair. HB 978 contains no definition of "barber" but AS 08.13.100(b) provides that a person licensed under this bill to perform "hair design" may be designated as a "barber" on his license if he chooses. The Oregon statute also provides that a person may choose whether to be designated as "barber", "hairdresser" or as both. Under this act a person who is licensed as a "barber" under the grandfather section is limited to performing those procedures he was licensed to perform under the original requirements, whereas the "barber" licensed under this act is allowed to perform any of the procedures which a "hairdresser" may perform because he has met that more stringent licensure requirement. If the legislature feels that the public needs to be informed of the different standards applied to "barbers", it could simply require that all persons licensed under this act be designated as "hairdressers" on their licenses.

10. Mr. Rose objects to the fact that there is no licensing provided for "barbers" or for teachers. "Barbers" are licensed according to the provisions applied to "hairdressers" under this act. There is no requirement that teachers obtain any special teachers' license, but 08.13.180 requires that a person have a license, temporary permit, or student permit in order to teach. If this does not adequately protect the public, an additional licensing requirement can be imposed on teachers.

11. Mr. Rose feels that AS 08.13.080 is ambiguous. I agree and would recommend the section be changed to read:

> (1) have successfully completed all courses that a school of hair design is required to teach to be licensed under AS 08.13.110, <u>if applying for a license to practice hair design</u>; or
>
> (2) <u>have successfully completed all courses that a school of cosmetology is required to teach in order to be licensed under AS 08.13.110, if applying for a license to practice cosmetology</u>;

12. Mr. Rose objects to allowing licensed practitioners to work outside a place of business or shop with no criteria for these facilities. He points out that it would be virtually impossible to inspect this type of operation. It occurs to me that requiring that people who practice outside of a shop be licensed at least provides the board with a chance to take action upon the receipt of consumer complaints. If this is not considered adequate protection for the public, this provision could be eliminated.

13. Mr. Rose objects to excluding practitioners in communities having less than 1,000 people from the requirements of licensure. This is strictly a policy decision. I feel that there is no question that a person who is practicing without a license under this section who moves to a more populated area would be required to obtain a license in order to continue practicing. Likewise, if the population of the area increased over time so that it was no longer a community of less than 1,000 people, persons who have been practicing without a license would be required to obtain a license.

14. Mr. Rose suggests that 08.13.180 be clarified to reflect the fact that certain persons may practice without a license under the terms of this bill. This could be done by wording the section to read

> A person who practices hair design or cosmetology or operates a school of hair design or cosmetology, or teaches in a school of hair design or cosmetology, without a license, temporary permit, or student permit required under AS 08.13 is guilty of a class B misdemeanor.

15. Mr. Rose points out that the word "affect" at page 8, line 10 should be "effect." This should be changed.

16. Mr. Rose again appears to be objecting to the definition of "cosmetology". This problem has been addressed in item 1.

17. Mr. Rose objects to the requirement which establishes a maximum period of time within which an apprentice may acquire the necessary training. This is a policy question, rather than a legal question; but as I understand it, the statute was specifically designed to preclude people from dabbling over an indefinite period of time and to require a serious commitment towards obtaining a license.

18. Mr. Rose suggests that the bill contain a provision requiring continuing professional education. This is a policy rather than a legal issue, and the bill can be changed to incorporate this suggestion.

19. Mr. Rose objects to the fact that only suspension or revocation of licenses is specifically mentioned as disciplinary powers of the board. AS 08.13.030(c)(3) provides that the board may "do any act necessary to carry out the provisions of this chapter." Under this section the board is given broad authority to censure or reprimand a licensee or to adopt regulations setting fines. I believe that this "catch-all" provision provides the board with an adequate range of disciplinary power; however, possible disciplinary actions open to the board could be specifically itemized. Mr. Rose particularly requests that the board be given the power to issue show cause.

Please contact me regarding any changes which you would like to have made to HB 978.

MEMORANDUM March 4, 1980

TO: Representative Fred Brown

FROM: Elaine Mitchell, Research Analyst

RE: Oregon's Combined Board of Hairdressers and Barbers
Research Request No. 89

Background

In 1977, the Oregon Legislature, under sunset provisions, was considering the activities of various boards and commissions. At that time, there were separate boards of examiners for barbers and for hairdressers. There had been for a number of years, according to one contact, fighting between the two associations over "turf" i.e., which profession would prevail over what services of the industry. There was also a belief among some of the industry that if they didn't come up with a viable proposal, the legislature would "do it for them."

Opposition to the combination of the two boards was voiced strongly by organized barbers. Through the barbers' union, the traditional entry into the profession was via the apprentice-journeyman route. The barbers were opposed to any change in the system and mounted a labor-intensive campaign in an attempt to defeat the legislation to combine the boards.

An organization was formed for the specific purpose of lobbying for a combined board of examiners--to place the hairdressers and the barbers under one examining board. The organization, still in existence, is named The Professional Hair Industry, Inc.

Interview Comments

According to a spokesman for that organization, Wayne Beinert, who is head of the Executive Barbers School in Portland, the combined board is a positive move for the industry in general. It has simplified the licensing procedure by (a) providing for a "one-stop" examination and licensing procedure; (b) eliminating the practical demonstration type examination; and (c) providing for an on-going licensing procedure schedule. Exams are scheduled once a month at designated areas throughout the state; are written exams only; and cover five categories: chemistry, safety, sanitation, use of implements, and state laws.

The administrator of the combined boards, Virginia Honeywell, discussed positive results: reduced paperwork within the administration and reduced cost. The latter will result this year in reduced cost to license applicants from $50 to $30, effective July 1, 1980; examination fees will be reduced from $15 to $10.

Individual licensed shop owners were also contracted. A barber (Eddie Gustamente) was a licensed barber at the time of the combination of the two boards, and is now a licensed hairdresser and barber. He related a positive reaction to the combined boards; and stated that objections by barbers at the time of the legislative consideration were voiced "probably because they were not prepared to get into 'hairdressing.'"

A hairdresser (Ilene Copeland) was a licensed hairdresser at the time of legislative consideration of the combination of the two boards, and is a member of the above named organization which lobbied for the change. She also related a positive attitude for the change, pointing out, in addition to the above comments, that it "has made life simpler for the licensed shop owner."

If you would like additional information, please let us know.

Amendment

HOUSE CS FOR CS FOR SENATE BILL 544
THE BOARD OF BARBERS AND HAIRDRESSERS

The following changes were made by the house regarding CSSB 544:

(1) P. 2, LS. 7-12 (CSSB 544) - The house deleted these lines in the Senate Bill which removes the regulation of fees by the board. The house inserted a fee schedule into statute which we can go along with. In the HCS the fee schedule is added on P. 8/9, Ls. 5/1.

(2) P. 5, LS. 7-10 (HCSCSSB 544) - The house added a section (c) which allows the board to create limited areas of professional licensing of cosmotology by regulation.
The board may not restrict or regulate the fields of manicure or pedicure. Initially the Senate didn't realize that there were only 4 (four) manicurirts in the state. All their equipment and materials can be purchased over the counter and there is no need to regualte these fields. We can go along with this change. Section (c) in the senate bill was changed to (d) in the HCS to allow for this change.

(3) P. 6. LS. 8-10 (HCSCSSB 544) - The house added a sentence requiring a person holding a student permit or temporary permit to have his permit available for inspection when engaged in practice. This goes along with the requirement for display of license of other practitioners as well.

(4) P. 7, LS. 8 - (CSSB 544) - The house deleted [a manacurist] from this section since there is no need for regulation of manacurists. (see (2) above).

(5) P. 9, LS. 9-13 - The definition of manacurist was deleted. (see (2) above)

IN THE SENATE BY THE COMMERCE COMMITTEE

CS FOR SENATE BILL NO. 544

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the regulation of the practice of barbering, hairdressing, and cosmetology; terminating the existence of the Board of Barber Examiners and the Board of Hairdressing and Beauty Culture Examiners; establishing the Board of Barbers and Hairdressers; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08 is amended by adding a new chapter to read:

CHAPTER 13. BARBERS AND HAIRDRESSERS.

ARTICLE 1. BOARD OF BARBERS AND HAIRDRESSERS.

Sec. 08.13.010. CREATION AND MEMBERSHIP OF BOARD. (a) There is created the Board of Barbers and Hairdressers consisting of five members appointed by the governor.

(b) The board consists of

(1) two persons licensed as barbers under this chapter;

(2) two persons licensed as hairdressers under this chapter; and

(3) one public member.

Sec. 08.13.020. TERM OF OFFICE AND REMOVAL OF MEMBERS. Members serve staggered terms of three years at the pleasure of the governor. Members of the board may be appointed to serve no more than two consecutive full terms.

Sec. 08.13.030. POWERS AND DUTIES OF THE BOARD. (a) The board shall exercise general control over the vocations of barbering, hair-

dressing, and cosmetology.

(b) The board shall

(1) examine applicants and approve the issuance of licenses and permits to practice;

(2) authorize the issuance of licenses for schools of barbering, hairdressing, and cosmetology;

(3) set fees for licensing, issuing permits, license and permit renewal, examining applicants and other charges as necessary to cover the operating expenses of the board;

(4) prepare an annual budget to be submitted to the legislature and request appropriations from the general fund, not exceeding the income generated from fees, to cover operating expenses.

(c) The board may

(1) suspend or revoke a license or permit;

(2) on its own motion or upon receipt of a written complaint, conduct hearings and request the department to investigate the practices of a person, shop, or school involved in the practice or teaching of barbering, hairdressing, or cosmetology;

(3) adopt regulations or do any act necessary to carry out the provisions of this chapter.

Sec. 08.13.040. MEETINGS AND EXAMINATIONS. The board shall meet as often as necessary to conduct its business. It shall conduct separate examinations covering each field of practice: barbering, hairdressing, and cosmetology. Examinations shall be given at least twice in every year for each field of practice for which applications for licensure are pending. An applicant may take an examination in more than one field during the same testing session.

Sec. 08.13.050. RECORDS OF THE BOARD. The board shall keep a record of its proceedings related to the issuance, refusal, suspension

and revocation of licenses and permits. The record shall contain the name, place of business, and date of each license and permit issued and shall be open to inspection by the public at all reasonable times. The board shall submit an annual report on its operations to the governor.

ARTICLE 2. EXAMINATION AND LICENSING.

Sec. 08.13.070. LICENSE REQUIRED. A person may not

(1) practice barbering, hairdressing, or cosmetology without a license, temporary permit, or student permit unless exempted under AS 08.13.160(c);

(2) open or conduct a school of barbering, hairdressing, or cosmetology without a license;

(3) operate a shop in violation of AS 08.13.120;

(4) permit a person in his employ or under his supervision who is not exempted under AS 08.13.160(c) to practice barbering, hairdressing, or cosmetology without a license, temporary permit, or student permit;

(5) permit the use of his license, temporary permit, or student permit by another person;

(6) obtain or attempt to obtain a license, temporary permit, or student permit by fraudulent means.

Sec. 08.13.080. QUALIFICATIONS OF APPLICANTS. An applicant for examination must

(1) have successfully completed all courses that a school with a program in barbering is required to teach in order to be licensed under AS 08.13.110 if applying for a license to practice barbering;

(2) have successfully completed all courses that a school with a program in hairdressing is required to teach to be licensed under AS 08.13.110 if applying for a license to practice hairdressing;

(3) have successfully completed all courses that a school

with a program in cosmetology is required to teach in order to be licensed under AS 08.13.110 if applying for a license to practice cosmetology; or

(4) have served an apprenticeship under AS 08.13.082.

Sec. 08.13.082. APPRENTICESHIP. (a) The period of apprenticeship required to qualify an applicant for a license to practice barbering is 1,500 hours. The apprenticeship must be served in a shop approved by the board. The apprenticeship may not be completed in less than nine months from the date of its commencement and must be completed in not more than two years from the date of its commencement.

(b) The period of apprenticeship required to qualify an applicant for a license to practice hairdressing is 2,000 hours. The apprenticeship must be served in a shop approved by the board. The apprenticeship may not be completed in less than one year from the date of its commencement and must be completed in not more than two years from the date of its commencement.

(c) The period of apprenticeship required to qualify an applicant for a license to practice cosmetology is 350 hours. The apprenticeship must be served in a shop approved by the board. The apprenticeship may not be completed in less than six months from the date of its commencement and must be completed in not more than one year from the date of its commencement.

Sec. 08.13.090. EXAMINATIONS AND OTHER REQUIREMENTS. (a) A written examination shall be given to each applicant for examination at a time and place determined by the board. The board may delegate the power of examination to a committee of the board or a board member.

(b) The written examination shall cover subjects designated by the board and shall test the applicant's knowledge of sanitary practices, safety of all procedures, and use of instruments, equipment and chemi-

cals permitted within the field of practice for which the applicant is seeking a license.

(c) The board may by regulation establish requirements for a practical examination for licensure.

Sec. 08.13.100. LICENSE. (a) The board shall authorize the issuance of a license to each qualified applicant who has passed an examination under AS 08.13.090. The license is valid for two years and subject to renewal.

(b) A license shall state the areas of practice (barbering, hairdressing, cosmetology, or any combination) which the practitioner is qualified to perform.

(c) A person holding a current valid license from a board of barbering, hairdressing, or cosmetology in another state or country is entitled to a license under this chapter without examination. An application shall include:

(1) proof of a valid license issued by another licensing jurisdiction;

(2) proof of completed training and working experience which the board finds to meet the minimum requirements of the state;

(3) payment of a credential investigation fee.

Sec. 08.13.110. SCHOOL LICENSE. The board shall adopt regulations for the licensing of schools of barbering, hairdressing, and cosmetology. The regulations shall include details of the curriculum, minimum hours of instruction, physical condition of the facilities, and financial responsiblity of the owner.

Sec. 08.13.120. SHOP LICENSE. The board shall adopt regulations for the licensing of shops. A shop owner will be licensed to operate a shop without examination, but unless he is a practitioner he may not conduct business without employing a manager who is a practitioner.

This section does not apply to a shop located in a community having a population of less than 1,000 people which is not within 25 miles of a community of more than 1,000 people.

Sec. 08.13.130. DISPLAY OF LICENSE. A practitioner shall display his license in a conspicuous location in his place of business. Each shop owner is responsible for the display of the licenses of employees. A practitioner who practices outside of a place of business shall carry his license with him to be shown to persons upon whom work is performed.

Sec. 08.13.140. LAPSED LICENSE. A lapsed license may be reinstated if the license has not been lapsed for a period of more than three years, and all renewal and delinquent fees for the period during which the license has been lapsed are paid.

Sec. 08.13.150. GROUNDS FOR REFUSAL, SUSPENSION OR REVOCATION OF A LICENSE OR PERMIT. The board may refuse, suspend, or revoke a license, student permit, or temporary permit for failure to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board.

Sec. 08.13.160. APPLICATION OF LICENSE REQUIREMENTS. (a) A person holding a valid license to practice barbering under AS 08.12 is licensed under this chapter, and may continue to practice barbering under the conditions imposed by AS 08.12 and the regulations issued under AS 08.12 until the license expires, at which time the provisions of this chapter apply and a license issued under AS 08.12 cannot be renewed.

(b) A person holding a valid license under AS 08.28 may continue to practice under the conditions imposed under AS 08.28 and the regulations issued under AS 08.28 until the license expires, at which time the provisions of this chapter apply and a license issued under AS 08.28 cannot be renewed.

(c) The licensing and permit provisions of this chapter do not apply to

(1) a person practicing barbering, hairdressing, or cosmetology in a community having a population of less than 1,000 people which is not within 25 miles of a community of more than 1,000 people and who uses only chemicals available to the general public;

(2) a shampoo person;

(3) a manicurist.

Sec. 08.13.170. TEMPORARY PERMITS. (a) A person not licensed under this chapter who wishes to practice and teach barbering, hairdressing, or cosmetology temporarily and primarily for educational purposes who is otherwise qualified to practice barbering, hairdressing, or cosmetology as determined by the board shall first obtain a temporary permit.

(b) The temporary permit shall specify

(1) the purpose for which it is granted;

(2) the period during which the holder of the temporary permit may practice;

(3) the place or places the holder of the temporary permit may practice.

Sec. 08.13.180. STUDENT PERMITS. A person attending a licensed school of barbering, hairdressing, or cosmetology, and a person apprenticed to a practitioner in a shop approved by the board shall obtain a student permit. A student permit to practice barbering or hairdressing is valid for two years. A student permit to practice cosmetology is valid for one year. A student permit may not be renewed, but, upon application, the board may issue a new permit to the same person, or extend an expired permit to the date of the next scheduled examination. Credit earned under an expired student permit may be transferred to a new

permit as determined by the board.

Sec. 08.13.190. FAILURE TO POSSESS A LICENSE OR PERMIT. A person who practices barbering, hairdressing, or cosmetology, or operates a shop, or operates a school of barbering, hairdressing, or cosmetology, or teaches in a school of barbering, hairdressing, or cosmetology, without a license, temporary permit, or student permit and who is not exempt under AS 08.13.120 or under 08.13.160(c) is guilty of a class B misdemeanor.

ARTICLE 3. GENERAL PROVISIONS.

Sec. 08.13.200. DEPOSIT OF RECEIPTS. Money received by the board from the payment of fees shall be paid into the general fund of the state.

Sec. 08.13.210. HEALTH AND SANITARY CONDITIONS. Health and sanitary conditions in shops and schools of barbering, hairdressing, and cosmetology shall be supervised by the Department of Health and Social Services.

Sec. 08.13.220. DEFINITIONS. As used in this chapter,

(1) "apprentice" means a person who receives on-the-job training under the direct supervision of a practitioner, who does not receive a wage or commission before he has completed 350 hours of training, and for whose work no charge is made before he has completed 350 hours of training;

(2) "barbering" means shaving, trimming, or cutting the beard or hair of a living person for a fee and for cosmetic purposes;

(3) "board" means the Board of Barbers and Hairdressers;

(4) "cosmetology" means the use of the hands, mechanical or electric apparatus or appliances, cosmetic preparations, antiseptics, or lotions in massaging, cleansing, stimulating, or similar work on the human body for cosmetic purposes for a fee;

(5) "hairdressing" means performing, for a fee, the following services for cosmetic purposes:

(A) shaving, trimming, or cutting the beard of a living person; and

(B) arranging, styling, dressing, curling, temporary waving, permanent waving, cutting, singeing, bleaching, coloring, cleansing, conditioning, or similar work on the hair of a living person;

(6) "manicurist" means a person who uses the hands, mechanical or electric apparatus or appliances, cosmetic preparations, antiseptics, or lotions in massaging, cleansing or similar work on the human hands or trims, shapes or polishes the nails of the human hands for cosmetic purposes for a fee;

(7) "practitioner" means a person licensed to practice barbering, hairdressing, or cosmetology under this chapter;

(8) "shampoo person" means a person who, for a fee and under the supervision of a practitioner of barbering or hairdressing, cleanses or conditions the hair of the human head with products which have no effect other than cleaning or conditioning the hair;

(9) "shop" is an establishment operated for the purpose of engaging in barbering, hairdressing, or cosmetology.

* Sec. 2. AS 08.03.010(c) is amended by adding a new paragraph to read:

(2) Board of Barbers and Hairdressers (AS 08.13.010) -- June 30, 1984.

* Sec. 3. AS 18.05.040(a)(9) is amended to read:

(9) standards of cleanliness and sanitation in connection with the construction, operation and maintenance of a camp, cannery, food handling establishment, food manufacturing plant, mattress manufacturing establishment, industrial plant, school, barber shop, <u>hairdressing</u>

or cosmetology [COSMETOLOGICAL] establishment, soft drink establishment, beer and wine dispensaries, and for other similar establishments in which insanitation may create a condition causative of disease.

* Sec. 4. AS 44.62.330(a) is amended by adding a new paragraph to read:

(47) Board of Barbers and Hairdressers (AS 08.13.010).

* Sec. 5. AS 08.03.010(b)(2) and (4); AS 08.12; AS 08.28; and AS 44.62.-330(a)(1) and (7) are repealed.

* Sec. 6. This Act takes effect immediately in accordance with AS 01.10.-070(c).

STATE OF ALASKA

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M May 2, 1980

SUBJECT: Section-by-section analysis CS for SB 544 (Work Order Number 8541)

TO: Senator Brad Bradley
Chairman, Senate Commerce Committee

FROM: Tamara Brandt Cook TBC
Legislative Counsel

You have asked for a section-by-section analysis of CS for Senate Bill 544 entitled: "An Act relating to the regulation of the practice of barbering, hairdressing, and cosmetology; terminating the existence of Board of Barber Examiners and the Board of Hairdressing and Beauty Culture Examiners; establishing the Board of Barbers and Hairdressers; providing for an effective date."

Section 1. A new chapter is created in Title 8 covering the combined professions of barbering and hairdressing.

Sec. 08.13.010. The Board of Barbers and Hairdressers is composed of five persons appointed by the governor, two barbers, two hairdressers, and one public member.

Sec. 08.13.020. The board members serve staggered terms of three years and may serve no more than two consecutive terms.

Sec. 08.13.030. The board has the following duties:

(1) to exercise general control over the vocations of barbering, hairdressing, and cosmetology;

(2) to examine applicants and approve issuance of licenses and permits;

(3) to approve the issuance of licenses for schools of barbering, hairdressing, and cosmetology;

(4) to set fees as necessary to cover the operating expenses of the board;

(5) to submit a budget to the legislature and request appropriations from the general fund which may not exceed income generated from fees collected by the board.

The board has the following powers:

(1) to suspend or revoke a license or permit;

(2) to conduct hearings and request the Department of Commerce and Economic Development to investigate the practices of the occupations being regulated;

(3) to carry out the provisions of this chapter through adopting regulations or doing any required act.

Sec. 08.13.040. The board is free to meet as often as required. It shall hold examinations in the fields of barbering, hairdressing, and cosmetology at least twice each year. An applicant for licensure may choose the field of practice he wishes to enter, or may choose to be examined in more than one field of practice.

Sec. 08.13.050. The board is obligated to keep records of permits and licenses issued or revoked and to report on its operations to the governor annually.

Sec. 08.13.060. This section prohibits

(1) the practice of barbering, hairdressing or cosmetology without a license or permit unless exempted under this act;

(2) conducting a school of barbering, hairdressing, or cosmetology without a license;

(3) operating a shop without a license unless specifically exempted by statute;

(4) allowing an employee or person being supervised to practice without a license or a permit unless specifically exempted by statute;

(5) permitting the use of a license or permit by another person;

(6) obtaining a license or permit by fraudulent means.

Sec. 08.13.080. There are three separate occupational fields which an applicant may seek licensure in. To qualify for licensure an applicant must have finished the courses that a school with a program in the particular field is required to teach in order to be licensed under this chapter. It is left up to the board to establish by regulation the standards for the licensing of schools. So, the educational requirements set out in this section are not specific, but rather, shall match the requirements which the board sets for schools. In this way, if a person attends a licensed occupational school, he will be assured of meeting the state educational requirements. In addition, an applicant must pass an examination in order to be licensed in a particular field. Separate examinations shall be given for the fields of barbering, hairdressing, and cosmetology. It is also possible for an applicant to qualify for examination through serving an apprenticeship, rather than by attending a licensed occupational school.

Sec. 08.13.082. This section describes the accepted apprenticeship program, which may only be conducted in a shop approved by the board. A person wanting to become a barber is required to receive 1,500 hours of apprenticeship training. The program must last at least nine months and may not be extended past two years. A person who wishes to become a hairdresser must complete 2,000 hours of apprenticeship training in not less than one year and not over two years. A person who wishes to practice cosmetology must receive 350 hours of apprenticeship training over a period of six months but within one year.

Sec. 08.13.090. Each applicant for licensure must pass a written examination covering sanitary practices, safety of procedures used in a particular field, and the use of instruments, equipment and chemicals pertinent to the particular field. The board has discretion to require a practical examination as well through regulation.

Sec. 08.13.100. A license is valid for two years and shall state the field or fields of practice which a person is qualified to perform. A person who is licensed in another

state or country is automatically entitled to a license in this state upon payment of required fees if he has training and work experience which the board finds meets the minimum requirements of this state.

Sec. 08.13.110. Schools of barbering, hairdressing, and cosmetology shall be licensed if they meet standards set by the board. The board must adopt regulations setting standards for licensing, including curriculum requirements, hours of instruction, physical condition of school facilities, and financial responsibility of the owner. Under the broad provision of AS 08.13.030(c)(3) granting the board power to adopt regulations needed to carry out its duties, the board has the discretion to adopt regulations setting standards for school licensure.

Sec. 08.13.120. The board is required to adopt regulations for licensing barber, hairdressing, and cosmetology shops. An owner will be licensed to operate a shop without an examination, however, unless he himself is licensed to practice, he must employ a manager who is. No licensure requirement is imposed upon shops located in communities having a population of less than 1,000 people as long as there is not a community of over 1,000 people within 25 miles.

Sec. 08.13.130. A person licensed under this act is required to display his license or to keep it with him if he is going to work outside of a regular place of business. A shop owner is affirmatively obligated to display the licenses of his employees.

Sec. 08.13.140. A license which has not been renewed for three years may be reinstated after payment of any required fees.

Sec. 08.13.150. The board has discretion to refuse, suspend, or revoke a license or permit for failure to comply with this chapter, with a regulation, or with an order of the board.

Sec. 08.13.160. Persons with valid licenses under existing law are allowed to continue to practice until their licenses expire. At that time, they will be required to comply with the provisions of this chapter and to obtain new licenses. The grandfather clause applies to persons who hold licenses

to practice barbering, and to persons holding any license under AS 08.28, which includes persons involved in the practice of hairdressing and beauty culture, managers, owners, instructors, and schools. Under AS 08.28 managers manicurists were licensed; but since they are no longer required to obtain a special license, the grandfather provision has no practical effect on them. The licensing requirements of this act also do not apply shampoo persons, persons who wash hair while under the supervision of a licensed practitioner. Additionally, no license is required to practice in a community having a population of less than 1,000 people so long as it is not within 25 miles of a community which is larger.

Sec. 08.13.170. A permit is available to a person who wishes to practice on a temporary basis in the state for educational purposes, and who is otherwise qualified. The board determines whether or not an applicant is qualified and a permit must specify the purpose for which the permit is granted, the period during which the holder may practice, and the place or places which the holder may practice.

Sec. 08.13.180. A person attending a school or serving an apprenticeship must hold a student permit. A permit to practice barbering or hairdressing is valid for two years, while one to practice cosmetology is valid for one year. A student permit may not be renewed; but the board has the discretion to issue a new permit to the same person or to extend an expired permit to the date of the next scheduled examination so that a person may continue training while waiting to be tested. If a person applies for a new student permit, the board has the discretion to transfer credit earned under the expired permit.

Sec. 08.13.190. A person who practices barbering, hairdressing, or cosmetology, operates a shop, operates a school, or teaches in a school without a license or permit commits a class B misdemeanor. This criminal penalty does not apply to a person practicing in or a shop located in a community of less than 1,000 people which is not within 25 miles of a larger community.

Sec. 08.13.200. Money generated through fees imposed under this chapter shall be deposited into the general fund.

Sec. 08.13.210. The Department of Health and Social Services is responsible for supervising sanitary conditions in shops and schools.

Sec. 08.13.220. This section defines terms.

(1) "Apprentice" is a person receiving on the job training under the supervision of someone licensed under this chapter. An apprentice may not receive a wage or commission until he has completed 350 hours of training, and no charge may be made for his work until that time.

(2) "Barbering" is shaving, trimming, cutting the beard or hair of a living person for a fee. A person practices barbering only when this is done for cosmetic, rather than for medical, purposes.

(3) "Board" refers to the Board of Barbers and Hairdressers.

(4) "Cosmetology" involves work upon the human body for cosmetic purposes for a fee.

(5) "Hairdressing" differs from "barbering" in that it includes temporary waving, permanent waving, singeing, bleaching, and coloring hair as well as shaving, trimming, or cutting the beard or hair.

(6) "Manicurist" is a person who works upon hands and nails for cosmetic purposes for fee. Manicurists are exempted from licensure.

(7) "Practitioner" is broadly defined to include all persons licensed to practice under this chapter.

(8) "Shampoo person" is a person who cleans or conditions hair under the supervision of a person who is licensed. A shampoo person is exempted from licensure.

(9) "Shop" includes barbering, hairdressing, and cosmetology establishments.

Section 2. The termination date of the Board of Barbers and Hairdressers is June 30, 1984.

Section 3. In order to include hairdressing establishments this section amends a provision which requires the commissioner of the Department of Health and Social Services to adopt regulations setting standards of cleanliness.

Section 4. The Board of Barbers and Hairdressers is added to the list of boards and agencies required to following the adjudicatory procedures of the Administrative Procedure Act.

Section 5. Provisions establishing a termination date of June 30, 1980 for the Board of Barber Examiners and the Board of Hairdressing and Beauty Culture Examiners are repealed; the chapters dealing with those boards are repealed entirely; and those two boards are removed from the list of boards and agencies required to comply with the adjudicatory provisions of the Administrative Procedure Act.

Section 6. The act becomes immediately effective.

If you have any further questions, please contact me.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

DIVISION OF PUBLIC ASSISTANCE

POUCH H-07
JUNEAU, ALASKA 99811

March 31, 1980

The Honorable Glenn Hackney
Chairman, Senate HESS Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Document # 59-80

Dear Senator Hackney:

House Bill 447 proposes terminating the existence of the Board of Nursing Home Administrators on January 1, 1981 and reassigns its responsibilities to the Department of Commerce and Economic Development.

At the time various Boards and Commissions were being considered for "sunsetting" by the Legislature in 1979, it was found that the existence of the Board of Nursing Home Administrators or some similar type of "peer review" system was, by federal law, (U.S. Code 42 Sub-Chapter XIX S. 1396 a(29)) necessary if the State of Alaska was to continue to receive federal fund participation for Medicaid nursing home services.

Federal fund participation is an essential part of the Medicaid nursing home services funding. Nursing home services comprise 70% of the total Alaska Medicaid budget (twenty-nine million dollars) and therefore, approximately fourteen million dollars (50% matching) could be lost in federal fund participation if some type of "peer review" licensing function is not provided for in Alaska Statute.

When viewed superficially, it is difficult to justify the need for, and cost of a statewide, regionally represented, five member Board of Nursing Home Administrators when only approximately 35 licenses have been issued since 1976. However, with approximately fourteen million dollars in federal fund participation dependent upon the state having "either a Board of Nursing Home Administrators or an agency of the state responsible for licensing under the Healing Arts Act of the state" the cost and need is easier rationalized.

What seems needed is a method of administrating the issuance of Nursing Home Administrators licensured through the Department of Commerce and Economic Development while at the same time providing a method of inexpensive "peer review." Some alternatives that we have considered are as follows:

I. Establish the Long Term Care Division of the Alaska State Hospital Association as the board the Department of Commerce and Economic Department must consult with regarding:

a. Promulgating of regulations.

b. Revocation of licenses.

c. Establishment of procedures to insure that licenses uphold standards.

d. Adoption of criteria for educational requirements.

The Long Term Care Division of the Alaska State Hospital Association meets at least bi-annually and at no expense to the State could provide the professional support needed to fulfill federal statute requirements. The Long Term Care Division of the Alaska State Hospital Association is composed of all the nursing home administrators in the State of Alaska.

II. Establish a Board, for federal purposes, composed of state employees who's offices are in Juneau. This type of board should meet during regular working hours and therefore, should be no added expense to the State

a. Director of Occupational Licensing.

b. Director of Public Assistance.

c. Director of Public Health.

d. Director of Nursing Board.

III. The development of a comprenensive healing arts act, which would encompass all healing professions.

IV. Reinstatement of the existing Board of Nursing Home Administrators with appropriate funding and staffing in the Division of Occupational Licensing to accomplish the tasks required.

The Division of Public Assistance opposes House Bill 447 and support the reinstatement of the Board of Nursing Home Administrators. We feel the cost of supporting the operation of such a board are justified when compared to the amount of federal fund participation involved.

Sincerely,

Rod Betit
Director

SENATE HESS COMMITTEE
ASSEMBLY BULDING, ROOM 106
JUNEAU, ALASKA

REF: ~~HOUSE BILL~~ No. 447

SENATE HACKNEY AND MEMBERS OF THE HESS COMMITTEE:

WE HAVE NO BASIC DISAGREEMENT WITH THE APPARENT INTENT OF H.B. #447. HOWEVER, THERE ARE SOME RELATIONSHIPS WITH FEDERAL REGULATIONS THAT MUST BE CONSIDERED SO AS TO PROTECT THE ABILITY OF NURSING HOMES TO SERVE THE ELDERLY AND THE ILL. THE FOLLOWING IS A BRIEF STATEMENT SETTING FORTH THE PROBLEMS AND SUGGESTING A CURE THRU MODEST CHANGES TO THE BILL,

FOUR "KEY" PHRASES DOMINATE OUR DISCUSSION RELATIVE TO ALASKA'S ELDERLY AND ILL CITIZENS:

HEALING ARTS ACT
BOARD OF NURSING HOME ADMINISTRATORS

PROGRAM COMPLIANCE CONTINUANCE
PROGRAM SUPPORT CONTINUANCE

UNDER THE TERMS OF THE FEDERAL SOCIAL SECURITY RULE NO NURSING HOME MAY OPERATE UNLESS IT IS LICENSED - A REQUIREMENT OF THE "HOME'S" LICENSE IS THAT IT BE ADMINISTERED BY A PERSON LICENSED AS A NURSING HOME ADMINISTRATOR.

ONLY TWO OPTIONS ARE AVAILABLE FOR THE LICENSING OF NURSING HOME ADMINISTRATORS:

A- LICENSED UNDER TERMS OF A HEALING ARTS ACT.
B- LICENSED BY A BOARD OF NURSING HOME ADMINISTRATORS.

ALASKA DOES NOT HAVE A "HEALING ARTS ACT". ALASKA HAS A "BOARD OF NURSING HOME ADMINISTRATORS" ABOUT TO BE SUNSETTED.

WHAT ARE SOME OF THE CONSEQUENCES OF NOT HAVING A "BOARD"?
