Alaska State Legislature

Senate

Committee on Community & Regional Affairs

Pouch V
State Capitol
Juneau, Alaska 99811

May 20, 1980

TO: Myrt Charney, Executive Director
Legislative Affairs

FROM: Senator Arliss Sturgulewski
Chairman, Community and Regional Affairs Committee

The Senate Community and Regional Affairs Committee proposes to undertake a project, starting at the end of the second session of the Eleventh Legislature, which would forward the work of the House and Senate Joint Interim Committees completed during the interim between the first and the second session of the Eleventh Legislature. This work will serve to knit together the various threads of studies and policy analysis that will be on-going during the time period prior to the commencement of the First Session of the Twelfth Legislature.

In addition, the Senate CRA Committee proposes to undertake a separate special study that will be beneficial to Senate members during the next session. A full project description has been developed and is attached, along with background material and the budget breakdown. The project is estimated to cost $32,144.

I would appreciate it if you would take the necessary steps to process this request for the committee. I also would appreciate receiving, as soon as possible, specific information regarding office space and other incidental arrangements.

Your assistance is appreciated.

cc: Senator Tillion
Senator Hohman

Enclosure

PROJECT PROPOSAL

The Senate CRA Committee proposes to undertake a project, starting at the end of the Second Session of the Eleventh Legislature, which would forward the work of the Joint Committees during the previous interim and would knit together the various threads of studies and policy analysis that will be on-going during the time period prior to the start of the First Session of the Twelfth Legislature.

The project which we propose and the projects which will be taking place during the same time share several goals: a concern for realization of the constitutional goal of maximum self government and local self determination, and the recognition that the state's changing economic climate calls for exploration of alternative approaches to achieving maximum self government and local self determination through new approaches to financial and other resources.

The committee proposes to undertake the following tasks:

1. As described in the background material, the committee believes that it is important to provide legislative interface with the efforts of the Department of Community and Regional Affairs and to forward their study results by developing any appropriate legislation. In order to provide the necessary coordination and efficiency of efforts, we foresee staff work in the execution of the Department of Community and Regional Affairs project, participation in the work of the Task Force and development of any appropriate legislation. These efforts will also be connected with committee efforts regarding the financing of services in the unorganized borough.

2. Concurrently with and as a supplement to agency efforts and studies regarding the financing of services in the unorganized borough, the Senate CRA Committee proposes to evaluate this question in terms of local tax base and incentives to borough formation in terms of the effects of the building of the gasline on local governments. The legislature, in its capacity as assembly of the unorganized borough, should be aware of the effects of the building of the gasline on both state and local revenues and the potential revenues of new boroughs.

To supplement existing studies, the committee proposes to prepare a study on the effect of the gasline on local governments. We will assume that the existing statutory framework of the oil and gas properties tax remains unchanged and examine the range of possible taxes along the pipeline corridor. These assumptions will be tested against and compared with the history of taxation in organized areas such as the North Slope Borough and the Kenai Peninsula Borough. Further, we intend to explore the disparities that might be created between funding levels in the pipeline boroughs and potential boroughs and the tax bases of other areas of the state. An analysis will be prepared of the implications of the statistical information about tax bases and resources necessary for the provision of minimal governmental services. An array of alternatives will be explored that address the conclusions reached in previous sections of the project and recommendations for any appropriate legislation will be made. It is foreseen that parts of this work, especially statistical analysis, will be provided by House Research and by the staff at Legislative Finance.

This project will not only supplement the efforts described in (1) above, but will also provide additional information for future revisions of SB 348 and SB 350 and such other legislation introduced during this session as SB 488.

3. Closely related to the area of financing of local government is the way in which governmental services are structured and the relationship of local governments to the state government. These relationships are embodied in AS 29, the title governing Municipal Government. Both the House and Senate CRA Committees, recognizing the considerable public desire for a revision on Title 29, have introduced a proposal to involve a variety of local government interests in the preparation of a revision of Title 29. Funding has been separately requested for this project which would consist of funds to Legislative Legal Services, one of the major proponents of revision of Title 29, for the following:

> Two groups would be selected from recommendations provided by legislators, the Department of Community and Regional Affairs, Alaska Municipal League and other interested and affected parties. The first group would be a policy advisory group composed of a variety of perspectives and interests, representing the diversity of local governments across the state, and would include a representative of the legislature. The second, a much smaller group, would be working group, composed of people who have had experience in the appplication of AS 29. The work group should consist of municipal attorneys, representatives of the Department of Community and Regional Affairs and the Department of Law, as well as a staff member of Legislative Legal Services; other municipal staff functions should also be represented, such as managers or clerks. While the actual technical work would be conducted by the working group, the policy group would provide overall guidance and assistance on policy questions.
>
> Administrative and secretarial responsibility would rest in Legal Services. In order to support this project funds would be required for travel and per diem. Most local governments will be glad to contribute staff time to this project. However, for both the policy the the working group it will be necessary to provide travel funds. As often as possible, teleconferencing will be used to reduce travel needs and to expedite the process.

The Senate CRA Committee feels it would be beneficial to participate in this project to revise Title 29, especially in terms of the variety of policy issues regarding local government, borough government formation and financing of governmental services. This effort would provide coordination between the projects described in (1) and (2) above and would insure that the committee is knowledgeable and able to carry forward and explain the proposed revisions to other members of the legislature. All that will be required for this component of our proposal is staff time and travel and per diem.

4. Related to the issues and projects described above is a fourth area that has been of concern to the CRA Committee through its previous work during the interim. To summarize the background material provided in this proposal, local governments and rural people have identified a variety

of problems involving the construction of capital projects. For example, there is considerable difficulty in many areas of the state with collection of sufficient funds to provide the local match requirement placed on many projects by the state and federal governments. The Second Session of the Eleventh Legislature has seen increased interest in the funding of capital projects. Increased revenue sources have meant increased interest in using general funds for capital construction, rather than bonding processes formerly employed. At the same time, there has been considerable dissatisfaction with the performance of the Department of Transportation and Public Facility as the state's prime builder of capital projects. This dissatisfaction has been intensified by the desire to use capital projects as public works projects in order to buoy the state's economy during the current downturn. Legislative Budget and Audit is currently auditing the Department of Transportation and Public Facilities in their capacity as managers of the state's capital projects. It is anticipated that management recommendations will be presented.

Legislative action during this session has been marked by the desire to identify and fund projects. However, there have also been other initiatives which have been taken. Senate Bill 546 and House Bill 1010 propose a Capital Construction Fund which would allocate to all areas of the state an entitlement that could be used for the construction and maintenance of capital projects. There are several interesting features to this bill, including a planning provision which seeks to improve and expand upon DOTPF's Chapter 168 responsibilities. Similarly, SB 488 seeks to establish a capital planning process to improve existing DOTPF functions.

During the same time period, an audit has been performed by the Legislative Budget and Audit Committee to examine any management problems within DOTPF insofar as capital projects are concerned.

It is the purpose of this project to explore the above set of interrelated capital construction issues and concerns: capital project planning, capital project funding, and DOTPF's relationship to capital projects. A paper will be prepared which identifies existing practices and existing problems associated with those practices; alternative solutions which address those problems will be discussed and evaluated by criteria which will be set forth in the paper.

BUDGET

The following budget is based on the assumption that the Second Session of the Eleventh Legislature will complete its business in June and that Legislative Affairs Agency will be able to provide (per information from Mr. Charney) office space and telephone service.

Staff salary, including 26% benefits	$19,404
Temporary secretarial service totalling 30 days	1,740
Travel & per diem AS 29 CRA Revenue Capital Construction	7,000
Contractual Printing	4,000
TOTAL	$32,144

BACKGROUND

Alaska's Constitution establishes the policy of maximum self government for the people. This policy has been implemented through creation of boroughs and cities in urban areas and in some rural communities. However, the vast bulk of Alaska lacks any basis for self-government, and the people do not even have the means for planning and participating in the affairs of their own region. It is this problem that provided the principal focus for the interim work of the Senate and House Community and Regional Affairs Joint Local Government Study of 1979.

Legislative proposals of the Joint Committee were derived from (1) a series of studies and analyses sponsored by the committee, (2) a two-day symposium designed to define issues and problems and suggest policies and directions, and (3) a series of public hearings held throughout rural parts of the state.

The Joint Committee found wide consensus in favor of a maximum measure of self-determination and self-rule, and establishment of regional units throughout the state to provide a basis for planning and program coordination. At the same time, the people do not want to rush into formal governmental organization; nor do they want it mandated.

Accordingly, the Joint Committee has developed an evolutionary approach that will provide people in rural areas with the means for self-government without forcing anything upon them prematurely. Choices and initiatives are left with each region.

CSSB 348 and CSSB 350 are two of the bills developed by the Joint Committee. CSSB 348 divides the unorganized borough into "unorganized boroughs" using the boundaries of the Regional Educational Attendance Areas (REAAs). Public hearings are held in each REAA by the Commissioner of Community and Regional Affairs and provision is made for adjustment of the boundary lines.

Each unorganized borough is eligible for regional planning program funds to study the economic, social, and environmental conditions of the area and the interrelationships between governmental units along with an examination of the feasibility of borough organization. No one is required to either undertake a study or form a borough. $25,000 plus $25 per capita is available to each unorganized borough for each of three years for regional planning programs.

Further, Title 29 is amended allowing for the incorporation, by petition to the Local Boundary Commission, of unorganized boroughs as home rule municipalities. Adoption of a home rule charter would require a majority vote both inside and outside of incorporated municipalities. Nothing in the bill requires the incorporation of a home rule borough or borough of any class. Rather, this section broadens the options currently available to residents in the unorganized borough.

CSSB 350 addresses certain responsibilities of executive departments important to the implementation of CSSB 348. State agencies are required

to collect data and information according to unorganized borough boundaries so that regional information will be available to local people and to the legislature. Certain exemptions are permitted. State agencies are also required to conduct program planning and management according to unorganized borough boundaries to facilitate coordinated service delivery. Combinations of unorganized boroughs for program planning and management purposes are permitted. Direct service delivery costs will be made available according to unorganized borough boundaries.

The Division of Policy Development and Planning (DPDP), Office of the Governor, is required to develop a data information system to facilitate state agency data collection and retrieval. Further, DPDP is required to report to the legislature alternatives and recommendations for improving coordination in state service delivery.

During the session, there has been considerable interest in these bills. A number of people have testified at hearings or have discussed the bills with the committee or its members. Due to interest in this legislation and to the complementary effect of recent developments in coastal zone management, the DCRA is initiating a study of the unorganized borough.

The Unorganized Borough Study (UOB) will include, (1) a series of "gatherings" or individual interviews with key residents in the unorganized borough to discuss and document problems and issues with planning and other service delivery in the unorganized borough; and (2) a working task force of Alaskan and non-Alaskan experts in public administration, finance and law to propose and examine solutions to key problems related to local and regional government and planning in the unorganized borough. A key product will be the identification of planning and management options for the unorganized borough and the evaluation of each option against the following criteria:

a. Costs and Incidence of Costs: There will be costs associated with any planning or management options. It is important that the total costs be assessed for each alternative; it is equally important to identify all entities directly and indirectly absorbing the costs.

b. Availability of Funds: One elementary requirement for any successful planning effort is financial resources; the funds may come from grants, tax revenues, revenue sharing, or some other source, but they must be available for both the development and implementation of a plan. All alternatives for the availability of funds should be evaluated for all stages of the planning program.

c. Availability of Staff: In line with funds, planning efforts will need and must have easy and continual access to capable staff resources for both plan development and implementation tasks.

d. Existing or Politically Feasible Mandates: The viability of a planning structure or program for Alaska's unorganized borough is largely dependent upon a mandate for that planning program. A mandate may occur in a number of ways: a legislative act, an administrative act of the Governor, public referendum or local election, or through a state agency program or regulation.

e. Public Acceptability: Akin to political feasibility is the need for public acceptability of a planning or management option.

f. Quality of Service Delivery: This a multi-faceted criterion; the quality of service delivery depends on a number of things, many of which are included in the other criteria. The objective, however, is not to repeat previous analysis, but to consider whether or not the planning alternatives are based upon "logical" planning units and how they will affect other public services and service areas.

g. Implementation Authority (planning options only): In almost all cases, a plan is only as good as its implementation. Therefore, an effective planning structure or organization must have appropriate implementation authorities and powers.

It is envisioned that this project would have a legislative liaison, employed by the legislature to monitor the study, participate in policy analysis and deal with legislation that might be developed by the task force conferences. Coordination of studies regarding service delivery that are envisioned in CSSB 350 and avoidance of duplication of legislative efforts of the interim involves a staff position funded by the legislature to follow the unorganized borough study, to assess and design in conjunction with DCRA studies to supplement or complement the unorganized borough study.

Partially as a result of the Joint Committees' work during the interim, a resolution was introduced on both the House and Senate sides, calling for a revision of AS 29. Since the time of original enactment, changes in the statutes, problems in its application, and policy questions of importance have been noted by municipal attorneys, city managers and clerks, and other municipal officials. Additionally, representatives of the unorganized areas have noted certain structural inflexibilities of AS 29 and certain unresolved policy questions, such as the function and role of IRA councils and property tax exemptions. The legislature needs to be aware of these and other policy issues and to be prepared for future discussions of these policy issues at hearings during the next session and on the floor when legislation is discussed. For more background on this subject, please see the attached memorandum of March 31, 1980 to Senator Tillion.

As a result of information received by the Joint Committees during hearings held throughout the state, the CRA Committees introduced legislation proposing a Capital Foundation Fund.

Among the items learned by the Joint Committees was that not all projects are equally needed. Experience indicates that some percentage of capital projects include ones no one wants to see built, other projects whose operation costs will be so high that local people will reject them, others for which maintenance funds are not available. Some of these projects duplicate facilities that exist; some are a source of community conflict as they are only desired by some special interest group. Many are proposed because communities want to get their economies moving; but local people do not always work in them.

While this year's capital budget is the largest in Alaska's history, we all recognize that the state has long been in the local construction

business. And the state will continue in this role because state government has greater revenues than local governments, and because there is a need throughout the state for facilities of all sorts and for public works projects to affect economic goals.

Recognizing this reality, both House and Senate Community and Regional Affairs Committees have introduced legislation (HB 1010 & SB 546) which seek to systematize the capital construction process by providing for local capital improvements planning and local determination of construction priorities. Equity concerns have led us to propose a system that is similar to revenue sharing entitlements, except that, in addition to organized areas receiving funds, unorganized areas also receive entitlements.

The Capital Foundation Fund will, by appropriation, provide funds to all areas of the state for certain capital improvements. To expend funds, each area will need to develop an areawide capital improvement plan, approved by he local assembly when there is one, and by advisory groups assisted by the Department of Community and Regional Affairs when there is no local government.

Organized boroughs, unified home rule municipalities, and unorganized boroughs are encouraged to conduct regionwide planning to avoid costly duplications of capital projects and to prioritize, on the local level, needs among communities, rather than leaving this process to state level government.

Each area, so long as appropriations are made, is certain of a source of funding for local projects. Each area will receive a formula share of the appropriation. This stability will be advantageous to local governments for planning pruposes. Additionally, unlike the current situation, areas may have greater ability to use capital projects for anti-cyclic economic benefits by being in control of fund expenditures. Annual funds do not lapse and may be accumulated for locally determined purposes. Home rule municipalities and organized boroughs expend funds themselves. In unorganized areas, the Department of Transportation and Public Facilities is responsible for fund expenditures. Local governments, under the Capital Foundation Fund program, will be assured of a steady supply of state funds for capital improvements that will be directed toward locally determined project needs and can be expended at a locally determined pace.

Capital Foundation Funds may be used as the local match required for certain state and federal projects. This will be particularly significant in rural areas which do not now have a source of local match.

Capital Foundation Fund entitlements may be used for any priority established by the capital improvement plan in the following classes: libraries, cultural recreation, health and community facilities; neighborhood parks; emergency detension facilities; water, sewer, solid waste and resource recovery facilities; and a variety of transportation facilities, such as local transit facilities and equipment.

As explained in the next section of this proposal, additional work is needed regarding capital construction.

At the heart of much of the concern of rural people regarding future formation of boroughs is a concern for the ability of communities to generate sufficient revenues to sustain local government and local governmental services. One of the areas that the Joint Committee initiated work in was the area of local government funding and fiscal resources. Unfortunately, this topic was not fully explored, and the committees felt that it was inappropriate to introduce legislation at that time. However, it is clear from all the testimony received and from preliminary work done during the interim that this issue lies at the heart of steps that can be taken to foster local and regional government in the unorganized borough. The Department of Community and Regional Affairs will be studying one part of this issue in their unorganized borough study. The legislature should not only participate in that study, but we can supplement those efforts to provide a more concrete understanding of the causal connections between revenue sources and borough government formation. Some of those relationships are clearly demonstrated in the work done by Darbyshire and Associates on the feasibility of the formation of a Yukon Flats Borough. There are, however, especially in the light of building the gasline, several policy issues that require legislative attention. A discussion of several of these policy issues was prepared for the committee by consultant Vic Fischer. A copy of his report is attached to this proposal. The focus that the Senate CRA Committee feels would be most useful at this time is the one centered on the development of "pipeline" boroughs.

Senator Tim Kelly
Senator Pat Rodey
Senator Terry Stimson

FROM: Senator Arliss Sturgulewski
Chairman

SUBJECT: Committee Meeting

Thursday, May 22, 1980 - 8:30 a.m.

Assistant Secretary Donna Shalala and Deputy Assistant Secretary David Garrison of the U.S. Department of Housing and Urban Development will be in Juneau May 22. They have indicated interest in meeting with our committee. I have arranged for a meeting at 8:30 a.m. on that date in the Butrovich Room for our committee members and members of the House Community and Regional Affairs Committee. Discussion will involve perspective on present and future Alaskan housing and community development issues and other revelant concerns. This should be an interesting and informational meeting and I welcome your participation.

Senator Arliss Sturgelewski
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgelewski:

Thank you for your interest in meeting Assistant Secretary Donna Shalala and Deputy Assistant Secretary David Garrison. Your perspective on present and future Alaskan housing and Community Development issues promises to be very valuable to Dr. Shalala and Mr. Garrison's understanding of the State and their ability to respond appropriately. As confirmed over the phone, Assistant Secretary Shalala and Deputy Assistant Secretary will be meeting with you at 8:30 a.m., Thursday, May 23rd in your office.

To assist your preparation for this meeting, I am enclosing biographies on Dr. Shalala and Mr. Garrison, a copy of a recent interview with Assistant Secretary Shalala and another Deputy Assistant Secretary (Dr. Stegman), background materials on the Policy Development and Research Division and HUD programs, and a copy of the Shalala/Garrison itinerary.

Again, thank you for your interest in participating in this visit.

Sincerely,

John Duffy
Area Manager

Reservation at Hilton (586-6900)

Friday May 23rd

7 AS #60 to Seattle

9:50 Arrive Seattle

Flight to Cleveland, Ohio

Shalala/Garrison Visit

Tentative Itinerary 5-8-80

Sunday - May 18th

Shalala
Arrive Fairbanks 10:35 p.m. - AS #99 (Possible airport meeting with Regional Administrator during Seattle layover.)

Garrison
Arrive Fairbanks 4:40 p.m. - AS #95

Reservation at Travelers Inn (456-7722)

Monday - May 19th

9-12 - With Vice Chancellor Mather et al (479-7314)

12-1:30 - Possible lunch with Mayors Carlson, Wood and City Manager Droz

2:30 - WC #63 to Kotzebue

2:40 - Arrive Kotzebue
-OPEN- (see Tuesday below)

3-5 - NANA Regional Strategy

Reservation at Nu-Luk-Vik Hotel (442-3331)

Tuesday May 20th

8:00 - NANA Housing Authority (442-3311)

- Bush visit to HUD sites with Sheldon

12:00 - Lunch with John Schaeffer

2:00

3:20 - WC #64 to Anchorage

5:50 - Arrive Anchorage

6:30-8 - Dinner with Duffy, Pavolka, Robinson and Chase

8-10 - Tour of City with Duffy, Pavolka, Robinson and Chase

Reservation at Westward Hilton (272-7411)

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT
WASHINGTON, D.C. 20410

OFFICE OF THE ASSISTANT SECRETARY
FOR LEGISLATION
AND INTERGOVERNMENTAL RELATIONS

IN REPLY REFER TO:

POLICY DEVELOPMENT AND RESEARCH DIVISION

Assistant Secretary - Donna E. Shalala

Deputy Assistant Secretary
for Policy and Program Development - David F. Garrison

Deputy Assistant Secretary
for Research and Demonstration - Michael A. Stegman

Deputy Assistant Secretary
for Economic Affairs - Elizabeth A. Roistacher

Under the Housing and Urban Development Act of 1970, the Assistant Secretary for Policy Development and Research undertakes programs of research, studies, testing and demonstrations related to the HUD mission. These functions are carried out through grants to and contracts with industry, non-profit organizations, educational institutions, and through agreements with State and local governments and other Federal agencies.

In meeting the goal of providing housing to meet national needs, research and technology programs include experiments to test the feasibility of providing direct cash assistance to needy families for rental or homeownership payments; studies of fair housing and equal opportunity practices; investigations of property disposition approaches; development of techniques to lower or stablize the costs of housing production, financing, management and the costs of Government subsidy programs; programs to increase housing safety and security, including reducing the hazards of lead-based paint and improving mobile home safety; programs concerned with the problems of housing deterioration and neighborhood decay, including assessments of promising approaches to housing and neighborhood preservation, such as urban homesteading and the fostering of local resident-business-government partnerships; activities to increase State and local government capabilities through the development of improved revenue generation and allocation practices, better methods for the guidance of economic and community growth, and development of ways to increase productivity in public service delivery systems.

In addition research related to the conservation of energy and natural resources, including solar energy, and geological problems in community development are supported, as well as the continued collection and analysis of economic and financial data essential to HUD policy and program development and evaluation. The largest single project in this area is the Annual Housing Survey undertaken to measure changes in housing inventory and to complile data on the physical condition of housing units and the characteristics of the occupants in both urban and rural areas.

Biography

Donna E. Shalala

Assistant Secretary for Policy Development and Research

Donna E. Shalala was nominated Assistant Secretary for Policy Development and Research by President Jimmy Carter on March 21, 1977, and confirmed by the Senate on April 7.

A research scholar and specialist in State and urban government and finance, with extensive published writings, Ms. Shalala came to HUD after a teaching career at Columbia, Yale Law School, the City University of New York and Syracuse University.

A member of Phi Beta Kappa, Ms. Shalala is a recipient of several other honors, including election in 1976 to the National Academy of Public Administration, L.H.D.'s from Marymount Manhattan and Russell Sage College, the American Association of University Women's Young Scholar Award and a Guggenheim Fellowship. Ms. Shalala, in 1975, was named Director and Treasurer of the Municipal Assistance Corporation (Big Mac), the agency created to solve New York City's financial problems.

Before coming to HUD, her civic activities included Vice Chairwoman of the Citizen's Union of the City of New York, and member of the boards of the Regional Plan Association, World Education Inc., the Council on Municipal Performance, and the National Municipal League.

She has also been consultant to numerous research and study groups, including the Connecticut Commission to Study School Finance and Equal Educational Opportunity, the American Jewish Committee's National Project on Ethnic America, and the Ohio Commission on Local Government Services.

A native of Cleveland, Ohio, Ms. Shalala received a bachelor of arts degree in 1962 from Western College for Women, Oxford, Ohio, and M.A. and Ph.D. from the Maxwell School of Citizenship and Public Affairs, Syracuse University, in 1968 and 1970, respectively. She served as a Peace Corps Volunteer in Iran from 1962-64.

EDUCATION

1970 - LLM, Urban Law Institute, George Washington University National Law Center, Washington, D.C.

1968 - J.D., George Washington University National Law Center, Washington, D.C.

1965 - B.A., Amherst College, Amherst, Massachusetts, political science major.

EMPLOYMENT

March, 1977 to present - Deputy Assistant Secretary for Policy Development, Office of Policy Development and Research, Department of Housing and Urban Development; supervise four divisions -- Policy Development, Policy Studies, Government Capacity Building, and Product Dissemination and Transfer.

March, 1975 to March, 1977 - Budget Analyst, Budget Priorities Staff, Committee on the Budget, House of Representatives, Washington, D.C.; areas of specialty -- housing, community and regional development, law enforcement and justice, revenue sharing, state and local government.

November, 1970 to March, 1975 - Legislative Counsel, Office of Federal Relations, National League of Cities and United States Conference of Mayors, Washington, D.C.; areas of specialty -- housing, community development, comprehensive planning, relocation.

October, 1969 to November, 1970 - Assistant Director, Housing Advisor, Center City Community Corporation (OEO-CAP funded Neighborhood Development Center), Washington, D.C.

September, 1968 to October, 1969 - VISTA Volunteer Attorney, Urban Law Institute and Neighborhood Legal Services Program, Washington, D.C.

June, 1965 to July, 1968 - Staff Assistant, Congressman F. Bradford Morse (5th Massachusetts District), U.S. House of Representatives, Washington, D.C.

BAR

Admitted to practice, District of Columbia, May, 1970.

Assistant Secretary Donna E. Shalala

Meeting the Policy and Research Challenge

Scene: A small round table in the office of Donna E. Shalala, Assistant Secretary for Policy Development and Research (PD&R).
Time: September 24, 1979.
Speakers: Dr. Shalala and her Deputy Assistant Secretary for Research, Dr. Michael Stegman.

Shalala: What has been our greatest challenge? I'd have to say making research relevant to policy. Timing alone is a significant part of the problem. You see, in addition to discipline and organization, research often requires advanced planning, and that is not conducive to the policymaking process, which marches to its own drum beat. Getting the two together is a very complicated task.

The second problem in making research relevant to policy is having the people who know the research findings in the room when the policymakers are making the decisions. That again becomes a timing issue. It's a personnel issue too. Simply finding good researchers who are sensitive to policy questions is difficult.

I've been particularly fortunate in locating such people. Elaine Ostrowski, for example, the new head of our Housing Management Division, has been a senior staff member and a director of public housing authorities. And Mike Stegman here also has a practical background in housing and research. Finding people who have a very special mix of practical experience as well as research experience means that we get closer to putting policy and research together.

Stegman: Another challenge we are trying to meet is increasing our ability inside PD&R to help formulate the questions that are then researched.

Inside HUD, for example, we are attempting to consolidate our research activities around a set of fundamental policy issues that characterize the Department's short- as well as long-term interests. Within each of these broad policy areas, we can design our research projects with some sense of how a project relates to the one just finished and how next year's work can build upon this year's efforts.

Consistency in the research framework developed around a particular problem allows us to build knowledge as we carry out our projects. Before, we were asking too many specific questions, parceling out our work across a great many contracting organizations, each of which had its own way of carrying out its work. As a result, we would end up with a large number of unrelated work products which reflected incompatible and inconsistent assumptions. Now we are trying harder to maintain consistency in our work and stay closer to our research agenda.

Shalala: But it's not enough just to set up a research agenda. What we do is ask the program managers to tell us what their

Deputy Assistant Secretary Michael Stegman

major problems are. Then it is up to us to frame the research questions and design the research around them. While we do that, we have to have a general sense of how long the program people can wait for the answers. This Department faces a lot of major research problems that would take us years to answer. Therefore, they may not receive as high a priority as some other questions that we can get faster answers to, answers that might improve the quality of a program incrementally.

Stegman: Take our Urban Homesteading Evaluation. We were able to produce on a timely basis estimates of the number of homesteaders participating in our program, the costs of rehabilitation, and the financing mechanisms being used. And our program people need to know these things as soon as possible. But the long-term impacts of the homesteading program – the effect of homesteading on neighborhood stabilization and on neighborhood reinvestment – these are longer term questions. These short- and long-term questions and issues are all being dealt with in the same consistent research framework.

Shalala: One of the valuable spinoffs of this approach is that we are answering things as we go along. We are learning strategies as we go along. Rather than saying that this is a good program or a bad program – because we finally realize that programs are complex and it's not easy to say yes or no, thumbs up or thumbs down – what we are learning are strategies that make programs work better and how, when you mix them up together, they can help toward neighborhood revitalization. Using those resources, what combinations seem to be more successful in what kinds of cities than other kinds of combinations?

Another way we've met the challenge of making research relevant to policy is to assume that there is no *single* way to put together policy and research. We have used every avenue we can think of. From the institutional side we have, for instance, introduced the Indefinite Quantity Contract. This is a budget process that allows us to keep a number of consulting firms and institutions around the country on tap for short-term projects. This is a strictly competitive award, but because it is ongoing it allows us to cut down the turnaround time when someone asks us to come up with a paper or a piece of analysis. We have a new small grants program that is also going to allow us a quick turnaround.

In other words, we have not accepted the fact that it has to take 180 days to award a contract on a piece of research we need an answer to in 30 days. As far as I can tell, we have used every legal personnel innovation available in this Department or in the Federal Government to expand and change our staff. For example, PD&R has had 700 personnel actions in the last year. Our people are topnotch, so some of these actions are promotions and things like that. But 700 actions for an office of some 200 people means we have been bringing lots of people in here, for 2 weeks, 2 months, 2 years to help us to do different kinds of things. While we have not been able to expand our ceiling, we have been

able to make all kinds of temporary appointments to give our permanent Civil Service – our chiefs – some Indians to work with.

We are really innovating in PD&R. From my discussions with my counterparts in other agencies, it's pretty clear that we are leaders in the area of building a real in-house capacity as well as tying that directly to our external research.

Stegman: Let me give an example of rapid turn around and the tailoring of staff and procurement procedures to respond quickly to important policy questions. The 1979 House/Senate conference report requires HUD to report to the Congress on the extent and impacts of condominium and cooperative conversions on low- and moderate-income families and on the supply of low- and moderate-income housing in cities across the country. The report is due 6 months from the date of enactment of the legislation. If we were to use traditional procurement procedures to secure the necessary survey assistance to carry out our work, we would just about get a contract signed by the time the report is due to Congress.

But we're not going that route. In addition to the Division of Special Studies here in PD&R, which is a group of 12 to 14 professionals who are going to be working on this study full time, we have negotiated a couple of survey task orders with the Research Triangle Institute in North Carolina, which is one of our Indefinite Quantity Contractors.

RTI will carry out a national telephone survey in 80 or so cities across the country to get a sense from policymakers, professional planners, and others about the nature of the problem and the extent of conversion activity in their cities. And in a smaller sample of cities, RTI will conduct intensive field surveys of households that actually live in converted buildings or buildings slated for conversion. We will even try to track a small sample of families that previously occupied converted buildings. Our ready access to quick response contractors gives us the capacity to analyze on site, in a reasonably broad range of cities, what the actual problems are.

There is no way we could do that using traditional contract instruments. As a result, we should be able to provide to the Congress at the end of that 6-month period the best possible estimates of the extent and impacts of conversion activities across the country.

Shalala: It's this new speed and flexibility that now allows HUD research to meet policy and program needs. We are also challenged by the need to anticipate questions. We have to anticipate the short-term questions our colleagues who run the programs need answered, and simultaneously we try to anticipate the questions that are going to arise a year from now.

For example, no one could be prouder than we are that when the President started to move on energy questions we were just completing a major national study on the cost of retrofitting all the public housing stock in this country. So when the Under Secretary turned to us and asked if we had any idea what it would cost to really retrofit the entire public housing stock, we could in fact answer the question.

When he was the Under Secretary, Jay Janis liked to say that the importance of PD&R is that, without us, the Department would go into the future with a paper bag over its head.

Being able to anticipate amounts to having a sense of what the future issues are going to be. And we get that not by just sitting down with researchers but by discussions with the program people too. And it requires being able to read trends and sense the problems that are beginning – whether it's the interim property issue in New York City, the energy crisis building up, or one of my pet projects, water conservation. I think there is going to be a water shortage in the future, and we want to make sure that everything we know about what can be done inside a house *is* done and the people know about it.

Ten years from now I expect another of the problems will be the creative reuse of abandoned property.

Stegman: In some ways I think we are already dealing with some of the issues that will be with us over the next 10 years. I believe the driving force of tomorrow's issues will involve matters of social equity more than technology – matters that we are now beginning to grapple with in our program.

Donna mentions creative reuse. I think an important question, with profound policy implications, will be how to support neighborhoods where the market has all but collapsed. This concerns ways of supporting community groups and other institutions to do the job and carry out the production and allocation activities that the market has ceased to do. Based on my assessment of the difficulties involved, I think that techniques of interfacing housing and related programs, which together would support community building in its fullest meaning, are of very high priority and are sufficiently complex to be with us as a major issue over the next decade.

Shalala: It will be the interrelationship between the programs.

Stegman: There will likely be a blurring of program distinctions with an increasing emphasis on accountability. There will be increasing concerns for cost-effectiveness, but the programs will be less structured in terms of the Department or agency that is supporting each piece of the work. We've got to develop better ways of interlinking program efforts

And that relates to a broader question of how we cost-account these efforts. I think increasingly as we look at community-building we are going to have to charge more and more of the cost of housing programs, for example, to other social accounts: to job training, to neighborhood stabilization, to increased investment around the housing we are rehabilitating. Increasingly, we are going to find it more difficult to really justify these increasing expenditures on a narrowly defined housing account. We are going to have to improve our abilities to measure the spillover effects and neighborhood effects of our community building work.

Shalala: Another long-range issue arises from the increasing portion of poor families that are female headed. These families are going to provide a very special housing problem that we are just beginning to think through in terms of how we organize this Department to deal with the issue.

Ten years from now everybody expects an America whose gross national product increases at a slower rate than at present. So you are going to see a lot of reuse of existing facilities, and multiple uses of facilities, and a lot less wastefulness about everything. Attitudes are going to be different – attitudes toward Government as well as attitudes about people, about their lifestyles and their expectations.

But all of it is not negative. In 10 years we will have a strong rehab industry, for example. In 10 years there will be enormous expertise in weatherization and in energy conservation in the home. We have been through the hard time in terms of learning about design and weatherization of existing homes.

But although we have to anticipate the future, I want to cheer a little about the present. If you ask what I'm proudest of, it's not one single thing. It's the whole thing. We've gotten our act together. We've narrowed down the amount of research we're doing, and we are covering the Department with high-quality, relevant evaluations. Our research is more relevant. It is better organized. The timing is better. We know what research questions can be answered in a short period and what can't. We are more involved in the business of this building because we have organized ourselves differently, and we recognize that the usual way people do research doesn't fit with the needs of government policymakers. These are the kinds of things I'm proudest of in PD&R.

I'm also very proud that we have developed whole areas in public finance and in economic development that we didn't have before. We've also vastly increased our resources devoted to elderly research, and made a big increase in our focus on family housing and family questions.

And we're doing a lot of work on applied questions. For example, we are now working with the Office of Neighborhoods to produce a series of handbooks to help people to use data better. After all, that is a role for researchers too. There's a lot of data available in financial institutions because of the Community Reinvestment Act and the Home Mortgage Disclosure Act, and we're showing community groups how to use them. We're not only doing research on the data ourselves, but we're anxious for outside people to do secondary analysis.

In the next year, the data bases of PD&R are going to be released so that researchers and community groups across the country can use them. In the design of the Community Development Block Grant evaluation, for example, we made sure that neighborhood organizations were keyed in so they and cities could use the information we were developing. This has not been done in Government before, not in any systematic way. For us now, giving people access to the date is not the exception but the rule. It's possible because HUD is probably the only Cabinet-level agency in which the policy and research functions are merged. That's why I have the best job in the Government, because at HUD they're together.

Stegman: Another research accomplishment we should mention is the urban impact analysis work that is currently going on in-house. I think that will make quite a substantial contribution. It is essentially either forging a new methodology or adopting existing methodology to a new set of concerns, namely, the impact of government legislation on the cities.

Shalala: In that area, Mike, I think we have actually expanded policy research. We have actually added a new dimension to policy research that was not there before. Now many of us would suggest that good urban impact analysis is nothing more than good policy analysis, but it operates from a different angle. We have actually moved analysis a step forward. The urban impact analyses in the two books we have coming out – the Johns Hopkins Press will publish them this year – will really be major events in the urban field that will be read by urbanists across the country.

That's another aspect of the Office of Policy Development and Research that I'm particularly happy about – we're getting our research and analysis into the hands of the people who can profit from them.

Programs of HUD

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Programs of HUD

"Housing is a fundamental, essential and basic human right equivalent to food and clothing on the national scale of human needs; it is the foundation of the family, and the family is the basic unit of the society.

"This understanding alone makes the provision of decent and affordable housing an appropriate and necessary focus for national policy."

Patricia Roberts Harris
Secretary
U.S. Department of Housing and Urban Development

. . . . . .

The U.S. Department of Housing and Urban Development (HUD) was established by Act of Congress in 1965 as a response to the rapid urbanization and increasing importance of housing and community development.

The programs summarized in this book have been designed by Congress and the Department to meet the Nation's need for decent housing for all Americans, and for sound community development consonant with national goals and policies. The programs have as their goal:

- Assuring decent shelter for all Americans
- Revitalizing our urban areas
- Providing a choice of living places
- Enhancing the capability of local governments to rejuvenate their communities

The book contains a brief description of each program and of aid available from HUD in the form of grants, guarantees, loans, mortgage and loan insurance, homeownership and rental subsidies and technical assistance.

Programs of HUD will be updated periodically. Questions concerning program changes should be addressed to Communications Services, Office of Public Affairs, Room 9245, HUD, 451 Seventh Street SW, Washington, D.C. 20410. (Telephone (202) 755-5284.

COMMUNITY DEVELOPMENT BLOCK GRANTS

2

Federal aid to promote sound community development.

Nature of Program: HUD awards "block" grants to local governments to fund a wide range of community development activities. In a single, flexible-purpose program, the block grants finance activities previously eligible under separate categorical grant programs: Urban Renewal; Neighborhood Development Grants; Model Cities; Water and Sewer Grants; Neighborhood Facilities Grants; Public Facilities Loans; Rehabilitation Loans; and Open Space, Urban Beautification and Historic Preservation Grants.

Spending priorities are determined at the local level, but the law enumerates general objectives which the block grants are designed to fulfill, including adequate housing, a suitable living environment and expanded economic opportunities for lower-income groups. Specifically, recipients are required to estimate their lower-income housing needs and address them in the overall community development plan they submit to receive their grant.

Applicant Eligibility: Metropolitan cities and qualified urban counties are guaranteed an amount called an "entitlement." It is based on need, objectively calculated by a formula that takes into account population, poverty, overcrowded housing, age of housing and growth lag. Smaller communities compete for the remaining ("discretionary") funds. However, local governments that participated in certain categorical grant programs, but do not qualify for an equivalent block grant, are "held harmless" for three years; i.e., they are funded at the same average level in order to complete projects already under way. After the three years, hold-harmless recipients are funded at two-thirds of the excess of hold-harmless over formula amount for one year and then one-third of the excess for the next year.

Funding Distribution: Of each year's appropriation, three percent goes directly into the Secretary's discretionary fund which is available for contingencies, emergencies and other special purposes. The rest is divided between standard metropolitan statistical areas (generally cities of at least 50,000 population and urban counties of 200,000 or more) and non-metropolitan areas, with 80 percent earmarked for the former and 20 percent for the latter. Money for metropolitan areas is allocated first to entitlement and hold-harmless grants; the balance is available for discretionary grants. Non-metropolitan funds go first to hold-harmless recipients with the remainder reserved for discretionary grants.

Legal Authority: Title I, Housing and Community Development Act of 1974 (P.L. 93-383), as amended by Title I, Housing and Community Development Act of 1977 (P.L. 95-128).

Administering Office: Assistant Secretary for Community Planning and Development, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: $10.95 billion authorized for three years (fiscal years 1978-80). The program has been fully funded each year. More than 1,300 communities received entitlement grants in each of the first two years of the program's operation; approximately 1,800 qualified for discretionary grants in both years.

COMPREHENSIVE PLANNING ASSISTANCE

4

Grants to help State and local governments finance comprehensive planning activities.

Nature of Program: A broad range of planning and management activities is supported by grants of up to two-thirds of the cost of a project. The comprehensive planning defined by this program is an ongoing process by which needs are determined and long-term goals set for land use, housing, and community facilities, and proper weight given to human and natural resources, and the improvement of the living environment.

Applicant Eligibility: States, for both intra- and interstate planning; metropolitan clearinghouses; councils of governments; Indian Tribal groups or other governmental units having special needs.

Legal Authority: Section 701, Housing Act of 1954 (P.L. 83-560), as amended; Title IV, Housing and Community Development Act of 1974 (P.L. 93-383).

Administering Office: Assistant Secretary for Community Planning and Development, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Regional Offices and Area Offices.

Current Status: Active.

Scope of Program: As of September 30, 1977, $822,949,408 had been reserved for projects, and $21,331,318 allocated to studies, research and demonstrations.

REHABILITATION LOANS

Loans to assist rehabilitation in federally-aided Community Development Block Grant, Urban Homesteading (Section 810), Urban Renewal and Code Enforcement areas.

Nature of Program: Direct Federal loans finance rehabilitation of residential, mixed use, and nonresidential properties in the above areas certified by the local government. By financing rehabilitation to bring the property up to applicable code, project or plan standards, the loans prevent unnecessary demolition of basically sound structures. A loan may provide for insulation and installing of weatherization items.
Loans may not exceed $27,000 per dwelling unit or $50,000 for nonresidential properties and the actual amount of a loan may be less, depending on certain factors.

Applicant Eligibility: Property owners in the aforementioned federally-aided areas and business tenants of such property whose leases have at least as long to run as the terms of the loan. The applicant must evidence the capacity to repay the loan and be unable to secure necessary financing from other sources on comparable terms and conditions. Preference is given to low- and moderate-income applicants.

Legal Authority: Section 312, Housing Act of 1964 (P.L. 88-560), as amended.

Administering Office: Assistant Secretary for Community Planning and Development, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Regional Offices and Area Offices, and housing and community development agencies of local government.

Current Status: Active. Congress has authorized continuation of the program through September 30, 1979.

Scope of Program: From 1964 through September 30, 1977, rehabilitation loan reservations aggregated about $471 million with $85 million in reservations in fiscal year 1977.

URBAN DEVELOPMENT ACTION GRANTS

6 Grants to assist severely distressed cities and urban counties.

Nature of Program: Action Grants assist severely distressed cities and urban counties to revitalize local economies and reclaim deteriorated neighborhoods through a combination of public and private investments in projects of maximum benefit to low- and moderate-income persons and members of minority groups.

Priority will be given projects with prospects of recapturing the community's financial investment for recycling in other economic development activities. The private sector's financial commitment must be secured by the community prior to the start of a project to be funded with Action Grants. Generally, projects should take no more than four years to complete. No additional funding will be available in years following that in which a project was approved, although additional Action Grant funding may be available to support different projects during the life of the program.

Applicant Eligibility: Cities—including those participating in the Community Development Block Grant Program in cooperation with urban counties—and urban counties, provided that they (1) have demonstrated ongoing results in providing housing for low- and moderate-income persons and equal opportunity in housing and employment for low- and moderate-income persons and members of minority groups, and (2) have met minimum criteria that indicate physical and economic distress. These criteria include the age of the housing stock, per capita income, population outmigration, unemployment, poverty, and job lag in retailing and manufacturing. Interested communities must request a determination of eligibility from the HUD Area Offices before applications can be submitted.

Funding Distribution: Of each year's appropriation, at least 25 percent will be set aside for small communities with populations of 50,000 or under. Action Grant funding is not based on formula or entitlement. Rather, funding will be based on a "reasonable balance" of residential, commercial, or industrial projects. At least ten criteria will be considered in the selection of projects for funding. The primary criterion will be the comparative degree of physical and economic distress among all applicants. Applications will be accepted throughout the year—during the first month of each quarter—and awards will be announced during the last month of each quarter.

Legal Authority: Section 119, Housing and Community Development Act of 1977 (P.L. 95-128), as amended.

Administering Office: Assistant Secretary for Community Planning and Development, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Central and Area Offices.

Current Status: Active.

Scope of Program: $400 million in Action Grant assistance has been appropriated for Fiscal Year 1978.

MODEL CITIES

8

A comprehensive attack on social, economic, and physical problems in selected slum and blighted areas, using Federal, State, Local and private resources in a coordinated and concentrated manner.

Nature of Program: Grants and technical assistance helped cities to carry out comprehensive programs attacking the social, economic, and physical problems of blighted neighborhoods in selected localities. Cities were required to use and coordinate existing Federal grant-in-aid programs and State, local, and private resources, and to involve neighborhood residents in planning, monitoring, and evaluating comprehensive five-year plans.

Model Cities grants were designed to supplement and concentrate other Federal, State and local aid in selected areas. Eligible activities included: expanding housing, job and income opportunities, improving educational facilities; combatting disease; reducing crime and delinquency; enhancing recreational and cultural opportunities; improving the physical environment; and providing vital social services.

Applicant Eligibility: Municipalities of all sizes.

Legal Authority: Title I, Demonstration Cities and Metropolitan Development Act of 1966 (P.L. 89-754).

Administering Office: Assistant Secretary for Community Planning and Development, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Superseded by Housing and Community Development Act of 1974, under which Model Cities-type activities may be funded. See Community Development Block Grants.

Scope of Program:
Total number of projects 145 cities
Total funding
In planning grants: 22,222,450.47
In operating fund: 2,467,593,901.00
In technical assistance 29,503,753.00

NEIGHBORHOOD DEVELOPMENT

Financial assistance for neighborhood development in urban renewal. 9

Nature of Program: This program modified the urban renewal program to permit more rapid and flexible execution of the urban renewal plans within specified neighborhoods. Thus a community could proceed with the renewal of individual neighborhoods (contiguous or otherwise) which needed urgent action, while at the same time continuing to plan the total redevelopment of the area.

HUD awarded loans and grants for neighborhood development on the same basis as urban renewal except that all grants were made in 12-month increments.

Applicant Eligibility: Local governments, renewal agencies or housing authorities, depending upon State enabling legislation.

Legal Authority: Sections 131-134, Title I, Housing Act of 1949 (P.L. 81-171), as amended by Section 501(b), Housing and Urban Development Act of 1968 (P.L. 90-448).

Administering Office: Assistant Secretary for Community Planning and Development, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Superseded by Housing and Community Planning and Development Act of 1974, under which neighborhood development may be funded. See Community Development Block Grants.

Scope of Program: Total funding: $2,817,827,079.27, Number of communities: 430.

NEIGHBORHOOD FACILITIES

10 Grants to aid in establishing multipurpose neighborhood centers.

Nature of Program: Grants covering up to three-fourths of the development cost financed facilities for neighborhood health, welfare, educational, cultural, social, recreational, or similar community services. Both new construction and rehabilitation were eligible. The facility had to be: needed to carry out a program of community service; consistent with comprehensive planning for the area; and accessible to a significant proportion of the area's low- or moderate-income residents.

Applicant Eligibility: Local public bodies, agencies, or Indian tribes authorized under State or local law to undertake neighborhood facility projects.

Legal Authority: Section 703, Housing and Urban Development Act of 1965 (P.L. 89-117).

Administering Office: Assistant Secretary for Community Planning and Development, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Superseded by Housing and Community Development Act of 1974, under which neighborhood facilities may be funded. See Community Development Block Grants.

Scope of Program:
Total number of projects: 798
Total funding: $249,971,261.00

OPEN SPACE-URBAN BEAUTIFICATION-HISTORIC PRESERVATION

Federal grants to help communities develop parks, improve the appearance of public areas, and preserve historic sites.

Nature of Program: Originally three separate programs, Open Space, Urban Beautification and Historic Preservation were consolidated in 1970 to allow communities to fund these related objectives with a single Federal grant to encourage more aesthetic urban development; to preserve sites of historic or architectural value; and to provide necessary recreational, conservation, and scenic areas.

HUD paid up to 50 percent of the cost of land acquisition and construction or rehabilitation of related facilities.

Applicant Eligibility: States and local public bodies with the requisite authority to perform these functions.

Legal Authority: Title IV, Housing and Urban Development Act of 1970 (P.L. 91-609).

Administering Office: Assistant Secretary for Community Planning and Development, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Superseded by the Housing and Community Development Act of 1974, under which these activities may be funded. See Community Development Block Grants.

Scope of Program:
Total number of grants 4,585
Total funding: $591,449,104.00

PUBLIC FACILITY LOANS

12

Long-term loans to help communities finance the construction of needed public works.

Nature of Program: Loans for up to 40 years and covering up to 100 percent of project cost financed a variety of public works. These include water and sewer facilities, gas distribution systems, street improvements, public buildings (excluding schools), recreation facilities and jails. Loans were available only for those parts of a project not covered by other Federal aid. Smaller communities received priority.

Applicant Eligibility: Local governments or State agencies having the legal authority to build public works and issue bonds to pay for them.

Legal Authority: Title II, Housing Amendments of 1955 (P.L. 84-345).

Administering Office: Assistant Secretary for Housing-FHA Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Superseded by Housing and Community Development Act of 1974, under which public facilities may be funded. See Community Development Block Grants.

Scope of Program: HUD has financed projects totaling $481,482,556.34.

URBAN RENEWAL

Federal financial assistance to eliminate blight in defined urban areas.

Nature of Program: Grants, planning advances and temporary loans helped to eliminate blight in urban areas through surveys and planning; land acquisition and clearing; rehabilitation of existing structures; new building construction; and the installation of public improvements including streets and sidewalks, utilities and recreational areas; flood protection; and the preservation of historic structures.

A Federal grant paid two-thirds of the net cost for cities with populations over 50,000 and three-fourths for communities with populations under 50,000 and for areas, regardless of population, which were designated as economic development areas by the Department of Commerce.

Applicant Eligibility: Local public agencies, which may be local or county renewal agencies or housing authorities, or local or county departments of government, depending upon State enabling legislation.

Legal Authority: Title I, Housing Act of 1949 (P.L. 81-171), as amended.

Administering Office: Assistant Secretary for Community Planning and Development, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Regional Offices and Area Offices.

Current Status: Superseded by the Housing and Community Development Act of 1974, under which urban renewal may be funded. See Community Development Block Grants.

Scope of Program: As of June 30, 1976, the total of grants paid out and reserved for future repayment of urban renewal notes in the following categories.

Conventional	$10,080,715,504.42
Community Renewal	61,447,348.25
Code Enforcement	333,291,189.44
Interim Assistance	33,678,394.46
Demolition	23,674,081.21
Demonstration	10,442,926.90
Certified Areas	7,784,217.60
Fair Access to Insurance Requirements	3,490.00

WATER AND SEWER FACILITIES

14 Grants to finance community water and sewer facilities.

Nature of Program: Federal grants financed land and construction costs of basic public water and sewer facilities, excluding sewage treatment. These facilities must be consistent with a program for a coordinated areawide water and sewer facilities system as part of the comprehensive planned development of the area.

Generally, grants could not exceed 50 percent of eligible land and construction costs. Under certain limited conditions, a grant of up to 90 percent could be made to a community with a population of less than 10,000.

Applicant Eligibility: Cities, towns, counties, Indian tribes, public agencies or instrumentalities of one or more States, municipalities or political subdivisions; or boards or commissions established to finance capital improvement projects.

Legal Authority: Section 702, Housing and Urban Development Act of 1965 (P.L. 89-117), as amended.

Administering Office: Assistant Secretary for Community Planning and Development, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Superseded by the Housing and Community Development Act of 1974, under which water and sewer facilities may be funded. See Community Development Block Grants.

Scope of Program:
Total number of projects: 2,435,491
Funding: $1,102,683,533.00
491 projects still under construction.

ONE- TO FOUR-FAMILY HOME MORTGAGE INSURANCE (SECTION 203 (b) and (i))

16

Federal mortgage insurance to facilitate homeownership and the construction and financing of housing.

Nature of Program: By insuring commercial lenders against loss, HUD encourages them to invest capital in the home mortgage market. HUD insures loans made by private financial institutions for up to 97 percent of the property value and for terms of up to 30 years. The loans may finance homes in both urban and rural areas (except farm homes). Less rigid construction standards are permitted in rural areas.

Applicant Eligibility: Any person able to make the cash investment and the mortgage payments.

Legal Authority: Section 203(b) and (i), National Housing Act (1934), (P.L. 73-479).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active

Scope of Program: Cumulative activity through September 1977 10,212,194 units insured under Section 203(b) for a value of over $125 billion; close to 80,000 units in outlying areas insured under Section 203(i) for a value of $600 million.

HOMEOWNERSHIP ASSISTANCE FOR LOW- AND MODERATE-INCOME FAMILIES (REVISED SECTION 235)

Mortgage insurance and interest subsidy for low- and moderate-income home buyers.

Nature of Program: To enable eligible families to afford new homes that meet HUD standards, HUD insures mortgages and makes monthly payments to lenders to reduce interest to as low as 4 percent. The homeowner must contribute 20 percent of adjusted income to monthly mortgage payments and must make a downpayment of 3 percent of the cost of acquisition. There are dollar limits on loans and sales prices. Mortgage limits are $32,000 ($38,000 for homes for 5 or more persons), and in high cost areas $38,000 ($44,000 for homes for 5 or more persons). The income limit for initial occupancy is 95 percent of the area median income.

Prior to 1976, this program provided larger subsidies to lower-income households and required a substantially smaller investment from them.

Applicant Eligibility: A home buyer's adjusted income may not exceed a certain percentage of local median income. There is no restriction on assets.

Legal Authority: Section 235, National Housing Act (1934), as added by Section 101, Housing and Urban Development Act of 1968 (P.L. 90-448).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active in its revised form.

Scope of Program: Cumulative activity through September 1977: 478,553 units have been insured with a value of about $8.6 billion.

HOMEOWNERSHIP ASSISTANCE FOR LOW- AND MODERATE-INCOME FAMILIES (SECTION 221(d)(2))

18

Mortgage insurance to increase homeownership opportunities for low- and moderate-income families, especially those displaced by urban renewal.

Nature of Program: HUD insures lenders against loss on mortgage loans to finance the purchase, construction or rehabilitation of low-cost, one- to four-family housing. Maximum insurable loans for an owner-occupant are $31,000 for a single-family home (up to $36,000 in high cost areas). For a larger family (five or more persons), the limits are $36,000 or up to $42,000 in high cost areas. Higher mortgage limits apply to two- to four-family housing.

Applicant Eligibility: Anyone may apply; displaced households qualify for special terms.

Legal Authority: National Housing Act (1934), (P.L. 73-479), as added by Section 123, Section 221(d)(2), Housing Act of 1954 (P.L. 83-560).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Cumulative activity through September 1977: 837,092 units insured for a value of over $11 billion.

Mortgage insurance to purchase or rehabilitate housing in older, declining urban areas.

Nature of Program: In consideration of the need for adequate housing for low- and moderate-income families, HUD insures lenders against loss on mortgage loans to finance the purchase, rehabilitation, or construction of housing in older, declining, but still viable urban areas where conditions are such that normal requirements for mortgage insurance cannot be met. This provision relaxed these requirements but specified that the property must be an "acceptable risk." The terms of the loans vary according to the HUD/FHA program under which the mortgage is insured.

Applicant Eligibility: Homeowners or project owners eligible for the FHA mortgage insurance they are seeking.

Legal Authority: Section 223(e), National Housing Act (1934), (P.L. 73-479), as added by Section 103(a), Housing and Urban Development Act of 1968 (P.L. 90-448).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: In the 9 years since its inception, 187,824 units were insured for a total of $2,070,432,528.

20

Mortgage insurance and homeownership counseling for low- and moderate-income families with a credit history that does not qualify them for insurance under normal standards.

Nature of Program: HUD insures lenders against loss on home mortgage loans to low- and moderate-income families which are marginal credit risks. HUD is also authorized to provide budget, debt-management, and related counseling services to these families when needed. These services are performed by local HUD-approved organizations. Applicants may seek credit assistance under most FHA home mortgage insurance programs.

Applicant Eligibility: Low- and moderate-income households with credit records indicating ability to manage their financial and other affairs successfully if given budget, debt-management, and related counseling.

Legal Authority: Section 237, National Housing Act (1934), (P.L. 73-479), as added by Section 102, Housing and Urban Development Act of 1968, (P.L. 90-448).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active as an insurance program.

Scope of Program: Cumulative activity through September 1977: 3,601 units with a value of $51,502,258 insured.

CONDOMINIUM HOUSING

Federal mortgage insurance to finance ownership of individual units in multifamily housing projects.

Nature of Program: HUD insures mortgages made by private lending institutions for the purchase of individual family units in multifamily housing projects under Section 234(c). Sponsors may also obtain FHA-insured mortgages to finance the construction or rehabilitation of housing projects which they intend to sell as individual condominium units under Section 234(d). A project must contain at least four dwelling units; they may be in detached, semi-detached, row, walkup, or elevator structures.

A condominium is defined as joint ownership of common areas and facilities by the separate owners of single dwelling units in the project.

Applicant Eligibility: Any qualified profit-motivated or nonprofit sponsor may apply for a blanket mortgage covering the project after conferring with his local FHA insuring office; any credit-worthy person may apply for a mortgage on individual units in a project.

Legal Authority: Section 234, National Housing Act, (1934), (P.L. 73-479), as added by Housing Act of 1961 (P.L. 87-70), and as amended.

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Cumulative activity to June 1977: 617 projects with 35,760 units insured for a value of $330,645,306.

COOPERATIVE HOUSING

22 Federal mortgage insurance to finance cooperative housing projects.

Nature of Program: HUD insures mortgages made by private lending institutions on cooperative housing projects of five or more dwelling units to be occupied by members of nonprofit cooperative ownership housing corporations. These loans may finance: new construction, rehabilitation, acquisition, improvement or repair of a project already owned, and resale of individual memberships; construction of projects composed of individual family dwellings to be bought by individual members with separate insured mortgages; and construction or rehabilitation of projects that the owners intend to sell to nonprofit cooperatives.

Applicant Eligibility: Nonprofit corporations or trusts organized to construct homes for members of the corporation or beneficiaries of the trust; and qualified sponsors who intend to sell the project to a nonprofit corporation or trust.

Legal Authority: Section 213, National Housing Act (1934), (P.L. 73-479), as added by Section 114, Housing Act of 1950 (P.L. 81-475).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Cumulative activity to June 1977: 2,062 projects with 116,165 units insured for a value of $1,583,489,959.

MOBILE HOMES (TITLE 1)

Federal insurance of loans to finance the purchase of mobile homes.

Nature of Program: To facilitate financing of mobile home purchases, thereby providing alternative lower-cost housing, HUD insures mobile home loans by private lending institutions. Loans may be insured for up to $16,000 and 15 years on single-module units and for $24,000 over 23 years for double-module units. The maximum allowable interest on both types is 12 percent.

Applicant Eligibility: Any person able to make the cash investment and the mortgage payments.

Legal Authority: Section 2, Title 1, National Housing Act (1934), (P.L. 73-479).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Program activity through October 1977: over 60,000 loans with an insured value of about $580 million.

MOBILE HOME COURTS

24 Federal mortgage insurance to finance construction or rehabilitation of mobile home courts.

Nature of Program: To help finance construction or rehabilitation of mobile home courts, HUD insures mortgages made by private lending institutions on the entire site. Mortgages are limited to $3,250 per individual mobile home space within each park. In high-cost areas, this maximum may be 50 percent higher. The park must be located in an area approved by HUD in which market conditions show a need for such housing.

Applicant Eligibility: Investors, builders, developers, cooperatives and others who meet HUD requirements may apply to an FHA-approved lending institution conferring with the local HUD office.

Legal Authority: Section 207, National Housing Act (1934), (P.L. 73-479).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Office.

Current Status: Active.

Scope of Program: Cumulative activity through June 1977: nearly 64,000 spaces insured for a value of over $188 million.

MULTIFAMILY RENTAL HOUSING

Federal mortgage insurance to facilitate construction and financing of a broad cross section of rental housing.

Nature of Program: HUD insures mortgages made by private lending institutions to finance the construction or rehabilitation of multifamily rental housing by private or public developers. The project must contain at least eight dwelling units. Housing financed under this program, whether in urban or suburban areas, should be able to accommodate families (with or without children) at reasonable rents.

Applicant Eligibility: Investors, builders, developers, and others who meet HUD requirements may apply for funds to an FHA-approved lending institution after conferring with their local HUD office. The housing project must be located in an area approved by HUD for rental housing and in which market conditions show a need for such housing.

Legal Authority: Section 207, National Housing Act (1934), (P.L. 73-479), as amended.

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Cumulative projects insured through June 1977. 2,614 projects with 282,782 units, cumulative amount insured. $3.89 billion.

EXISTING MULTIFAMILY RENTAL HOUSING

26

Federal mortgage insurance to facilitate purchase or refinancing of existing apartment projects.

Nature of Program: HUD insures mortgages to purchase or refinance existing multifamily projects originally financed with or without Federal mortgage insurance. HUD may insure mortgages on existing multifamily projects under this program that do not require substantial rehabilitation. Project must contain eight or more units, and must be at least three years old.

Applicant Eligibility: Investors, builders, developers, and others who meet HUD requirements.

Legal Authority: Section 223(f), National Housing Act (1934), (P.L. 73-479), as added by Section 311, Housing and Community Development Act of 1974 (P.L. 93-383).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Cumulative through June 1977, 112 projects were insured with 19,759 units valued at $307,719,380.

MULTIFAMILY RENTAL HOUSING FOR LOW- AND MODERATE-INCOME FAMILIES (SECTION 221(d)(3) and (4))

Mortgage insurance to finance rental or cooperative multifamily housing for low- and moderate-income households.

Nature of Program: To help finance construction or substantial rehabilitation of multifamily (5 or more units) rental or cooperative housing for low- and moderate-income or displaced families, HUD conducts two related programs. Both insure project mortgages at the FHA ceiling interest rate. Projects in both cases may consists of detached, semi-detached, row, walk-up, or elevator structures. The insured mortgage amounts are controlled by statutory dollar limits per unit which are intended to assure moderate construction costs. Units financed under both programs may qualify for assistance under Section 8 if occupied by eligible low-income families.

Currently, the principal differences between the programs are two: HUD may insure 100 percent of total project cost under Section 221(d)(3) for nonprofit and cooperative mortgagors but only 90 percent under Section 221(d)(4) irrespective of the type of mortgagor, and statutory unit limit mortgage amounts are less for Section 221(d)(3) than for Section 221(d)(4).

Formerly, the two programs were distinguished by these additional differences. Projects financed under 221(d)(3) could qualify for a below-market interest rate (as low as 3 percent) and for rent supplements. Consequently, these projects were limited to a lower statutory cost ceiling per unit than was allowed under 221(d)(4) projects which did not benefit from these subsidies. Below-market interest rates and rent supplements are no longer available for new projects for these programs.

Applicant Eligibility: Section 221(d)(3) mortgages may be obtained by public agencies, nonprofit, limited-dividend or cooperative organizations; private builders or investors who sell completed projects to such organizations. Section 221(d)(4) mortgages are limited to profit-motivated sponsors. Tenant occupancy is not restricted by income limits, except in the case of tenants receiving subsidies.

Legal Authority: Sections 221(d)(3) and (4), National Housing Act (1934), (P.L. 73-479), as added by Housing Act of 1954, (P.L. 83-560).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

28

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Cumulative activity through June 1977: 1,595 projects under Section 221(d)(3) with 132,858 units insured for a value of $1,782,109,137; 2,331 projects under Section 221(d)(4) with 281,731 units insured for a value of $4,670,329,338.

ASSISTANCE TO NONPROFIT SPONSORS OF LOW- AND MODERATE-INCOME HOUSING

Technical assistance and loans to sponsors of certain HUD-assisted housing.

Nature of Program: To stimulate the production of housing for low- and moderate-income families, HUD provides information and technical advice to nonprofit organizations that sponsor such multifamily housing.

HUD also makes interest-free "seed money" loans to nonprofit sponsors or public housing agencies to cover 80 percent of the preliminary development costs. Current HUD regulations limit these loans to nonprofit sponsors of Section 202 housing for the elderly or handicapped. Loans may be used to meet typical project development costs, such as surveys and market analysis, site engineering, architectural fees, site acquisition, and application and loan commitment fees. Loans are made from a revolving Low- and Moderate-Income Sponsor Fund.

Applicant Eligibility: Nonprofit sponsors eligible under HUD regulations and public housing agencies.

Legal Authority: Sections 106(a) and (b), Housing and Urban Development Act of 1968, (P.L. 90-448).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active with respect to Section 106(b) loans for Section 202 housing for the elderly and handicapped.

Scope of Program: Cumulative activity through fiscal year 1976: 260 loans approved for a total amount of $8,155,151.

MORTGAGE AND MAJOR HOME IMPROVEMENT LOAN INSURANCE FOR URBAN RENEWAL AREAS

30

Federally insured loans to finance mortgages on housing in urban renewal areas and to alter, repair or improve one- to eleven-family housing in those areas.

Nature of Program: HUD insures mortgages on new or rehabilitated homes or multifamily structures located in designated urban renewal areas with concentrated programs of code enforcement and neighborhood development. HUD insures supplemental loans to finance improvements that will enhance and preserve salvageable homes and apartments in designated urban renewal areas.

Applicant Eligibility: Investors, builders, developers, individual homeowners, and apartment owners.

Legal Authority: Sections 220 and 220(h), National Housing Act (1934), (P.L. 73-479), as added by Section 102(a)(3), Housing Act of 1961 (P.L. 87-70).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active but infrequently used. Urban renewal related activities are being phased out.

Scope of Program: Cumulative home improvement loan activity through September 1977: 7 loans on 8 units with a value of $35,550 insured; cumulative mortgage insurance through June 1977: 392 projects with 71,115 units and a total value of $1,374,911,602.

RENTAL AND COOPERATIVE HOUSING ASSISTANCE FOR LOWER-INCOME FAMILIES (SECTION 236)

Mortgage insurance and interest reduction and operating subsidies to reduce rents for lower-income households.

Nature of Program: Originally HUD insured multifamily mortgages and paid interest subsidies to lenders which allowed the mortgage to be paid off by the project owner at an interest rate as low as one percent. The reduction this made possible in monthly rents was designed to produce new or substantially rehabilitated rental or cooperative units for lower-income households. Tenants contribute 25 percent of adjusted income or the basic rent, whichever is the greater. Beginning in 1974, HUD paid additional subsidies to cover the difference between the tenants' contribution and the actual costs of operating the project.

Applicant Eligibility: Nonprofit, limited-dividend or cooperative organizations, or private builders or investors who sell the project to such organizations. Both tenants who can afford fair market rents and those who cannot may occupy these projects; only the latter will be subsidized.

Legal Authority: Section 236, National Housing Act (1934), (P.L. 73-479),as added by Section 201, Housing and Urban Development Act of 1968 (P.L. 90-448).

Administering Office: Assistant Secretary for Housing--Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Inactive. The housing subsidy moratorium of January 5, 1973, suspended this program; current activity consists mainly of funding bona fide commitments issued before the moratorium and amending existing contracts.

Scope of Program: Cumulative activity through June 1977: 4,217 projects with 460,188 units insured for $7.9 billion.

RENT SUPPLEMENTS

32

Federal payments to reduce rents for certain disadvantaged low-income persons.

Nature of Program: HUD may pay rent supplements on behalf of eligible tenants to certain private owners of multifamily housing insured by the Federal Housing Administration. The payment makes up the difference between 25 percent of a tenant's adjusted income and the fair market rent determined by HUD. However, the subsidy may not exceed 70 percent of the HUD approved rent for the specific unit. HUD may pay the supplements for a maximum term of 40 years.

Applicant Eligibility: Private nonprofit, limited dividend, cooperative, or public agency sponsors carrying mortgages insured under the following programs may apply for rent supplements: Sections 221(d)(3), 231, 236, and Section 202. (The basic mortgage insurance vehicle has been the Section 221(d)(3) Market Interest Rate program.) Eligible tenants are limited to low-income households that qualify for public housing and are either elderly, handicapped, displaced by government action, victims of national disaster, occupying substandard housing, or headed by a person serving on active military duty.

Legal Authority: Section 101, Housing and Urban Development Act of 1965, (P.L. 89-117).

Administering Office: Assistant Secretary for Housing--Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: New rent supplement contracts are no longer available. The program was suspended under the housing subsidy moratorium of January 5, 1973. Current activity consists of amending contracts for existing rent supplement projects and processing conversions of Section 236 rent supplement units to Section 236 "deep subsidy" assistance, as authorized by the Housing and Community Development Act of 1974.

Scope of Program: Through June 1977, 3,268 projects with 317,665 units. The total amount allocated over the life of the program was $300 million.

LOWER-INCOME RENTAL ASSISTANCE (SECTION 8)

A rent subsidy for lower-income families to help them afford decent housing in the private market.

Nature of Program: HUD makes up the difference between what a lower-income household can afford and the fair market rent for an adequate housing unit. No eligible tenant need pay more than 25 percent of adjusted income toward rent. Housing thus subsidized by HUD must meet certain standards of safety and sanitation, and rents for these units must fall within the range of fair market rents as determined by HUD. This rental assistance may be used in existing housing or in new construction or, substantially rehabilitated units. Different procedures apply in each case.

Local public housing agencies administer the existing housing program, certifying eligible tenants, inspecting the units proposed for subsidy, and contracting with approved landlords for payment. (Tenants execute separate leases with landlords to pay their share of rent.)

Nonprofit and profit-motivated developers, alone or together with public housing agencies, submit proposals for substantial rehabilitation or new construction in response to invitations from HUD, or they may apply to their State housing finance agency. On approval of the proposals, HUD contracts to subsidize the units to be occupied by eligible families.

Applicant Eligibility: Tenants must be lower-income households with incomes amounting to 80 percent of the area median income or less. Project sponsors may be private owners, profit-motivated and nonprofit or cooperative organizations, public housing agencies and State housing finance agencies.

Legal Authority: Section 8, U.S. Housing Act of 1937, (P.L. 73-479), as added by Housing and Community Development Act of 1974, (P.L. 93-383).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

34

Current Status: Active.

Scope of Program: 169,396 units of new construction or rehabilitation and 161,581 units of existing housing were reserved and slated for Federal subsidy in fiscal year 1977. Since the start of the Section 8 program in early summer of 1975, 946,218 units have been reserved and 295,000 of these were occupied as of September 30, 1977.

LOW-INCOME LEASED PUBLIC HOUSING (SECTION 23)

Private housing leased for low-income use.

Nature of Program: HUD pays basic annual contributions which permit local public agencies to lease decent private housing for low-income families at rents they can afford. The annual contributions make up the difference between the rents paid to private owners (plus local public agency operating expenses) and what low-income tenants can afford. That amount is based upon the tenant income but may not exceed 25 percent of adjusted income. The annual contributions cannot exceed the amount that would be paid by the local public agency for a newly constructed project designed to accommodate comparable numbers, sizes and kinds of families. The basic contribution may be adjusted for higher operating costs due to tax or utility increases.

Applicant Eligibility: Local housing authorities or agencies authorized to perform similar functions.

Legal Authority: Section 23, U.S. Housing Act of 1937, as added by Section 103(a), Housing and Urban Development Act of 1965, (P.L. 89-117).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Superseded by the Lower-Income Rental Assistance (Section 8) program. Section 23 projects may be converted to the Section 8 program.

Scope of Program: As of December 31, 1975, HUD was making annual payments on a total of 163,297 units. Of these, 72,524 were new construction, 23,751 were rehabilitated, and 67,022 were existing units.

36

Federal aid to local public housing agencies to provide decent shelter for low-income residents at rents they can afford.

Nature of Program: Local public housing agencies develop, own and operate low-income public housing projects, financing them through the sale of tax-exempt obligations. HUD furnishes technical and professional assistance in planning, developing and managing the projects and gives two kinds of financial assistance: preliminary loans for planning; and annual contributions to pay the debt service of PHA obligations, assure low rents and maintain adequate services and reserve funds. Rents that are based on the residents' ability to pay contribute to the costs of managing and operating the housing.

Several different methods are used to provide housing. Under the "Turnkey" program, the PHA invites private developers to submit proposals, selects the best proposal and agrees to purchase the project on completion. Under conventional-bid construction, the PHA acts as its own developer, acquiring the site(s), preparing its own architectural plans, and advertising for competitive bids for construction. The PHA may also acquire existing housing, with or without rehabilitation, from the private market under the acquisition program.

Applicant Eligibility: Public housing agencies established by local governments in accord with State law.

Legal Authority: U.S. Housing Act of 1937, as amended, (P.L. 75-412), Title 11, Housing and Community Development Act of 1974 (P.L. 93-383).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Approximately $101.6 million of contract authority was approved for 49,400 units during fiscal year 1977; about $137.5 million has been budgeted for 50,000 units during fiscal 1978.

As of June 30, 1977, 34,200 units were under construction, and 39,500 were in the preconstruction processing stage.

PUBLIC HOUSING MODERNIZATION

Federal aid to public housing agencies (PHAs) to finance capital improvements in public housing projects.

Nature of Program: HUD finances capital improvements in PHA-owned, low-income housing projects to upgrade living conditions, correct physical deficiencies, and achieve operating efficiency and economy. Within the limits of an existing Annual Contributions Contract (ACC), PHAs obtain modernization funds through a direct HUD loan or from temporary or permanent private financing of federally guaranteed notes or bonds. This increases the development cost of the project, which is amortized through annual contributions toward debt service over the remaining life of the contract.

Applicant Eligibility: Public housing agencies operating federally assisted public housing projects under an existing Annual Contributions Contract.

Legal Authority: U.S. Housing Act of 1937, (P.L. 75-412), as amended by Section 7(d), Department of Housing and Urban Development Act of 1965 (P.L. 89-174).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Number of PHAs participating in fiscal year 1978, approximately 800; funding: $2,566.6 million in capital funds from fiscal 1968 to fiscal 1978, $474.7 million in capital funds fiscal 1978 only.

PUBLIC HOUSING OPERATING SUBSIDIES

38 Federal grants to help operate public housing projects.

Nature of Program: HUD provides operating subsidies required to help Public Housing Agencies (PHAs) maintain and operate their projects, retain minimum operating reserves and offset certain operating deficits. The operating subsidies are based on the Performance Funding System (PFS). Implemented on April 1, 1975, this system replaced the previous Interim Funding formula. It calculates operating subsidies based on what it costs a well-managed PHA to operate its units. During fiscal years 1974, 1975 and 1976, special operating subsidy funding was directed to "target" projects that encountered severe operational problems.

Applicant Eligibility: All public housing agencies that administer low-income housing under Annual Contributions Contracts with HUD.

Legal Authority: Section 9, U.S. Housing Act of 1937, (P.L. 75-412); Title II, Housing and Community Development Act of 1974 (P.L. 93-383).

Administering Office: Assistant Secretary of Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Operating subsidies appropriated for Fiscal Year 1978 total $685 million.

DIRECT LOANS FOR HOUSING FOR THE ELDERLY OR HANDICAPPED (SECTION 202)

To provide housing and related facilities for the elderly or handicapped.

Nature of Program: Long-term direct loans to eligible, private, nonprofit sponsors finance rental or cooperative housing facilities for elderly or handicapped persons. The current interest rate is based on the average rate paid on Federal obligations during the preceding fiscal year. (Until the program was revised in 1974, the statutory rate was 3 percent.) Participation in the Section 8 rental housing program is required for a minimum of 20 percent of the Section 202 units.

Applicant Eligibility: Private, nonprofit sponsors may qualify for loans. Households of one or more persons, the head of which is at least 62 years old or is handicapped, are eligible to live in the structures.

Legal Authority: Section 202, Housing Act of 1959 (P.L. 86-372).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: From the date of enactment through 1972, loans for 45,275 units have been approved with a value of $579,444,000. After a brief suspension, the program was revised and reactivated by the Housing and Community Development Act of 1974. From resumption to September 30, 1976, loans were approved for 26,400 units; 21,000 units were approved for fiscal year 1977 and approximately 25,000 units are anticipated for fiscal year 1978.

MORTGAGE INSURANCE FOR HOUSING FOR THE ELDERLY

40 Federal mortgage insurance to facilitate financing of rental housing for the elderly or handicapped.

Nature of Program: To assure a supply of rental housing suited to the needs of the elderly or handicapped, HUD insures mortgages to build or rehabilitate multifamily projects consisting of eight or more units.

Applicant Eligibility: Investors, builders, developers, public bodies, and nonprofit sponsors may qualify for mortgage insurance. Persons at least 62 years old are eligible to rent such units.

Legal Authority: Section 231, National Housing Act (1934), (P.L. 73-479), added by Section 201 Housing Act of 1959 (P.L. 86-372).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Cumulative activity through June 1977 363 projects with 52,746 units insured for $782,759,340.

NURSING HOMES AND INTERMEDIATE CARE FACILITIES (SECTION 232)

Federal mortgage insurance to facilitate financing of nursing or intermediate care facilities.

Nature of Program: HUD insures mortgages to finance construction or renovation of facilities to accommodate 20 or more patients requiring skilled nursing care and related medical services, or those in need of minimum but continuous care provided by licensed or trained personnel. Nursing home and intermediate care services may be combined in the same facility covered by an insured mortgage or may be separate facilities. Major equipment needed to operate the facility may be included in the mortgage.

Applicant Eligibility: Investors, builders, developers, and private nonprofit corporations or associations, which are licensed or regulated by the State to accommodate convalescents and persons requiring skilled nursing care or intermediate care, may qualify for mortgage insurance. Patients requiring skilled nursing or intermediate care are eligible to live in these facilities.

Legal Authority: Section 232, National Housing Act (1934), (P.L. 73-479), added by Section 115, Housing Act of 1959 (P.L. 86-372).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: From date of enactment through June 1977: 1,154 projects with 131,420 beds were insured for a value of over $1.3 billion.

42 Federal mortgage insurance to finance construction or rehabilitation of nonprofit and proprietary hospitals, including major movable equipment.

Nature of Program: HUD insures mortgages to facilitate financing of urgently needed hospitals for the treatment of persons who require medical care furnished only (or most effectively) by hospitals. Loan-to-value ratio for new construction is 90 percent; for rehabilitation it varies slightly from this figure. Term of mortgage is 25 years. The Department of Health, Education and Welfare processes and reviews all applications under this program.

Applicant Eligibility: Proprietary and nonprofit hospitals certified by the responsible State agency in accordance with Section 604(a)(1) of the Public Health Services Act may apply.

Legal Authority: Section 242, National Housing Act (1934), (P.L. 73-479).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Number of projects: 138; number of beds: 34,449; funding: $1,701 244,260 over a 9-year period.

GROUP PRACTICE MEDICAL FACILITIES

Federal mortgage insurance to finance the construction, rehabilitation and equipment of facilities for group practice of medicine, dentistry and optometry.

Nature of Program: HUD insures mortgages on group practice medical facilities to relieve overburdened hospitals and nursing homes. This insurance facilitates the financing of necessary professional care unavailable in small communities geographically separated from city or county hospital centers. The maximum insurable loan may cover 90 percent of new construction costs; for rehabilitation, the loan-to-value ratio varies slightly from this figure. Term of mortgage is 25 years or ¾ of remaining economic life (whichever is less). Both HUD and the Department of Health, Education and Welfare review applications.

Applicant Eligibility: Nonprofit organizations must own the facilities, but they may be used by a profit-motivated group of doctors, dentists, optometrists, osteopaths, or podiatrists. The owners must be unable to obtain comparable mortgages without FHA insurance.

Legal Authority: Title XI, National Housing Act (1934), (P.L. 73-479), as added by Section 502, Demonstration Cities and Metropolitan Development Act of 1966 (P.L. 89-754).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Number of projects: 26; number of full-time professionals: 832; funding over a 11-year period: $40,025,098.

HOME IMPROVEMENT LOAN INSURANCE (TITLE 1)

44

Federal insurance of loans to finance home improvements.

Nature of Program: HUD insures loans to finance major and minor improvements, alterations and repairs of individual homes and nonresidential structures (whether owned or rented). The loans may be up to $15,000, bear interest up to 12 percent, and be paid back over 15 years. Loans on apartment buildings with a term of 12 years may be as high as $5,000 per unit, but the total for the building may not exceed $25,000, and the term may not exceed 12 years. Loans may also finance new construction for agriculture or nonresidential use. Lenders determine eligibility for and process these loans. Loans of not more than $7,500 are generally unsecured personal loans.

Applicant Eligibility: Credit-worthy property owners or tenants whose leases are at least 6 months longer than the loan term.

Legal Authority: Section 2, Title 1, National Housing Act (1934), (P.L. 73-479) as amended by Housing Act of 1956 (P.L. 84-1020).

Administering Office: Assistant Secretary for Housing- Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Cumulative activity through October 1977: 32 million loans insured for a value of over $26 billion.

MAJOR HOME IMPROVEMENT LOAN INSURANCE

Federal insurance of loans to finance major home improvements.

Nature of Program: HUD insures loans for major home improvements or alterations to qualified one- to four-family dwellings. The maximum loan amount is $12,000 per family unit, with an additional allowance for high cost areas; the maturity of the note may not exceed 20 years. Interest on these loans is limited to the current FHA interest rate, and they are secured by a junior lien on the property. To qualify for loan insurance, the property must be at least 10 years old, unless the alterations make major structural improvements, correct faults not known when the structure was completed, or repair casualty damage.

Applicant Eligibility: Any owner of a one- to four-family dwelling, as qualified above

Legal Authority: Section 203(k), National Housing Act (1934), as amended by Section 102(b), Housing Act of 1961, (P.L. 87-70).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active but infrequently used. See also Home Improvement Loan Insurance (Title I).

Scope of Program: Cumulative home improvement loans insured through September 1977: 2,827 cases covering 2,943 units. Cumulative amount insured: $17,676,320.

SUPPLEMENTAL LOANS FOR MULTIFAMILY PROJECTS AND HEALTH CARE FACILITIES

46

Federal loan insurance to facilitate financing of improvements to multifamily rental housing and health care facilities.

Nature of Program: HUD insures loans made by private lending institutions to pay for improvements to apartment projects, nursing homes, hospitals or group practice facilities that carry HUD-insured mortgages. By law projects in the above categories may also obtain FHA insurance on loans to expand housing opportunities or provide fire and safety equipment, regardless of whether HUD insured the original mortgage, though HUD regulations restrict the program to insured or Secretary-held mortgages.

Applicant Eligibility: Qualified owners of projects and health care facilities (as specified above) may apply for insured loans after conferring with their local HUD office.

Legal Authority: Section 241, National Housing Act (1934), (P.L. 73-479), as added by Section 307, Housing and Urban Development Act of 1968 (P.L. 90-448).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Cumulative loans insured through April 1977: 49 projects, covering 3,777 rental units, and 2,584 beds (in health care facilities). Cumulative amount insured: $21,876,809.

SINGLE-FAMILY HOME MORTGAGE COINSURANCE

Joint mortgage insurance by the Federal Government and private lenders to facilitate homeownership financing.

Nature of Program: HUD offers an additional and optional method of insuring lenders against losses on loans that they make to finance the purchase of one- to four-family homes. In return for the right to expedite preliminary processing procedures by performing them himself, the lender assumes responsibility for a portion of the risk (10 percent) and may retain a portion of the insurance premium. Thus coinsurance is expected to result in faster service to the buyer and to improve quality of loan origination and servicing.

For borrowers, the program operates just like the full insurance programs. The major differences affect the lending institution, which performs the loan underwriting and property disposition functions normally carried out by HUD alone.

Applicant Eligibility: Everyone eligible for mortgage insurance under the full insurance programs may apply for coinsured loans to lenders approved by HUD as coinsurers. The coinsuring lender, (any mortgagee approved by FHA), based upon the characteristics of the property and the credit qualifications of the borrower, determines whether to make the loan.

Legal Authority: Section 244, National Housing Act (1934), (P.L. 73-479), as added by Section 307, Housing and Community Development Act of 1974 (P.L. 93-383).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: As of October 1, 1976, the program was active in HUD field offices.

Scope of Program: As of September 1977, 1,792 units were coinsured for an amount of $51,253,100.

MULTIFAMILY HOUSING COINSURANCE

48 Joint mortgage insurance by the Federal Government and State Housing Finance Agencies to facilitate financing of rental housing.

Nature of Program: HUD insures 80 percent of the losses on mortgages made by State housing finance agencies to finance multifamily projects. This guarantee makes it easier for the State agencies to obtain credit in the private market through the issuance of State bonds. The remaining 20 percent of the risk is borne by the agencies themselves and, indirectly, by investors in the bonds.

Applicant Eligibility: State Housing Finance Agencies.

Legal Authority: Section 244, National Housing Act (1934) (P.L. 73-479), as added by Section 307, Housing and Community Development Act of 1974 (P.L. 93-383).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Active but still in preliminary stage.

Scope of Program: Indicators of program volume are not yet available.

GRADUATED PAYMENT MORTGAGE

Federal mortgage insurance for Graduated Payment Mortgages.

Nature of Program: HUD insures mortgages to facilitate early homeownership for households that expect their incomes to rise substantially. These "graduated payment mortgages" allow homeowners to make smaller monthly payments initially and to increase their size gradually over time.

Five different payment plans are available, varying in duration and rate of increase. Larger than usual downpayments are permitted to prevent the total amount of the loan from exceeding the face value of the mortgage at any given time. In all other respects, the graduated payment mortgage is subject to the rules governing ordinary HUD insured home loans.

Applicant Eligibility: All FHA-approved lenders may make graduated payment mortgages; credit-worthy applicants with reasonable expectations of increasing income may qualify for such loans.

Legal Authority: Section 245, National Housing Act (1934), (P.L. 73-479), as added by Section 308, Housing and Community Development Act of 1974 (P.L. 93-383).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active, but still in early stages of implementation.

Scope of Program: Indicators of program volume are not yet available. However, the outstanding aggregate principal amount of mortgages insured under this program may not exceed 1 percent of the outstanding total insured during any fiscal year by HUD.

50

Federal aid to Indian housing authorities to provide decent housing and related facilities in Indian areas, including the Pacific Trust Territory.

Nature of Program: Indian housing authorities develop and operate rental and homeownership projects, financing them through the sale of tax-exempt obligations. HUD furnishes technical and professional assistance in planning, developing and managing the projects and also gives financial assistance in the form of annual contributions to pay the debt service of IHA obligations. For rental projects, the contributions also assure low rents and maintain adequate services and reserve funds. The IHA is responsible for all maintenance costs on these projects. Rents that are based on the residents' ability to pay contribute to the costs of managing and operating the housing.

The homeownership projects, called "Mutual Help," allow the buyer-occupant to earn equity in his home by contributing the site, indigenous building materials, labor and/or cash to its construction. He is also responsible for all maintenance.

Several different methods are used to produce housing. Under the "Turnkey" program, the IHA invites private developers to submit proposals, selects the best proposal and agrees to purchase the project on completion. Under conventional-bid construction, the IHA acts as its own developer, acquiring the site(s), preparing its own architectural plans, and advertising for competitive bids for construction. In exceptional cases, the IHA may exclude competitive bidding. The IHA may also acquire existing housing, with or without rehabilitation, from the private market.

Applicant Eligibility: Indian Housing Authorities (IHAs) established under tribal or State law.

Legal Authority: U.S. Housing Act of 1937 (P.L. 75-412), as amended by Housing and Community Development Act of 1974 (P.L. 93-383).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: All HUD Area Offices, HUD Regional Offices in Denver, Colorado and San Francisco, CA.

Current Status: Active.

Scope of Program: Approved during fiscal year 1977. 8,000 units, $32.7 million in annual contributions; $430.6 million in loans.

Anticipated fiscal year 1978 approvals: 6,000 units; $23.7 million in contract authority; $285 million in loans.

COLLEGE HOUSING

52 Federal aid to educational institutions for housing and related facilities for students and faculties.

Nature of Program: HUD may give two types of assistance: direct Federal loans and debt service grants to support private market loans. Loans are available for a maximum of 50 years although they have been limited administratively to 40 years. The interest rate is 3 percent. Debt service grants may be made for a period of up to 40 years, in an amount equal to the difference between the average annual debt service on a commercial loan and the debt service on a 3-percent direct Federal loan.

Applicant Eligibility: Any college offering at least a 2-year program acceptable for full credit towards a bachelor's degree; and private and public nonprofit teaching hospitals for the construction of housing for student nurses, interns and residents. Qualifying institutions must show a current, severe housing shortage.

Legal Authority: Title IV, Housing Act of 1950 (P.L. 81-475).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: The grant portion of the program is inactive. In December 1974, Congress rescinded unused debt service grant funds. Thus HUD may not award grants for college housing. The loan portion of the program is being reactivated with $155 million available from repayments of previous loans. Actual operations are expected to resume in 1977.

Scope of Program: Loans–Number of projects: 3,790; number of accommodations: 960,000; total loan amount: $3.8 billion.

Grants–Number of projects: 327; number of accommodations: 59,847; HUD-supported loan amount: $572,914,000; annual grant amount: $17,012,531.

ARMED SERVICES HOUSING FOR CIVILIAN EMPLOYEES

Federal aid to relieve shortage of family housing for civilian and military personnel near research and development installations.

Nature of Program: HUD insures mortgages on housing for civilian employees at isolated installations. The mortgages must meet the requirements for the basic home mortgage program (Section 203(b)). Housing cannot be insured under this program unless there is sufficient civilian demand to offset any personnel reduction at the installation concerned. Only qualified prospective owner-occupants may qualify for this mortgage insurance.

Applicant Eligibility: Employees of or military personnel assigned to the National Aeronautics and Space Administration and the Atomic Energy Commission, or contractors thereof.

Legal Authority: Section 809, National Housing Act (1934), (P.L. 73-479), as added by Armed Forces Housing for Civilian Employees (P.L. 84-574).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Cumulative activity through September 1977: 16,757 homes insured for a total value of $276,328,100.

HOUSING IN MILITARY IMPACTED AREAS

54

Federal mortgage insurance for housing in areas affected by military installations.

Nature of Program: Mortgage insurance for both single and multifamily housing near military installations, can be provided under Sections 203, 207, 213, 220, 221, 227, 234, 235, and 236. Such mortgages will be the obligation of the Special Risk Insurance Fund. Projects are eligible notwithstanding that the property is neither economically sound nor an acceptable risk, providing the benefits outweigh the risk of cost to the Government.

Applicant Eligibility: Sponsor eligibility will be determined by the Section of the National Housing Act under which application is made. Tenant eligibility is open.

Legal Authority: Section 238(c) of the National Housing Act, (1934), (P.L. 73-479), as amended by Section 309 of the Housing and Community Development Act of 1977, (P.L. 95-128).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area and Insuring Offices.

Current Status: This is a new program which is expected to supplant Section 810 of the National Housing Act which was designed for military and civilian personnel but has become inactive.

Scope of Program: Indicators of program volume are not yet available.

.OMES FOR SERVICEMEN

Federal mortgage insurance to allow a serviceman on active duty to purchase a home partially subsidized by his service.

Nature of Program: HUD allows the Department of Defense, Transportation and Commerce to pay the HUD mortgage insurance premium on behalf of servicemen on active duty under their jurisdiction. The mortgages may finance single-family dwellings and condominiums insured under standard HUD home mortgage insurance programs.

Applicant Eligibility: Servicemen on active duty in the U.S. Armed Forces or the U.S. Coast Guard, or employees of the National Oceanic and Atmospheric Administration who have served on active duty for two years.

Legal Authority: Section 222, National Housing Act (1934), (P.L. 73-479), as added by Section 124, Housing Act of 1954 (P.L. 83-560).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Over a 23-year period, 265,533 units have been insured for a value of $4,109,844,961.

HOMES FOR SERVICEMEN

Federal mortgage insurance to allow a serviceman on active duty to purchase a home partially subsidized by his service.

Nature of Program: HUD allows the Department of Defense, Transportation and Commerce to pay the HUD mortgage insurance premium on behalf of servicemen on active duty under their jurisdiction. The mortgages may finance single-family dwellings and condominiums insured under standard HUD home mortgage insurance programs.

Applicant Eligibility: Servicemen on active duty in the U.S. Armed Forces or the U.S. Coast Guard; or employees of the National Oceanic and Atmospheric Administration who have served on active duty for two years.

Legal Authority: Section 222, National Housing Act (1934), (P.L. 73-479), as added by Section 124, Housing Act of 1954 (P.L. 83-560).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active.

Scope of Program: Over a 23-year period, 265,533 units have been insured for a value of $4,109,844,961.

56 Federal mortgage insurance to finance homeownership for victims of major disasters.

Nature of Program: HUD insures home mortgages to replace former dwellings damaged too extensively by a major disaster for reconstruction. The insured loan may cover 100 percent of the FHA-appraised value of the property up to $14,400, and may repaid over 30 years (or 35 years if necessary provided that the dwelling is constructed under FHA or VA inspection). Interest may not exceed the FHA interest rate ceiling. The lender collects a small FHA application fee from the borrower.

Applicant Eligibility: Owner-occupants or tenants of single-family dwellings who lost their previous homes by flood, fire, hurricane, earthquake, storm, riot or civil disorder, or other catastrophe determined by the President to be a major disaster.

Legal Authority: Section 203(h), National Housing Act (1934), (P.L. 73-479), as added by Section 110, Housing Act of 1954, (P.L. 83-560).

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices.

Current Status: Active but rarely used

Scope of Program: Statistics on this program are included in the basic home mortgage program, Section 203(b)

DISASTER TEMPORARY HOUSING

Temporary housing for families requiring shelter in a major disaster area.

Nature of Program: HUD is one of several Federal agencies that cooperate in a coordinated and unified effort under the broad direction of the Federal Disaster Assistance Administration (FDAA) to aid disaster victims. HUD supplies temporary housing authorized by FDAA following a Presidential declaration of a "major disaster" or "emergency." The housing may consist of existing vacant units; the Minimal Repair Program (MRP), mobile homes, and temporary mortgage or rental payments. Special field offices are established in the disaster area to administer the program.

Applicant Eligibility: Households in a Presidentially-declared disaster area which have (1) been displaced from their homes by such a disaster, or (2) face imminent dispossession or eviction from their homes due to financial hardship resulting from such a disaster.

Legal Authority: Section 404, Disaster Relief Act of 1974 (P.L. 93-288).

Administering Office: Assistant Secretary for Housing–Federal Housing Commissioner, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area Offices and Disaster Field Offices.

Current Status: Active.

Scope of Program: Cumulative activity through September 30, 1977 96,261 households assisted in 42 States, Guam, Puerto Rico and Virgin Islands; 8,663 families currently in temporary housing in 17 States and Guam, Puerto Rico and Virgin Islands.

THE OFFICE OF INDEPENDENT LIVING FOR THE DISABLED

58

To assure that physically and mentally disabled people have equal access to federally assisted housing.

Nature of Program: The Office of Independent Living for the Disabled was established to promote awareness of the housing needs of people with disabilities. It provides the focus for developing policies, programs, standards and regulations which affect all of HUD's housing and community development programs.

OILD initiates public information and training programs within HUD and among professional and nonprofit organizations, which create awareness and emphasize the right of access by disabled persons to HUD-assisted housing and the HUD programs that can help the disabled obtain housing.

OILD also provides liaison with other Federal and governmental agencies to ensure that all their applicable regulations and issuances concerning disabled people are included in HUD's operating regulations.

Executive Order 11914 directs inclusion of nondiscrimination language in HUD programs regulations. OILD is responsible for coordinating HUD efforts to prohibit discrimination on grounds of disability in all programs administered by the Department.

Applicant Eligibility: Any individual or organization seeking specific information about housing or programs for the disabled can apply to OILD for information. Any disabled person aggrieved by housing discrimination in programs administered by HUD may also turn to OILD for assistance.

Legal Authority: HUD Secretary's general authority permits the establishment of an office to promote independent living for persons with disabilities.

In addition, Section 504, Rehabilitation Act of 1973, (P.L. 93-112); Executive Order 11914, mandates compliance by HUD in areas within the purview of OILD.

Administering Office: Assistant Secretary for Housing—Federal Housing Commissioner, Office of Independent Living for the Disabled, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: Administering Office.

Current Status: Active.

COMMUNITY ECONOMIC DEVELOPMENT

60

A Federal inter-agency demonstration combining Federal resources with private sector involvement to generate employment and revitalize cities.

Nature of Program: Now under way in ten cities with significant economic and unemployment problems, the program will demonstrate innovative public/private solutions to these problems over a two-year period. HUD, the Department of Commerce and the Department of Labor are jointly conducting the demonstration. The participating cities have outlined a variety of improvements such as the creation of economic development commissions, loan and bond programs to raise capital, industrial development corporations, industrial parks, and neighborhood commercial revitalization ideas. Each city will document its experience and make the record available to other cities with similar problems. All cities selected have problems and proposed development plans common to many communities.

Applicant Eligibility: Participants have already been chosen. Further demonstrations are not planned at this time.

Legal Authority: Title V, Housing and Urban Development Act of 1970 (P.L. 91-609).

Administering Office: Assistant Secretary for Policy Development and Research, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office; or contact the National Council for Urban Economic Development, the U.S. Conference of Mayors, and the National League of Cities, 1620 "Eye" St., N.W., Washington, D.C. 20006.

Current Status: Active.

Scope of Program: The ten cities participating in the demonstration will receive Federal grants totaling $4.82 million over the next two years. Nine of the ten cities will receive annual grants of $250,000 for the two-year period; one city will receive $160,000 per year. These grants, together with community development funds from HUD, economic development funds from Commerce, and job training funds from Labor will add up to an estimated $1 billion over the next two years.

EXPERIMENTAL HOUSING ALLOWANCE PROGRAM

A test of the efficacy of direct cash assistance to low-income households for housing.

Nature of Program: The Housing Allowance Experiments are testing the feasibility of direct cash assistance to lower-income households to help them afford adequate housing from among existing units in the private market.

The program seeks information on three fundamental questions: how families use their allowances; how the housing market responds to allowances; and how allowance programs can best be administered. The findings will be analyzed for meaning and national applicability.

Applicant Eligibility: All households with incomes of up to $7,500 in cities participating in the experiments with the exception of non-elderly single persons and student heads of households. But additional enrollment is currently open only in two of the housing markets, metropolitan Green Bay, Wis., and South Bend, Ind.

Legal Authority: Sections 501 and 504, Housing and Urban Development Act of 1970 (P.L. 91-609).

Administering Office: Assistant Secretary for Policy Development and Research, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Active.

Scope of Program: A 10-year program initiated in 1972 involving up to 20,000 households in 12 metropolitan areas. Overall cost approximately $175 million.

LEAD-BASED PAINT POISONING PREVENTION RESEARCH

62

Nature of Program: In cooperation with other Federal agencies, HUD is determining the nature and extent of lead-based paint poisoning in children in the United States and developing more efficient ways to eliminate this hazard from the child's environment.

HUD invites proposals that meet research and demonstration requirements specified by the agency. In exceptional cases unsolicited proposals for innovative research are considered.

HUD also cooperates with the Department of Health, Education and Welfare, which pays local communities to screen children for lead poisoning. The HUD program office acts as a clearinghouse for information on the problems of lead-based paint hazards and their solution.

Applicant Eligibility: Experts with knowledge of the problems are periodically invited to respond to HUD requests for proposals. HUD also reviews unsolicited proposals from organizations or individuals pursuing research in the field.

Legal Authority: Lead-Based Paint Poisoning Prevention Act of 1971 (P.L. 91-695) amended in 1973 (P.L. 93-151) and 1976 (P.L. 94-317).

Administering Office: Assistant Secretary for Policy Development and Research, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Active.

Scope of Program:
Active projects or contracts: 20
Completed projects or contracts: 12
Funding through fiscal year 1977: approximately $7.5 million

748 SCRA MTGS WITH HUD-SR CITIZEN DEDUCTIONS

MODULAR INTEGRATED UTILITY SYSTEMS (MIUS)

Demonstration projects supplying all utility services to residential communities from a single on-site plant, using natural resources more efficiently and reducing adverse environmental impact.

Nature of Program: The Modular Integrated Utility System (MIUS) furnishes essential utility services for residential communities by recycling energy and "packaging" into one processing plant six functions: electricity, space heating and air conditioning, solid and liquid waste processing, and potable water.

Conventional methods of generating electricity waste about 65 percent of the energy in excess heat. MIUS recovers better than half of this waste energy and uses it for space heating, air conditioning, water heating, water treatment, and liquid waste treatment. An additional 5-10 percent is saved by recycling solid waste for its energy content. MIUS also reduces thermal, air, solid waste and water pollution.

Collaborating with HUD in this program are the National Aeronautics and Space Administration, the Atomic Energy Commission, the National Bureau of Standards, the Environmental Protection Agency, the Departments of Defense and Health, Education, and Welfare, and the Energy Research and Development Administration.

Applicant Eligibility: Not applicable

Legal Authority: Section 501 and 502, Title V, Housing and Urban Development Act of 1970 (P.L. 91-609)

Administering Office: Assistant Secretary for Policy Development and Research, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Active

Scope of Program: Eleven agency agreements or project contracts are in place or in process.

$9,462,000 in HUD funds have been authorized for 8 years (through 1980). This does not include other agency funding.

NATIONAL INSTITUTE OF BUILDING SCIENCES (NIBS)

64

A new, nongovernmental entity to provide leadership and technical expertise for the voluntary improvement of the Nation's building codes and standards.

Nature of Program: The main purpose of this nonprofit organization is to encourage new, cost-saving technology by promoting widely acceptable building standards and building product performance criteria.

Establishment of NIBS follows growing recognition that high building costs are caused partly by proliferating local building codes and wide variance in building product performance criteria.

NIBS will coordinate public and private groups active in building product testing, standard-setting and code enforcement. The Institute will disseminate data on building technology, encourage developers of new products and techniques to submit them for testing before marketing, and will promote better testing methods.

The Institute is currently governed by a Board of Directors appointed by the President and confirmed by the Senate. Federal agencies are authorized to contract with it for specific projects.

Applicant Eligibility: Not applicable.

Legal Authority: Section 809, Housing and Community Development Act of 1974 (P.L. 93-383).

Administering Office: Office of Policy Development and Research, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: Otis M. Mader, Vice President, Aluminum Company of America, 2928 Alcoa Building, Pittsburgh, PA 15219, (412) 553-3875.

Mr. Mader is Chairman of the 18-member Board of Directors, sworn in by former Secretary Hills on July 9, 1976.

Current Status: Just activated; formulating a program and hiring staff.

Scope of Program: Congress has appropriated $1 million for FY 1978. The law directs NIBS to become self-sustaining through fees for its services at the earliest feasible time.

SOLAR HEATING AND COOLING DEMONSTRATION PROGRAM

To encourage the use of solar technology in the general housing market.

Nature of Program: As part of the National Solar Energy Program administered by the Energy Research and Development Administration (ERDA), HUD is responsible for a demonstration of the practical application of solar energy in residential heating and cooling. HUD implements its program by: (1) residential demonstrations in which solar equipment is installed in both new and existing dwellings, (2) development of performance criteria and certification procedures for solar heating and cooling equipment; (3) market development to encourage acceptance of solar technologies by the housing industry; and (4) data gathering and dissemination on demonstration and market development efforts.

Applicant Eligibility: HUD periodically invites participation by builder/developers, State and local agencies and other qualified producers of housing for sale on the open market. Grants are currently not made to private individuals or to builders whose projects have been pre-sold.

Legal Authority: Solar Heating and Cooling Act of 1974 (P.L. 93-409).

Administering Office: Assistant Secretary for Policy Development and Research, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office or write: Solar Heating, P.O. Box 1607, Rockville, Md 20850.

Current Status: Active.

Scope of Program: Number of demonstrations (first to fourth cycles) approximately 375 grants, involving approximately 4,000 dwelling units. Total five-year program through fiscal year 1979: $49,000,000 (est.).

TENANT MANAGEMENT PROGRAM

66

A demonstration of a new approach to upgrading day-to-day operation of low-rent public housing.

Nature of Program: This three-year demonstration program is testing the effectiveness of tenant management as a means of improving the operating performance of public housing, creating new employment opportunities for tenants, reducing social deviance, increasing resident satisfaction, and generally enhancing the community aspects of public housing.

The program is modernizing buildings and grounds and providing salaries for tenant employees, social services, and training and technical assistance to upgrade tenant management skills and public housing authority management capabilities. Eventually, it aims to transfer to tenants primary responsibility in four critical areas of housing management: budget preparation and control, policy development, management operations and tenant relations.

Six public housing authorities are participants in the demonstration which has been designed and will be conducted, monitored, and evaluated by the nonprofit Manpower Demonstration Research Corporation. HUD and the Ford Foundation together are funding the demonstration.

Applicant Eligibility: Participants have already been chosen. No further demonstrations are planned.

Legal Authority: Sections 501 and 502, Title V, Housing and Urban Development Act of 1970 (P.L. 91-609); U.S. Housing Act of 1937 (P.L. 75-412), as amended by Section 6 of Housing and Community Development Act of 1974 (P.L. 93-383).

Administering Office: Assistant Secretary for Policy Development and Research, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: Manpower Demonstration Research Corp., 3 Park Avenue, New York, N.Y. 10016, or see administering office.

Current Status: Active.

Scope of Program: The seven housing developments participating in the demonstration contain 4,780 dwelling units with about 19,000 low-income residents. HUD has allocated a total of $20.2 million: $15 million in Modernization funds, and $5.2 million for on-site administrative expenses. A Ford Foundation grant supplements $600,000 in HUD funds used to manage the demonstration. The project spans three years, ending December 31, 1978.

URBAN HOMESTEADING

38

A national demonstration program transferring HUD properties to local governments to revitalize declining neighborhoods and reduce the Federal inventory of defaulted mortgages.

Nature of Program: Vacant HUD-held properties are transferred to local governments which developed homesteading plans approved by HUD. Each city had to devise a plan ensuring the availability of rehabilitation financing, technical assistance to homesteaders, and all essential municipal services to the target neighborhoods.

The local governments selected for the program then "sell" these properties for a token sum (as low as $1.) to individuals or families called "homesteaders." The homesteader must make repairs to meet minimum health and safety standards, then occupy the property as a principal residence for at least three years. Within 18 months of occupying the property, he must bring it up to local code standards. When all these requirements have been met, the homesteader receives full title to the property.

Applicant Eligibility: Homesteaders must be equitably selected by each participating city. Cities are chosen as demonstration sites by HUD after submitting acceptable homesteading plans.

Legal Authority: Section 810, Housing and Community Development Act of 1974 (P.L. 93-383); Section 20, Housing Authorization Act of 1976 (P.L. 94-375).

Administering Office: Assistant Secretary for Policy Development and Research, Urban Homesteading Demonstration Program, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Being converted to operating program. (See Office of Community Planning and Development.)

Scope of Program: *Number of projects:* approximately 40 demonstrations cities to date. *Funding:* $5 million was appropriated for FY 1976; HUD also allocated $5 million in rehabilitation loan funds to support the program in FY 1976. The Housing Authorization Act of 1976 authorized an additional $6.25 million for the transition quarter and FY 1977 to support the transfer of HUD-acquired properties to communities participating in the Urban Homesteading Demonstration Program as well as to some new participants. For FY 1978, $15 million has been appropriated. The 23 cities originally participating in the program will receive an additional $3.75 million worth of HUD-owned properties and an additional $7.5 million in rehabilitation loan funds, while new program participants will receive $2.5 million worth of HUD-owned properties and $3.5 million in rehabilitation loans, in their first year, with additional amounts expected later.

URBAN REINVESTMENT TASK FORCE

70

A public-private coalition to stimulate and aid investment in inner city revitalization.

Nature of Program: The Urban Reinvestment Task Force is a joint effort of HUD and the Federal Home Loan Bank Board, initiated in 1974, to demonstrate how a declining but still viable neighborhood can be revitalized through a partnership of residents, financial institutions and local government. With the aid of HUD research and demonstration funds, the Task Force supports two different programs: Neighborhood Housing Services (NHS) and Neighborhood Preservation Projects (NPP).

The major role of the Task Force in NHS is that of catalyst, bringing together members of local partnerships. A high-risk revolving loan fund helps homeowners to make repairs. For Neighborhood Preservation Projects, the Task Force supplements funding support for promising local preservation programs to determine their potential for application elsewhere.

Applicant Eligibility: Community groups, financial institutions, city governments, foundations, or a combination of these.

Legal Authority: Title V, Housing and Urban Development Act of 1970 (P.L. 91-609).

Administering Office: Assistant Secretary for Policy Development and Research, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: Urban Reinvestment Task Force, 1120 19th St., N.W., Washington, D.C. 20036, (202) 634-1689.

Current Status: Active.

Scope of Program: Over the life of the program, from May 1974 through August 1979, HUD is authorized to spend $14,625,000 and expects to fund a total of 76 projects.

Nature of Programs: HUD has six major areas of research that will require analysis by urban scholars. These outline descriptions pinpoint areas in which HUD invites participation:

• cost of housing: we are interested in looking at ways to reduce the component costs of housing (costs of developing, building, financing and operating) as well as more efficient ways of helping lower-income people afford housing through subsidy programs. We want to examine the impact on housing costs of components such as building codes, environmental reviews, settlement costs, energy conservation, secondary finance markets, large-scale land acquisition and development. Costs and effectiveness of alternative subsidy programs are also important. This research will specifically influence the direction that HUD policy will take in the next years.

• alternative housing finance mechanisms: we will be analyzing the economic impact of potential legislation on alternative mortgage instruments, financial institution regulation and reform, and conventional GNMA mortgage-backed securities. Our research will provide HUD with the capacity to develop initiatives as well as to respond to the many policy concerns in the housing finance system. We plan to convene panels of academic experts to help place policy questions posed by HUD into the context of a larger view of the housing finance system. These panels will help determine where research can be particularly fruitful.

urban economic development and public finance: we will be looking at questions relating to the fiscal viability of central cities and how cities are affected by Federal policies. We will seek to discover workable mechanisms for leveraging private-sector investments and what their advantages are. We plan to examine the role of small business in community development, changes in capital investment by cities, questions of development finance, efforts to coordinate available Federal and local resources, and the impact of Federal tax and grant policies on central cities.

• special users: elderly and handicapped. we will be addressing how best to provide housing and housing-related services to people who have special requirements caused by age or physical condition. What are the optimal strategies for assisting these people? What service package is essential to the success of special programs designed to reach them? Specifically, we want to examine HUD's role in helping elderly people keep their own homes and in helping handicapped people have access to buildings. We will look at the housing-related services that elderly people consume and the housing maintenance decisions that they must make. We will inventory the current housing situation to determine the extent to which people with disabilities have access to federally subsidized housing. We will also examine the need for and costs of retrofitting public buildings so that handicapped people will be assured of access.

• neighborhood reinvestment and revitalization: we will be looking at the process of neighborhood change and at intervention techniques designed to preserve neighborhoods by preventing and reversing decline. We will, for example, study the roles of the private sector and local residents in promoting revitalized neighborhoods, issues of acquisition and disposition of abandoned property, ways to stimulate reinvestment and mortgage lending in deteriorating neighborhoods.

• site selection/integration: we will be addressing issues of economic and racial freedom of choice in housing and learning how changes in demographics may affect trends in location patterns. We will try to determine what interventions are feasible, under what conditions residential dispersion and mobility occur, how to stimulate more imaginative designs to achieve lower-density housing and to integrate housing into the neighborhood environment. Specifically, we will conduct an evaluation of site and neighborhood standards for HUD-assisted programs. We hope to determine how alternative guidelines will affect racial balance in the public schools, neighborhood transition, and the availability of social services. Of equal importance, we will examine how alternate site selection policies would affect the composition of the population served by HUD's housing programs.

Applicant Eligibility: Not applicable.

Legal Authority: Section 501 and 502, Title V, Housing and Urban Development Act of 1970 (P.L. 91-609).

Administering Office: Assistant Secretary for Policy Development and Research, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Projects being readied for solicitations of interest.

Scope of Program: Funding levels to be determined.

New Communities

NEW COMMUNITIES

76

To encourage development of well-planned, diversified and economically sound new communities.

Nature of Program: HUD may provide a variety of financial and technical assistance to the developers of new communities undertaken in central cities, metropolitan suburbs and rural areas. Development must be in accord with comprehensive areawide planning, enhance the environment, contribute to the welfare of the area, provide for low- and moderate-income housing, and encourage social innovation and improved technology.

The major financial assistance program permits HUD to guarantee bonds, debentures, notes or other obligations issued by public and private developers to finance land acquisition and development of new communities. In the case of public land development agencies, guarantees for the principal obligation cannot exceed 100 percent of HUD's estimate of the value of real property before development and the cost of land development. For private developers, guarantees may not exceed 80 percent of the estimated value of real property before development plus 90 percent of the estimated cost of land development. However, the amount of guarantee cannot exceed $50 million for any single project.

HUD also issues Certificates of Eligibility to developers of new communities who do not require loan guarantee assistance but have new community development programs that meet the standards of the Urban Growth and New Community Development Act of 1970 (Title VII).

Federally approved new communities are eligible to receive Community Development Block Grant funds from the Secretary's discretionary fund.

Applicant Eligibility: Private new community developers and public land development agencies, including State, local or regional public bodies, authorized under State or local law to develop new communities.

Legal Authority: Title VII, Housing and Urban Development Act of 1970 (P.L. 91-609); and Title IV, Housing and Urban Development Act of 1968 (P.L. 90-448).

Administering Office: Community Development Corporation, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Of the 13 new community projects that received guarantee assistance, four are being phased out and nine are in various stages of development. Two other projects under development have received Certificates of Eligibility. Applications for assistance have been suspended since January 1975. All available resources are being applied to ongoing developments.

Scope of Program: HUD loan guarantees of new community obligations outstanding as of September 30, 1977 total $249 million.

Fair Housing and Equal Opportunity

80 Employment and Business Opportunity
81 Equal Employment Opportunity
83 Equal Opportunity in HUD-Assisted Programs
84 Equal Employment Opportunity in HUD-Funded Agencies
85 Fair Housing
87 Voluntary Compliance

EMPLOYMENT AND BUSINESS OPPORTUNITY

80 A program to ensure the employment of low-income residents and participation of small business concerns in HUD-assisted projects.

Nature of Program: Applicants, recipients, contractors and subcontractors in a HUD-funded program must provide opportunities for training and employment to low-income residents of areas where HUD-assisted projects are located. They must also award contracts for work on any such project to business concerns located in or substantially owned by residents of that area. A clause certifying compliance must be included in all work contracts.

Applicant Eligibility: Low-income residents and small business concerns in HUD-assisted project areas. Grievances alleging noncompliance may be filed at HUD Area and Insuring Offices.

Legal Authority: Section 3, Housing and Urban Development Act of 1968 (P.L. 90-448); Section 118, Housing and Community Development Act of 1974 (P.L. 93-383).

Administering Office: Assistant Secretary for Fair Housing and Equal Opportunity, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area and Insuring Offices.

Current Status: Active.

Scope of Program: In fiscal year 1977, 1,963 compliance reviews were conducted under regulations of Executive Order 11246 and Section 3, HUD Act of 1968. Complaints handled totaled 136, of which 54 were resolved.

EQUAL EMPLOYMENT OPPORTUNITY

A program to ensure that Federal and federally-assisted contractors do not discriminate in employment.

Nature of Program: Executive Order 11246 directs all Federal agencies to promote and ensure equal opportunity without regard to race, color, religion, sex or national origin, for everyone employed or seeking employment with Federal contractors or recipients of Federal assistance.

HUD is responsible to ensure that the Order is enforced as it affects HUD contracts and housing programs and the nonexempt construction contracts of HEW, VA and Commerce.

Affirmative action is required to ensure equal opportunity for minorities and women in employment. HUD's direct and federally-assisted construction contractors and subcontractors must comply with the Equal Opportunity Clause and applicable Federal Bid Conditions, as well as to the HEW, VA, and Commerce-assisted or direct construction contracts. Any person or group of persons suspecting employment discrimination by a covered construction contractor may file a complaint.

Applicant Eligibility: This program applies to employment under HUD's contracts for supplies and services, and all direct HUD contracts including research and development. It also applies to HUD's direct or federally-assisted construction contracts. Since HUD also administers the EO 11246 Construction Compliance Program for HEW, VA, and Commerce, the program also covers HEW, VA, and Commerce direct or federally-assisted construction contracts. Any person or class of persons suspecting employment discrimination by a covered construction contractor because of race, color, religion, sex or national origin may file a complaint.

Legal Authority: Executive Order 11246, of September 24, 1965, as amended by Executive Order 11375, of October 13, 1967.

Administering Office: Assistant Secretary for Fair Housing and Equal Opportunity, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Regional and Area Offices.

Current Status: Active.

Scope of Program: In fiscal year 1977, 1,963 compliance reviews were conducted under regulations of Executive Order 11246 and Section 3, HUD Act of 1968. Complaints handled totaled 136, of which 54 were resolved.

EQUAL OPPORTUNITY IN HUD-ASSISTED PROGRAMS

A program to assure equal opportunity to participate in and benefit from HUD-funded activities without regard to race, color, or national origin.

Nature of Program: HUD ascertains the extent to which its programs comply with the Federal law forbidding discrimination in all federally-funded activities.

The Office of Fair Housing and Equal Opportunity investigates complaints and reviews HUD programs to eliminate discrimination. Changes or new policies are developed to make HUD activities responsive to the problems of minorities and to promote their participation in HUD-assisted activities.

Under the Community Development Block Grant Program, discrimination on the basis of sex is also forbidden.

Technical assistance is available to State and local agencies with civil rights problems in HUD-assisted programs. Noncomplying HUD applicants or recipients are given the opportunity of a hearing; if that results in a finding of discrimination, Federal assistance for the program may be terminated.

Applicant Eligibility: Any HUD-funded activity, except contracts of insurance or guaranty, is subject to Title VI.

Any person or group suspecting discrimination in a HUD-assisted program because of race, color or national origin, may file a complaint.

Legal Authority: Title VI, Civil Rights Act of 1964 (P.L. 88-352), Section 109, Housing and Community Development Act of 1974 (P.L. 93-383).

Administering Office: Assistant Secretary for Fair Housing and Equal Opportunity, Development of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Regional and Area Offices.

Current Status: Active.

Scope of Program: In fiscal year 1977, 41 complaints were received and 32 closed; 235 compliance reviews were started and 190 closed. An additional 46 complaints were received and 54 compliance reviews begun under the Community Development Block Grant Program's Section 109.

EQUAL EMPLOYMENT OPPORTUNITY IN HUD-FUNDED AGENCIES

84

A program to assure that local government agencies funded by HUD will not discriminate in employment.

Nature of Program: HUD must assure that all agencies receiving HUD financial assistance comply with the terms and conditions of the equal employment opportunity clause of HUD's loan and grant contracts. This clause requires that HUD-funded agencies, in carrying out their programs, not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. It also requires them to take affirmative action to assure applicants their rights.

HUD periodically reviews its programs to determine compliance and conducts complaint investigations. Where there is an apparent failure to carry out the conditions of the contract clause, HUD attempts to secure voluntary compliance. If that fails, a hearing is held, which may lead to the agency being barred from further contracts with HUD.

Applicant Eligibility: All applicants or recipients who enter into contracts with HUD are subject to the inclusion of an equal employment opportunity clause and are required to carry out the terms and conditions of that clause.

Any person or class of persons suspecting employment discrimination by a HUD-funded agency because of race, color, national origin, sex or religion may file a complaint.

Legal Authority: Section 7(d), Department of Housing and Urban Development Act of 1965 (P.L. 89 174).

Administering Office: Assistant Secretary for Fair Housing and Equal Opportunity, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Regional and Area Offices.

Status: Active.

Scope of Program: Approximately 12 complaints and 3 compliance reviews were closed during fiscal year 1977.

FAIR HOUSING

A program to assure fair housing throughout the United States.

Nature of Program: HUD administers the law that prohibits discrimination in housing on the basis of race, color, religion, sex and national origin, investigating complaints of housing discrimination and attempting to resolve them through conciliation. HUD refers complaints to State and local fair housing agencies when they afford protection substantially equivalent to Federal law.

Technical assistance is available to State and local groups, private or public, profit and nonprofit, to help them prevent or eliminate discriminatory housing practices. Educational conferences with the housing industry, governmental and private groups interpret and explain the laws.

Executive Order 11063 prohibits discrimination because of race, color, creed, or national origin, in housing and related facilities which are owned or operated by the Federal Government or housing and related facilities provided by Federal financial assistance, including mortgage insurance and guaranty programs, or in the lending practices of lending institutions which make loans on property insured or guaranteed by the Federal Government. The Department receives complaints and conducts compliance reviews under Executive Order 11063.

Applicant Eligibility: Any individual aggrieved by housing discrimination may file a complaint with any HUD office in person, by mail, or by telephone. Pursuant to Title VIII an aggrieved party may also file suit in a Federal or local Court, seeking injunctive relief, actual damages and up to $1,000 in punitive damages

Legal Authority: Title VIII, Civil Rights Act of 1968 (P.L. 90-284), as amended; Executive Order 11063.

Administrative Office: Assistant Secretary for Fair Housing and Equal Opportunity, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office

Current Status: Active.

Scope of Program: Some 3,213 Title VIII complaints were received in fiscal year 1977 which, when added to 1,019 complaints on hand, totaled 4,232 complaints. A total of 2,774 complaints were processed. Conciliation was undertaken in 484 complaints, of which 256 were successful.

VOLUNTARY COMPLIANCE

Voluntary compliance with fair housing and with the employment of minority business enterprises in HUD-related activities.

Nature of Program: HUD promotes voluntary compliance in the private sector and with other Federal agencies in two areas: fair housing nationwide and the employment of minority business enterprise in HUD-related activities. HUD executes formal agreements both locally and nationwide.

Applicant Eligibility: Trade and professional organizations in housing and related fields, including homebuilders, realtors, and lending institutions; and other Federal agencies.

Legal Authority: Title VIII, Sections 809 and 808(e)(d), Civil Rights Act of 1968 (P.L. 90-284); Executive Order 11625.

Administering Office: Assistant Secretary for Fair Housing and Equal Opportunity, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Active.

Scope of Program: Plans and agreements negotiated and approved in fiscal year 1977: 237; approximately the same number is anticipated for fiscal 1978.

HUD program funds on deposit in minority-owned banks in fiscal 1977: $38.6 million; the same is anticipated for fiscal 1978.

HUD program funds awarded or granted to minority entrepreneurs in fiscal 1977: $150 million; approximately $165 million anticipated for fiscal 1978.

Business opportunities for minority entrepreneurs under the Community Development Block Grant program for fiscal 1977: $45 million; a 15 percent increase is anticipated for fiscal 1978.

Neighborhoods, Voluntary Associations and Consumer Protection

90 Neighborhood and Consumer Affairs
91 Counseling for Tenants and Homeowners
92 Community Services for Tenants
93 Interstate Land Sales Registration
94 Mobile Home Construction and Safety Standards
95 Real Estate Settlement Procedures
96 Lead-Based Paint Poisoning

NEIGHBORHOOD AND CONSUMER AFFAIRS

90

The office of Neighborhood and Consumer Affairs is responsible for ensuring participation by neighborhood, voluntary, and other nongovernmental organizations in development, revitalization, and stabilization of urban and regional areas. It is also responsible for ensuring that consumers' basic rights are considered in all housing and community development activities and for encouraging and facilitating consumer access to the Department's decisionmaking process.

Nature of Program: This office was created in 1977 to pursue five primary objectives. It assists neighborhood development organizations to improve their management capabilities; helps formulate local cooperative efforts; and encourages voluntary and other nongovernmental organizations to work with HUD on areas of mutual interest and concern. It reviews present and proposed departmental policies, elicits consumer comment, and makes recommendations based on analyses of those contributions. The office also maintains contact with a network of consumer groups developed in conjunction with HUD field offices, and monitors the departmental consumer complaint response system.

Applicant Eligibility: Not applicable.

Legal Authority: Sections 2 and 4(a), among other authorities, of the Housing and Community Development Act (P.L. 89-174).

Administering Office: Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Protection, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Active.

Scope of Program: Nationwide.

COUNSELING FOR TENANTS AND HOMEOWNERS

Free counseling for owners and tenants of HUD-insured housing.

Nature of Program: HUD-approved agencies counsel prospective home buyers and homeowners with respect to property maintenance, household budget and debt management, and such other matters as may assist them in improving their housing conditions and meeting the responsibilities of tenancy or homeownership. The counseling assistance is provided by qualified agencies voluntarily and generally without remuneration from HUD.

HUD is ***authorized*** to counsel buyers, owners and tenants of all HUD-assisted housing, but the agency is ***required*** to counsel homeowners assisted under the Section 235 homeownership program, and owners of single-family homes with HUD-insured mortgages under Title II of the National Housing Act (the latter requirement added in the 1977 Housing and Community Development Act). HUD may provide these services directly or may pay private or public organizations with special competence and knowledge in counseling low- and moderate-income families. HUD also compiles a counseling information package to be distributed by lenders to prospective buyers under this program.

Applicant Eligibility: Prospective home buyers, homeowners and tenants under HUD-assisted housing programs are eligible for counseling; public and private (but generally nonprofit) agencies may apply for HUD approval.

Legal Authority: National Housing Act, (1934) (P.L. 73-479), as amended by Sections 101(a) and 102(a), Housing and Urban Development Act of 1968 (P.L. 90-448); Section 811(a) Title I Housing and Community Development Act of 1974 (P.L. 93-383); Housing and Community Development Act of 1977 (P.L. 95-128).

Administering Office: Asst. Secretary for Neighborhoods, Voluntary Associations and Consumer Affairs, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area and Insuring Offices.

Current Status: Active.

Scope of Program: Approximately 450 HUD-approved agencies have provided counseling services to owners and tenants of HUD-assisted housing; 26 agencies are directly funded by HUD. Three million dollars have been appropriated for this purpose in fiscal year 1977.

COMMUNITY SERVICES FOR TENANTS

92

Increased resources to improve the quality of life for tenants.

Nature of Program: HUD furnishes technical assistance to local management of public housing and HUD-assisted housing. Federal and community agencies provide social services, employment opportunities and recreational programs for tenants through agreements negotiated nationally and collaboration developed at regional, State and local levels.

Applicant Eligibility: Tenants in public housing and other HUD-assisted multifamily rental housing.

Legal Authority: Section 3, (4), U.S. Housing Act of 1937 (P.L. 75-412).

Administering Office: Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Protection, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: HUD Area and Insuring Offices.

Current Status: Active.

Scope of Program: In addition to HUD's Technical Assistance, the Departments of Justice, Labor, and Health, Education and Welfare have contributed over $150 million in the five fiscal years ending June 30, 1976. These combined efforts have served some 3,000 public housing authorities, managing 1,400,000 units housing more than 3 million tenants.

INTERSTATE LAND SALES REGISTRATION

Protects consumers against fraudulent practices of land developers and promoters.

Nature of Program: HUD is responsible for enforcing the laws governing interstate land sales registration. Developers and their agents are prohibited from selling or leasing, by mail or by other means in interstate commerce, any lot in any subdivision of 50 or more lots unless two conditions have been met.

(1) A statement of record must be filed with HUD, listing information about the ownership of the land, the state of its title, its physical nature, the availability of roads and utilities, and other matters.

(2) A printed property report, containing pertinent extracts from the statement of record, must be furnished to the purchaser at least 72 hours before signing an agreement for purchase or lease.

Willful violation is subject to criminal penalties of imprisonment for not more than five years, or a fine of not more than $5,000, or both. A suit for damages may be brought in any State or Federal Court for the district in which the defendant may be found or in which the transaction took place. HUD may seek an injunction against any developer that it can show is violating or about to violate the law.

Applicant Eligibility: Not applicable.

Legal Authority: Title XIV, Housing and Urban Development Act of 1968 (P.L. 90-448).

Administering Office: Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Affairs, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Active.

Scope of Program: Number of filings: 12,905 as of November, 1977. Number of subdivisions: approximately 8,747 as of November, 1977.

Federal standards to protect the safety and health of mobile homeowners.

Nature of Program: In consultation with the Consumer Product Safety Commission, HUD issues Federal mobile home construction and safety standards to improve the quality and durability of mobile homes. The standards take into consideration existing State and local laws but preempt those which are not identical to the Federal standards. They apply to all mobile homes manufactured after June 15, 1976. Standards may be enforced by HUD through the Attorney General or the State. HUD may inspect factories and obtain records needed to enforce such standards. If a mobile home does not conform to Federal standards, the manufacturer must repurchase the home or bring it up to standards. Modular homes manufactured in a factory, transported to a building site, and placed on a permanent site-built foundation may, through a certification process, be exempted from Federal mobile home construction and safety standards if the homes meet other specified equivalent codes.

The law prohibits use of the mails and interstate commerce to sell or lease mobile homes that do not meet safety standards. Civil and criminal penalties also are provided where violation of such prohibitions occur.

Manufacturers must notify consumers, dealers and HUD of hazardous defects. The manufacturer must correct the defect if it presents an unreasonable risk of injury or death.

Applicant Eligibility: Not applicable.

Legal Authority: Title VI, Housing and Community Development Act of 1974 (P.L. 93-383). Housing and Community Development Act of 1977 (P.L. 95-128).

Administering Office: Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Affairs, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Active.

Scope of Program: The standards apply to mobile homes eight or more feet wide and 32 or more feet long built on a permanent chassis manufactured after June 15, 1976.

REAL ESTATE SETTLEMENT PROCEDURES ACT (RESPA)

Protects home buyers by requiring advance estimates of settlement costs, limiting mandatory escrow payments for insurance and taxes, and prohibiting referral fees and kickbacks.

Nature of Program: All borrowers in real estate settlements involving federally related mortgage loans must receive a good faith estimate of settlement costs from the lender when they file their loan application. They must also be given a HUD-prepared booklet containing information about real estate and loan transactions, various services, cost comparisons and information about RESPA at least one business day prior to the settlement date. A settlement statement, following the form prescribed by HUD, must be used at settlement to show the actual costs.

RESPA prohibits referral fees and kickbacks and forbids sellers to require title insurance from a particular title company. Lenders cannot require borrowers to deposit more than 12 months' taxes and insurance payments in an escrow account. The law also requires HUD to undertake studies and demonstrations relating to settlement costs and land recordation systems.

Applicant Eligibility: All lenders of federally-related home mortgages.

Legal Authority: Real Estate Settlement Procedures Act of 1974, as amended in 1975 (P.L. 93-533 and 94-205).

Administering Office: Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Affairs, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Active.

Scope of Program: Limited only by the number of federally-related mortgage loans. A federally-related mortgage loan is one made by any lender insured or regulated by any Federal agency, or loan guaranteed or insured by a Federal agency.

LEAD-BASED PAINT POISONING PREVENTION

96

To eliminate lead-based paint hazards in federally-owned or assisted residential construction or rehabilitation.

Nature of Program: Prohibits the use of any paint containing more than five-tenths of 1 per centum lead by weight (calculated as lead metal) in the total nonvolatile content of the paint or the equivalent measure of lead in the dried film of paint already applied or both; or with respect to paint manufactured after June 22, 1977 prohibits the use of any paint containing more than six one-hundreths of 1 per centum lead by weight (calculated as lead metal) in the total nonvolatile content of the paint or the equivalent measure of lead in the dried film of paint already applied. For HUD-assisted housing constructed prior to 1950, eliminate as far as practicable the immediate hazard of lead-based paint to which children may be exposed, and warn purchasers and tenants of such housing of the hazards of lead-based paint.

Legal Authority: Title III of the Lead-Based Paint Poisoning Prevention Act of 1971 (P.L. 91-695), as amended in 1973 (P.L. 93-151) and 1976 (P.L. 94-317).

Administering Office: Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Protection, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Active.

Scope of Program: Nationwide.

Federal Insurance Administration

98 Federal Crime Insurance
99 National Flood Insurance
100 Federal Riot Reinsurance

FEDERAL CRIME INSURANCE

98

Burglary and robbery insurance at affordable rates in States where the cost or availability of crime insurance is a critical problem.

Nature of Program: Federal Crime Insurance enables individuals and businesses to purchase affordable insurance against burglary and robbery losses. Policies are not cancelled because of losses, and rates are uniform within entire metropolitan areas. A minimum of protective devices is, however, required. The program is available in 21 States and the District of Columbia, where the cost or availability of crime insurance is a critical problem.

Residential burglary and robbery insurance is available in amounts up to $10,000, and businesses can purchase as much as $15,000 of burglary and/or robbery coverage.

Applicant Eligibility: A property owner, tenant, or businessman within an eligible State or the District of Columbia may apply for crime insurance. To be eligible for burglary insurance coverage, the premises must meet the protective device requirements. Protective devices are not required for commercial robbery insurance.

Legal Authority: Urban Property Protection and Reinsurance Act of 1968 (P.L. 90-448), as amended by Housing and Urban Development Act of 1970 (P.L. 91-609).

Administering Office: Federal Insurance Administration, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: Call toll-free 800-638-8780, or write to administering office.

Current Status: Active.

Scope of Program: Policies in force: 37,331 as of July 31, 1977. Amount of insurance: $245,700,000 as of July 31, 1977.

NATIONAL FLOOD INSURANCE

Federal insurance for flood-prone areas coupled with local flood plain management to reduce flood losses.

Nature of Program: HUD makes flood insurance available to property owners in flood-prone areas. The communities in which these flood-prone areas are located are required to administer flood plain management programs to minimize future flood damage. The insurance is contingent on the community's formal resolution of participation in the program.

Also contingent on a community's participation in the flood insurance program, is assistance under the Federal Disaster Relief Act following a flood. And federally-related lenders must inform borrowers on properties located in a flood-hazard area that flood disaster assistance will not be available in the event of a flood disaster.

Applicant Eligibility: Communities, i.e., States or their political subdivisions or areas, Indian tribes or tribal organizations, Alaska Native villages or authorized native organizations which have the authority to adopt and enforce flood plain management regulations for the areas within their jurisdiction.

Property owners in participating communities may apply for flood insurance through a licensed agent or broker.

Legal Authority: National Flood Insurance Act of 1968 (P.L. 90-448), as amended by Housing and Urban Development Act of 1968 (P.L. 91-152) and Housing and Community Development Act of 1974 (P.L. 93-383); Flood Disaster Protection Act of 1973 (P.L. 93-234), as amended by Housing Authorization Act of 1976 (P.L. 94-375).

Administering Office: Federal Insurance Administration, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: FIA Regional Offices, or call toll-free 800-424-8872.

Current Status: Active.

Scope of Program: Policies in force: 766,130 as of April 30, 1976. Amount of insurance: $21,528,000,000 as of April 30, 1976. Number of participating communities: 14,500 as of June 30, 1976.

FEDERAL RIOT REINSURANCE

100 Reinsurance for private property insurance companies against damage from riot and civil disorder.

Nature of Program: HUD reinsures insurance companies for excess losses in standard lines of property insurance coverage resulting from riots or civil disorders. Reinsured losses are shared among the insurance companies, the States, and the Federal Government. The sale of reinsurance is limited to companies that cooperate with State insurance authorities in FAIR plans. These are Statewide plans to assure property owners Fair Access to Insurance Requirements.

Minimum criteria for FAIR plans are specified by law, but State insurance authorities are expected to adopt whatever additional provisions are needed to make property insurance readily available to urban areas. FAIR plans are administered under supervision of the State insurance authority subject to Federal minimum regulatory standards. Where necessary, HUD may require additional programs as a condition of continued reinsurance in the State.

Applicant Eligibility: Property insurance companies that participate in a State FAIR plan.

Legal Authority: Title XI, Urban Property Protection and Reinsurance Act of 1968 (P.L. 90-448), as amended by Housing and Urban Development Act of 1970 (P.L. 91-609).

Administering Office: Federal Insurance Administration, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: See administering office.

Current Status: Active.

Scope of Program: As of April 30, 1977, 157 riot reinsurance contracts providing coverage to 412 property insurance companies. Reinsurance premiums totaled $1,150,000; total amount of reinsurance: $500 billion.

Federal Disaster Assistance Administration

102 Disaster Assistance 101
103 Disaster Preparedness

DISASTER ASSISTANCE

102

Supplemental Federal assistance to State and local governments and individuals affected by natural disasters.

Nature of Program: Following a Presidential declaration of a "major disaster," the Federal Disaster Assistance Administration (FDAA) may provide eligible individuals and families with temporary housing, special unemployment assistance, low-interest loans to repair or replace real or personal property, food coupons, legal services, crisis counseling, and individual and family grants to meet other disaster-related necessary expenses. Grants may be made to States, local governments, and private nonprofit institutions for debris removal and restoration of damaged facilities.

"Emergency" assistance is also available to save lives, protect property, public health and safety, or to avert or lessen the threat of a disaster. States may receive grants to suppress forest or grassland fires that threaten major disaster.

Applicant Eligibility: State and local governments, certain private nonprofit facilities, and individual disaster victims in areas declared eligible for "emergency" or "major disaster" assistance by the President upon the request of the Governor of the State.

Legal Authority: Disaster Relief Act of 1970 (P.L. 91-606), as amended by Disaster Relief Act of 1974 (P.L. 93-288); Executive Order 11795, as amended by Executive Order 11910.

Administering Office: Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410..

Information Source: Regional offices of the Federal Disaster Assistance Administration.

Current Status: Active.

Scope of Program:

In FY 1977:

Major disaster declarations	18
Emergency declarations	36
Fire Suppression grants	6
Funds Obligated (from President's Disaster Relief Fund)	$360,364,290

Federal aid encouraging States and local governments to prepare for or prevent natural disasters.

Nature of Program: The Federal Disaster Assistance Administration (FDAA) encourages State and local governments to develop comprehensive plans and practicable programs in preparation for disasters, and guides them in coping with pending or actual disasters.

A grant of not more than $250,000 may be made to any State to develop these plans and programs. In addition, FDAA may grant up to $25,000 per year in matching funds for improving, maintaining, and updating State disaster plans.

Technical assistance is also available to supplement the States' own resources in planning to meet disasters.

Applicant Eligibility: Eligible applicants are the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, the Canal Zone, the Trust Territory of the Pacific Islands, and (improvement grant only) the government of the Northern Marianas. (States must have applied by May 22, 1975, for the development grant.) The application must include a plan detailing the activities to be undertaken.

Legal Authority: Section 201, Disaster Relief Act of 1974 (P.L. 93-288), and Executive Order 11795, pursuant thereto.

Administering Office: Federal Disaster Assistance Administration, Department of Housing and Urban Development, Washington, D.C. 20410..

Information Source: Regional Office of the Federal Disaster Assistance Administration.

Current Status: Active.

Scope of Program: Number of grants awarded: 56 development, 5 improvement (as of September 30, 1977). Funding: $13,828,189 obligated.

Government National Mortgage Association

106 GNMA Mortgage-Backed Securities 105
107 GNMA Special Assistance Mortgage-Purchases ("Tandem")

GNMA GUARANTEED MORTGAGE-BACKED SECURITIES

106

Privately issued securities based on pools of federally underwritten mortgages. The securities are guaranteed by the Government National Mortgage Association to attract capital into the residential mortgage market.

Nature of Program: The Government National Mortgage Association (GNMA) guarantees the timely payment of principal and interest to holders of securities issued by private lenders and backed by pools of HUD-insured and VA-guaranteed mortgages. The guarantee is backed by the full faith and credit of the United States Government.

The modified "pass through" security guarantees monthly payments of principal and interest due on mortgages in the pool regardless of whether they are collected from the mortgagors. All prepayments and claims settlements also are passed through to the security holders.

Potential issuers of securities pool federally underwritten mortgages of homogeneous type (single-family, multifamily project, or mobile home) and interest rate. Once the pool has been approved and the certificates prepared by GNMA, issuers can market securities directly to investors or through securities dealers.

Applicant Eligibility: Applicants must be FHA-approved mortgagees in good standing and generally have a net worth of not less than $100,000.

Legal Authority: Housing and Urban Development Act of 1968 (P.L. 90-448).

Administering Office: Government National Mortgage Association, Department of Housing and Urban Development, Washington, D.C. 20410..

Information Source: See administering office.

Current Status: Active.

Scope of Program: GNMA has guaranteed over $49 billion in mortgage-backed, pass-through securities from the inception of the program in early 1970 through November 1977.

GNMA SPECIAL ASSISTANCE MORTGAGE PURCHASES ("TANDEM")

A secondary mortgage market created by Government National Mortgage Association purchases of mortgages from private lenders to expand and facilitate investment in housing.

Nature of Program: The Government National Mortgage Association (GNMA) was originally established as a secondary market for federally-insured residential mortgages not readily saleable in the private market. These mortgages generally financed housing for groups or in areas with special needs.

More recently GNMA was authorized to purchase both federally-insured and conventional mortgages at below market interest rates to stimulate lagging housing production. These mortgages are then resold at current market prices with the government absorbing the loss as a subsidy.

Applicant Eligibility: FHA-approved mortgagees may apply to sell federally underwritten mortgages to GNMA. Lenders approved by the Federal National Mortgage Association or the Federal Home Loan Mortgage Corporation to participate in their conventional mortgage purchase programs may apply to sell conventional loans to GNMA.

Legal Authority: Housing and Urban Development Acts of 1968 and 1969 (P.L. 90-448 and 91-152), Housing and Community Development Act of 1974, (P.L. 93-383), Emergency Home Purchase Assistance Act of 1974 (P.L. 93-449), Emergency Housing Act of 1975 (P.L. 94-50), Housing Authorization Act of 1976 (P.L. 94-375), and the Housing and Community Development Act of 1977 (P.L. 95-128).

Administering Office: Government National Mortgage Association, Department of Housing and Urban Development, Washington, D.C. 20410.

Information Source: Regional offices of the Federal National Mortgage Association in Atlanta, Chicago, Dallas, Los Angeles, and Philadelphia. Also see administering office.

Current Status: Twenty-five Special Assistance programs have been implemented since 1954. GNMA is currently purchasing mortgages pursuant to outstanding commitments under the following programs: program 17 (Section 236 and 221(d)(3) rent supplement projects); program 21 (unsubsidized multifamily projects); program 23 (HUD-insured multifamily project mortgages).

Scope of Program: Between January 1974 and September 30, 1977, GNMA issued $20.5 billion in commitments to purchase below-market interest rate mortgages under its Special Assistance program.

JUNEAU, ALASKA 99811

March 6, 1980

The Honorable Arliss Sturgulewski
Senator
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Re: SCR 51-54

Dear Senator Sturgulewski:

This responds to your request for our views on the use of resolutions in the light of the ruling in State v. A.L.I.V.E. Voluntary. In preparing this response we have reviewed that decision and the memorandum from Director Barrier of the Legislative Affairs Agency to Representative Anderson and the memoranda from Legislative Counsel Cook to you. We would agree with them that the use of resolutions as a veto over regulations, programs, or other actions or proposed actions has been placed in great doubt. Indeed, we believe that the ruling makes their use a nullity.

In A.L.I.V.E., the court quoted the terms of the Administrative Procedure Act which provide for the legislature to annul a regulation by a concurrent resolution and said:

> This statute encompasses a variant of what has come to be called the legislative veto. The question in this case is whether this device violates article II of the Alaska Constitution. We hold that it does.

State v. A.L.I.V.E. Voluntary, ___ P.2d ___ (Op. No. 2022, Feb. 17, 1980), at 2 (citation omitted, emphasis added).

Accordingly, the ruling is on the basis that, except as expressly provided for by the constitution, the legislative veto is itself constitutionally impermissible, and -- as the dissent makes clear -- the court's decision leaves no room for argument.

The principal question posed by the ruling in A.L.I.V.E. is whether the court will treat the several statutory requirements for legislative vetoes as severable or nonseverable, that

is, whether the entire statute is invalid or just the provisions for the legislative veto. We can offer no general answer. Each statute must be examined separately. All that we can say is that a serious question exists, and if the legislature does not act to answer it with amendatory legislation, the court will do so on a case-by-case basis as each statute becomes the subject of litigation.

Sincerely yours,

AVRUM M. GROSS
ATTORNEY GENERAL

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM

March 6, 1980

SUBJECT: Status of approval of coastal zone management regulations

TO: Senator Arliss Sturgulewski, Chairman
Senate Community and Regional Affairs Committee

FROM: Billy G. Berrier BGB
Director
Division of Legal Services

You have asked what effect the recent decision in State of Alaska v. A.L.I.V.E. Voluntary, (Feb. 19, 1980 Opinion No. 2022) has on approval of coastal zone management programs required by AS 46.40.080.

I have discussed this case in an earlier opinion for Representative Anderson. With his permission, I have made this opinion available to other legislators. A copy of that opinion is attached.

For coastal zone management programs simply requiring approval by bill rather than by concurrent resolution could create substantial problems under Article II, section 19 of the Constitution which prohibits the use of local or special acts where a general act can be made applicable. It may be possible that the legislation can be restructured to bring approval by law within the test for special legislation used in State v. Lewis, 559 P.2d 630 (Alaska 1977) which is the case approving the Cook Inlet land transfer; but this would involve substantial policy decisions by the legislature.

In my earlier opinion, I recommended proceeding in the areas by the use of concurrent resolutions knowing there is a risk involved. This is, of course, a policy decision to be made by the legislators. It would appear probable in this context that if the approval mechanism were held invalid, a court would hold the approval mechanism unnecessary to the validity of the programs and sustain the programs.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M February 28, 1980

SUBJECT: State of Alaska v. A.L.I.V.E. Voluntary

TO: Representative Nels A. Anderson, Jr.
House Majority Leader

FROM: Billy G. Berrier
Director
Division of Legal Services

You have asked my comments on the decision of the Supreme Court in the case of State of Alaska v. A.L.I.V.E. Voluntary, (File No. 3670). A copy of the decision is attached.

The case concerns a regulation relating to games of skill and chance annulled by the legislature. The authority for annulment was AS 44.62.320(a) which provides:

> The legislature, by a concurrent resolution adopted by a vote of both houses, may annul a regulation of an agency or department.

The Administrative Procedure Act was adopted by the First State Legislature in 1959. This Act provided, among other things, for the procedure by which regulations of agencies or departments are promulgated and the section was enacted as part of that procedure.

The Court held, with a majority opinion of three justices and a strong dissent by two justices, that regulations could not constitutionally be annulled by concurrent resolution since a resolution is not enacted in accordance with the requirements in Article II of the Constitution for adoption of law. The result, of course, is a non sequitor since the majority opinion avoided addressing the difference between regulation and law and finding that despite the difference, the enactment procedures applied. They, therefore, assumed the middle term of the syllogism and rambled widely to provide a substitute for the missing logic. Various cases were cited, only one of which was relevant and that one is no longer good law in its own jurisdiction.

For this reason, it is very difficult to determine the effect of the decision.

The holding is explicit that regulations may not be annulled by concurrent resolution. Although it is not explicitly stated, there is a clear implication that annulment by bill is constitutional.

Beyond that, the Court made several statements which do not appear necessary to the holding in this case. Much of this dicta is in sweeping terms. It casts doubt over substantial areas and, since the reasoning is essentially stream of consciousness rather than coherent, gives only minimal clues concerning the legal status of these areas.

Essentially the areas affected fall into two classes

(1) regulations and legislative oversight of regulations; and

(2) other areas of law where concurrent resolutions are used to provide legislative oversight.

On regulations the majority opinion states broadly:

> "The express provision in the Alaska Constitution of two specific legislative veto mechanisms supports our view that no implied general power to veto agency regulations by informal legislative action exists.
>
> * * *
>
> "In our view, the specificity with which the constitution deals with the legislative veto powers it does grant leads logically to the conclusion that no other veto power is implied."

The case law on regulations which the majority opinion cited is not helpful. One of the cases is on point but is no longer good law in its own jurisdiction, the second is a trial court decision and the last is a federal case where the question of a one-house veto was present but not reached. The discussion of this last case illustrates the difficulty in following the reasoning in the majority opinion. The Court referring to the United States Circuit Court decision in Atkins v. United States, 556 F2d 1028 (1977) said:

> The court implied that for one House to have the authority to make such a change would be unconstitutional: "Nor could one House do anything more than preserve existing law . . ." Id. at 1064. In contrast, the annullment provisions of AS 44.62.320(a) permit the legislature to void administrative regulations which are in effect. Such regulations are laws in every meaningful sense, and annulling any one of them effects a change in the law.

The connection and logic totally escape me.

In its discussion of delegation of power to annul regulations, an issue injected into the opinion since no delegation is involved in the case before the Court, the opinion is even less helpful. The majority opinion observes:

> "While the power to void agency regulations could be exercised by either the legislature, or by an agency, when the legislature exercises such power it must do so while acting as a legislature. It may not grant itself the power to act as an agency.
>
> "It might be supposed that if the legislature could condition the validity of a regulation upon the subsequent disapproval by both of its houses by concurrent resolution, it could condition the same upon disapproval by a committee, or a single legislator. Using the theory, propounded by the Amici, that a veto is merely a condition there is no principled distinction between these cases. It is therefore worth observing that most authorities have rejected the validity of laws conferring either affirmative or negatory legislative powers on individual legislators or legislative committees."

Perhaps the second point made by the majority opinion in discussing the desirability of legislative oversight of administrative regulations gives the best clue. The opinion stated:

> Second, at least according to a recent case study, the legislative veto has been unimpressive in practice. See Bruff & Gellhorn, Congressional Control of Administrative Regulation: A Study of Legislative Vetoes, 90 Harv. L. Rev., 1369 (1977). That study concludes, essentially, that the legislative veto encourages secretive, poorly

> informed, and politically unaccountable legislative action. Id. at 1409-20. It is consequences such as these that the enactment provisions of our constitution are designed to guard against.

It should be pointed out that the facts concerning the annulment which was the subject matter of the case do not support a conclusion that the annulment resulted from "secretive, poorly informed and politically unaccountable legislative action" but that, of course, is not material.

It is my conclusion that any annulment of regulation other than by law would be unconstitutional under this case. Although the question is not discussed since it is not relevant to the case, it is very clear that regulations which have the effect of law require statutory authorization and the legislature can withdraw the authorization or establish standards in whatever degree of specificity the legislature desired. Since in case of conflict between statute and regulation the statute controls, it is also clearly permissible to make the substantive statutes detailed thereby leaving less or no areas which must be dealt with by regulations. This latter course, however, involves a loss of flexibility and administrative expertise.

It appears that any form of legislative oversight of administrative regulations would be regarded with suspicion by the court. However, devices such as providing chat no regulation can become effective until it has been before the legislature in session for a set time or even a provision that no regulation may become effective unless approved by law are not clearly precluded.

In Plumley v. Hale, 594 P.2d 497 (Alaska 1979), our Court discussed the question of non-retroactive treatment in civil cases. The Court in that case stated:

> In accord with United States Supreme Court precedent, we have previously identified four conditions indicating the propriety of non-retoractive treatment in civil cases: 1) the holding is one of first impression, or overrules prior law, and was not foreshadowed in earlier decisions; 2) there has been justifiable reliance on an alternative interpretation of the law; 3) undue hardship would result from retroactive application; and 4) the

> purpose and intended effect of the holding is best accomplished by prospective application.

The case concerned approval of free conference committee reports without a recorded roll call vote. The Court held the criteria to be satisfied and the decision to be prospective only. In my opinion the facts here, while not as compelling as the facts in Plumley, would lead to a conclusion that annulment of regulations which occurred prior to this case are not affected by the case.

The second major problem area is legislative oversight exercised by concurrent resolution in other areas than regulation oversight. The majority opinion made a very broad statement saying:

> The question presented by this case is whether the legislature can exercise its legislative power without following these enactment provisions. In our view the answer must be in the negative, for otherwise they would serve no purpose.

(The dissenting opinion quite correctly pointed out this is not the question at all. Justice Boochever said

> In my opinion, the majority misstates the question presented as being whether the legislature can exercise its legislative power without the usual constitutional safeguards. The real question is whether, having exercised its legislative power, subject to all those safeguards, it may condition the delegation of regulatory power to an executive agency upon a provision for legislative oversight. I agree with our statement in Boehl that the legislature has that power.

This view will be significant in subsequent cases which concern the use of concurrent resolutions in context other than annulment of regulations placing as it does the issue before the Court in focus.)

The majority opinion went on the say:

> Of course, when the legislature wishes to act in an advisory capacity if may act by resolution. However, when it means to take action having a binding effect on

those outside the legislature it may do so only by following the enactment procedures.

While the dissent noted that numerous other statutes provide some specific legislative review function by concurrent resolution, the majority opinion does not specifically address this. The sweeping generality of the majority opinion clouds, and on its face forbids, these other functions.

These include:

1. AS 18.45.025 -- Approval of facilities siting permit for nuclear facilities.

2. AS 18.65.060 -- Disapproval of regulations relating to compilation of criminal justice information and release of this information.

3. AS 28.05.021 -- Approval of compacts with other states relating to motor vehicle registration and driving licenses.

4. AS 28.15.141 -- Approval of regulations relating to classification of drivers licenses.

5. AS 28.15.081 -- Approval of regulations relating to drivers license examination.

6. AS 35.10.080 -- Approval of physical facility procurement and planning policy.

7. AS 37.05.280 -- Approval of leases by the state with a rental in excess of $12,000. (While this has general application, it was adopted as part of and specifically relates to construction of public buildings by ASHA for lease to the state and is necessary for the validity of the revenue bonds issued by ASHA.)

8. AS 37.12.080 -- Approval of investments in a single project or to a single applicant by Alaska Renewable Resources Corporation if the investment exceeds $1,500,000 or five percent of the resources of the corporation.

9. AS 38.05.037 -- Disapproval of zoning by the division of lands in the unorganized borough.

10. AS 38.05.182 -- Disapproval of a determination by the Commissioner of the Department of Natural Resources that the taking of royalty on natural resources in money rather than in kind is in the best interests of the state.

11. AS 38.05.065 -- Approval of disposition of oil and gas and contracts for sale of state owned royalty gas or oil.

12. AS 39.23.080 -- Approval of salary commission recommendations. (This is now repealed but until the pay bill this year went into effect, it was the basis on which higher government officials, including the governor, legislators and judges, were paid.)

13. AS 44.55.110 -- Approval of Alaska Power Authority plans. This approval is a specific condition on bonding.

14. AS 44.57.210 -- Approval of projects of the Alaska Toll Bridge Authority. This approval is required before bonds may be issued.

15. AS 46.03.758 -- Disapproval of regulations establishing civil penalties for discharge of oil.

16. AS 46.40.080 -- Approval of Alaska coastal management programs.

While all of these are clouded by the language in the majority opinion, that language is clearly dicta except on the point of annulment of regulations. In my opinion, an attempt to determine whether in later cases the court would follow the broad sweep in the instant case, narrow that sweep depending on the issue before it, or even confine the case to its facts would be pure speculation. Courts have frequently done all three. The majority opinion with its conclusionary approach unsupported by a coherent rationale is of little assistance in determing the scope of the opinion.

Earlier in the opinion, I discussed retro-activity as it applied to regulations annuled by concurrent resolution before the opinion. There is an even stronger case for holding that retroactive application cannot be given to a decision in the areas where annulment of regulations is not in question.

I am, however, very distrubed by the possibility that a future decision in this area could be retroactive to the date of this decision based on a finding by the Court that this decision "clearly foreshadowed" a subsequent decision that resolutions could not be used as prescribed in these statutes. I do not think this would be the decision since certainly at the time of enactment of the laws referred to there was no foreshadowing and bringing all legislative action to a halt in areas of major concern to the state while the legislature re-wrote the law in these areas is certainly not reasonable.

Since the alternative would be to halt, among other things, power development, coastal zone management, and oil and gas sales based on a possibility that the Court will look on legislative oversight in these areas as unfavorably as it does on legislative oversight of regulations, I recommend continuing to operate within the statutory framework now established until the Court, by a subsequent decision, clarifies its position.

I would also recommend that the legislature consider the question of what options are open to it to meet the serious problems created by the case.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M February 26, 1980

SUBJECT: Legislative role in approving coastal management programs.

TO: Senator Arliss Sturgulewski, Chairman
Senate Community and Regional Affairs Committee
Attn: Margo Waring, A.A.

FROM: Tamara Brandt Cook TBC
Legislative Counsel

AS 46.40.080 simply provides for adoption by the legislature of coastal management programs which have already been reviewed and approved by the council. Clearly under the terms of this statute the legislature may approve the program or disapprove the program. Although the statute does not provide for the situation involving legislative approval of only part of a program, there is also no clear requirement that the legislature approve or disapprove the entire program. In fact, the legislature has done just that on previous occasions, so there is some precedent for the proposition that under the terms of AS 46.40.080 the legislature may approve a program in part and disapprove it in part. SLA 1978, Legislative Resolve Number 41.

Under AS 46.40.060 all district coastal management programs are submitted to the Alaska Coastal Policy Council for review and approval. Standards for council review are itemized in AS 46.40.070. In view of these provisions, an argument could be made that the legislature should not disapprove a program or part of a program that has been adopted by the council unless it finds that the council failed to properly apply the standards set out.

Since there is no case law on point and the language of the statute does not specifically restrict the legislative role, the legislature appears to be free to approve a management program, disapprove a program, or approve it in part and disapprove it in part. Note that the recent case, State of Alaska, and Department of Revenue v. A.L.I.V.E. Voluntary, No. 2022, February 19, 1980 casts considerable doubt upon the ultimate effect of legislative resolutions.

907-465-3800

M E M O R A N D U M February 26, 1980

SUBJECT: Constitutionality of legislative approval or disapproval by resolution of agency regulations.
(Work Orders No. 8190, 8191, 8192, and 8193)

TO: Senator Arliss Sturgulewski, Chairman
Senate Community and Regional Affairs Committee

FROM: Tamara Brandt Cook
Legislative Counsel

AS 44.62.320(a) which provides that the legislature, by a concurrent resolution, may annul a regulation of an agency or department, was recently held to be unconstitutional. State of Alaska, and Department of Revenue v. A.L.I.V.E. Voluntary, No. 2022, February 19, 1980. Essentially, that case held that specific provisions of the Alaska Constitution set out in Article II, sections 13, 14, and 18 must be complied with before the legislature can make new law. Additionally, the governor must have the opportunity to veto any new law. In view of these mechanics, the Supreme Court has concluded that the legislature may not create new law through resolution. The proposition that administrative regulations are not the same as bills and ought not to be subject to the same requirements was specifically presented and rejected by the Court. "Such regulations are laws in every meaningful sense, and annulling any one of them effects a change in the law." State of Alaska, and Department of Revenue v. A.L.I.V.E. Voluntary, supra, 21.

The Court recognized that the legislature may delegate law-making power to an administrative agency, and that the delegation could be made subject to a condition. But the condition must be lawful. Making a delegation subject to later change by the legislature through informal action (resolution) was held to be an unlawful condition. The Court reasoned that whenever the legislature exercises its law-making power, it must do so pursuant to the mechanics

set out in the constitution. While an agency may adopt regulations without following any of the same mechanics, the legislature may not act as an agency itself.

In view of this broad holding, AS 46.40.080, requiring approval of amendments to the state coastal management program by adoption of concurrent resolution or by majority vote while both houses are convened to confirm executive appointments, is questionable constitutionally since both these methods constitute informal law-making on the part of the legislature. Although this case did not deal with AS 46.40.080 specifically, it is significant to note that AS 46.40.080 was identified in the dissenting opinion as another example of a statute similar to the one held to be unconstitutional. State of Alaska, and Department of Revenue v. A.L.I.V.E. Voluntary, supra, 46.

Information Sheet

CAPITAL FOUNDATION FUND

The Capital Foundation Fund will, by appropriation, provide funds to all areas of the State for certain capital improvements. To expend funds, each area will need to develop an areawide capital improvement plan, approved by the local assembly when there is one, and developed with the Department of Transportation and Public Facilities when there is no local government.

Organized and unorganized boroughs are encouraged to conduct regionwide planning to avoid costly duplications of capital projects and to prioritize, on the local level, needs among communities, rather than leaving this process to state level government.

Each area, so long as appropriations are made, is certain of a source of funding for local projects. Each area will receive a formula share of the appropriation. This stability will be advantageous to local governments for planning purposes. Additionally, unlike the current situation, areas may have greater ability to use capital projects for anti-cyclic economic benefits by being in control of fund expenditures. Annual funds do not lapse and may be accumulated for locally determined purposes.

Capital Foundation Funds may be used as the local match required for certain state and federal projects. This will be particularly significant in rural areas which do not now have a source of local match.

Funds are eligible for both construction and maintenance costs. This means that local governments will be encouraged to consider life-cycle costs and encouraged to maintain buildings and other improvements in order to maximize the efficiency of their capital dollars.

Local governments, under the Capital Foundation Fund program, will be assured of a steady supply of state funds for capital improvements that will be directed toward locally determined project needs and can be expended at a locally determined pace.

CAPITAL FOUNDATION

FUND

Intent

It is the intent of this legislation to establish a capital foundation program which will equitably provide funds for the orderly development of capital improvements throughout the state. It is intended that the planning for such developments reflect regional and local needs and priorities and that, whenever possible, borough governments have complete responsibility for the expenditure of the capital foundation program funds.

This legislation recognizes that most capital development projects have greater than local significance and should, therefore, be planned and prioritized on the regional level. Further, the legislation acknowledges that the cost of construction and the cost of maintenance are closely related and that maximally efficient use of funds is encouraged by combining maintenance and construction funds.

Formula

Please see attached pages.

Funds may be used for either capital construction, betterment or maintenance, but not operation of the facilities. Funds allocated to either organized or unorganized boroughs do not lapse and may be accumulated for large projects or for growth management purposes.

Question: Should there be a ceiling on the amount which may be accumulated by any one borough?

Eligible Facilities

libraries
public protection facilities including fire service and holding facilities
neighborhood parks and other recreation facilities
water/sewer
solid waste and resource recovery facilities
health facilities
community facilities
Transportation facilities such as local service roads & trails, small boat harbors, seaplane floats, local transit facilities and equipment, upgrading and improvements in existing air transport facilities such as aviation aides and improvements and associated field improvements, emergency and/or recreational airstrips, so long as no transportation facilities jeopardize or are inconsistent with the state system as defined in the regional transportation plans and the State Facilities Plan.

However, only projects identified in the capital improvement plan are eligible for Capital Foundation Program expenditures.

Distribution

Capital Foundation Program funds will be distributed by formula to boroughs and to unified home rule municipalities, provided each has developed a capital improvement plan which includes a priority listing of capital improvement projects. In organized boroughs the cip will need assembly approval, after a public hearing.

In third class boroughs and for the unorganized borough, the following measures are taken to provide for planned regional development of capital improvements, as there is no regional government responsible for planning and expending funds.

Funds will be distributed to unorganized boroughs (SB 348). If this legislation is not passed, funds will be distributed to those areas identified as REAA's.

However, expenditure of the funds for unorganized boroughs is the responsibility of DOTPF. In order to properly plan for and prioritize capital improvements in the unorganized boroughs, advisory groups are established to assist DOTPF. (Amend Chap. 168 SLA 78).

Regional Advisory Councils

Advisory Council members are appointed by the Governor.

Membership of the advisory groups will consist of one elected official from each first class city or municipality, selected by the city. Additional representation from elected officials of second class cities and representatives of unincorporated communities shall be selected from nominations made by the Division of Community Planning, DCRA and DOTPF. Each regional advisory council shall consist of fifteen members.

The regional advisory councils will assist DOTPF in the development of a regional capital improvement plan, in prioritization among projects, in decision making regarding trade-offs between maintenance and new construction, and in project scheduling.

If an unorganized borough opts to become organized, the borough government will assume the capital improvement planning responsibility, responsibility for foundation program funds and may take title to existing capital improvement projects.

Definitions

Maintenance means preservation, upkeep and repair to keep a facility as close as possible to original condition.

Betterment means improvements, adjustments, additions which more than restore to a former condition for better service without major changes in original construction.

Operation means all costs attributable to utilization of the facility, such as heat, light, janitorial services.

CAPITAL FOUNDATION PROGRAM
(Construction and Maintenance)

FORMULA

Appropriations. The amount of appropriations authorized to be made to the capital foundation program for a fiscal year is equal to two hundred dollars times the state population.

Distribution. Amounts in the capital foundation program shall be distributed annually to municipalities and unorganized boroughs by the department by (a) allocating one-half of the amounts on the basis of population and one-half on the basis of area; and (b) determining the share of an individual municipality or unorganized borough by multiplying its population and area by the construction cost differential for that region. The minimum grant shall be five per cent of the largest distribution made to any municipality or unorganized borough.

Construction Cost Increases. The Department of Transportation and Public Facilities shall submit to the legislature on or before February 15 of each year an estimate of the average percentage increase in construction costs in the state during the previous year.

DEFINITIONS

(1) 'population" means the population of the state, municipality, or an unorganized borough as determined by the department using the latest figures of the U.S. Bureau of the Census or other reliable population data, including but not limited to school enrollments, public utility connections, registered voters, or certified employment payrolls.

(2) "construction cost differential" means one plus the percentage by which average construction costs in a region are greater than or less than the average construction costs in Anchorage as determined by the Department of Transportation and Public Facilities using the latest figures.

(3) "department" means the Department of Community and Regional Affairs.

ILLUSTRATION OF FORMULA (in round terms)

Base:	Population	X	Construction Cost Differential		Area (Sq. Mi.)	X	Construction Cost Differential	
Organized Areas	349,000		1.0	= 349,000	149,376		1.0	= 149,376
Unorganized Boroughs	80,000		1.25	= 100,000	437,036		1.25	= 546,295
	429,000			449,000				695,671

Appropriation: 429,000 X $200 = $85,800,000

Grant:

Adjusted Per Cent of Population X $200
Adjusted Per Cent of Area X $200

Organized Areas

349,000 / 449,000	= .78	X	$42,900,000	= $33,462,000		
149,376 / 695,671	= .215	X	$42,900,000	= 9,223,500		
				$42,685,500		$42,685,500

Unorganized Boroughs

100,000 / 449,000	= .22	X	$42,900,000	= $ 9,438,000		
546,295 / 695,671	= .785	X	$42,900,000	= 33,676,500		
				$43,114,500		43,114,500
					Total	$85,800,000

RE: Revision of AS 29

It is generally recognized, especially by those who work most closely with it, that AS 29 is in need of revision. Since the time of original enactment, changes in the title, problems in its application, and policy questions of importance have been noted by municipal attorneys, city managers and clerks, and such other municipal officials as assessors. The Legislative Revisor has indicated that AS 29 should be next approached in terms of needed revision.

The work of revision is complicated and, at times, highly technical. I have received numerous inquiries and requests for a process by which to revise AS 29. I have discussed this problem with many people, including Mr. Berrier, and Ms. Chitwood of the Alaska Municipal League.

I would like to suggest the following as an approach to the revision of AS 29 during the period of time between this session and the 1981 session. Funds and responsibility for this project would be directed by the Legislative Council to Mr. Billy Berrier, Legislative Legal Services, to conduct the revision. I foresee the project as follows: two groups would be selected by Mr. Berrier from recommendations provided by the Department of Community and Regional Affairs, Alaska Municipal League and other interested and affected parties. The first group would be a policy advisory group composed of a variety of perspectives and interests, representing the diversity of local governments across the state, and would include a representative of the legislature. The second, a much smaller group, would be a working group, composed of people who have had experience in the application of AS 29. The work group should consist of municipal attorneys, representatives of the Department of Community and Regional Affairs and the Department of Law, as well as a staff member of Legislative Legal Services; other municipal staff functions should also be represented, such as managers or clerks. While the actual technical work would be conducted by the working group, the policy group would provide overall guidance and assistance on policy questions.

Administrative and secretarial responsbility would rest in Legal Services. In order to support this project funds would be required for travel and per diem. Most local governments will be glad to contribute staff time to this project. However, for both the policy and the working group it will be necessary to provide travel funds. As often as possible, teleconferencing will be used to reduce travel needs and to expedite the

project. A draft bill will be ready for January 1981.

It is anticipated that $20,000 should cover the cost of this project. Any funds remaining would be returned.

Thank you for your attention to this matter.

RE: Sunset Free Conference Committee

Our previous memorandum on this subject (Feb. 29, 1980) conveyed to you the options and recommendations of Gerald Wilkerson, Legislative Audit. In this memorandum, we would like to present a fuller discussion of the issue of revision of the sunset process.

To establish a context for decisions about sunset revisions, a restatement of the policy approach of the sunset legislation may be appropriate. The significant difference between sunset and previously existing audit and review laws (as embodied in AS 24.20, Legislative Budget and Audit and AS 37.07 Executive Budget Act) is the provision for automatic termination of programs and agencies unless positive joint legislative action is taken. The philosophic assumption informing this approach is that needless government regulation over the private lives of individuals exists that creates a costly and needless burden. Hence, only positive action would save these agencies from automatic extinction. This bias of "guilty til proved innocent" is the key distinction between traditional audit and review mechanisms and the mechanism available in the sunset process.

Alaska's experience with sunset has not been atypical: few agencies have been allowed to terminate. A great deal of time, energy, and money has gone into reviewing boards and determining both their effectiveness and the adequacy of their enabling legislation. However, apparently, few legislators have felt a deep commitment to sunset, and several standing committees have found their time overwhelmed by the demands of the sunset process.

It is within this context that our instructions were given: to review the sunset process with a goal of a revision which would focus on those agencies/boards which require review, free regular committees from the burden of so tight a schedule, yet maintain the sunset process.

While the instructions are clear, the criteria used for judging any particular option are stringent: any number of alternatives would achieve the first two criteria; very few will meet the added criterion of

maintaining a process in which agencies/boards are automatically terminated unless positive action is taken by the legislature.

Discussion of Alternatives

1. The first alternative is the one suggested by Mr. Wilkerson (memorandum of February 29, 1980) in which legislators annually target agencies for sunset. While this option preserves the appearance of the existing sunset process, it should be noted that the power to annually target agencies/boards for sunset already exists under AS 24.20.271 relating to legislative audit. Passage of legislation which would enact this option would essentially duplicate existing authorities. Nothing more would be achieved than would be achieved by the simple repeal of sunset. Additionally, since bills would need to be signed by the Governor, possible veto could endanger this approach.

2. As mentioned in the memorandum of February 29, 1980, stretching out the existing schedule would meet the three criteria we were given, with the exception of focussing on agencies "in need" of sunset review. Even so, this option merits further discussion, as its implementation could be within the function of the Free Conference Committee itself. Legislative Legal Services informs us that the original intention behind placing the health boards in one group for sunset review was to achieve certain efficiences in approach and to provide for coordination in review, so that consolidations, cross references and other inter-disciplinary approaches could be undertaken by the legislature. However, the Free Conference could elect to extend the life of the health boards by varying lengths. For example, while the Psychology Board might be extended for one year, the Board of Nursing could be extended for six or eight years, effectively staggering reviews over a longer time period. Such action would achieve all three objectives: more frequent attention on those boards "in need" of review, less work for the standing committees, and retention of the sunset process.

3. If greater attention is paid to the concept of "less work" than to the other criteria, other options suggest themselves.

a) The sunset legislation allows for joint hearings on the agencies/boards. If joint hearings were held, less total legislative time would be spent; it would be easier for board members to participate, and the whole process would be less expensive. These benefits would be increased if boards were extended for greater periods of time, as suggested in 2 above.

b) Most states, in their sunset legislation, review only licensing/regulatory boards. If the Sunset Act were amended to eliminate the program agencies, then the work load would be reduced. In support of this concept, it should be remembered that program agencies can and are routinely reviewed and audited, that the executive budget process performs similar performance reviews and that the perceived burden of government regulation on the lives of citizens comes substantially from the public interest efforts of licensing and regulatory boards. Hence, if program agencies were to be removed from the sunset list, all three criteria would be observed, without great loss, as program agencies can and are routinely reviewed under traditional mechanisms.

Either or both of the options mentioned in 3(a) and (b) can be supported by the following argument. During the first cycle of sunset reviews, a great deal has been learned regarding the conduct of the process. In 1983, when the boards would again be sunsetted, review criteria will be easier to establish, the organization and scheduling of hearings should be easier, and, perhaps most significantly, there should be less to review as most of the boards will have undergone considerable revision of their practice acts.

4. There is a fourth alternative which would also meet the criteria given to us. This option does not necessarily involve changes in the sunset process or in the scheduling of boards for review. Instead, the legislature itself could establish an alternative process for the sunset reviews. A standing Sunset Committee (perhaps a Joint Committee) would be established. Staff would be hired for this committee. In favor of this option are several efficiences of effort. Although the same time and money would be spent as now, those efforts and funds could be more efficiently used. Staff would develop an expertise in the sunset process, hearings could be held over the interim, deadlines would be more easily met, and the public could be educated regarding the public interest goals of the boards, thus encouraging greater public participation in the sunset hearings. The theoretical loss involved in this option would be the expertise of existing standing committees.

This option could be combined with those detailed in 3(a) and (b) above.

After this memorandum was written, we received a copy of the "House Commerce Committee Interim Report, Sunset in Alaska, 1979-1980." On page 32 of that document a recommendation is made to establish a permanent committee on sunset. A copy of that page is attached to this memorandum.

Summary

There are several options which meet the criteria assigned to us for use in selecting optional revisions of the sunset process. Several of the options can be combined. Of importance in the consideration of these options is whether or not you wish to pursue an aggressive sunset review program. If so, the process selected should be well established and supported. On the other hand, you may consider that the primary value of sunset has already been achieved by the first sunset cycle: revisions to practice acts have been made, board performance has been improved, management adjustments have occurred, and some boards may have been terminated. In other words, we see this juncture as a further determination of the public interest and how that may be served.

RE: Capital Foundation Fund

At your request, we have prepared the attached material on a proposed Capital Foundation Fund. We have attempted a thorough listing of all pertinent points.

If you wuld like, we can meet at your earliest convenience to answer any questions you may have.

Attachment

March 24, 1980

TO: Committee Members
Community and Regional Affairs

FROM: Senator Arliss Sturgulewski

RE: Capital Foundation Fund

The Capital Foundation Fund will, by appropriation, provide funds to all areas of the State for certain capital improvements. To expend funds, each area will need to develop an areawide capital improvement plan, approved by the local assembly when there is one, and developed with the Department of Transportation and Public Facilities when there is no local government.

Organized and unorganized boroughs are encouraged to conduct regionwide planning to avoid costly duplications of capital projects and to prioritize, on the local level, needs among communities, rather than leaving this process to state level government.

Each area, so long as appropriations are made, is certain of a source of funding for local projects. Each area will receive a formula share of the appropriation. This stability will be advantageous to local governments for planning purposes. Additionally, unlike the current situation, areas may have greater ability to use capital projects for anti-cyclic economic benefits by being in control of fund expenditures. Annual funds do not lapse and may be accumulated for locally determined purposes.

Capital Foundation Funds may be used as the local match required for certain state and federal projects. This will be particularly significant in rural areas which do not now have a source of local match.

Funds are eligible for both construction and maintenance costs. This means that local governments will be encouraged to consider life-cycle costs and encouraged to maintain buildings and other improvements in order to maximize the efficiency of their capital dollars.

Local governments, under the Capital Foundation Fund program, will be assured of a steady supply of state funds for capital improvements that will be directed toward locally determined project needs and can be expended at a locally determined pace.

Distribution

Capital Foundation Program funds will be distributed by formula to boroughs and to unified home rule municipalities, provided each has developed a capital improvement plan which includes a priority listing of capital improvement projects.

In third class boroughs and for the unorganized borough, the following measures are taken to provide for planned regional development of capital improvements, as there is no regional government responsible for planning and expending funds.

Funds will be distributed to unorganized boroughs (SB 348). If this legislation is not passed, funds will be distributed to those areas identified as REAA's.

However, expenditure of the funds for unorganized boroughs is the responsibility of DOTPF. In order to properly plan for and prioritize capital improvements in the unorganized boroughs, advisory groups are established to assist DOTPF. (Amend Chap. 168 SLA 78). Accumulated funds will be managed by the Commissioner of Revenue.

Regional Advisory Councils

Advisory Council members are appointed by the Governor.

Membership of the advisory groups will consist of one elected official from each first class city or municipality, selected by the city. Additional representation from elected officials of second class cities and representatives of unincorporated communities shall be selected from nominations made by the Division of Community Planning, DCRA and DOTPF. Each regional advisory council shall consist of fifteen members.

The regional advisory councils will assist DOTPF in the development of a regional capital improvement plan, in prioritization among projects, in decision making regarding trade-offs between maintenance and new construction, and in project scheduling.

If an unorganized borough opts to become organized, the borough government will assume the capital improvement planning responsibility, responsibility for foundation program funds and may take title to existing capital improvement projects.

Definitions

Maintenance means preservation, upkeep and repair to keep a facility as close as possible to original condition.

Betterment means improvements, adjustments, additions which more than restore to a former condition for better service without major changes in original construction.

Operation means all costs attributable to utilization of the facility, such as heat, light, janitorial services.

CAPITAL FOUNDATION

FUND

Intent

It is the intent of this legislation to establish a capital foundation program which will equitably provide funds for the orderly development of capital improvements throughout the state. It is intended that the planning for such developments reflect regional and local needs and priorities and that, whenever possible, borough governments have complete responsibility for the expenditure of the capital foundation program funds.

This legislation recognizes that most capital development projects have greater than local significance and should, therefore, be planned and prioritized on the regional level. Further, the legislation acknowledges that the cost of construction and the cost of maintenance are closely related and that maximally efficient use of funds is encouraged by combining maintenance and construction funds.

Formula

Please see attached pages.

Funds may be used for either capital construction, betterment or maintenance, but not operation of the facilities. Funds allocated to either organized or unorganized boroughs do not lapse and may be accumulated for large projects or for growth management purposes.

Question: Should there be a ceiling on the amount which may be accumulated by any one borough?

Eligible Facilities

libraries
public protection facilities including fire service and holding facilities
neighborhood parks and other recreation facilities
water/sewer
solid waste and resource recovery facilities
health facilities
community facilities
Transportation facilities such as local service roads & trails, small boat harbors, seaplane floats, local transit facilities and equipment, upgrading and improvements in existing air transport facilities such as aviation aides and improvements and associated field improvements, emergency and/or recreational airstrips, so long as no transportation facilities jeopardize or are inconsistent with the state system as defined in the regional transportation plans and the State Facilities Plan.

However, only projects identified in the capital improvement plan are eligible for Capital Foundation Program expenditures.

Should schools, correctional facilities, energy projects of any scale be included?

RE: Sunset Free Conference

As requested, we spoke with Gerald Wilkerson regarding a schedule of sunsets that would achieve several objectives: focus on those agencies/boards which require review, free regular committees from the burden of so tight a schedule, yet maintain the sunset process.

Our discussion was a fruitful one. Several options were discussed. Below are three options which appear most worthwhile. The first is the one recommended by Mr. Wilkerson for possible action.

1. Eliminate from the sunset statute that language which lists the agencies and their review schedule. Instead, substitute language which would achieve the following: each year, prior to the year in which the review will take place, legislators will submit bills designating agencies for sunset review. These bills would be acted upon in the usual manner. This new process would be in addition to the process followed by LB&A, though additional language might be added to separately identify LB&A recommendations for sunset reviews as being transmitted to both houses by, for example, March 30.

The benefits of this approach are that the work load would be selected by those who will be doing the work. Legislators would be able to translate their own and their constituents' concerns into a work schedule for the next session. It may be anticipated that, having selected for review those agencies which legislators feel require review, there will be attention and follow-up during the subsequent session. Since there would be a focus on those agencies which require sunset, agencies which are functioning well can continue to do so. On the negative side, it would be possible for a single agency/board/commission to be selected year after year, impairing their effectiveness. This difficulty could be resolved by additional language which would limit the numbers of reviews possible (as in, "No agency can be selected for review in two consecutive years.")

2. Another solution which could achieve the objectives identified above would be to stretch out the existing schedule so that, for example,

RE: Legal Opinion Request

As a result of our public hearing on February 19, 1980, a legal opinion is requested concerning the substitution of the word "construction" for "capital improvements" in the title and body of SB 436.

The Department of Environmental Conservation testified on behalf of their concern. In the past, the program has funded items such as water delivery vehicles and honey bucket trucks, and they wish to continue this practice. They felt these items might not be included as a definition of "construction;" but could certainly be included as "capital improvements."

In order that the wording substitution does not modify the department's practice of funding some non-construction costs, particularly rolling stock, a legal opinion is desired. Would you also send a copy of this opinion to the Senate Finance Committee, where this bill was recently referred. Thank you.

TO: Myrt Charney, Executive Director
Legislative Affairs

FROM: Senator Arliss Sturgulewski
Chairman, Community and Regional Affairs Committee

The Senate Community and Regional Affairs Committee proposes to undertake a project, starting at the end of the second session of the Eleventh Legislature, which would forward the work of the House and Senate Joint Interim Committees completed during the interim between the first and the second session of the Eleventh Legislature. This work will serve to knit together the various threads of studies and policy analysis that will be on-going during the time period prior to the commencement of the First Session of the Twelfth Legislature.

In addition, the Senate CRA Committee proposes to undertake a separate special study that will be beneficial to Senate members during the next session. A full project description has been developed and is attached, along with background material and the budget breakdown. The project is estimated to cost $32,144.

I would appreciate it if you would take the necessary steps to process this request for the committee. I also would appreciate receiving, as soon as possible, specific information regarding office space and other incidental arrangements.

Your assistance is appreciated.

RE: Joint Local Government Interim RSA from DPDP, Office of Coastal Zone Management

---

Myrt,

It appears that there is a question related to the disposition of $12,000 which remained in the Senate Community and Regional Affairs Interim budget and which had been allocated for use of the Joint House and Senate Community and Regional Affairs Committee Local Government Study conducted during 1979. It was our intent and direction that these funds be returned to the Division of Policy Development and Planning, Office of Coastal Management.

The history of the Reimbursable Services Agreement between OCM and Legislative Affairs Agency for $25,000 can be reconstructed as follows. The documenting memos are attached.

1. A Reimbursable Services Agreement was approved on Sept. 14, 1979 between the Division of Policy Development & Planning, Office of Coastal Management and the Legislative Affairs Agency for services to be performed. Specifically, the RSA specified that public hearings would be conducted and staff services provided for the local government study. The amount of the RSA was $25,000.

2. On September 26, 1979 a memo was sent to the Division of Administrative Services by staff of the Joint Committee indicating the intent of the Chairmen that funds appropriated by

the Legislative Council for the Interim Local Government Study be expended BEFORE the $25,000 from the Office of Coastal Zone Management was to be expended.

3. Prior to the Second Session of the Eleventh Legislature, on January 11, 1980, the Division of Administrative Services was directed to encumber the $25,000 to cover expenses incurred by the Joint Committee during the Interim for which billings had not been received by Administrative Services.

4. In early March the House and Senate C&RA Committees were advised that approximately $12,000 remained in the Interim budget and that that amount could not be transferred back to the Office of Coastal Management as it did not specifically state on the RSA that any of the $25,000 not expended by the Committee would be returned. Apparently, the bookkeeping procedure used in this instance was an increase in the appropriation granted to the Joint Committee instead of a reduction in the expenditures.

The Chairmen of the Committee would appreciate a resolution of the problem with the $12,000 returned to the Office of Coastal Management.

March 25, 1980

Mr. Dave Walsh, President
Alaska Municipal League
c/o Pouch 6-650
Anchorage, Alaska 99502

Dear Dave:

The ability for municipalities to have a fair and equitable tax base is absolutely critical to healthy local government. I would like to urge the Alaska Municipal League, possibly in conjunction with the Alaska Native Foundation, RuralCap and others, to undertake, prior to next session, a major review of the kind and amount of taxes that the various classes of municipalities can levy and collect. The current Legislature is addressing House Bill 192, dealing with municipal revenue sharing, and Senate Bill 199, dealing with the school foundation program. These two areas provide major cornerstones for municipal school revenues. A third cornerstone, real and personal property tax, is currently faced with possible erosion and decreased credibility.

The Senate Community and Regional Affairs Committee has some twelve bills pending which impact the municipal property tax by allowing certain classes of exemptions, imposing restrictions, etc. Some, but not all, of these bills allow the municipalities to be reimbursed for the changes in their ability to levy and collect real and personal property taxes. Certainly the bills carry a major fiscal impact. I am enclosing a summary of the bills currently before my Committee. Many other tax bills affecting municipalities are before the Legislature, such as changes in the amount of sales tax which can be levied in certain municipalities and elimination of the business inventory tax.

Relating specificially to real and property taxes, it seems to me that policies must be established regarding possible exemption. If such policies are not developed, we will create a hodgepodge of a program that will serve no one well. For example, should we consider exemptions on a need basis rather than exemptions for special groups of people? Should there be equality for a whole group, rather than special interest exemptions within a group? What kind of things would be better left to grant and aid programs as opposed to exemptions in the property tax approach?

The Department of Community and Regional Affairs recently completed a study of the exemption problem. Their study gives a synopsis of information developed that deals with major exemption problems, and in some cases, suggests several options that might be taken. Their broad policy statement favors few, if any, additional exemptions, and they feel that any exemption program should meet the following criteria: "any exemption granted should be either for public property or for sufficient public good to justify a transfer of burden to the balance of the community." They recognize that the credibility of property tax has been questioned continually and with increasing intensity these past few years, and that many taxpayers feel that they are paying more than their fair share.

The state has recognized certain senior citizens' exemptions, as a matter of public policy. These exemptions support a policy of encouraging age diversity in Alaskan society, show esteem for and gratitude to the pioneers of the state and give a method of helping many to afford to stay in our state, rather than have to leave family, and friends to begin a life in another state, where it might be cheaper to live. The senior citizens who are on a fixed income and cannot absorb property taxes increased by inflation certainly are in need of assistance. However, some bills are now reaching into special groups within the senior citizens; for example, allowing for surviving spouses 55 and older of those senior citizens who qualified for real property exemption to continue to benefit from the exemption. But, what about other senior citizens within that same age group who might have just as much, or a greater need for exemptions? Disabled veterans are another group being suggested for special exemptions, but what about the equity question of all other disabled people in our State? Other questions of equity need to be considered.

Each piece of proposed legislation offers a shift in public policy -- new groups which deserve special treatment, new funding approaches, and so forth. However, sound public policy decisions can be made only within the context of effects or impacts on local governments and the general public. How can we create a new special exemption, for example, unless we are certain of municipalities fiscal needs, alternative revenue sources and the impact of using those other sources?

Again, I would urge the Alaska Municipal League to take a leadership position in review of the municipal property tax, as well as the broader impact of local municipalities being able to raise adequate revenues to fund needed municipal services. I would be most pleased to have your response as to whether you feel the Alaska Municipal League finds merit

in this proposal, and if so, I sincerely hope the league will analyze the kind and amount of taxes that the various classes of municipalities can and should levy and collect.

Sincerely yours,

Arliss Sturgulewski

Taxes (home improvement exemption)

SENATE BILL NO. 138, by Senators Bradley and Stimson. Relates to establishment of tax exemption for home improvements. Amends AS 29.53 by adding section which provides that the "value of an alteration, repair, renovation, addition to, or improvement of an existing structure which is used by a taxpayer as his personal residence is exempt from assessment for purposes of levy and collection of property taxes under this chapter....." Repeals AS 29.53.025(f) & (g) relating to current exemptions for improvements. Provides Act effective January 1, 1979.

Introduced February 13 and referred to Community & Regional Affairs, then to Finance.

Veterans (disabled) (property tax exemption)

SENATE BILL NO. 154, by Senator Bradley. Amends AS 29.53.020(e) to include disabled veterans of any age to section which exempts persons 65 or over from payment of property tax Applies to resident veterans, honorably separated from service whose service-related disability has been rated at 50% or more. Provides Act effective January 1, 1980.

Introduced February 13 and referred to Community & Regional Affairs, then to Finance.

Residential Property Tax (partial exemption)

SENATE BILL NO. 296, by Senator Stimson. Adds to list of exemptions from municipal property tax in AS 29.53.020(a) "the real property owned and occupied as a permanent place of abode by a resident, not exceeding $25,000 in value." Provides state shall reimburse a borough or city for revenues lost. Repeals AS 29.53.025(a) which allows municipalities to exclude or exempt or partially exempt residential property from taxation by ordinance ratified by voters, the exemption not to exceed $10,000 per residence. Provides Act effective January 1, 1981.

Introduced January 14 and referred to Community and Regional Affairs and then to Finance.

Property Tax (municipal) reduction of)

SENATE BILL NO. 299, by Senator Kerttula. Amends AS 29.53.050(a) (Tax Limitation on Municipalities) to read: "A (NO) municipality may not levy and tax for any purpose in excess of nine-tenths of one (THREE) percent of the assessed valuation of property within the municipality in any one year." Provides Act effective 1/1/81.

Introduced January 14 and referred to Community and Regional Affairs.

Property Tax (disabled Vets exempt)

SENATE BILL NO. 360, by Senators Sumner and Hackney, by request. Exempts from municipal property tax the real property owned and occupied as a permanent place of abode by a disabled veteran. Provides exemption is allowed to veteran "for a percentage of the assessed value of the real property which is the same as his percentage of disability as established by his service disability rating." Provides Act effective January 1, 1981.

Introduced January 24 and referred to Community and Regional Affairs and Finance.

Fire Prevention

SENATE BILL NO. 370, by Senators Colletta and Bradley. Adds to AS 29.53.020 (Municipal Property Tax - Required Exemptions) "Two

percent of the assessed value of a structure is exempt from taxation if the structure contains fire protection systems in operating condition incorporated as a fixture or part of the structure. The exemption is limited to 1) an amount equal to two percent of the value of the structure based on the assessment for 1981, if fire protection systems are a fixture of the real property on January 1, 1981; or an amount equal to two percent of the value of the structure as of January 1 following the installation of the fire protection systems as fixtures of the structure after January 1, 1981.

Introduced January 31 and referred to Community & Regional Affairs.

Sr. Citizens Tax Exemp. (surviving spouse)

SENATE BILL NO. 427, by Senators Ferguson, Ray, Sackett, Meland, Colletta, Sumner, Kerttula, Hohman, Mulcahy and Bradley. Amends AS 29.53.020(e) relating to municipal property tax exemption for senior citizens by adding: "The real property exempt from taxation under this subsection continues to be exempt if owned and occupied as a permanent place of abode by the surviving spouse of the resident, if the surviiving spouse is 55 years or older and has a gross annual income of less than $20,000." Does not provide for effective date.

Introduced February 12 and referred to Community and Regional Affairs, then to Finance.

Property Tax Exemptions (for energy

SENATE BILL NO. 431, by the Rules Committee by request of the Legislative Council by request. Adds new section to AS 29.53 (Municipal Assessment & Taxation) which exempts from municipal property tax "The value of an alternation or improvement of an existing structure that reduces energy consumption in the structure." Section applies to mobile homes also. Provides Act effective January 1, 1981.

Introduced February 12 and referred to Community and Regional Affairs, then to Finance.

Municipal Property Taxes (exemp. sr. citizens--personal property)

SENATE BILL NO. 456, by Senators Stimson and Bradley. Amends Municipal Assessment and Taxation (AS 29.53), required exemptions (020) by stating that the property of certain residents of the state is exempt and further states that "(e) The real property owned and occupied as a permanent place of abode by a resident 65 years of age or over, and the personal property owned by a resident 65 years of age or over, is exempt from taxation of the assessed value of the (REAL) property." Deletes reference to "real" property throughout and repeals AS 29.53.020(i) which defines "real property" as property including, but not limited to mobile homes whether classified as real or personal property for municipal tax purposes. Provides Act takes effect January 1, 1981.

Introduced February 18 and referred to Community & Regional Affairs, then to Finance.

Property Tax (residential-partial exem. from assess)

SENATE BILL NO. 465, by Senators Ferguson, Colletta, Fahrenkamp and Sumner. Exempts from general taxation (Municipal Assessment and Taxation, required exemptions--AS 29.53.020(a)) "(7) the real property owned and occupied as a permanent place of abode by a resident, not exceeding $85.000 in value." Exempts real property owned and occupied by a resident 65 years of age or over from

taxation of the assessed value of property which exceeds $85,000 in value. Repeals AS 29.53.025(a) (Municipal Assessment and Taxation. Optional Exemptions and exclusions. Section (a) states: "Municipalities may exclude or exempt or partially exempt residential property from taxation by ordinance ratified by the voters at a regular or special election."), and amends AS 29.53.020(g) (relating to reimbursement of borough or city for revenue lost by exemption) by deletion of language stating that upon proper application an individual would have been granted an exemption. Provides Act takes effect January 1, 1981.

Introduced February 18 and referred to Community and Regional Affairs, then to Finance.

Municipal Property Tax (exempting business inventory)

SENATE BILL NO. 510, by the Rules Committee by Request (for the Interim Tax Policy Committee). Exempts business inventory from municipal property tax levy and provides for reimbursement to municipalities of tax revenues lost by operation of the exemption. Reimbursement made on the basis of the application of the tax rate of the borough or city to the value of business inventory reported to the state by businesses for the purpose of taxation under the Alaska Net Income Tax Act, and subject to legislative appropriation to the Department of Community and Regional Affairs for the purpose. State Departments may adopt regulations to carry out the provisions of chapter. Repeals sections of Municipal Assessment and Taxation (AS 29.53) relating to assessment of business inventory and reassessment in the case of cessation of business during the tax year. Provides Act takes effect January 1, 1980.

Introduced March 5 and referred to Community and Regional Affairs, then to Finance.

Jay S. Hammond, Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Jay:

Re: Senior Citizens Tax Exemption from Municipal Property Tax

The legislature has under consideration, SB 328, which would establish an Older Alaskans Commission. In the event this legislation is adopted, I would like to bring to them, through you, a matter for their review and, hopefully, recommendations to the next session of the legislature. I am bringing this matter to the attention of your Advisory Committee on Aging.

The Senate Regional and Community Affairs Committee has had over twelve bills pending which impact the municipal property tax by allowing certain classes of exemptions, imposing restrictions, etc. Some, but not all, of these bills allow the municipalities to be reimbursed for the changes in their ability to levy and collect real and personal property taxes. Since real and property taxes create such a major corner stone of tax revenue source for municipalities, I have asked the Alaska Municipal League to look into the matter of establishing policies regarding possible exemptions. We will create a hodgepodge of a program in the absence of such policy. Dave Walsh, Chairman of the Alaska Municipal League, has indicated to me that the League will undertake such a study. However, I feel it would be important that a commission, dealing particularly with older Alaskans' needs, undertake a study of that part of the real and personal property tax which deals with older Alaskans.

The state has recognized certain senior citizens' exemptions as a matter of public policy. These exemptions support a policy of encouraging age diversity in Alaskan society, they show esteem for and gratitude to the pioneers of the state, and give a method of helping many to afford to stay in the state, rather than to leave family and friends to begin a life in another state where it might be cheaper to live. The senior citizens who are on a fixed income and cannot absorb property taxes increased by inflation certainly are in need of assistance. However, some bills are now reaching into special groups within the senior citizens: for example, allowing for surviving spouses 55 and older of those citizens who qualified for real property exemption to continue to benefit from the exemption. But, what about other senior citizens with the

same age group who might have just as much, or a greater need for exemptions?

Disabled veterans are another group being suggested for special exemptions, but what about the equity question of all other disabled people in our state? Other questions of equity need to be considered. Each piece of proposed legislation that we have considered offers a shift in public policy. New groups which deserve special treatment, new funding approaches, etc. However, sound public policy decisions can be made only within the context of effects or impacts on the general public, and certainly on local governments.

The Department of Community and Regional Affairs recently completed a study of the exemption problem. Their study gives a synopsis of information developed that deals with major exemption problems, and in some cases, suggests several options that might be taken. Their broad policy statement favors few, if any, additional exemptions, and they feel that any exemption program should meet the following criteria: "any exemption granted should be either for public property or for sufficient public good to justify a transfer of burden to the balance of the community." They recognize that the credibility of property tax has been questioned continually and with increasing intensity these past few years, and that many taxpayers feel that they are paying more than their fair share.

Again, I think the matter of senior citizens exemptions merits consideration by the Older Alaskans Commission. If such a commission is established by the legislature I would appreciate it if you would approach them on this subject.

Sincerely,

Dear Betty:

Enclosed are copies of letters I recently sent to Dave Walsh, President of the Alaska Municipal League, and to Governor Jay Hammond regarding tax exemptions from the municipal property tax. It seems to me that your Committee on Aging would have interest in taking a good look at the issue raised in my letters, particularly as they relate to older Alaskans.

With the pending change before the legislature, regarding the continuation of your Committee on Aging and the possible Older Alaskans Commission, I wanted to be sure to touch all bases. If you feel the issues raised have merit for consideration by your committee, I would be very delighted to have whatever follow-up information you might develop. You might wish to contact Dave Walsh to give input to the work that the Municipal League will be doing over the next year.

Thank you for your consideration of this material, and I do look forward to hearing from you.

Kindest personal regards,

SUBJECT: Request from Senator Sturgulewski

As per the request from Senator Sturgulewski, attached you will find the alternate proposed regulations from Donald Gilman regarding the Senior Citizen Property Tax Exemption and the correspondence from the Ombudsman pertaining to the same subject.

Also in question was the total number of senior citizens in the state. After researching this item with various state agencies, we have concluded that a reasonable estimate is 9,500 for 1980.

I believe this complies with the request received by the Department regarding senior citizens.

SENIOR CITIZEN
PROPERTY TAX EXEMPTION

19 AAC 35.120. DEFINITIONS IN THIS CHAPTER

(4) "permanent place of abode" means the real property including a dwelling, and the outbuildings, which are necessary to convenient use of the dwelling, owned and occupied by a resident who is 65 years of age or over.

Real property as used in this definition means the real property as recorded in the office of the district recorder by subdivision plat or by deed of conveyance of undivided real property.

(6) "ownership" means that an applicant is possessed of the ownership interest on January 1 of the year for which

exemption is requested, in the real property, defined as the "permanent place of abode", which interest is recorded in the office of the district recorder, including ownership of a mobile home as attested by a contract, bill of sale, or other proof in a form satisfactory to the local assessor;

(8) "senior citizen" means an applicant who is 65 years of age or older on January 1 of the exemption year.

Re: Ombudsman Complaint A79-0788
(Pending)

Dear Mr. McCarter:

On July 24, 1979, this office received a complaint alleging that the State Assessor has arbitrarily limited the senior citizens property tax exemption to one acre in urban areas and five acres in rural areas. According to the complainant, the State Assessor does not have statutory authority under AS 29.53.020 (e) to impose such a limitation on the property tax exemption granted to senior citizens.

Please take notice that this complaint has been fully investigated by the Office of the Ombudsman, and has been found to be Justified.

In our investigation of this complaint, we found that the property tax exemption in question is based on AS 29.53.020 (e) which states:

> The real property owned and occupied as a permanent place of abode by a resident 65 years of age or over is exempt from taxation of the assessed value of the real property. Only one exemption may be granted with respect to the same property and, if two or more persons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. No real property may be exempted under this subsection which the assessor determines, after notice and hearing to the parties concerned, has been conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the assessor is appealable under AS 44.62.560 - 44.62.570. (emphasis added)

When this law was originally enacted in 1972, it contained a provision to limit the exemption to those individuals with an annual income of less than $10,000.00. That provision was repealed in 1973. In 1976 the legislature passed an amendment to limit the exemption to the upper third quartile of assessed values in the state during the previous year. However, this provision was repealed during the 1977 Legislative Session, retroactive to January 1, 1977. Thus the quartile system was never

placed in effect.

The only limitation stated in the present statute on the amount of land to be included in the exemption is the phrase "real property owned and occupied as a permanent place of abode." The last two sentences of subsection (e) are clearly intended to prohibit the fraudulent transfer of real property to senior citizens for the purpose of avoiding taxes. As currently written, AS 29.53.020 (e) contains no mention of, or reference to, any specific acreage limitation on the amount of "real property owned and occupied as a permanent place of abode."

Shortly after this statute was first enacted, the State Assessor began utilizing administrative guidelines to impose an acreage limitation on the amount of land that senior citizens claimed as their permanent place of abode. These guidelines were based on the argument that the amount of land in the exemption must be strictly construed pursuant to 19 AAC 35.120 (4) of the Alaska Administrative Code. Subsection (4) of that Regulation, adopted in 1973, defines "permanent place of abode" as "a dwelling, or a dwelling unit in a multiple dwelling, including lots and outbuildings, or an appropriate portion thereof, which are necessary to convenient use of the dwelling unit." Since the Regulation does not contain mention of any specific acreage limitation, administrative guidelines were used to limit the exemption to one acre in urban areas and five acres in rural areas.

Over the years, at least three municipalities attempted to give full exemptions to senior citizens living on parcels larger than the one-acre and five-acre limitations. These municipalities took the position that the State did not have the statutory authority to limit the exemption to a specific number of acres. The State Assessor dissuaded the Municipality of Anchorage and the Matanuska-Susitna Borough from exempting large parcels by threatening to reject their reimbursement requests. In 1977, however, the State reimbursed the Kenai Borough on the basis of the full amount of the property claimed by senior citizens rather than the one-acre and five-acre formula. Due to the controversy surrounding the use of administrative guidelines to justify an acreage limit, the State Assessor drafted an amendment to 19 AAC 35.120 (4) which would have further defined "permanent place of abode" as "limited to not more than one acre if urban nor more than five acres if rural."

This proposed change in the Regulations met with strong opposition and in early 1978 the Legislature's Administrative Regulation Review Committee held hearings on the proposed amendment. After an exhaustive search, the Legislative Counsel could find no evidence to support the contention that the Legislature had ever intended a specific acreage limitation on the senior citizens exemption. In a written opinion, the Legislative Counsel concluded:

> there appears to be no basis in law by which the state assessor may direct or authorize local assessors to give approval to less than the entire parcel shown by an otherwise qualified applicant to be his or her permanent place of abode.

After the March 1978 hearings, members of the Administrative Regulation Review Committee were divided on the issue of whether there should be an acreage limitation. The only point agreed upon by the Committee was that if such an acreage limitation is to be instituted it must be written into the statute, not adopted by regulation or administrative guideline. Therefore, the Committee recommended that the matter be referred to the Legislature for consideration as an amendment to the statute. A bill to amend the statute was introduced in the 1978 session, but no final action was taken on it. So the State Assessor continued to administer the one-acre and five-acre limitations through the use of administrative guidelines. This resulted in the filing of a complaint with the Ombudsman and initiation of the present investigation.

In responding to our original inquiry regarding this complaint, the State Assessor asserted that the one acre and five acre limitation was mandated by the municipalities. Several municipal tax assessors assert, on the other hand, that the State Assessor forced this formula on the municipalities. The Department of Community and Regional Affairs requested an opinion from the Attorney General's Office on the agency's authority to impose a specific acreage limitation.

In an opinion dated August 17, 1979, Assistant Attorney General Rodger W. Pegues wrote that the State Assessor's one-acre and five-acre limitation "comports" with the purpose expressed in the phrase "owned and occupied" in the statute. Mr. Pegues justified his assertion not on the basis of specific reference to evidence of legislative intent but rather on the supposition that "we do not believe that a windfall for holders of vast tracts of land was intended or that the exemption was designed to encourage speculation in realty and the withdrawl of large tracts from the market." Mr. Pegues concluded that if the State Assessor's language of limitation were incorporated into the agency's regulations "as an interpretation of AS 29.53.020 (e), it would survive judicial scrutiny. However, until it is adopted as a regulation under the Administrative Procedure Act, it can have no legal force or effect on a person claiming the exemption." The Attorney General's opinion also suggested that if the Assessor has consistently interpreted AS 29.53.020 (e) as incorporating the one-acre and five-acre limitation, "the interpretive regulation can be given retroactive effect when it is adopted."

On the basis of the above-cited opinion, the Department of Community and Regional Affairs recently announced that it will hold public hearings for the purpose of amending the definition of "permanent place of abode" (19 AAC 35.120 (4)) to include the one and five acre limitations. That is precisely what the agency attempted unsuccessfully to do in early 1978. The agency's present course of action runs contrary to the recommendation made to the agency by the Legislature's Administrative Regulation Review Committee in 1978.

FINDING: We find the complaint to be Justified. We find the phrase "real property owned and occupied as a permanent place of abode" in AS 29.53.020 (e) to be clear on its face. We found no evidence of legislative intent and no persuasive interpretive rules to indicate that the legislature meant the phrase to authorize a specific acreage limitation.

The present statute should be applied as written: without an acreage limitation.

We also find that the definition of "permanent place of abode" in the Regulations (19 AAC 35.120 (4)) is in conflict with the language of the statute since "necessary to convenient use" implies a limitation of the exemption. In a similar manner, the State Assessor's "administrative guidelines," which have been used in the past to justify the one-acre and five-acre limitation, are also in conflict with the language and intent of the statute.

We find that the agency, by administratively imposing a limitation on a general tax exemption granted to a specific group of citizens, has infringed upon the functions of the Legislature. Tax relief is a question for legislators to decide, not a policy matter that should be decided by administrative officials. The State Tax Assessor and the Department of Community and Regional Affairs have assumed a taxing role by implementing specific acreage limitations on the Senior Citizens Property Tax Exemption. For this reason we find the agency's actions to be arbitrary and an abuse of administrative powers.

RECOMMENDATIONS:

1. We recommend that the Department of Community and Regional Affairs desist from enforcing the one-acre and five-acre "administrative guidelines" which are counter to the language of the statute.

2. We recommend that the agency not adopt the proposed change in 19 AAC 35.120 (4) which would further define "permanent place of abode" as "limited to not more than one acre if urban, nor more than five acres if rural."

3. We recommend that the agency amend 19 AAC 35.120 (4) to eliminate the phrase "which are necessary to convenient use of the dwelling unit" from the definition of "Permanent place of abode."

4. We recommend that if the agency believes there should be an acreage limitation on the Senior Citizens Property Tax Exemption, then the agency should address the issue by asking the Governor to introduce a bill to amend AS 29.53.020 (e) in the forthcoming session.

Since this report of our findings contains formal recommendations made by this office, may we have a response from you within thirty days, pursuant to AS 24.55.190 (b) and AS 24.55.200. Should you wish to discuss any part of this report, please feel free to call me at 276-4011.

Sincerely,

Frank Flavin
Ombudsman

November 23, 1979

CERTIFIED/RETURN RECEIPT REQUESTED

Mr. Frank Flavin
Ombudsman
840 K Street, Room 203
Anchorage, Alaska 99501

Dear Mr. Flavin:

RE.: OMBUDSMAN COMPLAINT A79-0788 (Pending)

In response to your report dated October 26, 1979, concerning the Senior Citizen Homeowners Tax Exemption program, there are several questionable statements that seem to indicate that the material has not been thoroughly researched.

We have consulted with members of the Attorney General's staff and they do not agree with your recommendations.

In your report you listed four specific recommendations; our response is as follows:

1. You recommend that the Department of Community & Regional Affairs desist from enforcing the one-acre and five-acre "administrative guidelines". The program was budgeted based on those guidlines; a substantial number of municipalities have already been reimbursed under those guidlines for this year; and all current applicants were instructed to file under these guidlines.

Therefore, any changes initiated would have to be implemented for program year 1981 (assessments as of January 1, 1980).

2. You recommend that the agency not adopt the proposed regulations. We intend to go ahead with the public hearings but not file any new regulations until the legislature has had a chance to review the situation in the next session.

3. You recommend the agency amend existing regulations to eliminate the phrase "which are necessary to the convenient use of the dwelling unit".

That regulation has been in effect since January 1973 and was reviewed by the Administrative Regulation Review Committee of the Legislature in 1977 and was not annulled. The Department feels the action taken by the Administrative Regulation Review Committee in 1977 indicated that this regulation does comply with legislative intent.

4. You recommend that if the agency believes there should be an acreage limitation on the Senior Citizen Property Tax Program, that it should recommend the Governor introduce legislation to that effect.

At the request of Representative William Parker, Chairman of the House Community and Regional Affairs Committee, the Department will present to that committee a study that addresses exemptions in general and includes proposals covering all of the Senior Citizen Exemption Programs.

I trust this response meets with your approval. If I can be of further assistance please contact me.

Sincerely,

Lee McInerney, Commissioner

Mr. Frank Flavin
Ombudsman
840 K Street, Room 203
Anchorage, Alaska 99501

Dear Mr. Flavin:

RE: OMBUDSMAN COMPLAINT #A79-0788

The staff of the Division of Local Government Assistance has always attempted to cooperate with your investigators. In the investigation of the Senior Citizen Homeowners Exemption program, we attempted to do the same. To the best of my knowledge the only contact between this Division and your office was a 5 minute phone call to the State Assessor, Terry Earley. Neither myself, as Division Director, nor LaDonna Brown, the program manager, was contacted. We are disappointed in the fact that the investigation was not more complete.

The statement in the news release that, "The office of the Ombudsman did not receive a written reply from the Department of Community & Regional Affairs within the requested thirty day time period.", while true, is misleading. On November 23, 1979, I spoke to Rolfe Buzzell of your office and promised him the response would be in the mail (by certified mail return receipt requested) that day. Our response was mailed November 23, 1979 three days prior to the deadline you imposed. We are disappointed at your failure to at least indicate that the Department's response had been prepared and was on the way. If the need to release your findings was so great that it could not wait an extra day on slow mail, we would have been willing to telex our response to you or provide a copy to your Juneau office.

The entire press release, including the timing of its release, appears to be more of an attempt at sensationalism than objective reporting of the facts.

In the Department's response to your October 26 letter I indicated that there are several questionable statements. I will now attempt to outline some of those statements along with some others that were included in your press release of November 26, 1979.

In your letter of October 26 you state: "In 1977, however, the State reimbursed the Kenai Borough on the basis of the full amount of the property claimed by Senior Citizens rather than the one-acre and five-acre formula." The State did "over"-reimburse the Kenai Peninsula Borough slightly in 1977, based on its billings to us for re-imbursements. However, it was not the full amount and we did, in fact, reduce the subsequent year's reimbursement to compensate for the 1977 overpayment.

In the next paragraph your letter states: "This proposed change in the regulations met with strong opposition and in early 1978 the Legislature's Administrative Regulation Review Committee held hearings on the proposed amendment." Although some draft work was done by the State Assessor's office on a proposed amendment to further limit the amount of exempt acreage to 1 and 5 acres, what the Legislature's Administrative Regulation Review Committee actually examined was the existing regulation 19 AAC 35.120(4) "'Permanent place of abode' means a dwelling or a dwelling unit in a multiple dwelling, including lots and outbuildings, or an appropriate portion thereof, which are necessary to convenient use of the dwelling unit." After lengthy discussion, the Committee did not annul this regulation which indicates the Committee members were not as opposed to limiting the acreage of the exemption as your letter and press release would indicate.

The purpose of the new amendment of 1 and 5 acres is an attempt, on our part, to further define the existing language of "including lots . . . or an appropriate portion thereof." At the end of that paragraph you refer to an opinion written by Legislative council and at least infer that opinion was a result of the Legislature's Administrative Regulation Review Committee hearing when, in fact, that opinion was written prior to the hearing. That opinion, in no way, is reflective of the results of that hearing.

In your news release of November 27 you refer to an "investigation of the State Tax Assessor's policy." While that title does lend itself to sensationalism, there is no such position or person. The position is technically entitled "State Assessor" which has nothing to do with state taxing policy.

In the second paragraph, the news release states "This action has adversly impacted hundreds of senior citizens in Alaska." We estimate there are less than 100 senior citizens affected by the 1 and 5 acre limit. Again our concern about your over dramatizing or sensationalizing the situation.

The news release also states "in the last month the State Assessor's office has distributed the 1980 applications for Senior Citizens Property Tax Exemption to the boroughs and the Municipality of Anchorage". In the context of the news release this sounds like the Department is going ahead with no regard for your report or the public hearings. Proper investigation and objective reporting would have indicated that those forms were printed in June and distributed in September and simply contained a statement that reflected administrative practice that the Division consistently used in reimbursing municipalities under this program.

I would again like to express my disappointment at the lack of objectivity and thoroughness in your office's investigation and report on the proposed regulations for the senior citizens homeowners exemption program.

I look forward to better communication between our offices in the future.

Sincerely,

Lee McAnerney
Commissioner

Lee McAnarney
Commissioner
Community & Regional Affairs
Pouch D
Juneau, Alaska 99811

Dear Lee,

I was pleased to learn that the Department of Community and Regional Affairs, through the Office of the State Assessor, is preparing to do a study of a more equitable approach to providing residents of Alaska with property tax relief, particularly those in need of relief as a result of limited incomes.

I concur that this study would indeed be a worthwhile endeavor and that the current "piece-meal" approach of providing property tax relief to certain groups of taxpayers needs revision.

As this study will presumably result in legislation which would be reviewed by the Community and Regional Affairs Committee, I would appreciate being informed of its progress. Please send any pertinent information to the following addresses.

Rep. Bill Parker

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

S B 296 exempts $25,000 in value from residential property. Revenue lost to the municipality by implementation of this bill shall be reimbursed by the State. This will necessitate an audit procedure of applications for each municipality. The number of applications to be audited is estimated to be approximately 125,000 in 1981 and an expected growth rate of new applications at 5% each year following.

It is anticipated that computerization of this program will help deter some personal services expenditures, however, it will be necessary to employ 5 clerical positions for the auditing procedures.

The estimated total revenue lost by the municipalities is $37,355,700 for 1981. This was computed as follows:

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This bill limits the mill levy for all municipalities to 9 mills.

The fiscal impact of this bill would result in a loss of revenue for the local municipalities of an estimated 44.3 million dollars from local property taxes. (see attachment for breakdown)

The State General Fund would realize an estimated 18 million dollar increase due to the limiting of local mill levy on State Assessed Oil & Gas Properties. The major impact of this would occur in the North Slope Borough.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
The major impact to administration will fall in the first year when regulations, forms and procedure must be adjusted. Printing and advertising = $2.0.

According to the latest data available there were 3,108 households eligible for senior citizen property tax exemption in FY 79. Of these households, 1,928 included a spouse. No data is available on the age or income level of the spouses.

Assuming each eligible surviving spouse received an average exemption in FY 80 (estimated to be about $616 per exemption in FY 80), $60,000 would be required if 5% of the total spouses become eligible. $120,000 if 10% become eligible, $240,000 if 20% become eligible, etc.

For purposes of this fiscal note we have used the 10% figure.

The regular program grant requirement is expected to increase at the rate of 12% per year which produces the figures above.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

It is estimated that the statewide ratio of personal property to real property, 14%, would be a reliable estimate for that of Senior Citizens. Therefore, a valuation of $1,761,539 (1979 value) at 14% results in a impact of $246,600. It is also estimated that this amount will increase at 8% per year.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

According to the Federal Veterans Administration, there are 468 veterans with over 50% disability. Assuming that 25% of those are 117 renters and another 20 are 65 and already exempt, the following computations are derived:

331 (Homeowners) times $558 (average senior citizen saving) =	184,698
117 (Renters) times $184 (average senior citizen renter reimbursement) =	21,528
448 TOTAL	$206,226

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The only information available from the Federal Veterans Administration was that there are approximately 200 veterans disabled 40% or more within the State. We have estimated based on total 200 being over 50% and that 3/4 of those are homeowners and 1/4 are renters.

150 homeowners @ $553 (average senior citizen homeowner savings) = $83,700

50 renters @ $184 (average senior citizen renters reimbursement) = 9,200

Total $92,900

Additional cost is for forms printing, processing and refunds processing.

SENATE BILL NO. 296

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act providing a partial exemption from assessment for levy and collection of property taxes on residential property; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.020(a) is amended by adding a new paragraph to read:

(7) the real property owned and occupied as a permanent place of abode by a resident, not exceeding $25,000 in value.

* Sec. 2. AS 29.53.020(e) is amended to read:

(e) The real property owned and occupied as a permanent place of abode by a resident 65 years of age or over is exempt from taxation of the assessed value of the real property, <u>which exceeds the exemption granted by (a)(7) of this section</u>. Only one exemption may be granted with respect to the same property and, if two or more persons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. No real property may be exempted under this subsection which the assessor determines, after notice and hearing to the parties concerned, has been conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the assessor is appealable under AS 44.62.560 - 44.62.570.

* Sec. 3. AS 29.53.020(g) is amended to read:

(g) The state shall reimburse a borough or city, as appropriate, for the real property tax revenues lost to it by the operation of

(a)(7) and (e) of this section. However, reimbursement will be made to a borough or city for revenue lost to it only to the extent that the loss exceeds an exemption which was granted by the borough or city [, OR WHICH UPON PROPER APPLICATION BY AN INDIVIDUAL WOULD HAVE BEEN GRANTED BY THE BOROUGH OR CITY, UNDER AS 29.53.020(a)].

* Sec. 4. AS 29.53.025(a) is repealed.

* Sec. 5. This Act takes effect January 1, 1981.

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act reducing the maximum rate of levy for property taxes by municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.050(a) is amended to read:

(a) A [NO] municipality may not levy and tax for any purpose in excess of nine-tenths of one [THREE] per cent of the assessed valuation of property within the municipality in any one year.

* Sec. 2. This Act takes effect January 1, 1981.

IN THE SENATE

SENATE BILL NO. 431

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act exempting from assessment and tax levy the value of improvements to real property that reduce energy consumption; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53 is amended by adding a new section to read:

Sec. 29.53.033. EXEMPTION FROM ASSESSMENT OF CERTAIN IMPROVEMENTS TO RESIDENTIAL PROPERTY. The value of an alteration or improvement of an existing structure that reduces energy consumption in the structure is exempt from assessment for purposes of levy and collection of property taxes under this chapter. This section applies to mobile homes, whether classified as real or personal property for municipal tax purposes.

* Sec. 2. AS 29.53.060(a) is amended to read:

(a) The assessor shall assess property at its full and true value as of January 1 of the assessment year, except as provided in this section and AS 29.53.030 - 29.53.035 [AS 29.53.030, 29.53.035] and AS 29.53.160. The full and true value is the estimated price which the property would bring in an open market and under the then prevailing market conditions in a sale between a willing seller and a willing buyer both conversant with the property and with prevailing general price levels.

* Sec. 3. AS 29.53.100(a)(2) is amended to read:

(2) the assessed value of all taxable property, separately

stating the value of improvements to the property which are exempt from assessment under AS 29.53.033;

* Sec. 4. This Act takes effect January 1, 1981.

Introduced: 2/12/80

SENATE BILL NO. 389

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the senior citizen property tax exemption; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.020(e) is amended to read:

(e) The real property owned and occupied as a permanent place of abode by a resident 65 years of age or over is exempt from taxation of the assessed value of the real property. An exemption under this subsection is limited to the assessed value of a parcel or tract of property of 160 acres or less. Only one exemption may be granted with respect to the same property and, if two or more persons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. No real property may be exempted under this subsection which the assessor determines, after notice and hearing to the parties concerned, has been conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the assessor is appealable under AS 44.62.560 - 44.62.570.

* Sec. 2. AS 29.53.020(i) is repealed and re-enacted to read:

(i) In (e) - (i) of this section

(1) "real property" includes but is not limited to mobile homes, whether classified as real or personal property for municipal tax purposes;

(2) "resident" means a person who has claimed Alaska as his place of residence for at least 25 consecutive years preceding applica-

tion for the exemption provided in (e) and (f) of this section; a break in residency of more than 30 days in a calendar year operates to defeat the applicant's claim of residency for that year.

* Sec. 3. This Act takes effect January 1, 1981.

Introduced: 2/18/80
Referred: Community & Regional Affairs and Finance

IN THE SENATE BY STIMSON AND BRADLEY

SENATE BILL NO. 456

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act exempting personal property owned by senior citizens from municipal property taxes; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.020(a)(6) is amended to read:

(6) the [REAL] property of certain residents of the state to the extent and subject to the conditions provided in (e) of this section.

* Sec. 2. AS 29.53.020(e) is amended to read:

(e) The real property owned and occupied as a permanent place of abode by a resident 65 years of age or over, and the personal property owned by a resident 65 years of age or over, is exempt from taxation of the assessed value of the [REAL] property. Only one exemption may be granted with respect to the same property and, if two or more persons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. No [REAL] property may be exempted under this subsection which the assessor determines, after notice and hearing to the parties concerned, has been conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the assessor is appealable under AS 44.62.560 - 44.62.570.

* Sec. 3. AS 29.53.020(g) is amended to read:

(g) The state shall reimburse a borough or city, as appropriate,

for the [REAL] property tax revenues lost to it by the operation of (e) of this section. However, reimbursement will be made to a borough or city for revenue lost to it only to the extent that the loss exceeds an exemption which was granted by the borough or city, or which upon proper application by an individual would have been granted by the borough or city, under AS 29.53.025(a) and (b)(2)(A).

* Sec. 4. AS 29.53.020(i) is repealed.

* Sec. 5. This Act takes effect January 1, 1981.

SENATE BILL NO. 360

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act providing for exemption of the residence of a disabled veteran from levy and collection of real property taxes and authorizing reimbursement to municipalities for revenues lost by operation of the exemption; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.020(e) is repealed and re-enacted to read:

(e) The real property owned and occupied as a permanent place of abode of a person described in this subsection is exempt from taxation of the assessed value of the real property as indicated in this subsection. Only one exemption may be granted for the same property, and, if two or more persons are eligible for an exemption for the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. Real property may not be exempted under this subsection if the assessor determines, after notice and hearing to the parties concerned, that the property was conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the assessor may be appealed under AS 44.62.560 - 44.62.570. An exemption under this subsection shall be allowed

(1) to a resident of the state 65 years of age or older for the entire assessed value of the real property; or

(2) to a disabled veteran for a percentage of the assessed value of the real property which is the same as his percentage of disability as established by his service disability rating.

* Sec. 2. AS 29.53.020(f) is amended to read:

(f) No exemption may be granted except upon written application for the exemption on a form prescribed by the state assessor for use by local assessors. The claimant must file the application no later than January 15 of the assessment year for which the exemption is sought, but during the same year the governing body of the municipality for good cause shown may waive the claimant's failure to make timely application for the exemption for that year and authorize the assessor to accept the application as if timely filed. The claimant must file a separate application for each assessment year in which the exemption is sought. If an application is filed within the required time and is approved by the assessor, he shall allow an exemption in accordance with the provisions of this section. If a claimant whose failure to file by January 15 of the assessment year has been waived as provided in this subsection and the application for exemption is approved, the amount of tax which the claimant may have already paid for the assessment year with respect to the property exempted shall be refunded to him. The assessor may at any time require proof in the form he considers necessary of the right to and amount of an exemption claimed under this section, and may require a disabled veteran claiming an exemption under (e) of this section to provide evidence of his disability rating.

* Sec. 3. AS 29.53.020(i) is repealed and re-enacted to read:

(i) In (e) - (i) of this section,

(1) "disabled veteran" means a person honorably separated from the military service of the United States who is a resident of the state, whose disability was incurred or aggravated in the line of duty in the military service of the United States, and whose disability has been rated by the branch of service in which he served or by the Veterans Administration;

(2) "real property" includes but is not limited to mobile homes, whether classified as real or personal property for municipal tax purposes.

* Sec. 4. This Act takes effect January 1, 1981.

LETTER OF INTENT ---- SB 2

Senate Bill 2, An Act relating to the comprehensive re--cycling and reduction of litter, and providing for an effective date, contains two elements; i.e., the program and the financing mechanism. In order to avoid possible constitutional problems involving the single subject rule, the Community and Regional Affairs Committee has developed Committee Substitute for Senate Bill 2, which covers program elements of SB 2. The Community and Regional Affairs Committee has developed a companion bill to cover the financing mechanisms and respectfully requests the introduction of this bill.

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

_____
Chairman

SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

February 22, 1979
Committee Public Hearing - Butrovich Room
HJR 10, HCR 7, am., SB 2

1:30 p.m. The meeting was called to order by Chairman Sturgulewski. Absent were: Senator Mulcahy and Senator Stimson. Present were: Senator Rodey, Senator Kelly and Chairman Sturgulewski.

House Concurrent Resolution 7, amended - Sponsored by the House Community and Regional Affairs Committee - "Relating to an annexation of territory to the City of Kodiak."

Following introduction and a brief discussion, the Committee gave an unanimous "do pass" decision.

House Joint Resolution 10 - Sponsored by Representative Zharoff - "Relating to Local Boundary Commission Recommendation I of January 23, 1979, for annexation of territory to the City of Kodiak."

Following introduction and a brief discussion, the Committee gave an unanimous "do pass" decision.

Senate Bill 2 - Sponsored by Senators Colletta, Kerttula, Sackett, Dankworth, Meland, Sturgulewski, Sumner, Ziegler, Bradley and Fahrenkamp - "An Act relating to the comprehensive recycling and reduction of litter and imposing a litter reduction assessment; and providing for an effective date."

Following introduction, Chairman Sturgulewski called a brief recess, in order to pass before the public new work drafts of a committee substitute for this bill.

Chairman Sturgulewski after calling the meeting back to order pointed out several main changes which show in the committee substitute. Section 41.21.140 dealing with Federal requirements was added. If there are any changes in Federal requirements that would affect a portion of the bill, we would see that those particular State portions, when in conflict with the State, would automatically drop out so the Federal funds could flow in. The tax portion has been segregated out. It does not require a fiscal note, but again under the single subject rule, it needs to have a separate vehicle. The nonseverability clause has been omitted so that this bill would conform to what the other legislation within the State normally does. There is a severability clause, where if a portion of

the bill is found to be invalid, the rest of the bill stands. The Courts have moved to hold as much as possible that the legislation will stay in effect, and that is a very major change in the substitute bill. A section has been added allowing for staggered terms of the Advisory Council, whereas the former bill caused a complete changeover in a two-year period of time.

Senator Colletta, the prime sponsor, was the first to testify. Stressing that the bill is a personal priority, he then briefly refreshed memories on the history revolving around the bill. The deposit and the litter reduction activity bills have changed through the times and circumstances. Both bills now address themselves to a recycling finish, in addition to the reduction of litter. This bill would be an opportunity to try something that would truly address a litter free environment versus the deposit measure. This bill is completely industry supported. It would create the first step, regardless of its volume collection, in a process to develop a litter free environment and save a resource ethic that we should all be participating in. He stressed he did not stand on the pride of authorship on anything within the bill other than the conceptual idea behind the bill. The bill is a composite of many, many litter acts that are in effect in various states and the amendments have been made out of actual work applications over the eight years that some have been in effect. The last page of the work draft, Page 13, Section 6, is a review and evaluation provision. Convinced that Alaskans will out perform other states, he urged that this bill be given a trial, so we will all have a better and happier place to live in without having added an additional burden to the overall populace in the attempt to reduce litter and recycle some of the materials that we use.

Mr. Eric Lee, Director of the Division of Community and Rural Development, Department of Communicty and Regional Affairs, stated his Department was basically in support of the concept of litter reduction and staying a litter-free State. There were some concerns in the language, somewhat of a technical nature. There was a concern that the costs of the program were covered by the new revenues generated. One recommendation was that a new division not be created. It was felt a highly visible program within an existing division, within the Department, would be just as advantageous and more economical in cost. A Department assumption is that a central location of the program would be located in Anchorage and that there would be a field office in Juneau, and costs are related to that accordingly. A Department assumption is that local communities are concerned about implementing the comprehensive litter reduction program and that the Departmental staff will provide assistance, guidance, and coordination in their efforts. The Department does not intend to be able to solve the problems themselves and it is with the assumption that local communities would be participating very actively, and that the program in those local communities would eventually become self-sustaining. The language of the initial bill indicated the administrative cost to be limited to 35 percent. The Department assumes that the administrative costs are defined as those costs which are not directly related to the program. Although some program costs may be salaries, salaries of people

Although some program costs may be salaries, salaries of people who 100 percent of the time are coordinating with the communities, they simply are not defined as administrative costs. An annual inflation rate of six percent is assumed. Basically, the Department took the revenue projection and tried to tell what they could do with that amount of money. So, the first years expenditures, next year, would be $600,000 total expenses, which was believed in line with the original projection. Of the $600,000, the Department broke out the line item budget on the second page. Included was a staff of eight people, with some clerical staff. A staff chart is provided. The high level information officer, educational type person, who heads the section is supported by a clerical staff and four professional field people, who would be working in the field with the local communities, to coordinate the activities of the program. In the 1981 projection, one more position was added, a fulltime position for a recycling coordinator. In discussions with other states, who had been involved in this, it was indicated this position would not be needed until the program was on its feet. Then, a coordinator for the recycling efforts would be needed. Other major items involved some travel, necessary when the staff needed to participate with local communities. The Advisory Council, which is created, would need travel and per diem monies as indicated on the fiscal note. There are basic communication costs, space costs, and other items based by the standard cost of the Anchorage area and the Juneau area. Another large item is $75,000 for promotional and educational type activities. A film has been listed as one major item. Other states have felt it to be one of the more advantageous methods of information assimilation. With promotion being one of the objectives, the budget is a reflection of this. Equipment and commodities to operate the number of bodies based upon current standards, as well as the grants section, where direct grants would be made to communities for the various functions are outlined in the bill.

Senator Rodey stated that in June, 1978, in a Community and Regional Affairs memo, the estimated cost of the bill was 2.6 million. There has been a significant reduction in the cost of the bill, without an apparent major change, and asked Mr. Lee why the tremendous decrease in the cost.

Mr. Lee stated that at that point the Department had tried to develop a handle on what it would cost essentially to do everything that everybody else in the country was doing. Other people had been contacted as well as various states with different programs. One major item was the Youth Patrol. The State of Washington funds their program 100 percent. Hundreds of youths are hired to go out and actually pick up the litter, and they are paid out of the general fund, which is over a million dollars. So, if the Legislature wants to fund a Litter Patrol with State funds, the language does not indicate it. It indicates other sources of funds for hiring that type of people. That was one of the major functions. Additionally, the Department was trying to say, what is the ultimate cost if a Rolls Royce of a program. In discussions with the sponsor and others, the revenue projections were indicated. The Department concurred that the cost of the program should not exceed the revenue. What is being said now is that is what can be done, and what will be done with that amount of money, and scale it down accordingly.

Senator Rodey commented that the Litter Patrol is still in the work draft, and that the Department of Revenue estimated revenue last year at $890,000. Would that be a reasonable amount of money to support the program? It was noted that legislators often see proposed programs come back more expensive than when they had started out. Community and Regional Affairs was felt to be one of the most responsible, but still felt that he should be cautious.

Chairman Sturgulewski commented that perhaps the new proposal on the tax bill had not yet been noted, and gave a brief summary.

Senator Rodey asked Mr. Lee if the Department handled any other litter control programs, or programs relating to refuse. Mr. Lee replied no.

Mr. Lee indicated that the Department of Environmental Conservation expressed concerns about the language. He would like a further clarification of the definition of administrative costs because if personnel services are considered administrative costs, you are not going to get this type of program for 35 percent of the total.

Senator Kelly asked why the Department of Community and Regional Affairs was selected to administer the program rather than the Department of Natural Resources. Mr. Lee did not know and suggested the original sponsor be asked.

Mr. Lee further stressed that the language referring to three months after the fiscal year to determine the report is a bit too restrictive, because the books do not actually close for a couple of months after the fiscal year end, and the Department would like to see an extension of six months, rather than three months.

Chairman Sturgulewski inquired if that would bring the program back before the Legislature for that immediate year.

Mr. Lee replied the Department has a similar type situation with the day care assistance program, which they administer. Fiscal time frame would be difficult to close down all the books. There is some concern about the Department's ability and mechanism for receiving and expending contributions of either cash or in kind, in terms of the day-to-day operations. The Department has no experience in this area and would like the language to clearly establish the intent, that the Department could take in gifts, donations, and turn around and spend those on behalf of the program. It was noted that some states have indicated difficulty in public relations with businesses when specific size, color and shapes of receptacles were mandated as these businesses may have spent a large amount of money on the decor of their buildings. So, the Department would like to see a little more flexibility in that part of the language. The Department would also like to see some indication as to what is expected and the intent of the establishment of a fine. Another item would be for the general use of grant money to municipalities to allow them to purchase the required receptacles, and so forth, a primary need.

Chairman Sturgulewski inquired if the thinking was toward smaller communities where that would be the difference of the beginning of the program. Mr. Lee replied yes. If that is the primary need and primary situation and they have no other basic resource. This could at least be a possibility. The sole use of the grants certainly does not support that idea.

Mr. Kanouse, Program Coordinator for the Division of Community and Rural Development, Department of Community and Regional Affairs, who had sat at the testifying table with Mr. Lee had no comments.

Ms. Foster introduced herself as Christine Foster, appearing as a member of the sponsoring committee for Ballot Proposition No. 5, in the 1978 General Election.

Ms. del Piaz introduced herself as Virginia del Piaz, Chairman of the Ballot Proposition, properly known as the Alaska Bottle Bill Initiative. She stated it was general knowledge she and Chris are legislative staff this Session and had received permission to testify. Several years ago they undertook an initiative drive to place a proposal for a term of beverage container legislation before the public. There were two problems of concern, recycling and litter. The initiative was defeated in the November General Election, but the interest in addressing these two problems remain undiminished. There is the concern that any legislation deal meaningfully and not just be cosmetic only in this problem.

Probably the most important concern is that the program would most appropriately be administered under the Department of Environmental Conservation, rather than the Community and Regional Affairs Department. DEC has the existing litter control measures, and has solid waste management. As a Department, DEC is the lead State agency for solid waste management planning, has the regulation for enforcement, for technical assistance, both under the State Law and the Federal 1976 Resource Recovery and Conservation Act. DEC already distributes litter bags, they have already done litter surveys, they provide local assistance to governments, promote the Alaska Clean-Up Month, which is believed to be May, and have done so for a number of years, and have also been involved in policing television spots and other public literature. It is very evident that this agency has been involved in this for some time and is therefore felt to be more of an appropriate agency to deal with the program. This program could be put in an existing division, in DEC, probably their Terrestrial Programs division, which already handles most of what is proposed.

Concerning the Advisory Council, there are two ways of working with it. One comment that if the program is moved to DEC, DEC already has an existing Advisory Committee that could possibly expand their charge to the proposed legislation. There is existing funding already for this particular Committee. They are a very well constituted working Committee. They are used to dealing with these things and they are very familiar with these types of problems. If the program is kept in Community and Regional Affairs, it was felt the Advisory Council should

very definitely not represent just the same interest group. It should be expanded to different interest groups rather than just businesses. Some suggestions might include a public member, education members of the community, local government officials, perhaps a rural representative, somebody from the recycling group, youth groups, some type of business representative, possibly one from a consumer group and environmental group, and one from service organizations which have expressed quite a lot of interest. Another suggestion is that the Council not meet more than two or three times a year, rather than the four or more times as stated. This would also help fiscal implications such as per diem and travel.

The proposed Litter Patrol has changed quite a bit through the years. In the current bill, the duties and purposes are vague and not well specified. This should be clarified further. As a note, to cover the size of our State of Alaska and to be an effective part of the program, it might grow quite large. There might be some problems with the way it's constituted.

If the grant section is to remain, some definite limitation on the grants indicated should be made. Numbers one through four for a large part already exists; numbers five and six could very effectively be made into a loan program either with one existing, or create a new one; and numbers seven through ten could be done by the Department or division, or could be subcontracted, or could possibly be grants, if so deemed. For further information, the first one goes with the instruction of informative material distribution to elementary or secondary schools, and so forth. There are already a lot of sources for this, mainly for the Keep American Beautiful Program and some through Federal programs. The second one, purchase and erection of roadside signs is vague, and it would be duplicating to give grants for this. There is already an existing statute for the address of roadside signs for littering. Section 19.19.010, states a Commissioner of the Department of Transportation and Public Facilities shall place a sign near State boundaries at each primary and secondary highway which informs the public of the prohibition against, and penalty for, highway littering and may place similiar signs at other locations in the State when considered necessary. We are already covering that contingency. Third, the organization, operation of the clean-up drive conducted by local agencies, private organization or service groups, even volunteer help, does exist in the private sector and question the wisdom of using State monies to fund this. Fourth, public information that is selected by the division including the use of media. DEC is already doing media spots against litter and programs are noted on television and radio. Fifth and Sixth speak to Number Five, the expansion of existing and creation of new source separation programs. Six, expansion of existing and creation of new community recycling centers. This might more appropriately be under a loan program because it is speaking of capital expenditures. Seven through Ten should more appropriately be under the section that gives the charge to the division in whichever department. It is essentially telling the things that should be done.

The litter control assessment, no matter what it's finally called, should be tied to the amount of litter generated by a business. There should be some relation between non-litter generated to the tax put upon by a particular business or operation.

Senator Kelly asked Virginia if she was satisfied with the recycling provisions of the bill. Ms. del Piaz replied there quite frankly weren't many and would certainly like to see this strengthened.

Chairman Sturgulewski felt some major and basic issues had been raised and asked Senator Colletta to speak again addressing the reason for the designation of the Department of Community and Regional Affairs as well as the Youth Patrol.

Senator Colletta again emphasized that this bill was the accumulation of experience gained by other states over the past eight years. This is not a State bureaucracy. For all practical purposes, this is a people's activity, thus the agency, Community and Regional Affairs, was picked, as they deal with people on a daily basis. DEC is limited in their scope. Although they have activities Statewide, it's not a normal reoccurring daily function. They deal with specific issues, and the Department of Natural Resources is the same way. They have Statewide responsibilities, but they do not work on a daily basis Statewide.

The Litter Patrol has been a source of controversy from the day it was requested, and it was never requested by him. The Youth Patrol is very much alive, and in Anchorage thought there was around 2,000 youngsters involved. This is being run through nonprofit and civic organizations. They are not State employees.

Senator Rodey expressed concern on the cost of the bill, especially being borne by Alaskan business, small and large alike. He stated his reluctance to put any additional burdens on Alaskan businesses this year, also feeling it's passed on to the consumer and affecting all Alaskans. The Litter Patrol appears to be a unknown quantity at this point and particularly in future years.

Senator Colletta again stressed that the Litter Patrol is alive and it is not State funded. It is comprised of youngsters who are assisting their parent organization in the earning of money, and it is a volunteer effort. The only paid individuals are those that the State will furnish to assist communities in accomplishing a Litter Act activity.

Senator Rodey further pointed out that nowhere in the bill does it say that, it merely says the division shall adopt mandatory requirements for adoption of regulations which established the Litter Patrol. Another concern is the requirement that businesses procure, place and maintain receptacles, at their own expense, after their expenses here. The responsibility is on people owning or operating a public place, which includes most businesses, certainly all retail. This was alluded to previously.

Senator Colletta stated he did not know of any other specific language. Specific organizations, such as the Chamber of Commerce, have already implemented the litter and recycling activity, totally privately funded. It was the understanding in talking with the Chairman of that activity, that it is not a probability. The only assist that he would want out of the passage of the bill would the educational aspects and conceivably, on occasion, a little bit of receipt money to tide over some of the contractual things that deal with the nonprofit organizations in the pick-up of litter. Through the normal course of activity, they do have designated spots, and receptacles now, and the responsibilities for policing their own yards still remains theirs. All we are doing is assisting and hoping that the accumulation of that would be the central place for them, again benefiting them. They still sweep their own parking lots and everything else.

To further clarify, originally there was a Litter Patrol. These were uniformed yougnsters working for a State agency and so forth, but experience has shown that was not the most practical way. What you have done is just expand a refuge pick-up activity. Greater success has been achieved in the utilization of the local youth and instilling pride in each community.

Senator Rodey stated he would be happy to work on the language and redo this section.

Mr. Gravo introduced himself as Mitch Gravo, testifying as a resident of the Municipality of Anchorage. Litter is a major problem for the municipality and any legislation which helps deal with that problem is supported. Legislative intent is a concern and suggests the Committee discuss the possibility of including the public sector also in that section. The Municipality works very closely with the Chamber of Commerce and last year the program was a tremendous success. This year there will be some changes, a new approach, and the program should be even more successful. The Advisory Council should also have solid waste professionals, and people with considerable expertise. It is indicated that six months after the bill goes into effect there should be a survey. If this goes into effect in July, the survey would be conducted in January, and in Anchorage all the litter is covered up at that time. They see it in May. When garbage and refuse is referred to in the bill, the suggestion is made for the word solid waste to be used instead, giving a specific definition. Concerning receptacles, the costs to those individuals may be significant depending upon the design, and the bill speaks that the design will be the responsibility of the director.

you might use the word solid waste, instead of garbage or refuse, because it's ..... and has a specific definition. Finally, when the legislation speaks to the receptacle, the costs to those individuals may be significant depending on the design, and the bill speaks of the design will be the responsibility of the director, and we suggest that perhaps you look at some, that better responsibility being placed with professional with a design, in the least costly manner possible. I have no further comment.

Chairman Sturgulewski: Fine. Are there questions of Mitch?

Senator Rodey: Madam Chairman, just one comment briefly with regard to the tenth section of the bill, since Senator Ziegler, the Senate grammarian, is not with us, let me, let me offer some comments. The English language is a beautiful thing and I think perhaps we could include its usage in the ~~intent~~ tenth clause by perhaps, by cutting down some of the existing verbage. I think it would be interesting for the press to take a look at it and see how it, we might say what is intended to be said and in fewer words and discretion .... set aside.

Chairman Sturgulewski: Thank you, Pat. Thank you, Mitch. Appreciate that. Ron Murphy?

Mr. Murphy: Madam Chairman and members of the Committee. My name is Ron Murphy. I'm a lawyer from Seattle, and the reason I am here is because it is my understanding that the Committee would like to hear from me about the experience we have had in that State and other states that I am familiar with. I represent the industry group that has been involved in this kind of a program in other states, especially

in Washington State; and, I have had a great deal of experience, good and bad, and made some mistakes, and hopefully have learned from them and my purpose here, I believe, is to hopefully answer questions that you might have that might help you in making determination of how to make your determination. I should also say that I have worked with, closely with, the Alaska industries people, and tried to work with Senator Colletta, and some of the other people here in Alaska, within the government, to give them the benefit of our experience.

Senator Sturgulewski: Mr. Murphy, I think it would be very helpful to us. I am sure you have had a chance to look at Senate Bill 2 and the Committee Substitute, what we have on the table in basic form, very similar to that. I wonder if you might be able to say what we have presented here, how that compares to what's happening in Washington and what you feel, or perceive has happened in Washington as a result of their bill. Or, have we strengthened areas where they have had weaknesses. What about this program? What can it do for Alaska, if there is a commitment of those that have said that we will make this bill work What might happen in Alaska as a result of a bill like that?

Mr. Murphy: I'll do my best.

Chairman Sturgulewski: Yes, just a little kind of an overview and comparison and what will this do for us.

Mr. Murphy: All right. And then if I don't answer something, or raise other questions, I hope you'll shoot straight at me and I'll try to do my best. If I don't know the answer, I'll tell you.

Chairman Sturgulewski: I may not, but I bet Senator Rodey will.

Mr. Murphy: All right. First of all, I think you asked me what, how does this bill compare with what my experience has been in other states and observations. This bill was put together as I understand it, as an attempt, to take the best of those bills and weed out the poor portions of those bills, and then it was tried to be tailored to the situation here that exists as best to be determined for Alaska. A lot of thought went into that and a lot of work went into it and it was an attempt to put it together in a fashion that would work here. For instance, the Washington approach, in the beginning, was entirely a litter bill approach Back in 1970-71, when the Washington approach was put together, it pertained entirely of litter. Now we find that there are these recycling solid waste problems that have developed and so the bill that you have before you is an attempt to incorporate and address itself to those problems and solving them. I should start right out, though, and try to be specific and say, it is not the intention as I understand this bill, and Senator Colletta certainly has more and better knowledge of what this is about and what he wants to accomplish, and you might want to accomplish, than I do. But industry, and speaking for industry I can say, I can say honestly and candidly, industry is behind this bill, as I understand in Alaska, and I can tell you its behind the bill in Washington. And I understand from talking to the industry people here that they don't intend to have a cosmetic bill, as stated here earlier, they want a bill to work. And they'll stand behind it and attempt to make it work. Now this bill is addressed somewhat to recycling, where the Washington bill was not. Now we are amending the Washington bill now to incorporate and strengthen recycling sections; but fortunately, when we drafted the Washington bill, we made it flexible enough, by luck, that it could address itself somewhat to recycling, and we were able to incorporate recycling in it and in the State of Washington, we have got a tremendous increase in recyclers and

recycling, which I think in large measure is due to this situation we have down there. We have some 500 recyclers in the State of Washington now, almost more than any other state and part of that is due to the bill. Not all of it, I assure you. Going back, ~~the,~~ what we did in Washington is, we were told in the State of Washington as industry, that if we didn't come up with something to solve the problem of litter back in those days, that we'd, the State would solve it for us. And we had some good Senators and Representatives that we knew, and we sat down with them, and we said, hey, we don't know how to solve the litter problem. We don't. We know it's a big one now because of what's happening in this country. But we said we'll go out and see what we can come up with. So, we got together a group of industry people like the ones you have here, and we'll try to get together here now, and come up with a program that we can present the Legislature and they take a look at it in that stage and say o.k., it makes sense, or it doesn't make sense. And that's what we did. And we studied, spent about $15,000, doesn't seem like much money now, but then it was quite a bit, to study the litter situation in the various states by the municipalities, by the states, by the individuals, businesses, and so forth, and come up with what we thought was the way to solve it. And we came up with basically what is known as the Washington Model Litter Law now. ~~That's how we~~ .... The idea behind this is, as I stated earlier, it's not to have the State solve all the problems that we had in the recycling and litter, and it's not to have the State tax everybody, industry, or anybody else, to solve all the solid waste and recycling problems, we haven't got that much money. But the purpose is to put the problem of litter control and now recycling into one central agency in a given state and get some control over it, get some guidance over it, get some standards set, and get a program going, so people will know how to deal with the problem. So we, in Washington and other states now, and we hope in Alaska, will put this under a government agency that will take control of setting these standards and start working on the problem, instead of a mish-mash

like we had with one industry doing one thing, and one city doing another thing, and we don't know where we are going. People need guidance and we need study and we need work, so this is what the idea was. But we also put in here after our studies were made, some specific things which we thought should be done, so we didn't say the State solved the problem. We found out that there weren't enough receptacles out in given communities, given areas where people were apt to litter, like beaches, parks, playgrounds, you know, marinas. And the receptacles weren't placed in the right places at the right time. And the receptacles weren't the kind of receptacles that people could see and recognize. So, one of the things we require in this Act and in the other acts, is that the State sets standards, just like we have with stop lights today, just like we have all restaurants have to have toilet facilities. The State sets standards on these receptacles and they should be. Somebody said here earlier, and I know it was a good thought and we wrestled with this, we think ~~standardize, and color it and design~~ standarized in color + design. It doesn't mean they have to be expensive; but they should have some way people could recognize wherever they go that's a litter receptacle and that's what it's for and there should be enough of them out so that they can use them. How many times have we gone down a city street, and I've done it in Seattle, and I've done it in Yakima where I grew up, and I think I did it in Anchorage, and you are a person who wants to see litter picked up, you pick up the litter and don't know what to do with it. So we've got to have the things out there for people to put them in and they should be standarized, we think, in color and design. So we found that people were being fined for litter, littering and charged $100, $150, $500. This wasn't helping. One question answered earlier today was why was the fine low. Frankly we set the fines low down there and suggest it to you here, because the idea is to keep the fine low for the litterer because you don't want him to go and clog up the courts. We want it to be like a parking ticket, and so then, when a person litters, and he is fined, he just takes bail and it's sort of an educational process. That's a little thing, but it's one of

the more important things. The other thing that we found out is that motorists, drivers, people going places, have a lot to do with litter. They get in a car, out it goes, when they get in their cars and go picnicking, and so forth. So, it's mandatory in this Act to have litter receptacles in automobiles. We also found out, and this can be a litter bag. You also find in here that litter receptacles are required to be placed in all the, to be handed out by the State agencies. They are inexpensive, the State can give them out and the State will send them out with motor vehicle registrations, this is all an education process. So, we have followed this pattern in the State of Washington basically, and it's taken a long time to go through all of it, but basically, identification of litter receptacles, plenty of them out, litter bags, plenty of them out, and a good strong educational program for the public. And I might stop here and ask you to ask me some questions, it's not a boondoggle, but, but educational program for the public, is not just going out and buying some television spots to don't litter, it's to get each community involved. Have this Department, with one other field man go to the communities, like in the State of Washington. We have an annual program in Ellingsburg, Washington, where it's clean up the Yakima River. The field person from our Department goes out, starts the program there, for instance, to get those young people to school there to go out and clean up that River once a year and it starts them out, gets them going and gives them receptacles, gets their local community to get the trucks going; and these are the kind of programs that are coordinated under this Act. I can stop and talk about the Litter Patrol in a minute, but right now you may have some questions.

Chairman Sturgulewski: Yes. Senator Kelly?

Senator Kelly: Mr. Murphy, in the State of Washington, which Department administrates this program?

Mr. Murphy: In the State of Washington we use the Department of Ecology. The reason we use that is that it had just been formed at that time and it seemed like the natural place for it to go, because they were going to be a Statewide agency talking about ecological matters. I, when, if you would ask me specifically why this Department was picked here, I wouldn't have known the answer and I was very pleased to hear what Senator Colletta said that, if you need an agency that works in the various communities at a local level, so that you can get that local touch and get self-help programs going. And the Department of Ecology was the only Department we had that did that.

Senator Kelly: And then you said something about 500 recycling plants in the State of Washington. Is that 500 rebottling plants, or, what exactly are your recycling centers?

Mr. Murphy: Recycling centers in the State of Washington cover everything from a fairly large ~~area~~ plant to one where you have maybe a scrap dealer with several employees, handling from one hundreds of thousands of tons of stuff down to a one, or two, man shop, where you've got a fellow that believes in recycling and goes out and does it on a very insignificant small time basis, say one man. Am I answering your question? That's what I meant -- we don't mean a bottle shop, I mean we don't mean a manufacturer.

Senator Kelly: You're not actually recycling the material, you're not recycling aluminum cans, or recycling bottles, you're just simply, kind of a scrap center?

Mr. Murphy: It would include both, collecting it, putting it in boxes, separating it, and selling it to somebody who does it. We would count the ones who collected it, just the little guy with the shop where he collects bottles and cans and gives somebody money for it, or paper, all those things. But it isn't always the fellow

who processes it, no. It's the collection agency included. So when I say 500, really, it's the little guy too. It's the little guy who picks it up, and has it here, and pays people to bring it in; and then he sells it to somebody else. Of course he might sell it to Northwestern Glass, the glass, and they turn it into glass bottles. Does that answer your question?

Senator Kelly: Yes. That answers that particular question. And the last question I have, I suppose, I have some doubt whether standarized receptacles are really necessary because I am assuming they are going to be a great deal more expensive. If a person has the option between just buying a logo and putting it on an existing receptacle, or buying a standarized receptacle that has obviously been manufactured outside the State and brought in, I'm pretty concerned that the size, the weight, and everything; it's going to turn out to be quite an expensive item. It's like looking for a bathroom, you know, it doesn't make any difference if it's boys, or men, or gentlemen, or has a silhouette, you know, when you need a bathroom, you know where to find one and you can find it relatively easily.

Mr. Murphy: Well, I didn't do a good job on that. You're exactly right on what we had in mind. We don't have in mind to standarize as to shape and buy outside the State of Alaska. What we have in mind only is that it be standarized in one color and have a logo on it. That's all. Now our State Department went ahead and passed some other regulations as to where they should be placed, like shopping centers. They told, this is what your Department would do we hope, in a shopping center in the State of Washington, you're supposed to have, if you run a shopping center, so many of these receptacles because of the amount of traffic that's in that center. Instead of one receptacle for 500,000, well that's over exaggerated, one receptacle for 10,000 people who go through a shopping center in a weekend, there's got to be a 100 receptacles in that shopping center. And they are not

necessarily, although a rich shopping center does put out expensive ones, but if you are running a Mom and Pop Shoe Store, and you had a lot of traffic there and I don't know if a shoe store would be a good example. But a marina, it might be that you would put out a litter barrel painted green, but you would have a logo on it which the State supplies free. Our State supplies all the logo stickers so that if you are a little guy, you have to have this green receptacle and you can paint a barrel if you want, then the State will supply you with a sticker so everybody can recognize it, and they stick it on the receptacle. So you are right. There is nc requirement that you have this expensive piece of hardware. No. But they should be standarized in the sense that you recognize them.

Chairman Sturgulewski: Senator Kelly what ———

Mr. Murphy: The logo is the important thing and I would like to think the color is too, but I, I heard a man, this Mr. Lee, say that he went around and found out this is a problem because some businesses do not want to go with the green color that we use because it destroys their decor. And we've had a terrible fight on this sometimes, and our position is, in industry, is that if you're, I shouldn't, let's not say MacDonalds, let's say if your a Joe Hugh's Drive In organization and you've got all green, no all brown, and your architect says you should have brown receptacles, because it's pretty, our answer is too bad. We want to see those receptacles and we want them to be green, and there has been some scraps on that. Correct.

Chairman Sturgulewski: Further questions, Senator? Senator Rodey?

Senator Rodey: Just one question and what is your per capita costs in the State

of Washington?

Mr. Murphy: Oh, for our program? Anybody got a calculator? I don't have one. I could, I could divide, right now our program is going to be about, and we're very high now, our program started out $600,000. We're spending about a million four in the next bi-annum, so divide that 3 million 5 hundred people and that will about do it.

Senator Rodey: Obviously, fairly, fairly low cost on that _ _ _

Mr. Murphy: Yes, what do you get, I'm interested to know myself.

Senator Rodey: That bi-annum, is that a two-year budget?

Mr. Murphy: No, that's a one year, a bi-annum would be double that, which would be about three. What we did is we went from 1971 at 600,000 like you've done, up to this figure; but we have a different tax setup than you do. I think your tax proposal here is better because ours puts a heavier load on some industries. And, incidentally, I want to be very level with you, we looked at this very carefully, how to make suggestions to this Legislature here, to carry this tax and I think that the tax program that shows here, this assessment program makes a lot more sense than the one we have in the State of Washington, for you're safe. But you don't have enough base here to isolate one or smaller groups ..... you get prohibited, this way everybody shares in the cost and it makes good sense.

Chairman Sturgulewski: Alright, Mr. Murphy, you're talking about amount tied in the amount of litter so called, that's what your

Mr. Murphy: Yes, we break it, you know .

Senator Kelly: Madam Chair. How do you pay for the program in Washington?

Mr. Murphy: Well, in Washington we have a very broad base tax, like you do, but we were able there to tax broad, broad spectrum of industries that were related to the litter problem only. For instance, you wouldn't tax the Boeing Airplane Co., but you would tax the department store because the department store puts out the materials that are in bags, sacks, toothbrushes, and so forth that end up in ...

Senator Kelly: So, you're much more restrictive.

Mr. Murphy: But we couldn't do that in your State. Yes, but we tried that in your State, we really tried hard to come up with that kind of a tact ~~approach~~ but because of the number of people in your State, ~~we had to do this in other states, we couldn't,~~ we just couldn't, it was impossible. But the one you've got now, I think is really very good.

Chairman Sturgulewski: Senator Rodey, I think we cut you off before you were finished there.

Senator Rodey: No.

Chairman Sturgulewski: Did that answer your question?

Senator Rodey: I think it did. Evidently you have a very, ~~low~~ lower per capita cost than we do, which I think would be natural considering the situation of Alaska and

the situation of, really the two questions that I'm concerned about, first how efficient and effective can that litter program be and then secondly, how much will it cost us and I think that's all legislators ..... and those two points aside.

Chairman Sturgulewski: Mr. Murphy, do you have any further response to that?

Mr. Murphy: Yes. He says, o.k., Murphy, you've got this program down there and you haven't told me what it's worth. Isn't that what you are saying? I think that's what you are asking.

Senator Rodey: That's what you are saying.

Chairman Sturgulewski: Would you like an answer to that question?

Senator Rodey: I think so, because, that's why I asked the cost worth and that's one part and the other question is how much are you getting for your money?

Mr. Murphy: Right. O.K., is it worth it? We started out in the State of Washington with not, you see when you start out in the State, how do you find out how much litter you have in the State to begin with? I don't know how to find out, so we had Booz Booth, Allen and Hamilton make a study for us. It cost us some $70,000 back in those days to tell us what to do about this program, what the ....., how to get it started and what have we got here in the way of litter, so we can see if we're making progress later on. They came up with a figure that we worked from, and according to the figures that have been done by outside measuring outfits, we have had upwards of a 60 percent reduction of litter, from what we would have had. Now, if you go to the State of Washington on a given day, Senator, I want

you to notice, when you go down a certain highway on a given day after there has been a summer tourist season on the 4th of July, and that road hasn't been picked up, you're going to see litter. But if you do it on a routine basis throughout the State as a study ~~not attempting to be done~~, and honestly as we know how to have them done, the State knows how to have them done, we have had a tremendous reduction of litter. We haven't solved it, I don't think we will ever, all the litter problem, but we have made a tremendous reduction, and we are very proud of what we've done. So I think it's worth the effort and the money.

Chairman Sturgulewski: Further questions?

Senator Rodey: Just one comment, it would be interesting if we knew the perimeters of our litter problem, in the State of Alaska.

Mr. Murphy: It would be very difficult to start out with because you're starting with 100, well 50 or 100 years of accumulation and you know you have to get a handle on it.

Chairman Sturgulewski: That's discouraging. (Laughter)

Mr. Murphy: Were there any other

Chairman Sturgulewski: Mr. Murphy, I do have one specific question. The way the Advisory Council is set up, it's completely composed of business people and I have had a number of questions raised; and we've had that today about the fact that we should really be bringing in, on the one hand we have the tchnicians, the other the broader public interest; and there's, true, the commitment of industry to make it work, but what's your comment as to how you bring in the various groups that

have an interest in this?

Mr. Murphy: I don't want to speak for Senator Colletta, so I'm speaking personally; and I don't even know whether he'd agree with me or not, haven't the slightest idea, and I also want to level with you. I think part of that was put in there, I can't say this for sure, but put in there for all business because business was very concerned that this might get out of control, if you got the wrong people on the Advisory Committee and tried to use this against them. I think that was a frightening thing that they put in here. I, myself, would say personally, I'm not really speaking for the rest of the business in Alaska now, I, myself, would say, you ought to go ahead and put some other legitimate interests in here that want to solve the litter problem and not attack something else. You understand what I mean, I'm sure. Yes, that kind of an approach and some safeguards for the voter, you've got to pay a tax and in this case it's all business in Alaska, so if they don't get overwhelmed, I say to try and strike a good balance. The other reason we'd like to see business on there with a good say is because we think business should be committed to make this program work and if they are on there, in strong force, then they have a chance to really make it work.

Chairman Sturgulewski: Thank you for your comments. Any other questions from Mr. Murphy? Thank you very much. We have a dual, I believe they wish to appear together, for the State Chamber of Commerce, Lou Harris and Don Dickey, is that correct? And following that, the last person I have on my list here would be Commissioner Mueller from the Department of Environmental Conservation.

Mr. Dickey: Madam Chairman, members of the Committee. I am Don Dickey, speaking on behalf of the Alaska State Chamber of Commerce. The idea of a comprehensive recycling or litter reduction program is, I think, is not only commendable but not

new because for a number of years, dozen or so, Chambers of Commerce throughout this State, and some of your home committees have been carrying on, as you know, very aggressive and progressive programs, as has been testified to before. However, the problem with that, our own community here has on one or two occasions national .... and yet it seems to have no, it's like a (~~senate bee~~ centipede?) with a hundred legs and no head to it, there doesn't seem to be any coordination Statewide, there are some areas le t out completely or not motivated enough to get started, and so I think the idea of looking at a comprehensive program with this magnitude has merit. I share, I was pleased to hear the Senator mention that, Rodey, his concern on the cost because certainly as business people, we share that at a time when the economy is not particularly booming. At the outset, in the original bill, as you know, it was tied to a gross business, gross receipt tax, having, or from I have heard 18 to 20 found that the greatest thorn in the side of the business people, the inequities of that tax, which are now repealed. I was not anxious to lead any movement that would possibly get that back on their backs; and so I felt that method of financing was objectionable, and I so stated to the Chairman, Senator Colletta, and others, who were involved in this. And I am very pleased to see the substitute, which is being proposed and the method of funding. I think it has two virtues as I look at it quickly. One is implicity (simplicity), and there are only four steps; and second, which is important, equity. As for the funding method, asked about raising money, as I see the new proposal, you are asking only the $25 business license now required. Those in the lower income brackets, more volumes of business(es) would asked only to add $5, second step takes it up to 10; and I understand from State figures of about 33,000 business licenses that 73 percent of all those licenses would fall within the $5 or $10 brackets. As far as the increase would go, where they are paying 25, now 30, 35, so two out of three businessmen in Alaska would only have to contribute no more than $10 a year. And I don't think that's unrealistic at all. At the very top of that spectrum,

the fourth step proposal in your bill, businesses having over a $1,000,000 gross volumne, I'd say, and there's only seven percent in the State, but with this small amount would only have to pay $75 more than they are now paying, or a total of $100. So at that top from going up $5 step up to a hundred, I don't think its excessive. I would like to start with the philosophy, and we have discussed, you and I, Senator, and others, the idea that its a chicken and egg thing ~~do~~, should we tie the tax and the funding to those people who contribute to the problem? And my responses, while that sounds logical and commendable, I don't think there are enough soldiers here or in China to police everybody that contributes to the problem; and I am going to propose, and we are taking it from our viewpoint that all of us contribute to the problem, all of us should contribute to the solution. So, I think in this manner, instead of trying to pick who threw the most out at the wastebasket, or if it's a professional man, or chamber type, all of us are either someplace, either in the picnic, or in the cars that are potential contributors to the trash problem. So, I think it's logical that all businesses be asked to contribute to the solution. I also say, and commend the Committee, ~~for a better~~, for this step which in no case would anyone have to pay more than $100, which is only a $75 increase in over a million dollars; and I think the small merchant who has that tough problem is protected with the $5 step. Commenting on some of the other factors, I naturally, again getting back to the funding factor, I am not only pleased to see, but we'd be considered a watch d to make sure that this action not include for administrative expenses that exceed 35 percent. I think that's most important. I don't feel we have enough money in this State, or Washington State combined, to pay for all of these functions; nor is that suggested as I read this. What I think we need is to encourage, stimulate and not duplicate but stimulate voluntary services that are already existing; whatever you want to call the youth corp, boy scouts, girl scouts, civic groups, organizations of that

nature, who long and hard have toiled at the collection and reduction of litter. So I hope that would be considered and that factor would be watched and the goal met. As far as grants to the existing Advisory Committee, it has been suggested that that seven member proposed committee be expanded; and I would, I believe that's realistic. I would concur with previous witnesses, Virginia and Mr. Murphy, that that has merit. Certainly we shouldn't draw a circle that excludes anybody, we should make it big enough that it includes everybody, provided they share the same goal and that's to clean up litter. As far as numbers, I have no magic proposals, I do think it should be ~~so~~ small enough that it's practical if they meet somewhere, and not be a complete troop of them, if they have to go. Having served on, a number of occasions over the past two dozen years, on State boards and commissions, I feel that the proposal of the Council meet not less than once every three months is perhaps unrealistic and may be unnecessary. I have, again, no magic figure to substitute, but twice a year probably, and maybe three. But I think merely the cost of that and the getting together, with the size of our State, any of us who have served as most of you have on various boards and commissions, I don't think it needs that much policing. As far as the receptacles, I know that, I think what is being proposed, and I have, well being Irish, I'm not going to propose green berets, or red, or purple, or even brown for the Hickel establishments, I'm merely suggesting that we would probably save some dollars, to get what they are using in Idaho, or in Washington. If we could order them in volume; and if all we do then, if we merely use our own oil barrels, but as has been suggested, use some decals from Alaska, so that the symbol is used on them, I think that would be a saving and it would also be an educational step for children or old folks to know that that's where they are to throw their refuse, trash. ~~The, on, I note that there are,~~ there is proposed also grants for public agencies, private, and also civic groups, municipal ~~or gym~~ types, and I think, whereas Anchorage particularly, Juneau to a lesser degree, Fairbanks, some others, have

had very fine clean-up programs. I think nothing should be done to discourage those, or minimize the voluntary help. It should merely supplement, and as I read the bill, that's what they propose to do, and I think that's good. As far as youth corp, and I know that's, gets to be a touch word on what we mean, I have no clarifying definition, but I think the key to this thing is getting young people involved. That's where it's at, and that's where we're really going to get to them to work on whatever banner, and I think these folks are more dedicated than the parents, in many cases, and that we should certainly utlize them, and the need for some job training and distraction from other activities that is perhaps not as desirable would come from having an opportunity for young people who find it tough to find jobs to be involved in some of these positive steps. So, I do hope it is encouraged in some other manner. Certainly the idea of issuing bags and things, some has been done already, I feel that there are motor registration or others, your cars, and your boats, I think has merit and also the receptacles. I had noted also on the, as far as there has been some contention in which Department, it should be placed, I am not quite as concerned with that. I think the most important thing is to determine the function. And the achievement of the goal is the desire and not who's favored agency gets to run it. I think the real accomplishment, and the thing I'm also pleased to see, that it has, and Senator Colletta at the offset testified, has a self-destruct clause that in three years he has enough confidence, and that's how we would look at it. Let's make corrections where needed, and if, at the end of three years it produced nothing, or little, too little, then I think it should self-destruct as is proposed. But I think that's a very favorable factor and I also would like, getting back to the financing end, the fact that apparently the proposed budget, and I only had a second to look, but the, starting at about 600,000, and if it could be done for less, I would encourage that too, but I see for the three-year period, but it's proposed that they indicate to us that they'd expect to raise under this four-step funding method on the license,

about $668,000, and that appears to be an adequate money to carry it for three years. I think we would make a major mistake, in our public relations for the business people, if in about a year and a half, we have to go back and .... and put another tap on it. So, I think that three-year funding and I hope, I have no idea that is correct, but I hope that, all the costs the Senator brought up are considered in there and that we don't find an overrun which finds us having to come back because that would be twice as tough ~~as it is in the past.~~ I certainly, for one, and it has been testified wouldn't take my time, nor yours, to try and come up to suggest some cosmetic approach. If this is a comprehensive, everybody-get-to-it approach Statewide, including the bush, and everywhere else, I say fine. If we all get our shoulder to it, I think we can make some accomplishment, so, even though the cost is involved, I think this substitute is a reasonable approach to it and appreciate the chance to talk.

Chairman Sturgulewski: Don't go away, just a minute. Questions of either of you? Senator Kelly?

Senator Kelly: Yes. I'm somewhat chagrined on that you've taken such an easy approach onto the restablishment of the gross business license tax in the State. You know, we have, I suppose a philosophical difference on how do you fund a bill of this nature assuming that, you know, we feel that it's comprehensive enough to mean anything. Washington, obviously, as Mr. Murphy testified, goes a different route and what they're saying, I assume like something those businesses who contribute the most to the problem are picking up the tab. In Alaska we're saying, in essence, that everybody contributes to the problem, and that, but the businessman, be it the small businessman that might not in the least bit contribute to the problem, will pick up the tab. We're opening up the gross business tax again, and aren't you all worried that once we open it up and begin taxing on licenses

again, that it will just be a simple step each year, just to increase it each year?

Mr. Dickey: No. I think that's a real possibility and I testified at the offset that we were not favorable when it was tied previously. If you recall, Senator, when you look at the proposal, there's a litte difference. I guess it's kind of half horse, half rabbit, you're asking me which I like of the two, and what I'm saying, I prefer this to the previous one, which would have put at the top a fine or a fee of $25,000. So, I'm saying I like $75 better than $23,000; so in proportion I think it's a much more realistic bill. I share your concern, and the possibility that this could be a vehicle to get back in the gross business license tax, which I would spend my fulltime agruing against it again, as I have for 18 years.

Chairman Sturgulewski: Senator Kelly, any further questions? Senator Rodey?

Senator Rodey: Just one. Where would you draw the line, Don, in terms of Chamber support for this legislation in terms of cost? We, unfortunately have seen costs rise and in some cases, all out of proportion of what we had anticipated. Certainly you've been a spectator, as well as a participant in these activities, and where would the Chamber draw the line in that regard? We are talking about a six hundred, seven hundred ,000 cost. 600,000 - 700,000

Mr. Dickey: Yes. I have no magic figure. I did talk to Senator Colletta and the others. I expressed and repeat publically my concern that we are starting a little high. Now obviously the people in administration are saying that they can hardly do it for this cost, and I can understand it, what are you paying for and what do you get? I was basing mine, you have to have some bench mark, and I asked Washington

State, prior to Mr. Murphy's testimony, what do you have, five years of experience in Washington, or six?

Mr. Murphy: Actually we really got rolling in 1972, but we had started in 1971.

Mr. Dickey: Seven years. But my thought when he responded with that they started out there with about $600,000, and they are still holding, which appears pretty good based on their population. So, by comparison, I was hoping we could get more for less, I guess. Now, how that would be done, I realize you have to line for line go down for it to be done. But I am stressing that I think one of the ways to do it, is that people who come in, as I understand it, into these communities to help stimulate the clean-up of the river, or the communities, ... the problem, that there only be one or two stimulators from the State and that the rest of the volunteers, I don't think that everybody should have to be, or expect to be paid, or that the volunteers who were doing a good job in some communities, be discouraged and say why should I go out and do this for free when across the street somebody is getting paid for this and let them do it. So, I think that is a very real concern. I don't have a magic figure. I would hope that it would be less than this and somewhere, I'd say, under, we could do it for five hundred thousand, somewhere to start, and then work up. But I did stress to the sponsors and others, this idea that the three of whatever they fund, I hope for those three years, just from a sales point would be, would permit us to whatever growth is going to occur, and still not have to go back for seconds ..

Chairman Sturgulewski: I wonder, have you gotten

Senator Kelly: Let me ask, having spent 18 years in business, Don, and being as close to the Alaska political situation and the State Government budgetary process as you

are, do you reasonably expect that budget to stay at $600,000 for three years?

Mr. Dickey: No. Nor do they propose that in here. They say six hundred, six hundred seventy three, and I think in the third year, six hundred sixty seven. And as I point out the total, I'm only using their figures, but they say it will raise six hundred sixty eight thousand the first year. We hope that there will be more business licenses attracted to share this pleasantry with us, so that we can all contribute. But, so, what I guess my response, Senator, would be that it appears that figure is adequate even with the three steps and I also want to re-emphasize and say again that I am pleased to see and would be here to see how it turns out, but there's a three year self-destruct, because if that starts, as we are all a little concerned, if that starts getting into millions of dollars worth of program, then I think we might have very quickly have second thoughts or other methods of skinning that same rabbit.

Chairman Sturgulewski: Any further questions? Fine. I'll point out for the Committee. We have a little bit of a problem. Both Senator Kelly and I should be over joining poor lonely Senator Bradley, who's trying to run a meeting without a quorum. I wonder if I could get an indication, we've had Commissioner Mueller, who would like to speak .... are there others in the audience that wish to speak on the subject? Alright, we have a couple of more. Commissioner, would we do you, two options here. One, we could allow Senator Rodey to continue the meeting and we would then miss it, or we could take a very brief recess, and help Senator Bradley get a quorum and get established at an official meeting and then slip back to hear your testimony. What's your schedule?

Commissioner Mueller: I don't have a schedule, Senator ....

Chairman Sturgulewski: Could we, we'll take about a ten minute recess and then come back to hear the additional testimony.

Mr. Dickey: Senator, could I just

Chairman Sturgulewski: Just a moment, Mr. Dickey go ahead.

Mr. Dickey: Just a last burst of wisdom.

Chairman Sturgulewski: Oh, my, I can hardly wait. (Laughter)

Mr. Dickey: I would hope that the self-destruct on the bill would also tie with the self-destruct on the tax. (Laughter)

Chairman Sturgulewski: Very good. We'll be back in ten minutes. Thank you.

CHAIRMAN STURGULEWSKI: Calling the meeting back to order, I just might point out a couple of changes there are, some cleaning up and technical things. A couple of things I think are important are on pages in the old Senate Bill 2, we have added Sections 41, 21 and 140. You will find this in your Committee Substitute. It has to do with Federal requirements. If there are any changes in Federal requirements that would affect a portion of the bill, we would see that those particular projects, when in conflict obviously, would, when the State is in conflict with the Federal, that the State portion would automatically drop out, so the Federal funds could flow in. We have segregated out the taxing, the tax portion of this. It does not require a fiscal note; but again under the single subject, it needs to have a separate, an vehicle. We have done away with the non-severability clause so that this bill would conform to what the other legislation within the State normally does. There is a severability clause, where if a portion of the bill is found to be invalid, the rest of the bill stands. It, of course, is to hold as much as possible...

The Courts have moved to hold as much as possible, but the legislation will stay in effect, and that is a very major change. We have added a section that would allow for staggered terms of the Advisory Council. The way the former bill was, it caused for them to be, ah, complete changeover and a two-year period of time. I think those are the main changes other than housekeeping.

We do have a list of people who have signed in. We still have a sign-in sheet there. We would first like to hear from the prime sponsor, if we could. Senator Colletta, would you like to join us? Do we have any other members of the House or Senate that would like to move up to the table? Fine. Thank you. Senator Colletta.

Senator Colletta: Madam Chairman and members of the Committee. First, I want to thank you for taking such speedy action on a measure that is personally a priority of mine; and I would like to also inform you that my remarks will be relatively brief. I know the Committee panel, I have associations with them on a reoccurring daily basis, within and out of the Legislature. And, I know that there is also an area where there is a great amount of visibility on this measure, but it would seem it would be well to refresh our memories as to how Senate Bill 2 is before us today. As you know, or may not, the litter act has been around for as long as some people have .... and worked very hard for a deposit measure. Since the original introduction of either of those two measures, the deposit or the litter reduction activity, times and circumstances have changed. Both bills now address themselves to a recycling finish, in addition to the reduction of the other. Maybe we should address ourselves to a speedy relation to the time available. We use what we pick up so, conceptually, I am very firm .... the election process. My convictions were from, by the people that possibly Senate Bill 2 offered, at the very least, an opportunity to try something that would truly address a litter free environment. This is the deposit mentioned. I can't stress that strongly enough becasue I believe that it should play a very important part in your deliberations as to what you do with this measure. It's worth a try, it's completely industry supported; but most importantly, I believe it will create the first step, regardless of its volume collection in a process that's going to be a viable, a truly .... a litter free and .... that could all be put to use. I do not stand on the side of the upper ship on anything within the bill other than the conceptual idea behind the bill. The bill is a composite of many, many litter acts that are in effect in various states and the amendments that they have made out of actual work applications of the measure over ..... You will receive a great deal of testimony. I had an opportunity to be in the audience here. But, we both need your support and possibly in opposition too. I would also direct

your attention in even though your work drafts have already begun to make some changes and make it ... even more of a bill, that you also allow such a place which is a review and evaluation as possible.

Chairman Sturgulewski: Mr., Senator, I wish you would make note of that again. I think, I think that's an important part of what you indicated earlier on the bill.

Senator Colletta: The last capable work draft that everyone has, page 13, section 6, is really an evaluation provision. I personally am so convinced that based on other state's experience, that Alaskan's are not performing and I would be willing to gamble on time .... certain for a trial on this measure .... we do implement the measure, so, it. You know, the least anybody can do is try and I think at a trial, they will all have a better and happier place to live in without having an additional burden to the overall populace in the attempt to reduce litter and recycle, some of the materials that were used. Madam Chairman, I might conclude with that, unless there are specific questions that we, or any of the Committee wish to ask.

Chairman Sturgulewski: Any questions of Senator Colletta? Fine, thank you very much. I thought that it might be helpful next to hear from the Department of Community and Regional Affairs. They will have a major role, of course, in at least a bureaucratic point of view of seeing that this bill is carried forward. And, Commissioner McAnerney is here. I believe you would like Eric Lee to talk to us today?

Commissioner McAnerney: (From the audience) Yes, Eric Lee is the one..

Chairman Sturgulewski: Fine. I hope that he'll, very good, thank you Commissioner, will speak to the fiscal note that is attached. We have a tax bill, but it doesn't indicate how much will be available for a program. And, if you could identify yourself for the record, we'd appreciate it.

Mr. Lee: I am Eric Lee, Director of the Division of Community and Rural Development, with the Department of Community and Regional Affairs.

Chairman Sturgulewski: Would you introduce yourself for the record?

Mr. Kanouse: I am Dan Kanouse, Program Coordinator for the Division of Community and Rural Development, Department of Community and Regional Affairs.

Chairman Sturgulewski: Fine, thank you. Go ahead, Eric.

Mr. Lee: Madam Chairman, the Department is basically in support of the concept obviously of staying a litter-free State in the reduction of litter in the State of Alaska for ..... possible. In looking at the original draft of the bill, we, of course, have some comment and some concerns about the language; and as Senator Colletta mentioned, the concept is, I think representative also a bill that has a working language that will enable the Department to successfully work on that, the bill. So, to get into that, I do have several items which are somewhat of a technical nature to be discussed later today, or at a later time; whatever is the pleasure of the Committee. I can briefly mention what some of those are in my remarks, if you'd like.

Chairman Sturgulewski: Eric, I think it would be helpful to point those out, the areas of concern. We would probably hear some of those mentioned a number of times;

but as far as specific solutions to that or suggestions, you might hold that until another time.

Mr. Lee: Right. There's a cause of concern that the cost of the program are covered by the new revenues generated, and I've not had the opportunity to examine the new revenue projections, but our fiscal note is based primarily upon the old bill projections which was provided to us. The fiscal note which I can't find, probably do have a copy, got mixed up.

Chairman Sturgulewski: You do have copies.

Mr. Lee: Fine. The, we did make several assumptions, in developing the fiscal note, and I think some of the assumptions are important, and we certainly would like to be corrected if our assumptions are at fault in the change before the Committee. The first recommendation we have in the, we make, did make an assumption in that .... was that a new division not be created. That is is an unncessary probation of the bureaucracy and in fact that a highly visible program within an existing division, within the Department, would be just as advantageous, and more economical in terms of the cost being put into it. The other assumption is that a central location of the program would be located in Anchorage and that there would be a field office in Juneau and the cost developed related to that. We made the assumption that local communities are concerned about implementing the comprehensive litter reduction program and that our Departmental staff will provide them with assistance and guidance and coordination from their efforts. We do not intend to be available to solve the problems ourselves and in that section, local communities will be participating very actively. The assumption that the program in the local communities will eventually become self-sustaining. The language of the initial bill indicated an administrative cost a little over 35 percent, and

our assumption was that administrative costs are defined as those costs which are not directly related to the program. A program costs something close to administrate, but some program costs may be salaried, salaries of those people who 100 percent of the time are coordinating with the communities, We, simply do not define as administrative costs. We assume an annual present rate of six percent. Getting back to the first page of the line item layout of the ..., our estimation is first primarily, what we did, Madam chairman, is to take the revenue projection and try to tell you what we can do with that amount of money. So, the first years expenditures, next year would be $600,000, total expenses. I believe this was in line with the original projection. Of these $600,000, we have broken out on the second page the line item project for you. We are talking about the staff of eight people, includes clerical staff, there is a staff chart provided on the next page, and the information offers high level information officer educational type person who heads the section supported by a clerical staff and four professional field people who would be working in the field with the local communities to coordinate the activities of the program. In the 1981 projection, we have added one more position, that is a fulltime position as a recycling coordinator. In our discussion with other states, who have been involved in this, have indicated that that position would, is one that would not really need to be, could not possibly be a fulltime position until the program is on its feet going with ..... development kind that makes it what it was .... someone to coordinate the recycling efforts at the same time, so we have added at least one position, in 1981. The other .... as we go down through involves some travel, which is going to be necessary for the staff to participate with the local communities. The Advisory Council which is created, the travel and per diem need to be paid and that is indicated in the fiscal note. We get into the basic communications costs, space costs .... based by the standard cost of the Anchorage area and the Juneau area, and so we couldn't note them. Another large item in here is $75,000 for commercial and educational type activities. We have listed in ..... perhaps as a

major item. This is obviously a flexible .... of the things the Interstate Commerce has been wanting to know, advantageous methods of information assimilation, commercial being one of the objectives and that is why the budget is why it is. Jumping down to the base of equipment and commodities to operate the number of bodies based upon current standards; and the grants sections would be direct grants to communities for the various sections outlined in the bill. I will be more than happy to try and answer any specific questions .... and the fiscal aspects of it.

Senator Rodey: My question is very simple. In June of 1978, in a Community and Regional Affairs memo, the estimated cost of the bill was 2.6 million. There has been a significant reduction in the cost of the bill in that time without an apparent major change in the bill. Could you explain to me why the tremendous decrease in the cost of the bill?

Mr. Lee: O.K. What we did, and it wasn't, when we were talking about that part, was to develop a handle on what the cost essentially, to do everything that everybody else is doing. And we contacted other people, and various states have different programs. One major thing in that section was the Youth Patrol, which the State of Washington has. The State of Washington funds that Youth Patrol one hundred percent. They actually hire hundreds I believe, of children, youth who actually go out and pick up the litter. They pay for that out of the general fund and that was over a million dollars in that portion. So, if you want to fund a Litter Patrol with State funds, the language in here does not indicate that. It indicates that we will be using other sources of funds for hiring that type of people. That was one of the major functions. Additionally, we were trying to say what is the , what cost would it be if we had the Rolls Royce of a program? In our discussions with the sponsor and with others .... what the revenue projections were and the fiscal, and we concur that the cost of the program after that ....

~~to revenue~~. What we were saying now is that is what we can do, and what we ~~are going to~~ will do with that amount of ~~dollars~~ money, and ~~spare that~~ scale it down accordingly.

Senator Rodey: Madam Chairman, just a comment. The Litter Patrol is, of course, still in the work draft that we have. The estimate of revenue by the Department of Revenue last year was $890,000; and, if I'm not correct, and, do you believe that would be a reasonable amount of money to support the program? We, of course, see programs proposed to us and invariably they come back to us more expensive than when they started out. And Community and Regional Affairs has been one of the most responsible departments ..... criticism on Community and Regional Affairs; but I am very cautious about this.

Chairman Sturgulewski: I might add that, one little comment, Eric at the beginning indicated that you have not, with the new proposal on the tax bill, had an opportunity to review your fiscal note. There was a high and a low and there are, there was a little bit lower amount from the smaller businesses put in the tax bill that has just been laid on your table and obviously you haven't had an opportunity to, to look at it, nor perhaps Eric Lee. The amount of revenue projection is approximately $680,000 from this ..... There was one .... that had the full $10 right at the beginning scale. It would have brought it up into the range that you are talking about. That's without a new fiscal note, that's

Mr. Lee: .... our original fiscal note is ... benefit our revenue projection than, perhaps the new bill. We were working with approximate figures at that time.

Chairman Sturgulewski: Senator Rodey, any further questions?

Senator Rodey: One further question, Eric, do you handle any other litter control

programs within the Department, or programs relating to refuse, or

Mr. Lee: No, we do not.

Chairman Sturgulewski: Any further questions of the representatives from the Community and Regional Affairs? Just one question, if I may, were you going to go on to some structural areas, fine.

Mr. Lee: That's why, I was going to say if you'd like, I'd continue to communicate on this thing. Some of the structural proglems that we had, that I was, some of these things will need further investigation and we .... carry on .... discussion to ... to determine the impact as well ..... The Department of Environmental Conservation, I don't mean to speak for them, have indicated to us that they have concerns about the language, which may preempt all other statutes dealing with litter and perhaps lose some of those that we don't want to see removed, changed. They, I would like a further clarification of the definition of administrative costs because if our personal services are considered administrative costs, you are not going to get this type of program, for 35 percent of the total.

Senator Kelly: Mr. Lee, why was the, your Department selected to administer the program rather than the Department of Natural Resources, for example?

Mr. Lee: Senator, I could not answer. I suggest that the original sponsor and the ..... The language referring to three months after fiscal year to determine the report is a bit too restrictive, because the books don't actually close for a couple of months after the end of the fiscal year and we would like to see an extension of six months, rather than three months.

Chairman Sturgulewski: On that point though, that would mean, the possibility then, of that program not possibly getting, would that bring it back before the Legislature for that immediate year, then?

Mr. Lee: It had, what occurs now, we have a similar type of situation with the day care assistance program, which we administer ..... Legislature, and we have that report prepared and ready for the Legislature before it convened in January. And three months after the first of the year would be October and, it would be, fiscal would be very difficult because the time frame and close down of all the books. We are somewhat concerned about the Department's ability and mechanism for receiving and expending contributions of either cash or in kind in terms of the day-to-day operations. We have not had experience in this area and would like the language establishing so it is clear that the intent that we can take in gifts, donations, and turn around and spend those on behalf of the program. There has been some concern indicated to us from other states that if you absolutely mandate a specific size, color, shape of a receptacle, that they have a lot of difficulty in the public relations aspect getting some of the businesses to support that, because they may have spent a large amount of money on the decor of their building, and you want to put a purple trash barrel alongside of their blue building, they would object, so we would like to see a little more flexibility, perhaps in that language. Also, we are somewhat concerned, would like some further investigation on the impact of the dollar smounts levied on the .... This would, like at least some indications as to what is expected and the intent of the establishment of the fine ...., it appears in some cases, ... fines have been reduced and we are not sure if that is the intent. Another item we would like to see added to the available use, for the general use of the grant money to municipalities, and would like to see that, allow them to also purchase .... purchase the required receptacles, and so forth, that is their primary need, and the current language .....

Chairman Sturgulewski: Eric, in that case, are you thinking of smaller communities where that would be the difference of the beginning of the program?

Mr. Lee: Yes, right. If that, that's the primary need, and primary situation, they have no other basic resource, we will, at least, have that be a possibility. I don't think we want to see that because the sole use of the grants at all, we certainly do not support that idea.

Chairman Sturgulewski: Other questions of, you might have of Eric Lee? Were you going to be giving some testimony today, or are you here as the back-up man?

Mr. Kanouse: .....

Chairman Sturgulewski: Fine. We'll obviously be having work sessions on this, and we appreciate your testimony. Senator Kelly? Fine, thank you very much. The next person to sign in was Chris Foster. I don't in all cases have the organization that is being represented. Oh, and Virginia del Piaz, if you'll introduce yourselves for the record, please?

Ms. Foster: My name is Christine Foster. I am appearing today as a member of the sponsoring committee for Ballot Proposition No. 5, in the 1978 General Election.

Ms. del Piaz: And I am Virginia del Piaz. I was Chairman of the Ballot Proposition Chris was speaking of, properly known as the Alaska Bottle Bill Initiative. We'd both also like to state that it is general knowledge we are legislative staff this Session. We have received permission to testify on this bill. O.K. Last year, or several years ago, we undertook an initiative drive to place a proposal for a term

of beverage container legislation before the public, because we were concerned about two problems. That was recycling and litter. The initiative was defeated in the November General Election, but our interest in addressing these two important problems has not diminished. It is our hope that the Legislature will give serious consideration to making any new program the very best possible for the State of Alaska. We are concerned that any legislation deal meaningfully and not just cosmetically in this problem. In that spirit we would like to make a few suggestions on this bill. We did not have the Committee Substitute to look at when we read the measure before us, so some of this might be a little out of line in sequence. Probably the most important thing we'd like to suggest to the Committee, and this is already somewhat been brought up by the Community and Regional Affairs, is that this program would most appropriately be administered under the Department of Environmental Conservation, rather than the Community and Regional Affairs Department. DEC has the existing litter control measures, it has solid waste management. In general, as a division, as a Department, DEC is the lead State agency for solid waste management planning, the regulation for enforcement, for technical assistance, both under the State law and the Federal 1976 Resource Recovery and Conservation Act. DEC already distributes litter bags, they've already done litter surveys, they provide local assistance to governments, they also promote the Alaska Clean-Up Month, which I believe is the month of May, and have done so for a number of years, and have also been involved in policing television spots and other public literature. So, it's pretty evident that this particular agency has been involved in this type of thing for some time and it is our feeling that they would be more of an appropriate agency to deal with this program. The lead, as it should be, and should continue to be with the Agency most logical, which would be DEC. It could be put, as was also suggested by Community and Regional Affairs in an existing division, in DEC, which would probably be their Terrestrial Programs division. That

already handles most of what the proposed division, of what this legislation needs, would handle. Secondly, the section of the Advisory Council, whereas you have two different ways of working with this. No. 1. If you are going to move the program to DEC, DEC already has an existing Advisory Committee that could very possibly, easily expand their charge to the concerns expressed in this bill. This would, to our way of thinking, be a logical extension of the need to DEC, of course, and also there is existing funding, and so forth, for this particular Committee. They are very well constituted, they are a working Committee, ~~they're,~~ they are used to dealing with these things and they're very familiar with these types of problems, so feel that this would be the more logical way to go. But, if the Committee decides to keep the program in the Community and Regional Affairs, we feel the Advisory Council should very definitely not represent just the same interest group, as is currently there, which would, on page 4, lines 7 through 10, Section B, on the old bill. ~~Some of the~~, We feel, that it should be expanded to ~~and for a~~ different interest groups rather than just the businesses. And some suggestions might include a public member, members of the education community that deal in education in the State, local government officials, perhaps a rural representative, somebody from the recycling group, youth groups are involved in this, obviously, of course, some type of business representative, possibly one from a consumer group and environmental group, or for service organizations which have expressed quite a lot of interest in this bill. We'd also suggest that they don't need to meet as many times a year, possibly twice or three times, rather than four or more times, would be adequate and would also help on the fiscal implications of per diem and travel. On the proposed Litter Patrol this, in following this bill over the years, has changed quite a bit. And in the current bill, the duties and purposes of this Litter Patrol are very vague and not very well specified, and so we suggest that this be a lot more truly tied down

clean-up drive conducted by local agencies, private organizations or service gruops, even volunteer help. Now this is something that already does exist in the private sector ~~of the~~ with the volunteer effort, and we just wonder at the wisdom of using State monies to fund something that is already essentially being taken care of in the private sector. And fourth, any other public information that is selected by the division including the use of media. As I mentioned earlier, ~~there is already a,~~ DEC is already doing some media spots against the litter and I think everybody familiar with the National ED Council, TSA Time, which you see on television and hear on the radio quite frequently, so feel this in a large part is already being done. The fifth and sixth one, speak to No. five, the expansion of existing and creation of new source separation programs, and six, expansion of existing and creation of new community recycling centers. This, as I said once, that this might more appropriately be under a loan program, because it is speaking of capital expenditures for structures, and so for equipment, and that this might be more appropriate for that particular type of program. And the last one, seven through ten, felt that these might more appropriately be under the section that gives the charge to the division, whether it's in DEC, or C/RA; but this is essentially telling them the things they should be working on and they are, in fact, pretty similar to what is charged to the division. And the litter control assessment, which was in the original bill that we were dealing with, and now you have separated them out, but our point still remains pretty consistent. No matter how this assessment, or tax, or whatever it is to be called when it's done, it should be tied to the amount of litter generated by a business. There should be some relation there between non-litter generated to the tax put upon a particular business or operation. Now, we'd like comments and suggestions but what we offered haven't been real specific and we don't have the language drafted, but we'd be more than happy at any time to work with the Committee on

to what their purposes are. And also, just make the observation that if this is to be an effective part of this program, it would probably have to go pretty large in order to cover a State the size of Alaska, so there might be some problems with the ways it's constituted. We would like to make a comment on the grant section of the bill. If this is to remain, in fact a grant section, we suggest there be some definite limitation on the grants indicated in the bill. As far as we could see, there was no limitation or lower limitation on the grants to be made. But, actually, when you look at the things as they are listed and there are ten listed, they break down in a different way than just getting grants. No.'s one through four are pretty much already existing; and five and six could, I think, very effectively be made into a loan program, either with one existing, or create a new one; and No.'s seven through ten could be done by the Department or the division, or could be subcontracted, or could possibly be grants, if this was deemed one. I would like to go over them briefly to explain how we came to that conclusion. The first one goes with the instruction at the distribution of informative material to elementary or secondary schools, and so forth. This is already, there are a lot of sources for this already, mainly for Keep America Beautiful program and some through Federal programs. We feel this in a large part already does exist. The second one, purchase and erection of roadside signs. This one is pretty vague, and to give grants for this is really duplicative. There ~~are already,~~ is already an existing statute for the address of roadside signs for littering and that Sec. 19.17.010, which states, very briefly, a Commissioner of Department of Transportation and Public Facilities shall place a sign near State boundaries, each primary and secondary highway which informs the public of the prohibition against ... ~~and~~ highway littering and shall place some more signs at other locations within the State when considered necessary. It was our though, ~~that this kind of,~~ it's already covering that contingency. Third, the organization, operation of the

specifics. We do have specific language worked for the loan program, if you'd be interested in that, that's why we've done possible language.

Chairman Sturgulewski: We definitely would want that information. Any questions of Virginia?

Senator Kelly: Just one. Virginia, are you satisfied with the recycling provisions in this bill?

Ms. del Piaz: Quite frankly, there aren't too many. I would certainly like to see this strengthened. There is quite a lot of interest going on with that, in this State currently. I know Anchorage is getting started with the program and I think this would have to be strengthened. I don't have any specific suggestions for you right now, but we could certainly work on it.

Chairman Sturgulewski: Other questions? Chris, did you care to give testimony also?

Ms. Foster: No, Virginia covered all our major points for both of us.

Chairman Sturgulewski: Fine. Thank you very much. I think a very major basic issue has been raised, and I am sure there will be other testimony. I wonder if Senator Colletta might wish to speak and I, to the reason for the designation of Community and Regional Affairs and also possibly to the Youth Patrol. I think those will be of interest to other groups and I know the Committee will be interested.

Senator Colletta: Madam Chairman, yes, I see that Senator Rodey raised those and if you will recall in my introductory remarks, I stated the bill hadn't had a great evolution because of that hitting us occurred over eight years of implementation. Community and Regional Affairs was picked for .... reason. This is not a State bureaucracy. This is, for all practical purposes, a people's activity; and who thus can do that, but the agency that's dealing with people on a daily basis; as is their prime charge of community and regional affairs. DEC is limited in their scope, although they have activities Statewide, it's not a normal reoccurring daily function. They go and .... on specific issues. Department of Natural Resources, the same way. They have Statewide responsibilities, but they don't work on a daily basis Statewide. The Litter Patrol, the fiscal note that Senator Rodey alluded to, has been a source of controversy from the day it was requested, and ironically, and for your information, it was never requested by myself. It was requested by those who were in opposition to the Litter Act; and I don't wish to open up that controversy. But that's where this 2.8 million dollars came from. At one time, in the course of introduction, Commissioner Max Brewer, from DEC, had suggested to me that he had some approximately 40 people, that he would delegate an additional responsibility to. Somehow, or another, 40 people got into the act that we were going to start funding and paying. Put 40 people on the payroll. This is the intent. The Youth Patrol is very much alive and ... In Anchorage I would suspect they have no less than 2,000 youngsters in a Youth Patrol. They are being run through nonprofit and civic organizations. They are not State employees. You can interpret any kind of wording, in whichever manner you wish, to fit the need that you wish. I would like to take the latitude of thanking Virginia and Chris. I offered an invitation, when it became .. on election night that this was not a victory for those people who, philsophically were in tune with me, I offered an invitation to them to cooperate to make this a workable bill. And, I'm now happy that they have come forward to do that.

Chairman Sturgulewski: We'll appreciate it as a Committee and certainly use their services. Senator Rodey?

Senator Rodey: Senator Colletta, my concerns, of course, the cost of the bill, I know you share that concern with me and the reason I referred to the previous memo, is because it is one piece of evidence that relates to the cost of the bill. And, I'm particularly concerned becasue the cost of the bill would be borne by Alaskan businesses, small and large alike, and quite frankly, I'm somewhat reluctant, perhaps reluctant in the extreme, to put any additional burdens on Alaskan businesses this year. I would rather stand neck deep in the Gastineau Channel than to ask another burden on business this year. Certainly it's passed on to the consumer too and it affects all Alaskans in that regard. That's why I'm concerned about the funding because it will reach the point of making a decision; and if we do have a bill, of course, I would like to see the lowest possible fiscal note and I know you share that concern with me. And that's why I'm looking at some of the alternatives and also the funding of the Litter Patrol, which appears to be an unknown quantity at this point, particularly in, in future years.

Senator Colletta: Senator Rodey, it's apparent one of two things is occurring. Either you're not hearing me, or I'm not making myself understood; but I thought I had addressed that. The Litter Patrol is alive, it's not State funded. The Litter Patrol is comprised of youngsters who are assisting their parent organization in the earning of some dollars. It's a volunteer effort. The only paid individuals are those that the State will furnish to assist communities in accomplishing a Litter Act activity.

is assisting and hoping that the accumulation of that would be the central place for them, again benefiting them. They still sweep their own parking lots and everything else. So, I don't think it's that controversial of an issue; it could be, but I doubt it, very much.

Senator Rodey: I'm not sure it is controversial, Madam Chairman, and perhaps we could hear from members present from these groups, or the Chamber on that and see if they have any question or

Senator Colletta: Madam Chairman. If I might have a,-I really want to clarify that Litter Patrol, I think maybe we're grasping at words. Originally there was a Litter Patrol; these were uniformed youngsters working for a State agency and so forth, but experience has shown that that's not the most practical way, because what you've done is just expand a refuge picking up activity, which just doesn't accomplish, and they have had greater success in utilization of the local youth.... instilling the pride in each community.

Chairman Sturgulewski: Senator Rodey?

Senator Rodey: Madam Chairman. I'd be happy to work with you, Mike, on this and redo the language, because the language Litter Patrol is still in there, and we need to redo the language in that section because it's a bit unfair to me. I think you're absolutely correct, certainly we can look at Europe and see what they have done to be at these means, that, some of the, which are very traditional.

Chairman Sturgulewski: Thank you. Are there other questions? Thank you very much Senator Colletta. The next asked to testify, Mr. Gravo and Ms. ....

Senator Rodey: Madam Chairman. Let me point out, though, that in, nowhere in the bill does it say that, it merely says that the division shall adopt mandatory requirement for adoption of regulations which established the Litter Patrol; and I think it is something we ought to consider in our draft. And certainly in our work on bills, I find your assurances to be absolutely gold plated. And I think this is one of the things which we need to deal with in the draft of the bill. And, let me bring one other concern up. There is, on page 6, Section C, ~~it~~ places the responsibility on people owning or operating in a public place and that does include ~~a very category; and includes~~ a great many businesses; if perhaps not most businesses in the State of Alaska, certainly all retail businesses. And, it deals with a question that Eric mentioned earlier; and that requires the businesses to procure, place and maintain those receptacles at, should be at their own expense, after their own expenses here. What reaction have we had from the community in regard to this? This was alluded to previously.

Senator Colletta: I don't know if there has been any other specific language that it's probably six months ahead of what this measure hopes to accomplish. They have already through specific organizations such as the Chamber of Commerce implemented the litter and recycling activity, totally privately funded. It is my understanding in talking with the Chairman of that activity, is not a probability the only assist that he would want out of the passage of this bill, would be the educational aspects and conceivably, on occasion, a little bit of receipt money to tide them over on some of the contractual things that deal with the nonprofit organizations in the pick-up of litter. But the responsibility you are referring to in Section C, Pat, I don't know how to answer that to you, other than the normal course of activity, they do have designated spots, receptacles now and the responsibilities for policing their own yards, still remains theirs. All we are doing

Municipality of Anchorage, or possibly a private citizen today, I don't know. Mitch?

Mr. Gravo: Sure. My name is Mitch Gravo. I am testifying as a resident of the Municipality of Anchorage. Litter is a major problem for the municipality and any legislation which helps us deal with that problem, we support. My comments will be very brief and they just deal with a few housekeeping matters. The first one, on legislative intent, suggest the Committee discuss the possibility of including the public sector also in that section, where you indicate encouragement and stimulation of private recycling efforts. For example, the Municipality works with, very closely with, the Chamber of Commerce on the program that Senator Colletta was just speaking about. Last year it was a tremedous success and this year because of the changes, new approach, I think it will be even more of a success. The Advisory Council possibility that not only the people are mentioned in there, be part of that Council, but also solid waste professionals also be included, people with considerable expertise. The survey section, you indicate that six months after the bill goes into effect there should be a survey to determine if its working. You might take a look at that, in that if it goes into effect in July, the survey would be conducted in January, and in Anchorage, all litter is covered up in January, and we see it in May. So, you might take a look at that.

Chairman Sturgulewski: Fine. I think that's more of a technical thing we do need to look at, because it was more of a question of when that program begins, and it's going to take a little time to get it underway. Good point.

Mr. Gravo: When you speak of, when the bill speaks of garbage or refuse, that's somewhat vague and our solid waste people suggested, quite publically, that perhaps

Calling the, ah, meeting back to order, I just might point out a couple of, ah, changes there are, ah, oh some cleaning up and technical things; but a couple of things I think are important on page of old Senate Bill 2, we have added, ah Sections 41, 21 and 140. You will find in your Committee Substitute. It has to do with Federal requirements, the, ah, if there are any changes in Federal requirements that, ah, would affect a portion of the Bill, ah, we would see that those particular, ah, projects, when in onflict obviously, ah, would, when the State is in conflict with the Federal that the State portion would, ah, automatically drop out, so the Federal funds could flow in. We have segregated out the, ah, the taxing, tax bill portion of this. It does not require a fiscal note, but again under the single subject .... it needs to have a separate, ah, vehicle. We have done away with nonseverability the non separate ability clause so that this Bill would conform to, ah, what the other legislation within the State normally does. severability There is a separate ability clause, where if a portion of the Bill, ah, is found to be invalid, the rest of the Bill stands. It, of course, to hold as much as possible The Courts have moved to hold as much as possible, but the legislation will stay in effect; and that is a very major change. We have added a section that would allow for staggered terms of the Advisory Council. The way the former Bill was,it caused for them to be, ah, complete changeover and a two-year period of time. I think those are the main, ah, changes other than housekeeping. Ah we do have a list of people who have signed in. We still have a sign-in sheet there. We would like first to, ah, hear from the prime sponsor, if we could, ah,

Senator Colletta, would you like to join us? Do we have any other members of the House or Senate that would like to, ah, move up to the table? Fine. Thank you. Senator Colletta.

Madam Chairman and Members of the Committee, first I want to thank you for taking such speedy action on a measure that, ah, personally is a priority of mine and, ah, I would like to also inform you that my remarks will be relatively brief. I know the Committee panels, I have associations with them on a reaccurring daily basis, within and out of the Legislature, and, ah, I know that there is also an area where there is a great amount of visability on this measure; but it would seem it would be well to ah refresh our memories as to how Senate Bill 2 is before us today. As you know, ah, or may not, the litter act has been around for as long as some people have pouted and worked very hard for a deposit measure. Since the original introduction of either of those two measures, the deposit or the litter reduction activity, times and circumstances have changed. Both bills now address themselves to a recycling finish, in addition to the reduction of the other maybe we should address ourselves to a speedy relation to the time available. We use what we pick up so, conceptually, I am very firm instruing the election process. My convictions were from by the people that possibly Senate Bill 2 offered, at the very least, an opportunity to try something that would truly address a litter free environment. This is the deposit mentioned. I can't stress that strongly enough because I believe that it should play a very important part in your deliberations as to what you do with this measure. It's worth a try, it's completely industry supported; but most importantly, I

believe it will create the first step, regardless of its volume collection in a process that's going to be a viable, a truly .... a litter free and .... that could all be put to use. I do not stand on the side of the upper ship on anything within the Bill other than the conceptual idea behind the Bill. The Bill is a composite of many many litter acts that are in effect in various states and the amendments/they have made out of actual work applications of the measure over ..... You will receive a great deal if testimony, ah, I had an opportunity to be, ah, in the audience here; but, ah, we, both, ah, need your support and possibly in opposition too. I would also direct your attention in even though your work drafts have already begun to make some changes and make it ... even more of a bill, that you also allow such a place which is a review and evaluation as possible.

Ah, Mr., ah, Senator, ah, I wish you would, ah, ah, make note of that again. I think .. I think that's an important part of what you indicated earlier on the Bill.

The last capable work draft that everyone has, page 13, Section 6, in really an evaluation provision. I personally am so convinced that based on other state's experience, that Alaskan's are not performing and I would be willing to gamble on time certain ... for a trial on this measure ... we do implement the measure, so, it, ah You know, the least anybody can do is try and I think at a trial they will all have a better and happier place to live in without having an additional burden to the overall populace in the attempt to reduce litter and recycle, some of the materials that were used.

Madam Chairman, I might conclude with that, unless there are specific

specific questions that we, or any of the Committee wish to ask.

Any questions of Senator Colletta? Fine, thank you very much. I thought that it might be helpful next, and, ah, to hear from the Dept. of Community & Regional Affairs. They will have a major role, of course, in, ah, at least from a bureaucratic point of view of seeing that this Bill is carried forward and Commissioner McAnerney is here, I believe you would like Eric Lee to talk to us today?

Yes, Eric Lee is the one

Fine, I hope that he'll, very good thank you Commissioner, will speak to the, ah, fiscal note that's attached . We have a tax bill but it doesn't, ah, indicate how much will be available for a program; and if you could identify yourself for the record, we'd appreciate it.

& Rural
I am Eric Lee, Director of the Division of Community/Development, with the Department of Community & Regional Affairs.

Would you introduce yourself for the record?

I am Dan Kanouse, Program Coordinator for the Division of Community and Rural Development, Department of Community & Regional Affairs.

Fine, thank you. Go ahead, Eric.

basically in support of
Madam Chairman, The Dept. is ~~based on~~ the concept obviously of

staying a litter-free state in the reduction of litter in the State of Alaska for ~~for~~ thing ..... possible. In looking at the original draft of the, of the Bill, we, of course have some comment and some concerns about the language and as Senator Colletta mentioned ah, ah, the concept is, I think representative also a bill that has a working language that will enable the Dept. to successfully ~~xxxxxxxxx~~ work on that, the bill, so to get into that I do have several items which ah, are of a technical nature to be discussed later today, or at a later time, whatever, is the pleasure of the Committee. I can briefly mention what some of those are in my remarks, if you'd like.

STURG. Eric, I think it would be helpful to, to point those out, the areas of concern. We would probably hear some of those mentioned a number of times; but as far as ah, ah, specific solutions to that or suggestions, you might hold that until another time.

LEE Right.

There's a cause of concern that the cost of the program are covered by the new revenues generated, and, ah, I've not had the opportunity to examine ~~xxxx~~ the new revenue projections, but, ah, our fiscal note is based primarily upon the old bill projections which was provided to us. The fiscal note which I can't find, probably do have a copy, got mixed up.

STURG. You do have copies.

Fine. Ah, The, We did make several assumptions, ah, in developing the fiscal note and I think some of the assumptions are important

be corrected if our assumptions are
and we certainly would, ah, like to ~~correct some that are at fault~~
at fault in the chance
~~in the ...~~ before the Committee. The first recommendation we have
that
in the we make, did make an assumption in that .. was/a new division
not be created; that, a, this is an unnessary, ah, probation of
the bureaucracy and in fact that a highly visable program within an
existing division, within the Department, would, ah, be just as
advantageous and, ah, more economical in terms of the cost being
put into it. The other assumption is that a central location of
the program would be located in Anchorage and that there would be
a field office in Juneau and the cost developed related to that.
We made the assumption that local communities are concerned about
implementing the comprehensive litter reduction program and that
our Departmental staff will provide them with assistance and
guidance and coordination from their efforts. We do not, ah,
intend to be available to solve the problems ourselves and in
that section local communities will be participating very actively.
The assumption that the program in the local communities will
eventually become self-sustaining. The language of the initial
administrative
bill indicated an ~~xxxxxx~~ cost of a little over 35 % and our, our
assumption was that administrative costs are defined as those costs
which are not directly related to, ah, to the program. A program
costs something close to administrate; but some program costs may
salaries
be salaried; ~~xxxxx~~ of those people who 100 % of the time are
coordinating with the communities. We, we simply do not define as
an annual present
administrative costs. We assume .. rate of 6 %. Ah, getting back
to the first page of the, the line item layout of the ...ah, our
first
estimation is/primarily, what, what we did, Madam chairman, is to
take the revenue projection and, and try to tell you what we can do
with that amount of money, so the, the first years expenditures

next year would be $600,000, total expenses. I believe this was in line with the original projection. Of these $600,000, we have broken out on the second page the line item project/you. We are ~~talking about the staff of eight people includes/the staff chart is a provided~~ talking about the staff of eight people includes clerical staff, there is a, a staff chart provided, ah, on the next page, and the information offers high level information office/type person who heads the section supported by a clerical staff and 4 professional field people who would be working in the field with the local communities to coordinate the activities of the program. In the 1981 projection, we have added one more position, that is a fulltime position as a recycling coordinator. In our discussion with other states, we have been involved in this have indicated that that position/is one that would not/need to be could not/be a fulltime position until the program is on its feet going with ... development kind that makes it what it was ... someone to coordinate the recycling efforts at the same time, so we have added at least one position, ~~in fact you need one~~ . The other .... as we go down through travel, which, ah, is going to be necessary for the staff to participate with the local communities. The Advisory Council which is created, ah, the travel and per diem need to be paid,/that is indicated in the fiscal note, we get into the basic, ah, communications costs, ah, space costs.... based by the standard cost of the Anchorage area and the Juneau area, and so we couldn't note them. Another large item in here is $75,000 for commercial and educational type activities. WE have listed in film? perhaps as a major item. This is obviously a flexible .... of the things the Interstate Commerce has been wanting to know, advantageous methods of information assimilation - commercial being one of the objectives and that is why the buget is why it is. Jumping down to the base of equipment and commodities

to operate the number of bodies based upon current standards; and the grants section s would be direct grants to communities for the various sections outlined in the bill. I will be more try and than happy to answer any specific questions ...

and the fiscal aspects of it.

Sen. Rodey: My questionis very simple. IN June of 1978 in a Community & Regional Affiars memo, the estimated cost of the Bill was 2.6 million. There ahs been a significant reduction in the cost of the bill in that time without an apparent major change in the Bill. Could you explain to me why the tremendous decrease in the cost of the bill?

Mr. Lee: O.k. What we did, and it wasn't, when, when we were talking about that part was to develop a handle on what the cost essentially xxxxxxxxxxxxxxxxxxxxxxxx to do everything that everybody else is doing. And we contacted other people, and, and, various states have different programs. One major thing in that section was the Youth Patrol, which the State of Washington has. The State of Washington funds that Youth Patrol 100 percent. They actually hire hundreds xxxxx, I believe, of children, youth who actually go out and pick up the litter. They pay for that out of the general fund and that was over a million dollars in that portion; so if you want to fund a litter patrol with State funds, the language in here does not indicate that. It indicates that we will be using other sources of funds for hiring that type of people. That was one of the major functions. Additionally, we were trying to say what is the what cost would it be if we had the Rolls Royce of a program? In our discussions with the sponsor and with other, what the communica /revenue projections xxxxxxxxxx were and the fiscal, we concur that the cost xxxafter that of the program proceed? to .. revenue. What we were saying now is that is what we can do, and what we are going to do xxx with that amount of dollars, and spare spend that accordingly.

Sen. Rodgy: Madam Chairman, just, just a comment, the litter patrol is, of course, still in the work draft that we have. The estimate of revenue by the Dept. of Revenue last year was $890,000

if I'm not correct, and do you believe that that would be a reasonable amount of money to support the program. WE, of course, see programs proposed to us and invariably they come back to us more expensive than when they started out and C/RA has been one of the most responsible departments ... criticism on C/RA; but I am very cautious about this.

Chairman Sturgulewski: I might that, one little comment, Eric at the beginning indicated that you have not, ah, with the new proposal on the tax bill had an opportunity to review your fiscal note. There was a high and a low and there are, there was a little bit lower amount from the smaller businesses put in the tax bill that has just been laid on your table and obviously you haven't had an opportunity to, to look at it,nor perhaps Eric Lee. The amount of revenue projection is approximately $680,000 from this revision~~provision~~. There was one .. that had the full $10 right at the beginning scale,that it wouldhave brought it up into the range that you are talking about. That's without a new fiscal note, that's

Mr. Lee: ... our original fiscal note is .... revenue projectsion benefit our than, than perhaps the new bill. We were working with approximate figures at that time.

Chairman S. Senator Rodey, any further questions?

Rodey: One further question, Eric, do you handle any other litter control programs within the Dept. or programs relating to refuse, or

Lee: No, we do not.

Sturg: Any further questions of the representatives from the Community & Regional Affairs? Just one question, if I may, were you going to go on to some structural areas - fine.

Lee: That's why, I was going to say if you'd like I'd continue to communicate on this thing. Some of the structural problems that we had, that I was, some of these things will need further investigation and w aren't?

carry on .. discussion to....

The Dept. of Envir. Cons.
to deterime the impact as well. .... I don't mean to speak for them
have
~~have~~ indicated to ~~us~~ that that they have concerns about the landguage
which may preempt all other statutes dealing with litter and perhaps
lose some of those
~~lose~~ that we don't want to see removed, ah, changed. They, I would
like a further clarification of the definition of administrative
costs because if our personal services are considered administrative
costs, you are not going to get this type of program, for 35 percent
of the total.

your
Sen Kelly: Mr. Lee, why was the, ~~xxxx~~Dept. selected to administer
the program rather than the Dept. of N. Res., for example.

Lee: Senator, I, I, could not answer, I suggest that the original
referring
sponsor and the .... The language ~~referred~~ to three months
to determine the
after fiscal year .. report is a bit too restrictive, because
the books don't actually close for a couple of months after ~~that~~
the end of the fiscal year and we would like to see an extension
of 6 months, rather than 3 months.

Stur. : On that point, though, that would mean, the possibility
ther, of that program not possibly getting, would that bring it
back before the Legislature for that immediate year, then?

Lee: It had, what, what occurs now, we have a similar type of
situation with the day care assistance program, which we adminster
..... Legislature, and we have that report prepared
and ready for ~~xxx~~ the Legislature before it convened in Jan. ~~In~~ And
three months after the frist of the year would be Oct. and, it would
be, fiscal would be very difficult because the time frame and close
down of all the books. We are somewhat concerned about the Dept.'s
ability and mechnism ~~xxx~~ for receiving and expending contributions
of either cash or in kind in terms of the day-to-day operations.
We have not had experience in this area and would like the language
establishing so it is clear ~~xxxxxxxxxxxxx~~ that the intent that we
can take in gifts, domations, and turn around and spend those on
behalf of the program. Tehre has been some concern indicated to
us from other states that, if you absolutely mandate a specific
size, color, shape of a receptle, that they have a lot of difficulty

in the public relations aspect getting some of the businesses to support that because they may have spent a large amount of money on the decor of their building, and you want to put a purple trash barrel alongside of their/building, they would abject, so we would like to see a little more flexibility, perhaps in, in that language. Also, we are somewhat concerned would like some further investigation on the impact of the dollar amountslevied on the . This

would like at least some indications as to what is expected and the intent of the establishment of the fine xxxxx, it appears in some cases, ... fines have been reduced and we are not sure if that is the intent. Another item we would like to see added to the available use for the, the general use of the grant money to municipalities, and would like to see that, ah, allow them to also purchase .. purchase the recquired receptles, & so forth, that that is their primary need; and the current language ...

Sturg: Eric, in that case are you thinking of smaller communties where that would be the difference of the beginning of the program?

Lee: Yes, right. If that, thats the primary need, and primary situation they have no other basic resource, we will, at least, have that be a possibility. I don't think we want to see that because the sole use of the grants at all, certainly not support that idea.

Sturg: Other questions of, you might have of Eric Lee? Were you going to be giving some testimony today or are you here as the back up man? .....

Kanouse:

Sturg: Fine. We'll obviously be having work sessions on this, and we appreciate your testimony. Senator Kelly? Fine, thank you very much. The next person to sign in was Chris Foster. I don't in all cases have the organization that is being represented.

Stug: Oh, And Virginia del Piaz, if you'll introduce yourself for the record, please?

My name is Christine Foster. I am appearing today as a member of the sponsoring committee for ballot proposition No. 5 in the 1978 Gen. election.

Any I am Virginia del Piaz, I was chairman of the Ballot Proposition Chris was speaking of, properly known as the Alaska bottle Bill iNiative. We'd both also like to state that it is general knowledge we are legislative staff this session. We ~~are~~ received have permission to testify on this bill. O.K. Last year, or several years ago, we undertook an iniative drive to place a proposal for a ... ~~beverage~~ term of beverage container Legislation before the public, because we were concerned about two problems. That was recycling and litter. The initiative was defeated in the Nov. Gen. election, but our interest in addressing these two important problems has not diminished. It is our hope that the Legislature will give serious consideration to making any new program the very best possible for the State of Alaska. We are concerned that any legislation deal meaningfully and not just cosmetic in this problem. IN that spirit we would like to make a few suggestions on this bill. We ~~do~~ did not have the Committee Substitute to look at when we read the measure before us, so some of this might be a little out of line in sequence. Problably the most important thing we'd like to suggest to ~~you~~ the Committee, and this is already somewhat been brought up by C/RA, is that this program would most appropriately be administered under the Department of Envir. Cons., rather than the Com. Reg. Aff. Dept. DEC has the existing litter control measures , it has solid waste management, in general, as a Div., as a Dept. DEC is the lead state agency for solid waste management planning, the regulation for enforcement, for technical assistance, both ~~with~~ under the State law and the Federal 1976 resource recovery and Conservation Act. DEC already distributes litter bags they've already done litter surveys, they provide local assistance to governments, they also promote the Alaska Clean-Up Month, which I believe is the month of May, and ~~has~~ have done so for a number of years, and have also been involved in policing television spots and other public literature. So, it's pretty evident/this that particular agency has been involved in this type of thing for some time and it is our feeling that they would be more of an appropriate agency to deal with this program. The lead, as it should be, and should continue to be with the Agency most logical, which would be DEC. It could be put, ... suggested by R/CA in as was also

Terrestrial

in an existing Division, in DEC, which would probably be their celestrial programs Division. That already handles most of what the proposed division, of what this legislation needs, would handle. Secondly, the section on the Advisory Council; whereas you have two different ways of working with this. No. 1, if you are going to move the program to DEC, DEC already has an existing advisory Committee that could very competently, possibly easily expand their charge to the concerns expressed in this bill. This would, to our way of thinking, be a logical extension of the need to DEC, of course, and also there is existing funding, & so forth, for this particular committee. They are very well constituted, they are a working committee, there're, they are used to dealing with these things and they're very familiar with these types of problems, so that this would be the more logical way to go; but, if the Committee decides to keep the program in the Commuity & Reg. Aff., we feel the Advisory Council should very definitely not represent just the main interest group, as is currently there, which would on page 4, lines 7 through 10, Section 8, on the old bill. Some of the, we feel, that it should be expanded to and for a different interest group, rather than just the businesses; and some suggestions might include a public member, members of the education community that deal in education in the State , local government officials, perhaps a rural representative, somebody from the recycling grup, youth gruos are involved in this, obviously, of course, some type of business represenative; possibly one from a consumer environmental group, or for service organizations which have epxressed quite a lot of interest in this bill. We'd also suggest that they don't need to meet as many times a year, possibly twice or three times, rather than 4 or more times, would be adequate and would also help on the fiscal implications of per diem and travel. On the proposed litter patrol this,in following bills over the years, has changed quite a bit. And in the current bill, the duties and purposes of this litter patrol are very vague and not very well specified, and so we suggest that this be a lot more tied down to what their purposes are; and also, just make the observation that if this is to be an effective part of this program, it would probably have to go pretty large in order to cover a State the size of Alaska, so there might be some problems with with the ways its constituted. We would like to make a comment on the grant section of the bill. If this is to remain, in fact a grant section, we suggest there be some definite limitation on the grants indicated in the bill. As far as we could see there was no limitation or lower limitation on the grants to be made. But, actually, when you look at the things as they are listed and there are 10 things listed, they break down in a different way than just getting grants.

Nos 1 through 4 are pretty much already existing; and 5 and 6 could, I think, very effectively be made into a loan program, either with one existing, or create a new one ; and Nos 7 through 10 could be done by the Dept. or the division, or could be subcontracted, or could possibly be grants, if this was deemed one. I would like to go over them briefly to explain how we came to that conclusion. The first one goes with the instruction at the distribution of informative material to elementary or secondary schools, and so forth. This is already, there are a lot of sources for this already, mainly for Keep America Beautiful program and some through Federal programs, we feel this, in a large part already does exist . The second one, purchase and erection of road side signs. This one is pretty vague , and to give grants for this is really ..... There are already is an existing statute for the address of road side signs for littering and that - Sec. 19-[illegible] 17-010, which states, very briefly, a Commissioner of DOT and Pub. Serv. shall place a sign near state boundaries, each primary and secondary highways which informs the public of the prohibitions against.....

and highway littering and shall place some more signs in other locations within the State when considered necessary. It was our thought, that this kind of, it's already covering that contingency. Third, the organization, operation of the clean-up drive conducted by local agencies, private organizations or service groups, even volunteer help. Now this is something that already does exist in the private sector of the volunteer effort and we just wonder at the wisdom of using State monies to fund something that is already essentially being taken care of in the private sector. And fourth, any other public information that is selected by the division including the use of media; as I mentioned earlier there is already a, DEC is already doing some media spots against the litter and I think everybody familiar with, the National Ed Council, TSA Time, which you see on television and hear on the radio quite frequently; so, feel this in a large part is already being done. The fifth and sixth one, speak to number 5, the expansion and of existing and creation of new source separation programs, and six expansion of existing and creation of new community recycling centers. This, as I said once, that this might more appropriately be under a loan program, because it is speaking of capital expenditures for structures, and so forth, equipment, and that this might be more appropriate for that particular type of program. And the last one, 7 though 10, felt that these might more appropriately be under under the section that gives the charge to the division, whether it's in DEC, or C/RA; but this is essentially telling them the things they should be working on and they are, in fact, pretty similar to what is charged to the division, and lastly

the litter control assessment, which was in the original bill that we were dealing with and now you have separated them outp but our po int still remains pretty consistent. No matter how this assessment, or tax, or whatever is to be called when it's done, it should be tied to the amount of litter generated by a business. There sould be some relation between there non litter generated to the tax put upon/particular business or operation. NOw, we'd like comments and suggestions but we offered haven't been real specific and we don't have the language drafted, but we'd be more than happy at any time to work with the Committee on specifics. We do have specific language worked for the loan program, if you'd be interested in that, that's why we've done possible language.

Sturg. We definitely would want that information. Any questions of Virginia?

Sen. Kelly - Just one. Are you satisfied with the recycling provisions in this bill?

Virginia: Quite frankly, there aren't too many. I would certainly like to see th: strengthened. There is quite a lot of interest going on with that inter-state currently. I know Anchorage is getting started with the program and I think this would have to be strengthened. I don't have any specific suggestions for you right now, but we coud l certainly work on it.

Sturg: Other questions? Chris, did you care to give testimony also?

Chris: NO, Virginia covered all our major points for both of us.

Sturg: Fine. thank you verymuch. I think a very/basic issue has been raised, and I am sure there will be other testimony. I wonder if Sen. Colletta might wish to speak and l, to the reason for the designation of c/RA and also possibly to the Youth Patrol. I think those will be of interest to other groups and I know the Committee will be interetted.

Col: Madam Chairman, Yes, I see that Sen. Rodey raised those and if you will recall in my introductory remarks, I stated the bill hadn't, a great evolution because of that hitting us occurred over 8 years of implementation. C/RA was picked for ... reason. This is not a State bureaucracy. this is, for all practical purposes, a people's activity; and who thus can do that, but the agency that's

dealing with people on a daily basis; as is their prime charge of community and regional affairs . DEC is limited in their scope, although they have acitivites statewide, it's not a normal recurring daily function. They go and ... on specific issue. Dept. of Nat. Res. the same way. They have statewide responsiblties but they don't work on a daily basis statewide. The Litter patrol, the fiscal note that Sen. Rodey alluded to has been a source of controversy from the day that it was requested, and ironically and for your information, it was never requested by myself. It was requested by those who were in opposition to the litter act; and I don't wish to open up that controversy. But that's where this 2.8 million dollars came from . At one time, in the course of introduction, Commissioner Max Brewer, from DEC, had suggested to me that he had some approximately 40 people, that he would delegate an additional reponsiblity to, Somehow, or another, 40 people got into the act that we were going to start funding and paying. Put 40 people on the payroll. This is not the intent. The Youth Patrol is very much alive and .. In Anchorage I would suspect they have no less than 2,000 youngsters in a Youth Patrol. They are being run through nonprofit and civic organizations. They are not State employees. You can interpret any kind of wording whichever manner you wish to fit the need that you wish. I would like to take the latitude of thanking Virginia and Chris. I offered indication, when it became an invitation on election night that this was not a victory for those people who, philsophically were in tune with me, I offered an invitation to them to cooperate to make this able a working bill. And, I'm now happy that they have come forward to do that.

Sturg: We'll appreciate it as Committee and certainly use their services. Sen. Rodey?

Sen. Rodey: Sen. Colletta, my concerns, of course, the cost of the bill; I know you share that concern with me and the reason I referred to the previous memo, is because it is one piece of evidence that relates to the cost of the bill. And, I'm particularly concerned because the cost of the bill would be borne by Alaskan businesses, small and large alike, and quite frankly, I'm somewhat reluctant, perhaps reluctant in the extreme, to put any additional burdens on Alaskan businesses this year. I would rather stand neck deep in the Gastineau Channel than ask another burden on business this year. Certainly it's passed on to the consumer too and it affects all Alaskans in that regard. That's why I'm concerned about the funding because it will reach the point of making a decision; and if we do have a bill, of course, I would like to see the lowest possible fiscal note and I know you share

that concern with me and that's why I 'm looking at some of the alternatives and also the funding of the litter ~~xxxx~~ patrol, which appears to be an unknown quantity at this point, particularly in, in future years.

Sen. Colletta: Sen. Rodey it's apparent one of two things is occurring. Either you're not hearing me, or I'm not making myself understood; but I thought I had addressed that. The litter patrol is alive, it's not State funded. The litter patrol is comprised of youngsters who are assisting their parent organization in the earning of some dollars. It's a volunteer effort. The only paid individuals are those that the State will furnish to assist communities in accomplishing a Litter Act activity.

Sen. Rodey: Madam Chairman, let me point out, though, that in no where in the bill does it say that - it merely says that the division shall adopt mandatory requirement for adoption of regulations which established the letter patrol; and I think it is something we ought to consider in our draft. And certainly in our work on bills, I find your assurances to be absolutely gold plated. And, I thnnk this is one of the things which we need to deal with in the draft of the bill. And, let me bring one other concern up. There is on page 6, Section C, places the responsibility on people owning or operating in a public place and that does include a very category; and includes a great many businesses; if perhaps not most businesses in the State of Alaska, certainly all retail businesses. And, it deals with a question that Eric mentioned earlier; and that requires the businesses to secure place and maintain those receptles.at/should be at their own expense, after their/expenses here. What reaction have we had from the community in regard to this? This was alluded to previously.

Sen. Colletta: I don't know if there has been any other specific language that it's probably 6 months ahead of what this measure hopes to accomplish. They have already throug specific organizations such as the Chamber of Commerce implemented the litter and recycling activity, totally private funded. It is my understanding in talking with the Chairman of that activity ~~xx xxxxxxxx~~ it is not a probability, the only assist that he would want out of the passage of this bill, would be the educational aspects

and conceivably on occassion a little bit of receipt money to tide them over on some of the contractual things that we deal with the nonprofit organizations in the pick-up of litter. But the responsbility you are referring to in Sec. "C", Pat, I, don't know how to answer that to you other than that the normal course of activity, they do have designated spots, receptles now and the responsiblities for policing their own yards still remains theirs, All we are doing is assiting and hopeing that the accumulation of that would be the central place for them, again benefiting them. They still sweep their own parking lots and everything else. So, I don't think its' that controversial of an issue; it could be, but I doubt it, very much.

Sen. Rodey: I'm not sure it is controversial, Madam Chairman, and perhaps we could hear from members present from these groups, or the Chamber on that and see if they have any question or

Sen. Coll: Madam Chairman, if I might have a, I really want to clarify that litter Patrol, I think maybe we're grasping at words. Originally there was a litter patrol; these were uniformed youghsters working for a State agency and so forth, but, experience has shown that that's not the most practical way; because what's you've done is just expand a refuge picking up activity, which just doesn't accomplish and they have had greater success in utilization of the local candidates canonies instilling the pride in each community.

Sturg. Sen. Rodey?

Sen. Rodey: Madam Chairman. I'd be happy to work with you Mike on this and redo the language, because the language Litter Patrol is still in there, and we need to redo the language in that section because it's a bit unfair to me . I think you're absolutely correct, certainly we can look at Europe and see what they have done to be at these means, which that, some of them are very traditional.

Sturg. Thank you. Are there other questions? Thank you very much Senator Colletta. The next asked to testify - Mr. Gravo and Ms. Municipality of Anchorage, or possibly a private citizen today, I don't know. Mitch?

GRAVO: Sure. My name is Mitch Gravo. I am testifying as a resident of the Municipality of Anchorage. Litter is a mjor problem for the municipality and any legislation which helps us deal with that probelm, we support. My comments will be very brief and they just deal with a few housewkeeping matters. The first one, on legislative intent, suggest the Committee discuss the possibility of including the public sector also in that Section. where you indicate encouragement, stimulation ~~assimilation~~ of private recycling efforts. For example, the Municipality works with, very closely with the Chamber of commerce on the program that Sen. Colletta was just speaking about. Last year it was a tremendous success and this year because of the changes, new approach, I think it will be even more of a success. The Advisory Council possibility that not only the people that are mentioned in there, be part of that Council, but also solid waste professionals, also being included, people of considerable expertise. The survey section, you indicate that 6 months after the bill goes into effect there should be a survey to determine if its working. You might take a look at that, in that if it goes into effect in July, the survey would be conducted in Jan., and in Anchorage, all litter is covered up in Jan., and we see it in May. So, you might take a look at that.

Sturg: Fine, I think that's more of a technical thing we do need to look at, because it's more of a question look at, because it was a question of when that program begins, and it's going to take a little time to get it underway. Good point.

GRAVO When you speak of, when the bill speaks of garbage or refuse, that's somewhat vague and our solid waste people suggested, quite publically, that perhaps you use the word solid waste, instead of garbage or refuse, because it's ..... and has a specific definition. Finally, when the legislation speaks to the receptle, the costs to those individuals may be significant depending on the design, and the bill speaks of the design will be the responsiblty of the director, and we suggest that perhaps you look at some better responsibility being placed with professional with a design in the least costly manner possible.

I have no further comment.

Sturg: Fine. Are there questions of Mitch?

Rodey: Madam Chairman, just one comment breifly with regard to the 10th intent section of the bill since Sen. Ziergler, the Senate gramarium is not with us, let me, let me offer some comments. The English language is a beautiful thing and I think perhaps we could include its useage in the intent clause by perhaps by cutting down some of the existing verbage. I think it would be interesting for the press to take a look at it and see how it, we might say what is intended to be said and in fewer words and discretion?....dry set aside.

Sturg: Thank you Pat. Thank you Mitch. Apprecate that. Ron Murphy?

Murphy: Madam Chairman, and members of the Committee. My name is Ron Murphy, I'm a lawyer from Seattle, and the reason I am here is because it is my understanding that the Committee would like to hear from me about the experience wwe have had in that State and other states that I am familiary with. I represent the industry group that has been involved in this kind of a program in other states, especially in Washington State; and I have had a great deal of experience, good and bad, and made some mistakes, and hopefully have learned from them and my purpose here, I believe, is to hopefully answer questions that you might have that might help you in making determination of how to-make your determination. I should also say that I have worked with, closely with, the Alaska industries peopee, and tried to work with Sen. Colletta, and some of the other people here in Alaska, within the governemnt, to give them the benefit of

our experience.

Sturg: Mr. Murphy, I think it would be very helpful to us. I am sure you have had a chance to look at Senate Bill 2 and the Committee Substitute what we have on the table in basic form, very similar to that. I wonder if you might be able to say what we have presented here, how that compares to ~~Washington~~ what's happening in Washington and what you feel, or percieve has happened in Washington as a result of their bill. Or, have we strengthened areas where they have had weakenesses. What about this program? What can it do for Alaska, if there is a commitment of those that have said/we will make this bill work. What might happen in Alaska as a result of a bill like that?

Murphy: I'll do my best.

Sturg: Yes, just a little, kind of an overview, and comparison and what will this do for us.

Murphy: All right. And then if I don't answer something, or raise other questions, I hope you'll shoot straight at me and I'll try to do my best. If I don't know the answer, I'll Tell you.

Sturg: I may not, but I bet Sen. Rodey will.

Murphy: All right. First of all, I think you asked me what, how does this bill compare with what my experience has been in other states and observations. This bill was put together as I understand it, as

an attempt, to take the best of those bills and weed out the poor portions of those bills and then it was tried to be tailored to the situation here that exists as best to be determined for Alaska. A lot of thought went into that and a lot of work went into it and it was an attempt to put it together in a fashion that would work here. For instance. The Washington approach, in the beginning, was entirely a litter bill approach. Back in 1970-71 when the Washington approach was put together, it pertained entirely of litter. Now we find that there are these recycling solid waste problems that have developed and so the bill that you have before you is an attempt to incorporate and address itself to those problems and solving them. I should start right out though and try to be specific and say, it is not the intention as I understand this bill, and Sen. Colletta certainly has more and better knowledge of what this is about and what he wants to accomplish, and you might want to accomplish than I do. But industry, and speaking for industry I can say, I can say honestly and candidly industry is behind this bill, and as I understand in Alaska, and I can tell you its behind the bill in Washington. And I understand from talking to the industry people here that they don't intend to have a cosmetic bill here, as stated here earlier, they want a bill to work. And they'll stand behind it and attempt to make it work. NOw this bill is addressed somwwhat to recycling, where the Washington bill was not. Now we are amending the Washington bill now to incooperate and strengthen recycling sections; but fortunately, when we drafted the Washington bill, we made it flexible enough, by luck, that it could address itself somewhat to recycling and we were able to incorporate recycling in it and in the State of Washington we have got a tremendous increase in recyclers

and recycling, which I think in large measure is due to this situation we have down there. We have some 500 recyclers in the St. of Wn. now, almost more than any other st. and part of that is due to the bill. Not all of it, I assure you. Going back, the, what we did in Wn. is, we were told in the St. of Wn. as industry that if we didn't come up with someting to solve the problem of litter back in those days that we'd, the State would solve it for us. And we had some good Senators and Representative s that we knew, and we sat down with them, and we said, hey, we don't know how to solve the litter problem. We don't. We know it's a big one now because of what's happening in this country. But we said we'll go out and see what we can come up with. So we got together, a group of industry people like the ones you have here, and we'll try to get together here now, and come up with a program that we can present the Legislature and they take a look at it in that stage and say o.k. - it makes sense, or it doesn't make sense. And that's what we did. And we studied, spent about$15,000, doesn't seem like much money now, but then it was quite a bit, to study the litter situation in the various states by the municipalities, by the states, by the individuals, businesses, and so forth, and come up with what we thought was the way to solve it. And we came up with basically what is known as the Wn. model litter law now. That's how we ... The idea behind this is, as I stated earlier, it's not to have the State solve all the problems that we had in the recyling and litter, and it's not to have the State tax everybody, industry, or anybody else, to solve all the solid waste and recycling problems, we haven't got that much money. But the purpose is to put the problem of litter control and now recycling into one central agency in a given state

and get some control over it, get some guidance over it, get some standards set, and get a program going, so people will know how to deal with the problem. So we, in Wash. and other states now, and we hope in Alaska will put this under a governemnt agency that will take control of setting these standards and start working on the problem instead of a mishmash like we had with one industry doing one thing and onecity doing another thing and we don't know where we are going. People need quidance and we need study and we need work, so this is what the idea was. But we also put in here after our studies were made some specific things which we thought should be done, so we didn't say the state solved the problem. We found out that there weren't enough receptcles out in given communities, given areas where peopel were apt to litter like beaches, parks, playgrounds, you know, marinas; and the receptles weren't placed in the right places at the right time; and the receptles weren't the kind of receptles that people could see and recognize. So, one of the things we require in this Act and in the other ACTs, is that the State sets standards, just like we have with stop lights today, just like we have, all restaurants have to have toilet facilities. The state sets standards on these receptles and they should be. Somebody said here earlier, and I know it was a good thought and we wrestled with this, we think standarize, and color it and design. It doesn't mean they have to be expensive; but they shold have some way people could recognize wherever they go that's a litter receptle and that's what it's for and there should be enough of them out so that they can use them. HOw many times have we gone down a city street, and I've done it in Seattle, and I've done it in Yakima where I grew up, and I think I did it in Anchorage

and you are a person who wants to see litter picked up, you pick up the litter and don't know what to do with it. So we've got to have the things out there for people to put them in and they should be standarized, we think, in color and design. So we found that people were being fined for litter, littering and charged $100, $150, $500. This wasn't helping. One question answered earlier today was why was the fine low. Frankly we set the fines low down there and suggest it to you here, because the idea is to keep the fine low for the litterer because you don't want/to go and clog up the courts. We want it to be like a parking ticket, and so then, when a person litters and he is fined, he just takes bail and it's sort of an educational process,. That's a little thing, but it's one of the more important things. The other thing that we found out is that motorists, drivers, people going places have a lot to do with litter. They get in a car, out it goes, when they get in their cars and go picnicing, and so forth. So, it's mandatory in this Act to ahve litter receptles in automobiles. WE also found out, and this can be a litter bag. We also find in here that litter receptles are required to be placed in all the, to be handed out by the St. agencies. They are inexpensive, the St. can give them out and the St. will send them out with motor vehicle registrations, this is all an educational process. So, we have followed this pattern in the St. of Wn, basically, and it's taken a long time to go through all of it; but basically, identification of litter receptles, plenty of them out, litter bags, plenty of them out, and a good strong educational program for the public. And I might stop here and ask you to ask me some questions, it's not a boondoggle, but, but edcational program for the public is not just going out and buying some television spots

and don't litter, it's to get each community involved. Have this field Dept, with one other xrxx man go to the communities like in the St of Wn we have an anuall program in Ellingsburg, Wn., where it's clean up the Yakima River. The field person from our Dept. goes out, starts the program there, for instance, to get those young people to school there to go out and clean up that River once a year and if, starts them out, gets them going and gives them receptles, gets their local community to get the trucks going; and these are the kind of programs that are coordinated under this Act. I can stop and talk about the Litter Patrol in a minute, but right now you may have some questions.

Sturg: Yes. Sen. Kelly?

Kelly: Mr. Murphy, in the St. of Wn, which Dept. administrates this program?

Murphy: In the St. of Wn. we use the Dept. of Eucology. The reason we use that is that it had just been formed at that time and it seemed like the natural place for it to go; because they were going to be a Statewide agency talking about eucological matters. I, when, if you would ask me specifically why this Dept. was picked here, I wouldn't have known the answer and I was very pleased to hear what Sen. Colletta said that if you need an agency that works in the various communities at a local level, so that you can get that local touch and get self help programs going. And the Dept. of Eucology was the only Dept. we had that did that.

Sen. Kelly: And then you said something about 500 recycling plants in the St. of Wn? Is that 500 rebottling plants, or; what exactly are your recycling centers?

MurphY:
Recycling centers in the St. of Wn. everything from a fairly large area, plant where you have maybe a scrap dealer with where you have several employees handling hundreds of thousands of ton s of stuff down to a one or two man shop, where you've got a fellow that believes in recycling and goes out and does it on a very insignificant small time basis, say one man. ~~day-to-day,-one-man~~ Am I answering your question? That's what I mean we we don't mean a bottle shop,/we don't mean a manufacturer -

Kelly: You're not adually recycling the material, your not recycling alumin cans, or recycling bottles, your're just simply, kind of a scrap center?

Murphy: It would include both, collecting it, putting it in boxes, separating it, and selling it to somebody who does it. We would count the ones who collected it, just the little guy with the shop where he collects bottles and cans and gives somebody money for it, or paper, all those things. But it isn't always the fellow who processes it, no. It's the collection agency included. So when I say 500, really, it's the li-tle guy too. It's the little guy who picks it up, and has it there, and pays people to bring it in; and then he sells it to somebody else. Of course it might sell it to Northwestern Glasa, the glass, and they turn it into glass bottles. Does that answer your question?

Kelly: Yes. That answers that particular question and the last question I have, I suppose, I have some doubt whether standarized receptles are really necessary because I am assuming they are going

to be a great deal more expensive. If a person has the option of just between buying a loboand putting it on an existing receptle, or buying a standarized receptle that obviously has been manufactured outside the STate and brought in, I'm, I'm pretty concenred that the size, the weight, and eve thing, it's going to turn out to be quite an expensive item. It's like looking for a bathroom, you know, it doesn't make any difference if it's boys, or men, or gentlemen, or has a siloute, youknow, when you need a bathroom, you know where to find one and you can find it relatively -

Murphy: Well, I didn't do a good job on that. YOu're exactly right on wat we had in mind. We don't have in mind to standarize as to shape and buy outside the State of Alaska. What we have in mind only is that it be standarized in one color and have a lobo logo on it . That's all. Now our St. Dept went ahead and passed some other regulations as to where they should be placed, like shopping centers. They told, this is what your Dept. would do we hope, in a shopping center in the St. of Wn., you're supposed to have, if you run a shopping center, so many of these receptles because of the amount of traffic that's in that cetner. Instead of on e receptle for 500,000, well that's over exaggerated, one receptle for 10,000 people who go through a shopping center in a weekend, there's got to be a 100 receptles in that shopping center. And they are not necessarily, although a rich shopping center does put out expensive ones, but if you are running a Mom andPop Shoe Store, and you had a lot of traffic there and I don't know if a shoe store would be a good example. But a marina, it might be that you would put out a litter barrel painted green but you would have a logo on it which the State supplies free. Our St. supplies all the logo stickers

so that if you are a little guy, you have to have this green receptle and you can paint a barrel if you want, then the St. will supply you with a sticker so everybody can recognize it, and they stick it on the receptle. So you are right. There is no requirement that you have this expensive piece of hardware. No. But they should be standarized in the sense that you recognize them.

Sturg. Sen. Kelly what -

Murphy: The logo is the important thing and i would like to think the color is too, but I, I heard a man, this Mr. Lee say that he went around and found out this is a problem because some businesees do not want to go with the green color that we use because it destroys their decor. And we've had a terrible fight on this sometimes, and our position is, in industry is that, if you're, I shouldn't, let's not say MacDonalds, let's say if your Joe's Hugh's Drive In organization and you've got all green, no all brown, and your architect says you should have brown receptles, because it's pretty, our answer is so bad. We want to see those receptles and we want them to be green and there has been some scraps on that. Correct.

Further questions, Senator?

Sturg: Sen. Rodey?

Rodey: Just one question and what is your per capita costs in the St. of Wn?

Rodey:

Murphy: Oh, for our program? Anybody got a calculator? I don't have one. I could, I could divide, right now our program is going to be about, and we're very high now, our program started out $x 600,000. Wepre spending about a million fo in the next bi-annum, so divide that 3 million 500,000 people and chat will about do it.

Rodey: Obviously, fairly, fairly low cost on that

Murphy: yes, what do you get, I'm interested to know myself.

Rody: That bi-annum, is that a two-year budget?

Murphy: No, that's a one year, a bi-annum would be double that, which would be about 3. What we did was we went from 1971 from 600,000 like you've done, up to this figure; but we have a different tax setup than you do. I think your tax proposal here is better because ours puts a heavier load on some industries. And, incendentally, I want to be very level withyou, we looked at this very carefully how to make suggestions to this Legislature here, to cary this tax and I think that the tax bprogram that shows here, this assessment program makes a lot more sense than the one we have in the St. of Wn, for your safe/. But you don't have enough base hereto isolate one or smaller group ... you get prohibited this way everybody shares in the cost and it makes good sense.

Sturg: Alright, Mr. Murphy, you're talking about amount tied in the amount of litter so called, that's what your

Murphy: Yes, we break it, you know

Kelly: Madam Chair, how do you pay for the program in Wn.

Murphy: Well, in Wn. we have a very broad base tax like you do, but we were able there to tax broad, broad spectum of industries that were related to the litter problem only. For instance, you wouldn't tax the Boeing Airplane co., but you would tax the Dept. store because the Dept. store puts out materials/in bags that are , sacks, toothbrushes, and sc forth that end up in ..

Kelly: So, you're, you're much more restrictive.

Murphy: But we couldn't do that in your St. Yes, but we tried that kind of a tact in your St, we really tried hard to come up with that ~~positive~~ approach but because of the number of people in your ST, we had to do this in other states, we couldn't, we just couldn't, it was impossible. But the one you've got now, I think is really very good.

Stur: Sen. Rodey, I think we cut you off before you were finished there.

Rodey: No,

Stu: Did that answer your question.

Rodey: I think it did. Evidently you have a/lower very, per capita cost than we do, which I think would be, be natural considering the situation of Alaska and the situation of. Really the two questions that I'm concerned about. 1. How effecient and effective can that litter program be and then secondly, how much will it cost us and I, I think that's all legislators. . and those two points aside.

Stu: Mr. Murphy, do you have any further response to that?

Mur: Yes. He says, o.k. Murphy, you've got ~~that~~ this program down there and you naven't told me what it's worth. Isn't that what you are saying? I think that's what you are asking.

Rodey: that's what you are saying.

Stu: woudl you, would you like an answer to that question?

Rodey: I think so, because, that's why I asked the ~~question~~ cost worth and that's part and the other question is how much are you getting for your money?

O.K., is it workh it?

Mur: Right. /We started out in the St. of Wn. with not, you see when you start out in the State, how do you find out how much litter do you have in the State bo begin with? I don't know how to find out, so we had Booth, allen and Hamilton make a study for us, it cost us some $70,000 back in those days to tell us what to do abcut this program, what the ..., how to get it started and what have we got here in the way of litter, so we can see if we're making progress later on. They came up with a figure that we worked from, and according to the figures that have been done by outside measuring outfits, we have had upwards of a 60 percent reduction of litter, from what we would have had. NOw if you go to the St. of Wash. on a given day, Senator, I want you to notice, when you go down a certain highway on a given day after there has been a summer tourist season on the 4th of July, and that road hasn't been picked up, you're going to see litter. But if you do it on a ... basis throughout the State ~~throughout~~ this as a study not attempting to be done, and honestly as we know how to have them done, the State knows how to have them done, we have had a tremendous reduction of litter. We haven't solved it, I don't think we will ever all of the litter problem, but we have made a tremendous reduction, and we are very proud of what we've done. So I think it's workh the effort and the money.

Stu: Further qeustions?

Rodey: Just one comment, it would be interesting if we knew the perimenters of our litter problem, in the St. of Ak.-

Murphy: It would be very difficult to start out with because you're starting out with, well 50 or 100 years of accumulation andyou know you have to get a handle on it. ③Were there any other-

100

① (laughter)

②Stu - That's discouraging.

Stu: Mry Mur. I do have one specific question. The way the Advisory Council is set up, it's completely composed of business people and I

have had a number of questions raised and we've had that today about the fact that we should really be bringing in, on the one hand we have the technicians, the other the broader public interest; and, there's, true, the commitment of industry to make it work, but what's you comment as to how you bring in the various grps that have an interest in this?

Mur: I don't want to speak for Sen. Colletta, so I'm speaking perosnally; and I don't even know whether he'd agree with me or not, haven't the slightest idea, and I also want to level with you. I think part of that was put in there, I can't say this for sure, but put in there for all business becasue business was very concerned that this might get out of control if you got the wrong people on the Adivosry Committee and tried to use this against them. I think that was a frightening thing that they put in here . I myself would say personally, I'm not really speaking for the rest of the business in Ak. now, I, myself, would say, you ought to go ahead and put some other legitimate interests in here that want to solve the litter problem and not attack something else. You understand what I mean, I'm sure. Yes, that kind of an approach and some safeguards for the voter, you've got to pay a tax and ... in this case it's all business in Ak., so if they don't get overwhelmed, I say to try and strike a good balance. The other reason we'd like to see business on there with a good say is because we think business should be committed to making this program work and if they are on there, in strong force, then they have a chance to really make it work.

Sut: Thank you for your comments. Any other questions from Mr. Murphy? Thank you very much. We have a dual, I believe they wish to appear together, for the St. Cham. of Commerce, Lou Harris and Don dickey, is that correct?

and following that, the past person I have on my list here would be Commissioner Mueller from the Dept. of En. Cons.

Dickey: Madam Chairman, Member of the Committee, I am Don Dickey spekaing on behalf of the Ak. St. Ch., of Com. The idea of a comprehensive recycling or litter reduction program, I think is not only commendable but not new becasue for a number of years, doezen or so, Chambers of Commerce throughout this State, and some of your home committees have been carrying on, as you know, very aggressive and progressive programs as has been testified to before. However, the problem with that, our own community here has on one or two occassions national ...and yet it seems to have no, it's like a senate beed with a hundred legsand no head to it, there doesn't seem to be any coordination statewide, there is some areas left out completely or not motivated enough to get started, and so I think the idea of looking at a comprehensive program with this magatitude has merit. I share, I was pleased to hear the Senator mention that, Rodey, his concern on the cost because certainly as business people we share that at a time when the economy is not particularly booming. At the outset offset, inthe original bill, as you know it was tied to a gross busines gross receipt tax, having, or from 18 to 20 found that the greatest thorn inthe side of the business peopel, the inequities of that tax which are now repealed. I was not anxious to lead any ... movement that would possible get that back on their backs; and so I felt that method of financing was objectionable, and I so stated to the Chairman, Senator Colletta, and otheres who were involved in this; and I am very pleased to see the substitute, which is being proposed and the method of funding, I think it has two virtues as I look at it quickly. One is simplicity,

and there are only 4 steps, and second, which is important equity. As for the funding method, asked about raising money, as I see the new proposal, you are asking only the $25 business license now required. Those in the lower income brackets, more volumes of business would be asked only to add $5, second step takes i t up to 10; and I understand from State figures of about 33,000 business licenses that 73 percent of all thoses linenses would fall within $5 or $10 brackets, as far as the increase would go, were they are paying 25, now 30, 35, ah, 35, so 2 out of three businessmen in Alaska would only htave to contribute no more than$10 a year; and I don't think that's unrealistic at all. At the very top of that spectrum, the fourth step proposal in your bill, businesses having over a $1,000,000 gross volume, I'd say, and there's only 7 percent in the State, but with this small amount would only have to pay $75 more than they are now paying, or a total of $100. So at that top from going up $5 step up to a hundred, I don't think its excessive. I would like to start with the philsophy; and we have discussed, you and I senator, and others, the idea/its a that chicken and egg thing do, should we tie the tax and the funding, to those people who contribute to the problem? And my responses, while that sounds logical and commendable, I don't think there are enough soldiers here or in China to police everybody that contributes to the problem; and I am going to propose, and we are taking it from our viewpoint that all of us contribute to the problem, all of us should contribute to the solution. So I think in this manner, instead of trying to pick who threw the most out at the waste-basket, or if it's a professional man, or chamber type, all of us are either someplace either in the picnic or in the cars are potential contributors to the trash problem. So, I think it's logical that all businesses be asked to contribute to the solution. I also say and commend

the Committee for a better for this step which in no case wwould anyone have to may more than $100, which is only a $75 increase; in over a million dollars; and I think the small merchant who has that tough problem is protected with the $5 step. Commenting on some of the other factors, I naturally, again getting back to the funding factor, I am not only pleased to see; but we'd be considered a watch dog to make sure that this action not include xhe for administrative expenses that exceed 35 percent. I think that's most important. I don't feel we have enough money in this state, or Washington State combined, to pay for all of these functions; nor is that suggested as I read this. What I think we need is to encourage, stimulate and not duplicate, but stimulate voluntary services that are already existing; whatever you want to call the Youth corp, boy scouts, girl scouts, civic groups, organizations of that nature who xxxxx have toiled long and hard at the collection and reduction of litter. So I hope xhat that would be considered and that that factor would be watched and the goal met. As far as grants to the existing Advisory Committee, it has been suggested that that 7 member proposed committee be expanded; and I would, I believe that's realistic. I would concur with previous witnesses, Virginia and Murphy, that that has merit, certainly we whouldn't draw a circle that excludes anybody; we should make it big enough that it includes everybody, provided they share the same goal and that's to clean up litter. As far as numbers, I dxxxkxkxxx proposals, have no magic I do think it should be so, small enough that's it's practical if they meet somewhere; and not be a complete troop of them, if they have to go. Having served on, a number of occassions over the past 2 dozen years on St. boards xx or commissionss, I feel that the proposal of the council xxx meet not less than once every 3 months is perhaps unrealistic and may be unnecessary. I have, again,

no magic figure to substitute, but twice a year probably, and maybe 3; but I think merely the cost of that and the getting together, with the size of our state, any of us who have served as most of you haveon various boards and commissions, I don't think it needs that much policing. As far as the receptles, I know, I think that, what is being proposed, and I have, well being Irish, I'm not going to propose green berets, or red or purple, or even brown for the Hickel establishments, I'm merely suggesting that we would probably save some dollars, to get what they are using in Idaho, or in Wahsington, if we could order them in volume; and if all we do, if we merely use our own oil barrels, but as has been suggested, use some decals from Alaska, so that the symbol is used on them, I think that would be a saving and it would also be an educational step for children or old folks to know that that's where they are to throw their refuse, trash. The, on, I note that there are, there is proposed also grants for public agencies, private, and also civic groups, municipal or gym types, and I think, whereas Anchorage particularly, Juenau to a letter degree, Fairbanks, some others, have had very fine clean-up programs. I think nothing should be done to discourage tho se, or minimize the voluntary help, it should merely supplement, and as I read the bill that's what they propose to do, and I think that's good. As far as the youth corp, and I know that's, gets to be a touch word on what we mean, I have no clarifying definition, but I think the key to this thing is getting young people involved, that's where it's at, and that's where we're really going to get to them to work on whatever banner, and I think these folks are more dedicated that the parents, in many cases, and that we should certainly utilize them, and the need for some job training and distraction from other activities that is perhaps not as desirable would come from having

an opportunity for young people who find it tough to find jobs to be involved in some of these positive steps. So, I do hope it is encouraged in some other manner. Certainly the idea of issuing bags and things, some has been done already, I feel that there ~~we~~ other ~~yo~~ motor registration or ~~register~~sothers, your cars, and your boats ~~has merit t~~ I think has merit and the receptles. I had noted also on the, as far as there as been some contention on which Dept. it should be placed, I am not quite as concerned with that, I think the most imporaant thing is to determine the function. And the achievement of the goal is the desire and not who's favored agency gets to run it. I think the real accomplishment, and the thing I'm also pleased to see, that it has, and Sen. Colletta at the offset testified, has a self destruct clause that in 3 years he has enough confidence, and that's how we would ~~kk~~ looke at it, let's take, we've never been down this road before together, let's take a start, let's do the best we can, let's make corrections where needed, and if at the end of three years it produced nothing, or little, too little, then I think it should self-destruct as is proposed. But ~~And x~~ I think that's a very favorable factor and I also would like, getting back to the finan ing end, the fact that apparently theproposed budget, and I only had a second to look, but the, starting at about 600,000; and if it could be done for less I would encourage that too, but I see for the three year perio, but it's proposed that they indicate to us that they'd expect to raise under this 4-step funding method on the license, about $668,000, and that appears to be an adeuate money to carry it for three years. I think we would make a major mistake, in our public relations for the business people, if in about a year and 1/2 we have to go back and .... and put another tap on it. So I think that 3 year funding and I hope, I have no idea

that is correct, but I hope that, all the costs the Senator brought up are considered in there and that we don't find an overrun which finds us having to come back because that would be twice as tough as .. in the past. I certainly, for one, and it has been testified wouldn't take my time, nor yours, to try and come up to suggest something cosmetic approach. If this is a comprehensive, everybody get to it approach statewide, including the bush, and everywhere else, I say fine. If we all get our shoulder to it, I think we can make some accomplishment, so, even though the cost is involved, I think this this substitute is a reasonable approach to it and appreciate the chance to talk.

Stur: Don't go away, just a minutes. Questions of either of you? Sen. Kelly?

Kelly: Yes, I'm somewhat chagrined on that you've taken/such easy approach onto the reestablishment of the gross business license tax in the the State. You know, I suppose we have a philosophical .. on how do you fund a bill of this nature assuming that, you know, we feel that it's comprehensive enough to mean anything. Washington, obviously, as Mr. Murphy testified, goes a different route and what they're saying I assume like something those businessses who contribute the most to the problem are picking up the tab. We're in Alaska saying in essence, that everybody contributes to the problem, and that, but the businessman, be it the small businessman that might not in the least bit contirbute to the problem, will pick up the tab. We're opening up the gross business tax again, and aren't you all worried that once we open it up and begin taxing on licenses again, that it will just be asimple step each year, just to increase it each year?

Dickey: No, I think that's a real possibility and I testified at the onset that we were not favorable when it was tied previously, offset
i
If you recall Senator, when you look at the proposal. There's a little difference. I guess it's kind of half horse, half rabbit, you're asking me which I like of the xxxx 2, and what I'm saying I prefer this to the previous one which would have put at the top a fine or a fee of $25,000, so I'm saying I like $75 better than $23,000; so, in proportion I think it's a much more realistic bill. I share your concern, and the possibility that this could be a vehicle to get back in the gross business license tax, which I would spend my full time agruing against it again, as I have for 18 years.

Stur: Sen. Kelly, any further questions? Sen. Rodey?

Rodey: Just one, where would you draw the line, Don, in terms of Chamber support for this legislation in terms of cost? WE, unfortately have seen costs rise and in some cases all out of proportion from what we had anticipated. Certainly you've been a spectater as well as a participatant in these actifities, and where would the chamber draw the line in that regard? WE are talking about a $600-$700,000 cost. six hundred, seven

Dickey: Yes. I have no magic figure. I did talk to Sen. Colletta and the others, I expressed and repeat publically my concern that we are atarting a little high. Now obviously the peopel in Administration are saying that they can hardly do it this cost, and I can understand it what are you paying for and what do you get? I was basing mine, you have to have some bench mark, and I asked Washington State, prior to Mr. Murphy's testimony, wnat do you have, 5 years of experience in Washington, or six?

Murphy: Actually we really got rolling in 1972, but we had started in 1971.

Dickey: Seven years. But my thought when he responded/that with the thing started there

with about $600,000, and they are still holding, which appears pretty good based on their population; so, by comparison I was hoping we could get more for less, I guess, Now how that would be done I realize you have to line for line go down. But I am stressing that I think one of the ways to do it, is that people who come in, as I understand it, into these communities to help stimulate the cleanup of the river, or the communities y, ... the problem, that there only be one or two stimulators from the State and that the rest of the volunteers, I don't think that everybody should have to be, or expect to be paid, or that the voluntters who were doing a good job in some communtties, be discouraged and say why should I go out and do this for free when across one street somebody is getting paid for this and let them do it. So I think that is a very real concern. I don't have a magic figure. I would hope that it would be less than this and somewhere, I'd say, under, we could do it for x 500 thousand, somewhere to start, and they work up. But I did stress to the sponsors and others this idea that the three of whatever they fund, I hope for those three years just from a sales point would be, would permit us to whatever growth is going to occur, and still not have to go back for seconds ..

Sturg: I wonder, have you gotten ...

Kelly: Let me ask, having spent 18 years in business Don and being Rodey as close to the Ak. polical situation and the St. government budgetary process as you are, do you reasonably expect that budget to stay at $600,000 for 3 years?

Dickey: No. Nor do they propose that in here. They say six hundred, six hundred seventy three, and I think in the 3rd year six hundred sixty

seven. And as I point out the total, I'm only using their figures, but they say it will raise six hundred sixty eight thousand the first year. We hope that there will be more business licenses attracted to share this pleasantly with us, so that we can all contribute. But, so, I guess my response would be that it appears that figure is adequate even with the three steps and I also want to reemphasize and say again that I am pleased to see and would be here to see how it turns out, but there's a 3 year self-destruct because if that starts, as we are all a little concerned, if that starts getting into millions of dollars worth of program, then I think we might have very quickly have second thoughts or other methods of skinning that same rabbit.

Stur: Any futher questions? Fine. I'll point out for the Committee. We have a little bit of a problem. Both Sen. Kelly and I should be over joining poor lonely Sen. Bradley, who's trying to run a meeting without a quarum. I wonder if I could get an indication, we've had Commissioner Mueller, who would like to speak .., are there others in the audience that wish to speak on the subject. Alright, we have a couple of more. Commissioner, would we do you; 2 optionshere. One, we could allow Sen. Rodey to continue the meeting and we would then miss it, or we could take a very brief recess, and help Sen. Bradley get a quarum and get established at an official meeting and then slip back to hear your testimony. What's your schedule?

Mueller: I don't have a schedule, Senator. ....

Sturg: Could we, ah, we'll take about a 10 minutes recess and then we'll come back to hear the additional testimony.

Dickey: Senator, could I just

Sturg: Just a moment, Mr. Dickey go ahead.

Dickey: Just a last burst of wisdom.

Sturg: Oh, my, I can hardly wait. (Laughter)

Dickey: I would hope that the self-destruct on the bill would also tie with the self-destruct on the tax. (Laughter)

Sturg: Very good. We'll be back in ten minutes. Thank you.

COMMITTEE REPORT

SENATE

1/15/79

FURTHER: Finance

Date: 2-20-79

Mr. President:

The Committee on COMMUNITY & REGIONAL AFFAIRS has had SENATE BILL NO. 6

special appropriation to Dept. of Community & Regional affairs for purchase of public works equipment for Craig & Klawock; eff. date

under consideration and (a majority of the committee) (the committee) reports it back with the following recommendations:

[X] do pass [ ] do not pass

[ ] do pass with attached amendments(s)

[ ] replace with CS for _____ [ ] same title [ ] new title

and recommends _____

[ ] AND attaches a "Letter of Intent" [ ] New Fiscal Note

[ ] reports it back without recommendation

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Between FY 77 and FY 79, mileage approved for State revenue has increased at approximately 7%. FY 80 increased at 7.5%. Therefore, it will be assumed that an average increase of 7% will continue.

If appropriations are insufficient to fund 100% for any fiscal year, a proration factor can be applied to the above amounts as, full funding was assumed in the calculation of these figures.

FY 80 State Revenue Sharing program - Approved Mileage

Public Roads	1553.32 miles x $1500 =	$ 2,329,980
Ice Roads	252.09 miles x $ 900 =	226,881
		2,556,861
Average cost-of-living adjustment @ 15%		383,529
		$ 2,940,390

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This bill will not have a fiscal impact on DOT/PF because it only updates the departmental designation from Department of Highways to Department of Transportation and Public Facilities (DOT/PF).

As requested, an estimate of the cost per mile of road maintained by DOT/PF is included. Based upon the 1981 budget request the average statewide cost per mile is $7500. Before any conclusions could be reached concerning a comparison of the cost with revenue sharing payments, an analysis of the roads, traffic, weather conditions and numerous other factors would need to be performed.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Between FY 77 and FY 79, the mileage approved for State revenue sharing has increased at the rate of 7% each year. It is assumed this trend will continue.

If the revenue sharing appropriation is insufficient to fund at 100% for any fiscal year, the proration factor can be applied to the above amounts. Full funding was assumed when these figures were prepared.

FY 79 State Revenue Sharing Program - Approved Mileage

Public Roads	1,277.8 miles x $1,500 =	$1,916,700
Ice Roads	166.84 miles x $ 900 =	150,156
		$2,066,856
Average cost-of-living adjustment @ 15%		310,028

Acquisition

A. One of the alleged benefits to accrue from the enactment of the Alaska Public Utility Commission Act was an amicable solution to the service area conflicts between competing utilities. To further this commendable objective, the League, therefore, supports legislation which would allow municipalities operating utilities to acquire the facilities of a competing utility under specific terms which would fairly compensate the competing utility.

Sewage Disposal

A. The League opposes regulations which would limit the Clean Water Act of 1977 from excluding municipalities adjacent to tidal fluctuations from the requirements of secondary treatment where the receiving waters do not merit secondary treatment for sewage effluent disposal into ocean waters.

B. The League also endorses the concept of the State of Alaska's paying up to 75% for sewage and water systems constructed by municipalities under the State of Alaska Construction Grant Program.

C. The League endorses an amendment to Federal Law which would allow the operational cost of sewage treatment facilities to receive general fund support from the State of Alaska and its municipalities.

Solid Waste

A. The League supports legislation which would authorize up to 75% of the costs of capital improvements for construction of solid waste disposal facilities by municipalities under the State of Alaska Construction Grant Program. This program shall be applicable to those facilities currently under construction at the time the Act passes.

Fresh Water

A. The League endorses amendments to federal and state regulations to permit waivers of the Fresh Water Drinking Standards.

PART VII
MUNICIPAL ELECTIONS

Majority Elections

A. The League supports legislation which would amend 29.28.040 to allow municipalities to determine, by local option, what percentage of votes cast is necessary for election to municipal office.

Gene....no offense but something more important has come up and I can't meet with you this morning.

Here are a couple of comments that may help you in deciphering the League's intent on the 40% bill.

First of all, the printed language (old SB 125) is what we would like to have introduced and passed. "A municipality may be ordinance exempt itself from the requirements of this section and provide for plurality vote for election of officials".

This would give the municipalities the right to decide for themselves if they want the 40% runoff provision that is now in state law.

It is also necessary to clarify what the 40% refers to - 40% of the votes cast or 40% of the voters voting.

For instance: In an election where candidates run at large there may be 6 people running for 3 seats, the top 3 would be elected. Let's say that 100 people voted. The 100 voters would cast 300 votes (one for each seat open). Now, does the 40% refer to the 300 votes cast or the 100 voters who cast them? It would be much more difficult to get 40% of the 300 votes cast than 40% of the 100 voters which would mean more runoffs, hence costly to the municipality.

7/31/79 to Legal Services Majority Elections .4.

Introduced: 2/4/77

Committee Substitute for Senate Bill 131 presently reflects:

1. Title and body contents of SB 342

2. $10 million G.O. Bond increase - covering solid waste facilities, plus new wording when relating to same.

3. $ 6 million G.O. Bond increase - raising State share from 50% to 75%

Committee Substitute for Senate Bill 436 presently reflects:

1. Page 1, line 10, section 1 - new wording (per Dept. Environmental Conservation request) to incorporate the raising of the State share from 50% to 75%

2. Amending typewriter error, page 1, line 28 to read (d) instead of (e)

3. Page 2, Line 21, Section 5 - adding a new paragraph stating "solid waste" definition as stated in HB 353, (per D.E.C. request and in answer to Mr. Baldwin's concern, our bill drafter.)

Alaska MUNICIPAL League

TELEPHONES
(907) 586-1325
586-6526

204 N. FRANKLIN ST.
JUNEAU, ALASKA 99801

The Alaska Municipal League urges amendment of CSSB 131 to provide for up to 75% state funding of municipal water and sewer projects that are not already receiving 75% EPA funding.

Currently EPA participates only in sewer interceptors and treatment plants. Sewerage collection and water distribution systems do not receive federal funding except for a few projects that have small EDA grants of 10%.

Equity: The state increasing the percentage of state support for those projects will go a long way toward reducing the inequitable burden that property owners must bear in paying for necessary basic water and sewer services. As it stands now, the property owner pays anywhere from 12.5% to 50%, depending on the nature of the project.

Relief for Property owners and Tax Payers: As I'm sure you are aware, the local share of water and sewer projects is paid by assessments on local property. Increasing the state share will provide direct relief to property owners and tax payers by reducing local improvement district assessments.

Price of Land: A big issue for the last couple of years has been the high cost of land. One reason for the high prices in developable suburban areas is the high cost of installing water and sewer systems. Increasing state participation in providing those systems will help to lower the cost of making land available for use.

I realize there is a problem with language in the bill to incorporate the proposed change. Because we are not advocating increasing the state share on EPA funded projects, we cannot simply change the 50% in the current law to 75%. I'm sure, however, if the committee accepts the concept, the professional bill drafters will be able to find acceptable language.

Possible questions:

1. What is the Village Safe Water Plan? What communities are involved?

   What is evaluation criteria? Past Projects, etc.

   Standards used for design decisions? Life cycle, maintenance costs? other ?

   Initial start with the communities - procedure? Options/alternatives presented to communities?

2. Water Sewer facilities construction grants - who does assessment on new systems? Community? Dept.?

Does Dept. check with communities, on their land use plan? Does Dept. follow communities land use plan? Exceptions?

How thoroughly are options to traditional (pipe) systems explored?

How many other communities does Dept. feel might end up in Skagway's situation? What is electrical percentage estimated for Sitka's new plant?

What happens if secondary treatment requirement waivers are not granted? How many waivers have been requested?

Dept. seems to have attitude - communities design,(if money available,)they build, or Dept. will help their design and communities can build..

Other Fed. agencies who might possibly be involved w/ Fed funding?

Environmental Development Administration?

Farmer's Home Adm.?

Overview / Dept. Environmental Conservation

What determines a community is eligible for Fed. funds for water/sewer grants? Mostly if collector systems are not involved.

Federally funded programs - have priorities
State and community programs - no priority list

If communities are eligible for Fed. grants - percentage breakdown:
- 75 % - Federal money
- 12 1/2 % - State Money
- 12 1/2 % - Local Participation

If just State/Community: 50 % State // 50 % Community = funding

Fed. requirements: Community must put in water/sewer plant with both primary and secondary facilities...
(3rd level (tursory?) gets 85 % Fed. funds if communities desire that phase.)
water/sewer mandatory State law - 1977??

Communities can get waivers depending on certain conditions for secondary facility. None have yet been granted, but applications are pending.

Federal agency: Environmental Protection Agency (EPA)
Economic Development Admin.

CONSIDER AMENDMENT TO COMMITTEE SUBSTITUTE
(50-75% increase of state share)
Both Dept. of DEC and Ginny Chitwood, AML will speak

Testimony of

Ernst W. Mueller
Commissioner of Environmental Conservation

On Senate Bill 342

Before the

Senate Committee on Community and Regional Affairs

February 12, 1980

Now SB 131

I am Ernst W. Mueller, Commissioner, Department of Environmental Conservation. I am here today to testify on SB 342, for the provision of bond funds for the award of grants to build water and sewerage facilities throughout the State of Alaska. These funds are administered by my Department in the Facility Construction and Operation Section. Two programs are included in the bond bill:

(1) Construction grants, which are available only to incorporated municipalities. Fifty percent of non-federally financed costs can be granted. Costs of operation and maintenance support of water and sewerage facilities are not grant eligible under this program.

(2) Village Safe Water. Grants under this program are available with populations ranging between 25 and 600, or to second class cities. One hundred percent funding is available for construction. Costs of operation, and maintenance support of facilities are grant eligible, these funds are included in the Department's operating budget.

The capital budget submittal fully describes these programs and a detailed delineation of the $25.520 million bond request. The primary purpose of the program is to improve sanitation facilities, improve public health and protect the quality of the environment. A secondary benefit results from stimulation of the local economy due to employment opportunities generated during construction. In the case of the VSW projects, which are performed under force account by the villages, valuable construction and management skills are imparted to the community.

This program differs from other State capital construction programs in that the Department has no firmly established set of projects at the time the bond funds are requested, or even when approved by the voters. Construction grants projects are developed by the municipal grantee in accordance with local planning requirements. They proceed at a pace selected by municipalities. The Department is often unaware of the specific project until an application is received. Therefore, to meet continually changing needs, it is necessary to have adequate funds available upon demand. Of course, the Department has performed a statewide needs assessment to provide us with basic information of sewage and water supply requirements.

In order to assure that there are adequate funds available, the Department projects past bond obligation rates and then adds an

inflation factor to forecast future needs. This process is explained in the capital budget submittal. To date, this method has been very accurate. The $23.0 million request is nearly identical with the need forecast two years ago. Having an adequate supply of bond funds available allows us to meet all grantee requests without requiring us to determine which communities can construct facilities when there are not funds available for all communities' needs. The program can run on a first-come, first-served basis.

Having adequate funds also has a secondary benefit in that the Department's administrative procedures and costs can be kept lower, since we are not required to establish a detailed ranking of priorities among the communities. If priority allocation of funds was necessary, the Department would be forced to require additional paper work from the grantee to enable us to make these decisions.

The VSW needs are also projected, based on past expenses for building a standard type of facility. The actual facilities to be built have not yet been determined. However, the bush caucus has been provided with a priority list of projects detailing in which communities the Department feels the greatest public health needs exist. The $2.520 million requested for the VSW Program would fund approximately three new projects. This

amount is suggested due to the limitations of our existing small staff to handle new projects. Since the VSW projects require a far greater amount of staff work per project than does the construction grants program, we are limited to approximately two new projects per engineer. If the Legislature chooses to fund more than the first group of projects listed on the priority list, the Department would like the opportunity to submit an additional fiscal note to assure that proper staffing becomes available.

The Department favors SB 342 for $25.520 million if there are no changes in AS 46.03.030. If AS 46.03.030 is amended by either adding solid waste facilities or changing the percentage of grant funding, the dollar amount in SB 342 needs to be increased, so that the projects can be funded. The eligibility of solid waste facilities would require an additional $8-$10 million in SB 342. In addition, an appropriation of $2.5-$3 million to cover the time period July 1, 1980 to December 31, 1980 would be required, so that communities would have money available immediately for solid waste purposes. A fiscal note has been prepared showing an increased need to hire more staff for the operation of the expanded grants program. This fiscal note requests a total of $82,700 to cover the salaries and support costs of an engineering position and an administrative assistant. The Department endorses the concept of adding solid waste facilities to our grants program if adequate funding is provided.

Increasing the percentage of grant participation above the current level of 50 percent is a serious concern of the Department. It has been our experience that as the grantee's percentage of project contribution is lowered, there is often a corresponding decrease in the level of active project participation by the grantee. The 50 percent level of funding appears to be adequate to ensure that the grantee administers this project properly. It is also probable that should State grants be increased to too high a percentage of total project cost, municipalities would have little interest in applying for federal grants (which require more paper work). The EPA provides approximately $18-20 million per year for sewerage system projects in 75 percent grants. The State then provides an additional 12.5 percent for a total of 87.5 percent in grant funding. If, for example, the State grant percentage was raised from 50 percent, there would be a strong likelihood that some communities would settle for a lesser total grant to avoid EPA grant requirements. An immediately increased annual demand of $18-$20 million on the State bond funds could result.

Should the Legislature choose to alter either the grant percentage or include solid waste facilities as grant eligible, a corresponding increase in the amount of the bond proposition will be required if the same number of projects are to be funded in the future.

Thank you for this opportunity to provide comments on SB 342. I would be glad to provide any further information you may need.

MEMORANDUM March 17, 1980

SUBJECT: CSSB 131 - G. O. Bonds for sewers

TO: Senator Arliss Sturgulewski, Chairman
Senate Community and Regional Affairs
Committee

FROM: Billy G. Berrier BGB
Director
Division of Legal Services

You have indicated that the Department of Environmental Conservation has indicated it would prefer deletion of the word "construction" on lines 9, 13, 21, and 25 of page 1, and lines 4, 18, and 23 of page 2, and replacement by the term "capital improvements".

I do not see any problem this would cause.

March 28, 1980

James A. Van Altvorst
City Manager
City of Ketchikan
Box 7300
Ketchikan, Alaska 99901

Dear Mr. Van Altvorst:

Thank you very much for your letter of support for CSSB 436, "An Act relating to grants for water supply, sewerage systems and solid waste facilities" and CSSB 131, "An Act providing for the issuance of general obligation bonds in the amount of $41,520,000, for the purpose of paying the costs of water and sewerage system and solid waste facility construction." Your letter is right to the point and I fully concur with your comments.

As you know, I sit as Chairman of the Senate Community and Regional Affairs Committee. Substantial work was done by the committee in conjunction with the Department of Environmental Conservation on this legislation. The legislation does address the solid waste disposal problem which creates concerns in so many areas of Alaska as well as giving incentive for solid waste recovery systems. Please be assured that I will support this bill before the Senate Finance Committee. I will make a copy of your letter available to the staff of Senator John Sackett. Thank you for sharing.

Sincerely,

Arliss Sturgulewski

Arliss Sturgulewski
Senator, District 10-H

cc: Senator Sackett

STATE OF ALASKA
DEPT. OF ENVIRONMENTAL CONSERVATION
JAY S. HAMMOND, GOVERNOR
POUCH O – JUNEAU 99811

The Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
Juneau, Alaska 99811

February 26, 1980

Dear Senator Sturgulewski:

As presented during the committee hearing on S.B. 436, February 19, 1980, the Department of Environmental Conservation has a concern regarding the substitution of the word "construction" for "capital improvements" in the title and body of the bill. In the past, this program has funded items such as water delivery vehicles and honey bucket trucks, and we would wish to continue this practice. These items may not be included in a definition of construction but could certainly be included as capital improvements.

We would appreciate a statement of legislative intent that the wording substitution does not modify the Department's practice of funding some non-construction costs, particularly rolling stock. A legal opinion obtained from the Director of Legal Services stating that no problem exists with the substitute wording would satisfy our concerns. If such an opinion is obtained, we would appreciate it being forwarded with the bill and fiscal note to the Senate Finance Committee.

Sincerely,

Ernst W. Mueller
Commissioner

INTRODUCTION OF BILLS (Senate)(cont'd)

Bond Issue (water & sewer systems)

SENATE BILL NO. 342, by the Rules Committee by request of the Governor. Provides for the issuance of $25,520,000 in general obligation bonds to pay cost of capital improvement for water and sewer systems. Funds will be allocated to Village safe water construction grants ($2,520,000) and urban water and sewer construction grants ($23,000,000). Provides amount withdrawn from the Public Facility Planning Fund for advance planning shall be reimbursed from proceeds of bond sale. Provides question be placed before voters at next general election. Effective immediately.

Introduced January 18 and referred to HE&SS and Finance.

Other Action on Bills

Bond Issue (water & sewer systems)

SENATE BILL NO. 342 (see p. 16). January 21 the Health, Education & Social Services Committee referral waived at the request of Senator Hackney, Chairman of HE&SS. Referred to Community & Regional Affairs, then to Finance.

STATE
of ALASKA

MEMORANDUM

TO: Mr. Keith Specking
Legislative Assistant
Office of the Governor

DATE: February 26, 1979

FILE NO:

TELEPHONE NO:

FROM: Ernst W. Mueller
Commissioner
Department of Environmental Conservation

SUBJECT: SB 131
Proposed 1979 Sewerage Construction Funds

The enactment of this bill would produce inequities in the funding process for Alaskan communities constructing water and sewerage systems.

Some communities would be eligible for the 90 percent funding provided through this bill; others would remain under AS 46.03.030, which provides for funding "up to 50 percent of the estimated cost not borne by the federal government."

If the formula for construction grants is to be modified, it should be done by revising the statute, to assure fair treatment of all Alaskan communities.

We believe that localities should bear a meaningful part of the cost of construction of these facilities. This is one way to ensure the local need for and interest in capital improvements.

Further inequities may result from the fact that SB 131 authorizes funding only for sewerage systems. Under AS 46.03.030, communities are eligible for grants for construction of both water and sewerage systems.

At present, federal construction grants are provided by the United States Public Health Service, the U. S. Department of Housing and Urban Development, the Farmers Home Administration, the U.S. Economic Development Administration, and the Coastal Energy Impact Program. Through federally-funded programs, the State is currently able to provide up to as much as 87.5 percent of the costs for sewerage and water systems.

We recommend that:

1. introduction of this bill be held over to the 1980 session to allow consideration with other bond issues; and also when additional information is needed for new projects in 1980-1982.

2. the match ratio be changed to (a) the lesser of 50 percent of total cost; or (b) 50 percent of the non-federal project costs (consistent with AS 46.03.030); and

3. funding be allowed for both water and sewerage systems.

Title 46. Water, Air and Environmental Conservation.

SB 131

Chapter 03. Environmental Conservation.

Article 2. Department of Environmental Conservation.

Section
20. Powers of the department
30. Grants and loans for water supply and sewerage systems

Sec. 46.03.020. Powers of the department. The department may

(10) adopt regulations necessary to effectuate the purposes of this chapter, including, by way of example and not limitation, regulations providing for

(A) control, prevention and abatement of air, water, or land or subsurface land pollution;

(B) safeguard standards for petroleum and natural gas pipeline construction, operation, modification or alteration;

(C) protection of public water supplies by establishing minimum drinking water standards, and standards for the construction, improvement, and maintenance of public water supply systems;

(D) collection and disposal of sewage and industrial waste;

(E) collection and disposal of garbage, refuse, and other discarded solid materials from industrial, commercial, agricultural and community activities or operations;

(F) Repealed by § 12 ch 172 SLA 1978.

(G) control of pesticides;

(H) such other purposes as may be required for the implementation of the policy declared in § 10 of this chapter;
(am § 12 ch 172 SLA 1978)

Effect of amendments.
The 1978 amendment, in paragraph (10), repealed subparagraph (F), which read "control of radiation sources to prohibit and prevent unnecessary radiation."

As the rest of the section was not affected by the amendment, it is not set out.

Editor's note. — Section 10, ch. 172, SLA 1978, provides: "Regulations adopted under authority of statutes repealed or amended by this Act shall remain in effect until repealed by the Department of Environmental Conservation in consultation with the Department of Health and Social Services."

Sec. 46.03.030. Grants and loans for water supply and sewerage systems. (a) Repealed by § 19 ch 220 SLA 1976.

(b) The department may grant to a municipality, as funds are available, up to the lesser of 50 per cent of the eligible cost or 50 per cent of the eligible cost not financed by the federal government, for public water supply, treatment and distribution systems and public sewage collection, treatment and discharge facilities for which construction has not commenced on or before June 21, 1976. The eligible cost of a project or portions of a project will be as determined by the federal agency granting the most monetary assistance. On projects or portions of projects, for which federal participation is not available, eligible costs will be determined by the department in accordance with (d) of this section. Projects shall be constructed in accordance with plans and specifications approved by the department.

(c) There is a water supply and sewerage systems fund created in the department to carry out the purposes of this section.

(d) When not otherwise defined by a federal agency for the purposes of (b) of this section, "eligible costs" includes, in addition to costs directly related to the project, the sum total of all costs of financing and carrying out the project. These include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property and the acquisition of machinery and equipment as may be necessary in connection with the project; an allocable portion of the administrative and operating expenses of the grantee; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of other items, including any indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary. (§ 3 ch 120 SLA 1971; am §§ 2, 19 ch 220 SLA 1976; am §§ 30, 31 ch 168 SLA 1978)

Effect of amendment.
The 1978 amendment added "in accordance with (d) of this section" to the end of the third sentence of subsection (b) and added subsection (d).

Presented by
Daniel Ogg / Deputy mayor
Kodiak

The undersigned residents of borough service district #1 hereby petition the legislature of the state of Alaska to fund 90% of the non federal portion of the cost of water and sewer service to this district based on the fact that the health and environmental proction of all citizens is involved.

For an Act entitled: "An Act providing for the issuance of general obligation bonds in the amount of $35,520,000 for the purpose of paying the cost of capital improvements for water and sewer and solid waste facilities systems; and providing for an effective date."

Introduced: 2/12/79
Referred: Community & Regional Affairs and Finance

IN THE SENATE BY KERTTULA

SCS SENATE BILL NO. 131

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act providing for the issuance of general obligation bonds in the amount of ~~$8,000,000~~ #35,520,000 for the purpose of paying the cost of sewerage systems construction; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. For the purpose of paying the cost of capital improvements for water ~~and~~ sewer and solid waste facilities systems, general obligation bonds of the state in the principal amount of not more than #35 ~~$8~~,520,000 shall be issued and sold. The full faith, credit and resources of the state are pledged to the payment of the principal of and interest and redemption premium, if any, on these bonds. These bonds shall be issued under the provisions of AS 37.15 as those provisions read at the time of issuance.

* Sec. 2. If the issuance of these bonds is authorized by the qualified voters of the state, a special fund of the state to be known as the "1980 Water Supply, and Sewerage Systems and solid waste facilities fund Fund" shall be established, to which shall be credited the proceeds of the sale of bonds described in Sec. 1 of this Act except for accrued interest and premiums. There is appropriated from the "1980 Water Supply, ~~and~~ Sewerage Systems ~~Fund~~ and Solid Waste Facilities fund to the Department of Environmental Conservation the amount of #35 $2,520,000, allocated in accordance with the following projects and estimates:

	Project	Location	Amount
(1)	Village safe water construction grants	Statewide	$ 2,520,000

(2) ~~Urban~~ Municipal water, ~~and~~ sewer, and solid waste facilities con-

struction grants Statewide ~~23,000,000~~ 33,000,000

* Sec. 3. If the issuance of these bonds is authorized by the qualified voters of the state, the amount of $89,400, or as much of that amount as is found necessary is appropriated from the general fund of the state to the state bond committee to carry out the provisions of this Act and to pay expenses incident to the sale and issuance of the bonds authorized in this Act. The amounts expended from the appropriation authorized by this section shall be reimbursed to the general fund from the proceeds of the sale of the bonds authorized by this Act.

* Sec. 4. The amount withdrawn from the public facility planning fund for the purpose of advance planning for the improvements financed under this Act shall be reimbursed from the proceeds of the sale of bonds authorized by this Act.

* Sec. 5. The question whether the bonds authorized in this Act are to be issued shall be submitted to the qualified voters of the state at the next general election and shall read substantially as follows:

Proposition

State General Obligation Water Supply, ~~and~~ Sewerage ~~Systems~~ & Solid Waste facilities

Bonds ~~$25,520,000~~ $35,

Shall the State of Alaska issue its general obligation bonds in the principal amount of not more than $~~25~~35,520,000 for the purpose of paying the cost of capital improvements for water, ~~and~~ sewerage and solid waste ~~systems~~ facilities.

Bonds Yes [ ]

Bonds No [ ]

* Sec. 6. This Act takes effect immediately in accordance with AS 01.-10.070(c).

The Honorable Arliss Sturgulewski
Chairman
Senate Community and Regional
Affairs Committee
Room 100 - Assembly Building
Juneau, AK 99801

Dear Senator Sturgulewski:

SENATE BILL NO. 132

Senate Bill No. 132, an Act relating to the refund of raw fish tax receipts to local government, was introduced in the Senate on February 12, 1979 and was referred to the Senate Community & Regional Affairs and Finance Committees.

For the consideration of the Senate Community & Regional Affairs Committee, I am enclosing a copy of a Fiscal Note prepared by Mr. P. A. Wall, Director, Administrative Services Division, Department of Revenue concerning the proposed legislation.

Sincerely,

R. D. Stevenson
Special Assistant

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

CS for Senate Bill 134 calls for $106,327 to be appropriated to make grants to the following recipients who did not receive State Revenue Sharing due to late submission of their applications. The funding listed is prorated at the State Revenue Sharing level of 88.712%.

City of Lower Kalskag	$11,275
City of Seward	86,165
City of Upper Kalskag	4,633
Copper Center VFD	3,313
Illiamna VFD	941

These figures represent the maximum amount of funding each applicant may receive upon verification of eligibility.

FEDERAL FUNDS						
OTHER (Specify)						

POSITIONS

FULL TIME	ø	ø	ø	ø	ø	ø
PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Authority for home rule or general law municipalities to issue revenue bonds will potentially saturate the market for these issues and bring all tax exempt revenue bonding under critical scrutiny by the United States Treasury. Such issues would further be in direct competition with similar state issues. It is further questionable that home rule or general law municipalities could market such debt at favorable rates on an individual basis and as such could potentially require state assistance at some time in the future.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

There is no fiscal impact to the state.

The bill impairs the equity of local assessment process by subsidizing current property owners and by penalizing new owners.

POSITIONS

FULL TIME		0				
PART TIME		0				
TEMPORARY		0				

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

According to the Federal Veterans Administration, there are 468 veterans with over 50% disability. Assuming that 25% of those are 117 renters and another 20 are 65 and already exempt, the following computations are derived:

331 (Homeowners) times $558 (average senior citizen saving) = 184,698

117 (Renters) times $184 (average senior citizen renter reimbursement) = 21,528

448 TOTAL $206,226

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The only information available from the Federal Veterans Administration was that there are approximately 200 veterans disabled 40% or more within the State. We have estimated based on total 200 being over 50% and that 3/4 of those are homeowners and 1/4 are renters.

150 homeowners @ $553 (average senior citizen homeowner savings) = $83,700

50 renters @ $184 (average senior citizen renters reimbursement) = 9,200

Total $92,900

Additional cost is for forms printing, processing and refunds processing.

SENATE JOURNAL

ALASKA STATE LEGISLATURE

ELEVENTH LEGISLATURE - FIRST SESSION

JUNEAU, ALASKA Tuesday April 10, 1979

Eighty-sixth Day

Pursuant to adjournment, the Senate was called to order by President Tillion at 10:02 a.m.

The roll call showed eighteen members present. Senators Ray and Sackett were absent.

The prayer was offered by the Chaplain, Pastor John Lenker of the Church of the Nazarene. Senator Kerttula moved and asked unanimous consent that the prayer be spread in the journal. Without objection, it was so ordered and the prayer appears as follows:

"Almighty God of all:

We recognize Your touch in the tiny spring blossoms, in the beautiful snowcapped mountains that surround this valley, in the myriad of stars that stud the vast expanse of the universe. We come to You with a sense of awe, but also with the knowledge that You are not only the great Creator, but also the Father of mankind, our Heavenly Father, aware and concerned with the affairs of men. May on this day, the wisdom and purpose of God direct the minds in making decisions which this Senate shall be called upon to make.

Help us in the spirit of our Lord's prayer to say, 'Our Father, which art in heaven, Hallowed be Thy name. Thy Kingdom come, Thy will be done on earth as it is in heaven. Give us this day our daily bread, and forgive us our trespasses as we forgive those who trespass against us. Lead us not into temptation but deliver us from evil, for Thine is the kingdom, and the power, and the glory, forever'.

Amen."

Senator Colletta moved and asked unanimous consent that the journal for the eighty-fifth legislative day be approved as certified. Without objection, it was so ordered.

MESSAGES FROM THE GOVERNOR

April 4, 1979

The Nonorable Clem Tillion
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Mr. President:

Please add to your list of Alaskans to be confirmed for appointments to boards and commissions the following:

STATE COMMISSION FOR HUMAN RIGHTS

*Diana Snowden, SRA Box 1735-M, Anchorage, term expiring 1/31/84.

BOARD OF NURSING

*Norma J. Frank, R.N., Box 4229, Mt. Edgecumbe, term expiring 3/31/84.

Sincerely,

Jay S. Hammond
Governor

*Reappointed

President Tillion referred the above appointments for confirmation to the Health, Education and Social Services Committee.

MESSAGES FROM THE HOUSE

Message of April 9 was read, stating the House has concurred in the Senate amendment to HOUSE BILL NO. 45 (powers of the Alaska Legislative Council and the Legislative Budget and Audit Committee), thus adopting: SCS HB 45

SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 45 (Alaska Legislative Council and the Legislative Budget and Audit Committee)

Message of April 10 was read, stating the House has passed the following and transmitting for consideration:

FIRST READING AND REFERENCE OF HOUSE RESOLUTIONS

COMMITTEE SUBSTITUTE FOR HOUSE CONCURRENT RESOLUTION NO. 20 amended, by the Special Gas Pipeline Financing Committee, CS HCR 20 am

Relating to the financial and Alaska impact plan submitted by the Alaska Gas Pipeline Financing Authority,

was read the first time and referred to the Finance Committee.

FIRST READING AND REFERENCE OF HOUSE BILLS

HOUSE BILL NO. 438 amended, by the Special Gas Pipeline Financing Committee, entitled: HB 438 am

"An Act relating to submission of a financial and Alaska impact plan by the Alaska Gas Pipeline Financing Authority; and providing for an effective date."

was read the first time and referred to the Finance Committee.

STANDING COMMITTEE REPORTS

SB 65 The Health, Education and Social Services Committee considered SENATE BILL NO. 65 (consolidating and strengthening the state's drug laws) and recommends it be replaced with COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 65. The committee further attaches a letter of recommendation to the Judiciary Committee. Senator Hackney, Chairman and Senators Ferguson, Sturgulewski, Fahrenkamp and Colletta signed "do pass if amended."

SENATE BILL NO. 65 was referred to the Judiciary Committee.

Letter of recommendations to the Judiciary Committee accompanying the above bill follows:

April 9, 1979

Robert Ziegler, Chairman
Senate Judiciary Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Chairman Ziegler,

The Senate Health, Education and Social Services Committee, in its review of SB 65, has red flagged the following sections of SB 65 for close examination by the Senate Judiciary Committee: sections 14 - 18.

Section 14 would require that an individual claiming exemption from the provisions of this bill would bear the burden of proof in proving his exemption. This Committee requests that Judiciary address the constitutionality of placing the burden of proof on the claimant as opposed to placing the burden of proof on the state to prove that the individual is not exempt.

Section 15 divides controlled substances into five categories similar to categories established under federal law. However, the classification format that the state intends to adopt through this bill, i.e. Class A, Class B, etc., varies from the federal government's in that the federal government's format is based on a numerical system of classification, i.e. Schedule I, Schedule II, etc. In order to avoid problems that might surface as a result of using dissimilar classification formats, this Committee requests that Judiciary consider the merits of adopting a system of classification that will coincide with the classification format used by the federal government.

SB 65

Sections 16, 17, and 18. This Committee requests that Judiciary take a look at the conformity between the penalty sections of this bill and the penalities prescribed for similar offenses in the Alaska Criminal Code.

Sincerely,

Glenn Hackney
Chairman

SB 53

The Rules Committee considered SENATE BILL NO. 53 (special appropriation to Office of the Governor for state's efforts concerning federal withdrawal of Alaska land) and recommends it be replaced with COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 53 (Finance) (page 761) and further recommends it be placed on the April 10 calendar. Senator Colletta, Chairman and Senators Hohman, Tillion and Sumner signed "do pass and place on April 10 calendar". Senator Ziegler signed "place on April 10 calendar".

SENATE BILL NO. 53 appears on today's calendar.

HB 44

The Rules Committee considered HOUSE BILL NO. 44 (supplemental appropriations to the Legislative Affairs Agency) and recommends it be replaced with SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 44 and further recommends it be placed on the April 10 calendar. Senator Colletta, Chairman, signed "do pass and place on April 10 calendar". Senators Hohman, Sumner and Ziegler signed "place on the April 10 calendar".

HOUSE BILL NO. 44 appears on today's calendar.

INTRODUCTION AND REFERENCE OF SENATE RESOLUTIONS

SR 8

SENATE RESOLUTION NO. 8 by Senators Colletta and Stimson,

Relating to geothermal resources,

was read the first time and referred to the Resources Committee.

SJR 32 SENATE JOINT RESOLUTION NO. 32 by Senators Kelly and Kerttula,

Expressing concern over the reported persecution of members of the Baha'i religious community in Iran,

was read the first time and referred to the State Affairs Committee.

Senator Kerttula moved and asked unanimous consent that the Senate recess to a call of the Chair for the purpose of a Democratic caucus. Without objection, the Senate recessed at 10:14 a.m.

AFTER RECESS

The Senate reconvened at 11:00 a.m.

CONSIDERATION OF THE CALENDAR

SECOND READING OF SENATE BILLS

SB 53 SENATE BILL NO. 53 (special appropriation to the Office of the Governor for the state's efforts concerning federal withdrawal of Alaska land) was read the second time.

CS SB 53 (Fin) Senator Sackett moved and asked unanimous consent for the adoption of the Finance Committee Substitute offered on page 761. Without objection, COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 53 (Finance) was adopted.

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 53 (Finance) (appropriating for the operating and capital expenses of the state government) was read the second time.

Senator Colletta moved and asked unanimous consent that the Rules be suspended and COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 53 (Finance) be considered engrossed, advanced to third reading and placed on final passage. Without objection, it was so ordered.

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 53 (Finance) was read the third time.

CS SB 53 (Fin)

The question being: "Shall COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 53 (Finance) (appropriating for the operating and capital expenses of the state government) pass the Senate?" The roll was taken with the following result:

Yeas: 30 Bennett, Bradley, Colletta, Dankworth, Fahrenkamp, Ferguson, Hackney, Hohman, Kelly, Kerttula, Meland, Mulcahy, Ray, Rodey, Sackett, Stimson, Sturgulewski, Sumner, Tillion, Ziegler

Nays: 0

and so, COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 53 (Finance) passed the Senate.

Senator Colletta moved and asked unanimous consent that the roll call on the passage of the above bill be considered the roll call on the effective date clause. Without objection, it was so ordered.

Senator Colletta gave notice of reconsideration on COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 53 (Finance) and moved and asked unanimous consent that it be taken up at this time. Without objection, it was so ordered.

SENATE BILLS IN THIRD READING

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 53 (Finance) was before the Senate at this time on reconsideration.

The question to be reconsidered is: "Shall COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 53 (Finance) (appropriating for the operating and capital expenses of the state government) pass the Senate?" The roll was taken with the following result:

CS SB 53 (Fin) Yeas: 20 Bennett, Bradley, Colletta, Dankworth, Fahrenkamp, Ferguson, Hackney, Hohman, Kelly, Kerttula, Meland, Mulcahy, Ray, Rodey, Sackett, Stimson, Sturgulewski, Summer, Tillion, Ziegler

Nays: 0

and so, COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 53 (Fin) passed the Senate on reconsideration.

Senator Colletta moved and asked unanimous consent that the roll call on the passage of the above bill be considered the roll call on the effective date clause. Without objection, it was so ordered.

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 53 (Finance) was referred to the Secretary for engrossment.

SB 201 SENATE BILL NO. 201 (relating to the salaries of elected municipal officials) was read the second time.

CS SB 201 Senator Sturgulewski moved and asked unanimous consent for the adoption of the Rules Committee Substitute offered on page 763. Without objection, COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 201 was adopted.

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 201 was read the second time.

Senator Colletta moved and asked unanimous consent that the Rules be suspended and COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 201 be considered engrossed, advanced to third reading and placed on final passage. Without objection, it was so ordered.

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 201 was read the third time.

The question being: "Shall COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 201 (relating to the salaries of elected municipal officials) pass the Senate?" The roll was taken with the following result: CS SB 201

Yeas: 20 Bennett, Bradley, Colletta, Dankworth, Fahrenkamp, Ferguson, Hackney, Hohman, Kelly, Kerttula, Meland, Mulcahy, Ray, Rodey, Sackett, Stimson, Sturgulewski, Sumner, Tillion, Ziegler

Nays: 0

and so, COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 201 passed the Senate and was referred to the Secretary for engrossment.

SECOND READING OF HOUSE BILLS

HOUSE BILL NO. 44 (supplemental appropriations to the Legislative Affairs Agency) was read the second time. HB 44

Senator Hohman moved and asked unanimous consent for the adoption of the Rules Senate Committee Substitute offered today. Without objection, SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 44 was adopted. SCS HB 44

SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 44 was read the second time.

Senator Colletta moved and asked unanimous consent that the Rules be suspended and SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 44 be considered engrossed, advanced to third reading and placed on final passage. Without objection, it was so ordered.

SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 44 was read the third time.

SCS HB 44 The question being: "Shall SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 44 (supplemental appropriations to the Legislative Affairs Agency) pass the Senate?" The roll was taken with the following result:

Yeas:	20	Bennett, Bradley, Colletta, Dankworth, Fahrenkamp, Ferguson, Hackney, Hohman, Kelly, Kerttula, Meland, Mulcahy, Ray, Rodey, Sackett, Stimson, Sturgulewski, Sumner, Tillion, Ziegler
Nays:	0	

and so, SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 44 passed the Senate.

Senator Colletta moved and asked unanimous consent that the roll call on the passage of the above bill be considered the roll call on the effective date clause. Without objection, it was so ordered.

SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 44 was referred to the Secretary for engrossment.

CS HB 211 am COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 211 amended (public elementary and secondary education) was read the second time.

Senator Colletta moved and asked unanimous consent that the Rules be suspended and COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 211 amended be advanced to third reading and placed on final passage. Without objection, it was so ordered.

COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 211 amended was read the third time.

The question being: "Shall COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 211 amended (public elementary and secondary education) pass the Senate?" The roll was taken with the following result:

Yeas	19	Bennett, Bradley, Colletta, Dankworth, Fahrenkamp, Ferguson, Hackney, Kelly, Kerttula, Meland, Mulcahy, Ray, Rodey, Sackett, Stimson, Sturgulewski, Summer, Tillion, Ziegler	CS HB 211 am
Nays:	0		
Absent:	1	Coleman	

and so, COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 211 amended passed the Senate.

Senator Colletta moved and asked unanimous consent that the roll call on the passage of the above bill be considered the roll call on Section 8. Without objection, it was so ordered.

Senator Colletta moved and asked unanimous consent that the roll call on the passage of the above bill be considered the roll call on Section 9. Without objection, it was so ordered.

COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 211 amended was signed by the President and Secretary and returned to the House.

ENGROSSMENT AND ENROLLMENT

MEMORANDUM

March 6, 1979

SUBJECT: SB 216 - Cultural Facilities (W.O. #6724)

TO: The Honorable Arliss Sturgulewski

FROM: John Williams
Policy Analyst

You have asked that we comment on the effect and equity of the formula provided in SB 216, an Act authorizing state aid to municipalities for the construction and development of cultural facilities. We submit the following information and comment.

Summary

Property value is generally a reasonable indicator to use to determine relative abilities of municipalities to pay for services. If only one indicator were to be used, especially considering the relative ease of gathering property value information and of verifying the validity of the data, it is probably the best. "Assessed" valuation is generally not as good an indicator as "full and true" value, in that full and true values consider optional exemptions and variances from market value. The formula is silent on state assessed oil and gas properties (AS 43.56). We assume that oil and gas properties are to be used in calculating the state average assessed valuation. If so, the use of assessed as compared to full and true values for non oil and gas properties will tend to increase the relative importance of state assessed property. Lastly, the use of the variable base percentage (10 percent for the smallest communities and 30 percent for the largest) will tend to increase the differential between small community and large community contributions, since more infrastructure and thus more tax base is generally attributed to larger communities.

Property Value as Ability to Pay Indicator

The formula contribution varies according to the relation of the local property value to the state-wide average. Property value is thus being used as an indicator of the "wealth" of each community. Wealth varies from income in that income is realized in the present, while wealth is previous income which has been invested in any number of ways, including property, stocks and bonds, jewelry, precious metals, etc.

Taxes are generally paid from income and not from wealth. However, it can be argued that local governments may not tax income, and therefore property value is a better single indicator of ability to pay.

Assuming that the municipal share of the cost of the cultural facilities will generally be financed with municipal bonds, debt capacity should be discussed. Debt capacity is a function generally of municipal population and property value. Rules of thumb used to estimate debt capacity by the municipal bond bank are $2,000 per capita or 15 percent of assessed valuation. Some cities (especially Petersburg and Klawock) are at or near the maximum, while others are not near their debt limits. While debt load and debt capacity are necessarily major considerations of the local governments, it would seem that the formula adequately considers debt capacity, both via the use of property value and the differential "contribution percentage" which increases with population.

Assessed Versus Full and True Property Valuation

The bill provides for the use of assessed valuations in the formula. Assessed values do not include optional municipal exemptions, including personal property, the first $10,000 of residential property, fishing vessels, etc. It also may vary to different degrees from the market value of the assessed property.

The state assessor is presently directed to evaluate local assessments and to adjust them to full and true property values (AS 29.53.060). Full and true values are a much improved indicator when comparing municipal wealth, especially when property value is the only indicator.

State Assessed (Oil and Gas) Property

AS 43.56 provides for state assessment of oil and gas properties. Oil and gas properties constitute nearly 52 percent of the total property value in the state (Alaska Taxable 1978), and thus their inclusion or exclusion is significant. Since oil and gas property that is located within a municipal boundary is taxable by that municipality (and municipal property taxes are deducted from state property tax liability), it would seem reasonable to include these properties. On the other hand, much of the Alaska pipeline and some other oil properties are located within the unorganized borough and are thus not taxed by local governments. We mention this for your consideration, but offer no opinion as to the merits of the partial exclusion of oil and gas property when determining the state property value base utilized in the formula.

Contribution Percentage Base Differential

The formula, by using a quotient which relates local property value to a state average property value base, generally shifts more of the construction cost to the state for relatively poor municipalities and the reverse for relatively wealthy municipalities (although we note that cities that

have property values in excess of the state average are protected from paying greater than the base percentage contribution rate). The use of a variable percentage contribution base is a significant divergence from the basic philosophy of "from those according to their abil ty." If it follows that larger comm.nities have better tax bases, then the differential base would tend to exaggerate the effect of formula.

Further Comments

We presently have in our computer library a data file which contains a complete set of per capita property values for all municipalities. The values are full and true values, however, and thus not applicable to the present formula. Should you desire, we can provide some computer calculations of contribution rates or other information using the data base we now have. We could likewise generate information using assessed valuations; however, it would require the construction of a new data file and could not be delivered as expeditiously. Please let us know if we can be of further assistance.

This Fiscal Note assumes no construction of cultural facilities.

IV. DATE March 9, 1979 PREPARED BY Bart Wagnon, Deputy Commissioner
AGENCY Commerce and Economic Development
PHONE 465-2500

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

HB 185 HB 185 Page 2 of 2 3-9-79
Advisory Commission

5 Members - no compensation

First year - Travel - 4 meetings @ $250 per meeting $5,000
three days per diem @ $165 per meeting..... 3,300

Second year - Travel - 3 meetings - travel & per diem @ $430 per meeting.... 6,450

Third year - Travel - 2 meetings - travel & per diem @ $460 per meeting..... 4,600

Assumptions:

1. Personnel Services

One Professional person, a Capital Improvement Project Coordinator (range 20) will be required. This position will:

a) establish an application process
b) work closely with each community which applies for funds to construct cultural facilities
c) administer the grant program
d) oversee the engineering and architectural work and;
e) prepare the financial package to go to bid.

(Salary $2,532 per month, plus benefits of $684 per month.)

In addition, one clerical person working half-time will be required. Clerk Typist III (range 8) for correspondence, filing, etc.

(Salary $554 per month plus benefits of $150 per month.)

2. Travel requirements are estimated at 12 trips @ $350 per trip (per diem included in estimate). These trips will be required during the application process, to meet with the cultural coordinating committees over architectural designs and engineering estimates and during the early stages of construction.

3. Contractual

A. Rent - 250 feet^2 @ $1.25 per feet^2/month $3,700
B. Telephone, communications..... 1,300
C. Postage, etc..... 500
D. Printing and advertising..... 1,000
E. Professional fees and services..... 1,500

4. Commodities

Office supplies 400

5. Equipment

Desk, chair, file cabinet, calculator..... 1,500

After FY '80 - inflation estimated @ 6% per year.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

No cost to State. Appears to simplify language concerning penalties and interest on unpaid property taxes.

Changes penalty on unpaid first half installment from eight percent (8%) to ten percent (10%) however, removes the apparent existing implication that a delinquent first half installment necessitates interest on entire tax bill.

SUBJECT: COMMITTEE MEETING - BUTROVICH RM.,#207, Capital Building

TUESDAY, FEBRUARY 12, 1980 - 1:30 p.m.

SB 259 - AN ACT RELATING TO HISTORICAL DISTRICTS

SB 342 - AN ACT PROVIDING FOR THE ISSUANCE OF GENERAL OBLIGATION BONDS IN THE AMOUNT OF $25,520,000 FOR THE PURPOSE OF PAYING THE COST OF CAPITAL IMPROVEMENTS FOR WATER AND SEWER SYSTEMS: AND PROVIDING FOR AN EFFECTIVE DATE

DISCUSSION - Increase in state participation, municipal sewer/water facilities.
Additional state participation in solid waste/resource recovery systems.

BACKGROUND

CHAPTER 139, SLA 1977, established the Historic District and Tourism Revolving Loan Fund.

General law and home rule municipalities may, in consultation with the State Historic Sites Advisory Committee, establish historical districts within their jurisdictions. An historic district for this purpose is "a reasonably compact area of historical significance in which two or more structures important to state or national history, and related by physical proximity or historical association, are located."

Owners of properties in such districts may apply to the Division of Business Loans, Department of Commerce and Economic Development, for long term loans (currently 7.5% interest rate) for rehabilitation and improvement if the following conditions are met.

1. Property must contribute to historical character of district.

2. Project must be recommended by municipal governing body or designated agent (planning and zoning commission or historic district commission).

3. Project must be recommended by State Historic Sites Advisory Committee.

4. Division of Business Loans must approve application.

There are now historic districts in: Juneau, Skagway, Haines, Eagle, and Nome. Districts are under consideration in Anchorage, Fairbanks, and Ketchikan. Potential exists for districts in a number of other places.

District sizes vary greatly with character of historic resources present and municipal considerations. All of Eagle, Nome, and Skagway are included in the districts. At Haines, only Fort Seward is included. Juneau has the potential for several in addition to the present downtown district.

At present there is no direct funding for historic district loans. When such loans have been made in the past, DBL has obtained the money by "selling" them to Department of Revenue.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

S B 296 exempts $25,000 in value from residential property. Revenue lost to the municipality by implementation of this bill shall be reimbursed by the State. This will necessitate an audit procedure of applications for each municipality. The number of applications to be audited is estimated to be approximately 125,000 in 1981 and an expected growth rate of new applications at 5% each year following.

It is anticipated that computerization of this program will help deter some personal services expenditures, however, it will be necessary to employ 5 clerical positions for the auditing procedures.

The estimated total revenue lost by the municipalities is $37,355,700 for 1981. This was computed as follows:

OTHER (Specify Fund Source)						

POSITIONS

FULL TIME	0					
PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This bill limits the mill levy for all municipalities to 9 mills.

The fiscal impact of this bill would result in a loss of revenue for the local municipalities of an estimated 44.8 million dollars from local property taxes. (see attachment for breakdown)

The State General Fund would realize an estimated 18 million dollar increase due to the limiting of local mill levy on State Assessed Oil & Gas Properties. The major impact of this would occur in the North Slope Borough.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to adoption, amendment, repeal and filing of regulations and requiring the preparation of a local government fiscal impact statement."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.62 is amended by adding a new section to read:

Sec. 44.62.195. LOCAL GOVERNMENT FISCAL IMPACT STATEMENT. If the adoption, amendment, or repeal of a regulation would result in a change in the amount of revenue available to, or the expenditures required of, a municipality, the department or agency proposing to adopt, amend, or repeal the regulation shall, in cooperation with the Department of Community and Regional Affairs, prepare a fiscal impact statement. In the fiscal impact statement the department or agency shall identify and describe the change in the amount of revenue available to or the expenditures required of the municipality by the adoption, amendment, or repeal of the regulation.

* Sec. 2. AS 44.62.200(a) is amended by adding a new paragraph to read:

(5) a summary of the local government fiscal impact statement required under AS 44.62.195.

* Sec. 3. AS 44.62.320(b) is amended to read:

(b) At the same time a regulation is filed by the lieutenant governor, the lieutenant governor shall submit the regulation to the chairman <u>and all members</u> of the Administrative Regulation Review Committee for review under AS 24.20.400 - 24.20.460 <u>together with any fiscal impact statement required to be prepared under AS 44.62.195</u>.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

1. The personal servides cost is based on the addition of three staff members (a Local Government Specialist IV - Range 19, a Local Government Specialist III - Range 17 and a Clerk Typist III - Range 8) to handle the additional work.

2. Benefits are included in the personal services cost. These are figured at 28% of salary per year.

3. Travel costs are figured at $2,000 a year. Preparation of the required fiscal notes would require dealing with agencies throughout the state and phone calls would not always be adequate to resolve the issues.

4. Contractual costs are to cover long distance telephone tolls and telephone base rate for 3 persons (1.5), typewriter rental (2.7), and rent for an additional 450 sq. ft. of floor space (.7).

33-001 (Rev. 12/79)

5. All the above costs are increased at 8% a year for inflation.

6. The one time equipment cost is for desks, office equipment, etc. for three persons.

STATE OF ALASKA

JAY S. HAMMOND, Governor

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER

POUCH B
JUNEAU, ALASKA 99811

March 5, 1980

The Honorable Arliss Sturgulewski
Chairman
Senate Community & Regional Affairs
Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

RE: FISCAL NOTE ON SB 292am AND SB 309 COMBINED

This letter is in response to your inquiry about the fiscal impact upon our department if SB 309 and SB 292am were combined and passed into law. The fiscal note contained in this letter is based on a number of assumptions.

1. SB 292am and SB 309 would be combined and passed into law.

2. The provisions for preparation of fiscal notes on regulations, now contained in SB 292am, would be amended. The amendment would place primary responsibility on our department for preparation of fiscal notes for any regulation change by a state department when such change effects municipal finances.

3. The personal services cost is based on the addition of three staff members (a Local Government Specialist IV - Range 19, a Local Government Specialist III - Range 17 and a Clerk Typist III - Range 8) to handle the additional work.

4. Benefits are included in the personal services cost. These are figured at 28% of salary per year.

5. Travel costs are figured at $2,000 a year. Preparation of the required fiscal notes would require dealing with agencies throughout the state and phone calls would not always be adequate to resolve the issues.

6. Contractual costs are to cover long distance telephone tolls and telephone base rate for 3 persons (1.5), typewriter rental (2.7), and rent for an additional 450 sq. ft. of floor space (.7).

7. All the above costs are increased at 8% a year for inflation.

8. The one time equipment cost is for desks, office equipment, etc. for three persons.

Fiscal Note for SB 319 from Dept. HESS, signed by Coordinator M.D. Plotnick stressed clarification was needed in two areas:

1. What happens in the case of a married couple? If both are 65 years of age or older, will they be entitled to exemptions on two vehicles?

ANSWER: Per Dept. of Public Safety/ Motor Vehicles: Both would receive an exemption - if married, regardless how the certificate is made out - the stipulation being they are of 65 or older...

2. What constitutes residency for purposes of this bill?

ANSWER: Per Dept. of Public Safety, Motor Vehicles: this would revert to driver's statutes - residency requirement 90 days.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Reduces grant requirement for FY 81 from $150,000 to $120,000. There is no impact to administration.

Present law does not exempt seniors from ad valorem tax on their vehicles, just from state collected registration tax. This bill corrects the present law to exempt seniors from property tax on vehicles, statewide.

Present law pays municipalities that do not tax vehicles. This bill corrects law to only reimburse municipalities for revenue lost. This accounts for the reduced need for revenue to fund the program.

POSITION PAPER/Department of Health and Social Service

POSITION PAPER
Senate Bill No. 319

"An Act relating to an exemption from municipal property taxation; and providing for an effective date."

The Department of Health and Social Services supports the intent of SB 319. The bill in its current form, however, seems to need clarification on two areas:

1) What happens in the case of a married couple? If both are 65 years of age or older, will they be entitled to exemptions on two vehicles?

2) What constitutes residency for purposes of this bill?

This bill will not impact on the Department of Health and Social Services but will impact on the Department of Community and Regional Affairs.

The Department of Health and Social Services recommends that Senate Bill 319 not be passed without revisions to address the above-stated concerns.

SB 314

Attached is proposed legislation for the motor vehicle exemption which the department feels is unacceptable in its present form for the following reasons:

1. The exemption should be located in Title 29 along with other prescribed property tax exemptions. Therefore, Section 3 of the proposed bill annulls the unsatisfactory section in Title 28.

2. The current law does not provide for exemption of local property tax levies on vehicles, only those levied through the state collection option are presently exempted.

Paragraph (j) of the proposed legislation provides exemption regardless of the collection procedure.

3. Three kinds of municipalities are currently being reimbursed:

Examples

Homer/Petersburg/Kotzebue — 1. Those actually exempting seniors through the state collection option; = correct Procedure

Matsu/Kenai — 2. Those that must, under the current law, collect ad valorem property tax from seniors locally; and = Double Income city & St.

Juneau — 3. Those that do not tax vehicles at all. = city St. Income

Paragraph (k) of the proposed bill allows reimbursement to municipalities only for revenue lost due to actual exemptions granted.

SB 324

Attached is proposed legislation to increase the renter payment formula from ½% per mill to 1% per mill. The proposal also removes the dollar limit per applicant. We believe this is equitable since the homeowner exemption is virtually unlimited. If the committee wishes to impose a limit, please suggest that it be no less than $750 per year.

Per DOVE Kull - Why ABUSE life style of Sr. Citizens if they had always lived in a higher manner - by placing a ceiling for any amt. Per Dept. C/Rn Maybe a dozen at most would go over #750 - Not a big matter.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
Assume 12% increase in program through FY 83 and 7% increase thereafter.

The bill effectively doubles payment to program beneficiaries and removes the $375 limit on each payment. Assume that grant requirement will double. No fiscal impact to administration.

In line 14, mil should be spelled mill.

IN THE SENATE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

SENATE BILL NO. 342

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act providing for the issuance of general obligation bonds in the amount of $25,520,000 for the purpose of paying the cost of capital improvements for water and sewer systems; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. For the purpose of paying the cost of capital improvements for water and sewer systems, general obligation bonds of the state in the principal amount of not more than $25,520,000 shall be issued and sold. The full faith, credit and resources of the state are pledged to the payment of the principal of and interest and redemption premium, if any, on these bonds. These bonds shall be issued under the provisions of AS 37.15 as those provisions read at the time of issuance.

* Sec. 2. If the issuance of these bonds is authorized by the qualified voters of the state, a special fund of the state to be known as the "1980 Water Supply and Sewerage Systems Fund" shall be established, to which shall be credited the proceeds of the sale of bonds described in sec. 1 of this Act except for accrued interest and premiums. There is appropriated from the "1980 Water Supply and Sewerage Systems Fund" to the Department of Environmental Conservation the amount of $25,520,000, allocated in accordance with the following projects and estimates:

	Project	Location	Amount
(1)	Village safe water construction grants	Statewide	$ 2,520,000

(2) Urban water and sewer construction grants — Statewide — 23,000,000

* Sec. 3. If the issuance of these bonds is authorized by the qualified voters of the state, the amount of $89,400, or as much of that amount as is found necessary is appropriated from the general fund of the state to the state bond committee to carry out the provisions of this Act and to pay expenses incident to the sale and issuance of the bonds authorized in this Act. The amounts expended from the appropriation authorized by this section shall be reimbursed to the general fund from the proceeds of the sale of the bonds authorized by this Act.

* Sec. 4. The amount withdrawn from the public facility planning fund for the purpose of advance planning for the improvements financed under this Act shall be reimbursed from the proceeds of the sale of bonds authorized by this Act.

* Sec. 5. The question whether the bonds authorized in this Act are to be issued shall be submitted to the qualified voters of the state at the next general election and shall read substantially as follows:

Proposition

State General Obligation Water Supply and Sewerage Systems Bonds $25,520,000

Shall the State of Alaska issue its general obligation bonds in the principal amount of not more than $25,520,000 for the purpose of paying the cost of capital improvements for water and sewerage systems?

Bonds Yes [ ]

Bonds No [ ]

* Sec. 6. This Act takes effect immediately in accordance with AS 01.-10.070(c).

ALASKA DEPARTMENT OF ENVIRONMENTAL CONSERVATION

DRAFT AMENDMENTS TO AS 46.03.030: GRANTS AND LOANS
FOR WATER SUPPLY AND SEWERAGE SYSTEMS

The title of AS 46.03.030 is amended to read:

"Sec. 46.03.030. Grants [and loans] for water supply, [and] sewerage and solid waste facilities [systems].

AS 46.03.030(b) is amended to read:

(b) The department may grant to a municipality, as funds are available, up to [the lesser of] 50 per cent of [the] eligible costs [or 50 per cent of the eligible cost] not financed by the federal government, for public water supply, treatment and distribution systems and public sewage collection, treatment and discharge facilities for which construction has not commenced on or before June 21, 1976. The eligible cost of a project or portions of a project will be as determined by the federal agency granting the most monetary assistance. On projects or portions of projects, for which federal participation is not available, eligible costs will be determined by the department in accordance with (e) [(d)] of this section. Projects shall be constructed in accordance with plans and specifications approved by the department.

AS 46.03.030(c) is amended to read:

(c) There is a water supply, [and] sewerage and solid waste facilities [systems] fund created in the department to carry out the purposes of this section.

AS 46.02020(d) is deleted and replaced with a new subsection to read:

"(d) The department may grant to a municipality as funds are available, up to 50 percent of eligible costs not funded by the federal government for solid waste processing or disposal facilities, or portions of such facilities, for which construction has not commenced on or before July 1, 1980; except that grants up to 60 percent of eligible costs not funded by the federal government may be awarded for those portions of solid waste processing or disposal facilities which provide for resource recovery. The eligible cost of a solid waste processing or disposal facility will be as determined by the federal agency granting the most monetary assistance. On facilities or portions of a facility for which federal participation is not available, eligible costs will be determined by the department in accordance with (e) of this section. Projects shall be constructed in accordance with plans and specifications approved by the department.

AS 46.03.030 is amended by adding a new subsection to read:

(e) The department shall, by regulation, identify those costs which will be considered eligible costs for the purposes of this section. Eligible costs shall include those contracted costs necessary for construction of a project, but do not include costs of interest and financing, right-of-way acquisistion costs, and costs related to operation, maintenance, repair or replacement of a project.

AS 46.03.900 is amended by adding the following new definitions to read:

) "Resource recovery" means the recovery of materials or energy from solid wastes to be used in manufacturing, agriculture, heat production, power production, or other productive processes or purposes; includes the reuse of materials or products to conserve natural resources.

) "Solid waste disposal facility" means any facility for which the primary purpose is to discharge, deposit, inject, consolidate, or place solid wastes into or onto the land; including but not limited to transfer stations and sanitary landfills.

) "Solid waste processing facility" means any facility for the purpose of extracting materials, volume reduction, conversion to energy, or other separation and preparation of solid waste for reuse or disposal of solid wastes; including but not limited to incinerators, shredders, balers, and transfer stations.

Effective date: July 1, 1980

FISCAL NOTE

To be included in the bill:

Issue Paper
Water and Sewer Construction Grants
December 1979

The Department, through the Facilities Construction and Operation section, administers a grant program which is directed toward providing incorporated communities with assistance in the construction of water and sewerage services. Two basic grant programs are administered: the State general obligation bond water and sewer grant program authorized by AS 46.03.030; and the federal wastewater pollution control program authorized by the Clean Water Act of 1977.

Under the State water and sewer grant program, incorporated municipalities may apply for grants to fund up to 50 percent of project costs for new water and sewerage facilities. If federal funding is involved in a project, State grants are limited to half the non-federal share of eligible project costs. Funded projects include facilities needed for community expansion as well as facilities needed to correct existing public health and environmental problems.

The Department performs the following administrative responsibilities in support of this program:

- review of grant applications
- review of project plans and specifications
- analysis of project construction and operating costs

- processing of grant offers and payment requests
- inspection of projects during construction and following completion
- preparation of project audit reports to ensure that grant funds were properly utilized by grantees.

Eligible projects are presently funded as need arises, after a review to ensure that projects are capable of meeting the need identified at an acceptable life cycle cost. The source of funding for these grants is general obligation bond funds which have been periodically authorized by the voters. Presently, approximately $18,112,626 are available for obligation t projects through this program.

Since July, 1976, $37,358,030 has been obligated to water and sewage projects throughout the state. Of this total, $14,465,180 (38.7%) was for community water supply projects; $9,450,000 (25.3%) was for sewage treatment and intercepter facilities (matching EPA funding); and $13,442,850 (36.0%) was for sewage collection facilities. These grants have supported projects in major communities in all regions of the state. The program is not heavily used by bush communities because the Public Health Service and the State Village Safe Water programs are addressing utility needs of remote areas. It is also usually difficult for small remote communities to raise the 50 percent matching requirements. In some instances, however, projects in remote areas are funded through the program in conjunction with other federal, state, or local funding sources.

The grant program for construction of sewage treatment facilities is administered under the authorization of the federal Clean Water Act of 1977. This Act mandates that community sewage treatment works achieve secondary treatment by 1983, except those communities capable of discharging effluent into marine coastal waters which receive good tidal mixing may be allowed to follow less stringent requirements. Secondary treatment is a broad term for many methods of treating sewage through the use of biological processes, and usually results in removal of 85% of the pollutants. Depending upon congressional appropriations from year to year, Alaska is allocated $16-25 million annually. These funds are then available to communities to finance 75 percent of the cost of sewage treatment and intercepter projects. The State water and sewage grant program mentioned above contributes an additional 12 1/2 percent toward such projects leaving only 12 1/2 percent to be funded locally.

The Clean Water Act assigns the Environmental Protection Agency the responsibility for this grant program. The Act also stipulates that EPA may delegate the administration of the program to the states, and makes funding available to those states which assume administration of the program. Alaska assumed responsibility for a major portion of the program in December of 1978 (one of the first states to do so) and was awarded a grant of $245,349 to cover costs of administration through June, 1980. EPA has received funding to defray State administration expenses in subsequent fiscal years.

In order to reduce the significant delays in grant processing which occurred under EPA administration, and to better ensure that projects are consistent with the unique requirements of Alaska, the Department assumed responsibility for the following administrative tasks:

- preparation of annual project priority list
- review of grant applications
- review of consultant agreements
- review and approval of plans and specifications
- review and approval of project change orders
- review and approval of O & M manuals.

Under agreement with EPA, State certification of these items will be accepted as if performed by EPA staff (subject to periodic audit). It is expected that additional administrative tasks will be delegated the state, including:

- facility plan approval
- interim and final project inspections
- eligibility determinations
- review and approval of planning documents
- preparation of necessary environmental assessments
- issuance of numerous other technical approvals required for each project.

Since 1975, grants averaging $20,000,000 a year have been awarded to 30 communities throughout the state. As with the State water and sewer grant program, mainly the larger communities have benefitted from the program. Recent modifications of the Clean Water Act present opportunities for making funding available to smaller communities for innovative, individual, or non-conventional sewage handling facilities.

Issue Papers

Water and Sewer Construction Grants

The Department of Environmental Conservation administers a grant program which provides incorporated communities with assistance in the construction of water and sewerage services. Two basic grant programs are administered: the State general obligation bond water and sewer grant program and the federal water pollution control program.

Under the State water and sewer grant program, incorporated municipalities may apply for grants to fund up to 50 percent of project costs for new water and sewerage facilities or one-half the non-Federal share of eligible costs if federal funding is involved. Funded projects include facilities needed for community growth as well as facilities needed to correct existing public health and environmental problems.

Eligible projects presently are funded as need arises. The source of funding for these grants is general obligation bond funds which have been authorized by the voters. Presently, approximately $18 million is available for obligation to projects through this program.

These grants have supported projects in major communities in all regions of the state. The program is not heavily used by bush communities because the Public Health Service and the State Village Safe Water programs are addressing utility needs of remote areas and it is usually difficult for small remote communities to raise the 50 percent matching requirements. In some instances, however, projects in remote areas are funded through the program in conjunction with other federal, state, or local funding sources.

The grant program for construction of sewage treatment facilities is administered under the authorization of the federal Clean Water Act of 1977. Depending upon congressional appropriations from year to year, Alaska is allocated $16-25 million annually. These funds are then available to communities to finance 75 percent of the cost of sewage treatment and interceptor projects. The State water and sewage grant program mentioned above contributes an additional 12 1/2 percent toward such projects leaving only 12 1/2 percent to be funded locally.

The Environmental Protection Agency is responsible for this grant program. However, EPA may delegate the administration of the program to the states, and make funding available to those states which assume administration of the program. In order to reduce the delays in grant processing which occurred under EPA administration, Alaska assumed responsibility for a major portion of the program in December of 1978 (one of the first states to do so).

Since 1975, approximately $20 million of Federal funds a year has been awarded to 30 communities throughout the State. As with the State water and sewer grant program, the larger communities have benefitted the most from the program. Recent changes to the Clean Water Act present opportunities for making funding available to smaller communities for innovative, individual, or non-conventional sewage handling facilities.

AF 46 03 030

Village Safe Water

The Village Safe Water Act calls for at least one facility for safe water and hygienic sewage disposal in each village in Alaska.

Since 1972, eleven VSW facilities have been constructed. They are in the villages of Northway, Chevak, Alakanuk, Selawik, Nulato, Koyukuk, Beaver, Pitkas Point, Kongiganank, Tanana and Council. A facility is being designed for Akiachak and will be constructed during the summer and fall of 1980.

In these eleven villages the VSW projects consist of sanitation facilities to which village residents can come to obtain water supply and sewage disposal services; with bathing and laundry services available in all except Council. No piped water-distribution or sewage collection systems are involved except for water and sewer service lines to schools.

Construction methods used so far have included: 1) competitive bid construction contracts administered by what was then the Alaska Department of Public Works, 2) competitive bid construction contracts administered by the Alaska Department of Environmental Conservation (ADEC), and 3) force account construction by the village through construction management contracts with engineering consultants.

The force account/construction management method of construction has been the most satisfactory of the three methods used. Facilities constructed that way have been built cheaper and faster than those built under competitive bid construction contracts; the quality of construction has been better; and the villages have been more intimately involved in, and satisfied with, their projects.

VSW facilities have cost from $118,000 at Council for a project begun in FY 78, to over $1,400,000 at Tanana, of which $755,000 were VSW funds. Villages served have ranged in size from 60 (Council) to over 550 (Selawik).

Experience in the VSW project has proved that financial, technical, and/or management assistance to the villages is necessary to ensure that the facilities continue to operate. ADEC provides technical and management assistance to the eleven villages. The VSW operation and maintenance support program has made it possible for all completed VSW facilities to serve the public as intended. It is instructive to note that the operation and maintenance cost per village has been decreasing in actual dollars (i.e., ignoring inflation) over the last few years.

ADEC has been working on a comprehensive planning effort intended to define the roles of State and federal agencies and other groups involved in providing rural sanitation services. The Department has sought close cooperation with the U.S. Public Health Service and the regional Native health corporations in carrying out the planning. In fact the Directors of the health corporations have served as an advisory board for the VSW program.

An early step in the planning was to inventory all village sanitation facilities. The inventory is updated annually and is widely viewed as the single most complete and dependable source of information on village sanitation.

Current plans are to investigate certain questions concerning how the VSW program should operate over the long term. Among the questions to be investigated are: 1) What services should VSW facilities provide (e.g., solid waste, piped service to individual homes, saunas)?; 2) Should there be village eligibility criteria for VSW program assistance?; 3) How should construction priorities be set?; 4) How fast should VSW facilities be built (i.e., how much construction money over what period of time)?; 5) What funding sources other than water and sewer bonds can be coordinated into VSW projects? and 6) What should the State's role be in operation and maintenance of VSW facilities, and perhaps other village sanitation facilities as well?

TO: ALL STATE LEGISLATORS
FROM: CLAIR HARMONY, KODIAK CITY MANAGER

THE KODIAK CITY COUNCIL SUPPORTS SB 342 AS A NEEDED AND ESSENTIAL WATER, SEWER AND SOLID WASTE FACILITIES GRANT PROGRAM.

PARTICULARLY IMPORTANT IS A NEW ELEMENT OF 50 PERCENT STATE MATCH FOR SOLID WASTE FACILITIES. CURRENT PRACTICES IN MANY ALASKAN COMMUNITIES REQUIRE THAT SHOT ROCK (AN EXPENSIVE PROCESS) BE USED AS FILL MATERIAL TO COVER SOLID WASTE. ALTERNATIVE SOLUTIONS ARE COSTLY AND ASSISTANCE IS ESSENTIAL BY THE STATE. THE CITY OF KODIAK FAVORS INCREASED LEVELS OF FUNDING OVER THE 50 PERCENT FOR SOLID WASTE CONSTRUCTION GRANTS. THESE ARE SUBSTANTIAL ONE TIME EXPENDITURES.

PER JIM BALDWIN / Legal

2/8/80

O.K. to do: (Kev Hula)

SB 131's title -use (and gut rest of context)

CS /

1 - Replace with SB 342's context

2 - Plus insert change of St. share increase 75 increase (instead of 50%)

3 - Change total approp. from $25,520,000 to $35,520,000 (reflecting Solid Waste Costs)

O.K. to do: (Gov.)

SB 342 Leave as is.

CS /

1 - but change st. share increase from 50 % to 75%

2 - Change total approp. from $25,520,000 to $35,520,000 (reflecting Solid Waste Costs)

NOTE: Solid Waste Processing & Disposal cannot be incorporated in either of the above bills.

Cannot Do = Separate Bill

Constitutionality - Enabling laws vs approprations (latter have to be separate)

NOW - you can put the effective date the same on the Bond Bill and the Waste Disposal Bill - making them a package - thus both will pass, or both will die.

OR

You can leave separate, as is now.

NOTE: The G.O. Bond bill that passed, will reflect increase for waste. In event Waste Disposal bill does not pass, the appropriated extra money can be designated by the Governor for the same or similar use thereof, as he initiates the program....

CSSB 348

This bill provides for sub-state regional units, called "unorganized boroughs," to be established in the unorganized borough. The Commissioner of Community and Regional Affairs is directed, after public hearings, to determine appropriate boundaries, initially based on REAA boundary lines. Provisions are made for the adjustment of boundary lines.

Each "unorganized borough" will be eligible for regional planning program funds to assist in determinations of the economic, social, and environmental conditions of the area and the interrelationships between governmental levels, with an examination of the potential and need for borough organization. No one is required to either undertake the study or to form a borough. The planning program and future organization, if any, is up to the local area. Each year, for 3 years, $25,000 plus $25 per capita is available to each unorganized borough for regional planning.

A new chapter is added to AS 29 which allows for incorporation, by petition to the Local Boundary Commission, of unorganized boroughs as home rule boroughs and the adoption by election of a home rule charter. Dual majority votes are required for passage of the home rule charter.

We are pleased to enclose the reports of the Local Government Interim Study by the Joint Senate and House Community and Regional Affairs Committee.

Legislation composed of seven bills was introduced jointly by the Senate and the House, Monday, January 21, 1980. Copies of the following bills may be obtained from your nearest Legislative Information Office. The complete package consists of Senate Bills 348, 349, 350, 351, 352, 353, 354; OR House Bills 580, 581, 582, 583, 584, 585, and 586.

For your additional information all the Senate bills in the package were assigned to the Senate Community and Regional Affairs Committee, with a referral to the Finance Committee. All the House bills in the package were assigned as follows: HB 580 - C/RA & Finance; HB 581 C/RA; HB 582 C/RA and Finance; HB 583 C/RA and Finance; HB 584 C/RA and Judiciary; HB 585 C/RA; and HB 586 C/RA. You might want to contact the referrals as well, after the bills leave the Community and Regional Affairs Committees. Senator John Sackett is Chairman of Senate Finance; Representtive Russ Meekins is Chairman of House Finance, and Representative Charles Parr is Chairman of Judiciary.

In the event you are unable to give your comments during the set teleconference times, please feel free to contact the Senate and House R/CA Committees at Pouch , Juneau, Alaska 99811.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
FY 80 - Reflects travel expenses, notice requirements, and supplies needed for public hearings on drawing boundary lines that differ from REAA's in the unorganized borough.

FY 81 - 85 - Reflects the addition of 3 Local Government Specialists (Range 17), a Clerk Typ ist III (Range 8) and Clerk Typist II (Range 7) to assist unorganized boroughs in becoming home rule boroughs. Seven proposed regions are presumed to be likely candidates for the home rule option. These areas are 1) Yukon Flats (REAA 13), 2) REAA 12, 3) NANA region (REAA 1), 4) Petersburg/Wrangell (part of REAA 19), 5) Prince of Wales Island (part of REAA 19), 6) The Aleutian Chain (parts of REAA's 8 and 10), and 7) Prince William Sound (REAA 21). It is anticipated that if this bill passes this session the bulk of the activity will take palce during FY 81 and FY 82 and will begin to lessen gradually through FY 85 as the newly incorporated boroughs became more self-sufficient.

The high travel cost during FY 81 reflects the need to administer simultaneously both drawing the boundaries for the unorganized boroughs and assisting the seven areas previously

mentioned in drawing up home rule charters.

There would be no fiscal impact from section 4 of this bill until there is an appropriation to fund the borough regional planning account set up in paragraph (g). However, the Department does anticipate the following additional cost at such time as an appropriation is made.

Staff to monitor and oversee contracts.

1.	Local Government Specialist IV	Range 19	Salary	$31,824
		Fringes		8,910
	Travel 10 trips @ 600			6,000
	Equipment & Supplies (400 after FY 81)			1,000
	Total Position Cost			$47,734
2.	Local Government Specialist III	Range 17	Salary	$27,468
		Fringes		7,910
	Travel 11 trips @ 600			6,600
	Equipment & Supplies (400 after FY 81)			1,000
	Total Projected Costs for FY 81			90,493
	FY 82			96,111
	FY 83			93,000
	FY 84			100,439
	FY 85			108,475

NOTE: Projections include 8% for inflation.

The above figures are based on the assumption that the initial appropriation would be sufficient to initiate studies in the majority of the unorganized boroughs as established in H. B. 580 or S. B. 348.

Senator Arliss Sturgulewski
Pouch V
Juneau, AK 99811

Dear Arliss:

I would like to take this time to personally thank you and your staff for taking time from your busy schedule to meet with myself and Mr. Harold Napoleon, regarding the bills concerning the unorganized boroughs which are under consideration by your committee.

It has become apparent that there are many interests which involved in the consideration of these bills and AVCP would like to reiterate it's position that it may be premature for this legislature to pass these legislations, at this legislative session. However, AVCP herewith submit to you and your committee for consideration that in lieu of the passage of these bills, that AVCP would be more than willing to be the demonstration area for the impact study to determine whether such a government can be established within the AVCP Region. That is to say, we would like to see legislative appropriating funds to AVCP to conduct an impact study to determine whether a borough government is feasible within the AVCP Region and for the legislature to give us, at the minimum of two (2) years to complete the study, at which time a decision will then be made the electorate with the AVCP Region. Furthermore, we submit to you and your committee for consideration that the external boundaries of such a governmental unit be that of the external boundaries of the regional corporations established under Public Law 92-203, and any subdivision to be determined by the impact study.

Again, thank you for taking time to meet with us to discuss this vital issue of concern to the people of the AVCP Region.

Sincerely,

Carl Jack, PRESIDENT
AVCP

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

FY 80 - Reflects travel expenses, notice requirements, and supplies needed for public hearings on drawing boundary lines that differ from REAA's in the unorganized borough.

FY 81 - 85 - Reflects the addition of 3 Local Government Specialists (Range 17), a Clerk Typist III (Range 8) and Clerk Typist II (Range 7) to assist unorganized boroughs in becoming home rule boroughs. Seven proposed regions are presumed to be likely candidates for the home rule option. These areas are 1) Yukon Flats (REAA 13), 2)REAA 12, 3) NANA region (REAA 1), 4) Petersburg/Wrangell (part of REAA 19), 5) Prince of Wales Island (part of REAA 19), 6) The Aleutian Chain (parts of REAA's 8 and 10), and 7)Prince William Sound (REAA 21). It is anticipated that if this bill passes this session the bulk of the activity will take place during FY 81 and FY 82 and will begin to lessen gradually through FY 85 as the newly incorporated boroughs become more self-sufficient.

The high travel cost during FY 81 reflects the need to administer both of the main

33-001 (Rev. 12/79)

activities in the bill: drawing the boundaries for the unorganized boroughs and assisting the seven areas previously mentioned in drawing up home rule charters.

CSSB 348

"AN ACT RELATING TO UNORGANIZED BOROUGHS, ESTABLISHING UNORGANIZED BOROUGHS, ESTABLISHING A PROGRAM OF PLANNING ASSISTANCE FOR UNORGANIZED BOROUGHS, PERMITTING ADOPTION OF HOME RULE CHARTERS BY UNORGANIZED BOROUGHS, AND DIRECTING SUBMISSION OF RECOMMENDATIONS CONCERNING ADJUSTMENT OF THE BOUNDARIES OF SERVICE AREAS OF THE UNORGANIZED BOROUGH"

BOUNDARIES

The bill divides the unorganized borough into "unorganized boroughs" using the boundaries of the Regional Educational Attendance Areas (REAAs). Public hearings are held in each REAA by the Commissioner of Community and Regional Affairs and provision is made for adjustment of the boundary lines.

REGIONAL PLANNING

Each unorganized borough is eligible for regional planning program funds to study the economic, social, and environmental conditions of the area and the interrelationships between governmental units along with an examination of the feasibility of borough organization. No one is required to either undertake a study or form a borough. $25,000 plus $25 per capita is available to each unorganized borough for each of three years for regional planning programs.

HOME RULE

Title 29 is amended allowing for the incorporation, by petition to the Local Boundary Commission, of unorganized boroughs as home rule municipalities. Adoption of a home rule charter would require a majority vote both inside and outside of incorporated municipalities. Nothing in the bill requires the incorporation of a home rule borough or borough of any class. Rather, this section broadens the options currently available to residents in the unorganized borough.

CSSB 350

"AN ACT RELATING TO THE RESPONSIBILITIES OF EXECUTIVE DEPARTMNETS OF STATE GOVERNMENT FOR CERTAIN STATE PROGRAMS"

This bill addresses certain responsibilities of executive departments important to the implementation of CSSB 348. State agencies are required to collect data and information according to unorganized borough boundaries so that regional information will be available to local people and to the legislature. Certain exemptions are permitted. State agencies are also required to conduct program planning and management according to unorganized borough boundaries to facilitate coordinated service delivery. Combinations of unorganized boroughs for program planning and management purposes are permitted. Direct service delivery costs will be made available according to unorganized borough boundaries.

The Division of Policy Development and Planning (DPDP), Office of the Governor, is required to develop a data information system to facilitate state agency data collection and retrieval. Further, DPDP is required to report to the legislature alternatives and recommendations for improving coordination in state service delivery.

Alaska's Constitution establishes the policy of maximum self government for the people. This policy has been implemented through creation of boroughs and cities in urban areas and in some rural communities. However, the vast bulk of Alaska lacks any basis for self-government, and the people do not even have the means for planning and participating in the affairs of their own region. It is this problem that provided the principal focus for the interim work of the Senate and House Community and Regional Affairs Joint Local Government Study of 1979.

Legislative proposals of the Joint Committee were derived from (1) a series of studies and analyses sponsored by the Committee, (2) a two-day symposium designed to define issues and problems and suggest policies and directions, and (3) a series of public hearings held throughout rural parts of the state.

The Joint Committee found wide consensus in favor of a maximum measure of self-determination and self-rule, and establishment of regional units throughout the state to provide a basis for planning and program coordination. At the same time, the people do not want to rush into formal governmental organization; nor do they want it mandated.

Accordingly, the Joint Committee has developed an evolutionary approach that will provide people in rural areas with the means for self-government without forcing anything upon them prematurely. Choices and initiatives are left with each region.

SB 348 and SB350 are two of the bills developed by the Joint Committee.

We are pleased to enclose the reports of the Local Government Interim Study by the Joint Senate and House Community and Regional Affairs Committee.

Legislation composed of seven bills was introduced jointly by the Senate and the House, Monday, January 21, 1980. Copies of the following bills may be obtained from your nearest Legislative Information Office. The complete package consists of Senate Bills 348, 349, 350, 351, 352, 353, 354; OR House Bills 580, 581, 582, 583, 584, 585, and 586.

For your additional information all the Senate bills in the package were assigned to the Senate Community and Regional Affairs Committee, with a referral to the Finance Committee. All the House bills in the package were assigned as follows: HB 580 - C/RA & Finance; HB 581 C/RA; HB 582 C/RA and Finance; HB 583 C/RA and Finance; HB 584 C/RA and Judiciary; HB 585 C/RA; and HB 586 C/RA. You might want to contact the referrals as well, after the bills leave the Community and Regional Affairs Committees. Senator John Sackett is Chairman of Senate Finance; Representative Russ Meekins is Chairman of House Finance, and Representative Charles Parr is Chairman of Judiciary.

In the event you are unable to give your comments during the set teleconference times, please feel free to contact the Senate and House R/CA Committees at Pouch V, Juneau, Alaska 99811.

CSSB 348

This bill provides for sub-state regional units, called "unorganized boroughs," to be established in the unorganized borough. The Commissioner of Community and Regional Affairs is directed, after public hearings, to determine appropriate boundaries, initially based on REAA boundary lines. Provisions are made for the adjustment of boundary lines.

Each "unor-anized borough" will be eligible for regional planning program funds to assist in determinations of the economic, social, and environmental conditions of the area and the interrelationships between governmental levels, with an examination of the potential and need for borough organization. No one is required to either undertake the study or to form a borough. The planning program and future organization, if any, is up to the local area. Each year, for 3 years, $25,000 plus $25 per capita is available to each unorganized borough for regional planning.

A new chapter is added to AS 29 which allows for incorporation, by petition to the Local Boundary Commission, of unorganized boroughs as home rule boroughs and the adoption by election of a home rule charter. Dual majority votes are required for passage of the home rule charter.

CSSB 349

This bill addresses certain responsibilities of executive departments important to the implementation of CSSB 348.

State agencies are required to collect data and information according to unorganized borough boundaries so that regional information will be available to local people and to the legislature. Certain exemptions are permitted. State agencies are also required to conduct program planning and management according to unorganized borough boundaries to facilitate coordinated service delivery. Combinations of unorganized boroughs for program planning and management purposes are permitted.

Direct service delivery costs will be made available according to unorganized borough boundaries.

The Division of Policy Development and Planning (DPDP), Office of the Governor, is required to develop a data information system to facilitate state agency data collection and retrieval. Further, DPDP is required to report to the legislature alternatives and recommendations for improving coordination in state service delivery.

CS FOR SENATE BILL NO. 349

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the responsibilities of executive departments of state government for certain state programs; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.17 is amended by adding new sections to read:

ARTICLE 2. PLANNING AND MANAGEMENT OF STATE SERVICES.

Sec. 44.17.100. PROGRAM DATA AND INFORMATION. (a) A principal department of the executive branch of state government, including a board or commission assigned to a department for administrative purposes, shall use the home rule and general law boroughs, unified municipalities, and regional educational attendance areas as the geographic units by which to collect and report data and information and process and analyze statistics about each of its programs.

(b) The information, data and statistics required to be collected and reported by this section include but are not limited to

(1) information which may be required by the division of policy development and planning in the Office of the Governor to describe the geographic distribution of the state's population, economic activities, and public services; and

(2) information about the program, including

(A) the estimated number of persons needing a service;

(B) the number of persons served by the program;

(C) the costs of the services provided by the program; and

(D) the conditions addressed or corrected by a service provided by the program.

(c) A department, board or commission may request an exemption from this section. An exemption granted under this subsection expires on June 30, 1982. The request for exemption shall be submitted to the governor, who may grant the exemption if he finds that additional expense, increased workload, or decreased efficiency in the operation of a program or development of a new program would be substantially greater than the public interest in compliance with this section. A department, board or commission requesting an exemption under this subsection shall submit to the governor a written statement

(1) naming the program for which an exemption is requested;

(2) describing the problems which would be encountered if the department, board or commission were required to conform to this section; and

(3) evaluating the effect of an exemption granted under this subsection on the collection and reporting requirements of (a) of this section for other programs administered by the department, board or commission.

* Sec. 2. AS 44.17 is amended by adding new sections to read:

Sec. 44.17.110. PROGRAM PLANNING AND MANAGEMENT. (a) A principal department of the executive branch of state government, including a board or commission assigned to a department for administrative purposes, shall use the home rule and general law boroughs, unified municipalities, and regional educational attendance areas of the state as the geographic units by which to develop and implement plans for providing services and to coordinate program planning and administration with the plans and programs of other agencies, municipalities and the federal government.

(b) A department, board or commission may combine one or more home rule boroughs, general law boroughs, unified municipalities, and regional educational attendance areas to define the geographical area within which a program is provided.

Sec. 44.17.120. REPORTING OF SERVICE COSTS. (a) A principal department of the executive branch of the government, including a board or commission assigned to a department for administrative purposes, shall provide information giving the direct cost of providing services to each municipality and regional educational attendance area used by the department under AS 44.17.110(a) for the management and administration of its programs. The information shall be available to

(1) the division of budget and management in the Office of the Governor, for its use in making recommendations for the program budget of a department, board or commission;

(2) the legislature, for its use in consideration of the state budget and other legislation relating to state services; and

(3) the public, upon request to the department, board or commission.

(b) In this section, "direct cost" means a cost which is related to providing a service, exclusive of general administrative and support costs.

Sec. 44.17.130. EXEMPTION. The provisions of AS 44.17.110 - 44.17.120 do not apply to

(1) a program of an executive department, board or commission which provides only professional or technical support services for another state department, board or commission, as determined by the governor; and

(2) a program for which exemption is specifically requested by the department, board or commission, and granted by the governor

because

(A) the program concerns the conservation or development of a natural resource; and

(B) the application of AS 44.17.110 - 44.17.120 would cause a substantial impediment to the performance of duties by the department, board, or commission.

Sec. 44.17.140. DEFINITION. In AS 44.17.100 - 44.17.140, "regional educational attendance area" means a subdivision of the part of the state not within an organized borough as determined by the commissioner of community and regional affairs under AS 14.08.031.

* Sec. 3. AS 44.17 is amended by adding new sections to read:

ARTICLE 2. PLANNING AND MANAGEMENT OF STATE SERVICES.

Sec. 44.17.100. PROGRAM DATA AND INFORMATION. (a) A principal department of the executive branch of state government, including a board or commission assigned to a department for administrative purposes, shall use the home rule and general law boroughs, unified municipalities, and unorganized boroughs as the geographic units by which to collect and report data and information and process and analyze statistics about each of its programs.

(b) The information, data and statistics required to be collected and reported by this section include but are not limited to

(1) information which may be required by the division of policy development and planning in the Office of the Governor to describe the geographic distribution of the state's population, economic activities, and public services; and

(2) information about the program, including

(A) the estimated number of persons needing a service;

(B) the number of persons served by the program;

(C) the costs of the services provided by the program;

and

(D) the conditions addressed or corrected by a service provided by the program.

(c) A department, board or commission may request an exemption from this section. An exemption granted under this subsection expires on June 30, 1982. The request for exemption shall be submitted to the governor, who may grant the exemption if he finds that additional expense, increased workload, or decreased efficiency in the operation of a program or development of a new program would be substantially greater than the public interest in compliance with this section. A department, board or commission requesting an exemption under this subsection shall submit to the governor a written statement

(1) naming the program for which an exemption is requested;

(2) describing the problems which would be encountered if the department, board or commission were required to conform to this section; and

(3) evaluating the effect of an exemption granted under this subsection on the collection and reporting requirements of (a) of this section for other programs administered by the department, board or commission.

* Sec. 4. AS 44.17 is amended by adding new sections to read:

Sec. 44.17.110. PROGRAM PLANNING AND MANAGEMENT. (a) A principal department of the executive branch of state government, including a board or commission assigned to a department for administrative purposes, shall use the home rule and general law boroughs, unified municipalities, and unorganized boroughs of the state as the geographic units by which to develop and implement plans for providing services and to coordinate program planning and administration with the plans and programs of other agencies, municipalities and the federal government.

(b) A department, board or commission may combine one or more home rule boroughs, general law boroughs, unified municipalities, and unorganized boroughs to define the geographical area within which a program is provided.

Sec. 44.17.120. REPORTING OF SERVICE COSTS. (a) A principal department of the executive branch of the government, including a board or commission assigned to a department for administrative purposes, shall provide information giving the direct cost of providing services to each municipality and unorganized borough used by the department under AS 44.17.110(a) for the management and administration of its programs. The information shall be available to

(1) the division of budget and management in the Office of the Governor, for its use in making recommendations for the program budget of a department, board or commission;

(2) the legislature, for its use in consideration of the state budget and other legislation relating to state services; and

(3) the public, upon request to the department, board or commission.

(b) In this section, "direct cost" means a cost which is related to providing a service, exclusive of general administrative and support costs.

Sec. 44.17.130. EXEMPTION. The provisions of AS 44.17.110 - 44.17.120 do not apply to

(1) a program of an executive department, board or commission which provides only professional or technical support services for another state department, board or commission, as determined by the governor; and

(2) a program for which exemption is specifically requested by the department, board or commission, and granted by the governor

because

(A) the program concerns the conservation or development of a natural resource; and

(B) the application of AS 44.17.110 - 44.17.120 would cause a substantial impediment to the performance of duties by the department, board, or commission.

Sec. 44.17.140. DEFINITION. In AS 44.17.100 - 44.17.140, "unorganized borough" means a subdivision of the part of the state not within an organized borough as determined by the commissioner of community and regional affairs under AS 29.03.011 - 29.03.021.

* Sec. 5. RESPONSIBILITIES OF THE DIVISION OF POLICY DEVELOPMENT AND PLANNING. The division of policy development and planning in the Office of the Governor shall

(1) by December 31, 1980, evaluate the cost and suitability of data and information reference systems and recommend the use of a system by the principal departments of the executive branch of the state government, including boards and commissions assigned to those departments for administrative purposes; the data and information system recommended by the division shall

(A) permit cross-referencing of data and information by the executive departments, boards and commissions; and

(B) classify data and information on the basis of the geographic units used by a department, board or commission for program management and cost reporting under AS 44.17.110 - 44.17.120.

(2) report to the legislature by July 1, 1983, alternatives and recommendations for improving coordination of programs which provide direct services to people, which are not exempt under AS 44.17.130.

* Sec. 6. Sections 3 and 4 of this Act take effect and secs. 1 and 2 of this Act are repealed only if a version of an Act entitled "An Act relating

to unorganized boroughs, establishing unorganized boroughs, amending the responsibilities of executive departments for state programs and services for residents of organized and unorganized boroughs, authorizing adoption of home rule charters by unorganized boroughs, and directing submission of recommendations concerning adjustment of the boundaries of service areas of the unorganized borough; and providing for an effective date", becomes law.

* Sec. 7. Sections 1 and 3 of this Act take effect July 1, 1981.

* Sec. 8. Sections 2 and 4 of this Act take effect July 1, 1982.

* Sec. 9. Sections 5 and 6 of this Act take effect immediately in accordance with AS 01.10.070(c).

I. REQUEST

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

There would be no fiscal impact from this bill until there is a appropriation as indicated in section (e)(2)(B) of this bill. However, the Department does anticipate the following additional cost at such time as appropriations are made.

Staff to monitor and oversee contracts.

1. Local Government Specialist I:	Range 19	Salary	31,824
		Fringes	8,910
Travel 10 trips @ 600			6,000
Equipment & Supplies (400 after FY 81)			1,000
Total Position Cost			47,734
[illegible] Local Government Specialist III	Range 17	Salary	27,465
			7.91

We are pleased to enclose the reports of the Local Government Interim Study by the Joint Senate and House Community and Regional Affairs Committee.

Legislation composed of seven bills was introduced jointly by the Senate and the House, Monday, January 21, 1980. Copies of the following bills may be obtained from your nearest Legislative Information Office. The complete package consists of Senate Bills 348, 349, 350, 351, 352, 353, 354; OR House Bills 580, 581, 582, 583, 584, 585, and 586.

For your additional information all the Senate bills in the package were assigned to the Senate Community and Regional Affairs Committee, with a referral to the Finance Committee. All the House bills in the package were assigned as follows: HB 580 - C/RA & Finance; HB 581 C/RA; HB 582 C/RA and Finance; HB 583 C/RA and Finance; HB 584 C/RA and Judiciary; HB 585 C/RA; and HB 586 C/RA. You might want to contact the referrals as well, after the bills leave the Community and Regional Affairs Committees. Senator John Sackett is Chairman of Senate Finance; Representtive Russ Meekins is Chairman of House Finance, and Representative Charles Parr is Chairman of Judiciary.

In the event you are unable to give your comments during the set teleconference times, please feel free to contact the Senate and House R/CA Committees at Pouch V, Juneau, Alaska 99811.

3-26-80 SB 348

DPDP did not get back with F.N. IN time before Committee Mtg. They are still working on it.

T

This bill passed out of our Sen. C/RM 3-25-80

CSSB ~~349~~

This bill addres es certain responsibilities of executive departments important to the implementation of CSSB 348.

State agencies are required to collect data and information according to unorganized borough boundaries so that regional information will be available to local people and to the legislature. Certain exemptions are permitted. State agencies are also required to conduct program planning and management according to unorganized borough boundaries to facilitate coordinated ser ice delivery. Combinations of unorganized boroughs for program planning and management purposes are permitted.

Direct service delivery costs will be made available according to unorganized borough boundaries.

The Division of Policy Development and Planning (DPDP), Office of the Governor, is required to develop a data information system to facilitate state agency data collection and retrieval. Further, DPDP is required to report to the legislature alternatives and recommendations for improving coordination in state service delivery.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

* DPDP has requested in its FY 81 budget, two positions which would have, as a part of their responsibilities, the development of a common geo-coding system for state agencies and the development and implementation of a process for reviewing state service delivery locations. Evaluation of agency service delivery conformity with district boundaries and evaluation of boundary variance requests (a change in wording of the bill is suggested) would fall within the purview of the latter responsibility. These were tasks independently identified during the formulation if DPDP budget and the increases have been shown only once, in the Division budget.

MEMORANDUM

TO: John Halterman, Acting Director
Division of Policy Development
and Planning

DATE: January 25, 1980

FILE NO:

TELEPHONE NO:

FROM: Jay Mopr

SUBJECT: SB 350/HB 581 "...relating to the responsibilities of the Division of Policy Development and Planning

This requires DPDP to produce a report on the subject of agencies' conformity with program requirements of another bill. That bill (I don't have the number) establishes districts throughout Alaska and requires agencies to collect data, develop program planning, coordinate planning and agency activities with other agencies, and provide information on the basis of the districts. The districts are to coincide with the REAA boundaries except where individual commissioners have determined that other boundaries would be more applicable to program requirements and have requested a variance from the Legislative Council.

In reporting on conformity with these provisions, DPDP is to make recommendations which require legislation and, apparently, which relate to the development and implementation of a master geographical coding system. It is not clear from the grammar of these bills that the coding system is to be anything more than a way to report on the coordination of delivery of state services by districts.

The bill should be written to separate the coding system from the conformity issue, since basic coordination among agencies by district will come largely from adherence to a commonly adopted coding system. That system, by itself will help to insure conformity and may necessarily precede conformity.

Although DPDP may undertake evaluations of programs involving more than one agency (AS 44.19), we would not be able to do the conformance evaluation without addition of one full-time position requested in our budget as a Range 18A. The person filling that position should be prepared to do continuing analysis of program district boundaries and service delivery patterns. The bill referred to in SB 350 allows agencies to determine unilaterally the need for boundary variances, submitting requests for variance to the Legislative Council. Such variances are clearly of interagency importance; especially so since the Governor's policy to develop efficient and effective service delivery suggests that space sharing and co-delivery of services may be, overall, more effective than when each agency attempts to minimize its own costs without regard for other agencies. DPDP should commence the design and implementation of a master geocoding system--not just the evaluation of how to do .

The only other reservation I have about the bill is that it refers to a set of pre-determined service delivery boundaries, deviation from which must be justified. This may be a good strategy where programs stand by themselves, but as mentioned above where some programs gain in effectiveness by association with others, there is no guarantee that the synergies of program delivery will be looked at. We had originally proposed that those synergies by investigated and district boundaries be determined on the basis of program clientele needs and other commonalities among programs.

I would add to the current version only the safeguard that someone be assigned the authority for insuring participation and coordination among agencies in evaluating any one agency's request for variance. To do this, someone must develop a comprehensive inventory of service delivery needs and a location model that will compute the economic and social tradeoffs of any agency's proposal for variance from established service delivery boundaries. The position we have requested would do this.

I recommend the language and grammar of the bill be edited to include the points noted above: a) DPDP will report on agencies' conformity in delivering services by district and in collecting data by district; b) DPDP will develop and implement a master geographical coding system for data collection and service delivery, and c) DPDP will have the authority to coordinate among agencies in determining the impacts of boundary variance requests.

cc: Sally Rue

CSSB 348

"AN ACT RELATING TO UNORGANIZED BOROUGHS, ESTABLISHING UNORGANIZED BOROUGHS, ESTABLISHING A PROGRAM OF PLANNING ASSISTANCE FOR UNORGANIZED BOROUGHS, PERMITTING ADOPTION OF HOME RULE CHARTERS BY UNORGANIZED BOROUGHS, AND DIRECTING SUBMISSION OF RECOMMENDATIONS CONCERNING ADJUSTMENT OF THE BOUNDARIES OF SERVICE AREAS OF THE UNORGANIZED BOROUGH"

BOUNDARIES

The bill divides the unorganized borough into "unorganized boroughs" using the boundaries of the Regional Educational Attendance Areas (REAAs). Public hearings are held in each REAA by the Commissioner of Community and Regional Affairs and provision is made for adjustment of the boundary lines.

REGIONAL PLANNING

Each unorganized borough is eligible for regional planning program funds to study the economic, social, and environmental conditions of the area and the interrelationships between governmental units along with an examination of the feasibility of borough organization. No one is required to either undertake a study or form a borough. $25,000 plus $25 per capita is available to each unorganized borough for each of three years for regional planning programs.

HOME RULE

Title 29 is amended allowing for the incorporation, by petition to the Local Boundary Commission, of unorganized boroughs as home rule municipalities. Adoption of a home rule charter would require a majority vote both inside and outside of incorporated municipalities. Nothing in the bill requires the incorporation of a home rule borough or borough of any class. Rather, this section broadens the options currently available to residents in the unorganized borough.

CSSB 350

"AN ACT RELATING TO THE RESPONSIBILITIES OF EXECUTIVE DEPARTMNETS OF STATE GOVERNMENT FOR CERTAIN STATE PROGRAMS"

This bill addresses certain responsibilities of executive departments important to the implementation of CSSB 348. State agencies are required to collect data and information according to unorganized borough boundaries so that regional information will be available to local people and to the legislature. Certain exemptions are permitted. State agencies are also required to conduct program planning and management according to unorganized borough boundaries to facilitate coordinated service delivery. Combinations of unorganized boroughs for program planning and management purposes are permitted. Direct service delivery costs will be made available according to unorganized borough boundaries.

The Division of Policy Development and Planning (DPDP), Office of the Governor, is required to develop a data information system to facilitate state agency data collection and retrieval. Further, DPDP is required to report to the legislature alternatives and recommendations for improving coordination in state service delivery.

Alaska's Constitution establishes the policy of maximum self government for the people. This policy has been implemented through creation of boroughs and cities in urban areas and in some rural communities. However, the vast bulk of Alaska lacks any basis for self-government, and the people do not even have the means for planning and participating in the affairs of their own region. It is this problem that provided the principal focus for the interim work of the Senate and House Community and Regional Affairs Joint Local Government Study of 1979.

Legislative proposals of the Joint Committee were derived from (1) a series of studies and analyses sponsored by the Committee, (2) a two-day symposium designed to define issues and problems and suggest policies and directions, and (3) a series of public hearings held throughout rural parts of the state.

The Joint Committee found wide consensus in favor of a maximum measure of self-determination and self-rule, and establishment of regional units throughout the state to provide a basis for planning and program coordination. At the same time, the people do not want to rush into formal governmental organization; nor do they want it mandated.

Accordingly, the Joint Committee has developed an evolutionary approach that will provide people in rural areas with the means for self-government without forcing anything upon them prematurely. Choices and initiatives are left with each region.

SB 348 and SB350 are two of the bills developed by the Joint Committee.

Dear Senator Sturgulewski:

I would like to thank you on behalf of A.V.C.P., Employment & Training and the City Administrators from the A.V.C.P. Region.

We are sincerely appreciative of your time, guidance and personal assistance which you provided. We are especially appreciative of your awareness and sensitivity to rural problems, although you represent the Anchorage Metropolitan area and areas.

Thank you.

Respectfully,

Theresa Peoples

RE. SB 351

Dear Senator:

We urge you to retain the wording "additional $25,000" in relation to the eligibility for revenue sharing.

We take this position because, as you undoubtedly know, the cities are operating on a road budget based on a 1971 economy. We have consistently spent much more than the required 20%, but still find ourselves with difficult maintenance problems because we can not afford to do the work properly.

Similarly, we find that our snow plowing budget is usually inadequate, because of revenue sharing limitations.

If the additional $25,000 were given, we believe that that would go a long way in covering administrative costs, thereby relieving a higher proportion of road money to be spent on roads.

Similarly, we are operating a fire department on $3,300 per year, based on a census of 440, but we have 22 sq. miles within our city limits. The $3,300 hardly buys gas and oil, much less much needed safety equipment.

We are located in Senator Kerttula's district and he is well aware of our problems also.

We also support the Muncipal League request for additional funding for the cities. We do have a Business License fee, but thus far, it only averages $325 per year revenue.

We appreciate your efforts on our behalf.

Sincerely,

David H. Murr, Mayor

Dear Senator Sackett:

I am Writing this letter on behalve of the City of Hoonah regarding SB 351.

Due to high fuel and electrical cost small cities such as Hoonah faces near bankruptcy in the future if we do not receive some sort of aid soon. Senate Bill 351 would be a means of helping release the financial burdens faced by rural communities.

We are supportive of SB 351 and urge its passage as soon as possible. Thanking you in advance.

Respectfully

RE: Senate Bill 351

Dear Senator Hohman,

The City of Quinhagak is pleased to recieve and read Senate Bill 351 by Rules Committee for Community And Regional Affairs.

Cities in rural areas increasingly become aware of the concerns of the need for financial assistance from State Government, in order to function properly as local Government.

As any other governments finance is the key for successful and effeicent operation of the city and its personnel and other city services. Without personnel and other needed local government services, cities never function properly.

The city is therefore requesting your needed assistance in support of this Bill (Senate Bill 351), city also is requesting your office to encourage passage of any bill designed to generate additional revenues to rural cities.

We are requesting copies of any correspondence from your office for the cities files, your assistance is greatly appreciated in this important matter.

Untill than,
Sincerely,

Sam Cleveland, Mayor
City of Quinhagak

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

To prepare fiscal notes on all bills relating to municipalities would require an additional Local Government Specialist (Range 17). The figures above are based on the bill being passed at the end of the current session and the position becoming effective in January 1981 for the next legislative session.

Personal services costs are based on a Range 17 position with 28% added for benefits plus 8% each additional year for inflation.

Contractual costs are primarily for long distance telephone calls. The one time equipment cost is for a desk, phone, etc.

FROM: Alaska Municipal League

RE: SB 352

The Alaska Municipal League supports SB 352, Fiscal Notes. Material received from the Advisory Commission on Intergovernmental Relations is attached for your information.

Fiscal notes estimate the effect on the expenditures or revenues of a local government of implementing or complying with a proposed state law. These notes can provide information for both legislators and local representatives on the effect of state law on localities. Presently, twenty five states provide some type of formal procedures for attaching fiscal notes to pending legislation affecting state finances. Twenty two states have enacted fiscal note procedures covering proposed legislation affecting local governments.

4.103 Legislative Notes on The Fiscal Impact on Local Governments Of State Legislative Action[1]

State legislative action often affects the expenditures and revenues of state government and local governments. The attachment of estimates of such costs (fiscal notes) to bills as they move through the legislative process assures a legislator's knowledge of the fiscal impact of the new or expanded programs being authorized or the requirements being imposed. It also enables interested citizens to fix responsibility for increased governmental costs and taxes. The Advisory Commission on Intergovernmental Relations, therefore, has recommended that, as a counterpart of a package providing citizens complete information about fiscal affairs, states include, with all major state legislation and proposed administrative regulations affecting local government revenues or expenditures, an explicit note setting out the fiscal impact on those local governments of the legislation or regulations.

The great majority of states provide some formal or informal procedure for attaching fiscal notes to pending legislation affecting state finances. Only 22, however, apply a similar procedure for legislation affecting local governments. Among the latter, only nine require the procedure as a matter of statutory law; most such fiscal note procedures have been established by joint rules of the legislature. Moreover, very few states require the attachment of fiscal notes to proposed administrative rules or regulations.

Attachment of fiscal notes adds a new dimension to the legislative process—an increased sense of responsible questioning and examination on the part of state legislators. With knowledge of the estimated cost of proposed legislation, they must accept responsibility for their acts. The taxpaying public is bound to benefit—either in tax savings or in more considered public programs, or both.

Information Bulletin

Advisory Commission on Intergovernmental Relations
Washington, DC 20575

BULLETIN No. 79-3 April 1979

STATE MANDATES

IN BRIEF

State mandates tend to impose state priorities on local governments. Many mandates require local governments to make organizational changes, provide more services, tell them how to relate to other local governments, or to their own personnel. While they sometimes create a benefit for the local government, more often mandates impose additional costs, especially when they are not accompanied by adequate state financial assistance.

To alleviate some of the difficulties inherent in state mandating of local expenditures, the Advisory Commission on Intergovernmental Relations has recommended that states define and catalog state-initiated mandates, and that they provide reimbursement for mandates which require local governments to provide additional services, exempt property from the tax base, or impose unnecessarily costly personnel requirements. In addition, the Commission has recommended that state legislation and proposed administrative regulations contain an explicit "fiscal note" setting out any financial cost impact on local governments. Copies of the model legislation are ~~attached~~ available.

State Mandates: An Overview

A state mandate can be defined as any state constitutional, statutory, or administrative action that expands or limits local government expenditure requirements. These mandates are frequently used to achieve uniform service levels and more professional standards for employees, but they are often the basis for imposing special interest demands as well. There are state mandates on public library hours, park and recreational programs, and local payments for regional public transit systems. Mandates are enacted on special education programs, local retirement systems, labor relations procedures, and salary and wage levels.

A 1976 ACIR survey of state mandates found they were most prevalent in four areas: 45 states mandated solid waste disposal standards; 45 states mandated special education programs; 42 states set standards for workmen's compensation for local personnel other than police, fire and education; 35 or more states had provisions on retirement systems. 1/

Not surprisingly, a survey of attitudes of local officials toward mandates revealed considerable opposition toward them. Although much of this disgruntlement can be alleviated with full or partial reimbursement of additional costs resulting from the mandates, 26% of the state municipal league representatives felt state mandates were inappropriate even if they were fully reimbursed.

The current financial stress being felt at all levels of government -- stemming from mounting inflation rates, a slowing of federal aid growth, and the growing popularity of tax and expenditure limits -- has made state mandates a problem that many local government officials insist must be rectified.

Current Trends

To date, ten states have acted to regulate state mandates by restricting their use or requiring that localities be fully or partially reimbursed for additional costs imposed by mandates. In 1978, four states enacted reimbursement measures to apply on proposed new mandates. Tennessee, Michigan, and Hawaii voters approved constitutional measures requiring the state to share or

---

1/ Advisory Commission on Intergovernmental Relations, State Mandating of Local Expenditures (Report A-67), Washington, D.C., U.S. Government Printing Office, July 1978.

fully fund costs associated with state-imposed mandates. Florida's reimbursement procedure is statutory.

Tennessee's constitutional revision provides that no law of general application shall impose increased expenditure requirements on cities or counties unless the General Assembly provides that the state share in the cost.

In Michigan, the state is prohibited from "requiring any new or expanded activities by local governments, reducing the proportion of state spending in the form of aid to local governments or shifting the tax burden to local governments" without full state financing.

Hawaii's constitution now provides the state must "share in the cost of any new programs or increased services which the legislature requires that counties provide."

The Florida statute calls for full reimbursement when: (1) a state general law requires municipalities or counties to perform an activity or provide a service or facility which requires the expenditure of additional funds; or (2) a state law grants an exemption or changes the manner by which local property is assessed, or alters authorization to levy local taxes. Partial state reimbursement is to be provided for any state general law which establishes a service or activity which meets both state and local objectives.

Of the six additional states that require state compensation for certain types of mandates, two are statutory and four constitutional:

-- By statute, California calls for full reimbursement for costs to local governments incurred by state-imposed mandates;

-- Montana law calls for either compensation or authorization of additional local taxation to cover the additional costs; and

-- Alaska, Louisiana, Maine and Pennsylvania have constitutional provisions calling for local reimbursement limited to certain types of state mandates.

Fiscal Notes

One step in the direction of state reimbursement is the provision of fiscal notes on state legislation. Fiscal notes estimate the effect on the expenditures or revenues of a local government of implementing or complying with a proposed state law, joint resolution, regulation, rule, order, or administrative action. These notes can serve as a brake on state legislative activity affecting local governments and provide information for both legislators and local representatives on the effect of state law on localities.

Presently, 25 states provide some type of formal procedures for attaching fiscal notes to pending legislation affecting state finances. These procedures vary considerably in their comprehensiveness and applicability. They generally do not extend to agency rules or governor's orders and are not tabulated at the end of the fiscal year.

In 1978, four states enacted fiscal note procedures covering proposed legislation affecting local governments: Connecticut, Georgia, Nevada, and Rhode Island. South Carolina established a fiscal note procedure in both houses of the legislature by rule. Wisconsin and Missouri provided for fiscal notes to be attached to proposed administrative rules and regulations affecting local governments.

Fiscal notes have recently become especially important because more local governments have begun asking for, and more states have begun providing, reimbursement for state mandated programs and services.

Recent State Activity

In this Bulletin, we will look at the state mandating/fiscal note processes in three states: California, Florida and Montana.

California

California's statutes are the most comprehensive of the existing state laws on state reimbursement for mandated costs imposed on local governments. Chapter 1406 of the California statutes of 1972, better known as SB 90, requires that local governments be reimbursed for costs incurred in providing state-mandated services. SB 90 imposed property tax limits on local governments as part of the state's response to Serrano v. Priest, a landmark California Supreme Court case which held that the state's school finance system was unconstitutional under the state's equal protection clause because it made the quality of education a function of local school district's taxable wealth.

The state's commitment to reimburse encompasses local costs that result from new state-mandated programs, increased service levels, and costs previously incurred at local option that have been subsequently mandated by the state. State administrative or executive orders mandating local costs are also to be reimbursed.

To be exempt from SB 90's reimbursement requirements, legislation must contain a disclaimer describing the rationale for nonreimbursable status. Problems have arisen with the initial use of disclaimers, mainly because a 2/3 vote of the legislature is required for all appropriations legislation to be approved. This provides an incentive to determine some reason for a disclaimer. In the first five years of the program, only 76 of the 1,400 bills that imposed state mandates contained appropriations to reimburse local governments. Some disclaimers were based on negligible cash cost to the local governments. Other bills containing disclaimers gave no reason for the exemption.

The legislative council's office identifies bills containing mandates and they are sent to the Local Mandated Program Unit where an estimate of the costs to localities is prepared. If a disclaimer is attached, the bill is sent to the Finance Committee which approves or disapproves the disclaimer.

In 1977 California enacted legislation to deal with many of the problems that have arisen in the wake of SB 90. The legislation changed the minimum threshold for submission of claims by local governments, expanded the grounds for appeal for reimbursement, and required the California Department of Finance to review all non-reimbursed statutes adopted after 1972. Most importantly, local governments are given the right to appeal bills that mandate costs but which contain either a disclaimer or no appropriation.

Florida

In 1978 Florida enacted a bill stating that any statute requiring "municipalities or counties to administer any program or provide any service or facility [to] include an economic impact statement estimating total costs and [to] provide a method of financing such program or service." The measure requires the legislature to finance activities, services, or facilities when both state and local objectives are being served. General laws under which the required expenditure of additional local funds is incidental to the main purpose of the law are exempted.

Reimbursement can be provided by one of three methods: additional state funds, specific authority to the county or municipality to levy a special tax, or through other sources provided by law. Other state or federal revenues shared with or granted to municipalities or counties are not to be reduced, supplanted, or adversely affected because of this reimbursement.

This act can be superceded or modified by subsequent legislation only when the legislation states specifically that it is so doing, and a reason for the change is stated.

Montana

Montana's legislature passed state mandating legislation in 1974. The law requires the state to authorize local governments to increase local tax levies or provide state funding for the mandate. Any law intended to require local governments to exceed their statutory levy authority can be vetoed by local governments. However, the law does not apply to expenses incurred by local governments that are incidental to the main purpose of the law.

The Montana experience has been uneven so far. Although most of the legislation passed since 1974 has included a statement to the effect that local governments may pay for mandates with money from general funds, in March 1976 the Montana Attorney General ruled that additional taxing authority was not conferred on local governments. Therefore, where an all purpose levy is used, the 65 mill limit cannot be exceeded. Jurisdictions have been told, however, they can abandon the all purpose levy and utilize separate levies until the legislature either raises the limit or exempts additional functions from inclusion in the all purpose levy.

The problems caused by this Attorney General's decision have caused Montana's reimbursement system to be unacceptable to many local governments. Until the legislature works out these mandate funding problems, there will continue to be state expansions into the local government arena without sufficient compensating funding.

State Mandates and Fiscal Notes - A Model

The Advisory Commission on Intergovernmental Relations has reviewed the status of state mandating across the country and the problems associated with this practice, and has made a number of

4.116 State Mandates*

The constitutional fact of state supremacy over local governments—the latter being "creatures of the state"—provides the legislature and the courts with authority to issue directives to these local units. State-initiated mandates can be defined to include any state constitutional, statutory, or administrative action that places new fiscal or administrative requirements on local governments. While other definitions might be possible, no matter what definition is used, the main problem raised by mandates is that added costs are imposed on local government officials. Stated simply, state mandates substitute state objectives for local priorities.

Because of the imposed restrictions on local autonomy, few issues create more resentment among local officials than state mandates. While it is necessary that state governments have wide latitude in establishing statewide policies and programs, there is a substantial controversy on how far states should move into certain areas. The real question becomes: Can state mandates be sufficiently differentiated between an "appropriate" mandate, and an "inappropriate" mandate?

The use of mandates has increased in recent years for two notable reasons. First, state legislatures have been increasingly reluctant to raise state taxes in response to public demand for local services. Second, the courts have taken a more active role in ordering improvements in service standards. Consequently, state legislatures are sometimes tempted to mandate local service increases, with no state financing, and let local officials figure out how to pay for the mandates.

Several justifications are offered in defense of mandates: (1) to assure minimum statewide service levels or a more uniform level of service throughout the state; (2) to develop professional standards for employees; and (3) to implement state social or economic policy objectives.

It must be emphasized that there is little or no controversy over many state-initiated mandates, particularly those relating to the organization and procedures of local government. State mandates are justified to prescribe the form of local government, the holding of local elections, and the designation of public officers and their responsibilities. Due process and "safeguard-type" mandates are necessary to insure, for example, the equitable administration of justice and the tax laws as well as to protect the public from malfeasance. State mandates of a supervisory nature are also necessary to require localities to act or to refrain from acting so as to avoid injury to, or conflict with, neighboring jurisdictions.

Despite the controversy and interest in the mandating issue, there is still little information available on the scope of the practice. However, results of an ACIR survey indicate that among the most commonly mandated functions are special education

*Derived from ACIR, *State Mandating of Local Expenditures*, A-67, Washington, DC, U.S. Government Printing Office, September 1978; ACIR, *Labor Management Policies for State and Local Government*, A-35, Washington, DC, U.S. Government Printing Office, September 1969; ACIR, *The Role of the State in Strengthening the Property Tax*, A-17, Washington, DC, U.S. Government Printing Office, June 1963; and ACIR, *State-Local Taxation and Industrial Location*, A-30, Washington, DC, U.S. Government Printing Office, April 1967.

programs (45 states) and solid waste disposal standards (45 states). Workmen's compensation (for local personnel other than police, fire, and education) programs are mandated in 42 states, while various provisions of retirement systems are mandated in 35 or more states. Most controversial, however, are state mandates that extend to traditionally local programs—park and recreational activities, for example.

State controls over, and mandates upon, local governments are manifested in constitutional and statutory provisions and in judicial interpretations thereof. Some state constitutional provisions and state legislation are enacted for the purpose of restraining such state mandates. For example, four state constitutions—Alaska, Louisiana, Pennsylvania, and Tennesse—limit the power of the state legislature to impose mandates upon local governments.[1] But the Pennsylvania provision, after disavowing interference with internal affairs proceeds to mandate binding arbitration of firemen and policemen.[2]

Proponents of the constitutional approach argue that this is surest way to protect local autonomy. The constitutional amendment is preferable, they argue, because state statutes cannot bind future legislatures. On the other hand, opponents of constitutional restrictions stress that this approach removes the flexibility state legislatures need to meet unforeseen future demands swiftly and decisively.[3] Opponents also note that the constitutional route is slower than statutory action.

A third position advocates a constitutional provision which requires a two-thirds vote of both houses of the legislature before the state legislature may mandate local government expenditures without offsetting state financial aid. This provision is supported in some states on the ground that the proposed procedure is in conformity with the authorization procedure contained in the existing home rule amendment allowing the state legislature by a two-thirds vote to pass a special law, provided the Governor has recommended passage of the law.

Besides the constitutional provisions, some states have adopted statutes which require state compensation for future mandated local costs or revenue losses, or both.[4] To date, the California statutes are the most comprehensive of the existing state laws on state reimbursement for mandated costs to local government. Under the terms of Chap. 1406, 1972, California statutes adopted the principle of reimbursing local governments for the costs incurred in providing state-mandated services. The reimbursement provision is broad in scope and intent, but it should be noted that such reimbursement applies only to subsequent mandates, and not retroactively. The state government commitment to reimburse is not limited to specific areas of governmental activities; rather, it encompasses local costs that result from (1) new state-mandated programs; (2) increased service levels mandated for existing pro-

[1] *Constitution of the State of Alaska*, art. II, sec. 19, provides that "local acts necessitating appropriations by a political subdivision may not become effective unless approved by a majority of the qualified voters voting thereon in the subdivision affected." The constitution also forbids a political subdivision to contract a debt "unless authorized for capital improvements by its governing body and ratified by a majority vote of those qualified to vote and voting on the question." *Constitution of the State of Louisiana*, art. VI, sec. 14, provides that "No law requiring increased expenditures for wages, hours, working conditions, pension and retirement benefits, vacation or sick leave benefits of political subdivision employees, except a law providing for civil service, minimum wages, working conditions and retirement benefits for firemen and municipal policemen, shall become effective until approved by ordinance enacted by the governing authority of the affected political subdivision or until the legislature appropriates funds for the purpose to the affected political subdivision and only to the extent and amount that such funds are provided." Art. II, sec. 24, of the *Tennessee Constitution* provides in part: "Laws imposing increased expenditures on local governments must provide method of funding, and, in case of bills of general application, provide state share in the cost."

[2] Art. III, sec. 31, of the *Constitution of the Commonwealth of Pennsylvania* provides: "The General Assembly shall not delegate to any special commission, private corporation or association, any power to make, supervise or interfere with any municipal improvement, money, property or effects, whether held in trust or otherwise, or to levy taxes or perform any municipal function whatever. Notwithstanding the foregoing limitation or any other provision of the Constitution, the General Assembly may enact laws which provide that the findings of panels or commissions, selected and acting in accordance with law for the adjustment or settlement of grievances or disputes or for collective bargaining between policemen and firemen and their public employers shall be binding upon all parties and shall constitute a mandate to the head of the political subdivision which is the employer, or to the appropriate officer if the Commonwealth is the employer, with respect to matters which can be remedied by administrative action, and to the lawmaking body of such political subdivision or of the Commonwealth, with respect to matters which require legislative action, to take the action necessary to carry out such findings."

[3] In reviewing the draft legislation, states will need to consider whether a constitutional amendment is necessary to make the legislation workable.

[4] *Revised Codes of Montana, Annotated*, sec. 43-517, provides that "Any law enacted by the legislature after July 1, 1974, which requires a local government unit to perform an activity or provide a service or facility which will require the direct expenditure of additional funds must provide a means to finance the activity service or facility." And further, that "the local government unit may refuse to administer or enforce any law which does not comply with the requirements of the section if that law requires any expenditure that would require the local government unit to exceed its statutory levy authority."

grams: and (3), by amendment, costs previously incurred at local option that have subsequently been mandated by the state. Mandated local costs arising from state administrative or executive orders are also to be reimbursed.

In drafting its recommended model bill, ACIR has concentrated on the reimbursement principle and suggests that it constitutes the core of any legislative proposal. The ACIR policy on state mandates rests on the belief that states mandating either new programs or increases in service levels, or personnel and retirement benefits should share in the cost that these programs impose on local governments.

The first step necessary to come to grips with the state mandating problem is a catalog or inventory of existing state mandates. The legislative or executive branch, or both jointly, should define and then catalog existing state-initiated mandates originating by legislation, executive order, or administrative rule and regulation. All state-initiated mandates adopted in the future should be added to the catalog, and the estimated costs imposed on local governments by all new mandates should be tabulated at the conclusion of each legislative session. After a catalog is created, the same reviewing body should categorize these mandated programs so that they may be fit into proper categories for reimbursement as discussed later. Most importantly, the catalog provides the indispensable first step necessary to rationalize mandates in terms of current policy concerns. (Some states may wish to institute some "sunset" procedure for mandates, once an accurate listing has been obtained.)

Secondly, to accomplish these policy objectives, state statutes should provide procedures and formulas for partial or full reimbursement to local governments, depending upon the category of the mandate. Drawing from the California statute, the following draft bill provides certain safeguards: (a) a fiscal note process to evaluate the cost of all mandates, and (b) a strict interpretation of state-initiated mandates.

Finally, in recognition of the potential for disagreement between state and local units of government as to the costs imposed by state-initiated mandates, the draft bill provides for an appeal and adjustment procedure through a state agency designated to resolve local governments' claims arising from inadequate state funding of the reimbursement provisions. Optional provisions are included to give the local government units the right to refuse to carry out a mandate not in compliance with the reimbursement policy and to appeal to the courts once administrative procedures have been exhausted.

Section 1 gives the short title of the bill.

Section 2 serves as a policy statement for the bill, including the recognition that state mandates have often produced confusing, inconsistent, and inequitable relationships between the state government and its local political subdivisions, and that to correct these problem areas a review of existing mandates should be undertaken with an eye to developing corrective actions to produce a consistent and equitable framework of state-local relations.

To establish a uniform basis for sifting through the historical record, the term "mandate" must be defined. *Section 3* of the bill defines a state mandate and the various categories of mandates. A broad rather than narrow definition is preferable in providing a basis for differential treatment of various types of mandates.[5] These definitions serve as a necessary prerequisite to any cataloging or reimbursement procedure, and constitute a first step of a review process of state mandates.

Section 4 of the suggested legislation calls for the legislative or executive branch, or both jointly, to catalog and publish descriptions of existing state-initiated mandates originating by legislation, executive order, or administrative rule and regulation. State mandates which are a result of federal legislative, executive, and court initiatives are also to be included in the catalog with appropriate annotation, as are all future state-initiated mandates. The estimated costs of all new state mandates imposed on local governments are to be tabulated at the conclusion of each legislative session.

Section 4 provides further that the catalog should indicate to which local government unit or official the mandate is directed, whether or not direct costs are attributable to the mandate and what those costs are, the extent of state financial participation in the mandate, and a description of the mandate and its source.

Section 5 requires that, in addition to any statutory requirements for evaluating the fiscal impact of proposed mandates, the state legislature and executive branch adopt, either by statute or rules of procedure, provisions for a statement of the statewide policy objective or objectives that require or justify the imposition of the proposed requirement upon the local government. The premise underlying this re-

[5] If the definition of mandates in general is narrowed at the outset, the door is closed to obtaining a complete inventory of mandates in effect and a subsequent delineation of "justified" and "unjustified" mandates.

quirement is that a good deal of irritation and friction concerning state-mandated costs imposed on local governments stem from the failure to articulate clearly the statewide policy objective.

Section 6 specifies the reimbursement share to be paid by the state government to the local unit for each category of mandate defined in *Section 3* of the bill. Briefly, subsection (b) calls for at least a 50% reimbursement of service mandates. Subsection (c) calls for a 100% reimbursement of the loss of local revenue directly attributable to a mandated classification or exemption of property for purposes of ad valorem property taxation. Subsection (d) calls for reimbursement of personnel mandates to the full extent of increased costs incurred by local governments directly attributable to the mandate, with a few exceptions. Subsection (e) calls for a 100% reimbursement of local governmental costs directly attributable to a mandated increase in public employee retirement benefits. It should be noted that reimbursements are to be paid only for mandates effective subsequent to the effective date of this legislation.

Finally, subsection (a) of *Section 6* expressly relieves the state of reimbursement liability for mandates dealing with the organization and structure of local government, matters of due process, and interlocal equity as defined in *Section 3* of the bill. Subsection (f) provides that any proposal which creates or enlarges a state mandate shall bear either a proposed authorization for appropriation of an amount necessary for reimbursement or a disclaimer from reimbursement liability, stating the specific reason for such exclusion as provided in *Section 9*(a).

Section 7 deals with the situation where the state also places a lid on local expenditures or taxes and calls for local government units to have the authority necessary to levy taxes beyond the general limitations on local government taxes or expenditures when mandates are not reimbursed. As a practical matter, this authority can be restricted to those local costs that exceed $5,000 or 1% of the local operating budget. In this way, the financial bind of local officials will be eased while the state policy will be coordinated through a reconciliation of program objectives and the desire to restrain local government tax and expenditure growth.

Section 8 calls for the state agency charged with oversight of mandates to complete and submit to the Governor and the legislature, within three months of the publication of the catalog prescribed in *Section 4*, a review and report on mandates existing prior to the effective date of the act. This report is to include but not be restricted to matters relating to the history of the mandate, its costs, and extent of state reimbursement and whether the mandate continues to meet a statewide policy objective and whether reimbursement should be undertaken. The report is to include any other information or recommendations which the agency considers pertinent. The objective of this required review would be to highlight those mandates that no longer meet a current statewide policy objective, and at the same time to uncover mandates that continue to meet current statewide policy but need to be strengthened or changed if they are to be effective.

Once it has been determined that reimbursement is a desirable statewide policy, a mechanism for reviewing reimbursement applications and for paying reimbursements to the local unit must be established. *Section 9* of the bill sets forth this procedure. First, however, subsection (a) expressly lists several circumstances which shall exclude the state from reimbursement liability. Basically, these circumstances are those which impose little recognizable new duty on the local government, or impose only minimal new costs, or those which impose additional costs but also provide offsetting savings. Additionally, subsection (a) enables the legislature to disclaim reimbursement liability for a unique or compelling policy reason, provided the reason is stated within the proposed act establishing the mandate.

Subsections (b) and (c) of *Section 9* provides the procedures necessary for an estimation of reimbursement costs, application for reimbursement, and a disbursement procedure. Most importantly, subsection (b) calls for an estimate of mandated costs to be prepared by an agency of the state executive branch after consultation with the affected local government unit and for the estimate to be submitted to both houses of the legislature before consideration of the proposal. Subsection (c) calls for the local governmental unit affected by the mandate to submit an application for reimbursement with estimated costs within 60 days of its effective date, and for an agency of the executive branch to review this application and forward the application upon approval to the appropriate agency for reimbursement or to the legislature for a direct appropriation to the local units of government. It should be noted that all reimbursement procedures are subject to the right of the state to audit the records of any local government to verify the actual costs of the mandate and make changes if necessary. Subsection (d) of *Section 9* provides the local unit with the authority needed to appeal any adverse reimbursement decision to a designated state agency.

States having a general revenue sharing or per

capita aid program for local governments will aready have established procedures for executive review, appeal, and reimbursement that can be adapted to accommodate mandate reimbursement application, review, and adjudication.

Some states may desire to make reimbursements a funtion of the legislature, through annual appropriations to the individual local units, following receipt of a recommended reimbursement schedule from the executive branch.

Recognizing that such an administrative appeals process may not be sufficient in some cases, an optional *Section 9* is included in the draft legislation calling for local governmental units to have the right (a) to initiate court action when the local unit feels there has been inadequate reimbursement or an improper decision as to whether a proposal involves state-mandated costs, or to enjoin the effect of the mandate until funds are available; and (b) to refuse to comply with the mandate.

Suggested Legislation

[AN ACT RELATING TO STATE MANDATING OF LOCAL GOVERNMENT EXPENDITURES, SERVICES, STANDARDS, EMPLOYMENT CONDITIONS, AND RETIREMENT BENEFITS]

(Be it enacted, etc.)

SECTION 1. *Short Title.* This act may be cited as "The State Mandates Act."

SECTION 2. *Findings and Purpose.*

(a) The [*legislature*] finds that preceding actions of the state government in specifying the manner, standards, and conditions under which public services are rendered to citizens by the political subdivisions of this state on occasion have not resulted in equitable relationships between the state government and its local political subdivisions. Some of these actions have dealt in detail with the internal management of local governments, others have specified the establishment of new services and facilities without providing any new revenue sources or any financial participation by the state in meeting the additional costs; still others have specified the adoption of higher service standards without a full assessment of the impact upon local expenditures and tax rates.

(b) It is the purpose of this act

(1) to provide for the collection and periodic publication of information on existing and future state and federal mandates;

(2) to enunciate policies, criteria, and procedures to govern any future state-initiated specification of local government services, standards, employment conditions, and retirement benefits that has the effect of necessitating increased local government expenditures in such a way as to accommodate the constitutional obligations of the state government in addressing problems of statewide concern, while avoiding the imposition of state standards upon essentially local responsibilities without appropriate reimbursement or other appropriate fiscal participation on the part of the state government; and

(3) to provide for a review of existing mandates and an identification of the nature and magnitude of corrective actions needed to produce a consistent and equitable framework of state-local relations regarding mandated services, standards, and expenditures.

SECTION 3. *Definitions.*

(a) "Local government" means a city, [municipality,] county, township, town, [borough, village,] school district, or special district.

(b) "State mandate" means any state-initiated constitutional, statutory, or executive action that requires a local government to establish, expand, or modify its activities in such a way as to necessitate additional expenditures from local revenues, including any order issued by a state court except judgments in

eminent domain condemnation and tort liability proceedings, or proceedings relating to local government performance or nonperformance under any contract or agreement. State mandates may be reimbursable or nonreimbursable as provided in this act.

(c) "Local government organization and structure mandate" is a state mandate concerning such matters as

(1) the form of local government and the adoption and revision of local government charters,

(2) the establishment of multicounty districts, councils of governments, or other forms and structures for interlocal cooperation and coordination;

(3) the holding of local elections;

(4) the designation of public officers, and their duties, powers, and responsibilities; and

(5) the prescription of administrative practices and procedures for local governing bodies.

(d) "Due process mandate" is a state mandate concerning such matters as the

(1) administration of justice,

(2) notification and conduct of public hearings,

(3) procedures for administrative and judicial review of actions taken by local governing bodies, and

(4) protection of the public from malfeasance, misfeasance, or nonfeasance by local government officials.

(e) "Benefit spillover" is the process of accrual of social or other benefits from a governmental service to jurisdictions adjacent to, or beyond the jurisdiction providing the service.

(f) "Service mandate" is a state mandate as to creation or expansion of governmental services or delivery standards therefor and those applicable to services having substantial benefit spillover and consequently being wider than local concern; for purposes of this act, applicable services are

(1) elementary and secondary education,

(2) community colleges,

(3) public health,

(4) hospitals,

(5) public assistance,

(6) air pollution control,

(7) water pollution control,

(8) solid waste treatment and disposal,

(9) non-local public transportation, and

(10) [*other statewide or non-local services for which the state might be expected to establish levels or delivery standards.*]

A state mandate that expands the duties of a public official by requiring the provision of additional

services is a "service mandate" rather than a "local government organization and structure mandate."

(g) "Interlocal equity mandate" is a state mandate requiring local governments to act so as to benefit other local governments or to refrain from acting to avoid injury to, or conflict with, neighboring jurisdictions, including such matters as

(1) land use regulations,

(2) tax assessment procedures for equalization purposes, and

(3) environmental standards.

(h) "Tax exemption mandate"[1] is a state mandate that exempts privately owned property or other specified items from the local tax base, such as

(1) exemption of business inventories from the local property tax base, and

(2) exemption of food or medicine from the local sales tax.

(i) "Personnel mandate" is a state mandate concerning or affecting local government

(1) salaries and wages,

(2) employee qualifications and training (except when any civil service commission, professional licensing board, or personnel board or agency established by state law sets and administers standards relative to merit-based recruitment of candidates for employment or conducts and grades examinations and rates candidates in order of their relative excellence for purposes of making appointments or promotions to positions in the competitive division of the classified service of the public employer served by such commission, board, or agency).

(3) hours, location of employment, and other working conditions, and

(4) fringe benefits including insurance, health, medical care, retirement and other benefits.

SECTION 4. *Collection and Maintenance of Information Concerning State Mandates.*

(a) The [department of community affairs] [state comptroller] [*other agency in the executive branch of state government*] [*committee, agency, or office of the legislature*] shall be responsible for

(1) collecting and maintaining information on state mandates, including such information as may be required for effective implementation of the provisions of this act;

(2) reviewing local government applications for reimbursement submitted pursuant to this act;

(3) hearing complaints or suggestions from local governments and other affected organizations as to existing or proposed state mandates; and

(4) reporting periodically to the Governor and [*legislature*] regarding the administration of provisions of this act and changes proposed thereto.

(b) (1) Within [12 months] following the effective date of this act, the [*head of state agency*

[1] See suggested legislation *State Compensation Programs for State-Owned Property*

specified in subsection (a) above] shall collect and tabulate relevant information as to the nature and scope of each existing state mandate, including but not necessarily limited to

(i) identity of type of local government and local government agency or official to whom the mandate is directed;

(ii) whether or not an identifiable local direct cost is necessitated by the mandate and the estimated annual amount;

(iii) extent of state financial participation, if any, in meeting such identifiable costs;

(iv) state agency, if any, charged with supervising the implementation of the mandate;

(v) a brief description of the mandate and a citation of its origin in statute or regulation.

(2) The resulting information shall be published in a catalog [available to legislators, state and local officials, and interested citizens]; as new mandates are enacted they shall be added to the catalog, and at the conclusion of [*each annual or biennial session of the legislature or other specified time*] the [*state executive or legislative agency*] shall list each new mandate enacted at the preceding legislative session, and the estimated additional identifiable direct costs, if any, imposed upon local governments.[2] A revised version of the catalog shall be published every [five] years, beginning with the publication date of the initial version.

(3) Information comparable to that described in subsection (1) above shall be collected by [*state agency*] regarding federal legislative, executive, and judicial mandates and shall be included in the initial and subsequent versions of the catalog.[3]

SECTION 5. *Specification of State Policy Objective.*

(a) Subsequent to the effective date of this act, any proposal for legislation submitted by the executive branch of the state government, any bill filed for introduction by a member of the [*legislature*], and any committee print of a new or amended bill that has the effect of creating or enlarging a state mandate upon local government as defined in Section 3(b) of this act shall include, in addition to the estimated additional costs to the affected local governments as provided under [*citation of any statute(s) requiring the attachment to proposed legislation of notes on local government fiscal impact*], a statement of the statewide policy objective or objectives that require or justify the imposition of the proposed requirements upon local government and the extent to which such policy objectives or objective cannot be achieved in the absence of such proposed requirements.[4]

(b) Subsequent to the effective date of this act, any executive order or administrative regulation

---

[2] See suggested legislation *Legislative Notes on the Fiscal Impacts on Local Governments of State Actions*. Also a provision might be included for differentiating between initial or first-year costs and subsequent annual operating costs.

[3] Federal mandates are so numerous and complex that states may wish to confine catalog coverage to certain major or other selected categories.

[4] In some states the substance of this subsection would be provided in the legislature's rule of procedure rather than by statute, at least with regard to the responsibilities imposed upon individual members or committees; alternatively such a rule might provide that consideration of a mandate bill would not be in order, absent the required statement of policy objective.

that creates or enlarges a mandate as defined in Section 3(b) of this act shall include a statement of the statewide policy objective or objectives as specified in subsection (a) above.

SECTION 6. *State Reimbursement to Local Government for Increased Costs Arising from Certain State Mandates.*

(a) Any increased costs accruing to local governments as a direct result of mandates dealing with the organization and structure of local government, due process mandates, and interlocal equity mandates as defined in subsections (c), (d), and (g) respectively, of Section 3 above, are not reimbursable by the state.

(b) At least [50%], but under no circumstances more than [100%] of the increase in costs of a local government directly attributable to a service mandate as defined in Section 3(f) enacted legislatively or established administratively subsequent to the effective date of this act shall be reimbursed by the state unless there is in existence at the time of such enactment a program of state aid for the service affected by the mandate whereunder the non-local share for any participating local government is [50%] or greater and where the increased costs arising under the mandate constitute allowable expenditures under the aid program. Where all or part of the increased costs are met through federal or other external aid, only the net increase to the local government shall be included in the base against which the amount of state reimbursement is to be computed.

[(c) [100%] of the loss in revenue of a local government directly attributable to a mandated classification or exemption of property for purposes of ad valorem property taxation enacted subsequent to the effective date of this act shall be reimbursed by the state. The loss of revenue does not include potential revenue from property of a type which was not being assessed and taxed on January 1, [*insert year in which this act is to be effective*].][*]

(d) Except for a state mandate that places a floor under retirement benefits or that affects personnel qualifications for local employees, the salaries and wages of which are partially or wholly financed under a state aid program, any personnel mandate as defined in Section 3(i) above enacted legislatively or established administratively subsequent to the effective date of this act shall be reimbursed by the state to the extent of increased costs incurred by local governments directly attributable to such mandate.

(e) All of the increased costs of a local government directly attributable to a mandated increase in public employee retirement benefits enacted subsequent to the effective date of this act [and which has the effect of elevating retirement benefits of local government employees above an adequate level—to

---

[*]States may wish to provide total or partial reimbursement in case of mandated exemptions of business inventories (see ACIR *State Legislative Program*, Vol. 3, M-94, *State and Local Revenues*, 3.10", pp. 49-52, Washington, DC, U.S. Government Printing Office, November 1975). See suggested legislation, *State Compensation Programs for State-Owned Property*.

costs above a 75% takehome salary replacement] shall be reimbursed by the state.[6]

(f) Subsequent to the effective date of this act, any proposal for legislation submitted by the executive branch of state government, any bill filed for introduction by a member of the [*legislature*], and any committee print of a new or amended bill that creates or enlarges a state mandate of the type specified in subsections (b), (c), (d), and (e) above, shall bear either a proposed authorization for appropriation of an amount necessary to provide the reimbursement specified above or a disclaimer from reimbursement liability, stating the specific reasons for such exclusion, as provided in Section 9(a) below.

SECTION 7. *Exemption from State-Imposed Limits of Taxes* [*and/or Expanditures*] *of Local Governments of Revenues Needed to Meet Increased Costs Directly Attributable to State Mandates.*

Execution of state mandates as defined in this act is hereby declared a public purpose of affected local governments in the [*insert name of state*], and where the increased local costs directly attributable to any nonreimburseable mandate as provided in Section (6) above exceeds [$5,000] [1% of the operating budget of the local government], the excess may be included in the [property tax levy] [fiscal year's operating expenditure] above and beyond the limitations set forth in [*cite applicable statutory provision setting general limitations upon local government tax rates or levies or upon expenditures*].

SECTION 8. *Review of Existing Mandates.*

(a) Concurrently with, or within [three] months subsequent to the publication of a catalog of state mandates as prescribed in Section 4(b) above, the [*state agency charged with oversight of mandates in Section 4(a)*] shall submit to the Governor and the [*legislature*] a review and report on mandates enacted prior to the effective date of this act and remaining in effect at the time of submittal of the report.

(b) The report shall include for each mandate the following:

(1) the factual information specified in Section 4(b) for the catalog;

(2) extent to which the enactment of the mandate was requested, supported, encouraged, or opposed by local governments or their respective organizations;

(3) whether or not the mandate continues to meet a statewide policy objective or has achieved the initial policy intent in whole or in part;

(4) amendments if any required to make the mandate more effective;

(5) whether the mandate should be retained or rescinded;

(6) whether state financial participation in helping meet the identifiable increased local costs arising from the mandate should be initiated, and if so, recommended ratios and phasing-in schedules; and

---

[6] In many states most local government retirement benefits have already reached what are regarded as adequate levels among retirement and actuarial experts (e.g., 75%-80% take-home salary replacement after meeting length of service requirements); many are beginning to exceed this level amid increasing concern about the financial soundness of local retirement systems. Each state will need to develop its own definition of "adequacy" with any mandated enrichments over that level subject to full or partial state reimbursement.

(7) any other information or recommendations which the [*state agency*] considers pertinent.

[(c) Any mandate not renewed, revised, or dealt with otherwise by the [*legislature*] shall terminate at the end of three years following the publication of the initial version of the catalog prescribed in Section 4(b).][7]

[(d) The [*appropriate committee of each house of the legislature*] shall review the report and shall initiate such legislation or other action as it deems necessary.]

SECTION 9. *Exclusions. Reimbursement Application, Review, Appeals, and Adjudication.*

(a) *Exclusions.* Any of the following circumstances inherent to, or associated with, a mandate shall exclude the state from reimbursement liability under this act. If the mandate

(1) accommodates a request from local governments [or organizations thereof];[8]

(2) results in no new governmental duties, including legislation or regulation permissive in nature;

(3) provides only clarifying or conforming, nonsubstantive changes in an earlier statute or regulation;

(4) imposes additional duties of a nature which can be carried out by existing staff and procedures at no appreciable net cost increase;

(5) creates additional costs but also provides offsetting savings resulting in no aggregate increase in net costs;

(6) imposes a cost that is wholly or largely recovered from federal, state, or other external financial aid;

(7) imposes additional net costs of less than [$1,000 for a single local government or 1/10 of a mill on the statewide aggregate local property tax base].

Additionally, the [*legislature*] may exclude a mandate from reimbursement liability for a unique or compelling policy reason, such reason to be stated in the act establishing the mandate.

(b) *Reimbursement Estimation and Appropriation Procedure.*

(1) When a bill is introduced in the [*legislature*], the [*legislative counsel or other office of the legislature*] shall determine whether such bill requires reimbursement to local governments pursuant to this act. The [*counsel or office*] shall make such determination known in the digest of the bill.

In making the determination required by this subsection the [*legislative counsel*] shall disregard any

---

[7] If a state desires to initiate a "sunset" procedure for forcing attention to mandates already on the books, the procedure should follow that set forth in the state's general "sunset" law, if one exists, additionally the legislature might find it preferable in consideration of workload to exclude "form and structure" and "due process" mandates from the scope of "sunset."

[8] A state mandate that arises as a direct result of a legislative provision sought by local governments probably should not require reimbursement. The wording of this exclusion depends upon the structure and process that underlies state legislation on local government affairs in a given state including such factors as: the extent to which such matters are handled by general law or as special legislation targeted by name or narrow population class to one or a few local governments; the nature of the local governments' request in a specific instance; nature of testimony given in support of the legislation; degree of unanimity of support among the individual local governments; and the role of state organizations of city or county officials and the scope and nature of the process by which the organizations establish positions in support of or opposition to specific legislative bills.

provision in a bill which would make inoperative the reimbursement requirements of Section 6 above, and shall make the determination irrespective of any such provision.

(2) Whenever the [*legislative counsel*] determines that a bill will require state reimbursement to a local government as provided in Section 6, the [*department of finance or other executive branch fiscal agency*], after consultation with the [*department of community affairs or the state agency designated in Section 4 and subsequently*] shall prepare estimates of the amount of reimbursement which will be required.[9] Such estimates shall be prepared for the [*respective committees of each house of the legislature*] which consider taxation and appropriation measures and shall be prepared prior to any hearing on such a bill by any such committee.

(3) The estimate required by subsection (2) above shall be the amount estimated to be required during the first fiscal year of a bill's operation in order to reimburse local governments pursuant to Section 6, for costs mandated by such bill. In the event that the operative date of such a bill does not begin on the first day of [*state fiscal year*], the estimate shall also include the amount estimated to be required for reimbursement for the next following full fiscal year. In the event that a bill is amended on the floor of [*either house*], whether by adoption of the report of a conference committee or otherwise, in such a manner as to require reimbursement pursuant to this act, the [*legislative counsel*] shall immediately inform, respectively, the [*Speaker of the House and the President of the Senate*] of such fact. Such notification from the [*legislative counsel*] shall be published in the journal of the [*respective houses of the legislature*].

(4) For the initial fiscal year, reimbursement funds shall be provided as follows:

(i) any statute mandating such costs shall provide an appropriation therefor, and

(ii) any executive order mandating such costs shall be accompanied by a bill to appropriate the funds therefor, or, alternatively an appropriation for such funds shall be included in the executive budget for the next following fiscal year.

In subsequent fiscal years, appropriations for such costs shall be included in the [executive budget] and general or supplemental appropriation bills.

(5) The amount appropriated for such purposes shall be [appropriated to the [*state fiscal agency*] for disbursement] [appropriated directly to the local units of government pursuant to subsection (c) below].

(c) *Reimbursement Application and Disbursement Procedure.*

(1) For the initial fiscal year during which reimbursement is authorized, each local government believing itself to be entitled to reimbursement under this act shall submit to the [*department of community affairs*] [*state fiscal agency*] [*other appropriate state officials or agency*], within [60] days of

---

[9] Where the legislature has provided a fiscal note procedure (as referenced in footnote to *Section 4(b)(2)* above), somewhat different wording may be needed.

the operative date of the mandate a claim for reimbursement accompanied by its estimate of the increased costs required by the mandate for the balance of the fiscal year. [*The department of community affairs*] [*or other state executive agency*] shall review such claim and estimate and forward them with its comments to the [*state fiscal agency*]]. The [*department of finance*] [*or appropriate state fiscal agency*] shall [pay such claims from the funds appropriated pursuant to subsection (b) above, provided that it may

(i) audit the records of any local government to verify the actual amount of the mandated cost, and

(ii) reduce any claim determined to be excessive or unreasonable.] [submit to the [*legislature*] a schedule of recommended appropriation to respective units of local government.]

(2) For the subsequent fiscal years, local governments shall submit claims as specified above on or before [*date*] of each year. The [*state fiscal agency*] shall [pay] [recommend to the [*legislature*] the payment of] such claims from funds appropriated therefor, provided that it

(i) may audit the records of any local governments to verify the actual amount of the mandated cost.

(ii) may [reduce] [recommend to the [*legislature*] the reduction of] any claim, determined to be excessive or unreasonable, and

(iii) shall adjust the payment to correct for any underpayments or overpayments which occurred in the previous fiscal year.

(3) Any funds received by a local government pursuant to this act may be used for any public purpose.

(d) *Appeals and Adjudication.*

(1) Local governments may appeal determinations made by state officers acting pursuant to this act. The appeal must be submitted to the [*department of community affairs or other state agency designated in Section 4*] within [days] following the date of receipt of the determination being appealed. [The appeal must include evidence as to the extent to which the mandate has been carried out in an effective manner and executed without recourse to standards of staffing or expenditure higher than specified in the mandatory statute]. The [*state agency*], after reviewing the evidence submitted to it, [may increase or reduce the amount of a reimbursement claim] [shall submitt to the legislature any recommendations for change]. [The decision of the [*agency*] shall be final.] [*Some states, especially those already having boards of control or other adjudicatory body for review of claims against the state may wish to provide a second level of appeal*].

SECTION 10. *Refusal to Comply with Mandate and Judicial Review Thereof.*

[(a) An affected local government may, by resolution refuse to comply with or enforce any law not meeting the requirements of this act.[10] A copy of such resolution shall be transmitted within 24

hours to the [attorney general; Governor.]]

(b) [*A section that would permit a local government to initiate court action to determine whether or not an enacted statute or issued executive order correctly specifies that it does not involve any state-mandated costs, or if it involves such costs that there is an adequate appropriation available and that would require the court to enjoin the effect of the mandate until funds are available.*][11]

SECTION 11. *Effective Date.* [*Insert effective date.*]

SECTION 12. *Separability.* [*Insert separability clause.*]

---

[10]See *Revised Codes of Montana*, sec. 43-517, SB 231, Florida Senate, 1978, provided "The municipality or county may refuse to comply with, administer, or enforce any law which does not comply with the requirements of this section unless such law expressly supersedes or modifies this act. No subsequent legislation shall be deemed to supersede or modify any provision of this act, whether by implication or otherwise except to the extent that such legislation shall do so expressly; reasons for legislative deviations from this section shall be stated with particularity in the preamble of the act."

4.103 Legislative Notes on The Fiscal Impact on Local Governments Of State Legislative Action[1]

State legislative action often affects the expenditures and revenues of state government and local governments. The attachment of estimates of such costs (fiscal notes) to bills as they move through the legislative process assures a legislator's knowledge of the fiscal impact of the new or expanded programs being authorized or the requirements being imposed. It also enables interested citizens to fix responsibility for increased governmental costs and taxes. The Advisory Commission on Intergovernmental Relations, therefore, has recommended that, as a counterpart of a package providing citizens complete information about fiscal affairs, states include, with all major state legislation and proposed administrative regulations affecting local government revenues or expenditures, an explicit note setting out the fiscal impact on those local governments of the legislation or regulations.

The great majority of states provide some formal or informal procedure for attaching fiscal notes to pending legislation affecting state finances. Only 22, however, apply a similar procedure for legislation affecting local governments. Among the latter, only nine require the procedure as a matter of statutory law; most such fiscal note procedures have been established by joint rules of the legislature. Moreover, very few states require the attachment of fiscal notes to proposed administrative rules or regulations.

Attachment of fiscal notes adds a new dimension to the legislative process—an increased sense of responsible questioning and examination on the part of state legislators. With knowledge of the estimated cost of proposed legislation, they must accept responsibility for their acts. The taxpaying public is bound to benefit—either in tax savings or in more considered public programs, or both.

As states move toward reimbursement of local governments for mandated programs, the attachment of fiscal notes becomes an essential part of any such procedure. The fiscal note will provide a basis for estimating the cost of such reimbursement and then initiating the actual reimbursement process.[2]

The following suggested legislation requires that fiscal notes be attached to legislation or administrative actions affecting local governments. It comprises a full fiscal note procedure and can be made to apply to legislation affecting state government. States that already have adequate state fiscal note legislation may simply wish to use the applicable local government provisions as amendatory to their present statutes. Requiring fiscal notes on legislation affecting local governments may also be handled through legislative rules or resolutions, rather than by statute.

The suggested bill is based on Arkansas and Maryland statutes (Act 221, 1977 Session, and An-

[1]Derived from ACIR, *State Limitations on Local Taxes and Expenditures*, A-64, Washington, DC, U.S. Government Printing Office, February 1977; and *State Mandating of Local Expenditures*, Report A-67, Washington, DC, U.S. Government Printing Office, September 1977.

[2]See suggested legislation on *State Mandates*.

notated Code, Art. 40, secs. 63-7-A, respectively).

Section 1 states the title of the act.

Section 2 states the findings and purpose of the legislation.

Section 3 defines a fiscal note.

Section 4 requires that fiscal notes be attached to all bills and resolutions with a fiscal impact on local governments.

Section 5 provides a parallel requirement for administrative rules and actions.

Section 6 specifies the information to be contained in a fiscal note.

Section 7 designates the official responsible for preparing the fiscal note or for determining that a fiscal note is not necessary and directs the official to obtain the advice and assistance of local government officials, when appropriate.

Sections 8 and 9 provide for revision of notes and replacement of waivers with notes if bills and resolutions are amended to change their fiscal impact.

Section 10 requires that fiscal notes be made available for public inspection.

Sections 11 and 12 are separability and effective date clauses.

[AN ACT REQUIRING THE ATTACHMENT OF FISCAL NOTES TO PROPOSED LEGISLATION AFFECTING LOCAL GOVERNMENT FINANCES]

(Be it enacted, etc.)

SECTION 1. *Short Title.* This act may be cited as the "[*State*] Local Government Fiscal Notes Act."

SECTION 2. *Findings and Purpose.*

(a) The [*legislature*] finds that many [local political subdivisions] of this state are adversely affected by the fiscal effects of rules, orders of regulatory bodies, and acts of the [*legislature*]. In many instances, neither the [*legislature*] nor the affected local governments are fully aware of the extent of the fiscal consequences of proposed laws or administrative actions. The [*legislature*] finds also that awareness on the part of legislators and interested citizens of the fiscal impact of proposed administrative actions and laws can result in tax savings or in more considered programs, or both.

(b) It is the purpose of this act to require the attachment of a fiscal note to each proposed law, joint resolution, regulation, rule, order, or administrative law presumed to have a fiscal impact on the [local political subdivisions] of this state.

SECTION 3. *Fiscal Note Defined.* For purposes of this act, "fiscal note" means a realistic statement of the estimated effect on the expenditures or revenues of [local political subdivisions] of implementing or complying with a proposed law, joint resolution, regulation, rule, order, or administrative law.

SECTION 4. *Fiscal Note Required on Legislation.* Before any vote is taken in a committee of the [*legislature*] or on the floor of [*either house*] thereof, on any bill or joint resolution affecting the expenditures or revenues of a [local political subdivision], a fiscal note shall be filed with the chairman of the committee to which the bill or resolution was referred and the [*chief clerk of each house*]. Any representative of any [local political subdivision] requesting a copy of the fiscal note shall be furnished with a copy immediately upon request. The sponsor of the bill or resolution shall be responsible for causing copies of the fiscal note to be furnished as required by this act.

SECTION 5. *Fiscal Note Required on Administrative Actions.* No regulation, rule, order, or administrative law, or amendment to an existing regulation, rule, order, or administrative law which would affect the expenditures or revenues of any [local political subdivision] in this state shall be valid, unless 30 days prior to its adoption by the board, commission, agency, department, officer, or other authority of the government of the [*insert state*], except the [legislature, the courts, and the

Governor], such board, commission, agency, department, officer, or other authority shall file a fiscal note with the [*secretary of state*]. Any [local political subdivision] that will be affected by the proposed regulation, rule, order, administrative law, or amendment thereto shall, upon request, immediately be furnished with a copy of the fiscal note by the board, commission, agency, department, officer, or other authority.

SECTION 6. *Contents of Fiscal Note.* A fiscal note shall contain an estimate of the effect of the bill, joint resolution, or administrative action on the expenditures or revenues of [local political subdivisions] for the fiscal year in which the bill, joint resolution, or administrative action would become effective if enacted and for the next [four] succeeding fiscal years. If the effect of the bill, joint resolution, or administrative action is not expected to be totally evident within the applicable period, the estimate shall be projected beyond that period to include an estimate for the first fiscal year in which it is expected to be fully effective.

SECTION 7. *Preparation of Note or Waiver.* The [*chief fiscal officer*][1] [*legislative research director*] shall have the fiscal note prepared by his office or by other departments or agencies of state government. Where appropriate, he shall seek the advice and assistance of local government officials or their representatives. A waiver of the fiscal note shall be prepared by the [*chief fiscal officer*] [*legislative research director*] for any bill, joint resolution, or administrative action that does not have a direct effect upon the revenues or expenditures of [local political subdivisions]. If the fiscal note is not prepared by the [*chief fiscal officer*] [*legislative research director*], the department or agency of state government preparing the fiscal note shall be clearly indicated on the fiscal note along with the signature of the [*chief fiscal officer*] [*legislative research director*] or his authorized representative indicating that the [*chief fiscal officer*] [*legislative research director*] agrees with the fiscal impact estimate thereon.

SECTION 8. *Revision of Note.* A fiscal note that is attached to a bill or joint resolution shall be revised if an amendment is adopted that changes the fiscal effect of the bill or joint resolution, unless this requirement is waived by [the chairman of the committee to which the bill was referred,] the [*president of the senate*] or the [*speaker of the house*]; provided, however, that such waiver shall apply only to technical changes. The revised fiscal note shall be processed by the [*chief fiscal officer*] [*legislative research director*] and returned as quickly as possible to the committee, or the clerk of the [*house*], or [*secretary of the senate*] if one of the latter has the custody of the bill or joint resolution at that time.

SECTION 9. *Replacement of Waiver With Note.* A waiver of a fiscal note shall be replaced with a fiscal note if an amendment to a bill or joint resolution causes the bill or joint resolution to have an ef-

[1]Either the chief fiscal officer of the executive branch or of the legislature may be designated.

fect upon the revenues or expenditures of [local political subdivisions].

SECTION 10. *Retention of Copy of Fiscal Note or Waiver; Inspection; Publication of Note or Waiver in Journals; Matter of Public Record.*

(a) A copy of each fiscal note or waiver of a fiscal note shall be retained by the [*chief fiscal officer*] [*legislative research director*], and be reasonably available for public inspection, for [at least three years following its preparation] [the duration of the program]. The fiscal note or waiver of a fiscal note attached to any bill or joint resolution shall be published in the [journal of each house of the [legislature] [session laws for the legislative session in which the act to which it applies is enacted].

(b) A fiscal note, upon being filed as herein provided, is a public record within the meaning of the [*cite state freedom of information act*]

SECTION 11. *Separability.* [*Insert separability clause.*]

SECTION 12. *Effective Date.* [*Insert effective date.*]

March 8, 1980

TO: Senator John Sackett
Senate Finance

FROM: Senator Arliss Sturgulewski

On March 6 the Senate Community and Regional Affairs Committee passed out SB 352 with a unanimous do-pass. The next committee of referral is Senate Finance. There has been growing interest in many states to have state legislatures more aware of the financial implications of their actions on local governments. Alaska seems to be no exception to that interest. For example, Senators Hackney, Ziegler and Kelly introduced SB 309, An Act requiring the preparation of a local government impact statement. That bill is currently before Community and Regional Affairs. Substitute language is currently being prepared that could either be attached to SB 292 as amended, An Act requiring fiscal notes to be prepared for regulations having fiscal impact, or could be considered as a committee substitute for SB 309. Senate Bill 309 speaks to the impact of changes in regulations as they might impact local governments; while SB 352 speaks to impacts of particular bills that could cause a financial impact on local communities.

During the committee meetings we spent considerable time discussing how legislation should be written to require a fiscal note showing municipal impact. I'm sending along materials submitted by the Alaska Municipal League that might help the Senate Finance Committee when it considers this bill. We discussed utilizing more specific language, such as consideration only of major impacts. However, testimony by the Community and Regional Affairs Department indicated they were comfortable with the wording of the bill and would of course be prepared to carry out the legislation if it should pass. There is a fiscal note accompanying SB 352.

I would be very happy to work with you or designated staff in the event you feel this legislation needs further refinement or discussion. I strongly support this bill and would appreciate your support and assistance. Thanks, John.

We are pleased to enclose the reports of the Local Government Interim Study by the Joint Senate and House Community and Regional Affairs Committee.

Legislation composed of seven bills was introduced jointly by the Senate and the House, Monday, January 21, 1980. Copies of the following bills may be obtained from your nearest Legislative Information Office. The complete package consists of Senate Bills 348, 349, 350, 351, 352, 353, 354; OR House Bills 580, 581, 582, 583, 584, 585, and 586.

For your additional information all the Senate bills in the package were assigned to the Senate Community and Regional Affairs Committee, with a referral to the Finance Committee. All the House bills in the package were assigned as follows: HB 580 - C/RA & Finance; HB 581 C/RA; HB 582 C/RA and Finance; HB 583 C/RA and Finance; HB 584 C/RA and Judiciary; HB 585 C/RA; and HB 586 C/RA. You might want to contact the referrals as well, after the bills leave the Community and Regional Affairs Committees. Senator John Sackett is Chairman of Senate Finance; Representative Russ Meekins is Chairman of House Finance, and Representative Charles Parr is Chairman of Judiciary.

In the event you are unable to give your comments during the set teleconference times, please feel free to contact the Senate and House R/CA Committees at Pouch V, Juneau, Alaska 99811.

A BILL

For an Act entitled: "An Act eliminating third class boroughs."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.08.030 is amended to read:

Sec. 29.08.030. CLASSES OF GENERAL LAW. General law municipalities are of four [FIVE] classes:

(1) first class boroughs;

(2) second class boroughs;

(3) [THIRD CLASS BOROUGHS;]

(4) first class cities;

(5) second class cities.

* Sec. 2. AS 29.08.040(g) is amended to read:

(g) A second class borough may reclassify as a first class [OR THIRD CLASS] borough [, AND A THIRD CLASS BOROUGH MAY RECLASSIFY AS A FIRST CLASS OR SECOND CLASS BOROUGH,] in the manner provided by AS 29.-33.270 - 29.33.290 for the addition of powers by boroughs, except the petition or proposal requests reclassification instead of requesting addition of powers.

* Sec. 3. AS 29.78.010(1) is amended to read:

(1) "borough" means a general law first or [,] second [OR THIRD] class organized borough;

* Sec. 4. AS 02.15.260(10) is amended to read:

(10) "municipality" means a home rule or general law municipal corporation and political subdivision, which is a first or second class borough or city [, OR A THIRD CLASS BOROUGH,] incorporated under the

laws of the state;

* Sec. 5. AS 14.12.110 is amended to read:

Sec. 14.12.110. SINGLE BODY AS ASSEMBLY AND SCHOOL BOARD. Notwithstanding the provisions of this chapter or other law, a single body may serve as both the borough assembly and borough school board in the manner provided for in this section [THIRD CLASS BOROUGHS UNDER AS 07.-17.030], if a borough ordinance for that purpose is approved by the assembly and ratified by a referendum of a majority of the qualified borough voters voting on the question at a regular or special election, and if the public school population within the borough is 500 pupils or less. If a single body serves as both the borough assembly and school board, the borough executive is the presiding officer of the borough assembly and president of the school board and the borough executive has all powers of a borough executive under AS 29.23 except for the veto power.

* Sec. 6. AS 38.05.037(a) is amended to read:

(a) In areas of the state outside first and [,] second [OR THIRD] class boroughs where there is no municipality with a zoning power, the division of lands shall exercise the zoning power by adopting zoning regulations.

* Sec. 7. AS 40.15.070 is amended to read:

Sec. 40.15.070. PLATTING AUTHORITY. If land proposed to be subdivided or dedicated is situated within a first or second class borough, the proposed subdivision or dedication shall be submitted to the borough planning commission for approval. If the land is situated within a city in the unorganized borough, [OR THE THIRD CLASS BOROUGH] the proposed subdivision or dedication shall be submitted to the city planning commission for approval. The borough planning commission is the platting authority for the first or second class borough, the city planning

commission is the platting authority for the city, and the division of lands is the platting authority in the remaining areas of the state [AND THIRD CLASS BOROUGH] for the change or vacation of existing plats or a portion of such plats, as provided in AS 40.15.075. If the borough or the city does not have a planning commission, the borough assembly or the city governing body, respectively, is the platting authority and the proposed subdivision or dedication shall be submitted to it. No subdivision may be filed for record until it is approved by the platting authority.

* Sec. 8. AS 40.15.075 is amended to read:

Sec. 40.15.075. AUTHORITY IN THE UNORGANIZED BOROUGH [AND THIRD CLASS BOROUGHS]. The division of lands is the platting authority in the area outside organized boroughs and outside cities in the unorganized borough [AND IN THE THIRD CLASS BOROUGH] for only the purposes of hearing and acting on petitions for the change or vacation of plats and shall execute this function substantially in conformity with the provisions of AS 29.33.210 - 29.33.240. Costs of publication and mailing as well as other costs authorized in AS 29.33.210 shall be paid to the division by the petitioner. The Department of Natural Resources shall adopt reasonable regulations governing the exercise of the authority conferred by this section upon the division of lands.

* Sec. 9. AS 43.35.130 is amended to read:

Sec. 43.35.130. REFUND TO LOCAL GOVERNMENTS. The department shall refund 75 percent of the tax collected from sales of punchboards in an organized borough or city of the first or [,] second [, OR THIRD] class to the local government. The balance shall be deposited in the general fund.

* Sec. 10. A municipality which is incorporated as a third class borough on the effective date of this Act may continue to operate as such until

December 31, 1984 and shall retain all the rights, powers and privileges which it possessed on the effective date of this Act. A third class borough which has not reclassified itself in the manner provided by AS 29.33.270 - 29.33.290 before December 31, 1984, is reclassified as a second class borough on that date.

* Sec. 11. The following laws are repealed: AS 29.08.040(h), (i), and (j); AS 29.41; AS 29.43.040(b); and AS 38.05.037(b)(2).

I. REQUEST

GENERAL FUND	0	0	0	25.0	0	0
FEDERAL FUNDS						
OTHER (Specify Fund Source)						

POSITIONS None

FULL TIME						
PART TIME						
TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

AS 29.18.180(a) states that boroughs that reclassify are entitled to an organizational grant of $25,000. This bill would force one existing third class borough to reclassify and thereby entitle it to a $25,000 grant. No other municipality is affected by the bill.

FY 83 is the estimated year of reclassification, although it could conceivably take place any time between FY 80 and FY 85.

SENATE BILL NO. 354

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act eliminating third class boroughs."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.08.030 is amended to read:

Sec. 29.08.030. CLASSES OF GENERAL LAW. General law municipalities are of four [FIVE] classes:

(1) first class boroughs;

(2) second class boroughs;

(3) [THIRD CLASS BOROUGHS;]

(4) first class cities;

(5) second class cities.

* Sec. 2. AS 29.08.040(g) is amended to read:

(g) A second class borough may reclassify as a first class [OR THIRD CLASS] borough [, AND A THIRD CLASS BOROUGH MAY RECLASSIFY AS A FIRST CLASS OR SECOND CLASS BOROUGH,] in the manner provided by AS 29.-33.270 - 29.33.290 for the addition of powers by boroughs, except the petition or proposal requests reclassification instead of requesting addition of powers.

* Sec. 3. AS 29.78.010(1) is amended to read:

(1) "borough" means a general law first or [,] second [OR THIRD] class organized borough;

* Sec. 4. AS 02.15.260(10) is amended to read:

(10) "municipality" means a home rule or general law municipal corporation and political subdivision, which is a first or second class borough or city [, OR A THIRD CLASS BOROUGH,] incorporated under the

laws of the state;

* Sec. 5. AS 14.12.110 is amended to read:

Sec. 14.12.110. SINGLE BODY AS ASSEMBLY AND SCHOOL BOARD. Notwithstanding the provisions of this chapter or other law, a single body may serve as both the borough assembly and borough school board in the manner provided for in this section [THIRD CLASS BOROUGHS UNDER AS 07.-17.030], if a borough ordinance for that purpose is approved by the assembly and ratified by a referendum of a majority of the qualified borough voters voting on the question at a regular or special election, and if the public school population within the borough is 500 pupils or less. If a single body serves as both the borough assembly and school board, the borough executive is the presiding officer of the borough assembly and president of the school board and the borough executive has all powers of a borough executive under AS 29.23 except for the veto power.

* Sec. 6. AS 38.05.037(a) is amended to read:

(a) In areas of the state outside first and [,] second [OR THIRD] class boroughs where there is no municipality with a zoning power, the division of lands shall exercise the zoning power by adopting zoning regulations.

* Sec. 7. AS 40.15.070 is amended to read:

Sec. 40.15.070. PLATTING AUTHORITY. If land proposed to be sub divided or dedicated is situated within a first or second class borough, the proposed subdivision or dedication shall be submitted to the borough planning commission for approval. If the land is situated within a city in the unorganized borough, [OR THE THIRD CLASS BOROUGH] the proposed subdivision or dedication shall be submitted to the city planning commission for approval. The borough planning commission is the platting authority for the first or second class borough, the city planning

commission is the platting authority for the city, and the division of lands is the platting authority in the remaining areas of the state [AND THIRD CLASS BOROUGH] for the change or vacation of existing plats or a portion of such plats, as provided in AS 40.15.075. If the borough or the city does not have a planning commission, the borough assembly or the city governing body, respectively, is the platting authority and the proposed subdivision or dedication shall be submitted to it. No subdivision may be filed for record until it is approved by the platting authority.

* Sec. 8. AS 40.15.075 is amended to read:

Sec. 40.15.075. AUTHORITY IN THE UNORGANIZED BOROUGH [AND THIRD CLASS BOROUGHS]. The division of lands is the platting authority in the area outside organized boroughs and outside cities in the unorganized borough [AND IN THE THIRD CLASS BOROUGH] for only the purposes of hearing and acting on petitions for the change or vacation of plats and shall execute this function substantially in conformity with the provisions of AS 29.33.210 - 29.33.240. Costs of publication and mailing as well as other costs authorized in AS 29.33.210 shall be paid to the division by the petitioner. The Department of Natural Resources shall adopt reasonable regulations governing the exercise of the authority conferred by this section upon the division of lands.

* Sec. 9. AS 43.35.130 is amended to read:

Sec. 43.35.130. REFUND TO LOCAL GOVERNMENTS. The department shall refund 75 percent of the tax collected from sales of punchboards in an organized borough or city of the first or [,] second [, OR THIRD] class to the local government. The balance shall be deposited in the general fund.

* Sec. 10. A municipality which is incorporated as a third class borough on the effective date of this Act may continue to operate as such until

December 31, 1984 and shall retain all the rights, powers and privileges which it possessed on the effective date of this Act. A third class borough which has not reclassified itself in the manner provided by AS 29.33.270 - 29.33.290 before December 31, 1984, is reclassified as a second class borough on that date.

* Sec. 11. The following laws are repealed: AS 29.08.040(h), (i), and (j); AS 29.41; AS 29.43.040(b); and AS 38.05.037(b)(2).

	2,898	2,174			$371,673

1/ Number of veterans in each disability rating was received by telephone from Mr. Waldron of the Veteran's Administration.

2/ Assume that 25% of the veteran's rent their home or have some arrangement other than homeownership.

3/ Assume that veteran's will average similar tax bills to those in the senior citizen property tax exemption program.

4/ A number of veterans may already be receiving property tax exemption because they are age 65 or over, this factor cannot be readily calculated so due to this and other factors the fiscal impact may be somewhat lower than that estimated.

SENATE BILL NC. 370

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to fire prevention."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.060(a) is amended to read:

(a) The assessor shall assess property at its full and true value as of January 1 of the assessment year, except as provided in this section and AS 29.53.030, 29.53.035, and 29.53.160. The full and true value is the estimated price which the property would bring in an open market and under the then prevailing market conditions in a sale between a willing seller and a willing buyer both conversant with the property and with prevailing general price levels. The assessor may not include the value of a fire protection system in the assessment of the full and true value of a building.

* Sec. 2. AS 42.05.381 is amended by adding a new subsection to read:

(d) A utility may not charge a fee or surcharge to provide standby water for fire protection systems which use hydraulic sprinklers.

* Sec. 3. AS 45.95.020(a) is amended to read:

(a) The commissioner shall, under regulations and policies adopted by him, make small business loans to acquire, finance or refinance or equip businesses, including farming equipment, fire protection equipment, mining and fishing, not exceeding $500,000. The loans shall be secured by acceptable collateral and may not exceed 75 percent of the appraised value of the collateral offered as security. The rate of interest may not exceed nine and one-half percent a year on the unpaid balance. The commissioner shall give preference in the granting of

loans under this section to applications for loans the purpose of which is to purchase and install fire protection equipment.

* Sec. 4. AS 45.95.020 is amended by adding a new subsection to read:

(e) The commissioner may not disqualify an applicant for, or prejudice the applicant's privilege to receive, a loan to purchase and install fire protection equipment on the basis of a prior or present loan to the applicant under AS 45.95.

* Sec 5. AS 44.33.170 is amended by adding a new subsection to read:

(b) Tourist attraction development matching money may also be obtained for the purpose of purchasing and installing fire protection equipment for a building used or to be used for the purposes described in (a) of this section.

1026 WEST 4TH AVENUE, SUITE 208
ANCHORAGE, ALASKA 99501
(907) 274-6644

February 29, 1980

The Honorable Hugh Malone
Pouch V
Juneau, Alaska 99811

Dear Mr. Malone:

Re: Definitions of Fire Protection Systems in House Bill 648

At the House Community and Regional Affairs Committee hearings on the above bill, a question concerning definition of fire protection systems was raised. The State Fire Chiefs Association explained their understanding of the bill was that it would cover those fire protection and fire alarm systems as defined in the National Fire Codes. What follows is a suggested definition of fire protection systems.

> Fire protection systems are those systems as defined in the National Fire Codes, current edition, published by the National Fire Protection Association.
>
> The systems include, but are not limited to, the following: Foam extinguishing systems, high expansion foam systems, carbon dioxide systems, Halon 1301 systems, Halon 1211 systems, dry chemical systems, water operation fixed systems, foam/water sprinkler and supply systems, standpipe and hose systems, hydraulic sprinkler systems, and associated pumps and tanks as required for the foregoing systems.
>
> Fire alarm systems include, but are not limited to: supplemental station signalling systems, local protective signalling systems, auxilliary signalling systems, remote station signalling systems, proprietary signalling systems, automatic fire protection systems.

The growing public support for this bill is indicative of its benefit. The Alaska Fire Chiefs Association and the Alaska State Fire Fighters Association emphatically urge its enactment.

If you have any questions please do not hesitate to call.

Very truly yours,

Brian R. Shute

Brian R. Shute, Attorney for
Alaska Fire Chiefs Association and
Alaska State Fire Fighters Association

Vol. 12

1979 NFC

Fire Hydrant—means a valved connection on a water supply system having one or more outlets and which is used to supply hose and fire department pumpers with water.

Fire Lane—means the road, path, or other passageway developed to allow the passage of fire apparatus through congested areas (both built-up and wildland).

Fire Marshal—means the individual designated as the administrative head of the agency, bureau or division responsible for the administration and enforcement of this Code. The Fire Department Chief Administrative Officer shall assume these responsibilities in those jurisdictions where a separate agency, bureau or division is not established. Other titles used to designate this individual are: Fire Prevention Official, Chief Fire Prevention Officer, Chief of the Bureau of Fire Prevention or Fire Prevention Chief. For purposes of enforcement of this Code, this term shall also apply to any person designated as a representative of the Fire Marshal.

Fire Official—means any authorized person serving as a designated employee, representative, or agent of the Fire Department.

Fire Protection System—means ~~any fixed device~~ or system, or fire extinguishing ~~device~~ or system, ~~or their combination~~, which is designed and installed for detecting, controlling, or extinguishing a fire, ~~or otherwise alerting occupants or the fire department~~, or both, that a fire has occurred.

Fire Retardants—mean liquids, solids or gases which tend to inhibit combustion when applied on, mixed in, or combined with combustible materials.

Fireworks Display—means the use of fireworks in a manner to provide audio and visual entertainment to a group of people.

Flamespread Rating—means the comparative performance of fire travel over the surface of a material when tested in accordance with the provisions of *Method of Test of Surface Burning Characteristics of Building Materials, NFPA No. 255* (*see Appendix B*). Grouping of ratings is listed in *Life Safety Code, NFPA No. 101 (see Annex A)*.

Gallon—means one U. S. Standard Gallon.

Grade—means the reference plane representing the average elevation of finished ground level adjoining the building at all exterior walls.

STATE OF ALASKA

JAY S. HAMMOND, Governor

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER

POUCH B
JUNEAU, ALASKA 99811

May 6, 1980

The Honorable Arliss Sturgulewski
Chairman
Senate C&RA Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

RE: CSHB 648 (FINANCE)

As per your request, the following represents the Department's concerns of CSHB 648.

Most of our concerns surfaced during our discussion on the original Senate Bill 370.

Our main concern in this bill is the statutory placement of the exemption. As this bill is an exemption, it should be placed in that category and not be an attempt to weaken the definition of full and true value. The reasoning for this is two-fold. First, the amended section which reads "The assessor may not include the value of a fire protection system in the assessment of the full and true value of a building" is contradictory to the definition of full and true value contained in the same section.

Second, exemptions, full or partial, mandatory or optional, are contained in 29.53.020, 29.53.025, 29.53.030, and 29.53.035. These are referred to constantly by the local assessor, and separating exemptions statutes would make it more difficult for the local municipality to effectively use Title 29.

The major concerns which the municipalities have expressed to the Department is the administration of the language used in this bill. The "value" of fire protection systems could be interpreted several ways, i.e., unit cost, in place cost, or market value. The market value of such a system could be well below the cost to install, thereby making the administration of this bill very difficult for the local municipality. It is also quite possible for some properties appear not to receive this exemption if the valuation is done by the income approach. This approach is utilized for commercial property in Anchorage and as other areas begin to become more sophisticated they will also use this approach.

The suggestion we made in regards to SB 370 could be implemented here as well. This would require the assessor to exempt 2% of the value of the building. The 2% was obtained from an international cost manual and reflects the average value of a fire protection system.

I hope this addresses the areas which you questioned and I would like to thank you for taking time to ask about our concerns on pending legislation.

Sincerely,

Lee

Lee McAnerney
Commissioner

TWO INTERPRETATIONS

(Insurance Services Agency)

APUC - says water standby charge is based on insurance rating for each area.

Whether water is used or not, certain amounts must be available in case of fire.

If SB 370 passes, APUC interprets:

- that buildings with sprinkler systems will not have to pay a fee or surcharge once system is installed....

IN VIEW OF THE ABOVE MANDATED CHARGE, APUC CONTENDS SOMEONE MUST PAY THE DIFFERENCE, AND THEY INTERPRET THIS DIFFERENCE AS COMING FROM ALL OTHER CONSUMERS, WHETHER COMMERCIAL, RESIDENTIAL, OR THE GENERAL PUBLIC.

Mr. Shirnberg interprets this bill to mean only commercial buildings will be affected - and any price differential would be equally split among all commercial buildings, whether they have sprinkler systems installed, or not. The general public would not be affected.

QUESTION: Also, APUC was established to set fair rates - is this law attacking the rate making process - even just a small portion?? And, is this good - to start ....?

MEMORANDUM State of Alaska

DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

A hard copy

TO: Marie Pignalberi
Deputy Commissioner

DATE: March 10, 1980

FILE NO:

THRU: Palmer McCarter
Director

TELEPHONE NO:

FROM: Steve Van Sant
Assistant State Assessor

SUBJECT: Comments on SB 370

This is a followup of the memorandum dated 3/5/80 to Deputy Commissioner Marie Pignalberi regarding concerns on SB 370.

Upon obtaining more information and talking with some of the assessors in the state, we would like to add the following information:

1. According to Anchorage Assessor, Pat McKee, this bill would be almost impossible for him to administer. The reason being that Anchorage does not value commercial property (where most fire protection equipment exists) by the cost approach, but by the income approach. The income approach is simply estimating market value by the income a building is capable of making. For example, assume there are two motels in Anchorage, side by side, and both were very similar. Further assume that one had sprinklers and the other one did not. The estimated value of one motel would probably be within 1%-5% of the value of the other, assuming the room rents were comparable. In this instance, there would be no value given on fire protection equipment, therefore, it would be very difficult to conform with SB 370.

2. As stated in our previous memorandum, we are concerned as to what value the assessor is expected to exempt, cost of equipment, cost of equipment and labor, or estimated market value. If it is to be the cost of the equipment, would the assessor take the actual cost to the owner, or the average cost to any property in general?

3. This bill does not require reimbursement by the state for revenues lost to the municipality by the implementation of this bill.

4. The property owner in the unorganized borough who plans to install fire protection equipment would not realize any incentive under this program (and, in our minds, if the bill is to be an incentive for installation of fire suppression systems, rural Alaska or the unorganized borough is where the greatest need exists).

ALTERNATIVE 1

For your information, we have attached pages from the "Marshall Valuation Service". This valuation service is used world wide by many assessors. Nearly all assessors in Alaska who value commercial property by the cost approach utilize this guide.

On one of the pages, it indicates that the approximate portion of the total cost for "sprinklers" in an office building is 1.9%.

If it is the intent of the legislature to pass a bill whereby the incentive is an exemption of property taxes, the Department would suggest amendments to SB 370 as follows:

1. Remove this exemption from AS 29.53.060 (Full and True Value) and place it in AS 29.53.020 (Required Exemptions).

2. State the amount to be exempted if a structure does have fire protection equipment. This could be done easily by stating, "The exempted amount of this exemption shall be 2% of the full and true value of the building as determined by the assessor under AS 29.53.060."

3. The state should reimburse the municipality any revenue lost to it by the implementation of this bill.

4. There should be a time limit of three years placed upon the exemption. This would allow time for the taxpayer to amortize his investment, but not be an on-going give away program.

5. Existing structures could be granted the same 2% exemption for three years to be equitable. (Although, again, if the intent is to encourage installation of a fire suppression system, only new structures should be included in the bill).

Alternative 2

If the intent of SB 370 is to offer incentives to property owners planning new construction and encourage the inclusion of fire protection systems in new structures, the Department suggests that a program similar to the following be considered.

For equity proposes, the state would adopt a normal cost schedule for fire protection systems. An example of such a cost schedule is presented in the attachments, page No. 2 from the Marshall Valuation Service. In conjunction with this schedule, Marshall Valuation Service also provides "local multipliers" which bring the normal cost schedule

into line with costs in Alaska. The local multiplier for the schedule is 1.97.

After adoption of a schedule, the Department could then compute the "normal cost" of a fire protection system by applying the schedule to each structure which applied for the program. For example, if an application were received for a 10,000 sq. ft. building, the normal costs would be obtained as follows:

10,000 sq.ft. X $1.15 X 1.97 = $22,655.00

After the normal costs were calculated, the incentive program would offer a grant to the property owner of 5% of the computed normal cost. Therefore, the property owner would receive $1132.75 ($22,655 X 5%) from the state. The normal costs could be updated on an annual basis to reflect current estimated normal costs.

Attachments

GENERAL INFORMATION

PERCENTAGE BREAKDOWN

The percentages below indicate the approximate portion of the total cost attributable to each component in a typical modern 12-story Class A office building of average size and quality, not including financing costs.

AVERAGE MULTISTORY OFFICE BUILDING

Plans, engineering, and supervision	6.2%
Clearing, excavation, and foundation	2.7%
Steel frame and decking	13.4%
Miscellaneous steel	1.0%
Heating and air conditioning	12.9%
Air conditioning enclosures	.5%
Plumbing	4.5%
Sprinklers	1.9%
Electrical, including fixtures	9.3%
Elevators, conveying systems	4.9%
Metal wall panels and insulation	5.3%
Masonry backup and partitions	3.0%
Frame and drywall partitions	3.7%
Sash and glazing	3.0%
Plaster and furring	2.0%
Doors, door frames, and hardware	.6%
Concrete floors and roof	7.5%
Roofing and roof insulation	.3%
Resilient floor coverings	1.2%
Carpeting	1.2%
Acoustical ceilings, suspended	2.5%
Painting	.8%
Marble, tile, and terrazzo	.4%
Miscellaneous carpentry, finish, and cleanup	1.0%
Miscellaneous, unclassified	.8%
General contractor's overhead and profit	9.4%
TOTAL	100.0%

The 9.4 percent listed for general contractor's overhead and profit is the percentage of total cost. This is the equivalent of 11.1 percent of labor, material, and subcontracts, excluding plans, engineering and architect's supervision.

FLOOR LOADS

The following are typical live floor loads of some of the buildings used in determining cost averages. A majority of the buildings will have more than one design floor load to accommodate various uses. Thus, a hotel will be designed for heavy floor loads in halls and public areas and lighter floor loads in room areas, and banks will need heavier floors in computer and equipment rooms than in office areas.

The listed loads are typical of design specifications of a number of buildings built or under construction during recent years.

OCCUPANCY	POUNDS PER SQUARE FEET	
Apartments and dormitories	40	(plus 20 lbs. of partitions)
Auditoriums and churches	100	(60 for fixed seating)
Banks	100	(150 lbs. in equipment floors)
Computer and equipment floors	150	
Dwellings	40	
Governmental buildings	80	(125 lbs. in equipment rooms)
Gymnasiums	100	(150 lbs. for drill floors)
Hospitals	50	(100 lbs. in corridors)
Hotels and clubs	50	(100 lbs. in public areas)
Libraries	60	(150 lbs. in stack areas)
Light industrials and garages	100	(50 lbs. in office areas)
Medium industrials	150	(50 lbs. in office areas)
Heavy industrials	200	(and up, 60 lbs. in office areas)
Lofts	100	(50 lbs. in office areas)
Low cost offices	50	(125 lbs. in equipment rooms)
Average offices	50	(150 lbs. in equipment rooms)
Good offices	60	(150 lbs. in equipment rooms)
Excellent offices	80	(175 lbs. in equipment rooms)
Restaurants	100	(150 lbs. in kitchen areas)
Schools	50	(100 lbs. in corridors)
Stores	100	(125 lbs. in appliance floors)
Theaters	80	(150 lbs. for stage floors)
Warehouses - light	100	
- medium	150	
- heavy	200	(and up)

STORES AND COMMERCIAL BUILDINGS

(SEGREGATED COST METHOD)

INTERIOR CONSTRUCTION — Table I is based on averages for several types of occupancies not including furniture, fixtures, and equipment. Table II gives costs based on a square foot of partition area and may be used when a more detailed analysis is desired. For additional interior and partition costs, see Section 52. For fixture and equipment costs, see Section 65.

TABLE I. Apply to total floor area. Add or deduct 5% for each foot of variation from 12' average story height.

FRAME INTERIOR PARTITIONS	1	2	3	4
Bowling alleys (excluding alleys and equipment)	$ .77	$ .92	$1.09	$1.30
Department stores	1.94	2.54	3.32	4.34
Discount stores	.56	.70	.88	1.11
Markets	.89	1.02	1.17	1.35
Restaurants, drive-in	2.80	3.79	5.12	6.92
Restaurants, table service	2.48	3.83	5.91	9.12
Retail stores	.82	1.17	1.66	2.37

MASONRY INTERIOR PARTITIONS				
Bowling alleys (excluding alleys and equipment)	$ .95	$1.12	$1.32	$1.56
Department stores	2.19	2.85	3.72	4.84
Discount stores	.74	.90	1.10	1.35
Markets	1.08	1.23	1.39	1.58
Restaurants, drive-in	3.18	4.25	5.69	7.61
Restaurants, table service	2.92	4.42	6.70	10.05
Retail stores	1.02	1.43	2.00	2.80

TABLE II. Apply to square feet of partition area. Costs include doors and openings. Do not use these costs if Table I is used.

Acoustic accordion partitions	$10.00	$13.75	$19.00	$26.00
Gypsum block	1.75	2.25	2.95	3.80
Masonry, tile or concrete block	2.00	2.60	3.45	4.50
Metal partitions	4.65	5.80	7.20	9.00
Metal and glass	5.20	6.40	7.90	9.75
Steel studs and gypsum board	1.90	2.25	2.65	3.10
Steel studs and plaster	2.25	2.60	3.05	3.55
Steel channels and gypsum board, 2-1/4"	2.95	3.50	4.15	4.95
Wood frame, drywall two sides	1.55	1.85	2.20	2.60
Wood frame, plaster two sides	1.85	2.15	2.55	3.00

PLUMBING — Apply to total floor area or use Section 53 for more detailed cost per fixture. The following costs represent typical ranges only.

	1	2	3	4
Bowling alleys	$ .64	$ .80	$ .99	$1.24
Department stores	1.08	1.39	1.80	2.32
Discount stores	.40	.58	.84	1.22
Markets	.79	1.09	1.49	2.05
Restaurants, drive-in	2.62	3.47	4.60	6.10
Restaurants, table service	2.30	3.40	5.04	7.45
Retail stores	.48	.78	1.26	2.05

SPRINKLERS — Apply to sprinklered area. Costs include all piping but do not include tanks.

5,000 square feet	$ .90	$1.09	$1.33	$1.61
10,000	.80	.96	1.15	1.38
15,000	.75	.89	1.06	1.25
20,000	.71	.85	1.00	1.17
25,000	.68	.81	.95	1.12
30,000	.66	.78	.92	1.07
40,000	.63	.74	.86	1.00
50,000	.61	.71	.83	.95
75,000	.57	.66	.76	.87
100,000	.54	.62	.71	.81
150,000	.50	.58	.66	.74
200,000	.48	.55	.62	.69

HEATING, COOLING AND VENTILATING — Apply to total floor area.

Add or deduct 3% for each foot of variation from 12' average story height.

Costs are given for gas-fired heating surfaces. Add or deduct as follows for other fuels.

Coal stoker for hot air	+10%	Coal, hand-fired	- 10%
Coal stoker for boiler	+10%	Oil-fired	+10%

For restaurants, use cost ranges in Section 13.

Electric, cable or baseboard	$ .88	$1.08	$1.32	$1.61
Electric wall heaters	.41	.47	.54	.62
Forced air	.86	1.10	1.41	1.80
Furnace, floor or wall	.45	.54	.65	.79
Gravity furnace	.72	.87	1.04	1.24
Hot water, baseboard or convectors	1.61	1.97	2.42	2.97
radiant floor	2.10	2.52	3.04	3.66
Space heaters, gas, with fan	.36	.45	.56	.71
steam coil, with boiler	.68	.81	1.00	1.25
steam coil, without boiler	.47	.60	.77	.98
Steam radiator, with boiler	1.31	1.64	2.06	2.59
without boiler	1.05	1.34	1.69	2.15

FIRE PROTECTION

FIRE PUMP EQUIPMENT

HORIZONTAL SHAFT (CENTRIFUGAL, 100 P.S.I.)

Prices include installation costs, coupling and motor or engine on a steel base, plus relief valve and waste cone. Controller must be added for electric units. Diesel engine costs include battery, trickle charger, coupling and automatic controller. Electric motors are 230/460 volt, 3 phase, 60 Hz.

G.P.M.	H.P.	R.P.M.	ELECTRIC	DIESEL
500	60	1800	$ 7,900	$34,000
750	75	1800	10,000	35,500
1000	100	1800	12,900	37,500
1500	125	1800	15,000	39,000
2000	150	1800	17,000	40,000
2500	200	1800	20,000	42,000

VERTICAL SHAFT (TURBINE, MULTI-STAGE)

The following prices include a vertical electric motor with thrust bearing. Costs for diesel engines include a right angle drive, coupler, metal skid, fuel tank, battery, trickle charger and automatic controller.

G.P.M.	H.P.	R.P.M.	PUMP ONLY	ADD FOR ELECTRIC	ADD FOR DIESEL
500	50	1800	$13,000	$1,650	$22,700
750	75	1800	14,500	2,400	24,500
1000	100	1800	16,500	3,200	26,300
1500	125	1800	18,500	3,900	28,500
2000	150	1800	21,000	4,700	30,500
2500	200	1800	27,000	6,200	35,500

PUMP DRIVERS

Diesel Engines with coupling, skid, battery, fuel tank and battery charger. For horizontal drive.

For 1000 gal, 100 psi Pump	$10,000
For 2000 gal, 100 psi Pump	$14,500

Electric Motors (Squirrel-cage induction, 3 phase, 60 cycle, drip-proof)

1500	590 - 750		

SPRINKLER SYSTEMS

Costs per square foot may be found in the Segregated Cost Sections. Refer to the section applicable to the type of building under consideration.

SMOKE AND HEAT ACTUATED ALARM SYSTEMS

Most commercial installations are leased. The costs below represent the installation costs charged to the user.

Commercial base cost $600.00 plus $ .17 per square foot of protected areas.
Residential ionization smoke detectors cost $50.00 to $70.00 installed.

FIRE PROTECTION

FIRE ALARM SYSTEMS

Buildings under 75' height.

Control panel at lobby:	
1 zone	$525
5 zone	600
Pull station	20
Smoke detector	50
Pull station with horn or bell alarm	40

(Use same costs for stations and detectors in buildings over 75' high).

Buildings 75' and above.

Control panel at fire control room (with street access for Fire Department) 75 zones	$3,000
Speakers connected with microphone at control panel	50
Emergency telephone,5 jacks	100
Sprinkler water flow detector	150
Time,date,location printer	3,500
Battery standby system	3,800

CABINETS

Extinguisher Cabinets:
Steel . . $100.00 Aluminum . . $150.00 Stainless Steel . . $250.00

Hose Cabinets:
Steel . . $110.00 Aluminum . . $165.00 Stainless Steel . . $280.00

Hose Houses:
Steel . . $600.00 Aluminum . . $900.00

Inside fire hydrants including 75' of 1-1/2" hose, valve, rack, and nozzle, installed without cabinet, cost $240 to $300.

EXTINGUISHERS

Portable, antifreeze (pressurized), 2-1/2 gal.	$ 75
Portable, water (pressurized), 2-1/2 gal.	60
Carbon Dioxide, with hose and horn, 2-1/2#	63
5#	71
10#	98
20#	145
Carbon Dioxide, wheeled, 50#	625
100#	1,300
Dry chemical, regular types, 2-1/2#	32
5#	37
10#	50
20#	87
30#	155

(For all purpose type, add 10 to 15 percent).

ALASKA PUBLIC UTILITIES COMMISSION CSHB #648
SB #370

Section 2 of SB 370 and CSHB 648 affects that statute of the Alaska Public Utilities Commission in that it takes the ratemaking powers which have been delegated to the Commission under AS 42.05 and returns them to the legislative arena. The Commission believes that the Legislature should have the following information before it decides what rates, if any, should be charged to a class of utility customers -- in this instance those commercial customers that have installed fire protection systems which use hydraulic sprinklers.

Establishing utility rates is admittedly a complicated process -- it involves determining what utility expenses are reasonable and then allocating those expenses to the classes of consumers that are responsible for the incurrence of those costs. Customers are then charged rates which cover these expenses.

The Commission believes the Legislature should realize that there are expenses directly associated with providing sprinkler service that if not paid by those customers who received the service, i.e., those who have installed sprinklers, will be borne by other customers, namely residential consumers and those commercial customers who have not installed a sprinkler system.

An example of the extent of utility expenses associated with providing water sprinkler service follows: In its last request to the Commission for a permanent rate increase, Central Alaska Utilities, a water utility in Anchorage serving approximately 10,000 customers, allocated $129,000 of its revenue requirement to be recovered from those customers who received sprinkler service. Section 2 of this legislation would require that those utility expenses attributable to provide water sprinkler service would be borne by all customers of the utility. It is interesting to note that if this amount, $129,000, must be recovered from all other CAU customers, it would require a rate increase of approximately $1.00 per month per customer or an annual increase of more than $12.00. The customers of the Anchorage Water Utility and other regulated water utilities providing this service would experience a similar increase. The Commission adds that as with all costs, those associated with providing sprinkler service change as a utility's economic circumstances change, and this number might not hold in a new tariff revision. The Commission also notes that this ratemaking prohibition would not effect the rates that nonregulated municipal water utilities might charge.

One of the questions raised by this legislation is who would provide the revenues needed to, if required, resize a water utility's service line as a result of the installation of sprinkler systems in a commercial building.

The Commission wants the legislature to understand that there are costs currently associated with providing sprinkler service that, if not recovered from the users who benefit from the service, must be borne by all of the utility's customers. This does not even begin to consider the costs that will be generated by new sprinkler customers taking advantage of the "free" service. This may be a social policy that the legislature desires to establish. However, it does depart from the Commission's utility ratemaking philosophy -- that to the most reasonable extent possible, the costs causer should be the cost payer.

NOTICE OF UTILITY TARIFF FILING

The ALASKA PUBLIC UTILITIES COMMISSION hereby gives notice that the MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE WATER UTILITY (AWU), a water utility, has filed a tariff revision (TA19-122) which reduces the monthly rates for private fire protection. A comparision of the current and proposed monthly rates follows.

Service Size	Current Rate	Proposed Rate	(*) See Below
2"	$ 7.10	$ 3.46	.18
3"	15.90	7.79	.41
4"	28.45	13.87	.72
6"	63.55	31.20	1.62
8"	112.85	55.49	2.89
10"	176.40	86.69	4.51
12"	254.10	124.85	6.50

More detailed information may be obtained from the utility whose address is 3000 Arctic Blvd., Anchorage, Alaska 99503. The filing may be inspected also at the offices of the Alaska Public Utilities Commission, 1100 MacKay Building, 338 Denali Street, Anchorage, Alaska 99501.

Any interested person may file a statement of views favoring or opposing the tariff revisions proposed by AWU with the Commission at 1100 MacKay Building, 338 Denali Street, Anchorage, Alaska 99501 on or before February 2, 1979. This statement should clearly affirm that the interested person has filed a true copy of it with AWU, 3000 Arctic Blvd., Anchorage, Alaska 99503 as required by the Alaska Administrative Code.

DATED at Anchorage, Alaska this 9th day of January, 1979.

ALASKA PUBLIC UTILITIES COMMISSION

Russell N. Staley
Acting Executive Director

(*) Filed by Julian Mason, Counsel for Western Enterprises and Jim Faiks, (Western) who stated in part,

> "Pending hearings on the revised tariff, counsel for Western held several meetings with AWU and its attorney. During those meetings, it was disclosed that AWU anticipated making an additional amendment to its tariff filing which would reduce the rates for sprinklered buildings to only 2.5% of their current level. Copies of the existing and proposed tariffs are attached as Exhibit 'A'."

Mr. Mason's complete statement (filing), from which this quotation is extracted, is attached.

MEMORANDUM State of Alaska

DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

TO Marie Pignalberi
Deputy Commissioner

DATE: March 10, 1980

FILE NO:

THRU: Palmer McCarter
Director

TELEPHONE NO:

FROM Steve Van Sant
Assistant State Assessor

SUBJECT: Comments on SB 370

This is a followup of the memorandum dated 3/5/80 to Deputy Commissioner Marie Pignalberi regarding concerns on SB 370.

Upon obtaining more information and talking with some of the assessors in the state, we would like to add the following information:

1. According to Anchorage Assessor, Pat McKee, this bill would be almost impossible for him to administer. The reason being that Anchorage does not value commercial property (where most fire protection equipment exists) by the cost approach, but by the income approach. The income approach is simply estimating market value by the income a building is capable of making. For example, assume there are two motels in Anchorage, side by side, and both were very similar. Further assume that one had sprinklers and the other one did not. The estimated value of one motel would probably be within 1%-5% of the value of the other, assuming the room rents were comparable. In this instance, there would be no value given on fire protection equipment, therefore, it would be very difficult to conform with SB 370.

2. As stated in our previous memorandum, we are concerned as to what value the assessor is expected to exempt, cost of equipment, cost of equipment and labor, or estimated market value. If it is to be the cost of the equipment, would the assessor take the actual cost to the owner, or the average cost to any property in general?

3. This bill does not require reimbursement by the state for revenues lost to the municipality by the implementation of this bill.

4. The property owner in the unorganized borough who plans to install fire protection equipment would not realize any incentive under this program (and, in our minds, if the bill is to be an incentive for installation of fire suppression systems, rural Alaska or the unorganized borough is where the greatest need exists).

ALTERNATIVE 1

Only Muni's

For your information, we have attached pages from the "Marshall Valuation Service". This valuation service is used world wide by many assessors. Nearly all assessors in Alaska who value commercial property by the cost approach utilize this guide.

On one of the pages, it indicates that the approximate portion of the total cost for "sprinklers" in an office building is 1.9%.

If it is the intent of the legislature to pass a bill whereby the incentive is an exemption of property taxes, the Department would suggest amendments to SB 370 as follows:

1. Remove this exemption from AS 29.53.060 (Full and True Value) and place it in AS 29.53.020 (Required Exemptions).

2. State the amount to be exempted if a structure does have fire protection equipment. This could be done easily by stating, "The exempted amount of this exemption shall be 2% of the full and true value of the building as determined by the assessor under AS 29.53.060."

3. The state should reimburse the municipality any revenue lost to it by the implementation of this bill.

4. There should be a time limit of three years placed upon the exemption This would allow time for the taxpayer to amortize his investment, but not be an on-going give away program.

5. Existing structures could be granted the same 2% exemption for three years to be equitable. (Although, again, if the intent is to encourage installation of a fire suppression system, only new structures should be included in the bill).

Alternative 2

If the intent of SB 370 is to offer incentives to property owners planning new construction and encourage the inclusion of fire protection systems in new structures, the Department suggests that a program similar to the following be considered.

For equity proposes, the state would adopt a normal cost schedule for fire protection systems. An example of such a cost schedule is presented in the attachments, page No. 2 from the Marshall Valuation Service. In conjunction with this schedule, Marshall Valuation Service also provides "local multipliers" which bring the normal cost schedule

into line with costs in Alaska. The local multiplier for the schedule is 1.97.

After adoption of a schedule, the Department could then compute the "normal cost" of a fire protection system by applying the schedule to each structure which applied for the program. For example, if an application were received for a 10,000 sq. ft. building, the normal costs would be obtained as follows:

10,000 sq.ft. X $1.15 X 1.97 = $22,655.00

After the normal costs were calculated, the incentive program would offer a grant to the property owner of 5% of the computed normal cost. Therefore, the property owner would receive $1132.75 ($22,655 X 5%) from the state. The normal costs could be updated on an annual basis to reflect current estimated normal costs.

Attachments

GENERAL INFORMATION

PERCENTAGE BREAKDOWN

The percentages below indicate the approximate portion of the total cost attributable to each component in a typical modern 12-story Class A office building of average size and quality, not including financing costs.

AVERAGE MULTISTORY OFFICE BUILDING

Plans, engineering, and supervision	6.2%
Clearing, excavation, and foundation	2.7%
Steel frame and decking	13.4%
Miscellaneous steel	1.0%
Heating and air conditioning	12.9%
Air conditioning enclosures	.5%
Plumbing	4.5%
Sprinklers	1.9%
Electrical, including fixtures	9.3%
Elevators, conveying systems	4.9%
Metal wall panels and insulation	5.3%
Masonry backup and partitions	3.0%
Frame and drywall partitions	3.7%
Sash and glazing	3.0%
Plaster and furring	2.0%
Doors, door frames, and hardware	.6%
Concrete floors and roof	7.5%
Roofing and roof insulation	.3%
Resilient floor coverings	1.2%
Carpeting	1.2%
Acoustical ceilings, suspended	2.5%
Painting	.8%
Marble, tile, and terrazzo	.4%
Miscellaneous carpentry, finish, and cleanup	1.0%
Miscellaneous, unclassified	.8%
General contractor's overhead and profit	9.4%
TOTAL	100.0%

The 9.4 percent listed for general contractor's overhead and profit is the percentage of total cost. This is the equivalent of 11.1 percent of labor, material, and subcontracts, excluding plans, engineering and architect's supervision.

FLOOR LOADS

The following are typical live floor loads of some of the buildings used in determining cost averages. A majority of the buildings will have more than one design floor load to accommodate various uses. Thus, a hotel will be designed for heavy floor loads in halls and public areas and lighter floor loads in room areas, and banks will need heavier floors in computer and equipment rooms than in office areas.

The listed loads are typical of design specifications of a number of buildings built or under construction during recent years.

OCCUPANCY	POUNDS PER SQUARE FEET	
Apartments and dormitories	40	(plus 20 lbs. of partitions)
Auditoriums and churches	100	(60 for fixed seating)
Banks	100	(150 lbs. in equipment floors)
Computer and equipment floors	150	
Dwellings	40	
Governmental buildings	80	(125 lbs. in equipment rooms)
Gymnasiums	100	(150 lbs. for drill floors)
Hospitals	50	(100 lbs. in corridors)
Hotels and clubs	50	(100 lbs. in public areas)
Libraries	60	(150 lbs. in stack areas)
Light industrials and garages	100	(50 lbs. in office areas)
Medium industrials	150	(50 lbs. in office areas)
Heavy industrials	200	(and up, 60 lbs. in office areas)
Lofts	100	(50 lbs. in office areas)
Low cost offices	50	(125 lbs. in equipment rooms)
Average offices	50	(150 lbs. in equipment rooms)
Good offices	60	(150 lbs. in equipment rooms)
Excellent offices	80	(175 lbs. in equipment rooms)
Restaurants	100	(150 lbs. in kitchen areas)
Schools	50	(100 lbs. in corridors)
Stores	100	(125 lbs. in appliance floors)
Theaters	80	(150 lbs. for stage floors)
Warehouses - light	100	
- medium	150	
- heavy	200	(and up)

STORES AND COMMERCIAL BUILDINGS

(SEGREGATED COST METHOD)

INTERIOR CONSTRUCTION — Table I is based on averages for several types of occupancies not including furniture, fixtures, and equipment. Table II gives costs based on a square foot of partition area and may be used when a more detailed analysis is desired. For additional interior and partition costs, see Section 52. For fixture and equipment costs, see Section 65.

TABLE I. Apply to total floor area. Add or deduct 5% for each foot of variation from 12' average story height.

FRAME INTERIOR PARTITIONS	1	2	3	4
Bowling alleys (excluding alleys and equipment)	$ .77	$ .92	$1.09	$1.30
Department stores	1.94	2.54	3.32	4.34
Discount stores	.56	.70	.88	1.11
Markets	.89	1.02	1.17	1.35
Restaurants, drive-in	2.80	3.79	5.12	6.92
Restaurants, table service	2.48	3.83	5.91	9.12
Retail stores	.82	1.17	1.66	2.37

MASONRY INTERIOR PARTITIONS				
Bowling alleys (excluding alleys and equipment)	$ .95	$1.12	$1.32	$1.56
Department stores	2.19	2.85	3.72	4.81
Discount stores	.74	.90	1.10	1.35
Markets	1.08	1.23	1.39	1.58
Restaurants, drive-in	3.18	4.25	5.69	7.61
Restaurants, table service	2.92	4.42	6.70	10.05
Retail stores	1.02	1.43	2.00	2.80

TABLE II Apply to square feet of partition area. Costs include doors and openings. Do not use these costs if Table I is used.

Acoustic accordion partitions	$10.00	$13.75	$19.00	$26.00
Gypsum block	1.75	2.25	2.95	3.80

Metal partitions	4.65	5.80	7.20	9.00
Metal and glass	5.20	6.40	7.90	9.75
Steel studs and gypsum board	1.90	2.25	2.65	3.10
Steel studs and plaster	2.25	2.60	3.05	3.55
Steel channels and gypsum board, 2-1/4"	2.95	3.50	4.15	4.95
Wood frame, drywall two sides	1.55	1.85	2.20	2.60
Wood frame, plaster two sides	1.85	2.15	2.55	3.00

PLUMBING — Apply to total floor area or use Section 53 for more detailed cost per fixture. The following costs represent typical ranges only.

	1	2	3	4
Bowling alleys	$ .64	$ .80	$ .99	$1.21
Department stores	1.08	1.39	1.80	2.32
Discount stores	.40	.58	.84	1.22
Markets	.79	1.09	1.49	2.05
Restaurants, drive-in	2.62	3.47	4.60	6.10
Restaurants, table service	2.30	3.40	5.04	7.45
Retail stores	.48	.78	1.26	2.05

SPRINKLERS — Apply to sprinklered area. Costs include all piping but do not include tanks.

5,000 square feet	$ .90	$1.09	$1.33	$1.61
10,000	.80	.96	1.15	1.38
15,000	.75	.89	1.06	1.25
20,000	.71	.85	1.00	1.17
25,000	.68	.81	.95	1.12
30,000	.66	.78	.92	1.07
40,000	.63	.74	.86	1.00
50,000	.61	.71	.83	.95
75,000	.57	.66	.76	.87
100,000	.54	.62	.71	.81
150,000	.50	.58	.66	.74
200,000	.48	.55	.62	.69

HEATING, COOLING AND VENTILATING — Apply to total floor area.

Add or deduct 3% for each foot of variation from 12' average story height.

Costs are given for gas-fired heating surfaces. Add or deduct as follows for other fuels.

Coal stoker for hot air	+10%	Coal, hand-fired	-10%
Coal stoker for boiler	+10%	Oil-fired	+10%

For restaurants, use cost ranges in Section 13.

Electric, cable or baseboard	$ .88	$1.08	$1.32	$1.61
Electric wall heaters	.41	.47	.54	.62
Forced air	.86	1.10	1.41	1.80
Furnace, floor or wall	.45	.54	.65	.79
Gravity furnace	.72	.87	1.01	1.21
Hot water, baseboard or convectors	1.61	1.97	2.42	2.97
radiant floor	2.10	2.52	3.04	3.66
Space heaters, gas, with fan	.36	.45	.56	.71
steam coil, with boiler	.68	.81	1.00	1.25
steam coil, without boiler	.47	.60	.77	.98
Steam radiator, with boiler	1.31	1.64	2.06	2.59
without boiler	1.05	1.34	1.69	2.15

FIRE PROTECTION

FIRE PUMP EQUIPMENT

HORIZONTAL SHAFT (CENTRIFUGAL, 100 P.S.I.)

Prices include installation costs, coupling and motor or engine on a steel base, plus relief valve and waste cone. Controller must be added for electric units. Diesel engine costs include battery, trickle charger, coupling and automatic controller. Electric motors are 230/460 volt, 3 phase, 60 Hz.

G.P.M.	H.P.	R.P.M.	ELECTRIC	DIESEL
500	60	1800	$ 7,900	$34,000

Stuart C. Hall

In the Matter of the Filing of a Tariff Revision, Designated as TA19-122, by ANCHORAGE WATER UTILITY to Decrease Sprinkler Fire Protection Rates	))))))	U-79-14

DEC 17 A.P.U.C.

MOTION TO ELIMINATE RETROACTIVELY TO JANUARY 2, 1979, THE PRIVATE FIRE PROTECTION CHARGES, CONTAINED IN THE TARIFF OF THE ANCHORAGE WATER UTILITY

The tariff of the Anchorage Water Utility ("AWU") contains a provision under which AWU levies a charge, in addition to the regular monthly charge, for service to buildings which contain sprinkler systems. The reasonableness of and justification for this charge have been hotly contested for several years by the owners of sprinklered buildings.

On January 2, 1979, the Anchorage Water Utility filed a tariff revision in which it proposed to reduce the charge for sprinklered buildings. That tariff filing was suspended by the Commission and hearings were scheduled. Western Enterprises and Jim Faiks ("Western") petitioned to intervene in the proceedings and their petition was granted. Western owns or represents the owners of a number of sprinklered buildings. Western and AWU agreed to attempt to resolve the dispute through negotiation and the Commission approved a stipulation extending certain deadlines.

Pending hearings on the revised tariff, counsel for Western held several meetings with AWU and its attorney. During those meetings, it was disclosed that AWU anticipated making an additional amendment to its tariff filing which would reduce the rates for sprinklered buildings to only 2.5% of their current level. Copies of the existing and proposed tariffs are attached as Exhibit "A." Based on that representation,

DUNN, BAILY and MASON
LAWYERS
LOUSSAC-SOGN BUILDING
420 D STREET
ANCHORAGE, AK 99501
(907) 276-4331

Western stipulated to a continuance of the scheduled hearings and an additional suspension period. However, AWU was unable to file the tariff on the stipulated date and Western agreed to an additional extension of time which the Commission approved in Order No. 5.

Shortly before the expiration of the most recent deadline, counsel for Western was notified by Mr. Peter Argetsinger, attorney for AWU, that AWU would be unable to file the tariff as planned for a variety of reasons. While the recited reasons are not directly relevant to this motion, the Commission should be aware that Mr. Argetsinger indicated that, while AWU agrees with Western that the tariff is wrong and must be lowered substantially, no decision has been made by the Municipality as to exactly what the tariff should be.

During the course of negotiations since the filing of the original amendment to the tariff, it has become absolutely clear that the present tariff contains rates which are many times higher than they should be.[1/] AWU has orally expressed a willingness to absorb any revenues which will be lost by eliminating the charge altogether until such time as it decides to file a new tariff. Under those circumstances, it is not reasonable for AWU's customers to continue to pay rates which the utility acknowledges are inappropriate and unreasonable. Therefore, Western respectfully asks that the private fire protection portion (i.e.,Schedule E, page 51) of the AWU tariff be eliminated retroactively to January 2, 1979. This motion, if granted, will require AWU to refund those charges, if any, which it has collected for private fire protection since January 2, 1979.[2/]

1/ Western's position has always been that the surcharge for sprinklered buildings is inappropriate, discriminatory, and unjustifiable. AWU disagrees but has acknowledged that the present rates are approximately 40 times what they should be. The second revision of the tariff (which was never filed) contained rates which were about 2.5% of the current rates.

2/ Many of the customers of AWU have refused to pay the charge. Western has escrowed the disputed charge.

DUNN, BAILY and MASON
LAWYERS
LOUSSAC-SOGN BUILDING
420 D STREET
ANCHORAGE, AK 99501
(907) 276-4331

There is ample authority to support granting of this motion. AS 42.05.381 (a) requires that all rates be "just and reasonable." AS 42.05.391 (a) prohibits a utility from subjecting a customer to "an unreasonable prejudice or disadvantage." The present tariff rates are so high that they are unreasonable and Western is being disadvantaged and prejudiced by those rates. Therefore, it is inappropriate and a violation of the statutes cited above to continue the present rates. Since AWU cannot decide what rates it wants, the proper action is to eliminate the rates entirely until AWU makes its decision and files a new tariff.

Respectfully submited this 13 day of December 1979.

DIVISION OF BUSINESS LOANS

Phone: 465-2510

POUCH D
JUNEAU, ALASKA 99811

The Division of Business Loans is not opposed to making loans for fire prevention equipment. It does, indeed, make them right now. The division is opposed to giving preferential treatment to certain types of loans. The installation of fire prevention equipment could mean preventing loss of life or property, but the same could be said of repairs to the hull of a fishing boat or repairs to the foundation of a store building or the purchase of new engines for an airplane. We get applications for those types of loans, too.

We are presently backlogged 16 weeks on applications. That's 16 weeks from the date the loan is received until the applicant receives a yes or no answer. The backlog increases as the difference increases between our fixed interest rate and the bank's rising rates. It is very difficult to justify putting off an applicant who has waited 16 weeks for an answer because we have to stop and work on a new application just received.

Preferential treatment of loans is difficult because:

1. With the current 16-week backlog, loans are not studied until many weeks after they are received. They are merely stamped and logged in and filed until a loan examiner finishes with those applications which came in before it. It would take a change in procedures and a sudden increase of the backlog if we were to, with the present staff, stop processing loans to read all incoming applications. In spite of our best efforts to provide forms which should make the use of loan proceeds evident, applicants often go out of their way to make it obscure.

2. Several bills have been introduced which require preferential treatment for certain types of loans. (Examples: fish holds, energy-related loans.) Preference isn't preference anymore if the volume of preference work is too great, and it may mean never getting to the run-of-the-mill loans if the preferred loans increase in quantity.

3. Almost all applicants have reasons for needing preferential treatment. Fishermen need to get their boats purchased or repaired before fishing season. Contractors need their new

equipment before the building season. Tourism facilities have to be ready for the tourist season. Child care facilities have to make mandated repairs or lose their licenses. Very few applicants are requesting something which isn't needed right now.

4. Many applicants for loans have signed earnest money agreements for the purchase of the item for which the loan proceeds are to be used. Their earnest money agreements nearly always have time limits, and forfeiture of thousands of dollars may result if no answer is received on the loan. Certainly this is also a request which should be given preference, if preferential treatment was available.

JUNEAU, ALASKA 99811

March 20, 1980

Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

It would appear that the addition to AS 45.95.020 contained in SB 370 is not necessary, as an applicant can have any number of small business loans, providing that they do not total more than $500,000. If the intent of that paragraph was to allow a loan that brought the total to more than $500,000, then it would have to be worded to allow that.

As written in the original SB 370, the paragraph could be construed to mean that the commissioner could not disqualify the applicant if we had previously foreclosed on a loan to him or if he was delinquent on an existing loan. I doubt that this is the intent of the paragraph, so if you want to include something regarding the amounts allowed, you would want to be more specific in the wording.

Thank you for the opportunity to comment on the bill.

Very truly yours,

Sharon Traylor

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The fiscal note for SB 370 is based upon the anticipation of State reimbursement to municipalities for revenue lost by the operation of SB 370. The dollar amounts shown were based upon the following information. The annual increase is estimated at 8% for property value inflation.

IV. DATE 4-1-80 PREPARED BY Steve Van Sant SVS

FISCAL NOTE - Continued SB 370

Estimated Revenue Lost By Municipalities By SB 370

Municipality	Comm. Property Value	Est. % w/Fire P. Syst.	Value Prop. w/FPS
Anchorage	$ 452,755,434	55%	$ 249,015,489
Fairbanks	96,920,074	40%	38,768,030
Juneau	106,867,300	60%	64,120,380
Ketchikan	51,299,887	40%	20,519,955
TOTAL	$ 707,842,695		$ 372,423,824

Prop. w/FPS @ 2%		Mill Rate	Revenue Lost
Anchorage -	$4,980,310	@ 13.79	$ 68,700
Fairbanks -	775,361	@ 15.68	12,200
Juneau -	1,282,408	@ 12.95	16,600
Ketchikan -	410,800	@ 16.00	6,600
			$104,100
	Est. Cities revenue lost	+	$ 10,000
			$114,100
	Est. 10% error factor	+	$ 11,400
			$125,500

MEMORANDUM State of Alaska

DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

TO Marie Pignalberi
Deputy Commissioner

DATE: March 10, 1980

FILE NO:

THRU: Palmer McCarter
Director

TELEPHONE NO:

FROM Steve Van Sant
Assistant State Assessor

SUBJECT: Comments on SB 370

This is a followup of the memorandum dated 3/5/80 to Deputy Commissioner Marie Pignalberi regarding concerns on SB 370.

Upon obtaining more information and talking with some of the assessors in the state, we would like to add the following information:

1. According to Anchorage Assessor, Pat McKee, this bill would be almost impossible for him to administer. The reason being that Anchorage does not value commercial property (where most fire protection equipment exists) by the cost approach, but by the income approach. The income approach is simply estimating market value by the income a building is capable of making. For example, assume there are two motels in Anchorage, side by side, and both were very similar. Further assume that one had sprinklers and the other one did not. The estimated value of one motel would probably be within 1%-5% of the value of the other, assuming the room rents were comparable. In this instance, there would be no value given on fire protection equipment, therefore, it would be very difficult to conform with SB 370.

2. As stated in our previous memorandum, we are concerned as to what value the assessor is expected to exempt, cost of equipment, cost of equipment and labor, or estimated market value. If it is to be the cost of the equipment, would the assessor take the actual cost to the owner, or the average cost to any property in general?

3. This bill does not require reimbursement by the state for revenues lost to the municipality by the implementation of this bill.

4. The property owner in the unorganized borough who plans to install fire protection equipment would not realize any incentive under this program (and, in our minds, if the bill is to be an incentive for installation of fire suppression systems, rural Alaska or the unorganized borough is where the greatest need exists).

ALTERNATIVE 1

Only Mines

For your information, we have attached pages from the "Marshall Valuation Service". This valuation service is used world wide by many assessors. Nearly all assessors in Alaska who value commercial property by the cost approach utilize this guide.

On one of the pages, it indicates that the approximate portion of the total cost for "sprinklers" in an office building is 1.9%.

If it is the intent of the legislature to pass a bill whereby the incentive is an exemption of property taxes, the Department would suggest amendments to SB 370 as follows:

1. Remove this exemption from AS 29.53.060 (Full and True Value) and place it in AS 29.53.020 (Required Exemptions).

2. State the amount to be exempted if a structure does have fire protection equipment. This could be done easily by stating, "The exempted amount of this exemption shall be 2% of the full and true value of the building as determined by the assessor under AS 29.53.060."

3. The state should reimburse the municipality any revenue lost to it by the implementation of this bill.

4. There should be a time limit of three years placed upon the exemption. This would allow time for the taxpayer to amortize his investment, but not be an on-going give away program.

5. Existing structures could be granted the same 2% exemption for three years to be equitable. (Although, again, if the intent is to encourage installation of a fire suppression system, only new structures should be included in the bill).

Alternative 2

If the intent of SB 370 is to offer incentives to property owners planning new construction and encourage the inclusion of fire protection systems in new structures, the Department suggests that a program similar to the following be considered.

For equity proposes, the state would adopt a normal cost schedule for fire protection systems. An example of such a cost schedule is presented in the attachments, page No. 2 from the Marshall Valuation Service. In conjunction with this schedule, Marshall Valuation Service also provides "local multipliers" which bring the normal cost schedule

into line with costs in Alaska. The local multiplier for the schedule is 1.97.

After adoption of a schedule, the Department could then compute the "normal cost" of a fire protection system by applying the schedule to each structure which applied for the program. For example, if an application were received for a 10,000 sq. ft. building, the normal costs would be obtained as follows:

10,000 sq.ft. X $1.15 X 1.97 = $22,655.00

After the normal costs were calculated, the incentive program would offer a grant to the property owner of 5% of the computed normal cost. Therefore, the property owner would receive $1132.75 ($22,655 X 5%) from the state. The normal costs could be updated on an annual basis to reflect current estimated normal costs.

Attachments

GENERAL INFORMATION

PERCENTAGE BREAKDOWN

The percentages below indicate the approximate portion of the total cost attributable to each component in a typical modern 12-story Class A office building of average size and quality, not including financing costs.

AVERAGE MULTISTORY OFFICE BUILDING

Plans, engineering, and supervision	6.2%
Clearing, excavation, and foundation	2.7%
Steel frame and decking	13.4%
Miscellaneous steel	1.0%
Heating and air conditioning	12.9%
Air conditioning enclosures	.5%
Plumbing	4.5%
Sprinklers	1.9%
Electrical, including fixtures	9.3%
Elevators, conveying systems	4.9%
Metal wall panels and insulation	5.3%
Masonry backup and partitions	3.0%
Frame and drywall partitions	3.7%
Sash and glazing	3.0%
Plaster and furring	2.0%
Doors, door frames, and hardware	.6%
Concrete floors and roof	7.5%
Roofing and roof insulation	.3%
Resilient floor coverings	1.2%
Carpeting	1.2%
Acoustical ceilings, suspended	2.5%
Painting	.8%
Marble, tile, and terrazzo	.4%
Miscellaneous carpentry, finish, and cleanup	1.0%
Miscellaneous, unclassified	.8%
General contractor's overhead and profit	9.4%
TOTAL	100.0%

The 9.4 percent listed for general contractor's overhead and profit is the percentage of total cost. This is the equivalent of 11.1 percent of labor, material, and subcontracts, excluding plans, engineering and architect's supervision.

FLOOR LOADS

The following are typical live floor loads of some of the buildings used in determining cost averages. A majority of the buildings will have more than one design floor load to accommodate various uses. Thus, a hotel will be designed for heavy floor loads in halls and public areas and lighter floor loads in room areas, and banks will need heavier floors in computer and equipment rooms than in office areas.

The listed loads are typical of design specifications of a number of buildings built or under construction during recent years.

OCCUPANCY	POUNDS PER SQUARE FEET	
Apartments and dormitories	40	(plus 20 lbs. of partitions)
Auditoriums and churches	100	(60 for fixed seating)
Banks	100	(150 lbs. in equipment floors)
Computer and equipment floors	150	
Dwellings	40	
Governmental buildings	80	(125 lbs. in equipment rooms)
Gymnasiums	100	(150 lbs. for drill floors)
Hospitals	50	(100 lbs. in corridors)
Hotels and clubs	50	(100 lbs. in public areas)
Libraries	60	(150 lbs. in stack areas)
Light industrials and garages	100	(50 lbs. in office areas)
Medium industrials	150	(50 lbs. in office areas)
Heavy industrials	200	(and up, 60 lbs. in office areas)
Lofts	100	(50 lbs. in office areas)
Low cost offices	50	(125 lbs. in equipment rooms)
Average offices	50	(150 lbs. in equipment rooms)
Good offices	60	(150 lbs. in equipment rooms)
Excellent offices	80	(175 lbs. in equipment rooms)
Restaurants	100	(150 lbs. in kitchen areas)
Schools	50	(100 lbs. in corridors)
Stores	100	(125 lbs. in appliance floors)
Theaters	80	(150 lbs. for stage floors)
Warehouses - light	100	
- medium	150	
- heavy	200	(and up)

STORES AND COMMERCIAL BUILDINGS

(SEGREGATED COST METHOD)

INTERIOR CONSTRUCTION — Table I is based on averages for several types of occupancies not including furniture, fixtures, and equipment. Table II gives costs based on a square foot of partition area and may be used when a more detailed analysis is desired. For additional interior and partition costs, see Section 52. For fixture and equipment costs, see Section 65.

TABLE I. Apply to total floor area. Add or deduct 5% for each foot of variation from 12' average story height.

FRAME INTERIOR PARTITIONS	1	2	3	4
Bowling alleys (excluding alleys and equipment)	$ .77	$ .92	$1.09	$1.30
Department stores	1.94	2.54	3.32	4.34
Discount stores	.56	.70	.88	1.11
Markets	.89	1.02	1.17	1.35
Restaurants, drive-in	2.80	3.79	5.12	6.92
Restaurants, table service	2.48	3.83	5.91	9.12
Retail stores	.82	1.17	1.66	2.37

MASONRY INTERIOR PARTITIONS	1	2	3	4
Bowling alleys (excluding alleys and equipment)	$ .95	$1.12	$1.32	$1.56
Department stores	2.19	2.85	3.72	4.81
Discount stores	.74	.90	1.10	1.35
Markets	1.08	1.23	1.39	1.58
Restaurants, drive-in	3.18	4.25	5.69	7.61
Restaurants, table service	2.92	4.42	6.70	10.05
Retail stores	1.02	1.43	2.00	2.80

TABLE II. Apply to square feet of partition area. Costs include doors and openings. Do not use these costs if Table I is used.

	1	2	3	4
Acoustic accordion partitions	$10.00	$13.75	$19.00	$26.00
Gypsum block	1.75	2.25	2.95	3.80
Masonry, tile or concrete block	2.00	2.60	3.45	4.50
Metal partitions	4.65	5.80	7.20	9.00
Metal and glass	5.20	6.40	7.90	9.75
Steel studs and gypsum board	1.90	2.25	2.65	3.10
Steel studs and plaster	2.25	2.60	3.05	3.55
Steel channels and gypsum board, 2-1/4"	2.95	3.50	4.15	4.95
Wood frame, drywall two sides	1.55	1.85	2.20	2.60
Wood frame, plaster two sides	1.85	2.15	2.55	3.00

PLUMBING — Apply to total floor area or use Section 53 for more detailed cost per fixture. The following costs represent typical ranges only.

	1	2	3	4
Bowling alleys	$ .61	$ .80	$ .99	$1.21
Department stores	1.08	1.39	1.80	2.32
Discount stores	.40	.58	.81	1.22
Markets	.79	1.09	1.49	2.05
Restaurants, drive-in	2.62	3.47	4.60	6.10
Restaurants, table service	2.30	3.40	5.01	7.45
Retail stores	.48	.78	1.26	2.05

SPRINKLERS — Apply to sprinklered area. Costs include all piping but do not include tanks.

5,000 square feet	$ .90	$1.09	$1.33	$1.61
10,000	.80	.96	1.15	1.38
15,000	.75	.89	1.06	1.25
20,000	.71	.85	1.00	1.17
25,000	.68	.81	.95	1.12
30,000	.66	.78	.92	1.07
40,000	.63	.74	.86	1.00
50,000	.61	.71	.83	.95
75,000	.57	.66	.76	.87
100,000	.54	.62	.71	.81
150,000	.50	.58	.66	.74
200,000	.48	.55	.62	.69

HEATING, COOLING AND VENTILATING — Apply to total floor area.

Add or deduct 3% for each foot of variation from 12' average story height.

Costs are given for gas-fired heating surfaces. Add or deduct as follows for other fuels.

Coal stoker for hot air	+10%	Coal, hand-fired	-10%
Coal stoker for boiler	+10%	Oil-fired	+10%

For restaurants, use cost ranges in Section 13.

	1	2	3	4
Electric, cable or baseboard	$ .88	$1.08	$1.32	$1.61
Electric wall heaters	.41	.47	.54	.62
Forced air	.86	1.10	1.41	1.80
Furnace, floor or wall	.45	.54	.65	.79
Gravity furnace	.72	.87	1.04	1.24
Hot water, baseboard or convectors	1.61	1.97	2.42	2.97
radiant floor	2.40	2.52	3.04	3.66
Space heaters, gas, with fan	.36	.45	.56	.71
steam coil, with boiler	.68	.81	1.00	1.25
steam coil, without boiler	.47	.60	.77	.98
Steam radiator, with boiler	1.31	1.64	2.06	2.59
without boiler	1.05	1.31	1.69	2.15

FIRE PROTECTION

FIRE PUMP EQUIPMENT

HORIZONTAL SHAFT (CENTRIFUGAL, 100 P.S.I.)

Prices include installation costs, coupling and motor or engine on a steel base, plus relief valve and waste cone. Controller must be added for electric units. Diesel engine costs include battery, trickle charger, coupling and automatic controller. Electric motors are 230/460 volt, 3 phase, 60 Hz.

G.P.M.	H.P.	R.P.M.	ELECTRIC	DIESEL
500	60	1800	$ 7,900	$34,000
750	75	1800	10,000	35,500
000	100	1800	12,900	37,500
500	125	1800	15,000	39,000
000	150	1800	17,000	40,000
500	200	1800	20,000	42,000

VERTICAL SHAFT (TURBINE, MULTI-STAGE)

The following prices include a vertical electric motor with thrust bearing. Costs for diesel engines include a right angle drive, coupler, metal skid, fuel tank, battery, trickle charger and automatic controller.

G.P.M.	H.P.	R.P.M.	PUMP ONLY	ADD FOR ELECTRIC	ADD FOR DIESEL
500	50	1800	$13,000	$1,650	$22,700
750	75	1800	14,500	2,400	24,500
000	100	1800	16,500	3,200	26,300
500	125	1800	18,500	3,900	28,500
000	150	1800	21,000	4,700	30,500
500	200	1800	27,000	6,200	35,500

PUMP DRIVERS

Diesel Engines with coupling, skid, battery, fuel tank and battery charger. For horizontal drive.

For 1000 gal, 100 psi Pump	$10,000
For 2000 gal, 100 psi Pump	$14,500

Electric Motors (Squirrel-cage induction, 3 phase 60 cycle, drip-proof)

VOLTAGE	R.P.M.	HORSEPOWER					
		30	50	75	100	150	200
230/460	1800	$620	$1,050	$1,550	$2,100	$3,150	$4,200

DIESEL DRIVE CONTROLLERS . . . . . $3,300 to $3,500

FLOW METERS

PUMP SIZE	COST RANGE	PUMP SIZE	COST RANGE
500	$170 - $620	2000	$ 660 - $ 830
750	500 - 650	3000	830 - 1,010
1000	530 - 680	[illegible]	1,010 - 1,230
1500	590 - 750		

SPRINKLER SYSTEMS

Costs per square foot may be found in the Segregated Cost Sections. Refer to the section applicable to the type of building under consideration.

SMOKE AND HEAT ACTUATED ALARM SYSTEMS

Most commercial installations are leased. The costs below represent the installation costs charged to the user.

Commercial base cost $600.00 plus $ .17 per square foot of protected areas.
Residential ionization smoke detectors cost $50.00 to $70.00 installed.

FIRE PROTECTION

FIRE ALARM SYSTEMS

Buildings under 75' height.

Control panel at lobby:	
1 zone	$525
5 zone	600
Pull station	20
Smoke detector	50
Pull station with horn or bell alarm	40

(Use same costs for stations and detectors in buildings over 75' high).

Buildings 75' and above.

Control panel at fire control room (with street access for Fire Department) 75 zones	$3,000
Speakers connected with microphone at control panel	50
Emergency telephone,5 jacks	100
Sprinkler water flow detector	150
Time,date,location printer	3,500
Battery standby system	3,800

CABINETS

Extinguisher Cabinets:
Steel . $100.00 Aluminum . . $150.00 Stainless Steel . . $250.00

Hose Cabinets:
Steel . . $110.00 Aluminum . . $165.00 Stainless Steel . . $280.00

Hose Houses:
Steel . $600.00 Aluminum . . $900.00

Inside fire hydrants including 75' of 1-1/2" hose, valve, rack, and nozzle, installed without cabinet, cost $240 to $300.

EXTINGUISHERS

Portable, antifreeze (pressurized), 2-1/2 gal.	$ 75
Portable, water (pressurized), 2-1/2 gal.	60
Carbon Dioxide, with hose and horn, 2-1/2#	63
5#	71
10#	98
20#	115
Carbon Dioxide, wheeled, 50#	625
100#	1,300
Dry chemical, regular types, 2-1/2#	32
5#	37
10#	50
20#	87
30#	155

(For all purpose type, add 10 to 15 percent).

AIR FOAM SYSTEMS

High Expansion, cubic feet per minute.

5,000 cfm . . $2,000 10,000 cfm . . $3,000 15,000 cfm . . $4,000

Low Expansion, (protein) cost per square foot of tank surface.

TANK SURFACE	FUEL OIL	GASOLINE
500 sq. ft.	$ 3,800	$ 4,200
1,000	4,300	4,900
1,500	4,900	5,700
2,000	5,500	6,600
3,000	7,200	8,900
4,000	9,300	12,000
5,000	12,000	16,000

CARBON DIOXIDE SYSTEMS

FLOODING SYSTEMS
(Cost per cubic foot)

	SMALL (500 cu. ft.)	MEDIUM (3,000 cu.ft.)	LARGE (30,000 cu.ft.)
Standard hazards	$ 1.60	$ 1.15	$ .60
Electric hazards	2.40	1.50	.70
Fur vaults	2.80	1.95	.85

LOCAL APPLICATION
(Cost per square foot)

	SMALL (25 sq. ft.)	MEDIUM (250 sq. ft.)	LARGE (1,000 sq. ft.)
Coated surfaces	$55.00	$36.00	$25.00
Liquid surfaces	75.00	51.00	37.00

HALON 1301 SYSTEMS
(Cost per cubic foot)

Includes ionization detection with approximately 6% total flooding of electrical hazards.

ALASKA PUBLIC UTILITIES COMMISSION CSHB #648
SB #370

Section 2 of SB 370 and CSHB 648 affects that statute of the Alaska Public Utilities Commission in that it takes the ratemaking powers which have been delegated to the Commission under AS 42.05 and returns them to the legislative arena. The Commission believes that the Legislature should have the following information before it decides what rates, if any, should be charged to a class of utility customers -- in this instance those commercial customers that have installed fire protection systems which use hydraulic sprinklers.

Establishing utility rates is admittedly a complicated process -- it involves determining what utility expenses are reasonable and then allocating those expenses to the classes of consumers that are responsible for the incurrence of those costs. Customers are then charged rates which cover these expenses.

The Commission believes the Legislature should realize that there are expenses directly associated with providing sprinkler service that if not paid by those customers who received the service, i.e., those who have installed sprinklers, will be borne by other customers, namely residential consumers and those commercial customers who have not installed a sprinkler system.

An example of the extent of utility expenses associated with providing water sprinkler service follows: In its last request to the Commission for a permanent rate increase, Central Alaska Utilities, a water utility in Anchorage serving approximately 10,000 customers, allocated $129,000 of its revenue requirement to be recovered from those customers who received sprinkler service. Section 2 of this legislation would require that those utility expenses attributable to provide water sprinkler service would be borne by all customers of the utility. It is interesting to note that if this amount, $129,000, must be recovered from all other CAU customers, it would require a rate increase of approximately $1.00 per month per customer or an annual increase of more than $12.00. The customers of the Anchorage Water Utility and other regulated water utilities providing this service would experience a similar increase. The Commission adds that as with all costs, those associated with providing sprinkler service change as a utility's economic circumstances change, and this number might not hold in a new tariff revision. The Commission also notes that this ratemaking prohibition would not effect the rates that nonregulated municipal water utilities might charge.

One of the questions raised by this legislation is who would provide the revenues needed to, if required, resize a water utility's service line as a result of the installation of sprinkler systems in a commercial building.

The Commission wants the legislature to understand that there are costs currently associated with providing sprinkler service that, if not recovered from the users who benefit from the service, must be borne by all of the utility's customers. This does not even begin to consider the costs that will be generated by new sprinkler customers taking advantage of the "free" service. This may be a social policy that the legislature desires to establish. However, it does depart from the Commission's utility ratemaking philosophy -- that to the most reasonable extent possible, the costs causer should be the cost payer.

TWO INTERPRETATIONS

(Insurance Services Agency)

APUC - says water standby charge is based on insurance rating for each area.

Whether water is used or not, certain amounts must be available in case of fire.

If SB 370 passes, APUC interprets:

- that buildings with sprinkler systems will not have to pay a fee or surcharge once system is installed....

IN VIEW OF THE ABOVE MANDATED CHARGE, APUC CONTENDS SOMEONE MUST PAY THE DIFFERENCE, AND THEY INTERPRET THIS DIFFERENCE AS COMING FROM ALL OTHER CONSUMERS, WHETHER COMMERCIAL, RESIDENTIAL, OR THE GENERAL PUBLIC.

Mr. Shirnberg interprets this bill to mean only commercial buildings will be affected - and any price differential would be equally split among all commercial buildings, whether they have sprinkler systems installed, or not. The general public would not be affected.

QUESTION: Also, APUC was established to set fair rates - is this law attacking the rate making process - even just a small portion?? And, is this good - to start ....?

NOTICE OF UTILITY TARIFF FILING

The ALASKA PUBLIC UTILITIES COMMISSION hereby gives notice that the MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE WATER UTILITY (AWU), a water utility, has filed a tariff revision (TA19-122) which reduces the monthly rates for private fire protection. A comparision of the current and proposed monthly rates follows.

Service Size	Current Rate	Proposed Rate	(*) See Below

THE ALASKA PUBLIC UTILITIES COMMISSION

Before Commissioners: Gordon J. Zerbetz, Chairman
Marvin R. Weatherly
Carolyn S. Guess
Susan M. Knowles
Stuart C. Hall

In the Matter of the Filing of a Tariff Revision, Designated as TA19-122, by ANCHORAGE WATER UTILITY to Decrease Sprinkler Fire Protection Rates	))))))	U-79-14

DEC 17 '79 A.P.U.C.

MOTION TO ELIMINATE RETROACTIVELY TO JANUARY 2, 1979, THE PRIVATE FIRE PROTECTION CHARGES CONTAINED IN THE TARIFF OF THE ANCHORAGE WATER UTILITY

The tariff of the Anchorage Water Utility ("AWU") contains a provision under which AWU levies a charge, in addition to the regular monthly charge, for service to buildings which contain sprinkler systems. The reasonableness of and justification for this charge have been hotly contested for several years by the owners of sprinklered buildings.

On January 2, 1979, the Anchorage Water Utility filed a tariff revision in which it proposed to reduce the charge for sprinklered buildings. That tariff filing was suspended by the Commission and hearings were scheduled. Western Enterprises and Jim Faiks ("Western") petitioned to intervene in the proceedings and their petition was granted. Western owns or represents the owners of a number of sprinklered buildings. Western and AWU agreed to attempt to resolve the dispute through negotiation and the Commission approved a stipulation extending certain deadlines.

Pending hearings on the revised tariff, counsel for Western held several meetings with AWU and its attorney. During those meetings, it was disclosed that AWU anticipated making an additional amendment to its tariff filing which would reduce the rates for sprinklered buildings to only 2.5% of their current level. Copies of the existing and proposed tariffs are attached as Exhibit "A." Based on that representation,

DUNN, PAULT and MASON
LAWYERS
LOUSSAC-SOGN BUILDING
431 D STREET

(907) 276-4331

and an additional suspension period. However, AWU was unable to file the tariff on the stipulated date and Western agreed to an additional extension of time which the Commission approved in Order No. 5.

Shortly before the expiration of the most recent deadline, counsel for Western was notified by Mr. Peter Argetsinger, attorney for AWU, that AWU would be unable to file the tariff as planned for a variety of reasons. While the recited reasons are not directly relevant to this motion, the Commission should be aware that Mr. Argetsinger indicated that, while AWU agrees with Western that the tariff is wrong and must be lowered substantially, no decision has been made by the Municipality as to exactly what the tariff should be.

During the course of negotiations since the filing of the original amendment to the tariff, it has become absolutely clear that the present tariff contains rates which are many times higher than they should be.[1/] AWU has orally expressed a willingness to absorb any revenues which will be lost by eliminating the charge altogether until such time as it decides to file a new tariff. Under those circumstances, it is not reasonable for AWU's customers to continue to pay rates which the utility acknowledges are inappropriate and unreasonable. Therefore, Western respectfully asks that the private fire protection portion (i.e., Schedule E, page 51) of the AWU tariff be eliminated retroactively to January 2, 1979. This motion, if granted, will require AWU to refund those charges, if any, which it has collected for private fire protection since January 2, 1979.[2/]

1/ Western's position has always been that the surcharge for sprinklered buildings is inappropriate, discriminatory, and unjustifiable. AWU disagrees but has acknowledged that the present rates are approximately 40 times what they should be. The second revision of the tariff (which was never filed) contained rates which were about 2.5% of the current rates.

2/ Many of the customers of AWU have refused to pay the charge. Western has escrowed the disputed charge.

DUNN, BAILY and MASON
LAWYERS
LOUSSAC-SOGN BUILDING
429 D STREET
ANCHORAGE, AK 99501

motion. AS 42.05.381 (a) requires that all rates be "just and reasonable." AS 42.05.391 (a) prohibits a utility from subjecting a customer to "an unreasonable prejudice or disadvantage." The present tariff rates are so high that they are unreasonable and Western is being disadvantaged and prejudiced by those rates. Therefore, it is inappropriate and a violation of the statutes cited above to continue the present rates. Since AWU cannot decide what rates it wants, the proper action is to eliminate the rates entirely until AWU makes its decision and files a new tariff.

Respectfully submited this 13 day of December 1979.

DEPARTMENT OF COMMERCE &
ECONOMIC DEVELOPMENT
DIVISION OF BUSINESS LOANS

Phone: 465-2510
POUCH D
JUNEAU, ALASKA 99811

The Division of Business Loans is not opposed to making loans for fire prevention equipment. It does, indeed, make them right now. The division is opposed to giving preferential treatment to certain types of loans. The installation of fire prevention equipment could mean preventing loss of life or property, but the same could be said of repairs to the hull of a fishing boat or repairs to the foundation of a store building or the purchase of new engines for an airplane. We get applications for those types of loans, too

We are presently backlogged 16 weeks on applications. That's 16 weeks from the date the loan is received until the applicant receives a yes or no answer. The backlog increases as the difference increases between our fixed interest rate and the bank's rising rates. It is very difficult to justify putting off an applicant who has waited 16 weeks for an answer because we have to stop and work on a new application just received.

Preferential treatment of loans is difficult because:

1. With the current 16-week backlog, loans are not studied until many weeks after they are received. They are merely stamped and logged in and filed until a loan examiner finishes with those applications which came in before it. It would take a change in procedures and a sudden increase of the backlog if we were to, with the present staff, stop processing loans to read all incoming applications. In spite of our best efforts to provide forms which should make the use of loan proceeds evident, applicants often go out of their way to make it obscure.

2. Several bills have been introduced which require preferential treatment for certain types of loans. (Examples: fish holds, energy-related loans.) Preference isn't preference anymore if the volume of preference work is too great, and it may mean never getting to the run-of-the-mill loans if the preferred loans increase in quantity.

3. Almost all applicants have reasons for needing preferential treatment. Fishermen need to get their boats purchased or repaired before fishing season. Contractors need their new

equipment before the building season. Tourism facilities have to be ready for the tourist season. Child care facilities have to make mandated repairs or lose their licenses. Very few applicants are requesting something which isn't needed right now.

4. Many applicants for loans have signed earnest money agreements for the purchase of the item for which the loan proceeds are to be used. Their earnest money agreements nearly always have time limits, and forfeiture of thousands of dollars may result if no answer is received on the loan. Certainly this is also a request which should be given preference, if preferential treatment was available.

March 20, 1980

Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

It would appear that the addition to AS 45.95.020 contained in SB 370 is not necessary, as an applicant can have any number of small business loans, providing that they do not total more than $500,000. If the intent of that paragraph was to allow a loan that brought the total to more than $500,000, then it would have to be worded to allow that.

As written in the original SB 370, the paragraph could be construed to mean that the commissioner could not disqualify the applicant if we had previously foreclosed on a loan to him or if he was delinquent on an existing loan. I doubt that this is the intent of the paragraph, so if you want to include something regarding the amounts allowed, you would want to be more specific in the wording.

Thank you for the opportunity to comment on the bill.

Very truly yours,

Sharon Traylor

Re: Senate Bill 370

Dear Senator Sturgulewski:

College Utilities Corporation is a privately owned sewer and water utility, serving the suburbs of Fairbanks, the University of Alaska, and the Fairbanks International Airport. We receive about 6.95% of our annual water operating revenues from fire protection charges, of which several of our customers are government agencies.

Should the legislature get into the business of rate setting, in competition with the Alaska Public Utilities Commission, which already is causing us paperwork nightmares and pocketbook headaches, and eliminates this fire protection charge via SB 370, the average rate for a single family dwelling will increase by approximately $1.87 per month. College Utilities feels this bill unfairly allows regulation, by legislation on top of that already provided by the APUC.

Sincerely,

GEORGE E. GORDON
President

COLLEGE UTILITIES CORPORATION

GEG/mjh

South Central Fire Prevention Council

"Lands, Homes, and Lives"

February 19, 1980

Senator Arliss Sturgulewski
Chairperson,
Senate Community & Regional Affairs Committee

Dear Senator Sturgulewski:

We strongly support and recommend that the Community & Regional Affairs Committee act favorably and recommend DO PASS to Senate Bill No. 370, an Act relating to fire prevention.

We feel that the provisions of this act that will allow businessmen and property owners to receive loans at terms and interest as proposed will encourage the installation of fire protection systems. An additional incentive will be created for the property owner by removing the fire protection systems from the real property tax roles.

This bill addresses and removes the inequity in water utility rates charged to property owners who have installed hydraulic fire protection systems.

All three of the provisions of this bill will create the much needed incentive that will allow property owners to make the needed installation of fire protection systems a reality. This will, in years to come, reduce the costs and demands on the public fire departments, and will assist greatly in bringing our escalating loss of life and property under control; reducing this loss and bringing together the public and private fire protections to provide the most cost effective method of providing for the fire protection needs of our communities.

Your support on this legislation will be greatly appreciated by those of us who work daily in the areas of fire prevention and suppression.

Respectfully Yours,

Russell J. Bagley

Juneau, Alaska 99811

Dear Senator Sturgulewski:

This letter is in support of House Bill 648 and Senate Bill 370 which are strongly supported by the Alaska Fire Chiefs' Association and the Alaska State Firefighters Association.

This bill will make low interest loans available to property owners to finance the installation of private fire protection systems, it will provide tax credits to property owners with private fire protection systems, and it will eliminate water standby utility charges on property owners' utility bills. It is an impressive program which will save cities and property owners money, without increasing mandatory regulation or other red tape.

Upon reading the enclosed position paper authored by the above Associations, I am sure you will agree with the Firefighters and Fire Chiefs that this bill is something long over due and it should be strongly supported.

When the program is explained every organization to whom the program has been presented has enthusiastically supported the program. The Fire Chiefs' Association is in receipt of letters from the Cordova Chamber of Commerce, the City of Ketchikan, the Water Conservation Association, all of which enthusiastically support the legislation. It is understood that more enthusiastic support is on the way and building. Please support House Bill 648 and its companion Senate Bill 370 this session. Thank you.

Very truly yours,

ALASKA FIRE CHIEFS' ASSOCIATION

Mr. Robert Shirnberg
Post Office Box 1167
Kenai, Alaska 99611

Dear Mr. Shirnberg,

This is to inform you that on January 29, 1980, the Cordova Chamber of Commerce took action supporting proposed legislation for the installation of Private Fire Protection Systems.

The following are specific concepts supported by this Chamber:

1. Low interest or no interest loans with a minimum of paperwork to be made available to businesses for the purpose of installing Private Fire Protection and Suppression Systems.

2. That loan payments be held to the amount saved on the establishemnt's fire insurance premium.

3. That legislation be passed urging local municipalities to not increase the assessed evaluation of the property because of the installation of such system, whether it be named as an improvement or any other such designation.

4. That sufficient publicity be given to business people in all communities.

The Chamber of Commerce feels that incentives for the installation of Private Fire Protection and Suppression Systems will reduce the loss of lives, property, and lost man-hours due to destruction of business property.

WELCOME

Sincerely,

Robert L. Varnam

CS FOR SENATE BILL NO. 370

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to fire prevention."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.020(a) is amended by adding a new paragraph to read:

(7) real property to the extent and subject to the conditions provided in (j) of this section.

* Sec. 2. AS 29.53.020 is amended by adding a new subsection to read:

(j) Two percent of the assessed value of an improvement to real property is exempt from taxation if the improvement contains a fire protection system approved under AS 18.70.081, and in operating condition, and incorporated as a fixture or part of the improvement. The exemption granted by this subsection is limited to

(1) an amount equal to two percent of the value of the fire protection system based on the assessment for 1981, if the fire protection system is a fixture of the real property on January 1, 1981; or

(2) an amount equal to two percent of the value of the fire protection system during the year of its installation if the fire protection system becomes a fixture of the property after January 1, 1981.

Add Section To reimburse Municipalities for Homes Loss

* Sec. 3. AS 42.05.381 is amended by adding a new subsection to read:

(d) A utility may not charge a fee or surcharge to provide standby water for fire protection systems which use hydraulic or standard sprinklers and which are approved under AS 18.70.081.

Delete

* Sec. 4. AS 45.95.020(a) is amended to read:

(a) The commissioner shall, under regulations and policies adopted by him, make small business loans to acquire, finance or refinance or equip businesses, including farming equipment, fire protection systems approved under AS 18.70 081, mining and fishing, not exceeding $500,000. The loans shall be secured by acceptable collateral and may not exceed 75 percent of the appraised value of the collateral offered as security. The rate of interest may not exceed nine and one-half percent a year on the unpaid balance.

* Sec. 5. AS 44.33.170 is amended by adding a new subsection to read:

(b) Tourist attraction development matching money may also be obtained for the purpose of purchasing and installing a fire protection system approved under AS 18.70.081 for a building used or to be used for the purposes described in (a) of this section.

* Sec. 6. AS 18.70 is amended by adding a new section to read:

Sec. 18.70 081. APPROVAL OF FIRE PROTECTION SYSTEMS. The Department of Public Safety shall inspect and approve or disapprove fire protection and fire alarm systems offered for sale in the state. Before October 30 of each year the Department of Public Safety shall make available a list of approved systems to the Department of Community and Regional Affairs, the Department of Commerce and Economic Development, and the public.

INTERIOR FIRE CHIEFS ASSN. OF ALASKA

Address Reply to:

James A. Morris
Member
Interior Fire Chiefs
Assn. of Alaska
656 7th Avenue
Fairbanks, Alaska 99701

January 25, 1980

Senator Brad Bradley
Pouch V - State Capitol
Juneau, Alaska 99811

Dear Senator Bradley:

Attached is some information that you requested concerning proposed legislation about the Community Fire Protection Incentive Program.

City Ordinance 3794 provides for a fee schedule for sprinkler services (4", 6" or 8" depending upon the side of the sprinkler system) for the Municipal Utilities System (MUS). MUS provides water service to all areas of the City of Fairbanks, excluding Fort Wainwright. There are presently some two hundred (200) sprinkler services in the MUS system. Note that the applicable rates are underlined (bracketed amounts are the changes applied previous to the effective date of Ordinance 3749, 27 December 1978).

Note also that the MUS fee schedule includes a fee of $65 per month for fire hydrants. The General Government of the City presently pays this fee to MUS for every public hydrant in the City (925 at present). This amounts to an annual cost of $721,500 underwritten by Sales and Property taxes equally proportiate from all property owners in the City (see attached copy 1980 City Budget page 104).

The number of fire hydrants required in any part of the City varies with the potential amount of water needed to extinguish a fire. This will vary with the size of the buildings in the area and what materials were used to construct them (wood, steel or concrete). Large commercial buildings require greater amounts of water, therefore more fire hydrants. Attached materials from the NFPA Fire Protection Handbook and ISO "Municipal Fire Protection Grading Schedule" are used as guidelines for providing adequate hydrants. Areas with one and two family houses usually have hydrants every four hundred (400) feet, yet commercial areas have twice as many hydrants (every 200-250 feet).

FISCAL NOTE - Continued SB 370

March 14, 1980

The Honorable Arliss Sturgulewski
Chairman, Community and Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Re: Senate Bill 370

Dear Senator Sturgulewski:

Some questions have arisen concerning the definition of fire protection systems. The understanding of the State Fire Chiefs' Association is that the bill would cover those fire protection and fire alarm systems as defined in the National Fire Codes. Following is a suggested definition of fire protection systems:

> Fire protection systems are those systems as defined in the National Fire Codes, current edition, published by the National Fire Protection Association.
>
> The systems include, but are not limited to, the following: Foam extinguishing systems, high expansion foam systems, carbon dioxide systems, Halon 1301 systems, Halon 1211 systems, dry chemical systems, water operation fixed systems, foam/water sprinkler and supply systems, standpipe and hose systems, hydraulic sprinkler systems, and associated pumps and tanks as required for the foregoing systems.
>
> Fire alerm systems include, but are not limited to: supplemental station signalling systems, local protective signalling systems, auxilliary signalling systems, remote station signalling systems, proprietary signalling systems, and automatic fire protection systems.

The growing public support for this bill is indicative of its benefit. The Alaska Fire Chiefs' Association and the Alaska State Fire Fighters Association emphatically urge its enactment.

If you have any questions please do not hesitate to call.

Very truly yours,

Brian R. Shute

Dear:

As you no doubt know, Committee Substitute for Senate bill 370, an act relating to fire prevention, passed out of the Senate CRA Committee April 1, 1980, and was referred to the Senate Finance Committee.

A tremendous amount of interest has been shown in this bill and substantial input on the background has been received, some of which negated major changes which are now incorporated into the committee Substitute. For your information, enclosed is pertinent material used by the Committeee in our deliberation of the various sections in the original bill, which appeared during the course of staff research.

Basically, incentives still remain for fire systems to be installed in structures throughout Alaska, which was the main intent of the sponsor. Unfortunately, rural Alaska, or those areas that do not charge property tax, will lose that incentive measure; but all businesses may realize the other incentive measure of applying for business loans at the lower interest rate.

Past concerns expressed by the various State agencies for the administration of the original bill has been resolved in the Committee Substitute, and all the agencies involved have stated they can now adequately work with the bill in its present form.

If you have any further questions, or concerns, please contact my office. I thought you would be interested in this brief synopsis of the Committee action, as well as receiving the additional information.

Sincerely,

Enclosures

The sponsor's main intent was to provide incentive measures for installation of fire protection systems, as well as to provide incentive measures for keeping the installation in effect, once it is installed. This bill Committee Sub. realizes these measures. Property tax exemptions are allowed for structures maintaining fire protection systems. Unfortunately, rural Alaska, or those areas that do not charge property tax will not benefit from this Statute; but all businesses may benefit from the other incentive section of applying for loans from the Business Loan Division, of the State Department of Commerce. Of course, we all realize that one incentive currently exists, and that is through the insurance charges that decrease when installation occurs.

The sponsor's intent was to provide incentive measures for installation of fire protection systems, as well as to provide incentive measures for keeping the installation in effect, once installed. The Committee Substitute retains the incentive measures to meet these goals. Property tax exemptions are allowed for structures maintaining fire protection systems; however, this section was changed from the original version to allow 2% exemption of the full and true value of the structure, with the intent for the percentage to remain effective on the original assessed value base figure through the proceeding years, as long as the system is maintained. It was unfortunately noted that rural Alaska, or those areas that do not charge property tax will not derive benefit from this incentive measure. The APUC section was deleted. The "priority" intention was deleted from the Business Loans section, as well as the section which forbid the Division from denying applicants which have present loans, or previous loans. Lastly, a new definition section was added for fire protection systems, which will be supplied and updated yearly from the Fire Marshall's Office. Past concerns expressed by the various State agencies for the administration of the original bill ~~have~~has been resolved in the Committee Substitute, and all agencies have now stated they can adequately work with the programs as outlined currently. For your information, enclosed is pertinent material used by the Committee in our deliberation of the various sections in the original bill, which appeared during the course of staff research.

If you have any further questions, or concerns, please contact my office. I thought you would be interrested in this brief synopsis of the Committee action, and hope this will give you a better understanding of the issues and concerns that were raised. No one ever objected to the concept, which has met with such enthusiasm and public support.

Sincerely,

Enclosures

IN THE SENATE

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR SENATE BILL NO. 370

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to fire prevention."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.020(a) is amended by adding a new paragraph to read:

(7) real property to the extent and subject to the conditions provided in (j) of this section.

* Sec. 2. AS 29.53.020(g) is amended to read:

(g) The state shall reimburse a borough or city, as appropriate, for the real property tax revenues lost to it by the operation of (e) or (j) of this section. However, reimbursement will be made to a borough or city for revenue lost to it only to the extent that the loss exceeds an exemption which was granted by the borough or city, or which upon proper application by an individual would have been granted by the borough or city, under AS 29.53.025(a).

* Sec. 3. AS 29.53.020 is amended by adding a new subsection to read:

(j) Two percent of the assessed value of an improvement to real property is exempt from taxation if the improvement contains a fire protection system approved under AS 18.70.081, in operating condition, and incorporated as a fixture or part of the improvement. The exemption granted by this subsection is limited to

(1) an amount equal to two percent of the value of the fire protection system based on the assessment for 1981, if the fire protection system is a fixture of the real property on January 1, 1981; or

(2) an amount equal to two percent of the value of the fire

protection system during the year of its installation if the fire protection system becomes a fixture of the property after January 1, 1981.

* Sec. 4. AS 45.95.020(a) is amended to read:

(a) The commissioner shall, under regulations and policies adopted by him, make small business loans to acquire, finance or refinance or equip businesses, including farming equipment, <u>fire protection systems approved under AS 18.70 081,</u> mining and fishing, not exceeding $500,000. The loans shall be secured by acceptable collateral and may not exceed 75 percent of the appraised value of the collateral offered as security. The rate of interest may not exceed nine and one-half percent a year on the unpaid balance.

* Sec. 5. AS 44.33.170 is amended by adding a new subsection to read:

(b) Tourist attraction development matching money may also be obtained for the purpose of purchasing and installing a fire protection system approved under AS 18.70.081 for a building used or to be used for the purposes described in (a) of this section.

* Sec. 6. AS 18.70 is amended by adding a new section to read:

Sec. 18.70.081. APPROVAL OF FIRE PROTECTION SYSTEMS. Before October 30 of each year the Department of Public Safety shall make available a list of approved fire protection systems to the Department of Community and Regional Affairs, the Department of Commerce and Economic Development, and the public.

MEMORANDUM State of Alaska

DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

TO: Marie Pignalberi
Deputy Commissioner

DATE: March 10, 1980

FILE NO:

THRU: Palmer McCarter
Director

TELEPHONE NO:

FROM: Steve Van Sant
Assistant State Assessor

SUBJECT: Comments on SB 370

This is a followup of the memorandum dated 3/5/80 to Deputy Commissioner Marie Pignaiberi regarding concerns on SB 370.

Upon obtaining more information and talking with some of the assessors in the state, we would like to add the following information:

1. According to Anchorage Assessor, Pat McKee, this bill would be almost impossible for him to administer. The reason being that Anchorage does not value commercial property (where most fire protection equipment exists) by the cost approach, but by the income approach. The income approach is simply estimating market value by the income a building is capable of making. For example, assume there are two motels in Anchorage, side by side, and both were very similar. Further assume that one had sprinklers and the other one did not. The estimated value of one motel would probably be within 1%-5% of the value of the other, assuming the room rents were comparable. In this instance, there would be no value given on fire protection equipment, therefore, it would be very difficult to conform with SB 370.

2. As stated in our previous memorandum, we are concerned as to what value the assessor is expected to exempt, cost of equipment, cost of equipment and labor, or estimated market value. If it is to be the cost of the equipment, would the assessor take the actual cost to the owner, or the average cost to any property in general?

3. This bill does not require reimbursement by the state for revenues lost to the municipality by the implementation of this bill.

4. The property owner in the unorganized borough who plans to install fire protection equipment would not realize any incentive under this program (and, in our minds, if the bill is to be an incentive for installation of fire suppression systems, rural Alaska or the unorganized borough is where the greatest need exists).

ALTERNATIVE 1

For your information, we have attached pages from the "Marshall Valuation Service". This valuation service is used world wide by many assessors. Nearly all assessors in Alaska who value commercial property by the cost approach utilize this guide.

On one of the pages, it indicates that the approximate portion of the total cost for "sprinklers" in an office building is 1.9%.

If it is the intent of the legislature to pass a bill whereby the incentive is an exemption of property taxes, the Department would suggest amendments to SB 370 as follows:

1. Remove this exemption from AS 29.53.060 (Full and True Value) and place it in AS 29.53.020 (Required Exemptions).

2. State the amount to be exempted if a structure does have fire protection equipment. This could be done easily by stating, "The exempted amount of this exemption shall be 2% of the full and true value of the building as determined by the assessor under AS 29.53.060."

3. The state should reimburse the municipality any revenue lost to it by the implementation of this bill.

4. There should be a time limit of three years placed upon the exemption. This would allow time for the taxpayer to amortize his investment, but not be an on-going give away program.

5. Existing structures could be granted the same 2% exemption for three years to be equitable. (Although, again, if the intent is to encourage installation of a fire suppression system, only new structures should be included in the bill).

Alternative 2

If the intent of SB 370 is to offer incentives to property owners planning new construction and encourage the inclusion of fire protection systems in new structures, the Department suggests that a program similar to the following be considered.

For equity proposes, the state would adopt a normal cost schedule for fire protection systems. An example of such a cost schedule is presented in the attachments, page No. 2 from the Marshall Valuation Service. In conjunction with this schedule, Marshall Valuation Service also provides "local multipliers" which bring the normal cost schedule

into line with costs in Alaska. The local multiplier for the schedule is 1.97.

After adoption of a schedule, the Department could then compute the "normal cost" of a fire protection system by applying the schedule to each structure which applied for the program. For example, if an application were received for a 10,000 sq. ft. building, the normal costs would be obtained as follows:

10,000 sq.ft. X $1.15 X 1.97 = $22,655.00

After the normal costs were calculated, the incentive program would offer a grant to the property owner of 5% of the computed normal cost. Therefore, the property owner would receive $1132.75 ($22,655 X 5%) from the state. The normal costs could be updated on an annual basis to reflect current estimated normal costs.

STATE OF ALASKA

THE ALASKA PUBLIC UTILITIES COMMISSION

Before Commissioners: Gordon J. Zerbetz, Chairman
Marvin R. Weatherly
Carolyn S. Guess
Susan M. Knowles
Stuart C. Hall

In the Matter of the Filing of a Tariff Revision, Designated as TA19-122, by ANCHORAGE WATER UTILITY to Decrease Sprinkler Fire Protection Rates	U-79-14 ORDER NO. 1

ORDER SUSPENDING TARIFF AND INSTITUTING AN INVESTIGATION

On August 29, 1978, ANCHORAGE WATER UTILITY (AWU) filed a tariff revision TA18-122, requesting authority to reduce its rates to owners of sprinkler fire protection systems. The Staff of the Commission subsequently observed that the proposed reduction was based on incorrect revenue requirements and therefore recommended that AWU withdraw its request and refile with the correct revenue requirement data.

Accordingly, on January 2, 1979, a corrected tariff revision was refiled with the Commission by AWU and designated as TA19-122.

According to AWU, the proposed rate reduction is expected to decrease the annual revenue derived from this schedule of services from $227,394 to $178,034, which amount will be absorbed by the utility until its next comprehensive rate proceeding.

AWU further indicated that the filing was made at the request of the administration and Borough Assembly of the Municipality of Anchorage. The filing is the result of a reduction

in water flow requirements for sprinkler heads from 6,000 gallons per minute (gpm) to 3,000 gpm. The reduction followed discussions between AWU personnel and personnel of the Insurance Services Organization offices in San Francisco, California.

The Commission has reviewed the proposed tariff revision and believes that there are broader considerations than those indicated by AWU that must be addressed before approval. Those considerations include, but are not limited to:

1. The justification for reduction in water demand for sprinkler systems.
2. The effect of the reallocation of water demand investment to utility rate payers.

The Commission further believes that an investigation into the reasonableness and propriety of reduction in sprinkler rates should be instituted.

THE COMMISSION FURTHER FINDS AND CONCLUDES:

1. That it is in the public interest to suspend the AWU request pending an investigation by the Commission.

2. AWU should be placed on notice that an investigation or public hearing in this proceeding might cause the Commission to require refunds to the affected parties.

ORDER

THE COMMISSION FURTHER ORDERS:

1. The operation of the tariff revision, designated as TA19-122, which was filed by Anchorage Water Utility, is suspended for an initial period not to extend beyond August 15, 1979.

2. An investigation is instituted into the reasonableness and propriety of the proposed rates.

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-6222

3. Anchorage Water Utility shall refund any excess revenues collected under its private fire protection (Schedule E tariff rates during the period of suspension if the existing rates are subsequently found to be excessive.

DATED AND EFFECTIVE at Anchorage, Alaska, this 15th day of February, 1979.

BY DIRECTION OF THE COMMISSION
(Chairman Gordon J. Zerbetz and Commissioner Susan M. Knowles not participating)

STATE OF ALASKA

THE ALASKA PUBLIC UTILITIES COMMISSION

Before Commissioners: Gordon J. Zerbetz, Chairman
Marvin R. Weatherly
Carolyn S. Guess
Susan M. Knowles
Stuart C. Hall

In the Matter of the Filing of a Tariff Revision, Designated as TA19-122, by the MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE WATER UTILITY to Decrease Sprinkler Fire Protection Rates	U-79-14 ORDER NO. 2

ORDER GRANTING PETITION TO INTERVENE
AND ESTABLISHING DISCOVERY PROCEDURES

On January 2, 1979, the MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE WATER UTILITY (AWU) filed a tariff containing reduced rates for "private fire protection service". On February 1, 1979, WESTERN ENTERPRISES, INC. (Western) and JIM FAIKS (Faiks) filed with the Commission a Notice of Objection to Tariff Filing and Petition to Intervene (Petition). The Petition was verified and showed that Faiks is the owner or part owner of 10 commercial buildings, that those buildings have fire protection sprinkler systems, and that AWU takes the position that its "private fire protection service" charge can be levied against those buildings. The Petition also showed that the charge to Western for "private fire protection" is about $9,000 a year and alleged that the charge is being assessed selectively in violation of AS 42.05.371.

The Petition asked that Western and Faiks be allowed to intervene in these proceedings, that the new tariff take effect but that all collections be made subject to refund, that

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-0222

the intervenors be granted reasonable rights of discovery, and that a pre-hearing conference be scheduled. AWU has not responded to the Petition.

On February 15, 1979, the Commission issued Order No. 1 in these proceedings which suspended the tariff and initiated an investigation. The Commission did not at that time rule on the Western/Faiks requests to intervene and to be granted rights of discovery.

Based on 3 AAC 48.110, the Commission finds that:

1. There is no means other than intervention by which the rights of Faiks and Western can be protected in this proceeding and there is no existing party who can represent the interests of Western and Faiks.

2. The participation of Faiks and Western will contribute to the development of a sound and complete record.

3. The participation of Western and Faiks will not broaden the issues presented or delay the proceedings.

4. Any order issued by the Commission in these proceedings may affect the financial interests of the owners of the buildings managed by Western.

The Commission also finds that it is appropriate to grant Faiks and Western reasonable rights of discovery because the granting of discovery rights will expedite and streamline these proceedings. In making this finding, the Commission notes that the business records of AWU are available to the Commission and its Staff and that the Commission files are, with limited exceptions, public records as a matter of law. See AS 09.25.120.

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-0222

ORDER

THE COMMISSION FURTHER ORDERS:

1. The Petition of Western Enterprises, Inc., and Jim Faiks to intervene in this proceeding is granted; as to intervenors, they become parties to this proceeding.

2. Western Enterprises, Inc., and Jim Faiks shall be permitted reasonable rights of discovery. Specifically, they shall be permitted to request from the Municipality of Anchorage d/b/a Anchorage Water Utility production of documents and other materials and answers to interrogatories which are admissible or which may lead to evidence admissible in these proceedings. Western Enterprises, Inc., and Jim Faiks, when making discovery requests, and Anchorage Water Utility, when responding to discovery requests, shall be guided generally by the Rules of Civil Procedure governing these requests.

DATED AND EFFECTIVE at Anchorage, Alaska, this 16th day of March, 1979.

BY DIRECTION OF THE COMMISSION

In the Matter of the Filing of a Tariff Revision, Designated as TA19-122, by the MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE WATER UTILITY to Decrease Sprinkler Fire Protection Rates	U-79-14 ORDER NO. 3

ORDER SETTING DATES FOR FORMAL HEARING AND PREFILED TESTIMONY

On February 29, 1979, the Commission suspended TA19-122 for an initial period not to extend beyond August 15, 1979. In its conclusions for this action the Commission noted that it would be in the public interest for the Commission to more thoroughly investigate this matter and in addition, placed the MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE WATER UTILITY (AWU) on notice that its investigation might require refunds to the affected parties.

On March 16, 1979, the Commission granted WESTERN ENTERPRISES, INC. (Western) and JIM FAIKS (Faiks) its petition to intervene as parties to this proceeding and reasonable rights of discovery.

Under its authority to regulate the conduct of its public hearings, the Commission will require AWU, Western - Faiks and Commission Staff to present prepared written testimony instead of oral direct testimony under 3 AAC 48.150(f). Parties will also be

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-3422

required to submit a list of witnesses in their order of appearance with their written testimony. The parties will be specifically precluded from calling witnesses who have not submitted prepared testimony. AWU and Western-Faiks will be required to submit prefiled testimony and witness lists by 4:30 P.M., July 13, 1979. The Commission Staff will submit its prefiled testimony and witness lists by 4:00 P.M., July 20, 1979.

ORDER

THE COMMISSION FURTHER ORDERS:

1. A public hearing is scheduled to convene at 9:00 A.M. on July 30, 1979, in the Commission's hearing room, 1100 MacKay Building, 338 Denali Street, Anchorage, Alaska.

2. Anchorage Water Utility, Western Enterprises and Jim Faiks shall file before 4:00 P.M., July 13, 1979, a list of witnesses in their order of appearance and written testimony instead of oral direct testimony for each witness.

3. Commission Staff shall file before 4:00 P.M., July 20, 1979, a list of witnesses in their order of appearance and written testimony instead of oral direct testimony for each witness.

DATED AND EFFECTIVE at Anchorage, Alaska, this 27th day of June, 1979.

BY DIRECTION OF THE COMMISSION

In the Matter of the Filing of a Tariff Revision, Designated as TA19-122, by the MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE WATER UTILITY to Decrease Sprinkler Fire Protection Rates	U-79-14 ORDER NO. 4

ORDER GRANTING STAY OF PREVIOUS ORDER
AND SUSPENDING TARIFF REVISION

On June 26, 1979, the Commission issued Order No. 3 setting the date of July 30, 1979, for a public hearing in this proceeding and requiring the parties to file written pre-filed testimony.

On July 9, 1979, the MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE WATER UTILITY (AWU) and WESTERN ENTERPRISES, INC., and JIM FAIKS (Western) jointly moved the Commission to stay Order No. 3 and to delay indefinitely the deadlines established in that Order. AWU stated it intended to file a revision to TA19-122 which would "involve different allocations, substantial shifting of costs and a significant change in the proposed rates" (Motion, p. 2). The Motion for Stay of Order and Stipulation also indicated that Western has considered and discussed the anticipated revisions and expects to stipulate to recommend its approval.

It is apparent that the revision the parties propose to TA19-122 will require an entirely new technical and financial

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-0222

analysis. Such a substantial revision has the effect of withdrawing one tariff revision and substituting another. Under 3 AAC 48.310(g) if a suspended tariff is withdrawn by a utility and later refiled, the Commission may, in its discretion, suspend it again for the full statutory period.

Since AWU desires to revise TA19-122 substantially the Commission will stay the operation of Order No. 3 and continue all deadlines established in that order indefinitely. The Commission will extend the suspension period of TA19-122 ordered in Order No. 1 indefinitely pending receipt of the supplemental tariff revision.

The Commission received a number of protests to the original filing from the public. Since the supplemental filing is expected to substantially alter the sprinkler rates proposed, the Commission will notice the new filing to the public pursuant to AS 42.05.411(a) and 3 AAC 48.280 and under 3 AAC 48.310(g) suspend the revised filing for further investigation.

AWU continues to be bound during the initial and any subsequent suspension periods of TA19-122 by the following refund procedure established in Ordering Paragraph No. 3 of Order No. 1:

> 3. Anchorage Water Utility shall refund any excess revenues collected under its private fire protection (Schedule E) tariff rates during the period of suspension if the existing rates are subsequently found to be excessive.

ORDER

THE COMMISSION FURTHER ORDERS:

1. The motion for Stay of Order and Stipulation, dated July 5, 1979, and jointly filed by the Municipality of

PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-0422

Anchorage d/b/a Anchorage Water Utility and Western Enterprises, Inc., and Jim Faiks, is granted.

2. The operation of the tariff revision, designated as TA19-122, is suspended indefinitely pending the utility's compliance with Ordering Paragraph No. 3 infra.

3. On or before September 15, 1979, the Municipality of Anchorage d/b/a Anchorage Water Utility shall file with the Commission its revised tariff for sprinkler rates and supportive documents.

4. All other conditions set forth in previous Commission orders in this proceeding remain in effect.

DATED AND EFFECTIVE at Anchorage, Alaska, this 13th day of July, 1979.

Susan M. Knowles
Stuart C. Hall

In the Matter of the Filing of a Tariff Revision, Designated as TA19-122, by ANCHORAGE WATER UTILITY to Decrease Sprinkler Fire Protection Rates	U-79-14 ORDER NO. 5

ORDER EXTENDING TIME FOR REVISED TARIFF FILING

On September 17, 1979, the MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE WATER UTILITY (AWU) filed a motion for an extension of time to file its revised tariff as directed by Order No. 4 in this proceeding, dated July 13, 1979. AWU stated in this motion that its proposed revisions to fire protection rates are presently undergoing further review by the Municipal Administration (Mayor and Executive Committee). The utility also indicated that the Municipal Assembly might request a public hearing and that in view of this process a 45 day extension of the Commission's filing deadline will be required.

AWU further states that the necessity for this motion has been discussed with Counsel for WESTERN ENTERPRISES, INC., and JIM FAIKS, intervenor in this proceeding, and he has indicated that the intervening party will not oppose this motion.

Since AWU desires to revise TA19-122 substantially, as discussed in Order No. 4 in this matter, the Commission is of the opinion that it would be in the public interest to extend its deadline for filing a revised tariff for an additional 45 day period as requested by AWU.

In the Matter of the Filing of a Tariff Revision, Designated as TA19-122, by MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE WATER UTILITY to Decrease Sprinkler Fire Protection Rates	U-79-14 ORDER NO. 6

ORDER SCHEDULING PRE-HEARING CONFERENCE

On July 9, 1979, the MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE WATER UTILITY (AWU) and WESTERN ENTERPRISES, INC. and JIM FAIKS (Western) jointly moved the Commission to stay Order No. 3 in this proceeding and delay indefinitely the public hearing set by that Order. The Commission granted the motion for stay based on AWU's desire to substantially revise TA19-122 and ordered that a revised tariff for sprinkler rates together with supporting documents be filed by September 15, 1979.

On September 17, 1979, AWU filed a motion to extend the deadline for filing the revised tariff for an additional 45 days, until November 2, 1979. The Commission granted this motion in Order No. 5.

AWU failed to meet the November 2, 1979, deadline. On December 17, 1979, Western filed a motion to eliminate retroactively to January 2, 1979 the private fire protection charges until AWU files a new tariff. The motion also states that AWU notified the attorney for Western that it

ALASKA PUBLIC UTILITIES COMMISSION
1100 MACKAY BUILDING
338 DENALI STREET
ANCHORAGE, ALASKA 99501
PHONE 276-6222

could not file the tariff as planned for a variety of reasons and that the utility had made no decision as to exactly what the tariff should be.

The Commission believes that at this point in time it would be most expeditious to schedule a pre-hearing conference between the parties, in accordance with 3 AAC 48.140, at which time AWU will be given an opportunity to explain its failure to file a new tariff. Also, the pre-hearing conference will afford an opportunity to explore possible courses of action to resolve the issues in this proceeding.

ORDER

THE COMMISSION FURTHER ORDERS, That, a pre-hearing conference be held at 9:00 A.M. on January 21, 1980, in the Commission hearing room, 1100 MacKay Building, 338 Denali Street, Anchorage, Alaska, to give the Municipality of Anchorage d/b/a Anchorage Water Utility and the parties an opportunity to delineate the issues and problems in establishing just and reasonable sprinkler fire protection rates.

DATED AND EFFECTIVE at Anchorage, Alaska, this 11th day of January, 1980.

ORDER RESCHEDULING PRE-HEARING CONFERENCE

On January 11, 1980, the Commission issued Order No. 6 in this proceeding which among other things scheduled a pre-hearing conference to give the MUNICIPALITY OF ANCHORAGE d/b/a ANCHORAGE WATER UTILITY (AWU) and the parties an opportunity to delineate the issues and problems in establishing just and reasonable fire protection rates.

Subsequently, it was learned that it would be necessary to postpone the pre-hearing conference to accommodate the convenience of the parties.

Accordingly, the Commission will reschedule the pre-hearing conference to February 11, 1980.

ORDER

THE COMMISSION FURTHER ORDERS, That, the pre-hearing conference previously scheduled for 9:00 a.m., January 21, 1980, will be held at 9:00 a.m. on February 11, 1980, in the Commission hearing room, 1100 MacKay Building, 338 Denali Street, Anchorage, Alaska, at which time the

3/27/80

Twyla,
Kindly excuse handwriting but am doing this in evening without secretary and typewriter. When I left office a while ago I weighed envelope & included an extra sheet of paper so here goes!

Most of enclosed items are self explanatory:
I made up the sheet with comparative rates and footnote explanation of source of 3rd. column. Please note that this material is from a docket that is still open re Anch. Water Utility – U-79-14.

Also enclosed 2-page summary of the APUC staff study of sprinkler rates in Alaska & Pacific Northwest. As I mentioned on phone, the first question was outside of our purview but was asked in an attempt to assess overall impact on this class of consumer. This first question was poorly prepared – it actually requires two answers, but an honest interpretation of the answer sheets is that most of the answers appear to be directed at the first part of the question.

I also am enclosing a sampling of answer sheets on both sides of the questions. I tried to choose some that had more than a terse "yes" or "no". Some of the comments are interesting. The Ketchikan comments were quite detailed. Note that Ketchikan uses different ~~different~~ methodology. Instead of setting a demand charge they charge for the number of sprinkler heads. Another deviation from demand charge was at Burley, Idaho where they charged on basis of property frontage –

I will be out of town over weekend but

will be in office early Tues. morning — Should be there by 9:00 AM your time — or feel free to call me at home (279-9971) after 8:00 AM your time if you have any questions —

Regards,
Gordon Farley

Will drop this at airport P.O. tonight & have spare & telecopy if doesn't get there on time but am quite sure we have comfortable margin — G.

Gentlemen:

Re: Private Sprinkler Fire Protection

This Commission is desirous of receiving information in the referenced matter as it relates to water utility rates and property tax assessments. Accordingly, if you could assist us by briefly answering the following questions it would be appreciated:

Q. 1. Does a property owner receive any type of tax break for installing a sprinkler system or does the owner subsequently pay more property tax due to an increased property evaluation?

ANS. Increase due to increased property evaluation as the sprinkler system is a unit of the property.

Q. 2. Are sprinkler system property owners charged a demand charge by the utility for water service and if so, what method is used to determine the costs for providing this service?

(See sheet attached.)

Q. 3. Is the sprinkler system property owner required to pay a direct fire hydrant or fire protection tax by the municipality?

(See sheet attached.)

HOLM

Q. 2. No. Not a demand charge. However, the customer is charged for automatic sprinkler fire protection service under Rate Schedule "F-2" of the Ketchikan Municipal Code by the Ketchikan Public Utilities.

Q. 3. No tax. The water system is owned and operated by the City of Ketchikan dba Ketchikan Public Utilities (KPU) who have not only the water system of Ketchikan, but also Electric and Telephone utilities. The Utilities are a separate financial entity from the General Government of the City of Ketchikan. KPU cannot tax. KPU's revenue is not derived from taxes, but only from services.

The City Charter of the City of Ketchikan is very specific as regards the Ketchikan Public Utilities. An excerpt from Article VIII, Public Utilities and Enterprises, will clarify the inability to provide any service without charge.

"None of the income, money, resources or property of the Water system Electric system or Telephone system, shall be placed in the General fund (City) or be used for the benefit of anything outside of the fund to which it belongs without due compensation or due value received in return."

Donald D. Bowey
Utilities Manager
8-2-79

Section 11.16.100 Automatic sprinkler fire protection service

Schedule "F-2" Ordinance No. 911

KETCHIKAN PUBLIC UTILITIES

Water schedule "F-2", automatic sprinkler fire protection service, shall be as follows:

(1) Availability. This schedule is available at the option of the utilities within the city limits of Ketchikan where size of mains and other facilities are adequate.

(2) Character of Service. Water service under this schedule shall be for the supply to "dry pipe" automatic sprinkler systems for fire protection only.

(3) Rate.

200 heads, or less	$102.55 per year
Additional, to 500 heads	.31 per head per year
Additional, to 1,000 heads	.20 per head per year
Additional, over 1,000 heads	.13 per head per year

(4) Minimum Charge: $102.55 per year

(5) General Provisions.

(A) Charges to be billed monthly.

(B) All fire protection lines, sprinkler, pipes and valves on private property shall be owned, installed and maintained by the owner and/or customer.

(C) All connections between utilities mains and privately owned facilities will be made at the expense of the customer.

(D) At the option of the utilities this service may be metered. The meter and the installation thereof shall be at the expense of the customer.

(E) No tap or outlet for use other than fire protection shall be permitted on fire lines or mains unless approved by the utilities.

Q. 1. Does a property owner receive any type of tax break for installing a sprinkler system or does the owner subsequently pay more property tax due to an increased property evaluation?

a.) no

b.) Whether the property owner subsequently pays more tax because property must be assessed at its full and true value based on open market conditions according to AS 29.53. Whether a sprinkler system has an impact on the market value is best addressed by the borough assessor or a private real estate appraiser. As a 1st class city in a 2nd class borough, we do not determine our local property evaluations.

Q. 2. Are sprinkler system property owners charged a demand charge by the utility for water service and if so, what method is used to determine the costs for providing this service?

a.) Not at present.

Q. 3. Is the sprinkler system property owner required to pay a direct fire hydrant or fire protection tax by the municipality?

a.) Not at present.

Dear Mr. Jewell:

1. The City of Dillingham does not give any tax break to property owners installing sprinkler system.

2. Our water demand rates are based on the size water line provided.

The city does not impose a special fire hydrant or fire protection tax.

A copy of our Water/Sewer Ordinance introduced August 16th is enclosed.

Q. 1. Does a property owner receive any type of tax break for installing a sprinkler system or does the owner subsequently pay more property tax due to an increased property evaluation?

Value of property increases – ergo taxes rise. See Alaska Statutes for restrictions on reducing assessed values – see also State Assessor in Juneau

Q. 2. Are sprinkler system property owners charged a demand charge by the utility for water service and if so, what method is used to determine the costs for providing this service?

~~Yes, size~~ No – however there is a demand charge for size of water line to building.

Q. 3. Is the sprinkler system property owner required to pay a direct fire hydrant or fire protection tax by the municipality?

No – I don't think state law permits what you think it does. See State Assessor.

Gentlemen:

Re: Private Sprinkler Fire Protection

This Commission is desirous of receiving information in the referenced matter as it relates to water utility rates and property tax assessments. Accordingly, if you could assist us by briefly answering the following questions it would be appreciated:

Q. 1. Does a property owner receive any type of tax break for installing a sprinkler system or does the owner subsequently pay more property tax due to an increased property evaluation?

No, he does not receive a tax break. The owner could pay more tax due to an increased property evaluation.

Q. 2. Are sprinkler system property owners charged a demand charge by the utility for water service and if so, what method is used to determine the costs for providing this service?

The owner must take a regular water service before qualifying for a special separate fire service. A monthly service charge is imposed based on the operation and maintenance cost of the meter and service pipe.

Q. 3. Is the sprinkler system property owner required to pay a direct fire hydrant or fire protection tax by the municipality?

No, he is not. The municipality makes a small contribution towards the calculated cost of fire protection.

SEATTLE

If possible, the Commission would also like to receive a list of private sprinkler rates currently used by your municipal water utility.

Very truly yours,

ALASKA PUBLIC UTILITIES COMMISSION

John F. Jewell
Deputy Director

IWM:gb

Section 33. That as of January 1, 1975, all water used for domestic and commercial purposes shall be supplied by meter only at the following rates and charges.

The rates for metered water supplied to premises within the City of Seattle in one month, or fractional part thereof, shall be in accordance with the following schedule:

SERVICE SIZE	CONSUMPTION QUANTITY ALLOWED	MINIMUM CHARGE
¾ inch	300 cu. ft.	$ 2.10
1 inch	600 cu. ft.	2.80
1½ inch	1200 cu. ft.	4.10
2 inch	2000 cu. ft.	5.80
3 inch	3400 cu. ft.	8.70
4 inch	4900 cu. ft.	12.00
6 inch	7100 cu. ft.	16.50
8 inch	10000 cu. ft.	23.00
10 inch	14300 cu. ft.	31.50
12 inch	20000 cu. ft.	44.00

Each one hundred (100) cubic feet in excess of the quantities allowed for the foregoing minimum charges except as hereinafter provided.. $ .213

Each one hundred (100) cubic feet in excess of the first thirty thousand (30,000) cubic feet .....$ .142

Each separate building or premises in addition to the first or principal building or premises supplied through the same service connection, five hundred (500) cubic feet or less $2.50

Provided, that the terms "separate building or premises" shall not apply to trailer parks or trailer courts, which shall be governed as to water rates by the number and sizes of services and quantity of water used under the previous schedule.

Water supplied to municipal departments of the City of Seattle, each one hundred (100) cubic feet in excess of the quantity allowed for the foregoing minimum charges .....$ .112

The rates for water supplied for fire protection purposes exclusively shall be deemed service charges and shall be for any one month, or fractional part thereof, as follows:

SIZE OF SERVICE	SERVICE CHARGE
2 inch	$ 1.85
3 inch	2.75
4 inch	3.90
inch	5.40
inch	7.10
10 inch	9.75
12 inch	11.70

The service charges hereinabove set forth shall be granted only during such times as there is no appreciable registration by the meter maintained by the City on such fire protection services.

Water used for any other purpose than for extinguishing fires, through a fire protection service, shall be charged at a rate double the common rate provided for in this ordinance.

← Domestic and commercial rates and fire service charges for inside the City limits of Seattle, Washington. Outside the City limits, rates are slightly higher for the same services.

Gentlemen:

Re: Private Sprinkler Fire Protection

This Commission is desirous of receiving information in the referenced matter as it relates to water utility rates and property tax assessments. Accordingly, if you could assist us by briefly answering the following questions it would be appreciated:

Q. 1. Does a property owner receive any type of tax break for installing a sprinkler system or does the owner subsequently pay more property tax due to an increased property evaluation?

Q. 2. Are sprinkler system property owners charged a demand charge by the utility for water service and if so, what method is used to determine the costs for providing this service?

Q. 3. Is the sprinkler system property owner required to pay a direct fire hydrant or fire protection tax by the municipality?

HGLH

EVERETT, WASH.

Service connection installations larger than the two-inch size shall be charged at the actual cost of the complete installation.

5. Delinquent penalty charge:
(See § 14.16.690) $15.00

6. Special charges:
   a. Turn-on requested less than thirty days after turn-off requested (See § 14.16.280) ..... $10.00 each
   b. Shut-off and turn-on requested for premises where customer's stop and waste valve should have been used (See §§ 14.16.220 and 14.16.250) ..... $10.00 each
   c. Turn-on or shut-off requested for a time other than regular hours (See § 14.16.250) ..... $30.00 each

7. Fire Service. The rates for water supplied exclusively for fire protection purposes shall be deemed service charges and shall be for any one month, or fractional part thereof, as follows:

Size of Service	Service Charge
4 inches	$ 4.00
6 inches	5.50
8 inches	7.50
10 inches	10.00
12 inches	12.00

B. Outside the City Limits.

1. Individual Meters. The consumption and minimum monthly charges for individual metered services outside the city limits shall be computed in the same manner as for metered customers within the city and then a surcharge of twenty-five percent of this amount shall be added to the charge so computed to arrive at the total monthly water charge.

2. Master Meters.
   a. The consumption charges for master meters outside the city limits shall be computed in the same manner as for individual metered services outside

meter. In the case of premises for which both fire protection and other water service for such uses as domestic, commercial, industrial, or manufacturing purposes is supplied, there may be two service installations made to the premises; one for fire service only and one for other water service. These service functions may also be combined in a single service connection with the approval of the water department.

In the event two separate service connections are installed, the fire protection system so served shall consist of an automatic sprinkler system only, without additional outlets which could normally be used for other than fire suppression purposes. (Ord. 1561 (part), 1971).

6.21.04. Fire service monthly service charges. (a) The minimum monthly rates for inspection and maintenance of detector check systems are fixed as follows:

FIRE SERVICE OR DETECTOR METER SIZE	MONTHLY SERVICE CHARGE
2"	$ 5.00/month
3"	5.00/month
4"	5.00/month
6"	7.50/month
8"	10.00/month
10"	15.00/month

Water used through the fire service line for fire suppression purposes and limited testing of the system will normally be furnished without any charge in addition to the monthly minimum charge set forth for fire service meter or detector check meter.

(b) If a detector check meter proves, or proof otherwise provided, leakage or unauthorized usage of water which is not for fire suppression purposes, the customer shall pay for all water used at the applicable metered rate. The rates for water so used are fixed as follows: At the time of first written notice from the city water department the applicable rate shall be the same as the domestic rate for comparable size of domestic water meter for unauthorized use over one hundred cubic feet per month; in the event the unauthorized use again occurs after the period of time specified in the written notice from the water department the rate shall be double the domestic rate for a comparable size domestic water meter for such unauthorized use over one hundred cubic feet per month.

(c) References made by this chapter as to existing metered rates shall be to Chapter 6.20 of the Edmonds city code. (Ord. 1561 (part), 1971).

6.21.050 Violation--Penalty. In addition to all civil rights of collection, liens, shut-offs and other remedies available to the city of Edmonds as prescribed by statute and ordinance for unauthorized use and/or nonpayment of charges, any person, firm, corporation or other organization, including any officers, directors and managers thereof, who violate any provision of this chapter shall be guilty of a misdemeanor and subject to penalties as set forth in Section 5.12.170 of the

This study was initiated prior to this legislative session for informational purposes in APUC Docket U-79-14, Re Anchorage Water Utility.

In July 1979, the Commission Staff mailed questionnaires to all known municipal water utilities within Alaska and to several municipal water utilities in the northwestern United States. The questionnaire consisted of three questions:

Q. 1. Does a property owner receive any type of tax break for installing a sprinkler system or does the owner subsequently pay more property tax due to an increased property evaluation?

Q. 2. Are sprinkler system property owners charged a demand charge by the utility for water service and if so, what method is used to determine the costs for providing this service?

Q. 3. Is the sprinkler system property owner required to pay a direct fire hydrant or fire protection tax by the municipality?

Of approximately 40 questionnaires sent within Alaska, 13 replies were received and of 93 questionnaires sent out of state 42 replies were received.

March 25, 1980

Mr. Dave Walsh, President
Alaska Municipal League
c/o Pouch 6-650
Anchorage, Alaska 99502

Dear Dave:

The ability for municipalities to have a fair and equitable tax base is absolutely critical to healthy local government. I would like to urge the Alaska Municipal League, possibly in conjunction with the Alaska Native Foundation, RuralCap and others, to undertake, prior to next session, a major review of the kind and amount of taxes that the various classes of municipalities can levy and collect. The current Legislature is addressing House Bill 192, dealing with municipal revenue sharing, and Senate Bill 199, dealing with the school foundation program. These two areas provide major cornerstones for municipal school revenues. A third cornerstone, real and personal property tax, is currently faced with possible erosion and decreased credibility.

The Senate Community and Regional Affairs Committee has some twelve bills pending which impact the municipal property tax by allowing certain classes of exemptions, imposing restrictions, etc. Some, but not all, of these bills allow the municipalities to be reimbursed for the changes in their ability to levy and collect real and personal property taxes. Certainly the bills carry a major fiscal impact. I am enclosing a summary of the bills currently before my Committee. Many other tax bills affecting municipalities are before the Legislature, such as changes in the amount of sales tax which can be levied in certain municipalities and elimination of the business inventory tax.

Relating specificially to real and property taxes, it seems to me that policies must be established regarding possible exemption. If such policies are not developed, we will create a hodgepodge of a program that will serve no one well. For example, should we consider exemptions on a need basis rather than exemptions for special groups of people? Should there be equality for a whole group, rather than special interest exemptions within a group? What kind of things would be better left to grant and aid programs as opposed to exemptions in the property tax approach?

The Department of Community and Regional Affairs recently completed a study of the exemption problem. Their study gives a synopsis of information developed that deals with major exemption problems, and in some cases, suggests several options that might be taken. Their broad policy statement favors few, if any, additional exemptions, and they feel that any exemption program should meet the following criteria: "any exemption granted should be either for public property or for sufficient public good to justify a transfer of burden to the balance of the community." They recognize that the credibility of property tax has been questioned continually and with increasing intensity these past few years, and that many taxpayers feel that they are paying more than their fair share.

The state has recognized certain senior citizens' exemptions, as a matter of public policy. These exemptions support a policy of encouraging age diversity in Alaskan society, show esteem for and gratitude to the pioneers of the state and give a method of helping many to afford to stay in our state, rather than have to leave family, and friends to begin a life in another state, where it might be cheaper to live. The senior citizens who are on a fixed income and cannot absorb property taxes increased by inflation certainly are in need of assistance. However, some bills are now reaching into special groups within the senior citizens; for example, allowing for surviving spouses 55 and older of those senior citizens who qualified for real property exemption to continue to benefit from the exemption. But, what about other senior citizens within that same age group who might have just as much, or a greater need for exemptions? Disabled veterans are another group being suggested for special exemptions, but what about the equity question of all other disabled people in our State? Other questions of equity need to be considered.

Each piece of proposed legislation offers a shift in public policy -- new groups which deserve special treatment, new funding approaches, and so forth. However, sound public policy decisions can be made only within the context of effects or impacts on local governments and the general public. How can we create a new special exemption, for example, unless we are certain of municipalities fiscal needs, alternative revenue sources and the impact of using those other sources?

Again, I would urge the Alaska Municipal League to take a leadership position in review of the municipal property tax, as well as the broader impact of local municipalities being able to raise adequate revenues to fund needed municipal services. I would be most pleased to have your response as to whether you feel the Alaska Municipal League finds merit

in this proposal, and if so, I sincerely hope the league will analyze the kind and amount of taxes that the various classes of municipalities can and should levy and collect.

Sincerely yours,

Arliss Sturgulewski

Taxes (home improvement exemption)

SENATE BILL NO. 138, by Senators Bradley and Stimson. Relates to establishment of tax exemption for home improvements. Amends AS 29.53 by adding section which provides that the "value of an alteration, repair, renovation, addition to, or improvement of an existing structure which is used by a taxpayer as his personal residence is exempt from assessment for purposes of levy and collection of property taxes under this chapter....." Repeals AS 29.53.025(f) & (g) relating to current exemptions for improvements. Provides Act effective January 1, 1979.

Introduced February 13 and referred to Community & Regional Affairs, then to Finance.

Veterans (disabled) (property tax exemption)

SENATE BILL NO. 154, by Senator Bradley. Amends AS 29.53.020(e) to include disabled veterans of any age to section which exempts persons 65 or over from payment of property tax. Applies to resident veterans, honorably separated from service whose service-related disability has been rated at 50% or more. Provides Act effective January 1, 1980.

Introduced February 13 and referred to Community & Regional Affairs, then to Finance.

Residential Property Tax (partial exemption)

SENATE BILL NO. 296, by Senator Stimson. Adds to list of exemptions from municipal property tax in AS 29.53.020(a) "the real property owned and occupied as a permanent place of abode by a resident, not exceeding $25,000 in value." Provides state shall reimburse a borough or city for revenues lost. Repeals AS 29.53.025(a) which allows municipalities to exclude or exempt or partially exempt residential property from taxation by ordinance ratified by voters, the exemption not to exceed $10,000 per residence. Provides Act effective January 1, 1981.

Introduced January 14 and referred to Community and Regional Affairs and then to Finance.

Property Tax (municipal) reduction of)

SENATE BILL NO. 299, by Senator Kerttula. Amends AS 29.53.050(a) (Tax Limitation on Municipalities) to read: "A (NO) municipality may not levy and tax for any purpose in excess of nine-tenths of one (THREE) percent of the assessed valuation of property within the municipality in any one year." Provides Act effective 1/1/81.

Introduced January 14 and referred to Community and Regional Affairs.

Property Tax (disabled Vets exempt)

SENATE BILL NO. 360, by Senators Sumner and Hackney, by request. Exempts from municipal property tax the real property owned and occupied as a permanent place of abode by a disabled veteran. Provides exemption is allowed to veteran "for a percentage of the assessed value of the real property which is the same as his percentage of disability as established by his service disability rating." Provides Act effective January 1, 1981.

Introduced January 24 and referred to Community and Regional Affairs and Finance.

Fire Prevention

SENATE BILL NO. 370, by Senators Colletta and Bradley. Adds to AS 29.53.020 (Municipal Property Tax - Required Exemptions) "Two

percent of the assessed value of a structure is exempt from taxation if the structure contains fire protection systems in operating condition incorporated as a fixture or part of the structure. The exemption is limited to 1) an amount equal to two percent of the value of the structure based on the assessment for 1981, if fire protection systems are a fixture of the real property on January 1, 1981; or an amount equal to two percent of the value of the structure as of January 1 following the installation of the fire protection systems as fixtures of the structure after January 1, 1981.

Introduced January 31 and referred to Community & Regional Affairs.

Sr. Citizens Tax Exemp. (surviving spouse)

SENATE BILL NO. 427, by Senators Ferguson, Ray, Sackett, Meland, Colletta, Sumner, Kerttula, Hohman, Mulcahy and Bradley. Amends AS 29.53.020(e) relating to municipal property tax exemption for senior citizens by adding: "The real property exempt from taxation under this subsection continues to be exempt if owned and occupied as a permanent place of abode by the surviving spouse of the resident, if the surviiving spouse is 55 years or older and has a gross annual income of less than $20,000." Does not provide for effective date.

Introduced February 12 and referred to Community and Regional Affairs, then to Finance.

Property Tax Exemptions (for energy

SENATE BILL NO. 431, by the Rules Committee by request of the Legislative Council by request. Adds new section to AS 29.53 (Municipal Assessment & Taxation) which exempts from municipal property tax "The value of an alternation or improvement of an existing structure that reduces energy consumption in the structure." Section applies to mobile homes also. Provides Act effective January 1, 1981.

Introduced February 12 and referred to Community and Regional Affairs, then to Finance.

Municipal Property Taxes (exemp. sr. citizens--personal property)

SENATE BILL NO. 456, by Senators Stimson and Bradley. Amends Municipal Assessment and Taxation (AS 29.53), required exemptions (020) by stating that the property of certain residents of the state is exempt and further states that "(e) The real property owned and occupied as a permanent place of abode by a resident 65 years of age or over, and the personal property owned by a resident 65 years of age or over, is exempt from taxation of the assessed value of the (REAL) property." Deletes reference to "real" property throughout and repeals AS 29.53.020(i) which defines "real property" as property including, but not limited to mobile homes whether classified as real or personal property for municipal tax purposes. Provides Act takes effect January 1, 1981.

Introduced February 18 and referred to Community & Regional Affairs, then to Finance.

Property Tax (residential-partial exem. from assess)

SENATE BILL NO. 465, by Senators Ferguson, Colletta, Fahrenkamp and Sumner. Exempts from general taxation (Municipal Assessment and Taxation, required exemptions--AS 29.53.020(a)) "(7) the real property owned and occupied as a permanent place of abode by a resident, not exceeding $85,000 in value." Exempts real property owned and occupied by a resident 65 years of age or over from

taxation of the assessed value of property which exceeds $85,000 in value. Repeals AS 29.53.025(a) (Municipal Assessment and Taxation. Optional Exemptions and exclusions. Section (a) states: "Municipalities may exclude or exempt or partially exempt residential property from taxation by ordinance ratified by the voters at a regular or special election."), and amends AS 29.53.020(g) (relating to reimbursement of borough or city for revenue lost by exemption) by deletion of language stating that upon proper application an individual would have been granted an exemption. Provides Act takes effect January 1, 1981.

Introduced February 18 and referred to Community and Regional Affairs, then to Finance.

Municipal Property Tax (exempting business inventory)

SENATE BILL NO. 510, by the Rules Committee by Request (for the Interim Tax Policy Committee). Exempts business inventory from municipal property tax levy and provides for reimbursement to municipalities of tax revenues lost by operation of the exemption. Reimbursement made on the basis of the application of the tax rate of the borough or city to the value of business inventory reported to the state by businesses for the purpose of taxation under the Alaska Net Income Tax Act, and subject to legislative appropriation to the Department of Community and Regional Affairs for the purpose. State Departments may adopt regulations to carry out the provisions of chapter. Repeals sections of Municipal Assessment and Taxation (AS 29.53) relating to assessment of business inventory and reassessment in the case of cessation of business during the tax year. Provides Act takes effect January 1, 1980.

Introduced March 5 and referred to Community and Regional Affairs, then to Finance.

Material Prepared By:
Robert R.Shirnberg
Fire Marshal
Nikiski Fire Dept.
Chairman Ad-Hoc Committee
ASFA/~~AFCA~~
December-2-1979

The Alaska State Firefighters Association and the Alaska Fire Chief's Association, at their respective annual meetings in October of 1979 in Petersburg, Alaska, were presented a program entitled, "Community Fire Protection Incentive Program".

Both the Alaska State Firefighters Association and the Alaska Fire Chief's Association submitted to their respective memberships a resolution calling for support in the preparation of program material to enact the Community Fire Protection Incentive Program during the 1980 session of the Alaska State Legislature. Both bodies passed unanimously this resolution.

A joint AD-HOC committee was formed, comprised of members of the ASFA and the AFCA to prepare the necessary material and to carry out the legislative program presentation.

The State of Alaska has the honor of being Number #1 in many catagories. We are by far the largest state in the Union. Our fisheries and resources from the sea are Number #1 in value. Our resources on oil and gas production are approaching Number #1. Our mineral potential is the greatest of all states.

Our state also has the dubious honor of being Number #1 by some margin in the loss of life per capita by fire and the property dollar loss per capita. It appears that the growth of our state is assured with projections of ship building facilities, processing and support facilities for a bottom fishing industry, oil and gas production with related petrochemical industrial plants, mineral development, etc. With the population and constructions that will come with this growth and with our present methods of providing fire protection, we will retain the dubious honor of being Number #1 in per capita loss of life and property damage as a result of fire.

We in the fire service recognize that a new approach in providing for both public and private fire protection needs must be developed. We recognize that the Community Fire Protection Incentive Program does offer the method to redirect fire protection systems and combine the best features of both public and private fire protection in a manner that will improve and better the community against the ravages of fire. It provides a method whereby the costs for public fire protection can be controlled as the community expands and grows.

The Community Fire Protection Incentive Program provides a method whereby the private property owner and businessman will have the incentive and support necessary to provide for the installation of private fire protection systems in their property. This incentive is created through a three-part program as follows:

~~Permanent Revolving Loan Fund~~ Include in Small Business Loans Program

This loan fund will provide loans to private property owners and businessmen at an interest rate and such terms that will create an incentive to install private fire protection systems such as hydraulic sprinkler systems.

The terms of the loan will be such that the direct insurance saving received for the installation of the sprinkler system will be calculated in the repayment schedule. It is the intent that the peoperty owner will realize a real dollar return on the installation of the sprinkler system. An example would be

that if the net insurance saving was $6,000 annually, the loan terms would require a $4,000 annual payment, resulting in a net return to the property owner of $2,000 annually until the loan has been paid off, at which time the property owner would receive the entire $6,000 benefit.

Tax Incentive

Remove from the property tax rolls the assessed value of the private fire protection system. There is no question of the roll that the private fire protection has in supporting the public fire protection system. It is taken into consideration in the I.S.O. rating schedule, it has a decided effect on reducing the overall insurance rating of a community's fire defenses. It protects the community's tax base. It protects the jobs and the economy of the community.

With our present policy of taxing private fire protection systems, we discourage the property owners from installing such voluntary systems.

Again, the private property owner and business man will be encouraged to install private fire protection systems if we remove the tax burden that is placed on such systems.

Water Standby Surcharge for Sprinkler Connections

Some water utilities have placed an excessive standby water rate to property owners that have installed hydraulic sprinkler systems in their property. In many cases these special rates have eliminated or exceeded any dollar saving the property owner may have enjoyed because he has installed a sprinkler system.

In some cases the owners of property equipped with sprinkler systems have shut the sprinkler system down and discontinued its use and accepted the higher insurance rate because there was a dollar saving between the water standby rate and the increased insurance premiums.

As can be seen, the excessive water rate charge is a direct attack on the incentive to install private fire protection systems.

Therefore, it is necessary that special water rates for properties equipped with sprinkler systems be reduced to a very nominal fee or eliminated altogether.

This program intent is to provide for the property owners and businesses the incentive and assistance to install fire protection systems. The program is to be made available to property owners in all areas of the state of Alaska, from the larger municipalities to the smaller communities and very rural areas. To those communities with full-time paid fire departments to those with volunteer fire departments, and also those areas without any fire protection at all. The program makes assistance available to areas that are isolated, such as remote cannery locations, and a method to provide for fire protection of such facilities.

With such a program in effect and within a few short years, we will see a decided reduction in our property fire loss and loss of life from fire. We will realize a direct saving in the cost of our public fire protection systems. We will be able to better meet the fire protection needs of our expanding and growing communities, and be able to control the costs of this expansion.

Fewer jobs will be lost through catastrophic fires, the economy better protected, the tax base of the community better assured, and those public programs that are supported by the tax base better protected.

Dear John:

I don't find any particular fault with SB 370, which is currently in Senator Arliss Sturgulewski's Community and Regional Affairs Committee. Undoubtedly, I'll vote for it when and if it appears before me, but I think there is a caveat: If the assessor cannot include the value of a fire protection system in the assessment for the full and true value of a building, why shouldn't the same exception apply to people who construct extra water tanks on their property or below the structure? What about an exemption for people who buy fire resistant roofing materials? How about people who spray structures with fire retardant chemicals? Likewise with fire retardant insulation?

I could go on and on, but I'm sure you get the idea.

Regards,

BRZ

February 22, 1980

Senator Mike Colletta
Pouch V
Juneau, Alaska 99811

Dear Senator Colletta:

On behalf of the City of Ketchikan, I wish to add support to passage of Senate Bill 370, an act relating to fire prevention.

Approved automatic fire protection systems are obviously and definitely advantageous to the building in which they are installed. However, the benefits of those systems go far beyond the individual structures. They also benefit the entire community.

Essentially, installation of such systems decreases a community's "fire flow requirement" which is the community's ability to deliver water to control fires. A decrease in the "fire flow requirement", in effect, reduces the need for fire fighting equipment, facilities to house that equipment and staff to operate and maintain that equipment and facilities without reducing the level of fire protection in the community. Therefore, the entire community can benefit because of a reduction in the cost necessary to provide a given level of fire protection.

Because the entire community can benefit from the installation of approved fire protection systems in individual building, building owners should be given an incentive to install such systems rather than suffer additional fees or taxes because they installed those systems. Therefore, the City of Ketchikan supports Senate Bill 370.

If you have questions about the City's position on this issue, please contact me.

Sincerely,

James A. Van Altvorst
City Manager

JAVA:gw

However, the presence of automatic sprinkler systems in buildings reduces the anticipated fire flow requirements by 25 - 50% (see ISO "Guide to Determination of Required Fire Flow"). Therefore, if a sprinkler system is installed less fire hydrants are required; e.g. every three hundred (300) feet instead of every two hundred (200) feet.

Since Fairbanks residents pay hydrant fees by general taxation rather than specific proximity charges or individual fire service demand fees, the owners of low service demand properties end up paying equivalent proportionate fees to owners of large demand properties.

The presence of sprinkler systems reduces the needed number of fire hydrants, and also therefore the necessary size of water mains can also be reduced.

The College Utilities Water System is a private utility providing water to an area of about 5,000 population to the west of the City limits of Fairbanks. Their method of assessing for sprinkler fees and hydrant charges is

a. $2.26 per month if located within 1,000 feet of fire hydrants,

b. Unmetered sprinkler service fees

1. $39.50/mo. for 2"
2. $84.00/mo. for 3"
3. $142.00/mo. for 4"
4. $225.00/mo. for 6"
5. $394.00/mo. for 8"

The City of North Pole has a fee schedule for sprinkler services very much like that of the City of Fairbanks.

If any bills are drawn up and introduced concerning any Community Fire Protection Incentive Programs, please forward me a copy. Thank you.

Sincerely,

James A. Morris

First Reading: 12/11/78

ORDINANCE NO. 3749, As Amended

AN ORDINANCE TO AMEND FGC CHAPTER 12. UTILITIES, SECTION 12.117, WATER UTILITY RATES AND CHARGES; COMPULSORY CONNECTION TO WATER SYSTEM, AND SETTING AN EFFECTIVE DATE.

BE IT ENACTED BY THE CITY COUNCIL OF THE CITY OF FAIRBANKS, ALASKA, as follows:

Section 1. That FGC Chapter 12, Utilities, Section 12.117, Schedule W-1, Metered Water Service be amended as follows:

(2) Monthly Rates:

Flat metered water rate per 1,000 gallons	$ 2.25	[$2.00]
(3) Minimum monthly charge for metered service, based on 2,500 gallons.	$ 5.70	[$5.00]

Section 2. That FGC Section 12.117 Schedule W-2, Other Water Service be amended as follows:

(2) Monthly Flat Rates:

Single faucet of outlet (3/4")	$ 8.90	[$ 7.90]
Full service of not more than 1 bath, 1 lavacory, 1 toilet and 4 additional faucets or outlets.	$19.80	[$17.60]
Additional cold water faucets or outlets over full service per faucet or outlet. . .	$ 1.80	[$ 1.60]
(3) Minimum Monthly Charge for Above Services .	$11.25	[$10.00]

(4) Unmetered Water Sprinkler and Fire Hose Service. Water provided herein covers unmetered water deliveries to fight fires. Usage of water for other than fire fighting purposes may terminate the service and/or result in penalties of not less than five (5) months flat rate charge. Water sprinkler systems or fire hose systems connected to metered services are not covered by this schedule.

(A) Monthly flat rates:

4" Service or less	$40.00	[$36.00]
6" Service	$48.00	[$43.00]
8" Service	$56.00	[$50.00]

(B) Fire Hydrant services:

Monthly hydrant service charge, per each	$65.00	[$58.00]

Section 3. That the effective date for such changes in rates set out in Sections 1 and 2 shall be the first billing cycle one month following the effective date of such ordinance making such changes.

Section 4. That the effective date for this ordinance be the 29th day of December, 1979.

Dear Senator Bradley,

The Interior Fire Chief's Association supports House Bill NO. 648 with one exception.

Section 2 AS 42.05.381 (d). The words hydraulic sprinklers are not defined and are too restrictive. That sentence should be changed by deleting the reference to "hydraulic sprinklers" or by adding the words "hydraulic and standard sprinklers."

Dear Senator Tillion:

Hopefully, Senate Bill No. 370 will be coming out of Committee and before the Senate for action in the near future.

I do support this legislation, and believe it will offer the businessman the assistance and initiative needed to install fire protection systems in his property. This bill offers the opportunity to control the escalating costs of fire protection service as well as improving the community's fire protection.

Your support on this legislation will be appreciated.

Respectfully,

SB 310

Proposed CS for HB 648 relating to fire protection would include a definition of fire protection equipment as follows:

p. 2 line 13
(c) In (b) of this section, "fire protection equipment" means fire protection or fire alarm systems as defined in the current edition of National Fire Codes published by the National Fire Protection Association.

Appropriate reference to this definition will be made as needed throughout the bill.

ATTN: Paul Quesnal

February 27,1980

Dear Paul

I have inclosed a written description of Fire Protection systems, I have also inclosed a copy of a letter I recieved from the Greater Juneau Chamber of Commerce supporting House Bill No.648

I contacted Ron Hendrie, the State Fire Marshal, and read to him the letter describing fire protection systems, he approved of the description on fire protection systems.

The program package material was sent to the printers on Tuesday, and we hope to have it back by this Friday, as soon as we get it in our hands we will be sending this material to your office.

It sounds like things are proceeding smoothly in respect to this bill, keep up the good work! and keep me posted on progress.

Bob Shirnberg

PS. Will you see that Marcie gets a copy of this?

DEFINITIONS OF FIRE PROTECTION SYSTEMS

Fire protection and fire alarm systems are those systems as defined in the National Fire Codes, current edition, published by the National Fire Protection Association.

These systems include, but are not limited to the following: Foam Extinguishing systems, High Expansion Foam systems, Carbon Dioxide systems, Halon 1301 systems, Halon 1211 systems, Dry Chemical systems, Water Spray Fixed systems, Foam/Water Sprinkler and Spray systems, Standpipe and Hose systems, Hydraulic Sprinkler systems, and associated pumps & tanks as required for the foregoing systems.

Fire Alarm systems include, but are not limited to: Central Station signaling systems, Local Protective signaling systems, Auxiliary systems, Remote Station signaling systems, Propietary signaling systems, Automatic Fire Detection systems.

FEB 1 . .80

January 21, 1980

Leaders
Senate House
House of Representatives
State Capitols

Dear Sirs:

Two years ago on December 13, 1977 the dormitory fire at Providence College in Providence, Rhode Island occurred and caused the death of ten girls. In May of 1979 a number of us, their parents, were able to meet for the first time and came to understand that we should do what we can to bring about some good from that tragic occurrence. We now write this letter to you in the spirit of one knocking at the door of your sensibilities.

We have the firm conviction that, if you as a leader in the affairs of your State will re-examine those factors relating to the fire at Providence College, you will learn the lessons that such an examination will reveal. We simply expect and pray that as a consequence you will be personally prompted to take active leadership in insuring that a similar tragedy will not occur on campuses and in institutions of your geographic area. We do not profess to know how you may proceed but trusting in Him above and acknowledging His goodness to us even as this burden of loss has been laid on us and giving witness to the happiness of the many acts of love we shared with our daughters while they lived, we make bold to ask you to consider the following steps as a possible course of action:

1. Lead the State Legislature in re-examining and restructuring laws, standards, and regulations pertaining to fire and building codes and related safety equipment protection devices in the light of all known technology.

2. Establish laws, funds, and agencies to study the technology of fires and the effect of heat, flame, and smoke on bodily, mental, and psychological functions so as to develop meaningful survival techniques.

3. Institute a network of cooperative, educational programs among state and local governments, schools, protection agencies, insurance companies, the press and media and other institutions and among the citizenry itself whereby fire awareness, fire precautions, fire hazards, fire safety and the like become part of everyone's education. Special efforts to heighten awareness should occur in those months and in those situations where the possibility of fire

may exist as known from probability studies and correlative statistical data.

We present our request to you on the basis that we feel compelled to raise our voices to stimulate a renewed interest and corrective action. We thank you for your attention and ask you to join us in our concern that the death of our daughters be not without some blessings for other human beings. We stand ready to assist you in any way we can.

Sincerely yours,

COMMUNITY FIRE PROTECTION INCENTIVE PROGRAM

Prepared by Robert R. Shirnberg
October 20, 1979
Fire Marshal
Nikiski Fire Department
283-4202
P.O. Box 1167, Kenai 99611

VI
F

COMMUNITY FIRE PROTECTION INCENTIVE PROGRAM

This program is designed to provide the means and methods for the installation of private fire protection systems in private property and to enhance and support the public fire protection systems of the communities throughout the state of Alaska. This is to be accomplished through the combination of three approaches:

1. Establish a loan fund to provide loans to private property owners for the installation of fire protection systems.

2. A tax incentive for property owners by removing from the property tax rolls the assessed value of the private fire protection system.

3. Control the water standby rate charge, charged by water utilities for large diameter service to sprinkler systems. Such rate charges should be set at a level that will not discourage the installation of sprinkler systems.

VI
F

What are the possible long term benefits from the Community Fire Protection Incentive Program?

It is apparent that if such a program is carried out to the ultimate, that most of our commercial and business properties could be protected by sprinkler systems. If this was the case, it will have a decided effect on the fire flow requirements of each community by reducing the flow requirements. This will affect the apparatus and equipment required, location and response distances of the companies, the number and location of fire stations, as well as the manning requirements of the fire departments.

There is no question that the State of Alaska is undergoing rather rapid growth in population. The oil industry is expanding, other industrial plants associated with the oil industry are planned and coming on line. The fishing industry is expanding into new products and plants. This is bringing additional population and businesses into many of our communities. This growth is impacting the fire protection systems of many of our cities and rural areas. Communities are being faced with providing additional fire protection services and with the costs of providing these services.

The community fire protection incentive program can provide an alternative to the increasing costs of fire protection. The fire service may well be able to hold the line in respect to increasing costs associated with the growth of the community, and may well be able to reduce the costs in relation to the mill rate required for fire protection.

I have enclosed a copy of an article by Harry E. Hickey, an associate professor with the University of Maryland, entitled "Built-In Fire Protection and Fire Department Manning." This was published in the Fire Management Review, a publication of the City Management Association. This is an area of interest to city managers, and will probably be discussed with the fire departments. The article is idealistic, but does indicate what effect providing sprinkler systems can have on the fire protection system of a community.

VI
F

I suspect that the greatest long term effects of the Community Fire Protection Incentive Program will be in the area of security of the community's assets. I look at these assets as the commercial property, the business within these properties, and the jobs created by these businesses. The community's assets are all the properties within their community, and the income for the community's programs are derived in the form of taxes on this property. With the property protected by sprinkler systems, the community's tax base and programs are protected from fire.

Such a system protects the economies of the community by providing security for the businesses that provide employment of those within the community. The immediate effect of fire on a business is often dramatic, in that amount of dollar loss attributed to the building and contents. The long-term effect of this fire is often overlooked in that the business and jobs lost, the former employees who often must leave the community to work elsewhere, and the effect of the lost payrolls. Few businesses recover from large fires; most often the fire destroys not only the building and contents, but along with that, the jobs and revenue from the business itself. This has the direct effect of removing the property from the tax rolls. We lose the tax generated by the former employees of the business. In many cases, the long-term effect is far more costly on the community than the dramatic immediate loss of the fire itself. In the long-term, this is probably the most important consideration for the establishment of a Private Fire Protection Systems Funding Program.

There have been a number of canneries in smaller communities that have been destroyed by fire. Most often they have not rebuilt, and in some cases the communities where this has happened have ceased to be. There have been a number of fires in commercial property in our larger communities that have destroyed a million dollar tax base, along with large numbers of jobs. These have long-term effects on the community.

The Community Fire Protection Incentive Program can reduce by a very large degree the economic effects of this type of fire.

VI
F

FIRE PROTECTION REVOLVING LOAN FUND

The revolving loan fund should be funded at a level that will allow for rapid implementation and installation of private fire protection systems.

This fund will make loans to property owners that desire or are required by the uniform building code to install private fire protection systems. Interest rates and loan terms of such loans should be established at a level that encourages the property owner to install such systems.

Requests for loans shall be considered on a priority basis, with those properties that are required to retro-fit fire protection systems in existing properties having the highest priority.

Loan priorities shall be established by the State Fire Marshal's Office. The fire protection system to be installed shall meet the standards as required by the State Fire Marshal's Office.

Cities and municipalities that have code enforcement and standards administered by building department and fire prevention services shall establish the priority schedule for loans and shall review and approve fire protection systems that meet the required standards. Loan requests meeting their approval shall be forwarded to the State Fire Marshal's Office for review and approval.

The revolving loan fund shall be administered by the Department of Commerce, and loan requests that have been approved by the State Fire Marshal's Office shall be granted.

VII
F

LOAN PRIORITY

PRIORITY#1

Property that will be required under the Uniform Building Code (1976) or (1979) as adopted by the State of Alaska to be retro-fitted with sprinkler systems.

PRIORITY#2

Exsisting property that is not required by the Uniform Building Code to be retro-fitted with sprinkler systems, but where the property owner desires to install a sprinkler fire protection system.

PRIORITY#3

New construction that is not required by the Uniform Building Code to install sprinkler systems, but where the property owner desires to install a sprinkler fire protection system.

PRIORITY#4

New or exsisting dwelling units where the property owner desires to install a approved sprinkler protection system.

VII
F

TAX INCENTIVE PROGRAM

What are we talking about when we speak of a tax incentive program for fire protection? In looking back over the years, and in particular to the fire protection systems that are provided by private property owners, business and industry, we find that through Fire Codes, Uniform Building Codes and ordinances we have insisted that these same property owners provide private fire protection systems.

In effect, what we are telling the property owner is that we in the fire service cannot provide or meet the fire protection requirements for their particular property, that we insist that they install a system that will provide for fire detection and extinguishment, and supplemented by our fire department, we can then possibly handle the fire problem in his building or property.

When the property owner provides for this private fire protection, we often overlook the fact that he is not only providing protection for his property, but in effect is providing a part of the overal' fire protection system of the community. His system does provide for fire protection to nearby properties in that the chances of the fire extending beyond his property is practically illiminated through his built-in fire protection system.

With the installation of a sprinkler system or other fire protection system within the property, the value of the property increases. Up to now the increased value of the fire protection system has been added or included in the tax assessment bill on the property.

I strongly feel that to require a property owner to provide for private fire protection systems on his property and then increase his tax bill because he has installed such a system is again self-defeating. We must be able to encourage the property owner to install such systems. We well know that such a system adds directly to the over-all fire protection system of the community.

To encourage the installation of private fire protection systems in our communities throughout the state, with the direct long-range effect of reducing or at least being able to maintain the current level of public fire protection we should consider the following:

Inact legislation at the State level that will remove from the tax rolls the assessment against private fire protection systems The net effect to the property owner will be that his property tax rate will be reduced by the value of the private fire protection system.

Presently, the property owner that provides private fire protection systems for his property receives the following benefits:

1. Protection for his building
2. Protection for the contents
3. Protection for the occupants
4. Protection for his business
5. A reduction in the insurance premiums

The public receives the following benefits when a private property provides fire protection systems:

1. The public that enters or resides within the building is protected.
2. The nearby property owners are protected from fire extending from the property in question.
3. The community's tax base is protected in the property
4. The community has assurance that this business will not be destroyed by fire.
5. The jobs provided within this property are secure from fire.
6. There is a lesser demand or requirement on the community public fire department because this property has a built in fire protection system.
7. The overall fire insurance rating will be enhanced by those properties protected by fire protection systems.

It is apparent that those property owners that install private fire protection systems not only receive certain benefits directly, but in respect to the community as a whole, that through their private efforts, provide a larger degree of benefit to the community in general.

Up until the present time, the property owner that provided private fire protection systems has received no direct benefits or credit from the community or local government for his efforts. The community has in general not recognized what the private fire protection systems mean to a community.

It is apparent that if all private property owners could or world provide private fire protection systems, it will have a dramatic long-term effect on the total community fire protection system. It will certainly affect the costs of providing community fire protection in the future.

WATER SURCHARGE RATE

The standby water surcharge rate that is applied in some communities to those property owners that have or have been required to install full sprinkler protection for their property is in effect self defeating in respect to the fire protection system of the community.

It appears that the only consideration for this type of charge is to provide additional revenue for the utility.

This type of rate charge will result in property owners taking a second look at installations of sprinkler systems. Unless the property owner has a direct benefit that is cost effective he will not be interested in providing fire protection systems for his property.

The benefits that the property owners should receive in the event he provides a sprinkler system for his property would be a reduction in his insurance rate, that will pay back the cost of the sprinkler system within a reasonable time. Another benefit is the protection of his property and business from fire.

An additional water surcharge for sprinkler connection is contrary to the fire protection needs of the community. The community should rather assist and encourage the property owner to install such systems.

We in the fire service, and those that are in communities that have placed a surcharge for sprinkler systems, have often been silenced and are unable to protest this self-defeating development of our fire protection systems. Where the administration is dead set against such charges and they are unable to speak out, such organizations as the State Fire Fighters Association can take a stand and pursue legislation at the State level prohibiting such charges.

If we can encourage the state legislators either by law, or administrative action by the Public Utilities Commission, to eliminate or reduce to a reasonable charge, the service provided for sprinkler systems we will have accomplished much in providing a direction and guidance in meeting the needs for fire protection in our communities.

CASE FIRE INSURANCE RATES

Property Discription 29,560 sq. ft. concrete block, retail shop complex.

Fire Protection Class Rural#8

Value of Building $702,000

Insurance Carried $700,000

Protected Rate .40 per 100

Unprotected Rate 2.65 per 100

Estimated cost of Sprinkler System $42,000

Assesed value of Sprinkler System $42,000

Property Tax Rate 5 mills

Fire Protection Loan 42,000 Interest 7% No.of Years 5

Monthy Payment $831 Annual Payment $9979

Cost Unprotected Property		Cost Protected Property	
Insurance	$18,550	Insurance	$2,800
Tax (mill rate)	$3,500	Tax	$3,500
		Tax Credit	$210
		Loan Payment	$9,979
Total	$22,050	Total	$16,069

Annual saving to property owner $5,931

Saving to property owner on complition of loan payments $15,960

Built-In Fire Protection And Fire Department Manning

by
Harry E Hickey
Associate Professor
University of Maryland

The number of companies required and the manning levels for each company are directly related to the number of hazards in a community. Any community has a range of hazards. Therefore, the geographical location and the nature of these hazards are prime factors in determining the location of engine and ladder companies.

PROPERTY HAZARD LEVEL REDUCTION

Generally, property hazard levels should be used to determine the number and type of fire companies required and the manning levels for each

One method of measuring property hazard levels is to determine the amount of water required to control and extinguish a fire in a building or a group of buildings. Required fire flow will vary according to a building's ground floor area, height, construction, occupancy, internal fire protection and alarm systems (automatic sprinklers and alarm transmission to emergency response service), and exposure conditions.

The Guide for the Determination of Required Fire Flow, which is published by the Insurance Services Office (ISO), can help to determine fire flow requirements for specific hazards (there is some question on the validity of the final computations). It is also helpful in assessing fire flow requirements according to a community's hazard variables. The guide states that by using these computations, fire flow requirements 'may be reduced by up to 50% for complete automatic sprinkler protection. Where buildings are either fire resistive or non-combustible construction, the reduction may be up to 75%". Thus, established fire flow values can be cut drastically by requiring the installation of automatic sprinkler protection.

Regardless of the method used to compute required fire flow, there is general agreement that the public protection equipment requirement increas with the fire flow requirement. Conversely, as the property hazard is reduced, so is the required fire flow and thus, the level of fire departme response.

A community policy to control and reduce property hazard levels by requiring automatic sprinklers can have a significant impact on holding th line with fire department manning requirements. In addition to improved life safety and property protection, automatic sprinklers may reduce property insurance premiums and the demand on the community's fire suppression delivery system. This may open new service delivery options, such as improvement of emergency medical services with existing personnel.

HYPOTHETICAL CASE STUDY

The community of Newtown, which covers approximately 12.75 square miles, has 5 primary hazards characterized by: ordinary construction, four stories, ground floor areas from 43,000 to 50,000 sq. ft., occupancie at the moderate hazard level, and normal exposure conditions. It is assumed that these buildings are the worst fire hazards in the community, and that the level of fire protection required for them will be equal or better for the rest of the community.

Without automatic sprinkler protection the ISO guide sets a required fire flow of 8,000 gallons per minute for each fire. However, using the water supply section of the ISO Grading Schedule, the basic fire flow for

VI

Newtown is 7,500 gallons per minute. The guide makes a clear distinction between required fire flow and basic fire flow.

If each of the primary hazards were retrofitted with a hydraulic automatic sprinkler system, the peak required fire flow for each fire demand zone would be reduced from 8,000 gallons per minute to 4,000 gallons per minute. This would reduce the basic fire flow for Newtown to 3,500 gallons per minute.

The reduction in fire flow requirements has a dramatic effect on manning levels. Fire suppression manning requirements were calculated on the following assumptions:

- a 48 hour work week
- average vacation and sick leave of 4 hours per week for each individu
- 38 persons are required to staff a suppression position 24 hours a da
- engine and ladder companies each require one officer on duty at all times

The ISO Grading Schedule was used to determine the number of engine and ladder companies required, based upon the response distance and the established required fire flows, and the manning requirements for each company.

Company and manning requirements were calculated with and without automatic sprinklers.

	Without Automatic Sprinklers	With Automatic Sprink
Stations	5	3
Engines	7	4
Ladders	3	1
Officers	42	15
Firefighters	209	76

Annual personnel costs (including fringe benefits) were estimated on the basis of $24,000 for each officer and $18,000 for each firefighter.

	Without Automatic Sprinklers	With Automatic Sprink
Officers	$1,008,000	$ 360,000
Firefighters	3,762,000	1,368,000
TOTAL	4,770,000	1,728,000

The reduction in personnel costs alone is $3,042,000. This hypothetic case does not consider the cost factors for installing automatic sprinkler community water system design, deactivation of two fire stations, or the potential savings on community insurance premiums.

It has been established that the property hazard level is the primary factor affecting manning levels for fire companies. When the hazard is reduced, so is the manning requirement. This is only one method of assessing the difference between protection from specific hazards with a complement of fire suppression personnel and increased private protection to lower the demand for public protection.

Sprinklers Required in New Buildings

BY R. J. COLEMAN
Director of Fire Protection

and

G. L. CARMICHAEL
Fire Marshal
San Clemente, Calif., Fire Dept.

Faced with a tremendous increase in the residential fire problem as its population doubles in the next 10 years, San Clemente, Calif., has passed an ordinance requiring sprinkler systems to be installed in new residential construction. The ordinance also applies to the remodeling of more than 50 percent of a building.

There has been a great deal of talk over the years about residential fires, which account for the largest number of structural fires and take the most lives, but San Clemente has done something about the residential fire problem. The sprinkler ordinance is also aimed at restraining the cost of public fire protection while maximizing fire department services and putting technology to work for us.

What prompted the passage of the residential sprinkler ordinance was a unique growth situation in the city and preparatory work by the staff of the San Clemente Fire Department.

Land to be developed

San Clemente covers 15 square miles with a population of 26,000. Two thirds of the city, about 10 square miles, is vacant land. The three corporations which own this land are prepared to fully develop it within the next 10 years. The population of San Clemente is due to double by 1990.

The fire department staff several years ago realized that it faced this potential and instituted a fire department master plan project. One of the elements of the master plan was to examine alternative methods of providing fire protection during this period of unprecedented growth. Initially, the department received most of its information and training on the master plan project from attending the National Fire Academy fire protection master planning course.

Historically, 50 percent of the fire loss in San Clemente has occurred in single and multiple residential buildings. The five-year fire record also showed that the largest percentage of fires started in kitchens and living rooms. The result of this statistical data was the formulation of a master plan goal to "reduce the loss of life and property in dwelling fires by building fire protection into the construction."

The early studies

Research during the master plan project developed a great deal of information on studies of residential sprinkler systems, smoke detectors and early warning systems. These systems were immediately identified as possible means of mitigating the fire problem.

The first of these systems that was integrated into the city's codes was that of smoke detectors. A comprehensive smoke detector ordinance, patterned after the San Carlos one, was adopted in 1976. This ordinance requires the installation of smoke detectors in all new homes and in existing homes when they are sold or by 1981, whichever comes first.

Members of the fire department took some of their basic information on residential sprinkler tests from United States Department of Commerce studies. With the aid of several local automatic sprinkler companies, the department conducted a series of controlled burns, experimenting with a wide range of heads and installation specifications suggested by the Department of Commerce studies. These tests were run in cooperation with local building contractors and developers. Interested parties were allowed to witness the tests and make suggestions on how to incorporate sprinkler systems into their construction projects.

Four sprinkler goals

The residential sprinkler ordinance was developed with four major goals:

1. That it be low cost.
2. That it be aesthetically acceptable to homeowners.
3. That it be aimed at reducing liability in providing fire services.
4. That it speed the response of extinguishing agents in a dwelling fire.

One thing became apparent right away. The state of the art in residential sprinkler protection was not perfect, and, to draw an analogy, the fire department staff felt "that if the Wright Brothers had waited for the Concorde to be invented, they probably never would have built the first aircraft." The decision was made to take what information we had and move forward with the development of a comprehensive sprinkler ordinance for dwellings.

The San Clemente Fire Department operates with an attack pumper that is backed up by reserve fire fighters. Based on this operational situation, it was our intent to provide residential sprinkler systems with three objectives in mind. The first objective was to confine 70 percent of all dwelling occupancy fires to the room of origin. The second was to utilize the sprinkler system to prevent flashover from extending a fire into rooms adjacent to the room of origin. The third objective was to provide fire suppression capability for the first 15 minutes of an alarm.

Fire department support

These three objectives recognized that these systems must be supported by fire suppression forces if they were to be 100 percent effective. These three objectives also recognized that the residential sprinkler system was primarily a tool to mitigate against fire spread during the reflex time period.

The department already had a partial track record on these systems. Due to the other problems in the community, such as limited access, underground garages, etc., the department had already required several apartment houses and condominiums to be sprinklered to NFPA Pamphlet 13-D requirements. Prior to passage of the ordinance, the fire prevention bureau had required these systems in approximately six of these occupancies. Three had been completed prior to the final drafting of the ordinance.

Consideration of this alternative was given a tremendous boost with the passage of proposition 13. This tax-limiting initiative highlighted the general problem of eroding revenue to support fire departments.

One of the most important elements in the study was that of cost. With home construction costs spiraling rapidly, one of the objectives of the study was to develop a system that would be economically feasible during construction. With single family dwelling construction costs running over $80,000, the installation of a truly domestic residential system was a relatively insignificant amount. The staff estimated the cost to be only $700 to $800 during the construction of a home of about 2100 square feet.

Early warning system

The third system that has yet to be required by ordinance is the early warning alarm system to tie together the other systems. The fire department communications officer, Captain Bill Bendy, has authored an ordinance and designed specifications for an alarm system that will allow the fire department to monitor both smoke detectors and residential sprinkler systems with

ordinance will soon be enacted.

There are many other elements of the residential sprinkler system too lengthy to digress in this article. Two of the major construction requirements, however, will be tightly controlled by the fire department.

First, the system must be installed according to proper design. Through a series of inspections and testing, the fire department will examine every installation and compare it against the standards and engineering drawings.

Secondly, the quality of construction will be controlled through a series of permits authorized under the ordinance, which in summary states, "No one shall install a residential sprinkler system in San Clemente without a fire department permit." These permits can be obtained through the office of the fire chief. It will be his obligation, prior to issuance of a permit, to be satisfied that the applicant has adequate training and knowledge in sprinkler system plumbing practices.

One-year sprinkler installer permits are issued for a $10 fee that covers the administration costs of the fire department.

Premium cut sought

The fire prevention bureau is soliciting input from the insurance industry in an attempt to get a reduction in insurance premiums for occupancies that are protected by all three built-in systems. The results of that study are incomplete at this time.

In summary, the enactment of these amendments to the Uniform Fire Code should allow our city to maximize our fire suppression forces without facing spiraling costs or reduced revenue. It will not prevent our department from growing in terms of additional staff and equipment. As a matter of fact, the master plan also calls for two new fire stations.

It is still too soon to determine if the standards and the ordinances produce a statistically significant level of reduction in the fire problem. The fire department staff is continuing to build a partnership of the fire service, the sprinkler industry, the insurance industry, the building industry and the local citizenry to upgrade the ordinances if that becomes necessary.

Hopefully, when the development of the three vacant land areas is completed, we will have an environment that is considerably safer from a fire loss point of view than the average community. We really don't know that for sure. To compare to our early analogy about the Wright Brothers, we have now built in a system that is flying, but we are really not sure how it's going to land. Only time will tell! □ □

The incentive aspects of the bill (voluntary or regulated installation of private fire protection systems) will favorably affect fire prevention and protection programs and efforts at the state and local levels.

(4) FISCAL IMPACT: ☐ NONE ☐ FISCAL ANALYSIS ATTACHED

(5) AMENDMENTS PROPOSED:

None

(6) COMMENTS:

The provisions in this bill provide the incentive and means and methods for the installatio of private fire protection systems in private property which will in turn enhance and support the public fire protection systems and capabilities of communities throughout Alask

Many communities are being faced with providing additional fire protection services and with the costs associated with providing those services. A community fire protection incentive program can provide an alternative to the increasing costs of fire protection.

A long term affect of such a program would be in the area of security of a communities assets, e.g. private fire protection systems protect the economics of the community by providing security for the businesses that provide the tax base and employment of those within the community. Both the direct and indirect socioeconomic impacts, from fire, would be reduced.

AD HOC COMMITTEE on Community Fire Protection Incentive Program

Chairman: Robert Shirnberg

Comments of preference requirement of loan for the instalation of fire protection systems.

Our original concept was to allow preference on the following basis for fire equipment loans.

First preference would be for those property's that are exsisting, and where the instalation of fire protection systems would be required by local or state building codes.

Second preference would have been for exsisting property owners that disired to install fire protection systems on a voluntary basis.

Third preference to new construction required to install fire protection systems

Fourth preference to new construction where voluntary instalation of fire protection systems is desired.

With the preferencial requirement removed from the loan considerations, there is no need to amplify the above considerations.

We feel that if the loan process problems are corrected, and loan applications for the instalation of fire protection systems can proceed in a timely manner, there would be no need for prefercial considerations, and these loans would be handled in the normal loan process.

Granting a 2% property tax incentive to those property owners who have installed approved fire protection systems is only a small recognition of what this improvement means to a community.

This incentive will help remove some of the reasons that a property owner may have that adversely affect the considerations to install approved fire protection systems.

We only need to look at property that is not protected by the fire protection systems to realize what a benefit to the community it is to have property owners install such systems.

It is the UNPROTECTED property that places the greatest demand on the public fire department and water system. Because of the fire flow requirements of unprotected properties, the manning level of fire departments is as high as it is now. It demands much more fire apparatus and pumping capacity, a larger water utility, and required fire flow reserve capacity.

The public's cost and taxes necessary to provide fire protection for property that is not equipped with approved fire protection systems is much greater. The real dollar costs of fire protection is measured by the number and amount of unprotected commercial properties within the community.

Yet we have responded to those property owners that have installed approved fire protection systems by requiring that they must pay additional property taxes because they have made improvements to their property--improvements that are far less costly to provide fire protection service for.

I find that we have a day and night comparison: Those that have made the effort to improve their property with a direct benefit to the community through reduced costs demanded by fire operations and a less demanding property on the water utility, we have required to pay ADDITIONAL property taxes.

While on the other hand, those property owners that have made no improvements; whose property demands more in respect to costs of operations of the fire department and demands a greater reserve fire flow of the water utility, ARE NOT TAXED ANY ADDITIONAL AMOUNT.

> We have a situation in effect, where those that do little if any improvement to their property are rewarded, and those that make decided improvements that reduce costs to the taxpayer are punished, in effect.

I believe that property owners are sensitive to discrimination in such cases. There is no question as to the performance of sprinkler systems, and to the role these systems can and do play in reducing the costs and demands on the public fire departments, as well as demanding less fire flow from the water utility.

There is no question that the majority of the commercial property within our communities is not protected by the installation of such systems. If incentives were not needed to encourage property owners to install such systems, why aren't these systems the rule, instead of the exception?

Water standby demand charges, as presently assessed or charged to property owners is one of the most inequitable rates assessed a property owner that has installed a sprinkler system. The reasoning and arguments used to justify this special rate charge are for the most part correct.

HOWEVER, all of the arguments and reasoning are directed at the WRONG property owner.

It is the property owner and/or commercial property that is not equipped with a sprinkler system that the rate arguments fit to a "T". It is the property that is NOT equipped with sprinkler systems that places the greatest demand on the water utility for fire operations. It is the property that is NOT equipped with sprinkler systems that causes the community's fire flow requirement to be increased. It is the property that is NOT equipped with a sprinkler system that requires the reserve fire flow.

Where should the fire flow demand rate be assessed?

As the commercial property generates the demand for the additional fire flow by the type of building, lack of fire protection systems, occupancy, etc, would it not be correct that the special water rates required for the additional fire flow requirements be assessed to those that generate the additional requirement? If this is the case, then those properties that are not equipped with fire protection systems should be assessed the additional rates required by the reserve or additional fire flow needed to combat fire in these properties.

What has happened in reality is that some (not all) water utilities have required additional revenue for operations, certainly common with today's economics. Because of this need, they have centered their rate requests on special users, and because of the large size of water service required by a sprinkler system, they have justified these charges based on the size of the service line to the property. In effect, they are charging by the inch of diameter water service. Little, if any, consideration has been given to the actual water demanded by such systems, and in particular considering the water demanded by fire operations of sprinkler-protected properties versus properties not protected by sprinkler systems. There is no question that buildings not equipped with sprinkler systems will demand much greater fire flows, and place a much greater demand and cost on the water utility. For the most part, these demand charges came on line with affected property owners not being aware of such charge until the first billing. The water utility did not publicly announce and make property owners aware of these considerations. For the most part these special unwarranted rates came about quietly. Once a rate such as this is established, it is very difficult to remove or correct, much the same as taxes.

These rates could be much better assessed to all commercial property owners. As a commercial water rate, then all properties would pay the rate. Adjusted, this would allow those that make the greatest demand on the water utility to pay a fair and just rate as per the demand generated by their property for the required fire flow. As it stands now, only those that place a lessor demand on the water utility are required to pay this special water rate.

Is it proper for the Legislature to direct the Public Utilities Commission on matters concerning rate setting?

In the case of the excessive water utility rates as approved by the P.U.C. for demand water service to sprinklered protected buildings, it is proper for the legislature to resolve and direct the P.U.C. to correct the unfair rates that have been approved.

The P.U.C. has allowed and approved a very inequitable rate to be charged by some water utilities for this service. As this rate does not hold with the fair and equitable rate policy as supposed to be administered by the P.U.C., where else but to the legislature can this problem be resolved? The P.U.C. has not re-directed its policy in this matter, and they have let the rate stand.

As to the fairness of the demand water standby rates, the Municipality of Anchorage has requested and received approval from the P.U.C. to remove the demand water standby charges that have been charged by the municipal water utility for the past three years. It is apparent that the Municipality of Anchorage considers these charges excessive and unwarranted, and has removed them effective March 31, 1980.

If the businessmen and property owners in our state cannot receive fair and equitable treatment from public state commissions, the only recourse they have is to seek adjustments by legislative action to resolve the problem.

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

Apparantly there is some concern that this legislation will effect for the most part the urban or larger community's, and [illegible] not do much in the way of helping those in rural or bush Alaska, this is far from the truth.

As in the case of most legislation that applies to all areas of the state, the greatest impact will be in these areas of most population or the urban areas.

However, on a one to one basis, this legislation will have the greatest effect in the rural or bush areas, and in these areas with little or not fire protection.

Insurance costs in rural and bush Alaska are often prohibitive. In many cases the cost of fire insurance is such that businessmen are hard pressed by the high rates. A substantial reduction in insurance rates upwards of 60% can be realized with the instalation of approved fire protection systems. The instalation of the fire protection systems and resulting reducing in insurance costs can make the difference between a marginal business and viable business operation. Often the insurance rates are a considerable portion of the overhead costs.

The impact of business failure or the distruction of a mine by fire in the rural or bush areas has a decided effect on the community, we have cases where the major business of a community has been destroyed by fire, placing many out of work, many of those effected must move to other areas to seek employment, and in some cases the community has ceased to be, because the sole source industry of the community has been destroyed.

There has been some question as to the tax incentive being fair for the rural or bush areas that do not have property taxes ; businessmen or property owners would not be taxed in such areas, therefore they have no incentive or equal considerations. I can only answer this by saying if you are not taxed for the instalation of fire protection systems, you do not have the problem, it is those areas that do tax for the instalation of fire protection systems that create a dis-incentive for the businessman.

Rural and Bush Alaska has a great incentive to install cost effective fire protection systems, the reduction of insurance costs and overhead costs, the security of the business is much better protected, resulting in better security for the jobs created by the business.

This legislation will allow a method for the business and or community to install fire protection systems, and greatly improve and reduce the impact and major economic effects of fire in our rural and bush areas of the state.

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

AVENUES OF APPROACH

PROBLEM

Alaska is No. 1 in fires with loss of life per capita and property dollar loss per capita

What can be done to help this situation?

SENATE BILL 370

Intent: Provide incentive, means and methods for installation of sprinkler systems (both standard and hydraulic) in residential and commercial buildings (excluding all other fire protection systems)

Bill provides 2 mechanisms:
1) through property tax exemptions
2) through business loans A) lower loans & interest B) priority status given over all other loans

---

PROS

Lives & business savings will continue to bring in more revenues to municipalities than lives & businesses lost /// vs municipality $ loss through:
1) property tax exemption revenue
2) water reduction revenue (a-water flow requirements for sprinkler heads reduction = 1/2 and b) fire hydrants water reduction c) water standby utilities chgs.
3) other revenue loss through expenses of firemen, policemen, cleanup, etc
NOTE: also general public property taxes would not have to increase.

Loan program provides more incentive

CONS "full and true value" definition is destroyed, destroys local assessors credibility in est. market value, and confuses taxpayer who refers to assessing records for information.

OTHER AVENUES OF APPROACH TO CONSIDER

1. Income tax credit in the amount spent for fire protection systems installation.
2. State reimburse the individual a check in the amount of a predetermined percentage of the system cost.
3. Insurance reductions
4. Water rate deductions

INTENT - INCENTIVE

Existing incentive: fire protection systems reduce insusrance premium costs. Property owners can more than "recoup" initial cost of the system installation within a relatively few years.

PROBLEMS (Penalization) 1) property tax increase 2) water standby surcharge not reduced/eliminated to nominal fee charge rates -- resulting where some owners have shut down their systems opting the higher insurance rates as the cheaper way to go.

Why not penalize those w/o Fire Protection /Sprinkler device instead?

END RESULT DESIRED / MECHANISM

Give incentive to commercial (and residential) owners to install and maintain fire protection systems; and, to present long term method whereby this installation will remain the cheaper avenue to go. (Adopt new building codes and the next one.)

Fire Protection Definition???

Bill Backers/Supporters initially: Alaska Fire Chiefs Assoc. and
Ak. State Firefighters Assoc.

Legislators: Senator Colletta & Bradley

Intent: provide incentive, mean and methods for installation of private fire protection systems in residential and commercial buildings. Two-fold approach:
through loans and property tax exemptions.

- allow businessmen and property owners to receive loans at intererst rates proposed, giving priority to such loans, thereby encouraging installation

- additional incentive by removing fire protection systems from real property tax roles.

- loan fund (Small Business Loans Division, Ec. Dev. & Com.) will provide loans - with intent of direct insurance savings received from the installation will be calculated in the repayment schedule.

=> tax incentive, remove from the property tax rools the assessed value of the system

- encouraging water standby surcharge for sprinkler connections be reduced/eliminated to nominal fee charge rates to property owners who have installed (Many cases this eliminates or exceeds any dollar saving realized from other reductions as result of installation; i.e., insurance rates lowered, etc.) This will assist ~~positively~~ so that owners will not cut the sprinkler system down and accept the high insurance rates as the cheaper way to go.

PROS

Lives & buildings saved, which will result in more revenue from respective businesses to the municipality.

What municipality will save with the above, will more than compensate for lost revenue because of the tax exemption; i.e., business generating sales tax continues, more employment continues, less policement, firemen, cleanup, effort needed...

Insurance rates are higher on buidlings without sprinklers -incentive to install system

Less water pressure is needed -

Insurance deduction to building owner will compensate for any payment on installation loan for sprinklers received.

CONS Municipality loss of revenue - instances where the taxpayer pays for hydrants generally from the municipality budget - underwritten by sales and property taxes equally proportiate from all property owners.

Dept. C/RA - "full and true value" definition is destroyed, destroys local assessors credibility in est. market value, and confuses taxpayer who refers to assessing records for information.

Gentlemen:

Re: Private Sprinkler Fire Protection

This Commission is desirous of receiving information in the referenced matter as it relates to water utility rates and property tax assessments. Accordingly, if you could assist us by briefly answering the following questions it would be appreciated:

Q. 1. Does a property owner receive any type of tax break for installing a sprinkler system or does the owner subsequently pay more property tax due to an increased property evaluation?

Reply: 8-3-79

A. 1. Taxes are not effected. Normally the owner will enjoy a better premium in his Insurance rates only.

Q. 2. Are sprinkler system property owners charged a demand charge by the utility for water service and if so, what method is used to determine the costs for providing this service?

A. 2. Yes. A rate analysis was conducted by a consulting firm to determine the rate.

Q. 3. Is the sprinkler system property owner required to pay a direct fire hydrant or fire protection tax by the municipality?

A. 3. No, just the minimum demand charge.

Gentlemen:

Re: Private Sprinkler Fire Protection

This Commission is desirous of receiving information in the referenced matter as it relates to water utility rates and property tax assessments. Accordingly, if you could assist us by briefly answering the following questions it would be appreciated:

Q. 1. Does a property owner receive any type of tax break for installing a sprinkler system or does the owner subsequently pay more property tax due to an increased property evaluation?

No, he does not receive a tax break. The owner could pay more tax due to an increased property evaluation.

Q. 2. Are sprinkler system property owners charged a demand charge by the utility for water service and if so, what method is used to determine the costs for providing this service?

The owner must take a regular water service before qualifying for a special separate fire service. A monthly service charge is imposed based on the operation and maintenance cost of the meter and service pipe.

Q. 3. Is the sprinkler system property owner required to pay a direct fire hydrant or fire protection tax by the municipality?

No, he is not. The municipality makes a small contribution towards the calculated cost of fire protection.

SEATTLE

If possible, the Commission would also like to receive a list of private sprinkler rates currently used by your municipal water utility.

Very truly yours,

ALASKA PUBLIC UTILITIES COMMISSION

John F. Jewell
Deputy Director

Section 33. That as of January 1, 1975, all water used for domestic and commercial purposes shall be supplied by meter only at the following rates and charges.

The rates for metered water supplied to premises within the City of Seattle in one month, or fractional part thereof, shall be in accordance with the following schedule:

SERVICE SIZE	CONSUMPTION QUANTITY ALLOWED	MINIMUM CHARGE
¾ inch	300 cu. ft.	$ 2.10
1 inch	600 cu. ft.	2.80
1½ inch	1200 cu. ft.	4.10
2 inch	2000 cu. ft.	5.80
3 inch	3400 cu. ft.	8.70
4 inch	4900 cu. ft.	12.00
6 inch	7100 cu. ft.	16.50
8 inch	10000 cu. ft.	23.00
10 inch	14200 cu. ft.	31.50
12 inch	20000 cu. ft.	44.00

Each one hundred (100) cubic feet in excess of the quantities allowed for the foregoing minimum charges except as hereinafter provided.. $ .213

Each one hundred (100) cubic feet in excess of the first thirty thousand (30,000) cubic feet .....$ .142

Each separate building or premises in addition to the first or principal building or premises supplied through the same service connection, five hundred (500) cubic feet or less $2.50

Provided, that the terms "separate building or premises" shall not apply to trailer parks or trailer courts, which shall be governed as to water rates by the number and sizes of services and quantity of water used under the previous schedule.

Water supplied to municipal departments of the City of Seattle, each one hundred (100) cubic feet in excess of the quantity allowed for the foregoing minimum charges .....$ .142

The rates for water supplied for fire protection purposes exclusively shall be deemed service charges and shall be for any one month, or fractional part thereof, as follows:

SIZE OF SERVICE	SERVICE CHARGE
2 inch	$ 1.85
3 inch	2.75
4 inch	3.50
6 inch	5.40
8 inch	7.10
10 inch	9.75
12 inch	11.70

The service charges hereinabove set forth shall be granted only during such times as there is no appreciable registration by the meter maintained by the City on such fire protection services.

Water used for any other purpose than for extinguishing fires, through a fire protection service, shall be charged at a rate double the common rate provided for in this ordinance.

← Domestic and commercial rates and fire service charges for inside the City limits of Seattle, Washington. Outside the City limits, rates are slightly higher for the same services.

Gentlemen:

Re: Private Sprinkler Fire Protection

This Commission is desirous of receiving information in the referenced matter as it relates to water utility rates and property tax assessments. Accordingly, if you could assist us by briefly answering the following questions it would be appreciated:

Q. 1. Does a property owner receive any type of tax break for installing a sprinkler system or does the owner subsequently pay more property tax due to an increased property evaluation?

No tax break

Q. 2. Are sprinkler system property owners charged a demand charge by the utility for water service and if so, what method is used to determine the costs for providing this service?

No

Q. 3. Is the sprinkler system property owner required to pay a direct fire hydrant or fire protection tax by the municipality?

No

HGLH

EVERETT, WASH.

Service connection installations larger than the two-inch size shall be charged at the actual cost of the complete installation.

5. Delinquent penalty charge:
(See § 14.16.690) $15.00

6. Special charges:
   a. Turn-on requested less than thirty days after turn-off requested
   (See § 14.16.280) ..... $10.00 each
   b. Shut-off and turn-on requested for premises where customer's stop and waste valve should have been used (See §§ 14.16.220 and 14.16.250) ..... $10.00 each
   c. Turn-on or shut-off requested for a time other than regular hours (See § 14.16.250) ..... $30.00 each

7. Fire Service. The rates for water supplied exclusively for fire protection purposes shall be deemed service charges and shall be for any one month, or fractional part thereof, as follows:

Size of Service	Service Charge
4 inches	$ 4.00
6 inches	5.50
8 inches	7 50
10 inches	10.00
12 inches	12.00

B. Outside the City Limits.

1. Individual Meters. The consumption and minimum monthly charges for individual metered services outside the city limits shall be computed in the same manner as for metered customers within the city and then a surcharge of twenty-five percent of this amount shall be added to the charge so computed to arrive at the total monthly water charge.

2. Master Meters.
   a. The consumption charges for master meters outside the city limits shall be computed in the same manner as for individual metered services outside

meter. In the case of premises for which both fire protection and other water service for such uses as domestic commercial, industrial, or manufacturing purposes is supplied, there may be two service installations made to the premises; one for fire service only and one for other water service. These service functions may also be combined in a single service connection with the approval of the water department.

In the event two separate service connections are installed, the fire protection system so served shall consist of an automatic sprinkler system only, without additional outlets which could normally be used for other than fire suppression purposes. (Ord. 1561 (part), 1971).

6.21.040 Fire service monthly service charges. (a) The minimum monthly rates for inspection and maintenance of detector check systems are fixed as follows:

FIRE SERVICE OR DETECTOR METER SIZE	MONTHLY SERVICE CHARGE
2"	$ 5.00/month
3"	5.00/month
4"	5.00/month
6"	7.50/month
8"	10.00/month
10"	15.00/month

Water used through the fire service line for fire suppression purposes and limited testing of the system will normally be furnished without any charge in addition to the monthly minimum charge set forth for fire service meter or detector check meter.

(b) If a detector check meter proves, or proof otherwise provided, leakage or unauthorized usage of water which is not for fire suppression purposes, the customer shall pay for all water used at the applicable metered rate. The rates for water so used are fixed as follows: At the time of first written notice from the city water department the applicable rate shall be the same as the domestic rate for comparable size of domestic water meter for unauthorized use over one hundred cubic feet per month; in the event the unauthorized use again occurs after the period of time specified in the written notice from the water department the rate shall be double the domestic rate for a comparable size domestic water meter for such unauthorized use over one hundred cubic feet per month.

(c) References made by this chapter as to existing metered rates shall be to Chapter 6.20 of the Edmonds city code. (Ord. 1561 (part), 1971).

6.21.050 Violation--Penalty. In addition to all civil rights of collection, liens, shut-offs and other remedies available to the city of Edmonds as prescribed by statute and ordinance for unauthorized use and/or nonpayment of charges, any person, firm, corporation or other organization, including any officers, directors and managers thereof, who violate any provision of this chapter shall be guilty of a misdemeanor and subject to penalties as set forth in Section 5.12.170 of the

This study was initiated prior to this legislative session for informational purposes in APUC Docket U-79-14, Re Anchorage Water Utility.

In July 1979, the Commission Staff mailed questionnaires to all known municipal water utilities within Alaska and to several municipal water utilities in the northwestern United States. The questionnaire consisted of three questions:

Q. 1. Does a property owner receive any type of tax break for installing a sprinkler system or does the owner subsequently pay more property tax due to an increased property evaluation?

Q. 2. Are sprinkler system property owners charged a demand charge by the utility for water service and if so, what method is used to determine the costs for providing this service?

Q. 3. Is the sprinkler system property owner required to pay a direct fire hydrant or fire protection tax by the municipality?

Of approximately 40 questionnaires sent within Alaska, 13 replies were received and of 93 questionnaires sent out of state 42 replies were received.

IN THE SENATE BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

CS FOR SENATE BILL NO. 389

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the senior citizen property tax exemption; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.020(a)(6) is amended to read:

(6) the real property of certain residents of the state to the extent and subject to the conditions of AS 29.53.022 [PROVIDED IN (c) OF THIS SECTION].

* Sec. 2. AS 29.53 is amended by adding a new section to read:

Sec. 29.53.022. SENIOR CITIZEN PROPERTY TAX EXEMPTION. (a) The real property of a resident 65 years of age or older is exempt from taxation under this chapter. The real property exempt from taxation under this section includes

(1) the entire parcel of real property owned and occupied by the resident as a permanent place of residence; and

(2) a parcel of real property owned by the resident which is adjacent to the parcel of real property owned and occupied by the resident as a permanent place of residence if the adjacent parcel qualifies for the exemption, as determined by the Department of Community and Regional Affairs by regulation.

(b) Only one exemption may be granted for a parcel of real property under this section. If two or more residents are eligible for the exemption for that parcel, the parties shall decide between or among themselves which of them shall receive the exemption.

(c) A parcel of real property may not be exempted from taxation

under this section if the assessor determines, after notice and hearing to the parties concerned, that title to the parcel has been conveyed to a resident who is an applicant for the exemption primarily for the purpose of obtaining the tax exemption. The decision of the assessor under this subsection may be appealed by the applicant under AS 44.-62.560 - 44.62.570.

(d) A tax exemption may not be granted unless a resident submits an application for an exemption. The application for exemption shall be made on a form prescribed by the state assessor for use by assessors of boroughs and cities which levy and collect real property taxes. A resident shall file his application by January 15 of the year for which a tax exemption is requested, but the city council or borough assembly, for good cause demonstrated by the resident, may waive the resident's failure to file an application by the time it is due and direct the assessor to accept the application as timely filed.

(e) An applicant for a tax exemption under this section shall file a separate application for each year in which the tax exemption is requested.

(f) If a tax exemption application is filed by January 15 and is approved by the assessor, he shall allow a tax exemption in accordance with the provisions of this section. If a resident whose failure to file by January 15 has been waived as provided in (d) of this section and the application for tax exemption is approved by the council or assembly, the amount of tax which the resident may have already paid for the assessment year with respect to the real property exempted shall be refunded to him.

(g) The assessor may at any time require proof in the form he considers necessary of the right and amount of an exemption claimed under this section.

(h) The state shall reimburse a borough or city, as appropriate, for the real property tax revenues lost to it by the operation of this section. However, reimbursement will be made to a borough or city for revenue lost to it only to the extent that the loss exceeds an exemption which was granted by the borough or city, or which upon proper application by an individual would have been granted by the borough or city, under AS 29.53.025(a).

(i) Except as provided in (h) of this section, nothing in this section affects similar exemptions from property taxes granted by municipalities on September 10, 1972, or prevents municipalities from granting similar exemptions by ordinance as provided in AS 29.53.025.

(j) In this section, "real property" includes, but is not limited to, mobile homes whether classified as real or personal property for municipal tax purposes.

* Sec. 3. AS 29.53.020(c) - (i) are repealed.

* Sec. 4. This Act takes effect January 1, 1981.

THE PRECEDING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M April 2, 1980

SUBJECT: CSSB 389, senior citizens property tax exemption

TO: Senator Arliss Sturgulewski, Chairman
Senate Community and Regional Affairs Committee

FROM: John B. Chenoweth
Legislative Counsel

For the record, I have left the term "adjacent" in the committee substitute, and assume that, if this committee substitute is enacted, the administering agency will rely on the definition of "adjacent" as one which exempts a parcel which is close to, but does not necessarily adjoin or is not contiguous to, the parcel on which is located the applicant's principal place of residence. In light of the committee's recommendation, the parcel "across the road" or the parcel created by subdivision of an existing parcel by a new road should qualify for the exemption under any test which the department may establish. I am less confident that a parcel that is "across the road" but separated from the main parcel by intervening acreage would meet the definition of "adjacent".

I have included reference to regulations of the department. While the department should be able to describe general categories in which the exemption is allowed and those in which it is denied and adopt these into the administrative code, the reference is broad enough for the department to adopt an approach which constitutes no more than a case-by-case determination if they think that approach to be more practical.

For the benefit of the committee, the provisions which were included in the original senior citizens exemption program for protection of the state and the applicant, and which are carried forward in this version in subsections (c) and (g), apply not only with respect to the "residence" parcel, but also with respect to "adjacent" parcel.

I had no instruction to amend the effective date clause. The changes wrought by the committee substitute take effect with the next assessment year. While some senior citizens would have to pay an incremental amount in the current assessment year (1980), those persons are not paying more tax than what they would under the law as it currently reads. With the effective date delayed, the department has six to eight months to redraft its regulations, conduct public hearings, and establish the necessary changes in order to prepare for the substantive effects of this bill.

IN THE SENATE

SENATE BILL NO. 389

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the senior citizen property tax exemption; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.53.020(e) is amended to read:

(e) The real property owned and occupied as a permanent place of abode by a resident 65 years of age or over is exempt from taxation of the assessed value of the real property. An exemption under this subsection is limited to the assessed value of a parcel or tract of property of 160 acres or less. Only one exemption may be granted with respect to the same property and, if two or more persons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. No real property may be exempted under this subsection which the assessor determines, after notice and hearing to the parties concerned, has been conveyed to the applicant primarily for the purpose of obtaining the exemption. The determination of the assessor is appealable under AS 44.62.560 - 44.62.570.

* Sec. 2. AS 29.53.020(i) is repealed and re-enacted to read:

(i) In (e) - (i) of this section

(1) "real property" includes but is not limited to mobile homes, whether classified as real or personal property for municipal tax purposes;

(2) "resident" means a person who has claimed Alaska as his place of residence for at least 25 consecutive years preceding applica-

tion for the exemption provided in (e) and (f) of this section; a break in residency of more than 30 days in a calendar year operates to defeat the applicant's claim of residency for that year.

* Sec. 3. This Act takes effect January 1, 1981.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This updated fiscal note is needed to initiate changes which the Department anticipates will occur in the Committee Substitute. It appears that individual permanent files must be set up for approximately 4000 senior citizen applicants which will necessitate the purchase of a filing cabinet.

The $500 under contractual services is the estimated increase in the use of the Departments Zenith line for use by senior citizens.

Community + Regional Affairs
Committee
Ak. State Legislature
Pouch V
Juneau, Alaska 99811

Attn: Alice Sturgulewski
Committee Chairman

After reading Senate Bill No. 389, the last portion that reads: "a break in residency of more than 30 days in a calendar year operates to defeat the applicant's claim of residency for that year." is very upsetting to me.

In a few years I will be 65 and it is about that time I plan a trip to see my niece on the east coast, going via Canada in my motor home. I can hardly make it there and back in that time, without any time for visiting. If, under SB 389, I stay outside more than 30 days when I return, I'd have to pay nearly $800 in taxes, thus penalizing me for taking a vacation when I am retired + have the time.

This is all wrong in my opinion and something should be done to spell out residency as keeping a valid home in Alaska whether we leave the State for 30 days or 60. I am much opposed to this 30-day time limit, although some type of limit should be listed to do away with those who spend 6 mos. of every year in the balmy south.

Sincerely,

Loraine McGregory
P.O. Box 622
Juneau, ak. 99802
(35-yr. resident)

Rt. 4, Box 4973
Juneau, Alaska 99803
March 5, 1980

Senator Julius Sturgulewski
State Senate
Juneau, Alaska

Dear Senator Sturgulewski;

Please let me call your attention to proposed legislation of great interest to senior citizens now and to future tax payers both now and in the future. My understanding is that both bills are now in Committees of Regional and Community Affairs and the Finance Committee, in the Senate. I would strongly urge that those in the Senate support Both S.B. 389 and SB. 427, and those in the House support the bill Rep. Mike Miller is working on, which covers the same material as S.B. 427, and is now in committee.

I. Senate Bill 427 which relates to senior citizens tax exemption. The original act should be amended to read; as follows: "The real property exempt from taxation under this subsection (Sec. 1. AS 29.53.020 e) continues to be exempt if owned and occupied as a permanent place of abode by the surviving spouse of the resident, if the surviving spouse is 55 years or older and has a gross annual income of less than $20,000." This needed change might enable more of surviving spouses, who are usually women, and whose income is reduced already by death of spouse, to remain in their homes.

II. Senate Bill 389 which relates to senior citizens tax exemption also. This bill would exempt from taxation all real property owned by the senior citizen which is contiguous to his or her place of abode. Many seniors, including myself, have been forced, due to high real property taxes, to subdivide his or her acres and keep selling lots, in order to pay taxes and try to keep up with inflation. Since I come from people who usually live to be 100 years or more, I could easily, under present set-up, outlive my income and become a pauper and a burden to the state. How much better, not only for seniors, but for all present and future taxpayers, if all of a senior's property which is contiguous with his or her place of abode, becomes tax exempt. This would enable more to remain in their own homes, and would decrease the need for state to build more senior housing units and pioneer-type homes.

Another section of S.B. 389 refers to a residency requirement which should be more explicitly spelled out. I am not sure if this following suggestion has been incorporated into the bill, or has only been proposed. But it should read: " A person does not break his residency requirement if he or she leaves his or her home and goes to any other place for a temporary period, and with intent of returning to his or her home." Many seniors save for several years in order to take a trip outside, and they should not have a limit on time away from Alaska to 30 days, which is not enough time to visit widely separated relatives, etc. This one, relates to a proposed change in eligibility for Longevity Bonus.

I urge these bills with above amendments be passed in Senate, and that in the House Rep. Mike Miller's bills regarding the above matters be passed.

Thank you,
Sincerely yours,
Mary E. Ross
Mary E. Ross

Dear Senator Kertulla,

Enclosed is the Copper River Native Association proposal for our Village Gardening and Agriculture Program. We would very much like having this proposal considered for funding.

A copy of this proposal has been sent to John C. Sackett, Nels A. Anderson, Jr., Pappy Moss, Margaret Branson and Patrick J. Carney.

We would like to get funding to enable us to start this program up in the spring. Any help you could give would be greatly appreciated.

Thank you in advance for your consideration of this request.

Sincerely,

Robert J. Hale Jr.

Health Department

January 23, 1980

"Village Gardening and Agriculture Proposal"

Drawer H

Copper Center, Alaska 99573

INTRODUCTION

The Copper River Native Association, Inc. was started in 1972 to serve the native people of the Ahtna region.

Our major focus is to assist people in developing their full potential, with the outcome being the improvement of their quality of life.

Copper River Native Association has been growing steadily. At the present time there are approximately 50 employees working in different departments of the organization.

The organization consists of a Health Department, a Housing Program, an Aging Program, a Human Services Program, and a Bilingual Program. Its main office is in Copper Center. From this central location, Copper River Native Association reaches out to the eight villages of the Ahtna region.

NEED FOR A GARDENING PROGRAM

Four Alaska native organizations now have Village Gardening and Agriculture Programs.

Some of the native people of the Ahtna region have asked the Copper River Native Association -- which is the area's major non-profit organization -- if such a program could be started in this region too. (See attached letters).

A gardening program would be completely in accord with the Copper River Native Association's goal of developing the full potential of the area's people and land, and would fit easily into the agency's existing programs. (The Health Department, for example, has an ongoing nutrition program).

A gardening program would be a useful addition in providing

home grown food to supplement native subsistence diets and to make better balanced meals.

The Copper River Basin is a poor region with high unemployment and high food prices.

In an informal unemployment survey made by the Copper River Native Association in December of 1979, it was determined that approximately 60% of all Copper Basin natives are out of work. Unemployment figures for this area that are used by the State of Alaska are often much lower than actual area unemployment levels in that they do not count persons who are not "on unemployment" (i.e. receiving money from the government). The Copper River Basin is also in the unusual situation of having its unemployment figures pooled with the figures from Valdez, which has very low unemployment and very high wages, due to jobs from the Alaska Pipeline terminus.

Copper River Native Association will work in the gardening program with native people who want to become involved in farming they can produce their own farm income and farm foods, and thus inprove their way of life and help to combat the area's poverty.

The Soil Conservation Service has made soil surveys of some of the Ahtna area and found that a large percentage of the Copper Basin is very good for farming and gardening.

According to Allen Koester, District Conservationist with the Soil Conservation Service, Copper Basin soils are generally silt loams 15 inches deep. They have a capability

Class III for agricultural uses. The climate of this area -- which can vary from being quite cool, to wet, to dry -- is the main limiting factor.

Nevertheless, all grain and hay crops and cool season vegetable crops adapted to Alaska can be grown in this area, and a substantial number of persons make their living by farming, especially in the Kenny Lake region. Warm season crops, such as zucchini, can be grown successfully outdoors in protected areas using a plastic mulch.

Gardening and farming have been going on in Chitina and Copper Center since the turn of the century. In the early 1900's, in fact, there was an agricultural station in the town of Copper Center. After the late 30's and 40's, however, when the Kennicoott Copper Mine closed, gardening was lost to the area.

PROGRAM OBJECTIVES

The primary purpose of this program is to provide educational and technical gardening assistance to eligible Alaskan Native individuals and organizations located in the Copper River Basin (Ahtna) region.

The program will:

1) Teach at least 55 native families in the four Copper Basin villages of Chitina, Copper Center, Gulkana and Chistochina gardening techniques that are suitable to their areas.

2) Ensure that a majority of the 55 Native families enrolled in the program will be able to supply all the cold-weather vegetables they need for their families for eight or nine months of the year.

3) Teach the 55 Native families enrolled in the program how to can and preserve food for the winter.

4) Encourage at least eight Native persons who are enrolled in the program to go into other areas of farming -- such as raising cattle, pigs and chickens for eggs.

5) Obtain the necessary gardening equipment (as itemized in the "Budget" section) for the program's four villages.

6) Obtain bedding plants for the first year of the program.

METHODS

The Copper River Native Association will hire a person who has experience in agricultue and Alaskan farming and horticulture to run the Village Gardening and Agriculture Program.

One person from each of the four villages involved in the program will be intensively trained on a one-to-one basis during the first year of the program in gardening techniques. Each of these persons -- who will be called Gardener I's -- will work 10 weeks during the summer season in his or her own village helping other local persons in their gardening.

Food preservation and canning classes will be given through the Copper River Native Association by the Palmer Cooperative

Extension Service in each of the 8 villages in the Copper River Basin. Two of the classes will be given in each of the 8 villages -- one in June and one in August.

An 18' x 24' x 9' prefabricated greenhouse will be purchased and erected in a central location in the Copper River Basin. It will serve as a demonstration greenhouse, and will be used in local classes.

The Agriculture Program Coordinator will hold classes in the winter and spring months on local agricultural possibilities, animal husbandry, application of fertilizer, the growing of hay or grain, and vegetable growing. Classes in the demonstration greenhouse will begin in March and run through September.

The Copper River Native Association Village Gardening and Agriculture Program will purchase local bedding plants for persons involved in the project.

The program will provide materials and equipment to program participants in the service area, as appropriate, and within the limits of available funding.

The Copper River Native Association will try to accomplish the above requirements so as to initiate or enhance the development of agricultural activities in the villages of Chitina, Gulkana, Copper Center and Chistochina, as they relate to local food production and preservation.

EVALUATION

The Agriculture Project Coordinator will evaluate this

program by conducting a follow-up survey on the 55 families who will plant gardens. Each family will be asked how much they saved on their food bills in comparison with previous years. The Coordinator will also ask participating families to comment, through a questionnaire, on program changes for future years.

The Agriculture Project Coordinator will check to see if the vegetables grown in each family's garden are enough to take them through eight or nine months of the year. If not, they will be shown how to grow more the next growing season.

The Agriculture Project Coordinator will ask the village councils in the participating villages to comment on the program and provide suggestions for program changes.

Three-quarters of the way through the first year of the program, the Agriculture Project Coordinator will evaluate the program to see if increased funding is needed to run an expanded program. If additional funds are needed, the Coordinator will be responsible for finding future funding sources.

The Agriculture Project Coordinator will report his or her findings to the Executive Director of the Copper River Native Association and to the Copper River Native Association Board of Directors for guidance in the future of the program.

FUTURE FUNDING

The Copper River Native Association intends to continue funding for this program, as needed, through a contract with the Bureau of Indian Affairs under the Snyder Act of 1921.

In addition, the Agriculture Project Coorindator will

also pursue other areas of funding in order to implement a sound agricultural program.

BUDGET

WAGES AND SALARIES:	
1) Project Coordinator Salary: ($1,532.00 for 3 months, $1,589.00 for 9 months)	$ 18,897.00
Project Coordinator Fringe (19.8%)	3,742.00
2) Secretary Salary (1/2-time): (20 hours/week @ $5.99/hour)	6,230.00
Secretary Fringe (31.2%)	1,945.00
3) Gardeners - 4 positions: ($5.66/hour each position - 7.5 hours/day x 5 days/week x 10 weeks)	8,490.00
Gardeners Fringe (22%)	1,868.
CATEGORY TOTAL	$ 41,172.
TRAVEL AND PER DIEM:	
Local travel to villages (26,000 miles x 18-1/2¢/mi.)	$ 4,810.
Travel to Anchorage (24 trips x 420 mi. x 18-1/2¢/mi.)	1,865.
Per Diem - 48 days x $62.00/day (Anchorage rates)	2,976.
Out-of-State trip to American Indian and Alaska Agriculture Conference ot other agriculture seminar	1,500.
Gardener's travel to training sessions (3,000 miles x 18-1/2¢/mi.)	555.
CATEGORY TOTAL	$ 11,706.

BUDGET

OTHER DIRECT COSTS:	
Telephone & Communications (12 months x $80/month)	$ 960.0
Office Supplies (12 months x $50/month)	600.0
Postage (12 months x $35.00/month)	420.0
Rent (12 months x $60/month)	720.0
Reproduction (12 months x $25.00/month)	300.0
Subscriptions	100.0
CATEGORY TOTAL	$ 3,100.0
MATERIALS AND SUPPLIES:	
Textbooks and printed educational materials (4 villages x $400.00 each)	$ 1,600.0
Program supplies (18 each - hoes, rakes, shovels potato forks - @ $10 each)	720.0
Seed and seed potatoes (4 villages x $300 each)	1,200.0
Bedding plants (for 55 families - 23 doz. / family 23 doz. x 55 families x $2.50/doz.)	3,163.0
Fertilizer (for 12 acres x $600/acre)	7,200.0
CATEGORY TOTAL	$13,883.0

BUDGET

EQUIPMENT AND EQUIPMENT RENTAL:	
Greenhouse (18' x 24' x 9' with heater and cooling fan)	$ 3,450.
Shipping charges for greenhouse (1250 lbs.)	1,200.
Utility costs for greenhouse maintenance (electricity and heat)	2,000.
Troy-bilt Rototiller purchase ($1,200 x 4)	4,800.
Bulldozer rental to clear land ($250/acre x 12 acres)	3,000.
Temporary rental of rototillers until delivery of one purchased (45 days x $20/day)	900.
CATEGORY TOTAL	$ 15,350.
CONSULTANT FEES AND TRAINING:	
Training for 4 gardeners ($5.66/hour x 10 days x 7.5 hours/day x 4 positions)	$ 1,698.
Consultant Fees (For travel and per diem from Palmer for 16 days)	1,406.
CATEGORY TOTAL	$ 3,104.

TOTAL BUDGET

Wages and Salaries	$ 41,172.00
Travel and Per Diem	11,706.00

Indirect on Subtotal @ 30.4%	24,340.00

GRAND TOTALS:

Total Program Dollars	$ 88,315.00
Indirect @ 30.4%	24,340.00
TOTAL BUDGET:	$112,655.00

FARMING DEMONSTRATION PROJECT: "Reserve Item"

Copper River Native Association is applying for a grant for a Gardening and Farming Program. A person with knowledge of Alaskan agriculture would serve as the Project Coordinator and work with two of the Ahtna regional corporations in a demonstration project. This project would involve raising grain to feed beef cattle and swine. It would also enhance the development of agricultural activities with the Native people.

This pilot project would start with 100 acres being put into grain crops and expanded as funds were available and as land is conveyed to the regional corporations.

The reason for the initial site of this project being located in Kenny Lake is because farming has been established there for some time now and has proven to be successful. It is known that grain can be raised in the Copper River Basin and this project would be used to show the Native people how to raise grain and hopefully encourage raising grain as a crop, as well as raising cattle and swine for their own personal use and also as an income source.

At this time we cannot include other villages in this project until their land is conveyed and a test crop successfully grown.

The pilot project would run for five years to see what different types of grain could be grown as feed for cattle and swine.

BUDGET FOR FARMING DEMONSTRATION PROJECT "R"

Land Clearing (100 acres x $250.00/acre)	$ 25,000.00
Seed for 100 acres (100 acres x 100 lbs. x 18¢)	1,800.00
Fertilizer (100 acres x $600/acre)	60,000.00
Equipment Rental	10,000.00
	$ 96,800.00
Indirect @ 30.4%	29,427.00
Total Required:	$126,227.00

RE: Village Gardening and Agriculture Proposal

Ahtna Corporation is very much in support of your proposal of village gardening in our region. As a result of you're studies, this could be a long term and future of our people.

As conveyance to Ahtna and it's villages, we need to develop our land; and gardening and agriculture has been our peoples goal.

With Copper River Native Association information and studies this will give the villages and region a start.

Please keep me informed.

Thank you,

Norman Johns

January 7, 1980

Dear Mr. Hale:

I shall try very hard to get you the information you need on starting a village gardening and farming program. This year the University has few people and fewer resources to literally come down and help you get started. However, we certainly can supply some information and put you in touch with the right people to talk to. By copy of this letter I am asking Dr. James Drew, Dean of the School of Agriculture and Land Management Resources, Dr James Matthews, Director of the Cooperative Extension Service and Dr. Pat O'Rourke, Chancellor of the Community Colleges, Extension and Rural Education, to provide whatever assistance they can to your request.

Good luck with your endeavors.

Very truly yours,

Jay Barton

Tom Craig, Executive Director
CRNA
Copper Center, AK 99573

Dear Tom,

Anything that CRNA can do to promote and develop agriculture and gardening in this area would be very helpful to me and I'm sure to many area residents.

We tried a small garden in Chistochina last summer and did the best we could by gathering information here and there from friends and relatives. A family gardening project could be more successful if help and information more specific to this area were available. As the cost of food continues to rise, the need for this kind of help increases also.

I also want to try growing hay and oats this summer, too, and will need help there.

Thank you for any consideration given to this idea.

Sincerely,
Lemmie Charles

SUBJECT: Village Agriculture and Gardening Program

As representative of this branch of Prince William Sound Community College, I would like to give my completesupport to the proposed program in Agriculture and gardening for the native population in this area. A program such as this one with the present land situation would be of profitable benefit to these people who own the land. Self sufficiency from the harvest produced through this project is certainly a worthwhile goal for which to strive. Learning to live off the land could most definitely come from such a program.

This center will give all aid possible to help this program be a success.

Sincerely,

Soveida Dollarhide

Dear Jay:

Re: Village Gardening

Recently the Community and Regional Affairs Committee considered SB 408, An Act making a special appropriation to Community and Regional Affairs for village gardening projects. The committee passed this bill out to the Finance Committee with one change, and that was to make the appropriation through the Department of Natural Resources, as opposed to the Department of Community and Regional Affairs. The committee accumulated some excellent background material in connection with their consideration of the bill. The Department of Natural Resources was asked to develop possible alternatives for developing a relationship between the Division of Agriculture and the village gardening projects. Background information from our committee file is being made available to you.

It is my understanding from the sponsor of SB 408, Senator Kerttula, that other gardening projects are being considered and may well be added during Finance Committee consideration of his bill. Without question, the interest and enthusiasm in the village gardening projects is growing! The timing appears to be superb for the Administration to develop and recommend an innovative approach for village gardening projects. It does seem imperative that there be a plan to maximize resources, provide funding, and technical and follow-up information. There appears to be a good deal of merit in alternative number 2. contained in Commissioner LeResche's March 11 memo re. Village Gardening Projects.

Again, I would appreciate your attention to this subject. Because of the high interest and enthusiasm we will no doubt see many projects proposed. Without question we are well beyond the ad hoc approach to an exciting new development in small scale agriculture. I look forward to your response.

Dear Tony:

Sorry to hear of the trouble that has developed in getting your very fine program funded for this summer. You have continued to do an excellent job all along, and your program has served as a model for others to attempt to duplicate in other areas of the State. It would be a shame if you were unable to continue.

Unfortunately, there is nothing we can do with the money we have available for the 1980 fiscal year, which expires June 30, 1980. We have given the legislature our projections for continuing existing gardening projects, including yours, and those projections included funds for new programs throughout the State. It is now in the hands of the legislature. The funds appropriated last year were designated to specific projects, as I'm sure you are aware. We had absolutely no flexiblity in distributing those funds.

I will be going to Juneau next week and will talk with Jim Deagan to see why his sources have dried up. If I can find out, I'll let you know.

All is not lost, but I admit things do not look too bright. I'll be getting back in touch soon.

Sincerely,

SB 436

CONSIDER COMMENTS MADE BY BILL DRAFTER - CS? + amend AMC

AMENDMENT NEEDS TO BE MADE - Page 1, line 28
change (e) to (d)

Suggested questions for SB 436

1. How many municipalities have applied and how many municipalities have accepted responsibility of solid waste disposal facilities?

2. Are second class cities intended also? Or just municipalities?

3. Dept. prepared to deal with questions of appropriate and alternative technology?

4. ~~Draft~~ Solid waste disposal plan - briefly?

Federal mandate? How Long have you been working on it? Deadline or completion date ~~mandate~~?

How many ~~people involved~~ working on this plan?

Apparently they have been working several years on plan - which is still not finalized. (are 4 years past deadline) Assistant planner has been doing work with supervision and constantly pulled for other work.

Committee Substitute for Senate Bill 131 presently reflects:

1. Title and body contents of SB 342

2. $10 million G.O. Bond increase - covering solid waste facilities, plus new wording when relating to same.

3. $ 6 million G.O. Bond increase - raising State share from 50% to 75%

Committee Substitute for Senate Bill 436 presently reflects:

1. Page 1, line 10, section 1 - new wording (per Dept. Environmental Conservation request) to incorporate the raising of the State share from 50% to 75%

2. Amending typewriter error, page 1, line 28 to read (d) instead of (e)

3. Page 2, Line 21, Section 5 - adding a new paragraph stating "solid waste" definition as stated in HB 353, (per D.E.C. request and in answer to Mr. Baldwin's concern, our bill drafter.)

STATE OF ALASKA
THE LEGISLATURE

POUCH Y STATE CAPITOL
JUNEAU ALASKA 99811
907 465 3800

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM February 7, 1980

SUBJECT: Grants for solid waste disposal and processing facilities (Work Order No. 7932)

TO: Senator Arliss Sturgulewski

FROM: James L. Baldwin
Legislative Counsel

SB436

You will find enclosed the bill you requested concerning grants for solid waste processing or disposal facilities. The draft submitted for my review was very well done but there are some points that need further review:

(1) The bill in section 5 adds some new definitions which are applicable to AS 46.03 but the terms "solid waste disposal facility" and "solid waste processing facility" seem partially included in the definitions of the term "treatment works" found in AS 46.03.900(21). This multiplicity of definitions may be warranted or it may cause confusion for the Department of Environmental Conservation when it seeks to exercise jurisdiction over a solid waste disposal or processing facility under any provision of AS 46.03; and

See Commissioner Mueller, DEC + ignore

(2) This bill, and AS 46.03 do not contain a definition of the term "solid waste." This term is already used in AS 46.03 without definition and I am worried that the absence of a definition may leave open the question of which type of waste facility qualifies for a grant under AS 46.03 since that chapter also contains definitions for "sewerage", "other waste" and mentions, but does not define, the term "industrial waste".

See Attached Definition Insert as part of "CS" SB436

Perhaps these points should be discussed with the municipalities concerned and the Department of Environmental Conservation before this bill is introduced.

JLB:jm

Enclosure

ment works, and treatment works serving as a public utility under AS 42.05.701(2)(C);

(22) "radiation" means all atomic and electronic product radiation;

(23) "radiation source" means any substance, machine, or electronic product which emits radiation;

(24) "schedule of compliance" means a schedule of remedial measures including an enforceable sequence of actions or operations leading to compliance with an effluent limitation, other limitation, prohibition, or standard;

(25) "sewage" means the water-carried human or animal wastes from residences, buildings, industrial establishments, or other places, together with ground water infiltration and surface water as may be present; the admixture with sewage of industrial wastes or other wastes is "sewage";

(26) "sewer system" or "sewerage system" means pipelines or conduits, pumping stations, and force mains, and all other appurtenant constructions, devices, and appliances used for conducting wastewater to a point of ultimate disposal;

(27) "solid waste" means all unwanted, abandoned, or discarded solid or semi-solid material whether putrescible or non putrescible, originating from any source, including but not limited to garbage, paper, wood, metal, glass, plastic, rubber, cloth, ashes, litter and street sweepings, dewatered sewage sludge, dead animals, offal, junked vehicles and equipment, material and debris resulting from construction or demolition projects or logging operations, abandoned and decaying structures, hazardous wastes, mine wastes, gravel pit, quarry and dredge spoils, and overburden except that originating from the construction of single buildings;

(28) "treatment works" means a plant, disposal field, lagoon, pumping station, constructed drainage ditch or surface water intercepting ditch, incinerator or other works installed or used for the purpose of treating, neutralizing, stabilizing or disposing of wastewater;

(29) "wastewater" means sewage, waterborne industrial waste, laundry liquid effluent, shower or sink water, or other wastes which are waterborne or in a liquid state;

(30) "water quality standard" means the measure of purity or quality of water, the maintenance of which is necessary to assure the water's integrity for its reasonable and appropriate use as established by the department;

(31) "water" includes lakes, bays, sounds, ponds, impounding reservoirs, springs, wells, rivers, streams, creeks, estuaries, marshes, inlets, straits, passages, canals, the Pacific Ocean, Gulf of Alaska, Bering Sea and Arctic Ocean, in the territorial limits of the state, and all other bodies of surface or underground water, natural or artificial, public or private, inland or coastal, fresh or salt, which are wholly or partially in or bordering the state or under the jurisdiction of the state; the term includes all water subject to federal jurisdiction under the Clean Water Act.

* Sec. 18. AS 46.03.180 is repealed.

* Sec. 19. The amendment of AS 46.03.850(f), in sec. 15 of this Act, has the effect of changing Rule 45(a)(2), Rules of Appellate Procedure, by requiring appeals from administrative decisions made under AS 46.03.850(e) to be brought within 10 days rather than the 30 days allowed by Rule 45(a)(2).

* Sec. 20. Sections 1, 4, 5, 6, 7, 8, 9, 11, 16, 17, and 18 of this Act take effect upon approval of the state's National Pollutant Discharge Elimination System program by the administrator of the United States Environ-

POSITION PAPER

ON SENATE BILL 436

by

ERNST W. MUELLER

COMMISSIONER OF ENVIRONMENTAL CONSERVATION

before the

SENATE COMMITTEE ON COMMUNITY & REGIONAL AFFAIRS

February 14, 1980

6 to 8 million in additional bonds - 1/3 addl share for these State/local projects.

The Department of Environmental Conservation wishes to go on record supporting S.B. 436, which amends AS 46.03.030 to include grant funding for solid waste facilities. It is estimated that an additional $10 million will be required in S.B. 131 should this amendment be adopted. It is my understanding that S.B. 131 has been amended to handle this increased grant burden. The Department endorses the concept of adding solid waste facilities to our grants program if adequate funding is provided. The attached fiscal note, while written for what is now designated S.B. 131, would apply to S.B. 436 as well. This note requests $82,700 to cover the costs for an engineering position and an administrative assistant to handle the increased grants load.

Planned Solve problems
D. wanted not report areas where funds have
projects - Fed report so they should use
database

Since the effective date of S.B. 436 is July 1, 1980, and bonds authorized by voter approval of S.B. 131 would not be available until the end of 1980, an appropriation will be necessary if any solid waste facilities are to be started this year. It is estimated that an appropriation of $2.5 to $3.0 million would be adequate.

As written, S.B. 436 provides for 50 percent State funding for the eligible costs of water, sewerage and solid waste facilities. In the case of solid waste facilities, provision has been made to increase the grant to 60 percent if the facility were to incorporate some form of resource recovery. Contact with the Alaska Municipal League indicates that the League is supporting an amendment to increase State grant participation from 50 to 75 percent for water and sewerage projects not receiving federal grant assistance. The Department does not strongly object to this increase, but we do wish to point out some items the Committee should be aware of in making a decision on the proposed amendment.

1) Our experience with EPA projects which receive a total state/federal grant of 87.5 percent shows that a much higher state involvement is required to administer those projects. This is partially due to increased federal regulations but also from decreased participation by the grantee when local contributions are reduced to a small fraction of

the total cost. If this amendment were to be adopted, it is expected that the Department's involvement would need to be increased to protect the State's investment. It is estimated that additional staff would be required. We would prefer to retain our present level of involvement and staff size.

2) With State grants of 75 percent available there may be a marked decrease in the interest of communities to seek federal matching funds for projects - particularly when they are accompanied by voluminous regulations and requirements. The supplanting of federal funds with State dollars will result in an undermined increase in the need for State bond funds. The EPA grants to Alaska for sewerage projects currently average $18 to $20 million per year. This would be a large deficit to make up with State funds.

3) It is suggested that should the Committee choose to amend S.B. 436, increasing State grants to 75 percent, an upset limit be included. It is suggested that the total of State/federal project participation not exceed 87.5 percent (the present limit on EPA financed projects). The following wording is

suggested to amend Section 1 of S.B. 436 should the Committee desire to amend the State percentage of contribution:

Section 1. AS 46.03.030 (b) is amended to read:

(b) The department may grant to a municipality, as funds are available, up to [THE LESSER OF 50] 75 percent of [THE] eligible costs [COST OR 50 PERCENT OF THE ELIGIBLE COST] not financed by the federal government, for public water supply, treatment and distribution systems and public sewage collection, treatment and discharge facilities for which construction has not commenced on or before [JUNE 21, 1976] July 1, 1980. However, for no project for which there is Federal participation shall the State grant exceed an amount which will result in the total of State and federal grant funding exceeding 87.5 percent. The eligible cost of a project or portions of a project will be as determined by the federal agency granting the most monetary assistance. On projects or portions of projects, for which federal participation is not available, eligible costs will be determined by the department in accordance with (d) of this section.

It is anticipated that the immediate effect of the change to .75 percent funding would be an additional $6.0 to $8.0 million for the two-year period requested in S.B. 131.

Thank you for this opportunity to provide comments on S.B. 436. I would be glad to provide any further information you may need.

TEMPORARY						

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

If S.B. 436 is adopted, authorizing the award of solid waste construction grants, it will be necessary to amend S.B. 131 to add an additional $10.0 million to cover the increased grants burden. Also an additional $2.5 to $3.0 million appropriation will be needed to cover the award of grants from the July 1, 1980 effective date through the time when bond funds are approved for use. Should S.B. 436 be amended further to increase the grant percentage to 75% this fiscal note will need to be amended.

DRAFT AMENDMENTS TO AS 46.03.030: GRANTS AND LOANS FOR WATER SUPPLY AND SEWERAGE SYSTEMS

The title of AS 46.03.030 is amended to read:

"Sec. 46.03.030. Grants [and loans] for water supply, [and] sewerage and solid waste facilities [systems].

AS 46.03.030(b) is amended to read:

(b) The department may grant to a municipality, as funds are available, up to [the lesser of] 50 per cent of [the] eligible costs [or 50 per cent of the eligible cost] not financed by the federal government, for public water supply, treatment and distribution systems and public sewage collection, treatment and discharge facilities for which construction has not commenced on or before June 21, 1976. The eligible cost of a project or portions of a project will be as determined by the federal agency granting the most monetary assistance. On projects or portions of projects, for which federal participation is not available, eligible costs will be determined by the department in accordance with (e) [(d)] of this section. Projects shall be constructed in accordance with plans and specifications approved by the department.

AS 46.03.030(c) is amended to read:

(c) There is a water supply, [and] sewerage and solid waste facilities [systems] fund created in the department to carry out the purposes of this section.

AS 46.02020(d) is deleted and replaced with a new subsection to read:

"(d) The department may grant to a municipality as funds are available, up to 50 percent of eligible costs not funded by the federal government for solid waste processing or disposal facilities, or portions of such facilities, for which construction has not commenced on or before July 1, 1980; except that grants up to 60 percent of eligible costs not funded by the federal government may be awarded for those portions of solid waste processing or disposal facilities which provide for resource recovery. The eligible cost of a solid waste processing or disposal facility will be as determined by the federal agency granting the most monetary assistance. On facilities or portions of a facility for which federal participation is not available, eligible costs will be determined by the department in accordance with (e) of this section. Projects shall be constructed in accordance with plans and specifications approved by the department.

AS 46.03.030 is amended by adding a new subsection to read:

(e) The department shall, by regulation, identify those costs which will be considered eligible costs for the purposes of this section. Eligible costs shall include those contracted costs necessary for construction of a project, but do not include costs of interest and financing, right-of-way acquisistion costs, and costs related to operation, maintenance, repair or replacement of a project.

AS 46.03.900 is amended by adding the following new definitions to read:

) "Resource recovery" means the recovery of materials or energy from solid wastes to be used in manufacturing, agriculture, heat production, power production, or other productive processes or purposes; includes the reuse of materials or products to conserve natural resources.

) "Solid waste disposal facility" means any facility for which the primary purpose is to discharge, deposit, inject, consolidate, or place solid wastes into or onto the land; including but not limited to transfer stations and sanitary landfills.

) "Solid waste processing facility" means any facility for the purpose of extracting materials, volume reduction, conversion to energy, or other separation and preparation of solid waste for reuse or disposal of solid wastes; including but not limited to incinerators, shredders, balers, and transfer stations.

Effective date: July 1, 1980

FISCAL NOTE

To be included in the bill:

"There is appropriated the sum of _____ to fund grants for solid waste processing or disposal facilities."

Resources needed for the Department to process grant applications relative to solid waste processing and disposal facilities:

SUBJECT: Committee Meetings, Butrovich Room 207, Capitol Building

Tuesday, March 11, 1980 - 1:30 p.m.

SB 446 - An Act making a special appropriation to the Department of Community and Regional Affairs for construction of a ski jump; and providing for an effective date.

SB 453 - An Act making a special appropriation to the Fairbanks North Star Borough for the development of a park strip along the Chena River in downtown Fairbanks; and providing for an effective date.

Thursday, March 13, 1980

No Meeting set at this time

Tuesday, March 18, 1980 - 1:30 p.m.

SB 370 - An Act relating to fire prevention.

SB 450 - An Act making an appropriation to the Legislative Council for a study of local options for control of the Fairbanks International Airport; and providing for an effective date.

SB 446 (Kerttula, Colletta, Kelly, Sturgulewski)

Summary - This bill gives $350,000 to the Anchorage Municipality to build a 60 meter ski jump, to be used for intermediate ski jump training and Nordic skiing.

Future goals include training for Olympic events with an eye to eventually hosting Olympic events--as well as national and international events.

Only one other jump hill exists in Alaska at the present time. It is twenty-five meters and situated at the Alaska Pacific University. This jump is out-dated for present use demands.

Alaska has had no competitors in the past. We have done well in racing events, but have never placed in jumping events.

Apparently $25,000 was given to the University of Alaska to study ski jump sites in the Anchorage area during the last session of the Legislature. The University, working in conjunction with Mr. Tobben Spurkland of the Nordic Ski Club in Anchorage and the U.S. Ski Assoc., Alaska Division, investigated 17 sites. Three final sites were selected:

Campbell Point (60 meter)
Campbell Track - Site A (60/65 meter)
Kincaid Park (45 meter)

The concept meets with much public support. Contacts with the Anchorage Municipality also agree to the concept, as well as to the administration thereof, including operating, maintenance and insurance costs., etc.

Calls of support have been received from Mr. Spurkland, Mr. Cress of the University of Alaska, and Mr. Dave Klatt.

- -

Mr. Spurkland called Monday, March 10, and requested that the Committee consider deleting "Campbell Point" from the bill and leaving the area open. Campbell Point apparently sits on federal land and there might be some problem of obtaining military access. He felt the total dollar figure could remain as is. In this event, construction could begin on one of the other above-mentioned sites.

Apparently no formal contacts or work has been done with the Anchorage Municipality. The total figure requested in this bill has not been investigated by the Municipality--and they received a copy of the plan only a week ago. This has not been brought before the Assembly. Yet, word received from the Mayor's office, and other agencies within the Borough, was that although the concept meets approval, there might be some question on the total dollar figure--is it enough? There has been apparently no coordination with the Municipality, yet they will be the ones to administer.

Mr. Spurkland did comment that although they want the project to go forward, one thought might be to have construction done privately--and, for instance, have the money go to the Nordic Club--it was felt this would save many administrative dollars that the Municipality would use.

To Senator J. Kerttula.

JAN 25 1980

Dear Jay -

Enclosed are some pamphlets which Tobben Spurkland our project Engineer just had printed. The exact facts and figures which I know you were so anxious for, are not yet completed. However Mr. Spurkland has enclosed a letter with calculations he has so far and we hope these will be of benefit to you in your request for our project.

Also enclosed is a letter from Jim Page which we feel tells the story pretty well.

We surely do hope that the pamphlets and the two letters will help you in some way to present our cause in the Legislature. Mr Spurkland will have further calculations on March 1.

We Thank you for all your help and wish you a successful session

Best Wishes.

Sincerely

Karl Eid

SKI - 79cad

PROGRESS REPORT JAN.18, 1980

From Tobben Spurkland

As of January 18, 1980,12 locations have been identified as possible sites for skijumps in the 40 to 70 meter range.

The sites are enumerated below without any order of presedence.

Campbell Point	~~60~~ meter
Arctic Valley Road	60 meter
Hillside, 3 sites	25-45 meter
Kinkaid Park 3 sites	25-45 meter
Alyeska	
Edmond Lake Park	25 meter
Fossil Creek	45 meter
Campbell Creek Gorge	45 meter

60 meter

do 350 M.

No site specific costestimates have been prepared as of this time except the very preliminary estimate for a complex at Campbell Point, which would be the least expengive to develope, because of the gravelpit operation at that location. A constructionbudgett of $300,000 was arrived at for this site. With contingencies and administration a more realistic cost would be $ 500,000.

If a 45 meter hill was to be constructed at any location in the Anchorage Bowl a minimum budgett would be as follows:

Earthwork	$ 85,000
Inrun Tower	$ 60,000
Admin. and design	$ 50,000
Total	$195,000

With preliminary design and actual quantitis for a site specific complex I expect to be able to furnish more reliable figures by the end of February.

Yours

Tobben Spurkland

Tobben Spurkland P.E.

[illegible]

[illegible]

[illegible] S. Casey
[illegible] Bob, Bear Drive
Anchorage, AK 99507

Dear Regan:

Thank you for your letter and the information on your proposal for a ski jumping complex in Anchorage. It looks to be extremely well thought out and appropriate for your needs.

The U. S. Ski Team is, of course, very pleased that you seem to be making progress toward the construction of these facilities. Anchorage would be an ideal site for many national and international championships. You have outstanding cross-country facilities and a very capable and active nordic club which has proven its ability to host well organized and well run nordic events. The addition of the proposed ski jump would enable you to have such prestigious tournaments as the Junior National Championships in Nordic skiing, the Junior Olympic Nordic Championships, the NCAA Championships, and the World Junior Championships. As your club has demonstrated such an outstanding ability to run high quality meets we would hope to have such events under your direction. It would reflect well on the entire nordic program in the United States and bring considerable prestige to your club and to Anchorage.

The construction of these facilities would also enable you to have better development [illegible] and I am sure, to have more of your skiers on national and international teams. At the present time Alaska has a few cross-country skiers skiing at the [illegible] level. Your program for women seems to be particularly strong and [illegible], Lynn Spencer, and Judy Kabinowitz will obviously represent Alaska well [illegible] in the skiing world. A good jumping and nordic combined program [illegible] enlarge this group. It has been proven over and over again that [illegible] as nordic combined athletes have greater capability to reach [illegible] jumping later on. We would also enjoy having [illegible] nordic combined skiers.

Hopefully you will be able to select a good site and complete a 60 meter jumping hill [illegible] has an artificial plastic surface for summer jumping. As you know, there is only one other hill in the United States right now that has summer jumping capability. It is pretty old fashioned and has limited usefulness for our Team. We are faced with the necessity right now of taking our jumpers to Europe several times each year as this is the only place they can get the needed summer jump training. If you were able to complete a modern facility with a plastic surface I am sure the U.S. Jumping Team would make full use of it for their training. I think it would be good for your club to have the top jumpers in the country around both as an example to your [illegible] kids and a source of current information on ski jumping technique and training for your coaches.

[illegible]

We would like to be of any assistance to you that we can in your efforts to win approval for your project. You can be sure that the U. S. Ski Team is 100% behind your plans which when completed will add a much needed dimension to the entire ski program in this nation.

Sincerely yours,

Jim Page
Assistant Nordic Director

SUBJECT: Status of FY80 "Community Grants" (80SLA1979)

The following summarizes activity relating to the recreational appropriations made to communities through DNR in Chapter 80, SLA 1979:

(1) Grants in Active Status:

(a) 20 Anchorage grants for a total of $4.4 million
(b) 1 Juneau grant for $75 thousand
(c) 1 Sutton: Community Building - RSA with DOT/PF for 10.0

(2) Grants in Preparation:

(a) 1 Fairbanks grant of $220 thousand for recreation site purchases. The desired land acquisition has already been accomplished and the North Star Borough has asked if the appropriation may now be used for development on those acquired sites.

(3) No Response to Letter of Solicitation (11/16/79):

(a)	Bethel: Kisaralik Shelter House	10.0
(b)	Kwethluk: Bike/Foot Trail Grant	20.0
(c)	Tanana: St. James Mission Rehabilitation	50.0

(4) Letter of Solicitation Not Yet Sent:

(a)	Gateway R.E.A.A. grant to Tok, Dot Lake, Mentasta Lake, Eagle, and Northway	77.2

(5) Uncertain Status:

(a) Fairbanks/Division of Parks: Chena Campground Upgrade - $400 thousand.

Recommended action:

(1) In order for Fairbanks to proceed with its application, we need a ruling as to whether the appropriation may be used for development rather than acquisition. I can ask Steve Smith, or Rod Pegues, for an opinion. If the opinion is favorable, Fairbanks can be notified to proceed; if unfavorable, the Fairbanks delegation can be advised that amending action would be appropriate this session.

(2) Certified letters of solicitation should be sent to the three communities which have not responded. I could draft for Chip's or your signature.

(3) Letters of solicitation should be sent to the villages under the R.E.A.A. grant after I do some more research. I could draft for Chip's or your signature.

(4) There appears to be some difference of opinion regarding whether Parks or the Borough is supposed to use the $400 thousand for the Chena Upgrade project. Chip is working directly on this issue.

cc: Chip Dennerlein

At any time during normal business hours and as often as the State or an agent of the State considers necessary, the State or an agent of the State shall be permitted to physically inspect the project.

IV. LAND STATUS AND PUBLIC ACCESS. The land and structures acquired with the funds appropriated for this project will be designated for public use upon completion of the project. The facilities constructed with the funds appropriated for this project will be located on publicly owned or controlled lands. Public access will be assured for a period of ten years from the date that notice of completion is filed with the department, after which time it will be automatically extended for successive ten year periods unless a contrary arrangement is agreed to by the department.

V. REQUEST FOR PAYMENT. The Department of Natural Resources is hereby requested to issue a warrant, payable to _____, in the amount of _____, in order to accomplish the work described above.

VI. NOTICE OF COMPPLETION. Immediately upon completion of the work described in Parts I and II above, a sworn affidavit stating that the project was accomplished, as described in this proposal, and setting forth an accurate summary of the expenditures made will be provided to the commissioner of natural resources by the project coordinator.

PROJECT NARRATIVE

I. PROJECT NEED STATEMENT. This appropriation request responds to the "Trails and Footpaths" grants program established by the Legislature in 1972 (AS 41.20.355-375). That statute provides that "an amount of not less than three-eights of one per cent nor more than one per cent of the total yearly state and federal matching sum combined, under the federal-aid-to-highways program . . . , shall be appropriated annually from the general fund to the Department of Natural Resources for the purposes of providing grants to eligible cities and boroughs for trails, footpaths and shelter construction and maintenance in appropriate areas, including but not limited to existing park and recreation areas and for the purpose of providing grants to the Department of Highways for developing the program specified in . . . this chapter." With the yearly State and federal funds in the federal-aid-to-highways program amounting to about $120 million the annual appropriation would range from $450.0 thousand (three-eights of one per cent) to $1.2 million (one per cent).

Since this program was established in 1972, however, funding has not occurred on an annual basis. The following summarizes appropriation activities for this grants program:

Fiscal Year	Funding Source	Amount
FY73-77	-	-0-
FY78	G.F.	300.0
FY79	G.F.	200.0
	G.O.	500.0
FY80	-	-0-

EXHIBIT III

PROPOSAL
of

_____

for a
Parks and Recreation Project
Identified in Section 25, Chapter 80, SLA 1979 (Page 62)
as

_____

I. PROJECT DESCRIPTION SUMMARY.

II. PROJECT WORK PLAN SUMMARY.

III. AUDITS AND INSPECTIONS. At any time during normal business hours and as often as the State or an agent of the State considers necessary, there shall be made available to the State or an agent of the State for examination all records regarding matters covered by this proposal. The State or an agent of the State will be permitted to audit, examine, and make excerpts or transcripts from the records, and will be permitted to audit all contracts, invoices, materials, payrolls, personnel records, conditions of employment, and other data relating to matters covered by this proposal.

(over)

At any time during normal business hours and as often as the State or an agent of the State considers necessary, the State or an agent of the State shall be permitted to physically inspect the project.

IV. LAND STATUS AND PUBLIC ACCESS. The land and structures acquired with the funds appropriated for this project will be designated for public use upon completion of the project. The facilities constructed with the funds appropriated for this project will be located on publicly owned or controlled lands. Public access will be assured for a period of ten years from the date that notice of completion is filed with the department, after which time it will be automatically extended for s ccessive ten year periods unless a contrary arrangement is agreed to by the department.

V. REQUEST FOR PAYMENT. The Department of Natural Resources is hereby requested to issue a warrant, payable to _____, in the amount of _____, in order to accomplish the work described above.

VI. NOTICE OF COMPPLETION. Immediately upon completion of the work described in Parts I and II above, a sworn affidavit stating that the project was accomplished, as described in this proposal, and setting forth an accurate summary of the expenditures made will be provided to the commissioner of natural resources by the project coordinator.

VII. CERTIFICATION OF AUTHORITY. Done at _____, this _____day of _____, 19_____.

MEMORANDUM State of Alaska

DEPARTMENT OF NATURAL RESOURCES
DIVISION OF PARKS

TO: Tom Bergstrom, Director
Division of Administration
and Management

DATE: January 15, 1980

FILE NO:

TELEPHONE NO:

FROM: Hilton Wolfe
Staff Assistant HWW

SUBJECT: Status of FY80 "Community Grants" (80SLA1979)

The following summarizes activity relating to the recreational appropriations made to communities through DNR in Chapter 80, SLA 1979:

(1) Grants in Active Status:

(a) 20 Anchorage grants for a total of $4.4 million
(b) 1 Juneau grant for $75 thousand
(c) 1 Sutton: Community Building - RSA with DOT/PF for 10.0

(2) Grants in Preparation:

(a) 1 Fairbanks grant of $220 thousand for recreation site purchases. The desired land acquisition has already been accomplished and the North Star Borough has asked if the appropriation may now be used for development on those acquired sites.

(3) No Response to Letter of Solicitation (11/16/79):

(a)	Bethel: Kisaralik Shelter House	10.0
(b)	Kwethluk: Bike/Foot Trail Grant	20.0
(c)	Tanana: St. James Mission Rehabilitation	50.0

(4) Letter of Solicitation Not Yet Sent:

(a)	Gateway R.E.A.A. grant to Tok, Dot Lake, Mentasta Lake, Eagle, and Northway	77.2

(5) Uncertain Status:

(a) Fairbanks/Division of Parks: Chena Campground Upgrade - $400 thousand.

Recommended action:

(1) In order for Fairbanks to proceed with its application, we need a ruling as to whether the appropriation may be used for development rather than acquisition. I can ask Steve Smith, or Rod Pegues, for an opinion. If the opinion is favorable, Fairbanks can be notified to proceed; if unfavorable, the Fairbanks delegation can be advised that amending action would be appropriate this session.

(2) Certified letters of solicitation should be sent to the three communities which have not responded. I could draft for Chip's or your signature.

(3) Letters of solicitation should be sent to the villages under the R.E.A.A. grant after I do some more research. I could draft for Chip's or your signature.

(4) There appears to be some difference of opinion regarding whether Parks or the Borough is supposed to use the $400 thousand for the Chena Upgrade project. Chip is working directly on this issue.

cc: Chip Dennerlein

MEMORANDUM

DEPARTMENT OF NATURAL RESOURCES - DIVISION OF PARKS

DATE: February 28, 1980

Donald D. Lehr, Director
Division of Budget and Management
Office of the Governor

FILE NO. 4205-1

TELEPHONE NO:

SUBJECT: Allocation of $2,442,461.00 FY80 LWCF Funds

FROM: Chip Dennerlein, Director
Division of Parks

Please use the following list of allocations for the above apportionment amount in lieu of the list submitted with request dated February 4, 1980.

The "Unallocated" amount of $66,760.24 will be allocated when projects are submitted.

Project - Participant		Authorization
Chena Rec. Area - Div. of Parks	275,400.00	CHA 113/SLA 78
Playground - Saxman	10,000.00	CHA 113/SLA 78

DEC 13 1979

Division of Parks

DEC 18 19[illegible]

Honorable Jay S. Hammond
Governor of Alaska
Juneau, Alaska 99811

Dear Governor Hammond:

It is my pleasure to provide you with a copy of the fiscal year 1980 Certificate of Apportionment of the $300,000,000 appropriated from the Land and Water Conservation Fund for use by the States, Puerto Rico, Virgin Islands, Guam, American Samoa, and the District of Columbia.

Apportionment of these funds is made under the Land and Water Conservation Fund Act of 1965, as amended, and the Act making appropriations for the Department of the Interior and related agencies for fiscal year 1980.

We look forward to continuing the beneficial relationship with you in administration of the Land and Water Conservation Fund and citizens of your State and the country.

Sincerely,

CHRIS T. DELAPORTE

RE: SB 451 and SB 452

I appreciated the opportunity to meet with you and other interested parties on your proposed legislation, SB 451 and 452. It seems to me the suggestion of doing some additional field work might be very helpful in the consideration of this legislation and I will lend my support to your efforts to accomplish this.

I would like to give you several areas that you might wish to consider in developing the study format. My office has not received a copy of your correspondence with Ellerbe and it may well be that these items have already been considered in their proposal to you. Several items of concern are as follows:

1. What kind of a mechanism should be set up to resolve differences within the various municipalities located within each of the four regions? If regional sports and recreational facilities councils are set up, what would their role be? The various municipalities would have their own planning function and would not necessarily accept the decisions of an advisory council. Might we be making decisions on a first-come-first-served basis, for example?

2. If regional councils are established, it seems to me we need to define the responsibilities of the councils as well as look at their relationship to local/regional government. ~~Without definition, sports and recreational facilities could cover a very broad range of facilities or improvements~~.

3. What kind of facilities would be eligible for funding? Without definition, sports and recreational facilities could cover a very broad range of facilities or improvements.

4. What entity would contract for construction/own land/take responsibility for operational and maintenance functions?

5. What are operational and maintenance costs of the proposed facilities?

Again, these are just some of the issues that are raised. I would be very happy to work with you as additional information becomes available.

ALASKA

STATE LEGISLATURE

MEMORANDUM

Memo to: Senator Sturgulewski
Chairman, Community and Regional Affairs Committee

From: Ruth Allington
Assistant
Senator Fahrenkamp

Date: March 5, 1980

Re: SB 451, SB 452 relating to sports facilities

Intent - The basic reason for these bills is to allow development of area-wide sports and recreation capabilities. There is a demonstrated need for covered facilities large enough for football games, and able to be adapted to tennis, track, basketball, soccer, and assorted other participant and spectator sports.

Other statutes of a similar nature are on the books. The drawback to the main one, 43.18.400, is that it would provide only up to 50% of the total funding of the facility. Also, it leaves management and administration up to the municipality. Under SB 451 an advisory council is formed. It is anticipated that this mechanism will enable the area-wide concept to be realized, without the problems inherent with a municipality doing the administration, i.e. a borough putting its own preferences above those of a city within the borough, or groups not associated with the municipality.

Although the original concept involved appropriations to individual municipalities, the bill became one of the proverbial Christmas Trees. In order to forstall further add-ons, the concept of using judicial districts was adopted. Two or three facilities within one district are still possible, if the municipalities get together and pool the funds.

It is anticipated that the following amounts will cover the cost of an air-dome of the size necessary in the listed municipalities.

Fairbanks	$12,000,000.
Anchorage	18,000,000.
Southeast	6,000,000.
Northwestern	6,000,000.

(All facilities except Anchorage and Fairbanks would use approximately the same size basis)

As stated in SB 451, the facility council would be responsible for managerial aspects of the facility, including hiring the manager. It is envisioned that the director would be "on-board" at least six months before completion of the project. The councils would prepare the budget for the coming year, for presentation to the legislature as backup for the 50% operating and maintenance cost grants from the state for the first five years. (Note: the wording limiting the state share of operating and maintenance costs to five years was left out of the bill. It will need to be added. It is anticipated that the state will not be involved after the five year initial period.)

SENATE BILL 451 and SENATE BILL 452

Committee substitutes are being requested denoting the changes marked in the attached SB 451 and SB 452. These two bills are scheduled for a public hearing in our Committee Tuesday, April 1.

The main change from the original bills, is that we are deleting the "council" and that we are adding a further definition of "sports/recreational facility."

Attachment

COUNCILS. Each local sports and recreation facility council shall

(1) hire a general manager for the sports and recreation facility;

(2) encourage broad community use of the sports and recreation facility, including athletic events, trade shows, and craft shows;

(3) prepare an annual budget to be submitted to the legislature for approval of grants of matching operating money for the sports and recreation facility;

(4) acquire necessary money to operate the sports and recreation facility;

(5) perform other duties necessary to the operation of the sports and recreation facility.

Sec. 44.47.400. OPERATING EXPENSES. Within the limits of legislative appropriation for the purpose, the department shall make annual matching grants to a local sports and recreation facility council equal to 50 percent of the estimated reasonable costs of operating the local sports and recreation facility for that year.

Sec. 44.47.410. DEFINITIONS. In AS 44.47.360 - 44.47.410, "municipality" includes a home rule, general law and unified municipality, as defined in AS 29.

Add sport/rec facility definition as ex. 43.18.460

SENATE BILL NO. 451

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act establishing a grant fund to be used for construction of community sports and recreation facilities, and providing for management of the facilities by local sports and recreation facility councils."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.47 is amended by adding new sections to read:

ARTICLE 9. SPORTS AND RECREATION FACILITY GRANTS.

Sec. 44.47.360. SPORT AND RECREATION FACILITY GRANT FUND. (a) There is established in the Department of Community and Regional Affairs the sports and recreation facility grant fund. From legislative appropriations to the fund, the department shall make grants to eligible municipalities for the construction of local sports and recreation facilities.

(b) Within the limits of legislative appropriations for the purpose, the department shall make grants to municipalities equal to the amount of the estimated reasonable costs of planning and construction of municipal sports and recreation facilities.

(c) A grant from the fund shall be made according to an agreement between the commissioner and the municipality receiving the grant. The agreement may include any provision agreed upon by the municipality and the commissioner and shall include the following:

(1) estimates of reasonable costs of planning and constructing a sports and recreation facility as approved by the commissioner

after consultation with the Department of Transportation and Public Facilities;

(2) a schedule of the disbursement of the grant, if, as determined by the commissioner, a grant is to be disbursed other than in one sum;

(3) agreement by the municipality to

(A) proceed with and complete the proposed planning and construction of a sports and recreation facility expeditiously;

(B) not discontinue operation or dispose of all or part of a sports and recreation facility for which it receives a grant without the approval of the commissioner;

(C) provide for the costs of land acquisition or otherwise provide land for the proposed sports and recreation facility.

(d) An application for a grant shall be on a form prescribed by the commissioner.

Sec. 44.47.370. LOCAL SPORTS AND RECREATION FACILITY COUNCILS. For purposes of operating each local sports and recreation facility established in whole or in part with a grant to a municipality under AS 44.47.360, a local sports and recreation facility council shall be established. Each council shall consist of five members residing in the municipality to be served by the facility. The members of a council shall be appointed by the governor to serve a three-year term, and may be reappointed to serve additional terms. Each council shall be incorporated as a nonprofit corporation in accordance with AS 10.20.

Sec. 44.47.380. COMPENSATION AND EXPENSES FOR COUNCIL MEMBERS. Members of a local sports and recreation facility council serve without compensation but are entitled to per diem and travel expenses provided by law for boards and commissions.

Sec. 44.47.390. DUTIES OF LOCAL SPORTS AND RECREATION FACILITY

Chip Dennerlein
Director, Division of Parks
Department of Natural Resources
619 Warehouse Drive Suite 210
Anchorage, Alaska 99501

Dear Chip:

Thank you very much for your informative letter regarding SB 451 and SB 452 relating to sports facilities. It is the intent of the sponsor, Bettye Fahrenkamp, to allow development of areawide sports and recreation facilities. I am enclosing her staff memo of March 5, 1980 giving some background information.

Through a contract, Senator Fahrenkamp is having additional work done to establish locations to be covered by the proposed funding, and will undoubtedly adjust the appropriations bill to reflect the new information. Senate Bill 451 is being changed to delete all references to the local sports and recreation facility council. Also to be deleted would be Sec. 44.47.400 dealing with operating expenses. A new section giving a definition for community sports and recreational facilities will be added. The wording will be the same as that reflected in existing statute 43.18.400.

Again, thank you for the information you have provided.

Sincerely,

Arliss Sturgulewski

DEPARTMENT OF NATURAL RESOURCES

DIVISION OF PARKS

619 Warehouse Dr., Suite 210
Anchorage, Alaska 99501

March 21, 1980

The Honorable Arliss Sturgulewski, Chairman
Senate Committee on Community and Regional Affairs
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

During the Legislative Session, the Commissioner's Office forwards to the Division of Parks legislation which may have an impact upon public recreation. I have recently been forwarded a copy of Senate Bill 452, the Sport and Recreational Facility Grant Fund, which is currently in your Committee. After reviewing this proposed legislation I would like to offer the following comments and suggestions.

As currently drafted, SB 452 proposes to establish a $42,000,000 recreational grant fund for local communities. These monies would be passed through the Department of Community and Regional Affairs to local "recreation and sport facility councils" located throughout the State. These local sport and recreation councils would receive and expend the funds as well as continue to maintain recreational facilities once constructed. While wholly supportive of State assistance to communities for outdoor recreation projects and sport facilities, I believe that the current structures proposed in the bill would be duplicative of existing state efforts and could result in confusion for communities regarding outdoor recreation projects.

The Division of Parks currently administers some two and a half to three million dollars annually of Federal monies from the Land and Water Conservation Fund to communities throughout Alaska and to State Park System for the construction of outdoor recreation projects. In addition to these Federal monies, the Division also administers millions of dollars worth of State grant monies for both construction projects within the State Park System and for a broad variety of recreation projects in communities throughout the State. One of the most positive points about SB 452 is that it recognizes the need for the State to assist communities in the construction of such facilities. Federal Land and Water Conservation Fund dollars fund recreation projects on a 50% matching basis. It is necessary for communities who apply for these funds to contribute a 50% match. This is often difficult, especially for small communities in rural Alaska. While the grants staff within the Division of Parks is generally able to assist communities in calculating an "in-kind" match by using of volunteer service and equipment donations, there is often still difficulty in coming up with the full dollar amount required to match Federal assistance. Moreover, the State of Alaska has been able to "land match" recreation projects over the past years. Under this program land which

came to the State via the Statehood Act can be used as a value match for Federal dollars for the purpose of outdoor recreation projects. This means that boroughs and cities which have received further entitlements from the State may use these lands to assist them in matching for recreation dollars. However, the State of Alaska is living on borrowed time under the Land Match Program. Currently, Alaska is the only State in the Union authorized to use land match for the Land and Water Conservation Fund. This policy originated more than ten years ago when Alaska's financial picture did not show a billion dollar surplus. I have been told to expect a "review" of the land match policy by the federal government.

In the past the State has recognized the need to assist local communities in constructing recreation facilities. There has been established in the Statutes a fund known rather tortuously the Outdoor Recreation Open Space and Historic Properties Development Fund (OROS & HPDF). This fund has been available to the State to use in assisting communities to meet half of their required half for Federal dollars to construct recreation projects. Unfortunately, this fund has run dry. As part of our Capital Project suggestions to legislators this year, the Division of Parks suggested appropriating monies for this fund. While our suggestion as to dollar amount has been much lower than the $42 million proposed by SB 452, the concept is quite similar. In addition the Division of Parks has suggested deleting the Federal match requirement in OROS & HPDF so that monies could be passed directly to communities regardless of whether they had applied for federal Land and Water Conservation dollars within a given year.

The grants staff within the Division of Parks has had extensive experience over the past ten years in administering recreation dollars to local communities. Alaska's track record for operating these programs has been excellent. In fact, Alaska is one of the few States within the Union to come through Federal Audits for a period of years without exceptions. Moreover, this State ranks high among the States in its record of obligating and expending pass through monies to communities in a timely fashion and in assisting them in their fiscal management of the programs. Based upon this track record I offer the following suggestions for the Legislation.

There already exists within the State structure a series of Park and Recreation Commissions (PARC). The sport and recreation facility commissions in SB 452 would appear to overlap with the functions of the local PARC's. Moreover, our experience with granting money to non-profit organizations located within municipal governments has been good. We would suggest that the monies be granted to the local government entities and that local park and recreation commissions be used to suggest projects to the local governments. It might be required that the local park and recreation commissions support and endorse those projects for which local governments apply. The program could also be administered by the Division of Parks. The purpose for this is by no means "empire building". All of the monies would be passed through to local governments. And to be quite honest, I have no desire for additional responsibil-

ities in administering grant monies. The reason that I suggest this concept is to avoid creating a new bureaucracy to administer a new recreation fund where inevitable overlaps in responsibilites would occur. It is almost certain that many communities receiving funds from the new sport and recreation facility grant would then try to use those monies to match federal monies which the Division of Parks administers. This makes absolutely good sense. Unfortunately, as we have experienced with grants administered from other agencies, the guidelines and regulations are often different. This is difficult for larger cities to cope with, and creates a veritable nightmare for any communities smaller than Anchorage. Moreover, having witnessed the fate of the OROS & HPD Fund we are concerned that this large appropriation might simply be a one time shot and be whittled away over the next few years never to be funded again. By allowing such a program to be tied to an ongoing federal program such as the Land and Water Conservation Fund, or at least providing for the ability of the Fund to easily dovetail may help sustain the dollars over time.

If there is no desire to place the fund within the Division of Parks or to transfer the money to the OROS & HPD Fund, then I would suggest at least that the word "indoor" be inserted in the purpose for the fund. At least this would avoid the overlap with outdoor recreation projects administered throughout the State by the Division of Parks.

In summary, I wholly support the concept of HB 452. If the intent of HB 452 is to simply fund several major sport facilities projects in major cities, such as the proposed "Project 80's" for the City of Anchorage, the fund may well work without a hitch. However if there is a desire to see a continuing fund which enables communities of all sizes throughout the State to construct and manage recreation facilities, then I believe the suggestions which I have forwarded to you in this letter have merit.

Thank you for your consideration of these observations. Please do not hesitate to call upon me or my grants staff should you have any further questions or wish to follow up on some of the comments which I have made.

Sincerely,

Chip Dennerlein
Director

DURING LEGISLATURE
POUCH V
STATE CAPITOL
JUNEAU, AK 99811
PHONE (907) 465-4943

Dear Coach:

How many years have you watched youth train for track and field in the hallways of our schools? How many times have you held your breath in anticipation of one of your students getting hurt trying to excel during a track and field event held under such dangerous conditions?

What about football? Isn't it a shame that you and your students put so much effort and time into this great sport and have such a short season? You know as well as I do the advantages of having an indoor football field.

THE TIME IS NOW! Last session I had $25,000 appropriated to do a feasibility study a Mulcahey Park. The findings are most encouraging. For instance, I was informed that the engineers drilled five holes to a depth of 65 feet each and found the ground very stable in that area.

During the interim, as many of you know, I spent many hours developing community support for the indoor sports activity center. I passed out pictures of what other communities, mostly smaller in population than Anchorage, have for sports programs. Such buildings as athletic centers in Flagstaff, Arizona, Montana State, and Moscow, Idaho's Kibby Center are naturals for what we need in Anchorage.

When I left Anchorage to start the session in January, I was sure most of the city's leaders were of the opinion that an indoor track and field and football field was a priority. But, opinions seem to have suddenly changed.

In the past five weeks I have talked to a number of Senators and Representatives and given them a packet similar to the enclosed. There has been a close effort working with them for mutual concerns about sports facilities throughout the state. Fairbanks is working hard for an indoor football field; Kenai wants a large indoor hockey arena; Palmer wants a larger indoor sports facility. There is no doubt that a bill will soon be sponsored for about $60 million for sports facilities. Of this amount, $22 million is appropriated for Anchorage under my insistance to informal groups that our needs, flexibilities, and populations are a top priority.

This may all sound fine, but we do have a major problem. That is, whose priorities should be met first? As you well know, the City Mayor and Assembly have an ad hoc committee pushing for recreational facilities they want to build, known as the Tony Knowles plan. There are major efforts now taking place to get the legislators to use state taxes for a spectator sport center first rather than the above indoor sports activity center described.

I feel our school athletic programs and the community participatory programs should take precedence over the city-sponsored, pro-team programs.

Now what? I need your help. There is no doubt that monies will be appropriated for an Anchorage sports facility this year. Would you be concerned enough to send a Public Opinion Message, (see procedure below), to each of the Anchorage legislators, (also listed below), asking them to appropriate state funds for an indoor football, track and field, and rifle range before using the state taxes for a spectator sports arena.

If you don't act now it could be years before action is taken. Please pass the word to your students and their parents to express their views to their legislator as well as the City Mayor's Office and the City Assembly.

With your help and support I feel that by the fall of 1982, we should see the first indoor football game in Anchorage. And how about the future of our students in track and field? Haven't you been amazed by the degree they excel under such adverse conditions?

Well coach, it's up to you now. I really need your help in starting a ground swell that will see our dream come true. Can I count on you?!

Yours Very Truely,

Terry Martin

Joan A. Ray

February 27, 1980

Representative Russ Meekins
Alaska State House of Representatives
Juneau,
Alaska 99801

Dear Russ:

We have prepared the following as an overview of the services we would contribute for sports facilities in Alaska. G & M Associates would provide a team consisting of Ellerbe-Alaska, Korbis Associates, Modern Construction, Inc., and Geiger Berger Associates, to provide the following services to the State of Alaska:

- Goals and Objectives Statement
- Primary design solution for four domed stadiums
- Realistic construction cost estimate
- Specifications for selection of Design-Build Team
- Models of four domed stadiums
- Time Phasing Schedule

Ellerbe-Alaska, local architects, planners and engineers are the premier firm nationally for civic, convention, and sport center facilities. Two outstanding examples of their expertise are the Notre Dame Athletic and Convocation Center and the Lexington Civic Center Arena (Rupp Arena) and Exhibit Hall. In addition, Ellerbe truly understands the design/build concept, and has lengthy local experience.

Korbis Associates is a planning and construction management firm from Pocatello, Idaho. They have worked along with Geiger Berger Associates, constructing engineers, to develop a cost efficient solution to construction of Sports Arenas. Korbis' preliminary estimate for a 210,000 Sq. Ft., 15,000 seat facility for Anchorage is $10,500,000. In addition to his tremendous cost savings forecast in construction, he points out that his solution has potential of up to 47% in energy savings to heat the building. Korbis and Geiger Berger have extensive Alaskan experience.

Modern Construction is the largest Alaskan owned construction company. They specialize in turn-key projects, construction management and design/build projects. The majority of Modern's work has been in the traditional competitive bid market. This experience along with their design/build specialty make them an invaluable part of our team both from a cost estimating and specifications writing stand point.

We feel the team approach best for this project because of the variety of subjects that must be studied, technical problems that must be solved, with critical schedules that must be met to give the State a viable project at the lowest possible, yet realistic, costs, this construction season. We could accomplish all of this by the end of March for an all inclusive fee of fifty thousand dollars ($50,000). I am enclosing herewith some supporting documents for your perusal.

Sincerely,

Joan A. Ray
President

1300 - Differential	$1,870.00		
Night Manager	657.00		
		Total	$ 2,527.00
1400 - Benefits			$24,920.00
Total Personnel Services			$111,712.00
Supplies			
2100 - Office Supplies			$ 250.00
2200 - Operating Supplies			1,500.00
Other Services and Charges			
3100 - Professional Services			--0-
3200 - Communication			600.00
3302 - Transportation - Mileage			2,000.00
3400 - Insurance			2,650.00
3600 - Repairs and Maintenance			2,500.00
3700 - Rentals			2,000.00
3800 - Miscellaneous			
3802 - Publicity			300.00
3806 - Training			700.00
3808 - Health Department Permit			100.00
		Total	$ 10,850.00
Direct Organizational Costs:			$124,312.00

Intergovernmental Charges:

Building Maintenance	$ 42,000.00
Custodial	68,800.00
Building Space Management	38,740.00
Personnel	1,585.00
Payroll	1,000.00
General Accounting	6,000.00
Accounts Payable	3,000.00
Purchasing	1,000.00
Cash Management	400.00
Forms Management	100.00
Duplications	2,500.00
Electronics	1,320.00
Parks and Recreation Administration	7,500.00
Function Cost	$173,945.00
Total Function Cost	$298,257.00

9. Operation and Maintenance Costs: It is expected that operation and maintenance will entail the expenditure of approximately $300,000 per year. In Table II operation and maintenance figures are shown (see Appendix B for anticipated costs.)

TABLE II
ESTIMATED OPERATION AND MAINTENANCE COSTS

Personnel (facility director, facility night manager, facility assistant manager, part-time recreation specialist, one part-time and four full time recreation attendants)	$111,712
Organizational Costs (supplies, communication, publicity, etc.)	12,600
Function and Maintenance (building maintenance, custodial, space management, intragovernmental charges)	173,945
TOTAL	$298,257

The following goal has been adopted by the subcommittee. FIFTY PERCENT OF OPERATION AND MAINTENANCE COSTS WILL BE PAID FOR BY THE USERS OF THE FACILITY. To accomplish this, fees could be collected for each use on a membership basis (e.g. quarterly or annually). As an alternative to user fees, it is proposed that a system of voluntary service in the operation of the facility be made available for those people who do not wish to pay for operation and maintenance. It is proposed that a management plan be developed for meeting such expenditures.

In drafting the management plan, the alternative of contractual services for the operation and maintenance of the recreation facilities should be seriously considered. The cost figures, shown in Table II, are projected according to Municipal salary and operating expenses: they are used for estimating purposes only. The committee anticipates that there may be considerable cost savings in operation and maintenance expenses under a contractual arrangement.

8. Capital Costs: Based on estimates for each component of the prototype facility and associated costs (e.g. architectural fees), it is projected that each facility would cost approximately $3.8 million (1979 dollars). In Table I the estimated costs of the prototype facility are presented.

from T. Martin

March 4, 1980

Senator Arliss Sturgulewski, Chair
Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

At the last regular meeting the Ketchikan Parks and Recreation Board reviewed Senate Bills No. 451 and 452 and would like to urge you to support these pieces of legislation. As a board we have two concerns that we would like addressed before the bill is sent back to the Senate for passage. The concept of a local sports and recreation facility council is excellent, however, we question the need for members of the council to be appointed by the Governor and feel that this could be more appropriately done at the local level.

Our other concern is that the definition of "municipality" include home rule cities, such as Ketchikan, as well as unified municipalities.

We thank you for your consideration and look forward to the passage of these bills.

Sincerely,

Susan Dickinson

GREATER SOLDOTNA CHAMBER OF COMMERCE

City of Opportunity

P. O. BOX 236 SOLDOTNA, ALASKA 99669

RESOLUTION 80-3

A RESOLUTION BY THE GREATER SOLDOTNA CHAMBER OF COMMERCE REQUESTING THE ALASKA STATE LEGISLATURE TO PROVIDE CONSTRUCTION FUNDING FOR THE CENTRAL PENINSULA SPORTS CENTER PROJECT OF THE KENAI PENINSULA.

WHEREAS, the Central Peninsula Sports Center is a multi-purpose facility that provides a setting for a large variety of sports functions and events, and

WHEREAS, the multi-purpose nature of the structure makes it suitable for other functions as civic events, conventions, and concerts, and

WHEREAS, the main feature of the facility is an ice rink that is easily convertible to multi-use floor space, and

WHEREAS, all ice-related events including hockey are presently held outdoors, often under severe and unpredictable weather conditions, and

WHEREAS, ice related activities have become popular and involves many individuals of all ages throughout the Kenai Peninsula, and

WHEREAS, the operation and maintenance of the completed facility will be contracturally assumed by the Kenai Peninsula Hockey Association, and

WHEREAS, the Kenai Peninsula Hockey Association, a non-profit community organization, has a solid, unsubsidized, 8 year operational record, and

WHEREAS, the organization's impressive record includes setting team schedules, furnishing coaches, furnishing all gear and equipment, schooling coaches and referees, transporting players to games and tournaments, paying everyone's insurance, and offering an annual $1,000 scholastic award.

NOW, THEREFORE BE IT RESOLVED THAT the Greater Soldotna Chamber of Commerce requests the Alaska State Legislature to provide construction funding for the Central Peninsula Sports Center since there exists a pressing need for a Kenai Peninsula multi-purpose facility, and since a responsible, non-profit community organization also exists for its operation and management.

BE IT FURTHER RESOLVED THAT the Greater Soldotna Chamber of Commerce send copies of this resolution to Mr. Jay Hammond, Governor of the State of Alaska; Mr. Clem Tillion, District 13 Senator, and President of Alaska Senate; Mr.

Re: Senate bills 451 and 452
Community Athletic Centers

Dear Arliss·

Would appreciate your personal support of the enclosed two bills which authorize and fund the construction of four community teflon-roofed athletic, recreation and performing arts facilities in each of the four judicial districts.

Enclosed is a photograph of a North Dakota facility and in addition a self-explanatory letter from John Korbis of Pocatello, Idaho, a person I have known for many years, who designed and built these all over the country. I would really like your committee to promptly act on these bills and you can be assured of my unstinted all-out cooperation.

Am wondering if you would be kind enough to schedule a hearing, if one is necessary, for I know there is extensive statewide support for these relatively inexpensive structures which Alaskans so desperately need during their cold winters and rainy summers.

Sincerely,

Edward A. Merdes

- and the -
KENAI PENINSULA HOCKEY ASSOCIATION, INC.

The Kenai Peninsula Hockey Association is a non profit corporation registered in the State of Alaska with a certificate of exemption under Section 501 (C)(3) of the Internal Revenue Code.

The corporation was formed in 1972 to develop, administer and promote ice hockey, figure skating, and other related sports, recreational activities and facilities for the Kenai Peninsula.

The Association is currently operating four outdoor ice arenas, two within the City of Kenai and two in Soldotna, providing under contract with the Kenai Peninsula Borough daily rink maintenance for youth, high school, and senior hockey, school and public skating programs.

The Association's affairs and programs are under the direction of a 14 member board of directors elected by and from its 226 members. Officers are elected each year by the board.

Youth hockey and recreational skating are growing sports here on the Central Peninsula as they are elsewhere in the State. Currently a total of 190 boys and girls between the ages of four and 14 are registered in the Association's youth hockey program and increasing use of rink facilities for the general skating purposes of school children and the general public will require the construction of several more outdoor rinks next year.

To date, participation in youth hockey has reflected a 375 percent increase in the eight years since the Association was formed and an average annual growth rate of 42 percent. Such growth will continue in a uniform manner. By 1982, there will be between 275 and 300 boys and girls in the program and playing on the Association's outdoor rinks.

Though healthy and growing, ice skating programs are being severely handicapped and constrained by the inconsistancies of winter weather here on the Peninsula, suffering extended shut downs each year by mild and rainy conditions, severe cold and heavy snows on the unprotected rinks. These same conditions discourage greater participation.

It is conservatively estimated that, given the controlled conditions of an indoor arena as proposed by this Associations planned CENTRAL PENINSULA SPORTS ARENA, in excess of 500 Central Peninsula boys and girls would now be participating in youth hockey alone with several hundred more from the Homer and other Peninsula community areas.

Adequate facilities for youth, high school and senior hockey, figure skating, and the other sports and recreational uses of skatable ice are the principal objective behind the Kenai Peninsula Hockey Association's effort to attract State financing for the construction of a proper enclosed ice arena for the Kenai Peninsula. However, the Association is also concerned for the many other sports, recreational and community needs for indoor facilities and a number of these uses are designed into the plans for the CENTRAL PENINSULA SPORTS ARENA.

The current design for the CENTRAL PENINSULA SPORTS ARENA provides facilities useable for track and field training, pre-season youth baseball practice, basketball, tennis, indoor soccer, volley ball, etc. with space accomodation for adding handball courts, weight and exercise rooms, and other training facilities. The sport of curling will be introduced through the use of the existing rink ice with curling rinks added on to the structure when separate facilities are warranted.

The CENTRAL PENINSULA SPORTS ARENA will also readily accomodate many of the Peninsula's community needs for a large enclosed structure. As designed, the building will easily accomdate conventions, sport and boat, trade and other shows, community dinners, dances, concerts and other attractions for large audiences and gatherings.

The Kenai Peninsula Hockey Association is a fiscally sound and well managed organization, directed and supported by leading business and community leaders. It has wide public support and is well equipped to direct and manage the construction and operation of a sports and community complex of the magnitude of the CENTRAL PENINSULA SPORTS ARENA.

Copies of the corporation's budgets and finance reports for the past three years are attached as are the projected annual income and operating costs for the CENTRAL PENINSULA SPORTS ARENA. Cost estimates were developed as based on the experience of the Ben Boeke Arena in Anchorage and the counsel of Boeke Arena manager John Rodda. Income projections are considered realistic for the first two years of operation and will will increase in subsequent years with growing use of the facilities.

The CENTRAL PENINSULA SPORTS ARENA complex is, as its name reflects, central to the Kenai Peninsula and readily accessible for the year around use of the Peninsula's 26,000 population and the hundreds of thousands of Alaskans who travel here each year for sports and recreational purposes.

We respectfully request your consideration and support for the State funding needed to build the CENTRAL PENINSULA SPORTS ARENA.

MERDES, SCHAIBLE, STALEY
AND DeLISIO, INC.

Dear Ed:

It was truly a pleasure to hear from you recently. I believe I last communicated with you in August of 1974. I have thought of you and the Anchorage study I participated in for your group many times these past few years and it is comforting to know that old friends are well and still working in the public interest. I am sure you are aware that President Davis has departed Idaho State University and is now President of the University of New Mexico at Albequerque. I visited with him a couple of months ago and he is doing well. I think I mentioned to you that I have also left the University as a full-time employee; I work only as a planning and development consultant for them. I am also working as a planning and construction consultant for the State of Idaho, through the Department of Administration and Public Works. I have been working as an independent consultant since July 1, 1979. I have recently completed a large solar water heating project at the University and have actively participated in several large geothermal projects. Since I saw you last, I have also completed a 10 million dollar

construction management, fast track manufacturing facility project for Tupperware Industries in Hemingway, South Carolina.

In response to your request, I have been in contact with Dr. Dave Geiger and he has sent me most of the updating information I needed to adequately respond to your inquiry. I am enclosing a copy of "Fabric Structures in Cold Regions" prepared by Geiger Berger Associates in 1977 for the U.S. Army Research and Engineering Laboratory. You will note that the study was made using Valdez, Anchorage, Big Delta (Ft. Greenley) and Barrow as test models. The study confirms the conclusions we made in 1974. It also is surprising to find the "Energy Cost Comparison Model" is considerably more promising than our conclusions in 1974. The study shows a 46% energy savings over conventional buildings and will be a very valuable design tool for any future construction in Alaska and should help in saving a lot of money in HVAC systems and for projecting energy costs much more accurately.

In analysing your suggestions, I understand that four (4) facilities are needed as follows:

Juneau	-	5,000 seats
Kenai	-	5,000 seats
Fairbanks	-	10,000 seats
Anchorage	-	15,000 seats

All of the facilities would be multi-purpose, capable of accommodating:

(1) General recreation, which could include jogging and running

track, tennis, handball/racquetball, conditioning rooms, etc.;

(2) Basketball;

(3) Football;

(4) Softball; marginal baseball;

(5) Soccer; hockey;

(6) Cultural activities; and etc.

In using the term "marginal baseball" I refer to the high cost of ceiling clearance, seating configuration and adequate outfield distances. Until preliminary plans and costs are determined, I would suggest that perhaps the smaller facilities such as Juneau and Kenai would not be cost effective if designed for baseball as required by NCAA or semi-pro baseball.

I am also enclosing a brochure developed by Dr. Geiger called "Engineering Design of Sports Facilities" which shows past, present and projected costs of air-supported, cable restrained roof systems. I firmly believe that the most economical design in first cost and life cycle maintenance and operational costs for your projects is the <u>air-supported, cable restrained system</u> developed by Geiger Berger Associates. This system incorporates natural earth berms, which utilizes on-site materials and enhances visual environment, saves energy and reduces wind pressures on the structure. From the viewpoint of life safety code and seismic compatibility, it appears this structural system is most logical. Aside from the roof capsule, all other major structural and architectural materials, construction methods, equipment, tools

and manpower are locally available, which is not only cost effective but also good local economics; also, citizen participation is the primary factor in the future success of these facilities. Alternate structural systems are also possible, such as rigid steel frames, tension structures and thin shelled concrete; however, these systems are much more costly given seismic design requirements and life safety code. The principal rationale in favor of the air-supported superstructure is the life cycle costs given a 50 year maintenance and operation model.

I have computed a cost model using the Dakota Dome in Vermillion, South Dakota, using a weighted average of +40% for construction in Alaska and adding 15% for inflation rate through July, 1980, for fixing construction costs and have calculated a construction cost at the four (4) Alaska sites for July, 1980, at $47.65 per square foot. I have added a construction contingency figure of approximately 5% which results in a cost of $50.00 per square foot as a realistic estimate for construction in Alaska in mid 1980.

The above figures do not include cost of land or unusual site conditions, but do include adequate final finishes for a usuable facility at the end of construction. I believe that if the four facilities were packaged for the planning, design and roof structure, that the economics of scale would reduce these costs significantly. The resultant estimates follow:

1. Juneau	-	75,000 sq. ft. =	3,750,000.00
2. Kenai		75,000 sq. ft. =	3,750,000.00

3. Fairbanks - 140,000 sq. ft. = 7,000,000.00

4. Anchorage - 210,000 sq. ft. = 10,500,000.00

$25,000,000.00

The above costs of course do not include planning and preliminary design criteria, but do reflect an average cost per seat or per square foot of similar facilities in the lower 48. Until functional planning, community input and specific site information is available, these costs could vary as much as plus or minus 10%. I would also like to refer you to my letter of May 7, 1974, Cost Model Mini-Astrodomes, Page 2, in which our estimated cost for the similar Anchorage project was approximately $30 per square foot, not including design fees, construction manager or contingency. If that $30 per square foot figure were adjusted by 1% per month it results in a projected construction cost today of $50 per square foot for January 1, 1980.

In conclusion I would like to restate my position regarding superstructures with roof spans exceeding 250 feet. I personally feel that in seismic zones 3 and 4 that rigid frame structures are unsafe and if designed to meet these codes are too costly. The air-supported, cable restrained structure, because of it's light weight and ability to deform under extreme stress, is safe and economical. The state of the Art is now well developed and given the earth population growth of 1 million persons every five days or 73 million additional humans on the planet every

year these structures are the "wave of the future" for most of mankind's environmental needs. The rapid depletion of our finite minerals and metals will require new efforts to conserve these resources as well as the conservation of energy and capital. Studies are now underway to cover an entire new city in Canada and here in the Intermountain area we are looking at covering 20 acre regional shopping centers next year.

I have contacted Dr. Dave Geiger and we are both willing to work with you and the State of Alaska in pursuing these projects. We are of course both busy and committed to existing clients and do suggest that requests for our services have adequate lead time so we can meet your time requirements.

If I can be of further service, please let me know.

Best wishes.

Respectfully submitted,

John J. Korbis

GREATER SOLDOTNA CHAMBER OF COMMERCE

City of Opportunity

P. O. BOX 236 SOLDOTNA, ALASKA 99669

RESOLUTION 80-3

A RESOLUTION BY THE GREATER SOLDOTNA CHAMBER OF COMMERCE REQUESTING THE ALASKA STATE LEGISLATURE TO PROVIDE CONSTRUCTION FUNDING FOR THE CENTRAL PENINSULA SPORTS CENTER PROJECT OF THE KENAI PENINSULA.

WHEREAS, the Central Peninsula Sports Center is a multi-purpose facility that provides a setting for a large variety of sports functions and events, and

WHEREAS, the multi-purpose nature of the structure makes it suitable for other functions as civic events, conventions, and concerts, and

WHEREAS, the main feature of the facility is an ice rink that is easily convertible to multi-use floor space, and

WHEREAS, all ice-related events including hockey are presently held outdoors, often under severe and unpredictable weather conditions, and

WHEREAS, ice related activities have become popular and involves many individuals of all ages throughout the Kenai Peninsula, and

WHEREAS, the operation and maintenance of the completed facility will be contracturally assumed by the Kenai Peninsula Hockey Association, and

WHEREAS, the Kenai Peninsula Hockey Association, a non-profit community organization, has a solid, unsubsidized, 8 year operational record, and

WHEREAS, the organization's impressive record includes setting team schedules, furnishing coaches, furnishing all gear and equipment, schooling coaches and referees, transporting players to games and tournaments, paying everyone's insurance, and offering an annual $1,000 scholastic award.

NOW, THEREFORE BE IT RESOLVED THAT the Greater Soldotna Chamber of Commerce requests the Alaska State Legislature to provide construction funding for the Central Peninsula Sports Center since there exists a pressing need for a Kenai Peninsula multi-purpose facility, and since a responsible, non-profit community organization also exists for its operation and management.

BE IT FURTHER RESOLVED THAT the Greater Soldotna Chamber of Commerce send copies of this resolution to Mr. Jay Hammond, Governor of the State of Alaska; Mr. Clem Tillion, District 13 Senator, and President of Alaska Senate; Mr.

GREATER SOLDOTNA CHAMBER OF COMMERCE

March 4, 1980

Senator Arliss Sturgulewski, Chair
Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

At the last regular meeting the Ketchikan Parks and Recreation Board reviewed Senate Bills No. 451 and 452 and would like to urge you to support these pieces of legislation. As a board we have two concerns that we would like addressed before the bill is sent back to the Senate for passage. The concept of a local sports and recreation facility council is excellent, however, we question the need for members of the council to be appointed by the Governor and feel that this could be more appropriately done at the local level.

Our other concern is that the definition of "municipality" include home rule cities, such as Ketchikan, as well as unified municipalities.

We thank you for your consideration and look forward to the passage of these bills.

Sincerely,

Susan Dickinson

February 27, 1980

Representative Russ Meekins
Alaska State House of Representatives
Juneau,
Alaska 99801

Dear Russ:

We have prepared the following as an overview of the services we would contribute for sports facilities in Alaska. G & M Associates would provide a team consisting of Ellerbe-Alaska, Korbis Associates, Modern Construction, Inc., and Geiger Berger Associates, to provide the following services to the State of Alaska:

- Goals and Objectives Statement
- Primary design solution for four domed stadiums
- Realistic construction cost estimate
- Specifications for selection of Design-Build Team
- Models of four domed stadiums
- Time Phasing Schedule

Ellerbe-Alaska, local architects, planners and engineers are the premier firm nationally for civic, convention, and sport center facilities. Two outstanding examples of their expertise are the Notre Dame Athletic and Convocation Center and the Lexington Civic Center Arena (Rupp Arena) and Exhibit Hall. In addition, Ellerbe truly understands the design/build concept, and has lengthy local experience.

Korbis Associates is a planning and construction management firm from Pocatello, Idaho. They have worked along with Geiger Berger Associates, constructing engineers, to develop a cost efficient solution to construction of Sports Arenas. Korbis' preliminary estimate for a 210,000 Sq. Ft., 15,000 seat facility for Anchorage is $10,500,000. In addition to his tremendous cost savings forecast in construction, he points out that his solution has potential of up to 47% in energy savings to heat the building. Korbis and Geiger Berger have extensive Alaskan experience.

Modern Construction is the largest Alaskan owned construction company. They specialize in turn-key projects, construction management and design/build projects. The majority of Modern's work has been in the traditional competitive bid market. This experience along with their design/build specialty make them an invaluable part of our team both from a cost estimating and specifications writing stand point.

We feel the team approach best for this project because of the variety of subjects that must be studied, technical problems that must be solved, with critical schedules that must be met to give the State a viable project at the lowest possible, yet realistic, costs, this construction season. We could accomplish all of this by the end of March for an all inclusive fee of fifty thousand dollars ($50,000). I am enclosing herewith some supporting documents for your perusal.

Sincerely,

Joan A. Ray
President

/jcw

DURING LEGISLATURE
POUCH V
STATE CAPITOL
JUNEAU, AK 99811
PHONE (907) 465-4943

Dear Coach:

How many years have you watched youth train for track and field in the hallways of our schools? How many times have you held your breath in anticipation of one of your students getting hurt trying to excel during a track and field event held under such dangerous conditions?

What about football? Isn't it a shame that you and your students put so much effort and time into this great sport and have such a short season? You know as well as I do the advantages of having an indoor football field.

THE TIME IS NOW! Last session I had $25,000 appropriated to do a feasibility study a Mulcahey Park. The findings are most encouraging. For instance, I was informed that the engineers drilled five holes to a depth of 65 feet each and found the ground very stable in that area.

During the interim, as many of you know, I spent many hours developing community support for the indoor sports activity center. I passed out pictures of what other communities, mostly smaller in population than Anchorage, have for sports programs. Such buildings as athletic centers in Flagstaff, Arizona, Montana State, and Moscow, Idaho's Kibby Center are naturals for what we need in Anchorage.

When I left Anchorage to start the session in January, I was sure most of the city's leaders were of the opinion that an indoor track and field and football field was a priority. But, opinions seem to have suddenly changed.

In the past five weeks I have talked to a number of Senators and Representatives and given them a packet similar to the enclosed. There has been a close effort working with them for mutual concerns about sports facilities throughout the state. Fairbanks is working hard for an indoor football field; Kenai wants a large indoor hockey arena; Palmer wants a larger indoor sports facility. There is no doubt that a bill will soon be sponsored for about $60 million for sports facilities. Of this amount, $22 million is appropriated for Anchorage under my insistance to informal groups that our needs, flexibilities, and populations are a top priority.

This may all sound fine, but we do have a major problem. That is, whose priorities should be met first? As you well know, the City Mayor and Assembly have an ad hoc committee pushing for recreational facilities they want to build, known as the Tony Knowles plan. There are major efforts now taking place to get the legislators to use state taxes for a spectator sport center first rather than the above indoor sports activity center described.

I feel our school athletic programs and the community participatory programs should take precedence over the city-sponsored, pro-team programs.

Now what? I need your help. There is no doubt that monies will be appropriated for an Anchorage sports facility this year. Would you be concerned enough to send a Public Opinion Message, (see procedure below), to each of the Anchorage legislators, (also listed below), asking them to appropriate state funds for an indoor football, track and field, and rifle range before using the state taxes for a spectator sports arena.

If you don't act now it could be years before action is taken. Please pass the word to your students and their parents to express their views to their legislator as well as the City Mayor's Office and the City Assembly.

With your help and support I feel that by the fall of 1982, we should see the first indoor football game in Anchorage. And how about the future of our students in track and field? Haven't you been amazed by the degree they excel under such adverse conditions?

Well coach, it's up to you now. I really need your help in starting a ground swell that will see our dream come true. Can I count on you?!

Yours Very Truely,

Terry Martin

HOW TO SEND A PUBLIC OPINION MESSAGE TO YOUR LEGISLATOR

You can send a Public Opinion Message to your legislator to let them know how you feel about a particular issue. The service is provided free of charge in order to encourage public participation in the legislative process. Your legislators need your feedback!

To send a P.O.M., call the Legislative Affairs Office, 2783668, or go down to their office at 1024 W. 6th Ave. in downtown Anchorage (6th and K St.). Your message will arrive in Juneau the same day you send it.

This service was established to make your legislators accountable to the taxpayers, so why not take advantage of it and let your voice be heard!

JAY S. HAMMOND, GOVERNOR
274-4676

DEPARTMENT OF NATURAL RESOURCES
DIVISION OF PARKS

619 Warehouse Dr., Suite 210
Anchorage, Alaska 99501

March 21, 1980

The Honorable Arliss Sturgulewski, Chairman
Senate Committee on Community and Regional Affairs
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

During the Legislative Session, the Commissioner's Office forwards to the Division of Parks legislation which may have an impact upon public recreation. I have recently been forwarded a copy of Senate Bill 452, the Sport and Recreational Facility Grant Fund, which is currently in your Committee. After reviewing this proposed legislation I would like to offer the following comments and suggestions.

As currently drafted, SB 452 proposes to establish a $42,000,000 recreational grant fund for local communities. These monies would be passed through the Department of Community and Regional Affairs to local "recreation and sport facility councils" located throughout the State. These local sport and recreation councils would receive and expend the funds as well as continue to maintain recreational facilities once constructed. While wholly supportive of State assistance to communities for outdoor recreation projects and sport facilities, I believe that the current structures proposed in the bill would be duplicative of existing state efforts and could result in confusion for communities regarding outdoor recreation projects.

The Division of Parks currently administers some two and a half to three million dollars annually of Federal monies from the Land and Water Conservation Fund to communities throughout Alaska and to State Park System for the construction of outdoor recreation projects. In addition to these Federal monies, the Division also administers millions of dollars worth of State grant monies for both construction projects within the State Park System and for a broad variety of recreation projects in communities throughout the State. One of the most positive points about SB 452 is that it recognizes the need for the State to assist communities in the construction of such facilities. Federal Land and Water Conservation Fund dollars fund recreation projects on a 50% matching basis. It is necessary for communities who apply for these funds to contribute a 50% match. This is often difficult, especially for small communities in rural Alaska. While the grants staff within the Division of Parks is generally able to assist communities in calculating an "in-kind" match by using of volunteer service and equipment donations, there is often still difficulty in coming up with the full dollar amount required to match Federal assistance. Moreover, the State of Alaska has been able to "land match" recreation projects over the past years. Under this program land which

came to the State via the Statehood Act can be used as a value match for Federal dollars for the purpose of outdoor recreation projects. This means that boroughs and cities which have received further entitlements from the State may use these lands to assist them in matching for recreation dollars. However, the State of Alaska is living on borrowed time under the Land Match Program. Currently, Alaska is the only State in the Union authorized to use land match for the Land and Water Conservation Fund. This policy originated more than ten years ago when Alaska's financial picture did not show a billion dollar surplus. I have been told to expect a "review" of the land match policy by the federal government.

In the past the State has recognized the need to assist local communities in constructing recreation facilities. There has been established in the Statutes a fund known rather tortuously the Outdoor Recreation Open Space and Historic Properties Development Fund (OROS & HPDF). This fund has been available to the State to use in assisting communities to meet half of their required half for Federal dollars to construct recreation projects. Unfortunately, this fund has run dry. As part of our Capital Project suggestions to legislators this year, the Division of Parks suggested appropriating monies for this fund. While our suggestion as to dollar amount has been much lower than the $42 million proposed by SB 452, the concept is quite similar. In addition the Division of Parks has suggested deleting the Federal match requirement in OROS & HPDF so that monies could be passed directly to communities regardless of whether they had applied for federal Land and Water Conservation dollars within a given year.

The grants staff within the Division of Parks has had extensive experience over the past ten years in administering recreation dollars to local communities. Alaska's track record for operating these programs has been excellent. In fact, Alaska is one of the few States within the Union to come through Federal Audits for a period of years without exceptions. Moreover, this State ranks high among the States in its record of obligating and expending pass through monies to communities in a timely fashion and in assisting them in their fiscal management of the programs. Based upon this track record I offer the following suggestions for the Legislation.

There already exists within the State structure a series of Park and Recreation Commissions (PARC). The sport and recreation facility commissions in SB 452 would appear to overlap with the functions of the local PARC's. Moreover, our experience with granting money to non-profit organizations located within municipal governments has been good. We would suggest that the monies be granted to the local government entities and that local park and recreation commissions be used to suggest projects to the local governments. It might be required that the local park and recreation commissions support and endorse those projects for which local governments apply. The program could also be administered by the Division of Parks. The purpose for this is by no means "empire building". All of the monies would be passed through to local governments. And to be quite honest, I have no desire for additional responsibil-

ities in administering grant monies. The reason that I suggest this concept is to avoid creating a new bureaucracy to administer a new recreation fund where inevitable overlaps in responsibilites would occur. It is almost certain that many communities receiving funds from the new sport and recreation facility grant would then try to use those monies to match federal monies which the Division of Parks administers. This makes absolutely good sense. Unfortunately, as we have experienced with grants administered from other agencies, the guidelines and regulations are often different. This is difficult for larger cities to cope with, and creates a veritable nightmare for any communities smaller than Anchorage. Moreover, having witnessed the fate of the OROS & HPD Fund we are concerned that this large appropriation might simply be a one time shot and be whittled away over the next few years never to be funded again. By allowing such a program to be tied to an ongoing federal program such as the Land and Water Conservation Fund, or at least providing for the ability of the Fund to easily dovetail may help sustain the dollars over time.

If there is no desire to place the fund within the Division of Parks or to transfer the money to the OROS & HPD Fund, then I would suggest at least that the word "indoor" be inserted in the purpose for the fund. At least this would avoid the overlap with outdoor recreation projects administered throughout the State by the Division of Parks.

In summary, I wholly support the concept of HB 452. If the intent of HB 452 is to simply fund several major sport facilities projects in major cities, such as the proposed "Project 80's" for the City of Anchorage, the fund may well work without a hitch. However if there is a desire to see a continuing fund which enables communities of all sizes throughout the State to construct and manage recreation facilities, then I believe the suggestions which I have forwarded to you in this letter have merit.

Thank you for your consideration of these observations. Please do not hesitate to call upon me or my grants staff should you have any further questions or wish to follow up on some of the comments which I have made.

Sincerely,

Chip Dennerlein
Director

(513 451-52)

Bottom Line -- Grants for construction of sports and recreational facilities

Questions to Consider:

1. Direct grants vs Statewide program

Statewide Program

1. Program time frame - several year? forever? or one-time only..... expenses
2. Grant components/include: planning? construction? Administrative for agencies involved initially?? maintenance? operating?
3. " - state share involvement? What %? Area/Municip %? Breakdown needed?
4. Grant distribution- money:
   First come - first serve?
   $ to region
   $ to boroughs
   $ to cities
   $ to corporations
   Set equal fair amounts? or Give varying amounts by population - %? area size - %? area income - %?
   total facilities in each area? = 1 or more????

WHAT IS THE TOTAL APPROPRIATION NEEDED TO BEGIN PROGRAM????
Consider maximum building size/ estimated costs/ and multiply by how many times? (per direction from above?)
Try to study area population and determine building size by seating capability?
What can be maximum area/ munic. Request?
SHOULD LEGISLATURE DETERMINE AREA NEED - OR LET AREA DO THIS THEMSELVES?

Eligibility? - Is any criteria desired for areas to apply?
A) Proof of public desire for facility needed? - especially if area has to match any money..
B) Proof of land ownership- on which the facility would be constructed?
C) Building Plans with cost outline - showing all projected costs?
D) Proff of area need and that the area could support their end???

WHO SHOULD DO THE CONTRACTING FOR CONSTRUCTION?

Accountability = Area: (If City or Borough, if Region? if Corporation?).
State What State agency? 3rd Party???

State Agency guidelines needed?
1. Have agency determine selection of who gets what? (Could use information from above)
2. Require screening of any eligibility requirements on applications?
3. Arbitrate - when 2 or more municipalities within same area are eligible - if $ limination is factor....?

What would be program effective date?

Ongoing expenses for ongoing program - who does what

ongoing expenses for any portions - i.e., operating and maintenance? Who does what....

COUNCIL NEEDED TO OVERSEE MAINTENANCE AND OPERATING EXPENSES? OR ANY OTHER EXPENSES? Or, is this provided in existing government structures?

Council - Any guidelines needed? What would they do, when would they and how.....
- Who would make up the Council (any eligibility requirements needed?)
- How would the Council be picked?
- Area Council Jurisdiction would encompass?
1 - what would be the cost vs other alternatives?
2 - [illegible] political problems?
3- are we duplicating services?
4- would public want to pay for a program if they could have no say vs through elected munipal officials....

WHAT ARE THE EFFECTS AND WHAT ARE THE CAUSES THIS LEGISLATION WOULD RESULT IN?

ABOVE ARE JUST SOME THOUGHTS - Twyla

SB 451/52 (Grants for Sports & Rec. Fac.) please hold until budget appropriations are set as Anchorage has a direct appropriation for regional sports complex proposed - seating 8-10,000, had no $ figure on request... If this goes through, Anchorage won't need these two bills.

no local control

He has concern about the Council overseeing projects/- whereas through budget - Anch. will oversee its own...

But, if request is not granted, then Anch. would push for this bill.....

One Regional Sport complex this year - Mulcahy Park

There are 9 proposed neighborhood complexes (Fairview was approved last year) include: Spenard, Eagle River Chugiak = the two requests in this year.

(Fairview is being designed now with construction to start in the spring)

Spenard to strat construction in the Spring '81

Above was all Mitch had or felt necessary to relay on Anchorage Capital improvement Plan - background and implementation.....

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

SB 452 appropriates $42,000,000 to the Sports and Recreation Facilities Grant Fund. The following cost breakdown assumes funding a the level specified in SB 452.

The Division of Community Planning would administer the planning phases of the sports and recreation facilities grant program. The Division of Local Government Assistance would manage construction and operation phases. Salaries were calculated at the FY 80 General Government Unit salary schedule. Inflation was assumed to be 8% per year. First-year costs are as follows:

STATE LEGISLATURE

MEMORANDUM

Memo to: Senator Sturgulewski
Chairman, Community and Regional Affairs Committee

From: Ruth Allington
Assistant
Senator Fahrenkamp

Date: March 5, 1980

Re: SB 451, SB 452 relating to sports facilities

Intent - The basic reason for these bills is to allow development of area-wide sports and recreation capabilities. There is a demonstrated need for covered facilities large enough for football games, and able to be adapted to tennis, track, basketball, soccer, and assorted other participant and spectator sports.

Other statutes of a similar nature are on the books. The drawback to the main one, 43.18.400, is that it would provide only up to 50% of the total funding of the facility. Also, it leaves management and administration up to the municipality. Under SB 451 an advisory council is formed. It is anticipated that this mechanism will enable the area-wide concept to be realized, without the problems inherent with a municipality doing the administration, i.e. a borough putting its own preferences above those of a city within the borough, or groups not associated with the municipality.

Although the original concept involved appropriations to individual municipalities, the bill became one of the proverbial Christmas Trees. In order to forstall further add-ons, the concept of using judicial districts was adopted. Two or three facilities within one district are still possible, if the municipalities get together and pool the funds.

It is anticipated that the following amounts will cover the cost of an air-dome of the size necessary in the listed municipalities.

Fairbanks	$12,000,000.
Anchorage	18,000,000.
Southeast	6,000,000.
Northwestern	6,000,000.

(All facilities except Anchorage and Fairbanks would use approximately the same size basis)

As stated in SB 451, the facility council would be responsible for managerial aspects of the facility, including hiring the manager. It is envisioned that the director would be "on-board" at least six months before completion of the project. The councils would prepare the budget for the coming year, for presentation to the legislature as backup for the 50% operating and maintenance cost grants from the state for the first five years. (Note: the wording limiting the state share of operating and maintenance costs to five years was left out of the bill. It will need to be added. It is anticipated that the state will not be involved after the five year initial period.)

Senator Bettye Fahrenkamp
Pouch V
Juneau, Alaska 99811

Dear Senator Fahrenkamp:

A major priority of the Fairbanks North Star Borough is the economic revitalization of downtown Fairbanks. An important element of any revitalization plan will be beautification of the downtown area, including the Chena River, a long-overlooked community asset.

Last summer, the Fairbanks Downtown Association began work on creation of a park and beautification of the river banks in the area around the Cushman Street bridge. Working with the association, the borough has developed plans for the second phase of this project. Passage of Senate Bill 453, which would appropriate $250,000 to the borough for this work, will enable implementation of the second phase this summer.

Cleanup of the river banks will be required, as many unsightly boulders, concrete slabs and other debris must be removed. Some bolstering of the banks is necessary, and city storm drains opening into the river must be repaired or replaced. Following this work, the banks will be landscaped, trees will be planted and benches will be installed.

Funding provided by SB 453 also will allow work to begin on the third phase of this project, which is development of major park facilities. These include a bike path along the river with rest areas equipped with benches and picnic tables; development of a small amphitheater near the river's edge for public performances by local artists and musicians; construction ofpedestrian bridges across the river to promote foot traffic and accomodate bike travel across the river; and development of a small municipal marina for small boat traffic on the Chena.

Communities across the country have gained tremendous benefits by developing and utilizing existing assets. Your introduction and support of SB 453 is deeply appreciated and will facilitate the beautification of the Chena River so that it will become a major community drawing card.

Projects of this nature require extensive cooperation and coordination, and we will continue to work with the Fairbanks Downtown Association through all phases of this park development. If I can be of further assistance to you on this matter, please contact me at your convenience.

Sincerely,

John A. Carlson
Borough Mayor

fairbanks downtown association

March 6, 1980

Senator Bettye Fahrenkamp
Pouch V
Juneau, Alaska 99811

Dear Senator Fahrenkamp:

The Fairbanks Downtown Association is embarking upon a revitalization program for downtown Fairbanks. One of the most unique untapped resources we have, is a river running through our city. Last summer this association began work on the banks of the river, drains were bolstered, landscaping started, and a small park was built by the bridge. All of which was well received by the community.

We would like to see phase two of this project begin this summer. With the passage of Senate Bill 453, which would appropriate $250,000 directly to the borough for implementation this summer, this would be possible.

Beautification of the Chena River will help give downtown Fairbanks a more enjoyable environment and greatly improve its visual tones. This will enhance the opportunity for the city to develope to the full extent of its potential, both culturally and economically.

The Fairbanks Downtown Association lends its full support to the passage of S.B.453. We look forward to working with the Borough through all phases of this park development.

Sincerely,

Karen L. Menefee

Arliss:

History to go with SB 453 - concern of dollars delay to municipality

Following the last session, Dept. C/RA became aware money was appropriated to the City of Fairbanks, which was to go through their Dept. - apparently as a result of FCC SB 53 (Budget) passage. They did not know who the players were, who the money should go to, etc., and when Fairbanks was contacted the first time - June 8 - Fairbanks did not even know..

Fairbanks started on the idea of having a public hearing - they had some extra dollars given from the Legislature - then the Downtown Businessmen Group stepped in, said hey, this is our money...

Dept. C/RA now knew the players. July 17 they wrote Mayor Wood requesting program outline, scope of services, etc., and sent a cc to Sen. Fahrenkamp and Ms. Karen Minefee, of the Downtown Business Group. No acknowledgement was received from the latter two; however, the city did return the questionnaire July 30.

August 3, Dept. C/RA sent out the contract; contract was returned and warrant was sent August 28.

Basically this was the event outline per the Dept. C/RA, Mr. Palmer McCarter's folder. There were some phone calls, some general memos, etc., that I have bypassed; but it appears in all instances the Dept. tried promptly to give this money away and letters were sent with a two day time period after correspondence was received by their agency from the City of Fairbanks.

Incidentally, the City of Fairbanks did go past their deadline date of Oct. 31, 1979, and has been granted an extension to June 1, 1980.

Also, the city had requested backpayment initially in the warrant to go back to July 1. Robin in Sen. Fahrenkamp s office had originally said work had begun in May.

PROCEDURE followed by Dept. C/RA - when money - direct grants - are to go to a municipality, they request a breakdown of the project plans and figures from the municipality, and then they send a contract, which is based on the guideline sent to all departments last year from Budget and Management, "Contract of Services." Once contract has been signed by all parties, the warrant is sent to municipality.

In event money goes to unorganized areas, nonprofits, etc., a more extensive contract is required.

Usually the above procedure should not take very long - if bills could be passed wherein the department would know immediately who to contact and what the program is about.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

It is estimated that the statewide ratio of personal property to real property, 14%, would be a reliable estimate for that of Senior Citizens. Therefore, a valuation of $1,761,539 (1979 value) at 14% results in a impact of $246,600. It is also estimated that this amount will increase at 8% per year.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

SB 465 exempts up to $85,000 in value from residential property in regards to property tax. Revenue lost in the municipality by implementation of this bill shall be reimbursed by the State. This will necessitate an audit procedure of applications for each municipality. The total number of applications to be audited is estimated to be 160,000 in 1981 and an expected growth rate of new applications at 5% each year following.

Computerization of this program will help deter some personal services expenditures, however, it will be necessary to employ 5 clerical positions for the auditing procedures. Computer costs are estimated at $25,000 per year.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The Department anticipates that one full time position will be needed for administration and coordination of the appropriation within this bill. It is assumed the grant will serve 4 of the 21 areas in the unorganized borough. The position will have to travel to each of the 4 areas on three occasions. It is assumed that grant funds will continue to be appropriated.

April 23, 1980

Senator Arliss Sturgulewski
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

Thank you for your information on SB 510 and SB 64. The Pelican City Council has discussed both bills and feels that they should oppose both SB 510 and SB 64.

The data figures presented to you showing merchandise inventory for Pelican were understated. In 1979 the merchandise inventory figure for Pelican was $894,889. At a mill rate of 7.5 mills that revenue was $6,711.67, 19% of our total property taxes. In 1980 the approximate merchandise inventory will be $1,043,800. At the same mill rate of 7.5 mills the revenue would be $7,832.87, or 18% of ou total property taxes.

We strongly feel that SB 64 would seriously damage our tax base. Property owners would have to bear the extra burden, therefore unfairly. raising their taxes.

The SB 510 proposed state reimbursement, that also, does not meet with council approval. The merchandise inventory tax is passed on the the consumer. In that way, the transient people , that utilize our facilities, are in some way, paying a share of there support. We feel this is a fair way of collecting for this tax.

We hope you seriously consider the consequences of these two bills. Thank you for the opportunity to express our opinion of these bills.

Sincerely,

Jake Peart

SENATE BILL 510

Attached is a copy of SB 510 showing changes desired to be incorporated into a Committee Substitute. This bill is scheduled for public hearing April 1, at 1:30 p.m.

The intent of this Committee is as follows:

The Department of Revenue is to be deleted. The program is to be similar to that of the senior citizen exemption program with municipalities. The Department of Community and Regional Affairs will receive appropriated monies from the Legislature to dispurse to the municipalities accordingly.

In order for a municipality to qualify, they must request businessmen in their area to submit inventory listings to them, and based on those filed inventories, reimbursement will be made from the state.

Attachment.

STATE OF ALASKA
THE LEGISLATURE

LEGISLATIVE AFFAIRS AGENCY

POUCH V STATE CAPITOL
JUNEAU ALASKA 99811
907-465 3800

MEMORANDUM April 3, 1980

SUBJECT: CSSB 510, relating to the business inventory tax exemption

TO: Senator Arliss Sturgulewski, Chairman
Senate Community and Regional Affairs Committee

FROM: John B. Chenoweth
Legislative Counsel

The committee's decision to make the business inventory tax exemption one which is "conditional" on annual full funding of reimbursement by the legislature strongly suggests that inclusion of reference to the business inventory tax may not properly be included in the list of mandatory tax exemptions under AS 29.-53.020(a). The committee substitute presents the material as a new codified section, AS 29.53.023.

*

The "conditional" provisions are to be found in sub-sections (d) and (e). Briefly, the approach taken requires the commissioner of the administering department to certify, within a relatively short time after the governor has had opportunity to review and take action on the amount appropriated for reimbursements to municipalities payable under this program, whether there will be enough money to reimburse local governments 100 percent of every dollar due. If not, the commissioner must compute and report the pro ration fraction. Thereafter, municipalities may secure, from businesses reporting inventory, the difference in revenue based on application of the municipal millage rate to the portion of the business inventory value for which reimbursement is not forthcoming. By way of example:

As part of the budget process, in FY 00, the department estimates and presents a budget request based on

Full reimbursement to all municipalities	$12,000,000
Reimbursement to specific municipalities:	
Anchorage	
Estimated business inventory value:	$700,000,000
Anticipated millage rate:	10 mills
Estimated return from inventory tax:	$ 7,000,000
Kodiak Island Borough	
Estimated business inventory value:	$ 50,000,000
Anticipated millage rate:	4 mills
Estimated return from inventory tax:	$ 200,000

The legislature appropriates the full $12,000,000 before leaving Juneau on May 20th. The governor has 20 days (Sundays excepted) to act on the bill. He does so, reducing the appropriation to $9,000,000. Immediately, the commissioner must certify that the amount available to fund an estimated $12,000,000 in reimbursement requests is $9,000,000 and that reimbursement to municipalities will amount to 9/12ths or 75 percent.

By the second half of June, then, the Municipality of Anchorage, with an estimated business inventory value of $700,000,000 and an expected millage rate of 10.0 mills determines

(1) that it will receive 75.0 percent of its anticipated business inventory receipts ($7,000,000) from the state: $5,250,000 from the department; and

(2) that it can recover the balance, $1,750,000 by a levy of 10 mills on 25 percent of the value of all business inventory:

$700,000,000 x 25% = $175,000,000
multiplied by millage rate of
10 mills (or 1 percent) = $1,750,000

The same approach may be taken by the Kodiak Island Borough:

(1) 75 percent of anticipated receipts, or $150,000, from state reimbursement;

(2) 25 percent of anticipated revenue by levy against 25 percent of the value of business inventory in the municipality:

$50,000,000 x 25% = $12,500,000
multiplied by millage rate of 4 mills = $50,000

Amounts payable by the state would be transmitted in the first part of FY 01.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

General Comments:

The figures following are based upon information received by this office in 1979 from municipalities involved. The updated figures were obtained by taking into account, the inflationary rate, the general decrease of mill rates, and the expected growth of businesses around the state.

Factual Data:

The estimated data used was as follows:

inflationary rate	=	+12%
decrease of millrates	=	-22%
business growth	=	+5%
increase in assessed value	=	+12%
1980 overall increase factor	=	+7%

Unalaska	3,818	4,085
Wrangell	38,156	40,827
	$ 8,576,677	$ 9,177,046

* It is questionable as to whether or not Fairbanks and Kenai, who currently exempt business inventory, would repeal the exemption and begin taxing inventories to take advantage of this program. If these two municipalities did begin taxing inventories, the fiscal note would change as follows:

Fairbanks estimated inventory value 1979	=	$ 101,016,740
Kenai estimated inventory value 1979	=	71,684,601
Estimated total revenue including 7% increase	=	3,152,165
Total revenue of other municipalities	=	$ 9,177,046
Estimated total revenue lost	=	$ 12,329,211

Other Expenditures

According to the Department of Revenue, there were 33,000 business licenses issued statewide in 1979. They expect a 5% increase for 1980. We have assumed 80% of these businesses are located within organized municipalities. It is assumed therefore, the Department will have to process almost 28,000 applications for reimbursement under SB 510. The Department will require two new positions with expenditures as follows:

2 clerk/typist III - Range 8A 1277	=	$30,648
Benefits @ 28%	=	8,581
Equipment	=	4,000
Supplies	=	1,000
Office space 800 sq.ft. @ $1.50 psf	=	14,400
		$58,629
Reimbursement Total	=	$12,329,211
Total Program Cost	=	$12,387,840

March 13, 1980

The Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Ms. Sturgulewski:

Your staff has contacted me regarding proposed Senate Bill No. 510. The bill would exempt the inventory of a business from municipal property tax and provides that the State would reimburse a Borough or City an amount equal to the revenue lost. The bill goes on to say that the State will determine the amount of reimbursement to a City or Borough based on inventory reported to the Department of Revenue on the income tax returns filed with this department. There are several reasons why this concept is not viable.

First of all, I am sure the authors of the bill are assuming that the Department of Revenue is already data capturing this information when an income tax return is filed. We do not data capture the information and it would be prohibitively expensive to do so.

Secondly, even if the Legislature decided that they wanted to pay the cost of the data capture, the information on the tax return is not in the proper format in that all inventories, wherever situated in the State of Alaska, are lumped together so that it would be impossible to identify the actual physical location for purposes of making the payment to a Borough or City.

Very truly yours,

Dear Senator Sturgulewski:

Thank you very much for your letter. Based on the information that I see in your letter, I would support Senate Bill 510 before supporting Senate Bill 64.

I feel that it is very important that the Municipalities still obtain funding from the State to offset there loss of revenue based on a decrease in business taxes.

To me it seems important that we find good programs and projects to spend the excess revenues that are coming in. It seems that this would be a good time to spend some money on moving the capital. It wouldn't be so hard to make Public Hearings if you were closer.

Sincerely,

F.T. Dugan, Jr.

March 24, 1980

You have evidenced interest in Senate Bill number 510, An Act exempting business inventory from municipal property tax levy, and providing for reimbursement to municipalities of tax revenues lost by operation of the exemption; and providing for an effective date. The Senate Community and Regional Affairs Committee has scheduled a public hearing on this bill April 1, 1:30 p.m. in the Butrovich Room of the State Capitol Building. Because of the widespread interest in this bill by many members of the business community and by affected local governments, we tried to set up a teleconference meeting. Due to the heavy teleconference schedule, we find that any available date would put us past a reasonable time for consideration of this bill. Since we are moving well into the session, it's important that SB 510 go to the next committee of referral, Senate Finance.

We are enclosing some background information dealing with SB 510. One of the major problems that must be addressed is how to "hold harmless" the local municipalities in the event business inventories are exempted from taxation. The Department of Revenue feels a different approach than is outlined may need to be utlized to assure this recovery. As you can see from the attached information, the revenue loss could be very substantial to some seventeen municipalities throughout the state. Your comments and suggestions on this part of the bill will be greatly appreciated.

For your information, Senate Bill 64, An Act exempting business inventories from municipal property taxes; and providing for an effective date, sponsored by Senators Bradley, Dankworth, Bennett and Fahrenkamp was passed out of the Senate Commerce last week and is now in Senate Finance. Senate Bill 64 does not provide for municipal reimbursement.

We will look forward to receiving information from you regarding this important piece of legislation.

Sincerely,

Arliss Sturgulewski
Senator, District 10-H

Dear Senator Sturgulewski:

I has come to my attention that Senate Bill 510 is now in the Senate Community and Regional Affairs Committee.

I wish to encourage you to bring this bill before the committee for consideration as soon as possible.

Due to high interest rates and our present economic hardships we must have some type of aid, or we will be closing our doors and moving from the State of Alaska.

I feel Senate Bill 510 is the type of aid needed to keep small businesses open in Alaska.

March 18, 1980

Senator Arliss Sturgulewski
Alaska State Senate
Committee on Resources
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

I wanted to write to to relate my support of Senator Summer's Senate Bill 510 which will exempt business inventories from Municipality taxes.

I could never understand why a business should be penalized for making goods available to Anchorage residents. Inventories are only another form of cash, (goods waiting to be turned into cash) so why shouldn't saving and checking account be subjected to the same tax. We all know the reason why, the banks would be cleaned out the last week of each December.

Senator this tax is directly passed on to every Alaska purchaser and is the unfairest tax in the land. I'm counting on Committee to report favorably on this bill and recommend a "do Pass" to the rest of the Senate.

Yours very truly,

CRAIG TAYLOR EQUIPMENT COMPANY

Dear Mr Sumner,

Although I appreciate notification of your SB 510 proposal, MDA is a not-for-profit health agency and therefore not affected.

However, as a private citizen, and 22 year resident of Alaska, Homesteader & mother of six, may I make some comments:

1. This bill appears to, in effect, shuffle tax money around from one pocket to another.

2. When will you politicians realize that a healthy economy can best be achieved by simply relaping the grip of <u>over-taxation</u> which is drowning the private sector, and feeding the bureaucracy into obesity.

3. Offer a bill to <u>suspend taxes on business profits</u> so that expansion will be encouraged and employment increased. Historically, this approach has been productive and had positive results in poor times. The benefits are seen in the private sector, and rightly so, if this country is to maintain some semblance of free enterprise. The fact that government may suffer a reduction of funds to feed egos could be termed as "just what the doctor ordered."

4. Read the mail, letters to editor, listen to the people who succeed (in spite of tax burdens) as small business — the businessmen & women. There's a better way than [illegible]

March 17, 1980

Senator Arliss Sturgulewski
Senate Community and Regional Affairs Committee
Pouch V
State Capital
Juneau, Alaska 99811

Dear Ms. Sturgulewski:

As a small independently owned business man, one of my major problems is how to serve our Alaska customers as well as our competition in Seattle does. The only advantage we have over the Seattle distributors is the stock we carry. However, in order to compete with the "outside" companies, we must price our items as low as they do. This means we must absorb the higher wages, the higher rent, and just generally the higher cost of doing business in Alaska. The Seattle distributor has none of these costs, nor does he create any employment in Alaska, nor pay any taxes.

One of our highest costs is the tremendous taxation that the Muncipality places on our business inventory. If we keep the inventory down, we cannot serve our customers in Alaska and cannot compete with Seattle. If we increase our inventory, we cannot afford to pay the taxes imposed upon us by the muncipality and still compete with Seattle businesses.

Would you please bring up Senate Bill 510 before your committee for consideration.

Thank you,

Ray Debenham

Dear Senator Sturgulewski,

We are writing in regard to Senate Bill 510, an act recently introduced by Senator Bill Sumner, which would exempt business inventory from municipal property tax levy.

We wish to urge you to bring this bill up soon before the Committee for consideration.

Attached is a copy of our letter to Senator Sumner stating our viewpoints, which we trust you will read and consider.

Small business is facing economic hardship at this time and we voice our appeal for tax relief.

Sincerely,
BAILEY'S RENT-ALL, INC.

Dear Senator Sumner,

Thank you for your letter concerning Senate Bill 510, an act exempting business inventory from municipal property tax levy.

We support you wholeheartedly! Our particular business which must support an extremely large inventory of equipment is hard pressed to meet the insurance and TAX expenses placed upon it! We are a service related business....offering our equipment for others to rent. A tax upon this type of inventory seems unfair, almost a penalty for buying and maintaining equipment for others to use.

In our present economic situation it is difficult for any business to aquire a desired inventory. Taxation even stifles business incentive to purchase and maintain stock. We welcome relief from a business personal property tax.

Thank you for your efforts.

Sincerely,
BAILEY'S RENT-ALL, INC.

Juneau, Alaska 99811

Dear Senator:

Thank you for your letter of March 12. I have reviewed Senate Bill 510 and have two comments. First, I must say that relief from taxation for individuals and small businesses, in particular, seems to me to be an appropriate step to encourage growth and add impetus to the profit motive.

The particular bill which you have introduced, however, could have a negative side effect. Specifically, it seems to me possible that communities which do not presently levy tax on business inventories might be encouraged to do so by this legislation. Accordingly, to foreclose such a result, it appears to me that the reimbursement should be limited to municipalities which had property tax levies in effect on the date of the introduction of the bill (March 5, 1980).

My second comment is that by retaining the data collection and reporting mechanism (to verify the amount of tax loss to be reimbursed under the bill), the bill tends to perpetuate the municipality's bureaucracy. While the municipality will no longer have a requirement for a collection force, its record maintenance and data collection requirements are not significantly reduced. I wonder if a clause might be provided whereby the values are fixed based on the 1979 assessments, to be adjusted by an index varying with population and/or business licenses issued, or some other relatively simple but automatic adjustment factor. I would think that Commissioner Williams may have other equally appropriate indexing ideas. The beneficial effect, then, would be to alleviate, virtually entirely, the need for maintenance of municipal bureaucracies dealing with inventory taxes, altogether. Such an approach should also reduce the burden on the State in controlling and verifying the values reported.

I hope the foregoing suggestions have been helpful and that the Legislature sees fit to adopt the proposal.

Best personal regards,

Arthur R. Hauver

Dear Senator Sturgulewski,

As a manager of a medium sized business firm in Anchorage that employs 44 people, I have many concerns about the financial health of our company as well as other business enterprises in our state.

Many firms have gone bankrupt recently and many more are experiencing serious financial difficulty because increasing operational costs, inflation, and legislation that suffocates free enterprise.

Everyonce in awhile a bill pops up that is like a "breath of fresh air" and Senate Bill No. 510 is one of those.

Senate Bill No. 510 is by no means a cure-all for our troubled business climate but it is a very positive step in the right direction.

I urge you, Senator, to bring Senate Bill No. 510 before the committee for consideration as soon as possible. I also urge you to support this bill with you best efforts.

Sincerely,

Dear Senator Sturjulewski:

I am writing to encourage the movement and passage of Senate Bill Number 510. My business is not affected directly by inventory since we maintain no merchandise inventory, however, my interest is stimulated by my concern for the poor economic condition among small business people in Alaska while at the same time our State Government has never before had so much cash at hand. Business inventory tax upon Alaskan small business' can only be described as a discriminatory measure which favor suppliers in the Northwest and serves to keep Alaskan inventories at a minimal level much to the disservice of the consumer public.

I also feel that the legislature should make every effort to eliminate nuisance types tax wherever possible.

Sincerely,

Re: SB 510

Dear Arliss,

Attaching copies of letter and SB 510 received from Senator Bill Sumner, this date.

I have reviewed same, this appears to be a potential relief for many business's paying inventory tax, our firm would not be effected, however there is need to give relief wherever possible to all businessmen.

I am not convienced that waiving State Income Tax is proper, and definitely not in favor of handing out sums of monies to Alaskans just because the funds are there and we are fortunate enough to be here.

Would appreciate you efforts on a long term mortgage financing bill, similiar to the short term $105 Million recently released. I do want to see criteria attached to it such as the FNMA guidelines in the previous financing.

Most of us have a great many problems with SB 1, understand Senator Hohman has introduced something else, would it be possible for you to send me a copy of it?

I am sure there are a great many requests for "excess funds" and appreciate your keeping a "conservative eye" on them as much as possible.

I have recently been appointed by Governor Jay Hammond to the Real Estate Commission. Can't express how very please I was to accept.

Want to take this opportunity to thank you for your continued efforts on the behalf of all Alaskan citizens.

Sincerely,

Barbara J. Hill

SB 510

Dear Arliss;

Understand this bill is in the Senate Community and Regional Affairs Committee and believe it would help.

This type of legislation is much better than trying to distribute the wealth as Hammond proposes — Easier to administrate, gets to business that needs help — and really helps the economy which helps all the people. Reduces cost of business which holds prices to the consumer.

Dear Bill:

I certainly support this bill but also believe it would help to make it retroactive to 1-1-79

This type of legislation helps all businesses - including those that are in trouble.

Would like a bill to pick up a percentage of Unemployment insurance and workmen's comp. which would also help all business.

SIGNED

☐ PLEASE REPLY ☐ NO REPLY NECESSARY

Taxes, taxes, taxes

Dear Editor:

It is most interesting that the Legislature passed retroactive pay raises and that the governor is attempting to count the number of employees in his budget.

In the meantime, I have received correspondence that my mortgage payments will be increased because of increased taxes and also that my workmen's compensation rate has been increased retroactive to Dec. 1, 1979, because of increased benefits being given by the state.

As of Dec. 31, 1979, the Alaska Permanent Fund had a balance of $256,009,283.53 and the Legislature plans to place an additional $900,000,000, bringing that fund to over one billion dollars. A lot of money when they don't even know what to do with it.

I am sure that the State of Oregon doesn't have that kind of money and yet property owners and renters received tax relief in 1979 and are receiving additional relief in 1980.

It would certainly appear that those highly paid people in Juneau could do something for the taxpayer and business of this state. I support eliminating the state income taxes and believe that property tax is another area that should be given relief, including a plan like Oregon where the renter gets relief.

The income tax gives credit to those who are making money. But how about business and the elimination of the $10 school tax that is a nuisance. Perhaps if the state would also pick up a percentage of workmen's compensation and unemployment insurance they would take a greater interest in how this money is spent. This would give relief to many of the small businesses who are paying the tax even though they are not even making money.

Out of 13 municipalities who responded to the questionnaire in regard to the mil levy, only four had not lowered their mil levy, most of them lowered it considerably.

CATEGORY: DEVELOPMENT **AGENCY:** REVENUE

PROGRAM: COMMUNITY DEVELOPMENT **BRU (s):** SHARED TAXES

The Shared Taxes BRU assists local governments through the sharing of revenue generated from numerous state taxes.

The Shared Taxes BRU is charged with the responsibility of administering, in an accurate and timely manner, shared revenue accounts with local city and borough governments. Specified percentages of revenue generated within local municipal boundaries are returned to the local units in accordance with statutory provisions. The various shared taxes are Municipal Assistance, Aviation Fuel, Fisheries, Telephone and Electric Co-op, Liquor License, and Amusement and Gaming License. Chapter 144, SLA 1978 abolished the Gross Receipts Tax.

In FY 80, distribution of revenues and taxes amounted to $14,417,100. The Governor's budget for the FY 81 distribution for all revenues and taxes will be $16,670,000. With the exception of Municipal Assistance, the recommendation equals 100% of anticipated revenues for each tax as determined by statutory formula. The recommendation for Municipal Assistance is the same dollar amount as FY 80.

Costs associated with administration of this program are budgeted within the Administration and Support BRU, General Government Category, within the Department of Revenue.

SENATE LETTER OF INTENT

ON
FCCS CSSB 7

Senate Bill 7 was the result of decisions made late in the 1978 legislative session. The Committee recognizes that it is not a perfect approach to revenue sharing, but there was insufficient time to address the overall question.

The intent of the revenue sharing portion of FCCS CSSB 7 is to refund approximately 150% of the revenues lost to municipalities by reason of the repeal of the Alaska Gross Business License Tax. It is the intent and purpose of the Legislature that one-third of the receipts of Sec. 43.20.016 be used to reduce property taxes in the municipalities involved, and that the additional money not be used for more services. The Committee recognizes that Sec. 43.20.016 is an imperfect vehicle to assure compliance with this intent and that some administrative problems will result from its passage. Thus AS 43.20.016 is not to be regarded as anything other than a temporary expedient, to be refined and improved by future Legislatures.

It is the sense of the Committee that the entire question of revenue sharing should be evaluated by the Eleventh Legislature and that Sec. 43.20.016 be reviewed in that context.

Respectfully submitted,

Sen. Clem Tillion, Chairman Rep. Orel Freeman, Chairman

The Secretary was requested to notify the House.

Exempts business inventories. Not so much for cities. Cuts out problem small assessments.

Does this include oil/gas inventories --
substantial $ to
43-7000 - Depreciation. Need to check.
OK if small D.T. Debt —

Dear Arliss,

Altho it was a brief one, my employ with the D.A.A.B. some years back gave me the opportunity to discover that ~~that~~ the local coffers are in need of a good shrinking experience. I quickly learned that there is terrible waste, exaggerated needs, and worst of all, six months out of each year, for at least two employees, practically full time, spent in thinking up ways to figure out how to keep their budget at least as big as it was the previous year.

So I have little sympathy for this dilemma, which municipalities profess they would be in.

The principle of taxation originally was intended to provide for a lot less than what the administrators of government now profess the citizen needs.

Our founding fathers were victims of such oppressions and were meticulously careful to write such powers out of the Constitution.

I suggest that re-imbursement as described is unnecessary. I also suggest, further, that the dollars which are taken, be left in the hands of the private sector where they do the most good.

Someone said To Govern does not give license to control. I ask you Arliss, what part of our lives does the government, local, State or Fed, not control today? Take heed of this in your work. Sincerely

Mac

SB 510
91

Dear Ms. ~~Tischer~~: Mae,

You have evidenced interest in Senate Bill number 510, An Act exempting business inventory from municipal property tax levy, and providing for reimbursement to municipalities of tax revenues lost by operation of the exemption; and providing for an effective date. The Senate Community and Regional Affairs Committee has scheduled a public hearing on this bill April 1, 1:30 p.m. in the Butrovich Room of the State Capitol Building. Because of the widespread interest in this bill by many members of the business community and by affected local governments, we tried to set up a teleconference meeting. Due to the heavy teleconference schedule, we find that any available date would put us past a reasonable time for consideration of this bill. Since we are moving well into the session, it's important that SB 510 go to the next committee of referral, Senate Finance.

We are enclosing some background information dealing with SB 510. One of the major problems that must be addressed is how to "hold harmless" the local municipalities in the event business inventories are exempted from taxation. The Department of Revenue feels a different approach than is outlined may need to be utlized to assure this recovery. As you can see from the attached information, the revenue loss could be very substantial to some seventeen municipalities throughout the state. Your comments and suggestions on this part of the bill will be greatly appreciated.

For your information, Senate Bill 64, An Act exempting business inventories from municipal property taxes; and providing for an effective date, sponsored by Senators Bradley, Dankworth, Bennett and Fahrenkamp was passed out of the Senate Commerce last week and is now in Senate Finance. Senate Bill 64 does not provide for municipal reimbursement.

We will look forward to receiving information from you regarding this important piece of legislation.

Sincerely,

Arliss Sturgulewski

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The Department of Community and Regional Affairs estimates that 125,000 of the estimated 196,900 property parcels in the State will be eligible for payments under SB 534. The Department will promulgate regulations. Application forms will be designed, printed and distributed. The receipt and processing of 125,000 applications and resulting payments will occur each year. Community and Regional Affairs has estimated a five percent growth.

JUSTIFICATION:

SB 534 creates a new document processing and payment system. The computer system to capture data from application forms and process the data to achieve payments and files will be designed and programmed by this position. Both the data capture machines and the processing itself requires programming. Processing includes batch processing, error correction, warrant control, preparation, release and redemption, and file maintenance.

The man month requirement will drop to three for the second and following years.

Referred: Commerce, Community & Regional Affairs and Finance

IN THE SENATE BY THE COMMERCE COMMITTEE

SENATE BILL NO. 535

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act providing for a Task Force on Fire Prevention and Control; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. TASK FORCE ON FIRE PREVENTION AND CONTROL. The Alaska Task Force on Fire Prevention and Control is established in the Department of Community and Regional Affairs.

* Sec. 2. MEMBERSHIP. (a) The Alaska Task Force on Fire Prevention and Control consists of nine members appointed by the governor, without regard to political affiliation, to be selected as follows:

(1) one member from the Alaska State Firefighters Association from a list of nominees provided by the association;

(2) one member from the International Association of Firefighters from a list of nominees provided by the association;

(3) one member from the Alaska Fire Chiefs Association from a list of nominees provided by the association;

(4) one member representative of the insurance industry;

(5) a contractor or architect licensed under AS 08.18;

(6) a commissioner or executive officer of a regional native housing authority created under AS 18.55.996;

(7) an educator from the state public school system;

(8) one public member; and

(9) one member representative of the Alaska Municipal League from a list of nominees provided by the league.

(b) There shall be at least one member from each judicial district.

* Sec. 3. OBJECTIVES. The objectives of the task force are to

(1) identify and provide a detailed account of the fire loss problem in the state, including causal factors;

(2) identify and define the present roles and relationships of the agencies in the state which are involved in fire protection activities at the local, regional, state and federal levels;

(3) recommend organizational or operational modifications to improve the effectiveness of the state's fire protection system;

(4) provide documentation that will assist all government agencies and fire fighting services in effectively meeting their fire protection responsibilities.

* Sec. 4. CHAIRMAN. The members of the Task Force on Fire Prevention and Control shall elect a chairman from the membership of the task force.

* Sec. 5. PROJECT DIRECTOR. The Task Force on Fire Prevention and Control shall hire an executive director to function as an impartial investigator and project director. The executive director shall be under the direction of the chairman and may, with the approval of the chairman, employ additional staff as necessary.

* Sec. 6. MEETINGS AND HEARINGS. The Task Force on Fire Prevention and Control shall meet at least once every three months. The first meeting shall be held not later than 60 days following the appointment of the nine members to the task force. Public hearings and meetings shall be held in areas of the state that are representative of its urban and rural fire protection problems.

* Sec. 7. COMPENSATION. The members of the Task Force on Fire Prevention and Control serve without compensation but are entitled to per diem and travel expenses authorized by law for boards and commissions.

* Sec. 8. DUTIES. The Task Force on Fire Prevention and Control shall

(1) request and review information concerning the causes and

nature of fire losses in the state;

(2) hold public hearings and meetings to determine the extent of public awareness of existing fire protection systems;

(3) study the activities of the various fire protection agencies in the state;

(4) submit an annual report with recommendations for the improvement of fire prevention and control in the state to the governor and the legislature; the first annual report shall be submitted by January 1, 1982; and

(5) by January 1, ~~1984~~ 1983, submit to the governor and the legislature its final report which shall identify those interim report recommendations which have been implemented, evaluate the practical effects of the implementation of the recommendations, and make further recommendations on the improvement of fire prevention and control.

* Sec. 9. This Act terminates on June 30, ~~1984~~ 1983.

* Sec. 10. This Act takes effect immediately in accordance with AS 01.10.-070(c).

HB 863: "An Act providing for a Task Force on Fire Prevention and Control; and providing for an effective date."

Statistics:

Alaska doubles U.S. average in life and dollar loss from fire
In 1979, there were 27 deaths, with an estimated $29.5 million loss to real and personal property due to fire.

Although quarterly runs are currently being done, we do know that for 1980 (the first quarter of) that there has been 14 fire fatalities vs. 9 fire deaths last year at this time ---- 11 of these 14 deaths occurred in rural areas, i.e., Bethel, Sand Point, Salcha (outside of Fairbanks).

Fire deaths per population:

Caucasian--27 deaths per million population (approximately U.S. average)

Indian --210 deaths per million population

Eskimo --600 deaths per million population

A PROSPECTUS OF ALASKA'S FIRE PROTECTION

A Report Furnished to Governor Hammond

by

Thomas W. Monk
Legislative Chairman
Alaska State Firefighters Association

January 4, 1980

A PROSPECTUS OF ALASKA'S FIRE PROTECTION

During the week of October 22, 1979, at their annual conference, the Alaska State Firefighters Association passed several resolutions, one of which was Resulotion 79-1 (attached) dealing with the establishment of a State Task Force whose purpose is to: define the fire problems of Alaska; develop a comprehensive State plan to minimize the affects of these problems; and establish an ongoing means to evaluate and monitor the implementation of the plan. This Task Force and its charges are to be appointed by the Governor for a three year period. To clarify the general terms of this resolution and to explain the intent and reasoning of the Alaska State Firefighters Association the following information is provided.

Relevant History

Throughout the history and development of this country, the occurrence of fire has been a key factor. As a tool, weapon, or accident, fire has been an ever-present element of our lives as either a noble friend or unmerciful enemy. Consequently, today the American public is complacent toward the devastation that fire wreaks daily across the country. The only time fire ever receives any particular attention is when its resultant losses are catastrophic and, except for the rare example, the mind soon wipes out any recollection of these incidents. The ability and inclination to bounce back and replace any such losses has a definite bearing on this attitude. Thus, fire problems have gone virtually unchecked and unnoticed for most of America's history.

It wasn't until 1966 that the issue received any serious national attention. Leaders of the nation's fire service gathered to express their concern and desire to generate some public and political action. From this meeting, the now-famous Wingspread Conference, resulted the Federal Fire Research and Safety Act in 1968 which established the National Commission on Fire Prevention and Control. Subsequently, the report of this Commission, America Burning, clearly documented the proportion of the fire problem in this country. Quoting from the report,

> "Appallingly, the richest and most technologically advanced nation in the world leads all major industrialized countries in per capita deaths and property losses from fire. While differing reporting procedures make international comparisons unreliable, the fact that the United States reports a death per million population rate nearly twice that on the second ranking Canada (57.1 versus 29.7) leaves little doubt that this nation leads the other industrialized nations in fire deaths per capita. Similarly, in the category of economic losses per capita, the United States exceeds Canada by one-third."

Thus, an awareness and true concern for the fire problem were finally born in this country.

Since that time and directly because of the incidents noted above, the National Fire Prevention and Control Administration (now known as the National Fire Administration) was established as the federal focal point to address the various needs as identified in the America Burning report. Using the creation of this administration as a model along with its recommendations, many states are conducting and have conducted similar analyses of their own fire problems.

The history of Alaska's fire service deserves mention only to make two critical points. The first point is that in comparison to many other states Alaska's fire protection system is very young. At the local level, the oldest fire department in the state, the Douglas Volunteer Fire Department, is 82 years old, which far exceeds the average age of any other fire department. At the state level, the oldest fire agency is the State Fire Marshal's Office which came into being roughly at the time of statehood. All other state agencies, in relation to their roles pertinent to our issues herein, are ten years old or less.

The point is not their age or history, but this places us in a most advantageous position. With the developing fire issues at the national level we can avail ourselves of national programs and recommendations without vast modification. In many states whose histories are long and firmly molded in tradition, much resistance exists in relation to any nationally born changes. Much of this resistance is based on a parochial attitude as opposed to actually addressing any specific needs. To a large extent, Alaska does not have to overcome such cumbersome obstacles.

The second point relating to Alaska's history is that Alaska leads all other states in the United States in life and property losses per capita from fire. From year to year these loss figures may vary greatly. In a state such as Alaska one large-loss fire has a substantial effect on these statistics. However, over the last ten years the average annual losses have exceeded the national average in the two noted categories by two to three times.

Thus, it is no exaggeration to say that among all industrialized governments in the entire world, Alaska has the twofold distinction of:

1. Theoretically having the potential to create the most advanced statewide fire protection system in the United States and possibly the world; and

2. Actually harboring the worst fire loss record of all the states in the country with the worst fire loss record in the world.

Scope

If one were preparing a ledger or statistical printout of Alaska's fire problem, the bottom line would reflect the life and dollar losses that the state now suffers and the account would be complete. Sadly, this is the approach that has often been used and has failed. The "problem" is much too complex to dismiss it in such cold, hard facts. Furthermore, such facts would only misdirect any attempts to rectify the problems for they lack the in-depth information necessary to identify the causal factors.

Today, the fire service is in the midst of a major philosophical change. That is, it is not the fire service's primary responsibility to suppress/extinguish fire, but rather it is their duty to prevent it. Once a fire starts, the fire protection system has failed. It is far too costly and ineffective to approach the issue from any other perspective. It is a startling fact to deal with, yet it must be realized that a vast majority of all fires are started or contributed to by simple human error. The fire service believes that fire prevention is the primary target for any concerted actions to reduce Alaska's fire losses if there is to be any marked influence on the fire problem.

This is not to say that fire suppression capabilities are not necessary. Despite our best efforts, the tragedy of fire will always exist as long as the human element is present. There are many avenues to investigate on this topic alone, but it is apparent that a definite change of attitude and action in necessary. A shift in everyone's philosophy must be accomplished for a community can no longer believe that simply because they own a big, new piece of firefighting apparatus their community is as safe as possible from fire. A continuing system of fire prevention and education is absolutely necessary and a new outlook on fire suppression is a must.

These issues for the moment may seem somewhat unclear. Whether this misunderstanding is due to simplicity or complexity or possibly to public ignorance or apathy is also an issue that should be further considered. It is sad to think of the dollars wasted in the false pursuit of fire safety across Alaska. Whatever the case, rest assured that complete analysis of the issues is not elementary.

For example, in any such analysis one should include arson and its related problems, building codes and their enforcement, insurance concerns and their effect on the fire problems, fire investigation and its contributions, public fire education programs and their delivery, and the social and economic effects caused by fire. The list of concerns is cumbersome and so interwoven that the issue soon grows to involve almost every area of community activity.

It encompasses the world of designers and builders; it encompasses governmental agencies in the myriad of ways they affect our everyday life, from zoning requirements to the level of risk they are willing to accept on behalf of their community; it encompasses the managers and occupants of buildings, whether they are private or public, commercial or residential.

This list is only limited by one's imagination, yet it should be clearly noted that thus far only the structural fire problem has been addressed. Many of the same concerns, as well as many unique ones, must also be considered in terms of marine fire safety, wildlands fire control and aircrash/rescue concerns. Substantial argument and discussion are easily generated on these areas as to how they fit into the overall fire problem, but the fact is that many of our local and state fire agencies and organizations are simultaneously involved in many of these specialized areas.

Intent

Thus, it becomes readily apparent that the fire problem is not one of limited proportion and scope. The concern is not only with the traditional aspect of what burns and why, but also the organizational and operational aspects of all agencies that exist in the State. This includes those fire entities at the local, as well as the state, level and extends beyond them into departments that assist these fire agencies. As an example, the sources of funding provided by the State must also be included if any such analysis is to be complete. Such a broad-based analysis has never been done before, but it is felt by the fire service that such a task must be accomplished in the best interest of the State. Furthermore, the fire service believes that the time and situation are presently supportive of such a task.

It should be noted that, in this text, we have avoided any reference to specific problems for several reasons. Primarily, we have neither the means nor the time to go into any great detail on the subject. Such is the purpose which the task force is to accomplish. Secondarily, much supportive information already exists but is not in any cohesive form. (In conjunction with this writing, several documents* providing much supportive information on these issues will be available on January 4 in a meeting of the Governor's Office and the Alaska State Firefighters Association.)

Proposal

To accomplish this in depth analysis, the Alaska State Firefighters Association requests that the Governor allocate the necessary funds to:

1. Appoint a nine-member task force to review and direct the activities of a project director, as outlined in the objectives listed below; and

---

*1978 Annual Report of the Alaska State Fire Marshal
America Burning: The Report of the Commission of Fire Prevention and Control
Organizational Design of Fire Service Training and Educational Resources in Alaska by Alaska Fire Service Training Program
Highlights of Fire in the United States by the National Fire Prevention and Control Administration

2. Contract with a research analyst to be an impartial investigator to act as the project director.

The goal of this body is to formulate a State plan addressing the fire problems of Alaska that, when enacted, will reduce significantly the fire losses of the state.

The objectives of this body are:

1. To identify and provide a detailed account of the fire loss problem in Alaska, including causal factors.

2. To identify and define the present roles and relationships of all agencies within the State which are involved in the fire protection activities at the local, regional, state and federal levels.

3. To recommend any organizational and/or operational modifications to improve the effectiveness of Alaska's fire protection system.

4. To provide documentation that will assist all levels of government and fire-related agencies in effectively addressing their fire protection responsibilities.

This project is to be limited to a ~~three~~ two-year time period and broken down into the following three phases:

1. Phase I	- Investigation and Research	6 months
2. Phase II	- Documentation and Development	18 months
3. Phase III	- Evaluation and Implementation	12 months

In anticipation of scheduling changes, the Task Force will have the authority to modify the phase periods as long as completion of the plan is accomplished in three years.

The makeup of the task force should be structured to provide as wide a geographical and involvement representation as possible in a nine-member body. The Alaska State Firefighters Association suggests that representatives from the list below be considered as members of this task force. It is also suggested that representatives of the existing State fire agencies be granted ex officio membership on this board.

Alaska State Firefighters Association
Alaska Fire Chief's Association
Rural public
Urban public
Public education system
Chamber of Commerce/Municipal League
Construction industry
Insurance organization
Social-economic advisor

The hiring of the project director and levels of funding should be administered by the Governor's Office in conjunction with State policy.

The Alaska State Firefighters Association recommends that the task force not be established within any existing state agency with fire protection responsibility.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF PUBLIC SAFETY

OFFICE OF THE COMMISSIONER / POUCH N – JUNEAU 99811

December 19, 1979

Mr. Thomas W. Monk
Legislative Chairman
Alaska State Firefighters
Association
P.O. Box 3
Auke Bay, Alaska 99821

Dear Mr. Monk:

Thank you for your letter of November 20th and copy of Resolution 79-1 pertaining to the establishment of a three year state task force to address Alaska's fire problems.

The resolution in concept appears to be calling for a state focused fire prevention and control master planning effort. Assuming this is correct, we feel a cooperative approach such as this is both desirable and necessary if the states fire environment is to be meaningfully improved.

The Department of Public Safety and in particular the Division of Fire Prevention will cooperate and assist in the master planning effort, in any manner possible, to the extent that personnel and other resource capabilities permit.

Please feel free to contact State Fire Marshal Ronald Hendrie, Division of Fire Prevention, Department of Public Safety, P.O. Box 6188 Annex, Anchorage, Alaska 99502, tele. 264-5691 or Gary Crouse at 465-4331 in Juneau for any input and/or assistance the Division of Fire Prevention may render.

Best wishes to you and the Alaska State Firefighters Association in your efforts to provide a more fire safe Alaska for our citizens and visitors.

Sincerely,

WILLIAM R. NIX
Commissioner

WRN:RAH:GRC:vrb

12-L2LH

ALASKA STATE FIREFIGHTERS ASSOCIATION

Conference, 1979

Resolution 79-1

Submitted by John Feero, Gastineau Chapter

WHEREAS, the State of Alaska has several serious fire problems, and

WHEREAS, the fire problems of Alaska have never been collectively addressed and/or documented, and

WHEREAS, no existing State agency or organization is charged with or has the resources to address these problems, and

WHEREAS, the attack of these fire problems presently conducted by various local, state, and federal agencies is uncoordinated and has no State focal point, and

WHEREAS, these fire problems encompass concerns of structural fire protection, wildlands fire protection, marine fire protection, and aircrash fire and rescue, and

WHEREAS, Alaska suffers the largest property loss per capita and life loss per capita of any state in the United States,

THEREFORE, BE IT RESOLVED THAT the Alaska State Firefighters Association recommend and support the establishment of a ~~three-year~~ State task force appointed and funded by the Governor to

1. define these fire problems in the State of Alaska
2. develop a comprehensive State plan to address and minimize the affects of these fire problems
3. establish an ongoing means to evaluate the implementation of this State plan.

Resolution 79-1 passed unanimously this date, October 26, 1979.

Leigh Gallagher

Leigh Gallagher, President
Alaska State Firefighters Association

Alaska Fire Chiefs' Association

211 West 7th Avenue
Anchorage, AK 99501
278-4413

December 20, 1979

Governor Jay Hammond
Office of the Governor
Pouch A
Juneau, Alaska 99811

Dear Sir:

At the 1979 Alaska State Firefighter's Association Conference a resolution was passed requesting that a task force be established by your office to make an in-depth study of the total fire safety and protection problem in the state.

COPY

The Alaska State Fire Chief's Association totally supports this resolution, and urge your speedy consideration of this proposal. Additionally, our association suggests that this task force be made up of persons not directly involved in fire protection, either at the State or the local levels. We feel that this will result in an impartial and complete study.

The Alaska Fire Chief's Association is dedicated to improving the catastrophic fire loss record in this state. I am sure that you are aware that our state has the highest per capita fire loss and life loss record in our country: and our country has the highest fire loss record in the world. We all must work to stop these tragic losses.

We are confident that the proposed task force study will lead us toward an improved fire loss record, toward a more effective and efficient fire service, and the results will benefit all Alaskans everywhere.

If I, or our association, can be of service to you in anyway in this endeavor please call upon me at any time.

Respectfully yours,

James R Evans

JAMES R. EVANS
President

(1) RELATED BILLS (SIMILAR OR CONFLICTING)
(2) OTHER AGENCIES AFFECTED BY BILL

1. CS HB 863
2. Refer to comments

(2) a. ORGANIZATIONAL SUPPORT FOR BILL	(2) b. ORGANIZATIONAL OPPOSITION TO BILL
Alaska Fire Chiefs Association Alaska State Firefighters Association	Unknown

(3) PROGRAM EFFECTS OF BILL

No discernible program effects during the task force study phases other than, upon request, occassional staff time and travel required to provide input concerning our programs and services/activities, including our observations as to the fire problem, to the task force.

Eventual short and long term program effects would depend on what recommendations, for the improvement of fire prevention and control, were made and implemented.

(4) FISCAL IMPACT: ☐ NONE ☒ FISCAL ANALYSIS ATTACHED (Informal)

(5) AMENDMENTS PROPOSED:

None

(6) COMMENTS:

In our opinion the task force study and report(s), comprehensively and properly conducted and executed, is vital to a long needed analysis and improvement of the state's fire protection system. Without an approach of this type meaningful improvement of the state's fire environment is not favorable and our delivery system cost effectiveness is highly suspect.

Among the objectives of the task force would be the identification and defining of the present roles and relationships of the various agencies in the state which are involved in fire protection activities at the local, regional, state and federal levels. There is considerable overlap and duplication of effort without any viable means of coordination.

In addition to the Department of Public Safety, numerous state agencies, e.g. Department of Natural Resources, Department of Transportation and Public Facilities, Department of Health & Social Services, Department of Administration, Department of Labor, Department of Education amongst others, are involved in varying levels of fire protection programs

A state focused fire prevention and control master plan is needed and indicated. The task force could and should be the catalyst for this direly needed effort if this legislation is passed.

For additional background material, including the scope of the issue, attached is a copy of A Prospectus of Alaska's Fire Protection (January 4, 1980) a report furnished to Governor Hammond by Mr. Thomas W. Monk, Legislative Chairman, Alaska State Firefighters Association.

In our opinion the task force study and report(s), comprehensively and properly conducted and executed, is vital to a long needed analysis and improvement of the state's fire protection system. Without an approach of this type meaningful improvement of the state's fire environment is not favorable and our delivery system cost effectiveness is highly suspect.

Among the objectives of the task force would be the identification and defining of the present roles and relationships of the various agencies in the state which are involved in fire protection activities at the local, regional, state and federal levels. There is considerable overlap and duplication of effort without any viable means of coordination.

(See reverse side)

In addition to the Department of Public Safety, numerous state agencies, e.g. Department of Natural Resources, Department of Transportation and Public Facilities, Department of Health & Social Services, Department of Administration, Department of Labor, Department of Education amongst others, are involved in varying levels of fire protection programs and activities.

A state focused fire prevention and control master plan is needed and indicated. The task force could and should be the catalyst for this direly needed effort if this legislation is passed.

For additional background material, including the scope of the issue, attached is a copy of A Prospectus of Alaska's Fire Protection (January 4, 1980), a report furnished to Governor Hammond by Mr. Thomas W. Monk, Legislative Chairman, Alaska State Firefighters Association.

CS FOR SENATE BILL NO. 546

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to state aid for local capital projects; establishing the capital projects foundation fund; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. It is the purpose of AS 44.42.100 - 44.42.160 to create a program which can provide a source of money which will be equitably distributed throughout the state to be used, alone or with money from other sources, to finance capital projects. It is the intent of the legislature that planning for capital projects reflect local needs and priorities and that, whenever possible, political subdivisions of the state have sole responsibility for the expenditure of state money provided through the program. Nothing in AS 44.42.100 - 44.42.160 is intended to restrict the legislative authority to appropriate money.

* Sec. 2. AS 44.42.020 is amended by adding a new paragraph to read:

(14) adopt regulations for management of the capital projects foundation fund established under AS 44.42.100 and administer that fund.

* Sec. 3. AS 44.42 is amended by adding new sections to read:

ARTICLE 2. CAPITAL PROJECTS FOUNDATION ENTITLEMENTS.

Sec. 44.42.100. CAPITAL PROJECTS FOUNDATION FUND AND ENTITLEMENTS. (a) There is established in the department a capital projects foundation fund for the purpose of providing state assistance for improvement, maintenance and new construction costs of local capital projects. Within the limits of appropriations for the purpose, the department shall make entitlements for capital projects to organized boroughs, to

home rule municipalities as defined in AS 29.08.010, and to municipalities unified under AS 29.68 which have capital improvement plans.

(b) Within the limits of appropriations for the purpose, the department shall make and manage entitlements for capital projects for unorganized boroughs if a version of an Act entitled "An Act relating to unorganized boroughs, establishing unorganized boroughs, establishing a program of financial assistance for the preparation of regional plans by unorganized boroughs, permitting adoption of home rule charters by unorganized boroughs, and directing submission of recommendations concerning adjustment of the boundaries of service areas of the unorganized borough; and providing for an effective date" is enacted. If that bill is not enacted, the department shall make and manage entitlements for capital projects for each regional educational attendance area organized under AS 14.08.031.

(c) The amount of appropriation authorized for the capital improvements foundation fund for each fiscal year is not less than $400 times the state population as annually determined by the Department of Labor.

Sec. 44.42.110. ELIGIBLE FACILITIES. An entitlement from the capital projects foundation fund may be used for improvement, maintenance, or construction costs of the following facilities

(1) libraries;

(2) community and emergency detention facilities;

(3) fire halls, including the purchase of fire vehicles;

(4) community parks and recreational facilities;

(5) water and sewer facilities;

(6) health facilities;

(7) community centers;

(8) cultural facilities;

(9) transportation facilities which do not duplicate state facilities and which are not inconsistent with the state transportation plan under AS 44.42.050 as determined by the department, including

(A) service roads;

(B) trails;

(C) harbors and docks for small boats;

(D) seaplane floats;

(E) public transit facilities, including the purchase of transit vehicles;

(F) emergency and recreational airstrips for small aircraft.

(b) A facility is eligible for an entitlement under this section only if it is identified in a capital improvement plan formulated under AS 44.42.130.

(c) If a facility is located in or to be located in a home rule or unified municipality or organized borough, it is not eligible for an entitlement under this section unless the borough or municipality

(1) has or will have title to the facility; and

(2) has authority under AS 29 to operate the facility.

Sec. 44.42.120. REGIONAL COUNCILS. (a) A regional council shall be established for each unorganized borough if a version of an Act entitled "An Act relating to unorganized boroughs, establishing unorganized boroughs, establishing a program of financial assistance for the preparation of regional plans by unorganized boroughs, permitting adoption of home rule charters by unorganized boroughs, and directing submission of recommendations concerning adjustment of the boundaries of service areas of the unorganized borough; and providing for an effect date." is enacted. If that bill is not enacted, a regional council shall be established for each regional educational attendance area. A regional

council shall be composed of no more than 11 members as follows:

(1) at least one person from each first class city which is located within an unorganized borough or regional educational attendance area, or which is included in an unorganized borough's capital improvement plan or a regional educational attendance area's capital improvement plan under (b) of this section and who is an elected city official selected by the city council;

(2) additional members selected by the governor from persons nominated by the Department of Community and Regional Affairs who are from second class cities and unincorporated communities within an unorganized borough or regional educational attendance area; members from second class cities shall be elected officials.

(b) A first class city which has not adopted a home rule charter and which is outside of an organized borough and outside of a regional educational attendance area shall be represented on the regional council of a regional educational attendance area or an unorganized borough which borders the city and shall be included in the capital improvement plan.

Sec. 44.42.130. CAPITAL IMPROVEMENT PLANS. (a) With assistance from the department, each regional council established under AS 44.42.120 shall formulate a capital improvement plan. A capital improvement plan formulated in accordance with this section shall be a five-year plan updated annually, and shall

(1) identify all capital projects needed in the borough, municipality, or regional educational attendance area;

(2) assign a priority to each capital project identified;

(3) include cost estimates for each capital project identified;

(4) include a list of needed capital projects which are not

eligible for an entitlement from the capital improvement foundation fund;

(5) identify possibilities for capital projects involving facilities having more than one use;

(6) consider the feasibility of waste heat utilization and other energy-saving measures for capital projects;

(7) provide for site acquisition for capital projects; and

(8) provide for needed public access and utilities.

(b) A capital improvement plan and revisions to a capital improvement plan for an unorganized borough or regional educational attendance area shall be adopted by the regional council after a public hearing and submitted to the department.

(c) To qualify to receive an entitlement from the capital projects foundation fund, an organized borough, home rule municipality, or unified municipality shall formulate and annually update a capital improvement plan which covers at least a five-year period. A capital improvement plan and revisions to a capital improvement plan for an organized borough, home rule municipality, or unified municipality shall be submitted to the city council or borough assembly. After a public hearing, and after approval by the council or assembly, the capital improvement plan shall be submitted to the department.

* Sec. 4. AS 44.42 is amended by adding a new section to read:

Sec. 44.42.140. ALLOCATION AND DISTRIBUTION OF ENTITLEMENTS. (a) Entitlements from the capital projects foundation fund shall be distributed annually by the department to each organized borough, home rule municipality, and unified municipality which has submitted a capital improvement plan as required by AS 44.42.130. An organized borough may agree that a city in the borough may receive and use money from an annual entitlement for the borough which is for a facility located in

the city, if the city has authority under AS 29 to operate and hold title to that type of facility. Entitlements from the capital projects foundation fund shall be distributed annually to accounts established by the department for each unorganized borough or for each regional educational attendance area which has submitted a capital improvement plan as required by AS 44.42.130. The commissioner shall enter into an agreement with a city in an unorganized borough or regional educational attendance area which elects to receive and use money from an annual entitlement to the unorganized borough or regional educational attendance area which is for a facility located in the city, if the city has authority under AS 29 to operate and hold title to that type of facility.

(b) Entitlements shall be annually allocated from the capital projects foundation fund as follows:

(1) seven-tenths on the basis of the population of the organized borough, home rule municipality, unified municipality, unorganized borough, or regional educational attendance area; and

(2) three-tenths on the basis of the area of the organized borough, home rule municipality, unified municipality, organized borough, or regional educational attendance area.

* Sec. 5. AS 44.42 is amended by adding new sections to read:

Sec. 44.42.150. USE OF ENTITLEMENTS. (a) An entitlement from the capital projects foundation fund distributed to an organized borough, home rule municipality, or unified municipality may be used only for projects identified in a capital improvement plan submitted to the department. Each recipient shall determine which project or projects to finance with the entitlement received each year under AS 44.42.140.

(b) A facility for which an entitlement from the capital projects foundation fund is received which is located in an organized borough but outside of a city shall be owned, operated and maintained by the borough.

A facility for which an entitlement from the capital projects foundation fund is received which is located in a city within an organized borough shall be owned, maintained and operated

(1) by the borough, if the city has the authority under AS 29 to operate and hold title to that type of facility;

(2) by the city, if the city has the authority under AS 29 to operate and hold title to that type of facility; or

(3) by either the borough or city as they may agree, if both the city and the borough have authority to operate and hold title to that type of facility.

(c) An entitlement from the capital projects foundation fund for a project in a first or second class city which is part of the capital improvement plan of an unorganized borough or a regional educational attendance area may be distributed to the city with the concurrence of the city council subject to the following terms:

(1) that the city will secure, retain and protect title to the site of an existing facility or to the site on which a new facility is to be constructed; for purposes of this paragraph it is sufficient that title is obtained in fee or by a lease which provides that the city enjoys exclusive use of the site and any improvements for the estimated life of the facility;

(2) that the city will assume responsibility for the operation of the facility to be financed with the entitlement, and the feasibility of the discharge of this obligation shall be demonstrated to the satisfaction of the commissioner before the payment of the entitlement.

(d) If it appears that the cost of a capital project financed by an entitlement from the capital projects foundation fund to an organized borough, home rule municipality, or unified municipality will vary substantially from the cost estimated at the time the entitlement was

provided in its original condition;

(4) "improvement, maintenance or construction costs" includes, in addition to costs directly related to the project, the total of all costs of financing and carrying out the project; these include, but are not limited to, the costs of surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property;

(5) "maintenance" means restoration and repair needed to keep a facility as close as possible to its original condition.

* Sec. 6. Sections 1 - 3 and 5 - 7 of this Act take effect July 1, 1980.

* Sec. 7. Section 4 of this Act takes effect July 1, 1981.

made for the capital project, the recipient is responsible for obtaining the additional money needed to complete the project. If a capital project financed by an entitlement from the capital projects foundation fund to an organized borough, home rule municipality, or unified municipality costs less to complete than estimated at the time the entitlement was made, the recipient may use the excess entitlement for other capital projects in its capital improvement plan.

(e) In an unorganized borough or regional educational attendance area each regional council shall annually determine which projects in its capital improvement plan to finance with entitlements from the capital projects foundation fund. The department is responsible for the design and construction of the projects selected by a regional council under this subsection and shall carry out the projects in accordance with AS 35 unless the commissioner allows a city to receive and use an entitlement in accordance with AS 44.42.140.

(f) An entitlement from the capital projects foundation fund may be used to match state or federal grants.

Sec. 44.42.160. DEFINITIONS. In AS 44.42.100 - 44.42.160

(1) "area" means the area in square miles of a home rule municipality, unified municipality, organized borough, or unorganized borough or regional educational attendance area which has a capital improvement plan;

(2) "population" means the population, as annually determined by the Department of Labor using the latest figures of the United States Bureau of the Census, of a home rule municipality, unified municipality, organized borough, or unorganized borough or regional educational attendance area which has a capital improvement plan;

(3) "improvement" means renovations and additions to an existing facility which allow for better service than the facility

HB 55 - CIP - FOUNDATION MEETING

FEB 13, 1980 meeting: Bushre, Rhode, Waring

Discussion: 1) regarding the formula, it was agreed that the wisest approach would be a formula that reflected, within limits, the current allocations of funds to regions.
2) Capital projects to be included: solid waste, health facilities, transportation facilities, community facilities, energy conservation or generation. Maintenance costs were to be included in eligible costs, as tradeoffs between new and old buildings and the importance of life cycle analysis are important.
3) Language will be included that will state that if a project is not in a capital improvement program, Foundation dollars cannot be spent for that project.
4) Distribution arrangements: Money will go to boros only. Boros may get a set additional amount for the numbers of first class cities it contains. Money will go directly to home rule municipalities. When a third class boro, that boro will be treated as the next lower class which is an "unorganized boro" as per SB 348 . If that bill does not pass, funds will be distrubuted per REAA boundaries. However, as there is no boro government responsible or accountable for planning and expending funds--or that can own and have title to property etc--those functions will be retained by the State and managed in a trustee relationship with the unorganized boros. When retained by the state, DOTPF and CRA will jointly etsblish a planning process to develop a CIP in the boro and establish advisory boards to assist them in that endeavor. This will be consistent with Chap 168 SLA 78 on a regional basis (as per SB 348). Foundation funds will be ~~expended~~ expended according to the CIP. If and when an unorganized boro opts to become organized, then they would assume the planning/fund expending functions and would, additionally, take title to whatever property there may be.

Boros & municipalities must have CIPs.

CS SB 546

Section 1: Statement of Intent

Section 2: Gives regulation adoption authority to DOTPF

Section 3: Description of the Capital Foundation Fund to provide assistance for local construction projects to organized and unorganized boroughs, home rule municipalitie and municipalities.

The amount of appropriation established at not less than $400 times the state population.

Sec. 44.42.110 lists eligible projects, that is, projects of local interest and not part of statewide capital plans. (b) states that projects may only be built in local governments that have adopted the appropriate powers (ex. park facilities require aoption of park powers).

Sec. 44.42.120 Regional councils are established for unorganized boroughs for capital improvement planning. Board composition is specified.

Sec. 44.42.130 Requires a capital improvement plan as a condition of entitlement receipt. Plans must be at least for five years. Plans for unorganized areas must include specific considerations.

Sec. 4. 44.42.140 Describes the allocations and distribution of entitlements. Direct distribution to organized boroughs which may distribute to cities. Commissioner keeps an account for unorganized boroughs and may enter into an agreement to distribute funds to cities in the unorganized boroughs, if project is identified for construction in that year.

Formula specified : 7/10 on basis of population, 3/10 on basis of area.

Sec. 5. 44.42.150 Use of Entitlements. For projects specified in the cip. Ownership (title) discussed, especially in relationship to local government powers.

Entitlements may be used to match state and federal grants.

44.42.160 Definitions are provided.

Sec. 6 and Sec. 7. Effective dates: the planning process starts July 1,1980, but the funding does not begin til July 1, 1981

Juneau, Alaska

Dear Arliss:

The Cordova City Council has discussed SB 546 Capital Improvement Revenue Sharing and agree with the concept but disagree to inclusion of the unincorporated boroughs.

Attached is a copy of the City's Resolution 80-19 which addresses these concerns. I would be happy to make myself available to discuss this bill further and to offer suggested changes or anything else that would be positive.

Sincerely

Perry D. Lovett
City Manager

enc: Res. 80-19

CITY OF CORDOVA, ALASKA Introduced 5/5/80

RESOLUTION 80-19

A RESOLUTION URGING THAT ONLY MUNICIPALITIES AND BOROUGHS OF THE FIRST AND SECOND CLASS BE INCLUDED IN FORMULA FUNDING FOR THE CAPITAL IMPROVEMENT REVENUE SHARING PROGRAM PROPOSED BY SENATE BILL #546

WHEREAS the City of Cordova has reviewed Senate Bill #546 and agrees in principle with the concept of a Capital Improvement Revenue Sharing Program, but does not agree with the formula proposed, and

WHEREAS the majority of the population of the State of Alaska resides within incorporated municipalities and boroughs of the first or second class, and

WHEREAS the cost of infrastructure to support the life style of these people is a heavy burden of the resources of these municipalities and boroughs that tax themselves, and

WHEREAS the land and improvements in the unincorporated boroughs pay no property tax or any other form of support, and

WHEREAS such support to the unincorporated borough would further discourage the incorporation of boroughs or annexation to existing municipalities and would be detrimental to the orderly and prudent use of existing resources,

NOW THEREFORE BE IT RESOLVED that the City Council of Cordova, Alaska, supports the concept of Capital Improvement Revenue Sharing to municipalities and boroughs of the first and second class but opposed Capital Improvement Revenue Sharing to the unincorporated boroughs.

PASSED AND APPROVED THIS 5 DAY OF MAY, 1980.

RE: Capital Projects Foundation Fund Bill

We have reviewed SB 546 and would like the House version of the bill drafted as a companion to SB 546 but with the following changes:

p. 3 lines 8 and following should read:
(1) one representative from each first class city selected by their city councils who are elected officials from first class cities located within the unorganized borough or regional educational attendance area;
(2) additional members selected by the governor from persons nominated by the Department of Community and Regional Affairs who are from second class cities and unincorporated communities within the unorganized borough or regional educational attendance area. Second class city representatives shall be elected officials.

p. 4 line 1
(5) identify shared facility opportunities

p. 5 lines 10 and following:
Delete wording following "recipient"
Draft a new (c) to read as follows:
(c) For projects built in first or second class cities in the unorganized boroughs, upon concurrence by the Council, the commissioner may make an agreement including any provision agreed upon by the parties, including the following:
(continue with line 13)

Bill would like the bill ready for our 8:30 A.M. Committee meeting on 4/9 and for introduction that day. Many thanks.

April 3, 1980

Dear Alaskan:

This package of material is about SB 546, proposing a Capital Foundation Fund for construction of capital projects throughout Alaska. This bill is a further result of the work conducted by the Joint House and Senate Community and Regional Affairs Committees during the summer of 1979. During the course of the Committees' work, many people identified problems regarding planning for and funding capital projects. We feel that SB 546 proposes a viable solution to difficulties experienced throughout the state. We hope that you will read the enclosed descriptive materials and the bill itself.

Senate Bill 546 proposes a systematic approach to construction of capital projects. Every area of the state would receive a formula entitlement, much like revenue sharing. Expenditure of the entitlement requires only the development of a capital improvement plan. In organized boroughs and home rule municipalities, local governments plan for and expend these funds themselves for eligible projects. In unorganized boroughs (as defined in SB 348 and HB 580), an advisory group plans for the capital projects, though the funds are expended by the Department of Transportation and Public Facilities, as their fiscally responsible agent.

Funds may be used for a variety of capital projects. Priorities are annually established on the borough level. Maintenance costs are also eligible for use of these Capital Foundation Funds. There are many other significant considerations in SB 546. Please read the descriptive material and the bill itself. Contact us regarding any suggestions for changes, comments, etc.

We look forward to hearing from you about the Capital Foundation Fund.

Sincerely,

Arliss Sturgulewski

Information Sheet

CAPITAL FOUNDATION FUND

The Capital Foundation Fund will, by appropriation, provide funds to all areas of the State for certain capital improvements. To expend funds, each area will need to develop an areawide capital improvement plan, approved by the local assembly when there is one, and developed with the Department of Transportation and Public Facilities when there is no local government.

Organized and unorganized boroughs are encouraged to conduct regionwide planning to avoid costly duplications of capital projects and to prioritize, on the local level, needs among communities, rather than leaving this process to state level government.

Each area, so long as appropriations are made, is certain of a source of funding for local projects. Each area will receive a formula share of the appropriation. This stability will be advantageous to local governments for planning purposes. Additionally, unlike the current situation, areas may have greater ability to use capital projects for anti-cyclic economic benefits by being in control of fund expenditures. Annual funds do not lapse and may be accumulated for locally determined purposes.

Capital Foundation Funds may be used as the local match required for certain state and federal projects. This will be particularly significant in rural areas which do not now have a source of local match

Funds are eligible for both construction and maintenance costs. This means that local governments will be encouraged to consider life-cycle costs and encouraged to maintain buildings and other improvements in order to maximize the efficiency of their capital dollars.

Local governments, under the Capital Foundation Fund program, will be assured of a steady supply of state funds for capital improvements that will be directed toward locally determined project needs and can be expended at a locally determined pace.

RE: Capital Foundation Fund

At your request, we have prepared the attached material on a proposed Capital Foundation Fund. We have attempted a thorough listing of all pertinent points.

If you wuld like, we can meet at your earliest convenience to answer any questions you may have.

Attachment

Playing the game of legislative end-around

by Tom Fink

THE LEGISLATURE is much like a football game. You don't win or lose until the game ends. Being an armchair quarterback, however, I am very disturbed by some of our plays and lack of success. It is as if the TV announcer is telling me that our team is running when I can in fact see that it is passing.

Our legislature and governor have resisted any tax repeals on the basis that we would be aiding non-residents. Yet they turn around and pass a new permanent fund law which unequivocally dedicates our permanent fund for investments for non-residents. The permanent fund law among other items specifically provides that not more than 15 percent of the fund can be invested in real estate mortgages in Alaska and in any case must have a yield equal to mortgages outside the state.

The permanent fund law is a non-resident law. It has many interesting provisions. After February of this year 50 percent of the oil monies shall go into the fund rather than 25. The fund is not designed for the benefit of Alaskans. It specifically demands that the state seek the highest possible return. It lists a series of permissible investments. Most of the investments are in federal government securities or securities backed by federal guarantees. However, the fund can invest in corporate bonds, short term corporate notes, and bankers acceptances.

Investments in corporate bonds are limited to 25 percent of the permanent fund and investments in Alaska real estate mortgages are limited to 15 percent of the fund. There is no limit on the other investments.

The bill further provides that the interest income only is considered income and goes to the general fund each year with two exceptions. Losses on the sale of any securities are deducted from the income and gains from the sales of securities are left in the permanent fund. Further, the income of the fund which is transferred to the general fund is the lesser of the actual income of the fund or the five year average of income.

THE HOUSE also has passed a bill taking $900 million out of the general fund and transferring it into the permanent fund. If making the permanent fund larger than the constitution requires and investing substantially all of the money outside is aiding the residents, someone will have to point out some new logic.

At the same time the legislature dawdles in its consideration of any tax repeal. Since 10 percent of the recipients of the income tax repeal would be non-residents, the other 90 percent of us must continue to pay taxes even though everyone acknowledges the state treasury does not need our tax money. There is only one conclusion. The issue of resident or non-resident is a red herring. The governor and the legislature don't want to give up the power which is created by the retention and control of large sums of money.

Recently Sen. Sturguluski introduced a bill which is supposed to make state aid available to local government for capital improvement projects. That's not what the bill does. The bill makes state money available for capital improvement projects primarily in the areas of the state where there is no local government.

It would be quite simple to set up a local government capital improvement fund and allow each local government to draw on that fund based upon it's population. Sen. Sturguluski's bill, SB546, however, has an intricate formula of entitlement. It is safe to say that with Anchorage having nearly 50 percent of the population, it will only be able to draw about 5 percent of the money.

HER BILL DIVIDES half of the fund based on population plus a cost differential factor. The effect of the cost differential factor is that each Anchorage citizen is counted as one-fifth of a citizen or each remote area citizen is counted as five citizens. The other half of the fund is to be divided based upon area. Now what in the world does area have to do with capital improvements? Capital improvements are designed for the use of people. The size of the area is further bent by the application of the construction cost factor, which results in the urban areas being cut by five or the rural areas being multiplied by five.

Her bill provides that the state shall put $200 per citizen into the fund and under her complicated formulas, Anchorage will receive about $10 per citizen. The other $190 per citizen will go to the other areas of the state where there is not any local government. All of the urban areas of the state are dramatically penalized.

Our state government should be doing everything that it can to promote the rural areas of the state to form local governments. By forming local governments they can accept some of the tax burden of government and can assume the responsibility for providing the necessary local government services. This legislation is a disincentive to form a local government.

Also in Sen. Sturguluski's bill the urban area with the local government must assume the cost of maintenance and operation, which is appropriate. However, the vast areas of the state with little population can draw on the account for maintenance and operation.

Everyone, including a governor and a legislator, is entitled to his own opinion. However, our elected representatives ought not to tell us one thing while doing another.

We can still win, but it is now the fourth quarter and we, the Alaskans Citizens, are behind 49-7.

Tom Fink, an Anchorage insurance man, is a former speaker of the Alaska House of Representatives.

CAPITAL FOUNDATION PROGRAM
(Construction and Maintenance)

FORMULA

Appropriations. The amount of appropriations authorized to be made to the capital foundation program for a fiscal year is equal to two hundred dollars times the state population.

Distribution. Amounts in the capital foundation program shall be distributed annually to municipalities and unorganized boroughs by the department by (a) allocating one-half of the amounts on the basis of population and one-half on the basis of area; and (b) determining the share of an individual municipality or unorganized borough by multiplying its population and area by the construction cost differential for that region. The minimum grant shall be five per cent of the largest distribution made to any municipality or unorganized borough.

Construction Cost Increases. The Department of Transportation and Public Facilities shall submit to the legislature on or before February 15 of each year an estimate of the average percentage increase in construction costs in the state during the previous year.

DEFINITIONS

(1) 'population" means the population of the state, municipality, or an unorganized borough as determined by the department using the latest figures of the U.S. Bureau of the Census or other reliable population data, including but not limited to school enrollments, public utility connections, registered voters, or certified employment payrolls.

(2) "construction cost differential" means one plus the percentage by which average construction costs in a region are greater than or less than the average construction costs in Anchorage as determined by the Department of Transportation and Public Facilities using the latest figures.

(3) "department" means the Department of Community and Regional Affairs.

Distribution

Capital Foundation Program funds will be distributed by formula to boroughs and to unified home rule municipalities, provided each has developed a capital improvement plan which includes a priority listing of capital improvement projects. In organized boroughs the cip will need assembly approval, after a public hearing.

In third class boroughs and for the unorganized borough, the following measures are taken to provide for planned regional development of capital improvements, as there is no regional government responsible for planning and expending funds.

Funds will be distributed to unorganized boroughs (SB 348). If this legislation is not passed, funds will be distributed to those areas identified as REAA's.

However, expenditure of the funds for unorganized boroughs is the responsibility of DOTPF. In order to properly plan for and prioritize capital improvements in the unorganized boroughs, advisory groups are established to assist DOTPF. (Amend Chap. 108 SLA 78).

Regional Advisory Councils

Advisory Council members are appointed by the Governor.

Membership of the advisory groups will consist of one elected official from each first class city or municipality, selected by the city. Additional representation from elected officials of second class cities and representatives of unincorporated communities shall be selected from nominations made by the Division of Community Planning, DCRA and DOTPF. Each regional advisory council shall consist of fifteen members.

The regional advisory councils will assist DOTPF in the development of a regional capital improvement plan, in prioritization among projects, in decision making regarding trade-offs between maintenance and new construction, and in project scheduling.

If an unorganized borough opts to become organized, the borough government will assume the capital improvement planning responsibility, responsibility for foundation program funds and may take title to existing capital improvement projects.

Definitions

Maintenance means preservation, upkeep and repair to keep a facility as close as possible to original condition.

Betterment means improvements, adjustments, additions which more than restore to a former condition for better service without major changes in original construction.

Operation means all costs attributable to utilization of the facility, such as heat, light, janitorial services.

CAPITAL FOUNDATION

FUND

Intent

It is the intent of this legislation to establish a capital foundation program which will equitably provide funds for the orderly development of capital improvements throughout the state. It is intended that the planning for such developments reflect regional and local needs and priorities and that, whenever possible, borough governments have complete responsibility for the expenditure of the capital foundation program funds.

This legislation recognizes that most capital development projects have greater than local significance and should, therefore, be planned and prioritized on the regional level. Further, the legislation acknowledges that the cost of construction and the cost of maintenance are closely related and that maximally efficient use of funds is encouraged by combining maintenance and construction funds.

Formula

Please see attached pages.

Funds may be used for either capital construction, betterment or maintenance, but not operation of the facilities. Funds allocated to either organized or unorganized boroughs do not lapse and may be accumulated for large projects or for growth management purposes.

Question: Should there be a ceiling on the amount which may be accumulated by any one borough?

Eligible Facilities

libraries
public protection facilities including fire service and holding facilities
neighborhood parks and other recreation facilities
water/sewer
solid waste and resource recovery facilities
health facilities
community facilities
Transportation facilities such as local service roads & trails, small boat harbors, seaplane floats, local transit facilities and equipment, upgrading and improvements in existing air transport facilities such as aviation aides and improvements and associated field improvements, emergency and/or recreational airstrips, so long as no transportation facilities jeopardize or are inconsistent with the state system as defined in the regional transportation plans and the State Facilities Plan.

However, only projects identified in the capital improvement plan are eligible for Capital Foundation Program expenditures.

ILLUSTRATION OF FORMULA (in round terms)

Base:

	Population	X	Construction Cost Differential			Area (Sq. Mi.)	X	Construction Cost Differential		
Organized Areas	349,000		1.0	=	349,000	149,376		1.0	=	149,376

IN THE SENATE

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to state aid for local capital projects; establishing the capital projects foundation fund; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.42.020 is amended by adding a new paragraph to read:

(14) adopt regulations for management of the capital projects foundation fund established under AS 44.42.100 and administer these funds.

* Sec. 2. AS 44.42 is amended by adding new sections to read:

ARTICLE 2. CAPITAL PROJECTS FOUNDATION GRANTS.

Sec. 44.42.100. CAPITAL PROJECTS FOUNDATION FUND. There is established within the department a capital projects foundation fund for the purpose of providing state assistance to local governments and to the unorganized borough for improvement, maintenance and new construction of capital projects. Within the limits of appropriations for the purpose, the department shall make grants to qualified local governments for capital projects and shall manage grants for capital projects in the unorganized borough.

Sec. 44.42.110. ELIGIBLE FACILITIES. A grant from the capital projects foundation fund may be used for improvement, maintenance, or new construction of the following type of facility if the facility is identified in a regional plan under AS 44.42.130:

(1) libraries;

(2) community and emergency detention facilities;

(3) fire halls, including the purchase of fire vehicles;

(4) parks;

(5) recreational facilities;

(6) water and sewer facilities;

(7) health facilities;

(8) community centers;

(9) transportation facilities which do not duplicate and which are not inconsistent with the state transportation system as determined by the department, including

(A) service roads;

(B) trails;

(C) harbors and docks for small boats;

(D) seaplane floats;

(E) public transit facilities, including the purchase of transit vehicles;

(F) emergency and recreational airstrips for small aircraft.

Sec. 44.42.120. REGIONAL ADVISORY COUNCILS. (a) To qualify to receive a grant from the capital projects foundation fund, a local government must establish ~~a regional advisory council of at least five~~ members.

(b) If a version of a bill entitled "An Act establishing unorganized boroughs, amending the responsibilities of state agencies for state programs and services for residents of organized and unorganized boroughs, and authorizing adoption of home rule charters by unorganized boroughs; and providing for an effective date" is enacted, a regional advisory council shall be established for each unorganized borough established under the terms of that enactment. If that bill is not enacted before the effective date of this Act, a regional advisory

council shall be established in each regional educational attendance area organized under AS 14.08.031. There shall be 15 members on each regional advisory council established under this subsection as follows:

(1) one elected official from each first class city in ~~the~~ unorganized borough or regional educational attendance area selected by the city council or assembly;

(2) additional persons, up to a total of 15, selected by the governor from lists of persons nominated by the Department of Transportation and Public Facilities or the Department of Community and Regional Affairs who are elected officials of second class cities or persons from unincorporated communities.

Sec. 44.42.130. CAPITAL IMPROVEMENT PLAN. (a) With assistance from the department, each regional advisory council established under AS 44.42.120 shall formulate a capital improvement plan which identifies all capital projects needed in the region, assigns a priority to each identified project, and contains cost estimates for each project.

(b) A capital improvement plan for a local government shall be submitted for approval by the council or assembly of the local government after a public hearing. Revisions in an approved plan must also be submitted for approval before becoming effective. A capital improvement plan for an unorganized borough or a regional educational attendance area shall be submitted for approval by the department after a public hearing.

Sec. 44.42.140. DISTRIBUTION OF GRANTS. (a) Grants from the capital projects foundation fund shall be distributed annually by the department to each local government which has approved a capital improvement plan as required by AS 44.42.130. Amounts from the capital projects foundation fund shall be distributed annually to accounts established by the department for each unorganized borough or for each regional educa-

tional attendance area if unorganized boroughs have not been established by enactment of a version of a bill entitled "An Act establishing unorganized boroughs, amending the responsibilities of state agencies for state programs and services for residents of organized and unorganized boroughs, and authorizing adoption of home rule charters by unorganized boroughs; and providing for an effective date".

(b) The amount of grants to be made to a region shall be determined by multiplying its population and area in square miles by the construction cost differential for that region and using this figure when compared with the total of figures similarly arrived at for all regions to calculate a percentage share of the total appropriation.

Sec. 44.42.150. USE OF GRANTS. (a) A grant from the capital projects foundation fund to a local government may be used only for a facility identified in an approved capital improvement plan. Each local government shall determine which project to finance with the grant received each year under AS 44.42.140.

(b) A grant from the capital projects foundation fund shall be disbursed in accordance with the terms of an agreement between the commissioner and the local government. The agreement may include any provision agreed upon by the parties, but must include in substance the following provisions:

(1) that the local government shall secure, retain and protect title to the site of an existing facility or on which a new facility is to be constructed; for purposes of this paragraph it is sufficient that title is obtained in fee or by a lease which provides that the local government enjoys exclusive use of the land and any improvements for the estimated life of the facility;

(2) that the local government agrees to proceed with and complete the proposed project expeditiously in accordance with plans

submitted to the department;

(3) that the local government agrees to assume responsibility for the operation of the facility, and the feasibility of the discharge of this obligation shall be demonstrated to the satisfaction of the commissioner before the payment of state money;

(4) that the grant will not exceed the estimated total project cost as determined by the commissioner.

(c) If it appears that the cost of a facility financed in part by a grant from the capital projects foundation fund will vary substantially from costs estimated at the time a grant was made for the facility from the capital projects foundation fund, the local government is responsible for obtaining the additional money. The additional money may be obtained from other grants made from the capital projects foundation fund to the local government. If a project costs less to complete than estimated, the local government may apply to use this money on other projects as provided in this subsection.

(d) A grant from the capital projects foundation fund may be used by a local government to match other state or federal grants.

(e) In the unorganized boroughs or regional educational attendance areas each regional advisory council shall determine annually which projects identified in its capital improvement plan to finance. The department is responsible for the projects selected. The regional advisory council for the unorganized borough or the regional educational attendance area is responsible for the operation of a facility financed by a grant from the capital projects foundation fund and the feasibility of the discharge of this obligation shall be demonstrated to the satisfaction of the commissioner before the department begins work on a project.

Sec. 44.42.160. DEFINITIONS. In AS 44.42.100 - 44.42.160

(1) "construction cost differential" means one plus the percentage by which average construction costs in a region are greater than or less than the average construction costs in Anchorage as determined by the department using the latest available figures;

(2) "improvement" means renovations and additions to an existing facility which allow for better service than the facility provided in its original condition;

(3) "improvement, maintenance or new construction" includes, in addition to costs directly related to the project, the total of all costs of financing and carrying out the project; these include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase, construction, reconstruction and improvement of real property; an allocable portion of the administrative and operating expenses of the grantee; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of other items, including indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary;

(4) "local government" means the government of a unified home rule municipality or organized borough;

(5) "maintenance" means restoration and repair needed to keep a facility as close as possible to its original condition;

(6) "population" means the population of a unified home rule municipality, organized borough, or unorganized borough or regional educational attendance area as determined by the department using the latest figures of the United States Bureau of the Census or other reliable sources of population data, such as school enrollment figures,

public utility connection figures, registered voter rolls, certified employment payrolls;

(7) "region" means a unified home rule municipality, organized borough, and unorganized borough established if a version of a bill entitled "An Act establishing unorganized boroughs, amending the responsibilities of state agencies for state programs and services for residents of organized and unorganized boroughs, and authorizing adoption of home rule charters by unorganized boroughs; and providing for an effective date" is enacted, or a regional educational attendance area which has an approved capital improvements plan.

* Sec. 4. This Act takes effect July 1, 1980.

CITY OF YAKUTAT

April 10, 1980

Senator Arliss Sturgulewski
Chairperson, Senate C/RA
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Senator Sturgulewski:

Thank you for the materials on SB 546, the capital foundation fund.

As drafted this proposed legislation would go a long ways to alleviating the capital improvement crunch we find ourselves in.

During late 1978, Yakutat drafted and accepted a capital improvement plan. Implemention, however, is slow and painful as the local funding base is insufficient to provide the necessary match funds to secure various loan/grant funds to execute the needed projects.

SB 546 would provide just such a capital base to proceed with needed projects in a timely fashion and yet avoiding prohibitively high local citizen assessments and taxation.

The City of Yakutat supports SB 546 and pledge our assistance as may be needed to assure its passage.

Your committee should be credited for the time, energy and forethought given the proposed capital foundation fund legislation.

Sincerely,

James M. Kohler
City Manager

mjr

ILLUSTRATION OF FORMULA (in round terms)

BASE:

	Population	X	Construction Cost Differential			Area (Sq. Mi.)	X	Construction Cost Differential		
Organized Areas	349,000		1.0	=	349,000	149,376		1.0	=	149,37
Unorganized Boroughs	80,000		1.25	=	100,000	437,036		1.25	=	546,29
	429,000				449,000	Rhoades				695,67

APPROPRIATION: 429,000 X $200 = $ 85,800,000
429,000 X $400 = $171,600,000

ENTITLEMENTS:

$$\frac{\text{Adjusted Local Population}}{\text{Adjusted Total Population}} + \frac{\text{Adjusted Local Area}}{\text{Adjusted Total Area}} \times \text{One-half Appropriation} = \text{Entitlement}$$

Organized Areas

$$\frac{349,000}{449,000} + \frac{149,376}{695,671} = .995 \times \$85,800,000 = \$85,371,000$$

Unorganized Boroughs

$$\frac{80,000 \times 1.25}{449,000} + \frac{437,036 \times 1.25}{695,671} = 1.005 \times \$85,800,000 = \$86,229,000$$

STATEWIDE TOTAL = $171,600,000

Metlakatla - Annette

$$\frac{1,203}{449,000} + \frac{250}{695,671} = .0030 \times \$85,800,000 = \$\ 257,400^*$$

Chugach

$$\frac{9,298}{449,000} + \frac{17,203}{695,671} = .0455 \times \$85,800,000 = \$\ 3,903,900$$

ILLUSTRATION OF FORMULA (in round terms)

Base:

	Population	X	Construction Cost Differential			Area (Sq. Mi.)	X	Construction Cost Differential		
Organized Areas	349,000		1.0	=	349,000	149,376		1.0	=	149,376
Unorganized Boroughs	80,000		1.25	=	100,000	437,036		1.25	=	546,295
	429,000				449,000					695,671

Appropriation: 429,000 X $200 = $85,800,000

Grant:

Adjusted Per Cent of Population X $200
Adjusted Per Cent of Area X $200

Organized Areas

$\frac{349,000}{449,000}$ = .78 X $42,900,000 = $33,462,000

$\frac{149,376}{695,671}$ = .215 X $42,900,000 = 9,223,500

$42,685,500 $42,685,500

Unorganized Boroughs

$\frac{100,000}{449,000}$ = .22 X $42,900,000 = $ 9,438,000

$\frac{546,295}{695,671}$ = .785 X $42,900,000 = 33,676,500

$43,114,500 43,114,500

Total $85,800,000

Capital Development Foundation

1. The problem is divisable into
   a) what should the formula be and what facilities/maintenance should it cover and
   b) to whom should it go?
2. To whomever it goes, the following principles need to be observed
   a) no special service districts
   b) no forcing of government on people
   c) equitable distribution
   d) simplicity of classes of recipients

3. Regarding (2) as many extra concerns that can be incorporated, the better.
-transportation planning, effects of reapportionment

Concept: The money will go to boroughs, when there is a borough. Th should have a cip. Ditto home rule municipalities. When it is a third class boro (if they survive this session), they will be treated as the next lower class.

In the unorganized boro:

Funds will be distributed along the boundry of 1) the unorganized boros as per SB or if SB is not enacted, 2) along the lines of the REAA. However, as there is no xxxxx boro government responsible and accountable for planning and expending money--or that can own title to land, property, etc--those functions will have to remain with the state. When the furctions are retained by the state, DOTPF will plan for PF under Chap.168 SLA 78 on a regional basis (per SB unorganized boro bill). To facilitate that planning process, each unorganized boro will have its own advisory group to advise and assist DOTPF. A CIP will be developed for each and funds expended accordingly.

If and when an unorganized boro opts to become organized, then they would assume the planning/fund expending functions and would, additionally, take title to whatever property there may be. The same principle will apply to maintenance funds.

TO: Senator Sturgulewski
FROM: Rep. Bill Parker
DATE: 4/15/80
RE: Capital Projects Foundation Fund Bill

The Capital Projects Foundation Fund bill (SB 546) has been reviewed and will be introduced in the House on 4/16/80 with the following changes:

p. 1 Article 2 Sec. 44.42.100 (a)

Entitlements for capital projects shall be made to organized boroughs, home rule municipalities as defined in AS 29.08.010, and to unified municipalities.(These references are used throughout the House version)
p. 2 A new (c) is added and subsequent sections renumbered.

(c) A first class city which has not adopted a home rule charter and which is outside of an organized borough and outside of a regional educational attendance area shall be included in the capital improvement plan and shall be represented on the regional council of a regional educational attendance area or an unorganized borough which borders the city.

p. 3 Sec. 44.42.120 Regional Council representation will be a follows:

A Regional council shall be composed of 15 members as follows:

(1) one elected official who is selected by the city council of each first class city located within an unorganized borough or regional educational attendance area, or which is included in an unorganized borough's capital improvement plan or a regional educational attendance area's capital improvement plan
(2) additional members selected by the governor from persons nominated by the Department of Community and Regional Affairs who are from second class cities and unincorporated communities within an unorganized borough or regional educational attendance area; members from second class cities shall be elected officials.

p. 4 line 1 Reworded as follows:

(5) identify possibilities for projects involving facilities having more than one use

p. 4 Line 25 and following read:

(b) the amount of an entitlement shall be allocated one-half on the basis of adjusted population and one-half on the basis of adjusted area. An entitlement shall be the ratio of the adjusted population to the total adjusted population plus the ratio of the adjusted area to the total adjusted area, times one-half the amount of an appropriation to the capital projects foundation fund.

p. 5 line 12 A new (c) is added:

(c) An entitlement from the capital projects foundation fund for a project located in a first or second class city as part of the capital improvement plan of an unorganized borough or a regional educational attendance area may be disbursed, with the concurrence of the city countil of the first or second class city, subject ot the following terms; (continues as SB 546 p. 5 line 13)

RE: Capital Projects Foundation Fund Bill

We have reviewed SB 546 and would like the House version of the bill drafted as a companion to SB 546 but with the following changes:

p. 3 lines 8 and following should read:
(1) one representative from each first class city selected by their city councils who are elected officials from first class cities located within the unorganized borough or regional educational attendance area;
(2) additional members selected by the governor from persons nominated by the Department of Community and Regional Affairs who are from second class cities and unincorporated communities within the unorganized borough or regional educational attendance area. Second class city representatives shall be elected officials.

p. 4 line 1
(5) identify shared facility opportunities

p. 5 lines 10 and following:
Delete wording following "recipient"
Draft a new (c) to read as follows:
(c) For projects built in first or second class cities in the unorganized boroughs, upon concurrence by the Council, the commissioner may make an agreement including any provision agreed upon by the parties, including the following:
(continue with line 13)

Bill would like the bill ready for our 8:30 A.M. Committee meeting on 4/9 and for introduction that day. Many thanks.

BILL NUMBER AND TITLE: HB 1010 Capital Foundation Fund

ORIGINAL SPONSOR: House/Senate C&RA
RECEIVED FROM:

OTHER SPONSORS:
FURTHER REFERRALS: Finance

HEARING DATE: 5/2/80

MEMBERS PRESENT:

Bill Parker	X	Pat Carney	X
Margaret Branson	X	Charlie Parr	X
Pat O'Connell	X	Fred Zharoff	X
		Ray Metcalfe	X

Lee Sharp, Municipal Attorney, Juneau

Basically in favor of any form of revenue hsaring and generally favors state assistance for capital projects however there are two basic defects in the bill as presently written:
(1) Area is used as a major component in the formula
(2) Bill contains a basic disincentive to organization in th. sparcely populated, smaller communities.

Opposed to having population and area considered equally. It is people who generate the need for capital projects and it seems irrelevant to take into consideration the water within the borough of Juneau or the large land masses of the North Slope Borough.

Technical problems with the bill are:

* Assistance is not going to first and second class cities, rather just those otherwise organized.
* How would you could the population of a borough and the first class and home rule cities within it?
* Why don't first and second class cities receive consideration for assistance?
* If a borough doesn't exercise Parks and Recreation or another power for which money/facilities are being provided, how could they operate same?
* Does the requirement for a 5 year Capital Plan create conflict for those communities which currently develop 6 or 7 year plans? (perhaps the mandate for annual updating solves this problem)
* P. 5 line 1 Why is the plan of the organized municipality submitted to the regional council?
* P. 5 General problem with the formula as contained in the bill. The amount of area taken into consideration should be reduced as it distorts the situation.
* P. 6 l. 1 What does the term "agreement" mean? This require-] ment is a problem.
* P. 7 lines 18-20 Questions whether the Dept. of Labor figures are updated annually and suggests that the municipality-determined population figures used in revenue sharing be considered instead.

COMMITTEE ACTION:

No action

TAPE # 10 SIDE 1 Footage 486-1785

Sharp reiterates that he likes the idea but not with the formula in the bill. It is people not area which creates "need". Further, if the stat is going to provide maintenance, there is no incentive for organization.

Dennis Dooley, SouthEastern Director of Programming for Dept. of Transportation and Public Facilities
Raises points in attached notes.

Parr- Suggests that cost of construction rather than cost of doing business be used as in the school formula.

Dooley - Responds that it would be difficult to sue school differential costs for other capital projects. Refers to p. 8 and asks how "costs" are going to be paid? Suggests that there needs to be clarification on how the service charge for required bond sales to implement the projects will be paid.

Parr - Asks for the distinction between major and minor maintenance costs.

Dooley - States that $50,000 is usually considered the dividing line between costs associated with maintenance being considered those under $50,000 (minor maintenance) and those above $50,000 as major . Those considered minor are usually in the operating budget.

Jim Kohler, Manager, City of Yakutat
Supports strongly the concept embodied in the bill as a good and innovative as well as simple approach to funding capital projects. It allows the local political subdivision to determine its priorities and to execute those priorities. It requires locally based planning. Suggests that the basic concept and worth of the bill not be overlooked in dealing with some of the technical and formula problems.He agrees with some of the technical problems cited by Sharp but says that the formula is not improperly skewed toward sq. mile consideration. Some weight must be included for land to offset some fixed costs for such facilities. The mechanics of fund distribution needs some work. A helpful exercise might be to look at what local governments are statutorily authorized to do and to allow entitlements to go to municipalities which have power to plan and execute. City budgets address costs which must be included in such projects and these priorities should be set by local government.

Parr - Watershed decision needs to be made re local vs. state responsibility in each of the listed areas for funding.

Dooley - Local concerns might also be regional and statewide.

Ginny Chitwood - Ex. Director, Ak. Municipal League
The 50%/50% gives too much weight in the formula to area but it should be recognized that area is a facotr. The mechanics of distribution presents some problems in that first class cities have the same powers basically as do home rule. The basic powers delegated are the same as home rule.

Compositon of regional councils with "one" representative elected from each city may not be enough. There should be more flexibility in the composition.

There may be a problem when second class boroughs having adopted few powers and containing first class or second class cities which may have adopted more powers.

Dooley's Notes

HB 1010

1. Perhaps a better definition of local capital project

(2) can a location agree to have their funds spent on a State responsibility project if it is of a higher priority

3. Can home rule cities agree to have their funds spent outside their boundaries

(4) Can a ~~city~~ borough and a home rule city agree to combine their funds and build projects in each others areas

5. Can a home rule city petition for inclusion along with the unorganized area which encompasses it?

6. Regional Councils
   - 15 members
   - who perform these services from the organized & home rule cities
   - 44.42.120

7. 44.42.130 (1)
   (shall) ~~coord~~ ~~beg~~ all
   list & effort to be required to identify all
   would require efforts that would be wasted
   + − limit to approx total of funding available
   44.42.130

8. (4) this would be the total of all projects

44.42.130

who is to define this "need"?

(9) 44.42.130

(c) doesn't appear to tie to earlier definition of regional council

10 44.42.140 (see 44.42.150(b))

Distribution should not be immediate but should allow for the cash flow to match the cash needs

11 140(b)

+ feel that the ratios should be simplified to drop area diff.
+ weighted in favor of area too highly → should limit to a max per capita either as a $ or ratio to lowest per capita

12 what about the need for a project which was not in the list

(B) ~~management~~ definition needs to have ~~a lower~~ lower $ limit to when does it become operations -

could they buy heating oil - repair pipes since they did not buy last?

pg 2
ln 12-14 Labor census ? → annual

pg 3 confusion as to regular state roles

question of sufficient to be CIP plan

pg 4 all capital projects state funds?
local ?
parameters ?
4) which are not eligible ? rules

(5) concur
(6) concur } are these criteria
(7) concur } to be used in prioritization
↳ state projects ?

b)

pg 5 b) ~~any~~ directed for citrus areas
how ratio of total area varies

↳ ln 22 is a priority required

pg 7 ln 12 sec 5 varie
a) too much to hold validity
by exogenous variables
b) to each one ?

pg 8 # for potential bond sales

The Honorable Arliss Sturgulewski
Chairman
Senate Community & Regional Affairs Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

With reference to SB 546 proposing a Capital Foundation Fund for construction of capital projects through-out Alaska, I feel that this legislation is well written and would urge it's passage. In particular, I like the language which insures special recognition of Rural capital needs.

If you have any comments, please advise.

Sincerely,

State Public Facilities Plan -
FY 81 C.I.P. Review Phase

As mandated by Chapter 168/78, the Department of Transportation and Public Facilities has conducted a review of the FY 81 Capital Improvement Budget requests as submitted by the various program agencies to the Division of Budget and Management.

The intent of this review effort was to provide technical assistance on construction-related projects being proposed through budget requests and to complete Phase I of the State Public Facilities Planning process. The process outlined in the attached work plan was accomplished (see attachment 1).

Due to the relatively short time frame of the actual review period (September 20 through October 12), a screening process was developed to insure that all C.I.P. proposals received had been considered at some level of examination. The review summary (attachment 2) shows all proposed projects received by our Department for analysis. This summary also indicates three basic levels of review and the "Comments for Consideration - FY 81 C.I.P. Budget Proposals" that are attached for your use (attachment no. 3). These levels are summarized as follows:

Level 1 - All FY 81 C.I.P. Budget requests received were reviewed for scope of work described. Projects involving only equipment purchases and minor installation work were drooped for further review (attachment 2 includes a listing of all projects eliminated from review at this level).

Level 2 - FY 81 C.I.P. project proposals were then looked at from four different areas of Capital Improvement Planning and Procurement. These four areas are as follows:

A. Life Cycle Cost Analysis - A general evaluation of initial and ultimate project cost estimates as presented on the Form 35a was made and correlated with any previous LCC analysis made on that project.

B. Inventory and Condition Survey - Budget/project requests dealing with proposed additions and/or alterations to existing facilities were compared to field surveys currently being conducted on state-owned facilities by this Department.

C. Combined/Companion Facilities - Proposed projects were studied to identify apparent opportunities for combining projects based on similar needs and locations. Also, parameters were set to review proposals for consideration and impact of related companion C.I.P. projects, such as sewer and water, access and acquisition requirements, communication facilities and transportation facilities.

D. Scheduling Analysis - General evaluation was made of project schedules being proposed by the program agencies. These schedules were compared to established scheduling guidelines, proposed funding sources (fed., Gen. Fund, G.O. Bond), and other projects (both currently authorized and proposed) in same location or in reasonable proximity. The type of contracting method being proposed was also considered in analysis.

Level 3 —After reviewing C.I.P. Budget requests through application of the above criteria, those proposed projects receiving comments of little or no major impact were eliminated from further processing. The remaining projects, along with review comments felt to be of potential substance, were grouped together by program agency and are submitted with a summary form indicating what types of comments were made (see attachment 3).

Per your request, six sets of these proposed projects with our review comments are attached for consideration by your staff. Only those FY 81 projects reaching the third level on analysis are included. Because of the short time for this processing, our comments in the four review areas remain in handwritten form and are attached to copies of budget forms 35A for ease of identification by your analysts.

It should be noted that the depth of analysis by our Department is limited by lack of complete field data from Inventory and Condition Surveys, and lack of background data being completed on combined facilities projects. Lack of comment should not be construed as acceptance of individual projects being proposed. Mitigation of the investigative results is most likely inherent in our condensed review for this funding cycle. It's hoped that the next budget cycle will commence early enough to allow our two agencies more time to get together earlier in the process toward the realization of comprehensive planning. We think that this is a good beginning.

One general comment on the Capital Improvement proposals concerns the code upgrading, handicapped barrier removal and energy conservation types of projects. It was noted several agencies have submitted requests addressing these rehabilitation-type projects based on the findings of our Facility Inventory and Condition Survey teams. A complete list of sites that have been, are presently, or will be visited and inspected by our Department is enclosed (attachment 4). Of importance is the fact

that our Department has also submitted several statewide Capital Improvement requests aimed at correcting these same items. Total coordination of these projects should be made to avoid duplication funding. DOT/PF's requests were NOT considered to be for any specific sites but more to establish fund to address the problems being found in existing facilities owned by the State. It was envisioned that a prioritization of actual projects funded through this source would be established to enable the most cost effective and objective execution of this required work.

If there are any questions on the attached review comments that we can help clarify, please contact me at 266-1642 in Anchorage or Warren Sparks at 465-4070 in our Juneau office.

This review process have been very beneficial to us. Through the opportunity of this over-view many general questions and comments have surfaced concerning the present system being utilized for Capital Improvements. At some point, when time permits, we'd like to discuss these with you and your staff in an attempt to further improve our services to you and to the State's overall effort towards logical growth.

Senator Arliss Sturgulewski
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski,

I have just finished my review of the literature you and Representative Parker sent on SB 546. I feel that SB 546 warrants considerable praise in that it is an equitable bill that does not favor one area over another. More importantly, it will provide for the construction of basic facilities in small communities which will lead to an increase of services for those communities and surronding areas. The fact that the bill allows for the maintenance of constructed facilities is extremely import. In too many cases, facilities go unused and deteriorate from a lack of fuel and maintenance.

I am, however, concerned over the administration of the program should the bill be enacted this session. If the dealings that the City of McGrath has had with DOTPF are indicative of DOTPF's administration of rural projects, I am fearful that overhead and engineering will seriously reduce the effectiveness of the program for the unincorporated boroughs. At the present time, DOTPF takes 15% for engineering and additional percentages for overhead. Take Project SOS-1(024) for example. Public hearings were held in McGrath on 9/19/78. The City was led to believe, the letters are on file in my office, that the project would be completed during the summer of 1979. The project was delayed beyond the 1979 construction seasons. Ombudsman Complaint A79-0988 revealed that delays in the project cost the project $79,000. Moreover, there was not sufficent money left in the project to complete it! I would estimate that $125,000 was lost from the project due to delays, engineering and travel and per diem. In order to complete the project, the City went for a supplemental appropriation for $200,000. Yesterday, I took DOTPF's material estimates and cost and calculated the cost of the entire project. At their estimate, the entire project should have cost approximately $348,000 and not the $530,000 which they told the Ombudsman!

Senator Sturgulewski, I and many others have no faith in DOTPF when it comes to the administration of CIP in rural Alaska. Many second class cities and REAAs can do the same job for less money

with better results. In my opinion, and it is my opinion only, I think that DOTPF keeps the rural CIPs on the back burner so that the overhead will finance their operations.

I would recommend that SB 546 contain provisions for those communities which have demonstrated the ability to complete a CIP which would limit or eliminate DOTPF's participation in this program. I feel that the State and the taxpayers would get more for their money.

Thank you for the oppertunity to comment on SB 546 and to sound off about DOTPF.

Sincerely,

Robert S. Juettner

Robert S. Juettner
City Administrator

CITY OF YAKUTAT

April 10, 1980

Senator Arliss Sturgulewski
Chairperson, Senate C/RA
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Senator Sturgulewski:

Thank you for the materials on SB 546, the capital foundation fund.

As drafted this proposed legislation would go a long ways to alleviating the capital improvement crunch we find ourselves in.

During late 1978, Yakutat drafted and accepted a capital improvement plan. Implemention, however, is slow and painful as the local funding base is insufficient to provide the necessary match funds to secure various loan/grant funds to execute the needed projects.

SB 546 would provide just such a capital base to proceed with needed projects in a timely fashion and yet avoiding prohibitively high local citizen assessments and taxation.

The City of Yakutat supports SB 546 and pledge our assistance as may be needed to assure its passage.

Your committee should be credited for the time, energy and forethought given the proposed capital foundation fund legislation.

Sincerely,

James M. Kohler
City Manager

mjr

Re: SB546

Dear Arlis:

The City of Barrow would like to provide written testimony on SB546 Capital Foundation Fund. We had anticipated being able to provide input via the teleconference network, unfortunately, the phone company was unable to provide a hook-up in time.

We wholeheartedly support the concept of the type of program proposed in SB546. However, we would like to raise several questions for your consideration.

a. Where does a home rule municipality such as the North Slope Borough fit into this type of program. We note mention of "organized" First Class Boroughs, Organized Second Class Boroughs, and Unified Home rule Municipalities, but nothing about Organized Home rule Boroughs.

b. How much control or input will local municipalities located in a Borough have in determining what capital improvement programs will be selected for inclusion under this bill.

c. Will cities and boroughs be able to work together effectively when a city has the statutory responsibility for a particular service or facility, but the borough is the one receiving funding that could be used on the cities projects.

d. To us, the intent of Sec. 44.42.150 is unclear. It seems to imply that a borough is the fund recipient, but the cities are the ones that will own/operate/maintain facilities funded by SB546. If that is the case, the same question asked is C above should also be asked here.

e. How will this program relate to the Annual Overal Economic Development Plan (OEDP) developed by some areas for the Economic Development Administration (EDA).

f. Sec. 44.42.150 C might be changed to allow for an adjustment factor that could allow for a cost override or project increase up to a certain amount. Perhaps a fixed percentage of the project cost. Some smaller communities might not be able to raise additional funds, and would thus have to scrap the entire project because of a 4 or 5 thousand dollar price increase.

We appreciate your considerations and the opportunity to actively participate in the decision making of Alaskas future.

Sincerely yours,

Bryan MacLean
City Manager

April 3, 1980

Dear Alaskan:

This package of material is about SB 546, proposing a Capital Foundation Fund for construction of capital projects throughout Alaska. This bill is a further result of the work conducted by the Joint House and Senate Community and Regional Affairs Committees during the summer of 1979. During the course of the Committees' work, many people identified problems regarding planning for and funding capital projects. We feel that SB 546 proposes a viable solution to difficulties experienced throughout the state. We hope that you will read the enclosed descriptive materials and the bill itself.

Senate Bill 546 proposes a systematic approach to construction of capital projects. Every area of the state would receive a formula entitlement, much like revenue sharing. Expenditure of the entitlement requires only the development of a capital improvement plan. In organized boroughs and home rule municipalities, local governments plan for and expend these funds themselves for eligible projects. In unorganized boroughs (as defined in SB 348 and HB 580), an advisory group plans for the capital projects, though the funds are expended by the Department of Transportation and Public Facilities, as their fiscally responsible agent.

Funds may be used for a variety of capital projects. Priorities are annually established on the borough level. Maintenance costs are also eligible for use of these Capital Foundation Funds. There are many other significant considerations in SB 546. Please read the descriptive material and the bill itself. Contact us regarding any suggestions for changes, comments, etc.

We look forward to hearing from you about the Capital Foundation Fund.

Sincerely,

Arliss Sturgulewski

Information Sheet

CAPITAL FOUNDATION FUND

The Capital Foundation Fund will, by appropriation, provide funds to all areas of the State for certain capital improvements. To expend funds, each area will need to develop an areawide capital improvement plan, approved by the local assembly when there is one, and developed with the Department of Transportation and Public Facilities when there is no local government.

Organized and unorganized boroughs are encouraged to conduct regionwide planning to avoid costly duplications of capital projects and to prioritize, on the local level, needs among communities, rather than leaving this process to state level government.

Each area, so long as appropriations are made, is certain of a source of funding for local projects. Each area will receive a formula share of the appropriation. This stability will be advantageous to local governments for planning purposes. Additionally, unlike the current situation, areas may have greater ability to use capital projects for anti-cyclic economic benefits by being in control of fund expenditures. Annual funds do not lapse and may be accumulated for locally determined purposes.

Capital Foundation Funds may be used as the local match required for certain state and federal projects. This will be particularly significant in rural areas which do not now have a source of local match.

Funds are eligible for both construction and maintenance costs. This means that local governments will be encouraged to consider life-cycle costs and encouraged to maintain buildings and other improvements in order to maximize the efficiency of their capital dollars.

Local government under the Capital Foundation Fund program, will be assured of a steady supply of state funds for capital improvements that will be directed toward locally determined project needs and can be expended at a locally determined pace.

IN THE SENATE

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to state aid for local capital projects; establishing the capital projects foundation fund; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.42.020 is amended by adding a new paragraph to read:

(14) adopt regulations for management of the capital projects foundation fund established under AS 44.42.100 and administer these funds.

* Sec. 2. AS 44.42 is amended by adding new sections to read:

ARTICLE 2. CAPITAL PROJECTS FOUNDATION GRANTS.

Sec. 44.42.100. CAPITAL PROJECTS FOUNDATION FUND. There is established within the department a capital projects foundation fund for the purpose of providing state assistance to local governments and to the unorganized borough for improvement, maintenance and new construction of capital projects. Within the limits of appropriations for the purpose, the department shall make grants to qualified local governments for capital projects and shall manage grants for capital projects in the unorganized borough.

Sec. 44.42.110. ELIGIBLE FACILITIES. A grant from the capital projects foundation fund may be used for improvement, maintenance, or new construction of the following type of facility if the facility is identified in a regional plan under AS 44.42.130:

(1) libraries;

(2) community and emergency detention facilities;

(3) fire halls, including the purchase of fire vehicles;

(4) parks;

(5) recreational facilities;

(6) water and sewer facilities;

(7) health facilities;

(8) community centers;

(9) transportation facilities which do not duplicate and which are not inconsistent with the state transportation system as determined by the department, including

(A) service roads;

(B) trails;

(C) harbors and docks for small boats;

(D) seaplane floats;

(E) public transit facilities, including the purchase of transit vehicles;

(F) emergency and recreational airstrips for small aircraft.

Sec. 44.42.120. REGIONAL ADVISORY COUNCILS. (a) To qualify to receive a grant from the capital projects foundation fund, a local government must establish ~~a regional advisory council of at least~~ five members.

(b) If a version of a bill entitled "An Act establishing unorganized boroughs, amending the responsibilities of state agencies for state programs and services for residents of organized and unorganized boroughs, and authorizing adoption of home rule charters by unorganized boroughs; and providing for an effective date" is enacted, a regional advisory council shall be established for each unorganized borough established under the terms of that enactment. If that bill is not enacted before the effective date of this Act, a regional advisory

council shall be established in each regional educational attendance area organized under AS 14.08.031. There shall be 15 members on each regional advisory council established under this subsection as follows:

(1) one elected official from each first class city in the unoganized borough or regional educational attendance area selected by the city council or assembly;

(2) additional persons, up to a total of 15, selected by the governor from lists of persons nominated by the Department of Transportation and Public Facilities or the Department of Community and Regional Affairs who are elected officials of second class cities or persons from unincorporated communities.

Sec. 44.42.130. CAPITAL IMPROVEMENT PLAN. (a) With assistance from the department, each regional advisory council established under AS 44.42.120 shall formulate a capital improvement plan which identifies all capital projects needed in the region, assigns a priority to each identified project, and contains cost estimates for each project.

(b) A capital improvement plan for a local government shall be submitted for approval by the council or assembly of the local government after a public hearing. Revisions in an approved plan must also be submitted for approval before becoming effective. A capital improvement plan for an unorganized borough or a regional educational attendance area shall be submitted for approval by the department after a public hearing.

Sec. 44.42.140. DISTRIBUTION OF GRANTS. (a) Grants from the capital projects foundation fund shall be distributed annually by the department to each local government which has approved a capital improvement plan as required by AS 44.42.130. Amounts from the capital projects foundation fund shall be distributed annually to accounts established by the department for each unorganized borough or for each regional educa-

tional attendance area if unorganized boroughs have not been established by enactment of a version of a bill entitled "An Act establishing unorganized boroughs, amending the responsibilities of state agencies for state programs and services for residents of organized and unorganized boroughs, and authorizing adoption of home rule charters by unorganized boroughs; and providing for an effective date".

(b) The amount of grants to be made to a region shall be determined by multiplying its population and area in square miles by the construction cost differential for that region and using this figure when compared with the total of figures similarly arrived at for all regions to calculate a percentage share of the total appropriation.

Sec. 44.42.150. USE OF GRANTS. (a) A grant from the capital projects foundation fund to a local government may be used only for a facility identified in an approved capital improvement plan. Each local government shall determine which project to finance with the grant received each year under AS 44.42.140.

(b) A grant from the capital projects foundation fund shall be disbursed in accordance with the terms of an agreement between the commissioner and the local government. The agreement may include any provision agreed upon by the parties, but must include in substance the following provisions:

(1) that the local government shall secure, retain and prote title to the site of an existing facility or on which a new facility is to be constructed; for purposes of this paragraph it is sufficient that title is obtained in fee or by a lease which provides that the lo al government enjoys exclusive use of the land and any impro ements for th estimated life of the facility;

(2) that the local government agrees to proceed with and complete the proposed project expeditiously in accordance with plans

submitted to the department;

(3) that the local government agrees to assume responsibility for the operation of the facility, and the feasibility of the discharge of this obligation shall be demonstrated to the satisfaction of the commissioner before the payment of state money;

(4) that the grant will not exceed the estimated total project cost as determined by the commissioner.

(c) If it appears that the cost of a facility financed in part by a grant from the capital projects foundation fund will vary substantially from costs estimated at the time a grant was made for the facility from the capital projects foundation fund, the local government is responsible for obtaining the additional money. The additional money may be obtained from other grants made from the capital projects foundation fund to the local government. If a project costs less to complete than estimated, the local government may apply to use this money on other projects as provided in this subsection.

(d) A grant from the capital projects foundation fund may be used by a local government to match other state or federal grants.

(e) In the unorganized boroughs or regional educational attendance areas each regional advisory council shall determine annually which projects identified in its capital improvement plan to finance. The department is responsible for the projects selected. The regional advisory council for the unorganized borough or the regional educational attendance area is responsible for the operation of a facility financed by a grant from the capital projects foundation fund and the feasibility of the discharge of this obligation shall be demonstrated to the satisfaction of the commissioner before the department begins work on a project.

Sec. 44.42.160. DEFINITIONS. In AS 44.42.100 - 44.42.160

(1) "construction cost differential" means one plus the percentage by which average construction costs in a region are greater than or less than the average construction costs in Anchorage as determined by the department using the latest available figures;

(2) "improvement" means renovations and additions to an existing facility which allow for better service than the facility provided in its original condition;

(3) "improvement, maintenance or new construction" includes, in addition to costs directly related to the project, the total of all costs of financing and carrying out the project; these include, but are not limited to, the costs of all necessary studies, surveys, plans and specifications, architectural, engineering or other special services, acquisition of real property, site preparation and development, purchase construction, reconstruction and improvement of real property; an allocable portion of the administrative and operating expenses of the grantee; the cost of financing the project, including interest on bonds issued to finance the project; and the cost of other items, including indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary;

(4) "local government" means the government of a unified hor rule municipality or organized borough;

(5) "maintenance" means restoration and repair needed to ke a facility as close as possible to its original condition;

(6) "population" means the population of a unified home rul municipality, organized borough, or unorganized borough or regional educational attendance area as determined by the department using the latest figures of the United States Bureau of the Census or other reliable sources of population data, such as school enrollment figures,

public utility connection figures, registered voter rolls, certified employment payrolls;

(7) "region" means a unified home rule municipality, organized borough, and unorganized borough established if a version of a bill entitled "An Act establishing unorganized boroughs, amending the responsibilities of state agencies for state programs and services for residents of organized and unorganized boroughs, and authorizing adoption of home rule charters by unorganized boroughs; and providing for an effective date" is enacted, or a regional educational attendance area which has an approved capital improvements plan.

* Sec. 4. This Act takes effect July 1, 1980.

(7) federal aid — shows a normal debit balance; includes funds expected to be received from federal sources for capital projects;

(8) expenditures, prior fiscal year — shows a normal credit balance;

(9) encumbrances — shows a normal debit balance;

(10) reserve for encumbrances — shows a normal credit balance;

(11) fund balance — shows a normal zero balance.

(d) The annual financial report of the state shall contain the following statements for each capital projects fund:

(1) balance sheet;

(2) analysis of changes in bonds authorized and unissued;

(3) analysis of changes in bonds to be authorized;

(4) analysis of changes in funds to be provided by others;

(5) statement of expenditures and encumbrances compared to appropriations. (§ 8 ch 168 SLA 1978)

Sec. 37.07.070. Legislative review. The legislature shall consider the governor's proposed comprehensive operating and capital improvements programs and financial plans, evaluate alternatives to the plans, make program selections among the various alternatives and determine, subject to available revenues, the level of funding required to support authorized state services. During each regular session of the legislature, legislative review of the plans shall be accomplished according to the following schedule:

(1) By the 45th legislative day, the legislature shall have established by concurrent resolution the total amount of state general funds that shall be available for appropriation for the budget year and the tentative allocation of the funds among program categories in both the operating and capital budgets. The resolution shall be introduced by the finance committee of the house in which the general appropriations bill was introduced.

(2) By the 90th legislative day, the house in which the general appropriations bill was introduced by the governor shall have calendared for second reading a version of the general appropriations bill. The bill shall be supported with documentation to explain the proposed appropriations and related statements of intent. In addition, a list of other appropriations or measures with fiscal implications pending before the legislature shall be included with the documentation for the calendared bill. (§ 1 ch 188 SLA 1970; am § 1 ch 66 SLA 1977; am § 9 ch 168 SLA 1978)

Effect of amendments. — The 1977 amendment added the second sentence of the introductory paragraph and paragraphs (1) and (2).

The 1978 amendment, in the introductory paragraph, substituted "operating and capital improvements programs and financial plans" for "program and financial plan" in the first sentence and "the plans" for "the plan" in the first and second sentences.

Program for pork

It wasn't long ago when Alaskan communities grubbed about in hot competition for a few million dollars a year in state budget appropriations. We cheered heartily when we got a new office building or a new highway out of the tight state budgets to boost our local economy.

Now the state is basking in new wealth, and we find our civic pork barrel specialists dressing their wish lists up like the nouveau riche strutting to their first society affair. It's no longer called "pork" or even "local capital improvements projects"—now it's a grand plan for remaking our cities in some future image.

Down in Anchorage the municipality is pressing the Legislature with a "Program for the 80s" to pour hundreds of millions of state dollars into civic centers, theaters and other projects. Many of the same projects are also advanced again under the cover of a world fair proposal in the "Expo 84" movement.

Up here we have the "Program for Progress," unveiled last week as a joint lobbying effort by the borough and the cities of Fairbanks and North Pole. The legislators who will get this pitch are all smart politicians who know the taste of pork even when it's cooked and served like veal. It's important, however, that the rest of us also understand this program for what it is before we get fooled into throwing a lot of popular support behind some local political hat trick.

First off, let's make it clear that there are some very valuable civic projects in the "Program for Progress" that do genuinely deserve our support. Most are relatively cheap, and they stand out like nuggets in the bottom of a pan:

- A long-overdue extension and rebuilding of the city's steam heat system;
- A community beautification program;
- A comprehensive geologic mapping of the Fairbanks area with a feasibility study of whether an ore processing plant should be built here;
- Renovation of the Fairbanks Recreation Center;
- A program of city utility system improvements; and
- Some modest capital projects from the University of Alask[illegible]dded to give the grandiose "wish list" some credibility.

But the largest pieces of the local program deserve nothing but spirited opposition. Most are just examples of a government planner's dreams gone wild. They are things that would be added to our local government burden without even a vote of the people.

For instance, the proposal for a rebuilt downtown area notes that in the land ownership, "Many parcels are small and owned by different individuals, hindering consolidation of land for larger developments." Fairbanks's oldest families must be selfish individuals, one concludes, to let their lifetime investments stand in the way of a bureaucratic utopia.

The justifications for the big government projects are thin. For instance, four large public parking garages are proposed downtown at $10 million to $13 million each, because "traffic congestion and parking shortages are contributing to air quality problems." In truth, traffic is less congested, the air is cleaner and there are far more parking places downtown than was the case 10 years ago.

Other proposals are things that have been rejected by Fairbanks voters in the past. The Blue Line Club's hockey rink is back, with the cost up to $7.7 million. The major focus of public opposition in the old East Side Neighborhood urban renewal plan is also back in the form of a $2 million request for Third and Seventh avenue access roads from downtown to the Steese Expressway.

This last point was specifically rejected by voters in the urban renewal repeal initiative in 1972. It has cropped up several times since then but former city mayor Harold Gillam, who was elected in 1972 while running on the initiative platform, kept shooting it down. Now he's no longer mayor, and it's surfaced again. The proposal would require condemnation of homes and widening of two streets through our oldest neighborhood just to save busy drivers a fraction of a minute in zooming downtown on their urgent business. Of course the time saved would be lost by two new traffic signals on the "expressway."

As for the $13.4 million borough office building, even a Juneau waste basket is too good a place for that proposal.

While there are some good points added in the confusion, the "Program for Progress" is mainly a program for bankruptcy for local taxpayers.

City/State

Section B

Spending formula proposed

by Roxinne Ervasti
Associated Press

Juneau — A formula for allocating construction money throughout the state based on population and area has been proposed in the Legislature. One lawmaker said the idea might be looked upon as an "anti-pork barrel" bill.

The proposal was presented to the Senate and House Community and Regional Affairs committees Wednesday. The House panel did not discuss it but there was some debate over it in the Senate committee, which plans to introduce it soon.

The bill, yet to be drafted, would set up a "capital foundation fund" which the Legislature would appropriate to on an annual basis, starting with about $86 million this year. Advisory committees in unorganized boroughs would set their own spending priorities.

The idea is to get more public input in unorganized boroughs, which now primarily rely on individual legislators to "bring home the bacon."

Sen. Arliss Sturgulewski, R-Anchorage, and chairman of the Senate panel, said the legislation would have been "an anathema" in the days before the state's oil wealth.

"But now we're seeing $500 million proposed for capital improvements . . . what we're doing, by the Legislature being the sugar daddy, is throwing the burden on many municipalities for operational costs."

She said if a detailed study was made of the long-range results of current spending proposals on local entities, "the fiscal note would be staggering beyond belief."

In summary, the intent and provisions of the proposal are:

— Where there is local government, capital improvement plans would be developed much as they are now.

— In unorganized boroughs, advisory groups would set spending priorities.

— The allocations could be accumulated over several years for large projects, and they could be used as match for state and federal grants — thus assisting areas that have no way of raising match money now.

— Funds could be used for maintenance and operation as well as construction, thus getting around what Sturgulewski said is a situation where communities are indirectly encouraged not to maintain structures so that they can eventually get "construction" appropriations for repairs.

A suggested formula is that the fund total the equivalent of $200 per capita in the state.

Allocation would be based on one-half the population of a municipality or unorganized borough, and one-half its area. Allocations would be determined by multiplying area and population times a construction cost differential. Each entity gets a minimum of 5 percent of the largest distribution made.

Sen. Bob Mulcahy, R-Kodiak, joked that the intent appeared to be to wipe out the "pork barrel" process.

"The legislative process, while it may not be all that good, is a heck of a lot better," he said. "I'm accountable back there. This would just create another layer of government."

Sen. Tim Kelly, R-Anchorage, said he could not support the concept.

"You're saying you would give $42 million to the organized boroughs, which have a population of 349,000, and twice as much, $85 million, to the unorganized boroughs, which only have 80,000 people," he said.

Sen. Pat Rodey, D-Anchorage, said he saw the concept as a "reform" and said it would get money out to local areas immediately, in contrast to the backlog of bond projects approved by voters.

"It would have an important impact on the legislative process by making the local voice stronger," said Rodey. "I see it as having a leavening effect on the ups and downs of a change in legislative leadership."

Sen. Terry Stimson, D-Anchorage, supported it. "I see it causing a legislator to come down here with a list of priorities from the people back home who had an opportunity to set them," he said.

Sturgulewski said nothing would preclude the Legislature from making additional appropriations, but that her idea would guarantee a minimum kind of revenue sharing for capital construction.

Study in magnificent new edifices

hayden green

If, a few months ago, anyone would have suggested that I would be advocating the need for another impact statement, my reaction would have been to suggest a sobriety test.

It does seem, however, that another impact statement is in order and shou'd relate to property taxes. With all the people showing up in Juneau, hats in hands, and all chorusing a syncopated version of, "How about a free lunch," we really need to take a look at whether Alaska property owners can afford to lay out the birdseed required to satisfy the warblings of these insatiable songbirds. We may find that those tempting free lunches are accompanied by a sizable bill for the fancy fiddle music that renders their theme song.

Just suppose that the folks in Juneau do decide to part with the big bucks for a whole slew of public buildings for Anchorage. In the midst of all the jubilation and mutual backslapping over having managed to get our fair share of the pie, let's don't neglect a look at that day in the not so distant future when all the fanfare has subsided and the dust has settled and we are left sitting in the shadows of all these new and magnificent edifices.

Do you imagine Juneau will continue to fork over the means to maintain and operate these buildings? I really don't think so. My guess is that the property owners will be called on to dig a little deeper and come up with the money to feed this extra drain on the public expense burden

Doubtless, about this time, someone will decide that the roads servicing all these sparkling new structures are simply inadequate and demand improvements. No sooner has this situation been corrected when, lo and behold, we will discover that the parking downtown just will not meet the needs of all those people using all those roads to get to all those buildings, and we will be faced with the construction of parking garages to meet those needs. Who do you think will be allowed to pay for all this?

A lot has been written recently about the salary increases that the Legislature voted themselves. I want to go on record as stating that I think these people aren't being paid enough. Because, as my old daddy used to say, "If all you pay is peanuts, you're liable to attract nothing but monkeys," and judging from the chattering that continues to emanate from the capital, we in Alaska have managed to attract our own circus.

Legislature gets 'anti-pork' proposal

By ROXINNE ERVASTI
Associated Press Writer

JUNEAU—A formula for allocating construction money throughout the state based on population and area has been proposed in the Legislature. One lawmaker said the idea might be looked upon as an "anti-pork barrel" bill.

The proposal was presented to the Senate and House Community and Regional Affairs committees Wednesday. The House panel did not discuss it but there was some debate over it in the Senate committee, which plans to introduce it soon.

The bill, yet to be drafted, would set up a "capital foundation fund" which the Legislature would appropriate to on an annual basis, starting with about $86 million this year. Advisory committees in unorganized boroughs would set their own spending priorities.

The idea is to get more public input in unorganized boroughs, which now primarily rely on individual legislators to "bring home the bacon."

Sen. Arliss Sturgulewski, R-Anchorage, and chairman of the Senate panel, said the legislation would have been "an anathema" in the days before the state's oil wealth.

"But now we're seeing $500 million proposed for capital improvements . . . what we're doing, by the Legislature being the sugar daddy, is throwing the burden on many municipalities for operational costs."

She said if a detailed study was made of the long-range results of current spending proposals on local entities, "the fiscal note would be staggering beyond belief."

In summary, the intent and provisions of the proposal are:

- Where there is local government, capital improvement plans would be developed much as they are now;
- In unorganized boroughs, advisory groups would set spending priorities;
- The allocations could be accumulated over several years for large projects, and they could be used as match for state and federal grants—thus assisting areas that have no way of raising match money now;
- Funds could be used for maintenance and operation as well as construction, thus getting around what Mrs. Sturgulewski said is a situation where communities are indirectly encouraged not to maintain structures so that they can eventually get "construction" appropriations for repairs.

A suggested formula is that the fund total the equivalent of $200 per capita in the state.

Allocation would be based on one half the population of a municipality or unorganized borough, and one half its area. Allocations would be determined by multiplying area and population times a construction cost differential. Each entity gets a minimum of 5 percent of the largest distribution made.

Sen. Bob Mulcahy, R-Kodiak, joked that the intent appeared to be to wipe out the "pork barrel" process. "The legislative process, while it may not be all that good, is a heck of a lot better," he said. "I'm accountable back there. This would just create another layer of government."

Sen. Tim Kelly, R-Anchorage, said he could not support the concept.

"You're saying you would give $42 million to the organized boroughs, which have a population of 349,000, and twice as much, $85 million, to the unorganized boroughs, which only have 80,000 people," he said.

Mrs. Sturgulewski said nothing would preclude the Legislature from making additional appropriations.

A related measure that has already been passed by her committee (CSSB348) would establish a system of planning grants for unorganized boroughs.

The grants, a minimum of $25,000 plus $25 per capita each year for up to three years, would allow the unorganized boroughs to study whether they want to organize.

Fink: Pay off state debts

By ROSEMARY SHINOHARA
Daily News reporter

A breeding ground for corruption and fraud would be created.

Alaska would have "social programs coming out our ears....They could lower the student/teacher ratio to one to one."

The state will pay peoole not to work.

State employes will reap much higher salaries.

And the state will be into all sorts of businesses, from banking to fishing.

That's Tom Fink's view of what will happen if the state decides to keep, rather than spend, it's huge revenue surplus.

Fink, a conservative Republican leader who served several years in the state House including a term as speaker, said he thinks whether the legislature attempts to keep the money, return it to the people or spend it, the state's going to end up spending it.

Given that, he's in favor of holding down the state operating budget, and using the money for two major purposes:

• Paying off its $750 million in bonded debt;

• And, paying for "a very expanded capital improve ments program."

The state has so much money it could build a capital, build the $3 billion to $4 billion Susitna dams, pay for crossings on Turnagain and Knik arms, build roads, bridges and docks, he said.

Besides all of that, the state set aside a fund for local governments to draw on for their own capital improvement projects.

The important thing is to see that government does not have a surplus, he said. "We have to find a wise way to take it out of state hands. We ought to eliminate personal, corporate and the special oil and gas income tax. We can easily do that and still have a huge surplus."

Severance taxes on oil pumped out of the ground ought to be lowered until they're the same rate as other states

Tom Fink

charge, he said.

And he suggested the state could pay off some of the national debt with money left over. "Wouldn't that be wonderful?"

While he favors eliminating various taxes, Fink indicated he doesn't like the idea of the state giving $350 to each resident,a proposal passed by the state House.

"I think it would attract a lot of people to Alaska just to get $350." The type of person who would come for that probably wouldn't be a very good type for Alaska to have, he said.

What he thinks will happen, Fink said, is that state income taxes will be suspended. "There'll be 146 people we don't need to collect income tax. But we'll need 500 people to pass it out," he joked.

While he doesn't want the government to stockpile surpluses, Fink noted projections are that by the year 2,000, the state will have a $200 billion surplus. "That's one-half million for every man, woman, and child. If you have a wife and 11 kids, that $6.5 million," he noted.

Fink has a wife and 11 kids.

SENATE BILL NO. 562

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the formation of coastal resource service areas; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 16.40.120(b) is amended to read:

(b) The commissioner of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional educational attendance areas as a single coastal resource service area or may divide an existing regional educational attendance area into two or more coastal resource service areas according to geographic, cultural or other features relevant to coastal management planning

(1) if a substantial portion of the coastal area contains land and water area owned by the federal government over which it exercises exclusive jurisdiction or land held in trust by the federal government for Alaska Natives over which the state would not exercise control as to use; or

(2) if, after giving due consideration to the standards applicable to incorporation of borough governments and the likelihood that a borough will be incorporated within the area, the commissioner determines that the functions to be performed under this chapter could be undertaken more efficiently through the combination of two or more regional educational attendance areas as a single coastal resource service area or through the division of a regional educational attendance area into two or more coastal resource service areas.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

TO: Tam Cook
FROM: Marjorie Gorsuch
RE: CS HB992/ CSSB 562

Please modify the CSHB992 (CSSB562) in a new CS to include the following:

p. 1 line 12 "hearings held in the regional educational attendance area affected..."

p. 1 line 13 "into no more than three coastal resource ..."

p. 1 line 14 "according to geographic, cultural, economic, environmental or other features..."

p. 1 line 16 Change word "district" to "area"

p. 1 line 19 Add a new (2) which would provide:

Cities within the costal resource service areas formed under this section are part of the coastal resource service area and may not exclude themselves.

p. 1 line 19 Renumber as (3) Change "district" to "area"

p. 2 line 2,3 Change "district" to "area"

p. 2 line 8 Change "is excluded" to "excludes itself"

p. 2 line 9 Change "must" to "shall"

Tam,

The Senate side would like the final version of the CS ready with these changes for its meeting Tuesday, April 29 at 1:30 P.M. The House would like theirs ready for Wed., April 30 at 8:30 A.M.

CS SB 562/HB 992

SUGGESTED AMENDMENTS TO SB 562/ HB 992

1. ~~(b) as is in statute 46.40.120 (b)~~ 46.40.120 as amended

ADD (c) For purposes of coastal zone management only, REAAs the commissioner of the DCRA may, after public hearings held in the area affected, divide an existing REAA into two or more coastal resource service areas, according to geographic, cultural or other features relevant to coastal management planning.

(1) Other factors not withstanding, each coastal resource service district formed as a subdivision of an REAA, must contain at least one first class or home rule city.

(2) No coastal resource service area district formed peior to the effective date of this act may be subdivided for coastal planning purposes.

~~(3) A subdivision of an REAA formed for the purposes of coastal management planning may join cooperatively with another coastal resource service area for coastal zone management purposes upon approval of the commissioner.~~

Sec. 2. AS 46.35.190 is amended to read:

46.35.190 COOPERATIVE ADMINISTRATION. (a) A city within the coastal area which is not part of an adjacent coastal resource service area may exclude (INCLUDE) itself for purposes of this chapter ...

(1) The provisions of 46.35.190 (a) do not apply to coastal resource service districts formed under 46.40.120 (c).

(b) Nothing in this chapter restricts or prohibits cooperative or joint administration of functions between a municipality, and a coastal resource service district formed under 46.40.120 (c) and a coastal resource service area organized under the provisions of this chapter upon initiation of a mutual agreement for the purpose.

(c) (1) A mutual agreement for cooperative or joint administration is required when a city selects to exclude itself from an adjacent coastal resource service area under the provisions of 46.35.190 (a).

HB 992/SB 542

Suggested changes to minimize potential adverse effects of this legislation.

1. For each subdivision of an REAA, specify a minimum percentage of the REAA's coastline that must be in each subdivision (this would work toward minimizing potential super fragmentation by establishing a standard for CRA to use).

2. For each subdivision of an REAA, specify that it must contain at least one first ~~or second class~~ cities. This would also serve the purpose of minimizing numbers of subdivisions and insuring a "lead" community which could administer the program, as Regional Corporations will be less likely to serve that role under the draft legislation. If this is adopted #1 above may not be essential.

3. Add language that states that 46.40.190 does not apply to subdivisions of an REAA. This further insures #2 above, i.e., that first class city cannot opt out of a subdivided REAA coastal resource service district. If opting out is allowed, then you could have small districts without any population to speak of.

4. Change 46.40.190 to provide for opting out rather than opting in. This would apply to all REAAs.

5. Change 46.40.190 (b) so that when a first class city opts out of a coastal resource service district, a cooperative agreement is mandatory.

Add language to require that in this case of an opted out first class city, a city representative sit on the coastal resource service district board and vice versa as ex offcio members.

6. Regarding crsd boards, change the language to provide for board numbers from 5-11 (as is the REAA board) instead of the inflexible seven member board.

7. Insure that either by mentioning the REAAs which can subdivide or ~~xx~~ otherwise, provide that the ability to subdivide is not retroactive. We want to avoid situations in which a crsd that has completed a czm plan won't go back, subdivide, and get funded agin for another czm plan.

incorporation

8. Eliminate all references to boro/standards being used for subdivisions. It would set a poor precedent to in any way imply that these small subdivisions are potential regional governments. Suggested language might be : "For purposes of coastal zone management planning only, coastal resource service districts may be formed from a part of an REAA" or other words that would state that boro incorporation standards are not being used.

The Honorable Arliss Sturgulewski, Chairman
Senate Community and Regional Affairs Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

The Alaska Coastal Policy Council, at its last meeting on March 18 and 19, 1980, took action on four items related to coastal management that will be of interest to the Legislature and in particular to the two Community and Regional Affairs Committees.

Resolution 79-2 of the Rural Alaska Coastal Management Conference, requesting Continuation of Coastal Resource Service Area (CRSA) boards, was endorsed by the council with a request for implementation powers deleted. Resolution 79-6 of the Rural Alaska Coastal Management Conference requesting the creation of interior resource districts, was endorsed in its entirety by the council. Copies of the resolutions, as the council endorsed them, are attached for your information.

The council supports CSSB 348, CSSB 349, and CSHB 581, as described by Ms. Margo Waring, which deal with local governments and make provisions for unorganized boroughs, including the division of rural education attendance areas.

Finally, the council voted to request amendment of section 46.40.120 (b) of the Alaska Coastal Management Act as follows:

> The Commissioner of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional education attendance areas as a single coastal resource service area <u>or may subdivide an existing regional education attendance area, according to geographic, cultural, or other features relevant to coastal management planning.</u>

This proposed amendment is now before the House of Representatives as HB 992, currently pending in the House Community and Regional Affairs Committee.

If further information is required, please contact Murry Walsh, Coordinator of the Office of Coastal Management (465-3540).

Sincerely,

Frances A. Ulmer
Co-chairman

Donald Gilman
Co-chairman

RESOLUTION 79-2 OF THE RURAL ALASKA COASTAL MANAGEMENT CONFERENCE

AS ENDORSED BY THE ALASKA COASTAL POLICY COUNCIL

ENTITLED: REQUESTING CONTINUATION OF COASTAL RESOURCE SERVICE AREA BOARDS.

WHEREAS, the Alaska Coastal Management Act of 1977 allows for the formation of coastal resource service areas in the unorganized borough for the purpose of developing coastal management programs, and

WHEREAS, the Department of Community and Regional Affairs provides funding and technical assistance so that coastal management plans may be developed and approved; and

WHEREAS, the coastal resource service area is formed after an election by the communities in the affected region; and

WHEREAS, the coastal resource service area boards are comprised of members from those various communities; and

WHEREAS, there is currently no provision for funding of coastal resource service area boards after the approval of their plans; and

WHEREAS, there is no mechanism for coastal resource service areas to monitor the implementation of their plans; and

WHEREAS, there is no mechanism for coastal resource service areas to monitor consistency determinations made by state agencies;

NOW THEREFORE BE IT RESOLVED that the Alaska State Legislature amend the Alaska Coastal Management Act of 1977 in order that the coastal resource service boards maintain their identity and be funded after approval by the Coastal Policy Council and the legislature of their coastal management plans.

RESOLUTION 79-6 OF THE RURAL ALASKA COASTAL MANAGEMENT CONFERENCE

AS ENDORSED BY THE ALASKA COASTAL POLICY COUNCIL

ENTITLED: REQUEST FOR CREATION OF INTERIOR RESOURCE DISTRICTS.

WHEREAS, the State of Alaska and the federal government have released oil and gas lease schedules for the next five years; and

WHEREAS, the State of Alaska and the federal government have enacted legislation providing for the formation of coastal resource districts; and

WHEREAS, the federal government and the State of Alaska provide funds for implementation of coastal zone management plans to the coastal districts; and

WHEREAS, the State of Alaska's five year schedule includes oil and gas lease sales in the interior of Alaska; and

WHEREAS, oil and gas development and pipeline construction in the Interior has the same impact as offshore development; and

WHEREAS, these interior areas have no legislative basis for creating district plans and no source of funding districts in the event of oil and gas lease sales and pipeline construction; and

WHEREAS, the Department of Community and Regional Affairs is allocated funds for the development of coastal districts,

Now, therefore, be it

RESOLVED, that the Department of Community and Regional Affairs search for a method of funding resource districts in the areas of the Interior which will be impacted by state oil and gas lease sales and pipeline construction, and

BE IT FURTHER RESOLVED that the Alaska State Legislature fund interim planning districts.

Apri. 10, 1980

Don Gilman, Co-chair
Alaska Coastal Policy Council
Soldotna, Alaska
and
John Haltermann, Co-chair
Alaska Coastal Policy Council
Juneau, Alaska

Dear Messrs. Gilman and Halterman:

Recently Representative Osterback sponsored, through the House Resources Committee, HB 992, An Act relating to the formation of coastal resource service areas; and providing for an effective date. This bill, as I understand it, seeks to solve problems encountered in the Alaska Peninsula/ Aleutian chain in establishing viable coastal resource service districts.

A similar bill may be introduced on the Senate side, by Senator Mulcahy. As Chair of the Senate Community and Regional Affairs Committee, I would appreciate hearing from you regarding this bill--your and the Council's view both of the problem and of this particular solution to that problem.

Thank you for your cooperation.

Sincerely,

Arliss Sturgulewski
Senator, District 10-H

Alaska Department of Community and Regional Affairs
225 Cordova, Building B, Suite 104
Anchorage, Alaska 99501

Dear Mr. Kimball:

The City Council, by motion, has instructed me to contact your office to determine the feasibility of amending AS 46.40.120 to permit the Commissioner discretionary authority to establish coastal resource service areas which emcompass areas smaller than REAA's. It is the view of the City Council that participation in a properly drawn service area could be a more effective mechanism for Unalaska's taking part in coastal management under the Act than either as its own district or as part of a district taking in most of the Chain.

Any assistance which your office could render in drafting a candidate amendment would aid us greatly in approaching our legislators on the question and would be greatly appreciated.

Sincerely yours,

Coastal Policy Council - agrees w/ concept

Application of ACMP to the
Aleutian/Pribilof Island Region

Problem:

Options provided under the Alaska Coastal Management Act for formation of "coastal resource districts" are not applicable to the Aleutian/Pribilof Island Region.

Background:

The Aleutian/Pribilof Island Region presents a unique situation relative to the establishment of coastal resource service areas. Within the Region are three first-class cities (Sand Point, King Cove and Unalaska) as well as regional educational attendance areas 8, 9 and 10 (Aleutian Chain, Pribilof and Adak).

Under present law the first-class cities have the option of becoming single coastal resource service areas, thus establishing their own coastal management planning programs within their respective political boundaries, or of joining forces with the REAA's to develop a regional planning effort.

In addition, the three REAA's may become separate coastal resource service areas or, under authority granted in AS 46.40.120(b) the Commissioner of the Department of Community and Regional Affairs, may consolidate REAA's 8, 9 and 10 into one or two service areas for coastal management purposes.

Given these conditions there exists the possibility of one or six, or any combination within these numbers, coastal resource service areas being created within the Aleutian/Pribilof Island Region.

The population of the Region is approximately 3600 with 2274 (63%) residing in the three first-class cities (Sand Point 773, King Cove 733 and Unalaska 768). The second-class communities of Akutan and St. Paul contain 652 residents, 85 and 567 respectively. Total Regional population residing in incorporated municipalities totals 2926 or 81%. Clearly, if the first-class communities elect to establish their own programs within their jurisdictions, the remaining area (REAA's 8, 9, & 10) will be substantially diluted of human resources with which to develop and implement a coastal management program.

Land interests in the region are geographically complex. Village corporations were unable to select ANCSA entitlements within the core townships of Native villages due to the configuration of islands and Federal reserves. As such, village corporations selected deficiency lands under the Act this resulted in the ownership of land many miles from their respective villages. An example is the Tanadqusix Corporation at St. Paul (Pribilof Islands). Tanadqusix Corporation has substantial land holdings approximately 200 miles away on Unalaska Island. This is the case for a majority of the Aleutian's village corporations thus creating an extremely fragmented pattern of land ownership and land interests throughout the chain.

Several Aleutian villages are vacant of population, yet represent vast land holdings and thus development interests for shareholders residing elsewhere. Unga and Sanak are two cases in point. Village Corporation members from Unga and Sanak reside in Sand Point yet hold major land interests outside of Sand Points City boundaries. They fear that should Sand Point elect to become a coastal resource service area they, as residents of Sand Point, will be precluded from having a voice in a coastal management program which encompasses their corporate land holdings.

The communities, on the other hand, would prefer to work with the respective corporations in a coastal management program but do not care to be involved or necessarily influenced by actions a thousand miles away.

The Aleutian/Pribilof Island Region situation strongly indicates the need to provide a third option for creating coastal resource service areas. This option would address the need to create service districts which emphasize common interests and geographic proximity in areas where land mass, economic interests and population are not contiguous.

Proposed Legislative Amendment

Section 3 AS 46.40.120(b) is amended to read:

(b) The Commissioner of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional educational attendance areas as a single coastal resource service area or may subdivide an existing regional education attendance area according to geographic, cultural or other features relevant to coastal management planning.

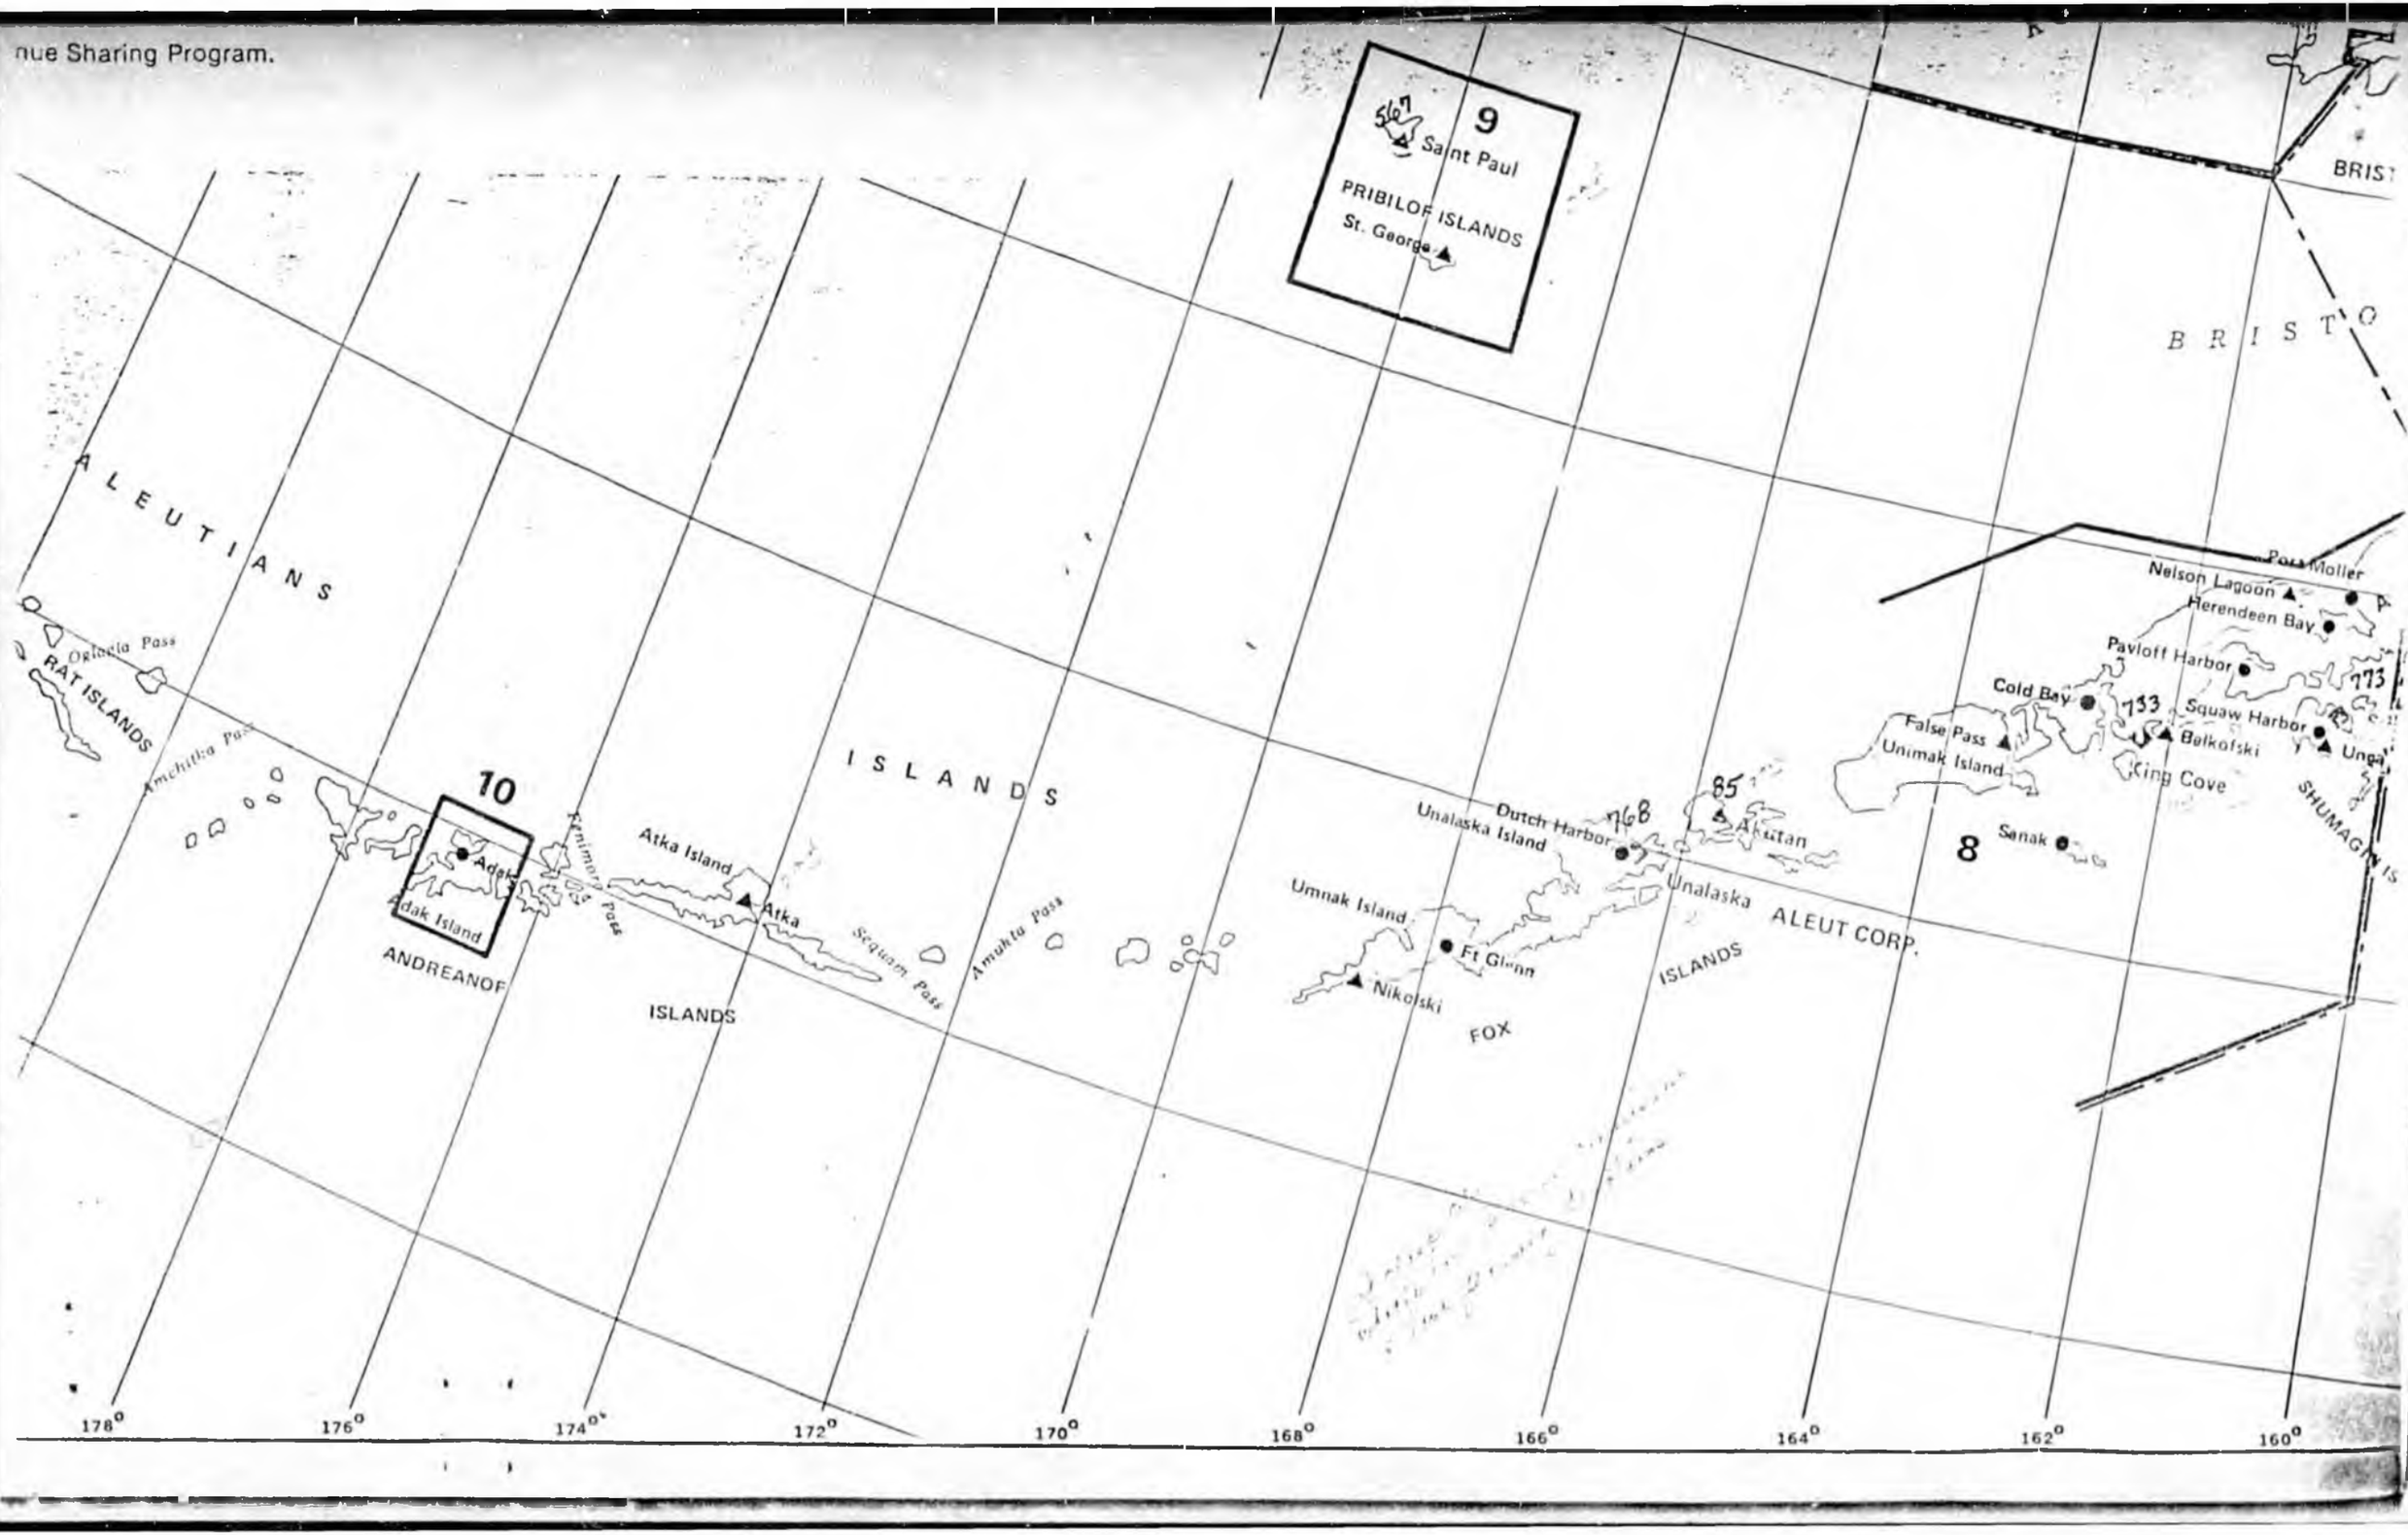
Clearly, if the first-class communities elect to establish their own programs within their jurisdictions, the remaining area (REAA's 8, 9, & 10) will be substantially diluted of human resources with which to develop and implement a coastal management program.

Land interests in the region are geographically complex. Village corporations were unable to select ANCSA entitlements within the core townships of Native villages due to the configuration of islands and Federal reserves. As such, village corporations selected deficiency lands under the Act this resulted in the owrership of land many miles from their respective villages. An example is the Tanadqusix Corporation at St. Paul (Pribilof Islands). Tanadqusix Corporation has substantial land holdings approximately 200 miles away on Unalaska Island. This is the case for a majority of the Aleutian's village corporations thus creating an extremely fragmented pattern of land ownership and land interests throughout the chain.

Several Aleutian villages are vacant of population, yet represent vast land holdings and thus development interests for shareholders residing elsewhere. Unga and Sanak are two cases in point. Village Corporation members from Unga and Sanak reside in Sand Point yet hold major land interests outside of Sand Points City boundaries. They fear that should Sand Point elect to become a coastal resource service area they, as residents of Sand Point, will be precluded from having a voice in a coastal management program which encompasses their corporate land holdings.

The communities, on the other hand, would prefer to work with the respective corporations in a coastal management program but do not care to be involved or necessarily influenced by actions a thousand miles away.



The Aleutian/Pribilof Island Region situation strongly indicates the need to provide a third option for creating coastal resource service areas. This option would address the need to create service districts which emphasize common interests and geographic proximity in areas where land mass, economic interests and population are not contiguous.

Proposed Legislative Amendment

Section 3 AS 46.40.120(b) is amended to read:

(b) The Commissioner of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional educational attendance areas as a single coastal resource service area or may subdivide an existing regional education attendance area according to geographic, cultural or other features relevant to coastal management planning.

nue Sharing Program.

Application of ACMP to the
Aleutian/Pribilof Island Region

Problem:

Options provided under the Alaska Coastal Management Act for formation of "coastal resource districts" are not applicable to the Aleutian/Pribilof Island Region.

Background:

The Aleutian/Pribilof Island Region presents a unique situation relative to the establishment of coastal resource service areas. Within the Region are three first-class cities (Sand Point, King Cove and Unalaska) as well as regional educational attendance areas 8, 9 and 10 (Aleutian Chain, Pribilof and Adak).

Under present law the first-class cities have the option of becoming single coastal resource service areas, thus establishing their own coastal management planning programs within their respective political boundaries, or of joining forces with the REAA's to develop a regional planning effort.

In addition, the three REAA's may become separate coastal resource service areas or, under authority granted in AS 46.40.120(b) the Commissioner of the Department of Community and Regional Affairs, may consolidate REAA's 8, 9 and 10 into one or two service areas for coastal management purposes.

Given these conditions there exists the possibility of one or six, or any combination within these numbers, coastal resource service areas being created within the Aleutian/Pribilof Island Region.

The population of the Region is approximately 3600 with 2274 (63%) residing in the three first-class cities (Sand Point 773, King Cove 733 and Unalaska 768). The second-class communities of Akutan and St. Paul contain 652 residents, 85 and 567 respectively. Total Regional population residing in incorporated municipalities totals 2926 or 81%. Clearly, if the first-class communities elect to establish their own programs within their jurisdictions, the remaining area (REAA's 8, 9, & 10) will be substantially diluted of human resources with which to develop and implement a coastal management program.

Land interests in the region are geographically complex. Village corporations were unable to select ANCSA entitlements within the core townships of Native villages due to the configuration of islands and Federal reserves. As such, village corporations selected deficiency lands under the Act this resulted in the ownership of land many miles from their respective villages. An example is the Tanadqusix Corporation at St. Paul (Pribilof Islands). Tanadqusix Corporation has substantial land holdings approximately 200 miles away on Unalaska Island. This is the case for a majority of the Aleutian's village corporations thus creating an extremely fragmented pattern of land ownership and land interests throughout the chain.

Several Aleutian villages are vacant of population, yet represent vast land holdings and thus development interests for shareholders residing elsewhere. Unga and Sanak are two cases in point. Village Corporation members from Unga and Sanak reside in Sand Point yet hold major land interests outside of Sand Points City boundaries. They fear that should Sand Point elect to become a coastal resource service area they, as residents of Sand Point, will be precluded from having a voice in a coastal management program which encompasses their corporate land holdings.

The communities, on the other hand, would prefer to work with the respective corporations in a coastal management program but do not care to be involved or necessarily influenced by actions a thousand miles away.

The Aleutian/Pribilof Island Region situation strongly indicates the need to provide a third option for creating coastal resource service areas. This option would address the need to create service districts which emphasize common interests and geographic proximity in areas where land mass, economic interests and population are not contiguous.

Proposed Legislative Amendment

Section 3 AS 46.40.120(b) is amended to read:

(b) The Commissioner of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional educational attendance areas as a single coastal resource service area o- may subdivide an existing regional education attendance area according to geographic, cultural or other features relevant to coastal management planning.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF COMMUNITY PLANNING

225 CORDOVA, BUILDING B
ANCHORAGE, ALASKA 99501

March 21, 1980

Mr. Richard Careaga
Director of Planning
P.O. Box 89
Unalaska, Alaska 99685

Dear Mr. Careaga:

In response to your letter of March 17 requesting our assistance in drafting an amendment to AS 46.40.120(b), I would like to relay the following information.

The City Councils of Sand Point and King Cove have made identical requests. In order to accommodate these requests in a timely manner I drafted a proposed amendment and presented same to the Alaska Coastal Policy Council on Wednesday, March 19.

Following my presentation and brief discussion the Council voted 11-0 in favor of a resolution supporting the proposed amendment. This support will accompany the proposed amendment to Juneau where we will request it be introduced via committee. We will meet with Sand Point officials and legislators for the affected area next week in Juneau to discuss the matter.

I have enclosed a copy of the proposed amendment for your City Council's review. Should the Council support it as written, I would appreciate a letter to that affect. Should there be a need to amend the language please contact me immediately as time is of the essence.

Thank you for your assistance in this matter and please assure the City Council and Mayor Holmes that we will keep them informed as things progress.

Thank you also for the courtesies extended during our recent visit. I enjoyed our stay.

Best regards,

Larry

The Honorable Bill Parker

Chairman

Community and Regional Affairs

Committee

Alaska State House of Representatives

Pouch V

Juneau, Alaska 99811

Dear Mr. Chairman:

SUBJECT: HB 992

At your request, the Department of Community and Regional Affairs has prepared background information on HB 992 and explored alternatives to the bill.

BACKGROUND

The Alaska Coastal Management Act of 1977, as amended, allows residents of the unorganized borough to organize coastal resource districts encompassing one or more regional educational attendance areas (REAAs). Each district prepares a coastal management program to be submitted to the Coastal Policy Council and State Legislature. The Commissioner of Community and Regional Affairs presently has authority to combine two or more REAAs into a single coastal resource service area. All municipalities which exercise planning powers are also districts. This system seems to

districts the regional center has chosen not to join the adjacent service area. Consequently, in the Bering Straits region there are two coastal resource districts, the City of Nome and the Bering Straits Coastal Resource Service Area; in the ~~Lower~~ Yukon/~~Lower~~ Kuskokwim region, there are also two coastal resource districts, the City of Bethel and the ~~Lower~~ Yukon/~~Lower~~ Kuskokwim Coastal Resource Service Area.

In addition to the regions discussed in the foregoing paragraphs, there are six coastal REAAs which have ~~been reticent to~~ not yet organize coastal resource districts. They have the following characteristics:

1. Four of them--the Aleutian Islands (REAA 8), Northern Panhandle (REAA 18), Southern Panhandle (REAA 19) and Prince William Sound (REAA 21)--have several first class or home rule cities each and no clearly defined regional center. Therefore, each region has several school districts, several coastal resource districts, and no established central gathering place or service center (except Anchorage or Juneau).

2. Federal landholdings consume much of the land within each region. Federally owned land is not part of the State's coastal zone. Settled areas and non-federal land often occur as isolated pockets separated by thousands of acres of federally owned land.

HB 992 resulted from concern that none of the organizational options offered by the Alaska Coastal Management Act may be well suited to situations of the second set of REAAs discussed above (REAAs 8, 9, 10,

18, 19, 21). Attachment 2 describes advantages and disadvantages of the status quo [AS 46.40120(b)], HB 992, three legislative alternatives and one administrative alternative.

Sincerely,

Lee McAnerney

Commissioner

* Program under way or completed

Status quo

AS 46.40.120(b) allows the Commissioner of Community and Regional Affairs to consolidate two or more REAAs into one coastal resource service area after considering standards applicable to incorporation of borough governments or the likelihood that a borough would be incorporated within the area.

HB 992

Under HB 992, AS 46.40.120(b) would be amended to allow the Commissioner of Community and Regional Affairs to not only consolidate two or more REAAs into one coastal resource service area, but also subdivide REAAs into separate coastal resource service areas according to geographic, cultural, or other features relevant to coastal management planning. Borough incorporation standards would also be considered.

Legislative alternative #1

Retain the language of HB 992, but restrict application of the subdivision providion to teh Aleutian Chain (REAA 1), Northern Panhandle (REAA 18), Southern Panhandle (REAA 19), and Prince William Sound (REAA 21).

By using the REAA as the basic unit for planning in the unorganized borough, the present law does not create any new boundaries for delivery of government services.

oHB 992 still uses REAAs as the basic unit of reference for coastal resource service areas.

°First-class or home-rule cities of the unorganized borough might be more inclined to join coastal resource service areas smaller than the entire REAA in which they are located.

°HB 992 would allow residents to plan for those areas which affect them most directly and with which they are most intimately familiar.

This provision would restrict application of the subdiviison section to areas most likely to express interest in them.

The present law allows first-class and home rule cities (and second-class cities under certain circumstances) to develop coastal management programs separate from the region and a number of cities do not see it in their best interest to join forces with an entire REAA. Consequently, coastal resource service areas are not being organized in several REAAs and yet many cities have legitimate interest in influencing development outside their corporate limits.

Indiscriminate subdivision of an REAA could produce fragmented coastal management programs.

°The restriction may be unnecessary since coastal resource service areas have organized districts in most of the other coastal REAAs.

°There may be constitutional question about treating regions differently.

egislative alternative #2

Retain the language of HB 992, but add the following provision:

If an REAA is divided and an organization election is called in one subdivision, an election will automatically be called in all other subdivisions of the REAA. If any one of the subdivisions elects to organize a district, all other subdivisions are automatically organized. The coastal management program from all subdivisions of an REAA must be coordinated from the outset and submitted simultaneously to enable the Coastal Policy Council and State Legislature to reach a reasonable conculsion about the compatibility of the plans. Although each subdivision would have its own board, there would be a seven-member regional oversight board with representation from the entire REAA (or combination of REAAs on a one-man, one-vote basis.

Advantages

°All of the advantages of HB 992

°Greater coordination among plans than would be afforded under HB 992.

Disadvantages

°Certain areas may be prematurely coerc into preparing a coastal management program by virtue of actions taken by neighboring areas.

°Any section could delay approval of th programs of other sections.

°Creation of another layer of governmen thereby making the process more cumber and costly.

d inistrative alternative

No legislative change, but a coastal resource service area could voluntarily organize itself in such a way that board members from one area would meet routinely with local people in that area and use the full board meetings as a means to combine sectional ideas and make compromises if necessary.

Local involvement in regional coastal management planning with as few new formal structures as possible

The representation and consequent votir strength of any given area on the sever member service area board would be less an entire REAA than in a subdivision of

4/25/80

TO: Margo
FROM: Marjorie

Re HB 992 SB562

Change #2 to require that for each subdivision of an REAA must contain at least one first class, or home rule city (Valdez and Cordova are both home rule as are Petersburg and Wrangell). Also, we need to be aware that in REAA 7 there is no first class or home rule city, only the second class city of Port Heiden)

#9 for consideration should be:
An REAA subdivided for the purpose of coastal management planning may be combined with another coastal resource service area for coastal zone management purposes.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER POUCH B — JUNEAU 99811

April 21, 1980

The Honorable Bill Parker
Chairman
Community and Regional Affairs
Committee
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Mr. Chairman:

At your request, the Department of Community and Regional Affairs has prepared background information on HB 992 and explored alternatives to the bill.

BACKGROUND

The Alaska Coastal Management Act of 1977, as amended, allows residents of the unorganized borough to organize coastal resource districts encompassing one or more regional educational attendance areas (REAAs). The Commissioner of Community and Regional Affairs has authority to combine two or more REAAs into a single coastal resource service area prior to organizational elections. Municipalities which exercise planning powers are also districts; they may join an adjacent coastal resource service area but are not required to do so. Each district prepares a coastal management program to be submitted to the Coastal Policy Council and State Legislature. This system seems to work well in certain areas, but has been received with reservation in others. Attachment 1 lists each coastal REAA and coastal resource districts within each REAA and indicates whether the district's coastal management program is under way or completed. REAAs which have not yet conducted coastal management elections but could do so under the present law are described as "potential" districts.

Coastal resource districts have been organized in three regions of the unorganized borough; another region is seriously considering following suit. Districts have formed in the Northwest Alaska region (REAA 1), the Bering Straits region (REAA 2), and the Yukon/Kuskokwim region (REAAs 3 and 4); district formation is under consideration in the Bristol Bay region (REAAs 6 and 7). These four regions have the following traits in common:

21-P2LH

1. Each region has one dominant regional center: Kotzebue in the Northwest Alaska region; Nome in the Bering Straits region; Bethel in the Yukon/Kuskokwim region and Dillingham in the Bristol Bay region.

2. All of the communities in the Northwest Alaska region and all but one in each of the other regions are second class cities or unincorporated and therefore obtain educational services from an REAA. (First class and home rule cities operate their own school districts.)

3. In two of the three regions which have organized coastal resource districts the regional center has chosen not to join the adjacent service area. Consequently, in the Bering Straits region there are two coastal resource districts, the City of Nome and the Bering Straits Coastal Resource Service Area; in the Yukon/Kuskokwim region, there are also two coastal resource districts, the City of Bethel and the Yukon/Kuskokwim Coastal Resource Service Area.

In addition to the regions discussed in the foregoing paragraphs, there are six coastal REAAs which have not yet organized coastal resource districts. They have the following characteristics:

1. Four of them--the Aleutian Islands (REAA 8), Northern Panhandle (REAA 18), Southern Panhandle (REAA 19) and Prince William Sound (REAA 21)--have several first class or home rule cities each and no dominant regional center. Therefore, each region has several school districts, several coastal resource districts, and no established central gathering place or service center (except Anchorage, Juneau, or Seattle).

2. Federal landholdings consume much of the land within each region. Federally owned land is not part of the State's coastal zone. Settled areas and non-federal land often occur as isolated pockets separated by thousands of acres of federally owned land.

HB 992 resulted from concern that options offered by the Alaska Coastal Management Act may not be well suited to the second set of REAAs discussed above (REAAs 8, 9, 10, 18, 19, 21). Attachment 2 describes advantages and disadvantages of the status quo [AS 46.40.120(b)], HB 992, two legislative alternatives and one administrative alternative.

Sincerely,

Marie Matsumoto-Pignalberi

for Lee McAnerney
Commissioner

* Program under way or completed

Status quo	Advantages	Disadvantages
AS 46.40.120(b) allows the Commissioner of Community and Regional Affairs to consolidate two or more REAAs into one coastal resource service area after considering standards applicable to incorporation of borough governments , the likelihood that a borough would be incorporated within the area, or the extent of federally owned land and water within the area.	By using the REAA as the basic unit for planning in the unorganized borough. the present law does not create any new boundaries for delivery of government services.	The present law allows first-class and home rule cities (and second-class cities under certain circumstances) to develop coastal management programs separate from the region. Many cities do not see it in their best interest to join forces with an entire REAA. Consequently, coastal resource service areas are not being organized in several REAAs, yet many cities have legitimate interest in influencing development outside their corporate limits.
HB 992		
Under HB 992, AS 46.40.120(b) would be amended to allow the Commissioner of Community and Regional Affairs to not only consolidate two or more REAAs into one coastal resource service area, but also subdivide REAAs into separate coastal resource service areas according to geographic, cultural, or other features relevant to coastal management planning. Borough incorporation standards would also be considered, as would federal ownership of coastal land and water.	HB 992 also uses REAAs as the basic unit of reference for coastal resource service areas. First-class or home-rule cities of the unorganized borough might be more inclined to join coastal resource service areas smaller than the entire REAA in which they are located. HB 992 would allow residents to plan for those areas which affect them most directly and with which they are most intimately familiar.	Indiscriminate subdivision of an REAA could produce fragmented coastal management programs.
Legislative alternative #1		
Retain the language of HB 992, but restrict application of the subdivision provision to the Aleutian Chain (REAA 8), Northern Panhandle (REAA 18), Southern Panhandle (REAA 19), and Prince William Sound (REAA 21). Allow the Commissioner of Community and Regional Affairs to combine REAAs with subdivisions of other REAAs if such combinations satisfy standards mentioned in HB 992.	This provision would restrict application of the subdivision section to areas most likely to express interest in them.	The restriction may be unnecessary since coastal resource service areas have organized districts in most of the other coastal REAAs. There may be constitutional questions about treating regions differently by specifying the geographic area rather than by specifying standards which must be met.

Attachment 2

Legislative alternative #2	Advantages	Disadvantages
