Retain the language of HB 992, but add the following provision: If an REAA is divided and an organization election is called in one subdivision, an election will automatically be called in all other subdivisions of the REAA. If any one of the subdivisions elects to organize a district, all other subdivisions are automatically organized. The coastal management program from all subdivisions of an REAA must be coordinated from the outset and submitted simultaneously to enable the Coastal Policy Council and State Legislature to reach a reasonable conclusion about the compatibility of the plans. Although each subdivision would have its own board, there would be a seven-member regional oversight board with representation from the entire REAA (or combination of REAAs) on a one-man, one-vote basis.	All of the advantages of HB 992. Greater coordination among plans than would be afforded under HB 922.	Certain areas may be prematurely coerced into preparing a coastal management program by virtue of actions taken by neighboring areas. Any section could delay approval of the programs of other sections. Creation of another layer of government would make the process more cumbersome and costly.

Administrative alternative		
A coastal resource service area encompassing one or more REAAs could voluntarily organize itself in such a way that board members from one area would meet routinely with local people in that area and use full board meetings as a means to combine sectional ideas and make compromises if necessary.	Local involvement in regional coastal management planning with as few new formal structures as possible. No legislative change would be needed.	The representation and consequent voting strength of any given area on the seven-member service area board would be less in an entire REAA than in a subdivision of it.

STATE OF ALASKA

COASTAL POLICY COUNCIL

April 17, 1980

LOCAL MEMBERS:
Donald Gilman, Lower Cook Inlet, Co-Chairman
Stanley Anderson, Bering Straits
Jon Halliwell, Northern Southeast
Eben Hopson, Northwest
Malcolm "Pete" Isleib, Prince William Sound
John Nicori, Southwest
Robert Sanderson, Southern Southeast
Lidia Selkregg, Upper Cook Inlet
Betty Wallin, Kodiak-Aleutians

STATE MEMBERS:
Frances Ulmer, Director of Policy Development & Planning, Co-chairman
Robert Ward, Commissioner of Transportation & Public Facilities
Charles Webber, Commissioner of Commerce & Economic Development
Robert LeResche, Commissioner of Natural Resources
Lee McAnerney, Commissioner of Community & Regional Affairs
Ernst Mueller, Commissioner of Environmental Conservation
Ronald Skoog, Commissioner of Fish & Game

The Honorable Arliss Sturgulewski, Chairman
Senate Community and Regional Affairs Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

The Alaska Coastal Policy Council, at its last meeting on March 18 and 19, 1980, took action on four items related to coastal management that will be of interest to the Legislature and in particular to the two Community and Regional Affairs Committees.

Resolution 79-2 of the Rural Alaska Coastal Management Conference, requesting Continuation of Coastal Resource Service Area (CRSA) boards, was endorsed by the council with a request for implementation powers deleted. Resolution 79-6 of the Rural Alaska Coastal Management Conference requesting the creation of interior resource districts, was endorsed in its entirety by the council. Copies of the resolutions, as the council endorsed them, are attached for your information.

The council supports CSSB 348, CSSB 349, and CSHB 581, as described by Ms. Margo Waring, which deal with local governments and make provisions for unorganized boroughs, including the division of rural education attendance areas.

Finally, the council voted to request amendment of section 46.40.120 (b) of the Alaska Coastal Management Act as follows:

> The Commissioner of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional education attendance areas as a single coastal resource service area <u>or may subdivide an existing regional education attendance area, according to geographic, cultural, or other features relevant to coastal management planning</u>.

This proposed amendment is now before the House of Representatives as HB 992, currently pending in the House Community and Regional Affairs Committee.

RESOLUTION 79-2 OF THE RURAL ALASKA COASTAL MANAGEMENT CONFERENCE

AS ENDORSED BY THE ALASKA COASTAL POLICY COUNCIL

ENTITLED: REQUESTING CONTINUATION OF COASTAL RESOURCE SERVICE AREA BOARDS.

WHEREAS, the Alaska Coastal Management Act of 1977 allows for the formation of coastal resource service areas in the unorganized borough for the purpose of developing coastal management programs, and

WHEREAS, the Department of Community and Regional Affairs provides funding and technical assistance so that coastal management plans may be developed and approved; and

WHEREAS, the coastal resource service area is formed after an election by the communities in the affected region; and

WHEREAS, the coastal resource service area boards are comprised of members from those various communities; and

WHEREAS, there is currently no provision for funding of coastal resource service area boards after the approval of their plans; and

WHEREAS, there is no mechanism for coastal resource service areas to monitor the implementation of their plans; and

WHEREAS, there is no mechanism for coastal resource service areas to monitor consistency determinations made by state agencies;

NOW THEREFORE BE IT RESOLVED that the Alaska State Legislature amend the Alaska Coastal Management Act of 1977 in order that the coastal resource service boards maintain their identity and be funded after approval by the Coastal Policy Council and the legislature of their coastal management plans.

RESOLUTION 79-6 OF THE RURAL ALASKA COASTAL MANAGEMENT CONFERENCE

AS ENDORSED BY THE ALASKA COASTAL POLICY COUNCIL

ENTITLED: REQUEST FOR CREATION OF INTERIOR RESOURCE DISTRICTS.

WHEREAS, the State of Alaska and the federal government have released oil and gas lease schedules for the next five years; and

WHEREAS, the State of Alaska and the federal government have enacted legislation providing for the formation of coastal resource districts; and

WHEREAS, the federal government and the State of Alaska provide funds for implementation of coastal zone management plans to the coastal districts; and

WHEREAS, the State of Alaska's five year schedule includes oil and gas lease sales in the interior of Alaska; and

WHEREAS, oil and gas development and pipeline construction in the Interior has the same impact as offshore development; and

WHEREAS, these interior areas have no legislative basis for creating district plans and no source of funding districts in the event of oil and gas lease sales and pipeline construction; and

WHEREAS, the Department of Community and Regional Affairs is allocated funds for the development of coastal districts,

Now, therefore, be it

RESOLVED, that the Department of Community and Regional Affairs search for a method of funding resource districts in the areas of the Interior which will be impacted by state oil and gas lease sales and pipeline construction, and

BE IT FURTHER RESOLVED that the Alaska State Legislature fund interim planning districts.

Application of ACMP to the
Aleutian/Pribilof Island Region

Problem:

Options provided under the Alaska Coastal Management Act for formation of "coastal resource districts" are not applicable to the Aleutian/Pribilof Island Region.

Background:

The Aleutian/Pribilof Island Region presents a unique situation relative to the establishment of coastal resource service areas. Within the Region are three first-class cities (Sand Point, King Cove and Unalaska) as well as regional educational attendance areas 8, 9 and 10 (Aleutian Chain, Pribilof and Adak).

Under present law the first-class cities have the option of becoming single coastal resource service areas, thus establishing their own coastal management planning programs within their respective political boundaries, or of joining forces with the REAA's to develop a regional planning effort.

In addition, the three REAA's may become separate coastal resource service areas or, under authority granted in AS 46.40.120(b) the Commissioner of the Department of Community and Regional Affairs, may consolidate REAA's 8, 9 and 10 into one or two service areas for coastal management purposes.

Given these conditions there exists the possibility of one or six, or any combination within these numbers, coastal resource service areas being created within the Aleutian/Pribilof Island Region.

The population of the Region is approximately 5000 with [illegible] residing in the three first-class cities (Sand Point 773, King Cove 733 and Unalaska 768). The second-class communities of Akutan and St. Paul contain 652 residents, 85 and 567 respectively. Total Regional population residing in incorporated municipalities totals 2926 or 81%. Clearly, if the first-class communities elect to establish their own programs within their jurisdictions, the remaining area (REAA's 8, 9, & 10) will be substantially diluted of human resources with which to develop and implement a coastal management program.

Land interests in the region are geographically complex. Village corporations were unable to select ANCSA entitlements within the core townships of Native villages due to the configuration of islands and Federal reserves. As such, village corporations selected deficiency lands under the Act this resulted in the ownership of land many miles from their respective villages. An example is the Tanadqusix Corporation at St. Paul (Pribilof Islands). Tanadqusix Corporation has substantial land holdings approximately 200 miles away on Unalaska Island. This is the case for a majority of the Aleutian's village corporations thus creating an extremely fragmented pattern of land ownership and land interests throughout the chain.

Several Aleutian villages are vacant of population, yet represent vast land holdings and thus development interests for shareholders residing elsewhere. Unga and Sanak are two cases in point. Village Corporation members from Unga and Sanak reside in Sand Point yet hold major land interests outside of Sand Points City boundaries. They fear that should Sand Point elect to become a coastal resource service area they, as residents of Sand Point, will be precluded from having a voice in a coastal management program which encompasses their corporate land holdings.

The communities, on the other hand, would prefer to work with the respective corporations in a coastal management program but do not care to be involved or necessarily influenced by actions a thousand miles away.

The Aleutian/Pribilof Island Region situation strongly indicates the need to provide a third option for creating coastal resource service areas. This option would address the need to create service districts which emphasize common interests and geographic proximity in areas where land mass, economic interests and population are not contiguous.

Proposed Legislative Amendment

Section 3 AS 46.40.120(b) is amended to read:

(b) The Commissioner of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional educational attendance areas as a single coastal resource service area or may subdivide an existing regional education attendance area according to geographic, cultural or other features relevant to coastal management planning.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF COMMUNITY PLANNING

225 CORDOVA, BUILDING B
ANCHORAGE, ALASKA 99501

March 21, 1980

Mr. Richard Careaga
Director of Planning
P.O. Box 89
Unalaska, Alaska 99685

Dear Mr. Careaga:

In response to your letter of March 17 requesting our assistance in drafting an amendment to AS 46.40.120(b), I would like to relay the following information.

The City Councils of Sand Point and King Cove have made identical requests. In order to accommodate these requests in a timely manner I drafted a proposed amendment and presented same to the Alaska Coastal Policy Council on Wednesday, March 19.

Following my presentation and brief discussion the Council voted 11-0 in favor of a resolution supporting the proposed amendment. This support will accompany the proposed amendment to Juneau where we will request it be introduced via committee. We will meet with Sand Point officials and legislators for the affected area next week in Juneau to discuss the matter.

I have enclosed a copy of the proposed amendment for your City Council's review. Should the Council support it as written, I would appreciate a letter to that affect. Should there be a need to amend the language please contact me immediately as time is of the essence.

Thank you for your assistance in this matter and please assure the City Council and Mayor Holmes that we will keep them informed as things progress.

Thank you also for the courtesies extended during our recent visit. I enjoyed our stay.

Best regards,

Lawrence H. Kimball, Jr.
Director

Introduced: 4/3/80
Referred: Community & Regional Affairs

IN THE HOUSE BY THE RESOURCES COMMITTEE

HOUSE BILL NO. 992

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the formation of coastal resource service areas; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 46.40.120(b) is amended to read:

(b) The commissioner of the Department of Community and Regional Affairs may, after public hearings held in the area affected, consolidate two or more regional educational attendance areas as a single coastal resource service area or may divide an existing regional educational attendance area into two or more coastal resource service areas according to geographic, cultural or other features relevant to coastal management planning

(1) if a substantial portion of the coastal area contains land and water area owned by the federal government over which it exercises exclusive jurisdiction or land held in trust by the federal government for Alaska Natives over which the state would not exercise control as to use; or

(2) if, after giving due consideration to the standards applicable to incorporation of borough governments and the likelihood that a borough will be incorporated within the area, the commissioner determines that the functions to be performed under this chapter could be undertaken more efficiently through the combination of two or more regional educational attendance areas as a single coastal resource service area or through the division of a regional educational attendance area into two or more coastal resource service areas.

CALL 2nr Mgmt

The Honorable Bill Parker

Chairman

Community and Regional Affairs

Committee

Alaska State House of Representatives

Pouch V

Juneau, Alaska 99811

Dear Mr. Chairman:

SUBJECT: HB 992

At your request, the Department of Community and Regional Affairs has prepared background information on HB 992 and explored alternatives to the bill.

BACKGROUND

The Alaska Coastal Management Act of 1977, as amended, allows residents of the unorganized borough to organize coastal resource districts encompassing one or more regional educational attendance areas (REAAs). Each district prepares a coastal management program to be submitted to the Coastal Policy Council and State Legislature. The Commissioner of Community and Regional Affairs presently has authority to combine two or more REAAs into a single coastal resource service area. All municipalities which exercise planning powers are also districts. This system seems to

districts the regional center has chosen not to join the adjacent service area. Consequently, in the Bering Straits region there are two coastal resource districts, the City of Nome and the Bering Straits Coastal Resource Service Area; in the ~~Lower~~ Yukon/~~Lower~~ Kuskokwim region, there are also two coastal resource districts, the City of Bethel and the ~~Lower~~ Yukon/~~Lower~~ Kuskokwim Coastal Resource Service Area.

In addition to the regions discussed in the foregoing paragraphs, there are six coastal REAAs which have ~~been reticent to~~ not yet organize coastal resource districts. They have the following characteristics:

1. Four of them--the Aleutian Islands (REAA 8), Northern Panhandle (REAA 18), Southern Panhandle (REAA 19) and Prince William Sound (REAA 21)--have several first class or home rule cities each and no clearly defined regional center. Therefore, each region has several school districts, several coastal resource districts, and no established central gathering place or service center (except Anchorage or Juneau).

2. Federal landholdings consume much of the land within each region. Federally owned land is not part of the State's coastal zone. Settled areas and non-federal land often occur as isolated pockets separated by thousands of acres of federally owned land.

HB 992 resulted from concern that ~~none of~~ the organizational options offered by the Alaska Coastal Management Act may be well suited to situations of the second set of REAAs discussed above (REAAs 8, 9, 10,

18, 19, 21). Attachment 2 describes advantages and disadvantages of the status quo [AS 46.40120(b)], HB 992, three legislative alternatives and one administrative alternative.

Sincerely,

Lee McAnerney
Commissioner

	Region	Coastal Resource Districts (Including cities and boroughs within regions defined by REAAs)
REAA 1	Northwest Alaska	* Northwest Alaska Coastal Resource Service Area
REAA 2	Bering Straits	* Nome * Bering Straits Coastal Resource Service Area
REAA 3&4	Lower Yukon/ Lower Kuskokwim	Bethel * ~~Lower~~ Yukon/~~Lower~~ Kuskokwim Coastal Resource Service Area
REAA 6&7	Nushagak-Bristol Bay	Dillingham ~~Bristol Bay Coastal Resource Service Area (potential)~~
~~REAA 7~~	Lake/Peninsula-Bristol Bay	* Bristol Bay Borough * Bristol Bay Coastal Resource Service Area (potential)
REAA 8	Aleutian Islands	Unalaska King Cove Sand Point Aleutian Chain Coastal Resource Service Area (potential)
REAA 9	Pribilof Islands	Pribilof Islands Coastal Resource Service Area (potential)
REAA 10	Adak	Adak Coastal Resource Service Area (potential)
REAA 18	Northern Panhandle	* Yakutat * Haines (City) * Skagway * ~~Juneau~~ Hoonah * Sitka * Kake Northern Panhandle Coastal Resource Service Area (potential)
REAA 19	Southern Panhandle	* Petersburg * Wrangell * Klawock * Craig * Hydaburg * Ketchikan Gateway Borough Southern Panhandle Coastal Resource Service Area (potential)
REAA 20	Metlakatla/Annette	* Annette Islands Indian Reserve
REAA 21	Chugach	* Cordova * Valdez Prince William Sound Coastal Resource Service Area (potential)

* Program under way or completed

Status quo AS 46.40.120(b) allows the Commissioner of Community and Regional Affairs to consolidate two or more REAAs into one coastal resource service area after considering standards applicable to incorporation of borough governments or the likelihood that a borough would be incorporated within the area.	By using the REAA as the basic unit for planning in the unorganized borough, the present law does not create any new boundaries for delivery of government services.	The present law allows first-class and home rule cities (and second-clas cities under certain circumstances) t develop coastal management programs separate from the region and a number of cities do not see it in their best interest to join forces with an entir REAA. Consequently, coastal resourc service areas are not being organized in several REAAs and yet many cities have legitimate interest in influenci development outside their corporate limits.
HB 992 Under HB 992, AS 46.40.120(b) would be amended to allow the Commissioner of Community and Regional Affairs to not only consolidate two or more REAAs into one coastal resource service area, but also subdivide REAAs into separate coastal resource service areas according to geographic, cultural, or other features relevant to coastal management planning. Borough incorporation standards would also be considered.	oHB 992 still uses REAAs as the basic unit of reference for coastal resource service areas. °First-class or home-rule cities of the unorganized borough might be more inclined to join coastal resource service areas smaller than the entire REAA in which they are located. °HB 992 would allow residents to plan for those areas which affect them most directly and with which they are most intimately familiar.	Indiscriminate subdivision of an REAA could produce fragmented coastal management programs.
Legislative alternative #1 Retain the language of HB 992, but restrict application of the subdivision providion to teh Aleutian Chain (REAA 1), Northern Panhandle (REAA 18), Southern Panhandle (REAA 19), and Prince William Scund (REAA 21).	This provision would restrict application of the subdiviison section to areas most likely to express interest in them.	°The restriction may be unnecessary since coastal resource service areas have organized districts in most of the other coastal REAAs. °There may be constitutional questions about treating regions differently.

Legislative alternative #2

Retain the language of HB 992, but add the following provision:

If an REAA is divided and an organization election is called in one subdivision, an election will automatically be called in all other subdivisions of the REAA. If any one of the subdivisions elects to orgarize a district, all other subdivisions are automatically organized. The coastal management program from all subdivisions of an REAA must be coordinated from the outset and submitted simultaneously to enable the Coastal Policy Council and State Legislature to reach a reasonable conculsion about the compatibility of the plans. Although each subdivision would have its own board, there would be a seven-member regional oversight board with representation from the entire REAA (or combination of REAAs on a one-man, one-vote basis.

Advantages

°All of the advantages of HB 992

°Greater coordination among plans than would be afforded under HB 992.

Disadvantages

°Certain areas may be prematurely coerced into preparing a coastal management program by virtue of actions taken by neighboring areas.

°Any section could delay approval of the programs of other sections.

°Creation of another layer of government thereby making the process more cumbersome and costly.

Administrative alternative

No legislative change, but a coastal resource service area could voluntarily organize itself in such a way that board members from one area would meet routinely with local people in that area and use the full board meetings as a means to combine sectional ideas and make compromises if necessary.

Local involvement in regional coastal management planning with as few new formal structures as possible

The representation and consequent voting strength of any given area on the seven-member service area board would be less in an entire REAA than in a subdivision of it

SB
565

Kuskokwim Native Association

May 9, 1980

The Honorable Clem Tillion
Senate President
Pouch V
Juneau, Alaska 99811

Dear Senator Tillion:

We would like to support SB 565, enabling the State to recognize Native Village Governments and encouraging them to administer local governmental programs.

The State Revenue Sharing Program is one example of a means by which Native Village Governments might handle their own affairs and increase interaction and cooperation between the state and village governments.

At the present time, the only state revenue sharing funds that an unincorporated village is eligible for are Volunteer Fire Department monies. If we consider the state revenue sharing program as a means for the state to share it's wealth with local governments to assist in local government function, then we are doing a tremendous disservice to those small unincorporated villages who are struggling to provide some of the same services as small cities in the unorganized borough. At a time when the Legislature is considering establishing regional units within the unorganized borough, I beleive that we need to first strengthen the village local government capabilities.

I have been working in the area of local government for our KNA villages over the past three years. During that time I have seen much development in each village's capability to handle its own affairs. For the state to ignoreour federally recognized Native Village Governments is a hinderance to the villages who are attempting to strengthen their local government capabilities and village development. For many villages, the Native Village Government is the only form of local government and should be encouraged to participate in state programs in the same manner as a second class city.

I would be happy to supply any additional information to you regarding specific questions dealing with Native Village Governments in our KNA area.

Sincerely,

Cheryl Jerabek

RE: DRAFTING REQUEST

I would appreciate having a bill drafted which would update SB 116 introduced by Senator Rader in 1975. The updates which I feel are necessary deal with certain technical issues, for example, interest rates, and updating to include a class of utility needs not specifically identified in SB 116.

Page 1, l. 22 , delete "the curtailment . . .gencies(line 23) and substitute: "delays experienced in obtaining low cost federal loans."
Page 2, l.9 delete "eight" and insert "the current borrowing rate by the state"
l.10 delete "per cent a year"
page 2, after line 13 and before the section identified on line 14 as (2) insert a new section (2) to read: " make loans to public utilities to meet short term or interim capital needs prior to receipt by the public utility of federal loan funds;"
Page 2, line 14 readjust numbering 2-5 becomes 3-6.
Page 5, line 21, change effective date.

I have attached a copy of SB 116 for your convenience.

Introduced: 1/31/75
Referred: Commerce and Finance

IN THE SENATE BY RADER

SENATE BILL NO. 116

IN THE LEGISLATURE OF THE STATE OF ALASKA

NINTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act creating the public utility revolving loan fund; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 42 is amended by adding a new chapter to read:

CHAPTER 08. PUBLIC UTILITY REVOLVING LOAN FUND.

Sec. 42.08.010. DECLARATION OF POLICY AND PURPOSE. The legislature finds that

(1) the availability of adequate public utility services and facilities at reasonable rates in this state is a proper matter of public concern;

(2) the ability of privately, municipally and cooperatively owned public utilities in the state to finance service to the public and capital improvement requirements to extend and improve those services on reasonable terms and conditions that will enable utility service rates to remain at reasonable levels in the foreseeable future is seriously impaired by the unavailability of low-cost private financing and the curtailment of low-cost loans available from federal agencies;

(3) as a matter of public policy, to ensure the sound development of the state and its resources and to provide an acceptable level of utility services to its residents at reasonable rates, the state should assist these public utilities in acquiring the funds that are essential to operate and maintain and expand utility facilities and services.

Sec. 42.08.020. REVOLVING LOAN FUND CREATED. There is created in the Department of Commerce the public utility revolving loan fund.

Sec. 42.08.030. POWERS AND DUTIES OF THE DEPARTMENT. (a) The department shall formulate general polices and procedures to implement the provisions of this chapter and promulgate regulations in consultation with the Alaska Public Utilities Commission.

(b) The department may

(1) if other credit is not readily available from private lending institutions at a rate of interest that does not exceed ~~eight per cent a year~~ the current borrowing rate by the State, for the term required, make loans to public utilities to finance or refinance capital improvements, plant and facilities, and to improve and expand services, subject to the provisions of this chapter;

(2) consult with appropriate federal agencies and other lending institutions which make loans to public utilities in the state concerning policies, regulations and procedures to carry out the provisions of this chapter;

(3) designate agents and delegate powers to them as is necessary;

(4) require bonds and undertakings from persons employed by it as in the commissioner's judgment are necessary, and pay the premiums on them;

(5) establish amortization plans as provided in sec. 50 of this chapter.

Sec. 42.08.040. ELIGIBILITY FOR LOANS. A public utility is eligible for a loan under this chapter if

(1) it is a public utility as defined in AS 42.05.701(2)(A) through (E);

(2) it is serving the public under a certificate of public

convenience and necessity issued by the Alaska Public Utilities Commission at the time of application for a loan;

(3) in the judgment of the department

(A) the public utility shows a definite potential for providing improved or expanded service in the community or service area it serves or otherwise requires the financing to maintain adequate, efficient and safe service; and

(B) the utility will be able to repay the loan.

Sec. 42.08.050. CONDITIONS AND LIMITATIONS ON LOANS. (a) A loan to a public utility under this chapter may not exceed $1,000,000.

(b) The loan shall be on terms and conditions the department determines appropriate and if secured by collateral may not exceed 75 per cent of the value of the collateral offered.

(c) Amortization plans for the repayment of loans made under this chapter may not exceed 30 years. The rate of interest may not exceed eight per cent a year on the unpaid balance.

(d) Unless a loan made under this chapter is participated in by a financial institution as provided in (e) of this section, it may not be made until an investigation and an economic feasibility study is conducted and, as a result of the investigation and study, the department determines that the loan is economically sound and that the utility will be financially self-sustaining and the loan will be fully amortized within and in accordance with the terms and conditions of the loan. The economic feasibility study shall be conducted by the department staff or by consultants, engineers or other technical experts approved by the department. To facilitate its determination of economic feasibility and the ability of the utility to be fully and financially self-sustaining and to amortize the loan, the department shall require the applicant for a loan under this chapter to furnish

those systems studies, long-range economic forecasts, financial data, and technical information that the department considers necessary.

(e) If a loan under this chapter is participated in by a financial institution in an amount not less than 20 per cent of the total amount of the loan, the department may accept the investigation and study made or accepted by the institution as a basis for its participation.

(f) If a financial institution participates in a loan made under this chapter, it may elect to administer and service the loan for a reasonable fee not exceeding one-half of one per cent.

(g) The state and the participating institution shall each have a lien or share the collateral to the extent of their respective portions of the total loan.

Sec. 42.08.060. ADMINISTRATION. Money loaned shall be delivered to the borrower in the form of a warrant drawn on the treasury, vouchered in the manner prescribed for state disbursing officers, and charged against the public utility revolving loan fund. Each voucher shall be approved by the commissioner of commerce or a bonded deputy authorized by him to act as a certifying officer. Upon repayment of loans by installments or otherwise, in accordance with the prescribed terms, or upon liquidation by foreclosure or other process, or upon receipt of interest or other revenue, the money so received shall be turned over to the commissioner of revenue for deposit in the public utility revolving loan fund.

Sec. 42.08.070. SALE OR TRANSFER OF NOTES, MORTGAGES AND OTHER COLLATERAL. (a) The commissioner of commerce may sell or transfer at par value or at a premium or discount to any bank or other private purchaser for cash or other consideration the notes, mortgages and other collateral held by the Department of Commerce as security for

loans made under this chapter.

(b) The commissioner of commerce may sell or transfer at par value to the Department of Revenue the notes, mortgages and other collateral held by the Department of Commerce as security for loans made under this chapter. The Department of Revenue shall purchase all of the notes, mortgages and other collateral so offered, allowing the Department of Commerce a one-half of one per cent service fee.

Sec. 42.08.080. GUARANTEES OF LOANS BY OTHERS AUTHORIZED. The commissioner of commerce may enter into agreements with other state departments and agencies, private banks, other lending institutions, and individuals for the purpose of guaranteeing loans made to qualified public utilities. The guarantees may not exceed 90 per cent of the amount loaned and the loans shall be secured in the same manner as provided for direct loans under this chapter. A loan made under this chapter and guaranteed by the commissioner of commerce and the state shall bear an interest rate not exceeding eight per cent a year on the unpaid balance.

Sec. 42.08.090. PROCEEDINGS AND REGULATIONS. The Administrative Procedure Act (AS 44.62) governs all proceedings, and the promulgation of regulations, under this chapter.

* Sec. 2. This Act takes effect on July 1, 1975.

CSHB 932 - An act creating the office of rural development, and the Rural Development Council; and providing for an effective date.

Senate Resolution for introduction - Relating to participation by the state in the White House Conference on Families.

League of Women Voters of Alaska

May 8, 1980

Honorable Jay S. Hammond
Governor
State of Alaska
Pouch A,
Juneau, Alaska 99811

Dear Governor Hammond:

The League of Women Voters of Alaska supports continued State participation in the White House Conference on Families.

The League worked closely with state and local community organizers throughout the entire process from planning community hearings to acting as recorders and facilitators. You are to be commended for carrying out the process in such an open manner. The entire process of choosing delegates was well done.

The League is appalled that you would consider abandoning the White House Conference on the Family and negating the grass root effort and commitment of Alaskans that went into choosing delegates and identifying issues impacting families in Alaska today.

The citizens of this state participated in the local hearings and state conference in good faith that they and Alaska's ideas would become part of the national dialogue on families. It is your responsibility to support this citizen/state effort and continue with the state participation in the conference.

The family is the most important basic unit in our society, and one which is strongly impacted by the more traditional political issues of economics. To consider withdrawing Alaska from dialogue on the family simply because more traditional issues are already consuming your time and energy is untenable. Non-participation is not the answer to controversy.

The League of Women Voters of Alaska urges you to keep faith with the citizens of Alaska who support the ideals of this conference and wish to continue the State's participation in the White House Conference on Families.

Sincerely,

Jean Stassel

Governor Jay Hammond
State of Alaska
Juneau, Alaska 99811

9 May 1980

Dear Governor Hammond,

I am disappointed and perplexed that you have proposed Alaska's withdrawl from the national White House Conference on Families. I am concerned that delegates to the State Conference and alternates to the National Conference were not informed of this serious proposal by a letter from you, and many may still be unaware if their local newspapers or media did not pick up on the story.

Speaking for Juneau's involvement, a large spectrum of people gave oral or written testimony or support to the local hearings. Some spent a great deal of time and thought on their presentation with the idea that their contributions would matter. They did. Juneau came up with a position paper which contained both "liberal" and "conservative" concerns, and the three elected delegates were bound by that paper in their actions at the State Conference.

Although some groups would claim that only their families are legitimate ones, I do not feel that most Alaskans believe that families, the basic nurturing unit of our society, can be stereotyped. In fact, nationwide figures show that an employed father, a housewife mother, and children (any number) is only 15% of our nations families. In Alaska where there is a higher than average incidence of employed women, this percentage is even lower.

Nor do I feel that the scare issues of ERA, abortion and gay rights are a significant part of the Conference outcome. None were targeted as major issue areas by any panel, and the latter two were mentioned only by the first panel and in a conservative context. The ERA is simply a fact of Alaskan life and law since our own state ERA was passed eight years ago. The conference was at times frustrating to people of all persuasions, but it was on the whole a democratic process, and the concluding document is a democratic document. It cannot fail, therefore, to contain things with which we may not all agree, but to censor or alter it in any way now would cause even more distrust of government.

Special attention was given at the Conference to the needs and concerns of our native peoples. Rosita Worl and Mary Jane Fate were excellent and informative keynote speakers there. Alaska's Native and rural people have unique family concerns which will not be heard at the national level if we are to withdraw.

Please reconsider your proposal.

Sincerely yours,

Susan R. Clark

Susan R. Clark, alternate delegate to
the National Conference

Governor Jay Hammond
Members of the Alaska State Legislature
Juneau, Alaska

Dear Governor Hammond, and House and Senate members:

I've been informed that Alaska's participation in the White House conference on Families is in question.

I would strongly urge you to support Alaska's participation in that conference for two reasons:

1. You as lawmakers know that your decisions have an impact on the living patterns and institutions of society. Legislation at all levels--federal, state, and municipal--cannot fail to have impact on families.. In a sense it is not possible to "do nothing," because the consequences of governmental policy reach deeply into society already. The only issue is whether we will face problems squarely.

2. The document prepared by Alaskans comprises the opinions of a wide spectrum of people, containing both liberal and conservative viewpoints. The delegates selected also are representative of nearly all viewpoints and should effectively represent the diversity of opinions within our state.

I hope you will sustain the confidence of people in our state's democratic processes and support our participation in the upcoming conference.

Sincerely,

John Jensen

Juneau, Alaska 99801

Dear Governor Hammond,

The Juneau Douglas Branch of the American Association of University Women met today and discussed your recent letter relating to the White House Conference on Families. The members voted unanimously to support Alaska's participation in the National Conference.

Our membership feels that Alaska's unique concerns will not be heard by the nation, if we are not present. Whatever action is taken at the National Conference, Alaska must be there to lend its voice to the proceedings.

Sincerely,

Barbara Potter

RESOLUTION

Whereas the Alaska Home Economics Association and the Future Homemakers of America have supported the National White House Conference on Families for the past year in our programs, and

Whereas this program has aroused deep issues as well as needs throughout our country, and

Since the Alaska Home Economics Association is a force for families,

Therefore, be it resolved that the Alaska Home Economics Association will support the State of Alaska's continued participation in the White House Conference on Families to insure the Alaska perspective will be communicated.

FOR THE RECORD

At 8 A.M. this date, a Jt. C/RA Hearing was held on the Skagway Annexation Local Boundary Commission Recommendation. Testimony was heard both for and against. At 10 a.m. the meeting adjourned.

Since the Jt. C/RA Committee did not take any definite action, the Local Boundary Commission's recommendations will go into effect (as stated in the cover memorandum letter to the Legislature from the Department of Community and Regional Affairs, dated January 18, 1980). Although the Committee realized the 45 day deadline, and this being the 43rd day, it was recognized that there was still time to submit negative resolutions and pass them within the deadline time period; however both co-chairmen (Senator Arliss Sturgulewski and Representative Bill Parker) decided to let the case stand as is; thereby letting the recommendations go into effect.

President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Sen[illegible]illion:

In accordance with the provision of Article X, Section 12 of the Alaska Constitution and Alaska Statutes 44.19.260, presented herewith is a recommendation of the Local Boundary Commission concerning annexation of territory to the City of Skagway.

The recommendation will become effective forty-five days after this presentation or at the end of the legislative session, which ever is earlier, unless disapproved by resolution concurred in by a majority of the members of each house.

Sincerely,

Lee

STATE OF ALASKA
LOCAL BOUNDARY COMMISSION
JUNEAU, ALASKA

RECOMMENDATIONS OF THE LOCAL BOUNDARY COMMISSION SUBMITTED TO THE ELEVENTH STATE LEGISLATURE SECOND SESSION ASSEMBLED

SUBMITTED JANUARY 18, 1980

Recommendation for Annexation of Territory

to the

City of Skagway

WHEREAS, petitioner, the City of Skagway has requested that certain territory be annexed to the City of Skagway; to wit: the entire area contiguous to the City between the Haines Borough and the Canadian border containing residential and recreational lands; and

WHEREAS, subsequent to giving proper notice, the Local Boundary Commission conducted a public hearing in Skagway on November 17, 1979, to consider whether the territory for which the City of Skagway petitioned should be annexed to the City; and

WHEREAS, following the public hearing the Local Boundary Commission convened a decisional meeting at which it reviewed the City of Skagway's petition, supporting brief and all testimony received prior to and during the November 17, 1979, public hearing; and

WHEREAS, the Local Boundary Commission has determined that the proposed area met the standards for annexation in that the area is likely to see development that will require municipal services; and

WHEREAS, the City of Skagway is the only local government located proximate to the territory which has the capability of providing the needed services;

NOW THEREFORE, the Local Boundary Commission recommends that pursuant to to Article X, Section 12 of the Alaska Constitution and Alaska Statutes 44.19.260 that the petition for annexation of territory to the City of Skagway be approved and that the boundaries of the City of Skagway be changed to read as follows:

City of Skagway. Beginning at Mt. Bagot at Lat. 59° 21' N and Long. 135° 2' W. Thence due West on a straight line to a point in the center of Lynn Canal on Taiya Inlet at approximately Lat. 59° 21' N and Long. 135° 22'.5" W. Thence northwesterly to Monument No. 124 on the Alaska-Canada Boundary at Lat. 59° 44' N and Long. 135° 43' W. Thence northeasterly along the Alaska-Canada Boundary to Mt. Foster. Thence southeasterly along the Alaska-Canada Boundary to the point of beginning.

In accordance with Article X, Section 12 of the Alaska Constitution, this recommendation shall become effective forty-five days after presentation to the legislature or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

Report to the Local Boundary Commission on the proposal to Annex territory to the City of Skagway

November 14, 1979

Department of Community and Regional Affairs

On July 27, 1979, the Department of Community and Regional Affairs received a petition proposing annexation of some 431.35 square miles of territory to the City of Skagway. Review of the petition indicated that it was in the proper form and did contain all the necessary information. A letter stating acceptance of the petition was sent to L.B. Jacobson, petitioners representative, on July 30.

Notice of the Commission's forthcoming hearing was mailed to petitioners' representative on October 23 and was posted in three public places and televised over the Skagway Network Television during the period of October 29 through November 16.

II. PETITION

The petition, for all intents and purposes, is the same petition the Commission considered in November of 1976. Admittedly, it is a larger geographic area, but the vast majority of additional territory is mountainous, not suitable for development and, according to petitioners representative, is included so that the entirety of the region could be within the confines of one local government. Because the issues are the same as in 1976 and because the Commission's Statement of Decision entered in that proceeding (copy attached) does not indicate a basis for the deletion of

territory from the annexation proposal, the Department's recommendation is, literally, the same as it was in the prior proceeding.

III. RECOMMENDATIONS

Normally, our reports attempt to analyze an annexation proposal, note the positive and negative aspects of the proposal and make recommendations pursuant thereto. However, we have chosen to take a different approach this time; petitioners' arguments are clear and the information provided is detailed and accurate. We feel no need to expand or comment on petitioners' arguments - the decision is the Commission's.

However, we feel a broader question has been ignored; that question is "what size should a city be?" In our opinion all of petitioners' arguments are, to lessor or greater degrees valid, but at what point does a city become an innappropriate service mechanism. We are not suggesting that we have the answer, only that the question needs to be asked. Specifically, we recommend that petitioners be questioned as to how the city will provide services to such an enormous area.

1/25/80 check w/ mayor as to type of hearing.

WHEREAS, the Local Boundary Commission has determined that the proposed area met the standards for annexation in that the area is likely to see development that will require municipal services; and

WHEREAS, the City of Skagway is the only local government located proximate to the territory which has the capability of providing the needed services;

NOW THEREFORE, the Local Boundary Commission recommends that pursuant to to Article X, Section 12 of the Alaska Constitution and Alaska Statutes 44.19.260 that the petition for annexation of territory to the City of Skagway be approved and that the boundaries of the City of Skagway be changed to read as follows:

City of Skagway. Beginning at Mt. Bagot at Lat. 59° 21' N and Long. 135° 2' W. Thence due West on a straight line to a point in the center of Lynn Canal on Taiya Inlet at approximately Lat. 59° 21' N and Long. 135° 22'.5" W. Thence northwesterly to Monument No. 124 on the Alaska-Canada Boundary at Lat. 59° 44' N and Long. 135° 43' W. Thence northeasterly along the Alaska-Canada Boundary to Mt. Foster. Thence southeasterly along the Alaska-Canada Boundary to the point of beginning.

In accordance with Article X, Section 12 of the Alaska Constitution, this recommendation shall become effective forty-five days after presentation to the legislature or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

Senator Arliss Sturgulewski
Chairman, Senate Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

Following a public hearing on 17 November the Local Boundary commission reached a decision to approve the City of Skagway's annexation petition. The petition along with the L.B.C. recommendation for approval will be introduced within the first ten days of the next legislative session and, unless disapproved or modified by the Legislature within forty five days, the territory comprising the unorganized Borough boundary contiguous to the present municipal boundaries will be annexed to the City of Skagway.

Copies of the City's petition with the supporting ordinance and ballot proposition are enclosed. I join with the City Council in requesting that the City's petition may receive favorable consideration by your committee.

Sincerely,

Robert F. Messegee
Mayor

CITY OF SKAGWAY
RESOLUTION NO. 79-11R

A RESOLUTION TO PLACE ON THE BALLOT AT THE GENERAL ELECTION OF OCTOBER 2, 1979 A PROPOSITION CONCERNED WITH EXTENSION OF THE MUNICIPAL BOUNDARIES OF THE CITY OF SKAGWAY BY ANNEXATION.

WHEREAS: Under the State of Alaska municipal land selection program the City of Skagway is entitled to select five hundred acres of vacant, unappropriated and unreserved State land lying within the municipal boundaries of the City and,

WHEREAS: There are not five hundred acres of State land suitable for selection within the present municipal boundaries and,

WHEREAS: Accordingly, with the concurrence of the State Division of Lands the City has nominated certain lands external to the boundaries which will become available for selection when encompassed by the City's boundaries and,

WHEREAS: There is very little remaining developable land within the present boundaries and, therefore, it is foreseen that there will be considerable residential and industrial development as well as growth in population in areas outlying the present City limits and,

WHEREAS: The availability of these lands for development will be enhanced through their inclusion within the City's boundaries and,

WHEREAS: The residents of these areas, both present and future, will enjoy the City's municipal services and will expect these services to be extended as becomes practicable and,

WHEREAS: Developments within these areas, if they are within the City, will increase the City's capacity to expand and increase the level of public services and,

WHEREAS: Under the provisions of State Statutes taxation of properties within newly annexed territory must be equitable and based on the levels of municipal services provided - a policy which the City Council endorses and pledges to follow and,

WHEREAS: It is in the common interest that all citizens residing in the Community of Skagway and who receive the benefits of public services share in the responsibilities of governance as well the opportunities to participate fully in the decision making processes which determine the levels of service provided and,

WHEREAS: The Legislature has set the deadline for municipal land selection as October 1, 1980 and,

WHEREAS: In order that the City may select its full entitlement of five hundred acres, the lands nominated for selection must be annexed prior to that date and,

WHEREAS: To this end, the City Council by ordinance approved the submission of an annexation petition and,

WHEREAS: To facilitate and effect economics in the annexation process by the use of surveyed boundaries, the City has petitioned to annex all of the areas contiguous to the City encompassed on the South and West by the Haines Borough boundary and on the North and East by the United States-Canadian boundary and,

WHEREAS: The City Council also is well aware that this matter is of great concern to the citizens of Skagway and that the effects of its outcome upon the entire community will be longstanding and,

WHEREAS: An expression by the citizens of Skagway of appreciation and of support or opposition to the proposed annexation would be of value to the Local Boundary Commission and the State Legislature in reaching a decision on the City's petition.

NOW THEREFORE BE IT RESOLVED BY THE COMMON COUNCIL OF THE CITY OF SKAGWAY:

That the following proposition shall be presented to the qualified voters of the City of Skagway at the General Election of October 2, 1979:

DO YOU FAVOR APPROVAL OF THE CITY'S PETITION TO ANNEX ALL OF THE CONTIGUOUS LANDS OF THE UNINCORPORATED BOROUGH ENCOMPASSED BY THE HAINES BOROUGH BOUNDARY ON THE SOUTH AND WEST AND BY THE UNITED STATES-CANADIAN BOUNDARY ON THE NORTH AND EAST?

Lorene S. Gordon, City Clerk

DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

In the Matter of Annexation)
by the City of Skagway, Alaska)
_____) PETITIONER'S BRIEF

I. In General. The City of Skagway, Alaska is a first class city organized and existing under the laws of the State of Alaska. It is Alaska's oldest city originally incorporated under territorial law as a municipality in 1900. The City of Skagway's original municipal boundaries, established in a 1900 election to incorporate, encompassed 931.49 acres more or less, excluding tide and submerged lands. The municipal boundaries were expanded through annexation in 1978 to encompass 11 square miles. According to the official 1970 census, the population of the City of Skagway was 675; its population for 1 July 1978 revenue sharing purposes as compiled for and approved by the Alaska Department of Community and Regional Affairs was 874.

II. Municipal Services Provided Within the City. The City of Skagway currently provides water, sewer (primary treatment), garbage and solid waste disposal services to its residents. Electrical power is provided by an independent, city-franchised utility regulated by the APUC. The City provides maintenance and repair services for city streets and rights-of-way.

Law enforcement within its jurisdiction is undertaken by a police force consisting of a chief of police and two officers, all on a full-time basis.

Fire protection, rescue and emergency medical services within the city and surrounding environs are undertaken by the Skagway Volunteer Fire Department operated out of the

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY

P.O. BOX 1211, JUNEAU, ALASKA 99802
PHONE 586-3340

City-owned fire hall, a modern facility constructed in 1969. Major equipment employed includes: one 1970 American LaFrance pumper, one 1973 American LaFrance pumper, one 1963 White 1000-gallon tank truck, one 1953 Howe Jeep pumper, one 1974 Dodge ambulance, 1 Kaiser Emergency Medical Rescue vehicle and one 1958 Ford hearse. The City retains and pays a part-time fire chief, two captains and two lieutenants. The Volunteer Fire Department has seventeen regular members in addition to officers, paid a drill allowance of $2,500 plus a special training allowance for fire training school attendance and fees. There are four fire cadets and eight emergency medical personnel. Additionally there are a number of former members of the fire department and civic minded citizens who invariably respond and assist in combating fires.

The City owns and operates a cemetery and charges a flat fee of $325.00 for opening and closing a grave plus the plot.

The City of Skagway by ordinance established a Port Authority which serves in a planning and advisory capacity to the Council respecting port development and regulation of maritime and small craft activities within Skagway Harbor, including the Small Boat Harbor.

The City of Skagway has adopted a complete zoning plan and map to govern the organized growth and development within the municipality, and further, has promulgated standards for subdivision development. These will be expanded to include the annexed territory. A unique aspect of its zoning plan is establishment of a Historic District and restrictive development regulations therein. To prevent

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
209 N. D. A. BLDG.
P.O. BOX 1211, JUNEAU, ALASKA 99802
PHONE 586-3340

construction of substandard buildings and dwellings, the City Council has adopted the National Electrical Code, Uniform Building Code, and National Plumbing Code by reference in ordinance form. Also adopted is the fire prevention code promulgated by the American Insurance Association.

The City owns and operates a medical clinic in a rather new building, leasing same to a Haines-based physician commuting to Skagway two days per week to provide health and medical service to residents and the outlying population.

The municipal library is managed as a non-profit activity by a library board appointed by the Mayor. Library operations are financially subsidized by the City. A new public library building is presently under construction with an estimated completion date of early August 1979.

The Skagway Museum is an entirely city-operated entity both in terms of physical plant and personnel. Like the library, the museum is used by the population on an area-wide basis, not limited to residents. Further, the tourists which the museum and Historic District attract inure at least indirectly to the benefit of non-residents living on the periphery of Skagway's boundaries.

Additionally, the City owns the physical plant and facilities of the local school system operated by the Skagway School District through its School Board. The current enrollment for both primary and secondary grades is 200 students, 10 of which reside outside the present municipal boundaries.

III. Extra-territorial Services. The City currently provides extra-territorial fire protection to non-residents

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
200 N. D. A. BLDG.
PHONE 586-2340
P.O. BOX 1211, JUNEAU, ALASKA 99802

on a limited and gratuitous basis. The decision of whether to respond to an out-of-town request for fire service lies with the independent discretion of the fire chief who will consider all known and relevant factors giving preference to vigilance and protection within the City. Outside calls are responded to only with the tank truck, jeep pumper and emergency rescue vehicle.

As to law enforcement outside the City, Skagway has no Alaska State Trooper based at the City, but instead relies upon a trooper being sent over from time to time from Haines on an as-needed basis. In essence, the City of Skagway does provide extra-territorial police protection currently; its officers are commissioned by the State to enforce state law and they do respond to calls for assistance outside the Skagway City limits. Approximately 35% of the traffic accidents investigated by the police department during the past 3 1/2 years occured outside the City limits.

The City provides no water or sewer service on an extra-territorial basis. The City operates and maintains the only garbage dump in the vicinity. There is no charge made to persons residing outside the city limits who use the dump facility.

The residents within the territory proposed for annexation naturally use the city-owned and maintained schools, medical clinic, library, museum and all other municipal facilities, including city streets and roadways. The non-residents benefit from the access to and actual utilization of the foregoing municipal facilities but other than through payment of the 3% sales tax do not financially

P.O. BOX 1211, JUNEAU, ALASKA 99802

contribute to their establishment, maintenance or perpetuation in any manner corresponding with the contributions from local residents.

IV. Imminent Development. The prospective developments advised in Skagway's 1976-7 annexation brief have largely materialized. The Klondike Goldrush Historical Park and Skagway-Carcross Road are fact and the third project, port development, is well along. The city-State joint use barge and ferry terminal off-loading facility is scheduled for completion this October, 1979 at a cost of $3.5 million. The White Pass rail freight dock and dredging project is in the permit process. Accordingly, it can be seen in retrospect that the City's 1976-7 annexation petition forecast the major projects with commendable accuracy.

Additionally, it appears that additional major projects will be imminently undertaken. These prospective developments in and about the City will assuredly affect its growth, level of commercial activity, and invoke desirability for further municipal control respecting external affiars.

1. Additional Port Developments. The City is in receipt of State and EDA grant funding for the concurrent construction of a heavy duty transfer bridge and cargo staging facility. The White Pass & Yukon Route has applications pending approval by the Corps of Engineers for construction of improvements to its water front facilities - e.g. dredging and rehabilitation of the cargo dock, dredging and major alteration of the Ore Terminal wharf. Dredging work in the City's Small Boat Harbor has been completed and the new float system is scheduled for installation in the summer of

P.O. BOX 1211, JUNEAU, ALASKA 99802
PHONE 586-3340

1980.

2. Industrial Developments. It is foreseen that the Natural Gas Pipeline will be constructed along the ALCAN right-of-way within the next several years. President Carter's speeches on July 15 and 16 addressing the nation's energy shortage indicate accelerated construction of the gas pipeline. The Skagway seaport will serve as the through-put point for materials and equipment for construction of a segment of the pipeline approximately 500 miles in length. During the estimated construction period of two to three years, this will entail major improvements to port facilities as well as major increases in longshoring and cargo handling activities in Skagway. Additionally, Skagway is being given serious consideration as the northern terminus for construction of an oil pipeline to Keg River. Northwest Energy - Foothills Ltd. has made application for construction of this project; the environmental impact statements are in process of development and a Presidential decision is expected by January 1980. The engineering and cost estimates contained in the application call for construction over a two-year period by a peak work force of 600 and the expenditure of some 211 million for the U.S. portion in Skagway and for the 14-mile pipeline to the Canadian Border, e.g., additional dredging and construction of a dock to handle a 120,000 dwt tanker every other day, construction of a 4 million barrel capacity tank farm, pump station and pipeline to the Canadian Border.

3. Klondike Gold Rush International Highway. The Skagway-Carcross road was opened for several weeks in September-October 1978 and was thoroughly enjoyed. The road reopened

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
203 H. B. A. BLDG. PHONE 586-5340
P.O. BOX 1211, JUNEAU, ALASKA 99802

in May 1979 and has been heavily traveled subsequently, e.g. for the period 7 May, 1979 to 30 June, 1979, the U.S. Customs Service reports some 12, 198 persons, 6,243 U.S. citizens and 5,955 Canadian and other nationalities, have traveled southbound over the highway. Canadian customs reports some 17,000 persons traveling northbound during the same period. This road is certain to become a major transportation corridor for commerce to interior Alaska and the Yukon Territory. Its importance was originally understated. It will serve as a scenic alternative to the Haines Highway for ferry borne vehicles entering and departing Alaska and will, as well, attract traffic traveling the Alcan Highway. The last session of the State Legislature appropriated some $564,000.00 for the procurement of maintenance equipment and employment of additional highway maintenance personnel in order to keep the road open year-around. It is anticipated that the Canadian Government will follow suit. For example, the Federal Government of Canada has appropriated $3 million for further construction and improvements and it is expected a portion of this funding will be applied to winter maintenance.

The establishment of the National Park and the opening of the highway already have resulted in increased tourism as well as changes in the nature of visitors, specifically, more younger families with children; more backpackers and hikers and more recreational and camping vehicles as opposed to retired couples traveling by cruise ships. The impacts of the Park and Highway are already being felt in Skagway. There is a lack of campgrounds and accomodations for recreational vehicles, resulting in traffic congestion and tight parking

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
250 H. S. A. BLDG. PHONE 586-9340
P.O. BOX 1211, JUNEAU, ALASKA 99802

in and close by the Historic District. Additional campgrounds and tourist support facilities are required, and, due to the limited developable land within the City limits, these will have to be located in the area proposed for annexation to the north of the City and along the Dyea road and in the Dyea valley. To prevent haphazard development with attendant adverse impact on the natural environment, creation of dangers to public health and safety, it is essential that the City exercise zoning and platting authority.

Impacts of change deserve comment. As noted above, the distinct impacts of the Park and Highway are already present. If either of the pipeline projects materialize, singly or in combination, the City will be severely impacted. The City will be faced with almost overwhelming demands for housing accomodations and for municipal services, most obviously, public safety, education and utility.

In order to meet and to reduce or ameliorate the adverse aspects of these foreseen changes the City must plan and prepare. The time is now. The City is doing this. The City's OEDP Committee has spent a great deal of time recently in updating the City's Overall Economic Development Plan. This report emphasizes the need for annexation.

Additionally, the City has received a planning grant under the Coastal Energy Impact Program. This planning effort will include the development of a District Coastal Management Plan, an Energy Impact Plan and also a comprehensive plan, a capital improvement plan and a financial management plan. Work on this plan will be initiated this summer with a completion date of May 1980.

P.O. BOX 1211, JUNEAU, ALASKA 99802

V. Why the Boundaries Proposed? The municipal boundaries of Skagway remained unchanged for 75 years. Until the last several years, growth in and around the City has not warranted extension of the municipal boundaries on the basis of need for provision of municipal services when viewed in the light of costs and services benefit to residents both within and outside the municipal boundaries. In 1976 it became apparent to the City Council that the City, by reason of its serving as a major port in a transportation corridor and as the commercial and industrial center of the area, has conferred substantial benefits upon residents and owners of properties outside the City without corresponding tax contributions on their part for these services and benefits. Due to opposition on the part of some of these non-residents and primarily because of a lack of consensus within the Council, the City petitioned for only a limited extension of its boundaries. The Local Boundary Commission considerably reduced the extent of the territory applied for and the annexation was approved by the Legislature in March of 1978. Subsequently, in its administration of government, the City has established differential tax districts for the annexed areas based on the City's capability to provide municipal services and the level of services provided.

The lines of communications in the Skagway area are limited and there is a dearth of developable land which is readily accessible - e.g. the area is largely river flood plain, mountain and glaciers. There are however, pockets of land suitable for residential or industrial development and to which provision of access will be practicable through

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
PHONE 586-3340
300 N. F. A. BLDG.
P.O. BOX 1211, JUNEAU, ALASKA 99802

road improvements and construction, e.g., along the Dyea road, in the Dyea valley and along the AB Mountain ridge line. And, most importantly, there is the transportation corridor through the White Pass. These are the areas which must be made available and developed in order that the City may accomodate ongoing and foreseen increased population and industrial growth. Under the State municipal land selection program the City's entitlement is 500 acres. There are, however, not 500 acres of State land within the City boundaries which are suitable for selection. Therefore, with the concurrence and assitance of the State Division of Lands, the City has nominated lands for selection which lie outside the present municipal boundaries. In making these nominations, it was understood that the City would have until 1986 to extend its boundaries through annexation and thereby select its full allocation. The recent legislature, however, set a deadline of 1 October 1980 for municipal land selection. Therefore, completion of the annexation process has become a matter of urgency.

To facilitate annexation, it is considered to be entirely appropriate as well as both more practical and more economical that the area to be annexed be encompassed by established survey monuments. Accordingly, the City Council reached a decision to petition for annexation of all of the area within the unorganized borough encompassed by the Haines Borough boundary and the U.S.-Canada Boundary.

Given the confines established by the Haines Borough boundary and the U.S. - Canada boundary, it is self-evident that any further enlargement of the City of Skagway's

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
200 N. D. A. BLDG. PHONE 586-5340
P.O. BOX 1211, JUNEAU, ALASKA 99802

boundaries will be impossible. The question becomes which form of government is most appropriate. The Skagway Council rejected establishment of a borough as being an overlapping, expensive, and largely unnecessary layer of government; better that the City should expand into the "gap". Further, there was no legal method under the State statutes for the City to transform into a unified city-borough in a single step. Lastly, the Council acknowledges a legislative trend toward classification of all lands in the State and toward elimination of the unclassified borough. Enlargement of the City of Skagway's boundaries to 451 square miles might be considered large for a city, but it is a mere paucity by present borough standards prevailing in the state. Specifically, it would be approximately one-third as large as the present smallest borough, about one-tenth as big as the "average" borough, and little useful purpose could be seen in organizing yet another separate local government unit in the form of a borough. A borough would furnish no greater services, and the City of Skagway has adopted a scheme of differential tax zones to implement a policy of real property taxation to correspond with the level of services provided.

VI. City Owned Properties Outside the Existing Boundaries. A segment of the west side of the City's recreational park at Yakutania Point lies outside the present boundary. The City has nominated several hundred acres of land for municipal selection which lies outside the City limits. Subject to approval of this petition, some of these lands will be selected prior to 1 October 1980.

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
PHONE
P.O. BOX 1211, JUNEAU, ALASKA 99802

VII. Population and Activities Within the Area Proposed for Selection. A total of 51 persons reside outside the City limits and within the area proposed for annexation. There are approximately 175 acres of privately-owned land in the area, primarily along the Dyea Road and in Dyea Valley. In addition to permanent residences there are a number of recreational cabins located on private and State land which are occupied weekends.

The largest industrial activity in the area, the White Pass and Yukon Route has extensive improvements in the area, specifically the railway and pipeline through the White Pass. The area proposed for annexation consists largely of Federal and State lands including the National Park and a portion of the Tongass National Forest.

VIII. Taxes, Services and Benefits in Transition. Upon receiving annexation authority, the City of Skagway would propose to undertake planning and zoning control immediately and to increase the level of police and fire protection as practicable throughout the enlarged jurisdiction. That is not to say that the services will be equal. For example, the Council will have to consider obtaining some separate and lesser firefighting equipment for placement at Dyea.

The City of Skagway's fiscal year runs from July 1 through June 30 of the next calendar year. Since the effective date of the annexation would fall in the middle of calendar year 1980 and most probably at a time other than the commencement of Skagway's 1980-81 fiscal year, it is contemplated that the City's services would be phased in on a schedule roughly

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
200 H. B. & A. BLDG. PHONE 586-1360
P.O. BOX 1211, JUNEAU, ALASKA 99802

commensurate with additional revenue which is generated for capital improvements. The City will not impose taxation, either on real or personal property, in the territory proposed for annexation until tax year 1981.

Extension of governmental services and of water and sewer utilities will be undertaken on a basis compatible with the City's financial ability with a view toward a favorable cost-benefit ratio. This is not in the immediate future and Skagway would establish differential tax zones which would be amended from time-to-time in parallel with the level of services provided. Skagway's present differential tax zone applies 100% of the levy to the land on the flats on the southeast side of the river; 79 1/2% to the flat lands on the other side of the river, and a 50% levy on the sloping lands and those within the City towards Dyea. It is contemplated that additional tax zones with appropriately lesser rates would be established for the areas proposed for annexation by this petition, e.g., for the Dyea and White Pass Corridor areas.

The City Council recognizes the need for fire, rescue and ambulance services; a plan will be formulated to ascertain how to best respond to additional requirements.

The construction of new residential and commercial structures and additions thereto in the new territory will be subject to the Planning and Zoning Permit process thus insuring greater value through compliance with recognized standards. In this regard, it is the intent of the City Council that these standards will be applied in a reasonable and equitable manner with due consideration given to the

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
200 N. F. A. BLDG.
P.O. BOX 1211, JUNEAU, ALASKA 99802

situs and nature of the building and to the individual life style preference of the inhabitants. The City's comprehensive zoning plan will have to be revised and expanded commensurate with its enlarged jurisdiction, and this will be done. In undertaking this task, the City plans to recognize non-conforming uses through "grandfather rights" and to confer with residents and owners of property in Dyea to ascertain whether full applicability of the aforementioned codes is appropriate in that sector.

Members of the population currently residing outside of the city and using municipally-provided services are unable to play a role in the formulation of policy pertaining to those services. The annexation would, in addition to the obvious benefit of the privilege of voting, allow those who are currently non-residents of the City to participate in policy formulation through candidacy for elective office such as council and school board, and serve on numerous committees and commissions.

There are no inter-municipal agreements regarding transitional provisions of services and distribution of assets and liability because this proposed annexation does not affect any other city or borough.

It is contemplated that benefits from annexation would accrue to the city, present as well as those enfranchised by annexation. The tax base will be broadened by the extensive capital investment programs proposed for support of the oil and natural gas pipelines. For example, of the estimated $211 million cost of the oil pipeline, some $163 million will be expended for capital improvements within the proposed

ROBERTSON, MONAGLE, EASTAUGH & BRADLEY
A PROFESSIONAL CORPORATION
510 H. B. & V. BLDG.
PHONE 586-2540
P.O. BOX 1211, JUNEAU, ALASKA 99802

municipal boundaries. The City will also arguably benefit from receipt of a percentage of the Tongass National Forest stumpage fees. These benefits will enable the upgrading of city services for the benefit of all residents, tourists and casual users of the area, commercial and industrial users who would patronize the area as a transportation corridor and staging location, and in particular will provide for the extension of a higher level of services to the more removed areas such as Dyea Valley.

IX. Conclusion. The purpose of this annexation petition is to anticipate growth and provide for advance planning. The increase in activity attendant to the construction and operation of the pipelines will both benefit the City's economy and generate increased demands and costs for governmental services. The City will require that the pipeline construction companies assume a major share of these costs until they can be supported by the increased tax base. In the absence of annexation, the City would be lacking adequate jurisdiction and controls necessary to implement timely extensions of municipal services.

Annexation is imperative if the City of Skagway is to fully realize its land selection entitlements.

It is the conclusion of the City Council that there is a need for basic governmental services such as the promotion and control of land usage and development through the exercise of planning and zoning authority paralleled by the extension of police and fire protection service to the inhabitable areas outside the city which are now or soon will be partially urban in character. Extension of the City

municipal boundaries. The City will also arguably benefit from receipt of a percentage of the Tongass National Forest stumpage fees. These benefits will enable the upgrading of city services for the benefit of all residents, tourists and casual users of the area, commercial and industrial users who would patronize the area as a transportation corridor and staging location, and in particular will provide for the extension of a higher level of services to the more removed areas such as Dyea Valley.

boundaries rather than formation of an overlapping borough jurisdiction is deemed a more prudent alternative. The volume and nature of tourism and recreational visitation is both changed and increased, and most importantly, the prospects for major industrial development are imminent. The City wishes to respond to the foreseen impact by enlarging its jurisdiction "to provide for maximum local self-government" consistent with Alaska's Constitutional mandate.

LETTER OF INTENT
SCR 12

The concept of local control in coastal zone management has been basic to the development of the state's coastal zone management program. A predominant concern of the committee is the functioning of this local control in the unorganized borough.

This letter is intended to condition legislative approval of these regulations on a requirement that the Department of Community and Regional Affairs submit an adequate development plan for the organization of effective, locally-controlled coastal resource districts. Appropriations for the coastal management program will be allocated accordingly. The committee suggests that the Department of Community and Regional Affairs work with the Legislative Council to satisfy this requirement.

While rural communities may not initially want to involve themselves in coastal zone management, it is doubtful they will want to entrust it to others when fully understood. Considering the implications district coastal zone management has for subsistence habitat protection and rehabilitation, one can probably expect strong local participation in district coastal zone management policy making.

The Legislative Council will establish an interim program to monitor the state's coastal resource disticts' community organization. Important to this organization is fair local-level understanding of the phrase "land and water uses of state concern". The energy siting regulations are designed to guide local coastal resource districts to properly regulate such land and water uses of state concern.

In addition, the committee is aware that the proposed standard 6 AAC 80.160 (a) introduces a new element in the coastal management program . Existing public participation regulations (6 AAC 80.020 and 6 AAC 85.130) apply specifically to adoption of district programs and amendments to district programs. In districts which develop district programs containing areas which merit special attention, the public involvement provisions of 6 AAC 85.130 apply. It is the intent of this committee that regulations for public involvement be developed for areas not in districts which are designated as meriting special attention by the Council. Council designation should include evidence of effective and significant opportunity for public participation in the specified "concurrence" and such public involvement process should be specified in the Alaska Coastal Managemnet Plan Guidelines.

Further, it is the intent of the committee that the letter of intent of the Senate Community and Regional Affairs Committee which appears on page 463 of the Senate Journal be approved.

SENATE LETTER OF INTENT

SENATE CONCURRENT RESOLUTION NO. 12

Testimony received by the Community and Regional Affairs Committee indicated the need for a change in the Alaska Coastal Policy Council's regulations. Specifically:

(1) 6 AAC 80.100 (a)(3) timber harvest and timber management activities must be planned so as to protect streambanks and shorelines, prevent adverse impacts on fish resources and habitats, and minimize adverse impacts on wildlife resources and habitats.

The testimony indicated the need:

following words "streambanks and shorelines," delete "prevent" insert "minimize"

A representative from the Alaska Coastal Policy Council and a representative from the Office of Coastal Management concurred with the need for this change.

It is the intent of this committee that the words "minimize adverse impacts" should apply to both fish resources and habitats and wildlife resources and habitats.

The Committee urges the Alaska Coastal Policy Council to consider and adopt this change at its earliest convenience.

Adopted as a Senate Letter of Intent March 13, 1979
by unanimous consent

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 22 (Rules) amended, by the Rules Committee, entitled: CSSB 22 (Rls) am

> "An Act extending the benefits of group insurance to certain temporary employees of the state and its governmental units; and providing for an effective date."

was read the first time and referred to the State Affairs and Finance Committees.

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 68 by the Rules Committee, entitled: CSSB 68

> "An Act relating to the use of waste heat produced by certain pipeline facilities; and providing for an effective date."

was read the first time and referred to the Judiciary Committee.

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 130 amended by the Health, Education and Social Services Committee, entitled: CSSB 130am

> "An Act relating to the student loan program; and providing for an effective date."

was read the first time and referred to the Health, Education and Social Services and Finance Committees.

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 182 (Finance) by the Finance Committee, entitled: CSSB 182 (Fin)

> "An Act abolishing the Alaska Salary Commission and providing for compensation of public officers and employees; and providing for an effective date."

was read the first time and referred to the State Affairs and Finance Committees.

REPORTS OF STANDING COMMITTEES

SCR 2 The State Affairs Committee has had SENATE CONCURRENT RESOLUTION NO. 2 (relating to the employment of persons in permanent part-time positions in state government) under consideration and a majority of the committee recommends it do pass. Concurring: Miller (Chairman), Eliason, Fuller, Gardiner and Martin.

SCR 2 was referred to the Rules Committee for placement on the calendar.

CS SCR 11am The State Affairs Committee has had COMMITTEE SUBSTITUTE FOR SENATE CONCURRENT RESOLUTION NO. 11 amended (relating to the hazardous condition of the Muldoon and Fort Richardson cloverleafs on the Glenn Highway due to lack of adequate guardrails) under consideration and a majority of the committee recommends it do pass. Concurring: Miller (Chairman), Eliason, Fuller, Gardiner and Martin.

CSSCR 11am was referred to the Rules Committee for placement on the calendar.

SCR 12 The Community and Regional Affairs Committee has had SENATE CONCURRENT RESOLUTION NO. 12 (approving regulations adopted by the Alaska Coastal Policy Council) under consideration and a majority of the committee reports it back with individual recommendations and attaches a letter of intent. Parker (Chairman), Brown and Parr recommend do pass. Carney and Zharoff have no recommendation.

SCR 12 was referred to the Rules Committee for placement on the calendar.

The Community and Regional Affairs Committee's letter of intent on SCR 12 appears as follows:

LETTER OF INTENT
SCR 12

The concept of local control in coastal zone management has been basic to the development of the state's coastal zone management program. A predominant concern of the committee is the functioning of this local control in the unorganized borough.

This letter is intended to condition legislative approval of these regulations on a requirement that the Department of Community and Regional Affairs submit an adequate development plan for the organization of effective, locally-controlled coastal resource districts. Appropriations for the coastal management program will be allocated accordingly. The committee suggests that the Department of Community and Regional Affairs work with the Legislative Council to satisfy this requirement.

SCR 17

While rural communities may not initially want to involve themselves in coastal zone management, it is doubtful they will want to entrust it to others when fully understood. Considering the implications district coastal zone management has for subsistence habitat protection and rehabilitation, one can probably expect strong local participation in district coastal zone management policy making.

The Legislative Council will establish an interim program to monitor the state's coastal resource disticts' community organization. Important to this organization is fair local-level understanding of the phrase "land and water uses of state concern". The energy siting regulations are designed to guide local coastal resource districts to properly regulate such land and water uses of state concern.

In addition, the committee is aware that the proposed standard 6 AAC 80.160 (a) introduces a new element in the coastal management program . Existing public participation regulations (6 AAC 80.020 and 6 AAC 85.130) apply specifically to adoption of district programs and amendments to district programs. In districts which develop district programs containing areas which merit special attention, the public involvement provisions of 6 AAC 85.130 apply. It is the intent of this committee that regulations for public involvement be developed for areas not in districts which are designated as meriting special attention by the Council. Council designation should include evidence of effective and significant opportunity for public participation in the specified "concurrence" and such public involvement process should be specified in the Alaska Coastal Managemnet Plan Guidelines.

Further, it is the intent of the committee that the letter of intent of the Senate Community and Regional Affairs Committee which appears on page 463 of the Senate Journal be approved.

SB 125

The Commerce Committee has had SENATE BILL NO. 125 (making a special appropriation for operating expenses of radio station KYUK, Bethel, and lapsing a portion of an appropriation for a capital expenditure for that station; effective date) under consideration and a majority of the committee reports it back with individual recommendations. Brown (Chairman), Branson and Bettisworth recommend do pass. Malone has no recommendation. Randolph recommends do not pass.

SB 125 was referred to the Finance Committee.

CSSB 134

The Community and Regional Affairs Committee has had COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 134 (making a special appropriation to the Department of Community and Regional Affairs for grants to municipalities and other recipients in place of entitlements under the program of state aid to local governments; effective date) under consideration and a majority of the committee recommends it do pass. Concurring: Parker (Chairman), Branson, Carney, Parr and Zharoff.

CSSB 134 was referred to the Finance Committee.

SB 202 The State Affairs Committee has had SENATE BILL NO. 202 (making a special appropriation from the International Airports Construction Fund to the Fairbanks International Airport; effective date) under consideration and a majority of the committee recommends it do pass. Concurring: Miller (Chairman), Eliason, Fuller, Gardiner and Martin.

SB 202 was referred to the Finance Committee.

SB 203 The State Affairs Committee has had SENATE BILL NO. 203 (authorizing the issuance and sale of an additional $8,500,000 in revenue bonds for international airports; effective date) under consideration and a majority of the committee recommends it do pass. Concurring: Miller (Chairman), Eliason, Fuller, Gardiner and Martin.

SB 203 was referred to the Finance Committee.

HB 76 The Judiciary Committee has had HOUSE BILL NO. 76 (relating to powdered alcohol) under consideration and a majority of the committee recommends it be replaced with COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 76 (same title) and reports it back with individual recommendations. Parr (Chairman), Phillips, Malone and Buchholdt recommend do pass. Brown, Martin and Anderson have no recommendation.

HB 76 was referred to the Rules Committee for placement on the calendar.

INTRODUCTION, FIRST READING AND REFERENCE OF HOUSE BILLS

HB 435 HOUSE BILL NO. 435 by Hayes, Barnes, Bettisworth and Martin, entitled:

"An Act relating to appropriation bills."

was read the first time and referred to the Finance Committee.

Frances Ulmer, Director of Policy Development & Planning, Co-chairwoman
Donald Harris, Commissioner of Transportation & Public Facilities
Phillip Hubbard, Commissioner of Commerce & Economic Development
Robert LeResche, Commissioner of Natural Resources
Lee McAnerney, Commissioner of Community & Regional Affairs
Ernst Mueller, Commissioner of Environmental Conservation
Ronald Skoog, Commissioner of Fish & Game

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Tillion:

On behalf of the Alaska Coastal Policy Council, and as required by law, we respectfully submit that portion of the Alaska Coastal Management Program adopted during 1978. We also request that you initiate legislative review and approval of this portion of the program.

Section 44.19.893(4) of the Alaska Coastal Management Act requires the Council to "...submit annually to the legislature, not later than the 10th day of each regular session, the portion of the coastal management program approved or amended by the council during the preceding year..."

As you also know, Section 46.40.080. of the Act provides that:

> The Alaska coastal management program adopted by the council, and any additions, revisions, or amendments of the program, take effect upon adoption of a concurrent resolution by a majority of the members of each house of the legislature or by a vote of the majority of the members of each house at the time the houses are convened in joint session to confirm executive appointments submitted by the governor.

In a legal opinion issued last spring, the Attorney General defined the "coastal management program" as that phrase is used in the foregoing citations, to include all regulations adopted by the Council, and all local government coastal programs mandated by Section 46.40.030. of the Act.

ALASKA
COASTAL MANAGEMENT PROGRAM

The attached portion of the program consists of a set of amendments to the ACMP Guidelines and Standards adopted by the Council in December of 1978.

The original Guidelines and Standards were prepared during late 1977 and early 1978 and submitted to the Legislature in April of 1978. (This late submittal was authorized by SB 388 which amended the Act to allow a one-time special submittal date for the originial Guidelines and Standards.) In June of 1978 the original Guidelines and Standards were approved by the Legislature and went into effect.

Since the last session, however, a number of requests were made to amend the Guidelines and Standards including some requests by the Legislature itself through letters of intent. In Section 80.010(c) of the original Guidelines and Standards, the Council bound itself to review these regulations periodically, and so, in the fall of 1978, the Council re-examined the regulations in light of various requests and suggestions and adopted the attached amendments.

We have followed the requirements of the Administrative Procedures Act in adopting these regulations and the Attorney General has reviewed and approved these amendments.

In a few days you will also receive the Council's Annual Report which describes the activities of the Council and ACMP as a whole. That report will repeat this submission and request for approval of these amendments. Further, the Annual Report will contain a number of reference items, such as the Alaska Coastal Management Act of 1977, and the original Guidelines and Standards, and will be a convenient reference source for the Legislature as it considers the requests of the Council.

We thank you for your consideration of these requests. We are at your disposal for presentations and discussions on these amendments to the Guidelines and Standards and any other matters related to ACMP. Please call Murray Walsh at the Office of Coastal Management (465-3540) to arrange for our participation if you or other members of the Legislature would so desire.

Sincerely,

Frances A. Ulmer
Co-Chairman

Roger Allington
Co-Chairman

Enclosures

6 AAC 80.040(b), COASTAL DEVELOPMENT, is amended to read:

(b) The placement of structures and the discharge of dredged or fill material into coastal water must, at a minimum comply with the standards contained in Parts 320-323, Title 33, Code of Federal Regulations, (Vol. 42 of the Federal Register, pp. 37133--47 (July 19, 1977)).
(Eff. 7/18/78, Reg. 67; am. / /, Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.060, RECREATION, is amended by adding a new subsection to read:

(b) Districts and state agencies shall give high priority to maintaining and, where appropriate, increasing public access to coastal water. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.070, ENERGY FACILITIES, is amended to read:

(a) Sites suitable for the development of major energy facilities must be identified by districts and the state in cooperation with districts.

(b) The siting and approval of major energy facilities by districts and state agencies must be based, to the extent feasible and prudent, on the following standards:

(1) site facilities so as to minimize adverse environmental and social effects while satisfying industrial requirements;

(2) site facilities so as to be compatible with existing and subsequent adjacent uses and projected community needs;

(3) consolidate facilities;

(4) consider the concurrent use of facilities for public or economic reasons;

(5) cooperate with landowners, developers, and federal agencies in the development of facilities;

(6) select sites with sufficient acreage to allow for reasonable expansion of facilities;

(7) site facilities where existing infrastructure, including roads, docks, and airstrips, is capable of satisfying industrial requirements;

(8) select harbors and shipping routes with least exposure to

reefs, shoals, drift ice, and other obstructions;

(9) encourage the use of vessel traffic control and collision avoidance systems;

(10) select sites where development will require minimal site clearing, dredging and construction in productive habitats;

(11) site facilities so as to minimize the probability, along shipping routes, of spills or other forms of contamination which would affect fishing grounds, spawning grounds, and other biologically productive or vulnerable habitats, including marine mammal rookeries and hauling out grounds and waterfowl nesting areas;

(12) site facilities so that the design and construction of those facilities and support infrastructures in coastal areas of Alaska will allow for the free passage and movement of fish and wildlife with due consideration for historic migratory patterns and so that areas of particular scenic, recreational, environmental, or cultural value will be protected;

(13) site facilities in areas of least biological productivity, diversity, and vulnerability and where effluents and spills can be controlled or contained;

(14) site facilities where winds and air currents disperse airborne emissions which cannot be captured before escape into the atmosphere;

(15) select sites in areas which are designated for industrial purposes and where industrial traffic is minimized through population centers; and

(16) select sites where vessel movements will not result in overcrowded harbors or interfere with fishing operations and equipment.

(c) Districts shall consider that the uses authorized by the issuance of state and federal leases for mineral and petroleum resource extraction are uses of state concern. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.080(a), TRANSPORTATION AND UTILITIES, is amended to read:

(a) Transportation and utility routes and facilities in the coastal area must be sited, designed, and constructed so as to be compatible with district programs. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.100, TIMBER HARVEST AND PROCESSING, is amended to read:

(a) Commercial timber harvest activities in the coastal area must be conducted so as to meet the following standards:

(1) the location of facilities and the layout of logging systems must be sited so as to minimize adverse environmental impacts;

(2) free passage and movement of fish in coastal water must be assured; and

(3) timber harvest and timber management activities must be planned so as to protect streambanks and shorelines, prevent adverse impacts on fish resources and habitats, and minimize adverse impacts on wildlife resources and habitats.

(b) Commercial timber transport, storage, and processing in the coastal area must be conducted so as to meet the following standards:

(1) onshore storage of logs must be encouraged where compatible with the objectives of the Alaska Coastal Management Program;

(2) sites for in-water dumping and storage of logs must be selected and these activities conducted so as to minimize adverse effects

on the marine ecosystem, minimize conflicts with recreational uses and activities, be safe from storms, and not constitute a hazard to navigation;

(3) roads for log transport and harvest area access must be planned, designed, and constructed so as to minimize mass wasting, erosion, sedimentation, and interference with drainage, and must be adequately maintained until they are returned to their pre-road natural drainage patters (put-to-bed); and

(4) stream crossings, including bridges and culverts, must be kept to a minimum number, designed to withstand seasonal high water and flooding, and must provide for free passage and movement of fish. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.110(a), MINING AND MINERAL PROCESSING, is amendend to read:

(a) Mining and mineral processing in the coastal area must be regulated, designed, and conducted so as to be compatible with the standards contained in this chapter, adjacent uses and activities, statewide and national needs, and district programs. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.160(a), AREAS WHICH MERIT SPECIAL ATTENTION, is amended to read:

(a) Any person may recommend to a district or to the council areas to be designated as areas which merit special attention. Districts shall designate in district programs areas which merit special attention. Areas which are not in districts and which merit special attention shall be designated by the council with the concurrence of appropriate state agencies, municipalities, and villages affected by the designation. Designations must include the following information:

(1) the basis or bases for designation under AS 46.40.210(1) or (b) of this section;

(2) a map showing the geographical location, surface area and, where appropriate, bathymetry of the area;

(3) a description of the area which includes dominant physical and biological features;

(4) the existing ownership, jurisdiction, and management status of the area, including existing uses and activities;

(5) the existing ownership, jurisdiction, and management status of adjacent shoreland and sea areas, including existing uses and activities;

(6) present and anticipated conflicts among uses and activities within or adjacent to the area, if any; and

(7) a proposed management scheme, consisting of the following:

(A) a description of the uses and activities which will be considered proper and the uses and activities which will be considered improper with respect to land and water within the area;

(B) a summary or statement of the policies which will be applied in managing the area; and

(C) an identification of the authority which will be used to implement the proposed management scheme. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 80.900, DEFINITIONS, is amended by adding new paragraphs to read:

6 AAC 80.900, DEFINITIONS. Unless the context indicates otherwise, in this chapter

(20) "feasible and prudent" means consistent with sound engineering practice and not causing environmental, social, or economic problems that outweigh the public benefit to be derived from compliance with the standard which is modified by the term "feasible and prudent;

(21) "including" means including but not limited to;

(22) "major energy facility" includes marine service bases and storage depots, pipelines and rights-of-way, drilling rigs and platforms, petroleum or coal separation, treatment, or storage facilities, liquid natural gas plants and terminals, oil terminals and other port development for the transfer of energy products, petrochemical plants, refineries and associated facilities, hydroelectric projects, other electric generating plants, transmission lines, uranium enrichment or nuclear fuel processing facilities, and geothermal facilities; "major energy facility" means a development of more than local concern carried out in, or in close proximity to, the coastal area, which meets one or more of the following criteria:

(1) a facility required to support energy operations for exploration or production purposes;

(2) a facility used to produce, convert, process, or store energy resources or marketable products;

(3) a facility used to transfer, transport, import, or export energy resources or marketable products;

(4) a facility used for in state energy use; or

(5) a facility used primarily for the manufacture, production, or assembly of equipment, machinery, products, or devices which are involved in any activity described in (1) - (4) of this paragraph;

6 AAC 80.900(9), is amended to read:

(9) "geophysical hazard areas" means those areas which present a threat to life or property from geophysical or geological hazards, including flooding, tsunami run-up, storm surge run-up, landslides, snowslides, faults, ice hazards, erosion, and littoral beach process;
(Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 85.040(a), BOUNDARIES, is amended to read:

(a) Each district must include a map of the boundaries of the coastal area within the district subject to the district program. Boundaries must enclose those lands which would reasonably be included in the coastal area subject to the district program if they were not subject to the exclusive jurisdiction of the federal government. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 85.130(b), PUBLIC INVOLVEMENT, is amended to read:

(b) At least 60 days before giving conceptual approval to the district program or significant amendment to the district program, the district shall give written notice to the council and any person who has requested notice in writing, as well as public notice of the proposed action by conspicuous advertisement in a newspaper of general circulation within the district. In addition, notice must be given by radio and by posting in villages and municipalities within the district. The notice must specify the time and place of a public hearing on the proposed action and the availability for review of the proposed district program document or significant amendment to the district program. The public hearing under this subsection may be held not sooner than 30 days after notice is given. At the public hearing, each person must be given

the opportunity to present statements, arguments, or contentions, orally or in writing. Districts shall insure that, where appropriate, translation into the appropriate Native language(s) is provided. The district shall consider all relevant matter presented to it. A written transcript or electronic recording of the public hearing must be submitted to the council. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 85.150, COUNCIL REVIEW, is amended to read:

(a) (((No changes.)))

(b) Within 30 days after submission of the district program or amendment under (a) of this section, the Office of Coastal Management shall issue its recommendation. The recommendation may be based, in whole or in part, on matters not submitted by the district under (a) of this section. Any matters so used must be identified in the recommendation and placed in the record file under (c) of this section. The recommendation must contain findings and conclusions based on this chapter, the standards contained in ch. 80 of this title, AS 46.40.060, and AS 46.40.070. The recommendation must be served on the district, the council, all persons who testified or submitted timely written statements at the public hearing held under sec. 130(b) of this chapter, and all persons who have requested the recommendation in writing. Broad public notice of the recommendation must be given.

(c) (((No changes.)))

(d) Within 30 days after service of the recommendation, any person served with the recommendation may serve on the council comments on the recommendation. Within 30 days after public notice of the recommendation, any other person may serve on the council comments on the recommendation. Within 10 days after the deadline for serving comments on the council under this subsection, the Office of Coastal Management may submit additional matter to the council in response to the comments. All comments served and all additional matter submitted under this subsection will be placed in the record file. The Office of Coastal Management shall respond to all comments within 30 days of receipt.

(e) (((No changes.)))

(f) If the council's decision under (e) of this section disapproves, in whole or in part, the district program, the decision will specify the date and location for the initial mediation session under AS 46.40.-060(b). Mediation sessions will be held with due regard for the convenience of the participants. Any person may attend mediation sessions. (Eff. 7/18/78, Reg. 67; am / / , Reg.)

Authority: AS 44.19.893
AS 46.40.040

6 AAC 85.900, DEFINITIONS, is amended by adding new subsections to read:

6 AAC 85.900, DEFINITIONS. Unless the context indicates otherwise, in this chapter

(9) "feasible and prudent" has the same meaning as in 6 AAC 80.900;

(10) "including" has the same meaning as in 6 AAC 80.900.

SENATE JOURNAL

ALASKA STATE LEGISLATURE

ELEVENTH LEGISLATURE - FIRST SESSION

JUNEAU, ALASKA Tuesday February 20, 1979

Thirty-seventh Day

Pursuant to adjournment, the Senate was called to order by President Tillion at 10:07 a.m.

The roll call showed nineteen members present. Senator Mulcahy was excused from a call of the Senate.

The prayer was offered by the Chaplain, Reverend Curtis McClain or the Glacier Valley Baptist Church.

Senator Colletta moved and asked unanimous consent that the journal for the thirty-sixth legislative day be approved as certified. Without objection, it was so ordered.

MESSAGES FROM THE HOUSE

Message of February 19 was read, stating the House has passed the following:

INTRODUCTION AND REFERENCE OF HOUSE RESOLUTIONS

HOUSE JOINT RESOLUTION NO. 12 by Representatives Randolph, Anderson, Barnes, Beirne, Bettisworth, Branson, Brown, Carney, Cotten, Duncan, Eliason, Freeman, Fuller, Gardiner, Guy, Halford, Haugen, Hayes, Hurlbert, McKinnon, Malone, Martin, Meekins, Metcalfe, Miles, Miller, Montgomery, Moss, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Rogers, Smith and Zharoff, HJR 12

> Relating to the tax exemption granted to federal employees in Alaska and in other locations outside the contiguous 48 states,

was read the first time and referred to the State Affairs Committee.

INTRODUCTION AND REFERENCE OF HOUSE BILLS

CS HB 3 COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 3 by the Judiciary Committee, entitled:

"An Act relating to the loss and restoration of voting rights."

was read the first time and referred to the State Affairs Committee.

CS HB 131 COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 131 by the Health, Education and Social Services Committee, entitled:

"An Act relating to the Pioneers' Homes."

was read the first time and referred to the Health, Education and Social Services Committee.

STANDING COMMITTEE REPORTS

SCR 19 The Community and Regional Affairs Committee has had SENATE CONCURRENT RESOLUTION NO. 19 (annexation of territory of the City of Kodiak) under consideration and the committee recommends it do pass. The report was signed by Senator Sturgulewski, Chairman, and concurred in by Senators Stimson, Rodey, Mulcahy and Kelly.

SENATE CONCURRENT RESOLUTION NO. 19 was referred to the Rules Committee.

SB 32 The Health, Education and Social Services Committee has had SENATE BILL NO. 32 (adopting the Interstate Corrections Compact) under consideration and a majority of the committee recommends it do pass. The report was signed by Senator Hackney, Chairman, and concurred in by Senators Sturgulewski and Fahrenkamp. Senator Ferguson signed "no recommendation".

SENATE BILL NO. 32 was referred to the Judiciary Committee.

The Resources Committee has had SENATE BILL NO. 51 (relating to the confidential nature of certain reports required by the Department of Fish and Game) under consideration and recommends it be replaced with COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 51 and reports it back as follows: Senator Sumner, Chairman, and Senators Meland, Bennett and Dankworth signed "no recommendation". Senators Fahrenkamp and Mulcahy signed "do pass". SB 51

SENATE BILL NO. 51 was referred to the Rules Committee.

The Resources Committee has had SENATE BILL NO. 71 (relating to issuance of free annual licenses for senior citizens) under consideration and a majority of the committee recommends it be replaced with COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 71, entitled: SB 71

"An Act relating to fish and game licenses; and providing for an effective date."

and reports it back as follows: Senators Fahrenkamp, Dankworth and Bennett signed "do pass". Senator Sumner, Chairman and Senator Kerttula signed "no recommendation".

SENATE BILL NO. 71 was referred to the Rules Committee.

The Health, Education and Social Services Committee has had COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 94 amended (supplemental appropriations to the Department of Education, division of vocational rehabilitation, Department of Health and Social Services, division of social services) under consideration and a majority of the committee recommends it be replaced with SENATE COMMITTEE SUBSTITUTE FOR COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 94 and that it do pass. The report was signed by Senator Hackney, Chairman, and concurred in by Senators Sturgulewski, Fahrenkamp and Colletta. Senator Ferguson signed "no recommendation". The Committee further reports it back with a letter of intent. CS HB 94 am

COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 94 amended was referred to the Finance Committee.

Letter of intent follows:

CS
HB
94
am

February 17, 1979

SENATE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE
LETTER OF INTENT FOR SENATE CS FOR CS FOR HOUSE BILL 94

With respect to the five social worker II positions and one social worker IV position in the Southcentral Region, it is the intent of the Senate Health, Education and Social Services Committee that these social workers be assigned to the area of child protection and not used by the Division of Social Services for some other unrelated service.

Senator Glenn Hackney
Chairman

Senator Frank Ferguson
Vice Chairman

Senator Mike Colletta

Senator Bettye Fahrenkamp

Senator Arliss Sturgulewski

The Rules Committee has had the following resolutions and bill under consideration and recommends they be placed on the February 21 calendar:

SR 4 SENATE RESOLUTION NO. 4 (termination of the Mutual Defense Treaty with the Republic of China)

SJR 7 SENATE JOINT RESOLUTION NO. 7 (expressing disappointment in and disapproval of President Carter's withdrawal of Alaska land under the Antiquities Act)

SB 101 SENATE BILL NO. 101 (disciplining of a licensed guide)

The reports were signed by Senator Colletta, Chairman, and concurred in by Senators Tillion, Sumner and Ziegler.

The above resolutions and bill will appear on the February 21 calendar.

SPECIAL COMMITTEE REPORTS

FREE CONFERENCE COMMITTEE REPORT

February 19, 1979

Mr. President:
Mr. Speaker:

The Free Conference Committee which has had SENATE JOINT RESOLUTION NO. 13 amended (encouraging the Alaska Congressional delegation to work together to resolve the problems created by the President's imposition of the Antiquities Act on lands in Alaska) and HOUSE COMMITTEE SUBSTITUTE FOR SENATE JOINT RESOLUTION NO. 13 amended House (enunciating the position of the Alaska State Legislature with respect to national interest lands in Alaska) under consideration, recommends that FREE CONFERENCE COMMITTEE SUBSTITUTE FOR SENATE JOINT RESOLUTION NO. 13 (enunciating the position of the Alaska State Legislature with respect to national interest lands in Alaska) be adopted. HCS SJR 13 am H

The report was signed by Senator Tillion, Chairman, and concurred in by Senator Ziegler. Senator Rodey signed "do not concur". House members concurring, Representative Miles, Chairman, and Representatives Fuller and Hayes.

Senator Ziegler moved that the Senate adopt the Free Conference Committee report. Senator Rodey objected, then withdrew his objection.

The question being: "Shall FREE CONFERENCE COMMITTEE SUBSTITUTE FOR SENATE JOINT RESOLUTION NO. 13 (enunciating the position of the Alaska State Legislature with respect to national interest lands in Alaska) pass the Senate?" The roll was taken with the following result:

Yeas:	18	Bennett, Bradley, Colletta, Fahrenkamp, Ferguson, Hackney, Hohman, Kelly, Kerttula, Meland, Ray, Rodey, Sackett, Stimson, Sturgulewski, Summer, Tillion, Ziegler
Nays:	1	Dankworth
Excused:	1	Mulcahy

FCCS SJR 13 and so, FREE CONFERENCE COMMITTEE SUBSTITUTE FOR SENATE JOINT RESOLUTION NO. 13 passed the Senate.

The Secretary was requested to notify the House.

UNFINISHED BUSINESS

Senator Sumner moved and asked unanimous consent that he be excused from a call of the Senate on February 21. Without objection, Senator Sumner was excused.

Senator Sturgulewski moved and asked unanimous consent that she be excused from a call of the Senate February 24, 25 and 26. Without objection, Senator Sturgulewski was excused.

project. A draft bill will be ready for January 1981.

It is anticipated that $20,000 should cover the cost of this project. Any funds remaining would be returned.

Thank you for your attention to this matter.

April 28, 1980

J. D. Nordale
Borough Attorney
Fairbanks North Star Borough
Box 1267
Fairbanks, Alaska 99707

Dear Jim:

Enclosed is a copy of SCR 66 which directs the Alaska Legislative Council to revise AS 29, Municipal Government. I'm also attaching a copy of my March 31 memo to Senator Clem Tillion which spoke to this issue. The Senate Concurrent Resolution was drawn as a result of that memorandum. The fiscal note is much higher than I anticipated, however, I think it is important that there be an advisory group and working group, and that funds be provided to bring people together.

I would appreciate whatever support you can lend to see the passage of SCR 66. I will be contacting the House Community and Regional Affairs Committee to request that they introduce a similar resolution on their side, and expedite it as fast as possible through the system. I will be bringing SCR 66 to the Senate Community and Regional Affairs Committee Tuesday, April 29.

Kindest personal regards,

Arliss Sturgulewski
Senator, District 10-H

Re: Municipal Code Revisions

Dear Arliss:

Both because of Alan Teshe's letter of March 18 to you and a recent conversation with Ginny Chitwood, I would urge you to make every effort to provide for the interim review of AS 29. I would urge that the Alaska Municipal League be a participant in the review process either as a contractor, a co-sponsor or in some other capacity. Based upon the discussions at the Local Government Symposium as well as comments received by the Joint House-Senate C & RA hearings, I think that participation from the unorganized borough is desirable.

A good deal of the criticism of and antagonism toward local government stems from inflexibility in portions of the code and vagueness in other parts. The writers of the Constitution were wise in their recognition that strong and flexible local government could best meet the needs of the diverse areas of this state. Too often local governments are unable to respond effectively because of unrealistic restrictions imposed by the state.

I hope that there is something that you can do to accomplish this review, and if I can be of any assistance, please let me know.

Very truly yours,

J. D. Nordale
Borough Attorney

The Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
State Capital
Juneau, Alaska 99811

Dear Arliss:

Re. Municipal code revisions.

Attached with this letter is a list of examples of various provisions of Title 29 which should be clarified through revision of that title. This list is by no means exhaustive and I am sure that other attorneys and municipal officials throughout the state could add additional examples and support a thorough revision of Title 29.

As we discussed some time ago in Juneau, I recommend that the Legislature form an interim committee to review AS 29 during the next two years and that the committee be empowered to seek assistance from municipal attorneys throughout the state, hold hearings as it deems appropriate, and present a new municipal code to the Legislature in 1981 or 1982. I have received expressions of support from attorneys representing several municipalities throughout the state and am confident they will assist the Legislature in preparing a revised municipal code.

Thank you very much for your continued attention to this matter. If there are additional questions I can answer regarding Title 29 or if the Legislature is prepared to take action in this matter, please do not hesitate to contact me.

Cordially,

Allan E. Tesche
Borough Attorney

Lee Sharp

January 4, 1980

Mr. Thomas F. Klinkner
Law Offices of Richard W.
Garnett III
900 West 5th Avenue, Suite 540
Anchorage, Alaska 99501

Dear Tom:

Thank you very much for your comments regarding the Local Government Study. Our final report is due out very soon and I will see that you are added to this mailing list. Overall, I am pleased with the results of this study. Although the proposals may seem modest, they seem to follow well the constitional directions set for local governments and certainly can bring some cohesiveness and coordination to the delivery of services to rural Alaska. Your indepth comments and support can certainly help in seeing that this needed legislation is adopted by this session of the Legislature.

Your voice adds to a growing chorus speaking to the need for thorough technical revision of Title 29 of the Alaskan Statutes. When a certain number of amendments have been made to the Statutes, a recommendation is made for a revision of the Title. This is the case, as I understand it, with Title 29 and the recommendation is being made that Title 29 be the next title to be revised. I have had preliminary discussions with Representative Bill Parker regarding this and with several other interested parties, such as the Alaska Municipal League. One possible approach might be the establishment of a short-term committee composed of chairs of the Senate and House Community and Regional Affairs, Mr. Jack Chenoweth, from the Legislative Legal Department, other attorneys who are familiar with working on the Statutes, and other interested persons. I would see this as a working group that would produce revisions to Title 29 for introduction to the next Legislature. It seems to me there needs to be a careful delineation of the so-called housekeeping aspects and other issues that may be of major policy impact. For example, issues dealing with service areas, annexation procedures, etc., may take some special review and consideration.

I will discuss this matter further with Mrs. Ginny Chitwood, Alaska Municipal League, and with Representative Bill Parker as to possible methods for best proceeding with the revision of Title 29. I am sending copies of this letter to a number of people in hopes that both you, Tom, and the ones receiving copies will send me their thoughts and comments as to how best to proceed. It would be very helpful to have some input as to the number of policy issues, in addition to overall revisions that may well need to be addressed. Again, thank you for your interest and I will look forward to hearing from you further on this.

Sincerely,

Arliss Sturgulewski

Senator Arliss Sturgulewski
Pouch V
State Capitol
Juneau, Alaska 99811

Dear Arliss:

I appreciated the opportunity to attend your discussion group on local government in rural Alaska, and thank you for sending me a copy of the report resulting from that session. I regret that I have not responded sooner to your request for implementation proposals.

While it certainly is not an essential prerequisite to the program you propose, I suggest that you consider as a complementary project a thorough technical revision of Title 29 of the Alaska Statutes. As an attorney for general law municipalities who has had substantial experience working with Title 29, I frequently am exposed to its legal inadequacies as a charter for the operation of small municipalities. Title 29 is at once too vague to be helpful in some areas and too restrictive in others. A new rural municipality can ill afford the added expense of developing a home rule charter and detailed municipal code merely to avoid the deficiencies of Title 29. While the structure of local government organization under Title 29 is basically sound, many of its procedural and administrative provisions do not provide the support and instruction that those who administer small, rural municipalities require.

I believe that if there were support for the project in the legislature it would not be difficult to assemble a committee of attorneys and others with day to day experience in the operation of general law municipalities to undertake a revision of Title 29 to make it more useful to those who operate under it-generally the smaller, more rural municipalities in the state.

LAW OFFICES OF
RICHARD W. GARNETT III

Please let me know if you would be interested in pursuing such a project.

Yours truly,

Thomas F. Klinkner

ANCHORAGE, ALASKA
AO NO. 79-138

AN ORDINANCE PROVIDING FOR THE SUBMISSION OF A BALLOT PROPOSITION TO QUALIFIED VOTERS AT THE OCTOBER 2, 1979 REGULAR ELECTION PROPOSING AN AMENDMENT TO ARTICLE II OF THE HOME RULE CHARTER FOR THE MUNICIPALITY OF ANCHORAGE.

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. A ballot proposition containing the following language shall be submitted to qualified voters at the regular election set for October 2, 1979:

PROPOSED CHARTER AMENDMENT

Shall Article II of the Home Rule Charter for the Municipality of Anchorage be amended by addition of a new subsection (14) to read as follows:

(14) The right to free and unfettered access to an Assemblyman on any issue or matter before the Assembly.

Section 2. As the current wording of Article II of the Charter would not be changed by addition of a new subsection (14), the existing provisions of Article II need not be indicated on the ballot proposition.

Section 3. Upon the concurrence of a majority of the qualified voters voting on the amendment proposed in this ordinance and thirty days after certification of the regular election of October 2, 1979, this amendment shall become effective.

Section 4. This ordinance shall take effect upon passage and approval.

Passed and approved by the Anchorage Assembly, this _____ day of _____, 1979.

AO NO. 79-141

AN ORDINANCE PROVIDING FOR THE SUBMISSION OF A BALLOT PROPOSITION TO QUALIFIED VOTERS AT THE OCTOBER 2, 1979 REGULAR ELECTION PROPOSING AN AMENDMENT TO SECTION 9.01 OF THE HOME RULE CHARTER FOR THE MUNICIPALITY OF ANCHORAGE.

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. A ballot proposition containing the following language shall be submitted to qualified voters at the regular election set for October 2, 1979:

PROPOSED CHARTER AMENDMENT

Shall Section 9.01 of the Home Rule Charter for the Municipality of Anchorage be amended to read as follows:

Section 9.01 Service Areas

(a) A service area to provide special services may be established, altered or abolished only by ordinance ratified by a majority of the qualified voters voting on the question who reside in the area where the special services are to be established, altered or abolished, or, if no qualified voter resides in that area, by the written consent of all owners of real property in that area; provided that the Assembly by ordinance may require that voters in a larger area vote on the question. The Assembly by ordinance may consolidate service areas providing substantially the same level of special services.

(b) The Assembly by ordinance shall adopt procedures for establishing, altering, abolishing and operating service areas. The Assembly may provide for appointed or elected boards of supervisors to supervise the

furnishing of special services in service areas. Special services provided in a service area shall be financed by a uniform tax levy within the area.

(b) Special services are services not provided on an areawide basis throughout the municipality, or services provided at a higher or different level than provided on an areawide basis throughout the municipality. Special services do not include the exercise of regulatory powers as determined by the Assembly.

The present language of Section 9.01 of the Charter reads as follows:

Section 9.01 Service Areas

(a) A service area may be created, altered, or abolished only with the approval of a majority of those voting on the question within the area affected, or, if no qualified voter resides within the area, with the written consent of the owners of all real property within the area affected. However, the Assembly, by ordinance may consolidate service areas in which services are provided by the municipality at the same level in each of the areas to be consolidated.

(b) The Assembly by ordinance shall adopt procedures for creating, altering, abolishing and operating service areas. Services provided in a service area shall be financed by a uniform tax levy within the area.

(c) The Assembly may provide for appointed or elected boards to supervise the furnishing of special services in service areas.

Section 2 Upon the concurrence of a majority of the qualified voters voting on the amendment proposed in this ordinance and thirty days after certification of the regular election of October 2, 1979, this amendment shall become effective.

Section 3. This ordinance shall take effect upon passage and approval.

Passed and approved by the Anchorage Assembly, this _____ day of _____, 1979.

ANCHORAGE, ALASKA
AO NO. 79-142

AN ORDINANCE PROVIDING FOR THE SUBMISSION OF A BALLOT PROPOSITION TO QUALIFIED VOTERS AT THE OCTOBER 2, 1979 REGULAR ELECTION PROPOSING AN AMENDMENT TO SECTION 9.02 OF THE HOME RULE CHARTER FOR THE MUNICIPALITY OF ANCHORAGE.

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. A ballot proposition containing the following language shall be submitted to qualified voters at the regular election set for October 2, 1979:

PROPOSED CHARTER AMENDMENT

Shall Section 9.02 of the Home Rule Charter for the Municipality of Anchorage be amended to read as follows:

Section 9.02 Assessment Districts

(a) The assembly by ordinance may establish assessment districts to provide and finance capital improvements specially benefiting real property. Assessments shall be proportionate to the special benefit received from the improvement. The assembly by ordinance shall prescribe uniform criteria for allocating the cost of the improvement within an assessment district.

(b) An assessment district may be created or extended only with the approval of the property owners who would bear more than 50% of the estimated cost of the improvement. An assessment district may be dissolved by assembly resolution at any time after the district's share of the cost of the improvement has been paid.

The present language of Section 9.02 of the Charter reads as follows:

Section 9.02 Assessment Districts

(a) The Assembly by ordinance may establish assessment districts to provide and finance capital improvements by means of an assessment, or services by means of a tax levy. The assessment or levy shall be proportionate to the benefit received from and the burden imposed upon the improvement or service. The Assembly by ordinance shall prescribe uniform criteria for allocating the cost of the improvement or service within an assessment district.

(b) An assessment district may be created or extended only with the approval of the property owners who would bear more than fifty per cent (50%) of the estimated cost of the improvement or service. An assessment district created to finance a capital improvement may be dissolved by Assembly resolution at any time after the district's share of the cost of the improvement has been paid. An assessment district created to finance a service may not be dissolved without the approval of the property owners who bear more than fifty per cent (50%) of the cost of providing the service.

(c) A special assessment for capital improvements, with interest and collection charges, is a lien on the property assessed, second only to property taxes and prior special assessments.

(d) A special assessment may not be contested by civil action unless the action is brought within sixty (60) days after confirmation of the assessment roll.

(e) An account or accounts for each special assessment district shall be created and kept separate from all other municipal accounts. Revenues collected within a special assessment may be applied only to costs incurred with respect to that assessment district.

Section 2 Upon the concurrence of a majority of the qualified voters voting on the amendment proposed in this

ordinance and thirty days after certification of the regular election of October 2, 1979, this amendment shall become effective.

Section 3. This ordinance shall take effect upon passage and approval.

AN ORDINANCE PROVIDING FOR THE SUBMISSION OF A BALLOT PROPOSITION TO QUALIFIED VOTERS AT THE OCTOBER 2, 1979 REGULAR ELECTION PROPOSING AN AMENDMENT TO SECTION 18.01 OF THE HOME RULE CHARTER FOR THE MUNICIPALITY OF ANCHORAGE.

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. A ballot proposition containing the following language shall be submitted to qualified voters at the regular election set for October 2, 1979:

PROPOSED CHARTER AMENDMENT

Shall Section 18.01 of the Home Rule Charter for the Municipality of Anchorage be amended to read as follows:

Section 18.01 Vote Required

This Charter may be amended only upon the concurrence of a majority of the qualified voters of Anchorage voting on a proposed amendment.

The present language of Section 18.01 of the Charter reads as follows:

Section 18.01 Vote Required

This Charter may be amended only upon the concurrence of a majority of the qualified voters of Anchorage voting on a proposed amendment, except that a proposed amendment which would diminish any right referred to in Article II or any provision of Section 16.02 requires approval by three-fifths (3/5) of the qualified voters voting on the amendment.

AN ORDINANCE PROVIDING FOR THE SUBMISSION OF A BALLOT PROPOSITION TO QUALIFIED VOTERS AT THE OCTOBER 2, 1979 REGULAR ELECTION PROPOSING AN AMENDMENT TO SECTION 17.13 OF THE HOME RULE CHARTER FOR THE MUNICIPALITY OF ANCHORAGE.

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. A ballot proposition containing the following language shall be submitted to qualified voters at the regular election set for October 2, 1979:

PROPOSED CHARTER AMENDMENT

Shall Section 17.13 of the Home Rule Charter for the Municipality of Anchorage be amended by addition of a new subsection (e) to read as follows:

(e) "interest in lands" means any estate in real property or improvements thereon excluding revocable permits or licenses, rights of way, or easements which the Assembly finds to be without substantial value to the Municipality.

Section 2. As the current wording of Section 17.13 of the Charter would not be changed by addition of a new subsection, the existing provisions of Section 17.13 need not be indicated on the ballot proposition.

Section 3. Upon the effective date of the amendment to the Charter proposed herein, the existing subsections of Section 17.03 of the Charter shall be redesignated alphabetically.

Section 4. Upon the concurrence of a majority of the qualified voters voting on the amendment proposed in this ordinance and thirty days after certification of the regular election of October 2, 1979, this amendment shall become effective.

AN ORDINANCE PROVIDING FOR THE SUBMISSION OF A BALLOT PROPOSITION TO QUALIFIED VOTERS AT THE OCTOBER 2, 1979 REGULAR ELECTION PROPOSING AN AMENDMENT TO ARTICLE 17 OF THE HOME RULE CHARTER FOR THE MUNICIPALITY OF ANCHORAGE.

THE ANCHORAGE ASSEMBLY ORDAINS:

Section 1. A ballot proposition containing the following language shall be submitted to qualified voters at the regular election set for October 2, 1979:

PROPOSED CHARTER AMENDMENT

Shall Article 17 of the Home Rule Charter for the Municipality of Anchorage be amended by deletion of Section 17.06?

The present language of Section 17.06 of the Charter reads as follows:

Section 17.06 Notice of Claims

The Municipality shall not be liable in damages for injury to person or property by reason of negligence or gross negligence unless, within four (4) months after the injury occurs, the person damaged, or his representative, serves written notice on an officer upon whom process may be served. The notice shall state that the person intends to hold the municipality liable for damages. It shall set forth with clarity the time and place of the injury, the manner in which it occurred, the nature of the act or defect complained of and the extent of the injury so far as known, and the names and addresses of witnesses known to be the claimant. The Assembly by ordinance may provide for exceptions to the requirements of this section for the administration of minor and routine claims.

Section 2. Upon the concurrence of a majority of the qualified voters voting on the amendment proposed in this ordinance and thirty days after certification of the regular election of October 2, 1979, this amendment shall become effective.

Who owns land
Are there residents
Never requires public hearing

The Development City concept by itself changes the values and practices that have built our free enterprise system.

In the past, the self sufficient family farm has been accepted as the necessary first step to developing an economy in undeveloped land.

The Development Cities Act, on the other hand, allows major developers to control and develop large resources with no concern or participation to the family unit who seeks (now more than ever) the security and satisfaction of being self supporting and controlling their own destiny.

My wife and I on that basis alone object to development cities entirely.

In my presentation this morning, however, I will approach the Act solely from the viewpoint of protecting Alaska interest within the Development City context.

The law in general must separate clearly the city and the developer and their relationship to each other, allowing the city to be an entity in itself, open to the general public and commerce.

29-10-220 LEGISLATIVE FINDING

We now have new information from Afognak City's first attempt. This information has created new questions that are not adequately dealt with under the existing law. It is my opinion that law as it is written is grossly deficient in protecting Alaska's interest and dealing with social and economic needs of our State.

29-18-230 to 29-18-340

This section of the law deals with procedures of the petitioner which must be made to include financial investigation of the petitioners over the previous ten years in order to develop a reasonable assurance that the petitioner has the management experience, stability and capital to execute such an undertaking to a desirable conclusion.

29-18-340 DEVELOPMENT CITY COUNCIL

It is clear that the governor has complete control of the city, with the city council serving at his pleasure. The city council members do not have to be residents during the first five years. A developing city is going to need a city council which is present and public to deal effectively with actual growth and need of a city just getting off the ground. Further, after being appointed, the city council should serve at no one's pleasure other than their public, and all members elected after they have their first forty permanent residents with specific language used to tie down who and who is not a permanent resident.

It is important here to look down the road a bit and realize the power that would be given the governor if, perhaps, ten to fifteen of these cities are being developed and all at the control of one governor, with the possibility of major developers coming

clearly not in the public interest.

A city council must live in the development city and be available to the public. The law as it reads now doesn't even say the city council has to be in Alaska. This means that a citizen would be required to pay long distance rates to talk to his appointed rulers.

29-18-380 PROCEDURES -

This allows no public participation of any kind. It has been suggested that the meetings be put on public address systems, but this would still severely hamper the needed exchange between the community and its appointed rulers.

29-18-390 DEVELOPMENT OF CITY CAPITAL IMPROVEMENT FUND

This should be clarified to specific purposes and be implemented in stages as required by specific development. For example, the needs for fun in a paper stage will be different from those of implementation.

29-18-400(4) Correct

This section should read "appointed from the public by the governor, not "nominated by the developer".

29-18-360(2) POWERS AND DUTIES

This section isolates the development city from existing borough planning if one exists. Therefore, there is no recourse for the general geographic area and existing economy to participate in decisions that might affect them, i.e., offshore experimental drilling facility in Afognak Bay, which is a reasonable assumption if Afognak City is there with the dock facility which the Afognak Native Corporation plans to build. The impact would certainly affect all of Kodiak Island Borough.

29-18-430 REVENUE BOND - indiv. have option to Buy into it.

Some consideration must be given to existing residence. In the initial petition, the eighty-five of us presently living there became 1/85 of the taxable tax base and 1/85 of the liability of a $2 million project. ANCSA 21(d) states that Native lands are not taxable and (22) miscellaneous states that no liens, exclusions or judgments of any kind can be executed within twenty years.

State is supporting one w/ state tax money

Further, each revenue bond must show its relevance to the city sector as opposed to corporation development. This particular train of thought should be questioned throughout the Act. Our purpose and (improvements on land at end 75 yrs ~~tax dollars~~) should be spent to aid in the cost of the city, and not in the development of the resource. In a case where the purpose of a facility services both, the cost should be divided between the city and the developer proportionally.

EXAMPLE

If a city dock that would serve the city alone could be built for $500, but to meet the needs of the developer must now cost $2,000. The developer should have to generate $1500 capital outside of the bonds. My concern here is the (tax liability of the bond on the city wrong - on the bk. corp etc.) should the industry fail to be profitable and the collateral not redeemable as under ANCSA (22) or not of sufficient value to satisfy its creditors. It appears to me that if the debts are kept reasonable that city could possibly survive the loss of its major developer by participating in existing economics such as fishing. On the other hand, if town liabilities are allowed to far exceed those of a realistic population projections ability to handle the city would most probably end up a ghost with many

citizens losing their shirts, as well as their dreams.

29-18-450 APPLICABILITY OF OTHER PROVISION OF THIS TITLE

This paragraph was not applied nor adhered to in Community and Regional Affairs' administration of the Act as it applied to the Afognak City's first petition, though it sheds a lot of light on the intent and composition of the Act. In its sweeping centralization, however, it creates contradiction within the law itself.

EXAMPLE

this should be diff if there are res. & ...

29-18-050(8) THE PROVISION FOR A FIRST CLASS CITY INCORPORATION

The signature and residence address of 50 permanent resident voters within the proposed municipality, which with eighty-five residents as applicable and Title 29-18-240 are both in Chapter 18. Hence, 29-18-240 has to be improved and clarified giving guidelines for public participation under a democratic government, as the character of its location changes from unpopulated - no existing economy - to populated with existing economies population and borough government. Dudhoff follow inc stand because of diff. pressures there are no people.

First and most important, there is no provision under the law that necessitates the establishment of public sector. There must be land made available to the general public and general business community.

This land must in no way be controlled by the developers other than its original planning and zoning. Land should be sold at a fixed percentage above cost and a provision requiring development within a given time to discourage land speculation. My concern here is that the law permits the possibility of Alaska's future growth to be exactly like Prudho Bay, where a group of corporations owns

public at the public's own discretion. Finally, I feel the State or petitioner should advertise the new city to the national business community, asking for their economic participation in fields other than that of the founding developer. For example, offshore oil exploration drilling support facilities and bottom-fishing processors are very real possibilities in the Afognak City and would go a long way in ensuring orderly development of well planned, diversified and economically sound new cities necessary to support the sound development of the State resources by both private and public sector.

Land Question

Dear Editor:

Last week Jack Anderson's nationally syndicated column included the disturbing statement that "Federal investigators are convinced that Koniag, Inc., has attempted fraudulently to obtain more than 600,000 acres of valuable land it is not entitled to." Koniag, with headquarters in Kodiak, is one of the defendants in a pending court suit that contends that one of Koniag's certified villages was erroneously created through mistake or fraud. The contested village corporation, Lesnoi (Woody Island), was the subject of a November article in the Alaska Advocate. The Advocate described a court deposition from a Lesnoi enrollee, who stated that the affidavit she signed to enroll in the village was not true and that she "never lived there;" a deposition from the BIA investigator who recommended certification; and a deposition from a 33-year Woody Island resident, indicating that no native village existed on Woody Island in 1970.

On the other hand, in a letter to Congressman Morris Udall, Edward Weinberg, attorney for Koniag, labelled the charges "bunk" and "the screams of the disappointed."

The issues are important: part of the contest involves the fate of 320,000 acres on Afognak Island. Afognak is national forest land, but—for the proposed Koniag amendment in pending d-2 legislation—Koniag would not be allowed to claim the land under the Claims Settlement Act. Another part of the amendment would have Congress certify seven villages that were originally declared ineligible by the Secretary of Interior.

Because the charges are so serious, the public deserves to know the truth about them. For the good of everyone concerned with the Claims Settlement Act, all the evidence should be exposed to the public scrutiny. We have the right to expect our legislators to be interested in seeking the truth through a full hearing. I urge every concerned citizen to write Senator Ted Stevens and Congressman Don Young, asking them to call for Congressional hearings into the land claims issue on Kodiak. The truth can only benefit us all.

Sincerely,
Pat Szabo

ANCHORAGE DAILY NEWS

WASHINGTON merry-go-round

Land juggling in Alaska

By JACK ANDERSON

WASHINGTON — Koniag Inc. is a Native Alaskan development corporation that federal investigators believe has attempted one of the biggest public-lands ripoffs of this century. Evidence gathered by the Justice and Interior Departments indicates that Koniag claimed more than 600,000 acres of valuable government land for "phantom" Native villages that exist only on paper.

A federal grand jury indictment of some of the parties involved was quashed by a former Bureau of Indian Affairs official. So we sent our associate Hal Bernton on an investigative foray into Alaska, where he dug up the facts.

KONIAG CLAIMED the land under provisions of the 1971 Alaska Native Claims Settlement Act. The law was designed to give the state's Eskimo, Aleut and Indian population an economic base with which to ease their transition from the isolated village life of their ancestors to the realities of the 20th century.

But the driving force behind Koniag Inc. is no simple, semi-literate Eskimo fisherman or Indian trapper. He is an articulate, acerbic ex-newspaper editor with a talent for lobbying and a weakness for alliterative invective toward anyone who crosses him. His name is Karl Armstrong and he is Koniag's executive vice president.

When residents of Kodiak banded together to fight Koniag's attempted land grab, Armstrong described the Citizens Action Group in a local newspaper he helped to found as a "mysterious mob of malcontents making malicious mischief through misleading information."

HE ADDED DARKLY: "It is not easy to find out just what this weird secret society is — or who it is. Like the Ku Klux Klan, it hides."

Armstrong was stretching poetic license to the point of arrant nonsense. Our associate Hal Bernton had no trouble locating members of the Citizens Action Group, and he found them neither weird nor mysterious.

They are local businessmen, ranchers, hunters and fishermen who are concerned and angry about what they see as Koniag's illegal move to gain ownership of valuable timberland worth millions of dollars. The land that Koniag seeks is located on the federall owned island of Afognak.

Seven of the 16 villages for which Koniag Inc. claims federal land under the 1971 act have been challenged as paper phantoms, imaginary entities that are not entitled to grants of federal land. After initially certifying all seven as eligible, the Bureau of Indian Affairs was reversed by higher-ups in the Interior Department on six of the alleged villages.

THE ONE VILLAGE that was given final certification is now being contested in court by Kodiak Island's citizens group.

Whether a court suit can overcome Koniag's clout in Washington remains to be seen. There seems little doubt that Armstrong has been an effective lobbyist in both the state and federal capitals. Backed by the increasing political strength of the native American corporations that have become Alaska's biggest private landowners, Armstrong is not above playing on the guilt of the white majority over the historically shabby treatment of Natives.

Those who question the validity of Koniag's villages are "trash, human trash, people who are here whom I would rather not have here," in Armstrong's words. "As far as I am concerned," he told our reporter, "the villages are there because they (the Natives) said they are there. If that is where they have a sense of place, who am I to argue with them?"

ARMSTRONG WAS ONCE the editor of the Kodiak Daily Mirror. His successor in the editorship, Nell Waage, won a national award for her editorial writing. But when the Mirror published some articles critical of some of Armstrong's friends, he denounced Waage as a "racist bigot."

The odd thing about Armstrong's fierce championing of Native Alaska rights is that his credentials as a Native — and thus his credibility as the executive officer of the Native development corporation — are almost as ephemeral as the villages that Koniag Inc. has claimed land for.

Armstrong's initial application to the Bureau of Indian Affairs for certification as a Native was rejected because he could show only that he was only three-sixteenths Native Alaskan. Eligibility for "Native" status requires at least one-fourth Native ancestry. But Armstrong protested, and the BIA gave him legal status as a Native.

ARTICLE 2. INCORPORATION OF DEVELOPMENT CITIES

Section

40. Incorporation standards

50. Application of standards

60. Incorporation of territory located within a municipality

19 AAC 10.040. INCORPORATION STANDARDS. (a) A community may not incorporate as a development city if the commission finds that:

(1) the area proposed for incorporation is served by an existing municipality or could be better served by an existing municipality;

(2) it is improbable that the proposed development will take place during the development stage;

(3) the program and activities contemplated may be undertaken through an expansion of the corporate limits of an existing city. The commission would then declare that city to be a development city for the purpose of preferential designation under AS 28.18.010, 340, and 460;

(4) the program and activities contemplated for development may be better undertaken by establishing a service area within an existing organized borough for a development project, and declares the service area to be eligible for preferential designation under AS 29.18.410 and 450;

(5) the proposed program and activities contemplated by the industrial developer do not serve the public interest as determined by the development city legislation under AS 29.18.220-460; and

(6) it is improbable that the proposed development city will meet the standards for incorporation as required by 19 AAC 10.010 by the end of the development stage.

(b) If the commission finds that a service area within an organized borough is to be designated for preferential treatment under (a) (4), the borough assembly may undertake the development project in the manner of a development city by forming a service area according to AS 29.63.090 and shall present to the commission a contractual agreement for their approval outlining the responsibilities assumed by the borough and the developer to implement the proposed development program.

(c) The assembly may decline the findings under (b) of this section to establish a service area and, in the alternative, request the commission to approve the incorporation of a development city.

(d) The commission may dissolve a development city established under AS 29.18.220 subsequent to its incorporation:

(1) the major economic development projected does not occur within a period of five years;

(2) the development project had been reviewed as a new project, and the commission determines that it is improbable that the proposed development would have taken place; and

(3) after five years, the development city not longer meets the standards for incorporation as required by 19AAC 10.010.

(e) A commission decision under this section may be appealed under the Administrative Procedure Act (AS 44.62).

Authority:

19 AAC 10.050. APPLICATION OF STANDARDS (a) No incorporation of territory located within an organized borough shall be allowed unless petitioners demonstrate to the satisfaction of the commission that the service and functions to be exercised by the proposed development city encourage orderly development of a well planned, diversified, and economically sound city. This requirement is considered satisfied if:

(1) the assembly of the borough in which the proposed city is located has passed, and the commission has approved, a resolution stating that the municipal services proposed could more economically and efficiently be provided by the development city form of government than by a service area of the borough;

(2) the proposed city is located in a relatively isolated area at least ten miles from the borough seat and is not connected by a primary or secondary state highway; and

(3) the proposed city is located primarily on land to which the developer owns or has conveyance of title;

(b) A petition for incorporation of territory within an organized borough will not be considered until petitioners have submitted, and the commission has approved, a contractual agreement between the proposed development city and the borough outlining the planning and zoning powers and responsibilities assumed by each party during the development stage.

(c) A petition for incorporation of territory will not be considered until the petitioners have submitted, and the commission has approved, a local hire agreement required by AS 29.18.330.

(d) A petition for incorporation of a community as a city of the first class shall be denied unless petitioners can demonstrate to the commission that the community has the ability to generate sufficient local revenues to pay for the local share of costs of any mandatory first class services. The amount of funds necessary shall include the funds to pay for an annual audit of city accounts and funds necessary to exercise the planning and zoning powers at a level sufficient to qualify the city for State Aid to Local Governments.

(e) The commission shall conduct a public hearing or an investigation prior or subsequent to the effective dates of an incorporation before entering into a decision pursuant to 19 AAC 10.040.

(f) The commission may conduct public hearings or investigations subsequent to the effective dates of an incorporation to determine whether the provision of municipal services is proceeding pursuant to the required schedule, and if it is not, the commission may institute dissolution proceedings under Article 5 of chapter 10.

Authority:

19 AAC 10.060. INCORPORATION OF TERRITORY LOCATED WITHIN A MUNICIPALITY. (a) In the case of any incorporation of territory within an organized borough which is providing services to the territory that the city will provide upon incorporation, the commission will determine the method by which assets, debts, and liabilities are to be distributed between the newly incorporated city and the municipality formerly providing services.

(b) In determining the method of transfer of service responsibility and the distribution of assets, debts, and liabilities, the commission will approve any fair and equitable agreement between the municipalities affected, but will independently review any proposed agreement.

(c) If, within two (2) years of the date of incorporation, the borough and the development city involved have failed to reach an agreement as to the transfer of assets, debts, and liabilities, the commission shall determine the fair and equitable agreement which shall be binding on all municipalities affected.

(d) If, in exercising its responsibilities under (c) of this section, the commission determines it necessary to employ the service of professional accountants or consultants, it may do so and charge the municipalities for any costs incurred.

Authority:

Sturgulewski

The Development City concept by itself changes the values and practices that have built our free enterprise system.

In the past, the self sufficient family farm has been accepted as the necessary first step to developing an economy in undeveloped land.

The Development Cities Act, on the other hand, allows major developers to control and develop large resources with no concern or participation to the family unit who seeks (now more than ever) the security and satisfaction of being self supporting and controlling their own destiny.

My wife and I on that basis alone object to development cities entirely.

In my presentation this morning, however, I will approach the Act solely from the viewpoint of protecting Alaska interest within the Development City context.

The law in general must separate clearly the city and the developer and their relationship to each other, allowing the city to be an entity in itself, open to the general public and commerce.

29-10-220 LEGISLATIVE FINDING

We now have new information from Afognak City's first attempt. This information has created new questions that are not adequately dealt with under the existing law. It is my opinion that law as it is written is grossly deficient in protecting Alaska's interest and dealing with social and economic needs of our State.

29-18-230 to 29-18-340

This section of the law deals with procedures of the petitioner which must be made to include financial investigation of the petitioners over the previous ten years in order to develop a reasonable assurance that the petitioner has the management experience, stability and capital to execute such an undertaking to a desirable conclusion.

29-18-340 DEVELOPMENT CITY COUNCIL

It is clear that the governor has complete control of the city, with the city council serving at his pleasure. The city council members do not have to be residents during the first five years. A developing city is going to need a city council which is present and public to deal effectively with actual growth and need of a city just getting off the ground. Further, after being appointed, the city council should serve at no one's pleasure other than their public, and all members elected after they have their first forty permanent residents with specific language used to tie down who and who is not a permanent resident.

It is important here to look down the road a bit and realize the power that would be given the governor if, perhaps, ten to fifteen of these cities are being developed and all at the control of one governor, with the possibility of major developers coming

into the State with only one person's consideration. This is clearly not in the public interest.

A city council must live in the development city and be available to the public. The law as it reads now doesn't even say the city council has to be in Alaska. This means that a citizen would be required to pay long distance rates to talk to his appointed rulers.

29-18-380 PROCEDURES

This allows no public participation of any kind. It has been suggested that the meetings be put on public address systems, but this would still severely hamper the needed exchange between the community and its appointed rulers.

29-18-390 DEVELOPMENT OF CITY CAPITAL IMPROVEMENT FUND

This should be clarified to specific purposes and be implemented in stages as required by specific development. For example, the needs for fun in a paper stage will be different from those of implementation.

29-18-400(4)

This section should read "appointed' from the public by the governor, not "nominated by the developer".

20-18-360(2) POWERS AND DUTIES

This section isolates the development city from existing borough planning if one exists. Therefore, there is no recourse for the general geographic area and existing economy to participate in decisions that might affect them, i.e., offshore experimental drilling facility in Afognak Bay, which is a reasonable assumption if Afognak City is there with the dock facility which the Afognak Native Corporation plans to build. The impact would certainly affect all of Kodiak Island Borough.

29-18-430 REVENUE BOND

Some consideration must be given to existing residence. In the initial petition, the eighty-five of us presently living there became 1/85 of the taxable tax base and 1/85 of the liability of a $2 million project. ANCSA 21(d) states that Native lands are not taxable and (22) miscellaneous states that no liens, exclusions or judgments of any kind can be executed within twenty years.

Further, each revenue bond must show its relevance to the city sector as opposed to corporation development. This particular train of thought should be questioned throughout the Act. Our purpose and tax dollars should be spent to aid in the cost of the city, and not in the development of the resource. In a case where the purpose of a facility services both, the cost should be divided between the city and the developer proportionally.

EXAMPLE

If a city dock that would serve the city alone could be built for $500, but to meet the needs of the developer must now cost $2,000. The developer should have to generate $1,500 capital outside of the bonds. My concern here is the tax liability of the bond on the city should the industry fail to be profitable and the collateral not redeemable as under ANCSA (22) or not of sufficient value to satisfy its creditors. It appears to me that if the debts are kept reasonable that city could possibly survive the loss of its major developer by participating in existing economics such as fishing. On the other hand, if town liabilities are allowed to far exceed those of a realistic population projections ability to handle the city would most probably end up a ghost with many

citizens losing their shirts, as well as their dreams.

29-18-450 APPLICABILITY OF OTHER PROVISION OF THIS TITLE

This paragraph was not applied nor adhered to in Community and Regional Affairs' administration of the Act as it applied to the Afognak City's first petition, though it sheds a lot of light on the intent and composition of the Act. In its sweeping centralization, however, it creates contradiction within the law itself.

EXAMPLE

29-18-050(8) THE PROVISION FOR A FIRST CLASS CITY INCORPORATION

The signature and residence address of 50 permanent resident voters within the proposed municipality, which with eighty-five residents as applicable and Title 29-18-240 are both in Chapter 18. Hence, 29-18-240 has to be improved and clarified giving guidelines for public participation under a democratic government, as the character of its location changes from unpopulated - no existing economy - to populated with existing economies population and borough government.

First and most important, there is no provision under the law that necessitates the establishment of public sector. There must be land made available to the general public and general business community.

This land must in no way be controlled by the developers other than its original planning and zoning. Land should be sold at a fixed percentage above cost and a provision requiring development within a given time to discourage land speculation. My concern here is that the law permits the possibility of Alaska's future growth to be exactly like Prudho Bay, where a group of corporations owns

all the land and commerce. Any city in Alaska must be open to the public at the public's own discretion. Finally, I feel the State or petitioner should advertise the new city to the national business community, asking for their economic participation in fields other than that of the founding developer. For example, offshore oil exploration drilling support facilities and bottom-fishing processors are very real possibilities in the Afognak City and would go a long way in ensuring orderly development of well planned, diversified and economically sound new cities necessary to support the sound development of the State resources by both private and public sector.

CONCLUSION

In conclusion it is extremely important to consider our states goals and values as we now look at our future.

International bankers and multinational corporation have acted and planned far in advance of the political concepts of the nation_ state by cutting off our states opportunity to procceed in its family oriented past by completely stopping land transfer to public and regulating every thing from limited entry to placer mining out of reach of most of the general public. They now have created a state of mind in Alaska that believes our only future is to develop on a big scale with major multinational corporation, If we go that route the future is clear. If the only future development in Alaska is with big corporation then we will be allowing our main stream economy to be controlled by multinational corporations.

It is my opinion that we should quard our six trillion dollars of natural resource like a miser, his purse only developing them in as much as its allows us to develop a free enterprise family oriented economy in aquaculure, farming,musk ox, reindeer and small mining.

What we need is a development of family oriented business act and not a development cities act.

February 13, 1979

Mr. Dodd Shay
P.O. Box 2913
Kodaik, Alask- 99615

Dear Legislator:

International bankers and multinational corporations have acted and planned far in advance of the political concepts of the nation state by cutting off our states opportunity to proceed in it's family oriented past by completely stopping land transfer to the public and regulating everything from limited entry to placer minning out of reach of most of the general public. Implimenting the Development Cities Act, is the next step in thier far ranging plan to control our states economy.

I would appreciate your time and consideration of the emclosed presentation as was given to members of the House and Senate Community and Regional Affairs committees, in Kodiak, on Sunday, February 11, 1979.

In closing, I would ask if there are questions, or more information needed, that you schedule a conference via the Legislative Teleconference Network.

Sincerely,

Dodd Shay

Dodd Shay

exact source of ignition was not known, but the oil spray created an explosive atmosphere and any spark, or electrical short circuit could have caused it to ignite, the board said.

The board determined that the probable cause of the accident was:

"The failure of poorly coordinated and inadequately supervised personnel at pump station number eight to follow precisely the written procedures for performing maintenance work and starting the pumps.

"Contributing to the accident was the absence of sole authority or station manager in complete control of all activities within the pump station during this critical startup period.

— designating a manager or management team at each pump station on the pipeline which would have the authority to require all personnel to comply with written safety rules and operating procedures.

— reviewing all startup and operating procedures for the pump stations to insure they are being done in a safe manner.

— installing a control in the pump room which will allow the pumps to be shut down from that location.

— installing a control in the pump room to operate the pump valves from that location.

— reviewing the company's training program for adequacy.

State Agency Will Review Afognak Petition March 15

A controversial petition for a first class development city on Afognak Island, about 40 miles off Kodiak Island, will be reviewed March 15 in Juneau.

The proposal, filed in November by a native village corporation, Natives of Afognak, got tentative approval in January from the state Department of Community and Regional Affairs.

However, a number of protests have come in, prompting the review, says Pat Poland, state Local Boundary Commission staff assistant headquartered in Anchorage.

The protests are chiefly from other native corporations holding land in the area, as well as from residents, he said.

Under state law, a development first class city may be established in areas that are basically uninhabited, thus giving incorporators the added borrowing power needed for fast development. Except for development cities, requirements for setting up a first class city specify a certain number of residents already living in the area.

The Afognak petition stated that the 825-mile area to be incorporated had no residents. However, Poland said, it appears that there are actually 41 residents of the area. The area proposed as a city includes about half of Afognak Island and all of Whale and Raspberry Islands, with only about half of the proposed area being land, he said.

Land holders and residents basically are protesting incorporation on grounds that they would be subject to taxation and land uses they did not approve.

The hearing on incorporation will be held in the Juneau office of Community and Regional Affairs, headed by Commissioner Lee McAnerney.

Lost River near Nome, the only development city to have been incorporated under the state's development city law, was dissolved several years ago.

The Afognak natives' group holds lands suitable for a logging operation. The corporation was formed from residents of both the old village of Afognak on Afognak Island and from Port Lyons on Kodiak Island. The latter village was formed after the 1964 earthquake rendered the former city uninhabitable.

The development city act anticipates that a new city is reasonably capable of growing to at least 400 inhabitants within five years.

Hawaii Judge Fines Talbot $2,000 and Censures

received he will open a file and gather evidence in the matter, such as copies of the various Hawaiian court orders and possibly portions of the hearing transcripts. If warranted, he said the hearing committee will meet to determine if Talbot has violated the code of professional ethics.

That committee, which is made up of lawyers and laymen, will hear his presentation, along with Talbot's, not unlike a small trial, Garrison said.

The committee then will make a recommendation to the bar association's board of governors, who can reject, amend or approve the committee's findings.

Depending upon the board's decision — and assuming he even is found guilty of an ethics violation — Talbot could be disbarred, reprimanded or a public notice of his action could be published, Garrison said.

Judge Closes Target Range

A controversial Hillside shooting range was put out of operation Wednesday when an Anchorage judge decreed the range was operating without a noise permit.

Superior Court Judge J. Justin Ripley ordered the [illegible]-Ammunition-Rifle Club of [illegible] (Parca) range be closed until [illegible] obtained a municipal noise [illegible]. However, testimony during [illegible] two-day hearing disclosed [illegible] operators did apply for a noise [illegible] in February but were denied the permit.

One municipal noise inspector testified the range did not violate municipal noise standards. But the permit was denied because the range allegedly did not meet safety standards, was the subject of complaints by community residents and was in a location not considered suitable by municipal officials.

Parca operators have contended the shooting range is safe and does not interfere with residential life in the community. The 75-acre gravel pit which contains the range is located on Cange Road just off O'Malley Road.

Parca founder Dave Sharukshahyn said Wednesday the club plans to pursue the noise permit through mu[illegible]

The

Discussion planned on development act

Feb. 9 1979
Kodiak Daily Mirror

By DEBORAH NELSON
Mirror Staff Writer

Onion Bay resident Dodd Shay, who wants to see the Development Cities Act rewritten, has organized a no host breakfast in the Sheffield banquet room this Sunday at 8 a.m. to discuss the issue.

Chairperson for the Senate Community and Regional Affairs committee Arliss Sturgulewski, said she plans to attend the breakfast and said some legislators from both the House and Senate Community and Regional Affairs committees are planning to attend the meeting Sturgulewski's office said Rep. Fred Zharoff and his wife have reported they will be present, but Sen. Bob Mulcahy said he wasn't sure if he would be able to fit the meeting into his schedule.

Shay said he plans to speak for about 15 minutes on the Development Cities Act and then plans to turn the issue over to those assembled for discussion.

Shay explained that while he was going over the statues concerning the Development Cities Act, he found areas "extremely lacking."

"The way the statues on the Act are currently written," stated Shay, "it doesn't deal with Alaska's social and economic problems. It will compound the problems that we already have if it is not rewritten before it is put into effect."

However, it may be a race against the statutory clock for Shay, because the Natives of Afornak are gearing up for another attempt to establish the Development City of Afognak.

The planning and zoning commission waived the platting requirements for the Ouzinkie and Afognak Corporations, Wednesday, allowing them to complete a major exchange of land. According to Marvin Frost, general manager for the Natives of Afognak, this was the biggest step before the corporation once again places a petition for the establishment of a development city before the Department of Community and Regional Affairs.

Shay said he expected Frost to attend the Sunday breakfast Frost said this morning he didn't know if he would be in attendance for the meeting or not.

Natives of Afognak had filed a petition for a development city in November 1977. The Local Boundary Commission had granted tentative approval for the development city in January 1978, however, it rescinded its decision in May of that year.

Shay, who owns five acres and a house on Onion Bay of Raspberry Island was involved in preempting to stop the 1977 Natives of Afognak petition for a development city. During the Democratic Convention held in Kodiak last April, Shay was successful in obtaining a party endorsed resolution opposing the Development Cities Act.

The development Cities Act has never been tested, however, it has remained on the books since 1972, when a Canadian-based firm proposed developing mineral deposits and establishing a town near Nome called Lost River.

That proposal was abandoned, but the cities act remained in the statutes, which permits

(Continued on Page 2)

Discussion

(Continued from Page 1)

uninhabited or unorganized areas within the state to become first class cities. The Development Cities Act also allows for a governor appointed city council which pre-empts residents from electing council members until the city has 400 permanent residents.

Legislators attend cities act meeting

Feb. 13, 1979

By DEBORAH NELSON
Mirror Staff Writer

Something good must be said for the democratic processwhena carpenter living in a remote region of the state can gather together at least 10 state legislators and other state officials to listen to his cause.

In his opening remarks to the group Sunday morning, Onion Bay resident Dodd Shay told the legislators he had arranged the breakfast meeting to inform them about discrepancies he has discovered in the Development Cities Act, "so that you can deal with the issue in the legislature."

"It is my opinion," Shay stated, "that the law as it is written is grossly deficient in protecting Alaska's interest, and in dealing with the social and economic needs of our state."

Shay, who had obviously done much research concerning the act, went over the statutes pertaining to the Development Cities Act and explained to the group what he found to be faulty statements.

Among the statutes Shay addressed was a statute pertaining to the initial government of a development city. This statute states that city council members do not have to be residents of a development city during the first five years of its incorporation, and that the governor has the power to appoint the initial city council members.

In his rebuttle to this statute, Shay stated, "it is clear the governor has clear control of the city, with the city council serving at his pleasure." Shay stated it was important to realize the power a governor could accrue "if perhaps, 10 to 15 of these cities are being developed, and all at the control of one governor."

"The law as it reads now doesn't even say the city council has to be in Alaska," declared Shay. "This means that a citizen would be required to pay long distance rates to talk to his appointed rulers."

In his concluding remarks, Shay stated that international bankers and multinational corporations have been "cutting off our state's opportunity to proceed in its family oriented past by completely stopping land transfer to the public, and regulating everything from limited entry to placer mining out of the reach of the general public."

Shay went on to say these corporations have created the state of mind in Alaska which

Meeting

(Continued from Page 1)

scale development by multinational corporations.

After Shay's presentation, the floor was opened for discussion. Borough Manager Stuart Denslow announced to the legislators that Shay was not alone in his concern over the Development Cities Act. He said other individuals expressed their concern over the issue to the borough.

When the discussion turned to the expected repetitioning the Natives of Afognak for the incorporation of a development city, Palmer McCarter, director of the local government assistance division, stated that it was "a sham, if you will, of the initial Afognak presentation."

McCarter stated that he believed, however, that Shay was "being parochial in assuming that all development cities would have residents like Afognak." McCarter said that many areas in the state would not have residents.

However, Local Boundary Commission representativee Sig Stranberg disagreed with McCarter. Stranberg stated the original petition of the Natives of Afognak for a development city was not a sham. He said the original petition "was valid, and it had punch to it," and that it was quite in line with the Development Cities Act. "It had flaws," said Stranberg, "but it wasn't incurable."

Stranberg explained that the initial petition for a development city of Afognak was requested by developers from within the state; "so the boundary commission greeted it with more enthusiasm." He said the commission also considered the original petition from the standpoint of encouraging development in Alaska.

Sen. Arliss Sturgulewski stated that perhaps now was the time to attend to the adjustments in the Development Cities Act, before the act was actually put into effect. The Development Cities Act has been on the books since 1972, when a Canadian based firm proposed developing mineral deposits and establishing a town near Nome called Lost River. That proposal was subsequently abandoned.

Chairman of the House Community and Regional Affairs Committee Bill Parker commented to Shay, "I think what you have pointed out to us, is that this little law didn't die with Lost River."

Many of the legislators present at the meeting did not appear to be very familiar with the Development Cities Act, but judging from the comments generated after Shay's presentation,Shay had impressed the group with his dedication in pursuing the issue.

Rep. Fred Zharoff, who was present at the meeting, said he thought Shay had posed some very interesting questions. He said he would like to see the Local Boundary Commission investigate the issue and come up with some recommendations.

"I am very pleased all of you came to hear me today," stated Shay at the dispersal of the meeting. "This is something my wife and I are very concerned about, and I am very pleased that you would all turn out just to hear one citizen."

Manager for the Natives of Afognak, Marvin Frost was invited by Shay to present the corporation's position concerning development cities to the group, but Frost did not attend the meeting.

We are still fully attached.
Have not yet been sent to
all legislators - HB4 per your request.

State Agency Will Review Afognak Petition March 15

A controversial petition for a first class development city on Afognak Island, about 40 miles off Kodiak Island, will be reviewed March 15 in Juneau.

The proposal, filed in November by a native village corporation, Natives of Afognak, got tentative approval in January from the state Department of Community and Regional Affairs.

However, a number of protests have come in, prompting the review, says Pat Poland, state Local Boundary Commission staff assistant headquartered in Anchorage.

The protests are chiefly from other native corporations holding land in the area, as well as from residents, he said.

Under state law, a development first class city may be established in areas that are basically uninhabited, thus giving incorporators the added borrowing power needed for fast development. Except for development cities, requirements for setting up a first class city specify a certain number of residents already living in the area.

The Afognak petition stated that the 825-mile area to be incorporated had no residents. However, Poland said, it appears that there are actually 41 residents of the area. The area proposed as a city includes about half of Afognak Island and all of Whale and Raspberry Islands, with only about half of the proposed area being land, he said.

Land holders and residents basically are protesting incorporation on grounds that they would be subject to taxation and land uses they did not approve.

The hearing on incorporation will be held in the Juneau office of Community and Regional Affairs headed by Commissioner Lee McAlearney.

Lost River near Nome, the only development city to have been incorporated under the state's development city law, was dissolved several years ago.

The Afognak natives' group holds lands suitable for a logging operation. The corporation was formed from residents of both the old village of Afognak on Afognak Island and from Port Lyons on Kodiak Island. The latter village was formed after the 1964 earthquake rendered the former city uninhabitable.

The development city act anticipates that a new city is reasonably capable of growing to at least 400 inhabitants within five years.

Judge Closes Target Range

A controversial Hillside shooting range was put out of operation Wednesday when an Anchorage judge decreed the range was operating without a noise permit.

Superior Court Judge J. Justin Ripley ordered the Pistol-Ammunition-Rifle Club of Alaska (Parca) range be closed until ... owners obtained a municipal noise ... mit. However, testimony during ... two-day hearing disclosed ra... operators did apply for a noise ... mit in February but were denied the permit.

One municipal noise inspector testified the range did not violate municipal noise standards. But the permit was denied because the range allegedly did not meet safety standards, was the subject of complaints by community residents and was in a location not considered suitable by municipal officials.

Parca operators have contended the shooting range is safe and does not interfere with residential life in the community. The 75-acre gravel pit which contains the range is located on Cange Road just off O'Malley Road.

Parca founder Dave Sharukshahyn said Wednesday the club plans to pursue the noise permit through ...

That committee, which is made up of lawyers and laymen, will hear his presentation, along with Talbot's, not unlike a small trial, Garrison said.

The committee then will make a recommendation to the bar association's board of governors, who can reject, amend or approve the committee's findings.

Depending upon the board's decision — and assuming he even is found guilty of an ethics violation — Talbot could be disbarred, reprimanded or a public notice of his action

Discussion planned on development act

Feb. 9 1979
Kodiak Daily Mirror

By DEBORAH NELSON
Mirror Staff Writer

Onion Bay resident Dodd Shay, who wants to see the Development Cities Act rewritten, has organized a no host breakfast in the Sheffield banquet room this Sunday at 8 a.m. to discuss the issue.

Chairperson for the Senate Community and Regional Affairs committee Arliss Sturgulewski, said she plans to attend the breakfast and said some legislators from both the House and Senate Community and Regional Affairs committees are planning to attend the meeting. Sturgulewski's office said Rep. Fred Zharoff and his wife have reported they will be present, but Sen. Bob Mulcahy said he wasn't sure if he would be able to fit the meeting into his schedule.

Shay said he plans to speak for about 15 minutes on the Development Cities Act and then plans to turn the issue over to those assembled for discussion.

Shay explained that while he was going over the statues concerning the Development Cities Act, he found areas "extremely lacking."

"The way the statues on the Act are currently written," stated Shay, "it doesn't deal with Alaska's social and economic problems. It will compound the problems that we already have if it is not rewritten before it is put into effect."

However, it may be a race against the statutory clock for Shay, because the Natives of Afornak are gearing up for another attempt to establish the Development City of Afognak.

The planning and zoning commission waived the platting requirements for the Ouzinkie and Afognak Corporations, Wednesday, allowing them to complete a major exchange of land. According to Marvin Frost, general manager for the Natives of Afognak, this was the biggest step before the corporation once again places its petition for the establishment of a development city before the Department of Community and Regional Affiars.

Shay said he expected Frost to attend the Sunday breakfast. Frost said this morning he didn't know if he would be in attendance for the meeting or not.

Natives of Afognak had filed a petition for a development city in November 1977. The Local Boundary Commission had granted tentative approval for the development city in January 1978; however, it rescinded its decision in May of that year.

Shay, who owns five acres and a house on Onion Bay of Rasberry Island, was involved in attempting to stop the 1977 Natives of Afognak petition for a development city. During the Democratic Convention held in Kodiak last April, Shay was successful in obtaining a party endorsed resolution opposing the Development Cities Act.

The development Cities Act has never been tested; however, it has remained on the books since 1972, when a Canadian-based firm proposed developing mineral deposits and establishing a town near Nome called Lost River.

That proposal was abandoned, but the cities act remained in the statutes, which permits

(Continued on Page 2)

Discussion

(Continued from Page 1)

uninhabited or unorganized areas within the state to become first class cities. The Development Cities Act also allows for a governor appointed city council which pre-empts residents from electing council members until the city has 400 permanent residents

Legislators attend cities act meeting

Feb. 13, 1979

By DEBORAH NELSON
Mirror Staff Writer

Something good must be said for the democratic processwhena carpenter living in a remote region of the state can gather together at least 10 state legislators and other state officials to listen to his cause.

In his opening remarks to the group Sunday morning, Union Bay resident Dodd Shay told the legislators he had arranged the breakfast meeting to inform them about discrepancies he has discovered in the Development Cities Act, "so that you can deal with the issue in the legislature."

"It is my opinion," Shay stated, "that the law as it is written is grossly deficient in protecting Alaska's interest, and in dealing with the social and economic needs of our state."

Shay, who had obviously done much research concerning the act, went over the statutes pertaining to the Development Cities Act and explained to the group what he found to be faulty statements.

Among the statutes Shay addressed was a statute pertaining to the initial government of a development city. This statute states that city council members do not have to be residents of a development city during the first five years of its incorporation, and that the governor has the power to appoint the initial city council members.

In his rebuttle to this statute, Shay stated, "it is clear the governor has clear control of the city, with the city council serving at his pleasure." Shay stated it was important to realize the power a governor could accrue "if perhaps, 10 to 15 of these cities are being developed, and all t the control of one governor."

"The law as it reads now doesn't even say the city council has to be in Alaska," declared Shay. "This means that a citizen would be required to pay long distance rates to talk to his appointed rulers."

In his concluding remarks, Shay stated that international bankers and multinational corporations have been "cutting off our state's opportunity to proceed in its family-oriented past by completely stopping land transfer to the public, and regulating everything from limited entry to placer mining out of the reach of the general public."

Shay went on to say these corporations have created the state of mind in Alaska which

Meeting

(Continued from Page 1)

scale development by multinational corporations.

After Shay's presentation, the floor was opened for discussion. Borough Manager Stuart Denslow announced to the legislators that Shay was not alone in his concern over the Development Cities Act. He said other individuals expressed their concern over the issue to the borough.

When the discussion turned to the expected repetitioning the Natives of Afognak for the incorporation of a development city, Palmer McCarter, director of the local government assistance division, stated that it was "a sham, if you will, of the initial Afognak presentation."

McCarter stated that he believed, however, that Shay was "being parochial in assuming that all development cities would have residents like Afognak." McCarter said that many areas in the state would not have residents.

However, Local Boundary Commission representativee Sig Stranberg disagreed with McCarter. Stranberg stated the original petition of the Natives of Afognak for a development city was not a sham. He said the original petition "was valid, and it had punch to it," and that it was quite in line with the Development Cities Act. "It had flaws," said Stranberg, "but it wasn't incurable."

Stranberg explained that the initial petition for a development city of Afognak was requested by developers from within the state, "so the boundary commission greeted it with more enthusiasm." He said the commission also considered the original petition from the standpoint of encouraging development in Alaska.

Sen. Arliss Sturgulewski stated that perhaps now was the time to attend to the adjustments in the Development Cities Act, before the act was actually put into effect. The Development Cities Act has been on the books since 1972, when a Canadian based firm proposed developing mineral deposits and establishing a town near Nome called Lost River. That proposal was subsequently abandoned.

Chairman of the House Community and Regional Affairs Committee Bill Parker commented to Shay, "I think what you have pointed out to us, is that this little law didn't die with Lost River."

Many of the legislators present at the meeting did not appear to be very familiar with the Development Cities Act, judging from the comments generated after Shay's presentation.Shay had impressed the group with his dedication in pursuing the issue.

Rep. Fred Zharoff, who was present at the meeting, said he thought Shay had posed some very interesting questions and said he would like to see the Local Boundary Commission investigate the issue and come up with some recommendations.

"I am very pleased that you came to hear me today," said Shay at the dispersal of the meeting. "This is something that my wife and I are very concerned about, and I am very pleased that you would come out just to hear one citizen."

Manager for the village of Afognak, Marvin Frost, was invited by Shay to speak on the corporation's position concerning development. Frost, a group, but Frost did not the meeting.

460. Definition

Revisor's note (1972).—Provisions virtually identical to §§ 220—460 of this chapter were originally enacted as AS 29.76, in ch. 106, SLA 1972. Also see ch. 110, SLA 1972, which incorporated the development city of Lost River.

Sec. 29.18.220. Legislative findings. The legislature finds that the development of natural resources in isolated and relatively unpopulated areas requires a policy and procedure which will provide planning, financial and other assistance necessary for encouraging orderly development of well-planned, diversified and economically sound new cities necessary to support the sound development of the state's resources by both the private and public sector. It is the purpose of §§ 220—460 of this chapter to set out the mutual responsibilities of the private and public sectors to achieve these objectives with a view to securing information valuable to future legislatures so that general legislation applicable to the establishment of development cities may be perfected. (§ 19 ch 118 SLA 1972)

Sec. 29.18.230. Development cities. Subject to reclassification under § 400(c) of this chapter, a development city is a city of the class designated by the Department of Community and Regional Affairs. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency."

Sec. 29.18.240. Incorporation. An area not served by an existing municipality which is not reasonably practicable to be served by an existing municipality may be incorporated as a development city by

(1) petition of the industrial developer to the Department of Community and Regional Affairs to be acted on by the Local Boundary Commission; or

(2) act of the legislature. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in paragraph (1).

Sec. 29.18.250. Petition for incorporation. A development city incorporation petition proposed by an industrial developer shall include the following information about the proposed city:

(1) class,

(2) name,

(3) boundaries,

(4) composition of the council,

(5) maps, documents, preliminary economic development projections, preliminary population projections, outline of the industrial developer's investigative and development expenditures and its proposed capital program, and other information required by the Department of Community and Regional Affairs to show that the proposed city meets the standards for incorporation,

(6) the proposed agreement required under § 330 of this chapter. (§ 19 ch 118 SLA 1972; am §§ 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in paragraph (5).

Sec. 29.18.260. Review. The Department of Community and Regional Affairs shall review the petition for content and shall return deficient petitions for correction and completion. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency."

Sec. 29.18.270. Investigation. If the petition contains the required information, the Department of Community and Regional Affairs shall investigate the proposal to determine whether the development expenditures and proposed capital program by the developer serve the public interest and demonstrate a probability of being carried forward to a successful conclusion. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency."

Sec. 29.18.280. Report. (a) The Department of Community and Regional Affairs shall report its findings to the Local Boundary Commission with its recommendations regarding the incorporation within 60 days of receipt of the petition for incorporation.

(b) The Local Boundary Commission shall review the petition and the findings and recommendations of the Department of Com-

munity and Regional Affairs within 60 days of receiving them. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in subsections (a) and (b).

Sec. 29.18.290. Decision on development city incorporation. (a) The Local Boundary Commission may reject a petition for incorporation if it finds that

(1) the area proposed for incorporation is served by an existing municipality or could be served by an existing municipality;

(2) it is improbable that the proposed development will take place;

(3) the program and activities contemplated by this chapter may be undertaken through expansion of the corporate limits of an existing city and then declares that city to be a development city for the purpose of preferential designation under §§ 10 and 340—460 of this chapter;

(4) the program and activities contemplated by this chapter may be undertaken by establishing a service area within an existing organized borough for a development project, and declares the service area to be eligible for preferential designation under §§ 410 and 450 of this chapter;

(5) the proposed development does not serve the public interest.

(b) If the Local Boundary Commission finds that a service area within an organized borough is to be designated for preferential treatment under (a) (4) of this section, the assembly may undertake the project in the manner of a development city and shall present to the Local Boundary Commission a contractual agreement outlining responsibilities assumed by the borough and the industrial developer to implement the proposed development program.

(c) The assembly may decline findings under (b) of this section to establish a service area and in the alternative request the Local Boundary Commission to approve incorporation of a development city.

(d) The Local Boundary Commission may dissolve a development city established under § 20 of this chapter if subsequent to its incorporation

(1) the major economic development projected does not occur within a period of five years; and

(2) if the development project had been reviewed as a new project the Local Boundary Commission determines it would have rejected the petition on the basis that it is improbable the proposed development would have taken place.

(e) A commission decision under this section may be appealed under the Administrative Procedure Act (AS 44.62). (§ 19 ch 118 SLA 1972)

Sec. 29.18.300. Preliminary planning. The city shall prepare and submit to the state preliminary plans in advance of completion of the final basic comprehensive plan for the city. The preliminary plans shall include

(1) maps, documents, preliminary economic development projections, preliminary population projections, outline of the industrial developer's investigative and development expenditures and its proposed capital program, and other information required by reviewing agencies of the state;

(2) a report on the physical and biological character of the proposed city's site and a land and water use plan and the design and siting of the community to be developed based upon these natural factors. (§ 19 ch 118 SLA 1972)

Sec. 29.18.310. Review and report. (a) The division of planning and research, in conjunction with the Departments of Community and Regional Affairs, Natural Resources, and Environmental Conservation and other departments as determined appropriate by the division of planning and research, shall review the preliminary planning and additional data may be requested.

(b) The division of planning and research shall coordinate the preparation of a report and recommendations, if any, which shall be submitted to the governor within 60 days of receipt by the state of the preliminary plans from the city. The city may proceed to the completion of the final basic comprehensive plan upon satisfying any specific recommendations contained in the report.

(c) During the course of planning toward completion of the basic comprehensive development plan the division of planning and research and the Department of Community and Regional Affairs shall be kept currently informed and the final plan shall be subject to review and recommendation by the division of planning and research, which shall act in its coordinating capacity to secure review by the Department of Environmental Conservation and other state agencies as appropriate. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, in subsection (a), deleted "Local Affairs Agency and the" following "conjunction with the" and inserted "Community and Regional Affairs" following "Departments of." In subsection (c), the amendment substituted "Department of Community and Regional Affairs" for "Local Affairs Agency."

Sec. 29.18.320. Limitation. The city may not proceed with commitment of funds or formal undertakings for physical development until it has a signed contract or contracts for sale of the company's products in quantities shown in the economic data and submitted by the company to be adequate to sustain an economically viable operation. The company may submit alternative valid evidence that the projected operation will proceed. The company shall notify the

Department of Community and Regional Affairs of the meeting of this requirement. Unless the Department of Economic Development makes a determination that the data is insufficient, the city may proceed. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in the third sentence.

Sec. 29.18.330. Local hire. In consideration of the incorporation of a development city under this chapter, the major developer shall enter into an agreement with the appropriate agencies of the state concerning

(1) establishing and maintaining an approved Department of Labor on-the-job training program to qualify Alaska residents lacking in the requisite technical skills of the activities to be undertaken;

(2) establishing resident hire goals in terms of per cent of employees at the end of the first year, second year and third year of operation;

(3) establishing the responsibilities of the various state agencies towards providing technical assistance, manpower procurement, relocation assistance, job opportunity services to residents in the area, supplemental vocational training, and the scope of effort each state agency has in this regard with specific commitments in terms of numbers of residents, time schedule and dollar value of training;

(4) establishing the penalties and conditions of noncompliance with the agreement. (§ 19 ch 118 SLA 1972)

Sec. 29.18.340. Development city council. The council of a development city has five members consisting of the commissioner of the Department of Community and Regional Affairs, or his designee, and four public members designated by the governor. The governor shall appoint no fewer than two public members from a list of nominees designated by the major developer providing the industrial base of the city as measured by employment and capital investment. The council shall serve at the pleasure of the governor. The designated councilmen need not be residents of the city during its development stage. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, in the first sentence, substituted "commissioner" for "director" following "consisting of the" and substituted "Department of Community and Regional Affairs" for "Local Affairs Agency."

Sec. 29.18.350. Filling a vacancy. If a vacancy occurs in the council as constituted under § 340 of this chapter, the applicable appointing authority shall designate the replacement during the development stage of the city. (§ 19 ch 118 SLA 1972)

Sec. 29.18.360. Powers and duties of council. During the development stage the council of a development city may

(1) exercise the powers and duties of a school board if the city is located outside an organized borough;

(2) exercise the powers and duties of a planning commission under AS 29.33.080, except that during the first five years or until the development city has 400 permanent residents, zoning and zoning changes will be reviewed and approved by the division of planning and research and the Department of Environmental Conservation. (§ 19 ch 118 SLA 1972)

Sec. 29.18.370. Powers and duties of development city executive director. During the development stage the council shall appoint an executive director of the development city, who may be one of its members, to serve at the pleasure of the council. The executive director shall have the powers and duties of all executive and administrative city officials set out in this title in order to develop the city under a comprehensive community development plan. (§ 19 ch 118 SLA 1972)

Sec. 29.18.380. Procedures. During the development stage, the council may provide for conference telephone or radiophone meetings at times determined by the council and shall determine its own rules and order of business. (§ 19 ch 118 SLA 1972)

Sec. 29.18.390. Development city capital improvement funds. All state agencies shall, where appropriate, adopt procedures to insure that, during the development stage, the needs of a development city are carefully considered in the allocation of funds available for capital improvement projects where those funds have not otherwise been committed by the legislature. (§ 19 ch 118 SLA 1972)

Sec. 29.18.400. Transition. (a) When a development city has 400 permanent residents elections shall take place according to the following schedule:

(1) in the first year two additional councilmen who shall be city residents elected for three-year terms;

(2) in the second year two councilmen who shall be city residents elected for three-year terms to replace one of the councilmen nominated by the industrial developer and one of the public members designated by the governor;

(3) in the third year two councilmen who shall be city residents elected for three-year terms to replace the commissioner of the Department of Community and Regional Affairs and one of the councilmen nominated by the industrial developer;

(4) in the fourth year a mayor who shall be a city resident elected for a three-year term to replace the remaining councilman nominated by the industrial developer.

(b) At the time of the election under (a) (4) of this section, or any time after it, the electorate may exercise the right to become a home rule city as authorized under this title.

(c) If, within a period of five years from the incorporation of a development city, the number of permanent residents does not reach 400, the Department of Community and Regional Affairs shall order an election for city officials and designate a successor class of city based on population as provided in this title. If the department designates a successor class of city, the provisions of this title relating to that class of city apply, and the city shall be reclassified accordingly. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "commissioner of the Department of Community and Regional Affairs"for "local affairs director" in paragraph (3) of subsection (a). The amendment also substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in the first sentence of subsection (c) and substituted "department" for "agency" in the second sentence of that subsection.

Sec. 29.18.410. Housing powers. From the time of the appointment of the first city council and for a period of 10 years following the first election of councilmen, the council may act as its own housing and urban renewal authority if such powers have been granted to cities under applicable provisions of law. (§ 19 ch 118 SLA 1972)

SEE LAST PAGE

Sec. 29.18.420. Land selection. (a) The Department of Natural Resources shall attempt to secure the transfer of the available federally owned land located within the boundaries of a development city into state ownership. After the transfer, a development city may select 10 per cent of the vacant, unappropriated, unreserved state land located within its boundaries. Nothing in this section affects a valid existing claim, location, or entry under the laws of the state or the United States whether for homestead, mineral, right-of-way or other purposes or affects the rights of an owner, claimant, locator, or entryman to the full use and enjoyment of the land so occupied.

(b) If land desired by the development city is unsurveyed at the time of its selection, the Department of Natural Resources shall survey or approve a survey by the city of the exterior boundaries of the area requested without interior subdivision and shall issue a patent for the selected area in terms of the exterior boundary survey. The cost of the survey is borne by the city. If land desired by the city has been surveyed at the time of its selection, the

boundaries of the areas requested must conform to the public land subdivisions established by the approval of the survey. Land selected by the city under this section is patented to the city by the Department of Natural Resources.

(c) After the selection of the land by the development city but before the issuance of final patent, the city may execute conditional leases and make conditional sales of selected land. (§ 19 ch 118 SLA 1972)

Sec. 29.18.430. Revenue bonds. Revenue bonds may be issued by a development city under the provisions of AS 29.58.200—29.53.220. However, no vote of the people is required to issue revenue bonds during the development stage. During the development stage revenue bonds may be issued by a majority vote of the city council. (§ 19 ch 118 SLA 1972)

Sec. 29.13.440. Shared revenue. A development city is entitled to shared revenue and other state funds on the same basis as a city or organized borough of the first class or, if reclassified under § 400(c) of this chapter, on the basis of the reclassification. During the development stage the Department of Community and Regional Affairs may establish an assumed population figure which shall be used to determine shared revenue based on population on per capita grants. (§ 19 ch 118 SLA 1972; am § 9 ch 200 SLA 1972)

Effect of amendment. — The 1972 amendment, effective July 1, 1972, substituted "Department of Community and Regional Affairs" for "Local Affairs Agency" in the second sentence.

Sec. 29.18.450. Applicability of other provisions of this title. All applicable provisions of this title consistent with the provisions of this chapter apply to development cities. Provisions of this chapter prevail over other provisions of this title which are inconsistent. (§ 19 ch 118 SLA 1972)

Sec. 29.18.460. Definition. In this chapter "development stage" means that period of time extending from the date of incorporation of a development city until such time as the city may attain a population of 400 permanent residents, or five years from the date of incorporation, whichever is earlier. (§ 19 ch 118 SLA 1972)

Alaska Statehood Act, 72 Stat. 339, and any other land designated solely for school revenues;

(11) "university land" means all sections 33 reserved to the university under 38 Stat. 1214, as amended (48 U.S.C. 353) and all land granted to or reserved for the benefit of the university;

(12) "vacant, unappropriated, unreserved land" means general grant land as defined in (4) of this section, excluding minerals as required by § 6(i) of the Alaska Statehood Act, which

(A) has not been set aside by statute for one or more particular uses or purposes;

(B) has not been approved for patent to a municipality under §§ 201 — 213 of this chapter or former §§ 190 and 200 of this chapter repealed by this act; or

(C) is unclassified or, if classified under AS 38.05.300, is classified for agricultural, grazing, commercial, industrial, private recreational, residential, utility or open-to-entry purposes, or where classified in accordance with an agreement between a municipality and the state providing for state management of land of the municipality. Introduced: 1/10/78
Referred: Community &
Regional Affairs and Finance

IN THE HOUSE

BY THE RULES COMMITTEE BY
REQUEST OF THE GOVERNOR

HOUSE BILL NO. 585

IN THE LEGISLATURE OF THE STATE OF ALASKA

TENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act establishing a local government study commission; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. LOCAL GOVERNMENT STUDY COMMISSION. There is established in the Department of Community and Regional Affairs a temporary local government study commission.

* Sec. 2. MEMBERSHIP OF COMMISSION. The commission has the following members:

(1) the commissioner of community and regional affairs or his designee;

(2) the chairman of the senate community and regional affairs committee;

(3) the chairman of the house community and regional affairs committee;

(4) four municipal officials appointed by the governor, one of whom must be from an organized borough or unified municipality, one from a first-class or home rule city located within an organized borough, and two from cities located within the unorganized borough;

(5) two residents of the unorganized borough, outside cities, appointed by the governor.

* Sec. 3. POWERS AND DUTIES OF THE COMMISSION. (a) The commission shall make recommendations to the governor and the legislature concerning the sufficiency of the existing local government structure and measures by which it may be improved, and toward that end, it shall

Legislative Committee
should develop guidelines.

(1) study and evaluate existing and alternative means of local government finance;

(2) study and evaluate the differences between governmental services and burdens in organized boroughs and the unorganized borough;

(3) study and evaluate the relationships between the state and local governments;

(4) study and evaluate existing and alternative local government structures;

(5) hold public hearings in organized boroughs, cities and the unorganized borough;

(6) after one year of study submit an interim report to the governor and the legislature;

(7) after two years of study, submit a final report with findings and recommendations to the governor and the legislature.

(b) In exercising its powers and fulfilling its responsibilities, the commission may:

(1) establish sub-committees to study each of the subjects set out in (a)(1) through (4) of this section;

(2) contract through the Department of Community and Regional Affairs for the professional services it considers necessary to prepare its final report.

* Sec. 4. DISSOLUTION OF COMMISSION. After presenting its final report, the commission is dissolved.

* Sec. 5. STAFF. The Department of Community and Regional Affairs through the division of local government assistance shall provide the staff for the commission.

* Sec. 6. EFFECTIVE DATE. This Act takes effect July 1, 1978.

BOROUGH ATTORNEY'S OFFICE

March 18, 1980

The Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
State Capital
Juneau, Alaska 99811

Dear Arliss:

Re. Municipal code revisions.

Attached with this letter is a list of examples of various provisions of Title 29 which should be clarified through revision of that title. This list is by no means exhaustive and I am sure that other attorneys and municipal officials throughout the state could add additional examples and support a thorough revision of Title 29.

As we discussed some time ago in Juneau, I recommend that the Legislature form an interim committee to review AS 29 during the next two years and that the committee be empowered to seek assistance from municipal attorneys throughout the state, hold hearings as it deems appropriate, and present a new municipal code to the Legislature in 1981 or 1982. I have received expressions of support from attorneys representing several municipalities throughout the state and am confident they will assist the Legislature in preparing a revised municipal code.

Thank you very much for your continued attention to this matter. If there are additional questions I can answer regarding Title 29 or if the Legislature is prepared to take action in this matter, please do not hesitate to contact me.

Cordially,

Allan E. Tesche
Borough Attorney

AS 29: Revisions Needed

29.08

Although an attempt has been made in this Chapter to classify the various kinds of Alaskan municipalities, more recent amendments to Title 29 and unification of several cities and boroughs have resulted in confusion over definitions of "cities", "boroughs", and "municipalities". It is not clear, for instance, whether the unified Municipality of Anchorage is a city, a borough, or unified municipality or all three forms of government within existing provisions of AS 29.

29.13.100

The Code should contain a uniform system for designating statutes that expressly apply to home rule municipalities and all such statutes should be consistently cross referenced.

29.23.050

The statutory residence requirement prescribed in this section is probably invalid. It is suggested that such residence requirements throughout AS 29 be reduced to a maximum of one year.

29.23.060(d)

Circumstances, other than financial interests, which allow a member to abstain should be better defined.

29.23.080

The procedure for determining vacancies under this section conflicts with the procedure established under AS 29.23.570.

29.23.130(B)

Once again, the three residency requirement in this section should probably be reduced to one year to assure its constitutional validity.

29.23.150 and AS 29.23.470

Both require assembly appointmet of an acting borough manager in the absence of or disability of the manager. If these sections address different policy questions, they are unclear; if they do not, one should be eliminated as redundant.

29.23.170

This provision does not specify when a veto becomes effective or specify any time limit for the overriding of the veto. Moreover, it does not indicate what is the status of an ordinance between the time its veto is announced and the time the Assembly first has an opportunity to override the veto. For instance, if the mayor vetos a line

item in the budget, may expenditures be made under that item until the mayor announces the veto at the next regular assembly meeting, or does the veto immediately strike the item until the veto is overridden?

29.23.200

The three year residency requirement here is also probably invalid.

29.23.210

As with the provisions for borougns, this section should provide more definite standards for abstention on other than conflict of interest grounds.

29.23.250

Another probably invalid three year residency requirement.

29.23.270

This provision has the same ambiguities with regard to the effectiveness of a veto and a veto override as the provision applying to boroughs.

29.23.555

This section has been superceded by AS 39.50.

29.33.070-245

Serious thought should be given to the purpose of the planning, platting and zoning provisions in this code. Should they only prescribe minimum due process standards for rezonings and other land use decisions or should they detail all of the administrative procedures to be followed by local governments in this area. This article presently tries to do little of both and does neither very well.

29.33.190

This section makes it unlawful for any person to sell or attempt to sell land located within a subdivision which has not yet been approved by the borough platting authority and subjects violators to certain criminal sanctions. But AS 29.53.100 requires that the borough assessor assess real property to "the owner of record as shown on the records of the district recorder" even though that person may be the owner of record only by virtue of an illegal subdivision in violation of AS 29.33.190. Moreover, AS 29.53.310 allows persons holding security interest in illegally subdivided lands to obtain release for portions of lots or tracts originally subdivided even though such lands were illegally subdivided in violation of AS 29.33.190.

29.33.070

It is unlear whether platting powers can be delegated to a second class borough or a city within the borough under this section.

29.33

The current language of this chapter, as it incoprorates a traditional definition of zoning and makes zoning along with platting the principal means of land use regulations, is unduly restrictive and should be revised to allow more innovative forms of land use regulation by boroughs and municipalities.

29.33.250

Presumably the transfer required is one from all cities exercising the power rather than from a city.

29.33 and 29.38

Should there be a provision for a borough to exercise a power in some but not all cities (for example in second class cities but not in first class cities)?

29.48.030(b) AS 29.48.035(b) and (c)

These provisions are redundant. The limitations on the powers of second class boroughs should be stated in a more concise fashion in one easily accessible part of the code.

Moreover, AS 29.48.030 and .035, insomuch as those sections distinguish between "regulation" and provision of "municipal facilities and services", are at the very least confusing and perhaps unnecessary.

29.48.030(a)(12)

The term transportation "system" used in this section should be defined.

29.48.260

Provisions of this section governing disposal of municipal properties should be clarified and revised to reflect increased land values throughout the state, to state who makes determinations of the value of land offered for sale and the date upon which such valuations must be based. Moreover, the statute should be clarified to either include or exclude rights-of-way or easements from its provisions.

29.53.135

The language regarding the composition of the Board of Equalization is unclear. The statute presently requires "at least that number of members of the assembly over and above the number required for a quorum to transact business"; the statute is unclear when applied to a lay board to whom the equalization function is delegated.

29.53

Should be amended to require payment of all taxes, even those due for more recent assessments on properties whose owners have requested issue of a quitclaim repurchase deed. Present law mandates issue of a quitclaim repurchase deed to the owner of record upon payment of those taxes assessed for the tax year stated in the clerk's deed even though the same property is the subject of other foreclosure proceedings brought in subsequent years. An amendment to AS 29.53 which would require payment of all taxes owing on a parcel before a quitclaim repurchase deed can be issued would eliminate substantial confusion in the minds of taxpayers, and would reduce administrative complexity for borough finance departments presently confronted with multiple foreclosure actions on the same parcels.

29.63.090

The present statute governing service areas does not adequately address the question of whether a service area may be used for exercise of a governmental regulatory power rather than for provision of municipal or services.

8.60.050-100

Regulation of junk yards in this section should be cross-referenced to those sections of Title 29. relating to areawide planning, platting and zoning powers.

9.25.110-120

It is unclear whether public records statutes apply at all to municipal government. If it is the intention of the Legislature to apply the public records laws of AS 9.25.110-120 to cities and boroughs, then those sections should be amended accordingly with an appropriate cross references to Title 29.

DEVELOPMENT CITY - Title 29

Senate Community and Regional Affairs
Arliss Sturgulewski

February 1979

Notes by Ann Sheets

It must be remembered that this statute was written for the Lost River project located near Nome in an unorganized borough containing no inhabitants. When Community and Regional Affairs received the petition for a development city on Afognak Island from the Afognak Island Native Association, they were given the impression that this area was devoid of inhabitants and proceded on this assumption. Most of the inhabitants are, in fact, transient cannery workers and may not wish for a voice in the development stage of a development city. It is not clear if all of the land is owned by the Native Corp. and if so, on whose land are the remaining inhabitants residing. If these inhabitants do not own land, they will not be subject to property tax even when it becomes a first class city. (they must pay tax only on improvements on the land).

29-18-050 (8) Provision for a first class city incorporation

This should be changed if there are inhabitants in the area. This section of the statute does not follow the standard incorporation procedures because it was assumed that a development city would result in an uninhabited area.

29-18-340 Development City Council

Change statute to "the Governor shall appoint no fewer that two public members from a list of nominees designated by the major developer providing the industrial base of the city as measured by employment and capital investment; and two members who are state residents preferably residing in the surrounding area or borough if the development city is located in a borough".

29-18-360 Powers and Duties of the Council

Considerable controversy has arisen over this provision as it gives planning & zoning powers to the division of planning and research and the Dept. of Environmental Conservation during the development stage. The original project for which this was written (Lost River) was located in an unorganized borough whereas Afognak is located within a borough which may want some control over development within its confines. An addition which may alleviate this problem is "except within an organized borough unless the borough waives DPD powers over development, planning, and zoning".

Actually, according to 29-18-290, the petition for a development city may be rejected

Actually, according to 29-18-290, the petition for a development city may be rejected under (4) if the organized borough is capable and willing to carry out the program and activities being considered or if the borough wishes to promote a development city within its area (5) (a) the assembly may "present to the Local Boundary Commission a contractual agreement outlining responsibilities assumed by the borough and the industrial developer to implement the proposed development program."

29-18-380 Procedures

Add "meetings shall be made public".

29-18-390 Development City Capital Improvements

Regulations presently being written by Community and Regional Affairs will clarify this.

29-18-430 Revenue Bonds

Mr. Shey is incorrect in his assumption that issance of Revenue Bonds would result in the 85 residents becoming 1/85 of the taxable base. Revenue bonds are issued from a coporation or bank based on the value of the project or facility thereby placing no liability on the tax payers. In the development stage, the inhabitants will not be taxed,and unless they own property, they will b taxed only on improvements on land when the development city is incorporated. The state may support the area with funds for certain capital improvement projects thereby represently the use of general tax monies. Mr. Shey gives an example of the building of a dock for which he says his concern is "the tax liability of the bond on the city should the industry fail to be profitable. . ." The facility would be liable in the case of Revenue bonds not the city.

Therefore, there are four alternatives before us:

1. Change the law to apply to locations which include a population; providing for a more democratic process in the development state of the project.

2. Repeal the law and in the process disallow certain developments that may be needed and beneficial to Alaska in uninhabited areas of the state.

3. Limit the law to only those areas in unorganized boroughs that have no inhabitants.

4. Leave the statute as is, counting on the regulations from Community and Regional Affairs to clarify the less definitive and confusing aspects of the law.

STATE OF ALASKA

LOCAL BOUNDARY COMMISSION

JUNEAU, ALASKA

RECOMMENDATIONS OF THE LOCAL BOUNDARY COMMISSION SUBMITTED TO THE ELEVENTH STATE LEGISLATURE FIRST SESSION ASSEMBLED

SUBMITTED JANUARY 23, 1979

RECOMMENDATIONS

1. Recommendation for annexation of territory to the City of Kodiak.

2. Recommendation for correcting an error in the present corporate boundary description of the Kenai Peninsula Borough.

STATE OF ALASKA

LOCAL BOUNDARY COMMISSION

JUNEAU, ALASKA

RECOMMENDATION FOR ANNEXATION OF TERRITORY TO THE CITY OF KODIAK, ALASKA

SUBMITTED TO THE ELEVENTH LEGISLATURE,

FIRST SESSION ASSEMBLED

SUBMITTED JANUARY 23, 1979

RECOMMENDATION FOR ANNEXATION OF TERRITORY

to the

City of Kodiak

WHEREAS, the petitioner, the City of Kodiak, has requested that certain property in the Mill Bay area be annexed to the city, to wit: twenty five lots contiguous to and North and East of the City of Kodiak, including residential and commercial properties; and

WHEREAS, upon receipt of the petition, the Department of Community and Regional Affairs determined that the petition was sufficient; and

WHEREAS, subsequent to giving proper notice, the Local Boundary Commission held a public hearing at Kodiak, Alaska, on December 12, 1977, in the Kodiak City Council Chambers; and

WHEREAS, as a result of that public hearing, the Local Boundary Commission determined other urban lands in addition to those defined in the petition might be suitable for annexation to the City of Kodiak; and

WHEREAS, after giving proper public notice, the Local Boundary Commission held an additional public hearing at Kodiak on April 26, 1978, to consider annexation of geographical areas generally described as the Spruce Cape area, the Mill Bay area, the Monashka Bay area, and the United States Coast Guard Station to the City of Kodiak; and

WHEREAS, after giving proper public notice, the Local Boundary Commission held a public meeting in Anchorage on August 16, 1978, to review the record of proceedings on the

petition; and

WHEREAS, the City of Kodiak has stated to the Local Boundary Commission that it is financially capable of providing its full range of general fund services to the area encompassed by the Local Boundary Commission decision; and

WHEREAS, the Local Boundary Commission has determined that the territory to be annexed meets the standards for annexation set forth at 19 AAC 05.010(3) in that the area is generally urban in character, as evidenced by Kodiak Island Borough population estimates, property valuations, and the relatively high level of commercial activity; and

WHEREAS, the Local Boundary Commission has determined that the territory to be annexed meets the standards for annexation set forth at 19 AAC 05.010(4) in that evidence gathered at the public hearings shows that the area to be annexed is in need of municipal services which can be most efficiently provided by the City of Kodiak; and

WHEREAS, the Local Boundary Commission has determined that the territory to be annexed meets the standards for annexation set forth at 19 AAC 05.010(5) in that Kodiak Island Borough planning documents indicate there is likelihood that growth and development will occur in the territory and annexation will enable the city to plan for and control that development and arrange the most efficient municipal services plan to accommodate the expected growth;

NOW, THEREFORE, the Local Boundary Commission recommends that, pursuant to Article X, Section 12, of the Alaska

Constitution, and Alaska Statutes 44.19.260, the petition to annex the territory generally described as the Spruce Cape area and the Mill Bay area be approved and that the boundaries of the City of Kodiak be amended to read as follows:

Beginning at Corner 3 of U.S. Survey 3945, said point being the true point of beginning; thence,

(1) S 55°21'W, 10,868.88 feet to Corner 2 of U.S. Survey 3945; thence,

(2) S 34°34'E, 4250.40 feet to Corner 1 of U.S. Survey 3945; thence,

(3) S 5°06'E, 957.66 feet to Corner 2 of U.S. Survey 2537-B, identical with Corner 15, U.S. Survey 3945; thence,

(4) S 5°05'30"E, approximately 260.74 feet, more or less, to a point intersecting with the Northerly ROW of the Abbert Highway; thence,

(5) along the said ROW in a Westerly and then Southerly direction to a point located upon the common boundary of Public Land Orders 5566 (parcel 2) and 5550, located within U.S. Survey 1673; thence,

(6) S 45°00'E, 2000 feet; thence,

(7) Southeasterly 3,280 feet, more or less, to point "A", said point "A" lying: S 15°34'E, 1,290 feet, more or less, to the center of the channel of St. Paul Harbor from the Southwest corner of Lot 6, Block 20 of U.S. Survey 2537-B; thence,

(8) N 58°06'E, 7,470 feet to a point in the channel North of the Easterly tip of Crooked Island; thence,

(9) N 0°50'W, 1,644.7 feet to a point located in the channel between Near Island and Holiday Island; thence,

(10) N 42°22'E, 5,200 feet, to Point "B", said point "B" lying: S 42°22'W, 3,037.1 feet, more or less, from a point on an

isolated rock which bears S 31°50'E, 191.95 feet from WC 6 MC, U.S. Survey 1822, said point also lying S 32°24'E, 1,162 feet, more or less, from MC 6, U.S. Survey 2873; thence,

(11) N 32°24'W, to a point in the channel which is 1,000 feet from the mean high water line of Kodiak Channel; thence,

(12) along a line, 1000 feet seaward, from the meander line of mean high water in a Northeasterly and then Northwesterly direction to a point 1,000 feet Northerly from the most Northerly tip, at mean high water, of Spruce Cape; thence,

(13) continuing along a line, 1,000 feet seaward, from the meander line of mean high water, proceeding around Mill Bay in a Southwesterly, Northwesterly, and then Northeasterly direction, to a point which is located upon the projected extension seaward of the Northern boundary of Lot 17, Block 1, Second Addition of Miller Point Subdivision, plat approved 11/23/66, said boundary being more specifically described as a line bearing S 73°01'E from the Division of Lands Witness Corner monument located 15 feet West of the Northeast Corner of Lot 17, Block 1, of said subdivision; thence,

(14) N 73°01'W, 1,000 feet to the Northeast Corner of Lot 17, Block 1, of said subdivision; thence,

(15) N 73°01'W, along the Northerly boundary of Lot 17, Block 1, of said subdivision, 327.41 feet, and continuing on approximately the same bearing an additional 1728.59 feet to WC 6 of Lot 3, U.S. Survey 3462; thence,

(16) S 47°56'W, 2551.56 feet to Corner 1, Lot 3, U.S. Survey 3462, identical to the East Corner of Lot 3 of Block 6, Monashka Bay Subdivision, plat approved 9/19/67; thence,

(17) S 45°42'59"W, 295.41 feet, to the South Corner of Lot 3, Block 6 of said subdivision; thence,

(18) N 44°05'04"W, approximately 115 feet, along the Southwesterly boundary of Lot 3, Block 6 of said subdivision to a point which bears N 50°13'26"E from the South Corner of

Lot 7, Block 5, of said subdivision; thence,

(19) S 50°13'26"W, across Otmeloi Way to the South boundary of Lot 7, Block 5, of said subdivision, and continuing along the Westerly ROW of Lake View Drive, 4,433.17 feet, more or less, to the Southeast Corner of Lot 7 of Block 8 of the Monashka Bay Subdivision, plat approved 9/19/67; thence,

(20) S 79°11'50"E, 569.59 feet, to Corner 5 of U.S. Survey 3467; thence,

(21) S 23°54'W, 2500.01 feet, to Corner 4 of U.S. Survey 3467, identical with Corner 4 of U.S. Survey 3468; thence,

(22) S 85°27'W, 746.33 feet, to Corner 3 of U.S. Survey 3468, identical with Corner 3 of U.S. Survey 2538-A; thence,

(23) S 55°21'W, 1893.54 feet, to Corner 4 of U.S. Survey 3945; thence,

(24) N 34°39'W, 2811.6 feet to Corner 3 of U.S. Survey 3945, the true point of beginning.

In accordance with Article X, Section 12, of the Alaska Constitution, this recommendation shall become effective forty-five days after presentation to the legislature or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

LOCAL BOUNDARY COMMISSION

JUNEAU, ALASKA

RECOMMENDATION FOR CORRECTING AN ERROR IN THE PRESENT CORPORATE BOUNDARY DESCRIPTION OF THE KENAI PENINSULA BOROUGH

SUBMITTED TO THE ELEVENTH LEGISLATURE,

FIRST SESSION ASSEMBLED

SUBMITTED JANUARY 23, 1979

RECOMMENDATION FOR CLARIFICATION OF SOUTHEASTERLY BOUNDARY

of the

KENAI PENINSULA BOROUGH

WHEREAS, the Local Boundary Commission has requested that the boundary description of the Kenai Peninsula Borough, dated April 30, 1974, be corrected and clarified in the southeasterly part of the boundary description, in the general area of Sargent Ice Field and the Chugach National Forest Boundary; and

WHEREAS, subsequent to giving proper notice, the Local Boundary Commission conducted a public hearing in Soldotna on Friday, January 12, 1979, to consider whether the boundary in question should be clarified and corrected; and

WHEREAS, after giving proper notice, the Local Boundary Commission held a public meeting in Yakutat on Thursday, January 18, 1979, reviewed the original boundaries, the proposed clarification, and all testimony prior to and during the January 12, 1979, public hearing; and

WHEREAS, the Kenai Peninsula Borough is in accord with the proposed clarification;

NOW, THEREFORE, the Local Boundary Commission recommends that, pursuant to Article X, Section 12, of the Alaska Constitution, and Alaska Statutes 44.19.260, the recommendation to clarify and correct the southeasterly boundary of the Kenai Peninsula Borough be approved and the following described boundary be adopted:

Beginning at Cape Douglas on the west side of Cook Inlet at the N.E. Corner of Sec. 27, T15S, R24W (projected), Seward Meridian, State of Alaska; thence West to the N.E. Corner of Sec. 29, T15S, R26W (projected); thence South to the S.E. Corner of Sec. 32, T16S, R26W (projected); thence West to the N.E. Corner of T17S, R28W (projected); thence South to the S.E. Corner of T17S, R28W (projected); thence West to the S.W. Corner of T17S, R32W (projected); thence North to the N.W. Corner of T17S, R32W (projected); thence West to the S.W. Corner of T16S, R32W (projected); thence North to the N.W. Corner of T13S, R32W (projected); thence West to the S.W. Corner of T12S, R32W (projected); thence North to the N.W. Corner of T11S, R32W (projected); thence East to the S.W. Corner of T10S, R30W (projected); thence North to the N.W. Corner of T9S, R30W (projected); thence East to the S.E. Corner of T8S, R29W (projected); thence North to the N.E. Corner of T8S, R29W (projected); thence East to the N.E. Corner of T8S, R28W (projected); thence North to the N.W. Corner of T6S, R27W (projected); thence East to the S.W. Corner of T5S, R26W (projected); thence North to the N.W. Corner of T5S, R26W (projected); thence East to the S.W. Corner of T4S, R25W (projected); thence North to the N.W. Corner of T1S, R25W (projected); thence East to the S.W. Corner of T1N, R24W (projected); thence North to the N.W. Corner of T4N, R24W (projected); thence East to the S.W. Corner of T5N, R23W (projected); thence North to the N.W. Corner of T8N, R23W (projected); thence West to the S.E. Corner of T9N, R24W (projected); thence North to the N.E. Corner of T12N, R24W (projected); thence West to the S.E. Corner of T13N, R24W (projected); thence North to the N.E. Corner of T15N, R24W (projected); thence East to the N.E. Corner of T15N, R12W (projected); thence South to the N.W. Corner of T13N, R11W (projected); thence East to the N.E. Corner of T13N, R10W (projected); thence South to the S.E. Corner of T13N, R10W (projected), said Corner being in Cook Inlet at Longitude 150°58'18"W, Latitude 61°10'00"N; thence Southeasterly to the S.E. Corner

of T12N, R9W (projected), said Corner being in Cook Inlet at Longitude 150°46'37"W, Latitude 61°04'49"N; thence Northeasterly to the N.E. Corner of T12N, R7W (projected), said Corner being in Cook Inlet at Longitude 150°26'01"W, Latitude 61°10'01"N; thence Southeasterly to the N. E. Corner of T11N, R6W (projected), said Corner being in Turnagain Arm at Longitude 150°14'40"W, Latitude 61°04'49"N; thence East to the N.E. Corner of T11N, R5W (projected), said Corner being in Turnagain Arm at Longitude 150°04'01"W, Latitude 61°04'49"N; thence Southeasterly to the N.E. Corner of Sec. 24, T10N, R2W (projected), said Corner being in Turnagain Arm at Longitude 149°32'05"W, Latitude 60°57'01"N; thence Southeasterly to the N.E. Corner of T9N, R1W (projected), said Corner being in Turnagain Arm at Longitude 149°21'26"W, Latitude 60°54'25"N; thence East to the N.E. Corner of T9N, R1E (projected), said Corner being in Turnagain Arm at Longitude 149°10'48" West, Latitude 60°54'25" North; thence Southeasterly to the N.E. Corner of Sec. 15, T9N, R2E (projected), said Corner being in Turnagain Arm at Longitude 149°03'41"W, Latitude 60°52'41"N; thence Southerly to the N.E. Corner of Sec. 26, T9N, R2E (projected), said Corner being in Turnagain Arm at Longitude 149°01'55"W, Latitude 60°50'57"N; thence South to the S.E. Corner of Section 35, T9N, R2E (projected); thence West to the N.E. Corner of Section 2, T8N, R2E (projected); thence South to the N.E. Corner of Sec. 2, T7N, R2E (projected); thence East to the N.E. Corner of T7N, R4E (projected); thence South to the S.E. Corner of T5N, R4E (projected); thence West to the N.E. Corner of T4N, R4E (projected); thence South to the N.E. Corner of Sec. 25, T4N, R4E (projected); thence East to the S.E. Corner of the S.W. 1/4 of Sec. 22, T4N, R5E (projected); thence Southerly to the S.E. Corner of the S.W. 1/4 of Sec. 34, T1N, R5E (projected); thence West to the N.E. Corner of the N.W. 1/4 of Sec. 3, T1S, R5E (projected); thence Southerly to the S.E. Corner of the N.W. 1/4 of Sec. 27, T1S, R5E (projected); thence West to the S.W. Corner of the

N.W. 1/4 of Sec. 27, T1S, R5E (projected); thence South to the N.E. Corner of Sec. 9, T3S, R5E (projected); thence Southwesterly to the S.E. Corner of Sec. 7, T3S, R5E (projected), said Corner being at or approximately at Cape Junken; thence Southwesterly to the S.E. Corner of the N.E. 1/4 of Sec. 4, T4S, R1E (projected), said Corner being at or approximately at Barwell Island; thence Southwesterly to the N.E. Corner of the S.E. 1/4 of Sec. 17, T5S, R1W (projected), said Corner being at or approximately at Pilot Rock; thence Southwesterly to the S.W. Corner of the S.E. 1/4 of Sec. 33, T7S, R2W (projected), said Corner being at or approximately at Seal Rock; thence Southwesterly to the N.W. Corner of Sec. 14, T10S, R7W (projected), said Corner being at or approximately at Pye Reef; thence Southwesterly to the S.E. Corner of the N.E. 1/4 of Sec. 28, T11S, R10W (projected), said Corner being at or approximately at Gore Point; thence Southwesterly to the S.E. Corner of the N.E. 1/4 of Sec. 27, T12S, R13W (projected), said Corner being on or approximately on the Southerly point of East Chugach Island; thence Southwesterly to the S.E. Corner of Sec. 31, T12S, R14W (projected), said Corner being at or approximately at Perl Rock; thence Southwesterly to Longitude 153°00'00"W, Latitude 59°02'00"N, in Cook Inlet; thence Southwesterly to the place of beginning at Cape Douglas, containing 25,600 sq. mi. more or less.

Together with all State waters lying within and appurtenant to the above described boundary; EXCEPT, all waters lying more than three miles Southerly of the boundary line between Perl Rock at or approximately at the S.E. Corner of Sec. 31, T12S, R14W (projected) and Longitude 153°00'00"W, Latitude 59°02'00"N. in Cook Inlet, and the N.E. Corner of Sec. 27, T15S, R25W (projected), at Cape Douglas, Southwesterly offshore jurisdiction terminates at a line beginning at the N.E. Corner of Sec. 27, T15S, R24W (projected), at Cape Douglas; and extending S62°30'00"E three miles.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER POUCH B – JUNEAU 99811

February 8, 1979

The Honorable Arliss Sturgulewski, Chair
Senate Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

The error in the description of the southeasterly boundary of the Kenai Peninsula Borough was brought to our attention by the United States Department of Agriculture, Forest Service. This boundary is located in a very remote area and, thus, the erroneous description was not discovered for these many years. The enclosed report from the United States Department of Agriculture, Forest Service provides a detailed account of the situation.

A public hearing was held in Soldotna on January 12, 1979 by the Local Boundary Commission (LBC) to consider this question. The LBC held a decisional meeting on January 18, and recommended to clarify and correct the southeasterly boundary of the Kenai Peninsula Borough.

The Kenai Peninsula Borough supports the amendments correcting this boundary description and since the area affected is not presently inhabited, we concur with the Borough's position and feel that speedy resolution of this situation is in the best interest of the State and the Kenai Peninsula Borough.

Sincerely,

Lee McAnerney
Commissioner

KENAI PENINSULA BOROUGH BOUNDARY December 1, 1978

In the process of compiling changes to be made in Topographic Quadrangle Seward B-5, it was noted that the description of the Kenai Peninsula Borough, dated April 30, 1974, southeasterly part, had an anomaly in the use of the Chugach National Forest Boundary to amplify portions of the description.

In two cases in this portion of the description, a corner is established using a land survey corner, and then is amplified by stating a latitude and longitude. In both cases, the latitude and longitude is incorrect, as determined from Bureau of Land Management Protraction Diagrams S15-2 and S14-11. The corners are as follows:

S.E. Corner of the S.W. 1/4 of Sec. 22, T4N, R5E.
Borough Boundary Description:
LAT: 60° 25' 00" N
LONG:148° 33' 00" W
(This latitude and longitude is stated as being on the Chugach National Forest Boundary, which it is.)
Correct description from BLM Protraction Diagram S14-11
LAT: 60° 24' 56.923" N
LONG: 148° 33' 42.146" W

S.E. Corner of the N.W. ¼ of Sec. 27, T1S, R5E.
Borough Boundary Description:
LAT: 60° 02' 00" N
LONG: 148° 33' 00" W
(This latitude and longitude, as stated in the description, is on the approximate Chugach National Forest Boundary)
Correct description from BLM Protraction Diagram S15-2
LAT: 60° 03' 42.949" N
LONG: 148° 34' 11.811" W

Further study showed that the portion of the borough boundary line between these points did not take into account the east-west correction of the section lines as they cross the Seward Base Line.

It was further noted that the term "(projected)" was used following each use of a Section type corner; e.g. "N.E. Corner of Sec. 26, T9N, R2E (projected)." The term probably intended is "protracted", meaning a land survey corner established on paper but not in the field.

It was also noted that in some cases, the term "South" was used to describe the direction along a section line. In other cases, the term "southerly" is used. The term "southerly" is more correct, since except at the township boundaries, the section lines are not true North-South lines.

The intent of the boundary line appears clear, and this intent is shown on the Seward A-5 Quadrangle, where the borough boundary can be seen not to follow the Forest Boundary, and it shows a correction at the Seward Base Line. (Copy of Seward A-5 attached.)

The existing description of the area in question is:

".....N. E. Corner of Sec. 25, T4N, R4E (projected); thence East to the S. E. Corner of the S. W. 1/4 of Sec. 22, T4N, R5E (projected), said corner being on the Chugach National Forest Boundary at Longitude 148°33'00"W, Latitude 60°25'00"N; thence southerly along the boundary line of said Chugach National Forest to the S. E. Corner of the N. W. 1/4 of Sec. 27, T1S, R5E (projected), said corner being on Longitude 148°33'00"W, Latitude 60°02'00"N; thence West....."

Suggested changes in the description are as follows: (additions are underlined; deletions are crossed out.)

".....N. E. Corner of Sec. 25, T4N, R4E ~~(projected)~~ (protracted); thence East to the S. E. Corner of the S. W.1/4 of Sec. 22, T4N, R5E ~~(projected)~~ (protracted); ~~said corner being on the Chugach National Forest Boundary at Longitude 148°33'00"W, Latitude 60°25'00"N;~~ thence southerly ~~along the boundary line of said Chugach National Forest~~ to the S.E. Corner of the S.W. 1/4 of Sec. 34, T1N, R5E (protracted); thence West to the N.E. corner of the N.W. 1/4 of Sec. 3, T1S, R5E (protracted); thence southerly to the S.E. Corner of the N. W. 1/4 of Sec 27, T1S, R5E ~~(projected)~~ (protracted); ~~said corner being on Longitude 148°33'00"W, Latitude 60°02'00"N;~~ thence West....."

The description of the area in question would then read:

".....N.E. Corner of Sec. 25, T4N, R4E (protracted); thence East to the S.E. Corner of the S.W. 1/4 of Sec. 22, T4N, R5E (protracted); thence southerly to the S.E. Corner of the S.W. 1/4 of Sec. 34, T1N, R5E (protracted); thence West to the N.E. Corner of the N.W. 1/4 of Sec. 3, T1S, R5E (protracted); thence southerly to the S.E. Corner of the N.W. 1/4 of Sec. 27, T1S, R5E (protracted); thence West....."

RE: Kenai Local Boundary Recommendation

The Senate Community and Regional Affairs Committee held a meeting 1:30 p.m., February 8, 1979, to discuss the Kenai Boundary Recommendation as presented to the Legislature by the Local Boundary Commission. All members present decided to take "no action," thereby letting this recommendation go into effect.

This notification hereby closes our Committee file.

TESTIMONY OF BETTY WALLIN,
MAYOR OF THE KODIAK ISLAND BOROUGH
BEFORE THE HOUSE AND SENATE COMMITTEES ON
COMMUNITY AND REGIONAL AFFAIRS
REGARDING THE PROPOSED ANNEXATION
BY THE CITY OF KODIAK OF
THE MILL BAY ROAD & MISSION ROAD AREAS

I am Betty Wallin, Mayor of the Kodiak Island Borough. I'd like to welcome you to Kodiak and take this opportunity to thank you for bringing your hearing here so that the people affected may speak to you directly.

The citizens living in the annexation area have very specific grievances against the City and reasons for believing that annexation would be contrary to their interests. As mayor for all the citizens of the Borough, inside and outside the City, my perspective on annexation is perhaps more broadly based. I firmly believe that annexation should not be allowed to proceed for two reason: first, it would constitute a travesty of our democratic processes; second, it would sound the death knell for unification.

It is possible that you will hear today from a few individuals claiming to support annexation. But virtually all who have contacted me -- and there have been many -- have expressed strong opposition to this proposal. They have argued over and over again against the unfairness of having this decision made without the benefit of a vote of the people concerned. (We complain about the federal government controlling our lands without understanding our needs and heeding our voice. How different will it be if the State, through its Local Boundary Commission, decides the fate of the residents of the annexation territory without appreciation for their needs and knowledge of how they might vote?)

I have had no answer for the citizens who approached me with their concern. I have found myself in complete accord with their views. Were this a case where residents were clearly in support of annexation, or apathetic in their attitude, the Local Boundary Commission's omnipotent role would be more palatable. But, obviously, this is not such a case. We ask the help of you, our elected representatives in bringing democracy to the annexation process.

I have, as indicated, a second problem with this annexation. It derives from an aspiration I hold for Kodiak, a hope for its future which would avoid problems such as this in the days and years to come. This hope is for unification.

We held an election on unification last October, in the midst of all this controversy. The proposition was defeated. But the tallies on either side were not terribly far apart. Given a little more time to explain to the people what unification could do for Kodiak Island, I am convinced the outcome would be different. I am equally convinced that unification is the only sensible, constructive way to go for this City and this Borough. And I am just as firmly convinced that it will not come to pass if this annexation takes place.

For the sake of democracy, for the sake of all those people whose interests would be adversely affected, and for the hope for the future -- unification -- I ask that Committee members recommend passage of Senator Mulcahy's and Representative Zharoff's respective resolutions.

Thank you for your consideration.

TESTIMONY OF NORMAN D. WOOTEN

BOX 3016
KODIAK, ALASKA
99615
486-4415

Februrary 10, 1979

My greatest concern over this entire matter is the fact that we as residents had no say in a decision that has so much effect on us. If an election were to be held in the area and the people were for the annexation then I would abide with that decision.

I own and reside on a one acre lot in the Dark Lake area. This lot is covered with spruce trees and berry bushes. I and my neighbors plow and maintain our own road. I haul and dispose of my own trash. Certainly this is extra work and less convenient for me than if I were in the city and entitled to all these services as a citizen. I purposely chose this lifestyle though. I desire to live in an uncongested area such as I do for several reasons. My two small daughters have the run of a fairly large area without me having the worries of a typical "town" parent of traffic-pedestrian hazards. My dog is free to roam over this same area without the city animal restrictions. I'm able to enjoy a clear view of the lake.

What does all this have to do with annexation? Even though according to city publicity I am to be in the zone paying 35% of assessed tax rate I am uncomfortable with this promise. If and when the time arrives that I am to pay full taxation I am not at all certain I will be able to afford the tax on a one acre lot. If my property were valued at $50,000.00, my present tax at 7.0 mills would be $350.00 per year. Under the city assessment of 16.1 mills it would jump to $855.00 per year plus the assessments for any proposed improvements in services. This being the case I would have to subdivide to be able to retain a place to live that I could afford. This is an unacceptable risk to me.

PRESENTATION FOR

JOINT COMMITTEES OF COMMUNITY & REGIONAL AFFAIRS

KODIAK, ALASKA FEBRUARY 10, 1979

BY WILLIAM H. BULEN, PRESIDENT KODIAK SANITATION, INC.

HONORABLE SENATORS AND ASSEMBLYMEN
LADIES AND GENTLEMEN

My name is William Bulen. My son Richard Bulen and I own and operate Kodiak Sanitation, Inc.. We have a lot of interest in the matter before you and obviously most of it is financial. Therefore, asking us how we feel about the matter is like getting a wolf to watch the sheep.

However, there is one aspect to the present situation which we think is grossly unfair and I will confine my remarks to this problem.

We have many complaints from our commercial customers regarding the unauthorized use of dumpsters. Only this week I received a call from someone at Kodiak Community College asking what they could do to stop people from using their dumpster. I had to advise them that for all practical purposes their only recourse was to talk to the people involved. As you can understand, this would serve no purpose beyond causing the offenders to find another dumpster.

In the area you are considering today we serve 89 homes and all trailer parks. We estimate that there are 315 additional residential units in the area, which are the ones without refuse service. Some of these people take their trash to the dump but a large percentage of them take it to town and place it in a convenient dumpster. The other day I heard someone remark that they had seen someone transfering trash to the dumpster at the new Post Office while people in two other cars waited to do likewise.

I do not mean to infer that all borough residents are garbage freeloaders but I will have to admit that even some of my friends are numbered among them. For some strange reason, otherwise honest people will not hesitate to steal service.

The only practical solution to this and other garbage related problems is mandatory garbage service, which would be achieved by annexation. In this we do have a financial interest so I will say no more.

Thank you

Joint Committee Hearing
Senate & House Community & Regional Affairs Committees
Kodiak, Alaska

Members of the Legislature, Ladies and Gentlemen:

I am appearing before you today both as a spokesman for the Borough Residents for Autonomy and as a resident, property owner and business person in the Spruce Cape area. So I would like to speak both in general terms and also as to how annexation might affect me as an individual residing in the area proposed for annexation.

First of all, it seems to us as a group that the only instance in which the Boundary Commission should exercise its statutory right to force an annexation without an assenting vote by the people affected by their decision should be in a circumstance where it can be clearly and irrefutably documented that there is an overriding public need. This is not the case in Kodiak. Testimony at the public hearings has been conflicting and documented facts are nearly non-existent. No detailed study has been performed by any independent agency as to the true costs to the residents of the area proposed for annexation, nor to the residents of the existing City of Kodiak. No time schedule for the provision of services had been furnished the Boundary Commission at the time of its decision. At no time has there been a real dialogue between the City administration and representatives of the area proposed for annexation (who have not been hand-picked by the City) as to what services they desire, if any.

The decision of the Boundary Commission appears to have been based on several assumptions:

1. That there is a need for water and sewer services in the area proposed for annexation.

2. That the residents of the area proposed for annexation are enjoying City services without paying their share of the costs.

3. That annexing this large area into the City would reduce conflicts between City and Borough governments and provide for greater efficiency.

4. That since many of us do our shopping and find employment in the City of Kodiak, that it is only logical that we should be governed by its administration.

It is certainly true that certain areas are in dire need of water and sewer. However, by far the greater portion is very large lots, sparsely settled. Individual water and sewer systems have been installed and are functional. Also, the City has indicated that it is beyond its physical and economic capability to provide sewer to these sparsely populated tracts. The residents have voted for

for a service district so that the services can be furnished only where they are wanted and needed, and where the residents have indicated a willingness to pay for them. When the City accepted Federal funding for the sewerage treatment plant, it also committed itself to extending sewer service to this entire area regardless of the political boundaries. The costs, of course, are borne by the users and not by the general taxpayer.

Insofar as our not paying our own way, let me cite my specific example. My residence and office on Spruce Cape Road are served by City water. We pay a premium due to our location outside the City. We have our own EPA approved septic system. We are on a State road, which is very well maintained by the Highway Department, and for which the State would continue to pay if we were annexed. The State Troopers responded promptly on the one occassion in twenty-two years when they were called. Our fire protection is through the auspices of a service district. When enough of us feel that we want a higher digree of fire protection, we alone will bear the costs of a sub-station. We enjoy being out of the heavily populated area with our children and our pets. So far, my clients have been willing to drive the extra distance for the accounting services I provide them.

As I see it, I will be paying an additional 6.8 mills, or $1,300 in my particular case, for the privilege of using the City Library, which I do not use at the present time. There will be no reduction in the taxes I pay to the State when the Troopers are replaced by City Police and the costs of road maintenance will continue to be borne by the State. If and when the municipal sewer crosses my land, I will also pay my full share for this (as I would if I remained outside the City). I am an avid reader, but I can buy many books to increase my own library for $1,300.

In addressing the point of efficiency of government, although the existing City-Borough conflict is at times distressing, it is an effective system of checks and balances. I don't need to remind any member of this committee that the most efficient form of government is a dictatorship. One of the beauties of our democratic form of government is that if the people living under that government really don't like it, then we ourselves have the option to change it by opting for unification or simply by "throwing the rascals out".

The Legislature has just appropriated ~~1-1/2~~ 3 million dollars toward a joint effort with Governor Hammond to convince the great white fathers in Washington, D.C. that even in their infinite wisdom they might not always know just what is right for the people of Alaska. Yet the Boundary Commission has decided that they are the persons best qualified to know what is best for us in Kodiak, despite overwhelming testimony from the people involved that they were opposed to the action being considered. I ask you to consider the implications.

Finally the argument has been advanced that we should be annexed since the City of Kodiak furnishes the shopping facilities for most of us. I do in fact, do most of my buying there, putting approximately $2,000 of sales tax into the City's general fund between business and personal purchases. But please bear in mind that most of the merchandise sold in the City of Kodiak originates in the Port of Seattle. While I have seen some editorializing that Kodiak Island might consider seceeding from the State of Alaska, I haven't heard any serious discussion of the entire island being annexed to Seattle!

Thank you very much for coming so far to hear us out.

Jo Hajdu

T. T. JACKSON
P. O. BOX 1215
KODIAK, ALASKA 99615

HONORABLE SENATORS AND REPRESENTATIVES:

THANK YOU FOR COMING.

I am T. T. Jackson, a continuous resident of Kodiak for thirty-seven years. I have a wife, Alma, and a son, Dell. We have a 100 unit Mobile Home Park outside the City of Kodiak. We are two miles from down town.

I am against annexation at this time. I am also against forming any service district.

I am for the City of Kodiak putting their house in order; that is, to pave all their streets that they now have; then annex Island Lake area and when that is brought up to the City standards; then advance with more annexation.

We, on Spruce Cape are not a burden to either the City or the Borough. Since the Borough was organized, not one cent of Borough money has been spent in the Spruce Cape area. The City of Kodiak has been very helpful with water and fire protection; however, we more than pay for these services. After the 1964 disaster, the Bureau of Docks & Yards built an 8 inch water main with fire hydrants for the Spruce Cape area, from the City Boundary on Mission Road for over two miles to the Loran Station on Spruce Cape Road; and the City took charge of these services and paid the Bureau of Docks & Yards $42,000.00. In turn we pay the City over 2 mills for fire protection and we pay 27 per cent more than the City of Kodiak residents do per unit for water.

I estimate that there are about 300 families on Spruce Cape - there are 8 Mobile Home parks and many other Mobile Homes out of parks and more parks being planned. At this time I will inform you that the City has an ordinance that prohibits Mobile Homes and even if the City desired it - it may be impossible to change this ordinance as they have been bonded under this ordinance.

Mobile Home Parks are self sufficient. That is they pay the same mill rate and water rate as other residences and businesses, but they receive no government aid. We build and maintain our streets, sewer and water systems and fire hydrants. No way can we become a burden to anyone. Spruce Cape pays annually approximately $90,000.00 to the City of Kodiak in Sales tax. I am sure none of this is returned to Spruce Cape. We are independent people who ask little and give much.

The State Legislators are noted for not listening to the people. One Example - ten years ago, the voters of Alaska asked, with a majority vote, for a Constitutional Convention. The Constituion of Alaska states that we are entitled to that convention, but ten years have passed and not even a mention of the Constitutional Convention. Here in Kodiak we have voted for NO ANNEXATION and NO SERVICE DISTRICT; now we are being told that the Constitution states that we must have one or the other. If the Legislators can ignore one part of the Constitution, then why not the other, or give us that Convention and let us make the necessary changes.

What our election here in Kodiak is telling you is that WE WANT LESS GOVERNMENT.

Are there any questions?

Yours TT Jackson

Carol Lechner
Public Testimony

I keep hearing that the democratic process has not been properly executed because the area in question for annexation did not get to vote on whether they wanted or did not want annexation. What about the person who wants annexation because his neighbor's sewer is running in his front yard and the same neighbor does not want annexation because he lives at the top of the hill? Or, the people that want annexation because Island Lake can no longer be used as a true recreational site because of polution? what are these victims' rights?

The vote on service districts narrowly passed, the vote on non-area wide powers failed, this means several thing to me--either the people already have the services provided by the City, or they want to continue existing with the problems they have, or they do not want the Borough to provide the services, or they feel it will cost them too much additional money. The problems will not go away and it will cost the people no matter who provides these services.

Who is better able to provide these services? The City presently has full services, sure they have some problems but nobody is perfect. I would venture to say every city in the U.S. has their problems. The City has vested many dollars in equipment and manpower, in my opinion, to have good, well trained personnel in these departments. People that know and understand the day to day routine of working and running these departments. In my opinion, it is beyond belief that a municipality who has never been in the business of public works, streets, fire or police could have the same knowledge--in 5 years time--to efficiently and effectively operate these services more economically then an established municipality with 39 years experience.

Services are costly enough without setting up two duplicate, full-service municipalities next door to one another. The area in question does not have the population or the bonding capacity based on their assessed valuation to warrent a separate full-service municipality. I feel the legislature would be doing a disservice to the whole area to create a situation such as that.

As an example, according to a breakdown by the City Finance Department, the City resident pays out of real property tax, .96 mills for fire services; whereas, the fire service district pays 2.23 mills for this service.

I believe further information on financing has been furnished to you in your information packet.

The City has, I feel, shown good faith in attempting to pre plan should annexation take place and has also addressed the concerns of the residents of the area. More information on this has also been provided to you.

It is questionable, according to State law, whether a new service district can legally be established if the new service can be provided by annexation to a City.

Thank you.

Box 1661
Kodiak Alaska 99615
10 Feb 1979

Dear Sirs:

Due to a prior commitment, my husband and I are unable to attend this meeting but want to go on record as being against this proposed annexation. We own Lots 13 + 15, Survey 3103 on the back side of Island Lake.

The city seems to conveniently forget why we have a water line in this area and more than once have been reminded at public meetings. I testified at the Boundary Commission meeting last fall that during the time Pete Deveau was mayor, the city did some work at the reservoir that put blue clay into the lake system. This blue clay was plugging filters on washers, and furnaces and was only a matter of time until these appliances would be ruined beyond repair. In order to avoid a law suit, a water line was run out here by the city. We were informed we would be charged a higher rate, the excess to be used for the maintenance and repair of the line.

When Jack Isadore was city manager, he called a meeting of the Island Lake and Shakafka Acres residents and tried to stampede us into asking for annexation. This meeting was held at East

Elementary school. He pointed out the inadequacies of the water line, the need for sewers etc. The final topper however was the statement that the city could not offer anything in the way of utilities at that time - I can't remember his exact words, but that was the gist of it.

We don't feel that the city can offer us ~~anything~~ any more at this time than they could then and therefore are against this proposed action

Thank you very much

Ellen Ross (Ellen Ross)

William Ross (William W. Ross)

TESTIMONY OF OKEY CHANDLER
BEFORE THE HOUSE AND SENATE
COMMITTEES ON COMMUNITY AND
REGIONAL AFFAIRS REGARDING
THE PROPOSED ANNEXATION BY
CITY OF KODIAK OF THE MILL BAY
ROAD AND MISSION ROAD AREAS

I, Okey Chandler, have been a citizen of Kodiak for 33 years. I have a tremendous personal investment in the democracy of this country, with over five years in the military, and a personal expenditure between $4,000 and $5,000 in public information efforts to keep it alive in Kodiak.

The root of our problem is that the City Council under its Home Rule Charter, has absolute powers. They can and do override referendums. At the focus of today's meeting I say to you emphatically, I resent the forced annexation effort.

The Mission Road and Spruce Cape Road area contains about 350 acres and is the resident place of 2/3 of the people who would be impacted negatively by the annexation effort. Between 75% and 80% of the people live in trailers. In the Island Lake area containing approximately 150 acres, the majority of the people live on the front side of Island Lake and in the vicinity of Naughton's Trailer Court on Mill Bay. The remaining area under consideration within the proposed annex area has very few people and some very large parcels of land with no people at all.

My personal experiences with the City have been very poor. When I lived in the Leite Addition at 1520 Mission Road, the City was engaged in building the sewer line. During the process of installation they broke the old sewer line and I of course asked

the City to hook me up. More than a year later, they completed the installation and during that time I was without sewer. When the installation was made, it didn't work. They told me the trunk line wasn't deep enough and it was necessary to install a line above ground. I asked the City to cover the line to keep it from freezing. The City Manager said "You can cover it yourself as it's on your land". The facility is still there today - above ground.

The history of real estate in the area is of considerable interest. More than thirty lots in the area have been repossessed for default of payments. These lots originally sold for prices ranging from a few hundred dollars to $2,000 or $3,000. Most of the lots beyond Mill Bay to the north are bought on the long-term installment plan. The people who live in this area are happy with what they have and most cannot afford, nor do they need, anything the City has to offer.

From the City's perspective, they continue to claim they are broke and as a result, they are incapable of taking care of the people currently living within the City, let alone those many persons in the proposed annex area. If this annexation becomes a reality, it will shatter the hopes and dreams of a lot of people. Many will lose their land and their homes as a result of tax burdens imposed by services that they neither need, nor can afford to pay for.

In 1969, it was discovered that about one half of the business establishments in the downtown area were not paying any taxes on their land. When the Borough tax assessor sent them a tax bill for 1969, they refused to pay and demanded to be excused

from the tax payment. The Borough Assembly, which at that time was dominated by City-oriented weighted voting, accommodated their request. This should be ample evidence that big business and the Chamber of Commerce completely dominated the local governments at the expense of the working people, even to the point that they have to pay City sales tax on their rent.

Okey Chandler
2-10-79

Okey Chandler
P.O. Box 1635
Kodiak, Alaska 99615

P.S. It is an interesting fact that there are over 3,500 acres of land in the City of Kodiak. Included in this land are hundreds of prime building lots, which to date have nothing constructed on them. So why do we need annexation?

To: Senator Arliss Sturgulewski

From: Ian Fulp

Date: Feb. 10, 1979

Re: Proposed Annexation

I own and reside on lot 9 in the Shahafka Acres Subdivision (Island Lake Area). The area in which I live is in desperate need of sewer service. I feel that annexation by the City is the best and most reasonable solution to this problem. I further feel that the ~~the~~ area to be annexed is so similar to the area within City limits that we are all residents of the City and recipients of City services whether ~~that~~ the coporate boundaries exclude us or not.

Kodiak, Alaska
2/10/79

Madam Chairmans,

I am opposed to annexation of the Island Lake area. I do not wish to be a part of the city. I feel that the government that governs the least governs the best. The city represent more government.

I appreciate the committee coming to Kodiak to take testimony. It helps restore my belief in the democratic process.

In closing, the least we deserve is a vote to decide if we should become a part of the city.

Duane Freeman

PETITION TO THE LEGISLATURE OF THE STATE OF ALASKA

We, the people residing within the boundaries of the area about to be forcefully annexed to the city of Kodiak, hereby petition the legislature, being the only authority with the power to grant us relief from this unsought, unwanted, arbitrary removal of Alaskan residents right of choice to our own form of government, to reverse the decision of the local boundary commission:

Joint Committee on Community & Regional Affairs
meeting in Kodiak, Alaska on 2/10/79

Gentlemen:

I have home and property on lot 11, Survey 3104, which lies within the effected Island Lake annexation area.

I would like to state that the surprise move to annex that area by the Kodiak City Council took place without either my knowledge or consent.

I am strongly opposed to the annexation of the Island Lake area. I feel that my rights of notice and due process have been violated, and request that you move to take steps to prevent this annexation from taking place.

Respectfully,

Mark White

Mrs. Gaynell Hatcher
Kodiak City Council Member
Kodiak, Alaska 99615

Dear Gaynell:

I have resided in Kodiak for 16 years and have been a home owner for 5 years. Inasmuch as I feel that it would be beneficial to the taxpayers of this town, I would like to go on record as favoring annexiation.

Sincerely,

Marion Soule

Community and Regional Affairs Committee
Juneau, Alaska

Dear Mr. Chairman and Members of thw Committee:

My name is Pete Resoff, and I live on Cliffside Road, which is within the boundaries under consideration for annexation by the City of Kodiak. I do not choose to become involved in an emotional controversy on annexation, but I do support a development that will not be in conflict with the existing standards of the City of Kodiak. I do not support Service Districts as they tend to be too costly.

Sincerely,
Peter M. Resoff

TESTIMONY OF THE KODIAK ISLAND BOROUGH
BEFORE THE HOUSE AND SENATE COMMITTEES ON
COMMUNITY AND REGIONAL AFFAIRS
REGARDING THE PROPOSED ANNEXATION
BY THE CITY OF KODIAK OF
THE MILL BAY ROAD & MISSION ROAD AREAS

The residents of the Kodiak Island Borough, and particularly of the territory proposed for annexation, are gratified that the Chairmen and members of your Committees have brought these hearings to the people of Kodiak so that they may participate fully in the legislative process. We are hopeful that exposure to the views of the people most directly affected by this controversy will result in an appreciation by Committee members of the lack of need for, and the inequities inherent in, this annexation proposal.

A bit of history may be helpful here. The City of Kodiak was incorporated on September 11, 1940; it is a home rule city. The Kodiak Island Borough was formed on September 24, 1963, as a second class borough capable of providing a wide range of services. The Borough runs the school system in Kodiak, has area-wide planning and zoning powers, operates the hospital under its health powers, has parks and recreation powers, operates a fire district through contract with the City, and has established a service area -- with voter approval -- for the furnishing of sewer, water and road service to the region involved in this annexation proposal.

Kodiak (the City), meanwhile, operates the dock and harbor facilities; runs the City library, conducts a City parks and recreation program, and operates police, fire and public works departments. The area proposed for annexation has little in common with this essentially downtown focus.

The people who live in the territory are present today in substantial numbers to describe their lifestyle and their views. The basic fact, however, is that much of this area is hardly "urban" as we would know it. As opposed to average lot sizes within the City of approximately 7200 square feet, most of the people in the region proposed for annexation live on lots of at least one to one and a quarter acres -- some on tracts of 40 to 60 acres. These people chose to locate their homes in this part of the island because they wanted more land and less governmental regulation.

The annexation process was initiated by the City in the Fall of 1977, when it filed a petition with the Department of Community and Regional Affairs seeking inclusion within its boundaries of a handful of lots along Mill Bay Road. The Local Boundary Commission conducted a hearing on the petition in Kodiak on December 12, 1977. Close to 30 people testified, many of them residents of the area presently proposed for annexation but beyond the Mill Bay Road lots described in the petition. (It was surmised at that time that the City intended to pursue a broader annexation plan, and the residents involved were determined that their position on such a proposal be known from the outset.) The nature of the testimony offered in December of 1977 was unequivocal: the residents were unanimously opposed to annexation. Only one person testified in favor of the petition: the City manager.

The Local Boundary Commission took the initiative thereafter, deciding to return to Kodiak for a second hearing on May 20, 1978. This time the requested annexation encompassed virtually all the habitable, developed land along the Kodiak road system. Again, the testimony was overwhelmingly opposed to annexation. Out of at least 35 witnesses, only six individuals spoke in favor of annexation: the

City attorney, the City manager, the former City finance director, an individual who had previously testified against annexation (stating that he had signatures from 75 to 80 percent of his renters opposing annexation), and two other individuals. On August 16, 1978, the Local Boundary Commission met in Anchorage and voted to recommend annexation of the Mission Road and Mill Bay Road areas, but not of the other regions proposed by the City.

Committee members may be wondering about the Borough's interest in all this. The basis for concern is simple: the Borough has been innundated with requests from citizens in the territory to protect them against the annexation. The Borough staff and assembly and mayor have exercised their respective and collective judgments on the matter and have determined that the people are right on every point: this annexation flies in the face of every notion we hold dear about democratic process; there is absolutely no need for annexation from the residents' point of view; there is no justification for annexation from the City's economic perspective; and finally, the City has not shown itself to be of such caliber and ability that its jurisdiction should logically be expanded.

The undemocratic means by which we came to this crossroads speaks for itself. The Boundary Commission, because it deals in questions of annexation on a frequent basis, is presumed to have a certain expertise in these matters. It is not required, under Alaska's statutory scheme of things, to let the people vote on whether they want to be annexed. The Borough's position is simply that this approach -- whereby a governmental regime may

be forced upon a group of unwilling citizens -- has no place in our American -- or Alaskan -- way of life. In this particular instance, the people involved are opposed to annexation and for good reasons. Abstract notions of appropriate governmental order which the Local Boundary Commission may have developed over the years appear to be misguided as applied to the specific fact situation in Kodiak.

Let's look at the purported need for annexation from the City's viewpoint. The City has claimed that the people need garbage service, that the people need animal control, that the people need better police protection, that the people need sewer and water, that the people need roads. What do the people say? In a survey conducted in 1977 by the Anchorage Urban Observatory of the University of Alaska, Kodiak residents outside the City showed virtually no interest in animal control or in expanded police protection; (they are currently served by the State Troopers). Some concern was expressed about roads, but interestingly enough, less than was expressed by residents living inside the City.

As for sewer and water, many of the citizens in the annexation area have invested thousands of dollars in wells and septic tanks which adequately service their property. In some places, however, notably the Island Lake area, sewer and water problems do exist. Citizens of the region will most likely provide you with the series of events leading up to the present state of affairs. The gist of the story, however, is that the City installed a temporary, plastic water line on an emergency basis several years ago. The line has long since proved deficient, and efforts to have the City upgrade the line and provide more adequate service have been of no avail. The citizens, thus, approached the

Borough for assistance. Through the election process, the Borough has formed a service area capable of meeting the residents' needs. (Election held April 18, 1978.)

The City therefore, has nothing to offer these people that the service district mechanism cannot provide. The advantage to the people of the service district approach is that they can vote for, and establish, and pay for the level of service that they actually need and can afford. And they are not saddled with the expense of services that are not required, and the application to them of ordinances and regulations which make no sense to their lifestyle.

The argument that may have some surface appeal to members of the Community and Regional Affairs Committees is that based on the economic equities of the situation. The City has argued that the people outside its boundaries use the City streets and therefore, should pay for their maintenance; use the City library, and therefore, should pay for its books; use the cargo dock and boat harbor, and therefore, should pay for those services, and so on through each of the facilities and services the City offers.

Of course, these economic grounds are never justification, standing alone, for annexation. Otherwise, the Local Boundary Commission would have recommended that the Coast Guard station be annexed, as well as Monashka Bay. In addition, it is noteworthy that the Local Boundary Commission regulations themselves safeguard against undue emphasis being placed on this particular factor. The regulations require that the Local Boundary Commission "consider alternate methods available to the

City for offsetting the cost of providing services to individuals or property beyond its property taxation powers. (19 AAC 05.010 (a)(8

In fact, the City has had such "alternate methods" in effect for several years now. First, residents outside the city contribute to City funds through the Borough's furnishing of facilities such as the swimming pool and through direct payments, as in the case of the library. Second, the City appropriately collects user fees to cover its enterprise activities. To the extent that monies from the general fund may have been necessary in the past to carry such activities, the City should properly look to a reevaluation of its fee schedules. Third, and most critically, the City levies a three percent sales tax on all goods and services sold within its limits, including operations based within the City which make deliveries or otherwise provide services in the outlying areas. For the most part, you cannot buy a sack of groceries, an article of clothing, a notebook for your child's school work or a motor for your boat, without paying taxes on your purchase. Nor can you run into marital difficulty and call upon your lawyer; or - adding insult to injury - prepare your income tax returns with the help of your accountant; or - most costly of all - come home to frozen pipes and solicit the assistance of a plumber, without, once again, paying your friendly City tax collector three cents on every dollar spent. So while the residents outside of the City may not pay quite as much as City dwellers, they do pay a substantial amount. Considering that non-residents do not take advantage of City services to the same extent as those who live within its jurisdiction, it would seem that the contribution is more than adequate.

There is, additionally, an unusual twist to this sales tax business which suggests that non-City residents may actually be paying more than their fair share. For the monies derived from the sales tax are used in part to foot the bill incurred by owners of personal property within the City: their personal property tax owed to the Borough is paid out of sales tax receipts collected by the City. For the City resident with two cars and a boat, a substantial savings is achieved through this arrangement. For the resident of Spruce Cape who lives in a trailer and has a car located on his property, there is no such windfall. He must pay his Borough personal property tax out of his own pocket -- and pay for his City neighbors' as well. Given the fact that people in the annexation area do not want the full array of City services, their sale tax contributions would seem more than adequate to compensate the City for those benefits actually received.

The Borough's final concern, again, and always, reflecting the concerns of its citizens, lies with the City's historical approach to annexation and to the provision of services within its existing boundaries as well as in the territory proposed for annexation. At previous hearings, citizens have testified, as perhaps they will again today, that they have come to the City and requested hook ups to sewer or water lines running contiguous or close to their property. These individuals were willing to pay the appropriate hook up and service fees. The City has refused to provide such service unless the individuals involved agreed to the annexation of their property to the City.

The City is entitled to, and does charge a higher rate for those utility customers who receive service beyond its boundaries. There can be no economic justification, therefore, for its action in refusing to hook up non-City customers. The City has claimed that it does not have the authority to service customers beyond its limits. I refer Committee members to a letter f om the City Clerk, Libby Presnall, to the Local Boundary Commission, urging action on certain individual lot annexations on the grounds that "Several of the lots need water and sewer which the City has no authority to extend at this time." Yet AS 29.48.040 provides that "a municipality owning or operating utilities may extend service to adjacent areas outside its municipal limits." The City's own Charter authorizes the operation of public utilities "either within or beyond its corporate limits." (Art. VIII, Sec. 8-1.)

There is still another wrinkle on this utility question -- the only real service any of these people are seeking. That is the agreement entered into in 1970 between the City and Borough for the cooperative provision of sewer and water services to the entire Kodiak area. The City could not have obtained the funds to build the sewage treatment plant without the Borough's cooperation, and without assurances given to the State and the federal government that the services would be provided areawide. Yet the City has refused, time and again, to honor its agreement and provide these services.

The Legislature is not being asked to determine the legality of the City's past practices and refusal to act. But the

Legislature is asked to understand the people's point of view: the Borough, through the service district mechanism can now provide the needed utility services. There is nothing else these people want or need from the City. Given the fact that the City has long had the power and, allegedly, the capability of providing these citizens with water and sewer services on an economically sound basis, and given the City's rather extortionist refusal to extend these services, why should the people now be forced into the City's jurisdiction?

There is another question regarding the appropriateness of an extension of municipal boundaries in this case. That is the City's track record within its existing limits. You may receive individual testimony on this point. I know you have received letters relating the poor road and sewer conditions within the City's current boundaries.

What then, is the Legislature's role in this dispute? Under our Constitution, the House and Senate have full power to let this annexation take place by failing to pass Senator Mulcahy's and Representative Zharoff's joint resolutions. The people, however, have voted legislators into office based on a belief that you are individuals capable of understanding and representing the citizens' needs and wants. You as Committee members can exercise appropriate discretion and determine that this annexation is not in the people's best interest.

Neither the people inside the City nor those outside see themselves as having the same aspirations at this time. There is a decidedly more rural lifestyle in the vast majority of the area proposed for annexation. There is a typically Alaskan desire not to be hassled by government intrusion -- be it services

that are not desired, regulations that make no sense, or taxes that threaten the very nature of one's existence.

The State's legitimate interest in this case is not at variance with the local interest. Both are concerned with sound and fair government and an adequate provision of services for the people affected. On behalf of the citizens of the Kodiak Island Borough and all the State, I urge you to consider the realities of Kodiak today, as presented by the citizens who will testify before you. I request that the House and Senate Committees on Community and Regional Affairs, respectively, recommend passage of the Zharoff/Mulcahy resolutions. Thank you very much for your attention.

Gentlemen:

The City of Kodiak has had two annexations pending for some time, namely, Lot 1, Block 1, USS 1822 and several parcels of land that are owned by the City and known as the municipal airport property. The City is presently processing two additional lots under the hundred percent method for annexation. All of these lots are in the area recently recommended by the Boundary Commission to the Legislature for annexation; however, there are immediate problems that need to be resolved.

Several of the lots need water and sewer which the City has no authority to extend at this time. One lot in particular hooked up to the City sewer without permission because the Department of Environmental Conservation was going to close the trailer court. There are charges involved with the service which the City cannot require unless they are within the City. The City is presently planning to provide property for lease at the municipal airport for tie down spaces that are desperately needed but for regulation and control feel that this area should be in the city limits.

I understand that you will be holding a meeting on October 3, 1978 and request your consideration of the above at this meeting. The City will have the two new annexations to you in time for this hearing. Your assistance in this matter will be appreciated.

Sincerely,

CITY OF KODIAK

Libby Presnall, CMC
City Clerk

CERTIFIED EXCERPT
KODIAK ISLAND BOROUGH ASSEMBLY PROCEEDINGS
DECEMBER 1, 1977

City of Kodiak Annexation Initiative

The following is an excerpt from testimony rendered by Mr. Ivan Widom, City Manager, City of Kodiak, at the Kodiak Island Borough Assembly regular meeting of December 1, 1977:

> "On December the 13th, in this room, the Local Boundary Commission will hold a hearing on the annexation of the Mill Bay Road area between the City limits and Cutoff Road. At that time I will also ask the Boundary Commission to consider annexation of the Mill Bay - Monashka area under discussion this evening. I personally feel that by establishing the Mill Bay - Monashka service area you will preclude the need for the residents to annex to the City."

I, Shirley Miller, being first duly sworn on oath, depose and say: that I am Clerk of the Kodiak Island Borough and that at the regular meeting of the Kodiak Island Borough Assembly held on Thursday, the 1st day of December, 1977, Mr. Ivan Widom, City Manager, City of Kodiak, made the above presentation and I do hereby certify that this is a true and official copy of that proceeding as recorded on tape.

ATTEST:

Shirley Miller
Shirley Miller, Clerk-Treasurer

Subscribed to and sworn to before me this 12th day of December, 1977.

Margaret L. Davis
Notary Public for Alaska

My Commission Expires: Oct. 14, 1980

ARLISS STURGULEWSKI

PRESENTATION MADE BEFORE THE ANNEXATION COMMITTEE
December 12, 1978
by City Manager Clair Harmony

I. Should annexation become a reality this January, we at City Hall have tried to set up a preliminary plan:
   1. What will take place
   2. What the 2,000 residents of the new area might expect in the way of effective delivery of services and, of course, what their concerns are now.

We are here tonight to present our best *estimates* as to costs, taxes, location of services, and to offer some options.

We are not in an advocate role, but are simply trying to do some preplanning for an action which at this point in time has been initiated and recommended by the Local Boundary Commission and will be going before the State Legislature in January.

The existence of the Annexation Committee, and this public hearing before that body, are sincere efforts to encourage expressions of public concern and input. Hopefully the committee will formulate a policy statement that can be adopted by the Kodiak City Council, which will provide for the following:
1. Early and special representation.
2. Reasonable differential property taxing zones.
3. Efficient priorities on road improvements.
4. Quality Police and Fire services.
5. Good delivery of water and sewer services.
6. Ultimate expansion of Parks/Recreation and Library services.
7. Modifications that might be envisioned by the community at large, the public here tonight and the committee, through its deliberations.

1. As to early representation:
   a. Voting franchise rights would become effective immediately.
   b. In addition, a special representative would be elected from the new area, to serve in an advisory capacity with the City Council for three (3) years.

2. The differential taxation zones would attempt to provide some equity based on the delivery of services such as roads, police and fire. As long as the City cannot get a fire truck to a home because of poor access routes, there should be less of a tax burden on that homeowner, and so on.

   Basically the difference between Fire Zones 1, 2 and 3 are that Zone 1 would receive 100% delivery of City services, therefore the

full mill rate (9.10). Zone 2 would have no effective delivery of fire service and are those areas where the roads are not maintainable, thus 75% mill rate.

Zone 3 would pay a 50% mill rate and would have poor delivery of police, fire and road improvements. All zones would be changed over the next several years as these services are upgraded.

3. Improvements to roads would progress at a reasonable rate, funded by increased shares in State Revenue Sharing, highway funding and, hopefully, the commitment by the State Legislature to fund greater levels of capital improvements. This could accellerate quality delivery of services to the annexation area.

4. Police and fire services can be expanded from revenue sharing funds, together with the slow phasing out of the State Troopers.

5. Water and sewer services which are funded through assessment districts. State and Federal grants could proceed in higher density areas, and be in as early as 1980 in those areas.

6. Parks/Recreation and Library services would expand on a somewhat slower basis, I would guess, and generally would be funded by general assessments and grants.

II. Briefly, advantages of annexation would include:
1. Relief to the polluted conditions of Island Lake.
2. Better fire and rescue.
3. Quality delivery of water at a lower user rate.
4. Exemption of personal property taxes.
5. Reduction in fire insurance rates.
6. An equal voting status with your neighbors inside the present City boundaries.
7. Plus other factors which will insure for the general health and welfare of the whole area.

III. Conclusion

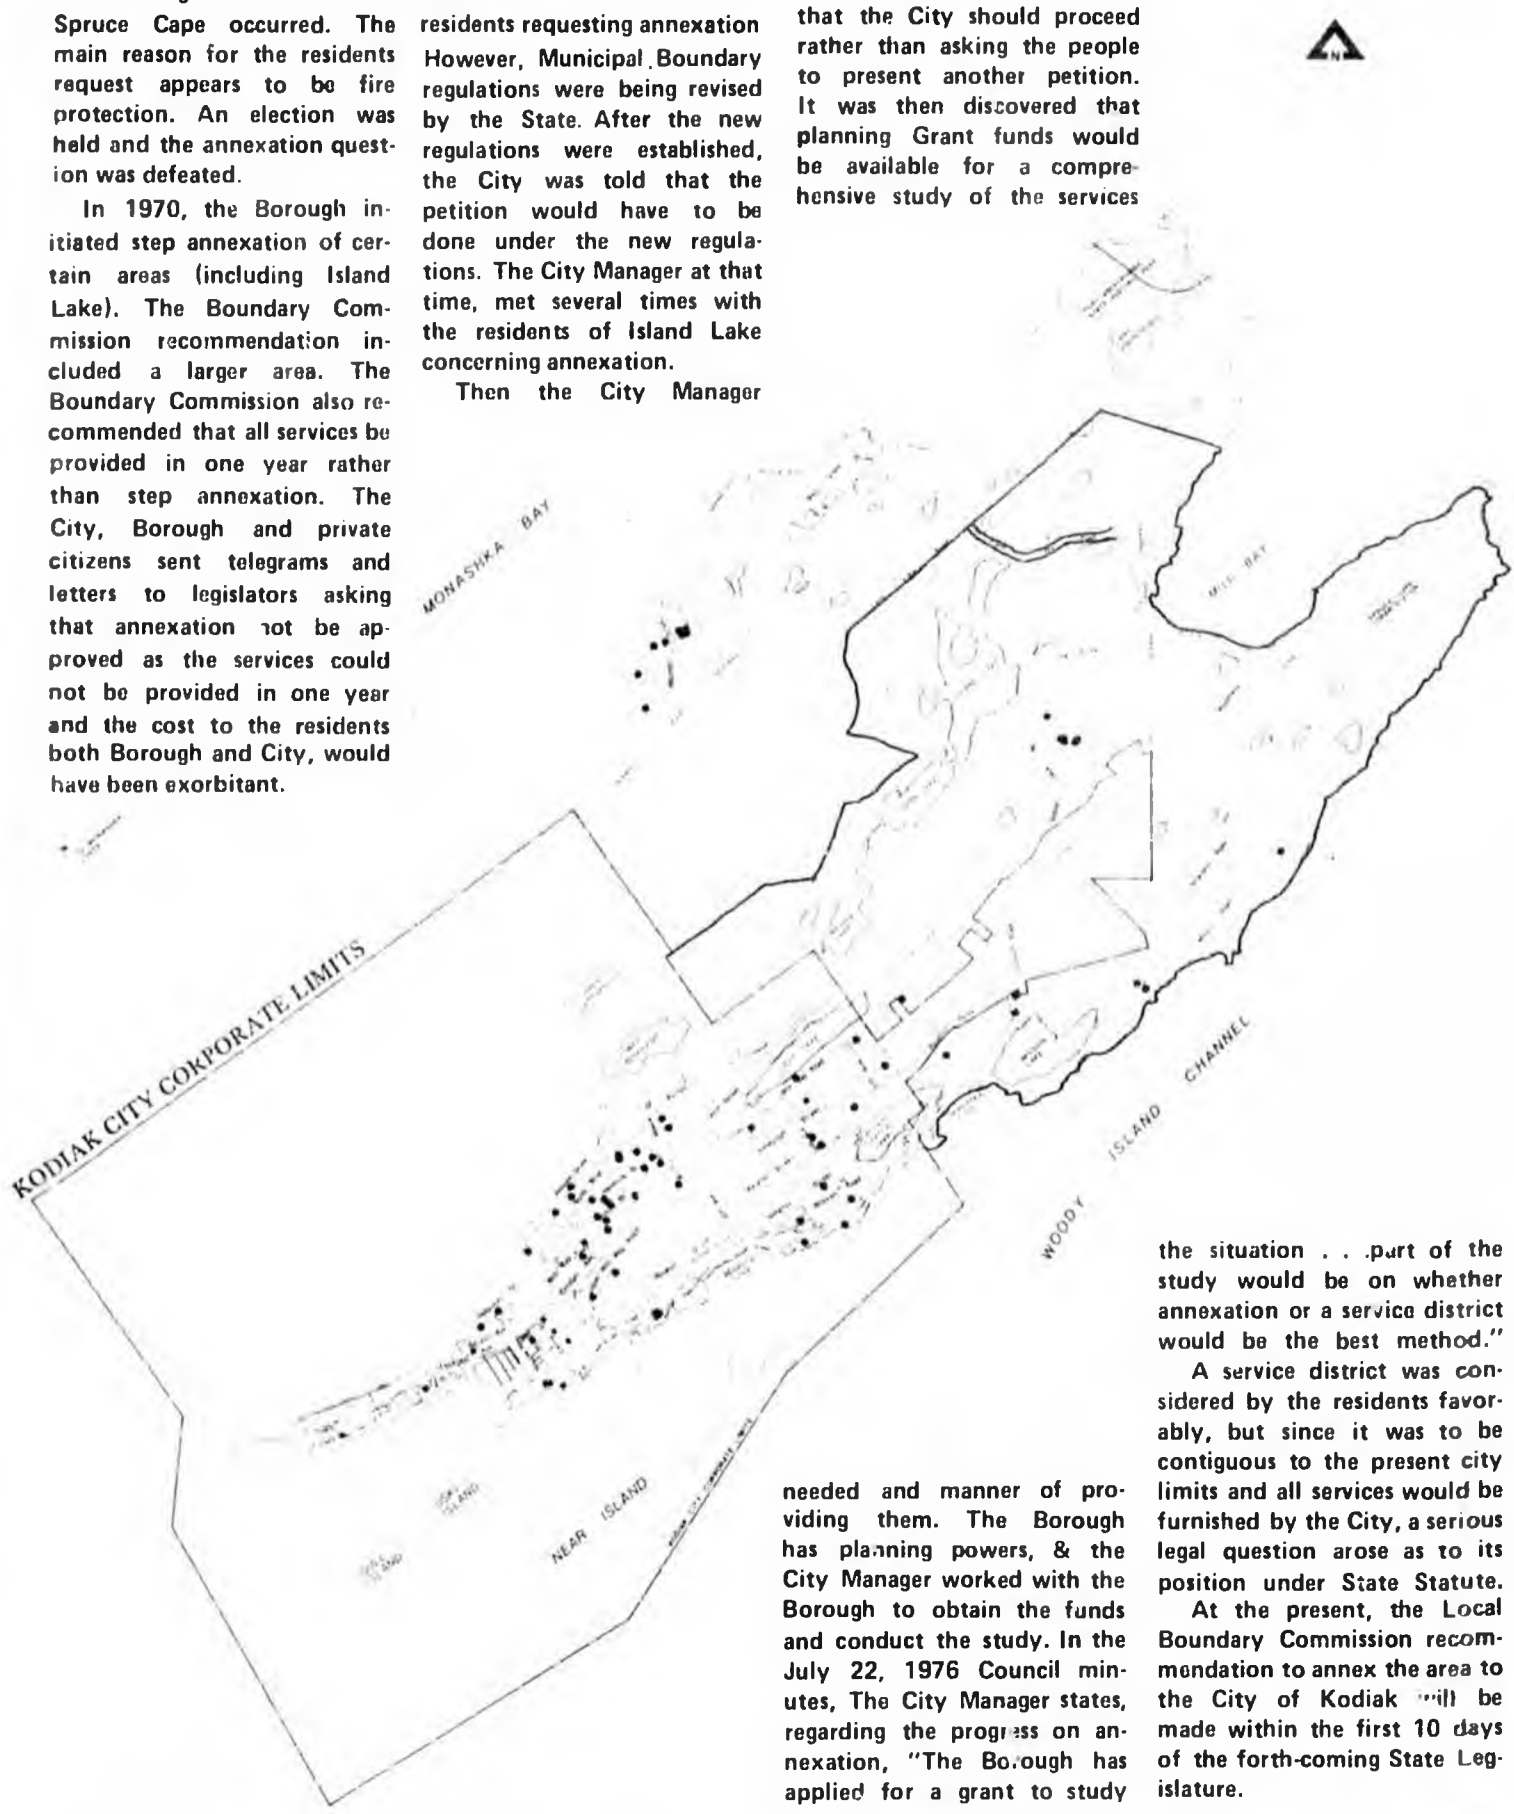
In conclusion, we are here tonight to answer questions about annexation, which may or may not take place. It is sort of out of our hands. We have tried to research the various possibilities without spending an exorbitant amount of time and City dollars. What is really needed are the expressions on your concerns which can help the City Council provide reasonable alternatives and effective delivery of service, should annexation become a reality.

Special Supplement to the Kadiak Times and Kodiak Daily Mirror

City of Kodiak

SPECIAL REPORT
ANNEXATION

The area outlined below has been recommended for Annexation by the State of Alaska Boundary Commission. It generally encompasses the area from the existing City limits to Spruce Cape along the water — then to Abercrombie and along Lake View Drive.



ISLAND LAKE ANNEXATION HISTORY

In 1968, the first attempt at annexing Island Lake and Spruce Cape occurred. The main reason for the residents request appears to be fire protection. An election was held and the annexation question was defeated.

In 1970, the Borough initiated step annexation of certain areas (including Island Lake). The Boundary Commission recommendation included a larger area. The Boundary Commission also recommended that all services be provided in one year rather than step annexation. The City, Borough and private citizens sent telegrams and letters to legislators asking that annexation not be approved as the services could not be provided in one year and the cost to the residents both Borough and City, would have been exorbitant.

In 1972, petitions were received from Island Lake residents requesting annexation However, Municipal Boundary regulations were being revised by the State. After the new regulations were established, the City was told that the petition would have to be done under the new regulations. The City Manager at that time, met several times with the residents of Island Lake concerning annexation.

Then the City Manager discussed the problem with the Council and it was agreed that the City should proceed rather than asking the people to present another petition. It was then discovered that planning Grant funds would be available for a comprehensive study of the services needed and manner of providing them. The Borough has planning powers, & the City Manager worked with the Borough to obtain the funds and conduct the study. In the July 22, 1976 Council minutes, The City Manager states, regarding the progress on annexation, "The Borough has applied for a grant to study the situation . . .part of the study would be on whether annexation or a service district would be the best method."

A service district was considered by the residents favorably, but since it was to be contiguous to the present city limits and all services would be furnished by the City, a serious legal question arose as to its position under State Statute.

At the present, the Local Boundary Commission recommendation to annex the area to the City of Kodiak will be made within the first 10 days of the forth-coming State Legislature.

WHAT ABOUT WATER & SEWER

The City of Kodiak engineering department has been doing preliminary planning for water and sewer service to the proposed annexation area so that construction could begin as soon as possible, if annexation were approved. Previous studies have been incorporated. It is anticipated that grants will be received for 50% to 75% of the costs.

The City has to the best of its ability incorporate the previous work of the citizens and engineering firm retained by the Borough. Plans showing proposed water and sewer lines will be available at the public meeting.

One unusual concept advanced is to allow acceptable Septic Systems in low denisty hard to reach areas in order to keep cost down and to allow assessment relief for the life of the System. Detailed engineering can not be realized until annexation is a reality & appropriate Grant monies can be applied for.

WHAT ABOUT ROADS

1st Priority?

1. Unamed Road in U.S.S. 3467
2. Track A Island Lake
3. Unamed Road in U.S.S. 3219, 3103, 3464 I and Lake
4. Cliffside & Cliffside Loop
5. Seabreeze & Woodland
6. Unamed Road in U.S.S. 3099

2nd Priority? What else should be done.

Reconstruct for purpose of snow removal, road grading, fire & police coverage.

There are 2½ miles of maintainable roads in the area. Maintenance means grading, drainage, snow removal and dust control.
With a minimum of work another 2½ miles of road would be maintainable.

WHAT ABOUT POLICE

Available on maintainable road system with one year or more additional coverage of state police - dispatch available on personal, telephone, or C.B. contact. Additional policemen and vehicles will be added as necessary to cover the entire area.

DIFFERENTIAL TAXATION?

WHAT IS IT ? A method of allowing new residents a break on taxation until they receive the same type and quantity of services as other residents.

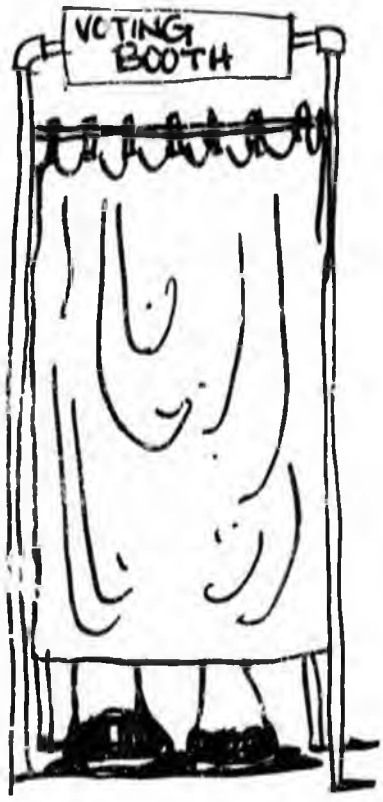
Zone No. 1

Generally that area next to Mission Road outside the present boundaries that may enjoy all City services afforded present City residents. Present Mill Rate for City purposes at 100% would apply.

Zone No. 2

Generally that area north of Mill Bay USS 2467, Shafaka Acres, Block 7 Monashka Bay subdivision that cannot receive full services. Mill Rate at 75% would apply.

Zone No. 3



Generally that area of Woodland Acres, and back of Island Lake that the city is presently unable to reach adequately with fire & police due primarily to present road conditions. 50% of the City Mill rate.

SEE THE CITY'S MAP

EARLY & SPECIAL REPRESENTATION

Early representation is afforded by a City Charter provision which allows any resident who has lived in the newly annexed for 2 years and in Alaska for 3 years the ability to run for Mayor or Council.

Also, the City Council by special provision will ask for the election of a special representative from the annexed area to serve as an advisor with the council for 3 years. Residents of the annexed area will of course vote for all council members and mayor as their respective terms expire.

THE CITY MADE THE FOLLOWING PROMISES IN RESOLUTION NO. 24 - 78

CITY OF KODIAK

RESOLUTION NO. 24 - 78

NOW, THEREFORE, BE IT RESOLVED by the Council of the City of Kodiak, Alaska as follows:

1. The City will, to the extent possible, establish and implement in the areas to be annexed, a system of differential taxation for any such areas that do not receive all services of the City supported by taxation or which receive these services at a level different from that provided in other areas of the City.

2. The City Manager is hereby directed to develop tentative plans for the provision of services to the areas proposed for annexation and to determine whether the City may be prevented by requirements for capital improvements or for other reasons from providing full services to portions of those areas for any temporary period of time. On or before October 1, 1978, the City Manager shall report to the Council and advise of the areas where provision of full services may be temporarily delayed, the level of service that will be provided and the estimated differential in cost between full services and the services to be provided.

3. The City Manager and the City Attorney shall explore existing legal requirements regarding residency requirements for voting and elective office, and the existing number of Council Members an make recommendations to the Council on or before October 1, 1978, regarding possible changes in law or policy to provide residents of newly annexed areas with representation within the City comparable to that currently available to City residents, and any recommendations regarding required changes in ordinances to implement that objective.

4. The City shall engage in an information program regarding the proposed annexation with the objective of making the public and the legislature aware of the need for and benefits of annexation, and shall employ the services of a qualified person, to the extent determined advisable, to actively support approval of the annexation by the Alaska legislature.

PASSED AND APPROVED this 24th day of August, 1978.

LET THE CITY KNOW WHAT OTHER WRITTEN PROMISES YOU WANT:

GOT A QUESTION?

Annexation Committee:	Phone Number
Bob Waage	486 - 4493
Emil Norton	486 - 5178
Marion Johnson	486 - 5171

PUBLIC MEETING

These Ideas are proposals and the City Needs your input.

A Public meeting with the Annexation Committee will be held on December 12 1978 at 7 p.m. in the Council Assembly Chambers.

EDITORIAL:

A crying need

Kodiak and the Aleutian Chain need another ferry to replace or support the M/V TUSTU-MENA.

Kodiak should not be left alone for two months without ferry service. The ferry will leave on its last trip Jan.31 and will not return until March.

Former State Senator Kay Poland, D-Kodiak, says "I may not be in office anymore, but you can't turn your interest off just because you're not in office. I suppose I'll always feel strongly on issues that affect the state and Kodiak in particular. . ."

Kay asserts, and we strongly agree, that the ferry as part of Alaska's Marine Highway System "is just as much a part of our road system as our highways are. . ."

Mrs. Poland points out that the ferry also helps somewhat to keep the soaring cost of living down.

Kay tried for four years to get a freight-passenger ferry for the Aleutians. That same ferry could serve as a back up for the TUSTUMENA. While the "Trusty Tusty," may be beloved, she is getting to be quite an old lady. We need a new one. The TUSTUMENA was one of the first ferries built in the early 1960's. She's also the only ocean going ferry. As Mrs. Poland points out, "When she goes we're left with nothing. There's nothing to back her up. There's nothing even on the drawing boards."

Kay anticipates it would be at least three years from concept to completion if the much needed additional ferry were to be approved tomorrow.

As Senator, Mrs. Poland did manage to have a study funded and conducted. That study showed the Aleutian ferry might be the only self-supporting ferry in the state. Yet, the administration and the Legislature keep putting it off.

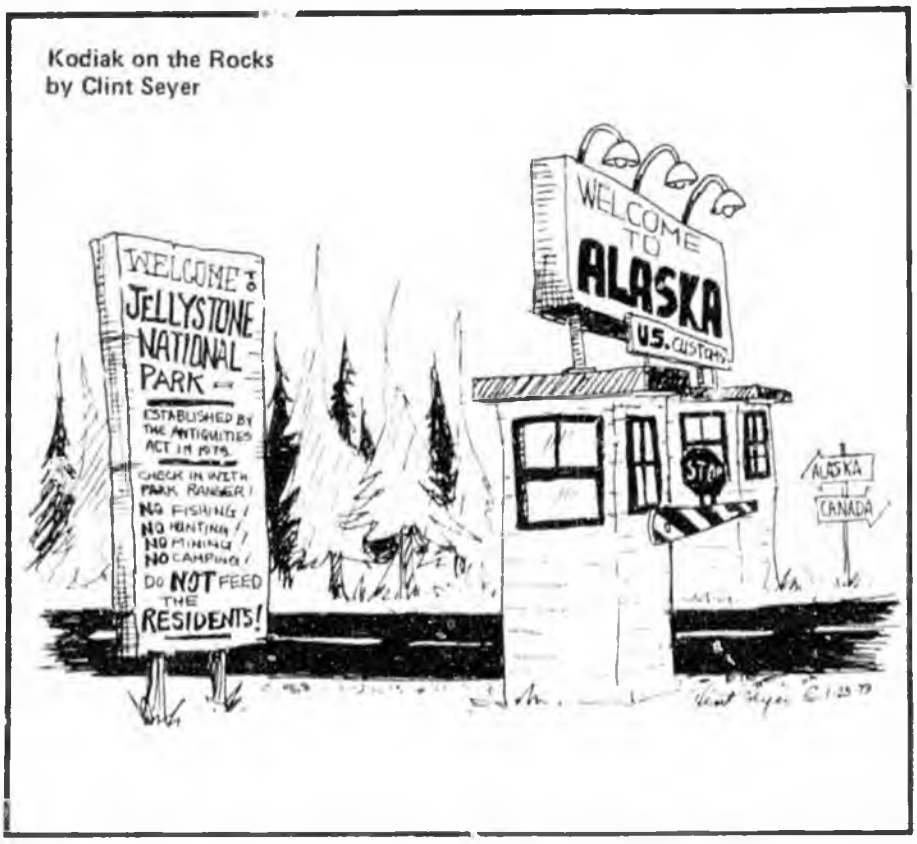
The TUSTUMENA is old and ships, like people, can only last so long. Seventeen cracks were discovered in her hull two years ago, and she was pulled out of service early — in October for repair because she couldn't withstand the stress of winter storms.

We were left only with air service to the mainland.

The TUSTUMENA definitely needs a back up vessel. A ferry serving the rapidly growing Aleutian Chain could also service our island villages.

The need is obvious. We hope the Legislature and the governor will not continue to ignore Kodiak and the Aleutians in this regard.

LETTERS:



Borough role on land claims?

Dear Editor:

Certain facts are incontestable. The first is, human nature being what it is, that given an inch, most people would try to take a foot. The second is that we have already witnessed an attempt by one Native group to claim lands not rightfully theirs which was caught by the courts. The third is that there are very substantial doubts raised in the suit by the Citizens Action Group that there are lands claimed by the Kodiak Natives

Kodiak on the Rocks
by Clint Seyer

Kay Poland sees solutions to Kodiak's dismal voting record, worst in Alaska

by KENT BRANDLI
Editor

Out of 4,159 persons registered to vote here in last August's primary election, only 1,370 voted, giving Kodiak the dubious distinction of having the worst voter turnout in Alaska.

Only 32.9 percent of those eligible here voted, says former State Senator Kay Poland. "It really makes it tough for representatives in Juneau to carry a heavy clout with such a poor showing," she adds.

In other fishing communities, where fishermen are out at sea on election day as they are in Kodiak, the turnout was much better. For example, in Seward and Cordova, 45.1 percent of those eligible voted.

"I've been harping on this for years, but it doesn't seem to do any good. Just the same faithfuls vote," according to Mrs. Poland.

She produces statistics to back up her argument, and proposes solutions.

"Sometimes it takes a real effort to vote. Such is the case with the fishermen. It takes some effort to vote absentee."

Sketch by Kay Linscheid

KAY POLAND

She also blames the state's election procedures, and the handling of voter registrations locally. "When the change was made from the court's handling absentees to the borough clerk handling it, there should have been ads in the newspapers, and on television and radio explaining the switch. This wasn't done in time."

Mrs. Poland says she personally voted absentee and had to "find out by traipsing all around." Within her own family "two of my kids who always voted were challenged. There is really something fouled up there."

Mrs. Poland did not seek re-election to the State Senate last year. Instead she ran unsuccessfully for Lt. governor with Tom Kelly as an Independent.

There is need for some correction, Mrs. Poland says. "There's apparently got to be an overhaul and it's got to start with proper training of the registrars. Also, I believe there's got to be some kind of a numerical check on voter registration forms," the former senator says. "The registrar should have to account for every form used or unused — voided or not." Mrs. Poland feels this

POOR VOTE

(Continued from Page 4)

should be done on a weekly basis.

She calls voter disinterest in Kodiak "a state of mind." But, also, "We've got to be sure that the absentee voter is well-informed as to where and when they can vote absentee. This is very important for Kodiak due to our large number of fishermen at sea."

Kodiak has state's worst voter turnout

Members Of The Community & Regional Affairs Committee
Senator Arliss Sturgulewski, Chairman
Pouch V
Juneau, Alaska 99801

Dear Ms. Sturgulewski:

Thank you for bringing your committee to Kodiak and reflecting a real caring attitude in your chairing of same. I feel Kodiak's residents owe you a vote of thanks for your very personal but very professional expertise in conducting a fine meeting. Your personality reflected a oneness with the people, the pros and the cons which I likened as the Apostle Paul, a great teacher who said - "I became as they were to better serve them".

I feel your district was so wise in electing you to your high office. Again, thank you.

I could and should have asked for time to answer some of the misinformed statements that surfaced near the end of the meeting. Being one of the Annexation Committeemen who worked in depth with the City on their proposals seeking the best conditions possible for the three areas up for annexation, if and when annexation was a reality. Several of the speakers spoke out of ignorance of several facts, as at no time did any of them avail themselves to or with the Annexation Committee or the City to offer input as to what they desired or what changes they would like in the City Proposals. In as brief a manner as possible, I wish to recap a few high points of some of the main spokesmen's for the opposition and maybe a few of the points will be reflected.

First, in Mayor Wallin's presentation, she highlighted the fact that she felt Unification was the answer, and not Annexation, and that if Annexation did become a reality, it would hinder the cause of Unification ever being brought about. I say the Mayor is in no way sincere in her contention. I also say the Mayor is striving to defeat any cause that will bring about any change whatsoever in the power struggle that is going on now in this small community. Even though she realizes the pressing needs of all the services indicated will continue to forestall any change . One example why I say this; when the meeting of the Boundary Commission held its last meeting in Kodiak, the Mayor's plea ws do not force us into the City we will Unify which is more desirable and an answer to all our problems.

In our last election, the Mayor nor her supporters put no effort whatsoever in trying to bring about Unification. If she had truly desired Unification and had expended only half as much energy and money that her Anti Annexation Committee has spent to defeat Annexation, I'm sure a Charter Commission could have been elected. It was defeated in the last election. Also the proposition for granting the Borough service districts power for sewer, water and other services.

You can see from this that the Anti Annexation force is actually fighting any change. Several of the Anti witnesses complained of having to change life styles; also giving this reason for living in the Borough, when in truth most of us live outside the City limits because this was the only place to buy land and at a price we could afford. The life style in the City of Kodiak is no different than outside the City limits.

The other main contention was their vote had been taken away. If you will reference the recent press release by Kay Poland, our former Senator, you will gather that Kodiakans do not exercise this great previlege even when its offered and only harp on it if they feel that it serves their purpose.

Out of 4,159 persons registered to vote here in last August's primary election, only 1,370 or 32 percent cared enough to vote. I would say this belies their contention that they cherish their right to vote. What do you say?

In the beginning of all of this, none of the opposition availed themselves to workshop meetings on the proposals by the City so therefore most of their complaints on what could be expected from the City if Annexation becomes a reality were erroneous. Most of the points of contention can be found in my pack of letters to the Editor that you have in hand.

One other correction on Mrs. Pat Szabo's testimony; the City does have a viable plan for Zone 3, in the 35 percent mill rate area. The City will install government-approved septic systems under an assessment district as sewer is done in other areas, 10 year pay plan.

An explanation of the City's refusal to hook up Lorna Arndt's water in the Island L[illegible] area, it is because of advice of Council because of the present litigation between the City and the Borough concerning the legality of service district of the City and/or the Borough.

One other Spruce Cape witness against Annexation Mr. T. T. Jackson. Mr. Jackson has over 100 mobile homes on a private sewer system that he charges sewercharges to all tenants. This sewer is drained into the bay with no treatment whatsoever. The four houses I spoke of in my presentation before the Committee was in reference to Mr. Jackson. This raw sewerage dumps into the Mission Lake where children play on rafts in summer and skate in winter. These are just a few of the terribe health hazards in my district. Island Lake is much worse. We will never realize these pressing needs if we wait on a service district by the Borough.

Just a passing reflection on the reported 500 signatures from the three proposed areas that object to Annexation. After conducting a telephone survey in the three areas, convinces me that it's a misleading fact that if it should be challenged it would not stand up at all. We have 268 phones in the three areas and in our survey, we found the yes and no about equal.

At the meeting the 500 was noticeably absent, the bottom line of all, is still the vocal 15 or 20.

Also, the survey cards that were presented to our Representative Fred Zharoff, should in no way be considered by your committee as I'm sure you will realize such a mailing could be rigged to reflect any desired result. Where the survey required no signature only an X - why couldn't the surveyor mark and mail as many no's as he chooses before giving the balance for distribution to boxholders? The act was so ill thought out and so obvious that I feel silly for feeling I need to point this fact out to the committee.

I have a long track record of fighting causes for Kodiak but I pride myself in truth and fairplay in all fights, lose, win or draw. I ask that your Committee consider the urgent need in your deliberations.

I find to stand up for right is not always popular but very rewarding.

Respectfully,

Robert Brooks

BOB BROOKS

cc:
Bob Mulcahy, Vice-Chairman
Fred Zharoff, Representative

Lorna-Lee ARNDT a Member of the Island Lake Sewer & Yachting Club, speaking for a group of ?.

I have 12 lots on the front side of Island Lake and my son has 13 lots and my daughter has 1 lot all in this area in U.S. Survey 3219 which you toured today.

We believe in the "Freedom to Vote" on Issues and not pushed into something we do not want.

I am one who was recently DENIED a water hook-up by the City of Kodiak and their Attorney on one of my lots where there is a City Water line on the lot. We were FORCED onto City Water in this whole area, because of the City's mistake, and did not know our private water systems were cut off until after they hooked us onto the City Water.

What will we do with our Goats; Cows; chickens; ducks; Geese; Rabbits, and Horses if this should become City as the City does not allow these animals?

We all moved where we are cause we do not like to live in the City and our Children have more to do, and never become bored; or even care to go in town or later in town.

One person in the family either goes to town once a day to get the mail and if one works that person picks it up on the way home from work. And maybe twice a week to get food as we hate going to the City. We purchase all clothes and household items from Catalogs or make one Airplane trip out a year to do our buying as it is much cheaper elsewhere. So you see we have no other reasons to want to leave our homes to go into the City, and we wish to keep all our properties in the Borough Government.

Feb. 12, 1979
Box 1635
Kodiak, Ak. 99615

Arliss Sturgelewski
Honorable Chairman Senate
Community & Regional Affairs Committee

Dear Arliss:

Facts about the people who testified at the hearing in Kodiak on Sat. Feb. 10, 1979 and who live in the proposed FORCED Annexation Area.

Dr. Bob Johnson who has a $500,000.00 or $600,000.00 Clinic in the City is my friend and my wife's and my physician and my wife requires special medication, and I quite frequently called Dr. Bob for this reason. I also called his wife frequently in regards to matters that we are both interested in.

Mr. Tom Sweeney has been living in the Borough for 5 or 6 years, and there is city water next door to him and across the street from him and those people are in the City and he could join the City at any time as it would not be spot zoning cause the neighbors are already in the City.

Mr. Bob Brooks who owns Brooks Tool Rental and Budget Rent-A-Car and has considerable realistate in the City says he has been there 17 years; and if he were in the City with his businesses he would not have to pay personnal property tax on his equipment or cars and his only reason to be in the City is he would gain financely. In all the time he has been here I don't know of anything he has ever done to make it a better Community in which to live. Several Years ago a bonding issue came up for a new school, and Mr. Brooks spent considerable money to defeat the Bond Issue. Mr. Bob Greene who was our Supt. of schools and who now works under Dr. Lind with the Education of Schools in Juneau, solicited my support for this Bond Issue. I wrote a letter to the Editor of our newspaper and then I wrote to all the Villages on Kodiak Island and zeroxed and sent sufficient copies for everyone at my own expense.

Mr. Emil Norton who was appointed by the City Manager to the Proposed Annexation Committee has stated that he did not need or want any services from anyone, and he took it to court to avoid being in the Service District. He appealed to the Borough Assembly for consideration and did not receive it, and for that reason he is Disruntled with the Borough Government.

Kodiak is in a recession due to the decline of Shrimp and King Crab catches in the last 3 or 4 years.

A year ago people were putting ads in the paper wanting a place to rent and now there are 8 to 20 For Rent ads in the newspaper each night, and there also are signs on houses either For Rent or For Sale all over Kodiak. There is every indication that Kodiak will decrease in Population and Not Increase in Population. The present Population does not exceed 4500 people.

Respectfully yours,

Okey L. Chandler

Okey L. Chandler

Dear Arliss:

It was good talking to you today. Enclosed, as per our discussion, are copies of the two briefs I have submitted at various stages in this controversy. Please feel free to call me with any questions you may have or any additional areas regarding which you may need further input. I have also contacted Hayden Green at the University and he assures me that he and P. J. Hill, who prepared the economic analysis submitted to the Local Boundary Commission and included in the information being sent to you, will also be available to answer any questions you might have.

I appreciate your intention to have our staff keep me informed as to developments regarding Kodiak. I look forward to working with you on this matter.

Sincerely,

Joan

BEFORE THE LOCAL BOUNDARY COMMISSION FOR THE

STATE OF ALASKA

IN THE MATTER OF ANNEXATION OF CERTAIN PROPERTY LOCATED ALONG MILL BAY ROAD, KODIAK;	)
CITY OF KODIAK,	)
Petitioner,	)
vs.	)
KODIAK ISLAND BOROUGH,	)
Respondent.	)

RESPONDENT'S BRIEF

I. Introduction

On October 19, 1977, the City of Kodiak submitted a petition for annexation of certain property located along Mill Bay Road in the Kodiak Island Borough to the Department of Community and Regional Affairs. While deficient in several respects (the most glaring of which was the absence of a resolution or ordinance authorizing the City to seek annexation), the petition was accepted by the Department. The City's case, as revealed in its brief, appears to rest on two principal grounds: first, that residents and property owners of the territory are deriving benefits from the City, such that they should be made to pay a commensurate share of the City's tax burden; and second, that the City could provide services to the territory more efficiently under annexation than could otherwise be accomplished. Intruding onto the specifics of this annexation proposal is petitioner's avowed intent to annex substantial other areas of Kodiak Island. See, Memorandum from Ivan L. Widom, City Manager, to the Local Boundary Commission, dated October 17, 1977.

Contrary to the City's allegations, it is the Borough's position that the best interests of the residents and property owners of the affected territory, and of the local governments involved, would not be served by this proposed annexation. As the Borough shall demonstrate, residents and owners of the territory would gain virtually nothing besides a hefty increase in their local taxes should this petition be successful -- an increase for services for which they presently pay more than adequately. The change in status would only serve to foster conflict, moreover, between the City of Kodiak and the Borough, and between the City and affected residents.

II. Lot Ownership and Configuration Within the Territory

At the outset, some factual clarification is required. In addition to the deficiencies in the petition mentioned above, there appear to be errors contained in the notice of hearing and attached lot descriptions provided by the Local Boundary Commission staff. First, Lots 3, 4, 5, 6, 7, 9 and 11 are identified as belonging to the City of Kodiak. Borough research indicates that those lots are currently patented by the State (patent number 50-64-0228 for lots 3-7, and 50-64-0169 for lots 9 and 11). The Borough, moreover, has filed land selections on these lots pursuant to AS 29.18.190, et seq. (Excerpt from Land Selections filed by Dale Tubbs for the K.I.B., Exhibit A.) The Borough, thus, possesses a specific interest in these particular lots, augmenting its underlying concern for the welfare of its residents in general.

In addition to this error, there appears to be an oversight in regard to Lot 27. This lot has not previously been annexed; nor is it included in the petition. It is

certainly possible that the City intentionally deleted this lot, perhaps because of known owner opposition to annexation. Such exclusion, however, would result in a continuation of the alleged misalignment of City boundaries. Since this "misalignment" is one of the grounds advanced by petitioner in support of annexation, the absence of Lot 27 is, at best, confusing. It suggests that this annexation proposal may not have been thoroughly analyzed from a thoughtful, planning perspective.

III. Standards for Annexation

Alaska Administrative Code Section 19.AAC 05.010 sets forth specific standards which provide guidelines for annexation. It is recognized that two of these standards ([1] and [3]) are met by this petition. The City raises no issues under Standards (2), (5), (6) and (9). These standards could not, in fact, be met in this case. Petitioner's case rests primarily on the purported fulfillment of Standards (4), (7) and (8). The Borough contends that there is not, in fact, compliance with these standards.

A. There is No Need in the Territory for Municipal Services that Could Not be Provided as Efficiently Without Annexation. (Standard No. 4.)

The City asserts that it can provide various services more effectively under annexation than would otherwise be possible. The City's history, however, and the facts regarding each of those services, suggest differently:

1. Sewer and Water. The City argues that sewer and water services would be extended immediately upon annexation. In fact, under a 1970 agreement between the Borough and the City, the City has long since been designated the agency responsible for implementation of water and sewer projects within the area of the road system in the Kodiak

failure to live up to the terms of this agreement accounts for the fact that services have not previously been extended to the lots within this territory. The City's track record is not one to inspire confidence.

2. Law Enforcement. The City simply describes its police force by numbers of officers and size of budget. The only argument made in this context, however, is that "Due to the nature of the boundaries in this area, certain problems can arise". (Petitioner's Brief, p. 1.) The Borough cannot envision what those problems might be. City police may certainly traverse City boundaries to get from one part of the City to another without violating any laws or ordinances. The only response possible to this broad statement is that the State Troopers provide police service to the territory. Residents and property owners have voiced no complaints about the level of service.

3. Fire Protection. The City's analysis of fire protection is, like its presentation of law enforcement, simply a descriptive one. What should be said is that there would be absolutely no change in fire protection provided the residents and property owners of the territory were the annexation to take place. Borough Fire District No. 1 presently covers this territory and is serviced through contract with the City; the contract provides fair consideration. (Exhibit C.) It might be noted, moreover, that the Borough owns one of the fire trucks utilized by the City, as well as a new ambulance similarly operated by the City and used inside and outside its boundaries.

4. Parks and Recreation. The City outlines its services in the parks and recreation area, and alleges a budget of $128,946 for this department. Apparently the intention is to suggest that Borough residents outside the

City are getting "something for nothing". In fact, the City is able to operate the pool and the gym only because the Borough has made them available. The pool and gym collectively are worth approximately $3,220,000, substantially more than the City's budgeted amount for this service. (Memorandum from Borough Assessor, Ed Haney, December 6, 1977; Exhibit D.) The joint agreement between the Borough, its School District and the City, further delineates the benefits accruing to the City through the use of these facilities. (Joint Agreement for the Use and Operation of Gymnasiums and Swimming Pool, Exhibit E.)

In addition, the Borough adopted parks and recreation powers within the last year, and has contracted for a major parks and recreation study to be completed by April of next year. City residents will undoubtedly benefit from the exercise by the Borough of its parks and recreation power.

5. Library. In describing its library with attached budgetary figures, the City again fails to make any case showing that Borough residents are taking unfair advantage. Petitioner acknowledges the Borough contribution of $15,000 to the library financing. There is no showing that this contribution is grossly disproportionate to the use by non-city residents of the library facilities. And there is also no mention of the fact that the Borough operates four libraries of its own which make interlibrary loans to the City library.

6. Cemetery. The City simply states that the cemetery, with its paid contractural employee, is available to Borough residents. There is no indication of how much this employee is paid; he may in fact be part-time. And there is no mention of the fact that the City acquired

the land for the cemetery in 1968 from the Borough for the price of $1.00. (Minutes of K.I.B. Assembly Meeting, 2/15/68, Exhibit F.) At the time, that land was worth approximately $29,600. At present, its estimated value is $300,000. (Memorandum from Ed Haney, Borough Assessor, to Stu Denslow, Borough Manager, Exhibit G.) Borough residents have more than paid their way into their ultimate resting places. Again, the level of service for the territory affected by this petition would not be increased through annexation.

7. Public Works Functions. The City's one-sentence remark in regard to public works provides little to which the Borough can helpfully respond. The fact that the Public Works Department provides street maintenance and snow removal is essentially irrelevant, since the primary road involved is Mill Bay Road, which is state maintained. Should the residents of the area decide that further local roads are necessary, they could finance them through road service districts, rather than taxing the general public for such neighborhood improvements. It might be noted, moreover, that private contractors are available to the Borough to provide competent road service, as is illustrated by the road service district in the Bells Flats-Russian Creek area. (Contract between the K.I.B. and Alagnak, Inc., Exhibit H.) House numbering, the other item mentioned in connection with public works, is a planning function and will be undertaken by the Borough as it proceeds with implementation of its comprehensive plan.

8. Cargo dock, boat harbor, ferry terminal and airport. The City alleges that these facilities are "to some extent" self-supporting, and then claims that general fund contributions have been made to maintain the facilities. Again, the City's lack of specificity renders the Borough's

attempt to be responsive difficult. Borough research uncovered only a $149,703 loan from the City's general fund to the cargo dock. (City of Kodiak, 1977/78 Budget, p. 46.) A loan hardly constitutes a "contribution". The City's presentation in this regard raises two additional questions. First, it is not at all clear that the municipal airport, as discussed further below, is an asset to Kodiak. The extreme hazardousness of this strip might merit its closure, rather than its support by taxpayers money. Second, it is not clear why general fund contributions should ever be used to make up deficits in the operating budgets of these enterprise activities. The people who use them should pay for them; those who do not use them, should not.

9. Garbage Collection. Residents of the territory would gain nothing new in the way of garbage collection should annexation take place. At present, they have the option of paying for garbage collection or transporting their own refuse to the dump. Under annexation, that option would be removed and they would pay for the service whether or not they wanted it. There has been no showing that such imposition is necessary.

A review of the above services indicates that the City has not demonstrated that it could improve the lot of territory residents through annexation. In fact, as described above, the residents and lot owners would gain virtually nothing to their advantage by way of annexation. As shown on the table below, however, these people would stand to lose a great deal. Best estimates reveal that, assuming the addition of sewer and water to all lots, the cost to lot owners should they remain outside the City limits would be 9.47 mills taxation plus $28.75 per month in water and sewer assessments; if the territory were annexed, the rate would

jump to a substantial 16.3 mills, with assessments in the neighborhood of $25.00 per month.

	City Resident	Borough Resident Outside City Limits
Borough Mill Rate	7.2	7.2
City Mill Rate	9.1	-0-
Fire Protection Mill Rate	-0-	2.27
Water	$10.00/mo.	$13.75/mo.
Sewer	$15.00	$15.00
Total	16.3 Mills $25.00/mo.	9.47 Mills $28.75/mo.

The City has simply failed to make a showing that such a rate increase is warranted or equitable for those affected.

B. Annexation Will Not Enable the City to Improve any Health or Safety Conditions in the Territory. (Standard No. 6.)

As noted previously, the City has not invoked this standard. It would be dismissed without comment were it not for the irony it brings to light. There is, in fact, a serious safety hazard located within the territory. That hazard is the municipal airport. Yet the City, which exercises complete control over this airport and even mentions it among the services provided to territory residents, has failed in its duty to alleviate the significant safety hazard that it poses. There is no reason to assume the City would perform more responsibly should other such problems arise.

C. It is Practical to Provide all Necessary Services to City Residents Without Bringing the Territory Within the City Boundaries. (Standard No. 7.)

Petitioner's brief includes broad statements to the effect that there is a "misalignment of boundaries [which] causes problems with enforcement of City ordinances and with providing certain services to those areas already annexed". That is the extent of petitioner's analysis. In light of joint Borough-City agreements covering water,

sewer, and fire, the Borough cannot envision any problems that might arise because of the existence of a few City lots within the territory. If the problems were significant, the City presumably would never have annexed those lots causing the present "misalignment".

D. The City is Receiving (or Should be Able to Devise Means of Receiving) Ample Reimbursement for the Services Provided Territory Residents and Lot Owners. (Standard No. 8.)

The City complains that it "provides substantial benefits to residents and owners of properties outside of [its boundaries] without corresponding tax contributions for municipally provided services". (Petitioner's Brief, p. 2.) Yet, sewer and water should be provided only upon assessment; fire protection is paid for by the Borough which levies a 2.27 mill rate on property owners within the District; parks and recreation services are in large part made available through the Borough-donated pool and gym; contribution is made by the Borough directly to the municipal library; the cemetery exists on a $300,000 plot of land given for $1.00 to the City by the Borough; the cargo dock, boat harbor, ferry terminal and airport are or should be self-supporting through user fees; and garbage collection is currently paid for by those who use it.

In addition to the direct payments identified above, all Borough residents outside the City fund the City's services and programs, whether or not they receive any benefits from them, through a three percent sales tax levied by the City on all goods and services sold within the City or by City-based businesses, whether the service is provided within or without the City. (City Ordinance 3.08.010 et seq.) Virtually all sales of goods and services on Kodiak Island take place within the City, so all residents

of the Island are sorely affected by this tax. Sales tax receipts, moreover, have been used to pay Borough personal property tax for City residents; owners of personal property within the City have not been required to make such payments out of their own pockets. (City Ordinance 3.04.010B.) Borough residents living outside the City boundaries have thus paid personal property tax twice; first their own, and then a substantial contribution to the payment of taxes for those persons who have personal property located within the City limits. Residents and lot owners in the territory have amply compensated the City for any benefits they might receive.

IV. Procedural Factors Against Annexation

Four intertwined procedural issues are raised by the manner in which this petition has proceeded to date. First, petitioner and the Local Boundary Commission seem determined to propel this matter forward with great speed, presumably because of the approaching start of the Legislative session. Such precipitous action, however, has resulted in failure by the Commission to follow its own guidelines, and has put great strains on the Borough and any other would-be respondent to prepare adequately for the upcoming hearing. Thus, the petition was apparently accepted notwithstanding the fact that no resolution from the City Council was attached (19 AAC 10.040[4]); the sources of information contained in the petition were presented only in a statement, not an affidavit (19 AAC 10.040[2]); and the petition was wrongly addressed to the Department rather than the Commission (19 AAC 10.070). In addition, the interest in reaching a quick determination in this case resulted in a refusal by the Staff Assistant to grant a few days postponement of the hearing. The Borough's attorney had requested such an

extension in order that a well-informed brief might be prepared and presented to the Commissioners sufficiently in advance of the hearing to enable them to receive the evidence with some foreknowledge of both sides of the case. (See, letter from Joan M. Katz to Pat Poland, Exhibit I.)

Second, as noted throughout the course of this brief, the City's presentation to the Local Boundary Commission consists primarily of broad allegations, without substantiating facts. Such material did not put the Borough in a sufficiently informed posture to respond adequately.

Third, the issue of annexation of the petitioned-for territory is clouded by the avowed intention of the City to extend its boundaries to still other areas. Mr. Poland has indicated to the Borough's attorney that the broader issues of annexation of large portions of the Kodiak Island Borough will in fact enter into the Commission's deliberations in the course of the hearing on the Mill Bay Road territory. Yet no petition has been filed on those other, very different areas; there is no way the Borough can prepare any response. Other interest groups, such as the Native population of Kodiak, may have strong feelings when confronted with the full scope of the proposed annexation. It would appear that any and all questions of annexation on the Island of Kodiak should await a proper petition adequately setting forth all the territory sought to be annexed with ample factual basis for the City's position. Absent such a rational approach, serious error might be committed as Commission deliberations are hurried forward without sufficient groundwork being laid. There is no emergency warranting such procedure.

Fourth, and finally, in connection with the intent to annex considerably more territory than is revealed in this petition, it would seem appropriate to handle this matter by

the step annexation procedure. Of critical concern to the Borough Assembly, staff and people they represent, is the fact that no opportunity has been afforded the people of this territory to vote on the issue of annexation. An election would give the Commission precise information regarding the people's views on this matter. It would also go far to reduce the anger and bewilderment experienced by Borough residents who view the non-elective process as an uncharacteristically undemocratic one for this State to be imposing upon them.

V. Conclusion

The only context in which the City's petition is comprehensible is that of a power play, a grab for land which the petitioner has no demonstrated ability to govern effectively. The evidence shows that the residents of the territory would gain nothing from annexation, but would stand to lose considerably from a financial standpoint. Abstract arguments supporting annexation are overshadowed by the reality of the cost-benefit ratio to those lot owners, by the fact that they do not support this petition, and by the realization that there is no equitable reason for increasing the City's tax base. Honest appraisal tells us that the City's track record for the delivery of services and for fair dealing with citizens on Kodiak Island is seriously deficient. There is no basis for granting the petition. There is sound basis for denying it. The Kodiak Island Borough respectfully requests that the Local Boundary Commission reject the City of Kodiak's petition for annexation.

Kodiak Island Borough
Box 1246
Kodiak, AK 99615

Dear Mr. Denslow:

This is to acknowledge receipt of Kodiak Island Borough's Municipal Selections, ADL 200122.

Further processing of the pending selections by the Southcentral District Office is not anticipated until completion of legislative action on House Bill 133 which addresses the municipal land selection problems in Title 29 of the Alaska Statutes. If, in the meantime, there are critical priority selections requiring immediate attention or questions regarding your selection status, we will be glad to respond to your needs.

Sincerely,

L. A. Dutton
District Manager

AGREEMENT

DESIGNATING THE CITY OF KODIAK AS THE AGENCY RESPONSIBLE FOR IMPLEMENTATION OF WATER AND SEWER PROJECTS ELIGIBLE FOR FEDERAL FUNDING

THIS AGREEMENT, made and entered into this 2nd day of July, 1970, by and between the CITY OF KODIAK, a municipal corporation, hereinafter referred to as "CITY" and KODIAK ISLAND BOROUGH, a municipal corporation organized under the laws of the State of Alaska, hereinafter referred to as "BOROUGH",

W I T N E S S E T H :

WHEREAS, BOROUGH is a second class borough and as such has limited authority which does not include the power to provide water or sewer service and

WHEREAS, CITY is a first class city and as such has a Public Works Department and in connection therewith provides sewer and water service to the residents residing within the corporate limits of the CITY OF KODIAK and to some residences residing outside the corporate limits of the CITY OF KODIAK, and

WHEREAS, the parties hereto desire to make application for Federal aid on local sewer and water project and one of the parties hereto must be designated an agency responsible for implementation of such projects.

NOW, THEREFORE, in consideration of the foregoing, the parties hereto mutually agree as follows:

1. CITY is hereby designated the agency responsible for implementation of any water or sewer projects within the area of the road system in the KODIAK ISLAND BOROUGH and is hereby authorized to make application for Federal aid in connection therewith.

IN WITNESS WHEREOF the parties hereto have caused this Agreement to be executed by their proper officials on the day and year first above written.

CITY OF KODIAK

BY: Leonard A. Pomeroy

KODIAK ISLAND BOROUGH

BY:

EXHIBIT B

CONTRACT TO FURNISH FIRE PROTECTION SERVICE

THIS CONTRACT made this 2ND day of ~~May~~ July, 1970, by and between the CITY OF KODIAK, hereinafter referred to as "City" and the KODIAK ISLAND BOROUGH, hereinafter referred to as "Borough", both being municipal corporations organized under the laws of the State of Alaska.

W I T N E S S E T H

WHEREAS, City is an Alaskan municipal corporation, being a home-roll or charter city, and as such is lawfully authorized and empowered to enter into the Agreement hereinafter recited; and

WHEREAS, Borough is an Alaskan municipal corporation of the second class and has under its powers formed a Fire Service District as provided by law and therefore is lawfully authorized and empowered to enter into the Agreement hereinafter recited; and

WHEREAS, Borough is presently without adequate fire protection in its Fire Service District and desires to have the services of City's Fire Department and to pay for such services; and

WHEREAS, City is willing to furnish fire protection to Borough's Fire Protection District provided an adequate payment is made.

NOW, THEREFORE, City and Borough agree as follows:

SERVICES TO BE RENDERED

FIRST: Subject to the conditions and qualifications hereinafter recited, the City will furnish to Borough's Fire Protection District during the period of this Agreement, the services of City's Fire Department to the same extent as if the area encompassed within the boundaries of the Borough's Fire Protection District were a part of the incorporated area of the City.

EXHIBIT C

TERM OF AGREEMENT

SECOND: The term of this Agreement shall be continuous until terminated by mutual agreement of the Parties or by notice of intention to terminate given in writing not less than ninety (90) days before the intended date of termination when such notice is given and which notice may be given by either Party at any time hereafter.

PAYMENT

THIRD: Borough agrees to pay to City during the term of this Agreement an amount equal to the millage rate levied by City for fire protection service in the City, which amount shall be levied and collected on all properties within Borough's Fire Protection District at the same millage rate. City shall give to Borough, in writing, at the time it sets its millage rate, the millage levied for fire protection within the City and that same millage rate shall thereafter be applied to all properties within the Borough Fire Protection District for the ensuing year and this amount shall be paid to City.

CITY IS NOT RESPONSIBLE FOR CONDITION OF FACILITIES

FOURTH: City assumes no responsibility for the condition of the water mains, adequacy of fire hydrants, water pressure or of any of the facilities to be furnished by Borough's Fire Protection District except to render the best service possible under the conditions which exist at any given time.

RESPONSIBILITY OF FIRE CHIEF

FIFTH: In agreeing to give Borough's Fire Protection District the same type and quality of fire protection service as

that enjoyed by the City, it is understood by Borough that the ultimate decision and discretion as to the method and manner of controlling or extinguishing fires is vested in the Fire Chief of the City. Neither City or Borough shall be allowed any priority in dispatching of fire fighting equipment or personnel, but in any given case, the decision shall be in the discretion of the City's Fire Chief.

FIREMEN TO BE MADE PEACE OFFICERS

SIXTH: City does not agree to furnish any peace officers in connection with the response to any fires within the Borough Fire Protection District unless such powers are conferred upon firemen by the laws of the State of Alaska and in that event the powers and authorities shall be limited to that authority granted.

INSPECTION BY FIRE DEPARTMENT

SEVENTH: The Fire Department of City shall have the same right to make inspections of any and all structures and grounds within the Fire Protection District of Borough and to make appropriate recommendations thereon with the same force and effect as the Fire Department has within the City.

BOROUGH TO ABATE FIRE HAZARDS OR NUISANCES

EIGHTH: Borough agrees to take timely action to abate any fire hazard or nuisance when such is called to the attention of the Borough Chairman or Borough Assembly.

INDEMNITY OF FIRE DEPARTMENT

NINTH: Borough agrees that the Fire Department of the City shall have the same privileges and immunities with respect to liability as said Department has in the City.

ADJUSTMENT OR REVISIONS OF BOUNDARIES

TENTH: Borough agrees that if the present geographical boundaries of the Fire Protection District of Borough are reduced or enlarged or expanded, then and in such event City may either refuse to service such enlarged area or this Agreement shall be amended to provide an added consideration for the additional fire protection to be rendered by City or a reduction in the compensatio by reducing the amount thereof by subtracting the millage from thos properties withdrawn.

CITY IS INDEPENDENT CONTRACTOR

ELEVENTH: The management, regulation and control of City' Fire Department shall remain the sole obligation of City, and the relationship of City to Borough shall, upon this Agreement taking effect, be that of independent contractor.

IN WITNESS WHEREOF, the Parties hereto have executed these presents by resolution of their respective governing bodies,, duly authorizing the same.

ADDENDUM

TO CONTRACT TO FURNISH FIRE SERVICE

Whereas the parties hereto have heretofore entered into an Agreement whereby CITY agreed to furnish to BOROUGH's Fire Protectic District, the services of CITY's Fire Department to the same extent as if the area encompassed within the boundaries of the BOROUGH's Fire Protection District were a part of the incorporated area of the CITY and

Whereas BOROUGH agreed to pay to CITY during the term of said Agreement, an amount equal to the millage rate levied by the CITY for fire protection service in the CITY but no provision was made, nor account taken of the Capital Improvements of the Fire Department to date or in the future,

Now therefore, the parties hereto agree that the BOROUGH will transfer, and the CITY will accept the equity of the BOROUGH in its fire truck and equipment as the BOROUGH's contribution to the Capital Improvements of the CITY's Fire Department to date, and to make further contributions to the Capital Improvements of the Fire Department through assessment and taxation at the same time and on the same basis as may be done by CITY in the future.

IN WITNESS WHEREOF, the parties hereto have executed these presents by resolution of their respective governing bodies, duly authorizing the same.

KODIAK ISLAND BOROUGH

DATE: December 6, 1977

FROM: Borough Assessor/ Ed Haney

TO: Whom It May Concern

At the time of construction in 1973 the cost of building the Kodiak High School gymnasium was One Million One Hundred Fifteer Thousand Dollars ($1,115,000). Reproduction today would be approximately One Million Six Hundred Seventy Thousand Dollars ($1,670,000).

The swimming pool complex in 1973 cost One Million Thirty Five Thousand Dollars ($1,035,000) to build and to reproduce it today would approximately cost One Million Five Hundred Fifty Thousand Dollars ($1,550,000).

Totaling the two (2) buildings together shows a cost to build in 1973 of Two Million One Hundred Fifty Thousand Dollars ($2,150,000).

The reproduction of the two (2) buildings together in 1977 would come to Three Million Two Hundred Twenty Thousand Dollars ($3,220,000).

KODIAK ISLAND BOROUGH SCHOOL DISTRICT
POST OFFICE BOX 886
KODIAK, ALASKA 99615
(TELEPHONE (907) 486-3131)

JOINT AGREEMENT FOR THE USE & OPERATION OF GYMNASIUMS & SWIMMING POOL

This agreement entered into this 15th day of November 1977, by and between the KODIAK ISLAND BOROUGH, hereinafter referred to as the *BOROUGH*, the KODIAK ISLAND BOROUGH SCHOOL DISTRICT, hereinafter referred to as the *DISTRICT*, and the CITY OF KODIAK, hereinafter referred to as the *CITY*.

WITNESSETH:

WHEREAS, the *DISTRICT* has under its jurisdiction the operation and management of three gyms and one swimming pool within *CITY* boundaries, said gyms being the Kodiak High School gym, the Main School gym, and the East Elementary gym; and,

WHEREAS, the *BOROUGH* contributes to the *CITY* recreation program by making school facilities available to the City Parks & Recreation Department for public use; this they do in lieu of providing recreational funds to the *CITY*; and,

WHEREAS, the *DISTRICT* obligated itself before the election of February, 1972 to running the pool for the public; and,

WHEREAS, it is inconvenient and costly for the *DISTRICT* to run a public recreation program; and,

WHEREAS, said swimming pool and gymnasiums are physically convenient and capable of being used by the *CITY* and its program conducted

by the Parks & Recreation Department; and,

WHEREAS, maximum use can be made of said swimming pool and gymnasium facilities by the joint use thereof of the *DISTRICT* and the *CITY*, and it is in the best interests of the parties hereto and the public that such use be made thereof.

NOW THEREFORE, in consideration of the above premises and the undertaking and convenants of each of the parties as hereinafter set forth, it is agreed by and between the parties as follows:

1. TERMS:

This *AGREEMENT* shall be effective for a term of 7½ months, commencing on November 15, 1977, and ending on August 1, 1978. The *AGREEMENT* may be terminated by either party giving 30 days written notice.

2. USE OF POOL & GYMS:

The *DISTRICT* shall have the right of exclusive use of said swimming pool and gymnasiums upon regular school days, Monday through Friday of each week during each school year, from 7:30 AM to 5:00 PM of each of the said days, except that the *CITY* reserves the right to use the pool or gymnasiums for the public if they are not being used at that time by the *DISTRICT*. The *DISTRICT* shall also, in addition to the hours specified, have the right to use the pool and gymnasium facilities for school activities and athletic purposes, but the gymnasiums and pool shall not be used by the *DISTRICT* for any program designed, or by its nature competitive with the recreation program carried on by the *CITY*. However, the *DISTRICT*

may not retain the gyms or pool for the daily practices of their athletic teams beyond the hour of 7:30 PM.

3. FACILITIES:

The *DISTRICT* facilities which are the subject of this agreement include the pool, the gyms, the locker rooms, together with a limited amount of office storage space.

4. SCHEDULING OF FACILITIES

The *DISTRICT* shall have first priority in scheduling its activities. After the *DISTRICT* establishes its schedule, the *CITY* shall make up its recreation schedule. The *CITY* must provide the *DISTRICT* with at least one week advance notice prior to commencement or change of the *CITY* recreation time schedule. Once the *CITY* established their recreation schedule, the *DISTRICT* must give the City Parks & Recreation director at least one week advance notice before changing their *DISTRICT* schedule, and this schedule change must meet the approval of the City Parks & Recreation director and the School Superintendent. Use of *DISTRICT* facilities by groups outside the realm of the *CITY* or the *DISTRICT*, at times other than during regular school hours, will be scheduled by the *DISTRICT* Community School Coordinator with the approval of the *CITY* Parks & Recreation director.

5. DENIAL OF FACILITIES:

The *DISTRICT* reserves the right to deny the use of their facilities to groups which by their behavior may either do physical harm to the facilities or participants, or by their presence downgrade the moral

and ethical standards of the *DISTRICT*.

6. CITY OPERATIONS:

The *CITY*'s responsibility is restricted to public use of the gyms and the pool as well as daily maintenance of the pool. This means that the *CITY* will:

a. Hire, terminate, pay, and supervise all *CITY* recreation personnel.

b. Schedule all *CITY* recreation use programs and activities.

c. Do the pool vacuuming, filtration, chemical up-keep, and locker room clean-up.

d. Provide reimbursement to the *DISTRICT* for overtime custodial services incurred when *CITY* recreational activities last later than 10:30 PM, unless prior agreements are made for use of the facility past the alloted time.

e. Provide supervisory personnel for all *CITY* recreation activities and insure that *CITY* recreation participants have vacated *DISTRICT* facilities prior to the supervisor's conclusion of duties.

7. DISTRICT OBLIGATIONS:

The *DISTRICT* will at its sole cost and expense:

a. Provide heat, light, power, water, chemical supplies, and equipment necessary for both *DISTRICT* and *CITY* use.

b. The *DISTRICT* will continue to handle all major mechanical work and the annual pool overhaul.

c. Provide all necessary building maintenance for the gyms, pools, and supporting facilities.

d. Provide regular custodial services during the regular school year when facilities are vacated by *CITY* recreation participants and supervisors by 10:30 p. m.

8. FEES:

Since *CITY* expense for operating the pool must be met by gate receipts, all gate receipts collected by the *CITY* are to be the property of the *CITY*.

9. LIABILITY INSURANCE:

The *CITY* shall at all times maintain and keep in effect liability insurance covering its use of said facilities.

10. PROPERTY DAMAGE

The *DISTRICT* facilities or property thereon damaged or destroyed by reason of the negligence or acts of the *CITY* employees or persons using the *DISTRICT* facilities during the times that said facilities are subject to the exclusive use of the *CITY* shall be the responsibility of the *CITY*, and reimbursement for replacement or repair thereof shall be made by the *CITY* to the *DISTRICT*; provided, however, that nothing herein contained shall be construed to obligate the *CITY* to make repairs for damage which is due to ordinary wear and tear.

11. TERMS OF THIS AGREEMENT

The terms of the *AGREEMENT* may be renegotiated to meet the prerequisities of the Community Education Program.

D. Resolution 68-5-R Setting Amount Owed by City for Payment on Personal Property Taxes. The resolution was read. Mrs. Hajdu inquired why the Borough was just now collecting these taxes from the City for 1967. Mr. Valkama explained that the City could make better use of these funds than the Borough, and so the delay was beneficial to them; and also that the City is just now collecting its 1967 sales tax, out of which this payment is made. Further, the Borough supplemental personal property roll has just been completed for 1967. Mrs. Springhill moved, seconded by Mr. Arndt, that the resolution be adopted. Mr. Burt and Mr. Bullock wished to review the tax returns before any action was taken. Mr. Valkama commented that if further reviews were made, it would probably turn out that the City would owe more money because in 1967 there were no teeth in the law requiring that people living inside the City file for their personal property. Motion carried by unanimous roll call vote.

E. Approval of Tax Adjustments Nos. R-67-38 and R-67-39. Both of these lots were taken by ASHA in 1966 and should have been in ASHA's name for 1967 instead of John Thevik's. Mrs. Springhill moved, seconded by Mr. Bullock, that adjustments No. R-67-38 and R-67-39 be approved. Motion carried by unanimous roll call vote.

F. Approval of November 15, 1968, as Delinquent Date for Second Half Payment of 1968 Taxes. It was explained that the ordinance sets November 1 as the delinquent date, but that enough tax bill forms are left from 1967 to use for 1968 if November 15 is again used as the delinquent date for second half payments of taxes. Mrs. Springhill moved, seconded by Mr. Arndt, that November 15, 1968, be approved as the delinquent date for second half payment of 1968 taxes. Motion carried by unanimous voice vote.

G. Conveyance of Cemetery in USS 3511 to City. Mr. Best stated that the cemetery is presently being arranged haphazardly, and suggested that it be conveyed to the City since they have the necessary staff to properly carry out proper arrangements. After discussion, Mrs. Springhill moved, seconded by Mr. Arndt, that the cemetery in USS 3511 be conveyed to the City for $1.00 with the provisions that it be properly laid out for roads and access and in accordance with the Subdivision Ordinance, insofar as practicable for a cemetery. Motion carried by unanimous roll call vote.

H. Dewitt Fields re Anton Larsen Road. Mr. Fields stated that he had been asked by Okey Chandler on behalf of the people of Anton Larsen Bay and Port Lions to meet with the Assembly concerning the restoration of this road, which is covered now at high tide for one mile. He stated that a petition concerning the road had been submitted to the Governor, and that the reply stated that $500,000 would be required to reroute the road. However, local contractors felt that the road could be sufficiently raised for only $25,000 to $30,000. Mrs. Hajdu suggested that the State be requested to use maintenance funds for this purpose, that they be informed that cost estimates for the job were less than $100,000, and that the road is needed by the families in the area and by the people from Port Lions and Ouzinkie who use it, after coming in by boat, as a means of getting to Kodiak. Mrs. Springhill moved, seconded by Mr. Bullock, that a resolution be drawn up by the attorney incorporating the ideas which were suggested in this discussion to take care of the problem of the Anton Larsen Bay Road. It was suggested that copies of the resolution be sent to the Governor and Kodiak's Representative and Senator. Motion carried by unanimous roll call vote.

X CHAIRMAN'S REPORT

A. Legislation of Interest. Mr. Best pointed out the following legislation of special interest:

HB 375
HB 376
HB 432 for school construction grants.
HB 463--appropriation bill for HB 432.
SB 175--providing for State to pay for defaults of local school bonds. This would help to give Alaska a better bond rating and may lower interest rates.
SB 293--3% education wage tax.

B. Building Inspector's Vehicle. Mr. Best suggested that since the City furnishes gas for the vehicle, the Borough furnish necessary repairs. The Assembly concurred.

EXHIBIT F

KODIAK ISLAND BOROUGH

M E M O R A N D U M

TO: Stu Denslow/Borough Manager

FROM: Ed Haney/Borough Assessor/Appraiser

SUBJ: Lot 1, Hospital Subdivision, USS 1822
Appraised Valuation

DATE: November 29, 1977

This lot (5.92 acres) was transferred from the Kodiak Island Borough to the City of Kodiak in 1968 to be used as a cemetary, recorded in Book of Deeds 21 at pages 92 and 93.

Comparable land in this area was selling for $5,000 per acre in 1968. As this is all high and well-drained land the 5.92 acres would have had a value of $29,600.00.

The 1978 value of this property were it put to it's best use (not a cemetary) would be $25,000 per acre or $148,000. If this land were subdivided into residential lots the market vlaue would total $300,000 This is possible because of adjacent water, sewer and access.

As a cemetary, it's value is almost an intangible, however to purchase land under today's market conditions would come close to the $300,000 figure.

Department of Community
and Regional Affairs
511 West Fourth Ave.
Anchorage, Alaska

Dear Pat:

This is simply to confirm our conversation of last Friday, November 18, 1977. At that time I requested that the Kodiak hearing now scheduled for December 12, 1977 be rescheduled for later in that week to enable me to prepare the Borough's brief in sufficient time so that Commissioners would have the opportunity to review it prior to the hearing. You denied that request. The Borough is now proceeding with the case within the time frame you have set forth. Should the short time allowed appear to prejudice the Borough at a later date, the objection will be reiterated at that time.

I look forward to hearing from you later today in regard to the review of Commissio precedents we discussed.

Thank for your consideration.

Sincerely,

Joan M. Katz

EXHIBIT I

BEFORE THE LOCAL BOUNDARY COMMISSION FOR THE

STATE OF ALASKA

Re: Proposed Annexation of Certain Lands in the Kodiak Urban Area to the City of Kodiak	))))))

BRIEF OF THE RESPONDENT KODIAK ISLAND BOROUGH

Introduction

Annexation entails substantial financial, political and practical consequences for property owners and residents of the lands involved. To assess those consequences in connection with the Kodiak situation, three fundamental questions need to be asked: (1) whether annexation would serve any real purpose so far as the territory to be annexed is concerned; (2) whether the alleged equities on the City's part exist in fact, or have been advanced simply to justify a quest for additional revenues; and (3) whether adverse consequences would befall individuals within the territory, or without, should annexation occur. Respondent's analysis of these questions will address the relevant, specific factors set forth in 19 AAC 05.010, as well as the concerns raised in both the letter of May 1, 1978, from Sheila Gallagher to Stewart Denslow, and in the Preliminary Report from the Department of Community and Regional Affairs, dated May 10, 1978.[1] In light of the fact that this proposed annexation is a legislative one, with no opportunity for the people involved to express their opinions at the polls, abstract theories of symmetry in local government should not be afforded excessive weight. The

[1] The final report was not available at the time this Brief was being prepared.

JOAN M. KATZ
Attorney at Law
540 "L" Street, Suite 101
Anchorage, Alaska 99501
(907) 274-7634

realities of the Kodiak situation need to be examined.

I. What Needs Exist Within The Territory That Could Best Be Met By Annexation?

Annexation makes sense only if services are needed and desired by the people affected which can best be provided by the annexing government. The evidence in this case, however, is that people outside the City's current boundaries are generally content with not only their government, but also the kinds and levels of services they are presently receiving.

An attitudes survey conducted by the Anchorage Urban Observatory last year indicates that the three greatest concerns for residents outside the City are litter, roads and the high cost of goods.[2] Inside the City, residents are most concerned about the same two priority issues, although roads are placed above litter. The problems of physical isolation and "environment" tie for third place. Outside the City only one person in the sample rated utilities as a top priority; only one identified animal control as such. And not a single person identified police or fire service as the most urgent problem.

These findings are highly significant in reflecting a general, marked absence of desire on the part of people in the affected territory to change the kind, or raise the level, of services they receive - even when no price tag is attached. The only exceptions occur in connection with roads and litter.

a. Roads. Kodiak's roads are essentially State maintained, with only 13 miles of road under City jurisdiction and 15.5 miles within the Borough's authority. Annexation for the purposes of road maintenance would be nonsensical for two reasons. First, the people within the City are more dissatisfied with the condition of their roads than are the people outside the City,

---

[2] For more detailed information on this survey see Kodiak Island Borough Economic Analysis, submitted by Drs. Green and Hill as part of the Borough's presentation in this proceeding.

suggesting that the City is hardly the appropriate government unit to undertake further road work. In addition to the findings of the Urban Observatory study in this regard, there is the testimony of City residents like Charles Davidson, who stated at the December 12, 1977 hearing that he was opposed to annexation in light of the City's inability to adequately pave and/or oil the roads within its current jurisdiction.

Second, Borough voters have recently elected to adopt road power within Service District I of the Mill Bay-Monashka Service area. This power will enable the Borough to offer road service to those areas in which the property owners vote to foot the bill. Such an undertaking has previously proven successful in the Bells Flat area, where private contractors provide road maintenance. (See Exhibit H to Respondent's Brief of December 9, 1977, regarding the proposed Mill Bay Road Annexation.)

Comments by the Local Boundry Commission staff concerning the absence of a Borough public works department to provide road maintenance are irrelevant to the Kodiak situation. As indicated previously, the roads at issue here do not cover hundreds of miles, but rather approximately 15.5 miles. Private contractors are not only capable of providing maintenance, grading, snow removal, etc. for this amount of road surface; such contractual arrangements would seem to be a boon to the local economy. Finally, it should be noted that in Fiscal 1978 the people of the Russian Creek and Bells Flat areas voted to spend $38,000 on road maintenance for nine miles of road while the City spent $1,110,014 for 13 miles of road maintenance and construction. The people currently living outside the City's boundaries should continue to have the right to choose to spend $38,000 vs. $1,110,01 if they are satisfied with the lower level of service. Annexation would deprive them of that right to choose.

JOAN M. KATZ
ATTORNEY AT LAW
1814 HIDDEN LANE
ANCHORAGE, ALASKA 99501
(907) 274-1804

b. Litter. Litter, the other major concern of Kodiak residents in and outside of the City, also provides no basis for annexation The State again has responsibility for maintaining

its roadways and would be charged with litter removal in those areas. The Borough, pursuant to its planning, road and health powers would similarly be able to undertake this responsibility. To support its case for annexation, the City would seem to have the burden of showing that it could better meet this problem.

c. Sewer and Water. The only additional, significant need that the Local Boundary Commission might want to examine would be that for sewer and water. In some areas of the Borough outside the City, sanitation standards necessitate, and the people desire (although not as a top priority) sewer and water improvements. The analysis submitted by the independent consultants from the Alaska Urban Observatory indicates that there is no reason to believe the City could meet these needs at less cost than the Borough. Unlike the services of roads and police, moreover, sewer and water are public utilities, in the same category as telephones. As such, they must pay their own way. They could, theoretically, be provided by a private corporation. The expansion of sewer and water into the territories in question should, therefore, have no bearing on the issue of annexation. (See Green and Hill, Kodiak Island Borough Economic Analysis, at 7.)

A review of services needed in the affected territory thus reveals that annexation represents a theory without any practical application or rational nexus to the facts in this case. There is no cry for expanded police protection. There is no reason to deprive private contractors of the opportunity to provide road maintenance at the level the people can afford. In his letter of December 16, 1977 to Mr. Strandberg, the City Manager himself acknowledged: "I am certain you are aware that as soon as an area gets water and sewer from the core City they have no need to annex. This is especially true in the Kodiak urban area". (Exhibit A, at 2-3) The point made by Drs. Green and Hill, of

course, is that not even sewer and water requirements create any need or justification for annexation. From the territory's standpoint, annexation is simply not needed in any way, to provide any service.

II. Is the City Entitled To Annexation For Reasons of Equity?

It is arguable, though Respondent would oppose this notion, that even without a need for annexation, such action could be required if the City is presently being placed in an inequitable position by virtue of non-City residents' use and enjoyment of City facilities and services. The City took this position in its Mill Bay Road petition brief; the information presented by Respondent in connection with that annexation is equally applicable here. Respondent's previous brief summarized the facts regarding specific services mentioned by the City in its plea for "equity" as follows:

> The City complains that it "provides substantial benefits to residents and owners of properties outside of [its boundaries] without corresponding tax contributions for municipally provided services". (Petitioner's Brief, p.2.) Yet, sewer and water should be provided only upon assessment; fire protection is paid for by the Borough which levies a 2.27 mill rate on property owners within the District; parks and recreation services are in large part made available through the Borough-donated pool and gym; contribution is made by the Borough directly to the municipal library; the cemetery exists on a $300,000 plot of land given for $1.00 to the City by the Borough; the cargo dock, boat harbor, ferry terminal and airport are or should be self-supporting through user fees; and garbage collection is currently paid for by those who use it.

Also mentioned in Respondent's previous brief was the highly significant fact of the three percent sales tax levied by the City on all goods and services sold within the City or by City-based businesses. Strong concern with the "high cost of goods" as expressed in the Urban Observatory attitudes survey, indicates the substantial impact of this tax. In a memorandum prepared at the time of the previous annexation hearing in Kodiak,

the Borough Planning Director researched his own financial situation and presented figures establishing that as a non-City resident, he was paying more taxes to the City (as a result of the sales tax) than he was contributing to the Borough through personal and real property taxes. (Memorandum from Planning Director to Borough Manager, December 6, 1977, Exhibit B.)

Local Boundary Commission regulations contemplate that measures such as sales taxes can be used as alternatives, not supplements, to annexation. 19 AAC 05.010(a)(8) provides in part:

> In determining whether [property owners in the territory receive the benefit of City services without commensurate tax controls] the Commission will consider alternate methods available to the city for offsetting the cost of providing services to individuals or property beyond its property taxation powers . . . .

Through this sales tax (plus the contribution to firefighting equipment, dock user fees, etc.), non-City residents of the Borough more than pay their way. They pay not only for benefits they receive, but for benefits innuring only or principally to City residents. For example, $60,000 received from sales tax revenues (to which non-City residents contribute as much per capita as City residents) has been used to finance construction of water and sewer facilities within the City in the 1977-78 fiscal year. (City of Kodiak Budget 1977-78 Fiscal year.) Even more significant perhaps, a substantial percentage of the property taxes owed by City property owners are being paid by sales tax receipts garnered from non-City residents as well as City residents. While the appraised value of City property should have netted the City 1.3 million dollars in tax receipts, in fact only $655,000 is being collected. (City of Kodiak Budget 1977-78 Fiscal year.) Where is the equity in such an arrangement? If City residents are not even paying their own property taxes at this time, what possible justification can there be for seeking to tax people currently outside the City boundaries?

It is apparent, thus, that if any group of people is being treated inequitably, it is the territory residents: they pay City bills through sales taxes while contributing directly through user fees and the like for services that they utilize. The City, in truth, simply wants to spread it's overhead a little thinner - an understandable position, but one decidedly negated by the equities of the situation.

III. Would Annexation Have Any Adverse Effects Upon Territory Residents Or Other Kodiak Citizens?

It is evident that annexation is not warranted because of any need for City services or from any equitable standpoint. It should be recognized, in addition, that annexation could be extremely harmful to territory residents - and ultimately to the Kodiak community at large.

Respondent's previous brief on Hill Bay Road attempted to illustrate the relative costs to territory residents of provisions of water and sewer services with and without annexation. On the assumption that territory property owners would pay existing City taxes to acquire such services, it was determined that the price tag for the annexed resident would be 16.3 mills plus $25.00 per month in assessments, as opposed to 9.47 mills and $28.75 per month for non-City residents. (Respondent's Brief 12-09-77 at 3.) Drs. Green and Hill have calculated potential mill rates under annexation on the alternative assumption that annexation would simply shift some of the City's cost to the new territory. In that case the mill rate for City residents would be 15.19 mills - as opposed to 9.47 for non-City residents receiving sewer and water. (See Green and Hill at 12.) The difference under either method of calculation, is clearly substantial.

There is another consideration however, which is as important as the economic detriment to be suffered through annexation.

This is the potential effect on this relatively small community of the hostility that would be engendered by the imposition of annexation on a group of people who are adamantly opposed to it. An effort at unification was initiated by the City on October 27, 1977. (Resolution 23-77, Exhibit C.) The Borough responded in good faith, and scheduled a day long workshop attended by members of the public, City and Borough officials, a representative from Community and Regional Affairs and the former attorney of the Anchorage Charter Commission. As a result of that meeting, the Borough Assembly voted unanimously to put the question of unification on the ballot this Fall. (Resolution No. 78-34-R, April 6, 1978, Exhibit D.)

Unification is an appropriate means by which to avoid duplication of government units and promote more efficient government. Most importantly, it is also a means well suited to healing political wounds and allowing citizens to work together toward common goals. If the Local Boundary Commission were to try to design a tool aimed at destroying any hope for unification in Kodiak, it could propose no better means than the contemplated annexation. As testimony at the December 12, 1977 hearing established, many citizens of the Borough outside the City limits are bitterly antagonistic towards the City as a result of actions or inactions attributable to that government. Many citizens, further, are outraged by their lack of opportunity to vote their views on the annexation question. Should City dominion now be imposed upon them, the chances of a harmonious movement towards unification would be destroyed.

Conclusion

Annexation may have a theoretical appeal along the lines of political neatness. Theory is not reality, however, and the fact is that without annexation there will be service districts,

with annexation, there will probably be differential taxation with inconsistent levels of service, and with unification, there would still -- and again -- be service districts. The diference between the present situation and annexation -- the only two options available to the Local Boundary Commission -- is in the degree of choice to be exercised in the annexed territory. And that choice of course translates into substantial impact on the pocketbooks of the property owners involved.

The Local Boundary Commission is undoubtedly cognizant of its significant power and responsibility in considering legislative annexations. Respondent urges the Commissioners to ask themselves the three questions posed in this Brief while deliberating the merits of this case. The answers, the Borough feels confident, will show no need for services that the Borough cannot provide at a cost comparable to or lower than the City; no inequity done to the City by non-City residents; and adverse effects on both territory residents and other Kodiak citizens alike should annexation be approved. In light of these realities, Respondent respectfully submits that legislative annexation in this case would be an abuse of discretion. Respondent requests that annexation be denied.

DATED this 15th day of May, 1978.

KODIAK, ALASKA
RECEIVED
DEC 19 1977

Dear Mr. Strandberg:

I do not envy the Commission's position when attempting to relate to the problems such as we have here in Kodiak. I respect your willingness to listen to many statements that are irrelevant; however, I do not believe they should bear much weight in your decision.

When I finished my initial remarks, I asked for an opportunity to reply to the Respondent's Brief. For one reason or another, you did not honor my request. I realize your desire not to prolong the hearing; however, there were many points that were made that were not true. It is too bad that you were not willing to give me an opportunity to clear them up for you and those attending the meeting.

I think it should be made known in what capacity your fellow Commission member, Ms. Gallagher, is working for the Boreegh. It is obvious that if her employment has anything to do with any of the issues mentioned in the annexation proceedings she should disqualify herself from any court proceedings, as well as Commission activities. Her ability to ask questions during the hearing that would bear on possible litigation would seem reason enough for her to disqualify herself. I would like to hear from you or Ms. Gallagher regarding this issue.

There are several points I would like to make that were brought out in the testimony of the citizens.

EXHIBIT A

1. The City sewage treatment plant is 100% funded by the Federal and State Governments and City of Kodiak. The City's portion is financed in part by general obligation bonds. There are no Borough funds involved this sewage treatment plant.

2. It is obvious that the City is not going to reap any huge benefits from the annexation proposal. Half of the lots are in public ownership, there are no industries, pipelines, etc. that would constitute a windfall to the City if the annexation did occur.

3. Postponing the decision on this annexation until after the legislature begins is not fair. The merits are quite obvious. I should not have to go into any detail on this.

4. As far as I could ascertain, there was not one registered voter from the area in question who spoke against the annexation. If an election were held rather than the public hearing, none of those people would have been able to voice their opinions. I think it was incumbent upon the Commission to make this clear. One of the items I wished to make known was that no resident of the area spoke on the annexation. The only people involved were property owners and those renting or leasing for business purposes.

5. At the Borough meeting on December 1, I tried to explain that the annexation of the Mill Bay Road area was the only item to be considered at the hearing. The Borough overreacted and sent out notices to all post office box holders as well as the notices in the paper. I feel that it is this kind of activity that turns people off toward government and makes all our jobs more difficult.

6. As I understand it, there are five members of the Boundary Commission and since two can hold a public hearing but three need to make a decision, the other two members that were absent also need to concur in the decision to hold another public hearing on this annexation.

It is quite obvious that the residents of the Borough and City residents who own property in the Borough are against annexation because of the additional financial burden. As far as I am concerned, that is no reason for these people not to be annexed. From your comments, you seem to have similar feelings. I am going to ask the Council of the City of Kodiak to wait six months before meeting with the Boundary Commission again since no annexations can occur until 1979. The Borough will go ahead with their service areas and unnecessary duplication of taxing structures will automatically result. I am certain you are aware that as soon as an area gets water and sewer from the core City they have no need

to annex. This is especially true in the Kodiak urban area.

I would like to take this opportunity to thank you for visiting with us. I really feel that you have quite a burden on your shoulders. I appreciate that fact only too well; however, I still feel that you have accepted your positions of trust and you have a responsibility to the municipalities that are depending on you for proper decisions.

Very truly yours,

CITY OF KODIAK

CONFIDENTIAL MEMORANDUM

To: Borough Manager
From: Planning Director
Subject: City and Borough Taxes, Individual Breakdown
Date: December 6, 1977

Sales Taxes:

Item	Amount of Tax (Month)
Food	$ 21.00
Telephone	2.25
Electricity	2.55
Fuel Oil (Furnace)	7.50
Clothing	3.00
Automobile Gas and Oil	1.80
Tire Repair	.54
Cosmetics	1.00
Water	.42
Dry Cleaning	.60
Cable Television	.51
Entertainment (Movies)	.75
Appliances (Large & small, Replace & repair)	1.05
Cards, Gifts, Candy	1.50
Books, Magazines, Newspaper	1.00
Meals Out	6.00
Beverages	5.00

Average Amount of Sales Tax Paid to City of Kodiak, $ 56.47 per Month;

Total Yearly Amount Sales Tax Paid to City (x 12), $ 677.64

Average of Combined City and Borough Taxes for non-City Resident, $1,117.68

Percentage of Total Tax Paid to the City of Kodiak, 60.629%

Percentage of Total Tax Paid to Kodiak Inland Borough, 39.370%.

Of the $440.04 paid to the Borough, 2.27 Mills or $109.44 were paid over to the City of Kodiak for fire protection, thus leaving the Borough with a net tax collected in the amount of $330.60, and the City of Kodiak with a total $787.08.

Percentage of Adjusted Total Tax Paid to the City, 70.421%,

Percentage of Adjusted Total Tax Paid to the Borough, 29.579%.

Respectfully submitted,

H Milligan

CITY OF KODIAK
RESOLUTION NUMBER 23-77

A RESOLUTION OF THE COUNCIL OF THE CITY OF KODIAK REGARDING THE ESTABLISHMENT OF A JOINT COMMITTEE TO STUDY UNIFICATION

WHEREAS, major changes are occurring in the entire Kodiak Island Borough, and

WHEREAS, the tax base is not sufficient to support excessive government and

WHEREAS, the relationships between the City of Kodiak and the Kodiak Island Borough demand close cooperation and coordination, and

WHREEAS, unification of the two governments might be in the best intere of the residents of the Kodiak Island Borough;

NOW, THEREFORE, BE IT RESOLVED that the Council of the City of Kodi wishes to participate in a study task force along with the Borough Assembly members and private citizens to study the advantages and disadvantages of unification and to recommend whether or not unification would be in the best interest of the residents of the Kodiak Island Borough. The Council respectfully requests the Borough Assembly to participate in this task force and to meet with the Council in worksession to determine how best to implement this study group.

PASSED AND APPROVED this 27th day of October, 1977.

Fern Flint
MAYOR

CITY CLERK

EXHIBIT C

A RESOLUTION PLACING BEFORE THE VOTERS OF THE KODIAK ISLAND BOROUGH THE QUESTION OF ELECTION OF A CHARTER COMMISSION TO PREPARE A UNIFICATION CHARTER.

WHEREAS, Alaska Statute 29.68 provides a method whereby a borough and the cities within it may be united into one government under a home rule charter, and

WHEREAS, the Assembly has determined that the voters of the Kodiak Island Borough should be given an opportunity to determine whether they wish to create a charter commission to prepare a home rule charter to be approved or disapproved by separate vote of the voters within and outside first class cities at a subsequent election.

NOW THEREFORE BE IT RESOLVED by the Kodiak Island Borough Assembly:

Section 1. The following proposition shall be submitted to the voters at the next regular Borough election to be held on October 3, 1978, which is at least 90 days after adoption of this resolution:

Shall a charter commission be formed (and charter commission members be elected as elsewhere provided on this ballot) to perpare, adopt and submit to the voters for their approval or rejection a proposed charter uniting Kodiak Island Borough and all cities within it as a single unit of home rule government having the powers, duties, and functions of a unified government as authorized by law?

Yes ( ) No ( )

Section 2. Effective upon the adoption of this resolution, a call is issued for nominations of charter commission candidates, specifying the filing deadline, and outlining the procedures for making nominations as follows:

(a) Eleven qualified voters shall be elected to a charter commission. Three (3) at large and eight (8) from (1) cities, or (2) the area outside cities. The number of members elected from cities and from the area outside cities shall be proportionate to the respective populations, as determined by the Department of Community and Regional Affairs.

(b) Charter commission candidates shall be nominated by petition signed by at least 50 qualified voters of the area from which the candidate seeks election, or by a number of qualified voters from that area equal to at least 10 per cent of the number of votes cast from that area in the last regular Borough election, whichever is less.

(c) Nomination petitions shall be filed with the Borough Clerk not later than September 1, 1978, which date is at least 30 days after notice of the call for nominations has been given through the Borough. Nominating petition forms shall be provided by the Borough Clerk.

(d) Procedures for acceptance of petitions, withdrawal of petitions and other election matters shall comply with all requirements of State law, and with the requirements of Title 2 of the Code of Ordinances of the Kodiak Island Borough to the extent consistent with State law.

Section 3. The vote on the proposition stated in Section 1 shall be tabulated in two separate classification.

One classification shall consist of all votes cast in the (first class and home rule cities) of the Borough. The other classification shall consist of all votes cast in the remaining areas of the Borough. In order for unification to be approved, it is necessary that a majority of the votes in each classification favor unification.

If unification is approved, those charter commission candidates who received the highest number of votes from their respective areas shall serve as members of the commission.

PASSED AND APPROVED by the Assembly of the Kodiak Island Borough this 6th day of April, 1978.

KODIAK ISLAND BOROUGH

Betty Wallin, Mayor
Kodiak Island Borough
Kodiak, Alaska

Honorable Betty Wallin:

In accordance with your request, Dr. P.J. Hill and I conducted an analysis to determine the economic consequence with regard to the matter of annexation of portions of the Kodiak Borough by the City of Kodiak. To facilitate the study, we have thoroughly dissected the annual operating budgets of both governmental entities, that is, the Borough and City, and analyzed a substantial amount of information contained in reports produced by other consultants and government entities.

We have generally concluded that the residents in the area being considered for annexation will not derive appreciable economic benefit from the City's proposed boundary expansion. From an economic prospective, the only justifications for expanding the governmental and taxing authority of the City are: (1) if the residents outside the City are dissatisfied with the level of service they are receiving, (2) if the City can provide services more efficiently and economically than the Borough and (3) if residents inside the City are carrying a disproportional burden for service shared by area-wide residents. Relevant information suggests that none of these conditions exist; therefore, annexation is not warranted. The basis for these conclusions are summarized in numerical order throughout the remainder of this report.

Sincerely,

G. Hayden Green

KODIAK ISLAND BOROUGH ANNEXATION ECONOMIC ANALYSIS

1. Borough residents level of satisfaction with existing services:

Members of the Anchorage Urban Observatory research staff were commissioned to conduct a survey of attitudes of residents in the Kodiak Borough as part of an OCS impact study in 1977. As part of that study, respondents were asked questions regarding their level of satisfaction with services received. A total of 472 individuals completed the survey. To determine if the level of satisfaction with services received varies between residents within the City and those residents in the proposed annex area, some additional computer and statistical analyses were conducted of the original questionnaire responses.

Individuals living in the village who responded to the questionnaire were omitted. The balance of the respondents were separated into two groups, that is, those people within the City limits and those in the proposed annex area. One question asked was, "What do you dislike about your area?" Of the 199 respondents living within the City, 15.1% listed roads; and 13.1% listed litter as their main area of dissatisfaction. Of the 119 individuals responding to the questionnaire who live in the proposed annex area, 12.6% listed roads; while 13.4% listed litter. This was the area with which residents registered their greatest level of dissatisfaction (roads and litter). In the Table attached, it can be seen that very little difference exists between the level of dissatisfaction with services between individuals living within the City limits and those living outside. In fact it should be noted that, while 2.5% of the respondents living within the City listed police and fire protection as their number one concern, not one person living outside the City listed it as an area of dislike. (See Table 1)

In another question residents were asked to rank several factors which they considered major problems facing the Kodiak Borough. In Table 2 the percentage of individuals listing various factors as their number one concerns are shown. It should be noted that only 5 percent of the respondents living outside the City listed inadequate public facilities and services as a primary concern.

A third question queried residents about those areas they felt were the communities' most pressing needs. Again, we separated respondents within the City and those in the proposed annex area. The factors listed as being the most pressing need were housing and roads by both sectors of the areas' population. Nine percent of the City's residents listed public services, water and sewer as a pressing need; while only 4.2 percent outside the City listed it as their first concern. (See Table 3)

In a subsequent question, residents were asked to rate community facilities and service as either presently being adequate, needing upgrading at the present time or needing upgrading in the future. A perusal of Table 4 suggests that residents outside the City have equal concerns with the level of services they receive. (See Table 4)

Several important implications pertinent to the issue of annexation are gleaned from the survey data:

1. Individuals within the City limits and those persons outside the City have similar attitudes towards the level of service they receive, that is, a comparable level of satisfaction with regard to public goods in relation to their cost.

2. The services of greatest concern to both City and Borough residents are roads and litter conditions. According to state records, the City maintains 13 miles of roads; while the Borough maintains 9 miles of roads. The remaining road system is state or privately maintained. The survey results suggest that residents do not perceive the City as doing a better job maintaining their road systems than the Borough is with its roads.

3. The survey results clearly suggest that the City is not more astute at providing services to local residences than the Borough government. There is some dissatisfaction among City residents with some services provided by the City of Kodiak, i.e. law enforcement, animal control, airport, parks, and roads. Within those services provided area-wide by the Borough, there exists a relatively high level of resident satisfaction, i.e. medical service and education.

4. The survey results indicate that individuals in the outlying areas are satisfied with the level of service they are receiving. This would suggest that the initiative to expand the boundaries of the City limits originated within the City or from a minority group.

2. Can the City provide services more efficiently and economically than the Borough?

One other area upon which the annexation decision should be predicated is the cost of providing public services. The City asserted in the original petition that it could provide services to the area in question more efficiently through annexation than otherwise.

In discussing this, several things need to be well defined. First, it is desirable to separate public goods from public utilities especially with respect to governmental finance. There are some goods that local governments provide that are, in reality, public utilities. Sewer and water systems fall under this category. Those who receive the benefits from these goods are easily identified; and these systems should, if possible, be supported by user fees. These facilities should not be financed by general taxes.

Secondly, with respect to the financing of public goods, it is possible to go the service district route efficiently. All that is required is an institutional arrangement whereby those who receive the benefits can be assessed in proportion to the costs. (The costs would include some prorata share of the fixed plant, not just thin marginal cost.) There is no loss in efficiency in doing this through service districts, and there is no economic reason for necessitating annexation. Expansion of services may produce some economies of scale (the larger the operation, the lower is the cost per unit of output); yet these can be realized without annexation. The service district would seem a more desirable route because of the ability of the residents to choose which public utilities they want.

Public goods are those types of goods which must, by necessity, be provided through taxation (police, planning, general administration, parks, etc.); yet there is no reason to believe that they require the annexation process. They could be provided on the basis of service districts and differential taxation. It should be remembered that the benefits of the service (public good) do have geographical limitations.

Further, it is doubtful than any particular government has a unique advantage in terms of production costs. Both the Borough and the City have to buy their resources in the same market, and they face the same types of technology. There is probably no economic rationale for having a service provided by one government over another.

To provide a basis for comparing the cost and operating efficiency of the two governments, we used the 1977/78 operating budgets of the two entities. (See Table 5)

It should be noted that several duplicated positions exist within the Borough and City governments. These will not be eliminated if the City boundaries are expanded.

A preferable alternative to annexation would be unification. If the two governments were unified, the positions listed in Table 6 could be eliminated. It should be noted, however, that the historical experience of unification efforts have not resulted in substantial cost savings. Where costs are saved in one area, they are often absorbed in others. The primary advantage of unification is the elimination of the conflict that often arises where two governments serve the same citizenry.

3. Are residents inside the City carrying a disproportional burden for services?

Kodiak is particularly concerned that they (City residents) are paying for many "public goods" that are used by people who live outside the City boundaries. The charge is that these non-city residents are "free riders." It would be useful to examine sources of revenue for the City and identify revenues that are paid by City residents and by non-residents.

The population of the respective areas (City and surounding area) is computed as follows: The total population of the City (official population figures used by the State of Alaska for revenue sharing) and the Borough in 1977 is 4,960 and 7,901 respectively. The population of the five second-class cities in the Borough (these are Akhiok, Larsen Bay, Port Lions, Ouzinke and Old Harbor) totaled 940. It will be assumed that there are approximately 200 persons living in other areas (areas outside cities). Therefore, the total population living in the greater Kodiak (City) area is 7,901 less 1,140 or about 6,761. Of that total, 4,960 live in Kodiak city; and about 1,800 live in the surrounding area. Therefore, of the total resident population in the greater area, City residents account for approximately 73 percent which implies that the surrounding area holds about 27 percent of the population.

Additionally, the migratory labor force accounts for a significant portion of those people who are hit by sales taxes. Accounting for a trend, it would appear that, on average, the labor force is 13 percent higher than the permanent residents would support. This is due to the cyclic nature of employment.

Thus, there would appear to be a significant portion of the population that would be hit by the sales tax who are not permanent residents of Kodiak city. Assuming that there are not wide differences in the distribution of income between residents (of the City) and non-residents, it would not be unreasonable to assume that people would pay the same amount in sales taxes to the City, no matter where they lived either within the City, the surrounding area or were transient labor force. Conceivably, what I can account for would seem to indicate that residents of the surrounding area and transient labor force (in covered employment) would probably account for about 40 percent of the total sales taxes collected. Additionally, there are others who pay sales taxes who are not accounted for by this figure (any sales that are made to Borough residents outside the greater Kodiak city area which would include all the outlying villages and any purchases made by the U.S. coastguard personnel). Also, there are significant sales taxes paid by people who work in Kodiak in the summertime who are not in covered employment; this would include all the sales made to fishing boats from the outside. Thus, the portion of sales taxes paid by non-city residents is probably greater than 50 percent.

One of the traditional arguments for a sales tax, at least in this instance, would seem to hold true. Sales taxes can be levied to tax people who might otherwise escape taxation, notably, tourists, transients, and non-residents of a political jurisdiction.

Other taxes of the city that are ultimately paid by non-city residents would include their portion of the property taxes that are shifted forward by commercial businesses within the City. Traditionally, across the U.S., businesses account for about 50 percent of property taxes (see Advisory Commission on Intergovernmental Relations, Federal-State-Local Finances: Significant Features of Fiscal Federalism, 1973-74 ed., Washington, D.C., p. 173). It is commonly believed that businesses shift large portions of the property tax on to the consumer in the form of higher prices. For example, the Port of Kodiak included $83,000 as a payment to City government in lieu of property taxes. This payment was included as part of the rate base in calculating charges for use of the terminal. This shifting is especially true in non-competitive market structures which is characteristic of the Kodiak economy. Thus if 50 percent of total retail sales which are made in Kodiak are made to non-city residents and are passed along in the form of higher prices, then it would be possible to conclude that approximately 25 percent of the property taxes paid to the city are, in fact, paid by non-city residents.

In terms of the total tax revenue Kodiak city collects, the City residents collect a significant portion of their taxes from people who do not reside in the City. Of total property taxes paid, we can attribute $163,750 to non-residents; and, of the total sales tax revenue ($1,250,000), approximately half ($625,000) can be attributed to non-residents. Thus it would seem as though non-residents pay as much as $788,000 into the purse of Kodiak city which accounts for almost 41 percent of total tax revenue. It can hardly be said that there is a significant "free rider" problem.

It is interesting to examine what would happen to property taxes in the area to be annexed if annexation were to take place and the City spread its property taxes out over a larger tax base. Currently, there are four service areas where differential taxation is imposed. These include: the City (TCA1), the fire district (TCA8), the road district (TCA9) and the villages (TCA9). The fire district and the road district property would be added to that of the City upon annexation; both of these areas hold about 12.85 percent of the total property in the Borough. The City, on the otherhand, contains 81.17 percent of total property in the Borough.

By using the mill rate and the tax base of the areas to be annexed along with the City, it is possible to examine what would happen if the property tax of the City were spread over the whole area. Currently the City is taxed at a 16.33 mill rate; the surrounding area mill rate is 7.23 with an additional assessment of 0.75 mills in the road district and 2.27 mills in the fire district. If the focus of annexation were to simply shift some of the cost to the outlying areas, the same total amount would be collected with the mill rate of the various areas being equalized. The overall mill rate would be 15.19 mills -- a decrease of 1.14 mills in the City (a decrease of $85.5 on a $75,000 home), an increase of 5.69 mills in the fire district (a $426.00 increase in property taxes on a $75,000 home), and an increase of 7.21 mills in the road district (an increase of $540.75 on a $75,000 home) for residents outside the City.

Further, it might be noted that the area to be annexed includes the U.S. Coast Guard base. Thus the retail sales on the base would be subject to the City sales tax which would add to the City revenues significantly. It is difficult to know how much this will add to the City revenues. The Office of non-appropriated fund for the Coast Guard reported that this total operation was approximately $3.5 million. While most of that was the BX and similar activity, the precise amount that would be hit by a retail sales tax would be difficult to determine. If, for example, $2.0 million were covered by the retail sales tax, the City would collect $60,000. This is about five percent of the total tax revenues for the City.

Some questions raised by the annexation question:

1. What needs exist wi hin the area to be annexed that would best be met by annexation?

2. Is the City entitled to annexation for reasons of equity?

3. Would annexation have any adverse effects upon those residing in the area to be annexed or upon other Kodiak residents?

4. Does the annexation proposed meet the standards for annexation as contained in 19 Alaska Administrative Code 05.010 ? (See copies given Committee members)

Points for consideration raised by Jack Chenoweth on Kodiak annexation issue -- January 29, 1979

Re the character of local government in Alaska:

1. The adaptation of local government to continually changing conditions is a characteristic of Alaska's local government system.
2. The decision regarding changing boundaries must be taken not by those immediately affected but by a state agency (the Local Boundary Commission) on the basis of independent evaluation.

Points related to the purpose of legislative oversight on annexation questions:

1. As political subdivisions, the cities and boroughs which have been incorporated are established to perform portions of the state's responsibilities for government that they are capable of performing. The state cannot escape responsibility for the essential quality and competence of the units of local government which exist and operate in accordance with applicable state statutes.

2. Local government involves the discharge of legal responsibilities. The capacities and abilities of municipalities to accept and discharge responsibilities greatly varies. The review process offers an opportunity for the legislature to gauge the capacities of the local government to provide services throughout an annexed or expanded area.

3. The effect of the boundary change on the epople involved is a legitimate concern. As taxation is always the cental factor in annexation decisions, one should question if the levels of taxation can be related to levels of service to be offered and whether annexation, with its attendant tax burden changes, will contribute to a better sharing of the burdens and opportunities for local government throughout a metropolitan region.

4. The resultant relationship of the annexation on city/borough relations is also to be considered. The legislature may do well to consider whether fulfillment of the annexation will have an effect on the range of political, service and other relationships between the city and borough and whether, in the short-range and in the long run, those relationships will grow stronger.

5. The legislature has the opportunity to review the boundary change for compliance with proper administrative procedures. Was the hearing properly noticed? Were those in attendance given opportunity to comment? Did the Commission adhere to its own requirements? Etc.

HOUSE COMMUNITY AND REGIONAL
AFFAIRS COMMITTEE

Matter of the annexation of territory to the City of Kodiak

January 29, 1979

YOU HAVE ASKED ME HERE BRIEFLY TO PROVIDE AN OVERVIEW OF THE ROLE ENVISIONED FOR THE LEGISLATURE IN ITS REVIEW OF AN ANNEXATION WHICH HAS BEEN RECOMMENDED BY THE STATE'S LOCAL BOUNDARY COMMISSION. THAT IS NOT AN EASY TASK. AND, WHILE MY REMARKS SHOULD BE UNDERSTOOD BY YOU TO BE LESS IN THE NATURE OF "RULES" THAT MUST BE FOLLOWED THAN THEY ARE "OBSERVATIONS" OR "SUGGESTIONS" THAT MAY BE CONSIDERED, I HOPE THAT THEY WILL HELP YOU TO FOCUS ON THE MERITS OF THE ARGUMENTS THAT ARE TO BE PRESENTED ON BOTH SIDES OF THE MATTER FREE OF THE EMOTIONALISM THAT IS CHARACTERISTIC OF VIRTUALLY EVERY SIGNIFICANT BOUNDARY CHANGE.

THERE IS A PURPOSE TO THIS PROCESS. IT IS A MANDATE OF THE ALASKA CONSTITUTION THAT THE ALASKA LEGISLATURE REVIEW AND CONSIDER BOUNDARY CHANGES FAVORABLY RECOMMENDED BY THE STATE'S LOCAL BOUNDARY COMMISSION. THE SOURCE OF THAT MANDATE IS ARTICLE X, SECTION 12, PART OF THE LOCAL GOVERNMENT ARTICLE OF THE STATE CONSTITUTION:

> A local boundary commission or board shall be established by law in the executive branch of the state government. The commission or board may consider any proposed local boundary change. It may present proposed changes to the legislature during the first ten days of any regular session. The change shall become effective 45 days after presentation or at the end of the session, whichever

is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house.

THAT RESOLUTION, HOUSE JOINT RESOLUTION 10, OFFERED BY REPRESENTATIVE ZHAROFF, IS, OF COURSE, THE MECHANISM BY WHICH THE LEGISLATURE MAY EXPRESS ITS DISAPPROVAL.

OVER THE WEEKEND, I SPENT SEVERAL HOURS RESEARCHING ANY INFORMATION THAT WOULD SHED LIGHT ON WHAT WAS INTENDED BY THIS CONSTITUTIONAL PROCEDURE. I FOUND SIGNIFICANT COMMENTARY CONCERNING THE ROLE AND RESPONSIBILITY OF A PROPOSED (FROM THE PERSPECTIVE OF 1955-56) COMMISSION OR BOARD TO CONCERN ITSELF WITH DEVELOPMENT OF A LOCAL GOVERNMENT FRAMEWORK ADAPTABLE TO MEET THE NEEDS OF DIFFERENT AREAS OF THE STATE AND THE PRINCIPAL ROLE ASSIGNED TO IT OF REVIEWING AND TAKING ACTION ON CHANGES IN BOUNDARIES OF MUNICIPALITIES. TYPICAL WERE THESE COMMENTS, COMPOSED AFTER THE CONSTITUTION HAD BEEN DRAFTED BUT BEFORE THE PROCLAMATION OF STATEHOOD WHICH WOULD GIVE LIFE TO THE PROPOSED CONSTITUTION:

> The constitutional provision regarding local boundaries contained in article X, sec. 12, was written for the purpose of unfreezing municipal boundaries and making them readily adjustable to changing needs resulting from the growth and movement of population and from changes in the demands for local services. The section of the Constitution was <u>designed to overcome roadblocks which vested local interests and prejudices in small segments of natural communities often put in the way of a proper readjustment of local boundary lines.</u> . . .

FURTHER ALONG IN THE SAME DOCUMENT, THERE APPEARS THIS ADDITIONAL OBSERVATION:

> The basic assumption in this discussion of annexation is one which is implicit in the local government article of the State Constitution. The assumption is that worthwhile local home rule depends upon the thoughtful and courageous exercise of the state's responsibility for establishing and maintaining ... responsible self-government. The State cannot discharge its responsibility for local institutions by automatically ratifying the petitions or votes of any groups of local citizens that may happen to express themselves favorably or unfavorably with respect to ... annexation. To pursue such a course would result in such a conglomeration of local jurisdictions as would make a mockery of the whole concept of local self-government.

TWO POINTS, THEN, WITH REFERENCE TO THE MATERIAL QUOTED: FIRST, THE ADAPTATION OF LOCAL GOVERNMENT TO CONTINUALLY CHANGING CONDITIONS IS A CHARACTERISTIC OF ALASKA'S LOCAL GOVERNMENT SYSTEM; SECOND, THAT DECISION MUST BE TAKEN NOT BY THOSE IMMEDIATELY AFFECTED BUT BY A STATE AGENCY (THE LOCAL BOUNDARY COMMISSION) ON THE BASIS OF INDEPENDENT EVALUATION.

NOW, WHILE THERE IS A SIGNIFICANT AMOUNT OF MATERIAL ANALYZING OR COMMENTING UPON THE NECESSITY FOR AND PROPER ROLE OF A STATE BOARD TO REVIEW AND CONSIDER LOCAL BOUNDARY CHANGES, THERE IS VIRTUALLY NOTHING TO DESCRIBE THE PURPOSE OF LEGISLATIVE OVERSIGHT. THE COMMENTARY OFFERED BY THE DRAFTSMEN OF THE STATE CONSTITUTION IS UNENLIGHTENING. OTHER SOURCES, NOTABLY EFFORTS BY THE LEGIS-

LATURE AND THE COURTS TO FILL THE GAP, ARE USEFUL AS COMMENTARY, BUT OFFER NO FIRM RULES. LET ME OFFER, THEN, SOME OF MY OWN THOUGHTS.

YOU MUST UNDERSTAND, FIRST, THAT THE CITIES AND BOROUGHS OF THE STATE OF ALASKA ARE POLITICAL SUBDIVISIONS OF THE STATE -- CREATURES OF THE STATE, SOMEONE HAS CALLED THEM, AND, AS THE ELEVENTH BIENNIAL LEGISLATURE WENDS ITS WAY INTO HISTORY, AND YOU ARE CALLED UPON TO CONSIDER TESTIMONY ON ONE OR ANOTHER BILLS BEARING ON LOCAL GOVERNMENT STRUCTURE, FUNCTION, AND FINANCES, YOU WILL BETTER UNDERSTAND THE CHOICE OF THAT WORD "CREATURES." AS POLITICAL SUBDIVISIONS, THE CITIES AND BOROUGHS WHICH HAVE BEEN INCORPORATED ARE ESTABLISHED TO PERFORM PORTIONS OF THE STATE'S RESPONSIBILITIES FOR GOVERNMENT THAT THEY ARE CAPABLE OF PERFORMING. GENERALLY, THE MORE THAT CAN BE PERFORMED AT THE INSTANCE OF LOCAL OFFICIALS, WITHOUT DETAILED ATTENTION FROM STATE OFFICIALS, HOPEFULLY, THE BETTER FOR ALL CONCERNED. BUT THE STATE CANNOT ESCAPE RESPONSIBILITY FOR THE ESSENTIAL QUALITY AND COMPETENCE OF THE UNITS OF LOCAL GOVERNMENT WHICH EXIST AND OPERATE IN ACCORDANCE WITH APPLICABLE STATE STATUTES. THUS, THE LEGISLATURE'S ROLE -- FROM THE OUTSET, EVEN WITH RESPECT TO ANNEXATIONS -- IS ONE OF OVERSIGHT.

LOCAL GOVERNMENT INVOLVES THE DISCHARGE OF LEGAL RESPONSIBILITIES, BOTH THOSE THAT MAY BE ACCEPTED BY THE VOTERS OF THE COMMUNITY AND THOSE WHICH MAY BE IMPOSED BY THE STATE. THE LEGISLATURE SHOULD UNDERSTAND, AND I THINK IT DOES GENERALLY UNDERSTAND, THAT THE CAPACITIES AND ABILITIES OF MUNICIPALITIES TO ACCEPT AND DISCHARGE THESE RESPONSIBILITIES GREATLY VARIES. THUS, THE REVIEW PROCESS OFFERS AN OPPORTUNITY TO GAUGE THE CAPACITIES OF THE LOCAL GOVERN-

THE CASE BOOKS AND MEETINGS OF MUNICIPAL GOVERNMENTS ARE REPLETE WITH THE RESULTS OF LITIGATION, THREATS OF LITIGATION, AND REACTIONS TO LITIGATION AS CITIES AND BOROUGHS STRIVE FOR POLITICAL ACCOMODATION, IF NOT FOR POLITICAL BALANCE. IN THREE MAJOR URBAN AREAS, ANCHORAGE, JUNEAU, AND SITKA, THE PROBLEM HAS BEEN RESOLVED BY UNIFICATION. IN OTHERS, NOTABLY FAIRBANKS AND KETCHIKAN, MINOR BOUNDARY ADJUSTMENTS HAVE SERVED TO ACHIEVE THAT BALANCE. THAT SAME PROCESS MAY NOW BE UNFOLDING IN THE KODIAK ANNEXATION. THE LEGISLATURE MAY DO WELL TO CONSIDER WHETHER FULFILLMENT OF THE ANNEXATION WILL HAVE AN EFFECT ON THE RANGE OF POLITICAL, SERVICE AND OTHER RELATIONSHIPS BETWEEN THE CITY AND THE BOROUGH AND WHETHER, IN THE SHORT-RANGE AND IN THE LONG-RUN, THOSE RELATIONSHIPS WILL GROW STRONGER.

FIFTH, LASTLY, IS THE OPPORTUNITY FOR THE LEGISLATURE TO REVIEW THE DECISION OF THE LOCAL BOUNDARY COMMISSION FOR COMPLIANCE WITH PROPER ADMINISTRATIVE PROCEDURES. WAS THE HEARING PROPERLY NOTICE? WERE THOSE IN ATTENDANCE GIVEN OPPORTUNITY TO COMMENT? DID THE COMMISSION ENTER A DECISION ON THE RECORD? DID THE COMMISSION ADHERE TO ITS OWN REQUIREMENTS? PROCEDURAL COMPLIANCE IS IMPORTANT. AT LEAST ONE ANNEXATION OF THE COMMISSION HAS BEEN SET ASIDE BY THE COURTS FOR FAILURE OF THE COMMISSION TO ATTEND TO STATUTORY REQUIREMENTS. THE LEGISLATURE COULD SAVE TIME AND LITIGATION BY REFUSING AN ANNEXATION, NO MATTER HOW MERITORIOUS, IF THERE HAS BEEN A SUBSTANTIAL FAILURE TO MEET ADMINISTRATIVE REQUIREMENTS.

THE PART OF THE LOCAL BOUNDARY CHANGE PROCESS WHICH REQUIRES OR ALLOWS LEGISLATIVE REVIEW OF A BOUNDARY COMMISSION DECISION IS VERY MUCH A POLITICAL PROCESS. THE INQUIRIES YOU DIRECT TO

MENT UNIT INVOLVED IN AN ANNEXATION, TO SEE WHETHER THE CITY (AS IN THIS INSTANCE) OR BOROUGH (IF THAT WERE THE CASE) WERE CAPABLE OF PROVIDING SERVICES THROUGHOUT AN EXPANDED AREA.

NEXT, I BELIEVE THE LEGISLATURE MAY PROPERLY INQUIRE INTO THE ANTICIPATED EFFECT OF THE BOUNDARY CHANGE OF THE PEOPLE INVOLVED, PRINCIPALLY THE RESIDENTS OF THE AREA IN QUESTION, BUT ALSO THOSE WHO ALREADY RESIDE WITHIN THE UNIT OF GOVERNMENT AND WHO MAY SEE CURRENT SERVICE LEVELS DILUTED IN AN EXTENSIVE AREAWIDE EXPANSION OR, IN THE ALTERNATIVE, AN INCREASE IN THE TAX BURDEN. TAXATION IS ALWAYS THE CENTRAL FACTOR IN ANNEXATION DECISIONS, BUT IT IS ALMOST NEVER PROPERLY FOCUSSED. THE QUESTION IS NOT ONE OF TAX INCREASE THAT NORMALLY ATTENDS THE INCLUSION OF NEW TERRITORY INTO AN EXISTING TAX-LEVYING JURISDICTION, BUT RATHER, WHETHER, FIRST, LEVELS OF TAXATION CAN BE RELATED TO LEVELS OF SERVICE TO BE OFFERED AND, SECOND, WHETHER ANNEXATION, WITH ITS ATTENDANT TAX BURDEN CHANGES, WILL CONTRIBUTE TO A BETTER SHARING OF THE BURDENS AND OPPORTUNITIES FOR LOCAL GOVERNMENT THROUGHOUT A METROPOLITAN REGION, EVEN IF, AS IN THIS INSTANCE, THE METROPOLIS IS ONLY THE SIZE OF "GREATER KODIAK."

FOURTH, I WOULD SUGGEST AS A FACTOR OR ELEMENT WARRANTING LEGISLATIVE EXAMINATION IS THE RESULTANT RELATIONSHIP OF THE ANNEXATION ON CITY/BOROUGH RELATIONS. IN TWO DECADES, IT HAS BECOME RATHER CLEAR THAT THE THEORETICAL DIFFERENCES PERCEIVED BY THE FRAMERS OF THE CONSTITUTION WHICH WARRANTED A CONCLUSION ON THEIR PART THAT THERE BE TWO TYPES OF LOCAL GOVERNMENT -- THE CITY AND THE BOROUGH -- GIVE RISE TO OTHER DIFFERENCES IN PRACTICE. CITY-BOROUGH RELATIONSHIPS THROUGH THE LAST 20 YEARS CAN ONLY BE DESCRIBED AS "STORMY."

THE PERSONS WHO APPEAR BEFORE YOU MAY BE AS BROAD, AS IMAGINATIVE, EVEN AS UNRELATED TO THE PARTICULARS OF THE SUBJECT MATTER BEFORE YOU AS IT IS POSSIBLE FOR THEM TO BE. THERE ARE NO LIMITATIONS ON WHAT YOU MAY REQUIRE: THERE IS BUT ONE THING THAT YOU MAY DO -- THE RESOLUTION OFFERED BY MR ZHAROFF IS THE VEHICLE FOR ANNULLING THE RECOMMENDED ANNEXATION IN ITS ENTIRETY; YOU CANNOT REDRAW THE LINES. (THAT IS NOT TO SAY THAT, IN THE EVENT YOU CHOOSE TO RECOMMEND ANNULMENT, YOU CANNOT ADOPT THE RESOLUTION OF MR ZHAROFF BUT, AT THE SAME TIME, REQUIRE THE COMMISSION TO RECONSIDER SPECIFIC BOUNDARY CHANGES OF THE CITY, SPECIFYING THE AREAS OF YOUR CONCERN. ALTERNATIVELY, IF THERE ARE AREAS WHICH THE BOUNDARY COMMISSION EXCLUDED FROM ANNEXATION BUT WHICH YOU BELIEVE SHOULD BE RECONSIDERED FOR INCLUSION, YOU MAY DIRECT THAT, BY RESOLUTION, TO THE ATTENTION OF THE COMMISSION.)

NOW, I DON'T KNOW WHETHER THESE MUSINGS FULFILLED THE INTENT OF THE CHAIRMAN IN EXTENDING AN INVITATION FOR ME TO SIT IN THIS CHAIR. BUT I HOPE IT CONTRIBUTES SOMETHING TO YOUR DELIBERATIONS , AND THAT IT MAKES THIS EFFORT AT LEGISLATIVE REVIEW MORE MEANINGFUL TO YOU. I DON'T ENVY YOU THE TASK.

IF THERE ARE ANY QUESTIONS WITH RESPECT TO ANY OF THESE POINTS, I WILL TRY TO RESPOND.

THANK YOU.

Extended Home Rule

SECTION 10. The legislature may extend home rule to other boroughs and cities.

Home Rule Powers

SECTION 11. A home rule borough or city may exercise all legislative powers not prohibited by law or by charter.

Boundaries

SECTION 12. A local boundary commission or board shall be established by law in the executive branch of the state government. The commission or board may consider any proposed local government boundary change. It may present proposed changes to the legislature during the first ten days of any regular session. The change shall become effective forty-five days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house. The commission or board, subject to law, may establish procedures whereby boundaries may be adjusted by local action.

Agreements: Transfer of Powers

SECTION 13. Agreements, including those for cooperative or joint administration of any functions or powers, may be made by any local government with any other local government, with the State, or with the United States, unless otherwise provided by law or charter. A city may transfer to the borough in which it is located any of its powers or functions unless prohibited by law or charter, and may in like manner revoke the transfer.

Local Government Agency

SECTION 14. An agency shall be established by law in the executive branch of the state government to advise and assist local governments. It shall review their activities; collect and publish local government information, and perform other duties prescribed by law.

Special Service Districts

SECTION 15. Special service districts existing at the time a borough is organized shall be integrated with the government of the borough as provided by law.

Letters to the editor

Dear Editor:

This letter is to all the people of Kodiak in response to some of the views expressed against annexation. In no way are all of the people against annexation. Some of us would like orderly development at a reasonable cost. This is not assured us with the borough goverment and a variable assortment of service districts. The first implementation of the borough goverment was not designed to take over existing or to overlap goverment systems already operating. It was really meant for the boondocks and Kodiak can hardly be called that as we do have a good school system, supermarkets, road systems, radio station and TV, without mentioningg other types of business which were well established when the borough came into existence

A few facts that might be interesting to all: Number one-practically every employed person is within the city limits or on the Coast Guard base. Number Two-we pay a 7 mil base in the borough plus a 2 mill fire service tax. Bell Flats pays another 7 mills for road service which comes up to 16 mills. Any other service that the borough might provide will put this tax over and above any you might be paying in the city. Number Three-We who live in the borough and operate businesses in the city do not have any say as to who and what rules govern us. Cliches have been passed back and forth but this is real taxation without representation.

A benefit of being in the city will be to assure that [illegible] us will be voting for [illegible] same people. Some will say "Why don't you move back into the city?" I want to say to all that I am a life long resident of Kodiak with a lot of years of public service and consider this is all one and the same area. Also I am a native with a heritage that goes back many many years.

Number Four-If the people who are flagging the cost of moving into the city would examine the cost of our borough goverment, especially the statements of the borough officials on this forthcoming land sale which reflects their daily operating procedure, I would say many thousands of dollars are poured down the tube annually.

I would like to mention at the last that these Pied Piper tactics should be a thing of the past. There are enough responsible and sensible people living in the borough who should look closely and think for themselves. Those who are residing in the borough and are concerned about services to be had, and are concerned about dollars and cents, should not listen to opinions but look and find out the hard facts as to to who can provide the services at the most reasonable cost.

If you are not concerned about these facts and are only being led down the road by people who hold animosity for the city, then a few years from now if you are still here we will not expect you to holler ouch, if annexation does not become a reality.

Very truly yours,
Emil Norton

1/30/79 4:00

Mr. Dodd Shay would like to set up a meeting following our hearing in Kodiak with:

Mr. Denslow
Mr. Marvin Frost, Afognak Native Assoc. Mgr
and himself

to meet with joint C/RA committees on

Development Cities Act, etc.

If we are agreeable, Mr. Denslow will set up the meeting.

Mr. Shay will call us back Feb. 1 (tomorrow) at 1:15 our time for confirmation..

~~He has~~
The above people are interested and represent all sides of the questions.....

T—

Why - if we would be agreeable to meet - if time permits.

Letters to the editor

Dear Editor:

I, as Kodiaks unofficial ombudsman, wish to share with you and other fellow Kodiakans a few reflections and conclusions on a current matter pertinent to the well being and progress for Kodiak in the years to come, namely the annexations of Spruce Cape, Island Lake, and Mill Bay, known as area 1, 2 & 3.

First, I wish to say I am a member of the Annexation Committee, and concurred for the final approval and recommendation of the annexation of the aforementioned areas after much study and evaluation. There is a very vocal minority that is attempting to retard and stifle the growth and progress of Kodiak.

Even though conditions of annexation of the various areas as required by the area some years ago have been met and better, the vocal minority continues to object on the grounds that the method being used to annex the areas is objectionable.

The argument at the boundary commission hearing here in Kodiak was that, unification was the answer, or that the borough could and would supply services through service districts.

Both were voted down in the past election, so where do we go from here? The borough claims to be able to furnish the services we need just as cheaply as the city. Can they?

I say no, you judge for yourself. In Bells Flats the residents pay 7 mills to the borough, plus 7.2 mills for road service such as it is, making a total of 14.2 mills. The mill rate in the city is 16.2 for all services. Anyone can see that all services under service districts, road, water, sewer, fire, and police, would cost much more than the 16.2 mills in the city.

If you will search the minutes of about 2 years ago, when Bells Flats was requesting a cost estimate from the borough for all services it came up to approximately 26 mills. Considering the inflation factor, two additional years would reach the lawful limit of 30 mills, for the same service.

Our senator and representative have just left for Juneau with a pledge to voice the sentiments of the majority. The bottom lines of all of this is (that) the vocal minority objectors, headed by my friend, Okey Chandler, are not representative of the majority of 2,000 people in the proposed annexation area or the 6,000 in the city.

As I am unable to devote as much time to passing petitions as Mr. Chandler, I am determined to have a true show of hands. Please help by filling out the signature form in this issue and mail it to our box. Any questions, please call. You that can and will, write letters to our representatives.

Thanks,
Bob Brooks

...Editor's note: The following letter, addressed to the Department of Commerce and Economic Development, was given to The Mirror for publication.

Dear Sirs:

Recently, I found it necessary to seek medical attention for the first time in well over a year, only to discover that my Blue Cross card was not acceptable at either the North Pacific Medical Center (Brockman & Halter), nor the Kodiak Island Hospital. Although I had proof of coverage, I was told I would have to pay cash and process my own claim at the doctors and the hospital...they offered to mail my claims in but wanted my money RIGHT NOW!

It is obvious that the doctors can eliminate a bookkeeper this way, thereby reducing their overhead by $1,000 to $1,200 a month, but the hospital excuse (given by a young girl at the admittance desk) was that the insurance companies were taking too long in processing claims and they wanted their money NOW.

My questions are: is this legal? If so, what happens to those who are unable to produce cash but are insured? Many cannot. Are these people refused medical care? Is this the reason so many local residents are going to Anchorage or Seattle for their medical problems?

I am told that in Anchorage you pay the first $50 and the rest is collected from your insurance company...I know from experience that in the Seattle-Tacoma area all you need is your (in my case) Blue Cross card and you are taken care of.

I have taken a dim view of any kind of socialized medicine in the past, but I am convinced that if Carter doesn't accomplish anything else, a national health plan would make him a more popular president an undoubtedly create a healthier nation.

Sincerely,
Barbara Miner

Fishermen make protest

Annex debate refused

By DEBORAH NELSON
Mirror Staff Writer

A challenge was made more than a week ago by Bob Brooks, pro annexation, to Dick Juelson, anti annexation, to debate the flaming annexation issue over the radio. Juelson has refused the challenge.

"I don't see any point in debating the issue in Kodiak," Juelson told The Mirror. "I would rather do my debating in Juneau than in Kodiak."

However, both the Senate and the House committees on Community and Regional Affairs have since announced they are coming to Kodiak in a few weeks for the specific reason to obtain input from the Kodiak community.

Brooks, a borough resident on the city's committee for annexation, said he challenged Juelson to the debate "to get the whole spectrum of the thing in the open." Brooks declared that "there are many erroneous things being aired by the anti annexation group, and I wanted to get it out in the open."

Both Brooks and Juelson said they plan on going to Juneau to lobby for contradicting sides of the issue. Juelson said he has been in close contact with Sen. Bob Mulcahy and Rep. Fred Zharoff, and he said he expects the legislators to inform him as to the best time to appear in Juneau.

"The issue was decided last spring before the people of the affected area or the city could speak on it," and Juelson. Since the Boundary Commission has taken the annexation issue out of local hands, Juelson said, the only alternative for those opposed to annexation is to petition the legislature.

Juelson said so far over 500 people in the affected area have signed the petition opposed to annexation. Juelson said there are approximately 800 voters in the affected area, "so we have well over half of the voters in that area," he said. Over 300 city residents have signed a petition against the proposed annexation, Juelson said.

Okey Chandler, who has been circulating anti annexation petitions, said that over 95 percent of those living in the affected area have signed the petition when it was presented before them. "Half of the other five percent wouldn't sign for religious reasons," said Chandler, "and the other half wouldn't sign a petition no matter what it was. They wouldn't sign a reprieve to keep their mother from hanging." Chandler said he expects to attend the legislative session to lobby against annexation, and to lobby for the upgrading of the Anton Larsen Bay Road.

Annex

(Continued from Page 1)

In his quest to "get the truth about annexation to the people," Brooks has circulated flyers at his own expense to inform residents of the city's position concerning annexation. Brooks is also circulating petitions in favor of the annexation at his own expense.

Brooks expressed his frustration with the apathy of citizens concerning issues he feels they should be taking an interest in. "Unless something is really taking the salt out of their beans today, people couldn't care less."

Annexation
The present area prop[illegible]d for
(Continued on P[illegible]ge 8)

Letters to the editor

Dear Editor:

I strongly object to the City's misuse of the annexation committee. When the City Manager Dick Berg asked me to serve on the committee, he assured me that it would not be asked to take a stand for or against annexation.

According to Mr. Berg at that time, the function of the committee was to decide what services would be needed from the City if annexation occurred. The City Mayor appointed six members to the committee; none of the members were elected by the residents of the area to be annexed.

Since that time, the committee has been pressured to favor annexation, and the committee and its recommendations have been portrayed as being representative of the residents of the area. Growing interest in Borough Residents for Autonomy, a group of area residents opposed to annexation, points in the opposite direction — to strong resident sentiment against forced annexation.

I also object to the false picture painted by the City's publication on annexation. In addition to containing a number of misleading statements, the publication presented differential tax zones as an existing fact. The use of differential tax rates in the area to be annexed is only a recommendation of the annexation committee. The City Council decides tax rates, and the City Council has no obligation to accept the committee's recommendations.

I am opposed to annexation. I fear the City is far more interested in increasing its population and thus its bonding capacity than in providing services to our area. I intend to write the House and Senate Committees on Community and Regional Affairs, the Speaker of the Alaska House of Representatives and the President of the Alaska Senate to urge them to reject this forced annexation. I urge all other concerned citizens to do the same.

Sincerely,
Nick Szabo

Letters

(Continued from Page 3)

annexation to the city as well as additional areas which could be proposed for annexation in the future must be considered as part of the problem of available land for expansion. At present, annexation is the only method for obtaining the utilities and services in the outlying areas which many people feel are mandatory before they will build, and construction of these utilities through residential areas is the only way in which presently zoned potential industrial land can be developed. Industrial land, unlike residential, cannot be developed unless it is serviced by utilities specified by environmental protection laws.

The city tax base is the basis on which bonded indebtedness for utility construction is approved and paid for. Therefore unless annexation is approved, a major revision in state statutes will be required to allow for the orderly expansion of the economic base of the community.

The Chamber firmly believes that duplication of facilities and/or creating additional local government costs is not a viable alternative to annexation.

Commerical Air Service

NOTE: If additional information on any of these subjects is desired, we will be most happy to supply it.

Sincerely,
Kodiak Area Chamber of Commerce

tion with the mailing; of which someone may have to pay when this is all over. Also, on tax levy after a annexation — "The City could set any mill rate." They won't because the City Council passed unanimously a resolution at their meeting of January 11th of concurring with the recommendations of the Committee and as proposed by the City of 100 percent Zone 1, 75 percent Zone 2, 35 percent Zone 3. "Lower insurance rates would require a fire substation and fire hydrants." Partly true; hydrants yes, substation no. Spruce Cape is now rated same as the city with fire hydrants only. "New trailers will not be allowed in the Annexed areas." An outright lie; or an uninformed statement. The City Council accepted and passed in the forementioned resolution a six year phasing out and Grandfathering in all trailers at that time as recommended by the Annexation Committee. "Cost of government will increase. The Borough will continue its present function and its size won't decrease." To this I say — if annexation becomes a reality, I shall lend my support to seeing that the Borough government size fits the services required of them by pressing for the elimination of any and all duplication of government where it is indicated or pushing for a Proposition 13 which can and will cure all.

The remaining five misleading statements will be answered at a later date.

If any of you would like my answer to them, the remaining five, feel free to call me anytime.

Sincerely,
Bob Brooks

LETTERS:

Bob Brooks disputes views of Nick Szabo

(Editor's note: The following letter to the editor has been edited slightly by the editor. Although it still exceeds our 500 word limit, it is printed as a courtesy to Mr. Brooks.)

Dear Editor:

I wish to respond to Nick Szabo's letter to the Editor on January 9th stating his objections of annexation of the three areas recommended for annexation by the Boundary Commission and subsequently by the Annexation Committee which Mr. Szabo was asked to serve on.

After reading Mr. Szabo's letter, I was appalled with disbelief which quickly gave way to outrage and anger. I feel Mr. Szabo's outburst at best, reflected a bias and uninformed attitude. Being a member of the Annexation Committee myself, I consider Mr. Szabo's babblings a non-deserving reflection on the whole committee consisting of five outstanding and dedicated citizens excluding himself; who have an unimpeachable history of service to this community namely: Bob Waage, Chairman, Emil Norton, Marian Johnson, Pete Resoff, myself and Mr. Dick Berg as a consultant. To infer that Mr. Berg could or would attempt to pressure or sway either of these people, especially me, one way or another from our objective views or conclusions on any matter affecting the welfare of this community as a whole, is unbelievable. Until now, I had always considered Nick Szabo an outstanding young progressive, with a solid head between his shoulders, with much to offer, and a real sense of responsibility. His overt attempt to malign the committee, Mr. Berg and all other city officials that are involved in any way with the subject of annexation without any foundation whatsoever, prompted this prognosis by your's truly.

I feel compelled to offer this rebuttal, not for the sake of people that have resided in Kodiak for many years, as they know the contributions each of these people have made and what they stand for. As I believe my philosophy on reputation is a fact — "In a large city, reputation is what people think you are; in a small town, such as ours, reputation is what people know you are." For those of you that are new arrivals or who seldom bother to keep abreast of local affairs, let's examine the facts.

Mr. Szabo charges pressure on committee members to favor annexation. The committee's function as I understand it to be was to offer input of needs of the various areas and study the city's proposals, recommend changes or improvements, working for the most benefits available for the proposed areas if and when annexation is a reality. In no way could the feeling of the Annexation Committee, as a body, bring about or cause to be brought about, annexation. The fate of annexation is totally in the hands of our legislature. Only as an individual can we voice our preference, of which I am doing.

Mr. Szabo also objected to the false picture especially concerning differential tax zones: again, this shows Mr. Szabo had no concept of just what the function of the Committee was. If Mr. Szabo had studied the City's report, even casually, he would not have made such a statement. Why do I say this? He or anyone else would have read "Public Meeting." These ideas are proposals and the City need your input. A public meeting with the Annexation Committee."

I ask Mr. Szabo how can a proposal be false or misleading? The Committee's function was to evaluate, suggest changes which they did. I'll mention just two impact ones. Zone No. 3 mill rate reduced from 50 percent to 35 percent, the grandfathering out trailers was extended to six years from two years. If Mr. Szabo had attended more than the one workshop meeting of the Committee than he did, may be he would have made more of a responsible report, or would he? On received the mailing of the Borough Residents for Autonomy. I am convinced Mr. Szabo accepted the appointment with full thought of using the fact to lend credence to the propaganda he planned to spread to bolster his cause of defeating annexation. I believe Mr. Szabo, or anyone else, has a right to object to annexation and work to that effect but, with facts and truth, not with erroneous statements and outright propaganda. Noting Mrs. Pat Szabo as one of the Committee of the Residents for Autonomy, substantiates the forementioned allegations, while Mr. Szabo poses as an objective Committeeman concerning annexation, Mrs. Szabo is a Committeeman of the Anti Annexation Committee. I think it cute but funny.

In closing, I wish to comment lightly on the Mailing of the Residents for Autonomy "Can we afford forced Annexation?" I suspect a very illegal act was committed in compos-

Borough engineer quits; says city can handle area problems, no need for borough

by KENT BRANDLI
Editor

With a blast at inefficiency in local government, and questioning the very need for the Kodiak Island Borough, Borough Engineer Bob Marmaduke has resigned effective today.

Marmaduke, in a letter to Borough Mayor Betty Wallin and members of the assembly said he has found another job on the mainland.

Borough Planner Harry Milligan told Kadiak Times a replacement will be sought. Marmaduke had been on the borough staff just short of a year.

Marmaduke said he resigned with regret, "As I have enjoyed my term of service, the beauty of the island, and the hard-working honesty of the native population."

In his letter of resignation, the young engineer said he felt "The borough is too little, too late."

"The borough is too little, too late. The City of Kodiak has the necessary infrastructure and the necessary competence to handle the island and its government, with the aid of the consultants now being used by the borough. . ."

The City of Kodiak has the necessary "infrastructure," (the underlying foundation or basic framework of a system or organization -- such as public utilities) and the necessary competence to handle the island and its government, with the aid of consultants now used by the borough, Marmaduke commented.

The engineer observed that "Perhaps, as is said, people seek no efficiency in government, but drama in inaction..."

Marmaduke told the mayor and assembly that if they would examine the relative costs, "A borough engineer, secretary, and related budget items are no more cost-effective than a consulting engineer, now that the Supreme Court allows competitive bidding among professional engineers..."

Marmaduke was not in Kodiak Wednesday and was unavailable for further comment.

A secretary said he was no longer employed by the borough.

BOB MARMADUKE

NBA magazine features Kodiak

"Interbranch," a new monthly publication of the National Bank of Alaska, takes a look at Kodiak in it's first edition, dated October, 1978.

The article, which calls Kodiak "Alaska's Fishing Capital," features photos by Dan Konigsberg, Steve McCutcheon and Jerry D. Martini.

The magazine, published primarily for the bank's employees and directors, features color photos of local bank employees in front of the small boat harbor and Baranof Museum.

The article says the National Bank of Alaska is the largest bank in Kodiak, dating back to 1960 when the Bank of Kodiak merged with NBA. Jim Payne is Kodiak branch Manager, and Charlene Landes is assistant manager. The bank employs a staff of 20.

LETTERS

Shuyak as it is, not for timber

Dear Editor:

Several weeks ago I sent in a note on Shuyak Island stating I would favor a wildlife sanctuary. I should have added more to that as I was just thinking about the bird life and animals, and of course, the Island as it is now. There are a few people that make their living and live on Shuyak. As they have chosen such an out of the way place to live no doubt there are others that would like to make their homes there. If I was younger, and had no land or place to live I would settle on Shuyak liking a quiet place to live just like those young people that live there now. I would not favor a ferry boat stop on Shuyak and no game hunters. It would not be a sanctuary if that was allowed. I wrote a short story for the Kodiak Mirror several years ago on Afognak Island and it becoming a stump ranch. This has worked out just like I predicted in that story.

I note there are advertisements in local papers "we care" by the logging Co. We care for what? All that good timber cut to make toilet paper. I believe in timber harvest select cutting not like clear cutting like what is going on on Afognak Island. Why isn't there some arial pictures on this cutting?...to give the Kodiak people an idea of what is going on. I believe on timber cutting by small saw mills for local use. I read where the Kodiak Borough is interested in Shuyak Island as a revenue source. Doesn't the Kodiak Borough have any bounds for such greed? I can see people living on Shuyak in home site lots, but cutting the timber on Shuyak — NO! It would not be Shuyak Island with the timber cut off. I would rather see it deeded back to the Russians than the Kodiak Island Borough having any'ain' to do with Shuyak Island. If the borough is in need of a place to set up their dwellings I would suggest the Chiswell Islands or Gianit Cape.

I hope this clears things up with the young people that call Shuyak Island home. I know Shuyak Island is in good hands with the quiet people that live there and others like them that will make it their home.

Regards,
/s/ Ed N. Opheim, Sr.

FINAL NOTICE!

PLEASE TAKE NOTICE that all CRAB POTS stored on and around the old drydock on the west side of Womans Bay (Mile beyond the Coast Guard Main Gate) are on private property and without permission to be there.

To facilitate proposed repairs and construction of the drydock, it is necessary that all these illegally stored crab pots be removed by their owners from the area immediately.

Crab pots still in the area after November 15, 1978 will be removed and owner may claim by identifying and paying all costs associated with removal and damages. Unclaimed crab pots will be disposed of in accordance with law.

Dear Fred,

We live in the Spruce Cape area, that is up for annexation and we wish to convey these facts to you. Even though a number of us in this area is not vocal as some of the anti annexation crowd, we feel the unifying of our area, Island Lake and Millbay is the only practical way to bring about the improvements that is sorely needed and shall be expecting, your effort toward the conclusion, that will benefit the areas as a whole.

It is said you indicated in conversation with two or more people on your departure, that you agreed that annexation was our last and best hope at this point, but you felt you owed a political debt, to certain election support. We would feel that you would be doing a great disservice to the whole community if your efforts reflected these facts.

Sincerely,

_____

Dear Bob,

We live in the Island Lake area that is up for annexation. We have this to say. Our area is in bad need of sewer and water, as we are sure you have been aware of.

After considering what it could cost under a service district using Bells Flats area as an example, where a service district for minor road service cost, 7.2 mills, for a total of 14.2 mills in the bouough we fell that annexation to the city would be far cheaper at 16.2 mills for all services.

Sincerely,

January 22, 1979

Chairman, Senate Committee on Community and Regional Affairs
Pouch V
Juneau, AK 99801

Dear Sir;

Although time is running short this letter is intended to bring about some action on the part of the State Legislature to help defeat forced annexation with the City of Kodiak. We are only two individuals living within the involved area, however we most certainly are not alone in our protest to this annexation.

To begin with let it be known that the wishes of area residents were totally ignored by the local boundary commission. Every resident of the area who testified at the boundary commission hearing spoke *against* forced annexation! It seems to us that our feelings and interests are being ignored by more powerful individuals who stand for annexation in the hope to gain a great deal for their own self-interests.

Another pertinent fact is that the area does not meet the standards for annexation. The area is not urban: the standard lot size in the area is one acre or larger, and one third of the land area is undeveloped.

City services are not required in this area. Fire protection is presently provided through a service district; roads are presently State-maintained or privately maintained; police protection is provided by the State Troopers; water is presently available to the majority of the area and is paid by user fees; sewers can be provided through service districts in those areas where sewers are needed.

We have signed a petition opposing forced annexation and hope that it will give you some idea how many individuals hope to stop annexation. We need your help! Please act on the behalf of the residents of this area by overturning forced annexation.

Sincerely,

Ron Matsuoka

NOTES FROM MEETING WITH MARGE GORSUCH

Mr. Parker feels a driving tour should be arranged.

Marge felt Stu Denslow, Bor. Mgr., and Gary Stevens, ~~City Manager,~~ mayor should be contacted first. Get best contact name from them for assistance in

✓ 1. setting up Bor. Assembly Room, checking on tape recorders, etc.

✓ 2. local advertising - newspaper(s), radio(s), t.v. scanner, etc.

3. People asked to testify should definitely include:

Joan Katz, Borough representative/ City attorneys — Boro Rep. — [illegible]

4. PROCEDURE: Per Jan Quinn, no buget requirement on phone calls per committee. Cost can be split or assumed by one committee. Up to Chairmans.

Per travel, advertising, etc. again one committee can assume all cost, or can be split. There is no set $ limit per Committee, etc.

SENATOR: One requirement for you is to send a written memorandum to Tillion stating dates of travel for your Committee, the purpose of the trip, who will be traveling, dates involved, and that expenses connected therewith would be:

1. travel, per diem, advertising, possible car rental, etc.

Whoever talks to Denslow and Stevens should inquire about:

Place; best time after our 10:20 arrival (early afternoon) for actual hearing; driving tour (before/after hearing) and best way to go - rentals cars, bus, or would something be provided by City/Boro.? etc..

MEMORANDUM

23 January 1979

SUBJECT: Request for Video Teleconference Proposals

TO: Committee Chairmen and House and Senate Leadership

FROM: Myrton Charney, Executive Director
Legislative Affairs Agency

The Legislative Teleconference Network will be scheduling twelve two-way video conferences during this session. This year, you will have a considerable amount of flexibility in selecting and scheduling the sites that you wish to participate. The State-leased satellite will be available on Thursday of each week for use by the network.

The first two video conferences of the session have been scheduled for February 15 and February 22. The locations have been pre-selected due to some technical delays in certain other communities. Normally, you will be able to select the communities of your choice. These two video conferences are scheduled as follows:

Date	Communities	Mode
February 15	Juneau, Anchorage, Fairbanks	two-way
February 22	Juneau, Nome, Bethel	two-way

Subjects of high general interest are sought for each video teleconference. Your consideration (no matter how tenative) of pending legislation, or subjects of broad public appeal for video conferencing, both now and as the session progresses, will help this agency assure public interest and participation.

Please make you choices known to the Network Coordinator's office, Room 505 - Capitol, at 465-4980.

Also, please contact us if you or your staff have any questions.

June 13, 1978

Ms. Sheila Gallagher
Chairman, Local Boundary Commission
Suite 201
3201 "C" Street
Anchorage, Alaska 99503

Dear Ms. Gallagher:

Enclosed are statements .rom Kodiak City residents. Cope Street behind the Travel Lodge is about 300 yards long and hasn't improved in more than 32 years. Alder Lane & High Street are just as bad or worse.

The City Manager would have you believe that living in the City would solve everyone's problems since they would have a Public Works Department. He grossly exaggerated facts. He stated the average family on the West Coast was 4.0 in size when it is 3.5. In Kodiak it is 3.4. I am dubious of anything he gave you as evidence.

The electric meter reading is done on contract. All meters are read whether they are being used or not. I have 2 meters. A neighbor has 2 meters. There are 20 or so meters in the Spruce Cape area on unoccupied buildings. 75 or 80 per cent of people living on Spruce Cape & Mission Road live in trailers on rented lots.

The City Manager stated last Summer, the City was going broke. I gave Mr. Strandberg a copy of the 1977 Spruce Cape appraisals & am mailing you a copy.

Mr. Craig Bishop at the December 12 meeting was opposed to annexation of USS-3093 that he has his trailer court & bookeeping service on. He presented a petition at the Dec.12 meeting. He favored annexation,5 Mr. Bishop was recently elected President of Chamber of Commerce. He had an application to build an apartment complex which the City Council approved. He stated that a trailer court owner sold land to repair his roads. He sold 2 houses & the land they were about 300 yards from his trailer court. He sold the houses to increase his trailer sales' stock in Bells Flats. He has about 15 acres in his trailer court with 90 or 100 trailers. The roads are unplatted. The roads & trailer court are private property. If they are upgraded, the owner will pay for it. Mr. Bishop said that other roads were needed. All of the lots on Spruce Cape are 1 lot deep. The only roads needed are private driveways. He came to Kodiak '72 or '73.

Mr. Mills stated there was 1 house on Island in 1963. There were many houses in the Island Lake area then. The tax records & K.E.A. records will verify this. Since he was here, he worked in a cannery for several years & as a heavy equipment operator. He has applied for a 1/2 million dollar permit that requires City approval (he lives in the City).

Mr. William H. Lamme, former Kodiak Post Master, lived on Island Lake 20 years ago & now lives in Anchorage.

Mr. Gary Stevens, Acting Mayor of Kodiak, came to Kodiak in 1972 or '73 & is an official in a Japanese owned cannery .

The reason I've taken time to gather the above facts is that I have a tremendous investment in democracy with 5 years, 1 month and 29 days in the military. I have spent over $4,000.00 since 1963 and several months of my time trying to keep democracy alive on Kodiak Island. I obtained 500 borough books from Mr. Ronald Cease when the borough was formed in Kodiak and spent about $1,500.00 on newspaper adds; $1,000.00 on zerox copies, $800.00 or more on radio and T.V. adds; $800.00 on avelopes, stamps/supplies, etc. I have mailed every member of the House & State Senate information/ research material on various issues which I was concerned with and also to every Governor except Governor Miller. I have written every U.S. Senator & key men in the House of Representatives & wired our representatives in D.C. & the President on several occasions.

Please give the above statements every consideration in whatever determinations you make which affects the lives of many Kodiak residents.

Sincerely,

Okey Chandler

Senator Arliss Sturgulewski, Chairperson
Community and Regional Affairs
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Arliss:

It was good talking to you today. Enclosed, as per our discussion, are copies of the two briefs I have submitted at various stages in this controversy. Please feel free to call me with any questions you may have or any additional areas regarding which you may need further input. I have also contacted Hayden Green at the University and he assures me that he and P. J. Hill, who prepared the economic analysis submitted to the Local Boundary Commission and included in the information being sent to you, will also be available to answer any questions you might have.

I appreciate your intention to have our staff keep me informed as to developments regarding Kodiak. I look forward to working with you on this matter.

Sincerely,

Joan M. Katz

BEFORE THE LOCAL BOUNDARY COMMISSION FOR THE

STATE OF ALASKA

IN THE MATTER OF ANNEXATION OF CERTAIN PROPERTY LOCATED ALONG MILL BAY ROAD, KODIAK;	)
CITY OF KODIAK,	)
Petitioner,	)
vs.	)
KODIAK ISLAND BOROUGH,	)
Respondent.	)

RESPONDENT'S BRIEF

I. Introduction

On October 19, 1977, the City of Kodiak submitted a petition for annexation of certain property located along Mill Bay Road in the Kodiak Island Borough to the Department of Community and Regional Affairs. While deficient in several respects (the most glaring of which was the absence of a resolution or ordinance authorizing the City to seek annexation), the petition was accepted by the Department. The City's case, as revealed in its brief, appears to rest on two principal grounds: first, that residents and property owners of the territory are deriving benefits from the City, such that they should be made to pay a commensurate share of the City's tax burden; and second, that the City could provide services to the territory more efficiently under annexation than could otherwise be accomplished. Intruding onto the specifics of this annexation proposal is petitioner's avowed intent to annex substantial other areas of Kodiak Island. See, Memorandum from Ivan L. Widom, City Manager, to the Local Boundary Commission, dated October 17, 1977.

Contrary to the City's allegations, it is the Borough's position that the best interests of the residents and property owners of the affected territory, and of the local governments involved, would not be served by this proposed annexation. As the Borough shall demonstrate, residents and owners of the territory would gain virtually nothing besides a hefty increase in their local taxes should this petition be successful -- an increase for services for which they presently pay more than adequately. The change in status would only serve to foster conflict, moreover, between the City of Kodiak and the Borough, and between the City and affected residents.

II. Lot Ownership and Configuration Within the Territory

At the outset, some factual clarification is required. In addition to the deficiencies in the petition mentioned above, there appear to be errors contained in the notice of hearing and attached lot descriptions provided by the Local Boundary Commission staff. First, Lots 3, 4, 5, 6, 7, 9 and 11 are identified as belonging to the City of Kodiak. Borough research indicates that those lots are currently patented by the State (patent number 50-64-0228 for lots 3-7, and 50-64-0169 for lots 9 and 11). The Borough, moreover, has filed land selections on these lots pursuant to AS 29.18.190, et seq. (Excerpt from Land Selections filed by Dale Tubbs for the K.I.B., Exhibit A.) The Borough, thus, possesses a specific interest in these particular lots, augmenting its underlying concern for the welfare of its residents in general.

In addition to this error, there appears to be an oversight in regard to Lot 27. This lot has not previously been annexed; nor is it included in the petition. It is

certainly possible that the City intentionally deleted this lot, perhaps because of known owner opposition to annexation. Such exclusion, however, would result in a continuation of the alleged misalignment of City boundaries. Since this "misalignment" is one of the grounds advanced by petitioner in support of annexation, the absence of Lot 27 is, at best, confusing. It suggests that this annexation proposal may not have been thoroughly analyzed from a thoughtful, planning perspective.

III. Standards for Annexation

Alaska Administrative Code Section 19.AAC 05.010 sets forth specific standards which provide guidelines for annexation. It is recognized that two of these standards ([1] and [3]) are met by this petition. The City raises no issues under Standards (2), (5), (6) and (9). These standards could not, in fact, be met in this case. Petitioner's case rests primarily on the purported fulfillment of Standards (4), (7) and (8). The Borough contends that there is not, in fact, compliance with these standards.

A. There is No Need in the Territory for Municipal Services that Could Not be Provided as Efficiently Without Annexation. (Standard No. 4.)

The City asserts that it can provide various services more effectively under annexation than would otherwise be possible. The City's history, however, and the facts regarding each of those services, suggest differently:

1. Sewer and Water. The City argues that sewer and water services would be extended immediately upon annexation. In fact, under a 1970 agreement between the Borough and the City, the City has long since been designated the agency responsible for implementation of water and sewer projects within the area of the road system in the Kodiak

failure to live up to the terms of this agreement accounts for the fact that services have not previously been extended to the lots within this territory. The City's track record is not one to inspire confidence.

2. Law Enforcement. The City simply describes its police force by numbers of officers and size of budget. The only argument made in this context, however, is that "Due to the nature of the boundaries in this area, certain problems can arise". (Petitioner's Brief, p. 1.) The Borough cannot envision what those problems might be. City police may certainly traverse City boundaries to get from one part of the City to another without violating any laws or ordinances. The only response possible to this broad statement is that the State Troopers provide police service to the territory. Residents and property owners have voiced no complaints about the level of service.

3. Fire Protection. The City's analysis of fire protection is, like its presentation of law enforcement, simply a descriptive one. What should be said is that there would be absolutely no change in fire protection provided the residents and property owners of the territory were the annexation to take place. Borough Fire District No. 1 presently covers this territory and is serviced through contract with the City; the contract provides fair consideration. (Exhibit C.) It might be noted, moreover, that the Borough owns one of the fire trucks utilized by the City, as well as a new ambulance similarly operated by the City and used inside and outside its boundaries.

4. Parks and Recreation. The City outlines its services in the parks and recreation area, and alleges a budget of $128,946 for this department. Apparently the intention is to suggest that Borough residents outside the

City are getting "something for nothing". In fact, the City is able to operate the pool and the gym only because the Borough has made them available. The pool and gym collectively are worth approximately $3,220,000, substantially more than the City's budgeted amount for this service. (Memorandum from Borough Assessor, Ed Haney, December 6, 1977; Exhibit D.) The joint agreement between the Borough, its School District and the City, further delineates the benefits accruing to the City through the use of these facilities. (Joint Agreement for the Use and Operation of Gymnasiums and Swimming Pool, Exhibit E.)

In addition, the Borough adopted parks and recreation powers within the last year, and has contracted for a major parks and recreation study to be completed by April of next year. City residents will undoubtedly benefit from the exercise by the Borough of its parks and recreation power.

5. Library. In describing its library with attached budgetary figures, the City again fails to make any case showing that Borough residents are taking unfair advantage. Petitioner acknowledges the Borough contribution of $15,000 to the library financing. There is no showing that this contribution is grossly disproportionate to the use by non-city residents of the library facilities. And there is also no mention of the fact that the Borough operates four libraries of its own which make interlibrary loans to the City library.

6. Cemetery. The City simply states that the cemetery, with its paid contractural employee, is available to Borough residents. There is no indication of how much this employee is paid; he may in fact be part-time. And there is no mention of the fact that the City acquired

the land for the cemetery in 1968 from the Borough for the price of $1.00. (Minutes of K.I.B. Assembly Meeting, 2/15/68, Exhibit F.) At the time, that land was worth approximately $29,600. At present, its estimated value is $300,000. (Memorandum from Ed Haney, Borough Assessor, to Stu Denslow, Borough Manager, Exhibit G.) Borough residents have more than paid their way into their ultimate resting places. Again, the level of service for the territory affected by this petition would not be increased through annexation.

7. Public Works Functions. The City's one-sentence remark in regard to public works provides little to which the Borough can helpfully respond. The fact that the Public Works Department provides street maintenance and snow removal is essentially irrelevant, since the primary road involved is Mill Bay Road, which is state maintained. Should the residents of the area decide that further local roads are necessary, they could finance them through road service districts, rather than taxing the general public for such neighborhood improvements. It might be noted, moreover, that private contractors are available to the Borough to provide competent road service, as is illustrated by the road service district in the Bells Flats-Russian Creek area. (Contract between the K.I.B. and Alagnak, Inc., Exhibit H.) House numbering, the other item mentioned in connection with public works, is a planning function and will be undertaken by the Borough as it proceeds with implementation of its comprehensive plan.

8. Cargo dock, boat harbor, ferry terminal and airport. The City alleges that these facilities are "to some extent" self-supporting, and then claims that general fund contributions have been made to maintain the facilities. Again, the City's lack of specificity renders the Borough's

attempt to be responsive difficult. Borough research uncovered only a $149,703 loan from the City's general fund to the cargo dock. (City of Kodiak, 1977/78 Budget, p. 46.) A loan hardly constitutes a "contribution". The City's presentation in this regard raises two additional questions. First, it is not at all clear that the municipal airport, as discussed further below, is an asset to Kodiak. The extreme hazardousness of this strip might merit its closure, rather than its support by taxpayers money. Second, it is not clear why general fund contributions should ever be used to make up deficits in the operating budgets of these enterprise activities. The people who use them should pay for them; those who do not use them, should not.

9. Garbage Collection. Residents of the territory would gain nothing new in the way of garbage collection should annexation take place. At present, they have the option of paying for garbage collection or transporting their own refuse to the dump. Under annexation, that option would be removed and they would pay for the service whether or not they wanted it. There has been no showing that such imposition is necessary.

A review of the above services indicates that the City has not demonstrated that it could improve the lot of territory residents through annexation. In fact, as described above, the residents and lot owners would gain virtually nothing to their advantage by way of annexation. As shown on the table below, however, these people would stand to lose a great deal. Best estimates reveal that, assuming the addition of sewer and water to all lots, the cost to lot owners should they remain outside the City limits would be 9.47 mills taxation plus $28.75 per month in water and sewer assessments; if the territory were annexed, the rate would

jump to a substantial 16.3 mills, with assessments in the neighborhood of $25.00 per month.

	City Resident	Borough Resident Outside City Limits
Borough Mill Rate	7.2	7.2
City Mill Rate	9.1	-0-
Fire Protection Mill Rate	-0-	2.27
Water	$10.00/mo.	$13.75/mo.
Sewer	$15.00	$15.00
Total	16.3 Mills $25.00/mo.	9.47 Mills $28.75/mo.

The City has simply failed to make a showing that such a rate increase is warranted or equitable for those affected.

B. Annexation Will Not Enable the City to Improve any Health or Safety Conditions in the Territory. (Standard No. 6.)

As noted previously, the City has not invoked this standard. It would be dismissed without comment were it not for the irony it brings to light. There is, in fact, a serious safety hazard located within the territory. That hazard is the municipal airport. Yet the City, which exercises complete control over this airport and even mentions it among the services provided to territory residents, has failed in its duty to alleviate the significant safety hazard that it poses. There is no reason to assume the City would perform more responsibly should other such problems arise.

C. It is Practical to Provide all Necessary Services to City Residents Without Bringing the Territory Within the City Boundaries. (Standard No. 7.)

Petitioner's brief includes broad statements to the effect that there is a "misalignment of boundaries [which] causes problems with enforcement of City ordinances and with providing certain services to those areas already annexed". That is the extent of petitioner's analysis. In light of joint Borough-City agreements covering water,

sewer, and fire, the Borough cannot envision any problems that might arise because of the existence of a few City lots within the territory. If the problems were significant, the City presumably would never have annexed those lots causing the present "misalignment".

D. The City is Receiving (or Should be Able to Devise Means of Receiving) Ample Reimbursement for the Services Provided Territory Residents and Lot Owners. (Standard No. 8.)

The City complains that it "provides substantial benefits to residents and owners of properties outside of [its boundaries] without corresponding tax contributions for municipally provided services". (Petitioner's Brief, p. 2.) Yet, sewer and water should be provided only upon assessment; fire protection is paid for by the Borough which levies a 2.27 mill rate on property owners within the District; parks and recreation services are in large part made available through the Borough-donated pool and gym; contribution is made by the Borough directly to the municipal library; the cemetery exists on a $300,000 plot of land given for $1.00 to the City by the Borough; the cargo dock, boat harbor, ferry terminal and airport are or should be self-supporting through user fees; and garbage collection is currently paid for by those who use it.

In addition to the direct payments identified above, all Borough residents outside the City fund the City's services and programs, whether or not they receive any benefits from them, through a three percent sales tax levied by the City on all goods and services sold within the City or by City-based businesses, whether the service is provided within or without the City. (City Ordinance 3.08.010 et seq.) Virtually all sales of goods and services on Kodiak Island take place within the City, so all residents

of the Island are sorely affected by this tax. Sales tax receipts, moreover, have been used to pay Borough personal property tax for City residents; owners of personal property within the City have not been required to make such payments out of their own pockets. (City Ordinance 3.04.010B.) Borough residents living outside the City boundaries have thus paid personal property tax twice; first their own, and then a substantial contribution to the payment of taxes for those persons who have personal property located within the City limits. Residents and lot owners in the territory have amply compensated the City for any benefits they might receive.

IV. Procedural Factors Against Annexation

Four intertwined procedural issues are raised by the manner in which this petition has proceeded to date. First, petitioner and the Local Boundary Commission seem determined to propel this matter forward with great speed, presumably because of the approaching start of the Legislative session. Such precipitous action, however, has resulted in failure by the Commission to follow its own guidelines, and has put great strains on the Borough and any other would-be respondent to prepare adequately for the upcoming hearing. Thus, the petition was apparently accepted notwithstanding the fact that no resolution from the City Council was attached (19 AAC 10.040[4]); the sources of information contained in the petition were presented only in a statement, not an affidavit (19 AAC 10.040[2]); and the petition was wrongly addressed to the Department rather than the Commission (19 AAC 10.030). In addition, the interest in reaching a quick determination in this case resulted in a refusal by the Staff Assistant to grant a few days postponement of the hearing. The Borough's attorney had requested such an

extension in order that a well-informed brief might be prepared and presented to the Commissioners sufficiently in advance of the hearing to enable them to receive the evidence with some foreknowledge of both sides of the case. (See, letter from Joan M. Katz to Pat Poland, Exhibit I.)

Second, as noted throughout the course of this brief, the City's presentation to the Local Boundary Commission consists primarily of broad allegations, without substantiating facts. Such material did not put the Borough in a sufficiently informed posture to respond adequately.

Third, the issue of annexation of the petitioned-for territory is clouded by the avowed intention of the City to extend its boundaries to still other areas. Mr. Poland has indicated to the Borough's attorney that the broader issues of annexation of large portions of the Kodiak Island Borough will in fact enter into the Commission's deliberations in the course of the hearing on the Mill Bay Road territory. Yet no petition has been filed on those other, very different areas; there is no way the Borough can prepare any response. Other interest groups, such as the Native population of Kodiak, may have strong feelings when confronted with the full scope of the proposed annexation. It would appear that any and all questions of annexation on the Island of Kodiak should await a proper petition adequately setting forth all the territory sought to be annexed with ample factual basis for the City's position. Absent such a rational approach, serious error might be committed as Commission deliberations are hurried forward without sufficient groundwork being laid. There is no emergency warranting such procedure.

Fourth, and finally, in connection with the intent to annex considerably more territory than is revealed in this petition, it would seem appropriate to handle this matter by

the step annexation procedure. Of critical concern to the Borough Assembly, staff and people they represent, is the fact that no opportunity has been afforded the people of this territory to vote on the issue of annexation. An election would give the Commission precise information regarding the people's views on this matter. It would also go far to reduce the anger and bewilderment experienced by Borough residents who view the non-elective process as an uncharacteristically undemocratic one for this State to be imposing upon them.

V. Conclusion

The only context in which the City's petition is comprehensible is that of a power play, a grab for land which the petitioner has no demonstrated ability to govern effectively. The evidence shows that the residents of the territory would gain nothing from annexation, but would stand to lose considerably from a financial standpoint. Abstract arguments supporting annexation are overshadowed by the reality of the cost-benefit ratio to those lot owners, by the fact that they do not support this petition, and by the realization that there is no equitable reason for increasing the City's tax base. Honest appraisal tells us that the City's track record for the delivery of services and for fair dealing with citizens on Kodiak Island is seriously deficient. There is no basis for granting the petition. There is sound basis for denying it. The Kodiak Island Borough respectfully requests that the Local Boundary Commission reject the City of Kodiak's petition for annexation.

Dear Mr. Denslow:

This is to acknowledge receipt of Kodiak Island Borough's Municipal Selections, ADL 200122.

Further processing of the pending selections by the Southcentral District Office is not anticipated until completion of legislative action on House Bill 133 which addresses the municipal land selection problems in Title 29 of the Alaska Statutes. If, in the meantime, there are critical priority selections requiring immediate attention or questions regarding your selection status, we will be glad to respond to your needs.

Sincerely,

L. A. Dutton
District Manager

AGREEMENT

DESIGNATING THE CITY OF KODIAK AS THE AGENCY RESPONSIBLE FOR IMPLEMENTATION OF WATER AND SEWER PROJECTS ELIGIBLE FOR FEDERAL FUNDING

THIS AGREEMENT, made and entered into this 2nd day of July, 1970, by and between the CITY OF KODIAK, a municipal corporation, hereinafter referred to as "CITY" and KODIAK ISLAND BOROUGH, a municipal corporation organized under the laws of the State of Alaska, hereinafter referred to as "BOROUGH",

W I T N E S S E T H :

WHEREAS, BOROUGH is a second class borough and as such has limited authority which does not include the power to provide water or sewer service and

WHEREAS, CITY is a first class city and as such has a Public Works Department and in connection therewith provides sewer and water service to the residents residing within the corporate limits of the CITY OF KODIAK and to some residences residing outside the corporate limits of the CITY OF KODIAK, and

WHEREAS, the parties hereto desire to make application for Federal aid on local sewer and water project and one of the parties hereto must be designated an agency responsible for implementation of such projects.

NOW, THEREFORE, in consideration of the foregoing, the parties hereto mutually agree as follows:

1. CITY is hereby designated the agency responsible for implementation of any water or sewer projects within the area of the road system in the KODIAK ISLAND BOROUGH and is hereby authorized to make application for Federal aid in connection therewith.

IN WITNESS WHEREOF the parties hereto have caused this Agreement to be executed by their proper officials on the day and year first above written.

CITY OF KODIAK

By Richard C. Poole

KODIAK ISLAND BOROUGH

By

EXHIBIT B

CONTRACT TO FURNISH FIRE PROTECTION SERVICE

THIS CONTRACT made this 2ND day of ~~May~~ July, 1970, by and between the CITY OF KODIAK, hereinafter referred to as "City" and the KODIAK ISLAND BOROUGH, hereinafter referred to as "Borough", both being municipal corporations organized under the laws of the State of Alaska.

W I T N E S S E T H

WHEREAS, City is an Alaskan municipal corporation, being a home-roll or charter city, and as such is lawfully authorized and empowered to enter into the Agreement hereinafter recited; and

WHEREAS, Borough is an Alaskan municipal corporation of the second class and has under its powers formed a Fire Service District as provided by law and therefore is lawfully authorized and empowered to enter into the Agreement hereinafter recited; and

WHEREAS, Borough is presently without adequate fire protection in its Fire Service District and desires to have the services of City's Fire Department and to pay for such services; and

WHEREAS, City is willing to furnish fire protection to Borough's Fire Protection District provided an adequate payment is made.

NOW, THEREFORE, City and Borough agree as follows:

SERVICES TO BE RENDERED

FIRST: Subject to the conditions and qualifications hereinafter recited, the City will furnish to Borough's Fire Protection District during the period of this Agreement, the services of City's Fire Department to the same extent as if the area encompassed within the boundaries of the Borough's Fire Protection District were a part of the incorporated area of the City.

TERM OF AGREEMENT

SECOND: The term of this Agreement shall be continuous until terminated by mutual agreement of the Parties or by notice of intention to terminate given in writing not less than ninety (90) days before the intended date of termination when such notice is given and which notice may be given by either Party at any time hereafter.

PAYMENT

THIRD: Borough agrees to pay to City during the term of this Agreement an amount equal to the millage rate levied by City for fire protection service in the City, which amount shall be levied and collected on all properties within Borough's Fire Protection District at the same millage rate. City shall give to Borough, in writing, at the time it sets its millage rate, the millage levied for fire protection within the City and that same millage rate shall thereafter be applied to all properties within the Borough Fire Protection District for the ensuing year and this amount shall be paid to City.

CITY IS NOT RESPONSIBLE FOR CONDITION OF FACILITIES

FOURTH: City assumes no responsibility for the condition of the water mains, adequacy of fire hydrants, water pressure or of any of the facilities to be furnished by Borough's Fire Protection District except to render the best service possible under the conditions which exist at any given time.

RESPONSIBILITY OF FIRE CHIEF

FIFTH: In agreeing to give Borough's Fire Protection District the same type and quality of fire protection service as

that enjoyed by the City, it is understood by Borough that the ultimate decision and discretion as to the method and manner of controlling or extinguishing fires is vested in the Fire Chief of the City. Neither City or Borough shall be allowed any priority in dispatching of fire fighting equipment or personnel, but in any given case, the decision shall be in the discretion of the City's Fire Chief.

FIREMEN TO BE MADE PEACE OFFICERS

SIXTH: City does not agree to furnish any peace officers in connection with the response to any fires within the Borough Fire Protection District unless such powers are conferred upon firemen by the laws of the State of Alaska and in that event the powers and authorities shall be limited to that authority granted.

INSPECTION BY FIRE DEPARTMENT

SEVENTH: The Fire Department of City shall have the same right to make inspections of any and all structures and grounds within the Fire Protection District of Borough and to make appropriate recommendations thereon with the same force and effect as the Fire Department has within the City.

BOROUGH TO ABATE FIRE HAZARDS OR NUISANCES

EIGHTH: Borough agrees to take timely action to abate any fire hazard or nuisance when such is called to the attention of the Borough Chairman or Borough Assembly.

INDEMNITY OF FIRE DEPARTMENT

NINTH: Borough agrees that the Fire Department of the City shall have the same privileges and immunities with respect to liability as said Department has in the City.

ADJUSTMENT OR REVISIONS OF BOUNDARIES

TENTH: Borough agrees that if the present geographical boundaries of the Fire Protection District of Borough are reduced or enlarged or expanded, then and in such event City may either refuse to service such enlarged area or this Agreement shall be amended to provide an added consideration for the additional fire protection to be rendered by City or a reduction in the compensatio by reducing the amount thereof by subtracting the millage from thos properties withdrawn.

CITY IS INDEPENDENT CONTRACTOR

ELEVENTH: The management, regulation and control of City' Fire Department shall remain the sole obligation of City, and the relationship of City to Borough shall, upon this Agreement taking effect, be that of independent contractor.

IN WITNESS WHEREOF, the Parties hereto have executed these presents by resolution of their respective governing bodies,, duly authorizing the same.

ADDENDUM

TO CONTRACT TO FURNISH FIRE SERVICE

Whereas the parties hereto have heretofore entered into an Agreement whereby CITY agreed to furnish to BOROUGH's Fire Protectic District, the services of CITY's Fire Department to the same extent as if the area encompassed within the boundaries of the BOROUGH's Fire Protection District were a part of the incorporated area of the CITY and

Whereas BOROUGH agreed to pay to CITY during the term of said Agreement, an amount equal to the millage rate levied by the CITY for fire protection service in the CITY but no provision was made, nor account taken of the Capital Improvements of the Fire Department to date or in the future,

Now therefore, the parties hereto agree that the BOROUGH will transfer, and the CITY will accept the equity of the BOROUGH in its fire truck and equipment as the BOROUGH's contribution to the Capital Improvements of the CITY's Fire Department to date, and to make further contributions to the Capital Improvements of the Fire Department through assessment and taxation at the same time and on the same basis as may be done by CITY in the future.

IN WITNESS WHEREOF, the parties hereto have executed these presents by resolution of their respective governing bodies, duly authorizing the same.

KODIAK ISLAND BOROUGH

DATE: December 6, 1977

FROM: Borough Assessor/ Ed Haney

TO: Whom It May Concern

At the time of construction in 1973 the cost of building the Kodiak High School gymnasium was One Million One Hundred Fifteen Thousand Dollars ($1,115,000). Reproduction today would be approximately One Million Six Hundred Seventy Thousand Dollars ($1,670,000).

The swimming pool complex in 1973 cost One Million Thirty Five Thousand Dollars ($1,035,000) to build and to reproduce it today would approximately cost One Million Five Hundred Fifty Thousand Dollars ($1,550,000).

Totaling the two (2) buildings together shows a cost to build in 1973 of Two Million One Hundred Fifty Thousand Dollars ($2,150,000).

The reproduction of the two (2) buildings together in 1977 would come to Three Million Two Hundred Twenty Thousand Dollars ($3,220,000).

KODIAK ISLAND BOROUGH SCHOOL DISTRICT
POST OFFICE BOX 886
KODIAK, ALASKA 99615
(TELEPHONE (907) 486-3131)

JOINT AGREEMENT FOR THE USE & OPERATION OF GYMNASIUMS & SWIMMING POOL

This agreement entered into this 15th day of November 1977, by and between the KODIAK ISLAND BOROUGH, hereinafter referred to as the *BOROUGH*, the KODIAK ISLAND BOROUGH SCHOOL DISTRICT, hereinafter referred to as the *DISTRICT*, and the CITY OF KODIAK, hereinafter referred to as the *CITY*.

WITNESSETH:

WHEREAS, the *DISTRICT* has under its jurisdiction the operation and management of three gyms and one swimming pool within *CITY* boundaries, said gyms being the Kodiak High School gym, the Main School gym, and the East Elementary gym; and,

WHEREAS, the *BOROUGH* contributes to the *CITY* recreation program by making school facilities available to the City Parks & Recreation Department for public use; this they do in lieu of providing recreational funds to the *CITY*; and,

WHEREAS, the *DISTRICT* obligated itself before the election of February, 1972 to running the pool for the public; and,

WHEREAS, it is inconvenient and costly for the *DISTRICT* to run a public recreation program; and,

WHEREAS, said swimming pool and gymnasiums are physically convenient and capable of being used by the *CITY* and its program conducted

by the Parks & Recreation Department; and,

WHEREAS, maximum use can be made of said swimming pool and gymnasium facilities by the joint use thereof of the *DISTRICT* and the *CITY*, and it is in the best interests of the parties hereto and the public that such use be made thereof.

NOW THEREFORE, in consideration of the above premises and the undertaking and convenants of each of the parties as hereinafter set forth, it is agreed by and between the parties as follows:

1. TERMS:

This *AGREEMENT* shall be effective for a term of 7½ months, commencing on November 15, 1977, and ending on August 1 _____, 1978. The *AGREEMENT* may be terminated by either party giving 30 days written notice.

2. USE OF POOL & GYMS:

The *DISTRICT* shall have the right of exclusive use of said swimming pool and gymnasiums upon regular school days, Monday through Friday of each week during each school year, from 7:30 AM to 5:00 PM of each of the said days, except that the *CITY* reserves the right to use the pool or gymnasiums for the public if they are not being used at that time by the *DISTRICT*. The *DISTRICT* shall also, in addition to the hours specified, have the right to use the pool and gymnasium facilities for school activities and athletic purposes, but the gymnasiums and pool shall not be used by the *DISTRICT* for any program designed, or by its nature competitive with the recreation program carried on by the *CITY*. However, the *DISTRICT*

may not retain the gyms or pool for the daily practices of their athletic teams beyond the hour of 7:30 PM.

3. FACILITIES:

The *DISTRICT* facilities which are the subject of this agreement include the pool, the gyms, the locker rooms, together with a limited amount of office storage space.

4. SCHEDULING OF FACILITIES:

The *DISTRICT* shall have first priority in scheduling its activities. After the *DISTRICT* establishes its schedule, the *CITY* shall make up its recreation schedule. The *CITY* must provide the *DISTRICT* with at least one week advance notice prior to commencement or change of the *CITY* recreation time schedule. Once the *CITY* established their recreation schedule, the *DISTRICT* must give the City Parks & Recreation director at least one week advance notice before changing their *DISTRICT* schedule, and this schedule change must meet the approval of the City Parks & Recreation director and the School Superintendent. Use of *DISTRICT* facilities by groups outside the realm of the *CITY* or the *DISTRICT*, at times other than during regular school hours, will be scheduled by the *DISTRICT* Community School Coordinator with the approval of the *CITY* Parks & Recreation director.

5. DENIAL OF FACILITIES:

The *DISTRICT* reserves the right to deny the use of their facilities to groups which by their behavior may either do physical harm to the facilities or participants, or by their presence downgrade the moral

and ethical standards of the *DISTRICT*.

6. CITY OPERATIONS:

The *CITY*'s responsibility is restricted to public use of the gyms and the pool as well as daily maintenance of the pool. This means that the *CITY* will:

a. Hire, terminate, pay, and supervise all *CITY* recreation personnel.

b. Schedule all *CITY* recreation use programs and activities.

c. Do the pool vacuuming, filtration, chemical up-keep, and locker room clean-up.

d. Provide reimbursement to the *DISTRICT* for over-time custodial services incurred when *CITY* recreational activities last later than 10:30 PM, unless prior agreements are made for use of the facility past the alloted time.

e. Provide supervisory personnel for all *CITY* recreation activities and insure that *CITY* recreation participants have vacated *DISTRICT* facilities prior to the supervisor's conclusion of duties.

7. DISTRICT OBLIGATIONS:

The *DISTRICT* will at its sole cost and expense:

a. Provide heat, light, power, water, chemical supplies, and equipment necessary for both *DISTRICT* and *CITY* use.

b. The *DISTRICT* will continue to handle all major mechanical work and the annual pool overhaul.

c. Provide all necessary building maintenance for the gyms, pools, and supporting facilities.

d. Provide regular custodial services during the regular school year when facilities are vacated by *CITY* recreation participants and supervisors by 10:30 p. m.

8. FEES:

Since *CITY* expense for operating the pool must be met by gate receipts, all gate receipts collected by the *CITY* are to be the property of the *CITY*.

9. LIABILITY INSURANCE:

The *CITY* shall at all times maintain and keep in effect liability insurance covering its use of said facilities.

10. PROPERTY DAMAGE

The *DISTRICT* facilities or property thereon damaged or destroyed by reason of the negligence or acts of the *CITY* employees or persons using the *DISTRICT* facilities during the times that said facilities are subject to the exclusive use of the *CITY* shall be the responsibility of the *CITY*, and reimbursement for replacement or repair thereof shall be made by the *CITY* to the *DISTRICT*; provided, however, that nothing herein contained shall be construed to obligate the *CITY* to make repairs for damage which is due to ordinary wear and tear.

11. TERMS OF THIS AGREEMENT

The terms of the *AGREEMENT* may be renegotiated to meet the prerequisities of the Community Education Program.

D. Resolution 68-5-R Setting Amount Owed by City for Payment on Personal Property Taxes. The resolution was read. Mrs. Hajdu inquired why the Borough was just now collecting these taxes from the City for 1967. Mr. Valkama explained that the City could make better use of these funds than the Borough, and so the delay was beneficial to them; and also that the City is just now collecting its 1967 sales tax, out of which this payment is made. Further, the Borough supplemental personal property roll has just been completed for 1967. Mrs. Springhill moved, seconded by Mr. Arndt, that the resolution be adopted. Mr. Burt and Mr. Bullock wished to review the tax returns before any action was taken. Mr. Valkama commented that if further reviews were made, it would probably turn out that the City would owe more money because in 1967 there were no teeth in the law requiring that people living inside the City file for their personal property. Motion carried by unanimous roll call vote.

E. Approval of Tax Adjustments Nos. R-67-38 and R-67-39. Both of these lots were taken by ASHA in 1966 and should have been in ASHA's name for 1967 instead of John Thevik's. Mrs. Springhill moved, seconded by Mr. Bullock, that adjustments No. R-67-38 and R-67-39 be approved. Motion carried by unanimous roll call vote.

F. Approval of November 15, 1968, as Delinquent Date for Second Half Payment of 1968 Taxes. It was explained that the ordinance sets November 1 as the delinquent date, but that enough tax bill forms are left from 1967 to use for 1968 if November 15 is again used as the delinquent date for second half payments of taxes. Mrs. Springhill moved, seconded by Mr. Arndt, that November 15, 1968, be approved as the delinquent date for second half payment of 1968 taxes. Motion carried by unanimous voice vote.

G. Conveyance of Cemetery in USS 3511 to City. Mr. Best stated that the cemetery is presently being arranged haphazardly, and suggested that it be conveyed to the City since they have the necessary staff to properly carry out proper arrangements. After discussion, Mrs. Springhill moved, seconded by Mr. Arndt, that the cemetery in USS 3511 be conveyed to the City for $1.00 with the provisions that it be properly laid out for roads and access and in accordance with the Subdivision Ordinance, insofar as practicable for a cemetery. Motion carried by unanimous roll call vote.

H. Dewitt Fields re Anton Larsen Road. Mr. Fields stated that he had been asked by Okey Chandler on behalf of the people of Anton Larsen Bay and Port Lions to meet with the Assembly concerning the restoration of this road, which is covered now at high tide for one mile. He stated that a petition concerning the road had been submitted to the Governor, and that the reply stated that $500,000 would be required to reroute the road. However, local contractors felt that the road could be sufficiently raised for only $25,000 to $30,000. Mrs. Hajdu suggested that the State be requested to use maintenance funds for this purpose, that they be informed that cost estimates for the job were less than $100,000, and that the road is needed by the families in the area and by the people from Port Lions and Ouzinkie who use it, after coming in by boat, as a means of getting to Kodiak. Mrs. Springhill moved, seconded by Mr. Bullock, that a resolution be drawn up by the attorney incorporating the ideas which were suggested in this discussion to take care of the problem of the Anton Larsen Bay Road. It was suggested that copies of the resolution be sent to the Governor and Kodiak's Representative and Senator. Motion carried by unanimous roll call vote.

X CHAIRMAN'S REPORT

A. Legislation of Interest. Mr. Best pointed out the following legislation of special interest:

HB 375
HB 376
HB 432 for school construction grants.
HB 463--appropriation bill for HB 432.
SB 175--providing for State to pay for defaults of local school bonds. This would help to give Alaska a better bond rating and may lower interest rates.
SB 248--3% education wage tax.

B. Building Inspector's Vehicle. Mr. Best suggested that since the City furnishes gas for the vehicle, the Borough furnish necessary repairs. The Assembly concurred.

EXHIBIT F

KODIAK ISLAND BOROUGH

M E M O R A N D U M

TO: Stu Denslow/Borough Manager

FROM: Ed Haney/Borough Assessor/Appraiser

SUBJ: Lot 1, Hospital Subdivision, USS 1822
Appraised Valuation

DATE: November 29, 1977

This lot (5.92 acres) was transferred from the Kodiak Island Borough to the City of Kodiak in 1968 to be used as a cemetary, recorded in Book of Deeds 21 at pages 92 and 93.

Comparable land in this area was selling for $5,000 per acre in 1968. As this is all high and well-drained land the 5.92 acres would have had a value of $29,600.00.

The 1978 value of this property were it put to it's best use (not a cemetary) would be $25,000 per acre or $148,000. If this land were subdivided into residential lots the market vlaue would total $300,000 This is possible because of adjacent water, sewer and access.

As a cemetary, it's value is almost an intangible, however to purchase land under today's market conditions would come close to the $300,000 figure.

Local Boundary Commission
Department of Community
and Regional Affairs
511 West Fourth Ave.
Anchorage, Alaska

Dear Pat:

This is simply to confirm our conversation of last Friday, November 18, 1977. At that time I requested that the Kodiak hearing now scheduled for December 12, 1977 be rescheduled for later in that week to enable me to prepare the Borough's brief in sufficient time so that Commissioners would have the opportunity to review it prior to the hearing. You denied that request. The Borough is now proceeding with the case within the time frame you have set forth. Should the short time allowed appear to prejudice the Borough at a later date, the objection will be reiterated at that time.

I look forward to hearing from you later today in regard to the review of Commissio precedents we discussed.

Thanks for your consideration.

Sincerely,

Joan M. Katz

EXHIBIT I

BEFORE THE LOCAL BOUNDARY COMMISSION FOR THE

STATE OF ALASKA

Re: Proposed Annexation of Certain Lands in the Kodiak Urban Area to the City of Kodiak	))))))

BRIEF OF THE RESPONDENT KODIAK ISLAND BOROUGH

Introduction

Annexation entails substantial financial, political and practical consequences for property owners and residents of the lands involved. To assess those consequences in connection with the Kodiak situation, three fundamental questions need to be asked: (1) whether annexation would serve any real purpose so far as the territory to be annexed is concerned; (2) whether the alleged equities on the City's part exist in fact, or have been advanced simply to justify a quest for additional revenues; and (3) whether adverse consequences would befall individuals within the territory, or without, should annexation occur. Respondent's analysis of these questions will address the relevant, specific factors set forth in 19 AAC 05.010, as well as the concerns raised in both the letter of May 1, 1978, from Sheila Gallagher to Stewart Denslow, and in the Preliminary Report from the Department of Community and Regional Affairs, dated May 10, 1978.[1] In light of the fact that this proposed annexation is a legislative one, with no opportunity for the people involved to express their opinions at the polls, abstract theories of symmetry in local government should not be afforded excessive weight. The

JOAN M. KATZ
Attorney at Law
540 "L" Street, Suite 101
Anchorage, Alaska 99501
(907) 274-7634

[1] The final report was not available at the time this Brief was being prepared.

realities of the Kodiak situation need to be examined.

I. What Needs Exist Within The Territory That Could Best Be Met By Annexation?

Annexation makes sense only if services are needed and desired by the people affected which can best be provided by the annexing government. The evidence in this case, however, is that people outside the City's current boundaries are generally content with not only their government, but also the kinds and levels of services they are presently receiving.

An attitudes survey conducted by the Anchorage Urban Observatory last year indicates that the three greatest concerns for residents outside the City are litter, roads and the high cost of goods.[2] Inside the City, residents are most concerned about the same two priority issues, although roads are placed above litter. The problems of physical isolation and "environment" tie for third place. Outside the City only one person in the sample rated utilities as a top priority; only one identified animal control as such. And not a single person identified police or fire service as the most urgent problem.

These findings are highly significant in reflecting a general, marked absence of desire on the part of people in the affected territory to change the kind, or raise the level, of services they receive - even when no price tag is attached. The only exceptions occur in connection with roads and litter.

a. Roads. Kodiak's roads are essentially State maintained, with only 13 miles of road under City jurisdiction and 15.5 miles within the Borough's authority. Annexation for the purposes of road maintenance would be nonsensical for two reasons. First, the people within the City are more dissatisfied with the condition of their roads than are the people outside the City,

---

[2] For more detailed information on this survey see Kodiak Island Borough Economic Analysis, submitted by Drs. Green and Hill as part of the Borough's presentation in this proceeding.

suggesting that the City is hardly the appropriate government unit to undertake further road work. In addition to the findings of the Urban Observatory study in this regard, there is the testimony of City residents like Charles Davidson, who stated at the December 12, 1977 hearing that he was opposed to annexation in light of the City's inability to adequately pave and/or oil the roads within its current jurisdiction.

Second, Borough voters have recently elected to adopt road power within Service District I of the Mill Bay-Monashka Service area. This power will enable the Borough to offer road service to those areas in which the property owners vote to foot the bill Such an undertaking has previously proven successful in the Bells Flat area, where private contractors provide road maintenance. (See Exhibit H to Respondent's Brief of December 9, 1977, regarding the proposed Mill Bay Road Annexation.)

Comments by the Local Boundry Commission staff concerning the absence of a Borough public works department to provide road maintenance are irrelevant to the Kodiak situation. As indicated previously, the roads at issue here do not cover hundreds of miles, but rather approximately 15.5 miles. Private contractors are not only capable of providing maintenance, grading, snow removal, etc. for this amount of road surface; such contractual arrangements would seem to be a boon to the local economy. Finally, it should be noted that in Fiscal 1978 the people of the Russian Creek and Bells Flat areas voted to spend $38,000 on road maintenance for nine miles of road while the City spent $1,110,014 for 13 miles of road maintenance and construction. The people currently living outside the City's boundaries should continue to have the right to choose to spend $38,000 vs. $1,110,01 if they are satisfied with the lower level of service. Annexation would deprive them of that right to choose

JOAN M. KATZ
ATTORNEY AT LAW
1614 HIDDEN LANE
ANCHORAGE, ALASKA 99501
(907) 274-3804

b. Litter. Litter, the other major concern of Kodiak residents in and outside of the City, also provides no basis for annexation The State again has responsibility for maintaining

its roadways and would be charged with litter removal in those areas. The Borough, pursuant to its planning, road and health powers would similarly be able to undertake this responsibility. To support its case for annexation, the City would seem to have the burden of showing that it could better meet this problem.

c. Sewer and Water. The only additional, significant need that the Local Boundary Commission might want to examine would be that for sewer and water. In some areas of the Borough outside the City, sanitation standards necessitate, and the people desire (although not as a top priority) sewer and water improvements. The analysis submitted by the independent consultants from the Alaska Urban Observatory indicates that there is no reason to believe the City could meet these needs at less cost than the Borough. Unlike the services of roads and police, moreover, sewer and water are public utilities, in the same category as telephones. As such, they must pay their own way. They could, theoretically, be provided by a private corporation. The expansion of sewer and water into the territories in question should, therefore, have no bearing on the issue of annexation. (See Green and Hill, Kodiak Island Borough Economic Analysis, at 7.)

A review of services needed in the affected territory thus reveals that annexation represents a theory without any practical application or rational nexus to the facts of this case. There is no cry for expanded police protection. There is no reason to deprive private contractors of the opportunity to provide road maintenance at the level the people can afford. In his letter of December 16, 1977 to Mr. Strandberg, the City Manager himself acknowledged: "I am certain you are aware that as soon as an area gets water and sewer from the core City they have no need to annex. This is especially true in the Kodiak urban area". (Exhibit A, at 2-3) The point made by Drs. Green and Hill, of

course, is that not even sewer and water requirements create any need or justification for annexation. From the territory's standpoint, annexation is simply not needed in any way, to provide any service.

II. Is the City Entitled To Annexation For Reasons of Equity?

It is arguable, though Respondent would oppose this notion, that even without a need for annexation, such action could be required if the City is presently being placed in an inequitable position by virtue of non-City residents' use and enjoyment of City facilities and services. The City took this position in its Mill Bay Road petition brief; the information presented by Respondent in connection with that annexation is equally applicable here. Respondent's previous brief summarized the facts regarding specific services mentioned by the City in its plea for "equity" as follows:

> The City complains that it "provides substantial benefits to residents and owners of properties outside of [its boundaries] without corresponding tax contributions for municipally provided services". (Petitioner's Brief, p.2.) Yet, sewer and water should be provided only upon assessment; fire protection is paid for by the Borough which levies a 2.27 mill rate on property owners within the District; parks and recreation services are in large part made available through the Borough-donated pool and gym; contribution is made by the Borough directly to the municipal library; the cemetery exists on a $300,000 plot of land given for $1.00 to the City by the Borough; the cargo dock, boat harbor, ferry terminal and airport are or should be self-supporting through user fees; and garbage collection is currently paid for by those who use it.

Also mentioned in Respondent's previous brief was the highly significant fact of the three percent sales tax levied by the City on all goods and services sold within the City or by City-based businesses. Strong concern with the "high cost of goods" as expressed in the Urban Observatory attitudes survey, indicates the substantial impact of this tax. In a memorandum prepared at the time of the previous annexation hearing in Kodiak,

the Borough Planning Director researched his own financial situation and presented figures establishing that as a non-City resident, he was paying more taxes to the City (as a result of the sales tax) than he was contributing to the Borough through personal and real property taxes. (Memorandum from Planning Director to Borough Manager, December 6, 1977, Exhibit B.)

Local Boundary Commission regulations contemplate that measures such as sales taxes can be used as alternatives, not supplements, to annexation. 19 AAC 05.010(a)(8) provides in part:

> In determining whether [property owners in the territory receive the benefit of City services without commensurate tax controls] the Commission will consider alternate methods available to the city for offsetting the cost of providing services to individuals or property beyond its property taxation powers . . . .

Through this sales tax (plus the contribution to firefighting equipment, dock user fees, etc.), non-City residents of the Borough more than pay their way They pay not only for benefits they receive, but for benefits inuring only or principally to City residents. For example, $60,000 received from sales tax revenues (to which non-City residents contribute as much per capita as City residen has been used to finance construction of water and sewer facilities within the City in the 1977-78 fiscal year. (City of Kodiak Budget 1977-78 Fiscal year.) Even more significant perhaps, a substantial percentage of the property taxes owed by City property owners are being paid by sales tax receipts garnered from non-City residents as well as City residents. While the appraised value of City property should have netted the City 1.3 million dollars in tax receipts, in fact only $655,000 is being collected. (City of Kodiak Budget 1977-78 Fiscal year.) Where is the equity in such an arrangement? If City residents are not even paying their own property taxes at this time, what possible justification can there be for seeking to tax people currently outside the City boundaries?

It is apparent, thus, that if any group of people is being treated inequitably, it is the territory residents: they pay City bills through sales taxes while contributing directly through user fees and the like for services that they utilize. The City, in truth, simply wants to spread it's overhead a little thinner - an understandable position, but one decidedly negated by the equities of the situation.

III. Would Annexation Have Any Adverse Effects Upon Territory Residents Or Other Kodiak Citizens?

It is evident that annexation is not warranted because of any need for City services or from any equitable standpoint. It should be recognized, in addition, that annexation could be extremely harmful to territory residents - and ultimately to the Kodiak community at large.

Respondent's previous brief on Mill Bay Road attempted to illustrate the relative costs to territory residents of provision of water and sewer services with and without annexation. On the assumption that territory property owners would pay existing City taxes to acquire such services, it was determined that the price tag for the annexed resident would be 16.3 mills plus $25.00 per month in assessments, as opposed to 9.47 mills and $28.75 per month for non-City residents. (Respondent's Brief 12-09-77 at 8.) Drs. Green and Hill have calculated potential mill rates under annexation on the alternative assumption that annexation would simply shift some of the City's cost to the new territory. In that case the mill rate for City residents would be 15.19 mills - as opposed to 9.47 for non-City residents receiving sewer and water. (See Green and Hill at 12.) The difference under either method of calculation, is clearly substantial.

There is another consideration however, which is as important as the economic detriment to be suffered through annexation.

This is the potential effect on this relatively small community of the hostility that would be engendered by the imposition of annexation on a group of people who are adamantly opposed to it. An effort at unification was initiated by the City on October 27, 1977. (Resolution 23-77, Exhibit C.) The Borough responded in good faith, and scheduled a day long workshop attended by members of the public, City and Borough officials, a representative from Community and Regional Affairs and the former attorney of the Anchorage Charter Commission. As a result of that meeting, the Borough Assembly voted unanimously to put the question of unification on the ballot this Fall. (Resolution No. 78-34-R, April 6, 1978, Exhibit D.)

Unification is an appropriate means by which to avoid duplication of government units and promote more efficient government. Most importantly, it is also a means well suited to healing political wounds and allowing citizens to work together toward common goals. If the Local Boundary Commission were to try to design a tool aimed at destroying any hope for unification in Kodiak, it could propose no better means than the contemplated annexation. As testimony at the December 12, 1977 hearing established, many citizens of the Borough outside the City limits are bitterly antagonistic towards the City as a result of actions or inactions attributable to that government. Many citizens, further, are outraged by their lack of opportunity to vote their views on the annexation question. Should City dominion now be imposed upon them, the chances of a harmonious movement towards unification would be destroyed.

Conclusion

Annexation may have a theoretical appeal along the lines of political neatness. Theory is not reality, however, and the fact is that without annexation there will be service districts,

with annexation, there will probably be differential taxation with inconsistent levels of service, and with unification, there would still -- and again -- be service districts. The diference between the present situation and annexation -- the only two options available to the Local Boundary Commission -- is in the degree of choice to be exercised in the annexed territory. And that choice of course translates into substantial impact on the pocketbooks of the property owners involved.

The Local Boundary Commission is undoubtedly cognizant of its significant power and responsibility in considering legislative annexations. Respondent urges the Commissioners to ask themselves the three questions posed in this Brief while deliberating the merits of this case. The answers, the Borough feels confident, will show no need for services that the Borough cannot provide at a cost comparable to or lower than the City; no inequity done to the City by non-City residents; and adverse effects on both territory residents and other Kodiak citizens alike should annexation be approved. In light of these realities, Respondent respectfully submits that legislative annexation in this case would be an abuse of discretion. Respondent requests that annexation be denied.

DATED this 12th day of May, 1978.

Regional Affairs
511 West Fourth Avenue
Anchorage, Alaska 99501

Kodiak Island Borough
KODIAK, ALASKA
RECEIVED
DEC 19 1977

Dear Mr. Strandberg:

I do not envy the Commission's position when attempting to relate to the problems such as we have here in Kodiak. I respect your willingness to listen to many statements that are irrelevant; however, I do not believe they should bear much weight in your decision.

When I finished my initial remarks, I asked for an opportunity to reply to the Respondent's Brief. For one reason or another, you did not honor my request. I realize your desire not to prolong the hearing; however, there were many points that were made that were not true. It is too bad that you were not willing to give me an opportunity to clear them up for you and those attending the meeting.

I think it should be made known in what capacity your fellow Commission member, Ms. Gallagher, is working for the Borough. It is obvious that if her employment has anything to do with any of the issues mentioned in the annexation proceedings she should disqualify herself from any court proceedings, as well as Commission activities. Her ability to ask questions during the hearing that would bear on possible litigation would seem reason enough for her to disqualify herself. I would like to hear from you or Ms. Gallagher regarding this issue.

There are several points I would like to make that were brought out in the testimony of the citizens.

EXHIBIT A

1. The City sewage treatment plant is 100% funded by the Federal and State Governments and City of Kodiak. The City's portion is financed in part by general obligation bonds. There are no Borough funds involved in this sewage treatment plant.

2. It is obvious that the City is not going to reap any huge benefits from the annexation proposal. Half of the lots are in public ownership, there are no industries, pipelines, etc. that would constitute a windfall to the City if the annexation did occur.

3. Postponing the decision on this annexation until after the legislature begins is not fair. The merits are quite obvious. I should not have to go into any detail on this.

4. As far as I could ascertain, there was not one registered voter from the area in question who spoke against the annexation. If an election were held rather than the public hearing, none of those people would have been able to voice their opinions. I think it was incumbent upon the Commission to make this clear. One of the items I wished to make known was that no resident of the area spoke on the annexation. The only people involved were property owners and those renting or leasing for business purposes.

5. At the Borough meeting on December 1, I tried to explain that the annexation of the Mill Bay Road area was the only item to be considered at the hearing. The Borough overreacted and sent out notices to all post office box holders as well as the notices in the paper. I feel that it is this kind of activity that turns people off toward government and makes all our jobs more difficult.

6. As I understand it, there are five members of the Boundary Commission and since two can hold a public hearing but three need to make a decision, the other two members that were absent also need to concur in the decision to hold another public hearing on this annexation.

It is quite obvious that the residents of the Borough and City residents who own property in the Borough are against annexation because of the additional financial burden. As far as I am concerned, that is no reason for these people not to be annexed. From your comments, you seem to have similar feelings. I am going to ask the Council of the City of Kodiak to wait six months before meeting with the Boundary Commission again since no annexations can occur until 1979. The Borough will go ahead with their service areas and unnecessary duplication of taxing structures will automatically result. I am certain you are aware that as soon as an area gets water and sewer from the core City they have no need

to annex. This is especially true in the Kodiak urban area.

I would like to take this opportunity to thank you for visiting with us. I really feel that you have quite a burden on your shoulders. I appreciate that fact only too well; however, I still feel that you have accepted your positions of trust and you have a responsibility to the municipalities that are depending on you for proper decisions.

Very truly yours,

CITY OF KODIAK

KODIAK ISLAND BOROUGH

CONFIDENTIAL MEMORANDUM

TO: Borough Manager

FROM: Planning Director

SUBJECT: Individual Breakdown of City and Borough Taxes

RE: Information Required by Counsel

DATE: December 6, 1977

During our discussions with Mrs. Joan Katz, she requested I prepare a breakdown of my estimated Kodiak Island Borough Real and Personal Property Tax as well as the amount of Sales Tax collected by the City for goods and services.

The following reflects the assessed valuation of the real property I lease:

Land	Building	Total	KIB Mill Rate		Amount of Tax
$8,900	$32,890	$41,790	$9.50	=	$397.00

Personal Property:

Description	Valuation	Mill Rate	Amount of Tax
1965 Dodge ½ Ton P.U. w/Camper	$ 500		
1974 Buick 2 Dr. H.T.	2,975		
1973 Chevrolet K5 Blazer	2,900		
1969 9-HP Outboard Motor	50		
Total	$6,425	x $9.50	$ 61.04
Total Amount of Tax Revenue Collected by K.I.B.			$440.04

The following reflects the estimated Sales Taxes I pay:

EXHIBIT B

CONFIDENTIAL MEMORANDUM

To: Borough Manager
From: Planning Director
Subject: City and Borough Taxes, Individual Breakdown
Date: December 6, 1977

Sales Taxes:

Item	Amount of Tax (Month)
Food	$ 21.00
Telephone	2.25
Electricity	2.55
Fuel Oil (Furnace)	7.50
Clothing	3.00
Automobile Gas and Oil	1.80
Tire Repair	.54
Cosmetics	1.00
Water	.42
Dry Cleaning	.60
Cable Television	.51
Entertainment (Movies)	.75
Appliances (Large & small, Replace & repair)	1.05
Cards, Gifts, Candy	1.50
Books, Magazines, Newspaper	1.00
Meals Out	6.00
Beverages	5.00

Average Amount of Sales Tax Paid to City of Kodiak, $ 56.47 per Month;

Total Yearly Amount Sales Tax Paid to City (x 12), $ 677.64

Average of Combined City and Borough Taxes for non-City Resident, $1,117.68

Percentage of Total Tax Paid to the City of Kodiak, 60.629%

Percentage of Total Tax Paid to Kodiak Island Borough, 39.370%.

Of the $440.04 paid to the Borough, 2.27 Mills or $109.44 were paid over to the City of Kodiak for fire protection, thus leaving the Borough with a net tax collected in the amount of $330.60, and the City of Kodiak with a total $787.08.

Percentage of Adjusted Total Tax Paid to the City, 70.421%,

Percentage of Adjusted Total Tax Paid to the Borough, 29.579%.

Respectfully submitted,

H Milligan

Harry Milligan

CITY OF KODIAK
RESOLUTION NUMBER 23-77

A RESOLUTION OF THE COUNCIL OF THE CITY OF KODIAK REGARDING THE ESTABLISHMENT OF A JOINT COMMITTEE TO STUDY UNIFICATION

WHEREAS, major changes are occurring in the entire Kodiak Island Borough, and

WHEREAS, the tax base is not sufficient to support excessive government and

WHEREAS, the relationships between the City of Kodiak and the Kodiak Island Borough demand close cooperation and coordination, and

WHREEAS, unification of the two governments might be in the best intere of the residents of the Kodiak Island Borough;

NOW, THEREFORE, BE IT RESOLVED that the Council of the City of Kodi wishes to participate in a study task force along with the Borough Assembly members and private citizens to study the advantages and disadvantages of unification and to recommend whether or not unification would be in the best interest of the residents of the Kodiak Island Borough. The Council respectfully requests the Borough Assembly to participate in this task force and to meet with the Council in worksession to determine how best to implement this study group.

PASSED AND APPROVED this 27th day of October, 1977.

Jerry Tust
MAYOR

CITY CLERK

EXHIBIT C

KODIAK ISLAND BOROUGH
RESOLUTION NUMBER 78-34-R

A RESOLUTION PLACING BEFORE THE VOTERS OF THE KODIAK ISLAND BOROUGH THE QUESTION OF ELECTION OF A CHARTER COMMISSION TO PREPARE A UNIFICATION CHARTER.

WHEREAS, Alaska Statute 29.68 provides a method whereby a borough and the cities within it may be united into one government under a home rule charter, and

WHEREAS, the Assembly has determined that the voters of the Kodiak Island Borough should be given an opportunity to determine whether they wish to create a charter commission to prepare a home rule charter to be approved or disapproved by separate vote of the voters within and outside first class cities at a subsequent election.

NOW THEREFORE BE IT RESOLVED by the Kodiak Island Borough Assembly:

Section 1. The following proposition shall be submitted to the voters at the next regular Borough election to be held on October 3, 1978, which is at least 90 days after adoption of this resolution:

Shall a charter commission be formed (and charter commission members be elected as elsewhere provided on this ballot) to prepare, adopt and submit to the voters for their approval or rejection a proposed charter uniting Kodiak Island Borough and all cities within it as a single unit of home rule government having the powers, duties, and functions of a unified government as authorized by law?

Yes ( ) No ( )

Section 2. Effective upon the adoption of this resolution, a call is issued for nominations of charter commission candidates, specifying the filing deadline, and outlining the procedures for making nominations as follows:

(a) Eleven qualified voters shall be elected to a charter commission. Three (3) at large and eight (8) from (1) cities, or (2) the area outside cities. The number of members elected from cities and from the area outside cities shall be proportionate to the respective populations, as determined by the Department of Community and Regional Affairs.

(b) Charter commission candidates shall be nominated by petition signed by at least 50 qualified voters of the area from which the candidate seeks election, or by a number of qualified voters from that area equal to at least 10 per cent of the number of votes cast from that area in the last regular Borough election, whichever is less.

(c) Nomination petitions shall be filed with the Borough Clerk not later than September 1, 1978, which date is at least 30 days after notice of the call for nominations has been given through the Borough. Nominating petition forms shall be provided by the Borough Clerk.

EXHIBIT D

(d) Procedures for acceptance of petitions, withdrawal of petitions and other election matters shall comply with all requirements of State law, and with the requirements of Title 2 of the Code of Ordinances of the Kodiak Island Borough to the extent consistent with State law.

Section 3. The vote on the proposition stated in Section 1 shall be tabulated in two separate classification.

One classification shall consist of all votes cast in the (first class and home rule cities) of the Borough. The other classification shall consist of all votes cast in the remaining areas of the Borough. In order for unification to be approved, it is necessary that a majority of the votes in each classification favor unification.

If unification is approved, those charter commission candidates who received the highest number of votes from their respective areas shall serve as members of the commission.

PASSED AND APPROVED by the Assembly of the Kodiak Island Borough this 6th day of April, 1978.

Betty Wallin, Mayor
Kodiak Island Borough
Kodiak, Alaska

Honorable Betty Wallin:

In accordance with your request, Dr. P.J. Hill and I conducted an analysis to determine the economic consequence with regard to the matter of annexation of portions of the Kodiak Borough by the City of Kodiak. To facilitate the study, we have thoroughly dissected the annual operating budgets of both governmental entities, that is, the Borough and City, and analyzed a substantial amount of information contained in reports produced by other consultants and government entities.

We have generally concluded that the residents in the area being considered for annexation will not derive appreciable economic benefit from the City's proposed boundary expansion. From an economic prospective, the only justifications for expanding the governmental and taxing authority of the City are: (1) if the residents outside the City are dissatisfied with the level of service they are receiving, (2) if the City can provide services more efficiently and economically than the Borough and (3) if residents inside the City are carrying a disproportional burder for service shared by area-wide residents. Relevant information suggests that none of these conditions exist; therefore, annexation is not warranted. The basis for these conclusions are summarized in numerical order throughout the remainder of this report.

Sincerely,

G. Hayden Green, Ph.D.

P.J. Hill, Ph.D.

G. Hayden Green, Ph.D, MBA

KODIAK ISLAND BOROUGH ANNEXATION ECONOMIC ANALYSIS

1. Borough residents level of satisfaction with existing services:

Members of the Anchorage Urban Observatory research staff were commissioned to conduct a survey of attitudes of residents in the Kodiak Borough as part of an OCS impact study in 1977. As part of that study, respondents were asked questions regarding their level of satisfaction with services received. A total of 472 individuals completed the survey. To determine if the level of satisfaction with services received varies between residents within the City and those residents in the proposed annex area, some additional computer and statistical analyses were conducted of the original questionnaire responses.

Individuals living in the village who responded to the questionnaire were omitted. The balance of the respondents were separated into two groups, that is, those people within the City limits and those in the proposed annex area. One question asked was, "What do you dislike about your area?" Of the 199 respondents living within the City, 15.1% listed roads; and 13.1% listed litter as their main area of dissatisfaction. Of the 119 individuals responding to the questionnaire who live in the proposed annex area, 12.6% listed roads; while 13.4% listed litter. This was the area with which residents registered their greatest level of dissatisfaction (roads and litter). In the Table attached, it can be seen that very little difference exists between the level of dissatisfaction with services between individuals living within the City limits and those living outside. In fact it should be noted that, while 2.5% of the respondents living within the City listed police and fire protection as their number one concern, not one person living outside the City listed it as an area of dislike. (See Table 1)

In another question residents were asked to rank several factors which they considered major problems facing the Kodiak Borough. In Table 2 the percentage of individuals listing various factors as their number one concerns are shown. It should be noted that only 5 percent of the respondents living outside the City listed inadequate public facilities and services as a primary concern.

A third question queried residents about those areas they felt were the communities' most pressing needs. Again, we separated respondents within the City and those in the proposed annex area. The factors listed as being the most pressing need were housing and roads by both sectors of the areas' population. Nine percent of the City's residents listed public services, water and sewer as a pressing need; while only 4.2 percent outside the City listed it as their first concern. (See Table 3)

In a subsequent question, residents were asked to rate community facilities and service as either presently being adequate, needing upgrading at the present time or needing upgrading in the future. A perusal of Table 4 suggests that residents outside the City have equal concerns with the level of services they receive. (See Table 4)

Several important implications pertinent to the issue of annexation are gleaned from the survey data:

1. Individuals within the City limits and those persons outside the City have similar attitudes towards the level of service they receive, that is, a comparable level of satisfaction with regard to public goods in relation to their cost.

2. The services of greatest concern to both City and Borough residents are roads and litter conditions. According to state records, the City maintains 13 miles of roads; while the Borough maintains 9 miles of roads. The remaining road system is state or privately maintained. The survey results suggest that residents do not perceive the City as doing a better job maintaining their road systems than the Borough is with its roads.

3. The survey results clearly suggest that the City is not more astute at providing services to local residences than the Borough government. There is some dissatisfaction among City residents with some services provided by the City of Kodiak, i.e. law enforcement, animal control, airport, parks, and roads. Within those services provided area-wide by the Borough, there exists a relatively high level of resident satisfaction, i.e. medical service and education.

4. The survey results indicate that individuals in the outlying areas are satisfied with the level of service they are receiving. This would suggest that the initiative to expand the boundaries of the City limits originated within the City or from a minority group.

G. Hayden Green, Ph.D, MBA

2. Can the City provide services more efficiently and economically than the Borough?

One other area upon which the annexation decision should be predicated is the cost of providing public services. The City asserted in the original petition that it could provide services to the area in question more efficiently through annexation than otherwise.

In discussing this, several things need to be well defined. First, it is desirable to separate public goods from public utilities especially with respect to governmental finance. There are some goods that local governments provide that are, in reality, public utilities. Sewer and water systems fall under this category. Those who receive the benefits from these goods are easily identified; and these systems should, if possible, be supported by user fees. These facilities should not be financed by general taxes.

Secondly, with respect to the financing of public goods, it is possible to go the service district route efficiently. All that is required is an institutional arrangement whereby those who receive the benefits can be assessed in proportion to the costs. (The costs would include some prorata share of the fixed plant, not just thin marginal cost.) There is no loss in efficiency in doing this through service districts, and there is no economic reason for necessitating annexation. Expansion of services may produce some economies of scale (the larger the operation, the lower is the cost per unit of output); yet these can be realized without annexation. The service district would seem a more desirable route because of the ability of the residents to choose which public utilities they want.

Public goods are those types of goods which must, by necessity, be provided through taxation (police, planning, general administration, parks, etc.); yet there is no reason to believe that they require the annexation process. They could be provided on the basis of service districts and differential taxation. It should be remembered that the benefits of the service (public good) do have geographical limitations.

Further, it is doubtful than any particular government has a unique advantage in terms of production costs. Both the Borough and the City have to buy their resources in the same market, and they face the same types of technology. There is probably no economic rationale for having a service provided by one government over another.

To provide a basis for comparing the cost and operating efficiency of the two governments, we used the 1977/78 operating budgets of the two entities. (See Table 5)

It should be noted that several duplicated positions exist within the Borough and City governments. These will not be eliminated if the City boundaries are expanded.

A preferable alternative to annexation would be unification. If the two governments were unified, the positions listed in Table 6 could be eliminated. It should be noted, however, that the historical experience of unification efforts have not resulted in substantial cost savings. Where costs are saved in one area, they are often absorbed in others. The primary advantage of unification is the elimination of the conflict that often arises where two governments serve the same citizenry.

3. Are residents inside the City carrying a disproportional burden for services?

Kodiak is particularly concerned that they (City residents) are paying for many "public goods" that are used by people who live outside the City boundaries. The charge is that these non-city residents are "free riders." It would be useful to examine sources of revenue for the City and identify revenues that are paid by City residents and by non-residents.

The population of the respective areas (City and surounding area) is computed as follows: The total population of the City (official population figures used by the State of Alaska for revenue sharing) and the Borough in 1977 is 4,960 and 7,901 respectively. The population of the five second-class cities in the Borough (these are Akhiok, Larsen Bay, Port Lions, Ouzinke and Old Harbor) totaled 940. It will be assumed that there are approximately 200 persons living in other areas (areas outside cities). Therefore, the total population living in the greater Kodiak (City) area is 7,901 less 1,140 or about 6,761. Of that total, 4,960 live in Kodiak city; and about 1,800 live in the surrounding area. Therefore, of the total resident population in the greater area, City residents account for approximately 73 percent which implies that the surrounding area holds about 27 percent of the population.

Additionally, the migratory labor force accounts for a significant portion of those people who are hit by sales taxes. Accounting for a trend, it would appear that, on average, the labor force is 13 percent higher than the permanent residents would support. This is due to the cyclic nature of employment.

Thus, there would appear to be a significant portion of the population that would be hit by the sales tax who are not permanent residents of Kodiak city. Assuming that there are not wide differences in the distribution of income between residents (of the City) and non-residents, it would not be unreasonable to assume that people would pay the same amount in sales taxes to the City, no matter where they lived either within the City, the surrounding area or were transient labor force. Conceivably, what I can account for would seem to indicate that residents of the surrounding area and transient labor force (in covered employment) would probably account for about 40 percent of the total sales taxes collected. Additionally, there are others who pay sales taxes who are not accounted for by this figure (any sales that are made to Borough residents outside the greater Kodiak city area which would include all the outlying villages and any purchases made by the U.S. coastguard personnel). Also, there are significant sales taxes paid by people who work in Kodiak in the summertime who are not in covered employment; this would include all the sales made to fishing boats from the outside. Thus, the portion of sales taxes paid by non-city residents is probably greater than 50 percent.

One of the traditional arguments for a sales tax, at least in this instance, would seem to hold true. Sales taxes can be levied to tax people who might otherwise escape taxation, notably, tourists, transients, and non-residents of a political jurisdiction.

Other taxes of the city that are ultimately paid by non-city residents would include their portion of the property taxes that are shifted forward by commercial businesses within the City. Traditionally, across the U.S., businesses account for about 50 percent of property taxes (see Advisory Commission on Intergovernmental Relations, Federal-State-Local Finances: Significant Features of Fiscal Federalism, 1973-74 ed., Washington, D.C., p. 173). It is commonly believed that businesses shift large portions of the property tax on to the consumer in the form of higher prices. For example, the Port of Kodiak included $83,000 as a payment to City government in lieu of property taxes. This payment was included as part of the rate base in calculating charges for use of the terminal. This shifting is especially true in non-competitive market structures which is characteristic of the Kodiak economy. Thus if 50 percent of total retail sales which are made in Kodiak are made to non-city residents and are passed along in the form of higher prices, then it would be possible to conclude that approximately 25 percent of the property taxes paid to the city are, in fact, paid by non-city residents.

In terms of the total tax revenue Kodiak city collects, the City residents collect a significant portion of their taxes from people who do not reside in the City. Of total property taxes paid, we can attribute $163,750 to non-residents; and, of the total sales tax revenue ($1,250,000), approximately half ($625,000) can be attributed to non-residents. Thus it would seem as though non-residents pay as much as $788,000 into the purse of Kodiak city which accounts for almost 41 percent of total tax revenue. It can hardly be said that there is a significant "free rider" problem.

It is interesting to examine what would happen to property taxes in the area to be annexed if annexation were to take place and the City spread its property taxes out over a larger tax base. Currently, there are four service areas where differential taxation is imposed. These include: the City (TCA1), the fire district (TCA8), the road district (TCA9) and the villages (TCA9). The fire district and the road district property would be added to that of the City upon annexation; both of these areas hold about 12.85 percent of the total property in the borough. The City, on the otherhand, contains 81.17 percent of total property in the Borough.

By using the mill rate and the tax base of the areas to be annexed along with the City, it is possible to examine what would happen if the property tax of the City were spread over the whole area. Currently the City is taxed at a 16.33 mill rate; the surrounding area mill rate is 7.23 with an additional assessment of 0.75 mills in the road district and 2.27 mills in the fire district. If the focus of annexation were to simply shift some of the cost to the outlying areas, the same total amount would be collected with the mill rate of the various areas being equalized. The overall mill rate would be 15.19 mills -- a decrease of 1.14 mills in the City (a decrease of $85.5 on a $75,000 home), an increase of 5.69 mills in the fire district (a $426.00 increase in property taxes on a $75,000 home), and an increase of 7.21 mills in the road district (an increase of $540.75 on a $75,000 home) for residents outside the City.

Further, it might be noted that the area to be annexed includes the U.S. Coast Guard base. Thus the retail sales on the base would be subject to the City sales tax which would add to the City revenues significantly. It is difficult to know how much this will add to the City revenues. The Office of non-appropriated fund for the Coast Guard reported that this total operation was approximately $3.5 million. While most of that was the BX and similar activity, the precise amount that would be hit by a retail sales tax would be difficult to determine. If, for example, $2.0 million were covered by the retail sales tax, the City would collect $60,000. This is about five percent of the total tax revenues for the City.

Sent 2/1/79

The Senate and House Community and Regional Affairs Committees have scheduled a Joint Committee Hearing in Kodiak on February 10, 1979. Subject of the meeting will be "Recommendation for Annexation of Territory to the City of Kodiak, Alaska" as submitted to the Eleventh Legislature by the State of Alaska Local Boundary Commission; Senate Joint Resolution No. 12 and House Joint Resolution No. 10 relating to the Local Boundary Commission Recommendation of January 23, 1979 for annexation of territory to the City of Kodiak.

For your information, both Resolutions, plus a list of Senate and House Committee members are being sent to you. I wanted to give as much advance notice as possible. Arrangements are being made to hold the Joint Public Hearing at the East Elementary School Auditorium at 2:00 P.M., February 10, 1979.

We will have a sign-in sheet at the Hearing for all individuals and groups wishing to testify.

Sincerely,

Arliss Sturgulewski
Senator, District 10-H

Dear Sir:

I am writing to request that you hold hearings on the attempt of the city of Kodiak to annex certain areas into the city.

I urge you to vote against this proposal. I am confident that if the residents of the area are allowed to testify at a hearing that your vote will be against the annexation.

Thank you for your consideration of this matter.

Sincerely yours,

Norman D. Wooten

Alaska State Legislature
Pouch V
Juneau, Alaska
99811

Dear Sirs:

As a resident of the Kodiak Island Borough I am appealing for your support in helping us to overcome a problem. The city of Kodiak is attempting by legislative action to annex the area in which I live into the city. The Local Boundry Commission is reccomending to the Committee on Community and Regional Affairs their approval of the proposal. I strongly urge that you vote against this proposal.

I am opposed to this annexation for the following reasons:

1. The residents of the area had their wishes totally ignored by the Commission. At the hearings in Kodiak on 16 August, 1978, not one resident testified in favor of this action. In fact, there was overwhelming opposition. If for no other reason I feel this fact should have a bearing on the decision.
2. I do not believe that we are urban in nature which is one of the criteria for annexation. The standard lot size is one acre or larger with one-third of the land being undeveloped.
3. I do not believe city services are required. The roads in the area are state or privately maintained. Police protection is provided by the State Troopers. Water is available through wells or user paid water lines. Sewer service will be obtainable at less expense through a service district plan.

Once again I ask that you cast your vote <u>against</u> the annexation proposal. Thank you for your time and consideration of this matter.

Sincerely yours,

Norman D. Wooten

Dear Sir:

In this day and age when the American government is supposed to be going back to the orginal ideals of our founding fathers of government for the people, by the people, of the people, Alaska seems to be somewhere back in the Dark Ages.

Recently here in Kodiak a local boundary commission was appointed to look into the annexation of several borough areas. For this purpose a hearing was held at which several residents of these areas in question participated. Every resident who testified at the boundary commission hearing was against annexation. Yet despite that fact, the boundary commission decided to go through with the annexation.

What does all this have to do with you and the Alaska State Legisture? You can set right this injustice by disapproving the annexation in this legislative session, otherwise we will have annexation forced down our throats.

We are totally against annexation - if for no other reason than the way our "local government" went about the procedure, disregarding the wishes of those citizens who are effected.

Hopefully, the Alaska State Legislature will demonstrate what democracy is all about by disapproving this forced annexation.

Sincerely,

Mr. D. ~~B.~~ Pistorese

RE: FORCED ANNEXATION IN KODIAK

January 15, 1979

Dear Sir:

We live in the sub-division known as Woodland Acres. It has come to our attention that this area is one of the areas that the Boundary Commission feels should be incorporated into the City of Kodiak.

A few months ago the Boundry Commission came to Kodiak and residents of the proposed areas of annexation by the City met in a public meeting. Of the more than 100 people present, the only person in favor of annexation was the City of Kodiak's City Manager. This should speak out as the view of the people involved in this annexation. Apparently, the Boundary Commission was blind and deaf for they still want to annex these areas into the City. How can this happen in a democracy? That is why we are writing this letter.

The reason we live in the area we do is for the privacy full acre lots afford. This is not our opinion alone, but shared by many of the people who live here. If our property was annexed into the City, we would be forced to sub-divide our property, or the taxes would be too costly for us to pay.

We have lived on our property for two years. In order to build our house, we had to spend $6,000 for a well and $1500 for our sewage system. Now the City wants to incorporate us and make us pay more money for sewer assessments and water assessments, both of which we proably won't see for 10 years. The City cannot even provide these services to all the residents within the City as the boundries stand now, how can they afford them for new residents.

The services the City says that it will provide are already received through the Borough. 1) Roads are presently State maintained or privately maintained. The City proposes to maintain only 2½ miles of road in the entire area. The City cannot even maintain roads that are within a half mile from City Hall! 2) Fire protection is presently provided through a service district. 3) Police protection is currently provided by the State Troopers.

WE DO NOT NEED OUR TAXES INCREASED!! WE DO NOT WANT TO BE INCORPORATED INTO THE CITY OF KODIAK!! Please hear our plea since the Boundary Commission ignored it!! Please do not force us from the land and privacy we, the residents of these proposed areas,want and need. Please hold a hearing on the Kodiak City annexation.

Sincerely,

Catherine Olsen
Steven Olsen

Box 2069
Kodiak, AK. 99615

Arliss Sturgulewski
Chairman, Senate Community &
Regional Affairs Committee
Pouch V
Juneau, AK. 99811

Dear Ms. Sturgulewski:

I am against FORCED ANNEXATION. We in the area that the City of Kodiak and the Boundry Commission are trying to force into the City moved in this area to be outside the City, and enjoy the wide open spaces. If we wanted to live in the City we would have built a home there 15 yrs. ago and not where we all chose to live. Also I would have moved to Russia if I wanted to live under dictatorship.

Our Great Borough Government gave us an opportunity in Service District #1 to vote for or against a Service District and what improvements we wanted. The first was water; the second was sewer and the third was roads. The Borough was not biting off a bigger chunk than they can chew, like the City wants to. The Borough had Engineers draw up Plans and Specs for our Water and Sewer Service District and we are all set to go and then the City Convinces the Boundry Commission to Force us in as the City is broke and needs our tax money to bail them out: but we will not get the Services.

Furthermore no one wants to live under the City Charter as it reads now, as it is not according to Alaska State Statutes and someone in Juneau should look into this.

Please give us some consideration of "freedom to vote" as this is very important to all of us. Thank you for listening.

Sincerely,

Lorna Lee Arndt

Re: Opposition to City of Kodiak Annexation Attempt

Dear Governor Hammond:

In 1965, I lived in the La Lande Addition, adjacent to the City of Kodiak. The lots were 50 X 100 feet and there was a trailer court in our vicinity. We petitioned the City of Kodiak to be annexed that year because of the need for sewer services. We were annexed in 1966.

We have a City water system that was installed with antique fittings. So poor is the City's public works capabilities that the Fitzgerald Welding Shop had a fire and was gutted because the fire department did not have the tools available to open the hydrants. It was only after the disastrous fire that modern hydrants were installed by the City. I continued to live in the same location until 1969, and the requested utilities had still not been installed. During the period of residence the only thing that I ever received were several tax increases from the City. The records of the City Public Works Department will show that the sewer was not installed until fall of 1973. The City of Kodiak's total lack of public works capability is not only well known, but easily documentable.

The City says they are broke and that they need the taxpaying participation of citizens outside the City to help underwrite the cost of services being rendered to City residents. The only thing that I can see that I will receive from the City of Kodiak are tax increases, as their past record shows. I request that you and your Administration and our Legislative representatives work aggressively against this forced annexation.

Sincerely,

John Morton

The Honorable Bill Parker

Dear Senator and Represerative,

I'm writing in the concern of our land which is in the area which Kodiak is trying to annex. We are in the process of building our house and hope to move into it by this spring. We bought this land because we wanted to live outside of the city. We do not want to be apart of the city. So we are making our voice heard.

Thank you for your concern on this matter.

Sincerely,

Mrs. K. Diane Haigh

The Honorable Arliss Sturgalewski
Alaska Senate
Pouch V
Juneau, Alaska 99801

Dear Senator Sturgalewski:

This letter is in regard to the annexation of Spruce Cape, Mill Bay, and Island Lake into the City of Kodiak. We do not wish to be annexed as we do not feel the city can provide us with any better service than we presently have. We have voted against annexation twice but this time we were not allowed to vote. We feel we are being forced to become part of the City of Kodiak against our wishes.

I would urge the Legislature to overturn the decision of the Local Boundary Commission. I would also ask that a hearing be set so that testimony can be heard. Thank you for your attention.

Most sincerely,

Kodiak, Alaska 99615

January 25, 1979

Dear Senator Stunguleweski:

I am greatly concerned about claims made by the City of Kodiak in the past several months concerning the underlying "necessity" for its annexation efforts. The City has alleged that annexation is required if it is to provide utility services sought by residents outside the municipal limits.

In fact, the City has every right to provide these services right now, without any annexation. Under Title 29 of the Alaska Statutes, municipalities owning or operating utilities are specifically authorized to extend their services outside the municipal limits. The City's own charter grants the identical power.

in addition, it is the Borough's position, currently being pursued in the courts, that the City not only has the "right" to provide these residents with water and sewer services, but is actually under an obligation to do so in light of agreements negotiated previously with the Borough and conditions attached to sewer and water funds provided the City under Federal and State grants.

Since utility funds are self-supporting, with the full costs paid by the users, there would be no cost to the residents of the City. I think it could be documented that the surcharge on the present water users outside the City results in a profit to the City. Further, until such time as sewer service is provided outside the City boundaries, the entire costs of the very expensive new sewerage treatment plant are being borne by the residents of the City, so it would be to the benefit of the users inside the City to expand the user base.

It is hard to believe that a municipal government such as the City of Kodiak would deliberately mislead the people of this area. Yet it is my opinion that such deliberate misrepresentation is precisely what has taken place. It is hoped that the municipal body which would seek to achieve annexation through such means will not be afforded the opportunity to govern those citizens it has attempted to deceive. Perhaps this is one of the reasons that the majority of the people living outside the City have elected to form service districts to take care of their needs as they perceive them.

Sincerely,

JO HAJDU

The Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
Juneau, Alaska
99811

Dear Senator Sturgulewski:

As you are chairman of the Senate Committee on Community and Regional Affairs I am appealing to you to overturn the decision of the Local Boundry Commission to annex a large portion of the Kodiak Island Borough into the city of Kodiak.

In my letter to you on January 16, 1979, I stated some of the reasons I was opposed to this action. The longer this issue goes on the more I feel as if I am being "railroaded" into something undesirable. If an election were held in the affected area and the majority were for annexation I would abide by that decision. However, having been in contact with most of those residents I find that the desire is to remain outside the city.

I am very concerned that our state system allows and encourages a five member commission who are not residents of an area to come in and make a decision so against the wishes of those who reside in that area.

I respectfully ask that you use your position as chairman of the reviewing committee to vote <u>against</u> the annexation into the city of Kodiak.

Sincerely yours,

Norman D. Wooten

Norman D. Wooten

23 January 1979
Kodiak, Alaska

The Honorable Arliss Sturgulewski
Alaska State Senate

Dear Senator:

I have been an Alaskan resident in Kodiak for 31 years and am in total opposition to the forced annexation of my area to the City of Kodiak for the following reasons:

1. The area is still very suburban in nature due to large lots, most of which are over one acre in size, one has 67 acres. In order to pay taxes and assessments on this size lot at this time, many of us would have to subdivide and sell part which would defeat the reason we moved out here.

2. The Antiquities Act — Proposition 13 —— so many issues are showing us that people, yes Alaskans too do care "how" they're governed and when "enuff is enuff".

The people & their wishes should be important in decision making where their property and well-being is concerned. If people are so full of apathy that they don't express their opinions & wishes that is one thing. They deserve what they get. However, expressing such and being able to change inequitable laws and/or reverse decisions not representative of the people affected, is our right as citizens.

3. We know the City of Kodiak is in financial trouble - an article in our local papers now and again verifies this but must we pay for their mistakes and get nothing in return? We pay the city sales tax on everything we purchase in the city and everything that is delivered to us such as oil, propane, etc..... We also pay the Borough Personal Property Tax which city residents don't.... The Borough contributes to the city library on our behalf, swimming pool and gym are Borough. we who have city water pay a higher usage rate and we have and pay for a fire district.

People in the Borough recently voted for new service districts in the event they are needed, and only one area is in need of any particular service at this time which can be taken care of without being annexed. The Borough and City has an agreement contract stating the city will supply non-residents with services they are willing to pay for and want. Otherwise, the majority of the people are content with things as they are.

4. We residents organized and have circulated petitions in the affected areas and in the City. For myself I have had one person refuse to sign saying he was involved with the city over property he owns. Within the City I've only had two people not sign. Most people are well aware that the revenue the City would derive from our property couldn't pay for much service. I sincerely believe they only want us as a tax base for bonding purposes.

I am very suspicious of people or governments that go behind my back in order to get something done which affects me and mine so deeply.

If and when a majority of the people in my area by a vote feel it best to annex I would go along peaceably. None of the people in the City or in the affected areas were consulted on this matter - but treated like we weren't old enough to blow our own nose!!

Would much appreciate your careful consideration in helping to reverse the Boundary Commissions decision in this matter. Thank you for "listening".

ENC: Flyer put out & paid for
by organized residents
of affected areas.

Sincerely,
June Juelson
Mrs. June Juelson
Box 286, Kodiak, Ak. 99615

CAN YOU AFFORD FORCED ANNEXATION?

Despite what the City of Kodiak says, annexation will cost you money . . .

. . . The present City mill rate is 16.1; the mill rate outside the City is 7.0. The proposal for differential tax zones in the annexation area is only a recommendation of the City's annexation committee--six residents of the area to be annexed. The City Council is not obligated to accept the recommendation. AFTER ANNEXATION TAKES PLACE, THE CITY COUNCIL CAN LEVY ANY TAX RATE IT WISHES--REGARDLESS OF THE WISHES OF AREA RESIDENTS.

. . . Fire insurance rates will not decrease because of annexation. Insurance rates are set by a national rating association. Lower rates would require a fire substation and fire hydrants as well as fully maintained roads, higher water pressure and more fire equipment and personnel for the larger area.

. . . Assessments for water and sewer, to be based on the square footage of each lot, will be inequitable. A homeowner on a 200' x 150' lot will pay five times more for water and sewer than a homeowner on a 60' x 100' lot. Unimproved lots will also be assessed for water and sewer.

. . . New trailers <u>will not</u> be allowed in the area, causing housing costs to rise.

. . . Costs of government will increase. The Borough government will continue its present functions so its costs won't decrease, BUT the City's costs will increase with a larger area to be serviced.

Borough residents already pay for the services they use. Almost half the City's revenue comes from sales tax; only about 9% comes from property taxes. It has been estimated that more than half of the sales tax is paid by non-City residents. Why should you be forced to pay more money?

ANNEXATION WILL NOT NECESSARILY IMPROVE SERVICES

. . . The City's record on road service is poor. Many roads inside the city are unpaved and poorly maintained. Just a few examples: Cope Street, High Street, Baranof Heights, Russell Estates, East Addition, Leite Addition.

. . . The City plans to improve sewer and water service only in certain parts of the annexation area.

. . . Recreation facilities are already available through the Borough-donated swimming pool and gym. The Borough contributes to the support of the A. Holmes Johnson Library for use by Borough residents.

. . . The City police force may be adequate for the present city area, but it would not be able to cover the large area to be annexed.

. . . "Early and special representation" allowing a resident of the area to be a non-voting member of the City Council is an empty promise. Any person may attend Council meetings, and the inequity of not having a vote is the central issue in forced annexation.

WHAT CAN YOU DO?

This forced annexation can be overturned by the Alaska State Legislature if it acts to di: pprove the annexation in the legislative session beginning Januar: 15. If the Legislature does not act, the annexation will take place. YOU CAN INFLUENCE THE LEGISLATURE:

1. A petition opposing forced annexation is presently being circulated. Both residents of the area to be annexed and city residents may sign the petition.

2. Write to the Chairman, Senate Committee on Community and Regional Affairs and the Chairman, House Committee on Community and Regional Affairs, Pouch V, Juneau, AK. 99801. Request that the committees hold a hearing on the Kodiak City annexation and urge them to recommend that the Legislature disapprove the annexation.

PLEASE TURN THE PAGE FOR MORE STEPS YOU CAN TAKE TO DEFEAT FORCED ANNEXATION

Kodiak Annexation

18 January 1979
Kodiak, Alaska

The Honorable Arliss Sturgulewski
Alaska State Senate

Dear Senator:

I am writing you as chairman of the committee for Community and Regional Affairs, to ask that your committee investigate the apparent loss of citizens right to be heard as regards the Boundary Commissions position on the forced annexation of the approximately 2,000 acre's north of the City of Kodiak. As a resident of Kodiak for over 31 years, I have never seen a more flagrant disregard for the people than this.

Although permitted by Alaska Statutes, the intent of the Legislature could not have been to put the residents of the whole community at the mercy of commercial interests and a few misguided local politicians.

As chairman of "Borough Residents for Autonomy" for the past two months, I have discussed this issue with hundreds of local residents. My findings to date are that 95% of those residing outside the city oppose this forced annexation and at least 85% residing inside the city also oppose it. If it's against the wishes of the majority of the people, why should it be allowed to happen?

Thank you for your careful consideration of this matter.

Sincerely,

Dick Juelson

Kodiak annexation

January 22, 1979

Hon[illegible]y Hammond
Gove[illegible]or
State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Governor Hammond:

I am circulating a petition that opposes forced annexation. I have several hundred signatures from the proposed annexation area. Ninety-five percent of those contacted signed the petition. The remaining five percent did not sign for religious reasons and other affiliations.

About eighty-five percent of City residents contacted have signed the petition opposing annexation.

We solicit your assistance in defeating this issue.

Sincerely,

Okey Chandler

Dear Sirs;

Although time is running short this letter is intended to bring about some action on the part of the State Legislature to help defeat forced annexation with the City of Kodiak. We are only two individuals living within the involved area, however we most certainly are not alone in our protest to this annexation.

To begin with let it be known that the wishes of area residents were totally ignored by the local boundary commission. Every resident of the area who testified at the boundary commission hearing spoke *against* forced annexation! It seems to us that our feelings and interests are being ignored by more powerful individuals who stand for annexation in the hope to gain a great deal for their own self-interests.

Another pertinent fact is that the area does not meet the standards for annexation. The area is not urban: the standard lot size in the area is one acre or larger, and one third of the land area is undeveloped.

City services are not required in this area. Fire protection is presently provided through a service district; roads are presently State-maintained or privately maintained; police protection is provided by the State Troopers; water is presently available to the majority of the area and is paid by user fees; sewers can be provided through service districts in those areas where sewers are needed.

We have signed a petition opposing forced annexation and hope that it will give you some idea how many individuals hope to stop annexation. We need your help! Please act on the behalf of the residents of this area by overturning forced annexation.

Sincerely,

Ron Matsuoka

Attention: Arliss Sturgulewski;

This letter is to inform you and your Committee that the vocal minority, that is opposing annexation does not reflect the feelings of the majority in the city or the areas to be annexed. Nor do they offer an alternate solution to bringing about the badly needed services that Kodiak needs.

I am hopeful that in your wisdom or knowledge that you will base your support on the issue of facts in your inquirey, and not on the very vocal minority, as the majority is usually passive and not very vocal. Annexation is the last tool at our disposal to bring about the needed services, as a proposition to elect a unification charter commission and, or a proposition to grant service districts powers to the borough was voted down in our last election.

I leave the question to you; what other choice do we have other than annexation?

Sincerely,

Bob Brooks

RE: Local boundary commission proposal for Kodiak annexation

Dear Legislature:

I would like to go on record expressing my objection to the proposed boundary commission proposal for annexation to the city of Kodiak. In 1946, I obtained title to my homestead and have had continuous residency there since 1950. In 1973, I subdivided 19-one acre lots and have sold 12 of these lots. In 1973, I sold 100 acres to Mr. Al Schafer, who in turn, subdivided aobut 30-one acre lots. The remaining 67 acre parcel has been advertised for sale for six or seven months. However, the costs of development and the pending threat of annexation have discouraged buyers.

If there is a need for the development of this property, it can be developed through the Borough sewer, water and road service district, which we in the area voted for, without annexation, or the additional improvement, assessments and 9 mill city tax.

There is a 40 acre tract in USS 3515 adjoining my property with only one house. There are only 10 houses on my 160 acre homestead in US Survey 1682.

At this time, we feel the proposed annexation is premature. It should be postponed a few years until the need for full city services exists and the area has the population base necessary to support those services. Forced annexation to the city would leave me in dire circumstances, as I am 85 years old.

I think the members of the legislature should visit Kodiak prior to letting this happen. On that visit, I am sure you will discover many parts of the city which need and pay for city services, but are still waiting to receive them.

I respectfully request your support of a resolution rejecting this proposed annexation. If I can provide you with more information on this matter, please let me know.

Sincerely,

B E Nachtweih

8 March 1978

To Whom it may concern,

The purpose of this letter, is to illustrate, through relating a series of past events, what I perceive to be a general lack of concern for the other guy or what could be termed an "every man for himself," attitude.

I had heard of Russell Estates and their "sewer problems" but was assured that my new house (Jim Smiths old house-Lot 3 Block 3) had already experienced the local problems and through a new pump and line that was installed, should have no further problems. We moved into the house on the twelveth of August 1977.

Everything was going smoothly until November 17th when my neighbor's (John Pirak) and my sewer line froze, breaking my grinder pump and I assume his also. The history on the open sewer lines that froze is somewhat unclear to me but I shall give you an account as best I can determine.

When Jim Smith lived in the house the plastic sewer line was apparently shattered from the main line back-pressure. This caused my contractor, Richard Carr, and Tac Plumbing to arrange to have a copper line installed to withstand the high pressures introduced by the less-than-sufficient sewage system laid by Russell Estates. Perhaps a one-way check valve would have been in order, at the street connection. I don't believe this was done, as I have street pressure on my house line even now.

The new copper line rests mostly on John Pirak's land and is a common line for both our houses, with each house tapping into the system through a "Y" type connection to the single line. This single line concept was probably adopted in order to reduce the high costs of the special materials involved in the fix.

Now we know how and why the open copper sewer lines were there, but not why they were left uncovered or whose responsibility it was to cover them, nor has anyone involved accepted the responsibility.

It should also be mentioned at this point that John Pirak's grinder pump and lead-in lines were open to the elements and unprotected from any possible freezing situation. Sometime after the sewage line replacement and before I bought the house, my grinder pump lones had also blown and had been replaced by Tac Plumbing with copper lines. As can be confirmed by Bradley Plumbing, the heat tape previously installed on the plastic lines was left laying on the bottom of the pump housing and consequently those lines were frozen. No indication of these problems was related to me by Jim Smith so I had assumed they did not exhist.

So much for the background. Now that my pump has quit and I have water all over my house (Nov 17), I called my contractor (Richard Carr) note- (house still under warranty) and explained the situation to him; careful to mention that I'm sure the line is frozen and the pump broken, and requested that he, as the contractor, make arrangements theough the responsible parties, to repair the problem. The reason I suspected a broken pump is that I had the complete service manual and trouble shooting guide on loan from the neighbor on the other side of me (who had recently experienced a similar problem), which clearly explained that a blocked line would most likely cause the pump to fail.

Richard Carr called Bradley Plumbing andthey arrived at the house some time later and examined the problem. He said,"the sewer line was frozen"!!! He then called his supervisor who apparently called Marine Welding Service to come and thaw the lines. Even though the line was then thawed, my pump, as suspected, failed to work: For that visit I was charged $36.05 by Bradley Plumbing for the service call and $30.90 by Marine Welding for thawing the line.

Bradley Plumbing ordered the repair parts for the pump; and I, as a back up, ordered them also. Our parts arrived at the same time about the 18th of December. This was for us, one month with no sewage. Not a pleasant experience when you've just bought an expensive house and its the holiday party season.

I had, in the meantime, talked with Richard Carr, still seeking his assistance in placing the bills in the hands of the responsible people.

I made arrangements with Bradley Plumbing to have the pump repaired the afternoon of 20 December but was greeted by the work crew at 08:30 a. m. when I was returning home from work. The men had just turned the circuit breakers off in the house and were ready to begin repairs. The next thing they did was cut the two electrical wires leading to the pump. One line was still hot and on the same line with my refrigerator. In my opinion a very dangerous and non professional approach. I mentioned I had the step-by-step instructions for pump removal and repair but they chose not to use them. They did remove the pump, take it to the shop, repair it, replace it, and it worked. The cost was $200.87 for two men for three hours minus $24.02 for parts. My neighbor indicated that he could do it in from one to two hours.

Incidentally, I covered the sewer lines myself to prevent freezing. Bradley Plumbing, after replacing the broken parts in the pump, reinstalled the heat tape on the lead-in lines and confirmed it was working. These lines later refroze, even with the heat tape on, indicating the initial installation was not adequate to withstand the winter environment we experience in Kodiak.

Meanwhile, John Pirak's contractor (Mr Nylund), had put some heat tape and insulation on his pump and lines. They were, quite obviously, inadequate as their pump and lines refroze. John Pirak has had his problems too. After returning to Kodiak after his Christmas Vacation, he discovered his sewage system was not working properly. I don't know just what series of events led up to the present day situation, but I do know that about the fourteenth of February he began dumping raw sewage between our houses. The City was notified of this that day and a Mr. Herman Beukers came out and evaluated the situation and talked with John Pirak and myself. I had thought that this would be sufficient to "get the ball rolling" and clear up this problem. I was wrong, as I found out when I had returned home from an extended trip to Seattle on the 25th of February. Raw sewage was still being dumped between our houses routinely, and in its flow to Lily Lake was passing under my house. The stench was, and is, terrible. On Monday, the 27th of February, I called the City Manager and explained the situation to him and my displeasure that the situation had progressed unchecked. I had called John Pirak first to find out if anything was being done, to which he replied "no". It should be noted that even though I would not,and did not dump sewage during the month my system was out, there are people with different values,and under these circumstances, they cannot be faulted entirely in this matter. At least this time my phone calls prompted some action and the following day his system was again hooked into the sewer system and "magically" worked. If you should check with the weather bureau you would notice the temperature had been above freezing for several days and had undoubtably thawed the lines allowing his pump to again work. I believe this whole evolution is based on the simple fact that liquids freeze when not properly insulated from the cold.

Everyone is again happy and contented for the moment but; wait a minute, are John's pump and lines freeze-protected? No! they aren't and he is gone out on another Crabbing trip. Effectively there has been no long term solution introduced and the situation is likely to occur again at any moment.

Although I duscussed, in detail, all the aforementioned circumstances with each person involved, no one would acknowledge and accept the responsibilty for the occurrances or admit to a lack of professionalism. The common putoff was "I'll look into it", "The City is responsible", or " The other guy should have done it".

I intend to send a copy of this letter only to the people mentioned on the distribution list for now and will hold my final judgements until everyone has had ample time to respond to this and possibly bring new light on the situation and work out a reasonable answer to why this has happened, and correct those discrepancies that now exhist.

I have decided that the financial responsibility for my above mentioned problems, rests with Richard Carr and that he, in turn, should redeem whatever monies he feels he is due from the responsible individuals.

I would hope to have more pleasant relations with everyone in the future but realize few people are appreciated by those who bring them to task. It should also be noted that throughout this affair I ahve not lost my temper and my primary concern has always been to correct those faults that should never have occurred in the first place.

Sincerely yours,

D. R. Jetts

Legislator
Pouch V
Juneau, Alaska 99811

Dear Legislator:

On October 6th the Local Boundary Commission made a decision to propose the annexation of* Island Lake, Spruce Cape and Mill Bay to the City of Kodiak. As you know, this method of annexation does not give the affected resident a voice in that basic decision.

* all affected area

When you take away someone's right of choice, even if sanctioned by State law, you had better have a good reason, a dire need. Because you have taken away something you can't give back.

I am the chairman of a group formed by a large number of residents in the area that has been recommended by the Local Boundary Commission. We will be forwarding information, facts and reasons why we feel so strongly that the Alaska State Legislature should disapprove that recommendation.

We request your serious consideration of this issue, as on the face it appears to be just an annexation, but in reality it threatens for us the very essence of representative government.

Sincerely,

Dick

Dick Juelson,
Chairman
Borough Residents for
Autonomy

cc: Governor Jay Hammond
Commissioner, CRA
Chairman, Local Boundary Commission

File

December 21, 1978

Dear Legislator:

On behalf of the residents of the Spruce Cape, Monashka Bay, Mill Bay and Island Lake areas, I am seeking your assistance and that of your colleagues in the State Legislature in requesting that you support a joint Senate/House resolution, overturning the Local Boundary Commission's recommendation that these areas be annexed into the City of Kodiak.

As expressed in the attached letter to the Boundary Commission, the residents of this annexation area have not voted for annexation. They feel they do not need and cannot afford the full range of City services at this time. The recognize the need for sewer, water and road services as expressed by their vote when they approved a Borough service area to provide these services.

As you know, following that election the City of Kodiak took legal action to enjoin the election, even though their efforts to obtain a restraining order to bar the election were overruled by the Kodiak Superior Court. A final decision on this issue is still pending.

We recognize the State Constitution and the State laws of Alaska allow the Boundary Commission the power to annex areas regardless of the citizens' wishes; therefore, we ask your assistance in exercising your constitutional power to overturn this decision, by allowing free people the constitutional rights guaranteed by the U. S. Constitution to express themselves in a free election the type of local government they wish to represent them, and the types and levels of service from government they feel they need and can afford.

I am sending a copy of this letter to Governor Jay Hammond and each member of the Alaska State Legislature. I will also be forwarding additional materials to you during the discussions on this issue as I am sure other citizens of this area will also be doing.

Again, I ask your assistance and vote to undo what is about to be done to those of us who will be included in this annexation area.

Yours truly,

Okey Chandler

Okey Chandler

ANNEXATION HEARING

MAY 20, 1978

The Boundary Commission should not consider forcing anyone to be a part of the City before City government is in the framework of the U. S. Constitution.

October, 1977 City voters voted for everyone to pay their own personal property taxes instead of the City paying them. December, 27, 1977, several of the biggest businessmen, millionaire boat owners, etc., appeared before City Council and requested they override the referendum and they did. The City will pay their taxes until January 1, 1979.

Most cannery workers are paid $4.00 to $4.50 per hour. About 8 years ago, it was voted to tax rent. Labor in the City is taxed.

Last summer City Manager, Mr. Widom, stated that the City was going broke and found new things to tax: lawyer fees, Sears orders, freight and parcel post. A Sales Tax Inspector and Collector was hired.

At the last Council meeting, it came up to raise the sales tax $.02.

After looking at tax assessments and large businesses in the core area, it is obvious that most of them are paying taxes on 1965 valuations. Land values have risen 5-30 times as much in outlying areas.

Approximately 20 years ago, residents of the Mission Road area voted to be annexed to the City. Lots in the area were 1,000 to 6,000 square feet. Land value doubled in a year or two. In 5 to 6 years, the assessed value went up 20 times more than they were when annexed to the City. Allman Addition was annexed in 1965. Several

hundred people lived in both of these areas.

Area: Catholic School - 80 Acres, Annexed 1967.

Area: Kodiak Community College - 80 Acres, Annexed 1965.

Area: Hospital and Graveyard - 50 Acres, About 1966 Annexed.

Sealand Cargo Dock was annexed in 1977. They were paying $17,000 taxes and now pay no taxes.

Gibson Cove was annexed in 1976. No one lives in this area. The Borough is losing money.

There have been 15 to 20 other annexations. For various reasons quite a few were to keep from paying taxes on inventory and equipment.

The real property tax amounted to $677,116 in the City in 1977. Sales tax was $1,200,000. More than half of this was paid by people living outside of the City. Over 1/3 of City taxes are paid by people living outside of the City.

The Police Department is budgeted for $813,379 which is $136,000 more than all real property taxes collected in the City.

There were 3800 people living in the City in 1970. This is $214.00 for every person living in Kodiak to support the Police Department. People living outside City limits do not need City Police protection. There hasn't been an act of violence that I have seen in the newspapers outside of the Kodiak area.

The City Manager is grossly exaggerating the facts about services. He stated that 40% of library services were for people living outside of the City. There are about 3 times as many people living in the City as in the immediate vicinity. He stated there were 26 fires outside the City in 1977. There have been 2 trailer fires in the Spruce Cape area since December 12, 1977.

The cemetery was public land which was given to the City. The

City doesn't dig any graves. There is another cemetery.

The Ram site is a community project. The City is paid for everything that is landed at the City Dock. I am sure the City makes out.

All of the land in the Monashka Bay area was bought from the Borough or BLM on contract. 70-80% are buying in new subdivisions on installment. Monashka Bay has about 300 acres and 15-20 houses. USS 1682 has 160 acres about a mile from Island Lake. It is very irregular to be included in Island Lake area and has about 12 houses on it.

USS 3219 - 10 acres, 30-40 houses. Lots are 50 x 100. Many lines were put in 20 years ago and were not buried deep enough.

Any areas that wants an improvement district petitions the Borough and it is placed on the ballot. All water and sewer lines are installed by the City and Borough and are done by contract.

I came to Kodiak February, 1946. There were 2,600 people here then. In 32 years it has grown to 3,800. The projected population growth in the various areas are pipe dreams.

The airport is 5 or 6 miles from Sealand Dock. This is several hundred acres in this area that belongs to the Federal government. No one lives on it. Wien Airlines has a contract for security check. The City is paid, if this is annexed the City will probably tax freight, and tickets and everything else they can tax.

The only government we have in Kodiak that abides by the U. S. Constitution and common law is the Borough government. If this vast area is annexed to the City it will destroy what is left of democracy in this area.

The City is broke and seeks this large annexation to bail them out. The City Manager and City Council that sent for you never spent a day on the firing line to keep democracy alive. I request that you deny this petition for annexation.

December 19, 1978

Dear Legislator:

I am a long-time resident of the area recommended by the local Boundary Commission to be forcefully annexed to the city of Kodiak.

I request your assistance in overturning the decision of the Boundary Commission. At the public hearing held by the Boundary Commission in Kodiak the only testimony offered in support of the annexation was given by members of the city council and the city manager, while the meeting place was jammed to overflowing with residents in opposition.

The city of Kodiak has not documented any threat so grave as to deprive the citizens of Alaska of the right of self-determination. The main reason advanced by the city seems to be the need for water and sewer in the area to be annexed, but they have not furnished a time table (or costs) for the provision of these services. Further, I'm sure you are well aware that these services can be provided by the city without annexation. In fact, some parts of the area already have city utilities and pay a surcharge for the privilege.

Utilities are force-fund accounting, paid for by the users, so there is no cost to residents of the city for us to have this service.

It appears to me that the real reason for the city's request to the Boundary Commission is that the city council fears that the Borough Assembly represents a threat to its' power structure. The hapless residents are therefore caught in the middle of this power struggle.

If the decision is allowed to stand, the taxes of the people in the existing city limits and the taxes of the residents outside the city will be increased to provide services which have not been requested and are not desired.

I would also appreciate your support in making statutory changes so that no other citizen of the state will ever find himself arbitrarily placed under a form of government without a majority vote of the persons affected.

Thank you very much for any assistance you may be able to render.

Very truly yours

Jo Hajdu

The Honorable Arless Sturgulewski
Chairman
Alaska State Senate
Pouch "V"
Juneau, Alaska 99811

Dear Senator Sturgulewski:

We are taking this opportunity to express our feelings against being annexed to the city of Kodiak. We have lived in Kodiak 30 years-most of that time living in the Spruce Cape area- on a homesite which we had "proved-up". There have been several attempts during the last few years to take us into the city. These attempts have been made more in the form of threats and untruths than in a co-operative workable arrangment.

Very truly yours,

Mrs. Lindsey
Mr. and Mrs. Louis B. Lindsey

cc: Clem Tillion,Pat Rodey,Tim Kelly

23 January 1979
Kodiak, Alaska

The Honorable Clem Tillion
Alaska State Senate
Juneau, Ak. 99811

Dear Senator Tillion:

I have been an Alaskan resident in Kodiak for 31 years and am in total opposition to the forced annexation of my area to the City of Kodiak for the following reasons:

1. The area is still very suburban in nature due to large lots, most of which are over one acre in size, one has 67 acres. In order to pay taxes and assessments on this size lot at this time, many of us would have to subdivide and sell part which would defeat the reason we moved out here.

2. The Antiquities Act -- Proposition 13 ---- so many issues are showing us that people, yes Alaskans too do care "how" they're governed and when "enuff is enuff".

The people & their wishes should be important in decision making where their property and well-being is concerned. If people are so full of apathy that they don't express their opinions & wishes that is one thing. They deserve what they get. However, expressing such and being able to change inequitable laws and/or reverse decisions not representative of the people affected, is our right as citizens.

3. We know the City of Kodiak is in financial trouble - an article in our local papers now and again verifies this but must we pay for their mistakes and get nothing in return? We pay the city sales tax on everything we purchase in the city and everything that is delivered to us such as oil, propane, etc.... We also pay the Borough Personal Property Tax which city residents don't.... The Borough contributes to the city library on our behalf, swimming pool and gym are Borough. We who have city water pay a higher usage rate and we have and pay for a fire district.

People in the Borough recently voted for new service districts in the event they are needed, and only one area is in need of any particular service at this time which can be taken care of without being annexed. The Borough and City has an agreement contract stating the city will supply non-residents with services they are willing to pay for and want. Otherwise, the majority of the people are content with things as they are.

4. We residents organized and have circulated petitions in the affected areas and in the City. For myself I have had one person refuse to sign saying he was involved with the city over property he owns. Within the City I've only had two people not sign. Most people are well aware that the revenue the City would derive from our property couldn't pay for much service. I sincerely believe they only want us as a tax base for bonding purposes.

I am very suspicious of people or governments that go behind my back in order to get something done which affects me and mine so deeply.

If and when a majority of the people in my area by a vote feel it best to annex I would go along peaceably. None of the people in the City or in the affected areas were consulted on this matter - but treated like we weren't old enough to blow our own nose!!

Would much appreciate your careful consideration in helping to reverse the Boundary Commissions decision in this matter. Thank you for "listening".

Sincerely,

Mrs. June Jackson
Box 286, Kodiak, Ak. 99615

ENC: Flyer put out & paid for by organized residents of affected areas.

1-25-79

an Senator Tillion: P.S.

Rec'd your letter tonight & will answer your question now as best I can.

Spruce Cape: Has City water line put in by ASHA after '64 earthquake. We pay higher user fee. ASHA sold line to City for a very nominal cost. Sewer line is out as far as the treatment plant but no one is hooked up on that new line. A couple residents are hooked up from old line due to City moving out for the school or I believe. They had the chance to hook on & did. No immediate need for sewer but service district has been voted in if & when need arises.

Island Lake - has temporary city water line, no sewer. A definite need in this area - that is why they voted for a service district recently. Property owners would be assessed for the line no matter who put it in. We feel the Borough is in better condition to get bonding that the City. Compact area around the lake only.

Mill Bay & Nonashka - mostly very low density - have own wells and sewer systems. Content as they are. So is Spruce Cape.

We watch Capitol '79 and find it very interesting - sure helps to see you all in there doing your job. We feel closer to you and you must feel closer to us knowing we're watching.

Thanks for your care in this matter. [illegible]

The Community & Regional Affairs Committee
Bob Mulcahy, Senator
Vice Chairman of the Committee
Pouch V
Juneau, Alaska 99801

Dear Bob,

I feel the annexation of Spruce Cape, Island Lake and Millbay to the City is the only practical way to bring about the needed services; sewer, water, police protection and a better utilization of the land in these areas.

In a small community such as ours, two overstuffed governing bodies are both costly and unnecessary. Unifying these areas can and will reflect an overall improvement making these areas a better place to live.

Service Districts under the Borough would be too costly which when realized by the people in these areas would be turned down thereby continuing the unhealthy and undesirable conditions that exist.

Sincerely,

Iris M. Brooks

TO WHOM IT MAY CONCERN:

From March of 1974 to September of 1976 I lived on Cope Street, the street that ascends the side of Pillar Mountain from the Sheffield House.

The conditions of the public works and utilities on Cope Street are poor. The road is very narrow allowing only one way traffic. It is seldom graded, and has very limited parking. Occasionally while I lived there the garbage truck could not make it up the road due to heavy snow or ice. This limited the service.

The water pressure on Cope Street is also very poor. Many times I had absolutely no water pressure when my neighbor was using water. This was most inconvenient when I was in the shower and my neighbor flushed his toilet.

TO WHOM IT MAY CONCERN

Mr. Neseth and I have lived at the end of Cope Streeet since the 1930's when the area was away out of town. Many homes have filled in the area since and Cope Street simply grew in by general use. It is grossly inadequate for the amount of traffic on it, exeeially in the winter when it is too hazardous to drive as serious icing occurs. The overflow from ditching (or whatever) has nowhere but the road to get on, and is an every winter condition. Such a vehicle as the garbage truck has great difficulty maneuvering for a turn-- this is winter and summer. Our private steps from the Base Road level to the Cope Street level past our kitchen window becomes a public thorofare for foot travel at this end. This is naturally a nuisance besides an invitation to who-knows-what mischeif in this day. We don't like it.

June 5, 1978

TO WHOM IT MAY CONCERN:

As a resident on Cope Street from November 1, 1975 to January 4, 1976, I found the public works facilities in very poor condition. There was no water pressure and at best of conditions was not able to wash clothes or shower without being inconveniences by poor water pressure. During our residency there we found that most times we had to park on Rezanoff and Walk up the hill carrying groceries, etc., because there was no parking facilities available on the street. Snow removal activities prevented any parking during that period of time. Because of these conditions my family and I moved to another area.

House and Senate Community and Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Committee Members;

The City of Kodiak's current taxation policy includes levy of sales tax on goods ordered directly from a point outside Kodiak (i.e. Seattle) when that firm has a representative in Kodiak. They justify this stand on a City Statute which permits such taxation when the goods involved are solicited for within the City proper. This policy results in City sales tax being charged for orders placed directly with the Sears-Roebuck office in Seattle. The City contends that Sears Roebuck catalogs and a Sears Catalog store being in Kodiak constitute sufficient solicitation to support such taxation.

I find this tax policy objectionable and question whether catalogs or the presence of a catalog store in Kodiak qualifies as solicitation - especially for those of us who live outside the city limits. It seems unfair that we Borough residents who live outside, but near the Kodiak City limits should have to pay this tax, whereas persons living elsewhere in the Borough do not.

I learned of this tax in April, 1978 when I placed a placed a fairly large order directly with the Sears Roebuck office in Seattle. Even though I paid for this order (including freight) in advance, I was billed an additional 3% by Sears Roebuck for Kodiak City Sales Tax prior to delivery.

I would appreciate your assistance as a member of the Community and Regional Affairs Committee in looking into the propriety of this taxation. Hopefully, your upcoming visit to Kodiak may provide an oppertunity to look into this matter in greater depth.

Your time concerning this matter is appreciated.

Cordially,

Peter B. Jackson

February 3, 1979

Senator Arliss Sturgulewski
Community & Regional Affairs Committee
Juneau, AK. 99811

Dear Senator Sturgulewski:

The anxiety and activity being generated by the Boundary Commissions annexation statement for an area in Kodiak is touching a lot of people. The flurry seen on top of the pile against annexation does not reflect the thinking of all of us residing in the area affected.

Our elected officials made a statement that they were going to abide by the majority of the voters they heard from. What they should have said is that they would act responsible to the needs of the area to be annexed. Both of our elected officials have lived in Kodiak a long time and are aware of the health problem in the Island Lake area. The Spruce Cape area also has a sewage problem. It is as critical as the Island Lake area but has not had the publicity. A lot of the effluent goes over the bank onto the beach or into swampy or creek areas. I am sure your group deserves a close look at this situation to make an intelligent judgement.

The State Health Department is accutely interested in what will happen. If this area is not annexed and the Borough government attempts to provide the service of sewer and water there could be legal problems to overcome. The services could be delayed and no telling how long it will take the court to come to a decision. Problems like this the officials are aware of and should be paying attention to and not just appeasing the voting public. The animosity against the city a few are carrying in the fight against annexation might cost us all a lot more than just taxes.

I truly think that your group coming to Kodiak and surveying and listening to the people will help the health and welfare of our neighbors. Thank you for your interest.

Very truly yours,

Emil Norton

The Honorable Governor Jay Hammond
Juneau, Alaska

Dear Governor:

We are opposed to the forced annexation being proposed by the City of Kodiak, and the specially appointed Committee on Annexation.

We own three lots within the affected areas and are very disturbed that we are not being allowed to vote on this issue or be taken seriously when we say we are not interested in being annexed into the city. Two of our lots are vacant and our home is on the third. We were planning to build a larger home to accomodate the needs of our family more adequately, but if we are forced into the city it is extremely likely that we could not afford the taxes and other assessments that would be required for sewer and water services (which it seems very unlikely we would receive within a reasonable amount of time). Forced annexation would very possibly force us to sell our larger lot and the hopes of a larger home.

Please take all due action to see that those persons affected by this action on the part of the Kodiak City Council will have their opinions and desires heard, and that an equitable solution be implemented.

Thank you for your interest in these matters and your subsequent intervention as needed.

Sincerely,

Mr. & Mrs. Glenn Dick

Kodiak Alaska.
Jan. 30. 1979

Governor Hammond.

Dear Sir:

I wish to object to the annexation of the lands outside of the City of Kodiak.

I am a 34 year resident of Alaska, all in Kodiak. I have lived in the same place for 30 years.

We, the resident voters, voted for a Service district, which will take care of our need for many years.

Most of us have spent many dollars developing our communities, and are happy as things are. If we wanted we would move on.

Being dictated to goes against the grain, and our democratic way of life.

I believe the same as most of the people in the concerned areas, that this is only a way for the City, "Kodiak" to get more ~~to~~ bonding bus; and if the same holds true as in the past. They would not do any improvements for 5-10, meanwhile collecting taxes for which we would get nothing.

Please give this matter some serious thought.

Sincerely

Juneau, Alaska 99811

Dear Arliss:

Again annexation has stirred up the Kodiak community. I am not sure that I will be in town when your committee comes to Kodiak so thought it best to drop you a line as to my feelings as a citizen of Kodiak. I am a resident of the City, and I believe this matter concerns all citizens of the Kodiak area. We are one community and should function as such.

It is my strong belief that the Boundary Commission has bent over backwards to accomodate the residents of the area to be annexed. I do not believe that the Kodiak area can have proper sanitation or land management until annexation takes place.

You have really been handed a "hot potato", but I'm sure with your experience on the Anchorage Assembly you can handle it very well.

I'm sure you are enjoying your Senate work. Best of luck.

Sincerely,

Kay

Kay Poland

kep/ns

3 Feb 79

Honorable Governor

Last Mo a a city resident that is against the annexation to the east of Kotlik what the boundry commission has proposed for the following reasons

a. It is my personell belief that is not legal at last Morally to force annexation on any group that is opposed as otherwise without a vote of those concerned

b. Like us, Kotlik our city council has a long history of distorting truths to the betterment of big money or for personal gains. It shows in the sewer systems within our city where different contractors have not been forced and built to standards that verge on criminal neglect

Besides the back street problem that I'm sure you are aware of my own home on Regan St was not properly connected. Instead of making the contractor put in a lift station to raise the effluent it is at the rear of our lot + adjoining lots without easements. The line has no fall to it or at least very little causing many clogging of the line. It is a normal occurrence for us to have to pressure force the line open. I've been told by a friend of mine (One of the local plumbers) that this type of problem is common

throughout the city having to pressure flush peoples sewer lines as long as this type of problem has been allowed to continue to exist makes me think it will always be so.

C. as a city resident there is a far overriding need that I am entitled to, and that is my right to privilege there being increased greatly with the annexation the police force has be proposed by 30% the fire department by 20% the city Public works by 25%, with increased in vehicles for police fire trucks a new fire station and a larger and new city public works Maintance shop. The tax base of the area concerned could only support a 6.7% which mean that the most the city would have to make up the last.

D. I hope you will support legislation that will take away the power that is now given to the boundry commission

E. I hope you will check the reasons of the minority of those wanting this annexation a Example is Block who has only a small real property tax base compared to a large personell property base that as a city resident I wouldn't have since the city plays it for its citizens

Let me thank you for at least reading this as former members of the Kodiak Island Borough I'll be happy to give you any assistance

Honorable Jay S. Hammond
Governor
State of Alaska
Pouch A
Juneau, Alaska 99811

Dear Governor Hammond:

After further discussions with more citizens of the Kodiak community, we wish to further advise as to some of the alarming shortcomings of the current City of Kodiak utility system. About eighteen or twenty years ago, the City installed a sewer system with engineering so poor that it was necessary in some instances to install the piping above ground to obtain gravity flow. More than a year passed after the installation before the City would accept hookups to the installed line. People living at the site were without sewer and in the presence of an above ground line, requested that the City cover the sewer line to keep it from freezing. The City advised that the residents should cover it themselves as it was on their property. The City of Kodiak installed two neoprene couplings on the pipe so it could be steam heated when freezing occurred. The line is made of asbestos material which is cracked, a fact which can be examined visually at 1520 Mission Road, next to the Kingdom Hall Church.

The sewer treatment plant which was completed last year, never has worked properly. I doubt if it ever will. I have enclosed a newspaper article describing the technical difficulties resulting from poor design and bad construction. I live about ½ mile from the sewer treatment plant and observe the traffic on the road near the plant daily. A tank truck is required to make regular pickups of undried sludge since the very beginnings of the plant's operations.

A friend and acquaintance, Mr. Van Hulle, who lives at 1315 Ismailov, has said that his sewer line backs up into his house every year or so without any explanation as to the technical problem by the City. Mr. Van Hulle can be reached for personal testimony on the problem at 486-4791, his place of employment, or his home number, 486-3418.

The La Lande Addition petitioned the City of Kodiak for annexation in 1965. The lots in the subdivision were approximately 50 X 100 feet. They were interested in having sewer service. The neighborhood was annexed in 1966 and did not receive any utility service until the fall of 1973.

The above comments and the enclosed printed material give further evidence that the City of Kodiak isn't capable of taking care of what they have now, let alone considering expansion of systems into other areas.

Sincerely,

Okey Chandler

Sludge pollutes stream:

City's multi-million dollar sewage plant not working right

City maintenance personnel are still being confounded by the multi-million dollar sewage treatment plant, and the problems have led to serious concern by several local residents.

Apparently secondary waste material, better known as sludge in the sewage treatment business, is being dumped at the landfill site off of the Monashka Bay Road and is polluting a nearby stream.

An investigation by Kadiak Times confirmed reports of the leaking sludge ponds, and Wednesday city maintenance supervisor Herman Beukers said his department is aware of the problem.

Beukers said the sludge being dumped at the landfill site has an 80 percent water content which is causing it to run off from the ponds. He explained the treatment plant's centrifuge and other necessary equipment used to extract water from treated waste is not operating properly.

Consequently he said, the sludge contains far more water than it is supposed to. "Only 20 percent of the sludge is solid waste," Beukers said. He said the city plans to find another spot at the landfill site to dispose of the sludge in order not to further pollute the nearby stream.

The city had planned to dispose of the secondary waste material at Swampy Acres off of the Base-Town Road, however, that area is tied up by Native land claims.

Beukers said that his department knows what is wrong with the centrifuge, the problem is trying to find someone to fix it. He said it could be another two months before the problems can be ironed out.

Ordinarily some 600 gallons of sludge must be disposed of daily, however, the city has been dumping more because of a backlog.

The sewage treatment plant went into operation last May.

SLUDGE PONDS AT DUMP — Resident Jerry Burns looks over a pond of sludge material from the sewage waste treatment plant. Several cells or ponds have been built to store the sludge, however, some of the waste is leaking into a nearby stream.

Officials say Libby Presnall will quit post

Kodiak City Clerk Libby Presnall has indicated she intends to resign from that position sometime next month, according to reports from city officials yesterday.

Mayor Gary Stevens said Wednesday he has not received anything official to date, however, according to conversations with Ms. Presnall she told the mayor she intends to resign by March. City manager Clair Harmony confirmed that report.

Ms. Presnall could not be reached for comment before press time Wednesday. She has been employed by the city for nine years, Harmony said.

Harmony said Presnall's resignation was not scheduled for discussion at tonight's regular city council meeting.

LETTERS

(Continued from Page 4)

which they are not entitled to.

Now it is also a fact in land starved Kodiak that all unclaimed lands would belong to the Borough; that is, to the people of Kodiak. In other words, if the Natives did get title to lands which they should not have, they would be stealing from all of us.

My question is, what is the Borough doing to protect the interests of all of us? The Citizens Action Group using their own money are investigating the claims of several possibly fraudulent villages and apparently grounds to continue the case. However their funds are limited and they are fighting Native groups funded by enormous amount of federal (taxpayers) money. If they should loose their fight, it should be because their cause is wrong rather than they were outspent!

I hope this letter will be answered publicly by the responsible Borough official; what is the Borough doing to ensure that the villages contested by the CAG are legitimate? Should not the Borough be doing just what the CAG is doing?

Whether one agrees with it or not, the Native Land Claims Act is law. Yet the Native should get only that to which he is entitled. If no one protests, he could steal it all. What is the Borough who is most concerned doing about this? We taxpayers would like to know!

Sincerely,
Earl Fischer

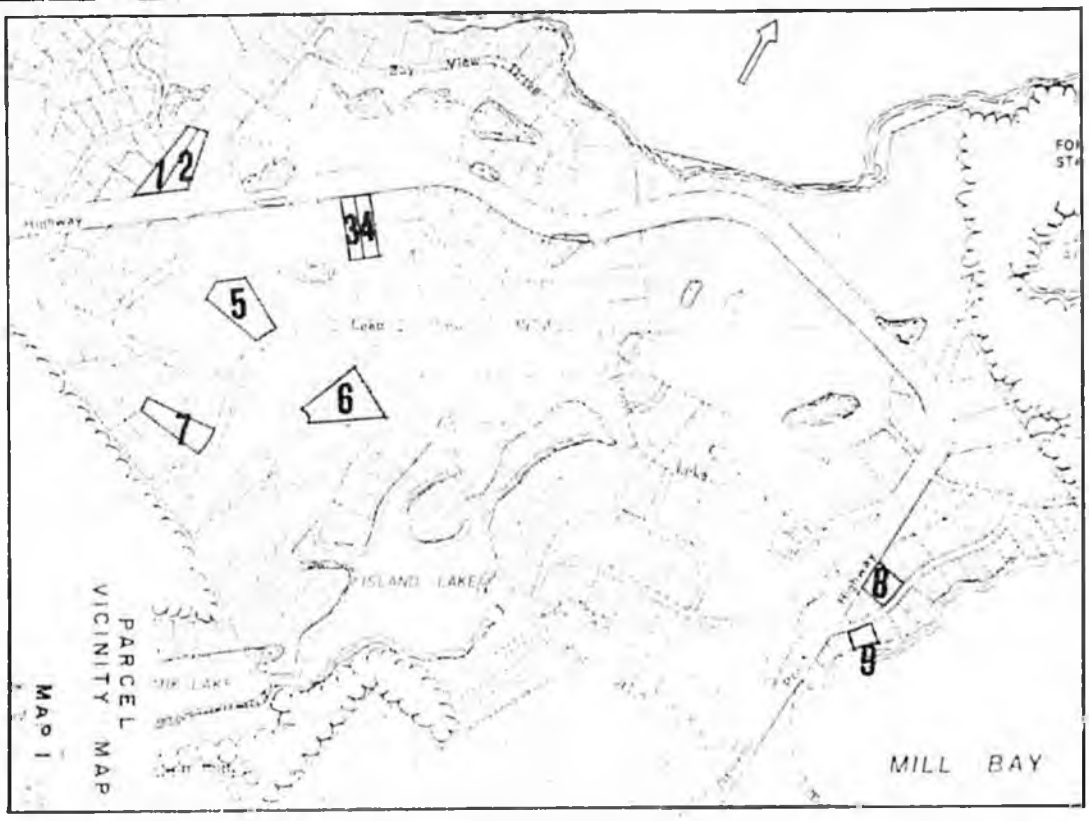
Photos by Dennis A. Johnson

SLUDGE POLLUTES STREAM — Borough resident John Attaway kneels beside a stream running near the landfill site off Monashka Bay Road. Problems at the sewage treatment plant have forced city maintenance personnel to dump sludge with 80 percent water content at the landfill site. City personnel say they are aware of the problem, and are coming to terms with it.

AUCTION

(Continued from Page 1)

parcel 4 is Lot 10B and minimum bid is $38,500.



Road access to parcels 5,6 and 7 has been platted, and Denslow said funds are expected to be appropriated this year under the Borough local service roads and trail program for construction. Parcels 5 and 7 front Lake View Road are 3.35 acres and 2.41 acres respectively.

Parcel 5 is located in Block 4, Lot 20 of Monashka Bay Subdivision, minimum bid is $27,000; parcel 7 is located in Block 8, Lot 5 of the subdivision and minimum bid is $20,500 -- the lowest of any of the lots.

Parcel 6 is located in Block 7, Lot 9 of the Monashka Bay Subdivision on Sawmill Circle, a cul-de-sac. The lot is 3.91 acres and minimum bid is $31,500.

Parcels 8 and 9 front Cliffside Road off of Monashka Bay Road in the Miller Point Subdivision. Parcel 8 is 1.35 acres located in Block 5, Lot 7A; minimum bidding price is $21,000. Parcel 9 is the only beachfront property up for sale, and is located in Block 1, Lot 4 of Miller Point second addition; minimum bid for the .70 acre lot is $30,000.

Any parcels remaining unsold after the auction will be up for sale after 60 days. Buyers will be restricted to purchasing one parcel only. More information, including a land sale specification sheet, can be obtained from the borough clerk in the borough office building.

LAND AUCTION SET — Above map shows location of parcels to be sold by the Kodiak Island Borough. (Story on Page [illegible])

Ted Nelson's mother dies

Maureen Nelson, the mother of local resident Ted Nelson, died Saturday evening in Muskegon Heights, Mich. where she has lived since moving to the United States from Dublin, Ireland.

Mrs. Nelson, 75, had recently visited her son and his wife, Norma Nelson, in Kodiak, and had made a trip here in 1977. Maureen Nelson was born Sept. 5, 1903 in Dublin and moved to this country when she was 21.

Later Mrs. Nelson met Joseph E. Nelson, and eventually the couple were married. She is survived by two daughters, two sons, 17 grandchildren and five great grandchildren.

Funeral services were held in Muskegon Heights yesterday. Burial will be in Muskegon Heights as well.

Ted Nelson and his wife have lived in Kodiak since 1974. Nelson is employed by the State of Alaska, Department of Transportation.

FLIK

Film Lovers in Kodiak (FLIK) has scheduled a well known Humphrey Bogart movie (a sea epic) at East School this Saturday (Jan. 27) at 7:30 p.m. FLIK is for members, and donations will be requested from visitors.

The Community & Regional Affairs Committee
Bob Mulcahy: Senator, Vice Chairman of Committee
Pouch, V.
Juneau, Alaska 99801

Dear Sir,

We live in the Bells Flat area where the borough furnishes road services, which consist of snow removal only, costing us 7.2 mills, a total of 14.2 mills. Considering the cost of this one service, we feel service districts for other services; water, sewer and police would be too high.

We feel the city could and would be able to furnish the needed services much cheaper and sooner. The areas up for annexation now would be wise to annex to the city, realizing full services for 16.2 mills.

Sincerely,

_____

F · 1633
Kodiak, Alaska 99615
February 4, 1979

The Honorable Arliss Sturgulewski
Chairman, Senate Committee on
Community and Regional Affairs
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

My husband and I live at Island Lake, Kodiak, in the area affected by the proposed City of Kodiak annexation. We are both opposed to the proposal.

The wishes of area residents were ignored in the Boundary Commission's recommendation. At the well-attended Boundary Commission hearing not one area resident spoke in favor of the proposed annexation; in fact, only the Kodiak City Manager testified in favor of the proposal. A petition opposing the annexation has been circulated among residents of the affected area; at this time over 600 of the area's 800 adult residents have signed the petition.

Prior to the City's proposal, the Kodiak Island Borough had, at the request of area residents, studied providing services to the area through Borough service districts. In an election area residents voted for the establishment of Borough water, sewer and road service districts. The Borough had previously negotiated agreements with the City of Kodiak to make possible this service district approach. Progress stopped, however, when the City sued the Borough and petitioned for annexation of the area.

Now, however, instead of looking toward the provision of services, City officials have stated that they cannot afford to provide sewer, road or improved water service to areas like the one in which we live. We live on a one-acre lot reached by a small privately maintained road. City officials have explained that because the area is sparsely populated and present roads inadequate, the City would not be able to provide services to us. But our situation is not unique in the area proposed for annexation. A one-acre lot is the standard lot size in the area, one-third of the area is completely undeveloped, and two-thirds of the area is sparsely populated.

As justification for recommending the annexation, the Alaska Department of Community and Regional Affairs in its May 17, 1978, Report to the

Local Boundary Commission, cited Article X Section 5 of the Alaska Constitution that " . . . a new service area shall not be established . . . if the new service can be provided . . . by annexation to a city." But if the City of Kodiak disavows any intention until some time in the distant future of providing services to the vast majority of the area, doesn't that negate the preference for annexation over a service district?

We urgently request you to recommend the Senate defeat the proposed City of Kodiak annexation, both because the merits of the case argue against annexation and because forced annexation would strip the citizens involved of their right to have a voice in their own fate.

Sincerely,

Patricia Szabo

Juneau, Alaska 99801

Dear Bob,

We live in the Island Lake area that is up for annexation. We have this to say. Our area is in bad need of sewer and water, as we are sure you have been aware of.

After considering what it could cost under a service district using Bells Flats area as an example, where a service district for minor road service cost, 7.2 mills, for a total of 14.2 mills in the borough we feel that annexation to the city would be far cheaper at 16.2 mills for all services.

Sincerely,

February 1, 1979

The Community & Regional Affairs Committee
Fred Zharoff: Representative
Pouch, V.
Juneau, Alaska 99801

Dear Fred,

We live in the Spruce Cape area, that is up for annexation and we wish to convey these facts to you. Even though a number of us in this area is not vocal as some of the anti annexation crowd, we feel the unifying of our area, Island Lake and Millbay is the only practical way to bring about the improvements that is sorely needed and shall be expecting, your effort toward the conclusion, that will benefit the areas as a whole.

It is said you indicated in conversation with two or more people on your departure, that you agreed that annexation was our last and best hope at this point, but you felt you owed a political debt, to certain election support. We would feel that you would be doing a great disservice to the whole community if your efforts reflected these facts.

Sincerely,

SENATE COMMUNITY & REGIONAL AFFAIRS COMMITTEE

KENAI LOCAL BOUNDARY COMMISSION RECOMMENDATIONS TO LEGISLATURE

Chairman Arliss Sturgulewski called the meeting to order 1:30 p.m.

Chairman Sturgulewski gave a brief review of the Kenai Local Boundary Commission report and recommendations presently before the Committee. She stressed if no action was taken, the recommendations would be considered approved and would thereby go into effect 45 days from the time introduced in the Session.

Mr. Doug Griffin, Local Government Specialist, State Department of Community and Regional Affairs, attending in behalf of Mr. Palmer McCarter, Director of the Local Government Assistance Division, gave a brief review, stressing that the recommendation was strictly a clarification of an incorrect boundary made in 1974. The Forest Service had noticed first the descrepancy. His Department was in total agreement with the recommendations now before the Committee.

Senator Simpson questioned for clarification sake that no physical change was entailed, that it was merely correcting the description.

Mr. Griffin confirmed and gave further technical boundary descriptions.

Senator Simpson asked when the the boundaries were first drawn.

Mr. Griffin stated the erroneous description was dated April 30, 1974.

Senator Simpson expressed curiosity at how the descripancy was noticed.

Mr. Griffin stated in a memorandum the Forest Service noticed descripancies when making adjustments.

Committee Action

A motion was made and unanimously passed concurring with the Local Boundary Commission Report.

KODIAK TRIP PLANS

Committee members briefly discussed material being compiled for their review before the Jt. Hearing took place; agenda outline; timetable; crowd anticipated, etc.

February 12, 1979

TO: The Honorable Clem Tillion
President, State Senate

FROM: Arliss Sturgulewski, Chairman
Senate Community & Regional
Affairs

RE: Kenai Local Boundary Recommendation

The Senate Community and Regional Affairs Committee held a meeting 1:30 p.m., February 8, 1979, to discuss the Kenai Boundary Recommendation as presented to the Legislature by the Local Boundary Commission. All members present decided to take "no action," thereby letting this recommendation go into effect.

This notification hereby closes our Committee file.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER POUCH B – JUNEAU 99811

February 8, 1979

The Honorable Arliss Sturgulewski, Chair
Senate Community & Regional Affairs Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

The error in the description of the southeasterly boundary of the Kenai Peninsula Borough was brought to our attention by the United States Department of Agriculture, Forest Service. This boundary is located in a very remote area and, thus, the erroneous description was not discovered for these many years. The enclosed report from the United States Department of Agriculture, Forest Service provides a detailed account of the situation.

A public hearing was held in Soldotna on January 12, 1979 by the Local Boundary Commission (LBC) to consider this question. The LBC held a decisional meeting on January 18, and recommended to clarify and correct the southeasterly boundary of the Kenai Peninsula Borough.

The Kenai Peninsula Borough supports the amendments correcting this boundary description and since the area affected is not presently inhabited, we concur with the Borough's position and feel that speedy resolution of this situation is in the best interest of the State and the Kenai Peninsula Borough.

Sincerely,

Lee McAnerney
Commissioner

Palmer McCarter

by: Palmer McCarter
Director

Enclosure

21-P2LH

KENAI PENINSULA BOROUGH BOUNDARY December 1, 1978

In the process of compiling changes to be made in Topographic Quadrangle Seward B-5, it was noted that the description of the Kenai Peninsula Borough, dated April 30, 1974, southeasterly part, had an anomaly in the use of the Chugach National Forest Boundary to amplify portions of the description.

In two cases in this portion of the description, a corner is established using a land survey corner, and then is amplified by stating a latitude and longitude. In both cases, the latitude and longitude is incorrect, as determined from Bureau of Land Management Protraction Diagrams S15-2 and S14-11. The corners are as follows:

S.E. Corner of the S.W. 1/4 of Sec. 22, T4N, R5E.

Borough Boundary Description:

LAT: 60° 25' 00" N
LONG: 148° 33' 00" W
(This latitude and longitude is stated as being on the Chugach National Forest Boundary, which it is.)

Correct description from BLM Protraction Diagram S14-11

LAT: 60° 24' 56.923" N
LONG: 148° 33' 42.146" W

S.E. Corner of the N.W. ¼ of Sec. 27, T1S, R5E.

Borough Boundary Description:

LAT: 60° 02' 00" N
LONG: 148° 33' 00" W
(This latitude and longitude, as stated in the description, is on the approximate Chugach National Forest Boundary)

Correct description from BLM Protraction Diagram S15-2

LAT: 60° 03' 42.949" N
LONG: 148° 34' 11.811" W

Further study showed that the portion of the borough boundary line between these points did not take into account the east-west correction of the section lines as they cross the Seward Base Line.

It was further noted that the term "(projected)" was used following each use of a Section type corner; e.g. "N.E. Corner of Sec. 26, T9N, R2E (projected)." The term probably intended is "protracted", meaning a land survey corner established on paper but not in the field.

It was also noted that in some cases, the term "South" was used to describe the direction along a section line. In other cases, the term "southerly" is used. The term "southerly" is more correct, since except at the township boundaries, the section lines are not true North-South lines.

The intent of the boundary line appears clear, and this intent is shown on the Seward A-5 Quadrangle, where the borough boundary can be seen not to follow the Forest Boundary, and it shows a correction at the Seward Base Line. (Copy of Seward A-5 attached.)

The existing description of the area in question is:

".....N. E. Corner of Sec. 25, T4N, R4E (projected); thence East to the S. E. Corner of the S. W. 1/4 of Sec. 22, T4N, R5E (projected), said corner being on the Chugach National Forest Boundary at Longitude 148°33'00"W, Latitude 60°25'00"N; thence southerly along the boundary line of said Chugach National Forest to the S. E. Corner of the N. W. 1/4 of Sec. 27, T1S, R5E (projected), said corner being on Longitude 148°33'00"W, Latitude 60°02'00"N; thence West....."

Suggested changes in the description are as follows: (additions are underlined; deletions are crossed out.)

".....N. E. Corner of Sec. 25, T4N, R4E ~~(projected)~~ (protracted); thence East to the S. E. Corner of the S. W.1/4 of Sec. 22, T4N, R5E ~~(projected)~~ (protracted); ~~said corner being on the Chugach National Forest Boundary at Longitude 148°33'00"W, Latitude 60°25'00"N;~~ thence southerly ~~along the boundary line of said Chugach National Forest~~ to the S.E. Corner of the S.W. 1/4 of Sec. 34, T1N, R5E (protracted); thence West to the N.E. corner of the N.W. 1/4 of Sec. 3, T1S, R5E (protracted); thence southerly to the S.E. Corner of the N. W. 1/4 of Sec 27, T1S, R5E ~~(projected)~~ (protracted); ~~said corner being on Longitude 148°33'00"W, Latitude 60°02'00"N,~~ thence West....."

The description of the area in question would then read:

".....N.E. Corner of Sec. 25, T4N, R4E (protracted); thence East to the S.E. Corner of the S.W. 1/4 of Sec. 22, T4N, R5E (protracted); thence southerly to the S.E. Corner of the S.W. 1/4 of Sec. 34, T1N, R5E (protracted); thence West to the N.E. Corner of the N.W. 1/4 of Sec. 3, T1S, R5E (protracted); thence southerly to the S.E. Corner of the N.W. 1/4 of Sec. 27, T1S, R5E (protracted); thence West....."

Re: Kenai Peninsula Borough Boundary Hearing

Dear Arliss:

The State Boundary Commission conducted a hearing on January 12, 1979, in Soldotna, during which only Philip Waring, our Planning Director, and Mayor Don Gilman gave testimony.

We take no exception to the Boundary Commission action since it conforms exactly to the Borough boundaries as we understood them to be.

Sincerely,

Clyde Baxley

SUBJECT: House Bill No. 185 DATE: March 27, 1979
State Aid to Municipalities
for Cultural Facilities

I would appreciate a hearing on House Bill No. 185 in the near future.

I realize that you have conducted hearings on similar Senate legislation. However, I will be pleased to testify on the bill or provide other information you might need.

I would like to see the legislation enacted this session and therefore view an early hearing and movement of the bill as critical.

Juneau, Alaska 99811
465-3991

MEMORANDUM February 25, 1980

TO: Representative Terry Gardiner

FROM: Jack Kreinheder, Issues Analyst

RE: HB 192 - Computer Runs Excluding Hospital and Health Entitlements
Research Request No. 64

As you requested, I have produced five alternative entitlement breakdowns for HB 192, all of which exclude the revenue sharing entitlements for hospital and health facility operation, hospital construction, and health power grants. A chart summarizing the results is attached, as are the more detailed computer printouts on which the chart is based. The total current entitlement under present statutes for these categories, including the cost of living allowance and the partial funding proration factor, is $8,259,162. I have subtracted this value from the original HB 192 total entitlement of $27,000,000 to arrive at a base or midpoint value for comparative purposes of $18,740,838.

Four other runs were made on the low side and the high side of this midpoint value using $2 million increments, as you requested. These entitlement values were $14,740,838, $16,740,838, $20,740,838, and $22,740,838, respectively.

I'm sorry for the delay in providing these runs, but the updating process required considerably more time than I expected. The model is now updated and complete.

Please let me know if you have any questions or would like additional runs. As you know, the Agency has a very full workload at the present time, but we will do what we can to provide any further research or computer work on HB 192 as quickly as possible.

MEMORANDUM February 15, 1980

TO: Representative Bill Parker
Senator Arliss Sturgulewski

FROM: Jack Kreinheder, Issues Analyst

RE: Revenue Sharing Research
Research Request #8.

Introduction

You have asked that I prepare an analysis of the present revenue sharing program and of the revenue distribution plan incorporated in HB 192, with respect to the criteria set forth in my memo of January 14 and discussed at our meeting the next week. This memo is intended to provide you with the requested analysis and to inform you of other findings of my research to date, the most important of which is that a foundation approach to revenue sharing was introduced in 1975 as HB 539. A copy of the bill is attached, along with a brief report by Mike Miller, Chairman of the Interim Committee on Shared Revenues with Municipalities, which drafted the legislation. I have also attached as background information two memos prepared for Rep. Gardiner by John Williams of the former Research Division and Jack Chenoweth of Legal Services. One memo is a sectional analysis of HB 192 and the other is a general discussion of present law and HB 843, the predecessor to HB 192. The major changes between the two bills are that the per capita income factor was dropped from the equalization formula and eligible local revenues were expanded in HB 192.

Summary of Comparative Analysis

The revenue sharing proposal embodied in HB 192 appears to represent a marked improvement over the present program with respect to six of the ten criteria which we agreed upon as possible goals for the revenue sharing program. The comparison for the remaining four criteria yields mixed or uncertain results. The four criteria for which HB 192 offers no definite advantage over the current program are (by their original numbers): (4) Creation of incentives for transfer of service delivery responsibility from the State to municipalities; (5) Creation of incentives for local government formation in the unorganized borough; (6) Encouragement of local effort in funding basic or additional services; and (10) Encouragment of efficient delivery of services.

It is important to note that although HB 192 may constitute a substantial improvement over the present program in terms of six criteria, there may be alternative systems or modifications which would more completely fulfill some or all of the goals represented by these criteria, and by the four criteria with which HB 192 does not clearly comply. However, it is encouraging, given your emphasis on the use of HB 192 as a legislative vehicle, that the bill does appear at the outset to be compatible with most of your priorities for the revenue sharing program.

The ten criteria will each be evaluated below. For each criterion, the implications of the present program will first be discussed, followed by a comparative evaluation of the HB 192 proposal.

I. An Equitable Allocation of Financial Resources

Because equity is such a subjective term, this criterion cannot meaningfully assessed in isolation, but must be considered in the context of other criteria, primarily those relating to distribution of funds. These distribution criteria are: (2) provision of a minimum level of basic services; (3) consideration of local population, wealth and need; and (7), pertaining to tax equalization. Each of these criteria will be discussed in detail below, but their relevance for the equity question can be summarized here.

Present Revenue Sharing Program

Under present law, approximately 75 percent of revenue sharing funds are distributed on a per capita basis, with the entitlements dependent on the type of service provided. The remaining funds are allocated for road maintenance and health facilities and hospitals; these entitlements are based on the number of road miles maintained and the number of beds in each health facility and hospital (or on a per facility grant).

Criterion (2) is not addressed at all by the per capita portion of the entitlements in terms of funding. The Department of Community and Regional Affairs (CRA) has promulgated regulations specifying minimum levels of service for each of the categories, but the entitlements are still based solely on actual population, with no floor or minimum entitlements provided. A minimum grant is authorized for hospitals and health facilities.

Criterion (3) is met only to a limited degree by the present program. Population is, of course, the major factor used in computing current entitlements. Criterion (3) suggests however, that population alone

is not an equitable basis for the sharing of state revenues, and that local wealth and need should also be considered. Local wealth plays no part in the current program. If anything, entitlements are positively related to local wealth, because revenue sharing entitlements pay only a part of most service costs; therefore, a poor community may not be able to provide many services and will not receive the corresponding entitlements. Need is considered by the present program only as a function of population and the number of services provided. The structure of the program assumes that if a particular service is needed, it will be provided by the municipality and the level of the service will be determined by the population.

With respect to criterion (7), pertaining to tax equalization, the current program has no positive impact, and may actually contribute to a disequalization of the tax burdens borne by the residents of different municipalities.

In light of the three aspects of the equity question discussed above, the current revenue sharing approach appears to have major deficiencies in several areas. The program does not provide for an equitable allocation of financial resources, when evaluated in accordance with the agreed upon criteria. It is important to note that an entirely different finding could be reached if different criteria or priorities were employed. For example, Representative Parr's amendment last session to HB 192, which specified that no community could receive less revenue than its population percentage share, suggests a prioritization of the population factor at the expense of tax equalization and the consideration of local wealth and need. Were population to be treated as the major component of equity, the present program would fare a good deal better in an evaluation of this type.

HB 192

HB 192, as evaluated by three criteria stated above, is a clear improvement over the present program. Criteria (2) and (7) are addressed in the title of HB 192, which reads in part that the act provides for "minimum entitlements" and for "equalization of the tax resources of municipalities." With regard to criterion (3), HB 192 would replace the current system of per capita service entitlements with an equalization entitlement "based on the population, relative ability to generate revenue, and local tax burden of the taxing unit." Both the current program and HB 192 consider population but HB 192 also addresses the other two factors in criterion (3), local wealth and need. A more detailed discussion of this issue will be deferred to the full analysis of criterion (3).

As a final point on the equity criterion, it should be noted that greater equity is one of the two major purposes stated in HB 192. Section 1 of the act states that the purpose is to "improve the revenue raising and distribution system for the benefit of residents of home rule and general law municipalities by providing for more equitable allocation of financial resources among municipalities to improve their fiscal capacities." Of course, legislative intent and the actual results of implementation can diverge considerably, as is discussed in relation to the present program below; but this analysis suggests that the revenue distribution proposal in HB 192 should accomplish its stated goals regarding equity, where equity is again defined in terms of the component criteria discussed in this memorandum.

II. Assurance of a Minimum Level of Basic Services to Residents of Organized Municipalities

Present Program

As mentioned earlier, the only minimum entitlement provision in the present revenue sharing program is for hospitals and health facilities. The basic hospital entitlement is $1,000 per bed, up to $75,000 per hosptial, but a municipality with a hospital having less than 10 beds may elect to receive a flat $25,000 grant. Similarly, a health facility is eligible for an entitlement of $1,000 per bed, but the local government may receive a flat $4,000 grant for each facility if it chooses.

The intent of these minimum payments is clearly to account for the fixed costs and economies of scale which exist for the provision of hospital and health care services. The statute gives recognition to the fact that a hospital with less than 10 beds is likely to have substantially higher operating costs per bed than a larger hospital. A minimum level of physician services and treatment facilities is necessary for the operation of any hospital or health facility, and these costs are spread over a smaller number of patients and beds.

Similar economies of scale exist for many other services as well, but the current revenue sharing program does not allow for this factor in the per capita service entitlements. For example, a community of 200 persons receives the same entitlement ($12 per capita) for police services as does the Municipality of Anchorage, even though the smaller community would receive a much smaller percentage of the costs it incurrs for police services. Assuming for the moment that a minimum level of

police protection is one officer per 1,000 people or community, the 200 person community would receive only $2,400 in revenue sharing funds towards the cost of its one policeman. Anchorage, on the other hand, would receive $12,000 for each officer ($12 x 1,000 people).

The Community and Regional Affairs Department does administer minimum standards regulations, under 19 AAC 30.020. As an example, a community requesting revenue sharing funds for police protection must demonstrate that one or more police officers is on duty or on call at all times, and that the officers employed meet certain age and training requirements. Similar regulations cover each of the services for which revenue sharing funds are provided.

Although these minimum service standards do provide some assurance that services provided by municipalities are adequate, the standards are not backed up with funding for minimum service levels. Because service entitlements are on a straight per capita basis, a community must have a fairly sizable population before revenue sharing funds will provide a substantial percentage of the total cost of service provision at the minimum service levels specified by regulation.

HB 192

The revenue sharing plan proposed in HB 192 would replace all of the per capita entitlements, except for volunteer fire departments, with an equalization entitlement, which is discussed in more detail below. The equalization entitlement provides revenue sharing funds only to municipalities which levy taxes; however, the bill also provides a minimum entitlement of $25,000 plus an area cost-of-living differential for each fiscal year if the municipality meets certain requirements which are set forth in the bill and pertain to elections, council meetings, budget matters, and codification of ordinances. Municipalities are free to spend the $25,000 on meeting the above requirements, provision of municipal services, or on whatever they wish. The minimum entitlement provision substantially increases the revenue sharing funding available to the smaller communities in comparision to amounts allocated under present law.

In addition to increased funding through the minimum entitlement provision, two other factors suggest that HB 192 might provide more assurance of a minimum level of services than the present program. The first is that a municipality receiving a minimum entitlement must organize its administrative affairs as specified in the bill and must hold regular council meetings. Better organization may allow more efficient administration of municipal services. Regular council meetings should provide the residents of the municipality with more control over what services, and what levels of service, are provided by the municipal government.

The second factor is that all municipalities are given greater freedom over the types of services to be provided with revenue sharing funds they receive under HB 192. The current program provides funds only for a set of statutorily specified services, while HB 192 would provide municipalities with a single sum to be used for services of the municipality's choosing (exceptions are road and hospital entitlements which would still be administered on the current basis). Municipalities are therefore able to give greater emphasis to those services most necessary or desirable for their own residents. Although minimum levels of service may not be provided for all of the basic services we discussed, each municipality is more likely to provide adequate levels of service for those services of most importance in that community.

III. Consideration of Local Population, Wealth and Need

Present Program

As we noted earlier, most of the current revenue sharing funds are allocated on a per capita, service specific basis. The allocation criteria for the remaining funds are miles of road maintained, for road entitlements, and number of beds or facilities, for hospitals and health facilities. The distinction between the per capita and the other entitlements is significant in terms of the priorities stated in criterion (3), because the non per capita entitlements more closely reflect these priorities, with the notable and obvious exception of the wealth factor. The distinction between the two categories of allocations is also important because HB 192 deletes almost all of the per capita entitlements in present law, while the entitlement amounts only are modified in the road and health care sections.

The most striking deficiency of the present program with respect to criterion (3) is that local wealth is in no way considered as a factor in determining the per capita, road, or health entitlements. It appears that wealth may have an indirect effect on entitlement amounts, but the effect is directly opposite to that intended by criterion (3), which suggests that wealthier municipalities should receive a lower level of revenue sharing funds, other factors being equal. The current program, on the other hand, may tend to favor local governments with greater financial resources, as less wealthy municipalities are less likely to be able to afford to provide all services that are eligible for revenue sharing. Because revenue sharing grants cover only a part of the cost of most services, communities without a substantial tax base may not be able to fund their necessary share, and therefore would receive less

revenue sharing support than a community of equal size but greater wealth.

With respect to the population criterion, the principal drawback of the present program is that population is over-emphasized at the expense of the wealth and need criteria. However, population is not considered at all in the determination of road and health entitlements, apparently because miles of road maintained and number of beds or facilities are regarded as indicators of need. The adequacy of these indicators is another question, but it does seem desirable to employ indicators which more directly reflect need when possible, rather than using population as a proxy for local need.

It is essential to distinguish between two types of need in regard to the State revenue sharing program. The first type of need, and the one which is most commonly thought of in this context, is the degree to which the residents of a particular municipality require a particular service or set of services.

The second type of need is equally important and refers to the degree of necessity for State support of services provided on the local level. This type of need is dependent not only on wealth, but also on the level of taxation, neither of which are considered under the current revenue sharing program.

HB 192

The principal purpose of the proposal embodied in HB 192 is to make revenue sharing entitlements more equitable by introducing local wealth and tax burden factors as allocation criteria. Local wealth is defined in terms of the full and true assessed property valuation in each municipality. HB 843 also included per capita income as an indicator of local wealth, but this provision was apparently dropped because the available data were not sufficiently accurate.

The tax burden is related to the need for State support of local services, as discussed above, but is also correlated in a more general fashion with the need for the services themselves. In theory, the tax rate in each municipality should reflect the level and number of services provided by municipal tax revenues. The weak link between the tax rate and the need for local services is that the type and level of municipal services may not correspond with the actual need for the various services. However, the emphasis of both HB 192 and the criteria discussed here appears to be on local control of service delivery, thus necessitating a reliance on the ability of local governments to identify and meet local needs.

The need criterion is the least specifically defined and understood of the population, wealth, and need group, and may be one area which should receive further attention. But although local tax effort may not be the ideal indicator of local service needs, it seems clear that the combination of population, wealth, and tax effort upon which the HB 192 formula is based represents a marked improvement over present law.

IV. Creation of Incentives for the Transfer of Service Delivery Responsibility from the State to Municipalities

Present Program

By authorizing catergorical grants for the provision of municipal services, the current program does provide incentives for local governments to provide certain services. However, the strength of the incentives is limited by the statutorily specified set of services which are eligible for revenue sharing funds, and by the fact that municipalities must still pay most of the cost of locally provided services. No incentive is provided for the establishment of local services which are not on the eligible list. In addition, because no minimum level of funding is provided for the per capita services, the incentive for providing local services is diminished for these local governments with relatively few people residing in their jurisdictions.

HB 192

The implications of HB 192 regarding such incentives differ in several major respects from current law. The first is that the incentive for locally provided services is not limited to specific services, but applies instead to any service which a municipality may wish to provide. The bill thus broadens the scope of revenue sharing incentives.

However, this broadening of scope also diminishes State control over which services are locally provided. HB 192 may not be an improvement in this respect if incentives are intended to promote local provision of special services.

The minimum entitlement provision of HB 192 alleviates, at least to some extent, the declining incentive problem faced by small communities under present law. However, the bill does not specify that the entitlements must be spent on local services, so the strength of the minimum entitlement incentive depends substantially on the priorities of each local government.

An additional point is that the increased level of revenue sharing funding which HB 192 would provide should logically increase the incentive for local provision of services in a roughly proportional fashion, since more state funds would be available for these services.

The final consideration regarding incentives for local assumption of service delivery is that while the current program is selective in terms of the types of services for which these incentives are provided, HB 192 is selective with respect to the amount of funding, and therefore incentive, provided to communities of differing tax effort. The effect of the equalization entitlement is to provide a greater level of funding, and therefore a greater incentive for local services, to local governments with high tax rates. Two different conclusions can be drawn from this situation. One is that municipalities with high tax burdens will have more difficulty in raising tax rates than municipalities with low tax effort; therefore the former municipalities require a larger incentive i.e, more funding, than the latter to encourage the provision of local services. A contrary argument might be that a high tax rate is an indicator that a municipality already provides many local services, and that the incentives should be directed at those municipalities with low tax rates and few locally provided services.

V. Creation of Incentives for Local Government Formation in the Unorganized Borough

Present Program

This criterion is one which deserves further research; however, my work to date indicates that both the current program and HB 192 are neutral with respect to incentives for borough formation, and both provide positive incentives for the incorporation of cities, with HB 192 providing stronger incentives than the present program. The current program has a provision, Section 43.18.045, which prevents any loss in revenue sharing funding when municipalities unify or merge with a borough. If a borough is formed which assumes service responsibilities formerly held by cities, the cities will lose some revenue sharing funding, but the loss will be proportional to the decrease in service responsibilities.

John Williams noted in the attached memorandum of February 17, 1978 that the system of revenue sharing distribution provided in HB 843 "would appear to have a neutral effect with respect to the unification of existing governments. We do not find any circumstances where a subsequent unification agreement would cause a decrease in the revenue sharing entitlement for identical services." The same finding would

appear to apply to HB 192. HB 843 contained a hold harmless clause for non per capita entitlements which was deleted in HB 192. However, this deletion apparently has no effect on entitlement levels. Jack Chenoweth indicated that the clause was dropped because there was no situation in which HB 192 could create this type of revenue loss.

Positive incentives are provided under both present law and HB 192 for the incorporation of cities, because such cities become eligible to receive revenue sharing funds. The incentives under present law may be rather weak because of the per capita structure of the program, the lack of minimum entitlements for the various services, and the fact that communities considering incorporation are generally quite small. The combination of these factors indicates that many communities may not have a great deal to gain from revenue sharing by incorporating. Still, some positive incentive is provided.

HB 192

HB 192 substantially increases the incentive for incorporation of small communities by providing minimum entitlements of $25,000, as discussed earlier. Although no funding can be realized under the equalization entitlement unless taxes are levied, the minimum entitlement alone can provide such communities with a substantial grant of State revenue sharing funds. If a community is considering incorporation in order to raise local tax monies, HB 192 greatly increases the incentive for incorporation over the present program. Under current law, it makes no difference in determining entitlements whether a local tax is levied, but HB 192 specifically considers the generation of local revenue in the equalization formula. Given the small tax base of most unincorporated communities, even a small generation of local revenue would constitute a substantial local effort factor and the entitlements, relative to the number of residents, would be substantial.

VI. Encouragement of Local Effort in Funding Services

Present Program

Application of this criterion reveals the greatest deficiencies in both the present program and HB 192, because its intent is contrary to the legislative intent of the revenue sharing program, which is to enable local governments to reduce tax rates. The legislative intent for the program was restated through the passage of HB 89 in 1977 to read:

"The intent of sections 10-100 of this chapter in authorizing state aid for...municipal services is that municipalities which levy taxes reduce those levies in reasonable proportion to the amount of state aid received by the municipality for a given fiscal year." The present program therefore encourages a decrease, rather than an increase in local effort for funding services.

HB 192

Although the above statement of intent would be repealed by HB 192, the bill appears to implicitly retain a similar intent to reduce local effort. However, HB 192 would seem to be an improvement over present law with respect to encouraging local effort, because instead of providing the same entitlement regardless of local effort, HB 192 provides less funding for local governments which levy lower, or no taxes. Some incentive is therefore provided for municipalities to increase local effort, and thereby increase their revenue sharing entitlements. This incentive appears to be an incidental result of the equalization formula, rather than an intentional inducement to increase local effort. HB 192 would provide approximately one dollar in revenue sharing funds for each additional three dollars raised through local effort, other factors held constant. However, if many communities increased their local effort, the proration factor would be substantially reduced unless appropriations for the program were increased. A widespread increase in local effort would therefore result in little additional revenue sharing funding.

HB 192 does represent a major shift in direction with respect to local effort. Although the intent may still be to allow municipalities to reduce tax burdens, the bill replaces the blanket incentive offered by the present program with a more selective approach that focuses the incentive for reduced effort on those municipalities with high or excessive local tax burden, where it may be inappropriate to encourage further increases in local effort.

VII. Consideration of Tax Rates Equalization--Taxpayers Statewide Should Pay Roughly the Same Percentage of the Cost of a Minimum Level of Basic Services

Present Program

Because the current program does not consider local tax effort in the provision of municipal services, tax equalization plays no part in revenue sharing under current law. This would appear to constitute a major difficulty in fulfilling the legislative intent of the program.

For example, communities with no local taxes receive revenue sharing dollars for services at the same rate as a community supplying the same service with a 20 mil property tax rate and a 3 percent sales tax. Clearly the former community cannot reduce the tax burden for its citizens any more by receiving revenue sharing dollars, while revenue sharing funds would allow only a small decrease in the large tax burden of the latter community. Yet the current program provides entitlements at the same rate to communities with tax burdens as disparate as the example cited.

HB 192

Tax equalization is one of the major purposes of this bill, as mentioned earlier. By comparing the amount of revenue raised - not just by taxes, but also by fees, licenses, and other sources which replace taxes - with the tax base of the municipality, the HB 192 formula determines a local effort factor which reflects the equivalent tax burden on the residents of each municipality. Again, municipalities in which residents pay heavily for municipal services are granted a higher entitlement than muncipalities with light or nonexistent tax burdens, population aside.

It is important to note that HB 192 does not fully meet the intent expressed in criterion (7), because there is no assurance that tax rates will actually be equalized. There is nothing to prevent communities which now levy no taxes from continuing this policy. Similarly, local governments with high tax burdens are not required to reduce taxation rates in consideration of revenue sharing; if they wish, they could use the funds to provide additional services. However, some inducement for communities with high tax burdens to reduce taxes may be provided by the requirement in the bill that municipalities post notices of the mil levy equivalent of revenue sharing funds received, thus informing residents of the potential for reducing local taxes.

I would like to raise an important point which I think was overlooked in our discussion of criterion (7). The criterion does not consider the wealth or tax base of municipalities as currently worded, and thus fails to consider the true tax burden placed on residents. For example, consider two communities of equal size in which it costs $50,000 per year to provide a minimum level of police protection, but one community has a much larger tax base than the other. If each community were to pay the same <u>percentage</u> of this cost, the less wealthy community would have to levy a much higher tax to raise the same amount as the wealthier community. Therefore, it is more appropriate that the communities levy the same equivalent tax rate, even though the wealthier community may pay the entire cost, while the community with the smaller tax base may

pay only a fraction. A possible restatement of criterion (7) would be that taxpayers "should contribute roughly the same level of local effort toward the cost of providing a minimum level of basic services."

VIII. Consolidation of Funding Into a Minimum Number of Channels (a Simple System is Desirable)

Present Program

The current system is simple in terms of the factors on which entitlements are based, but the number of funding channels is large because a number of other local aid programs are administered separately from the revenue sharing program. The differing requirements and entitlement levels for the per capita grants have caused some complaints by smaller communities about the complexity of the program. Some difficulty is to be expected in any program of this type, though, because of the need for cooperation with communities that do not have adequate administrative capabilities.

HB 192

In terms of complexity, HB 192 is a trade-off. The numerous per capita entitlements are replaced with a single equalization entitlement, but the basis on which this single entitlement is determined is considerably more complex than the present program. Communities would no longer need to document the provision of local services to obtain revenue sharing entitlements under the HB 192 proposal, but detailed information on expenditures and revenues would need to be provided for each fiscal year. On balance, HB 192 would be more complex to administer than the present program, but additional complexity seems unavoidable if factors such as local wealth and need are to be incorporated into the revenue sharing allocation formula. I can see no method of simplifying the HB 192 approach without undermining the purpose and effectiveness of the bill.

With regard to the consolidation of funding channels, HB 192 does not improve the current situation. The identification of other local aid programs suitable for inclusion in the revenue sharing program may be an important research need in meeting this criterion.

IX. Allowance for Differences in Delivery Systems to Meet Local Needs (Local Flexibility)

Present Program

A substantial amount of flexibility in delivery systems is provided to municipalities under the current program. For example, a local govern-

ment can receive $5 per capita in revenue sharing funds for parks and recreation services. The community has complete flexibility in choosing whether to spend this funding on park maintenance, operation of a pool facility, or any other program.

Although the current program is flexible in the sense just discussed, it is very inflexible with regard to the types of services which are eligible for revenue sharing funding, as only the services specified by statute can qualify. The State is, in effect, assuming responsibility for the prioritization of local services by specifying the eligible services and providing different entitlement amounts for the various services.

HB 192

The bill offers almost complete local flexibility over the choice of delivery systems and the types of services to be provided. The exceptions are the road and health entitlements which are retained from present law, and the minimum entitlement provisions, which imposes certain responsibilities on communities before the entitlement can be received. With these exceptions, municipalities are free to determine service priorities at the local level. If a community has no need for air or water pollution control measures, but has a strong need for improved fire protection, it is able to use revenue sharing funds in accordance with these priorities.

Although HB 192 complies quite well with criterion (9), the flexibility which it provides appears to conflict to some extent with criterion (2), which states that a minimum level of specified services should be provided in all municipalities. Criterion (2) cannot be met without specifying the desired services by statute, which would reduce local control and flexibility. As I mentioned in the discussion of criterion (2), the emphasis seems to be on local control of service delivery, thus suggesting that criterion (2) not be interpreted literally. Given this interpretation of apparent priorities, HB 192 constitutes a significant improvement over present revenue sharing laws with respect to local flexibility.

X. Encouragement of Efficient Delivery of Services

Present Program

No explicit provisions appear to be included in current law for encouragement of efficient service delivery. Although some standards of service are required by statute and regulation, I could find no incentives

for communities to meet the required standards in an efficient manner.

There is a rather substantial indirect incentive for efficient service delivery. Because the present program supplies only a portion of the total costs of most services, a substantial commitment of local funds is necessary in most cases to provide municipal services. This local commitment provides greater accountability for efficient service delivery at the local level. For those communities that receive revenue sharing funds but generate no local revenue, this local accountability is diminished.

HB 192

The principal contribution of HB 192 with respect to efficient service delivery appears to be the minimum entitlement requirements. These were discussed earlier, but their significance here is that the necessity for small communities to prepare a budget, hold regular council meetings, and so forth should clarify local expenditure patterns and increase accountability for the efficient use of these expenditures.

HB 192 may increase service efficiency in another way by replacing the per capita entitlements with the single equalization entitlement. Because a community can receive revenue sharing funds only for specific services under present law, an incentive exists for communities to provide a service even if it is not needed, in order to increase local revenues. HB 192 would remove this incentive, because the entitlements are not tied to specific services, with the exception of road and health entitlements. This exception may be a problem; some studies have cited cases of communities clearing snow from rivers just to receive the $900 per mile ice road maintenance entitlement. The efficiency criterion may deserve further research to determine if stronger incentives for the efficient delivery of services could be implemented.

Other Research Findings

The State revenue sharing program has been the subject of two major studies since its inception in 1970. The first was a report prepared by Arthur Young and Company for the Department of Community and Regional Affairs. The conclusions of the report were that an equalization approach would be too costly and was inappropriate for a state with developing governmental structures, and that a straight per capita system would be the best approach.

The second was prepared for the Anchorage Urban Observatory Program and evaluated six alternative revenue sharing proposals considered by the

Interim Committee on Shared Revenues in 1975. Although somewhat unorganized, the report provides useful information on previous revenue sharing research. Contact me if you would like to review either of these reports.

The attached foundation approach bill was introduced during the 1976 session. I asked Jack Chenoweth about the reasons for the bill's failure and he stated that lack of available funding was the principal cause. The bill basically substitutes "units" for "dollars" in determining entitlements. The only real benefit of this approach would appear to be the ease of adjustment in the level of funding for the revenue sharing program.

LEGISLATIVE AFFAIRS AGENCY
POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99801

December 8, 1975

Senator Genie Chance
310 "K" Street
Suite 701
Anchorage, Alaska 99501

Dear Senator Chance:

I am pleased to enclose with this letter two pieces of proposed legislation which represent the recommendations of this interim committee in the area of shared revenues with municipalities. The proposed legislation is the product of a number of meetings of the committee in the months since the adjournment of the legislature plus two public hearings. One of these public hearings was held in conjunction with the October convention of the Alaska Federation of Natives, in order to receive bush community viewpoints. The other hearing was held in conjunction with the October conference of the Alaska Municipal League. In addition, suggestions and constructive criticism were requested by mail and received from a wide variety of cities and communities throughout the State of Alaska.

It was considered crucial, since revenue sharing has been created solely for the purpose of assisting municipalities in the funding of needed local services, that the final product of the committee take maximum note of the views and suggestions of the various municipalities across the state. The enclosed bill represents what the committee considers to be the most beneficial and most feasible of those suggestions.

Perhaps some review might be in order concerning the need for revision of the current shared revenue program. Although the program in concept currently enjoys the unanimous and enthusiastic support of every municipality in the state, the following were considered deficiencies which new legislation could correct.

HOUSE MAJORITY LEADER
VICE CHAIRMAN, LEGISLATIVE COUNCIL
VICE CHAIRMAN, STATE AFFAIRS COMMITTEE
MEMBER, RULES COMMITTEE
MEMBER, COMMITTEE ON COMMITTEES

First, it was felt that a "foundation" approach might be useful in the field of revenue sharing--"foundation" approach meaning a formula with a foundation amount similar in concept to that utilized in the school foundation statutes. The beauty of such an approach is that whenever a legislature wishes to raise the foundation amount (to recognize increases in the cost of doing business) it is necessary merely to amend one word in the statutes. Absent the foundation approach it is necessary, whenever you wish to recognize the increase in the cost of doing business, to go into the statutes and revise the per capita dollar figure for each of the various categories in which shared revenue assistance is given to municipalities. This is both cumbersome and, in practice, inequitible. Some categories tend to get raised, others do not and the system can easily get out of balance.

It was felt, too, that the amount of shared revenues being designated for small communities was much too small. It was recognized that the present purely per capita approach just did not offer the very small communities enough money to assist in any meaningful way in meeting the obligations of local government. It was recognized that whether a second class city had 25 residents, or 75 residents, or 125 residents there was nonetheless an irreducible minimum cost of doing business, and that that minimum was just as great for very small villages as it was for medium sized second class cities. It was, therefore, considered desirable that a minimum grant base be established for these communities and it was further considered desirable that the base amount agreed upon be as generous as possible in order that the benefits of government on the local level be economically feasible for the communities.

Another deficiency in the current statutes was the lack of the requirement for standards and criteria by which the Department of Community and Regional Affairs could determine whether communities were actually entitled to shared revenues in the various categories under which they were seeking aid. This deficiency has long been recognized by the Department of Community and Regional Affairs and has been recognized additionally by the Legislative Budget and Audit staff. This is not to say that the shared revenue monies alloted to the communities should be required to be spent in the categories designated--far from it. It was and still is the consensus of the committee and of the municipalities that local discretion should continue in the spending of shared revenue receipts. It was felt, however, that in order to receive shared revenue monies in, for example the fire department category it should be demonstrated that the community can meet minimum standards in that category.

> Finally, there was a question projected by some communities as to whether the use of categories in sharing state revenues was even appropriate. It was thought perhaps more appropriate simply to allocate available dollars to the municipalities and let each local government establish its own priorities without regard to existing municipal services.

In order to correct these deficiencies the committee drafted three alternate pieces of legislation for consideration by the committee and the municipalities of Alaska. With considerable--and greatly appreciated--assistance from the University of Alaska/Anchorage, we were able to develop extensive data showing the practical results (i.e., the dollars to be received) for each community in the state under the various alternatives. We developed similar data based on proposed legislation already in the house (legislation which, incidently, had been previously endorsed by the Alaska Municipal League) and also on a simple per capita allocation of funds to municipalities. Four of these five total alternative were specifically noncategorical in approach. All of the alternatives and all of the data were presented to delegates of the Alaska Federation of Natives Convention and delegates to the Alaska Municipal League Conference. In addition, this material was mailed to virtually every municipality, large and small, in the state with requests for evaluations and suggestions.

I think it would be fair to say that prior to the hearings and mialings there was a strong feeling among the larger communities, in partiuclar, that revenue sharing should be based on tax effort. The feeling was that those who tax themselves the most should receive the most additional state aid. This was the principle thrust of the existing proposed legislation which the Alaska Municipal League had previously endorsed. The committee recognized this concept in two of the alternatives they proposed, but built in additional factors including the availability of tax resources plus tax effort in relation to those resources. Interestingly, when all the facts--in the form of state-wide computerized readouts--were laid before the communities a very noticable modification of opinion became apparent during the hearings and in countless conversations afterward. Committee memebers noted a discernible reluctance on the part of communities, large and small, to terminate the categorical approach. What was needed, several elected officials indicated, was a bill which more or less continued the "tried and true" categorical approach, in the present revenue sharing system but which also incorporated the "foundation approach".

Basically, then, this is the bill which the interim subcommittee has proposed:

First, the bill does create a municipal "foundation approach" to revenue sharing. It does so by allocating varying numbers of units to various categories of municipal services and then multiplying those units times population, and then multiplying this product times a "foundation" base figure. For this bill the committee established a foundation base at $1.00. In future years if the cost of doing business goes up, for instance 11%, the legislature may, if it chooses, raise the foundation amount by simply changing the figure $1.00 to $1.11.

In establishing categories and establishing unit values within each category, the committee did indeed stick by the "tried and true" categories of past years. Police protection, for instance, which in previous years earned communities shared revenue at the rate of $12.00 per capita will earn units within the foundation formula at the rate of 12 units. Fire protection is 7.5 units (as opposed to $7.50 per capita under the present system). Additional ingredients include air or water pollution control (2 units), land use planning (2 units), parks and recreation (5 units). Two important changes have been made in the categorical designations. Under present law a community can receive $5.00 per capita for operating either a small boat harbor/ port or for operating mass transit or for operating an airport. In the proposed bill 5 units can be accumulated in <u>each</u> of these categories. The second important difference is the addition of solid waste disposal as a new category, which in the proposed bill will be valued at 2 units.

The proposed legislation establishes a $25,000 minimum grant for municipalities whose low per capita standing would otherwise earn them only small amounts of revenue. The committee felt the $25,000 figure was a generous but nonetheless fair amount. It was interesting to note that at neither public hearing was there any critism of this amount. At one meeting of the committee, a single individual did observe that he thought the figure was pretty high for the very smallest communities. He did not, however, seek to have the committee change the amount.

Additional features of the bill include the following:

Special start-up grants have been established in various categories for municipalities who do not currently offer such services as police protection, fire protection, air

and water pollution control, land use planning, parks and recreation, small boat harbors/ports, air ports or mass transit systems. The Department of Community and Regional Affairs is specifically charged with creating minimum standards of service in the various categories for which municipalities can receive revenue sharing. Revenue sharing for hospitals remains virtually the same as under current law except that responsibility for administering this section is transferred to the Department of Health and Social Services. Additionally, in the area of health, a paragraph specifies that no hospital or health facility shall be eligible for revenue sharing unless the facility has received a Certificate of Need from a municipality or the state. This paragraph anticipates that "Certificate of Need" legislation will be passed in this session of the legislature. Another interim committee is studying the whole broad area of health facilities so this section may undergo substantial modification when that interim committee completes its deliberations. Shared revenues for road maintenance remains virtually the same as current law. A very important feature of the new legislation is that if a new second class city is created in an organized borough after passage of this law, the city would not be eligible for the $25,000 minimum grant. This feature is designed to preclude small gatherings of 25 people or more from incorporating simply to take advantage of the $25,000 revenue sharing opportunity. Finally, a very important feature of the proposed legislation is the clause which guarantees each municipality that it will not receive less money than it is receiving under the current statutes.

There, of course, are many additional features to the legislation, but this summary covers most of the major changes.

As noted earlier, the committee is submitting two bills for introduction and for consideration by the legislature. One is quite large and comprehensive and is described in the report above. The other bill consists of only one paragraph and this paragraph constitutes one of the many provisions of the larger bill.

The provision, drafted at the request of the Department of Community and Regional Affairs, simply mandates that the department create minimum standards and criteria to qualify municipalities for grants in each category of shared revenue. If the major bill should run into difficulties and if passage does not seem assured, then it is recommended that the legislature consider and enact the oneparagraph small piece of "clean-up" legislation.

The fiscal impact of the legislation will be to raise the state shared revenue allocation from . current level of about $15 million to a level of approximately $20 million--if the bill is fully funded. The raise, of course, comes from creating the $25,000 minimum grants to small cities, from creating a new category (solid waste) and from separating the now-combined port/harbor-airport-mass transit category into three separate categories.

This report would not be complete without making special acknowledgement of the work of the several individuals and agencies. The committee is extremely appreciative of the hours of work, both during committee sessions and out of session, by Dr. Garth Jones and P. J. Hill, both of the University of Alaska/Anchorage. The vast volume of computerized data that both Dr. Jones and Mr. Hill provided was crucial in the final deliberations and directions of the committee.

Similarly, we would like to give a special thanks to Mr. Rich Wilson and Mr. Sam Coxson, both of the City of Anchorage who helped in obtaining and analyzing the data, and who attended most of the sessions and hearings of the committee and contributed greatly to the deliberations. We are indebted as well to the Alaska Federation of Natives who made time available for us during the annual AFN convention in Anchorage, and the Alaska Municipal League who similarly made time available during its annual conference in that same city. The League, as well, was most helpful to the committee in circularizing its membership and alerting municipalities of Alaska to the work of the committee. Finally, I would like to acknowledge the fine work of the staff of the Legislative Affairs Agency, and Bill Berrier in particular, plus the membership of the interim committee. Interest was lively, suggestions were broad and imaginative and attitudes were positive throughout the course of the committee's deliberations. It has been a pleasure to chair this committee and of course all of us on the committee stand ready to answer any questions which you or other members of the legislature might have concerning the recommended legislation. Thank you for your own fine support of the committee.

Sincerely,

Mike Miller, Chairman, Interim
Committee on Shared Revenues
with Municipalities

MEMORANDUM

SUBJECT: HB 843 (W.O. #7/R)

TO: The Honorable Terry Gardiner

FROM: John Williams
Research Analyst

You have asked that we prepare an analysis of HB 843, an Act providing for equalization of the tax resources of municipalities and continuing a portion of the program of state aid for municipal purposes; and providing for an effective date. The following analysis consists of: (1) a discussion of present revenue sharing law; (2) an overview of the general implications of the bill; (3) the financial distribution scheme as provided for in the bill; (4) a discussion of the allocation formula; and (5) an attachment demonstrating the comparative revenue distribution under current law and HB 843.

PRESENT REVENUE SHARING

HB 843 would amend the current state aid to local governments program, as provided for in AS 43.18.010-090. The current law provides for the legislature to annually appropriate an amount to be distributed to local governments according to a series of local services which are eligible under the program. Approximately 75% of the revenues are distributed on a per capita basis; the remainder are allocated according to miles of road maintained and the number of health facilities and hospitals (either on a per facility basis or a per bed basis). Services in support of military installations are apportioned on a per capita

basis but according to a different schedule than utilized for civilian populations. The Department of Community and Regional Affairs (CRA) determines whether a municipality qualifies under the provisions specified for each eligible service category. When eligibility has been certified, the municipality then receives a statutorily set amount per capita (or medical facility or mile of road maintained) specified for each service category. For example, a municipality receives $12 per capita for police protection, $7.50 per capita for fire protection, and $2 per capita for land use planning. Should the liability of the program exceed the legislatively appropriated amount, all municipal entitlements are prorated so that the total liability equals the available money.

The legislative intent for the program was restated via the passage of HB 89 in 1977 (120 SLA 1977 becomes effective July 1, 1978) to read "(t)he intent of §§ 10-100 of this chapter in authorizing state aid for....municipal services is that municipalities which levy taxes reduce those levies in reasonable proportion to the amount of state aid received by the municipality for a given fiscal year" (sec. 4, HB 89).

Using the criteria established by the legislative intent, there would appear to be two considerations regarding the present revenue sharing law which indicate that it cannot fully accomplish the intent. (1) The present distribution system does not consider the local tax rate in distributing revenues. Those communities which have a relatively high tax rate receive payments at the same rate as communities which supply minimal or no services from local taxes. Instead, present law directs the Dept. of CRA to determine whether specific services which

are being supplied by the municipalities qualify them for categorical entitlements, regardless of differences in tax rates utilized in funding those service categories.[1] (2) Additionally, present law does not include "ability to pay" considerations. A community with a larger than state average per capita property valuation receives revenues at the same rate as communities which are relatively poor. The same criticism can be raised with respect to per capita income differentials from which taxes are paid. A circular argument can be developed which demonstrates that poorer communities must set taxing rates at higher levels to generate the same revenues per capita as wealthier municipalities, which in turn requires a greater proportion of the disposable income of the poorer municipality residents to pay the additional tax burden vis-a-vis wealthier communities. The alternative for the poorer community is to forgo local services, which causes concomitant financial loss if the forgone services were eligible for revenue sharing dollars. The actual result is often substandard services.

---

[1] The eligible services list has expanded since inception and presently includes services related to health and welfare, transportation, recreation, and economic development (a bill before the legislature this year would add cultural activities). Since the eligible services list has greatly expanded, it would appear timely to consider allowing any public service specifically authorized by a municipality to be considered as eligible for revenue sharing dollars. A method for accomplishing this would be to look directly at the local tax rate in determining the distribution of the revenue sharing appropriation, since the tax rate will reflect the level and number of services provided by municipal tax revenues.

OVERVIEW OF HB 843

HB 843 repeals essentially all provisions of the present revenue sharing law which allocate monies on a per capita basis (police, fire, parks and recreation, land use planning, transportation, and air and water pollution control). Present law which allocates monies for health facilities, hospitals, road maintenance, fire districts outside of municipalities, and support of military installations is saved.

The repealed portion is replaced with a per capita allocation system based upon population, taxing rate, and a factor which compares each local government to the state average using per capita property value and per capita income as indicators. Our analysis indicates that any appropriation to the program in excess of $23 million will increase the entitlement for all local governments with local tax ordinances in effect except the North Slope Borough and the City of Valdez. Several second class cities and one first class city with no local taxes would receive less. Section 9 of the bill provides for all local governments to be held harmless for three years after passage, such that no municipality will receive less during that three year period than they did in 1978, regardless of their entitlement as calculated by the specified formula.

FINANCIAL DISTRIBUTION SCHEME

HB 843 provides that revenue sharing dollars shall be utilized by municipalities in the taxing jurisdiction for which the amount of entitlement is determined. Boroughs with area-wide taxes for general government services except education shall receive revenue sharing

allocations to be used for area-wide purposes. For boroughs with differential taxing rates in service areas, revenue sharing entitlements based upon the service area tax rates must be utilized only in those service areas. First or second class cities with city-wide taxes would receive an allocation based upon the city-wide tax rate to be used city-wide (except for education). Cities with differential taxing zones would receive allocations according to the tax rate applied in each differential tax zone.

This system of distribution would appear to have a neutral effect with respect to the unification of existing governments. We do not find any circumstance where a subsequent unification agreement would cause a decrease in the revenue sharing entitlement for identical services. The bill contains a hold harmless clause for entitlements under the non per capita portion should a subsequently unified local government be entitled to less than the preceding multiple local governments.

ALLOCATION FORMULA

HB 843 specifies a formula to be used in determining entitlements for per capita revenue sharing distributions. The formula utilizes three considerations: (1) population; (2) tax rate; and (3) the relative "ability to pay" of each local government or subunit thereof.

The formula is:

$$\text{Entitlement} = \underbrace{P}_{A} \times \underbrace{\left[\underbrace{(PT + 2.3ST)}_{B} \times \underbrace{\left(\frac{SPCPV/LPCPV + SPCI/LPCI}{2}\right)}_{C}\right]}_{D}$$

where P = population
PT = property tax mil rate
ST = sales tax per cent rate
SPCPV = state average per capita property value
LPCPV = local per capita property value
SPCI = state average per capita income
LPCI = local per capita income

We will discuss the formula according to the portions indicated by the braces.

Part A

The population is determined in the same fashion as provided for in present law. Any reasonable population estimate is accepted by the Dept. of CRA.

Part B

Part B indicates the portion of the formula which determines the local tax rate. Property tax mil rates and sales tax per cent rates are converted to mil equivalents. The 2.3 conversion factor multiplied by

the sales tax rate was determined by comparing the revenue that could be generated by applying a one mil property tax to the total full and true assessed property value in the state and a one per cent sales tax to the total retail business in the state. That comparison demonstrates that a one per cent sales tax would generate 2.3 times more revenue than a one mil property tax.

Part C

The portion of the formula set out by brace C averages two ratios that compare the "economic base" of each local government to the state average. The ratios are mathematically designed to create a number larger than one for communities lower than the state average for the two indicators, and a number smaller than one for communities above the state average. The average of the two ratios is then multiplied times the computed tax rate so as to adjust upward the local tax effort of economically disadvantaged communities and downward economically advantaged communities.

Part D

The portion set out by brace D is called the local effort factor, and is not allowed to exceed 25. The ceiling has the effect of setting a limit on the amount of support given to each municipality under the revenue sharing program. This, in combination with the required publishing of revenue sharing entitlements, would appear consistent with the legislative intent of the program, which is to diminish local tax burdens.

The bill further provides for adjustments in both sales tax and property tax rates based on optional exemptions allowed under Alaska law. As an example, a municipality utilizing the $10,000 residential property tax exemption would be required to declare the revenues forgone by the exemption, and a comparative portion of the tax would be excised from the tax rate base before computing that municipality's entitlement. Mandatory exemptions, such as agricultural lands and senior citizens housing would not affect the tax rate, since the forgone revenues are reimbursed by the state.

SUBJECT: Sectional Analysis of the Municipal League's Revenue Sharing Reform Proposal (Work Order No. 6162)

TO: Representative Terry Gardiner

FROM: John B. Chenoweth
Legislative Counsel

John Williams
Policy Analyst

In response to your request of the Legislative Council on July 21, 1978, we have participated with a special committee of the Alaska Municipal League in drafting a revenue sharing reform bill, which is now complete. The Board of Directors of the League approved the draft at its meeting in Juneau on January 19, 1979 (copy enclosed).

Following is a sectional analysis of the committee's product.

*Section 1. PURPOSE.

Three purposes are stated: (1) equity of allocation of state resources with municipalities; (2) basic support to municipalities for public services irrespective of physical location of taxable wealth; and (3) improvement of the administrative capacity of less populous municipalities.

*Section 2. CHAPTER 88.

This chapter contains the major revision of the revenue sharing program. In the most general terms, it provides for the computation and distribution of an "equalization entitlement" for local government services in accordance with a formula and schedules set out in the sections incorporated in the chapter.

Sec. 29.88.010 specifies the method that is utilized to distribute revenues under the chapter. Three factors are

applicable: population, revenue generation, and property value base.[1] The formula multiplies the population of the taxing unit[1] by the mill rate equivalent of allowed revenues[2] generated by the municipality. The sum of allowed revenues is divided by one-thousandth of the full and true taxable property value within the taxing jurisdiction. The resultant quotient is referred to as the "local effort" for the municipality: is equal to the full and true mill rate equivalent of all allowed revenues generated by each municipality.

Sec. 29.88.015 specifies the means whereby population numbers shall be determined. Generally, Bureau of the Census data will be utilized; however, other reliable data in the judgment of the Department of Community and Regional Affairs may be used. The provision for population count is not unlike the provision of the current state aid program. Unlike the current program, however, no separate treatment is given the counting of persons who are residents of military reservations.

Sec. 29.88.020 describes the means whereby mill rate equivalent determinations will be made. Initially, a certified statement submitted by each municipality, on a form provided by the department, will specify the revenues generated in each municipality. This shall be accomplished by all municipalities by

---

1/ A "taxing unit" is defined, for purposes of this program as "a city, borough, unified municipality, or service area or differential tax zone."

2/ Allowed revenues include tax revenues plus other revenues which will diminish the necessity of incremental tax revenues, including inspection fees, permits, fines, penalties, use fees, and income from mass transit, offstreet parking, and recreation programs. Revenues not allowed for inclusion are tax revenues used to subsidize utilities commonly run by private businesses (as defined in sec. 45 of this chapter), interest on investments, income from the sale or lease of land or equipment, and revenues from any other source.

October 15. By December 15, the department is to make a final determination for each municipality, after reviewing all financial audits and statements submitted by the municipalities. Any adjustments made to the figures initially submitted by a municipality shall be reported to the municipality along with the revised figures.

Full and true property values shall be determined in the manner provided in AS 14.17.140 (state aid to education). In municipalities which are not school districts and thus not covered by the provisions of AS 14.17, the state assessor shall, at least once each three years, estimate the property value for all cities with populations of 750 or more. For cities which are not school districts, and which have populations less than 750, estimated property values will be determined by averaging the per capita property values of all cities having populations less than 750 and for which assessments are completed.

Sec. 29.88.025 specifies the necessary documentation that would be supplied to the department by each municipality in support of its application. The fiscal information is to be for the fiscal year which precedes the fiscal for which the entitlement is sought.

Sec. 29.88.030: As with present law, the bill provides f entitlements to be returned to the taxing unit for whic e entitlement was earned. There are two exceptions: 15 pe nt of an area-wide entitlement may be used for non area-wide purposes, and, the local government may decide the taxing jurisdiction that is to receive the entitlement generated by non-tax revenues (fees, permits, etc).

Sec. 29.88.035 establishes the tax equalization account from which entitlements earned under this chapter will be paid. The total appropriation to the account is to be distributed by prorating entitlements.

Sec. 29.88.040 gives the department authority to adopt, amend and repeal regulations necessary to implement the chapter. The regulations would contain provisions for obtaining information, set filing dates, providing notification to municipalities with respect to changes made by the department with regard to any entitlement, and a reasonable time for a municipality to respond to decisions of the department. In response

to some specific complaints by several of the Municipal League representatives who worked on the draft, language has been inserted by which the department is directed to supply application assistance to municipalities. Additionally, the department is empowered to extend the definition of utilities (section 045 of this chapter) to cover additional enterprise activities for which no working classification has been provided by statute.

Sec. 29.88.045 defines terms used in the chapter, including 'taxing unit' and 'utilities'.

*Section 3. CHAPTER 89.

Chapter 89 is, in substance, a restatement of present law regarding entitlements earned for road maintenance, health facilities and hospitals, construction aid, and volunteer fire departments in the unorganized borough. The following changes have been made from present law: (1) public road maintenance entitlements are based on $2500/mile (present law is $1500/mile); (2) ice road maintenance is based on $1500/mile (present law is $900/mile); (3) construction aid for hospitals is not multiplied by the cost of living factor, as is the case in present law; and (4) municipalities which exercise a health power will not receive a $2 per capita distribution.

Generally, this portion of present law which is saved in the Municipal League's draft bill provides for health related entitlements according to the following: (1) for hospitals with 10 or more beds -- the greater of $1,000 per bed or $75,000 per facility, (2) for hospitals with fewer than 10 beds -- the greater of $1,000 per bed or $25,000 per facility; (3) for health facilities -- $1,000 per bed or $4,000 per facility; (4) the entire entitlement received for health purposes must be used for health purposes; (5) for hospitals which were begun after January 1, 1968, the greater of $2,500 per bed or 5 percent of the construction cost annually until the total payment equals 25 percent of the total construction cost; and (6) for volunteer fire departments in the unorganized borough, $7.50 per capita. Entitlements earned under this section (except for hospital construction) are multiplied by an area cost of living differential, determined under AS 39.27.030.

Section 29.89.040 establishes a miscellaneous services account, from which payments are made under this chapter.

*Section 4. CHAPTER 90.

Sec. 29.90.010 precludes an interpretation of the general administrative provisions of the state aid program to create of a debt to the state.

Sec. 29.90.020 directs the department to allocate funds from the two accounts established (AS 29.88.035 and AS 29.89.040) and further provides that any excess funds existing in the miscellaneous services account (Chapter 89) shall then be added to the tax equalization account (Chapter 88).

Subsection (b) describes the means for determining proration of funds allocated under the equalization formula of Chapter 88 and under the minimum entitlement provisions of AS 29.90.030. After the Chapter 88 and Chapter 89 entitlements have been determined, the amount necessary to guarantee the minimum entitlement provided for in Sec. 29.90.030 is calculated and all Chapter 88 municipal entitlements are proportionally reduced so that the sum of payments under Chapter 88 and under AS 29.90.030 equal the amount available in the tax equalization account.

Sec. 29.90.030 provides for payment of minimum entitlements. All municipalities are guaranteed a minimum of $25,000 (plus the cost of living allowance for their area) if (1) a regular election has been held; (2) regular council meetings have been conducted; (3) the municipality has adopted a budget; (4) local ordinances have been codified; and (5) some degree of municipal administration is provided for through a manager, clerk, or other part-time or full-time officer.

*Sections 5 - 9.

These sections make correlative changes in AS 29 required by the state aid program changes, and are generally self-explanatory.

*Section 10.

The section repeals the statutory basis of the present program of state aid to local governments.

*Section 11: "Hold Harmless"

Section 11 specifies that, for three years after this act becomes effective, no municipality will receive less than its actual entitlement earned in the last year that the present law is applied.

*Section 12

The section specifies that the act becomes effective when $27,000,000 is appropriated to the program, or July 1, 1982, whichever is earlier.

SUBJECT: Sectional Analysis of the Municipal League's Revenue Sharing Reform Proposal (Work Order No. 6162)

TO: Representative Terry Gardiner

FROM: John B. Chenoweth
Legislative Counsel

John Williams
Policy Analyst

In response to your request of the Legislative Council on July 21, 1978, we have participated with a special committee of the Alaska Municipal League in drafting a revenue sharing reform bill, which is now complete. The Board of Directors of the League approved the draft at its meeting in Juneau on January 19, 1979 (copy enclosed).

Following is a sectional analysis of the committee's product.

*Section 1. PURPOSE.

Three purposes are stated: (1) equity of allocation of state resources with municipalities; (2) basic support to municipalities for public services irrespective of physical location of taxable wealth; and (3) improvement of the administrative capacity of less populous municipalities.

*Section 2. CHAPTER 88.

This chapter contains the major revision of the revenue sharing program. In the most general terms, it provides for the computation and distribution of an "equalization entitlement" for local government services in accordance with a formula and schedules set out in the sections incorporated in the chapter.

Sec. 29.88.010 specifies the method that is utilized to distribute revenues under the chapter. Three factors are

applicable: population, revenue generation, and property value base.[1] The formula multiplies the population of the taxing unit[1] by the mill rate equivalent of allowed revenues[2] generated by the municipality. The sum of allowed revenues is divided by one-thousandth of the full and true taxable property value within the taxing jurisdiction. The resultant quotient is referred to as the "local effort" for the municipality: it is equal to the full and true mill rate equivalent of all allowed revenues generated by each municipality.

Sec. 29.88.015 specifies the means whereby population numbers shall be determined. Generally, Bureau of the Census data will be utilized; however, other reliable data in the judgment of the Department of Community and Regional Affairs may be used. The provision for population count is not unlike the provision of the current state aid program. Unlike the current program, however, no separate treatment is given the counting of persons who are residents of military reservations.

Sec. 29.88.020 describes the means whereby mill rate equivalent determinations will be made. Initially, a certified statement submitted by each municipality, on a form provided by the department, will specify the revenues generated in each municipality. This shall be accomplished by all municipalities by

---

1/ A "taxing unit" is defined, for purposes of this program as "a city, borough, unified municipality, or service area or differential tax zone."

2/ Allowed revenues include tax revenues plus other revenues which will diminsh the necessity of incremental tax revenues, including inspection fees, permits, fines, penalties, use fees, and income from mass transit, offstreet parking, and recreation programs. Revenues not allowed for inclusion are tax revenues used to subsidize utilities commonly run by private businesses (as defined in sec. 45 of this chapter), interest on investments, income from the sale or lease of land or equipment, and revenues from any other source.

October 15. By December 15, the department is to make a final determination for each municipality, after reviewing all financial audits and statements submitted by the municipalities. Any adjustments made to the figures initially submitted by a municipality shall be reported to the municipality along with the revised figures.

Full and true property values shall be determined in the manner provided in AS 14.17.140 (state aid to education). In municipalities which are not school districts and thus not covered by the provisions of AS 14.17, the state assessor shall, at least once each three years, estimate the property value for all cities with populations of 750 or more. For cities which are not school districts, and which have populations less than 750, estimated property values will be determined by averaging the per capita property values of all cities having populations less than 750 and for which assessments are completed.

Sec. 29.88.025 specifies the necessary documentation that would be supplied to the department by each municipality in support of its application. The fiscal information is to be for the fiscal year which precedes the fiscal for which the entitlement is sought.

Sec. 29.88.030: As with present law, the bill provides for entitlements to be returned to the taxing unit for which the entitlement was earned. There are two exceptions: 15 percent of an area-wide entitlement may be used for non area-wide purposes, and, the local government may decide the taxing jurisdiction that is to receive the entitlement generated by non-tax revenues (fees, permits, etc).

Sec. 29.88.035 establishes the tax equalization account from which entitlements earned under this chapter will be paid. The total appropriation to the account is to be distributed by prorating entitlements.

Sec. 29.88.040 gives the department authority to adopt, amend and repeal regulations necessary to implement the chapter. The regulations would contain provisions for obtaining information, set filing dates, providing notification to municipalities with respect to changes made by the department with regard to any entitlement, and a reasonable time for a municipality to respond to decisions of the department. In response

to some specific complaints by several of the Municipal League representatives who worked on the draft, language has been inserted by which the department is directed to supply application assistance to municipalities. Additionally, the department is empowered to extend the definition of utilities (section 045 of this chapter) to cover additional enterprise activities for which no working classification has been provided by statute.

Sec. 29.88.045 defines terms used in the chapter, including 'taxing unit' and 'utilities'.

*Section 3. CHAPTER 89.

Chapter 89 is, in substance, a restatement of present law regarding entitlements earned for road maintenance, health facilities and hospitals, construction aid, and volunteer fire departments in the unorganized borough. The following changes have been made from present law: (1) public road maintenance entitlements are based on $2500/mile (present law is $1500/mile); (2) ice road maintenance is based on $1500/mile (present law is $900/mile); (3) construction aid for hospitals is not multiplied by the cost of living factor, as is the case in present law; and (4) municipalities which exercise a health power will not receive a $2 per capita distribution.

Generally, this portion of present law which is saved in the Municipal League's draft bill provides for health related entitlements according to the following: (1) for hospitals with 10 or more beds -- the greater of $1,000 per bed or $75,000 per facility, (2) for hospitals with fewer than 10 beds -- the greater of $1,000 per bed or $25,000 per facility; (3) for health facilities -- $1,000 per bed or $4,000 per facility; (4) the entire entitlement received for health purposes must be used for health purposes; (5) for hospitals which were begun after January 1, 1968, the greater of $2,500 per bed or 5 percent of the construction cost annually until the total payment equals 25 percent of the total construction cost; and (6) for volunteer fire departments in the unorganized borough, $7.50 per capita. Entitlements earned under this section (except for hospital construction) are multiplied by an area cost of living differential, determined under AS 39.27.030.

Section 29.89.040 establishes a miscellaneous services account, from which payments are made under this chapter.

*Section 4. CHAPTER 90.

Sec. 29.90.010 precludes an interpretation of the general administrative provisions of the state aid program to create of a debt to the state.

Sec. 29.90.020 directs the department to allocate funds from the two accounts established (AS 29.88.035 and AS 29.89.040) and further provides that any excess funds existing in the miscellaneous services account (Chapter 89) shall then be added to the tax equalization account (Chapter 88).

Subsection (b) describes the means for determining proration of funds allocated under the equalization formula of Chapter 88 and under the minimum entitlement provisions of AS 29.90.030. After the Chapter 88 and Chapter 89 entitlements have been determined, the amount necessary to guarantee the minimum entitlement provided for in Sec. 29.90.030 is calculated and all Chapter 88 municipal entitlements are proportionally reduced so that the sum of payments under Chapter 88 and under AS 29.90.030 equal the amount available in the tax equalization account.

Sec. 29.90.030 provides for payment of minimum entitlements. All municipalities are guaranteed a minimum of $25,000 (plus the cost of living allowance for their area) if (1) a regular election has been held; (2) regular council meetings have been conducted; (3) the municipality has adopted a budget; (4) local ordinances have been codified; and (5) some degree of municipal administration is provided for through a manager, clerk, or other part-time or full-time officer.

*Sections 5 - 9.

These sections make correlative changes in AS 29 required by the state aid program changes, and are generally self-explanatory.

*Section 10.

The section repeals the statutory basis of the present program of state aid to local governments.

*Section 11: "Hold Harmless"

Section 11 specifies that, for three years after this act becomes effective, no municipality will receive less than its actual entitlement earned in the last year that the present law is applied.

*Section 12

The section specifies that the act becomes effective when $27,000,000 is appropriated to the program, or July 1, 1982, whichever is earlier.

THE CITY AND BOROUGH OF JUNEAU
CAPITAL OF ALASKA
155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

April 30, 1980

The Honorable Arliss Sturgulewski
Chairman, Senate Community and
Regional Affairs Committee
Pouch "V" State Capitol Building
Juneau, Alaska 99811

FILE: Legislation-1980

SUBJECT: CSHB 192(am)

Dear Senator Sturgulewski:

The City and Borough of Juneau supports HB 192 as it passed the House but requests that the following change be made in the bill to correct problems which arise out of a House Finance Committee change.

Replace lines 17 through 22 on page 2 with the following:

(C) revenue from payments in lieu of taxes made by municipally owned enterprise operations, from fees, rentals, leases, penalties, licenses or permits received during the preceding fiscal year by the municipality for a function or service over which it has control, including revenues derived from parks and recreation services, mass transit, and offstreet parking; and

The foregoing amendment

1. makes it clearer that it is the payments in lieu of taxes made by a municipal utility to the municipality which are counted as a part of local effort and that the revenue to the utility is not counted, and

2. deletes the use of the word "utility" (which is defined elsewhere in the bill for other purposes) and replaces it with the "municipal enterprise" language so that it

will include in lieu of tax payments made by all tax exempt municipal enterprise operations and not just those made by those operations which are defined as utilities, and

3. deletes revenue to municipal garbage utilities from local effort.

Thank you for your consideration of the foregoing matters.

Sincerely,

Gerald L. Sharp
City-Borough Attorney

GLS:phl

HB192 REVENUE SHARING ENTITLEMENTS

Information from state analyses which has been incorporated in various new items (for example, see the attached article from the April 23, 1980 issue of the Anchorage Daily News) provides examples of how much additional revenues various Alaskan communities would receive under HB192 than under the present state revenue sharing formula. This information is misleading, however, in that it compares what the revenue would be under full funding of HB192 with what the revenues would be under the current statutes at about a 66% funding level.

The FY 1980 total state entitlement, excluding hospital pass-thru funding, is $18,157,087. Actual funding was $13,649,100 (75% funding level). The amount used by the state in its analysis is $12,000,226 (66% funding level). The $12,000,226 figure apparently excludes all health funding, not just hospital pass-thru funding.

According to the state analysis, under the new revenue sharing bill, Anchorage would get about $8.2 million, an increase over the nearly $5.4 million it gets now.

The $5.4 million figure ($5,352,264) for Anchorage is based on a total State-wide amount of $12 million. The $12 million dollar figure is used by the State because, as the newspaper article states, this is the entitlement under the current State revenue sharing formula. However, as was previously stated, the entitlement for State FY 1980 (July 1, 1979 - June 30, 1980) was $18,157,087.

It should be noted that Anchorage's entitlement for FY 1980 (under current statutes) is $7,849,556 (43.2% of the State total). However, Anchorage received only $5,900,692 due to the entitlement being funded at only the 75% level. The House version of the FY 1980 supplemental appropriation bill would provide for 100% funding.

The State has estimated that Anchorage will receive about $8.2 million ($8,190,667) under HB192 at a $31 million funding level. The $31 million figure, however, includes hospital funding -- the amount available for governmental purposes (and therefore comparable to the other data presented in this analysis) is $22,740,838. Anchorage's share is 36.0%.

As the data in the preceding paragraphs indicate, under HB192 Anchorage's entitlement drops from 43.2% of the State total to only 36.0%. The dollar amount of the entitlement increases slightly from $7.8 million to $8.2 million -- not from $5.4 million to $8.2 million.

A more valid comparison of the dollar amounts, however, would be to take a look at Anchorage's share if the current statutes were funded at the same dollar amount as proposed for HB192. Anchorage would then receive $9.8 million. So really we are talking about Anchorage's share under HB192 going down from $9.8 million to $8.2 million at the same funding level.

Anchorage Daily News Wednesday, April 23, 1980 a-4

Revenue sharing bill clears House

By ROXINNE ERVASTI
The Associated Press

JUNEAU — The House gave narrow approval today to a bill increasing revenue sharing to local governments to $31 million this year.

The bill, which passed 25-9 could come up for a vote later, however, as Rep. Dick Eliason, a prime opponent, gave a "notice of reconsideration."

Eliason's main complaint was that his hometown, Sitka, would have just a slight increase in state revenue sharing compared to cities he believes are similar in population, tax base and incomes.

House Speaker Terry Gardiner, D-Ketchikan, who has pushed the bill for the past three years and calls it a "reform" of the revenue sharing proposal, said lawmakers who looked only to the figures of their areas were not looking at revenue sharing on a statewide basis.

Gardiner also said they are assuming that what their areas have received under the current formula are equitable.

The bill (CSHB192) continues the $8 million appropriation for hospital construction and special categorical grants based on miles of road in a municipality and other services.

But Gardiner said it revises the general formula for distributing money to take into account local revenue raising resources of a community and how much of an effort it makes to tap them. It would also guarantee at least $25,000 to small communities which previously received little or no revenue sharing, and would guarantee that no municipalities receive less money in the next five years than they do now.

The bill must still be approved by the Senate, and some legislators who voted against it in the House said they expect changes to be made, pitching the issue into a House-Senate free conference committee.

Voting against the bill were Reps. Ramona Barnes, Bob Bettisworth, Chat Chatterton, Eliason, Joe Hayes, Terry Martin, Joe Montgomery, Randy Phillips and Dick Randolph.

Currently, the state revenue sharing formula provides about $12 million to local government and $8 million for health facilities.

With an increase to $23 million (excluding the $8 million for hospitals), Sitka would get about $255,000, or 1.12 percent of the total, compared to about $234,650 it receives now, or 1.95 percent of the total.

Meanwhile, Juneau, which gets 4.29 percent or $514,500 now, would get 6.52 percent of the total for nearly $1.5 million.

Ketchikan Gateway Borough would go from $74,806 now (a little over one-half of one percent of the total) to $283,240 or 1¼ percent of the total under the new bill.

Eliason recited some of those figures, and said "This is where I lose sense of this being equalization."

"It's patently unfair that ... we're penalizing those areas that are running good local governments and keeping down taxes," he said.

"Mr. Eliason is making the assumption that (Sitka's current share) is right and deserving," Gardiner said.

Under the revenue sharing bill, Anchorage would get about $8.2 million, an increase over nearly $5.4 million it gets now; Fairbanks North Star Borough would get nearly $1.7 million compared to about $938,000 it gets now, and Kodiak Island Borough would get nearly $161,000 compared to $52,600 now.

(1) Similar to HB843 & SB502 introduced in the 10th Legislature. Neither passed.
(2) Department of Community & Regional Affairs

(2) a. ORGANIZATIONAL SUPPORT FOR BILL

Unknown

(2) b. ORGANIZATIONAL OPPOSITION TO BILL

Unknown

(3) PROGRAM EFFECTS OF BILL

In so far as this Division is concerned there is no direct program affect reference sec. 3 (AS 29.89.025) nor is there any discernible program affect reference the remainder of the proposed act.

(4) FISCAL IMPACT: ☐ NONE ☐ FISCAL ANALYSIS ATTACHED

(5) AMENDMENTS PROPOSED:

None

(6) COMMENTS:

The proposed act repeals AS 43.18.010-045 (State Aid For Miscellaneous Purposes) and would add new chapters to AS 29 concerning Municipal Tax Resource Equalization for local government services (AS 29.88) and State Aid For Micellaneous Municipal Purposes (AS 29.89). AS 29.89.025 State Aid to Volunteer Fire Departments is similar to existing law, however, the reference to "organized boroughs or cities" is deleted. Depending on legislative intent it appears that the act would provide for payments to all qualified volunteer fire departments both in an outside of organized boroughs or cities.

AS 29.88 would eliminate designation for funding as contained in the current law, e.g. $7.50 per capita for fire protections services, $12 per capita for police protection etc.

It is our understanding the Department of Community & Regional Affairs supports this bill.

Gene Dusek, Budget Officer

SUBJECT: HB192 Anchorage Revenue Sharing Entitlements

The latest House Research Agency analysis (Exhibit A) does not provide the information that we had requested through Mitch. We wanted the State to ~~re-run~~ rerun the program to show what Anchorage's share would be at the various funding levels if the Minimum Entitlements were not considered part of the base funding level but were add-ons. Exhibit A does not do that. The first three columns are from the previous computer runs plus a few other funding levels (but without any changes to the computer program.). The fourth column is a total of the minimum entitlements for HB192. The fifth column is Anchorage's entitlement (column 2) divided by column 1 less column 4. That really doesn't tell us what we wanted to know.

I am still concerned about the state trying to compare apples with oranges. They continue to compare what the revenue would be under full funding of HB192 with what the revenue would be under the current statutes at about a 75% funding level. They should be comparing full funding under HB192 with full funding under the current statutes. In Exhibit B I have attempted to do this. A number of assumptions had to be made in preparing Exhibit B, and they are explained in the footnotes to Exhibit B.

As shown in Exhibit B, when comparing full funding under the current statutes versus full funding under HB192, both Anchorage's percentage of the total entitlement as well as Anchorage's dollar entitlement are less under HB192 until approximately a $100,000,000 funding level.

At the actual FY 1980 full funding level of $18,157,087 (excluding hospital pass-thru funding), Anchorage is entitled to $7.8 million under the current statutes and only $6.2 million under HB192 (that equates to 43.23% and 34.07% of the State total, respectively). If the State funds revenue sharing at the commonly mentioned level of $24,000,000 (again excluding hospital pass-thru funding), Anchorage would be entitled to $10.4 million under the current statutes, and only $8.8 million under HB192 (43.23% and 36.67% of the state total, respectively).

I am therefore concerned not just with Anchorage's decrease in percentage of total state shared revenue under HB192, but also Anchorage's decrease in actual dollars received (considering 100% funding under the current statutes).

I also have some concern about trying to rationalize the behavior of the computer program. For example, in Exhibit A, I question why the decrease in the total Minimum Entitlement (column 4) isn't greater as we go from the $18,740,838

funding level to the $58,000,000 level. It would seem to me that at a $58,000,000 funding level, very few, if any governments would not be receiving their $25,000 minimum entitlement.

EXHIBIT B

FOOTNOTES

(a) Per the State Department of Community and Regional Affairs, the actual State-wide and Anchorage fully-funded State Revenue Sharing Entitlement for FY1980 are as follows:

	State Total	Anchorage	Anchorage Percentage
Total State Revenue Sharing	$27,021,915	$14,177,251	52.47%
Less Hospital Base-Then Funding:			
Hospital Contingency	$ 7,292,828	$ 5,902,695	80.94%
Other	1,572,000	425,000	27.04%
Total	$ 8,864,828	$ 6,327,695	71.38%
State Revenue Sharing for Other Than Hospital Base-Then	$18,157,087	$ 7,849,556	43.23%

(b) At the $18,157,087 funding level, Anchorage's percentage of the State total is 43.23% (see footnote "a" above). Under the current State Statutes, this percentage should remain the same at all funding levels.

(c) These percentages had to be estimated using an elementary form of trend analysis since Anchorage's per entitlements under HB192 were not available from the State for these funding levels.

SUBJECT: CSHB 192 (Finance) amended

TO: Representative Terry Gardiner
ATTN: John Sund

FROM: John B. Chenoweth
Legislative Counsel

The insertion of "utilities" at page 2, line 20, was action specifically requested by the Finance Committee.

To narrow the amendment so that only contributions recieved from municipal utilities in lieu of property taxes (and not all utility revenues) are recognized as income, the following amendment is in order:

Page 2, line 20: Delete "utilities,"

Page 2, following line 24: Insert an additional paragraph to read:

"(E) payments received by a municipality from a utility which are in lieu of taxes levied and collected by the municipality."

JBC:jdn

1. Delete (on page 17) Sec 11, subsection (a)(3).

2. Add the following to Sec. 4 (on p. 14):

Sec. 29.90.030 Minimum Entitlement Adjustment

(a) A municipality may not receive a total amount of money under AS 29.88, AS 29.89.010 and AS 29.90.020 which is less in proportion to the total amount appropriated and allocated under those sections than ninety percent (90%) of the percentage of its population to the total population of the State as determined by the Department of Labor.

(b) If the total amount that would be received by a municipality under AS 29.88, AS 29.89.010 and AS 29.90.020 would be less than as required by this section, the municipality shall receive an additional entitlement in an amount sufficient to comply with this section. In the case of boroughs that include cities which are eligible to receive funds under AS 29.88, AS 29.89 or AS 29.90.020, the funds to be received by the borough shall be deemed to include any amounts to be received by cities within the borough for purposes of this section.

(c) Amounts received by municipalities under this section are subject to proration in the manner provided by AS 29.90.010.

MEMORANDUM March 21, 1980

TO: Representative Terry Gardiner

FROM: Jack Kreinheder, Issues Analyst JK

RE: HB 192 - Computer Runs Including MUSA Revenues
Research Request No. 64

You have requested that I make additional HB 192 computer runs which incorporate the Municipal Utilities Service Assessment (MUSA) revenues, and which include a $30 million total entitlement. The attached charts present five alternative runs, which are structured as follows:

1. Total entitlement = $18,740,838. MUSA revenue included; health and hospital excluded. (This run should be compared to the $18,740,838 run with MUSA revenues excluded, which was provided in my memorandum of February 25, to evaluate the MUSA impact. This entitlement reflects the original $27 million entitlement of last year, minus the current health and hospital entitlements.)

2. Total entitlement = $30 million. MUSA revenues included; health and hospital entitlements excluded.

3. Total entitlement = $30 million. MUSA revenues excluded; health and hospital entitlements excluded.

4. Total entitlement = $30 million. MUSA revenues included; health and hospital entitlement included.

5. Total entitlement = $30 million. MUSA revenues excluded; health and hospital entitlement included.

Three municipalities receive MUSA revenues: the Municipality of Anchorage, the City of Fairbanks, and the City of Seward. The effect of including the MUSA revenues on these municipalities' entitlements under HB 192 depends on: (1) the total entitlement; and (2) the inclusion of health and hospital entitlements, as well. In terms of dollars, Fairbanks

gains the most from MUSA inclusion, followed by Anchorage, then Seward. In terms of percentage increase in entitlements, Fairbanks and Seward receive similar increases from including MUSA revenues, while the Anchorage increase is considerably less. Although Anchorage collects the highest MUSA revenues of the three municipalities, its MUSA revenues comprise the smallest percentage of the total revenues eligible under HB 192; therefore, Anchorage receives the lowest percentage increase in its revenue sharing entitlement when MUSA revenues are included.

At a total entitlement of $30,000,000, without health and hospital funding, inclusion of the MUSA revenues increases the entitlements for the three municipalities by the following amounts:

1. Anchorage - $89,749 (0.8%)
2. Fairbanks - $111,615 (5.1%)
3. Seward - $ 8,634 (6.1%)

The MUSA impact is smaller if health and hospital funding is included and/or if the total entitlement is reduced. Table 1 displays this information.

We were not able to make computer runs including revenues from short-term investments, as was requested, because the revenue sharing questionnaires completed by the municipalities specifically stated that these revenues were not to be included as eligible revenues. Therefore, it would be necessary to contact each community again, which was not possible within the time frames of your request.

It is important to note that if short-term investment revenues were included as eligible revenues, the effect on the entitlement of each municipality would depend on the value of its investment revenues relative to the investment revenues of all other municipalities. For example, Anchorage would realize an entitlement increase only if its investment revenues comprise a larger percentage of its total eligible revenues than those of the average municipality in the state.

If you would like additional explanation of these latest computer runs, or if further research is necessary, please do not hesitate to contact me.

MEMORANDUM March 27, 1980

TO: Representative Terry Gardiner

FROM: Jack Kreinheder JK
Issues Analyst

RE: HB 192 Computer Runs at Total Entitlements of $24, $26 and $28 Million (Research Request No. 64)

The attached chart provides percentage breakdowns by local government of revenue sharing entitlements at various total entitlement levels, and is organized as follows:

1) FY 1979 revenue sharing entitlements (actual total entitlement = $13.8 million)

2) FY 1980 entitlements (actual total entitlement = $12 million)

3) HB 192 entitlements (proposed total entitlement = $24 million)

4) HB 192 entitlements (proposed total entitlement = $26 million)

5) HB 192 entitlements (proposed total entitlement = $28 million)

All five of these revenue sharing computer runs exclude hospital construction, hospital and health facility operational entitlements, and per capita health power entitlements. The three HB 192 computer runs include Municipal Utilities Service Assessment in-lieu of tax revenues for the municipalities which collect them: Anchorage, Fairbanks, Ketchikan and Seward.

The decrease in the revenue sharing entitlement, excluding hospital and health funding, of about $1.8 million from FY 1979 to FY 1980 reflects the fact that although the total entitlement increased by about $1.5 million in 1980, hospital and health entitlements increased from $4.7 million to over $8 million, thus reducing the remaining entitlements. As you know, most of this increase in hospital and health entitlements is attributable to hospital construction funding, which increased from 13 percent of the total revenue sharing entitlement in FY 1979 to 28 percent in 1980.

Please let us know if we may be of further assistance.

JK/dp

ALASKA STATE LEGISLATURE
HOUSE OF REPRESENTATIVES
RESEARCH AGENCY

Pouch Y, State Capitol
Juneau, Alaska 99811
(907) 465-3991

MEMORANDUM April 28, 1980

TO: Representative Terry Gardiner

FROM: Jack Kreinheder
Issues Analyst

RE: CS for House Bill No. 192 (Finance) am
Research Request No. 64

As you requested, I have prepared new computer runs estimating the revenue sharing entitlements for each municipality, as reflected in the version of HB 192 passed by the House on 4/22/80. The following changes were made to the original bill:

1. The total entitlement was increased from $27 million to $31 million (Section 12).

2. The hold-harmless provision was extended from three to five years [Section 11(a)(2)].

3. In-lieu-of tax revenues from municipal utilities were included as eligible local revenues for the purpose of determining each municipality's local tax effort [Section 2, Section 29.88.010 (c)(1)(c)].

4. The effective date in the event of a legislative appropriation less than that specified in the bill was changed from 1982 to 1983 (Section 12).

5. The section providing for aid to volunteer fire departments (VFD's) was amended on the House floor to make all VFD's, not just those outside cities or boroughs, eligible for State aid under HB 192 [Section 3, Section 29.89.025(a)].

The entitlement figures in the attached chart should be regarded as preliminary values, primarily because we are still evaluating the fiscal impact of the amendment pertaining to volunteer fire departments. These computer runs, therefore, do not reflect the VFD amendment. In addition,

it appears that there is a greater number of municipalities which collect in-lieu-of tax revenues from municipal utilities than we had originally believed. In-lieu-of tax revenues have been included for the major municipalities, but we need to contact about 25 local governments to verify the remaining in-lieu-of revenues. A new set of entitlement figures incorporating these revenues, as well as the effect of the VFD amendment, will be prepared as soon as the necessary data can be obtained.

Entitlement Chart

The attached chart presents three entitlement figures for each municipality, together with the percentages of the total entitlement which each figure constitutes. The first two columns contain the population of each local government and its percentage of the state's total population. The next two columns show the revenue sharing entitlement and percentage for each municipality under current law for FY 80, excluding health and hospital entitlements. The following two columns display the local government entitlements under HB 192, also excluding health and hospital funding. The remaining four columns also compare present law and HB 192 entitlements and percentages, but include the funding for health services and hospitals.

MEMORANDUM April 30, 1980

TO: Representative Terry Gardiner

FROM: Jack Kreinheder, Issues Analyst JK

RE: Impact of Proposed HB 192 Hold Harmless Amendment(125 Percent)
Research Request No. 64

Attached is the computer run you requested for the Senate Community and Regional Affairs Committee, showing the effect on HB 192 revenue sharing entitlements of a provision ensuring that all municipalities would receive at least 125 percent of their 1980 prorated entitlement. The run was made at a funding level of $31 million and includes hospital and health entitlements.

A total of thirteen municipalities would be affected by a 125 percent hold harmless provision, with the following local governments receiving the most money under such a provision:

1.	Sitka Borough	-	$72,493
2.	City of Valdez	-	$51,535
3.	North Slope Borough	-	$39,253
4.	City of Kodiak	-	$17,256

The total cost or the amount that other communities would lose from this hold harmless amendment would be about $225,000. The cost would be distributed equally over all municipalities on a percentage basis, with each municipality not benefitting from the hold harmless provision incurring a reduction of about one percent (.01) in its revenue sharing entitlement.

One final point is that as HB 192 is written, providing a 125 percent hold harmless clause would result in an actual entitlement increase for affected municipalities of about 24 percent. This is a result of the existing hold harmless language, which states that the additional hold

harmless monies shall be prorated along with all other entitlements to fund the hold harmless entitlements. In order to guarantee an actual increase of 25 percent over the current entitlement, the hold harmless level would need to be set at about 126 percent, or the proration mechanism could be changed so that the hold harmless entitlements were not prorated.

JK/bf

March 26, 1980

TO: Representative Terry Gardiner

FROM: Jack Kreinheder, Issues Analyst JK

RE: Explanation of HB 192 Equalization Formula
Research Request No. 64

You have requested that I prepare for the Finance Committee some practical examples of how the equalization formula in Chapter 88 of HB 192 is applied. This memorandum presents three hypothetical and three real applications of the equalization formula. Also included in the last section is a revised estimate of the taxation incentive under HB 192.

The HB 192 equalization formula is defined as P x R, where P = population and R = millage rate equivalent, or local tax effort. This local effort factor is calculated by dividing the total locally generated revenues allowed under the bill by one-tenth of one percent of the total property value of the taxing unit. To take a theoretical case, if a municipality has local revenues of $1 million and a total property valuation of $100 million, the local effort factor would be 10 [$1 million/($100 million x .001)]. A municipality with the same tax base but $2 million in local revenues would have a local effort factor of 20 [$2 million/($1 million x .001)], and its Chapter 88 entitlement per resident would therefore be twice that of the former community.

A third example would be a municipality with the same local revenues as the first example ($1 million), but with a tax base only half as large ($50 million). This municipality would also have a local effort factor of 20 [$1 million/($50 million x .001)], and would therefore receive twice the Chapter 88 entitlement per resident of the first example, and the same entitlement as the second example. Although the municipality in the second example raises twice the local revenues of the municipality in the third case, the second municipality's tax base is also twice as large; thus, the tax burden and local effort factor of the two municipalities is identical and they would receive the same entitlement per resident under Chapter 88. Of course, if the populations of the two municipalities differed, the actual Chapter 88 entitlement for each of the two local governments would vary in direct proportion to their populations. Table 1 summarizes the three examples presented above.

To further illustrate the relationsnip of the three variables used in the equalization formula--population, local revenues, and local assessed property valuation--consider the communities of Kenai, Ketchikan, and Homer. Table II shows how the equalization entitlement is calculated for each of the communities. As the table indicates, the local revenues generated by Kenai are only about 72 percent as large as those raised by Ketchikan, but Kenai's property valuation is also about 72 percent that of Ketchikans; therefore, the local effort factors are nearly identical (19.95 vs. 19.50). These cities are placing similar tax burdens on their residents and their equalization entitlements per resident would thus be comparable. Ketchikan has nearly twice as many residents as Kenai, and its total Chapter 88 entitlement would be correspondingly greater than Kenai's.

Homer has a tax base of about $86 million, or about 64 percent of Kenai's. If the local revenues raised by Homer were also 64 percent of the local revenues collected by Kenai, the local effort factors and Chapter 88 entitlements per resident of the two cities would be identical. However, Homer's actual locally-generated revenues are only about 30 percent as large as Kenai's. Homer's local effort factor would therefore be less than half that of Kenai's (9.17 vs. 19.95). In other words, the tax burden on the residents of Kenai, relative to the tax base of the community, is more than twice the tax burden carried by Homer residents. Kenai's equalization entitlement under HB 192 would therefore be about 2.2 times more per resident than Homer's. It should be noted that although Homer's Chapter 88 entitlement per resident would be less than either Ketchikan's or Kenai's, Homer would still receive more revenue sharing funds than it currently receives at any HB 192 total entitlement of $27 million or greater (including health entitlements).

One additional consideration should be mentioned. There is a fourth factor used in determining equalization entitlements under HB 192 however, it is applied equally to all communities. This is a proration factor which calculates the share of the total entitlement which is distributed under the equalization entitlement provision (Chapter 88). The proration factor varies according to the total entitlement; at a total entitlement of $27 million (including health entitlements), the factor is about 2.4. The actual equalization entitlement for each local government at a total entitlement of $27 million would therefore be 2.4 times the amount determined by application of the equalization formula.

HB 192 Taxation Incentive

The incentive for municipalities to raise tax rates in order to receive additional revenue sharing funds under HB 192 is much smaller than I indicated to you at the Finance Committee meeting of 3/24. I had thought that the local taxes/revenue sharing entitlement ratio was about 3 to 1; i.e., three additional dollars in local taxes would increase the revenue

sharing entitlement by one dollar. However, test runs of the computer model indicate that this 3:1 ration applies only to very small communities or service areas, and that the ratio is much higher for larger municipalities. Anchorage appears to have the highest ratio at about 23 to 1, meaning that to obtain one additional revenue sharing dollar under HB 192, Anchorage would have to raise an additional $23 in local taxes. The average ratio for all the municipalities appears to be about 14 to 1. Therefore, the incentive for municipalities to raise taxes under HB 192 is much lower than previously indicated.

MEMORANDUM April 9, 1980

TO: Representative Bill Parker
Senator Arliss Sturgulewski

FROM: Jack Kreinheder, Issues Analyst JK

RE: Incentives for Regional Government Formation and Local Service Delivery
Research Request No. 8

In a meeting on March 21 with Marjorie Gorsuch and Margo Waring of your staffs, it was agreed that the best course of action at this point would be for me to focus my research efforts on the development of specific amendments to HB 192 which would enable the bill to more effectively meet some of your goals for the revenue sharing program. The two objectives chosen for further study were: (1) to provide greater incentives for the formation of regional governments in the unorganized borough; and (2) to provide incentives for the transfer of service delivery responsibility to the local level.

It appears that the potential for modifying the HB 192 revenue sharing proposal to meet these objectives without sacrificing the political viability of the bill is rather limited, for reasons explained below. However, we have formulated two possible amendments to the bill which would provide the types of incentives you wish to create. The two proposals are described below.

Borough Formation Incentives

Under AS 29.18.180, a newly incorporated borough is eligible for an organizational grant of at least $25,000, or $10 for every voter participating in the borough incorporation election. It is widely recognized that a grant of this size would cover only a small part of of the organizational costs of any new borough. The State Assessor's Office has estimated that it would cost at least $200,000 just to prepare the initial tax assessment roll in any one of the current R.E.A.A.'s. New boroughs would also be faced with the cost of hiring municipal personnel, establishing new services, and other major expenses. In addition, the organizational grant amount has not been changed since 1966, although inflation has more than doubled costs since that time.

One way to encourage borough formation would therefore be to amend AS 29.18.180 to provide a larger grant. A minimum organizational grant for new boroughs of $125,000 per year for the first two years, and $75,000 for the third year, would more accurately reflect the true costs of organization and would provide a greater incentive for the formation of regional governments in the unorganized borough. These figures were developed by staff members of the Department of Community and Regional Affairs and suggested to me by Patrick Poland of the Department's Local Government Assistance Division.

Although these grant values may still not cover all the costs of borough organization, depending on the size and situation of the area being organized, they would at least provide a more realistic and substantial amount of funding for this purpose. Of course, increasing the organizational grants to even higher levels would offer a greater incentive for borough formation, but there would appear to be a clear trade-off between the amount of funding offered and the prospects of the legislation being enacted.

It would probably be desirable to retain the per capita provision of the organizational grants to account for the higher costs of organizing boroughs for larger or more populated areas. Under present law, a new borough would receive more on a per capita basis than the minimum grant if more than 2500 persons vote in the organization election. Applying the same 2500 voter threshold to the proposed total organizational grant of $325,000, the per voter grant would be $130.

It may also be desirable to incorporate other factors into the organizational grants, such as land area of the new borough, population density, or taxable property value. Unfortunately, little is known about the quantitative relationship between these factors and the cost of borough organization, and making the organizational grant provisions too complex could reduce the incentive for organization which the grant is intended to provide.

Incentives for Local Service Delivery

The services which were identified during this research as possible candidates for the transferral of delivery responsibility from the state to the local level are police protection and the maintenance of airports, ports and harbors, and certain types of roads. A number of local governments have expressed interest in assuming these services, but could not

obtain sufficient funding from their own resources or from the current revenue sharing program. A possible method of encouraging local governments to assume responsibility for police services and the maintenance of transportation facilities would be to allow municipalities to receive the funds which the State would otherwise expend in providing the particular service the municipality wished to assume.

For example, if the Department of Public Safety spends $50,000 per year to provide police assistance to a given community, that community could elect to receive the $50,000 directly in exchange for an agreement to provide a similar level of police protection. If the community felt it could not fully replace the services of the State Troopers, but wanted to have some type of police assistance at the community level, the local government could receive a level of funding which corresponded to the expected reduction in State Trooper expenditures resulting from the local police service plan. For example, if the majority of police assistance calls in a community were for relatively minor late-night or weekend disturbances, the community could receive some funding for a part-time or on-call local officer, while retaining the services of the State Troopers for homicides or other serious crimes. A similar arrangement could apply to the maintenance of airports, harbors, and roads.

It appears that this type of approach would need to be carried out through negotiations between the Department of Public Safety - or the Department of Transportation, in the case of airports, harbors, and roads - and local governments on an individual basis. The primary concern of the departments involved would probably be to ensure that their responsibilities for local services would be decreased in proportion to their loss in funding. It might be desirable for local governments to prepare a plan of service which would demonstrate to the department's satisfaction that the municipality would be able to either meet the same standards as the service provided by the department, or, if it provided a lower level of service, would require only part of the department's funding for that service.

The primary advantage of transferring these types of services to the local level would be enhanced flexibility and freedom of choice for municipalities with regard to the types and levels of service provided in each community. Local governments assuming a service previously provided by the State would be free to supplement the State funding with other local, federal, or State monies if they wished to provide a greater level of service. Although it is questionable whether local governments should be allowed to use the State money for an altogether different

service than the one being transferred, since police protection and basic facility maintenance are usually considered as essential services, municipalities could be allowed to provide the service in an alternative manner that fulfilled the same needs, but was more appropriate for the particular characteristics and situation of each community. For example, a community with high unemployment could elect to employ maintenance procedures for its airport, harbor, or roads which made less use of graders, dredges and other equipment, and employed more workers instead.

There are a number of potential difficulties with the local assumption of State services. Economies of scale appear to be one of the most significant problems with this approach. Particularly in the smaller communities, it may not be economically feasible to maintain a police force or maintenance personnel at the local level. A related problem is that of administrative support for police and maintenance services. Although a community might be able to afford a policeman's salary, for example, it may not be able to cover the cost of equipment, insurance, legal protection, and other necessary administrative expenses. However, it may be possible for two or more local governments in close proximity to enter into joint agreements for a particular service, and thereby increase the efficiency and feasibility of the service, while still retaining local control.

An additional problem may be that in some cases the department's costs would not be significantly reduced if a local government assumed a particular service. For instance, the Department of Public Safety may have one State Trooper who is responsible for a region containing five small communities. If two of these communities decide to assume responsibility for police protection, the Department would probably save only the cost of transporting the trooper to those communities, because it can't employ three-fifths of a trooper for the remaining communities.

One practical consideration with the transfer of services to the local level is that the departments may not be able to break out their expenditures on a community-by-community basis. Should this problem arise, one solution would be to require such a breakdown for the upcoming fiscal year and then implement the transfer of service responsibility the following year.

A final problem could be that of differing standards of service quality between the departments and the communities assuming new services. Because judgements about levels and qualities of service tend to be subjective in nature, it is easy to imagine disputes arising between the departments and local governments about whether a municipality's approach to service delivery

met the same standards as the service previously provided by the State.

HB 192 Issues

Neither of the options discussed above would directly modify the revenue sharing program proposed in HB 192, although the options could be incorporated in the bill as a separate section. We considered several possible changes to the HB 192 revenue sharing proposal which would provide incentives for borough formation and local assumption of services, but it was evident that none of these changes could be made without seriously compromising the political viability of the bill. The basic problem is that any changes to the HB 192 equalization formula or other parts of the bill which would provide these types of incentives will result in a loss of revenue sharing funds for established municipalities, or will reduce local flexibility in the use of revenue sharing funds. Both of these results would tend to reduce the support of existing municipalities for the bill, which is already facing an uncertain political future.

The Municipality of Anchorage currently opposes the passage of HB 192. Anchorage municipal officials are concerned that even though Anchorage would receive an increase in revenue sharing funds under HB 192, the municipality's percentage share of the total revenue sharing entitlement would decrease. The significance of this point for this discussion is that any changes to the HB 192 revenue sharing proposal which would provide the types of incentives you desire, would further reduce Anchorage's share (together with all existing local governments' shares)of the total funding for the program. Such changes could therefore further jeopardize the passage of HB 192 by increasing the opposition of Anchorage officials and possibly diminishing the support of other local governments for the bill.

The two major changes we considered and rejected were: (1) providing a temporarily increased entitlement to new boroughs; and (2) requiring that revenue sharing funds be used for the provision of local services, rather than capital improvements or general government expenses. Under the first approach, the equalization entitlement and/or the minimum entitlement for new boroughs would be increased by a specified factor, say three or four times, in the first year and then tapered off over several years. This increased funding would serve a purpose similar to the organizational grants suggested earlier in this memorandum; the major distinction between the two approaches is that the increased revenue sharing entitlement for the new boroughs would necessarily reduce the entitlements for all other local governments, while the

organizational grants could be funded separately, as they are under present law, and would not affect the dollar allocation or percentage share of other local governments.

With regard to incentives for local assumption of service delivery responsibilities, it was noted in my earlier memorandum of February 15 that HB 192 does increase such incentives over the present revenue sharing program by increasing the total funding level and by allowing municipalities to allocate revenue sharing funds according to local priorities. Because HB 192 would not require revenue sharing funds to be spent for local services, as opposed to capital improvements or other expenses, consideration was given to including such a requirement in the bill. However, my conversations with Community and Regional Affairs staff, Jack Chenoweth, and others indicated that many municipalities would be strongly opposed to such a requirement. In addition, a requirement of that type runs contrary to the HB 192 emphasis on local flexibility.

An important additional point is that the two options proposed earlier in this memorandum are not intended to represent a comprehensive approach to the formation of regional governments and the local provision of services. The local government legislation package already introduced would provide greater incentives in these areas than any politically feasible additions to HB 192. However, given the constraints established by the HB 192 approach to revenue sharing, these two options appear to be the most viable means of adding the types of incentives you desire to HB 192.

We hope our comments are useful. Please do not hesitate to contact me if you would like to discuss this subject in more detail, or if we may be of further assistance.

RE: SCS CS HB 192

I am forwarding to you copies of materials supplied to the Senate Community and Regional Affairs Committee for our hearings on HB 192. You may find these helpful in your and the Senate Finance Committee's review of the legislation.

I also thought I would summarize for you the CRA Committee's actions on this bill. Amendments adopted by the Senate CRA Committee dealt with several different areas:

1. revision to the Volunteer Fire Department eligibility
2. changes regarding eligible utility revenues and assessments for public utilities
3. two highly important revenue sharing studies for baseline information on mass transit and hospital costs
4. separation of hospital construction funding from the miscellaneous services account
5. adoption of the Anchorage Municipality's amendment to increase the allocation for six communities and to peg future sums to a population figure - There was a great deal of debate on this amendment, leading to a split decision. The other version favored by Committee members, including the Chairman, was an amendment offered by the Alaska Municipal League which would "hold harmless" for five years at 115% of full entitlement. This would favorably impact more communities, while achieving Anchorage's goal of increasing their percentage of revenue sharing. It is also an approach consistent with the approach of the bill itself.

I would be glad to provide any additional background information you might wish. We have requested additional computer runs for our amendments from Jack Krienheder of House Research. These runs are not yet complete, so I have asked him to contact you directly.

To: _____ SENATE BILL No. _____

To: SCS CS HOUSE BILL No. 192 (Finance)

PAGE: 19 LINE: 5

Page 19 - Delete lines 5 through 11 and insert in their places a new section to read:

Section 13 to read:

AS 29.95.030 is amended by adding a new section to read:

Sec. 29.95.030. ENTITLEMENT ADJUSTMENT. (a) A municipality may not receive a total amount of money under AS 29.88, AS 29.89, and AS 29.95.020 which is less in proportion to the total amount appropriated and allocated under those sections than 90 percent of the percentage of the population of the municipality to the total population of the state for the fiscal year, as the population of the municipality and the population of all municipalities of the state is determined under AS 29.88.015.

(b) When the total amount that would be received by a municipality under AS 29.88, AS 29.89 and AS 29.95.020 is less than the amount determined under (a) of this section, the department shall pay to the municipality, in addition to payments under AS 29.88, AS 29.89, and AS 29.95.020, the amount of the difference.

(c) For puposes of determining whether an entitlement adjustment is payable to a borough under this section, if a borough includes one or more cities which are entitled to receive entitlements payable under AS 29.88, AS 29.89 or AS 29.95.020, in addition to the entitlement of the borough, entitlements payable to the cities shall be considered as if they were payable to the borough.

(d) The minimum entitlement adjustment account is established. Money to carry out the provisions of this section shall be allocated by the department to the account in accordance with AS 29.95.010. If amounts in the account are insufficient to pay each municipality's share authorized under this section, the amounts which are available shall be distributed pro rata among eligible municipalities.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

No fiscal impact to the Department. The agency personnel currently responsible for administering the municipal services revenue sharing program (AS 43.18.010-045), which is repealed by this bill, would assume responsibility for the shared revenue program proposed by HB 192. It is believed that the work involved for both programs is equivalent.

...S. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

House Bill No. 192 would repeal AS 43.18.010 - 43.18.045 which provides for State Aid to Local Governments. The Governor's FY 80 request for continuance of this grant program is $18,638,000.

House Bill No. 192, which calls for reform of the State Revenue Sharing Program and a minimum appropriation of $27,000,000, would cost $[illegible] more than the Governor's request to fund in FY 80.

The agency request for FY 80 to fund the existing Revenue Sharing Program at 100% was $21,357,300. As the implications of the new definition of "full project cost" for construction aid [AS 37.14.010(1)] are [illegible] this figure may be insufficient for full funding.

AMENDMENT # 2

Will place in a separate account hospital construction funds. There will be a seperate account for roads/trails and hospital and health facility operation and volunteer fire departments.

AMENDMENT # 3 Two revenue sharing studies Sec. 12 and Sec. 13 at end of bill

* Sec. 12. (a) The Department of Health and Social Services and the Department of Community and Regional Affairs shall jointly examine and their recommendations on the extent to which the state should assist municipalities, nonprofit corporations, and others in the construction and operation of hospitals and health facilities.

(b) By February 1, 1981, the commissioner of health and social [illegible] shall submit to the legislature a report, accompanied by draft legislation examining programs of state aid for hospital and health facility construction and operation, including both public and private facilities, and recommending a comprehensive health and hospital financial assistance program. The report and accompanying legislation shall be based on health care and health facility need, expressed as a function of number of beds, occupancy rate of facilities, kinds of care and levels of service provided or not provided, or other factors which the commissioner of health and social services reasonably believes should be the basis by which state assistance for hospitals and health facilities and their programs should be provided.

(c) The report and accompanying legislation presented under (b) of this section shall

AMENDMENT #3 continued

(1) include, if necessary, reference to certificates of need legislation and any other current program of the federal or state governm which applies in determining whether hospitals and health care facilities shall be constructed;

(2) recommend a permanent program of state assistance to munici palities for hospital care and health care services, whether provided by public or private facilities, which improves the level of care for the peo of the state.

* Sec. 3. This Act takes effect July 1, 1980.

SB 13

It is the intent of the Legislature that the Alaska Department of Community and Regional Affairs provide, by the tenth day of the Twelfth Legislature, First Session, the Legislature with draft legislation for the funding of mass transportation through the revenue sharing formula. The Department shall also prepare a report on the current status of transit operations in the State.

In preparing draft legislation, the Department shall take into account regional differences, private and public operation of transit systems, and various options for state support. It is suggested that the Department examine the approaches to this question taken by other states.

AMENDMENT # 4 Fire

Sec. 29.89.025. STATE AID TO VOLUNTEER FIRE DEPARTMENTS IN THE UNORGANIZED BOROUGH. (a) The department shall pay to a volunteer fire department registered with the state fire marshal and serving an area not in an organized borough or city a sum for protection purposes equal to $7.50 per capita for the population served by the department, as determined by the state fire marshal.

(b) A grant shall be made as set out in (a) of this section to facilitate the organization of a volunteer fire department in an area not in an organized borough or city upon application of the proposed fire protection group to the state fire marshal and approval of applications according to standards of organization and service prescribed by regulations adopted by the state fire marshal.

VERSION 1

Page 17 to existing language in (b) add clarification that the amount intended is the amount ~~prorated~~ of entitlement prorated during the last year of the old revenue sharing program.

VERSION 2

For the five years that follow adoption of the new revenue sharing program, no municipality may receive less than 125% of the amount received by that municipality during ~~the~~ the last fiscal year of the old program. Separate account?

Version 3

For the five years that follow adoption of the new revenue sharing program, no municiaplity may receive less than 125% of the amount due to ~~it~~ that municipality as its full entitlement during the last fiscal year of the old revenue sharing program. Separate account established.

VERSION 4

1. Delete (on page 17) Sec 11, subsection (a)(3).

2. Add the following to Sec. 4 (on p. 14):

Sec. 29.90.030 Minimum Entitlement Adjustment

(a) A municipality may not receive a total amount of money under AS 29.88, AS 29.89.010 and AS 29.90.020 which is less in proportion to the total amount appropriated and allocated under those sections than ninety percent (90%) of the percentage of its population to the total population of the State as determined by the Department of Labor.

(b) If the total amount that would be received by a municipality under AS 29.88, AS 29.89.010 and AS 29.90.020 would be less than as required by this section, the municipality shall receive an additional entitlement in an amount sufficient to comply with this section. In the case of boroughs that include cities which are eligible to receive funds under AS 29.88, AS 29.89 or AS 29.90.020, the funds to be received by the borough shall be deemed to include any amounts to be received by cities within the borough for purposes of this section.

(c) Amounts received by municipalities under this section are subject to proration in the manner provided by AS 29.90.010.

Min as
sep. account
amount at
2.5 million

AMENDMENT # 6

AS 29.18.180(a) is amended to read:

(a) For the purpose of defraying the cost of transition to borough or city government and in order to provide for development and interim governmental operations, each borough and city incorporated after January 1, 1968, or, in the case of a second class city, incorporated or reclassified after January 1, 1968, other than a unified municipality incorporated under the provisions of AS 29.68.240 - 29.68.440 [AS 29.85], or a municipality otherwise incorporated by consolidation, is entitled to an organization grant equal to $130 [$10] for every voter who voted in the borough or city incorporation election. However, each incorporated borough and each first class city incorporated or established by reclassification outside an organized borough is entitled to

(1) $125,000 for the fiscal year in which it was incorporated or reclassified;

(2) $125,000 for the next fiscal year; and

(3) $75,000 for the third fiscal year [AT LEAST $25,000].

* Sec. 13. AS 29.18 is amended by adding a new section to read:

Sec. 29.18.182. ASSESSMENT ROLL. (a) The Department of Community and Regional Affairs shall establish the initial assessment roll for a borough incorporated under this chapter. The initial assessment roll shall contain the information required by AS 29.53.100(a) and shall be sufficient for computing tax levies by the municipality and for computing the amount of local effort required by the municipality under AS 14.17.021(c)(2) and 14.17.071.

(b) In the preparation of the initial assessment roll, the De-

partment of Community and Regional Affairs may contract for the services of appraisers and others whose services are required to complete the initial assessment. When completed, the initial assessment roll shall be certified by the commissioner of community and regional affairs, and the completed assessment roll, together with all supporting information and materials prepared by the Department of Community and Regional Affairs shall be transmitted to the borough assembly.

(c) The Department of Community and Regional Affairs, to the extent appropriations are available for the purpose, shall continue to pay the costs of the services of a municipal assessor and related staff for three years after the completion of the initial assessment roll.

* Sec. 14. AS 29.18.182(a), added in sec. 13 of this Act, is amended to read:

(a) The Department of Community and Regional Affairs shall establish the initial assessment roll for a borough incorporated under this chapter. The initial assessment roll shall contain the information required by AS 29.53.100(a) and shall be sufficient for computing tax levies by the municipality [AND FOR COMPUTING THE AMOUNT OF LOCAL EFFORT REQUIRED BY THE MUNICIPALITY UNDER AS 14.17.021(c)(3) AND 14.17.071].

* Sec. 15. Sections 1 - 11 of this Act take effect on the first day of the fiscal year for which $31,000,000 or more is appropriated and allowed by the governor for distribution to municipalities and other recipients under the provisions of this Act, or on July 1, 1983, whichever is earlier.

* Sec. 16. Sections 12 - 14 of this Act take effect July 1, 1980.

* Sec. 17. Sections 15 - 17 of this Act take effect immediately in accordance with AS 01.10.070(c).

THE CITY AND BOROUGH OF JUNEAU
CAPITAL OF ALASKA
155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

May 1, 1980

The Honorable Arliss Sturgulewski
Chairman, Senate Community and
Regional Affairs Committee
Pouch "V" State Capitol Building
Juneau, Alaska 99811

FILE: Legislation-1980

SUBJECT: CSHB 192(am)

Dear Senator Sturgulewski:

The following change on page 4 of CSHB 192(Finance)(am) would provide for a simple means of adjusting the assessed value of a municipality to take into account the value of those utilities for which payments in lieu of taxes are made.

In line 8 on page 4 of the bill, delete the period after "AS 14.17.140" and add the following:

> and shall include, in addition, for each utility for which a payment in lieu of taxes is made, the computed assessed value of the utility. The computed assessed value of the utility shall be the amount computed by dividing the applicable millage rate into the amount of the payment in lieu of taxes made by the utility.

This should provide a simple method of computing the assumed value of the utility for which the payments in lieu of taxes are made. This addition should be made so that the municipalities with privately owned utilities are not penalized for permitting private industry to provide those utility services.

Sincerely,

Gerald L. Sharp
City-Borough Attorney

(c) Amounts received by municipalities under this section are subject to proration in the manner provided by AS 29.90.010.

AMENDMENT # 6

NO

AS 29.18.180(a) is amended to read:

(a) For the purpose of defraying the cost of transition to borough or city government and in order to provide for development and interim governmental operations, each borough and city incorporated after January 1, 1968, or, in the case of a second class city, incorporated or reclassified after January 1, 1968, other than a unified municipality incorporated under the provisions of AS 29.68.240 - 29.68.440 [AS 29.85], or a municipality otherwise incorporated by consolidation, is entitled to an organization grant equal to $130 [$10] for every voter who voted in the borough or city incorporation election. However, each incorporated borough and each first class city incorporated or established by reclassification outside an organized borough is entitled to

(1) $125,000 for the fiscal year in which it was incorporated or reclassified;

(2) $125,000 for the next fiscal year; and

(3) $75,000 for the third fiscal year [AT LEAST $25,000].

* Sec. 13. AS 29.18 is amended by adding a new section to read:

Sec. 29.18.182. ASSESSMENT ROLL. (a) The Department of Community and Regional Affairs shall establish the initial assessment roll for a borough incorporated under this chapter. The initial assessment roll shall contain the information required by AS 29.53.100(a) and shall be sufficient for computing tax levies by the municipality and for computing the amount of local effort required by the municipality under AS 14.17.021(c)(3) and 14.17.071.

(b) In the preparation of the initial assessment roll, the De-

partment of Community and Regional Affairs may contract for the services of appraisers and others whose services are required to complete the initial assessment. When completed, the initial assessment roll shall be certified by the commissioner of community and regional affairs, and the completed assessment roll, together with all supporting information and materials prepared by the Department of Community and Regional Affairs shall be transmitted to the borough assembly.

(c) The Department of Community and Regional Affairs, to the extent appropriations are available for the purpose, shall continue to pay the costs of the services of a municipal assessor and related staff for three years after the completion of the initial assessment roll.

* Sec. 14. AS 29.18.182(a), added in sec. 13 of this Act, is amended to read:

(a) The Department of Community and Regional Affairs shall establish the initial assessment roll for a borough incorporated under this chapter. The initial assessment roll shall contain the information required by AS 29.53.100(a) and shall be sufficient for computing tax levies by the municipality [AND FOR COMPUTING THE AMOUNT OF LOCAL EFFORT REQUIRED BY THE MUNICIPALITY UNDER AS 14.17.021(c)(3) AND 14.17.071].

Sec. 15. Sections 1 - 11 of this Act take effect on the first day of the fiscal year for which $31,000,000 or more is appropriated and allowed by the governor for distribution to municipalities and other recipients under the provisions of this Act, or on July 1, 1983, whichever is earlier.

* Sec. 16. Sections 12 - 14 of this Act take effect July 1, 1980.

* Sec. 17. Sections 15 - 17 of this Act take effect immediately in accordance with AS 01.10.070(c).

Attachment 2

1. Delete (on page 17) Sec 11, subsection (a)(3).

2. Add the following to Sec. 4 (on p. 14):

Sec. 29.90.030 Minimum Entitlement Adjustment

(a) A municipality may not receive a total amount of money under AS 29.88, AS 29.89.010 and AS 29.90.020 which is less in proportion to the total amount appropriated and allocated under those sections than ninety percent (90%) of the percentage of its population to the total population of the State as determined by the Department of Labor.

(b) If the total amount that would be received by a municipality under AS 29.88, AS 29.89.010 and AS 29.90.020 would be less than as required by this section, the municipality shall receive an additional entitlement in an amount sufficient to comply with this section. In the case of boroughs that include cities which are eligible to receive funds under AS 29.88, AS 29.89 or AS 29.90.020, the funds to be received by the borough shall be deemed to include any amounts to be received by cities within the borough for purposes of this section.

(c) Amounts received by municipalities under this section are subject to proration in the manner provided by AS 29.90.010.

Keep as sep. account funded at 2.5 million

SUBJECT: Sectional Analysis of the Municipal League's Revenue Sharing Reform Proposal (Work Order No. 6162)

TO: Representative Terry Gardiner

FROM: John B. Chenoweth
Legislative Counsel

John Williams
Policy Analyst

In response to your request of the Legislative Council on July 21, 1978, we have participated with a special committee of the Alaska Municipal League in drafting a revenue sharing reform bill, which is now complete. The Board of Directors of the League approved the draft at its meeting in Juneau on January 19, 1979 (copy enclosed).

Following is a sectional analysis of the committee's product.

*Section 1. PURPOSE.

Three purposes are stated: (1) equity of allocation of state resources with municipalities; (2) basic support to municipalities for public services irrespective of physical location of taxable wealth; and (3) improvement of the administrative capacity of less populous municipalities.

*Section 2. CHAPTER 88.

This chapter contains the major revision of the revenue sharing program. In the most general terms, it provides for the computation and distribution of an "equalization entitlement" for local government services in accordance with a formula and schedules set out in the sections incorporated in the chapter.

Sec. 29.88.010 specifies the method that is utilized to distribute revenues under the chapter. Three factors are

applicable: population, revenue generation, and property value base.[1] The formula multiplies the population of the taxing unit[1] by the mill rate equivalent of allowed revenues[2] generated by the municipality. The sum of allowed revenues is divided by one-thousandth of the full and true taxable property value within the taxing jurisdiction. The resultant quotient is referred to as the "local effort" for the municipality: it is equal to the full and true mill rate equivalent of all allowed revenues generated by each municipality.

Sec. 29.88.015 specifies the means whereby population numbers shall be determined. Generally, Bureau of the Census data will be utilized; however, other reliable data in the judgment of the Department of Community and Regional Affairs may be used. The provision for population count is not unlike the provision of the current state aid program. Unlike the current program, however, no separate treatment is given the counting of persons who are residents of military reservations.

Sec. 29.88.020 describes the means whereby mill rate equivalent determinations will be made. Initially, a certified statement submitted by each municipality, on a form provided by the department, will specify the revenues generated in each municipality. This shall be accomplished by all municipalities by

---

1/ A "taxing unit" is defined, for purposes of this program as "a city, borough, unified municipality, or service area or differential tax zone."

2/ Allowed revenues include tax revenues plus other revenues which will diminsh the necessity of incremental tax revenues, including inspection fees, permits, fines, penalties, use fees, and income from mass transit, offstreet parking, and recreation programs. Revenues not allowed for inclusion are tax revenues used to subsidize utilities commonly run by private businesses (as defined in sec. 45 of this chapter), interest on investments, income from the sale or lease of land or equipment, and revenues from any other source.

October 15. By December 15, the department is to make a final determination for each municipality, after reviewing all financial audits and statements submitted by the municipalities. Any adjustments made to the figures initially submitted by a municipality shall be reported to the municipality along with the revised figures.

Full and true property values shall be determined in the manner provided in AS 14.17.140 (state aid to education). In municipalities which are not school districts and thus not covered by the provisions of AS 14.17, the state assessor shall, at least once each three years, estimate the property value for all cities with populations of 750 or more. For cities which are not school districts, and which have populations less than 750, estimated property values will be determined by averaging the per capita property values of all cities having populations less than 750 and for which assessments are completed.

Sec. 29.88.025 specifies the necessary documentation that would be supplied to the department by each municipality in support of its application. The fiscal information is to be for the fiscal year which precedes the fiscal for which the entitlement is sought.

Sec. 29.88.030: As with present law, the bill provides for entitlements to be returned to the taxing unit for which the entitlement was earned. There are two exceptions: 15 percent of an area-wide entitlement may be used for non area-wide purposes, and, the local government may decide the taxing jurisdiction that is to receive the entitlement generated by non-tax revenues (fees, permits, etc).

Sec. 29.88.035 establishes the tax equalization account from which entitlements earned under this chapter will be paid. The total appropriation to the account is to be distributed by prorating entitlements.

Sec. 29.88.040 gives the department authority to adopt, amend and repeal regulations necessary to implement the chapter. The regulations would contain provisions for obtaining information, set filing dates, providing notification to municipalities with respect to changes made by the department with regard to any entitlement, and a reasonable time for a municipality to respond to decisions of the department. In response

to some specific complaints by several of the Municipal League representatives who worked on the draft, language has been inserted by which the department is directed to supply application assistance to municipalities. Additionally, the department is empowered to extend the definition of utilities (section 045 of this chapter) to cover additional enterprise activities for which no working classification has been provided by statute.

Sec. 29.88.045 defines terms used in the chapter, including 'taxing unit' and 'utilities'.

*Section 3. CHAPTER 89.

Chapter 89 is, in substance, a restatement of present law regarding entitlements earned for road maintenance, health facilities and hospitals, construction aid, and volunteer fire departments in the unorganized borough. The following changes have been made from present law: (1) public road maintenance entitlements are based on $2500/mile (present law is $1500/mile); (2) ice road maintenance is based on $1500/mile (present law is $900/mile); (3) construction aid for hospitals is not multiplied by the cost of living factor, as is the case in present law; and (4) municipalities which exercise a health power will not receive a $2 per capita distribution.

Generally, this portion of present law which is saved in the Municipal League's draft bill provides for health related entitlements according to the following: (1) for hospitals with 10 or more beds -- the greater of $1,000 per bed or $75,000 per facility, (2) for hospitals with fewer than 10 beds -- the greater of $1,000 per bed or $25,000 per facility; (3) for health facilities -- $1,000 per bed or $4,000 per facility; (4) the entire entitlement received for health purposes must be used for health purposes; (5) for hospitals which were begun after January 1, 1968, the greater of $2,500 per bed or 5 percent of the construction cost annually until the total payment equals 25 percent of the total construction cost; and (6) for volunteer fire departments in the unorganized borough, $7.50 per capita. Entitlements earned under this section (except for hospital construction) are multiplied by an area cost of living differential, determined under AS 39.27.030.

Section 29.89.040 establishes a miscellaneous services account, from which payments are made under this chapter.

*Section 4. CHAPTER 90.

Sec. 29.90.010 precludes an interpretation of the general administrative provisions of the state aid program to create of a debt to the state.

Sec. 29.90.020 directs the department to allocate funds from the two accounts established (AS 29.88.035 and AS 29.89.040) and further provides that any excess funds existing in the miscellaneous services account (Chapter 89) shall then be added to the tax equalization account (Chapter 88).

Subsection (b) describes the means for determining proration of funds allocated under the equalization formula of Chapter 88 and under the minimum entitlement provisions of AS 29.90.030. After the Chapter 88 and Chapter 89 entitlements have been determined, the amount necessary to guarantee the minimum entitlement provided for in Sec. 29.90.030 is calculated and all Chapter 88 municipal entitlements are proportionally reduced so that the sum of payments under Chapter 88 and under AS 29.90.030 equal the amount available in the tax equalization account.

Sec. 29.90.030 provides for payment of minimum entitlements. All municipalities are guaranteed a minimum of $25,000 (plus the cost of living allowance for their area) if (1) a regular election has been held; (2) regular council meetings have been conducted; (3) the municipality has adopted a budget; (4) local ordinances have been codified; and (5) some degree of municipal administration is provided for through a manager, clerk, or other part-time or full-time officer.

*Sections 5 - 9.

These sections make correlative changes in AS 29 required by the state aid program changes, and are generally self-explanatory.

*Section 10.

The section repeals the statutory basis of the present program of state aid to local governments.

*Section 11: "Hold Harmless"

Section 11 specifies that, for three years after this act becomes effective, no municipality will receive less than its actual entitlement earned in the last year that the present law is applied.

*Section 12

The section specifies that the act becomes effective when $27,000,000 is appropriated to the program, or July 1, 1982, whichever is earlier.

Enclosure

person may be convicted for a violation of §§ 230 — 260 of this chapter unless it appears to the satisfaction of the court that the provisions of this section have been substantially complied with by the hospital. (§ 4 ch 40 SLA 1960)

Sec. 18.20.250. Receipt of services without intent to pay a misdemeanor. A person who requests and receives hospital care including board, room, surgical care, medical care, or related services or drugs or other medication, or any combination of them from a general hospital, with the intent not to pay the amount due and the amount which becomes due for one or more of the items or who obtains credit from a general hospital for the items by intentionally giving and furnishing false information as to name, address, employment or property unless the items furnished are fully paid for, is guilty of a misdemeanor, and upon conviction is punishable by imprisonment in a jail for not more than one year, or by a fine of not more than $1,000, or by both. (§ 2 ch 40 SLA 1960)

Sec. 18.20.260. Definitions. In §§ 230 — 260 of this chapter "general hospital" means a hospital which offers its services to the public and which receives all patients as they apply, to the extent its capacity and facilities permit and in accordance with the rules and regulations established by it. (§ 1 ch 40 SLA 1960)

Chapter 25. Assistance to Hospitals and Health Facilities.

Article
1. Construction and Equipment Aid to Nonprofit Hospitals (§§ 18.25.010 — 18.25.030)
2. Aid for Operation Deficits of Community Operated Nonprofit Hospitals and Clinics (§§ 18.25.040 — 18.25.060)
3. Assistance for Community Health Facilities (§§ 18.25.070 — 18.25.110)
4. General Provisions (§ 18.25.120)

Article 1. Construction and Equipment Aid to Nonprofit Hospitals.

Section
10. Department to render aid
20. Determination of necessity
30. Intent

Sec. 18.25.010. Department to render aid. The department may facilitate the purchase, construction and repair of, and obtain necessary equipment for, nonprofit hospitals operated by municipalities, communities and associations in the state. (§ 1 ch 81 SLA 1949; am § 1 ch 107 SLA 1953)

Sec. 18.25.020. Determination of necessity. The department shall initiate appropriate action under §§ 10 — 30 of this chapter when it determines which projects are of most immediate necessity, and shall allot money to the municipalities, communities and associations on a

matching basis, or in accordance with their financial ability and urgency of the need. (§ 2 ch 81 SLA 1949; am § 2 ch 107 SLA 1953)

Sec. 18.25.030. Intent. It is the intent of §§ 10 — 30 of this chapter to provide financial aid to municipalities, communities and associations for which an attempt at complete financing by themselves of a necessary project would entail great hardship. It is also intended that the department utilize the money authorized under §§ 10 — 30 of this chapter so far as can be arranged to assist the municipalities, communities and associations in matching funds with the federal government under applicable federal law for hospital assistance. (§ 3 ch 81 SLA 1949; am § 3 ch 107 SLA 1953)

Article 2. Aid for Operation Deficits of Community Operated Nonprofit Hospitals and Clinics.

Section
40. Department to render aid
50. Determination of necessity
60. Intent

Sec. 18.25.040. Department to render aid. The department may assist in cases of operational deficits of community operated nonprofit hospitals and clinics in the state. (§ 1 ch 96 SLA 1949)

Sec. 18.25.050. Determination of necessity. The department shall initiate appropriate action in accordance with the provisions of §§ 40 — 60 of this chapter as soon as the department determines which projects are of most immediate necessity. (§ 2 ch 96 SLA 1949)

Sec. 18.25.060. Intent. It is the intent of §§ 40 — 60 of this chapter to provide financial aid, or funds to match available federal funds to aid localities or municipalities whose taxable values are limited in scope and for whom an attempt at community financing of a community operated nonprofit hospital or clinic would entail insurmountable hardship. (§ 3 ch 96 SLA 1949)

Article 3. Assistance for Community Health Facilities.

Section
70. Department to render assistance
80. Intent and purpose
90. Use of purchases
100. Regulations authorized
110. Report to legislature of grants made

Sec. 18.25.070. Department to render assistance. The department may assist in the purchase, construction, repair, and equipping of facilities to improve and protect community health, and may provide financial assistance for the operation of the facilities in case of operational deficits. (§ 1 ch 117 SLA 1951)

Sec. 18.25.080. Intent and purpose. It is the intent of §§ 70 — 110 of this chapter to assist communities and areas in developing and improving health service facilities by the purchase, construction,

renovation, or establishment of hospitals, health centers, or clinics, or quarters for personnel, and the purchase of furnishings, supplies and equipment and making the other expenditures necessary to carry out the purpose of §§ 70 — 110 of this chapter. Assistance is to be given in areas which would otherwise be denied adequate facilities, because the taxable values are limited in scope and an attempt at total community financing of a project would cause hardship or prevent its realization. It is also intended that the department utilize the money authorized under §§ 70 — 110 of this chapter so far as can be arranged to assist municipalities in matching funds with the federal government under federal law. (§ 2 ch 117 SLA 1951)

Sec. 18.25.090. Use of purchases. Purchases under §§ 70 — 110 of this chapter are to be used for the purpose for which appropriated and when the purpose is discontinued the items shall be returned to the department for use elsewhere. (§ 3 ch 117 SLA 1951)

Sec. 18.25.100. Regulations authorized. The department shall adopt rules and regulations for

(1) the establishment of criteria, minimum requirements and standards for assistance to communities under §§ 70 — 110 of this chapter;

(2) the establishment of the fiscal and accounting procedures and controls considered necessary for the payment of grants;

(3) the compilation of data and information from the communities concerned which will support the need for assistance under §§ 70 — 110 of this chapter;

(4) the establishment of procedures by which communities may apply for assistance;

(5) accepting financial or other assistance from the federal government under federal law to carry out the purpose of §§ 70 — 110 of this chapter through matching funds or grants;

(6) cooperation and coordination with other state boards, departments or agencies engaged in construction programs in areas applying for assistance under §§ 70 — 110 of this chapter. (§ 4 ch 117 SLA 1951)

Sec. 18.25.110. Report to legislature of grants made. Within 10 days of the convening of each legislative session, the department shall submit a report of grants made under §§ 70—110 of this chapter. (§ 5 ch 117 SLA 1951)

Article 4. General Provisions.

Section
120. Definitions

Sec. 18.25.120. Definitions. In this chapter "department" means the Department of Health and Social Services. (am § 6 ch 104 SLA 1971)

Effect of amendment. — The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare."

Chapter 30. Air Pollution.

Section
05—250. [Repealed]

Secs. 18.30.005—18.30.250.
Repealed by § 4 ch 120 SLA 1971.

Editor's note. — The repealed chapter derived from § 2, ch. 86, SLA 1969; § 6, ch. 104, SLA 1971.

Section 5, ch. 120, SLA 1971, provides: "All litigation, hearings, investigations and other proceedings pending under any law amended or functions which may be transferred by this Act, continue in effect and may be continued and completed notwithstanding any such transfer or amendment provided for in this Act. Certificates, orders, rules or regulations issued or filed under authority of a law amended by this Act or functions which may be transferred by this Act, remain in effect for the term issued, unless or until revoked, vacated, or otherwise modified under the provisions of this Act. All contracts or other obligations created by any law amended by this Act or by virtue of functions which may be transferred by this Act, and in effect on July 1, 1971, remain in effect unless or until revoked, or modified under the provisions of this Act."

Legislative committee report. — For report on ch. 120, SLA 1971 (SB 75 am H), see 1971 House Journal, p. 1016.

Chapter 33. Pesticides Control Board.

Section
10—100. [Repealed]

Secs. 18.33.010—18.33.100.
Repealed by § 4 ch 120 SLA 1971.

Editor's note. — The repealed chapter derived from § 1, ch. 166, SLA 1970.

Section 5, ch. 120, SLA 1971, provides: "All litigation, hearings, investigations and other proceedings pending under any law amended or functions which may be transferred by this Act, continue in effect and may be continued and completed notwithstanding any such transfer or amendment provided for in this Act. Certificates, orders, rules or regulations issued or filed under authority of a law amended by this Act or functions which may be transferred by this Act, remain in effect for the term issued, unless or until revoked, vacated, or otherwise modified under the provisions of this Act. All contracts or other obligations created by any law amended by this Act or by virtue of functions which may be transferred by this Act, and in effect on July 1, 1971, remain in effect unless or until revoked, or modified under the provisions of this Act."

Legislative committee report. — For report on ch. 120, SLA 1971 (SB 75 am H), see 1971 House Journal, p. 1016.

Messages dated April 18 and April 19, 1980 were read stating the Senate has passed the following and they are transmitted for consideration:

FIRST READING AND REFERENCE OF SENATE RESOLUTIONS

SENATE JOINT RESOLUTION NO. 68 by the Commerce Committee by request: SJR 68

> Relating to proposed federal budget cuts in appropriations to the United States Postal Service and reduction in the federal cost-of-living allowance.

was read the first time and referred to the State Affairs Committee.

FIRST READING AND REFERENCE OF SENATE BILLS

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 523 amended, by the Judiciary Committee, entitled: CSSB 523 am

> "An Act relating to public utilities; and providing for an effective date."

was read the first time and referred to the Commerce Committee.

SENATE BILL NO. 549 amended, by the Health, Education and Social Services Committee, entitled: SB 549 am

> "An Act relating to professional licensing and to the practice of pharmacy; and providing for an effective date."

was read the first time and referred to the Health, Education and Social Services Committee.

SB 550 am SENATE BILL NO. 550 amended, by the Health, Education and Social Services Committee, entitled:

"An Act relating to professional licensing and to the practice of pharmacy; and providing for an effective date."

was read the first time and referred to the Commerce Committee.

REPORTS OF STANDING COMMITTEES

HB 192 The Finance Committee has had HOUSE BILL NO. 192 (providing for equalization of the tax resources of municipalities, continuing a portion of the program of state aid for municipal purposes, and providing for minimum entitlements; effective date) under consideration and a majority of the committee recommends it be replaced with COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 192 (Finance) (same title), reports it back with individual recommendations, and attaches a letter of intent. Freeman (Vice Chairman), Smith, Guy and Schaeffer recommend do pass. McKinnon, Rogers and Haugen have no recommendation.

HB 192 was referred to the Rules Committee for placement on the calendar.

The letter of intent on HB 192 follows:

HOUSE FINANCE COMMITTEE

LETTER OF INTENT

CSHB 192

It is the intent of the Legislature that the Alaska Department of Community and Regional Affairs provide, by the tenth day of the Twelfth Legislature, First Session, the Legislature with draft legislation for the funding of mass transportation through the revenue sharing formula. The Department shall also prepare a report on the current status of transit operations in the State.

HB 192

In preparing draft legislation, the Department shall take into account regional differences, private and public operation of transit systems, and various options for state support. It is suggested that the Department examine the approaches to this question taken by other states.

Oral Freeman

Rep. Oral Freeman, Vice-Chrmn.
House Finande Committee

HB 610

The Finance Committee has had HOUSE BILL NO. 610 (making a special appropriation to the Department of Administration, Older Alaskans Commission, for programs of benefit to older Alaskans; effective date) under consideration and a majority of the committee reports it back with individual recommendations. Freeman (Vice Chairman), Meekins, Duncan, Guy and McKinnon recommend do pass. Montgomery, Smith and Haugen have no recommendation.

HB 610 was referred to the Rules Committee for placement on the calendar.

HB 611

The Finance Committee has had HOUSE BILL NO. 611 (authorizing state aid for service programs for the benefit of older Alaskans; effective date) under consideration and a majority of the committee reports it back with individual recommendations. Freeman (Vice Chairman), Meekins, Duncan, Guy and McKinnon recommend do pass. Montgomery, Smith and Haugen have no recommendation.

HB 611 was referred to the Rules Committee for placement on the calendar.

HB 615

The Finance Committee has had HOUSE BILL NO. 615 (relating to an exemption from municipal property taxation, effective date) under consideration and a majority of the committee reports it back with individual recommendations. Freeman (Vice Chairman), Meekins, Duncan, Guy and McKinnon recommend do pass. Montgomery, Smith and Haugen have no recommendation.

HB 615 was referred to the Rules Committee for placement on the calendar.

HB 618 The Finance Committee has had HOUSE BILL NO. 618 (establishing an Older Alaskans Commission; effective date) under consideration and a majority of the committee recommends it be replaced with the Health, Education and Social Services COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 618 (same title), reports it back with individual recommendations and attaches a new fiscal note. Freeman (Vice Chairman), Meekins, Duncan, Guy and McKinnon recommend do pass. Montgomery, Smith and Haugen have no recommendation.

HB 618 was referred to the Rules Committee for placement on the calendar.

Fiscal note on CSHB 618 appears in House Journal Supplement No. 51.

HB 648 The Finance Committee has had HOUSE BILL NO. 648 (relating to fire prevention) under consideration and a majority of the committee recommends it be replaced with COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 648 (Finance) (same title), recommends it do pass and attaches a fiscal note. Concurring: Freeman (Vice Chairman), McKinnon, Smith, Guy, Montgomery and Haugen.

HB 648 was referred to the Rules Committee for placement on the calendar.

Fiscal note on HB 648 appears in House Journal Supplement No. 51.

HB 698 The Community and Regional Affairs Committee has had HOUSE BILL NO. 698 (relating to the composition and representation requirements of general law boroughs; effective date) under consideration and a majority of the committee reports it back with individual recommendations. Parker (Chairman) and Branson recommend do pass. Parr and Zharoff have no recommendation.

HB 698 was referred to the Rules Committee for placement on the calendar.

HB 710 The Finance Committee has had HOUSE BILL NO. 710 (making appropriation adjustments for the Department of Health and Social Services, Division of Public Assistance; effective date) under consideration and a majority of the committee recommends it be replaced with COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 710:

Attachment 4

THE CITY AND BOROUGH OF JUNEAU

CAPITAL OF ALASKA

155 SOUTH SEWARD ST. JUNEAU, ALASKA 99801

April 30, 1980

The Honorable Arliss Sturgulewski
Chairman, Senate Community and
Regional Affairs Committee
Pouch "V" State Capitol Building
Juneau, Alaska 99811

FILE: Legislation-1980

SUBJECT: CSHB 192(am)

Dear Senator Sturgulewski:

The City and Borough of Juneau supports HB 192 as it passed the House but requests that the following change be made in the bill to correct problems which arise out of a House Finance Committee change.

Replace lines 17 through 22 on page 2 with the following:

(C) revenue from payments in lieu of taxes made by municipally owned enterprise operations, from fees, rentals, leases, penalties, licenses or permits received during the preceding fiscal year by the municipality for a function or service over which it has control, including revenues derived from parks and recreation services, mass transit, and offstreet parking; and

The foregoing amendment

1. makes it clearer that it is the payments in lieu of taxes made by a municipal utility to the municipality which are counted as a part of local effort and that the revenue to the utility is not counted, and

2. deletes the use of the word "utility" (which is defined elsewhere in the bill for other purposes) and replaces it with the "municipal enterprise" language so that it

will include in lieu of tax payments made by all tax exempt municipal enterprise operations and not just those made by those operations which are defined as utilities, and

3. deletes revenue to municipal garbage utilities from local effort.

Thank you for your consideration of the foregoing matters.

Sincerely,

Gerald L. Sharp
City-Borough Attorney

GLS:phl

. Funding the Newly Organized Municipalities

. The League requests the enactment of legislation to provide adequate block grants to assist in the formation of new municipalities.

. Public Employee Retirement

. The League urges that legislation which increases benefits under the Public Employees Retirement System provide that the increased cost shall be borne by contributions from the employees. The League urges the Legislature to recognize the effect on participating municipal employers if any amendments are made to PERS.

2. The League supports legislation that would allow locally elected officials, including those who are active members in the Alaska State Teachers Retirement System, and former elected officials to participate in the Public Employees Retirement System.

H. Cultural, Civic and Convention Centers and Museums

1. While legislation has been enacted into law to enable the state to assist local communities in the construction, maintenance and operation of cultural, civic, convention and community recreation centers, only minimal funding has been available for this purpose. The League, therefore, urges the Legislature to authorize the issuance of bonds for this or any similar legislation in an amount sufficient to meet the construction requirements in Alaska communities.

2. The League urges the Legislature to provide state assistance for the acquisition, construction, maintenance and operation of museums by Alaskan communities in order to preserve and display materials illustrative of the history of the state, the community and its people.

AML

I. Local Hospital Use

1. It is the practice of the Public Health Service and other health agencies to transport patients from local communities with modern hospital facilities and professional expertise to regional hospitals for treatment and convalescence. If local community hospitals are to survive and provide the professional services communities require, these cases should remain in the local hospitals. The League, therefore, urges the state and federal agencies responsible for health care to utilize the local health facilities and to transport patients to regional centers only when the necessary services are not available.

2. The League supports legislation that would retain full funding of the State Shared Revenue Program but would remove "aid to hospital construction" funding from the state shared revenue program. The League strongly supports increased state funding of hospital construction and operating costs but feels that this should be funded outside the State Revenue Sharing Program and within the Department of Health and Social Services.

Municipality of Anchorage

MEMORANDUM

DATE: April 18, 1980

TO: Mayor Sullivan
THRU: Lu Person, Director of Management and Budget LP
FROM: Gene Dusek, Budget Officer GD

SUBJECT: HB192 AMENDMENT

Per Mitch, the only amendment to HB192 as passed out of the House Finance Committee on April 17th was to increase the total amount, including hospital pass-thru funding, to $31 million.

At a $31 million funding level, the State has estimated that $22,740,838 would be available for other than hospital pass-thru funding. At this funding level, the following shows how Anchorage would fare under the current statutes and under HB192 in FY1981.

Current Statutes		HB192	
Amount	% of State total	Amount	% of State total
$9,830,864	43.23%	$8,190,667	36.01%

The above compares to Anchorage's share of $7,849,556 (43.23%) of the State total of $18,157,087 if FY 1980 State-shared revenues are fully funded as per the House supplemental.

Re: HB 192 - Revenue Sharing

Needless to say, Alaska Municipal League supports a state revenue sharing program. The cities and boroughs are struggling to provide services demanded by their constituents while at the same time keeping local taxes at a reasonable level. Local government officials appreciate the help they receive from the Legislature in meeting those goals.

Although we prefer continuance of the existing revenue sharing program to no program at all, we do support reform in the method of distributing funds. Presently there is little correlation between the cost of providing a service and the amount in the revenue sharing category. Additionally, the current categorical program contains no inflation ajustment factor, whereas, the cost of living has increased over 89% since the inception of the program.

We support separating the hospital construction grants from the general revenue sharing fund because it is a pass through to hospitals and not a revenue to municipalities. This year it was 28% of the total entitlement.

We do not feel it is as important to separate the roads and highways section but we support increasing the per mile amount. Estimates on actual costs range from $4,000 to $10,000 per mile depending on type, number of lanes, etc. In addition, we suggest adding another category to Chapter 89 - State Aid for Miscellaneous Purposes entitled "State Aid to Municipalities for Public Transit Operations" (see enclosed). This category will aid energy conservation by encouraging public transit and is a logical balance to the road maintenance section.

In summary we support the concept of helping those communities that are willing to help themselves as contained in the HB 192 formula. We do believe, however, that there needs to be some stronger hold harmless clauses to lessen the impact on those municipalities adversely affected by this bill.

3 to 5 years 125% of fiscal '80 (original appropriation)

33.75m 32.35m w/supplemental + entitlement or 35m

204 N. FRANKLIN ST.
JUNEAU, ALASKA 99801

Proposal to amend HB 192 to add a new section to Chapter 89, State Aid for Miscellaneous entitled State Aid to Municipalites for Public Transit Operations.

We suggest two different ways to compute the assistance: (1) 25% of operating costs or (2) 33½% of expenses less fare revenues. Using rough figures from FY '79, the dollar amounts are:

Anchorage	Total Expenses	$4,250,500 - 25%	= $1,062,625
	Fare Revenues	546,700	
	Deficit	$3,703,800 - 33½%	= $1,234,600
Barrow	Total Expenses	$ 350,000 - 25%	= $ 87,500
	Fare Revenues	54,000	
	Deficit	$ 296,000 - 33½%	= $ 97,680
Fairbanks	Total Expenses	$1,108,800 - 25%	= $ 277,200
	Fare Revenues	144,000	
	Deficit	964,800 - 33½%	= $ 296,000
Juneau	Total Expenses	$ 930,200 - 25%	= $ 232,550
	Fare Revenues	100,000	
	Deficit	830,200 - 33½%	= $ 276,667
Ketchikan	Total Expenses	$ 409,412 - 25%	= $ 102,353
	Fare Revenues	338,500	
	Deficit	70,912 - 33½%	= $ 23,637

Total 25% of Expenses	$1,762,228
Total 33½% of Deficit	$1,928,584

Committee on Community & Regional Affairs

Official Business

Porch V
State Capitol
Juneau, Alaska 99811

MINUTES MEETING April 30,1980 8:00 am
SUGGESTED AMENDMENTS

Mr. Monk, Fire Fighters' Association
Prefers categorical assistance; but supportive of Rogers' amendment.

Mr. Lee Sharp, Juneau City Boro Attorney
regarding utilities (see letter, Attachment 4)
regarding fire protection: keep as was, since 125% discretionary areawide money(p.5) allows for boro support of VFDs.
regarding "hold harmless " : population should not be used
regarding hospitals: hospital construction should be in a separate account or preferably removed entirely from revenue sharing to DHSS.

Mr. Gary Kraus, Dept. Public Safety
perfers categorical assistance to fire services. Supports amendments that extend revenues to all fire services.

Ginny Chitwood, Alaska Municipal League
regarding hospitals, utilities, mass transit (see attachment 5)

Palmer McCarter,Mary Foster, LGAD, Dept. Comm. & Regional Affairs
regarding utilities: in lieu provision benefits municipal owned utilities
Hospital Construction aid: in preference order: should be deleted from revenue sharing and placed in DHSS; put in a separate account from other miscellaneous services; return to original definition of actual construction costs (eliminate financing costs)
Regarding Fire protection: p. 10 opposed . Prefers orginal version, as all boros have fire protection powers.
Re "hold harmless": either clarify that "original appropriation"was meant or no need for 125% clause if FY80 entitlement used instead of FY 80 appropriation
Correction: p. 3, l.21 : Change December 15 date

Regional Affairs Committee
Pouch "V" State Capitol Building
Juneau, Alaska 99811

FILE: Legislation-1980

SUBJECT: CSHB 192(am)

Dear Senator Sturgulewski:

The following change on page 4 of CSHB 192(Finance)(am) would provide for a simple means of adjusting the assessed value of a municipality to take into account the value of those utilities for which payments in lieu of taxes are made.

In line 8 on page 4 of the bill, delete the period after "AS 14.17.140" and add the following:

> and shall include, in addition, for each utility for which a payment in lieu of taxes is made, the computed assessed value of the utility. The computed assessed value of the utility shall be the amount computed by dividing the applicable millage rate into the amount of the payment in lieu of taxes made by the utility.

This should provide a simple method of computing the assumed value of the utility for which the payments in lieu of taxes are made. This addition should be made so that the municipalities with privately owned utilities are not penalized for permitting private industry to provide those utility services.

Sincerely,

Gerald L. Sharp
City-Borough Attorney

CS FOR HOUSE BILL NO. 974

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to state aid for hospitals; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. Notwithstanding AS 43.18.010(h)(2)(A), during the fiscal year ending June 30, 1981, the Department of Community and Regional Affairs shall make payments under AS 43.18.010(h)(2) to a municipality which has the power to provide hospital facilities and services and which exercises the power on the basis of $1,000 per bed for each bed actually used for patient care limited to the number of beds provided for in the construction design of the hospital or $200,000 a hospital for those hospitals with 10 or more beds, or $70,000 a hospital for those hospitals with less than 10 beds, as the municipality may elect. Amounts received under this section may be used only for hospitals and shall be apportioned among qualifying hospitals as the municipality determines.

* Sec. 2. (a) The Department of Health and Social Services and the Department of Community and Regional Affairs shall jointly examine and report their recommendations on the extent to which the state should assist municipalities, nonprofit corporations, and others in the construction and operation of hospitals and health facilities.

(b) By February 1, 1981, the commissioner of health and social services shall submit to the legislature a report, accompanied by draft legislation, examining programs of state aid for hospital and health facility construction and operation, including both public and private facilities, and recommending a comprehensive health and hospital financial assistance program. The report

and accompanying legislation shall be based on health care and health facility need, expressed as a function of number of beds, occupancy rate of facilities, kinds of care and levels of service provided or not provided, or any other factors which the commissioner of health and social services reasonably believes should be the basis by which state assistance for hospitals and health facilities and their programs should be provided.

(c) The report and accompanying legislation presented under (b) of this section shall

(1) include, if necessary, reference to certificates of need legislation and any other current program of the federal or state government which applies in determining whether hospitals and health care facilities shall be constructed;

(2) recommend a permanent program of state assistance to municipalities for hospital care and health care services, whether provided by public or private facilities, which improves the level of care for the people of the state.

* Sec. 3. This Act takes effect July 1, 1980.

33-001 (Rev. 12/79)
Modified by DHSS (11-28-79)

A study to determine the State's role in providing aid/support to Alaska's acute care facilities and how such aid/support should be disbursed should provide important policy and resource allocation direction for the State on this complex issue. Because of the health planning and policy considerations raised, the study should be conducted under the aegis of the DHSS Division of State Health Planning and Development with particular focus on its facilities development section.

With current Division staff limitations and work load commitments this scope of work would be contracted to a qualified research group with capabilities in and a working knowledge of Alaska's health care delivery system, health care economics, capital development in health care facilities, State plans for development as articulated by the Statewide Health Coordinating Council, State regulations and other dimensions. It is anticipated that the scope of work would require approximately $50,000.

To ensure input of affected/interested parties, a task force would be convened to advise the contractor and the Division on the study. The task force would include a hospital administrator, a representative of a third party payor, a consumer, a representative of the State's Medicaid program, a member of the Division's facilities development staff, a Health Systems Agency board member and a member of the Statewide Health Coordinating Council. The task force would meet in Anchorage, the most economical meeting site, at least three times during the study at an approximate cost of $3000 per meeting.

Costs are included to produce a report for select distribution at the conclusion of the study.

MEMORANDUM State of Alaska

TO. Marie Matsuno
Deputy Commissioner

DATE: April 29, 1980

FILE NO:

Through: Palmer McCarthy
Director

TELEPHONE NO:

FROM: Terry Earley
State Assessor

SUBJECT: CSHB 192 am

The staff of the Senate Community & Regional Affairs Committee requested fiscal analysis of two proposed amendments to CSHB 192 am. Both amendments deal with organization of newly incorporated areas.

The first of these would increase organizational grants (AS 29.18.180) to $130 per voter and also increase the minimum grant to newly formed boroughs and first class cities to $125,000 (current statue is $10 per voter and $25,000 minimum).

Assuming that there will be one borough or first class city incorporation in FY 81, two in FY 82, one in FY 83, etc. and assuming that two second class cities incorporate per year and the average number of voters of these cities is 150, the following is a listing of the fiscal impact by year:

1981	1982	1983	1984	1985
164,000	289,000	164,000	289,000	164,000

The second amendment would require the Department to provide for preparation of the initial assessment roll in newly formed boroughs and maintain that assessment role for two subsequent years.

The assumption of two in FY 81, and one in FY 82, etc. would still be valid. The preparation and maintenance of assessment rolls, per this amendment, would be done by a private contractor and supervised by the Department.

It is anticipated that the cost of these contracts would average $300,000 per borough for the initial assessment roll and $75,000 for each of the next 2 years.

The breakdown of Departmental administrative costs would be as follows:

Personal Services

2	Appraisers Range 18	$58,272
1	Clerk Typist III Range 8	14,892
1	Clerk Typist II Range 7	14,484
		$87,648
	Fringes at 28%	24,541

Travel	$112,189
Existing Personel	$ 8,000
New Appraisers	12,000
	$20,000

Contractual

Telephone	$ 6,000
Postage	4,200
Printing & Advertising	6,000
Machine Rental	6,000
Office Space 600 sq.ft. @ 1.50	10,800
Data Processing	25,000
	$58,000

Commodities

Reference Materials	$ 5,000
Office Supplies	5,000
	$10,000

Equipment $ 3,000*

*Initial set up costs.

The following listing is the total cost by year for this amendment, including 8% inflation.

FY 81	FY 82	FY 83	FY 84	FY 85
$506,200	899,600	1,522,500	1,212,000	957.9

TE:jh

recipient, entitlements determined under AS 29.88, AS 29.89 and AS 29.90, together with the additional sums required by (a) of this section, shall be equally prorated and the prorated amounts distributed to municipalities and other recipients.

* Sec. 12. AS 29.18.180(a) is amended to read:

(a) For the purpose of defraying the cost of transition to borough or city government and in order to provide for development and interim governmental operations each borough and city incorporated after January 1, 1958, or, in the case of a second class city, incorporated or reclassified after January 1, 1968, other than a unified municipality incorporated under the provisions of AS 29.68.240 - 29.68.440 [AS 29.85], or a municipality otherwise incorporated by consolidation, is entitled to an organization grant equal to $130 [$10] for every voter who voted in the borough or city incorporation election. However, each incorporated borough and each first class city incorporated or established by reclassification outside an organized borough is entitled to

(1) $125,000 for the fiscal year in which it was incorporated or reclassified;

(2) $125,000 for the next fiscal year; and

(3) $75,000 for the third fiscal year [AT LEAST $25,000].

* Sec. 13. AS 29.18 is amended by adding a new section to read:

Sec. 29.18.182. ASSESSMENT ROLL. (a) The Department of Community and Regional Affairs shall establish the initial assessment roll for a borough incorporated under this chapter. The initial assessment roll shall contain the information required by AS 29.53.100(a) and shall be sufficient for computing tax levies by the municipality and for computing the amount of local effort required by the municipality under AS 14.17.021(c)(3) and 14.17.071.*

(b) In the preparation of the initial assessment roll, the De-

partment of Community and Regional Affairs may contract for the services of appraisers and others whose services are required to complete the initial assessment. When completed, the initial assessment roll shall be certified by the commissioner of community and regional affairs, and the completed assessment roll, together with all supporting information and materials prepared by the Department of Community and Regional Affairs shall be transmitted to the borough assembly.

(c) The Department of Community and Regional Affairs, to the extent appropriations are available for the purpose, shall continue to pay the costs of the services of a municipal assessor and related staff for three years after the completion of the initial assessment roll.

* Sec. 14. AS 29.18.182(a), added in sec. 13 of this Act, is amended to read:

(a) The Department of Community and Regional Affairs shall establish the initial assessment roll for a borough incorporated under this chapter. The initial assessment roll shall contain the information required by AS 29.53.100(a) and shall be sufficient for computing tax levies by the municipality [AND FOR COMPUTING THE AMOUNT OF LOCAL EFFORT REQUIRED BY THE MUNICIPALITY UNDER AS 14.17.021(c)(3) AND 14.17.071].

* Sec. 15. Sections 1 - 11 of this Act take effect on the first day of the fiscal year for which $31,000,000 or more is appropriated and allowed by the governor for distribution to municipalities and other recipients under the provisions of this Act, or on July 1, 1983, whichever is earlier.

* Sec. 16. Sections 12 - 14 of this Act take effect July 1, 1980.

* Sec. 17. Sections 15 - 17 of this Act take effect immediately in accordance with AS 01.10.070(c).

finance the project; and the cost of other items, including an indemnity and surety bonds and premiums on insurance, legal fees, fees and expenses of trustees, depositaries, financial advisors, and paying agents for the bonds issued as the issuer considers necessary.

Sec. 29.89.025. STATE AID TO VOLUNTEER FIRE DEPARTMENTS IN THE UNORGANIZED BOROUGH. (a) The department shall pay to a volunteer fire department registered with the state fire marshal and serving an area not in an organized borough or city a sum for protection purposes equal to $7.50 per capita for the population served by the department, as determined by the state fire marshal.

(b) A grant shall be made as set out in (a) of this section to facilitate the organization of a volunteer fire department in an area not in an organized borough or city upon application of the proposed fire protection group to the state fire marshal and approval of applications according to standards of organization and service prescribed by regulations adopted by the state fire marshal.

(c) In this section, "fire protection" includes, but is not limited to, fire protection provided by a volunteer fire department registered with the state fire marshal which has official recognition and financial support from the community or area in which it is located.

Sec. 29.89.030. STATE AID FOR MASS TRANSIT. The department shall pay _____ per capita to a municipality which provides mass transit services.

Sec. 29.89.035. POPULATION DETERMINATION. For purposes of this chapter, population shall be determined by the latest figures of the United States Bureau of the Census or other reliable population data, including but not limited to public school enrollment figures, public utility connection, registered voters or certified employment payrolls.

Sec. 29.89.040. AREA COST-OF-LIVING DIFFERENTIAL. (a) Payments

Helen D. Beirne, Commissioner
Department of Health and Social Services
Pouch H-01
Juneau, Alaska 99811

Dear Commissioner Beirne:

Thank you for your letter of January 22 indicating your interest in determining whether our hospital may receive funds from the State under AS 18.25.040 et. seq.

We have been in correspondence on this subject since November 9, 1979. Inasmuch as over three months have elapsed since that time, I ask that you please urge all parties concerned to provide you and me with guidance as soon as possible.

The enclosed statistics will show you that in the last 12 months we have served 6,723 Alaskans, 80 percent of which reside in Anchorage. Our financial projections show that we will be incurring operational break-even or better by July, 1981. In the meanwhile, we will be incurring operational deficits each month, and this is why we are seeking relief under the statute being examined.

I feel that the fact that the statute has never been exercised is no reason to delay exercising it where and when applicable.

It would be a tragic loss to Alaska if, for lack of temporary assistance under existing statutes, it were to lose this modern and efficient hospital for use by the general population that has been supporting it through fees for service.

I look forward to your answer.

Sincerely,

Ronald A Pavellas

Unorganized Borough Fire Protection Groups	27	58,655	$ 44,092
Entitlements	160	$25,472,940	$19,148,593
Cost-of-Living Allowance (COLA)		1,548,975	1,164,400
Total Entitlements		$27,021,915	$20,312,993
Less Prior Year Adjustments		77,003	77,003
Final Entitlements		$26,946,423	$20,235,990

RATES USED TO COMPUTE GRANT ENTITLEMEMTS
UNDER THE STATE AID TO LOCAL GOVERNMENTS
MUNICIPAL SERVICES REVENUE SHARING PROGRAM

Municipal Services	Rates
Police Protection	$12 per capita
Military	6 per capita
Fire Protection	$7.50 per capita
Air (*)/Water (**) Pollution Control	$2 per capita
Land Use Planning	$2 per apita
Parks and Recreation	$5 per capita
Military	1.25 per capita
Transportation Facilities	$5 per capita
Military	2.50 per capita
Road Maintenance	
Public Roads	$1,500 per mile*
Ice Roads	900 per mile**
Health Services	$2 per capita
Hospitals	$75,000 per hospital*
	25,000 per hospital**
	1,000 per bed***
Health Facilities	$ 4,000 per facility*
	1,000 per bed**
Construction Aid	$ 2,500 per bed*
	5% of total project cost** (whichever is greater)

DEFINITIONS

COLA - means cost-of-living allowance used in computing total grant entitlements.

FY 80 - means the fiscal year ending June 30, 1980.

NOTE

As the total entitlements exceeded the amount appropriated to the revenue sharing account, each recipient's share was prorated at 75.1723%.

	Total for Boroughs & Unified Govt's	Total for Cities	Total for Fire Protect-ion Groups	Total FY 1980 Approved Entitlements
Police	$ 2,444,334	$ 1,379,658		$ 3,823,992

Alaska State Legislature

Senate

Committee on Community & Regional Affairs

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

March 22, 1980

TO: Representative Terry Gardiner

FROM: Senator Arliss Sturgulewski

RE: House Bill 192

Several times we have discussed HB 192, Municipal Revenue Sharing. After passage by the House, I will ask that this bill be referred to my committee. I'm enclosing a copy of a letter received from Palmer McCarter of the Department of Community and Regional Affairs. I think you will be interested in paragraphs two and three as they relate to the question of revenue sharing for hospitals. You indicated that you intended to do some work as far as your bill related to hospitals and I thought this might be useful information.

The first paragraph in the memo relates to SB 16 which increases road maintenance under the current revenue sharing program. I do not intend to move this out of committee at this time but will hold it for consideration along with House Bill 192. I would appreciate your keeping my office advised of the progress of your bill. It would be helpful for me to have a staff representative at the Finance Committee hearing on this bill.

Enclosure

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

DIVISION OF LOCAL GOVERNMENT ASSISTANCE

POUCH B
JUNEAU, ALASKA 99811

March 17, 1980

The Honorable Arliss Sturgulewski
Chairman
Senate Community & Regional Affairs
Committee
Pouch V
Juneau, Alaska 99811

RE: HB 192 AND SB 16
MUNICIPAL REVENUE SHARING

Dear Senator Sturgulewski:

Your office has inquired about the relationship of Senate Bill No. 16 to House Bill No. 192. The provisions of Senate Bill No. 16, which increases road maintenance aid under the municipal services revenue sharing program, have been incorporated into House Bill No. 192. House Bill No. 192 would repeal the existing revenue sharing program established by AS 43.18.010 and replace it with a shared revenue formula based on a municipality's tax effort compared to its taxable wealth. The non per capita categories funded under the current program, including road maintenance aid, are reinstated by House Bill No. 192. House Bill No. 192 effectively supercedes and includes Senate Bill 16.

Construction Aid is another of the non per capita categories retained by House Bill No. 192. In FY 1980, entitlements for this one category total more than $7 million. Only a few non-profit hospitals are benefiting from this category of payment, and all local governments are indirectly contributing towards the construction of these hospitals through a low proration factor. It would appear that construction aid for hospitals and health facilities should be administered by the Department of Health and Social Services, and it is suggested that the category be eliminated from House Bill No. 192.

As an alternative to elimination of construction aid from the revenue sharing reform bill, it is at least suggested that the definition of "total project cost" include only the actual cost of construction. House Bill No. 192 currently allows all project-related costs, including land and financing, which is consistent with existing law. However, it is this recently enacted statutory definition of total project cost that has caused the construction aid entitlements to skyrocket and that has resulted in hospitals being reimbursed for financing costs before these costs are even incurred. In addition, reimbursement for hospital construction under the State Revenue Sharing Program is made without regard to the financial condition of the hospital or any other criteria which considers need.

21-P3LH

The Department of Community and Regional Affairs supports the equalization of municipal tax resources through revenue sharing and the minimum entitlement proposed by House Bill No. 192.

Sincerely,

Lee McAnerney
Commissioner

CSHB 192 (Fin) am

Mr. Rogers moved and asked unanimous consent that amendment No. 2 be adopted. There being no objection, amendment No. 2 was adopted.

Mr. Brown moved and asked unanimous consent that CSHB 192(Fin)am be considered engrossed, advanced to third reading and placed on final passage. There being no objection, it was so ordered.

CSHB 192(Fin)am was read the third time.

The question being: "Shall CSHB 192(Fin)am pass the House?" The roll was taken with the following result:

CSHB 192 (Fin) am

CSHB 192(Fin)am

4/22

Yeas:	25	Anderson, Beirne, Branson, Brown, Buchholdt, Carney, Cotten, Duncan, Fuller, Gardiner, Guy, Hurlbert, McKinnon, Malone, Miles, Miller, Munson, O'Connell, Osterback, Parker, Parr, Rogers, Schaeffer, Smith, Zharoff
Nays:	9	Barnes, Bettisworth, Chatterton, Eliason, Hayes, Martin, Montgomery, Phillips, Randolph
Not voting:	6	Freeman, Halford, Haugen, Meekins, Metcalfe, Moss

And so, CSHB 192(Fin)am passed the House.

Mr. Brown moved that the effective date clause on CSHB 192(Fin)am be adopted.

The question being: "Shall the effective date clause be adopted?" The roll was taken with the following result:

CSHB 192(Fin)am eff. date

Yeas:	31	Anderson, Beirne, Branson, Brown, Buchholdt, Carney, Chatterton, Cotten, Duncan, Eliason, Fuller, Gardiner, Guy, Halford, Hayes, Hurlbert, McKinnon, Malone, Miles, Miller, Montgomery, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Rogers, Schaeffer, Smith, Zharoff
Nays:	4	Barnes, Bettisworth, Martin, Randolph
Not voting:	5	Freeman, Haugen, Meekins, Metcalfe, Moss

And so, the effective date clause was adopted.

Mr. Eliason gave notice of reconsideration of his vote on CSHB 192(Fin)am on the next legislative day.

Matanuska-Susitna Borough
Box B
Palmer, Alaska 99645

Dear Ron:

Thank you for your letter of March 3 regarding various municipal revenue sharing items. You will want to check with Senator Kerttula regarding supplementals in revenue sharing. I did want you to know that HB 192, dealing with municipal revenue sharing, is probably going to come over from the House sometime toward the end of the month. I am assuming it will be sent to the Community and Regional Affairs Committee for review. Your comments will be helpful.

As I'm sure you are aware, the State Board of Education had a committee forum that did substantial work on the foundation program for support of schools. This matter is currently before the House Finance Committee. When it comes to the Senate, it probably will be assigned as a committee referral to Senate HESS. Again, your comments will be most helpful in that consideration. Additionally, as an outgrowth of the interim local government committee, we are having an additional paper prepared which speaks to some of the areas of disincentive to formation of local governments. One of the items is the disparity that exists between REAA's receiving 100 percent of construction costs while organized governments receive only 80 percent, and that 80 percent is contingent to total dollars available. I share your concern over this inequity and would certainly assist in any effort to see this inequity corrected.

Thank you for sharing this information.

Kindest personal regards,

Arliss Sturgulewski
Senator, District 10-H

Matanuska-Susitna Borough

BOX B. PALMER, ALASKA 99645 • PHONE 745-3246

BOROUGH ASSEMBLY

March 3, 1980

Arliss Sturgulewski, Senator
State Senate
Pouch V
Juneau, AK 99811

Dear Senator Sturgulewski:

It has been called to the Matanuska-Susitna Borough Assembly's and my attention that there doesn't appear to be any legislation being proposed which will increase the funds programmed for local schools. Operational costs of schools have taken a dramatic increase in current years which is placing an even greater burden on the local government. Preliminary figures indicate that our local school budget will increase somewhat in excess of 30% for fiscal year 1981. Without corresponding increases in the foundation program, I am sure you can understand what this impact will do to the taxpayers.

We respectfully request that the Legislature investigate the possibility of equalizing the cost of education to the taxpayer in those unincorporated areas and incorporated areas. It seems extremely unjust that those areas which are attempting to help themselves, mainly the incorporated areas, should be penalized by receiving less assistance from the State coffers.

Some years ago the Legislature developed a program for State aid to assist local governments in the retirement of school construction debt. This legislation has been modified several times and we are asking that the Legislature again review the program, keeping in mind two particular items which we feel are of the greatest concern. The first item relates to the inequity of assistance between organized and unorganized areas whereby facilities are funded 100% in unorganized areas and 80% in organized areas, subject to availability of funds for the payment to organized areas. The Matanuska-Susitna Borough entitlement under the program for the fiscal year ending June 30, 1980, if paid at that level designated by legislation, would have been $2,577,515. Correspondence received from the Department of Community & Regional Affairs indicates that payment will be $2,014,439, or a shortfall of $563,076. They indicate this is the result of insufficient monies in the budget to cover those assistance payments at program level. The Borough requests that you look into a funding method which would assure ample monies will be available on an annual basis to fund the program as provided. In an effort to

assist the municipalities with their immediate needs, we would suggest that a supplemental appropriation be made to the 1980 fiscal year budget to fund the program at 100% of its designated amount.

The final item of concern in this area is in the State shared revenue for municipal services such as land use planning, parks & recreation, fire suppression and road maintenance. The Department of Community & Regional Affairs has informed the Borough that their entitlement will be $134,802 short for fiscal year 1980, again due to the fact that insufficient funds were requested in the 1980 fiscal year State budget to meet these commitments. The Borough asks that a supplemental appropriation be made to the 1980 fiscal year State budget in an amount sufficient to make the assistance payments to the municipalities at the program level.

Any financial assistance you can give us would be directly and immediately passed on to the taxpayers of the Borough in the form of lower taxation. I am sure you are all well aware of the economic and unemployment conditions in the Matanuska-Susitna Borough. Tax relief is an important and emotional issue among the residents, and the Assembly and I are doing everything we can to minimize the tax impact. Your assistance would be greatly appreciated.

Respectfully yours,

Ronald L. Larson, Mayor
Matanuska-Susitna Borough

RLL:clm

cc: Monte Hotchkiss
Matanuska-Susitna Borough School District

HB 123, Is there any one of these 1-5 that you prefer?

3/2/80

HB 192

Possible restructuring of HB 192 in order to acheive one or more of the following:

1. restructure to approach as nearly as possible a situation in which people pay the same equivilent tax rate, i.e. that reflects the true tax burden.

2. Restructure so that the formula gives more incentives for the formation of regional government in the unorganized borough.

3. Restructure the formula to include greater incentives for local assumption of service delivery.

4. Definition of "need" and how to work it into the formula

5. Greater emphasis on more state support for less wealthy areas (p. 7)

JK tells us that HB 192 can be improved by creation of incentives for the transfer of service delivery, for local government formation in the unorganized boro, by encouragement of local effort in funding basic or additional services , and to encourage efficient service delivery. It seems to me that one of the above should be selected with a view toward amending the ~~xxxxxx~~ HB 192 formula to include that element.

Revenue sharing bill clears House

4/23/80

By ROXINNE ERVASTI
The Associated Press

JUNEAU — The House gave narrow approval today to a bill increasing revenue sharing to local governments to $31 million this year.

The bill, which passed 25-9 could come up for a vote later, however, as Rep. Dick Eliason, a prime opponent, gave a "notice of reconsideration."

Eliason's main complaint was that his hometown, Sitka, would have just a slight increase in state revenue sharing compared to cities he believes are similar in population, tax base and incomes.

House Speaker Terry Gardiner, D-Ketchikan, who has pushed the bill for the past three years and calls it a "reform" of the revenue sharing proposal, said lawmakers who looked only to the figures of their areas were not looking at revenue sharing on a statewide basis.

Gardiner also said they are assuming that what their areas have received under the current formula are equitable.

The bill (CSHB192) continues the $8 million appropriation for hospital construction and special categorical grants based on miles of road in a municipality and other services.

But Gardiner said it revises the general formula for distributing money to take into account local revenue raising resources of a community and how much of an effort it makes to tap them. It would also guarantee at least $25,000 to small communities which previously received little or no revenue sharing, and would guarantee that no municipalities receive less money in the next five years thar they do now.

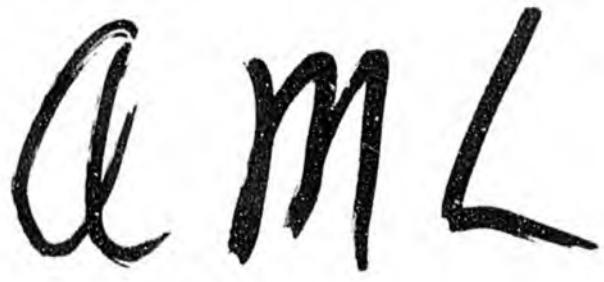
The bill must still be approved by the Senate, and some legislators who voted against it in the House said they expect changes to be made, pitching the issue into a House-Senate free conference committee.

Voting against the bill were Reps. Ramona Barnes, Bob Bettisworth, Chat Chatterton, Eliason, Joe Hayes, Terry Martin, Joe Montgomery, Randy Phillips and Dick Randolph.

Currently, the state revenue sharing formula provides about $12 million to local government and $8 million for health facilities.

With an increase to $23 million (excluding the $8 million for hospitals), Sitka would get about $255,000, or 1.12 percent of the total, compared to about $234,650 it receives now, or 1.95 percent of the total.

Meanwhile, Juneau, which gets 4.29 percent or $514,500 now, would get 6.52 percent of the total for nearly $1.5 million.



Ketchikan Gateway Borough would go from $74,306 now (a little over one-half of one percent of the total) to $283,240 or 1¼ percent of the total under the new bill.

Eliason recited some of those figures, and said "This is where I lose sense of this being equalization."

"It's patently unfair that ... we're penalizing those areas that are running good local governments and keeping down taxes," he said.

"Mr. Eliason is making the assumption that (Sitka's current share) is right and deserving," Gardiner said.

Under the revenue sharing bill, Anchorage would get about $8.2 million, an increase over nearly $5.4 million it gets now; Fairbanks North Star Borough would get nearly $1.7 million compared to about $938,000 it gets now, and Kodiak Island Borough would get nearly $161,000 compared to $52,600 now.

CATEGORY: DEVELOPMENT **AGENCY:** REVENUE

PROGRAM: COMMUNITY DEVELOPMENT **BRU (s):** SHARED TAXES

The Shared Taxes BRU assists local governments through the sharing of revenue generated from numerous state taxes.

The Shared Taxes BRU is charged with the responsibility of administering, in an accurate and timely manner, shared revenue accounts with local city and borough governments. Specified percentages of revenue generated within local municipal boundaries are returned to the local units in accordance with statutory provisions. The various shared taxes are Municipal Assistance, Aviation Fuel, Fisheries, Telephone and Electric Co-op, Liquor License, and Amusement and Gaming License. Chapter 144, SLA 1978 abolished the Gross Receipts Tax.

In FY 80, distribution of revenues and taxes amounted to $14,417,100. The Governor's budget for the FY 81 distribution for all revenues and taxes will be $16,670,000. With the exception of Municipal Assistance, the recommendation equals 100% of anticipated revenues for each tax as determined by statutory formula. The recommendation for Municipal Assistance is the same dollar amount as FY 80.

Costs associated with administration of this program are budgeted within the Administration and Support BRU, General Government Category, within the Department of Revenue.

ON
FCCS CSSB 7

Senate Bill 7 was the result of decisions made late in the 1978 legislative session. The Committee recognizes that it is not a perfect approach to revenue sharing, but there was insufficient time to address the overall question.

The intent of the revenue sharing portion of FCCS CSSB 7 is to refund approximately 150% of the revenues lost to municipalities by reason of the repeal of the Alaska Gross Business License Tax. It is the intent and purpose of the Legislature that one-third of the receipts of Sec. 43.20.016 be used to reduce property taxes in the municipalities involved, and that the additional money not be used for more services. The Committee recognizes that Sec. 43.20.016 is an imperfect vehicle to assure compliance with this intent and that some administrative problems will result from its passage. Thus AS 43.20.016 is not to be regarded as anything other than a temporary expedient, to be refined and improved by future Legislatures.

It is the sense of the Committee that the entire question of revenue sharing should be evaluated by the Eleventh Legislature and that Sec. 43.20.016 be reviewed in that context.

Respectfully submitted,

Sen. Clem Tillion, Chairman Rep. Orul Freeman, Chairman

The Secretary was requested to notify the House.

409

Mr. President:
Mr. Speaker:

The Free Conference Committee which has had SENATE BILL NO. 409 and SENATE BILL NO. 409 amended House under consideration recommends that FREE CONFERENCE COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 409 be adopted.

Senator Members: Senator Rodey, Chairman, and Senators Croft and Sackett. House members: Representative Gruening, Chairman, and Representatives Duncan and Carpenter.

RE: Effect of Inflation on Revenue Sharing Entitlements
Research Request No. 94

You have asked that we determine what the total revenue sharing entitlement would be if the entitlement rates for the various categories had kept pace with inflation over the years. Based on the inflation figures provided by Ginny Chitwood of the Alaska Municipal League, the current entitlement would be $38,891,494 when adjusted for inflation. This figure compares to the entitlement under present law of $27,031,915. The inflation-adjusted entitlement would be about 44 percent higher than the current entitlement.

One major point must be made regarding the above analysis. I did not inflate the current hospital construction aid entitlements, because these entitlements are administered on a percentage of total costs basis, and have therefore increased with inflation as total construction costs have risen. Current law provides that construction aid be granted at the rate of $2,500 per bed or 5% of the total project costs; however, all of the entitlements under this category have been made on the percentage basis. It is therefore not appropriate to inflate the entitlement amount for this category.

Please contact us if we may be of further assistance. It should be noted that with our present workload, we ordinarily could not have met your request as soon as we did, but the simplicity of the analysis allowed an exception to be made in this case. We have hired additional temporary staff, and our workload and response time should improve soon.

MEMORANDUM

February 25, 1980

TO: Representative Terry Gardiner

FROM: Jack Kreinheder, Issues Analyst

RE: HB 192 - Computer Runs Excluding Hospital and Health Entitlements
Research Request No. 64

As you requested, I have produced five alternative entitlement breakdowns for HB 192, all of which exclude the revenue sharing entitlements for hospital and health facility operation, hospital construction, and health power grants. A chart summarizing the results is attached, as are the more detailed computer printouts on which the chart is based. The total current entitlement under present statutes for these categories, including the cost of living allowance and the partial funding proration factor, is $8,259,162. I have subtracted this value from the original HB 192 total entitlement of $27,000,000 to arrive at a base or midpoint value for comparative purposes of $18,740,838.

Four other runs were made on the low side and the high side of this midpoint value using $2 million increments, as you requested. These entitlement values were $14,740,838, $16,740,838, $20,740,838, and $22,740,838, respectively.

I'm sorry for the delay in providing these runs, but the updating process required considerably more time than I expected. The model is now updated and complete.

Please let me know if you have any questions or would like additional runs. As you know, the Agency has a very full workload at the present time, but we will do what we can to provide any further research or computer work on HB 192 as quickly as possible.

Back up figures on Corporate Income Tax municipal assistance

In FY 79, each municipality received 60% of the money collected for calendar year '78 gross business license receipts tax - the last year that tax was in effect.

The original estimate was 12 million, but the shared amount ended up being $13,349,900. It was automatically 60% of the actual receipts and not subject to budget estimates and legislative appropriation. That 12 million estimate is apparently what was used in preparing the FY 80 budget.

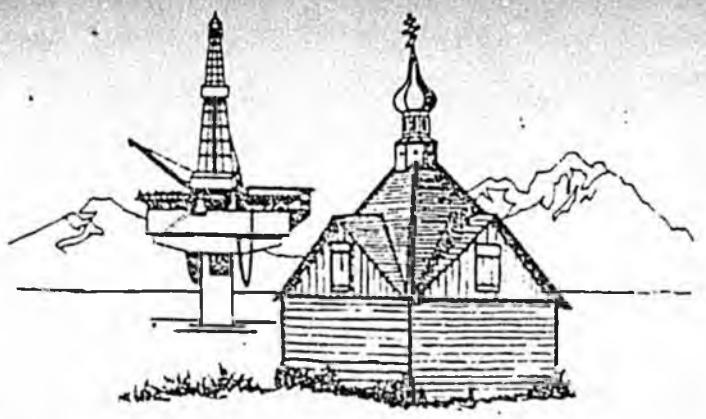
According to the law and the footnotes in the statute supplements, the amount shared in FY 80 should have been an amount equal to or greater than 10% of the 1979 receipts, estimated at $257,400,000. Only 11.4 million was appropriated and only 11.4 million is in the FY 81 executive budget. The State estimates revenues from corporate and petroleum income taxes at $417 million for FY 80 and at $586 million for FY 81.

Amount shared with municipalities:

FY 79 actual: $13,349,900

FY 80 actual: $11,400,000

FY 81 budget: $11,400,000



for the filing of the individual income tax return.

* Sec. 2. AS 43.20 is amended by adding a new section to read: 1/1/79

Sec. 43.20.016. SHARING OF CORPORATE INCOME TAX REVENUE WITH MUNICIPALITIES. (a) There is established within the Department of Revenue the municipal assistance fund. The legislature may appropriate to the fund during each fiscal year an amount equal to or greater than 10 per cent of the income tax revenue received by the state under sec. 11(e) of this chapter and ch. 21 of this title for the previous fiscal year. The Department of Revenue shall distribute money from the fund to each organized borough and each city of any class on an annual basis as provided in (b) and (c) of this section.

(b) The base amount to be distributed from the fund to each borough and city for the fiscal year shall be the amount received by the borough or city during fiscal year 1978 under AS 43.70.080; however, if the amount appropriated to the fund by the legislature under (a) of this section is insufficient for distribution of the full base amount, the Department of Revenue shall prorate the amount available for distribution on the basis of amounts received during fiscal year 1978 under AS 43.70.080. A city incorporated within an organized borough after June 30, 1977 shall receive as a base amount a share of the amount distributed to the borough in which it is located based on the ratio of population in the city to the total population in the borough. A city incorporated outside an organized borough after June 30, 1977 shall receive as a base amount the amount received by the city in the state most closely approximating it in population at the time of its incorporation. A borough incorporated after June 30, 1977 shall receive as a base amount the amount received by the borough in the state most closely approximating it in population at the time of its incorporation.

part (c) says this is additional money, to be distributed on the basis of population.

March 7, 1980

Honorable Russ Meekins
Chairman, House Finance Committee
Pouch V
Juneau, AK 99811

Dear Representative Meekins:

The Legislature has an opportunity to correct an inequity in funding of the Municipal Assistance Fund and by so doing accomplish several other worthwhile goals expressed by the Legislature and the Administration.

A brief review of the history of the Municipal Assistance Fund will point up the inequity that has arisen. The municipalities, organized boroughs and cities, automatically received 60% of the gross business tax up to fiscal year 1979, the last year the tax was in effect. in degree of certitude of revenue, this was a most reliable income source. The State Legislature offered as a substitute for this income source, the Municipal Assistance Fund providing for distribution to municipalities of 10% of more of the corporate income taxes paid to the State. The municipalities, by accepting this substitute income source, went "at risk" in two ways. First, like the State they gave up the more reliable tax source, gross business receipts as compared to the uncertaintity of net income. Second, 60% of the gross business tax receipts was automatically distributed compared to annual legislative appropriating action. The State is at risk where it depends upon net income and the municipalities now are joined with the State. We are all aware of the State winning on their risk taking as corporate net income revenues have increase, the inequity is that so far the State Legislature has not seen fit to honor their commitment and pass on the 10% to the municipalities who shared the risk. We seek your aid in correcting this inequity. At the conclusion of this letter are the dollar amounts involved.

Further in your consideration is the achievement of other goals spoken of by Legislative members and Administration. Funds received by municipalities from this source will: lower real property mill rate or reduce the size of increase and will be visible to the citizens of the municipalities. In addition, fund distribution of this type puts the discretion of spending such funds at the most

ALASKA MUNICIPAL LEAGUE
LEGISLATIVE COMMITTEE MEETING
December 14, 1979

The meeting was called to order by Chairman Ron Larson at 9:30 am on December 14, 1979 in the assembly chambers of the City and Borough of Juneau. The following committee members were present: Ron Larson, Lee Sharp, Gene Moore, Lyman Hoffman, Marilyn Dimmick, Dan Keck, Mike Ribar, Allen Cronk, Ben Delahay, Mike Mikell, Bill Curtis, Bill Walker, Earl Richards, Barbara Shaffer, and Judi Slajer; staff: Ginny Chitwood.

Chitwood distributed information on the status of League sponsored bills, a list of League membership, and a list of the legislative committee members, board members and staff.

Agenda action list - from 1980 policy statement:

Public Employee Retirement (page 3, I-G,2) - Larson said he is working with Paul Arnoldt, Director of the State Division of Retirement and Benefits, and will have more to report at the next meeting.

Bill to Split out Hospital Funding from Revenue Sharing to Health and Social Services (Page 3, I-I (eye),2) - There was discussion on whether H&SS currently has the administrative structure to handle the program or whether there will have to be a new office set up. Curtis said that the same person who certifies the hospital and the number of beds for the present revenue sharing program should be able to handle the proposed program. Mikell said he would talk to Senator Glenn Hackney about legislation.

Senior Citizen Exemptions (page 4, I-L,4) - Dimmick reported that the Kenai Peninsula Borough unanimously passed a resolution endorsing exemption of the whole parcel owned and lived on by a senior citizen. Sharp distributed three alternatives. After striking the word "smallest" in alternate "B", the committee voted to endorse that version, (see attached). It was suggested that the pending ombudsman investigation be checked before seeking to have legislation introduced.

HB 66 Corrections - Sharp distributed a draft bill, labelled "D". He suggested the legislative committee support the concept of the bill and work to have it incorporated in the House Resources Committee bill, rather than have it introduced as League sponsored legislation.

The necessity for clarification of overriding state interest taking precedence over local selections was discussed. Cronk said he would prepare legislation inplementing the League's resolution dealing with land selection and grant regulations. Cronk distributed "land selection report". The committee adopted enclosures # 1, 3, 4 & 5, and adopted an amended version of Sharp's "D" instead of enclosure # 2, (see attached).

Land Selection - Mental Health Lands (Page 7, IV-B,2) - Cronk distributed draft "E", which includes two pages of definitions. The committee deferred action on the proposal. Sharp volunteered to revise the wording, (see attached).

Mineral Policy (page 16, IX-A,5) - Jim Nordale sent a draft labelled "F". After amending it slightly, the committee adopted draft "F", (see attached).

Controlled Livestock Districts (page 8, IV-8,1) - Nordale sent draft "G" which was adopted by the committee.

Extraterritorial Jurisdiction in Coastal Management Districts (page 8, IV-E,2) - Slajer distributed draft "H", which was adopted by the committee. It was noted that this proposal should be considered only a first step, not the complete answer to the problem addressed in the policy statement. Extraterritorial control is needed in addition to input to plan formation.

Majority Elections (page 12, VII-A,1) - Two bills, SB 126 and HB 341, have been introduced, both of which clarify the 40% plurality and contain a provision to opt out of the 40% rule.

Solid Waste (page 12, VI-D,1) - Perry Lovett sent draft "I" which was adopted by the committee in an amended version, (see attached). The committee voted to recommend to the board a new policy on resource recovery. The proposal to make grants or low interest loans for capital improvements available to private utilities was tabled until June.

Social Security Participation (page 15, VIII-E,2) - Staff was instructed to prepare a draft to implement this section.

Loans for Water and Sewer Projects and Title 29 Revisions (agenda items # 12 and # 13) These items were deferred until the next meeting.

Boat Tax - nothing new to report.

Assembly Apportionment and Reapportionment - Slajer distributed a draft bill. It was decided to defer action to allow time for review. Staff was directed to send copies of the draft bill and current law to municipal elected officials, administrators, clerks, attorneys and to AML board and legislative committee members. Larson will conduct a hearing on Friday, January 25, in the annex of the City and Borough of Juneau assembly chambers. Following the hearing, a draft bill and provisions will be presented to the board.

Legislative Priorities - The legislative committee recommended the following priorities to the board.

1. Assembly apportionment and reapportionment

2. Revisions to HB 66 (Chapter 85, SLA 79)
   a. state disposal
   b. subdivision override

3. Revenue sharing
   a. transfer hospital funding to H&SS, with no decrease in revenue sharing
   b. increase funding level by 300%
   c. revisions to formula should reflect philosophy of helping those who help themselves

4. Economic development, especially sections 2 & 4 of Part X

5. New foundation formula for education

6. Tax credits
   a. energy
   b. local support to school operations & capital projects

7. Front end funding for school capital projects

8. Grants and long term, low interest loans for construction of power and water projects

9. State funding for cultural and civic centers

10. Mineral policy

4/2/80

Dear Carlin

Re: School Construction Payments

I believe Pat Carney's bill, HB 638, with a few modifications, can solve the reimbursement delay problem. I would suggest a compromise between the two year delay in present law and the immediate payment, calling for a one year delay to allow the Department of Education time to review audits + to have some proof that payments were made + made for approved projects. (I talked to Norm Tenesque about this + he has no problem - in fact he suggested waiting until after the audit.)

This bill, however, will not solve any problems unless the legislature is willing to fully fund it. As a first step most municipalities would like to see current law funded at its authorized level. In FY 79 the appropriation was 5.6 million less than

entitlement; in FY 80, 6.7 million less; and proposed in FY 81, 5.2 million less.

Needless to say, AMC supports both full funding + shortening the delay -- reimbursement.

Thanks for your help,

Tommy

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF REVENUE

(907) 465-2300

OFFICE OF THE COMMISSIONER

POUCH S – JUNEAU 99811

April 9, 1980

The Honorable Senator Sturgulewski
Chairman
Senate Community & Regional
Affairs Committee
Alaska State Legislature
Juneau, Alaska 99811

Dear Senator Sturgulewski:

I am enclosing a memo from Phil Wall, Director of Administrative Services, explaining how the entitlement for Municipal Assistance is arrived at. The Governor's budget request for FY 1981 is $11,400,000 and so Anchorage's entitlement would again be $4,918,924, plus a portion of the $828,470 over the base amount of $10,571,530.

The projections below are combined estimate totals for the petroleum and corporate income taxes for FY 1981 through 1985 in millions of dollars:

FY 81	FY 82	FY 83	FY 84	FY 85
586	955	1,110	1,267	1,334

AS 43.20.016 states that the Legislature may appropriate 10% of the petroleum & corporate income tax collected, or more, to the Municipal Assistance Fund. If 10% were appropriated, based on the above revenue projections, the amounts in the fund would be (in millions of dollars):

FY 81	FY 82	FY 83	FY 84	FY 85
58	95	111	127	133

Because of the constitutional problem of dedication of funds, AS 43.20.016 only suggests that the Legislature may use a 10% formula for appropriating money to the Municipal Assistance Fund. AS 43.20.016(b) and (c) spell out how amounts more or less than the suggested 10% formula are to be distributed. Policy and budget considerations by the Administration and the Legislature have determined the amount actually appropriated to the fund in recent years.

Using the suggested 10% formula Anchorage's entitlement would be the base amount of $4,918,924 and then the excess would be shared by using the per capita rules contained in AS 43.20.016(c). The entitlement utilizing this formula for FY 81 through FY 85 would be (in millions of dollars):

FY 81	FY 82	FY 83	FY 84	FY 85
26	42	49	57	59

If you have any further questions please do not hesitate to call.

Sincerely,

Denna L. Cline

MEMORANDUM

RECEIVED
APR 2 1980
OFFICE OF THE COMMISSIONER

TO: Joseph K. Donohue
Deputy Commissioner

DATE: April 2, 1980

FILE NO:

TELEPHONE NO. 465-2313

FROM: Phil A. Wall, Director
Administrative Services Division

SUBJECT: Municipal Assistance Sharing

The old Alaska Business License sharing ended on December 31, 1979. The first Municipal Assistance sharing for fiscal year 1980 occurred in March, 1980 under AS 43.20.016. This new sharing program established the base amount to be shared as the actual amount shared to each municipality in fiscal year 1978. The actual fiscal year 1978 amounts were:

Anchorage Municipality	Statewide
$4,918,924	$10,571,530

The law also allows for the distribution of an appropriation which is larger or smaller than the $10,571,530 base amount. For fiscal year 1978 an amount of $11,400,000 (or $828,470 more than the base amount) was appropriated. Some adjustment to the base amount may occur as a result of our request for opinion, but, most of the excess will be shared to municipalities under the per capita rules contained in AS 43.20.016 (c).

The fiscal year 1981 Municipal Assistance Fund appropriation request is again $11,400,000. This is the amount approved by the Governor.

204 N. FRANKLIN ST.
JUNEAU, ALASKA 99801

March 19, 1980

The Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

I am writing concerning municipal assistance from general and petroleum corporate income tax receipts.

In the process of repealing the gross business license tax, the Legislature eliminated a source of income for municipalities - 60% of the gross business license fees collected within a municipality. To compensate for this loss of revenue, the Legislature established the Municipal Assistance Fund. According to AS 44.20.016, "the Legislature may appropriate to the fund during each fiscal year an amount equal to or greater than 10% of the income tax revenue received by the state under sec. 11(e) of this chapter and chapter 21 of this title for the previous year." Chapters 20 and 21 pertain to corporate and petroleum income taxes.

According to the letter of intent that accompanied the repeal of the gross business license tax, municipalities were to benefit from the change. In actuality, however, municipalities have lost considerably.

For FY '79, the last year operating under shares of the gross business license tax, municipalities received $13,349,900. For FY '80, the Legislature appropriated only $11,400,000 and the amount in the Governor's proposed FY '81 budget remains at that same level even though the revenues generated by general and petroleum corporate income taxes were $257,400,000 in FY '79 and are estimated at $417,000,000 for FY '80.

The Alaska Municipal League urges the Legislature to appropriate monies to the municipal assistance fund as currently authorized by law.

Sincerely,

Dave Walsh
President

Cross reference. — As to taxpayer remedies, see AS 43.05.240.

Effect of amendment. — The 1976 amendment repealed subsections (b), (c) and (d), which provided for a hearing where agreement could not be reached with taxpayer as to the amount of the license tax, which provided that a person aggrieved by an action of the department could apply in writing giving notice of the grievance and requesting a hearing, and providing for disposition of excess amounts paid, respectively.

Subsection (b) extends no rights beyond statute of limitations. — It is doubtful that subsection (b) of this section would extend any rights to the taxpayer beyond the time specified in the applicable statute of limitations. Ketchikan Spruce Mills v. Dewey, 17 Alaska 336 (1957).

But it does allow raising of question of overpayment after return approved. — Subsection (b) of this section seems to indicate an intention to allow the taxpayer to raise the question of an overpayment of taxes even after the return has been approved by the department under subsection (a). Ketchikan Spruce Mills v. Dewey, 17 Alaska 336 (1957).

Taxes voluntarily paid under a mistake of law cannot be recovered. Ketchikan Spruce Mills v. Dewey, 17 Alaska 336 (1957).

But the legislature may enact additional remedies for the recovery of illegal or excessive taxes. Ketchikan Spruce Mills v. Dewey, 17 Alaska 336 (1957).

And subsection (c) of this section creates such an additional remedy. — Ketchikan Spruce Mills v. Dewey, 17 Alaska 336 (1957).

Voluntary payment or payment under mistake of law not a defense in action for partial refund. — In the light of subsection (c) of this section, proof that the payment was made voluntarily or under a mistake of law is no defense in an action for partial refund of taxes. Ketchikan Spruce Mills v. Dewey, 17 Alaska 336 (1957).

Refund due on showing of payment in excess of amount due. — Under this section a taxpayer is entitled to a refund upon the bare showing that he paid an amount in excess of the tax which was due. Ketchikan Spruce Mills v. Dewey, 17 Alaska 336 (1957).

And there is no requirement that the tax be paid under protest. Ketchikan Spruce Mills v. Dewey, 17 Alaska 336 (1957).

Or that showing of duress must be made. — Ketchikan Spruce Mills v. Dewey, 17 Alaska 356 (1957).

Running of interest against sovereign. — Equitable motives have led the majority of courts to recognize tax refunds as an exception to the general rule that interest does not run against a sovereign in the absence of an express statute creating such liability. Ketchikan Spruce Mills v. Dewey, 17 Alaska 336 (1957).

Costs against sovereign. — But costs may not be assessed against a sovereign without statutory authority therefor. Ketchikan Spruce Mills v. Dewey, 17 Alaska 336 (1957).

Sec. 43.70.050. Appeals.
Repealed by § 3 ch 166 SLA 1976.

Cross reference. — For present provisions covering the subject matter of the repealed section, see AS 43.05.240.

Editor's note. — The repealed section derived from § 7, ch. 43, SLA 1949.

Sec. 43.70.060. Civil penalty. (a) Repealed by § 3 ch 166 SLA 1976.

(b) If a person fails to apply for a license at the required time or makes, wilfully or otherwise, an erroneous or fraudulent return, the department shall assess the fee from any information it can obtain. This assessment is prima facie good and sufficient for all legal purposes under this chapter. (§ 8 ch 43 SLA 1949; am § 2 ch 128 SLA 1955; am § 6 ch 58 SLA 1971; am § 3 ch 166 SLA 1976)

Cross reference. — For civil penalty imposed for failure to file a return or report, or pay the full amount of a tax, or a portion or a deficiency of the tax, see AS 43.05.220.

Effect of amendment. — The 1976 amendment repealed subsection (a), which provided for an additional amount to be added to the fee for failure to file a business license return or pay the fee, as finally determined by the department, due to wilful neglect.

Section merely regulatory. — See same catchline in note to AS 43.10.160.

And severable from other revenue provisions. — See State v. Baker, Sup. Ct. Op. No. 227 (File No. 428), 393 P.2d 893 (1964), citing Alaska v. Baker, 64 Wash. 2d 207, 390 P.2d 1009 (1964).

It is designed to persuade taxpayer to comply with chapter. State v. Baker, Sup. Ct. Op. No. 227 (File No. 428), 393 P.2d 893 (1964).

Sec. 43.70.070. Security. (a) Repealed by § 4 ch 94 SLA 1976.

(b) A nonresident person who starts to perform a construction contract or subcontract or other line of business in the state and is not known by the department to be the holder of adequate property in the state to secure collection of the license money which will probably accrue under this chapter by virtue of the business shall, in or with his application, state under oath the extent of lienable real and personal property against which the tax may be collected, and other information with respect to description, location and value of the property which the department prescribes. If the value of the property is not equal to three times the amount of the tax for which the applicant will probably be liable to the state, the department shall not issue the license until the applicant files with him a surety bond approved by the attorney general in a penal sum equal to twice the probable amount of the tax for which the applicant will be liable, conditioned upon payment of the tax in full when due, and with interest if not paid before delinquency. The department may waive the bond requirement if the applicant posts other security in the form of collateral acceptable to the department. (§ 9 ch 43 SLA 1949; am § 4 ch 94 SLA 1976)

Effect of amendment. — The 1976 amendment repealed subsection (a), which made the amount of the fee, interest charge, and penalty imposed under this chapter a lien in favor of the state and provided generally for such lien.

Section merely regulatory. — See same catchline in note to AS 43.10.160.

And severable from other revenue provisions. — See State v. Baker, Sup. Ct. Op. No. 227 (File No. 428), 393 P.2d 893 (1964), citing Alaska v. Baker, 64 Wash. 2d 207, 390 P.2d 1009 (1964).

Sec. 43.70.080. Disposal of money. All money collected by the department under this chapter shall be deposited in the general fund. The Department of Revenue shall refund to each organized borough and each city of any class 60 per cent of the money collected in the local government. (§ 11 ch 43 SLA 1949; am § 4 ch 155 SLA 1962; am § 74 ch 69 SLA 1970)

Legislative committee report. — For report on ch. 69, SLA 1970 (HB 564), see 1970 House Journal Supplement No. 2, p. 7.

Validity of refunds to incorporated cities — See 1960 Op. Att'y Gen., No. 5.

Sec. 43.70.090. Regulations. The department may adopt regulations necessary to determine and collect the fees imposed and to enforce this chapter. (§ 12 ch 43 SLA 1949)

Sec. 43.70.100. Penal provisions. (a) It is unlawful for a person to (1) wilfully evade a tax under this chapter; (2) fail to make a return or keep or produce a record required under § 30 of this chapter; (3) make a false or fraudulent return or false statement with intent to defraud the state or evade payment of the tax; or (4) aid or abet another in an attempt to evade payment of the tax.

(b) It is unlawful for an executive officer or agent of a corporation or agent of a person to make or permit to be made for his principal a false return or false statement in answer to an inquiry from the department with the intent to evade the payment of the tax under this chapter.

(c) A person who violates this section is guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both.

(d) In a prosecution under this chapter, no person otherwise competent as a witness is privileged from testifying on the ground that his testimony may incriminate him. However, no indictment or prosecution shall afterwards be brought against the witness on account of an offense or transaction concerning which he testifies as a witness. In a prosecution under this chapter, the attorney general may, with the consent of the department, compromise the case by accepting from the defendant a sum not less than the tax, interest on the tax, and all costs and expenses. (§ 10 ch 43 SLA 1949)

Exclusiveness of remedy. — Where a statute provides for the payment of a license fee as the condition of doing any specified business, and also provides that a violator of the act shall, upon conviction, be punished by fine or imprisonment, the remedy by prosecution and punishment so prescribed by the statute is exclusive, unless there is some special provision of law which permits the prosecution of a civil action to recover the license fee. United States v. Jourden, 193 F. 986 (9th Cir. 1912).

Sec. 43.70.110. Definitions. In this chapter, unless the context otherwise requires, the following words have the meanings indicated.

(1) "Business" includes all activities or acts, personal, professional, or corporate, engaged in or caused to be engaged in, or following or engaging in a trade, profession, or business, including receipts from advertising services, rental of personal or real property, construction, processing, or manufacturing, but excluding fisheries businesses, fishermen, liquor licenses, insurance businesses, mining, and coin-operated amusement and gaming machines, calling or vocation, with the object of financial or pecuniary gain, profit or benefit, either direct or indirect, and not exempting subactivities producing marketable

(3) for the third year beginning after December 31, 1977 that a taxpayer files an income tax return and each tax year thereafter — $300.

(c) For part-year residents and nonresident individual taxpayers the credit provided in this section shall be prorated according to the number of months of residency in the state.

(d) The space for claiming the individual income tax credit shall be given a prominent location on the form furnished by the department for the filing of the individual income tax return. (§ 1 ch 144 SLA 1978)

Effective date. — Section 8, ch. 144, SLA 1978, makes this section effective July 9, 1978, in accordance with AS 01.10.070(c). Section 7 of that chapter makes this section retroactive to January 1, 1978.

Sec. 43.20.016. Sharing of corporate income tax revenue with municipalities. (a) There is established within the Department of Revenue the municipal assistance fund. The legislature may appropriate to the fund during each fiscal year an amount equal to or greater than 10 per cent of the income tax revenue received by the state under § 11(e) of this chapter and ch. 21 of this title for the previous fiscal year. The Department of Revenue shall distribute money from the fund to each organized borough and each city of any class on an annual basis as provided in (b) and (c) of this section.

(b) The base amount to be distributed from the fund to each borough and city for the fiscal year shall be the amount received by the borough or city during fiscal year 1978 under AS 43.70.080; however, if the amount appropriated to the fund by the legislature under (a) of this section is insufficient for distribution of the full base amount, the Department of Revenue shall prorate the amount available for distribution on the basis of amounts received during fiscal year 1978 under AS 43.70.080. A city incorporated within an organized borough after June 30, 1977 shall receive as a base amount a share of the amount distributed to the borough in which it is located based on the ratio of population in the city to the total population in the borough. A city incorporated outside an organized borough after June 30, 1977 shall receive as a base amount the amount received by the city in the state most closely approximating it in population at the time of its incorporation. A borough incorporated after June 30, 1977 shall receive as a base amount the amount received by the borough in the state most closely approximating it in population at the time of its incorporation.

(c) If the amount in the fund at the time of distribution exceeds the base amount to be distributed under (b) of this section, the excess amount shall be distributed to each borough and city on the basis of population. For the purpose of this subsection, the population of a city within an organized borough shall be deducted from the population of the borough. Population, for the purpose of this section, shall be as certified by the commissioner of community and regional affairs.

(d) The intent of (c) of this section is that local governments which levy property taxes reduce those levies in reasonable proportion to the amount of increased state aid received by a local government. The governing body of each local government shall furnish a notice with the tax statement describing its use of this increased state aid. (§ 2 ch 144 SLA 1978)

Effective date. — Section 8, ch. 144, SLA 1978, makes this section effective January 1, 1979.

Editor's note. — Section 6, ch. 144, SLA 1978, effective January 1, 1979, provides: "TRANSITIONAL RULES FOR REVENUE SHARING UNDER THIS ACT. The revenue raised under AS 43.70 which relates to the 1978 calendar year (including the $25 license fee due March 1, 1978 and the fees on the total gross receipts for 1978 which accompany returns filed in 1979 under AS 43.70.030(d)) is the source of revenue to be shared in 1979 in accordance with AS 43.70.080. The increase in the corporate income tax which goes into effect in 1979 is the source of revenue to be shared with the municipalities under AS 43.20.016 in 1980 and subsequent years. This Act does not entitle any organized borough or any city of any class to revenue under both AS 43.70.080 and AS 43.20.016, for the same period of time."

Sec. 43.20.030. Returns and payment of taxes.

Subsection (d) of this section creates a duty to speak when it requires a notice of modification of a taxpayer's federal income tax return. Stevenson v. Burgess, Sup. Ct. Op. No. 1514 (File No. 2791), 570 P.2d 728 (1977).

Taxpayers estopped from asserting statute of limitations due to failure to notify regarding modification of federal tax liability. — The failure of certain taxpayers to notify the department of the modification in their federal income tax liability for two years constitutes a breach of the duty to give notice of modification pursuant to this section and amounts to the concealment of a material fact. Where the state, to its detriment, relying on that lack of notice, as it reasonably could, failed to institute the statutory mechanism for collection of additional taxes, the taxpayers are estopped from asserting the protection of the statute of limitations embodied in AS 43.20.200(b). Stevenson v. Burgess, Sup. Ct. Op. No. 1514 (File No. 2791), 570 P.2d 728 (1977).

Sec. 43.20.031. Taxable income of residents; deductions; exemptions. (a) The taxable income of a resident of the state is his entire taxable income as defined in § 63 of the Internal Revenue Code with the following modifications:

(1) a taxpayer whose income includes a cost-of-living allowance which is exempt from federal income tax shall determine and include that amount as part of his income as if the cost-of-living allowance were not exempt;

(2) the benefits allowed to taxpayers under Internal Revenue Code §§ 1301 — 1307, as amended, are allowed only to taxpayers who have been residents of the state for the full base period as well as for the computation year as defined in these sections; the commissioner shall adopt regulations governing benefits under these sections of federal law allowable to spouses eligible to file a joint Alaska return for the computation year when one spouse has not been a resident of Alaska for the full base period;

Sec. 43.56.030. In place of other taxes.

Municipal taxation of AS 43.56 property may only occur as authorized under AS 29.53.045. North Slope Borough v. Sohio Petroleum Corp., Sup. Ct. Op. No. 1750 (File Nos. 3460, 3513, 3659), 585 P.2d 534 (1978).

And all of it is entitled to a state tax credit. North Slope Borough v. Sohio Petroleum Corp., Sup. Ct. Op. No. 1750 (File Nos. 3460, 3513, 3659), 585 P.2d 534 (1978).

Regulation denying credit held invalid. — An emergency regulation which denied a credit against the tax levied by the state under AS 43.56.010(a) for property taxes collected by municipalities in excess of the limitations set forth in AS 29.53.045 and 29.53.050(b) was invalid since AS 43.56.010(d) mandates that all taxes paid under AS 29.53.045 are to be credited against the levy of AS 43.56.010(a). North Slope Borough v. Sohio Petroleum Corp., Sup. Ct. Op. No. 1750 (File Nos. 3460, 3513, 3659), 585 P.2d 534 (1978).

Cited in Liberati v. Bristol Bay Borough, Sup. Ct. Op. No. 1735 (File No. 3365), 584 P.2d 1115 (1978).

Chapter 70. Alaska Business License Act.

Section	Section
10. [Repealed]	70. [Repealed]
30. Levy and computation of license fee	80. Disposal of money

---

State license tax on salmon canneries with its revenue sharing provision is not different in kind from general gross receipts tax of Alaska Business License Act. — See Liberati v. Bristol Bay Borough, Sup. Ct. Op. No. 1735 (File No. 3365), 585 P.2d 878 (1978).

Sec. 43.70.010. Exemptions.

Repealed by § 5 ch 144 SLA 1978, effective January 1, 1979.

Editor's note. — The repealed section derived from § 3, ch. 43, SLA 1949; § 2, ch. 172, SLA 1957; § 1, ch. 152, SLA 1962.

Section 6, ch. 144, SLA 1978, effective January 1, 1979, provides: "TRANSITIONAL RULES FOR REVENUE SHARING UNDER THIS ACT. The revenue raised under AS 43.70 which relates to the 1978 calendar year (including the $25 license fee due March 1, 1978 and the fees on the total gross receipts for 1978 which accompany returns filed in 1979 under AS 43.70.030(d)) is the source of revenue to be shared in 1979 in accordance with AS 43.70.080. The increase in the corporate income tax which goes into effect in 1979 is the source of revenue to be shared with the municipalities under AS 43.20.016 in 1980 and subsequent years. This Act does not entitle any organized borough or any city of any class to revenue under both AS 43.70.080 and AS 43.20.016, for the same period of time."

Sec. 43.70.030. Levy and computation of license fee. (a) The license fee for each business is $25.

(b) The license fee for each national bank and state bank, trust company and savings and loan association is seven per cent of its net income. Net income means the taxable income of each taxpayer before net operating loss deduction and special deductions, computed as required under the Internal Revenue Code of the United States and

includes all other income including income from federal, state or municipal obligations. Each of these taxpayers required to make a return under the provisions of the Internal Revenue Code shall at the same time file with the department a return setting out the amount of tax due under this chapter, and other information for the purpose of carrying out the provisions of this chapter which the department requires. Each of these taxpayers shall also at the same time file a true and correct copy of the tax return which he has filed with the Internal Revenue Service. A taxpayer filing under this subsection shall use the same tax year as the taxpayer uses for federal income tax purposes. Any approved extension of time to file the taxpayer's federal income tax return automatically extends the time for filing under this chapter. Any agreement which a taxpayer enters into with the Internal Revenue Service which extends the statute of limitations for any federal income tax return will apply to returns filed under this chapter. The department may, in its discretion, grant an extension of time to file or an extension of the statute of limitations independent of federal action. Every taxpayer shall notify the department in writing, within 90 days, of any alteration in, or modification of his federal income tax return and of a recomputation of tax or determination of deficiency. For purposes of applying the statute of limitations, this notification constitutes a separate return, and failure to file this notification will have the same effect as the failure to file a return under this title.

(c) The license for the privilege of taking orders through use of catalogs and by mail order offices in the state is the same as set out in this chapter for business generally.

(d) The fee of $25 applies to all of the provisions of this section, and shall accompany the application. The balance is due and payable on the last day of the taxpayer's tax year and shall be paid before the 15th day of the third month following the end of the tax year, except that the time for filing the return may be extended as provided in (b) of this section. To enable accurate determination of the balance of the tax due at the end of each year, each person to whom this chapter applies shall keep records, give statements under oath, and make returns which the department requires. Returns are made under penalty of perjury. (§ 5 ch 43 SLA 1949; am § 1 ch 128 SLA 1955; am § 1 ch 101 SLA 1960; am § 1 ch 68 SLA 1973; am § 1 ch 50 SLA 1975; am § 3 ch 144 SLA 1978)

Effect of amendments.

The 1978 amendment, effective January 1, 1979, in subsection (a) deleted "plus a sum equal to one-half of one per cent of the gross receipts in excess of $20,000 from the business during the year for which the license is issued, except that all gross volume in excess of $10,000 a year is taxed at the rate of one-quarter of one per cent" from the end of the first sentence of the subsection and deleted the former second sentence of that subsection, which read "The annual license fee paid by a professional person to his professional board shall be credited against the initial fee required under this chapter." In subsection (b), the amendment added the present fifth through eighth and tenth sentences and inserted "within 90 days" in the present ninth sentence. In subsection (c), the amendment deleted "and gross volume of business of those offices includes

all orders taken at them whether delivery of the merchandise is made through the offices or not" from the end of the subsection. In subsection (d), the amendment deleted "initial" preceding "fee" in the first sentence, and in the second sentence, substituted "the last day of the taxpayer's tax year" for "December 31st of each year," "15th day of the third month following the end of the tax year" for "first day of March following," and the language beginning "time for filing" for "department may extend the time until the 30th of the following April upon application showing that the extension is necessary to enable the applicant to ascertain the amount of license money due."

Section 6, ch. 144, SLA 1978, effective January 1, 1979, provides: "TRANSITIONAL RULES FOR REVENUE SHARING UNDER THIS ACT. The revenue raised under AS 43.70 which relates to the 1978 calendar year (including the $25 license fee due March 1, 1978 and the fees on the total gross receipts for 1978 which accompany returns filed in 1979 under AS 43.70.030(d)) is the source of revenue to be shared in 1979 in accordance with AS 43.70.080. The increase in the corporate income tax which goes into effect in 1979 is the source of revenue to be shared with the municipalities under AS 43.20.016 in 1980 and subsequent years. This Act does not entitle any organized borough or any city of any class to revenue under both AS 43.70.080 and AS 43.20.016, for the same period of time."

Sec. 43.70.070. Security.

Repealed by § 4, ch 94, SLA 1976; § 5, ch 144, SLA 1978, effective January 1, 1979.

Editor's note. — The repealed section derived from § 9, ch. 43, SLA 1949. Subsection (a) was repealed by § 4, ch. 94, SLA 1976, and subsection (b) was repealed by § 5, ch. 144, SLA 1978.

Sec. 43.70.080. Disposal of money [Effective January 1, 1980]. All money collected by the department under this chapter shall be deposited in the general fund. (§ 11 ch 43 SLA 1949; am § 4 ch 155 SLA 1962; am § 74 ch 69 SLA 1970; am § 4 ch 144 SLA 1978)

Effect of amendment. — The 1978 amendment, effective January 1, 1980, deleted the former second sentence, which read "The Department of Revenue shall refund to each organized borough and each city of any class 60 per cent of the money collected in the local government."

Editor's note. — Section 6, ch. 144, SLA 1978, effective January 1, 1979, provides: "TRANSITIONAL RULES FOR REVENUE SHARING UNDER THIS ACT. The revenue raised under AS 43.70 which relates to the 1978 calendar year (including the $25 license fee due March 1, 1978 and the fees on the total gross receipts for 1978 which accompany returns filed in 1979 under AS 43.70.030(d)) is the source of revenue to be shared in 1979 in accordance with AS 43.70.080. The increase in the corporate income tax which goes into effect in 1979 is the source of revenue to be shared with the municipalities under AS 43.20.016 in 1980 and subsequent years. This Act does not entitle any organized borough or any city of any class to revenue under both AS 43.70.080 and AS 43.20.016, for the same period of time."

204 N. FRANKLIN ST.
JUNEAU, ALASKA 99801

March 19, 1980

The Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

I am writing concerning municipal assistance from general and petroleum corporate income tax receipts.

In the process of repealing the gross business license tax, the Legislature eliminated a source of income for municipalities - 60% of the gross business license fees collected within a municipality. To compensate for this loss of revenue, the Legislature established the Municipal Assistance Fund. According to AS 44.20.016, "the Legislature may appropriate to the fund during each fiscal year an amount equal to or greater than 10% of the income tax revenue received by the state under sec. 11(e) of this chapter and chapter 21 of this title for the previous year." Chapters 20 and 21 pertain to corporate and petroleum income taxes.

According to the letter of intent that accompanied the repeal of the gross business license tax, municipalities were to benefit from the change. In actuality, however, municipalities have lost considerably.

For FY '79, the last year operating under shares of the gross business license tax, municipalities received $13,349,900. For FY '80, the Legislature appropriated only $11,400,000 and the amount in the Governor's proposed FY '81 budget remains at that same level even though the revenues generated by general and petroleum corporate income taxes were $257,400,000 in FY '79 and are estimated at $417,000,000 for FY '80.

The Alaska Municipal League urges the Legislature to appropriate monies to the municipal assistance fund as currently authorized by law.

Sincerely,

Dave Walsh

SUBJECT: CSHB 192 (Finance) amended

TO: Representative Terry Gardiner
ATTN: John Sund

FROM: John B. Chenoweth
Legislative Counsel

The insertion of "utilities" at page 2, line 20, was action specifically requested by the Finance Committee.

To narrow the amendment so that only contributions recieved from municipal utilities in lieu of property taxes (and not all utility revenues) are recognized as income, the following amendment is in order:

Page 2, line 20: Delete "utilities,"

Page 2, following line 24: Insert an additional paragraph to read:

"(E) payments received by a municipality from a utility which are in lieu of taxes levied and collected by the municipality."

JBC:jdn

1. Delete (on page 17) Sec 11, subsection (a)(3).

2. Add the following to Sec. 4 (on p. 14):

Sec. 29.90.030 Minimum Entitlement Adjustment

(a) A municipality may not receive a total amount of money under AS 29.88, AS 29.89.010 and AS 29.90.020 which is less in proportion to the total amount appropriated and allocated under those sections than ninety percent (90%) of the percentage of its population to the total population of the State as determined by the Department of Labor.

(b) If the total amount that would be received by a municipality under AS 29.88, AS 29.89.010 and AS 29.90.020 would be less than as required by this section, the municipality shall receive an additional entitlement in an amount sufficient to comply with this section. In the case of boroughs that include cities which are eligible to receive funds under AS 29.88, AS 29.89 or AS 29.90.020, the funds to be received by the borough shall be deemed to include any amounts to be received by cities within the borough for purposes of this section.

(c) Amounts received by municipalities under this section are subject to proration in the manner provided by AS 29.90.010.

Municipality of Anchorage

MEMORANDUM

DATE: April 18, 1980

TO: Mayor Sullivan
THRU: Lu Person, Director of Management and Budget LP
FROM: Gene Dusek, Budget Officer GD

SUBJECT: HB192 AMENDMENT

Per Mitch, the only amendment to HB192 as passed out of the House Finance Committee on April 17th was to increase the total amount, including hospital pass-thru funding, to $31 million.

At a $31 million funding level, the State has estimated that $22,740,838 would be available for other than hospital pass-thru funding. At this funding level, the following shows how Anchorage would fare under the current statutes and under HB192 in FY1981:

Current Statutes		HB192	
Amount	% of State total	Amount	% of State total
$9,830,864	43.23%	$8,190,667	36.01%

The above compares to Anchorage's share of $7,849,556 (43.23%) of the State total of $18,157,087 if FY 1980 State-shared revenues are fully funded as per the House supplemental.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The bill is drafted with the provisions providing for the inclusion of terms and conditions to be in the public interest and for payment to the municipality to be based upon previous maintenance and operation costs and will not cause a cost change to State government.

If a unified municipality and the State enter into an agreement, the State would reduce personnel and related costs and increase contractual services to allow payment to the municipality. At this time, the costs which would be applicable are not known since the particular makeup of the agreement would decide the costs.

4/14/80 --- ARLISS CSHB 550, am

Ken Spray, Local 71, Juneau 586-6993 called (I missed him when

he stopped by earlier...)

HE OPPOSES ABOVE BILL.

Union s ndpoint - employees might not want to transfer - with state they have benefits plus collective bargaining, and might not want to be pushed into municipality, as city ordinances can change on whims,(as did Fbx??)

He questions that Anchorage could better handle the computer(s) versus state.... Said if employees don't wish to transfer, they are awfully hard to obtain - it took his union over 6 months the last time looking for the state - Questions whether one or two computers involved and different benefits - why not DOT-PF taking over.. etc.

He wanted you to know his feelings - and plans to testify ...

Mitch stopped by and called Frank Tecco, who told me:

Anchorage system is under one computer traffic control system, and State and municipality have plugged in their respective operation signals.... Anchorage currently has 4 engineers, 10 technicians which cover many other facits, fire alarms, police monitering, etc -- as result of above transfer, where State currently has 3 technicians working in Anchorage area, this would change to 1 engineer and 2 technicians. - this added to the existing positions

For Line Ctg Computer & Personnel

Municipality of Anchorage

MEMORANDUM

DATE: January 13, 1978

TO: Mayor Sullivan through Municipal Manager

FROM: Municipal Traffic Engineer

SUBJECT: Traffic Signal System

Since my appointment to the position of Traffic Engineer in Anchorage, I have had ample opportunity to observe the operation of traffic signals and their capability for moving traffic through the Municipality. I have also become acquainted with the Computer Center and the efforts the State Maintenance and Operations Section has undertaken towards establishing a synchronized signal system. I am frequently reminded of the State signal failure response record and have discussed operations with the State Maintenance and Operations Section.

I am disturbed by the State's entire operation, primarily because the necessary expertise to manage such an esoteric enterprise as the new traffic signal system exceeds the capability which the State possess. Maintenance and Operations has assumed full responsibility for traffic movement and retains formal authority for traffic control. Maintenance men and technicians cannot learn enough from "sales training classes" to replace many years of actual experience with traffic signal controllers on the streets. Soon Honeywell will leave and the problem will be compounded since the Maintenance and Operations Section will be left to control traffic by themselves

It is increasingly obvious that the recent reorganization of the Department of Transportation has adversely effected its operation and overall efficiency by dissecting the Traffic Engineering functions. Planning and Design contain experienced Traffic Engineers, yet they have no control over day to day operations on the highways. The actual control of and responsibility for traffic movement has now been assumed by the State Maintenance and Operations Section. Thus, the formal authority in traffic control for 80% of Anchorage's traffic signals and major highways now rests within an organization that contains no professional Traffic Engineers. Furthermore, the State has a complex computer center to provide traffic signal control through System Engineering, but have no System Engineering personnel nor anyone experienced in computer programming, signal systems or urban signalization control techniques.

It is time that we seriously consider resuming all traffic control facilities in the urbanized area of this Municipality. The opportunity is present because we possess both the expertise in the engineering functions and in the maintenance functions to optimize the benefits achievable from the present equipment.

The following list contains justification why the Municipality of Anchorage should resume complete control of the traffic signal system within the urban area.

- The people of this Municipality have indicated their intent to be unified, eliminate divided jurisdictional controls and remove outside big brother attitudes. We can no longer "pass the buck" in citizen complaints to the State.

- Commissioner Harris has reportedly stated that he supports contracting activities to local jurisdictions as much as possible.

- Talk within the electronics industry is centering around the preparation of an annual maintenance package to present to the State. The package will include the private maintenance of all traffic signals and the Computer Center.

- Don McAllen, Electronics Supervisor, informs me that, with the addition of the 3 man State signal crew, we can maintain all signals and other hardware. Furthermore, we can work a swing shift because of our depth in electronic personnel (9+3). We will be able to respond to emergencies faster, with more equipment, manpower, and expertise. This will reduce vehicular delay and inconvenience while increasing public safety.

- We have two Associate Traffic Engineers in our office which have extensive background and training in traffic signals and traffic signal systems. Both of the following individuals have the knowledge of what actually happens on the street when one pushes buttons in the Computer Center.

  Mr. Bob Sickler has 10 years of experience in field tuning traffic signal controllers and 5 years of work with a similar traffic computer system. Mr. Sickler is currently President of the Northwest Section of the International Municipal Signal Association and has kept himself, through this Association, well informed of all the advances in traffic signal system control.

  Mike Thompson is educated in computer systems and computer language by a highly technical college and for the past 4 years has worked with traffic signal design and had complete responsibility for a similar traffic signal control computer in Portland, Oregon.

We can resume the operation and maintenance of all traffic signal equipment in urban Anchorage by securing an additional 3 man traffic maintenance crew with ~~an Associate Traffic Engineer and one~~ Technician to operate the Computer Center. This will not adversely impact the Municipality's budget because the salaries paid these 4 men would be furnished through a State Contract. Maintenance and repair of the Computer Center would be contracted to Honeywell and also charged back to the State. Since all the overhead and management for this operation already exists in the Municipality, it will save the requirement for redundant management within the State.

You suggested that I have lunch with Mr. O'Sullivan to discuss our participation in the Computer Center. I seek your support in discussing the transfer of the entire traffic signal system facilities over to the Municipality. I feel confident that we can convince the State of the merits of Municipal management. I solicit your support in this endeavor for I am convinced that the motoring public in Anchorage will benefit.

Frank C. Tecca
Municipal Traffic Engineer

Thursday, March 6, 1980 - 1:30 p.m.

SB 352 - Requiring fiscal notes/bills affecting municipalities

HB 585 - Re/incorporation of 2nd class borough/home rule

power projects for the two river systems, but ... yet u... nounce a decision to proceed with the work.

Home rule bill proposed

By The Associated Press

The House has passed and sent to the Senate a bill to allow second class boroughs to move to home rule status.

The bill, HB58?, was introduced by a joint House-Senate interim committee that this summer studied local government needs for organized and unorganized boroughs in Alaska. The bill passed 37-1 on Tuesday.

Another piece of legislation still pending would allow unorganized boroughs to also move to home rule status, which allows a charter to be developed so that local government can be tailored to the area it serves.

Currently, municipalities and boroughs must be first class before they can adopt a home rule charter.

Committee members said the bill passed on Tuesday makes it easier for local government to respond to local needs. Home rule status allows the local government to adopt ordinances and enact powers unless they are expressly prohibited in the Alaska Constitution.

Several other measures pending in the House and the Senate deal with unorganized boroughs, which committee members say have become laced with "spaghetti-like" boundaries.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This bill would allow second class boroughs to move directly to the Home Rule status without going through the process of first becoming first class as is now required.

There would be no fiscal impact on state government.

IN THE SENATE

SENATE BILL NO. 353

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the incorporation of second class boroughs as home rule boroughs."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.13.010 is amended to read:

Sec. 29.13.010. MUNICIPAL CHARTER ADOPTION. A first class municipality or second class borough may adopt a charter for its own government. A home rule municipality may amend its charter or adopt a new one. A charter is framed by a charter commission of seven members chosen by the municipal voters at a regular or special election. A candidate for the commission must be a qualified voter of the municipality and a resident of the municipality for three years immediately preceding the election. A charter commission election is called by filing a petition with the borough assembly or the city council, or by resolution of the borough assembly or city council. The petition must be signed by a number of municipal voters equal to 10 percent of the votes cast in the last regular election of the municipality.

The bill will move in committee.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Reduces grant requirement for FY 81 from $150,000 to $120,000. There is no impact to administration.

Present law does not exempt seniors from ad valorem tax on their vehicles, just from state collected registration tax. This bill corrects the present law to exempt seniors from property tax on vehicles, statewide.

Present law pays municipalities that do not tax vehicles. This bill corrects law to only reimburse municipalities for revenue lost. This accounts for the reduced need for revenue to fund the program.

HB 615 -- Identical to SB 319 which was passed out of Sen. C/RA 1/29/80

"An Act relating to an exemption from municipal property taxation; and providing for an effective date."

Fiscal Note for SB 319 from Dept. HESS, signed by Coordinator M.D. Plotnick stressed clarification was needed in two areas:

1. What happens in the case of a married couple? If both are 65 years of age or older, will they be entitled to exemptions on two vehicles?

ANSWER: Per Dept. of Public Safety/ Motor Vehicles: Both would receive an exemption - if married, regardless how the certificate is made out - the stipulation being they are of 65 or older...

2. What constitutes residency for purposes of this bill?

ANSWER: Per Dept. of Public Safety, Motor Vehicles: this would revert to driver's statutes - residency requirement 90 days.

POSITION PAPER/Department of Health and Social Services

POSITION PAPER
Senate Bill No. 319

"An Act relating to an exemption from municipal property taxation; and providing for an effective date."

The Department of Health and Social Services supports the intent of SB 319. The bill in its current form, however, seems to need clarification on two areas:

1) What happens in the case of a married couple? If both are 65 years of age or older, will they be entitled to exemptions on two vehicles?

2) What constitutes residency for purposes of this bill?

This bill will not impact on the Department of Health and Social Services but will impact on the Department of Community and Regional Affairs.

The Department of Health and Social Services recommends that Senate Bill 319 not be passed without revisions to address the above-stated concerns.

T

REQUIREMENT OR OBLIGATION MAY BE IMPOSED UPON A BIDDER AS A CONDITION PRECEDENT TO THE AWARD OF A CONTRACT TO A BIDDER UNLESS THE REQUIREMENT OR OBLIGATION IS OTHERWISE LAWFUL AND SPECIFICALLY SET OUT IN THE ADVERTISED SPECIFICATIONS.]

* Sec. 8. AS 19.30.191(c) is amended to read:

(c) All contracts by a local government <u>that has not assumed local road powers must</u> [AWARDED BY COMPETITIVE BIDDING UNDER (b) OF THIS SECTION MUST COMPLY WITH THE PROVISIONS OF THIS SECTION, AND] have the prior concurrence of the commissioner.

* Sec. 9. AS 19.30.191 is amended by adding a new subsection to read:

(d) Except as rovided (b) of this section and in AS 44.33.300, construction of each project shall be administered by the department in accordance with guidelines established by the commissioner by regulation.

* Sec. 10. AS 19.30.201 is amended to read:

Sec. 19.30.201. CONSTRUCTION. The construction of a local service road or trail undertaken by <u>the department</u> [A LOCAL GOVERNMENT] or under its direct supervision under the provisions of AS 19.30.111 - 19.30.241, shall be performed according to approved design standards and are subject to the inspection and approval of the commissioner. All construction work done and labor performed by or under the direct supervision of the <u>department</u> [LOCAL GOVERNMENT] shall be in accordance with [THE LAWS OF THAT LOCAL GOVERNMENT AND] applicable state law.

Deleted Sec. 19.30.211 - in this am. from CS HB 782

* Sec. 11. AS 19.30.221 is amended to read:

Sec. 19.30.221. AVAILABILITY OF ALLOCATED SUMS. (a) On and after the date that the commissioner has certified the sums allocated to each local government, the sums shall be available for expenditure [BY THE LOCAL GOVERNMENT] under the provisions of this chapter.

(b) These <u>allocated</u> sums shall <u>be</u> [CONTINUE] available for expenditure [BY THAT LOCAL GOVERNMENT] for a period of five years after the

close of the fiscal year for which the sums are authorized and any amounts so obligated remaining unexpended at the end of that period shall lapse and shall be available for other local service road or trail construction within that allocation district in accordance with AS 19.30.111 - 19.30.241.

(c) This section applies to sums transferred under AS 19.30.151(b).

(d) The payment of royalties required to obtain materials to construct local service road and trail projects is a valid expenditure under this chapter.

* Sec. 12. AS 19.30 is amended by adding a new section to read:

Sec. 19.30.233. REPORTS. (a) No later than October 1 of each year, a local government which has received money under AS 19.30.151(b) shall prepare a report showing the use of the money by the local government during the preceding 12 months. The local government shall submit a copy of the report to the commissioner.

(b) No later than December 1 of each year, the commissioner shall prepare a report showing the use of the money allocated under this chapter during the preceding 12 months and a report on the status of all projects under this chapter for which the department has construction responsibility. The commissioner shall submit copies of the reports to the governor.

* Sec. 13. AS 19.30.241 is amended by adding new paragraphs to read:

(7) "commissioner" means the commissioner of transportation and public facilities;

(8) "department" means the Department of Transportation and Public Facilties.

* Sec. 14. AS 19.30.191(a) and 19.30.231 are repealed.

IN THE HOUSE BY THE STATE AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 782

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to local service roads and trails."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 19.10.015 is amended by adding a new subsection to read:

(b) Notwithstanding (a) of this section, a municipality may designate the width of a road which is not a part of the state highway system if the municipality maintains the road.

* Sec. 2. AS 19.30.151(a) is amended to read:

(a) Upon application by a local government, local service roads and trails constructed under the provisions of AS 19.30.111 - 19.30.241 and located within the jurisdictional boundaries of a local government, as defined in AS 19.30.241(3), may be transferred to that local government upon approval by the Department of Transportation and Public Facilities and after a vote of the people in the area. [A LOCAL GOVERNMENT WHICH HAS ASSUMED ROAD POWERS BEFORE MAY 20, 1971 MAY NOT BE REQUIRED TO HOLD AN ELECTION AS PROVIDED BY THIS SECTION.]

* Sec. 3. AS 19.30.151(b) is amended to read:

(b) The commissioner shall, upon request of a local government, [IS AUTHORIZED TO] transfer funds allocated under AS 19.30.131 to any local government which has assumed local road powers [HE DETERMINES TO BE QUALIFIED TO CONSTRUCT LOCAL SERVICE ROADS OR TRAILS].

* Sec. 4. AS 19.30.161 is amended to read:

Sec. 19.30.161. DESIGN STANDARDS, RIGHTS-OF-WAY AND WIDTHS. Design standards, rights-of-way and widths for each local service road and trail project shall have the prior approval of the commissioner,

unless the project is under the supervision of a local government that has assumed local road powers. If the project is under the supervision of a local government that has assumed road powers, design standards, rights-of-way and widths shall be established by the local goverment.

* Sec. 5. AS 19.30.171(b) is amended to read:

(b) The costs incurred by the commissioner in acquiring this land or interest in land includes all costs and any fees incidental to acquisition [, INCLUDING RELOCATION ASSISTANCE AND PAYMENTS IN ACCORDANCE WITH AS 34.60]. All costs incurred [BY THE COMMISSIONER] in connection with the acquisition of the land or interest in land for local governments that have assumed local road powers shall be paid by the local government for which the land or interest in land is acquired. Right-of-way acquisition costs incurred by the commissioner for local governments without local road powers under AS 19.30.151(a) shall be charged to the project allocation for the local government for which the land or interest in land is acquired.

* Sec. 6. AS 19.30.181 is repealed and re-enacted to read:

Sec. 19.30.181. PROJECT AGREEMENTS. A local government which has assumed local road powers may enter into a formal project agreement with the commissioner for the construction of a specific project.

* Sec. 7. AS 19.30.191(b) is amended to read:

(b) [EXCEPT AS PROVIDED IN AS 44.33.300, CONSTRUCTION OF EACH PROJECT SUBJECT TO THE PROVISIONS OF THIS SECTION SHALL BE PERFORMED BY CONTRACT AWARDED BY COMPETITIVE BIDDING, UNLESS THE COMMISSIONER FINDS THAT, UNDER THE CIRCUMSTANCES RELATING TO THE PROJECT, SOME OTHER METHOD IS IN THE PUBLIC INTEREST.] Contracts entered into by a local government that has assumed local road powers for the construction of each project shall be awarded only on the basis of the lowest responsible bid submitted by a bidder meeting established criteria of responsibility. [NO

REQUIREMENT OR OBLIGATION MAY BE IMPOSED UPON A BIDDER AS A CONDITION PRECEDENT TO THE AWARD OF A CONTRACT TO A BIDDER UNLESS THE REQUIREMENT OR OBLIGATION IS OTHERWISE LAWFUL AND SPECIFICALLY SET OUT IN THE ADVERTISED SPECIFICATIONS.]

* Sec. 8. AS 19.30.191(c) is amended to read:

(c) All contracts by a local government that has not assumed local road powers must [AWARDED BY COMPETITIVE BIDDING UNDER (b) OF THIS SECTION MUST COMPLY WITH THE PROVISIONS OF THIS SECTION, AND] have the prior concurrence of the commissioner.

* Sec. 9. AS 19.30.191 is amended by adding a new subsection to read:

(d) Except as provided (b) of this section and in AS 44.33.300, construction of each project shall be administered by the department in accordance with guidelines established by the commissioner by regulation.

* Sec. 10. AS 19.30.201 is amended to read:

Sec. 19.30.201. CONSTRUCTION. The construction of a local service road or trail undertaken by the department [A LOCAL GOVERNMENT] or under its direct supervision under the provisions of AS 19.30.111 - 19.30.241, shall be performed according to approved design standards and are subject to the inspection and approval of the commissioner. All construction work done and labor performed by or under the direct supervision of the department [LOCAL GOVERNMENT] shall be in accordance with [THE LAWS OF THAT LOCAL GOVERNMENT AND] applicable state law.

* Sec. 11. AS 19.30.211 is amended to read:

Sec. 19.30.211. MAINTENANCE. The department shall maintain, or cause to be maintained, any project constructed by the department under the provisions of AS 19.30.111 - 19.30.241, except that upon mutual agreement of the commissioner and the local government the responsibility for maintenance may be transferred to the local government if it is authorized to assume road maintenance powers.

Deleted in Sen Am.

* Sec 12. AS 19.30.221 is amended to read:

Sec. 19.30.221. AVAILABILITY OF ALLOCATED SUMS. (a) On and after the date that the commissioner has certified the sums allocated to each local government, the sums shall be available for expenditure [BY THE LOCAL GOVERNMENT] under the provisions of this chapter.

(b) These allocated sums shall be [CONTINUE] available for expenditure [BY THAT LOCAL GOVERNMENT] for a period of five years after the close of the fiscal year for which the sums are authorized and any amounts so obligated remaining unexpended at the end of that period shall lapse and shall be available for other local service road or trail construction within that allocation district in accordance with AS 19.30.111 - 19.30.241.

(c) This section applies to sums transferred under AS 19.30.151(b).

(d) The payment of royalties required to obtain materials to construct local service road and trail projects is a valid expenditure under this chapter.

* Sec. 13. AS 19.30 is amended by adding a new section to read:

Sec. 19.30.233. REPORTS. (a) No later than October 1 of each year, a local government which has received money under AS 19.30.151(b) shall prepare a report showing the use of the money by the local government during the preceding 12 months. The local government shall submit a copy of the report to the commissioner.

(b) No later than December 1 of each year, the commissioner shall prepare a report showing the use of the money allocated under this chapter during the preceding 12 months and a report on the status of all projects under this chapter for which the department has construction responsibility. The commissioner shall submit copies of the reports to the governor.

* Sec. 14. AS 19.30.241 is amended by adding new paragraphs to read:

(7) "commissioner" means the commissioner of transportation and public facilities;

(8) "department" means the Department of Transportation and Public Facilties.

* Sec. 15. AS 19.30.191(a) and 19.30.231 are repealed.

IN THE HOUSE

The House was called to order at 11:30 a.m.

UNFINISHED BUSINESS

SB 559 The Speaker added an additional referral to the State Affairs Committee on SENATE BILL NO. 559 (convening of the legislature).

CSHB 782 The message from the Senate concerning COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 782 (local service roads and trails) and COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 782 amended Senate (same title) was before the House at this time.

Representative Anderson moved that the House concur in the Senate amendment to CSHB 782, thus adopting CSHB 782amS and asked that the members vote no.

The question being: "Shall the House concur in the Senate amendment to CSHB 782?" The roll was taken with the following result:

CSHB 782AMS

Yeas:	0	
Nays:	35	Anderson, Barnes, Beirne, Bettisworth, Branson, Brown, Buchholdt, Carney, Chatterton, Cotten, Duncan, Freeman, Fuller, Gardiner, Guy, Halford, Hayes, Hurlbert, McKinnon, Malone, Martin, Metcalfe, Miles, Miller, Montgomery, Moss, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Randolph, Rogers, Zharoff
Not Voting:	5	Eliason, Haugen, Meeking, Schaeffer, Smith

Representative Buchholdt changed her vote from "yea" to "nay."

And so, the House failed to concur in the Senate amendment to CSHB 782.

The Chief Clerk was instructed to so notify the Senate and respectfully request that they recede from the amendment. CSHB 782

In the event the Senate fails to recede, the Speaker appointed the following members to a Free Conference Committee to meet with a like committee from the Senate to consider the above bills:

Representative Malone, Chairman

Representative Rogers

Representative Martin

Representative Brown moved and asked unanimous consent that the House adopt the letter of intent on COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 1031 (continuing the existence of the Board of Electrical Examiners, and amending the statutes relating to the powers and duties of the board; effective date) (pages 1261 - 1262 of the journal). There being no objection, it was so ordered. CSHB 1031

Representative Metcalfe moved and asked unanimous consent that SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 856 (relating to the relocation of the state capital; effective date) be taken from the State Affairs Committee and sent to the next committee of referral. SSHB 856

Representative Miller objected.

The question being: "Shall SSHB 856 be taken from the State Affairs Committee and sent to the next committee of referral?" The roll was taken with the following result:

MOTION SSHB 856

Yeas:	7	Barnes, Bettisworth, Hayes, Martin, Metcalfe, Montgomery, Randolph
Nays:	29	Anderson, Beirne, Branson, Brown, buchholdt, Carney, Chatterton, Cotten, Duncan, Freeman, Fuller, Gardiner, Guy, Halford, Hurlbert, McKinnon, Malone, Miles, Miller, Moss, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Rogers, Smith, Zbareff

HOUSE BILL 782

TITLE:

An Act relating to Local Service Roads and Trails Program

OBJECTIVE OF LEGISLATION:

(a) To grant local governments which have assumed road powers increased authority and responsibility over local road criteria and the expenditure of the program's funds.

(b) To grant local governments which have not assumed road powers the authority to charge right-of-way costs to the program.

MAJOR AMENDMENTS TO PRESENT STATUTES:

(1) Remove the authority of the Commissioner of the Department of Transportation to withhold program money from "qualified" local governments and remove the authority to mandate project agreements between the Department and the local governments (with road powers) concerning the construction of projects.

(2) This legislation would grant to local governments which have adopted road powers the authority to establish the design standards, right-of-ways, and the right-of-way width (not the Commissioner).

* (3) Allow program funds to be used for the purchase of right-of-ways (present statutes prohibit such a usage).

* (4) As a valid cost of road construction, royalty payments for materials shall be charged to the program.

* The Department of Transportation has estimated that right-of-way and material costs will require ar additional expenditure of $1.2 million in a typical year. However, since the appropriation is a lump sum, allocated in a manner set by statute, I do not recommend funding above the proposed level for the next fiscal year. The flexibility to use available funds for the above purposes will result in an improved program.

HOUSE BILL 782

TITLE: AN ACT RELATING TO LOCAL SERVICE ROADS AND TRAILS PROGRAM.

OBJECTIVES OF LEGISLATION: To grant local governments, which have assumed local road powers, increased authority/ responsibility over local road criterions and the expenditure of the program's funds.

MAJOR AMENDMENTS TO PRESENT LAW: (A). Remove the discretionary authority of the commissioner of the department of transportation to withhold program money from "qualified" local governments; and power to mandate project agreements between the dept. and local governments concerning the construction of projects.

(B). Under this Act, local governments, which have adopted local road powers, may establish the design standards, right of ways, and widths, not the commissioner.

(C). The proposed language would allow the useage of program funds for the purchase of rights of ways. Present law prohibits such a useage.

SECTIONAL ANALYSIS OF HOUSE BILL 782

SEC 1 19.10.015

(B) would provide a municipality, that has assumed road powers (and will maintain said road) with the authority to designate road widths.

SEC 2 19.30.151

(A) is amended to remove reference to a date requiring a local government election. Amended version would require the transfer of L. S.R. and T's, upon approval by D.O.T., to the requesting local government.

SEC. 3 19.30.151

(B) is amended by deleting the commissioner's authority to with-hold program funds; based on his interpretation of qualification.

SEC 4 19.30.161

is amended by delegating to a local government, which has assumed road powers, the authority to establish road design standards, rights of way and widths for projects carried out under this program.

SEC 5 19.30.171

(B) is amended by deleting the requirement that the local government shall pay for the acquirement of rights of ways. Amended language would allow for the useage of program funds to acquire rights of ways.

SEC 6 19.30.181

is amended by deleting the project approval/disapproval authority of the commissioner and the requirement that the state and the appropriate local government enter into a formal project agreement. Amended language gives the local government the option to enter into a formal project agreement with the state, on any specific project.

SEC 7 19.30.191

(B) For local governments, which have not assumed road powers, amended language would delete the commissioner's authority to award contracts on a non-competitive basis. For Local governments, which have assumed local road powers, amended language deletes references to commissione bidding participation. Furthermore, to insure that winning bids are selected upon the principle of "the lowest responsible bid", references to requirements or obligations that may be imposed upon a bidder were deleted.

SEC 8 19.30.201

technical amendments that serve to seperate D.O.T. design standards and state law, from local government design standards and ordinances.

HOUSE BILL 782 RELATING TO THE LOCAL SERVICE ROADS &
SPONSORED BY MALONE AND ROGERS

The Department of Transportation and Public Facilities recommends the following revisions to the proposed changes:

Section 19.30.171(b) Revise to read as follows:

The costs incurred by the commissioner in acquiring this land or interest in land includes all costs and any fees incidental to acquisition. ~~All costs~~ incurred in connection with the acquisition of the land or interest in land for local governments with road powers shall be paid by the local government for which the land or interest in land is acquired. Right of way acquisition costs incurred by the commissioner for local governments without road powers is chargeable to the project allocation for the local government for which the land or interest in land is acquired.

Comment: This revision is necessary to clarify the area of responsibility of funding for right of way costs. Deleted reference to relocation assistance.

Section 19.30.173 Royalty. Add the following section:

Royalty payments required to obtain the necessary materials to construct local service roads and trails projects is a valid item of construction costs.

Comment: This addition is necessary to clarify the area of responsibility of funds related to royalty payments.

Section 191.30.191(b) Revise as follows:

Contracts for the construction of each project by the local government with road powers shall be awarded only on the basis of the lowest responsible bid submitted by a bidder meeting established criteria of responsibility.

Comment: This revision is necessary to differentiate between local governments with road powers and others without.

Section 191.30.191(c) Revise as follows:

All contracts by other than a local government with road powers awarded by competitive bidding under (b) of this section must comply with the provisions of this section, and have the prior concurrence of the commissioner.

Comment: This revision is necessary to place the responsibility of proper contract procedures with local autonomy.

Section 191.30.191(d) Add the following section:

Except as provided in AS 44.33.300 and in (b) above, construction of each project subject to the provisions of this section shall be administered by the Department within the commissioner's guidelines.

Comment: This addition is necessary to direct the local governments without road powers to a source document such as the LSR&T Handbook. The LSR&T Handbook will cover the policy and procedures necessary to carry out the LSR&T program concerning other than local governments with road powers.

Fiscal Note for HB 782 SUPPORT

Local Service Roads & Trails project average cost breakdown for one mile projects are as follows:

I. Right-of-Way Costs

Urban

Construction cost	$1,000,000
R/W Acquisition ($130,000 per Acre)	200,000
R/W Administration @25%	50,000
R/W Cost/Construction cost	25%

Suburban

Construction cost	$ 500,000
R/W Acquisition ($40,000 per Acre)	80,000
*R/W Administration @30%	24,000
R/W cost/Construction cost	30%

*Additional cost percentage due to some travel and additional map source such as BLM, ADL Native allotments, etc.

Remote Areas

Construction cost	$ 200,000
R/W Acquisition ($3,500 per Acre)	8,000
*R/W Administration @40%	3,200
R/W cost/Construction cost	5%

*Additional cost percentage due to more travel involved than the Suburban areas.

15% increase of project costs for Right-of-Way is anticipated reflecting $690,000 per year for a $10,000,000 bond issue.

II. Payment of Royalties. Based on royalty payments for materials, needed funding for the program follows:

Assuming that each project averages one mile and 15,000 cu. yds. is utilized per project, royalty related costs are computed as follows:

Calendar years 1981 & 1982. Each average 16 new projects in the unorganized Boroughs. Estimated cost of material at $.75/cu. yd. paid for royalties (Tanana Village Streets is set at $.55 and paid for through a special appropriation by the legislature). Cost of load count employee is $3,000 to $6,0 per month. (State employees will be base X O.H. factor of 1.77. Survey part time and travel would exceed $8,000).

15,000 cu. yd. X $.75	=	$11,250.00
Load Count Employee	=	5,000.00
TOTAL	=	$16,250.00

16 projects X $16,250 = $260,000/year.
1981 & 1982 Royalty related costs = $520,000 total.

An additional $500,000 per year increase funding is an[illegible]nated.

SUMMARY

Rural Development (office of)

HOUSE BILL NO. 932, by the Rules Committee by request of the Legislative Budget and Audit Committee. Establishes the Office of Rural Development in the Governor's Office and the Rural Development Council as the policy council for the office. Council consists of the Lt. Governor, a member of each house appointed by the presiding officer of that house, four state officers appointed by the Governor, the Dir. of Policy Development and Planning, six members from the private sector appointed by the Governor. States the purpose of the Act is "... to create a governmental structure that will function as the advocate of rural economic issues and rural community issues concerning development within the state, federal, and local governments, and in the private sectors, and which will assist rural people and institutions in laying the foundations of a healthy rural private economic base." Office is required to submit a comprehensive activity report to the Legislature before January 15 of each year. Provides Act effective immediately.

Introduced March 4 and referred to Community & Regional Affairs and Finance.

May 20, 1980

TO: Billy Berrier, Director
Division of Legal Services

FROM: Twyla Hartsock, Administrative Assistant
Senate C/RA Committee

SUBJECT: SCS CSHB 932

The Senate C/RA Committee this date passed "Senate Committee Substitute" version (WO 7871-Berrier) out with the following additional amendments:

pg. 1 - line 6 - title: delete "the office of rural development, and"

pg. 2 - line 14: delete "Office of" and add "Council" following "development."

pg. 5 - lines 18-20: delete sec. 44.19.226.
pg. 5 - line 23: delete "and the office"
pg. 5 - line 27: add "Executive" between "the" and "director"; delete "of the office" and add "the" between "of" and "rural"
pg. 5 - line 28: add "Council" following "Development"

pg. 6 - lines 1 & 2: state more clearly this section will be repealed.

Would you please incorporate the above changes and return the final "SCS" jacketed version as soon as possible. When it is received, the bill will be immediately forwarded to the Senate Secretary's Office for transmittal to the next referral, the Senate Finance Committee.

IN THE HOUSE BY THE FINANCE COMMITTEE

CS FOR HOUSE BILL NO. 932 (Finance)

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An act creating the office of rural development, and the Rural Development Council; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASK

* Section 1. FINDINGS; POLICY, PURPOSE. (a) The legislature finds that there is a public interest in the development of a healthy private economic base in rural Alaska, that the rural areas of the state and the many small communities of the state have been in economic crisis for decades, and that in many rural communities a private economic base has ceased to exist which conditions endanger the economic, social, and cultural well-being of the state's rural citizens and the healthy growth and balance of the state's entire economy. The legislature further finds that while many opportunities for economic growth may be available to rural areas, the problems of the state's rural areas are many and complex, spreading beyond the confines or authority of any one program, any one government, or any one policymaker and therefore requiring a special initiative on the part of all concerned parties.

(b) It is the policy of the legislature that

(1) villages and small communities should have access to economic development opportunities;

(2) there is a special commitment to the development of a private economic base for villages and small communities;

(3) the state should use its resources and financial strength to encourage the development of a healthy, self-sustaining rural economy;

(4) the state has the primary policy responsibility to act and to catalyze commitment among many interests, including the state, federal government, local governments, and the private sector to promote a private economy in rural areas;

(5) the advocacy of a private economy compatible with preservation of the subsistence economy should be among the highest priorities of state policy.

(c) It is the purpose of this Act to create a governmental structure that will function as an advocate of rural areas and small communities presenting development issues before state, federal, and local governments, and in the private sectors, and which will assist rural people and institutions in laying the foundations of a healthy rural private economic base.

* Sec. 2. AS 44.19 is amended by adding new sections to read:

ARTICLE 3C. OFFICE OF RURAL DEVELOPMENT.

Sec. 44.19.191. OFFICE OF RURAL DEVELOPMENT. There is established in the Office of the Governor the office of rural development. The director of the office is appointed by the governor and serves at his pleasure. The governor may consult with the council concerning the appointment or discharge of the director.

Sec. 44.19.291. COUNCIL ESTABLISHED. (a) There is established the Rural Development Council as the policy council for the office of rural development. The council consists of

(1) the lieutenant governor;

(2) a member of each house of the legislature appointed by the presiding officer of that house;

(3) the commissioners of the departments of transportation and public facilities, commerce and economic development, and community and regional affairs, and the director of the division of policy development and planning;

(4) six representatives of the private sector appointed by

the governor who are residents of the rural area or small communities;

(5) the Alaska state director of the Farmers Home Administration of the United States Department of Agriculture and a designated representative of the Region X Rural Development Task Force who are ex officio members of the council and may attend and participate in all meetings of the council but may not vote.

(b) The members of the council appointed by the governor serve at the pleasure of the governor.

(c) The lieutenant governor is chairman of the council and one of the legislative members shall be elected by the council as legislative co-chairman.

(d) Members of the council serve without compensation but are entitled to per diem and travel expenses provided by law for members of boards and commissions.

Sec. 44.19.211. PURPOSE OF THE COUNCIL. The purpose of the council is to provide policy direction to the office and to assist the office in the performance of the duties of the office. The council shall assist in coordinating the economic development activities of all departments and agencies of government so that the need for those activities and the impact of those activities on small communities and rural areas is considered and assist in coordinating the activities of departments and agencies of government which have field responsibilities in the rural areas to the extent that those activities relate to economic development. The council shall also assist the office in its advocacy function.

Sec. 44.19.216. MEETINGS. The council shall meet at the call of the chairman or legislative co-chairman at the request of a majority of the members, and at least four times a year at a regularly scheduled time as determined by the members. The council may convene meetings of

heads of agencies or departments which are concerned with rural matters or economic development if the council determines a meeting to be useful.

Sec. 44.19.221. POWERS AND DUTIES OF THE OFFICE. The office shall

(1) act as advocate for the development of an economic base which is compatible with preservation of the subsistence economy in rural Alaska, for community development and for public services which will enhance the opportunity for growth of an economic base in small communities and rural Alaska, and for other matters and programs useful to development of the private economy in rural Alaska;

(2) coordinate projects relating to economic development among departments and agencies;

(3) act as advocate for rural development programs which are not within the jurisdiction of a specific department or agency;

(4) act as advocate for appropriate technology development and the advancement of entrepreneurial opportunities;

(5) encourage and assist in the creation and use of regional development enterprises.

Sec. 44.19.226. STAFF. Within budget and appropriation limits, the director may hire staff and determine their compensation. Except for making inquiries, neither the council nor an individual member of the council may give orders to the staff on administrative matters.

Sec. 44.19.231. REPORTS. Before January 15 of each year the office shall submit to the legislature a comprehensive report describing the activities of the council and the office for the preceding year.

Sec. 44.19.236. DEFINITIONS. In AS 44.19.191 - 44.19.236

(1) "council" means the Rural Development Council;

(2) "director" means the director of the office of rural development;

(3) "office" means the office of rural development.

* Sec. 3. AS 44.66.010(a) is amended by adding a new paragraph to read:

(8) office of rural development and Rural Development Council (AS 44.19.191 - 44.19.236) -- June 30, 1987.

* Sec. 4. This Act takes effect immediately in accordance with AS 01.10.-070(c).

IN THE HOUSE BY THE FINANCE COMMITTEE

SCS FOR CS FOR HOUSE BILL NO. 932 (Community and Regional Affairs)

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An act creating the Rural Development Council; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS; POLICY, PURPOSE. (a) The legislature finds that there is a public interest in the development of a healthy private economic base in rural Alaska, that the rural areas of the state and the many small communities of the state have been in economic crisis for decades, and that in many rural communities a private economic base has ceased to exist which conditions endanger the economic, social, and cultural well-being of the state's rural citizens and the healthy growth and balance of the state's entire economy. The legislature further finds that while many opportunities for economic growth may be available to rural areas, the problems of the state's rural areas are many and complex, spreading beyond the confines or authority of any one program, any one government, or any one policymaker and therefore requiring a special initiative on the part of all concerned parties.

(b) It is the policy of the legislature that

(1) villages and small communities should have access to economic development opportunities;

(2) there is a special commitment to the development of a private economic base for villages and small communities;

(3) the state should use its resources and financial strength to encourage the development of a healthy, self-sustaining rural economy;

(4) the state has the primary policy responsibility to act and to catalyze commitment among many interests, including the state, federal government, local governments, and the private sector to promote a private economy in rural areas;

(5) the advocacy of a private economy compatible with preservation of the subsistence economy should be one of the highest priorities of state policy.

(c) It is the purpose of this Act to create a governmental structure that will function as an advocate of rural areas and small communities presenting development issues before state, federal and local governments, and in the private sectors, and which will assist rural people and institutions in laying the foundations of a healthy rural private economic base.

* Sec. 2. AS 44.19 is amended by adding new sections to read:

Sec. 44.19.201. COUNCIL ESTABLISHED. (a) There is established in the Office of the Governor the Rural Development Council. The chairman of the Council is appointed by the Governor and serves at his pleasure.

(1) The Council shall be located in the Office of the Governor.

The council consists of

(1) The Governor's Designated Chairman;

(2) a member of each house of the legislature appointed by the presiding officer of that house;

(3) the commissioners of the departments of transportation and public facilities, commerce and economic development, and community and regional affairs, and the director of the division of policy development and planning;

(4) six representatives of the private sector appointed by the governor who are residents of the rural area or small communities;

(5) the Alaska state director of the Farmers Home Administration of the United States Department of Agriculture and a designated representative of the Region X Rural Development Task Force who are ex officio members of the council and may attend and participate in all meetings of the council but may not vote.

also, AK. Dept. of Interior Rep.

(b) The members of the council appointed by the governor serve at the pleasure of the governor.

representatives from State & federal agencies, local governments, or other groups, and interested individuals to participate as deemed appropriate by the council.

(3) Compensation. The members of the Council who are not state or federal government representatives are entitled to receive reimbursement for travel expenses and per diem incurred on Council business in accordance with AS 39.20.180.

(4) Officers. There shall be officers of the Council as follows:

(a) A chairman;

The chairman may designate a vice-chairman who may preside in the chairman's absence.

(b) An executive director will be provided from the Office of the Governor.

Sec. 44.19.211. PURPOSE OF THE COUNCIL. The purpose of the Council is to provide policy recommendation to the governor and the legislature. The Chairman shall assist The Director in coordinating the economic development activities of all departments and agencies of government so that the need for those activities and the impact of those activities on small communities and rural areas is considered and assist and coordinating the activities of departments and agencies of government which have field responsibilities in the rural areas to the extent that those activities relate to economic development. The Chairman shall also assist the governor in his advocacy function.

Sec. 44.19.216. MEETINGS. The Council shall meet at the call of the governor, the chairman, at the request of a majority of the members, and at least four times a year at a regularly scheduled time as determined by the members. The Council may convene meetings of heads of agencies or departments which are concerned with rural matters or economic development if the Council determines a meeting to be useful.

Sec. 44.19.221. POWERS AND DUTIES OF THE COUNCIL. The Council shall

(1) investigate and assess rural conditions;

(2) act as advocate for the development of an economic base which is compatible with preservation of the subsistence economy in rural Alaska, for community development and for public services which will enhance the opportunity for growth of an economic base in rural Alaska, and for other matters and programs useful to development of the private economy in rural Alaska;

(3) develop and recommend to the governor and the legislature rural development goals and policies;

(4) recommend to the governor and the legislature activities, programs, projects or strategies which will stimulate rural development in Alaska in accordance with adopted state rural development policies;

(5) recommend to the governor and the legislature the most effective uses of available federal funds to implement the priorities itemized in (4) above;

(6) assist in the interagency and intergovernmental coordination of economic development issues, activities in Alaska;

(7) submit to the governor, within one year of the effective date of this order and on a yearly basis thereafter, a report containing a summary of the Council's activities regarding the duties under (1), (3), and (4) of this section and making recommendations as to future rural development activities;

(9) act as advocate for rural development programs which are not within the jurisdiction of a specific department or agency;

(10) act as advocate for appropriate technology development and the advancement of entrepreneurial opportunities;

(11) encourage and assist in the creation and use of regional development enterprises.

The Council in complying with (4) in Sec. 44.19.221 may

(1) identify opportunities for joint investment strategies;

(2) facilitate rural development efforts approved by the governor by

(a) identifying interagency or intergovernmental procedural obstacles and providing assistance to such efforts in meeting legal requirements.

(b) coordinating technical and financial assistance efforts.

(c) offering its services as a mediator on specific conflicts arising in rural development issues.

Sec. 44.19.228. STAFF. Except for making inquiries, neither the Council nor an individual member of the Council may give orders to the staff on administrative matters.

Sec. 44.19.231. REPORTS. Before January 15 of each year, the Council shall submit to the legislature a comprehensive report describing the activities of the Council for the preceding year.

Sec. 44.19.236. DEFINITIONS. In AS 44.19.191 - 44.19.236

(1) "council" means the Rural Development Council;

(2) "director" means the director of the Rural Development Council.

Sec. 3. AS 44.66.010(a) is amended by adding a new paragraph to read:

(8) Rural Development Council (AS 44.19.191 - 44.19.236) -- June 30, 1987.

Sec. 4. This Act takes effect immediately in accordance with AS 01.10.070(c).

QUESTIONS & ANSWERS RE. HB 932

Q. Does this bill establish another agency to do what existing agencies should be doing now?

A. (1) The purpose of the office is to provide a focus of state agency activities and state investments for the purpose of finding our maximum leverage position with federal spending and private capital investment strategies.

There is no encroachment on the specific program duties of any existing agency.

(2) The office created is not an agency, it has no powers to receive and expend program monies, and the office and council are subject to sunset review.

(3) There is a need to begin reconciling the many disparate positions and interests representing Alaska's traditional and emerging economic aspirations. A consensus must be achieved among the many divergent positions that presently compete, to the detriment of all parties and the whole state in particular. Such a consensus, however limited it may be at the beginning, will allow the state to develop policies that may be vigorously pursued.

Q. Why should the legislature establish this office and council by statute?

A. (1) This bill describes Alaska's specific response to the president's invitation to participate in his New Rural Policy. By establishing the council in statute the legislature will be strongly supporting the Governor while creating a body through legislative intent that is capable of getting things done.

(2) The Governor's Office has indicated they would have established this council by executive order anyway - this bill considerably enhances the state consensus represented by the council in matters of Alaska/Federal economic policy.

Q. Would this legislation be of benefit to urban areas in Alaska?

A. To the extent that our urban economies are service oriented, which is considerable, those economies are dependent on the health and growth of the state's resource based economy. The future of this economy is largely in rural Alaska, hence rural development is also urban development.

STATE OF ALASKA

DEPT. OF ENVIRONMENTAL CONSERVATION

JAY S. HAMMOND, GOVERNOR

465-2601

POUCH O – JUNEAU 99811

May 13, 1980

The Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

It is my understanding that th Senate Community and Regional Affairs Committee is currently considering HB 932, the Rural Development Act. Your staff has asked me to provide the Committee with a list of functions of the Department of Environmental Conservation for the Committee's use in determining appropriate representation of State agencies on the Rural Development Council. That list follows:

1. Funding construction of water and sewer facilities under the federal and State water and sewer bond programs and the Village Safe Water program. Under legislation already passed by th Committee, solid waste facilities would be grant eligible. We also certify and assist in the training of water and wastewater system operators.

2. Review of plans for surveillance of air emission sources, sewerage systems including on-lot sewage disposal (subdivision review), drinking water supplies and solid waste disposal facilities.

3. Oil and hazardous waste spill prevention and cleanup. This fiscal year the department wil develop a model contingency plan for small communities for oil spill protection.

4. Certification of dredge and fill activities and other activities resulting in discharge into navigable waters for compliance with State water quality standards. Under the Federal Clean Water Act, a designated State agency must provide the certification of activities requiring permits from the Corps of Engineers, Environmental Protection Agency, Coast Guard (bridges), and Federal Energy Regulatory Commission (dams).

5. Membership on the Coastal Policy Council.

6. Analysis of various water related environmental problems, with proposed solutions, such as waste oil generation and disposal, and sewage disposal.

If I can be of any further assistance in this matter, please advise.

Sincerely,

C. Deming Cowles

TESTIMONY OF ANDREW W. EBONA

on

HOUSE BILL 932, "AN ACT CREATING THE OFFICE OF RURAL DEVELOPMENT, AND THE RURAL COUNCIL: AND PROVIDING FOR AN EFFECTIVE DATE."

(Presented at the Joint House and Senate Community & Regional Affairs Committee Teleconference on March 28, 1980.)

MADAME CHAIRMAN, MR. CHAIRMAN, HONORABLE SENATE AND HOUSE COMMITTEE MEMBERS, LADIES AND GENTLEMEN. I AM ANDREW W. EBONA, EXECUTIVE DIRECTOR OF THE CENTRAL COUNCIL OF THE TLINGIT & HAIDA INDIANS OF ALASKA. FOR THOSE OF YOU WHO ARE NOT AWARE, THE TLINGIT AND HAIDA CENTRAL COUNCIL IS THE CONGRESSIONALLY-RECOGNIZED GENERAL GOVERNING BODY FOR OVER 16,000 TLINGIT AND HAIDA INDIANS IN SOUTHEAST ALASKA. A MAJORITY OF THOSE CONSTITUENTS RESIDE IN RURAL ALASKA, WHICH MAKES HOUSE BILL 932 EXTREMELY IMPORTANT TO US.

ALLOW ME TO FURTHER QUALIFY OUR TESTIMONY. THE CENTRAL COUNCIL HAS TWO BASIC DEPARTMENTS ... THE DEPARTMENT OF COMMUNITY SERVICES AND THE DEPARTMENT OF HUMAN SERVICES. BOTH WORK DIRECTLY WITH OUR NINETEEN (19) COMMUNITIES IN DELIVERING SERVICES. AS A RESULT OF INPUT FROM THOSE COMMUNITIES, WE FEEL THAT WE CAN STATE POSITIVELY THAT WE HAVE EXTENSIVE WORKING KNOWLEDGE OF THE RURAL AREA. AS A MATTER OF INFORMATION, WE HAVE ALSO PARTICIPATED WITH VARIOUS OTHER REGIONAL NATIVE NON-PROFITS AND STATE/FEDERAL AGENCY REPRESENTATIVES ON A TASK FORCE FOR RURAL DEVELOPMENT. THIS TASK FORCE HAS BEEN IN EXISTENCE FOR THREE YEARS AND HAS BEEN ATTEMPT-

ING TO COORDINATE THEIR EFFORTS IN DELIVERING SERVICES TO THE RURAL COMMUNITIES AS THE RURAL DEVELOPMENT COUNCIL WOULD HOPE TO DO. THE RECOMMENDATIONS AND SUPPORT THAT WE ADVANCE HERE ARE OFFERED IN THE HOPE THAT THE STATE WILL BE ABLE TO UTILIZE AND LEARN FROM OUR EXPERIENCES.

HB 932, "AN ACT CREATING THE OFFICE OF RURAL DEVELOPMENT, AND THE RURAL DEVELOPMENT COUNCIL", PRESENTS A CONCEPT WHICH WE WHOLEHEARTEDLY ENDORSE. WE ARE ALL AWARE THAT ONE OF THE CONDITIONS, WHICH GENERATES OR RELATES DIRECTLY TO MANY OF THE RURAL ALASKA PROBLEMS, IS THE LACK OF AN ECONOMIC BASE IN THE RURAL AREAS. THIS PIECE OF LEGISLATION WAS DEVELOPED IN RECOGNITION OF THIS AND THEREFORE EARNS OUR SUPPORT.

THOSE PROVISIONS WHICH PROVIDE FOR COUNCIL APPOINTMENT ATTEMPT TO SET UP A MECHANISM WHICH WOULD PROVIDE FOR COORDINATION OF EFFORT IN ALL ACTIVITIES DIRECTED TOWARDS THE RURAL COMMUNITIES. THIS IS INDEED LAUDABLE CONSIDERING THE FACT THAT EFFORTS IN THE PAST HAVE BEEN MADE ON AN AGENCY-BY-AGENCY, PIECEMEAL BASIS. WE ARE, HOWEVER, CONCERNED THAT AGENCY REPRESENTATION WOULD OVERWHELM RURAL REPRESENTATION. A WAY TO AVOID THIS WOULD BE TO PLACE THE STATE DEPARTMENT REPRESENTATIVES ON THE RURAL DEVELOPMENT COUNCIL IN AN EX-OFFICIO CAPACITY. WE WOULD ALSO HOPE THAT THE STATE DEPARTMENT OF COMMERCE & ECONOMIC DEVELOPMENT WOULD BE INCLUDED ON THE LIST OF RELATED DEPARTMENTS, SINCE IT IS RURAL DEVELOPMENT THAT IS BEING ADDRESSED.

TO DATE THERE HAS BEEN NO FORMAL STATE POLICY CONCERNING RURAL DEVELOPMENT. THE POLICY OF THE LEGISLATURE AS OUTLINED ON PAGE ONE OF THE BILL WOULD BE ACCEPTABLE AS THE GOALS AND OBJECTIVES OF THE COUNCIL. WE RECOMMEND THAT ONE OF THE RESPONSIBILITIES AND OUTCOMES OF THE COUNCIL

WOULD BE THE DEVELOPMENT OF SPECIFIC POLICIES THE STATE COULD AND WOULD UTILIZE IN COORDINATING RURAL DEVELOPMENT. THIS MEANS THAT THE COUNCIL MUST HAVE SOME SORT OF AUTHORITY TO RECOMMEND STATE POLICY AND TO ASSURE THAT IT IS FOLLOWED.

OTHER CONSIDERATIONS THAT MUST BE TAKEN ARE THE MAKE-UP OF THE COMMUNITIES THAT COMPRISE RURAL ALASKA. THE BULK OF THOSE COMMUNITIES ARE MADE UP OF ALASKA NATIVES. WE URGE THAT THIS BE TAKEN INTO CONSIDERATION WHEN APPOINTMENTS ARE BEING MADE. THE STATE MUST ALSO RECOGNIZE THE ROLES AND THE RESULTING IMPACT THE REGIONAL AND LOCAL PROFIT AND NON-PROFIT NATIVE CORPORATIONS HAVE IN THE RURAL COMMUNITIES. THEY ALSO SHOULD BE REPRESENTED ON THE RURAL DEVELOPMENT COUNCIL.

WITH THE INCLUSION OF THESE RECOMMENDATIONS IN HOUSE BILL 932 THE CENTRAL COUNCIL GOES ON RECORD IN TOTAL SUPPORT OF AN OFFICE OF RURAL DEVELOPMENT AND A RURAL DEVELOPMENT COUNCIL.

Andrew W. Ebona, Executive Director
Central Council of the Tlingit &
Haida Indian Tribes of Alaska

UNIVERSITY OF ALASKA
FAIRBANKS ALASKA 99701

May 5, 1980

Dear Senator Sturgurlewski and Committee Members:

CSHB932, creating an office of rural development and a Rural Development Council, has been referred to Senate Community and Regional Affairs Committee after having passed on the House floor.

The original HB932 proposed a sixteen voting-member Council. CSHB932 deleted "two members appointed by the Governor who are engaged in private enterprise which has significant rural involvement" and "the director of cooperative extension service of the University of Alaska" (p. 3, HB932). The director of cooperative extension may not have been the most appropriate representative, however, I would suggest that the University of Alaska's massive data collection on rural Alaska, would make University representation a valuable asset to the Council.

The Agricultural Experiment Station, the Institute of Social and Economic Research, the Mineral Industry Research Laboratory and the Arctic Environmental Information and Data Center, to name a few, have all worked extensively and accumulated a wealth of information on rural Alaska. Incidentally, the State Legislature created three of the above named institutes and mandated the fourth. They and other research institutes are described in the 1978-79 Research Annual Report which was sent to you in early February.

As a land grant institution, the University of Alaska is attempting to respond to the needs of the people of the State. University membership on the Rural Development Council would serve the mutual purpose of keeping the University informed of the changing needs and priorities of rural Alaska while bringing University resources to bear in the deliberations of the Council.

I recommend that a provision be incorporated into CSHB932 which would add to the council a representative of the University of Alaska research institutes, to be appointed by the President of the University. Whether or not a University representative is added, I would encourage the research institutes to cooperate with the office of rural development and the Rural Development Council whenever possible. I believe that University membership on the Council would expedite communication and cooperation.

Very truly yours,

Jay Barton

Jay Barton

The Honorable William K. Parker
Alaska House of Representatives
Pouch V
Juneau, Alaska 99811

Dear Bill,

With reference to HB932, an alternative creating the Governors Office of Rural Development and the Rural Development Council, I would like to offer the following comments:

1) The creation of the Governors Office of Rural Development is the most direct method for meeting the states responsibility to recognize the "special relationship" which exists between the state govenment and rural Alaskans. A possible alternative may be the creation of rural desks within state departments. However; cost constraints make this opiton less attractive.

2) The existing Rural Development Council is capable of providing necessary policy direction and other duties as proposed. Also, the current composition and leadership are dedicated to the orderly and meaningful development of rural Alaska. In addition to most state departments, the current membership includes representation from major nonprofit corporations and federal agencies with significant operating programs in rural Alaska.

If you have any questions or comments please call.

Sincerely,

COMMUNITY ENTERPRISE DEVELOPMENT
CORPORATION OF ALASKA

COOPERATIVE EXTENSION SERVICE

UNIVERSITY OF ALASKA
FAIRBANKS ALASKA 99701

May 2, 1980

Senator Arliss Sturgulewski
Alaska State Legislature
Pouch V
Juneau, AK 99811

Dear Arliss:

I have reviewed the committee substitute for House Bill 932, which I understand passed the House recently and is referred to your committee. An earlier version included the Director of Cooperative Extension as a member. The version which I understand passed dated 4/18/80 does not.

As you know, the Director of Cooperative Extension serves as continuing Executive Secretary of the Alaska Rural Development Council. That role has provided continuity for the Council since its inception in 1971. I believe that the record of the Council has been very positive in promoting communication, a public forum, and coordination of state, federal, local government, and private agency coordination.

The legislation as proposed in #932 appears to move another step in addressing coordination in the developing of policy and programs as it relates to rural Alaska.

Retaining the Director of Extension as a member of the Council proposed originally in #932 would provide an important linkage between the two structures, which although have similar interests would very likely address their role at a different pace. It would also provide a linkage with outreach programs of the University that have as a principle mission educational support oriented towards development of rural Alaska.

I hope that consideration can be given to that concern as the Senate addresses their interest in the legislation. The Executive Secretary of the Alaska Rural Development Council is a member of the Board of Directors of the Council.

Attached for your information is a copy of the Council's brochure, currently being updated, and a copy of letterhead that reflects the scope of involvement in the Alaska Rural Development Council.

Thanks for your consideration in this matter, which I understand is now being considered by your committee.

Sincerely,

Jim Matthews

SUBJECT: Special Assignment on Alaska

TO: Alex P. Mercure
Assistant Secretary
for Rural Development

I met first with the staff director of the Seattle FRC in Seattle. In Juneau, I met with both administrative and legislative staff as arranged by Governor Hammond's assistant, Bob Palmer. I spent considerable time with Secretary's Representative Fisher, FmHA State Director Roderick, Alaska Federation of Natives President Morrie Thompson (former head of BIA), the small farms and conservation districts committees, and many other citizens, legislators, and natives. Opinions expressed to me were amazingly consistent on the following issues:

- o Political labels are quite unimportant. Support for an organized approach to rural development has bipartisan support in the legislature and between the legislature and the governor. There seems to be wide support for Lt. Governor Terry Miller as the next governor.

- o Development needs are well defined and understood as you heard when you were there last June.

- o The State has incredible developmental resources at its disposal through the oil revenues--yet there is universal concern that only the other guy's needs will be met and not everyone's, and that the revenues will be used to meet short-run exigencies rather than to build a viable economy that can sustain itself after the oil revenues cease.

- o The State must develop a self-sustaining economy--and, in particular, a viable agriculture economy--in order to avoid continuous boom and bust cycles.

- o The main problems are seen as the inflexibility of federal programs, in program managers who cannot respond to the unique needs and opportunities of the State, and the lack of coordination among federal programs and the management of them.

A less widely recognized problem soon became clear: the main problem is not the lack of federal flexibility as much as it is a lack of political consensus in the State. As the President's Policy on Small Community and Rural Development emphasizes, rural development programs of all levels of government come together at the State, not the national level. Effective coordination of policy and activities must, therefore, be under strong leadership within states. Alaska has the resources but has not had the political will to forge a consensus on the use of the resources. Until a consensus is developed, assumption of leadership for rural development involves great risk.

Evidence of the lack of consensus is in the myriads of task forces, committees, subcommittees, conferences, hearings, and on and on that exist in the state to bring the right people together and to coordinate their efforts--and to avoid having to make the hard choices. The numbers of them and the frequency of their meetings is mind-boggling in a state with less than half a million population spread over such great area. The problems and opportunities have been studied, debated, discussed, and reported on almost beyond comprehension. Yet, there exists nothing to bring them together into a coherent whole. Recommendations abound, but no one has yet been able to devise the tradeoffs necessary to subordinate goals and priorities.

Recently, however, several things have fallen into place:

- o Governor Hammond has asked Secretary Bergland to work with him to create a state/federal partnership for rural development.

- o The staff of Representative Jim Duncan, Chairman of the House Budget and Audit Committee, has just about completed a study and recommendations of desirable relationships for coordinated development among state agencies, and a framework to work out others.

- o The President's policy provides the vehicle necessary to get federal agencies organized and working with each other and with state and local officials at the federal and the state levels.

With the exception of one issue, the Alaska Railroad (discussed below), the federal government should not attempt to assume the state's burden by setting up a study or a series of task-oriented task forces. The problems have been studied to death. What is needed is full federal support for the state's assumption of the role of convening the important actors to begin to set priorities. Once the priorities have been set, the federal government, with the state, can pursue activities--or further studies if necessary--to meet the priorities.

If the Governor is willing to designate a Rural Development Council in accord with the President's invitation, and if he is willing to put it under the leadership of someone with recognized status (the Lt. Governor, for example), federal agencies will be willing to participate as per their orders from the Working Group on Small Community and Rural Development. Thus, the structure for state policy-setting plus intergovernmental coordination of policy and implementing actions would be in place.

Life could be breathed into such a structure, and political consensus boosted, by a highly visible state/federal memorandum of agreement to make it all work. USDA, through the Seattle FRC Rural Development Task Force, should take the lead role in preparing and implementing the agreement. (The study being prepared for Representative Duncan's Committee recommends that USDA (FmHA) take the lead among federal agencies. Both the Department and Secretary Bergland are popular in Alaska.) A highly visible agreement and effort to develop a joint investment strategy are very important because of the huge federal presence in Alaska and the universal distrust of the dominant federal partner--the Department of the Interior.

funding

An agreement could specify the course to be followed to reach initial consensus on overall goals and priorities. So that all federal agencies would have reason to actively participate, the agreement could even specify task forces and lead agency responsibility to perform the background work necessary to set priorities. The agreement could provide funding for staff to the Governor's Council: EDA 304 funds could be used as well as FmHA 111 funds. Other agencies, especially Interior, could be encouraged to contribute.

It would take some very high quality staff work to help forge the consensus and leadership that are necessary. Someone will have to be brought into the state at a high salary. This and the high travel costs will make the staff support quite expensive.

RECOMMENDATIONS:

- The Board of Directors of the Council of State Community Affairs Agencies (COSCAA) is meeting in Juneau early in July. This will get some very high-powered state officials into Alaska, e.g., Hank Huckaby, Community Affairs Commissioner in Georgia; and Paula Herzmark, Executive Director of the Department of Local Affairs in Colorado. If we will cover their additional per diem and travel expenses, they will conduct training seminars and dialogues with appropriate state and local officials.

- I understand that Jack Watson and Berry Crawford will be going to Alaska after they attend the USDA Workshop to be held in Spokane, March 17-20. Jack Watson could announce that he and you have directed the newly formed Region X FRC Rural Development Task Force to begin at once to negotiate a memorandum of agreement for a state/federal rural development partnership.

- As a broader than FmHA/State agreement, it could be signed by Jack Watson and you or, perhaps, by the Secretary. A special show of concern and commitment by the Secretary could go far to smooth over the ill feelings for the President that derive from the popular animosity toward Interior and the land settlement issue.

- If the ceremony took place while the COSCAA group was there, the agreement could be credited for the assistance they would be there to provide--and it would impress them too.

- As you know, the Alaska Railroad is crucial to the development of large-scale agriculture in the Delta area near Fairbanks. There is a lot of controversy over freight rates--the RR wants to charge the barley project full costs for returning the empty train, making the price of the barley noncompetitive. I recommend that a task force to address this issue be set up soon. Berry Crawford has a special interest in it. With your direction, I could work with him and Bob Palmer to get something going right away.

NOTES:

- The Alaska natives control most of the state's developable private land and venture capital. State officials and the public recognize this and seem to be very eager and quite willing to give the natives a prominant role in the state's development.

- On the other hand, at a legislative hearing on discrimination, I heard a lot of testimony that the pipeline and drilling companies discriminate against minorities and women.

- The development of a bottom fishing industry is of special concern to the White House. EDA has funded an infrastructure development planning project to develop a plan that could coordinate and guide investments of public funds by federal agencies, the state, municipal governments, and port districts in support of fisheries development and related community growth. No doubt, a lot can be learned from this project on how to go about creating a joint investment strategy in Alaska.

- A study to inventory all of the task forces, committees, etc., involving federal agencies is underway under the aegis of the Seattle FRC.

Dear Senator Sturgulusky,

I would like to extend my thank you on behalf of A.V.C.P., Employment & Training and other City Administrators who participated on the Government outreach Program.

I really appreciate your concern for formation of Rural Development Office and formation of Rural Development Council. Your effort as a chairman for Senate Community and Regional Affairs Committee will have positive economic impacts to rural Alaska Communities.

I have drafted a resolution supporting H.B. 932 to be adopted by Akiachak City Council. Your effort to establish healthy economic base will benefit the whole community as well as other villages.

Your support to allow more Revenues to be allocated to rural Alaska will help municipal governments to establish healthier economic base.

Thank you for your effort.

Sincerely,

Sam George

SUBJECT: Attached (testimony on HB 932)

Attached, for your information and comment, is a copy of the testimony I prepared and delivered last Friday before the Joint House/Senate CRA Committees on HB 932.

In essence, it is a good Bill and sorely needed to meet the problems and issues it identifies. My only problem is that it doesn't seem to go far enough to serve as an instrument to truly force the Administration to develop appropriate rural Development policies for Alaska.

I would be interested in your comments and observations. Clearly, the time has come to push this issue.

Thanks for your help.

TESTIMONY OF

PHIL SMITH, EXECUTIVE DIRECTOR
RURAL ALASKA COMMUNITY ACTION PROGRAM, INC.

BEFORE

JOINT HOUSE/SENATE COMMUNITY AND REGIONAL AFFAIRS COMMITTEES

HB 932

MARCH 28, 1980

Administration • P.O. Box 3-3908, Anchorage, Alaska 99501 • (907) 279-2511

Ladies and Gentlemen of the Joint Committee on Community and Regional Affairs, for the Record, my name is Phil Smith. As Executive Director of the Rural Alaska Community Action Program, I welcome and appreciate this opportunity to testify on House Bill 932, and to express my support for its passage. Clearly, the issue of rural development in Alaska is one which is both timely and appropriate for the Legislature to address.

At the outset, I would like to congratulate the author and sponsor of the Bill for recognizing the serious plight of rural Alaska. Further, the Statement of Findings, Policy, and Purpose contained in Section 1 of the Bill is laudable, if for no other reason than that the Bill proclaims the policy that "Villages and small communities should exist in the State." In spite of that important and significant policy statement, however, Section 1 may be a little too open to interpretation. Terms need to be defined.

For instance, what is really meant by "Rural Development," a "healthly private economic base," and "the advocacy of a private economy?" If the assumption is that the public interest is to be served by the existence of small towns and vallages in Alaska, then the Bill's emphasis on development of a "private economic base" seems to me to respond to only a small part of the challenge.

There is no doubt in my mind that there is a demonstrated need for the State of Alaska to develop an economic policy for rural Alaska. Absent such a policy, the "economic crisis" referred to in the Bill will undoubtedly continue. Also, absent such a policy, it will be difficult, if not impossible, to devise and implement appropriate policies relating to Energy, Transportation, Telecommunications, Human Services, Local Government, and the whole host of other public issues which impact the lives of village people.

So, yes, we need an economic policy. I am not sure, however, that we need to develop such a policy by transferring all of the assumptions of the Western Cash Economy onto the backs of village people. An "economic policy" for rural Alaska must be one which is appropriate to each locale, not one that is designed only to maximize capital i' the private sector in order to develop busisnesses for their own sake. An appropriate economic policy for rural Alaska must include a thorough and sensitive analysis of the nutritional/cultural/economic imperative of subsistence. Additionally, it must be planned and it must grow from the village and from the villager's own aspirations. Any "economic policy" devised in Washington or Seattle or Juneau or Anchorage and thrust upon the villages may well do far more harm than good.

Accordingly, as the language of HB 932 is further developed, I would suggest that the Statement of Findings, Policy, and Purpose be re-worked to demonstrate a high degree of sensitivity to what rural development is really all about -- that is, the well-being of rural Alaskan people on their own terms, with t heir own expectations being the bell-wether against which to measure its success, and the freedom and the authority to control their own destiny. It is clearly not enough to import the failing of the Western Cash Economy to rural Alaska.

All of the above implies a significant and most complex challenge for those who would develop public policy. Unfortunately, the mechanism proposed in HB 932 (the creation of a "Rural Development Council" and a staff position, both lodged within the Office of the Governor) may not be adequate to respond to the issues and concerns that the Bill itself identifies.

The pervasive assumption behind the need to create the Council and the Office of Rural Development is that existing mechanisms already available to the Administration (such as the Department of Community and Regional Affairs and other line

DEPARTMENTS AND AGENCIES OF STATE GOVERNMENT, THE DIVISION OF POLICY DEVELOPMENT AND PLANNING IN THE GOVERNOR'S OFFICE, THE STATUTORIALLY AUTHORIZED BUT UNFUNDED RURAL AFFAIRS COMMISSION, AND OTHER STRUCTURES AVAILABLE TO THE GOVERNOR) LACK EITHER THE MANDATE, THE ' OR THE DIRECTION TO DO THE JOB. SINCE THERE IS A PERCE OF COMMITMENT ON THE PART OF THE ADMINISTRATION TO FORTHRIGHTLY ADDRESS THE PROBLEM, I AM CONCERNED THAT ALL THIS BILL REALLY DOES IS TO HAND THE GOVERNOR YET ANOTHER STRUCTURE WHICH MAY OR MAY NOT FUNCTION. THEREFORE, BOTH THE POWER AND THE AUTHORITY OF THE COUNCIL NEED TO BE CONSIDERABLY EXPANDED.

ANOTHER CONCERN I HAVE WITH THE STRUCTURE, SCOPE, FUNCION, AND MANDATE OF THE COUNCIL, AS OUTLINED BY THE BILL, IS THAT (WITH THE EXCEPTION OF THE DIRECTOR OF THE COOPERATIVE EXTENSION SERVICE OF THE UNIVERSITY), THERE IS NO ROOM FOR FEDERAL INVOLVEMENT. PRESIDENT CARTER'S DECEMBER 20TH PROMULGATION OF THE "SMALL COMMUNITY AND RURAL DEVELOPMENT POLICY" OF THE UNITED STATES GOVERNMENT IS A CLEAR INVITATION AND A CHALLENGE FOR GOVERNORS TO EXTABLISH STATE RURAL DEVELOPMENT COUNCILS AS MECHANISMS FOR INSURING COORDINATION OF JOINT FEDERAL/STATE EFFORTS TO IMPLEMENT LOCAL RURAL DEVELOPMENT PRIORITIES. IN SHORT, THE PRESIDENT IS ASKING STATES TO TELL THE FEDERAL GOVERNMENT WHAT RESPONSES IN FEDERAL POLICY AND PROGRAMS AND FUNDING PRIORITIES ARE NEEDED IN ORDER TO ACTUALIZE THE DEVELOPMENTAL DESIRES OF RURAL AMERICA.

ALTHOUGH I ADMIT IT IS POSSIBLE (EVEN TEMPTING ON OCCASION) TO BE CYNICAL ABOUT THE MOTIVES OF THE FEDERAL GOVERNMENT AS THEY RELATE TO ALASKA, THERE IS EVERY INDICATION THAT, AT LEAST IN THIS INSTANCE, THE PRESIDENT IS SERIOUS. IF THE PURPOSE OF HB 932 IS TO ESTABLISH A STRUCTURE TO TAKE ADVANTAGE OF PRESIDENT CARTER'S RURAL INITIATIVES, IT SEEMS TO ME THAT FEDERAL PARTICIPATION OF THE COUNCIL IS INDICATED.

IN CLOSING, I WOULD LIKE TO REITERATE MY SUPPORT OF HB 932, AND URGE ITS PASSAGE ONCE MORE. AS I NOTED EARLIER, THERE IS A SIGNIFICANT LACK OF POLICY DEVELOPMENT AND POLICY

DIRECTION RELATING TO COMMUNITY DEVELOPMENT IN RURAL ALASKA. THAT THIS FACT IS RECOGNIZED BY THE AUTHORS OF THE BILL AND BY THE COMMITTEES HOLDING HEARINGS ON IT IS A SIGNIFICANT STEP IN THE RIGHT DIRECTION. THE WEAKNESSES IN THE BILL WHICH I HAVE NOTED IN THIS TESTIMONY ARE MINOR. SHOULD THE COMMITTEES BE INTERESTED, I WOULD BE HAPPY TO WORK WITH THE MEMBERS TO ASSIST IN DRAFTING APPROPRIATE AMENDMENTS. BEYOND THAT, I AM SURE THAT OTHERS TESTIFYING TODAY WILL LIKEWISE COMMIT THE NECESSARY TIME AND EFFORT TO ASSURE THAT A COMMITTEE SUBSTITUTE EMERGES WHICH CAN DO THE JOB THAT SO DESPARATELY NEEDS TO BE DONE.

THANKS VERY MUCH FOR THE OPPORTUNITY TO TESTIFY. I WOULD BE HAPPY TO ENTERTAIN ANY QUESTIONS YOU MIGHT HAVE.

Date: 3-19-90

Before the House Community and Regional Affairs Committee
March 19, 1980

MR. CHAIRMAN, SENATORS AND MEMBERS OF THE COMMITTEE:

MY NAME IS BOB PALMER. I AM THE SPECIAL PROJECTS COORDINATOR FOR THE OFFICE OF OF THE GOVERNOR AND I AM HERE TODAY TO PRESENT THE VIEWS OF THE HAMMOND ADMINISTRATION ON HOUSE BILL 932.

PERHAPS A LITTLE BACKGROUND WOULD BE BENEFICIAL TO PUT THE SITUATION IN FOCUS.

GOVERNOR HAMMOND AND I ATTENDED THE ANNUAL MEETING OF THE WESTERN GOVERNORS' ASSOCIATION IN SUN VALLEY, IDAHO, LAST SUMMER -- JUNE 10 - 13, 1979. AT THAT MEETING, JACK WATSON, EXECUTIVE ASSISTANT TO PRESIDENT CARTER, AND ALEX MERCURE, UNDERSECRETARY OF AGRICULTURE, PRESENTED TO THE GOVERNORS A SUMMARY OF A NEW FEDERAL PROGRAM THAT HAS COME TO BE KNOWN AS THE WHITE HOUSE RURAL INITIATIVES PROGRAM. THIS WAS PRESENTED AS A TOP PRIORITY PROGRAM OF PRESIDENT CARTER WITH JACK WATSON AND ALEX MERCURE SERVING AS CO-CHAIRMEN. THE ULTIMATE OBJECTIVE IS SIMPLY TO IMPROVE LIVING CONDITIONS AND LIVES OF THE PEOPLE IN RURAL AMERICA. ALL ALASKA IS TOTALLY RURAL OR SMALL COMMUNITY AND THE OVERALL STATE WOULD BE INVOLVED IN THIS EFFORT.

SHORTLY AFTER THAT MEETING, UNDERSECRETARY MURPHY SPENT ABOUT TEN DAYS TRAVELING THROUGHOUT RURAL ALASKA, SURVEYING THE LIVING CONDITIONS AND FAMILIARIZING HIMSELF WITH SOME OF THE PROBLEMS OF ALASKA.

AT THE END OF THAT TIME, HE MET WITH GOVERNOR HAMMOND AND ME TO DISCUSS THE POSSIBILITY OF ALASKA ACCEPTING THE FEDERAL GOVERNMENT'S OFFER TO JOINTLY ADDRESS THE PROBLEM AND ATTEMPT TO GET BETTER RESULTS FROM THE FEDERAL DOLLARS NOW COMING INTO ALASKA.

AT THE END OF THAT MEETING, GOVERNOR HAMMOND STATED THAT HE DID WISH TO INITIATE SUCH A PROGRAM TO MAKE THAT COMMITMENT TO RURAL DEVELOPMENT AND THAT THE ALASKA AGRICULTURAL ACTION COUNCIL WAS DESIGNATED AS THE STATE AGENCY RESPONSIBLE FOR THE THE PROGRAM IN ALASKA. GOVERNOR HAMMOND REPEATED THOSE STATEMENTS IN A SUBSEQUENT LETTER TO SECRETARY BERGLAND, SECRETARY OF AGRICULTURE. ON THE WASHINGTON LEVEL, THE DEPARTMENT OF AGRICULTURE IS THE LEAD AGENCY OF A TEAM COMPOSED OF TOP-LEVEL PEOPLE DESIGNATED FROM MOST OF THE OTHER DEPARTMENTS. ON THE REGIONAL X LEVEL IN SEATTLE, THE TEAM IS CHAIRED BY DON CAMPBELL, U.S. DEPARTMENT OF AGRICULTURE.

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

November 14, 1979

TO WHOM IT MAY CONCERN:

This is to introduce Kris Patterson, a Research Associate with the Alaska Native Foundation.

The Foundation is working on a project for the Legislative Budget and Audit Committee to research and document the background, mechanisms and success of the interagency agreements between the Federal Government and various states.

Information gleaned from this process and subsequent recommendations are being developed in cooperation with the Office of the Governor.

We would appreciate any assistance which you can provide Ms. Patterson relative to this project.

BOB PALMER
Special Projects Coordinator
Office of the Governor

REPRESENTATIVE JIM DUNCAN
Chairman
Legislative Budget and Audit Committee

A CONSIDERABLE AMOUNT OF TIME HAS ELAPSED AS THE FEDERAL GOVERNMENT FLESHED OUT THE BONES OF WHAT WAS ORIGINALLY ONLY THE SKELETON OF A CONCEPT.

ON DECEMBER 20, 1979, PRESIDENT CARTER FINALLY WENT PUBLIC WITH THE OFFICIAL ANNOUNCEMENT OF THE WHITE HOUSE RURAL INITIATIVES PROGRAM AND THE MECHANISM FOR ACCOMPLISHING ITS OBJECTIVES BEGAN TO TAKE SHAPE.

OVER THE MONTHS, THE GOVERNOR'S OFFICE HAS HAD NUMEROUS CONTACTS WITH WHITE HOUSE OFFICIALS AND SECRETARY BERGLAND IN TRYING TO DETERMINE HOW THE PROGRAM WAS EVOLVING AND THE PROPER ROLE OF THE STATE IN ORDER TO MAXIMIZE THE BENEFIT TO THE STATE AND ITS PEOPLE.

FINALLY, ON THE 26TH OF FEBRUARY, THE GOVERNOR AND I MET WITH WHITE HOUSE OFFICIALS AT THE NATIONAL GOVERNORS' ASSOCIATION ANNUAL MEETING IN WASHINGTON, D.C., AND LAID OUT THE SCENARIO AS WE WOULD LIKE IT TO WORK IN ALASKA. THERE WAS COMPLETE APPROVAL OF OUR PROPOSAL.

HB 932 introd. Mar. 4, 1980

ON MARCH 7, THE ALASKA STATE COMMISSIONERS OF COMMERCE AND ECONOMIC DEVELOPMENT,

COMMUNITY AND REGIONAL AFFAIRS, EDUCATION, FISH AND GAME, HEALTH AND SOCIAL SERVICES, LABOR, MILITARY AFFAIRS, NATURAL RESOURCES, AND TRANSPORTATION WERE ADVISED OF THE GOVERNOR'S INTERACTION WITH THE FEDERAL GOVERNMENT AND REQUESTED TO DESIGNATE A TOP-LEVEL ASSISTANT TO SERVE ON THIS TEAM, COMMITTEE OR COUNCIL OR BECOME MEMBERS THEMSELVES. THE DIVISION OF POLICY DEVELOPMENT AND PLANNING HAD ALREADY BEEN BROUGHT ON BOARD. SIMULTANEOUSLY, WE BEGAN SEARCHING FOR A FULL-TIME EXECUTIVE DIRECTOR TO STAFF THE COMMITTEE OR COUNCIL.

WE ARE BROADENING THE EXPERTISE OF THE GROUP STILL MORE BY INVITING REPRESENTATIVES FROM THE ALASKA FEDERATION OF NATIVES, AS WELL AS OTHERS FROM THE PRIVATE SECTOR, WITH BACKGROUND AND KNOWLEDGE OF RURAL ALASKA.

AS AGREED TO BY THE WHITE HOUSE, THIS GROUP--WITH VERY BROAD-BASED EXPERTISE AND EXPERIENCE IN RURAL ALASKA--WILL ATTEMPT TO IDENTIFY THE MAJOR PROBLEMS OF RURAL ALASKA, AGREE UPON THE BEST SOLUTIONS TO THOSE PROBLEMS, PRIORITIZE THE PROBLEMS AND SOLUTIONS, THEN WORK WITH THE FEDERAL GOVERNMENT TO REDIRECT THE EXISTING STREAMS OF FEDERAL DOLLARS COMING INTO ALASKA, AND THE STATE FUNDS THAT MAY BE

AVAILABLE TO IMPLEMENT THOSE SOLUTIONS. THAT IS A MAJOR REAL OPPORTUNITY.

THE FEDS HAVE EMPHASIZED THAT THERE WILL NOT BE ADDITIONAL FEDERAL DOLLARS; IN FACT, IF PRESIDENT CARTER'S BUDGET CUTS GO THROUGH, THERE WILL BE FEWER FEDERAL DOLLARS. THE OPPORTUNITY IS SIMPLY ONE OF GIVING THE STATE MORE SAY ABOUT HOW THE FEDERAL DOLLARS ARE USED AND, HOPEFULLY, GETTING MORE BANG OUT OF THE FEDERAL BUCK, WHILE SIMULTANEOUSLY DETERMINING THE PRINCIPAL USES OF STATE FUNDS IN RURAL DEVELOPMENT.

WE HAVE BEEN ASSURED THAT FARMERS' HOME ADMINISTRATION 111 PLANNING FUNDS ARE AVAILABLE FOR AT LEAST A PORTION OF THE STAFFING REQUIRED. WE HAVE ALSO BEEN ADVISED THAT EDA 304 FUNDS ARE AVAILABLE FOR THIS PURPOSE.

IN SUMMARY, MR. CHAIRMAN, GOVERNOR HATFIELD HAS BEEN ADDRESSING THIS OPPORTUNITY FOR APPROXIMATELY EIGHT MONTHS. THE TEAM, COMMITTEE, OR COUNCIL THAT IS BEING ASSEMBLED IS BROADLY BASED WITH A VERY WIDE BACKGROUND OF EXPERTISE. A SEARCH IS NOW UNDERWAY FOR AN EXECUTIVE DIRECTOR TO HEAD THIS EFFORT ON A FULL-TIME BASIS. THE OBJECTIVES OF THIS GROUP SEEM IDENTICAL TO THOSE INDICATED IN

HB 932.

IN VIEW OF THE ABOVE, IT WOULD APPEAR THAT PASSAGE OF HOUSE BILL 932 WOULD RESULT IN A RATHER COMPLETE DUPLICATION OF EFFORT.

THANK YOU.

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

MEMORANDUM

To: The Honorable Lee McAnerney
Commissioner
Department of Community and Regional Affairs

From: W. I. "Bob" Palmer
Special Projects Coordinator
Office of the Governor

Date: March 7, 1980

Re: White House Rural Initiatives Program

NOTE: HB 932 was introduced Mar. 4

Shows nearly complete ignorance of the situation.

President Carter has recently publicized the concept of the White House Rural Initiatives Program. Governor Hammond has designated the Alaska Agricultural Action Council as the "lead agency" for State participation in this program. The AAAC has carried on discussions with the White House staff for several months on the procedures for implementing this program.

In essence, the State team has the opportunity to take an overall view of Alaska, identify the problems and potentials--of all kinds--facing Alaskans, prioritize the solutions to the problems, and then work with the Federal Government to redirect the streams of Federal monies flowing to Alaska through existing channels to fund those State-established priorities. In other words, if we believe we can get a more effective bang out of the Federal buck, then we have the opportunity to achieve that.

The possible solutions to Alaskan problems to be addressed by the White House Rural Initiatives Program are primarily conceived of as those that can be reached through increased job opportunities. Such jobs may be the result of rather massive industrial development activities, such as the potential bottom-fish industry, or of projects as small as a single-family, commercial truck garden in the Aniak area, producing vegetables for sale on the retail market in Bethel.

The opportunity now before us is a very unusual one -- a very exciting one and one with tremendous potential for achievement. Obviously, if the potential of this opportunity is to be realized, it will require a much broader base of expertise than is possessed by the Agricultural Action Council and a very considerable expenditure of time and effort by the team and its members.

Would you please designate a top-level, energetic, creative-thinking individual from your staff to serve on this team and notify me of your designation by March 21, 1980?

We will also need a great deal of participation from the private sector to round out this team and achieve the broad base of expertise needed.

It is my thinking also at this time that both the opportunity and the workload offer such tremendous potential benefits that we need to hire a top-quality executive director who can devote full time to heading up this effort rather than trying to add an additional load to someone already working full time in other responsibilities.

Any suggestions that you may have for obtaining the greatest benefits possible for Alaskans from this opportunity will be very welcome, now and on a continuing basis.

Thank you.

REPRESENTATIVE JIM DUNCAN
CHAIRMAN
BUDGET & AUDIT COMMITTEE

MEMBER
FINANCE COMMITTEE

M E M O R A N D U M

TO: Representative Jim Duncan
Chairman, Budget & Audit Committee

FROM: Gordon Stockdale
Economic Development Coordinator

SUBJECT: White House Strategy

DATE: September 14, 1979

Since we assumed the task of overseeing the development and implementation of the Carter administration's new Title VII Private Sector Initiatives Program, we have discovered ourselves in a position of ever greater responsibility for understanding the extremely complex relationship that exists between state and federal agencies that purport to be involved in activities relating to the broad general subject of 'economic development.'

House Speaker Terry Gardiner's mandate to monitor a very distinct change in emphasis to the nationally significant CETA program reflected a deep and, as we have seen, well placed concern that here an opportunity may exist which if left to the diffuse whimsy of precedent and existing vested interests might pass without any benefit to Alaska.

It has become obvious that the proposed reorgnization of CETA, and indeed every agency affected by the President's initiatives holds more interest for Alaska than any of us could have realized at the outset. Carter is facing a tough fight for his party's nomination, and an even harder effort to serve a second term as President. At least at this time, a new and inspiring domestic policy is essential to his administration, he is vulnerable and he needs a model to show the nation.

With Kennedy's official entry in the race for the Presidential nomination, we may reasonably expect Carter to extend his

efforts to enhance his stature as a viable candidate. With SALT II facing an almost certain failure in the Senate, or at the very least, a complete subversion of the President's autonomy in international affairs. In conjunction with the recent Andrew Young dismissal, it would be reasonable to assume that the major effort of the Carter administration will focus on his domestic policy, primarily through the medium of the energetically pursued but foundering White House Initiatives.

We have been fortunate in developing an excellent working relationship with this state's CETA prime sponsor and more recently, with the Governor's office through Bob Palmer, his Special Projects Coordinator. In that we are able to achieve such a high level of concurrence in the scope of the task in Alaskan economic development along with an appropriate structure to represent and pursue Alaska's interests, we are an attractive medium for the Carter administration to apply its resources to. We have simultaneously begun to enjoy a closer relationship with the growing cooperation and coordination of the Native Regional Corporations and their affiliated Title III prime sponsors. The prospect of nurturing a responsible, representative forum of Alaskan economic interests is especially relevant at this time.

DEPARTMENT OF AGRICULTURE
OFFICE OF THE SECRETARY
WASHINGTON, D.C. 20250

Honorable Jim Duncan
Chairman, Legislative Budget
and Audit Committee
House of Representatives
State Capitol, Pouch V
Juneau, Alaska 99811

Dear Mr. Chairman:

Thank you for your thoughtful and informative letter of October 15. I am gratified to hear that Mr. Stockdale shares my feelings that our September meeting with him and his staff was indeed productive.

I am very pleased to learn of the beginning progress you are making in developing a structural plan to overcome the most fundamental obstacles to a healthy rural economy in Alaska, and I especially welcome your invitation to us to become involved at this early stage. These developments fit in quite well with our own thinking and plans at this time.

Specifically, as Secretary Bergland has just written to Governor Hammond, I have assigned Craig Bigler of the Farmers Home Administration to work with state and federal representatives in Alaska to assess the current situation and develop recommendations on the issues we can address jointly. Mr. Bigler has arranged to meet with Bob Palmer and with other state officials at Mr. Palmer's discretion in Juneau on November 13, and undoubtedly Gordon Stockdale will be at this meeting. Mr. Bigler will meet with Secretary Bergland's representative, James Fisher, and with other USDA officials in Anchorage on November 14. He will be in Homer on the 15th to consult with state and federal officials attending a Small Farms Committee meeting there.

We are confident that these meetings will provide at least a beginning consensus on issues that can be productively addressed through joint federal-state approaches that meet our mutual objectives of being fully sensitive to Alaska's priorities. Mr. Bigler will prepare a report for me synthesizing the findings and presenting recommendations on approaches that we might pursue. We will of course be in contact with you and other Alaska officials as soon as the report is completed, to obtain review and comments and to plan the next steps.

Your enthusiasm about the joint efforts we are pursuing, your hope that they will result in a model for other states, and your kindness in taking the time to express your commitment to these objectives through your letter are deeply appreciated.

Sincerely,

October 15, 1979

Mr. Alex P. Mercure
Assistant Secretary for Rural Development
U.S. Department of Agriculture
219 N. Agriculture Building
14th Street & Independence Ave. S.W.
Washington, D.C. 20250

Dear Mr. Mercure:

Please accept my sincere appreciation for the time you afforded my staff in Washington in September.

Mr. Gordon Stockdale reported an excellent meeting with you that achieved a considerable understanding of the magnitude of Alaska's economic development potential and the opportunities associated with it.

As Gordon explained to you, we in the legislature and members of Governor Hammond's administration are working toward a rural development strategy that will achieve a very broad consensus of appeal in Alaska. The resulting strategy will lend itself readily to a cooperative partnership with President Carter's White House Initiatives in Rural/Urban Development, Employment, Energy, Communications and Transportation to name only the most obvious relationships.

The Alaska Rural Development strategy is in its formative stage at this time. Members of the Alaska Legislature's House of Representatives and Senate, and the Office of the Governor are cooperatively developing a structural plan to overcome our most fundamental obstacles to a healthy rural economy. We regard this task basic to the development of a healthy statewide economy since a strong rural sector naturally supports the economies of the urban service centers.

We encourage and solicit the involvement of the Department of Agriculture in this early stage of development of what we hope will serve as a realistic model for other states and emerging economies to apply to their own situations.

Sincerely,

Representative Jim Duncan
Chairman, Legislative Budget
and Audit Committee

DEPARTMENT OF AGRICULTURE
OFFICE OF THE SECRETARY
WASHINGTON, D. C. 20250

Most IMPORTANT!!

January 21, 1980

SUBJECT: Special Assignment on Alaska

TO: Alex P. Mercure
Assistant Secretary
for Rural Development

I met first with the staff director of the Seattle FRC in Seattle. In Juneau, I met with both administrative and legislative staff as arranged by Governor Hammond's assistant, Bob Palmer. I spent considerable time with Secretary's Representative Fisher, FmHA State Director Roderick, Alaska Federation of Natives President Morrie Thompson (former head of BIA), the small farms and conservation districts committees, and many other citizens, legislators, and natives. Opinions expressed to me were amazingly consistent on the following issues:

- Political labels are quite unimportant. Support for an organized approach to rural development has bipartisan support in the legislature and between the legislature and the governor. There seems to be wide support for Lt. Governor Terry Miller as the next governor.

- Development needs are well defined and understood as you heard when you were there last June.

- The State has incredible developmental resources at its disposal through the oil revenues--yet there is universal concern that only the other guy's needs will be met and not everyone's, and that the revenues will be used to meet short-run exigencies rather than to build a viable economy that can sustain itself after the oil revenues cease.

- The State must develop a self-sustaining economy--and, in particular, a viable agriculture economy--in order to avoid continuous boom and bust cycles.

- The main problems are seen as the inflexibility of federal programs, in program managers who cannot respond to the unique needs and opportunities of the State, and the lack of coordination among federal programs and the management of them.

A less widely recognized problem soon became clear: the main problem is not the lack of federal flexibility as much as it is a lack of political consensus in the State. As the President's Policy on Small Community and Rural Development emphasizes, rural development programs of all levels of government come together at the State, not the national level. Effective coordination of policy and activities must, therefore, be under strong leadership within states. Alaska has the resources but has not had the political will to forge a consensus on the use of the resources. Until a consensus is developed, assumption of leadership for rural development involves great risk.

Evidence of the lack of consensus is in the myriads of task forces, committees, subcommittees, conferences, hearings, and on and on that exist in the state to bring the right people together and to coordinate their efforts--and to avoid having to make the hard choices. The numbers of them and the frequency of their meetings is mind-boggling in a state with less than half a million population spread over such great area. The problems and opportunities have been studied, debated, discussed, and reported on almost beyond comprehension. Yet, there exists nothing to bring them together into a coherent whole. Recommendations abound, but no one has yet been able to devise the tradeoffs necessary to subordinate goals and priorities.

Recently, however, several things have fallen into place:

- o Governor Hammond has asked Secretary Bergland to work with him to create a state/federal partnership for rural development.

- o The staff of Representative Jim Duncan, Chairman of the House Budget and Audit Committee, has just about completed a study and recommendations of desirable relationships for coordinated development among state agencies, and a framework to work out others.

- o The President's policy provides the vehicle necessary to get federal agencies organized and working with each other and with state and local officials at the federal and the state levels.

With the exception of one issue, the Alaska Railroad (discussed below), the federal government should not attempt to assume the state's burden by setting up a study or a series of task-oriented task forces. The problems have been studied to death. What is needed is full federal support for the state's assumption of the role of convening the important actors to begin to set priorities. Once the priorities have been set, the federal government, with the state, can pursue activities--or further studies if necessary--to meet the priorities.

If the Governor is willing to designate a Rural Development Council in accord with the President's invitation, and if he is willing to put it under the leadership of someone with recognized status (the Lt. Governor, for example), federal agencies will be willing to participate as per their orders from the Working Group on Small Community and Rural Development. Thus, the structure for state policy-setting plus intergovernmental coordination of policy and implementing actions would be in place.

Life could be breathed into such a structure, and political consensus boosted, by a highly visible state/federal memorandum of agreement to make it all work. USDA, through the Seattle FRC Rural Development Task Force, should take the lead role in preparing and implementing the agreement. (The study being prepared for Representative Duncan's Committee recommends that USDA (FmHA) take the lead among federal agencies. Both the Department and Secretary Bergland are popular in Alaska.) A highly visible agreement and effort to develop a joint investment strategy are very important because of the huge federal presence in Alaska and the universal distrust of the dominant federal partner--the Department of the Interior.

An agreement could specify the course to be followed to reach initial consensus on overall goals and priorities. So that all federal agencies would have reason to actively participate, the agreement could even specify task forces and lead agency responsibility to perform the background work necessary to set priorities. The agreement could provide funding for staff to the Governor's Council: EDA 304 funds could be used as well as FmHA 111 funds. Other agencies, especially Interior, could be encouraged to contribute.

It would take some very high quality staff work to help forge the consensus and leadership that are necessary. Someone will have to be brought into the state at a high salary. This and the high travel costs will make the staff support quite expensive.

RECOMMENDATIONS:

- The Board of Directors of the Council of State Community Affairs Agencies (COSCAA) is meeting in Juneau early in July. This will get some very high-powered state officials into Alaska, e.g., Hank Huckaby, Community Affairs Commissioner in Georgia; and Paula Herzmark, Executive Director of the Department of Local Affairs in Colorado. If we will cover their additional per diem and travel expenses, they will conduct training seminars and dialogues with appropriate state and local officials.

- I understand that Jack Watson and Berry Crawford will be going to Alaska after they attend the USDA Workshop to be held in Spokane, March 17-20. Jack Watson could announce that he and you have directed the newly formed Region X FRC Rural Development Task Force to begin at once to negotiate a memorandum of agreement for a state/federal rural development partnership.

- As a broader than FmHA/State agreement, it could be signed by Jack Watson and you or, perhaps, by the Secretary. A special show of concern and commitment by the Secretary could go far to smooth over the ill feelings for the President that derive from the popular animosity toward Interior and the land settlement issue.

- If the ceremony took place while the COSCAA group was there, the agreement could be credited for the assistance they would be there to provide--and it would impress them too.

- As you know, the Alaska Railroad is crucial to the development of large-scale agriculture in the Delta area near Fairbanks. There is a lot of controversy over freight rates--the RR wants to charge the barley project full costs for returning the empty train, making the price of the barley noncompetitive. I recommend that a task force to address this issue be set up soon. Berry Crawford has a special interest in it. With your direction, I could work with him and Bob Palmer to get something going right away.

NOTES:

- The Alaska natives control most of the state's developable private land and venture capital. State officials and the public recognize this and seem to be very eager and quite willing to give the natives a prominant role in the state's development.

- On the other hand, at a legislative hearing on discrimination, I heard a lot of testimony that the pipeline and drilling companies discriminate against minorities and women.

- The development of a bottom fishing industry is of special concern to the White House. EDA has funded an infrastructure development planning project to develop a plan that could coordinate and guide investments of public funds by federal agencies, the state, municipal governments, and port districts in support of fisheries development and related community growth. No doubt, a lot can be learned from this project on how to go about creating a joint investment strategy in Alaska.

- A study to inventory all of the task forces, committees, etc., involving federal agencies is underway under the aegis of the Seattle FRC.

Rural Development Goals

Initiatives discussed in the report are in support of the five national rural development goals articulated by the Secretary of Agriculture early in the Administration:

1. Improve rural income levels and increase rural employment opportunities.
2. Improve the access of rural residents to adequate housing and essential community facilities and services.
3. Provide a more equitable distribution of opportunities through targeting efforts on distressed areas, communities, and people.
4. Create and implement a process for involving the private sector and local, State, and Federal agencies in establishing policies and programs that affect rural areas.
5. Strengthen the planning, management, and decisionmaking capacity of public and private institutions concerned with economic opportunity and quality of life in rural America.

This is Bob Palmer's Original assignment

July 16, 1979

The Honorable Bob Bergland
Secretary of Agriculture
U.S. Department of Agriculture
Washington, D.C. 20250

Re: Invitation to U.S. Department of Agriculture to join with Alaska to cooperatively establish joint priorities for rural development

Dear Mr. Secretary:

As a result of my meeting with Assistant Secretary Alex Mercure, I would like to invite you to meet with me at a time to be mutually determined so that the State of Alaska could jointly establish with the U.S. Department of Agriculture the federal-state rural development priorities for Alaska.

Mr. Mercure was most emphatic that the State initiatives are the approaches that would be considered at the top of the agenda of such a joint and cooperative effort. It is our understanding that your department has attempted a comparable effort with Puerto Rico. We in Alaska also have situations which differ substantially from national norms complicated by an area larger than the states of Illinois, Indiana, Iowa, Kansas, Missouri, Nebraska, Kentucky, Colorado, Connecticut, Delaware, Hawaii, Maryland, Massachusetts, New Hampshire, New Jersey and Rhode Island combined, and by extreme isolation of many of our rural communities.

Recently the Alaska Legislature has established an Agricultural Action Council. It appears that this group would be a logical one to meet with your designated working group for this study. The Council is composed of both executive branch and public members.

I would suggest as subjects for preliminary planning of such a meeting the following challenging areas:

1. Review of USDA agencies' structures, alignment, coordination and organization to address Alaska's unique opportunities. Adjustment of national policies to better meet diversified Alaska conditions.

2. Accelerated inventory and evaluation of the State's renewable resources.

3. Development of renewable resources through assistance to rural communities such as Native village corporations and regional corporations for:

   a. self-sufficiency in food, energy and shelter

   b. revenue base for profit-making arms of Native corporations

4. Rural transportation initiatives to facilitate rural development.

5. Development of agricultural resources in:

   a. forestry
   b. commercial agriculture
   c. red meat - reindeer and standard domestic livestock
   d. marketing and processing of agriculture resources

6. Research needs unique to Alaska's conditions. This would include energy conservation and utilization of waste heat from Alaska's pipelines.

7. Establish coordination mechanism with like circumpolar nations and Alaska, including exchange of personnel, production techniques and research/data.

8. Technical assistance to build (both farming and ranching) management expertise relating to development of expanding commercial agricultural base, various unit sizes and entry of individuals into the industry with limited and diverse backgrounds.

9. Establish USDA/State coordinating mechanisms at both state and national levels to address priority issues of Alaskan region.

I especially appreciate the fact that federal-state governments cannot and should not do everything for everyone. A study of this type must be able to concentrate upon those activities which would bring the most benefit at the least public expense and adequately meet Alaska's priority needs.

Although a venture of this sort may, perhaps, have some hazards, it

presents almost unlimited opportunities and I feel extremely enthusiastic about the potential of this type of initiative.

Sincerely,

Jay S. Hammond
Governor

cc. James Fisher

MEMORANDUM

TO: Community & Regional Affairs Committee Members

FROM: Rep. Jim Duncan

DATE: March 24, 1980

SUBJECT: House Bill 932

On Wednesday, March 19, House Bill 932 was first heard by a Joint Session of the Community and Regional Affairs Committee. At that time, some concern was expressed over the advisability of adopting an advocacy position toward rural communities and villages as we propose in House Bill 932.

Please let me assure you that there is nothing in the intent of this legislation that supposes the State must accept extraordinary social responsibility for those communities with little or no resources to develop a local economic base. In fact, our current situation of CETA maintenance of otherwise nonexistent cash economies in the absence of State policy has done more to mandate State responsibilities by default than a well-addressed development policy ever could.

In this bill I hope we begin to address some of the problems of inadequate rural access to State infrastructure, uncoordinated agency practices, lack of Private Sector considerations in State policies, and this State's marginal ability to affect Federal-Alaska economic policies and agency practices. The formation of a council in the Governor's office that will begin to do something rather than create another level of study and advisement requires a special commitment on our part and a special structure to do the job.

In many ways, the high cost of government in Alaska is directly related to the same causes of exceptionally high

risk and the high cost of private capital investments in rural development. These problems can be simultaneously addressed. The government role of defining the limit and degree of development Alaska can tolerate requires a counterpoint that seeks to facilitate development within those imposed limits, to the mutual benefit of both the public interest and the objectives of private enterprise.

These roles, though complimentary, can come into conflict if they are vested in the same structure particularly when private industry seeks a fair hearing of its problems and objectives at the same door they were issued their limitations. Similarly, no appointed public official has quite the objective credibility that an elected officer does to reach across broad agency, state-federal, and private industry boundaries to elicit cooperation.

Please examine the enclosed material which further explains the rationale behind HB 932. I welcome your suggestions for improvements to this bill.

JD:jp
Encls.

Representative Dale Locker (Ohio)

Washington Report

A new approach to federal policy on rural development

Rural America—its "changing face," its special needs, and the coordination of the hundreds of federal programs that affect its human and natural resources—was the focus of attention in late December as President Carter announced his Small Community and Rural Development Policy.

The policy, as outlined before a gathering of hundreds of state and local officials and representatives of community-based organizations and the small town business and financial community, combines a set of principles to guide the administration of federal programs, a series of organizational and procedural changes to develop the institutional capacity at the federal and state level to deal with rural issues on a continuing basis, and an "action agenda" of over 100 initiatives to help meet pressing rural needs.

In noting the changes in many rural areas—growth in population, expansion in rural employment, diversification of rural economies—the President argued the need for "a forward-looking policy . . . to manage the effects of such change—to enable individuals and communities to solve their problems and to capitalize on their opportunities."

And yet, he continued, "rural people and communities have proportionately greater unmet basic human needs than do other parts of the nation." Almost 40 percent of the nation's poor live in rural areas. Rural areas have 58 percent fewer physicians, 38 percent fewer dentists and 29 percent fewer nurses, on a per capita basis, and yet a higher incidence of chronic disease exists and more workdays are lost due to illness in the rural sector than in urban areas. While 57 percent of the rural poor and 45 percent of the rural elderly do not own an automobile, public transportation carries less than 1 percent of rural residents who work away from home.

To meet these needs and manage the effects of change in rural areas, the President directed his top administrators to manage their programs so as to recognize local priorities and facilitate decision-making, to invest federal funds in ways that complement state-local plans and priorities, to use federal assistance to help leverage private sector investments, to target federal funds to disadvantaged persons and distressed commmunities in rural areas, to provide local citizens and their leaders with assistance for more effective decision-making and development efforts, and to make federal programs more accessible to rural jurisdictions and better adapted to rural circumstances and needs.

The capacity to implement the policy's principles and initiatives was enhanced by a request to Congress for creation of an Undersecretary of Agriculture for Small Community and Rural Development, who will aid the Secretary in carrying out his responsibilities under the Rural Development Act of 1972, and who will co-chair, along with the President's Assistant for Intergovernmental Affairs, a revitalized Working Group on Small Community and Rural Development.

The Working Group will include top officials from the Office of Management and Budget, the Domestic Policy Staff, the departments of Education, Energy, Transportation, Housing and Urban Development Agriculture, Treasury, Interior, Health and Human Services, Labor, and Commerce, as well as the Environmental Protection Agency, ACTION, the Community Services Administration, the Small Business Administration, and the General Services Administration.

The President also directed the Secretary of Agriculture to appoint an Advisory Council to monitor policy implementation and to advise the Secretary and the Working Group, including participation in an annual review of rural policies, programs and budget levels. Members of the Council will include state and local elected officials, representatives of community-based organizations and other private interest groups, and representatives of the business and financial community.

A second level of advisory bodies would be created with the positive response of governors to the President's invitation to establish State Rural Development Councils. Federal Regional Councils will be directed to set up rural development task forces to assist state implementation efforts, and agency heads will direct their field personnel to participate on the state councils as requested by the governors.

The Secretaries of Housing and Urban Development, Health and Human Services, Education, Commerce, Energy, Labor, Transportation, and Interior, and the Administrators of the Environmental Protection Agency, the Community Services Administration, and the Small Business Administration were also directed to review existing policies and programs in relation to the policy principles, and to designate a senior official to be responsible for monitoring implementation of the policy and to serve as a rural advocate within the agency.

On the Agenda

The "action agenda" announced by the President comprises key actions already taken by the Administration and a series of new proposals which will require executive and/or congressional response to implement. The series of White House Rural Initiatives announced over the past 15 months in the areas of health, sewer and water, rural elderly housing, communications, energy, transportion, and public works forms the core of ongoing agenda items. These actions and new proposals that should be of interest to state legislators include:

Housing—

- extend current four-year, four-state demonstration in state delivery of federal housing and community assistance to other rural distressed communities in those states;
- fully implement initiative on congregate elderly

housing, with social services provided on site ($12.5 million, 10-site demonstration); and
- develop standardized loan application and appraisal forms for HUD, FHA, FmHA, and VA.

Energy—
- implement initiatives to promote small-scale hydroelectric, community-based unconventional gas and small-scale fuel alcohol development;
- support legislation providing $750 million in grants and $1.5 billion in loan guarantees over five years to assist states in meeeting the needs of areas experiencing rapid energy resource development ("boom towns");
- support loans financed from windfall profits tax revenue for construction of small-scale alcohol fuel plants; and
- extend the 4 cents per gallon tax exemption on the sale of gasahol.

Health—
- continue implementation of four-year initiative to construct or rehabilitate 300 primary care clinics and to train and employ rural residents as support staff;
- promote full implementation by HFW of the Rural Health Clinic Services Act;
- place top legislative priority on Child Health Care Program and other preventive care programming for children;
- promote legislation permitting "swing beds" to simplify Medicare and Medicaid reimbursement in rural hospitals; and
- provide incentives to states and local communities to increase access to alcohol and drug abuse programs in rural areas.

Capacity building—
- develop a national program to support locally selected circuit-riding managers to assist rural towns and counties;
- continue to fund FmHA Section III rural planning programs;
- provide technical assistance to rural officials on the use of 1980 census data and improve access to detailed data at the small town level;
- negotiate a single set of application, auditing, and reporting requirements for clusters of federal aid programs; simplify and standardize compliance requirements with cross-cutting federal laws and executive orders.

Transportation—
- continue implementation of the components of the June 1979 initiative, including assistance to commuter airlines and small town airports, rehabilitation of railroad branchliners, promotion of rural ridesharing, and coordination and delivery of social service and public transit;
- propose amendments to provide $100 million per year from 1981-85 for small airport development; and
- support adequate funding of Section 18 (Nonurbanized Public Transportation Program) of Surface Transportation Act of 1978.

Other items of interest include:
- funding the planning and construction of alternative wastewater systems;
- supporting special emphasis on program needs of rural areas in reauthorizing legislation for vocational education;
- requiring state governments to provide adequate access to welfare programs and the Food Stamp program in sparsely populated areas;
- emphasizing rural downtown revitalization through policy to facilitate transfer and lease of federal property, and convening of a national conference on redevelopment of mainstreet;
- fully implementing the Environmental Protection Agency's policy on agricultural land protection;
- adopting as a national goal the elimination of unsafe drinking water during the 1980's;
- fully implementing the Rural Clean Water Program in FY 1980; and
- completing the joint CEQ-USDA study of the effects of conversion of prime agricultural land to other uses and of measures to control such conversion.

The Working Group began its formal deliberations in late January, at which time the process for the appointment of the Advisory Council was initiated. The White House has been in contact with each governor to encourage the designation of a state rural development council. And during the coming weeks, a series of conferences for state and local officials and others interested in rural affairs will be held throughout the country to assist in publicizing and implementing the small community and rural development policy.

Rep. Dale Locker is Chairman of NCSL's Rural Development Committee.

A STATE "ADVOCACY STRUCTURE:"

--FOR ALASKA RURAL ECONOMIC DEVELOPMENT

Composition and Structure Commission/Agency 24

Kinda of Issues and Problems 28

This report suggests several alternative policy structures for guiding a special process of encouraging private economic development in rural Alaska, and for giving that process a "sustainable" emphasis over an extended period of time.

The suggested structures ARE NOT solutions in themselves, but merely represent functional vehicles that can help develop and sustain effort to create a private economic base in rural Alaska.

The proposals inherent in this report are based on the serious conditions of the economy of much of rural Alaska. Additionally, they make a case as to why the "present" might provide special conditions, resources, and a timeliness in attacking such difficult conditions.

PURPOSE IN THE BROADEST SENSE

In the broadest sense, the purpose of a special structure is to marshall, coordinate, and sustain existing and potential federal, state, and private resources capable of contributing to growth of a private economic base for the rural communities and regions of the state.

Further, the structure should provide a single focal point for involving rural Alaska people in the process. Such a structure would be a first attempt at building a state-relationship with Alaska rural development's mosy unique partner --the native land claims corporations.

The private land, capital, and social base of the rural village corporation represents a grassroots structural resource in itself. The availability of such a field level structure in a depressed region is a most favorable circumstance of infrastructure in such general conditions of third-world economic void. However, the state has essentially ignored the existance of the corporations and any inherent state interest in their success or failure.

Any structure must also address "community development" issues basic to a private economic base. However, care must be taken that community development does not dominate the structure, or tend to divert energy from more difficult to resolve economic tasks.

The most important purpose of a special structure must be a strong "missionery dedication" to creation of private economy in rural regions.

THE SPECIAL "PRIVATE" CHARACTER

Two basic features of the mission of rural development in Alaska appear to justify a special structure og government, whether that structure is temporary or permanent.

First, the charge to generate a "private economic base" is not a familiar role of government. Second, responsibilities of such a policy effort tend to overlap the established categories of government programs.

THE NEED FOR SPECIAL EMPHASIS

Special emphasis to a problem outside the bounds of traditional government services is difficult to achieve for line-agencies. A mission may be so critical, and so varied, that indeed it MUST OPERATE BEYOND THE BOUNDARIES OF TRADITIONAL SERVICE AGENCIES. But architects of such things "beyond" the bounds of those service agencies, often fashioned as so-called "coordinators," must concede that more often than not, such creations become quickly isolated and powerless to carry out their tasks within government.

A purported "special structure" cannot hope to invade the "turf" of entrenched agencies, unless first the legislature is thoroughly convinced of the depth of the target problem, and secondly unless the state executive is equally convinced.

In order to avoid the inevitable muted-isolation of such a special structure, the construction of the unit must build-in strong political backing and involvement. Such backing is essential precisely because such a structure is being asked to INTERFERE WITH THE ESTABLISHED ROUTINES OF OLD LINE AGENCIES, or is being asked to "reach" where they cannot reach.

Confronted by an "outside structure" charged with coordination, or the like, an established line-agency will generally take the easiest path. Generally that easiest path is to resist outside interference. Only if there is a very strong commitment in high level policy ranks, or after an agency gets its fingers slapped, will traditional agencies opt to "cooperate," since that then becomes their "easiest path." In other words, in constructing a special structure policymakers must analyze how to give a separate structure special "clout."

A special structure, in commission or agency form, and whether permanent or temporary, cannot be justified unless lawmakers are convinced of the following:

(1) . . . that the economic problem in rural Alaska is catastrophic in scope, or lacking that extreme;

(2) . . . that the mission does not fit traditional program agencies, or spreads beyond the bounds of a number of agencies;

(3) . . . that the problems require a special emphasis, or perhaps are problems easy to slide off for "future action," therefore tending to submerge the mission under the day-to-day crisis of a department.

(4) . . . that the problems are so serious and complex that a line agency lacks the "clout" to deal with the issue, or to initiate action and propose solution without special political backing.

(5) . . . that the mission is genuinely not to "run program," but rather to coordinate and provide muscle for other existing state programs and resources, and to provide the same between government and other institutions (federal, state, local government, non-profit, private).

Additionally, inherent in many of the foregoing criteria is that a special rural development structure should be cast in the role of "advocate." The role of advocate could pose inherent conflicts within some departments, and in the case of a planning agency may compromise that agency by presupposing the outcome of careful planning work. The role of the planning agency may require a very close partnership with the advocate agency, but the planning agency may be something of an alter-ego partner, being required to occassionaly criticize and oppose the more active advocacy of its alter-ego partner.

THE MEASURE OF THE ALASKA "RURAL ISSUE"

The measure of the problem of "rural economy" in Alaska measures very high against most of the previous criteria. Individuals may differ in assessment of degree of the problem, or in the nature of solution, but few are likely to disagree that the condition of the state's rural community economy is indeed catastrophic and has been for more than three decades.

From another view, economic events of the past several decades in Alaska have wrought tremendous growth and changes in urban Alaska. But the economic gap, as well as the sense of alienation between urban and rural Alaska, has widened. This division also tends to follow unfortunate racial lines among Alaskans.

The economic contrasts of rural and urban Alaska presents a picture of prosperous urban islands floating in a sea of rural economic depression.

Whatever the cause or whomever, if anyone, is to blame, the economic condition of much of rural Alaska is undisputably a human tragedy and an embarassment to our democratic economic systems.

SPECIAL OPPORTUNITIES OF THE PRESENT

It is difficult for our system of government to reach into the private economic sector and participate in constructing economic equity. The independence and separate dynamics of our government systems and our private economic systems do not always relate to each other. However, in critical times our systems, while perhaps slow to respond, have generally proven able to rectify glaring inequities.

Looking for the means to build a public/private relationship, a case can be made that unused federal resources are available. Additionally, it appears that federal economic policy is shifting to emphasize priority policy: . . . that only "private jobs" can resolve severe economic problems in the long run.

Present federal policy is shifting resources to rural and development initiatives that stress private development and private employment. These so-called "White House Initiatives" hold out great opportunity to those who are ready for them, for those who can put them together with other available resources, and for those like Alaska, that have a genuine underdeveloped rural base that is starved for "risk capital."

CURRENT ACTION

Recognizing the federal opportunity, the Alaska Legislative Budget and Audit Committee, together with the State Administration, has been working to put together a series of federal/state agreements designed to coordinate federal economic resources through a single federal lead agency, and to put that agency together with a state working counterpart.

The effort would be to coordinate federal resources of value in a rural economic initiative, to maximize those resources, and to clear federal/state barriers to development (regulatory, etc.) on a timely basis.

The state working counterpart would be WHATEVER SPECIAL STRUCTURE THE LEGISLATURE AND EXECUTIVE chooses to approve (which is the primary subject of this report).

PRIVATE RESOURCES

A case can be made also that private resources are now available for rural development that were not present in the past.

The native corporate structure has matured and gained experience in the last eight years. The capital assets of the native corporations, and especially the village corporations represent a "resource" that should be assisted by state and federal development policy.

However, the capital of native corporations in many respects is no different than any other capital. Despite the fact such capital has a social base in the form of resident community stockholders, such capital must still find and/or develop viable projects which offer both reasonable security of the investment and adequate return. It must be stressed that under the law, the native corporations ARE NOT social welfare organizations, but are established as profit making private corporations. They have the same problems in facing high risk frontier development as other corporations, except that their personal motivation to "do it" in the face of higher risk is likely stronger. However, it is possible that the proper use of state and federal resources, in conjunction with native corporate resources, might be able to reduce risk to native capital and encourage the flow of such assets into rural development.

The current proposal to pre-pay the remainder of the state's obligation under land claims settlement will also add significantly to the financial base of native corporation capital. Such an action may be the single largest, and the simplest action, the state can take in regard to rural development.

The private land and resource base that is a part of the land claims structure is also a significant factor in rural development. The goal of a state structure should be to help assist and direct capital to grassroots rural development, regardless of whether that capital is private, state, federal, or native, and to encourage the use of state, federal, and native land and resources in a coordinated fashion in behalf of encouraging a rural private economic base.

Additionally, Alaska financial institutions are now considerably stronger and more varied than a decade ago. They have stronger ties to outside institutions, and due to such world scale developments as Prudhoe Bay, new significance of fisheries resources, a capital and resource base from land claims, Alaska commands a respect far beyond the measure of its present economic production.

STATE RESOURCES

The chief asset of the state is its "position" to act as a focal point in bringing together available existing resources, and to apply to an effort to construct a viable rural private economy.

The state must be, and is the natural initiator of a search for, and a marshalling of, economic resources. Obviously, federal agencies do not come seeking difficult and often risky development efforts.

The state also has basic resources of its own to offer that it did not have a decade ago. The state has the ability to act as initiator of community services related to private development, such as utilities, transportation facilities, and technical assistance. The state has the ability to participate in capital, or to attack basic private financing issues such as fire insurance in rural areas. The state has a "field network" available through program agencies, which with proper coordination, could assist in both local community development and private projects.

The state also offers a superior basic structure with which to coordinate with federal institutional participants. The Alaska structure has a strong central line of authority leading from the governor, and is vastly different than the fractured multi-elective structure that exists in many other states.

THE ALASKA DIFFERENCE: LENGTH AND DEPTH OF COMMITMENT

Alaska requires a long-term commitment to rural economic problems. The state's rural problems are not a result of recent economic recession, or existing sick industries, the problems are a result of more than a quarter century of economic collapse and difficult cultural adjustments. The Alaska effort may require the better part of a decade..

It is here --in length and depth of commitment-- where Alaska differs markedly from the manner in which other state's will approach the development of SPECIAL FEDERAL AGREEMENTS to enhance private economic development. A review of the few existing agreements, and potential agreements, indicates that the agreements appear geared towards one or two "priorities-of-the-day." They seem to carry a hidden presumption of temporariness about them, and lack a strong tie to "joint" executive/legislative commitment and development of intrastate mechanism to focus on more than the "issues-of-the-day." In this respect it is likely the initial motivation of Alaska is different from other states.

In reviewing the federal opportunity for both the state to command and coordinate federal resources, there appears to be a significant opportunity for Alaska to be the only, or at minimum one of the few, states to approach the agreements with a much longer range view in mind.

Alaska has the opportunity to get the federal government committed to state rural development, committed to special treatment and coordination, and to keep that commitment going for a prolonged period. However, in order to command the long-term commitment of the federal government the state must first itself be committed.

As previously stated, economic initiatives under our separate public and private policy systems require a deep commitment to bridge the gap. In Alaska this means a commitment of the executive and the legislature, and further a broadbased commitment within the legislative body. Oddly, the effort must command the commitment of the urban legislator and the perception that the effort is also vital to the urban economies of the state.

Commitment of rural policymakers to such an effort is something to be taken for granted, with some exceptions. However, rural backing and rural development as a "rural issue, can isolate the effort as a regional issue, and one therefore elgible to be pushed, shoved, cut, threatened, bargained, and generally politically played-out in the precarious wars of short-term legislative policy. Unfortunately, long term issues requiring a breadth and depth of commitment, issues needing an expectation of sustainability over time, do not always fare well in the battles of more immediate political pie-cutting.

However, the commitment of urban legislators could provide the commitment to rural development the sustainability it needs. Urban lawmakers have an interest of their own in an expanding and healthy rural economy.

Previously Alaska was described as a series of urban economic islands floating in a sea of economic depression. Whether that picture is overstated can be argued, but the lesson of the protrayal cuts both ways. The picture not only reflects a non-existant rural economy, and all which that infers, but equally a precariously isolated urban economic structure.

The picture is one of precariously narrow urban economies based primarily on government spending, cycles of construction and singular resource development booms, and one of urban communities failing to develop themselves as broad commercial centers serving a growing economy far beyond their own borders.

In other words, for the state's narrow based and isolated urban economies, rural development is "urban development." It is not only urban development, but offers a strongly stabilizing ingredient for the urban economic structure. It is almost impossible to undertake development in most rural areas of the state that does not benefit the urban commercial centers. However, the converse is not true, since urban development may hold no benefits for rural communities.

Urban policymakers may also consider the long-range ramifications of continued neglect of a rural economy:

(1) . . . that the urban/rural economic contrast is both a serious ethical and functional problem for Alaska.

(2) . . . that the end-results of continued rural economic poverty tend to become urban social and economic problems due to out-migration into urban areas.

(3) . . . that in future general economic constrictions, urban unemployed will tend to outmigrate from the state, but that the rural unemployed, represented mostly by native Alaskans, are unlikely to outmigrate except to urban areas due to deep cultutal ties.

(4) . . . that while Alaskan urban economies have grown dramatically over the past several decades, those economies remain narrow.

(5) . . . that in order to develop a stable commercial center, the center must have an economy to serve "elsewhere."

(6) . . . that rural development promotes both direct, and indirect economic activity for urban centers.

(7) . . . . that rural development expands opportunity for larger scale rural resource development, since expanding economic benefits will increase confidence of both urban and rural parties that that such "development" can be managed for mutual benefit.

There must also be an awareness that rural Alaska needs a scale of development we might term "micro development." However, urban inrerests tend to key on "m.rco-development" scale projects, projects on a scale where it is often simply asssumed that there is enough "economic fall-out" to benefit everyone. However, this is not necessarily true, and especially so for non-urban areas.

Carefully managed "marco-scale" development may be made to pay some dividends to rural Alaska. But what rural Alaska does need is micro-development, development that is small, not nearly so exciting and romatic to advocate for policymakers, but which fits the needs and the life-style of rural communities. In a sense, a structure charged with rural economic advocacy will need to learn to "think small," and it will take some adapting on the part of policymakers to think in terms of thousands of dollars, tens of jobs, and etc., instead of on sweeping scales of billions of dollars, world scale resources, and thousands of jobs.

THE POSSIBLE ALASKA STRUCTURES

The purpose of creating a structure is to provide a functional vehicle for policy focus, and to put the label "special" on the structure. Such labeling tends to put the structure, and the policy community, "on notice" that they intend to do something, and to invite scrutiny if they show a lack of performance. A special structure also tends to isolate itself sufficiently to invite participation of interested parties.

Three types of structures appear possible:

(1) A SPECIAL COMMISSION, responsible to the Governor, and working out of the Office of the Governor.

(2) AN OFFICE created within the Office of the Governor. A small agency essentially part of the executive staff.

(3) Assignment to an existing agency with related interests, either creating a new unit thereto, or reorganizing an existing unit.

The basic alternative "settings" for a structure will be discussed in terms of the least viable first.

Assignment to Existing Department

The assignment of the task of rural development advocacy and coordination to an existing department immediately relegates the issue to whatever is the status of that agency.

If the agency is a sub-unit of an existing division, of an existing department, then it is likely the federal government would view the state effort in much the same manner of other states --that the structure has one of two priorities and little other interest.

It is not the intent here to be critical of the ability of any one of several possible agency operators, but rather to suggest that it is asking alot of a sub-component agency to be able to become not only an interagency coordinator among state agencies, but also between state and federal governments and between government and the private sector.

As a sub-component within a line-department, a rural economic development initiative would first have to command its fair share of attention by department heads from among the "daily crisis" of regular operating programs.

Next, since such a rural effort would reach beyond departmental confines, not only would the rural effort have to battle for survival among competing demands within the department, but also it would have to survive among competing demands outside the department. Such a program would constantly require the department chief officer to run interference in coordinating problems with other departments, as well as with key players in the governor's office and with other institutions. The sub-departmental assignment can be made to look good on an organizational chart, but likely asks a line-agency chief, already besieged with enough operational problems, to unrealistically wear thin their welcome in "unhappy" interdepartmental "turf" battles, much less to provide the "extra-energy" to provide leadership to draw together federal, state, and private interests.

The fact remains, that programs are just that, they are designed to deliver an established service in a beneficial manner and with a mimimum of bureaucratic boat-rocking both "within and "without" the departmental organization. A department may well prove the exception, especially if it is new and must find its policy niche, when there is exceptional political backing, or when there is unusual leadership.

However, in viewing something as complex as a rural development effort involving multiple departments, governments, and other institutions, the process appears to supercede the primary "operations" role of a state line-department.

The structure must be capable of:

--FIRST, capable of refining its charge to projects which can be accomplished. The structure must participate in selecting rural priority efforts.

--SECOND, it must determine who, if anyone, is presently charged with a needed function, must encourage rural responsibilities be assigned departments, and give backing to departments in carrying out their rural functions.

--THIRD the rural structure must be capable of some leeway in independent articulation. It cannot be just the state administration's spokesmen, since one of its purposes will be to inject "unfinished ideas" into the"

--executive policy forum
--legislative policy forum
--private policy forum
--and the public forum

--FOURTH, the rural structure must plow new ground in that it should not be a GOVERNMENT PROGRAM, but must be a facilitator of private effort. It must strike a respectful partnership with the "private policy" sector.

--FIFTH, the structure must be cast in a role of "advocate" for rural initiative --for rural action.

Last, there is always the very real problem of the tendencies in an operational department to convert potential of a popular effort into gain for its own agency budget needs.

If a departmental placement for structure is to be considered, there are a number of potential candidates with rural field organizations. Key among them would be the Department of Community and Regional Affairs, and the Department of Transportation and Public Facilities.

Additionally, the Division of Policy and Planning (DPDP) in the Office of the Governor, would serve as a home for such a structure, either as an intregal portion of the division, or as a more defined sub-component like the Office of Coastal Zone Management. However, there could also be conflicts of fundemental roles. The rural effort needs the partnership, the resources of DPDP, and DPDP should be encouraged to build a strong rural planning component. But DPDP also may need to be the alter-ego of the rural structure, as it functions as rural advocate. It would appear DPDP's planning role should be to put the product of advocacy into a larger scheme, and as alter-ego be the necessary critic of the much more activist rural advocacy agency.

A CABINET LEVEL AGENCY

The creation of a special agency in the Office of the Governor is perhaps the simplest creation. Such an office would be small and it is likely its ability to function, and command policy attention within that framework, would be largely dependent on the capability of the person heading such as office.

The office could serve well enough as the focal point for state interaction with the federal/state interagency agreements. And, in terms of carrying out the intrastate functions of the federal/state agreements, such an office would probably be able to carry out its task of state department coordination.

However, open to question is whether such an office could carry out the "expanded" mandate of a significant rural development initiative. Since rural Alaskans, and legislators, would not be on the inside of such a construction, it is likely the tendency would be for those interests to become critics of actions, lack of actions, or both.

It is also doubtful that such an office left simply in that form, could be the injector of unfinished ideas into various forums, or if so, that the injection would tend simply to be into the executive policy forum shielded from the dynamics of more public policy forums. Additionally, circumstances would tend to make the office "spokesmen" for the state administration on rural economic issues, limiting the dynamics of the structure.

If a simple agency structure is selected, then effort will be required to give the office high prestige, and to provide it with staff. The dimensions of the office might be expanded by merging the function with the Private Industries Councils created federal Title VII, thereby providing the agency with a rural private outreach and some dynamics of rural "input." However, at this point the Office begins to take on the posture of the commission/ agency form of structure.

Under conditions of other times a modified Office structure could suffice, but today the senior policy structure of the state is virtually besieged by "macro-issues," such as d-2, OCS, bottom fishery, gas pipeline, gas liquids development, excess revenue policy, Beaufort Sea development, and many others.

The heavy burdens of Alaska policy going into the 1980s would appear to suggest that a long-range rural policy structure most be given "something extra" to program it for survival.

STRUCTURAL SETTING

The structural setting of a cabinet level office would be much like the other "offices" of the governor, except that a portion of its responsibility would face "outward" from state government to interface with the federal interagency agreements and the federal/state joint function. In many respects the structural arrangement of the rural structure need not be much different if developed in a "commission" form.

The special office could be flanked on one side by the Private Industries Council (PIC), which could act as an advisory group, even to the extent of merging staff functions. The office should also be flanked by the Division of Policy and Planning (DPDP), which could beef up its own rural planning capability and establish direct liaison with the rural office.

It is preferrable under the Alaska strong executive concept that the office be clearly responsible to the governor, and that the governor in the final analysis be responsible for the rural office. The purpose of attaching other involvements is not to erode or substitute for executive responsibility, but to provide some of the special elements previous described. Such features could add political strength by tapping legislative input, involve input from rural advisory features, and achieve status by the involvement of a key political officer such as the Lt. Governor.

However, such features added to a cabinet level office transcends into the third alternative structure, esentially which seeks to construct involvement of other key interests without dilluting the final "executive" responsibility of the office

A RURAL COMMISSION/AGENCY STRUCTURE

The third alternative structure initially appears the most complex. However, the appearance of complexity is derived largely from trying to name the main compenents of the rural structure, and determine their basic purposes. In a sense naming such a structure merely formalizes what likely exists in a "de facto" sense anyway.

The concept of the commission structure would simply be to draw together in one place the "key parties" with rural roles, and then to balance out that more institutional group with a balance of rural field representatives. The structure should remain firmly within the executive framework. The policy group would bring together the following components.

--INSTITUTIONAL REPRESENTATIVES, not necessarily limited to state officials.

--LEGISLATIVE REPRESENTATION, providing a balance against administration.

--RURAL PUBLIC REPRESENTATION, providing for non institutional balance from the rural field areas.

--PRIVATE SECTOR REPRESENTATION, providing representation from private business, possible finance.

The group would be a comission capable of acting as a "whole," but it would also be a commission capable of acting in the form of its natural "parts," he basic components of these subcommittees being drawn from the sectors they represent on the commission:

--DEPARTMENTAL COORDINATING SUBCOMMITTEE

--RURAL ADVISORY SUBCOMMITTEE

--PRIVATE SECTOR SUBCOMMITTEE

In order to allow the commission to function more efficiently it is suggested the governor name an executive committee of five:

--One agency representative

--One Legislative Representative

--Two rural representatives

--The chairman (of the commission)

The structure would be designed to allow, when appropriate, each subcomponent to operate on its own in special areas of concern and assignment. However, at the request of the subcommittees, or the direction of the chairman, the subcommittees would overlap depending on the problem being addressed. Additionally, legislators would be considered members of any of the subcommittees. The system would allow for each subcommittee to specialize in its natural area, with rural representatives minimizing rural outreach and input

The function of the executive committee would be to also operate as the key component in facing the federal government, and in efficiently dealing with the smaller issues of implementing the federal/state inter-agency agreements.

The executive committee would be the state salesperson in the federal market place, seeking to maximize federal resources.

An innovation in the executive committee structure might be to call the legislative representative the "Legislative Co-Chairman." The suggestion is that the legislative co-chairman would not have the same management perogratives of the chairman, but could be used to maximize the presence of the commission by carrying to the federal level the power of legislative position as well as being charged with rural leadership as (Legislative) Co-Chairman. In considering the latter suggestion, it should be remembered that there is a difference between the "elected" leaders and the agency presentatives reception in Washington offices. The elected representatives has no constraints in skipping middle-management, or in the unquestioned right of calling on Washington level political support and in involving them in deliberations. The posturing of the legislative co-chairmanship would solely to an attempt to sustain the rural effort by tapping political power and political presense as the state structure faces Washington D.C. Equally, the Lt. Governor might be used to be the Chairman of the state structure, thus again tapping the political strength and presense of the elective leaders.

The goal of tapping the state's political power structure is to provide a strong and unified executive/legislative policy face towards Washington D.C. (such policy links also facilitate federal links to the state).

In terms of excecutive functions on the internal Alaska level the legislative possition should not violate the integrity of the traditional Alaska executive system. In this area the position of legislators would be that of members.

In terms of the policy structure reaching out for input into rural Alaska, here the legislators could again play a stronger role, perhaps even facilitating common outreach efforts between legislative committees and the commission effort.

MEMBERSHIP

The Commission shall be composed of not more than 14-members, with four being institutional members, two being legislators, two being members of the private economic community, and six being members from rural areas.

Legislators could be appointed by the governor, or by the presiding officers of each chamber.

Legislation should provide for the membership of the director of the University Cooperative Extension Service on the commission as one of the four instititional members.

The legislation should name state departments with key rural field and/or planning responsibility, requiring the Governor to name two as institutional members. The legislation should state that other chief administrators shall serve ex-officio at the request of the Governor or Lt. Governor.

The legislation should name the Lt. Governor as an institutional member and name the Lt. Governor as Chairman of the Commission unless he chooses not to serve on the commission. In such event the Governor shall name another Chairman from any of the membership.

Two private economic community members should be appointed by the governor, representing private business and/or financial expertise.

Six members should be appointed who live in rural areas. It is suggested that these members be drawn from a list of nominations from the boards of the Rural Education Attendance Areas (REAAs). Requested should be first nomination of REAA board members willing to serve, and preferrably with private business experience in rural areas, and second for nominations other than board members. The intent is to move towards using the state's only region-wide elective rural officers for public input in state policymaking affecting their communities. The legislation should ask that the governor's appointment from those nominations recognize the various rural regions of the state as much as is possible comensurate with a small number of members to be appointed.

AGENCY DIRECTOR AND STAFF

The Legislation should provide for the appointment of the Director of the rural structure by the governor.

The gubenatorial appointment makes clear the primary executive loyalty and nature of the structure. Additionally, the act of inviting legislators into a titular role of an executive commission denotes a certain amount of trust between the two branches of government on rural advocacy. As a practical matter, the governor may be well advised to consult with the commission in selecting a director, while making it very clear that the director has the support and confidence of the governor. In this regard, it should be considered that the director will have to function among other department heads in coordinating rural functions. If it is not clear that the director is the "governor's person," then the functionality or the ability to coordinate and cooperate with other agencies is open to question. Without executive recognition, the director is likely to quickly become the underling of whatever key administration official on the commission DOES HAVE THE GOVERNOR'S CONFIDENCE.

The legislation should also provide for commission staff within the provisions of legislative budgeting. The nature of the commission may also mean that some staff can be provided by federal grants. In staffing expertise should be split between employees with practical rural awareness and staff that has expertise in working within government and private agency structures.

AGENCY/COMMISSION DESIGN

The design of the commission appears complex. It is in reality quite simple. The appearance of complexity comes from trying to arrive at a design of any unit whereby the pieces of the unit can remain separate when necessary (or when working on issues and problens which need not involve the other components of the commission).

--The design allows for the federal government to design whatever cooperating unit it desires and attach it to the state creation.

--Whatever federal working unit could 1) function seperately, and 2) be part of a unified state/federal working council, depending on working goals and conflicts. And, 3) a federal designee (likely of the federal designated lead agency under interagency agreements), could be a federal vice-chairman of any combined unit.

--The state executive committee could function as a separate state unit in direct Washington lobby efforts.

--The state executive committee is designed to simplify the federal interface and internal state interagency coordination.

--The full state Rural Development Commission is designed to function as a whole in dealing with problems, policy, and projects.

--The State Rural Development Commission is designed to function in its natural "parts" in 1) attacking problems unique to those parts, and 2) in trying to fullfill obligations to have an "outreach and input" to and rural rural areas of the state.

--The State Rural Development Commission in its "parts" will also be able to accomodate overlapping between those parts based on the "overlap" of problems and the "overlap" of the individual "interest" of members.

--The state/federal structure at the top will be able to direct the function of state/federal subunits who actually exist in, and have practical field knowledge of, rural Alaska regions.

--In keeping with establishing a line of authority, the State Rural Development Agency would work under the "direction" of the Governor through the offices of the Lt. Governor acting as Chairman. The commission would provide the carry-through on rural issues.

THE KINDS OF ISSUES AND PROBLEMS

The kinds of issues and problems the rural structure will handle will be varied. The central theme of the commission at any period in "time" will depend on what is possible within the historical circumstances of that time period.

--The development of a private economic base in terms of "specifics" will in part depend on practical economics --practical potentials of "what's" possible "where," and "when."

--The structure may address the issue of "what the state should do" in helping prevent failure and default of smaller native/private corporations actually located in rural areas.

    --possible maintenance of a village management assistance effort like attempted by Alaska Native Foundation (through CRA, or by contract).

--State potential in encouraging native capital investment in rural areas, and in participating in the "security" of front-line rural investments.

--The development of state loan instrumentalities, and state bonding authorities, in such a manner as to be practically useful for potential rural investors.

--Identification and resolution of other rural "blockages" to private investment.

    --fire insurance.
    --bonding availability.
    --utility infrastructure.
    --transportation
    --training Assistance

--An advocate to "tailor" large "macro" economic projects, whether a major petroleum project, or an applicant for state industrial bonds, to respond not just to such things as generalized affirmative action, but more specifically to the "micro-economic" needs of more remote rural communities (if an employer can rotate an employee from Anchorage or Texas, it is possible to rotate an employee from a rural village.

The Role of State Rural Departments 63

This report briefly reviews state responsibility and organization from the perspective of Alaska's varied rural populations.

The report probes state organization and function in terms of the potential "role and placement" of a state structure charged with encouraging the development of a private economic base in rural areas. The report does not seek "fault" in existing programs, or suggest fault through past action or inaction, but rather seeks to indentify rural programs which offer creative association for some "new" structure charged with forging a state/private partnership devoted to expanding a "private" economic base in rural Alaska.

At Issue: A Rural Strategy

In the final analysis this report is suggestive that the state needs to be continually developing and modifying a broad and flexible "Rural Economic Development Strategy."

Secondly, the state needs the MEANS by which to implement and sustain such long-range policies.

Thirdly, the state needs to take the leadership by establishing a structure on the Alaska level, designed to maxmimize and coordinate federal, state, local, and private resources available for desirable rural economic development projects. The more detailed consideration of the proper design of such a state structure, and the placement of such a structure within the framework of state government, is the subject of a companion report to this document.

Lastly, as a matter of statewide economic policy, this report suggests that rural development is fundemental to urban development. Rural economic growth should be an important urban economic goal, since such development is essential to broadening the economic base of the state's commercial centers.

GOVERNMENT STRUCTURE AND "POLICY"

Government generally is a highly organized structure designed to provide a variety of "services" that a society has determined to be necessary. Therefore the established structure of government says something about established policy, the priority of various policies, and about the "lack of such policy."

In the case of an Alaskan rural economic policy, there is essentially no clearly identifiable structure, and therefore there is no apparent state rural economic policy, or policies. There are, of course, many state rural "service" programs, and a large variety of state rural policies addressing various rural needs, but few touch upon the the seemingly primary need of "an economic base."

However, this should not be suprising since Alaska state government, or any other similar government, is generally a structure developed to deliver the more traditional services --education, transportation, health and social services, and etc. It is perhaps an unusual circumstance, that our government systems in this country often focus strong issue on "things economic," but rarely do they develop the means to effect strong economic policy. The problem of effecting rural policy is even more acute, since a lack of infrastructure and isolation limit the normal means of "advocacy."

Under any circumstance the distance between our American government systems and our private economic systems is significant, and only when unusual tools are available to a government, or there is crisis, is policy generally able to bridge the distance and weld government and private economic goals to some common purpose. In view of our public and private systems "seperation," Alaska's potential for success in forging a state/private partnership must be open to issue. However, Alaska does have some special and unusual "tools" at-hand --tools that most other government have no hope of having available.

ALASKA: SPECIAL TOOLS FOR SUCCESS

First; the general state of collapse of the Alaska rural economy in many regions means there are few entrenched interests to complicate and make policy change difficult.

Second; Alaska is in many respects the most "rural" of all the states, providing opportunity for Alaska to gain federal recognition of its rural economic needs on the federal agency level.

Third; Current federal policy is shifting to emphasize federal support for private efforts that contribute to a continuing private economic base, with special emphasis on rural economic initiatives. Alaska has special opportunity to take advantage of both old and new federal resources, and also has special reason to sell its often unusual needs to the federal government.

Fourth; The structure of the State of Alaska is less complex, and has a clearer line of authority than most other governments, creating special opportunity to expedite and coordinate federal resources. In other words, Alaska has a genuine executive structure, while most other governments (competing for resources) are structured into something akin to a "committee of executives."

Fifth; The state is Alaska's largest resource owner. Aside from being a political entity, the State of Alaska is one of the largest and and most diversified resource corporations in North America.

The role of resource owner is untypical of other governments, and gives the state both special opportunity (and responsibility) to promote economic development and to forge a mutually beneficial partnership with the private economic structure needed to develop those resources.

Sixth; The state is also a large financial corporation well beyond the bounds of the usual government service institution. The state's resource disposition provides it with "excess revenues" well beyond the state's immediate and future service demands, leaving opportunity for the prudent use of excess financial capital as a tool in encouraging private development.

Seventh; The settlement of Alaska Native Land Claims has provided a unique private structure in rural Alaska, and has created opportunity for the state to work in partnership with that unique private corporate structure. The land claims settlement has created a rural network in private interests that has both lands and some financial capital. The native corporations represent a "local opportunity" for partnership and for participation in development, which is completely unavailable in most other similar areas of "third world" economic conditions. The native corporations have the unusual nature of having the efficient structure of the private corporation, but also having a local base.

Eighth; The economy of Alaska has access to a large federal landmass, and its various resources, as well as significant marine resources and the nation's largest continental shelf.

Ninth, The final special difference for an Alaska economic initiative may be in the "timing." The timing is very likely "right" in terms of the: 1) maturing of the land claims corporation, 2) in terms of the maturing of the state resource and land base, 3) in terms of the state's financial resources, 4) in terms of world crisis over long term resource commitment and availability, and lastly, 5) in terms of the evolution of federal policy to stress private development, and the opportunity for maximizing federal financial resources and generating federal cooperation and coordination.

Nevertheless, the forging of a tri-partnership --state, federal, and private-- to address rural economic problems and develop an Alaska rural development policy, is not a easy task. However, in any such policy the state must have primary responsibility, and it is the state that has the lasting interest in insuring that rural economic policies are developed and can be sustained over a sufficient period of time. If an emphasis on rural economic problems is to be initiated, then it is the state that has the responsibility for initiation.

Initiation by the state also provides a certain acknowledgement by other partners, especially the federal government, of the state's leadership in setting economic priorities, in economic and environmental planning, and in allocating monetary resources. Such leadership also provides opportunity for a commanding role in maximizing state financial resources available for development by addition of federal and private effort.

THE "PLACE" OF A RURAL INITIATIVE STRUCTURE

The end result of a review of state rural service responsibility is a determination of whether a structure, designed to promote policy enhancing a rural "economic foundation," belongs "within" the traditional government service structure, or is best placed "outside" of normal government delivery institutions.

The general conclusion of this report in reviewing state rural programs appears to recommend that such a structure should stand "separate" from the general programs. The basic function of the routine delivery of rural service, and the task of maintaining a continually changing rural economic development strategy, appear to be inherently separate.

Many reasons can be presented in defense of such a "separation," but these reasons, in terms of detail, belong more properly in the companion report to this document which deals with the potential conceptual design of a state policy structure.

However, such reasoning ranges from the traditional separation of the private economy and government service roles in our American systems, the special "advocate" nature of an economic policy structure, and the need for a structure to be an advocate of rural services related to rural economy that are broader than the function of any one agency.

Finally, to be successful in bridging the gap between private and public systems, such a policy group needs the strong political adjacency and backing of both the executive and the legislative.

The success of government dealing with the private policy sector may be rooted in government respecting the private-policy sector as a sector to be treated with a respect, and on an equal footing, with the policy branches of government. Therefore, the suggestion that state dialogue with the private sector be subordinated to a sub-bureaucracy status may be fatal to a successful policy partnership. In other words, a policy partnership suggests a certain equality and mutual interest among the parties.

A principal determination of the policymaker in seeking to "place" a state structure charged with encouraging a private economic base, may therefore be, whether the public policymaker chooses to treat the private sector as an equal and independent partner in policy, or whether that private sector is a subordinate partner suggestive that it is to be "directed" by some line-agency.

However, this is not to suggest that such a rural economic development structure does not have a strong interest in, and relationship too, the rural service agencies and the state's role in community development. An economic development structive would be strongly supportive of rural service needs, especially as they impact development opportunities.

Hence, in "placing" a state policy structure charged with addressing economic issues, a number of primary considerations have thus far surfaced. They are:

1) The issues of whether the mission and the charge of economic advocacy are not inherently different, and therefore such a structure perhaps should not be subordinate in a line-agency with service functions.

2) The need for a political adjacency to governor and legislature in order to maintain momentum, and

3) The issue of treating the private policy sector as a legitimate policy level co-equal.

THE RURAL POLICY SYSTEMS

The previous discussion questioned the placement of a state rural economic policy structure essentially "within" the state line-service functions. However, the policy structure external to the state government itself must also be reviewed in terms of such a state system.

In rural Alaska four basic policy systems are identifiable. The systems are familiar structures in American policy, but as might be expected, in rural Alaska some of those structures are underdeveloped or almost non-existant.

It is not "within" any one of these systems that a rural development strategy must be forged, but rather between such systems. The structure by one means or another, to be successful, must forge a partnership among these systems.

These identifiable policy systems are, in their broadest context, as they apply to rural Alaska:

1) The federal policy system.

2) The state policy system.

3) The local government policy system.

4) The private enterprise policy system.

The first three systems are clearly recognizable, although each has its special difficulties in dealing with the problems of rural Alaska. However, it is perhaps unfortunate that the American "alter-ego" to government, our very dynamic private economic system, is not recognized and communicated with as a fundemental policy system.

As indicated the above systems each have their problems when applied to rural Alaska. The special problems of the state system and the local government system will be discussed in more detail in following material. However, the federal system deserves some brief comment, since the system has "more established economic roles" than state and local systems, but must suffer from sheer logistics of policy between remote policy centers and extremely isolated Alaska rural communities in a bi-cultural setting. The federal government also faces the very realistic problem of having to establish policy criteria on a norm that fits an incredible variety of national situations.

Despite areas of extreme policy dispute between the state and federal government, the federal government does offer significant resources that can be applied to a rural development initiative.

ORIGINS OF STATE RURAL POLICY

The state largely inherited the rural policy system from the federal government. The Territorial government also carried out certain rural service functions. It is perhaps easy to point an accusing finger at the federal government, alledging a neglect of rural Alaska, but it should also be remembered that Alaska Territorial government was a form of "self government" and had the option to function in rural regions.

There are many reasons why Alaska Territorial Government did not expand its functions into the rural regions, and many of those reasons are very practical and many are simply circumstantial under the conditions of the period. Conversely, a case can be made that the federal government made significant efforts, especially when one considers the practical circumstances of that government in dealing with rural Alaska. Like all government, the federal agencies depend on policy, and policy depends on "appropriations" that generally derive from a political base. Obviously, Alaska had little political base, and the far flung and isolated rural needs of the state lacked even the cohesion necessary for a local advocacy. Most federal agencies lacked support for carrying out Alaska functions, while others received "fall-out" support from general "Indian" legislation enacted by the Congress

It is not the function of this report to go into detail concerning the problems of early rural policy. However, a few brief comments lend perspective to the later development of rural policy under statehood.

Presently, state rural policy is primarily aimed at delivering in rural areas the "traditional" services of government. And, in view of the difficultv the state has had in simply forging policy for the more traditional services in rural areas, it is not suprising that the state has been incapable of addressing a "less traditional" role regarding the economic plight of its rural populations.

In general, the circumstances that retarded the delivery of basic services in rural Alaska, simply more fully eclipsed a policy recognition of economic conditions and attendant state responsibility.

First, in early statehood, since the state was not delivering the traditional basic services, it was unlikely that the state should perceive self-responsibility for the more non-traditional and difficult to service economic problems. Additionally, generally government will not respond to more difficult development of "economic policy" unless there is a crisis. There are some exceptions, such as the nation's long history of addressing agricultural economic policy. Hence, economic policy in the area of U.S. agricultural policy has become "traditional policy." Additionally, in places like rural Alaska, hidden away from general policy-view (and public) view by isolation, wilderness, and culture misperceptions, despite severe economic problems, the existance of such "crisis" was simply not recognized.

Secondly, in early periods Alaska rural policy was fractured, and additionally there was no traditional local government system to be the conveyor of local needs to "the citizens," and to be the purveyor advocacy to senior governments.

Third, in the early years of statehood there was a perception, despite the declarations of the State Constitution, that native issues were federal issues, and that native Alaskans were still the "wards" of the federal government.

Fourth, state responsibility was further undercut by assertions that rural problems were the result of federal neglect (somehow justifying further state neglect).

Fifth, there was general recognition that rural services were expensive. Therefore there was a natural, and perhaps quite practical, resistance on the part of the revenue impoverished young state to create rural services, or to encourage an early transfer of many functions from the federal government.

Sixth, a public perception that statehood and local control would bring a magically improving general economy tended to undercut entry into economic policy. Statehood itself was perceived to be the economic solution for all Alaska. The economic emphasis of the time was more on the government-revenue side of the economic equation.

Seventh, the federal poverty programs were implemented in the early 1960s. Many of these programs were administered by the state, and others were delivered directly to rural Alaska. The programs appeared to be dramatically attacking rural poverty, and did tend to "finance" the entry of the state into rural responsibility. However, most of the programs focused on traditional government policy areas, such as education and basic services, and there was not a coordinated emphasis on the causes of rural poverty --the lack of "cash" industry and the rising demand for "cash" in the rural economy. The programs for the most part were conceived in Washington D.C. and funded on an "on-gain/off-again" short term grant basis. The cycle of poverty programs failed to recognize that much of pre-war rural Alaska had a variety of "cash" industries that fit community life-style, but that post-war Alaska saw those industries sink into almost total recession.

The poverty programs did their job in identifying that rural Alaska was in "poverty," in providing an element of advocacy that substituted for the lack of infrastructure, and in easing the state into a rural outreach.

Eighth, land claims settlement contributed to public misconceptions and adversity. Land claims helped dramatically forge state rural issue and policy, but tended to distract from a detailed focus on very basic rural needs. Public reaction to land claims was that native Alaska (rural Alaska) has land and money, so let them solve their own problems. Oddly, the land claims structure should have been "welcomed" as an economic middle-ground structure usable by government in development policy.

Ninth, the gigantic economic issues of the pipeline period of the early 1970s tended to sweep aside lesser and more homegrown economic problems. The pipeline was a distraction. The "euphoria" of the pipeline boom, both within and outside of government, created the assumption that something would rub-off on everyone.

Tenth, rural political representatives have generally been at a disadvantage in securing policy attention and service dollars, partially due to the lack of a local government funding vehicle for channeling state monies for local services. For example, broad funding formulas have allowed urban lawmakers to sercure most appropriation needs on almost an "automatic" annual basis. One formula delivered basic school support for urban areas, and another picked up local debt service. Such formulas delivered urban educational services and also relieved local tax burdens for other purposes and services. Maintaining such services required only minimal political effort each year, with all urban lawmakers having a common interest. In contrast, rural lawmakers have constantly been required to fight line-by-line for service approprations within the budget, often in competition with fellow rural representatives. Under such conditions the rural lawmakers quickly "expends" his political opportunities for minor gains in "bricks-and-mortar." Despite urgent long range problems, the rural politician has had little excess energy to devote after battling for immediate needs. Applied to economic development, rural lawmakers have had difficulty in just marshalling their talents for the "most basic" of traditional basic services, let alone entry into such long-range, complex, and less traditional policy arenas as restoring a private rural economic base.

The lack of substantial local governments in rural Alaska creates many problems. The rural state representative is left being a substitute local government representative, and the state is often cast in the role of substitute local government. However, this report does not suggest that creation of "local government" in rural Alaska will necessarily resolve local-government oriented problems. Obviously, rural Alaska lacks population density and the usual dynamics that makes local government viable, and therefore caution should be exercised in attempting to create a system that may be unrealistically "grafted" on top of rural communities. The lack of a "cash" economy in rural regions may be prerequisite to a genuine local government --a government that rural people feel belongs to "them" and not the state.

This report earlier suggested that a crucial issue in a public/private partnership in development is whether the public treats the private as a "respected" policy equal, or whether it attempts to subordinate that policy partner. Suggested was that an equality is perhaps crucial to a true partnership and creativity. The same may be true of local government, which is often termed a "lesser" government. It may be important to a rural "economic initiative" partnership, as well as to the proper relationship of a rural local government with the state, that the policymaker determine whether rural local government belongs to a rural public, or is simply a step-child of the state for the state's convenience, and whether in any partnership the policymaker (and the state) views such a relationship as one of equals, or of a subordinate relationship. The

relationship, and be suggestive of a subordinate role of the state.

BENCHMARKS IN ALASKA RURAL POLICY

Alaska rural policy has its origins in the Territorial period in Territorial legislation, in federal legislation, and in the organic legislation of the federal government that granted powers to Alaska level governments of the period. The basis for the expanding policy role of Alaska government in that time was linked to: 1) the ability of the Territory to carry out functions, and 2) its desire, or lack of desire, to responsibly tax itself to carry out policy functions and services.

Limit on Territorial Powers

In granting powers to Alaska in various pieces of organic legislation dating even to pre-Territorial status, the Congress saw fit to limit the ability to finance through "bonding," which correspondingly limited the ability of the Territory to finance capital projects. Since most rural needs were "facility" oriented and expensive, that basic federal limitation considerably hamstrung Territorial government. Depending on the period, the Territories ability to "tax" was also limited.

As a result statehood and the ability to bond represented a crucial benchmark in the state being able to finance rural programs.

Congress reenforced the situation by granting the Alaska cities the right to bond for facilities. In reviewing the situation it is easy to conclude that Congress desired to keep the Territorial government weak.

Alaska Willingness to Tax

The ability of the Territory to tax was also in question at times, with such question being aimed mostly at the ability to tax the lucrative fishing industry. Alaska was willing to tax its "outside" owned industries, Congress under lobby by Seattle interests was reluctant, but it must also be acknowledged that when it came to taxation the Territory also showed a very "marked disinterest" in taxing its own citizens by any means.

Hence, while Alaska decried federal dominance it was reluctant to "pay-its-own-way." As a result Territorial government resembled something of a "pass-through" agency." With little money of its own, the Alaska government took in federal funds and other earmarked revenue, and passed those funds through to local government.

In the pre-statehood period it was local government that had the ability to bond themselves, tax themselves, and which were the primary recipient of Territorial federal funds. The weak Territorial government did not have unrestricted funds to spend in rural regions, and the lack of a local government infrastructure left the rural citizens out of the basic funding pattern. The pattern simply reenforced the "division" of the Alaskan urban/rural spheres, and the dominance of the federal government in the rural area. The lack of revenue, and the lack of a willingness of the Territory to raise its own from its own citizens, simply meant there was no "Territorial presense" in rural Alaska.

Perhaps the crucial benchmark paving the way for Alaska rural policy was the Territories decision to "tax itself" after a bloody 1948 election surrounding the issue. Territorial Gov. Ernest Gruening for a decade had advocated the need for a comprehensive schedule of Alaska taxes to finance government, and for a decade the Territorial Legislature steadfastly refused such a program. In exasperation Gruening in 1948 aggressively campaigned against the legislature, and suprisingly won a majority that enacted Alaska's first really comprehensive revenue base.

The decision to tax was an important decision in declaring an assertive self-responsibility, and while benefits were not oriented towards rural Alaska, the revenue availability would begin a long process of accepting more expensive rural responsibilities. Oddly, the tax benchmark was likely a crucial step in the final drive for statehood. The period 1948 - 1953 saw lawmakers begin to organize a very fractures government, saw a leveling of federal agency power, saw the Territory complete an organized compilation of its laws, saw the abolition of the Alaska Fund with a coordinated tax system, the creation of a Territorial Department of Fisheries (as an assertion of local management), and the creation of the Alaska Statehood Committee.

Territorial Influences on Alaska Structure

The Territorial experience was one of wrestling with a fractured Territorial government, with a variety of elected officials, a weak legislature, a federally appointed governor, and policy strings that disappeared into the maze of Washington D.C.

The Territorial experience had established the firm place of local government in the policy framework of Alaska political thinking. The new emphasis was not so much to create a "super-executive" structure, but to create a structure far removed from the cob-webs of the Territory, where the line responsibility was clear and where there was clearly some "one" in charge.

Constitutional Benchmarks

The constituion Alaskans drafted in 1955 produced a number of rural benchmarks and framed a few ongoing policy dilemmas.

The constitution created generally a simple executive structure with the governor clearly responsible for all actions. While Alaska has its ongoing problems in making government function, the simple structure of the Alaska system in the long-run should be an advantage for rural needs, policy development, and coordination of multi-government effort. Many other state's administrative structure resembles a "committee" of executives.

The constitution declared responsibility for ALL its citizens, laying both the legal and policy foundation that native Alaska, and therefore rural Alaska, was the responsibility of the state.

The constitution recognized the unresolved nature of Alaska native land claims.

The constitution attempted to deal with the problem of local government by declaring that Alaska would be divided into governmental units called "boroughs" (State Constitution, Article X). The lack of local government still causes problems in state dealings with rural Alaska, but also, the fundemental problems that have precluded the normal creation and function of local government in such remote rural areas are also still with us.

Early Statehood Benchmarks

In the early period of statehood the state government was not without rural concerns. The state attempted entry into vocational education aimed at rural areas, and airports were a high priority. A Rural Development Agency was established in the Office of the Governor, which acted as the representative of the governor in assessing and resolving urgent rural problems, and which also administered a small grants program (now lodged in the Rural Assistance Division, Department of Community and Regional Affairs). However, in the first half of the 1960s state efforts were constrained by budget uncertainty as the state absorbed functions from the federal government and attempted to establish a revenue base. Under such circumstances the state budget was small, growing from $60-million to $154-million by 1965. Early bond issues totaled only $30-million (1960), $17-million (1962), and $13-million (1964).

The real rural issues began to surface in the mid-1960s as the state's financial ability grew and as confidence grew that the could pay for new effort in policy.

In 1965 the Legislature developed a concept of rural regional high schools, and presented a $5-million bond issue to the public. While the concept ultimately never came into existance, the public DID APPROVE THE BONDS. The action was an important legislative, and public, declaration that the state was ready to begin carrying out its rural education service responsibilities, and that the state, not the federal government has the responsibility for educating rural Alaskans (native Alaskans). Likewise, the issue recognized the severe problems of secondary education for rural citizens.

In 1966 Land Claims settlement became an issue for the first time in the public policy forum.

Additionally, in the 1966 elections issue surfaced as to whether the state should create a Department of Native Affairs to tackle rural Alaska problems. The issue produced considerable debate, con' ibuted to public awareness of "things rural," but floundered in both the native and non-native community on the basis of not wishing to create another "little-Bureau of Indian Affairs," and on concerns that such an agency would create difficult racial question. The issue lead to the counter suggestion of creating a Department of Community and Rural Affairs.

On the Congressional level by 1964 Alaska representatives were beginning to press for an Alaska Housing Program for rural communities, and press for upgrade and transfer of BIA schools to the state.

The mid-1960s also saw the entry of the federally instigated war on poverty programs. The programs made contribution to developing "rural awareness" on the part of both policy maker and public, and likewise contributed to grass-roots awareness of problem solving on the rural level.

By 1966 native land claims had brought about the first phase of the land freeze, and the land claims problem was rapidly becoming the state's most serious issue.

By 1968 significant efforts were being made to bring electrical services to Alaska rural communities. The Alaska Village Electrical Cooperative (AVEC), organized to finance through the the federal Rural Electrification Agency (REA), also required a somewhat hasty organization of many Alaska rural communities into Alaska fourth class cities.

Throughout the majority of the 1960s two adjacent policy/issue streams were developing. Independent issue forces were developing such as land claims, as well as political forces such as the Alaska Federation of Natives, and other non-profit corporation agencies in the form of rural need advocates (AVEC, poverty non-profits, etc.). And, in the other stream,the improving revenue base of state government, more than $200-million by fiscal 1969, allowed a cautious state expansion into rural service needs. In perspective, the 1960s was a period when Alaska was unsure it could meet the basic obligations of statehood in terms of financing government, and as events of the decade provided "confidence," the state showed willingness to confront more costly rural service needs.

The discovery of oil and Prudhoe Bay in 1968 and the entry into a "surplus revenue" condition in 1969 with the receipt of the $900-million set the stage for facing more rural responsibility on the part of the state.

On one hand the rural areas suffered in the "funding process" because they were not part of local government systems, and therefore could not participate in the almost "automated" state transfer of funds to Alaska local governments that saw additional funding equally more than half of the $900-million shifted to urban areas in the next five years. On the other hand, the existance of excess funds meant that rural areas could push for additional education funds, transportation improvements, and other health service needs.

By 1971 the legislature had created the rural State Operated School System SOS, and while short-lived, the effort was aimed at providing rural Alaska a sembalance of autonomy, input, and substitute local government in the area of education.

In terms of funding for education, the stepped up appropriations in essence represented the first <u>significant state money</u> that the state had put into rural education. Prior to 1970 the state's receipts under federal PL-874 impact funding approximately equaled the state's rural school outlay for operations (Note: The federal government generously allowed the state to receive maximum impact funds even treating open-to-entry federal lands as maximum federal impact).

The state in the early 1970s enacted such legislation as a Village Safe Water Act (although little more than a declaration of responsibility for health needs), it addressed the needs for community roads, trails, and designed state municipal revenue sharing so small communities could obtain a share for the barest expressions of responsibilities such as fire, police, and etc.

Settlement of Land Claims in 1971 began a process of constructing a private corporate infrastructure throughout rural Alaska. However, there was unfortunately little state effort to recognize that structure in any institutional construction, or to take an interest in the survival and success of those unique creations on the part of the state.

The legislature did create in the early 1970s the Department of Community and Regional Affairs, which was designed to collect together rural and community functions of state govenment. The assumption existed that such a department would provide adequate "rural linkage." However, while the department has in many cases performed very capably, it was created as a line-agency (program agency), and as such too much was expected in regard to such an agency pursuing problems that exist outside the scope of defined programs or are multi-agency.

The legislature in the mid-1970s hammered out the Rural Education Attendance Area legislation (REAAs), disbanding the old SOS school system in favor or regional districts.

The REAAs represented a significant policy step in creating (education-service) local government, in allowing a genuine measure of regional autonomy and self-determination, in providing a funding formula taking the burden off rural lawmakers to have to fight for each individual school need. The REAAs also sought to follow native corporation boundaries, seeking to achieve a social and geographic compatibility.

THE PATTERN OF STATE SERVICES

The present pattern of state services being extended into rural Alaska are very BASIC AND TRADITIONAL SERVICE ORIENTED.

The entry into rural services follows the traditional American pattern of education, transportation, and health and social services.

On the rural community level this translated into the presence of teachers, school facilities, an airport, roads in trails, the availability of safe water, and to a lesser degree the presence of sewage disposal, electrical service, and adequate housing. Of these services teachers, school buildings, roads, trails, and airports can be funded either by formula or by state appropriation. However, water, sewage, and community electricity are utility in nature, implying some measure of local support and responsibility. Additionally, adequate housing implies some ability to support that housing.

It is in the area of utility services, housing, and personal income that state policy runs into the "void" that is at the bottom of rural issue. The issue is the lack of rural economy, the lack of ability to support services, housing, and family.

A review of state service responsibility in rural area reflects emphasis on blindly providing categorical services. It is the Department of Education's responsibility to facilitate education. It is the Department of Transportation's responsibility to provide roads and airports as directed by the legislature, it is the responsibility of the Department of Environmental Conservation to police safe water, it is the Department of Community and Rural Affairs responsibility to operate various assigned community assistance efforts. Each department has its functions and carries out that function. However, schools need electricity, water, and sewage, and homes and people need services, and the later need income for paying for such services and for purchasing other personal needs.

In the final analysis, no state agency is responsible for any kind of comprehensive addressing of the problems of rural economy.

The failure to address an Alaska rural economy is not a failure of program agencies and their specific authorities, but rather a failure of state policy to recognise that while services are urgently needed, they coumpound the problem of rural economics --the widening division of "cash available" and "cash needed" to pay for services.

The economic conditions of rural Alaska date to the 1940s, and while rural Alaska has always lacked services, it has not always lacked an economy. Pre-World War II rural Alaska had a variety of "cash" industries, depending on the rural region, that quite amply supported the rural life style of the period.

Such rural industries were fur, fish, gold, labor intensive transportation, woodcutting, and etc., all of which declined into disasterous conditions by the mid-1950s. External influences and changing technology eroded the rural economy. The price of gold was frozen in the early 1930s, spelling a slow death for Alaska mining, fur fashions changed and fur farming, synthetics, and fur imports snuffed out the fur industry, the bush plane eclipsed labor intensive transportation, and the convenience of oil killed off the woodcutting industry. In 1948 the Alaska Railroad altered its Yukon River steamboats from woodburners to oil, and overnight the woodyards and much economy disappeared from the Yukon Valley. Likewise the decline of major industry saw the decline of fishing for barter and cash.

A strong case can be made that for the past quarter century rural Alaska has been in severe depression and almost nobody noticed. This can be contrasted with the quick response and issue attached to the current problems of the state's urban economies. The difference is likely that a sophisticated infrastructure exists in the urban areas to demand that economic crisis be recognized and dealt with to the extent possible.

By and large it was not the role of the state service agencies to notice and deal with such a fundemental issue as rural economy, an issue obviously far exceeding the boundaries on the jurisdiction of any one, or for that fact, all such agencies.

The purpose of reviewing state services within the context of economic rural needs is that while such agencies must remain largely within their categorical responsibilites, these same agencies are very valuable front-line allies in an rural economic initiative. Regardless of however the state chooses to address the broad issues of rural economic plight, the facts also are that a fairly small number of state agencies have the rural organization and community level experience that must be brought into any such effort.

The following section will review state agency from the standpoint of both present rural involvement and the nature of that involvement.

RURAL EMPHASIS OF STATE AGENCIES

State government growth over two decades has produced a greater state presence in rural areas. Growth has produced a developing pattern of state agencies with a viable rural network of employees in the field.

Agencies with singificant rural presence divide into functions which by their nature must remain narrow, such as police functions, and agencies which have sigificant community development potential. The following chart reflects agencies with large numbers of employees "outside" Juneau, Fairbanks, and Anchorage.

STATE EMPLOYMENT BY DEPARTMENT AND LOCATION
(Timeframe 1977)

Agency	Juneau	Anchorage	Fairbanks	Other	Total
Governors Office	174	106	25	21	326
Administration	307	102	90	170	669

TOTALS	3,485	3,526	1,232	2,973	11,216

* Agencies with large rural organizations and/or responsibilities.

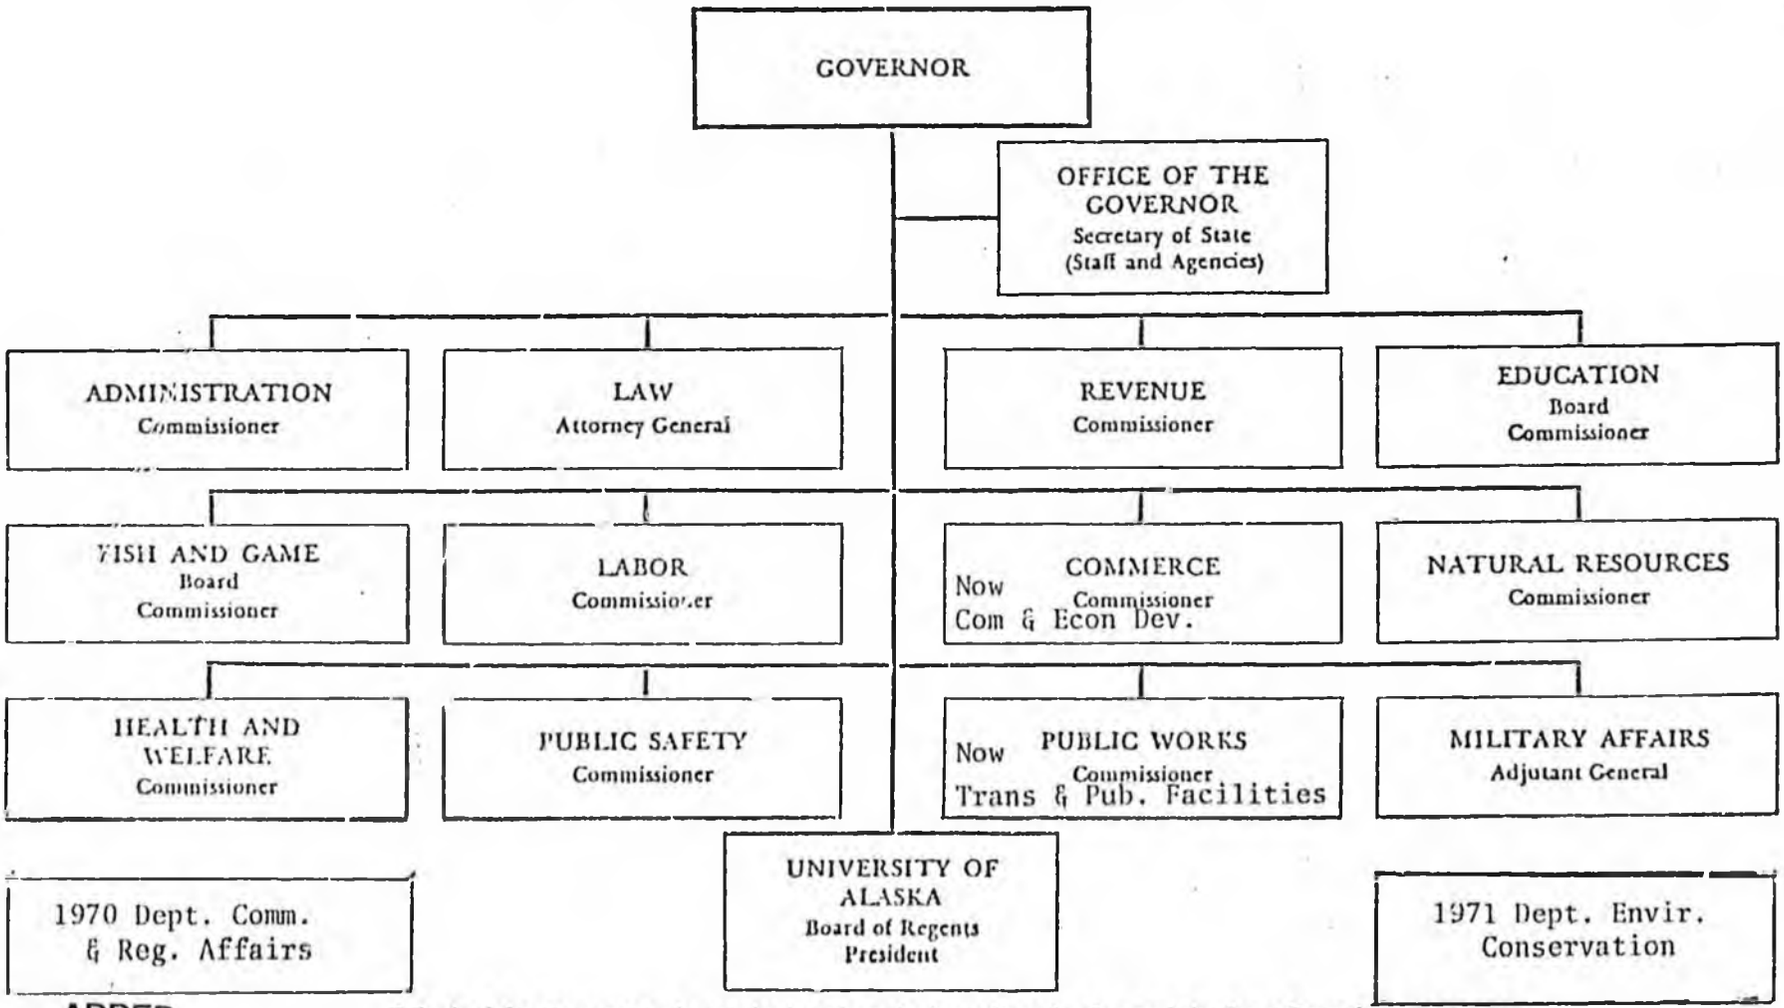
** Agencies with specialzed rural functions.

Several other organizations outside of the state structure deserve mention. One is the University of Alaska, which has a growing rural network, and other other are the Rural Education Attendance Areas (REAAs). The latter are of interest not only because of their comprehensive local government coverage, but because their boards constitute publically elected representation.

The following review of state agencies will be reviewed in order of groups of agencies reflecting:

1) Agencies with either large numbers of rural employees in the field, significant rural responsibilities, or with both.

2) Agencies with large field organizations but with highly specialized responsibilities, and which therefore might not be appropriately called upon in some coordinative rural effort.



3) Agencies with small rural field staff operations, but which have a large policy impact on potential rural issues. Agencies with potential for rural involvement.

4) Agencies without significant rural field operations and with little definitive rural responsibility.

The following page provides a view of how the architects of Alaska government established state agencies in 1959 with twelve departments (the contitution limited departments to 21). The basic organization has altered little in two decades. Two new agencies have been added, another department was created and then merged with Commerce (Dept. Commerce & Economic Dev.), while the early day version of Public Works was split into thr Departments of Highways and Publig Works, and then remerged in 1977 into Transportation and Public Facilities.

Alaska 1959

ORGANIZATION OF THE EXECUTIVE BRANCH

Principal departments and agencies based on the State Constitution and the State Organization Act of 1959. Members of the Fish and Game and Education Boards and the Board of Regents appointed by Governor. Commissioners of Education and Fish and Game appointed by Governor from names submitted by Boards. Heads of all other principal departments directly appointed by Governor. All appointments subject to legislative confirmation. The administration of the University of Alaska is specifically established by the Constitution and is not under the same direct executive control as the principal departments included here.

GOVERNOR'S OFFICE

The Governor's office is both a kind of "super-agency" and a kind of "catch-all" agency, inheriting functions which either do not fit elsewhere or which have inherent conflicts in role (example: The Public Defender would be suspect if under the Department of Law and the state's chief prosecuter. There is also a tendency to place "advocacy" agencies in the Governor's Office, since their role of advocacy may clash with line-service roles and since their actions shape basic new policy.

Obviously many functions of the Governor's office have an impact on rural policy, but a few have a very important policy shaping role.

They are:

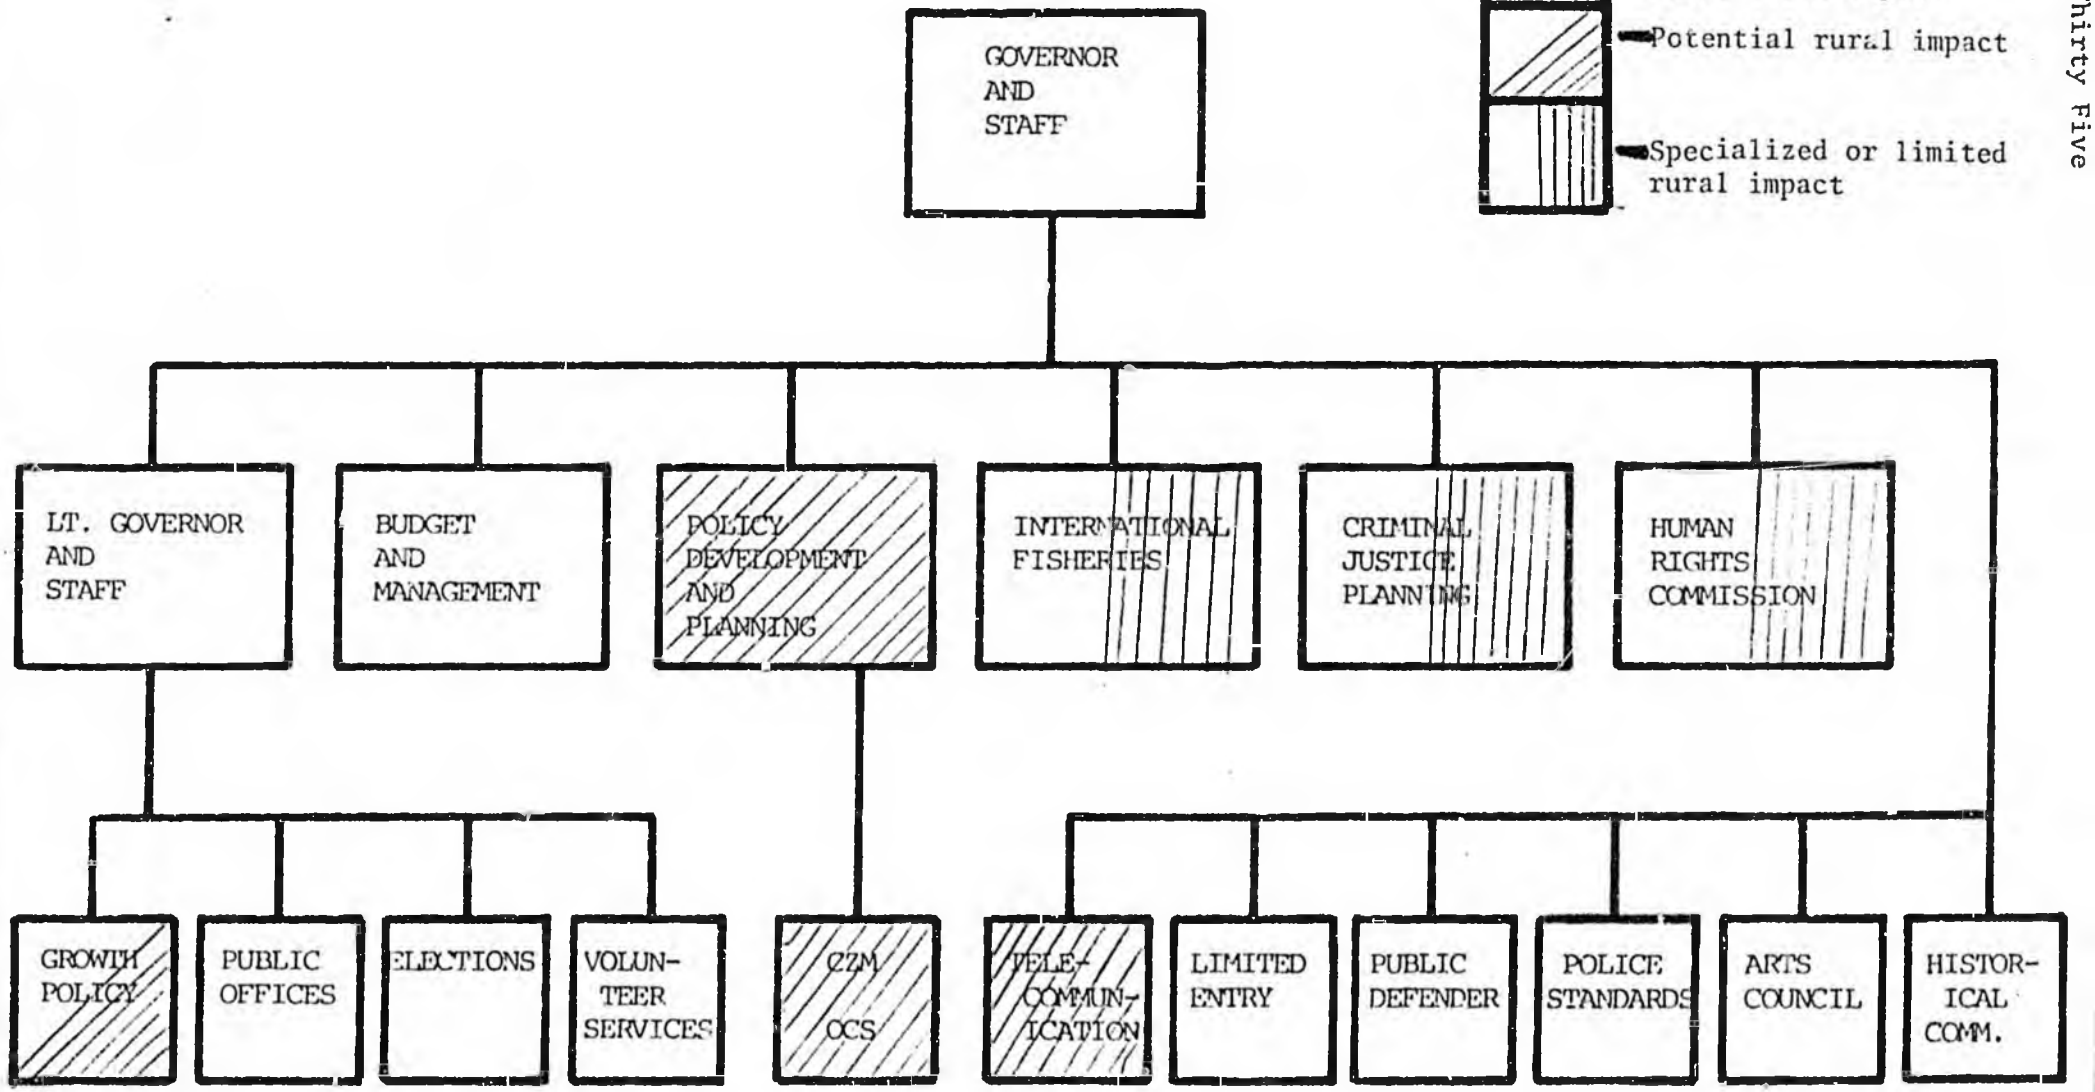
--POLICY DEVELOPMENT AND PLANNING
  --Coastal Zone Management Subagency

--OFFICE OF TELECOMMUNICATIONS

--GROWTH POLICY COUNCIL (Office Lt. Governor)

Other agencies of the Governor's Office have a very definite but special role in rural policy, such as the HUMAN RIGHTS COMMISSION and CRIMINAL JUSTICE PLANNING COMMISSION. The Office of International Fisheries and the state's trade office functions in Denmark and Tokyo could have an important rural relationship in regard to facilitating private economic initiative.

The Division of Policy Development and Planning can have a large impact on rural policy, and especially on rural private economic development. However, DPDP is an agency that must maintain a very broad planning perspective, and must carry out functions that must make it at times an "adversary," as opposed to an "advocate." An example may be the agencies difficult role in Coastal Zone Management, where it may have to oppose local demands (such as current differences over the North Slope Borough's proposed Coastal Zone Plan).



DPDP must also be broadbased and have continual involvement in all sorts of policy, including rural policy, and for that very reason DPDP may not be able to act as a genuine rural economic advocate.

Telecommunications is an agency in the Office of the Governor that has functioned as an "advocate" in terms of rural communications issues, and general Alaska communications issues in recent years. Telecommunicat- could have been assigned to DPDP, but it is doubtful if DPDP could have specialized and have acted as "advocate" as did the Office of Telecommunications.

OFFICE OF THE GOVERNOR

- Significant policy and/or rural field impact
- Potential rural impact
- Specialized or limited rural impact

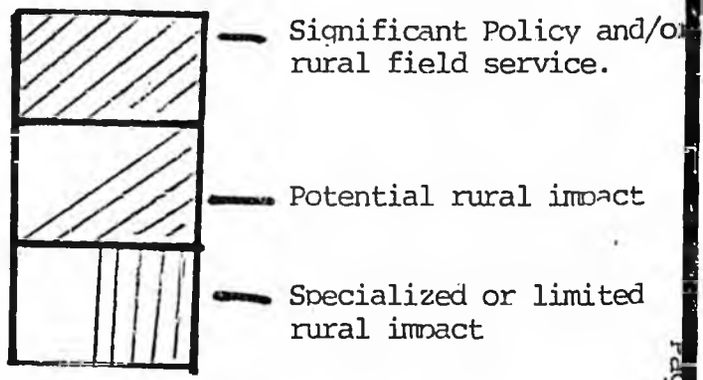
DEPARTMENT COMMUNITY AND REGIONAL AFFAIRS

The Department of Community and Regional Affairs Department has the responsibility to meet the state's responsibility to render maximum assistance to government and the community and regional level. The Department is therefore not necessarily a department charged with "maximum" rural obligations. However, the department is perceived by many policy-makers as a Department with special rural obligations, and the department also perceives itself to a certain extent in that manner. The charge of the department places CRA in a position of assisting in rural areas where government is small, inadequate, lacks professional management, and in many respects acting as "subsitute" government where non exists at all.

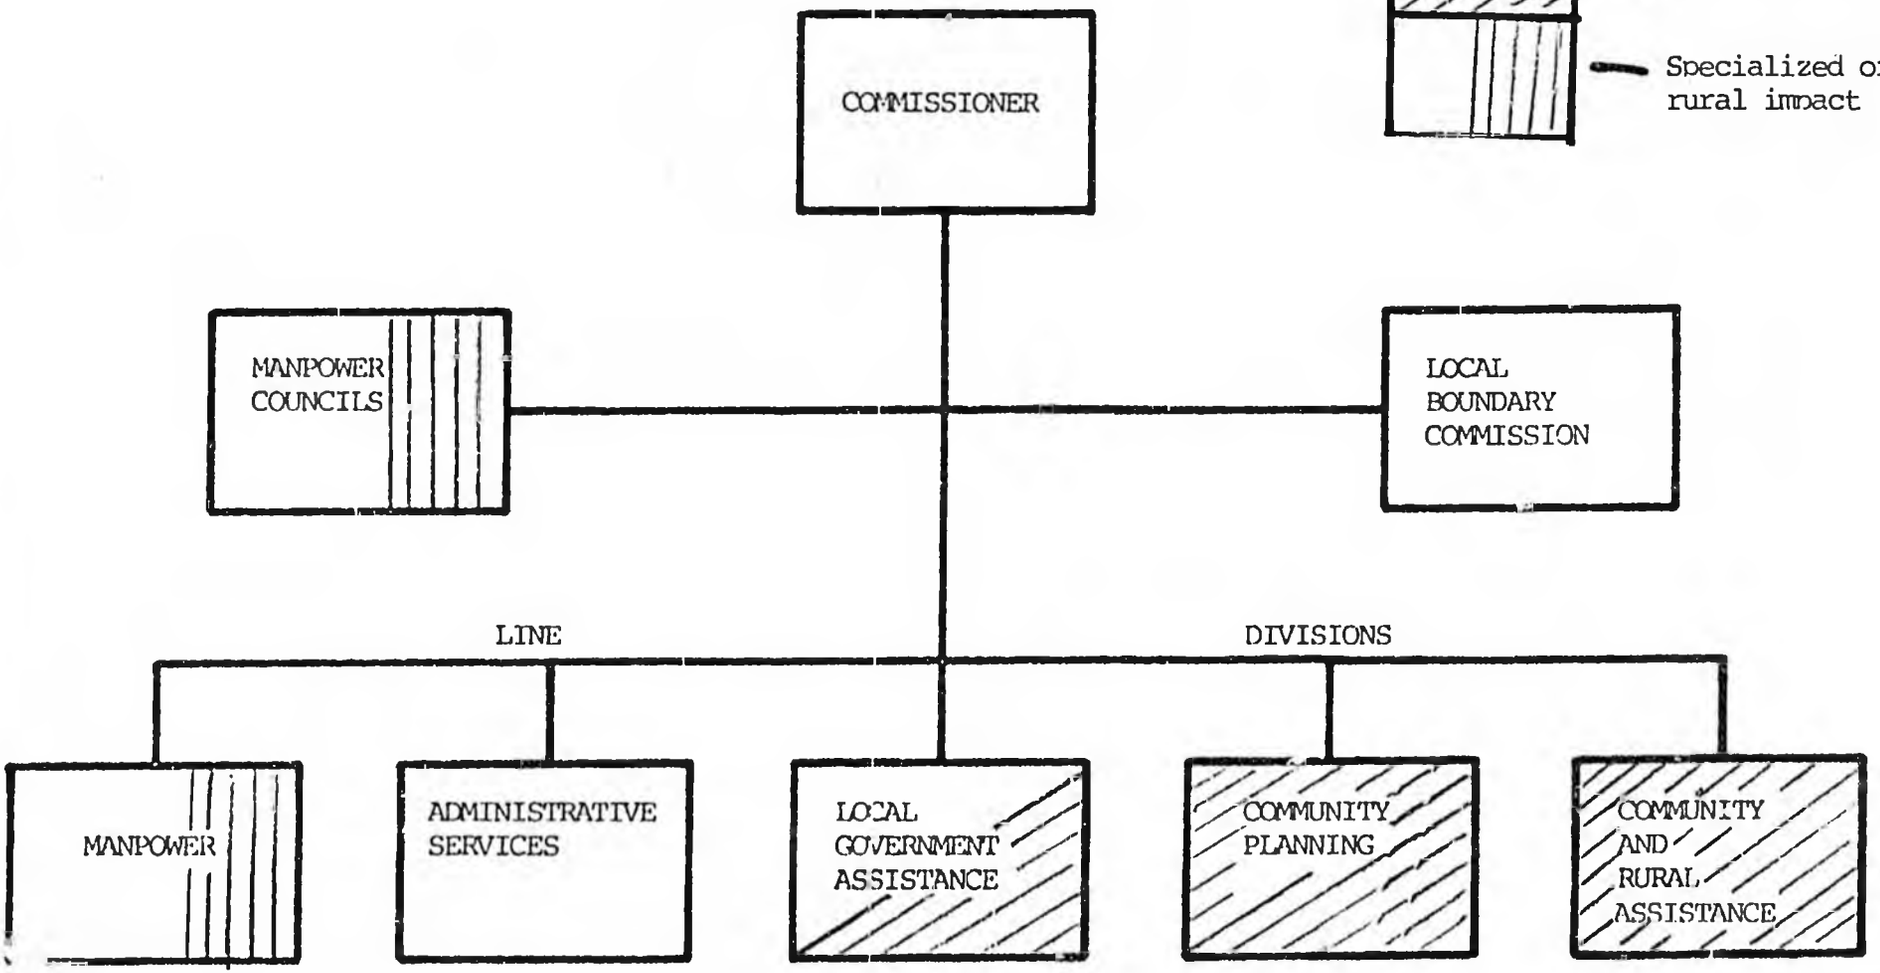
The Department has five divisions:

(1) Administrative Services
(2) Manpower
(3) Community Planning
(4) Local Government Assistance
(5) Community and Rural Assistance

The Department also is the seat of policy groups or commissions such as: 1) THE STATE BOUNDARY COMMISSION, 2) MANPOWER COUNCILS, and more recently 3) THE PRIVATE INDUSTRIES COUNCIL (PIC).



The Department maintains offices in key rural centers, and operating programs such as the rural assistance grants projects, has a valuable rural outreach.



CRA now has an important rural presence and as rural Alaska wrestles with difficult local government problems, the department will have an even more important role. However, the future demands of local government in rural Alaska will tend to specialize CRA in the government area, creating new obligations that will tax its resources in maintaining its program service obligations.

The department is now presently small with primary rural responsibility placed in its community planning function, local government assistance function, and rural assistance and grants program. CRA will be an important partner in economic advocacy in rural Alaska, and it is likely in that process that whatever structure is designed as a rural economic advocate, will likewise be an advocate of maximizing CRAs program and service functions.

Community and Regional Affairs, although quite small compared with other departments, must be selected as one of the four to five departments with significant rural policy and field obligations. The Department has also the most "generalized" functions of those rural agencies (as compared with Transportation, or HSS) and therefore the Department may be a likely nominee for a lead-functionary among program-service agencies in bringing together coordination in the field on economic projects.

DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

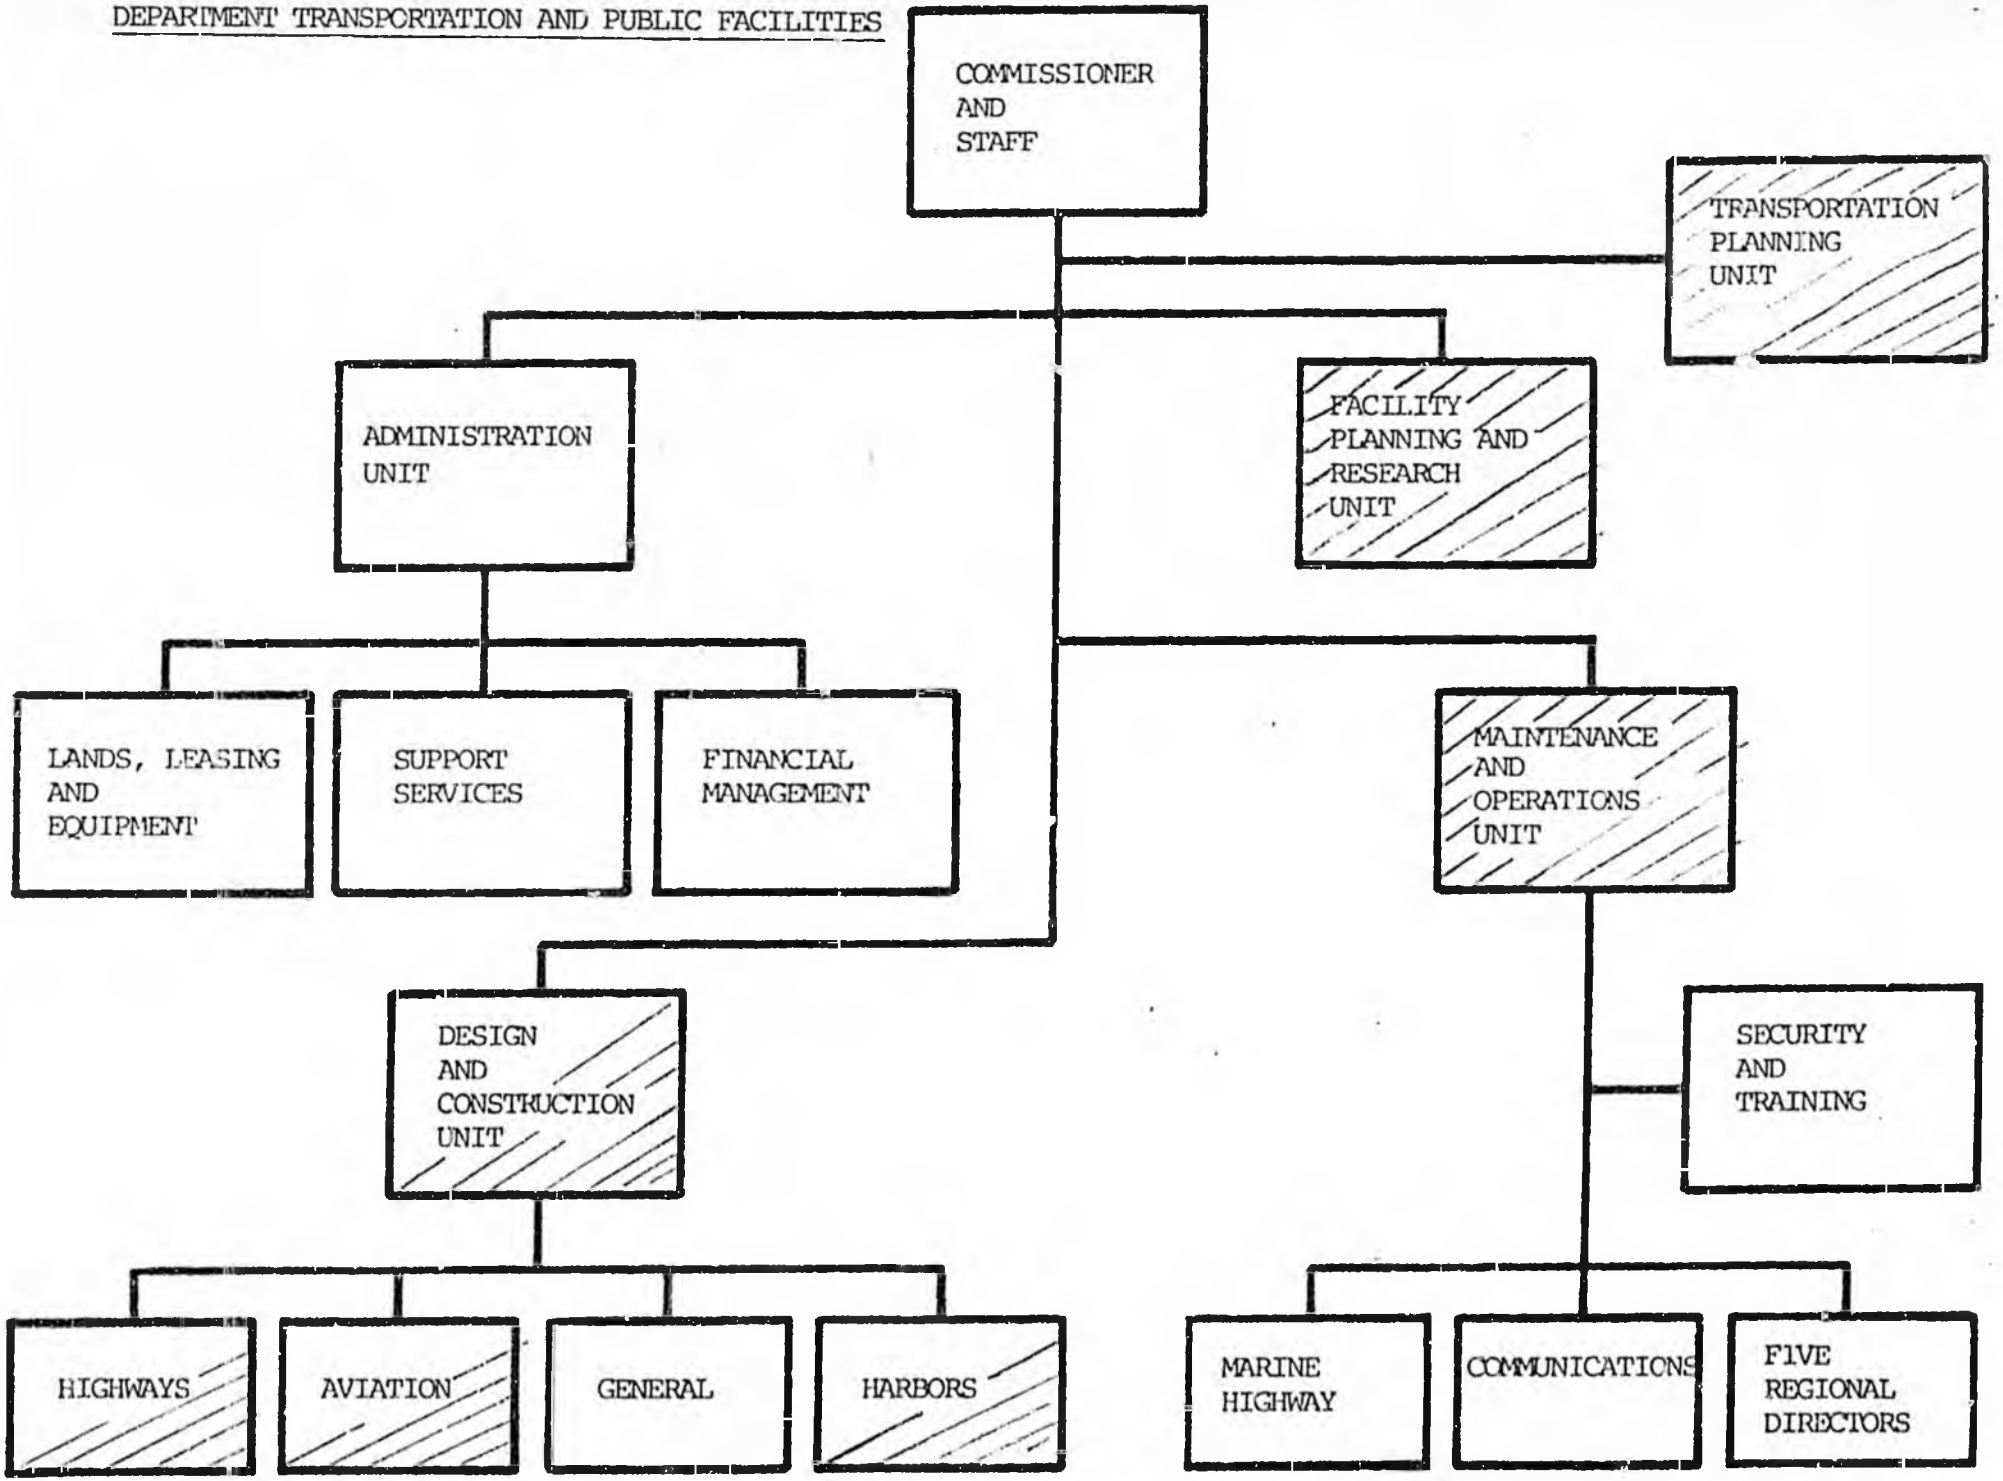
DEPARTMENT OF TRANSPORTATION AND PUBLIC FAILITIES

The Department has the largest number of employees in state government. Many employees are either in planning and construction, or maintenace along transportation systems connecting major urban centers, but nevertheless, a sizable number of employees are represented in rural areas.

The Department has four major units:

1) Administration
2) Design and Construction
3) Maintenance and Operations
4) Facility Planning and Research
**Trabsportation Planning (Office of Commissioner)

The Department is very important to rural areas because of its planning and development of rural transportation systems, its planning and development of facilities, and its maintenance of such facilities. In both areas the department has critical possible SUPPORT and EXPERTISE to offer private development in rural areas.



DOT important rural functions are:

1) TRANSPORTATION AND FACILITY PLANNING: Important in terms of possible coordination and support of rural development in the private area.

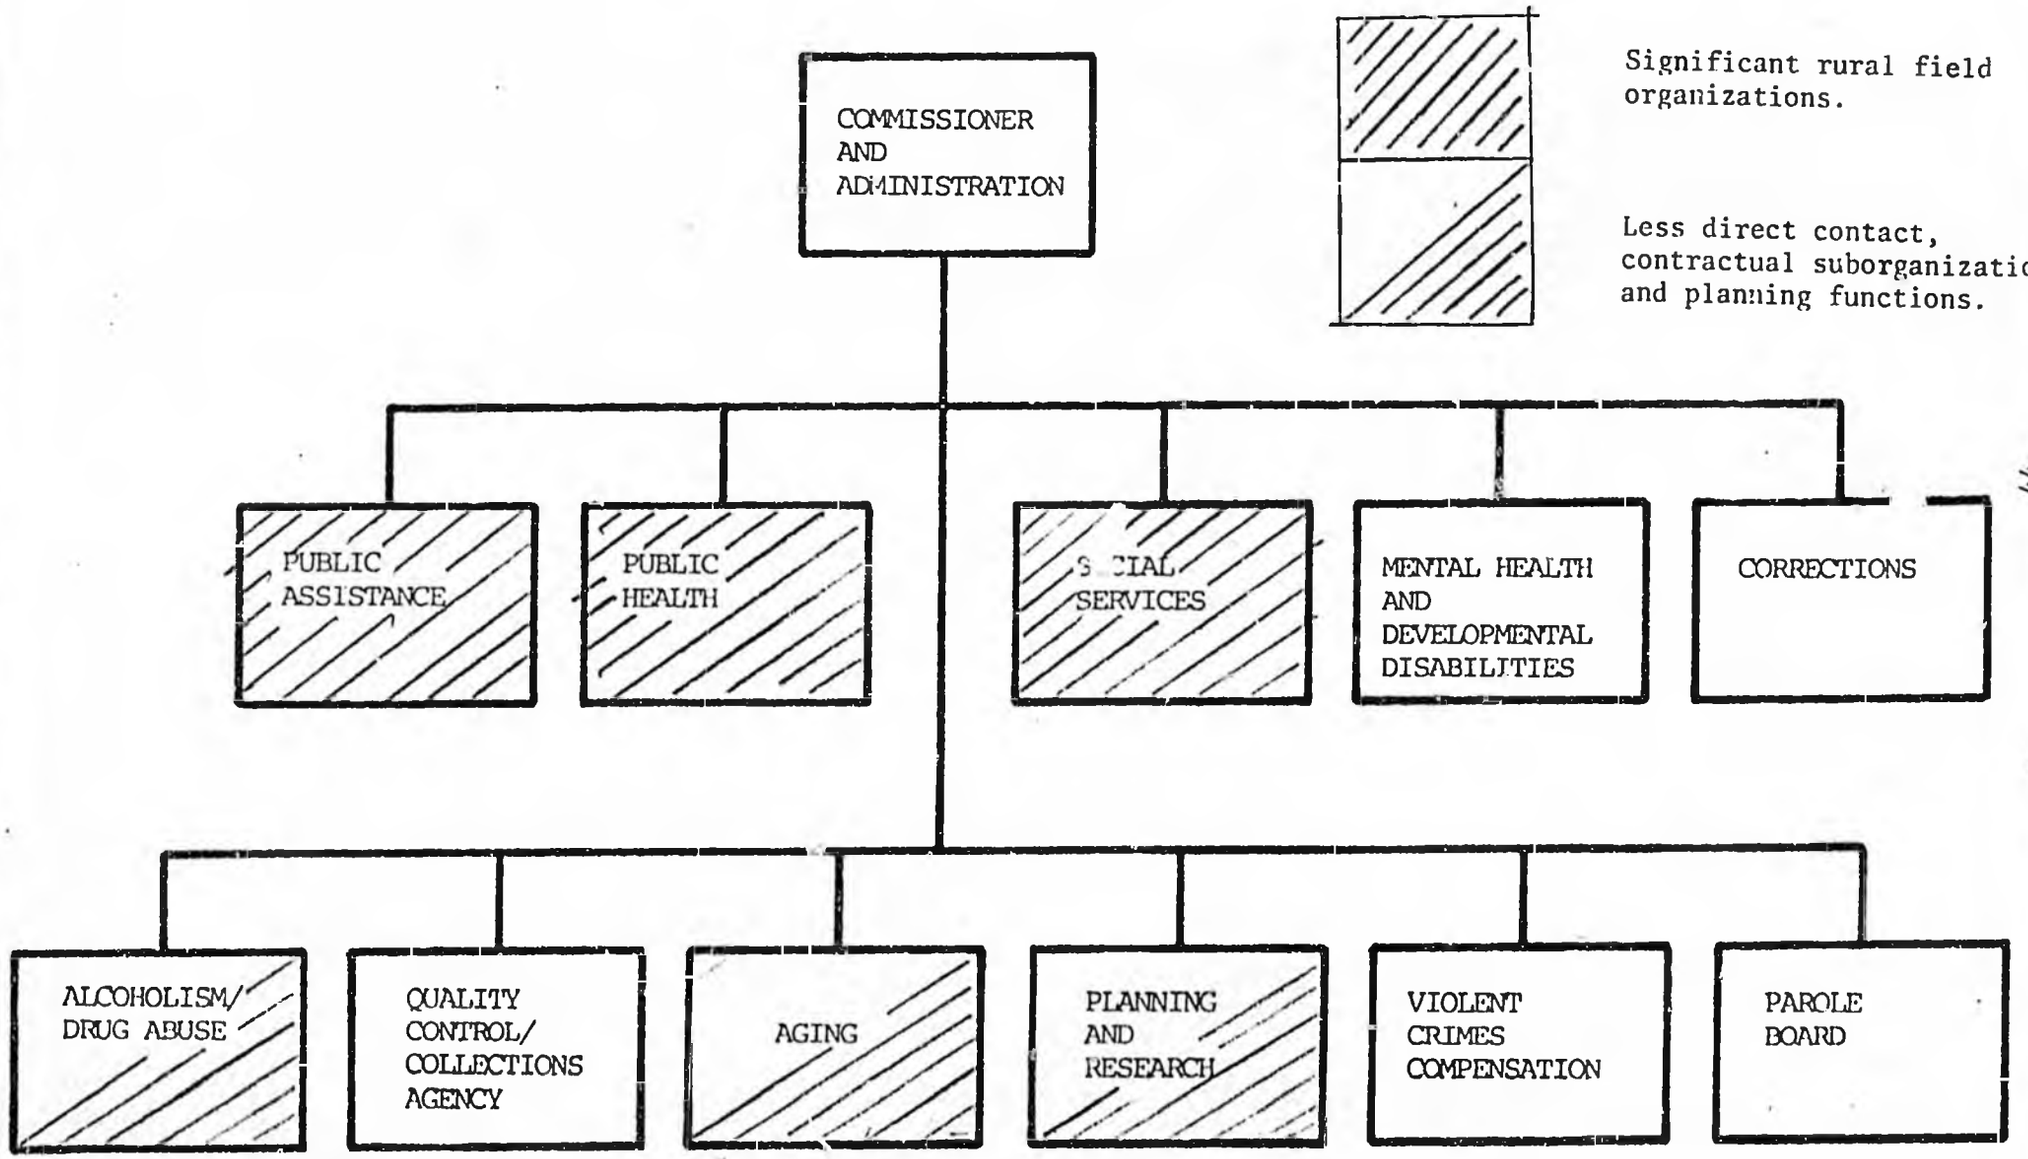
2) MAINTENANCE AND OPERATIONS: A valuable field staff with rural experience.

3) DESIGN AND CONSTRUCTION UNITS: Important in building to rural needs. A source of practical development experience for rural projects.

DEPARTMENT TRANSPORTATION AND PUBLIC FACILITIES

DEPARTMENT HEALTH AND SOCIAL SERVICES

The Department is the state's second largest department and is perhaps the largest in terms of employees functioning on the field level in rural areas of the state.



HESS has rather specialized program functions, but in any effort at developing a coordinated rural awareness and effort, the fact is that the department has the most strategically placed field staff. The contact of the staff with communities is also reasonably frequent and regular. The Department is also contact and program involvement with a great many rural Alaska non-profit corporations that deliver various kinds of contract services.

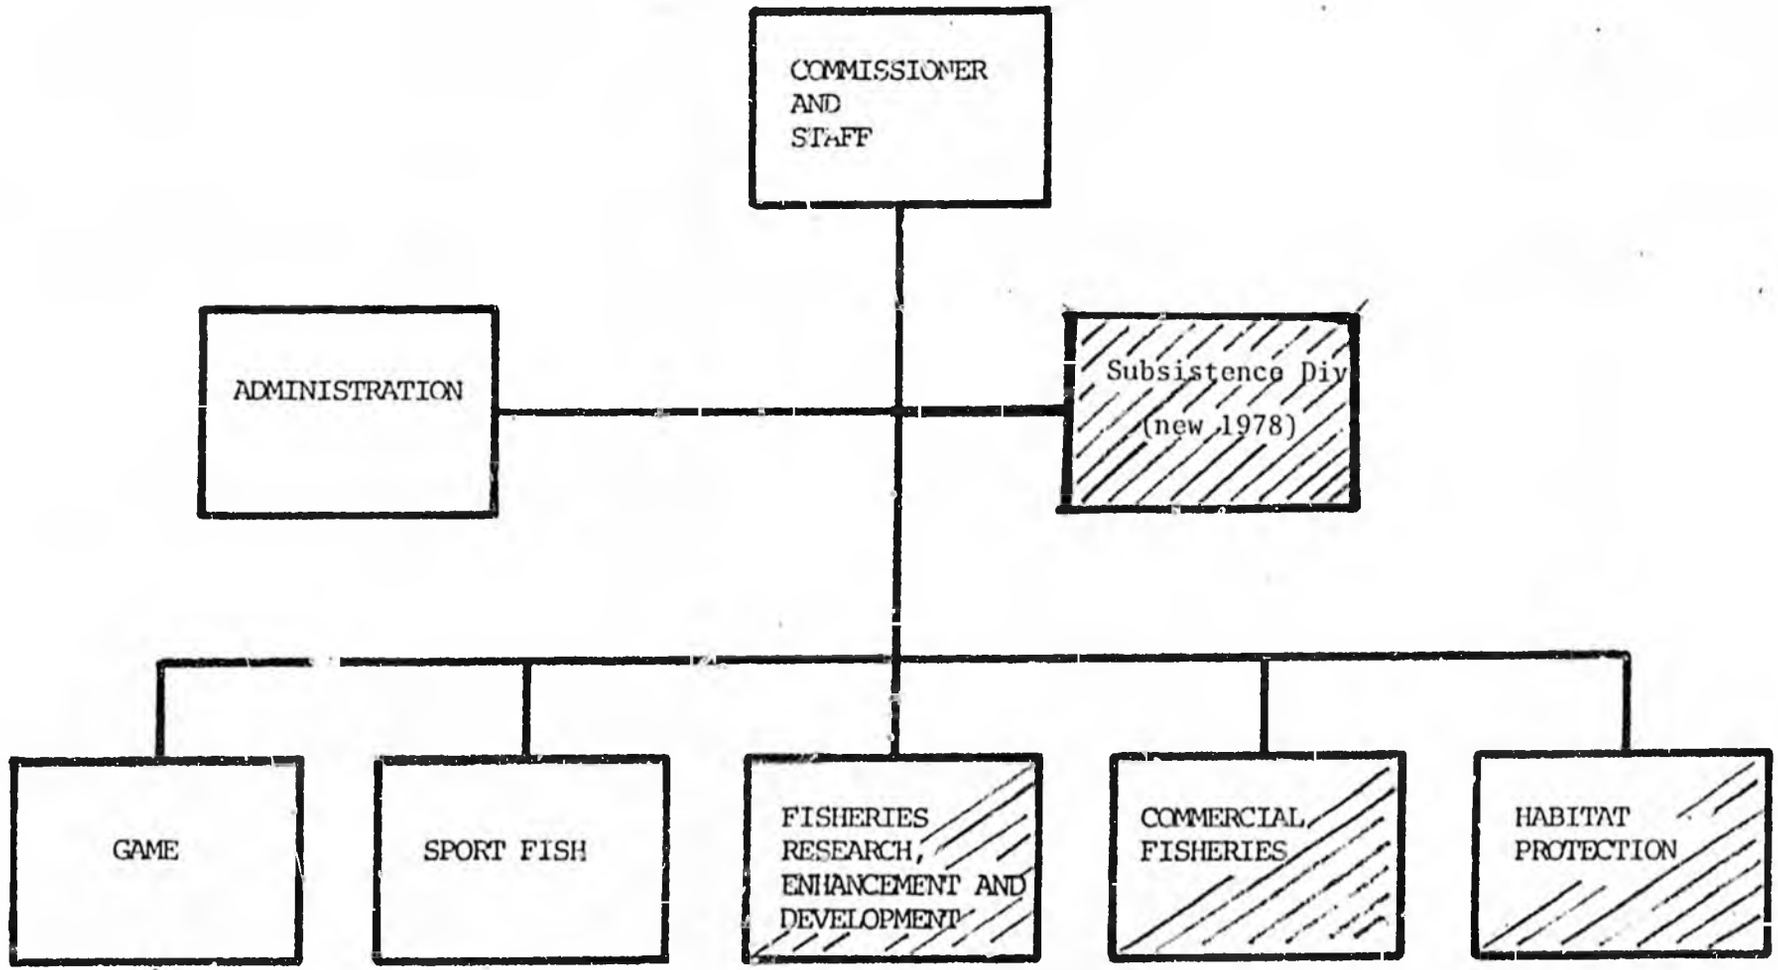
Ironically the department with this "largest rural presence" is the department that is charged with putting on the social and economic "band aids" in an almost futile attempt to patchup the results of decades of economic and social deterioration.

The key field divisions are: PUBLIC ASSISTANCE, PUBLIC HEALTH, SOCIAL SERVICES, and less directly ALCOHOLISM, AGING, and PLANNING AND RESEARCH.

Despite the seeming gap between HSS programs and the function of an economic initiative, it may be important that the department be included among departments that would be partner to economic initiative.

DEPARTMENT OF HEALTH AND SOCIAL SERVICES

DEPARTMENT OF FISH AND GAME



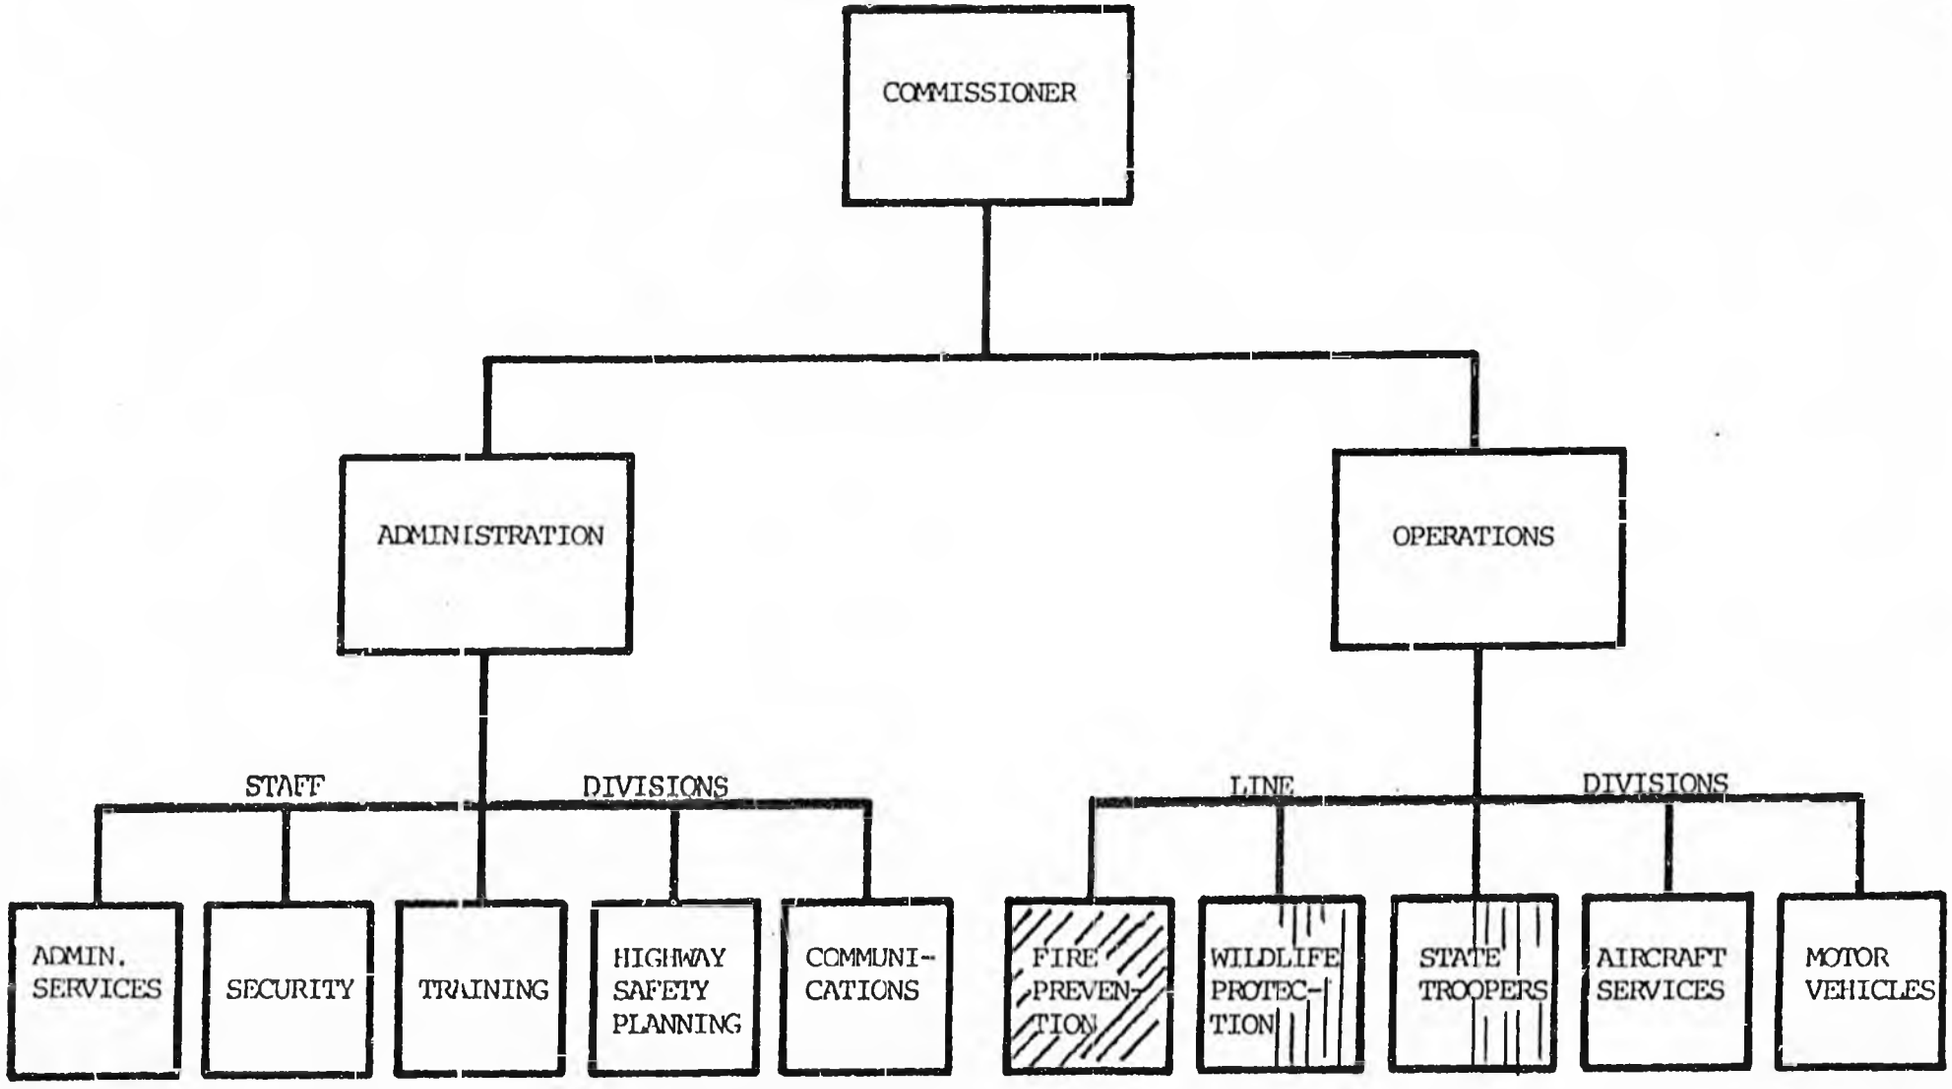
The Department of Fish and Game has a sizable rural staff, but one which has rather specialized functions in most cases. The Department has five principal divisions: GAME, SPORT FISH, COMMERCIAL FISHERIES, HABITAT PROTECTION, FISHERIES RESEARCH, ENHANCEMENT, AND DEVELOPMENT, and a sixth unit added in 1978 to deal with SUBSISTENCE.

Fisheries Research and enhancement, commercial fisheries, and habitat protection all can be involved in rural issues and problems. However, in terms of an expectation of "early" advocacy, the divisions may have a conflict in role, since they must police and question various proposals made against their primary spheres of interest. Such units cannot be expected to be policeman, evaluator, and advocate.

The subsistence division implemented in 1978 for the first time created a unit within the department that was broadly oriented towards a rural issue --use of the resource for subsistence. The broad charge of the division has also equipped it to function more in the role of advocate of rural needs than other departmental units.

It may be in a rural economic initiative that the Subsistence Divison might prove an effective coordinator between other units and external structures involved in rural development.

DEPARTMENT OF FISH AND GAME



DEPARTMENT OF PUBLIC SAFETY

The Department of Public Safety is perhaps the most field oriented department in state government. The department is literally a field agency. However, while the department has an excellent rural spread of employees, and an excellent communications network, its specialized police function removes it from being a functional part of any rural coordinative unit. The role of the department is simply inherently different from development functions.

The department also operates the division of Wildlife Protection, and while this unit is extensively rural oriented, it has even a stronger conflict.

The division within Public Safety that could have significant rural impact, and become significant rural advocate in terms of community development and protection, is the DIVISION OF FIRE PREVENTION.

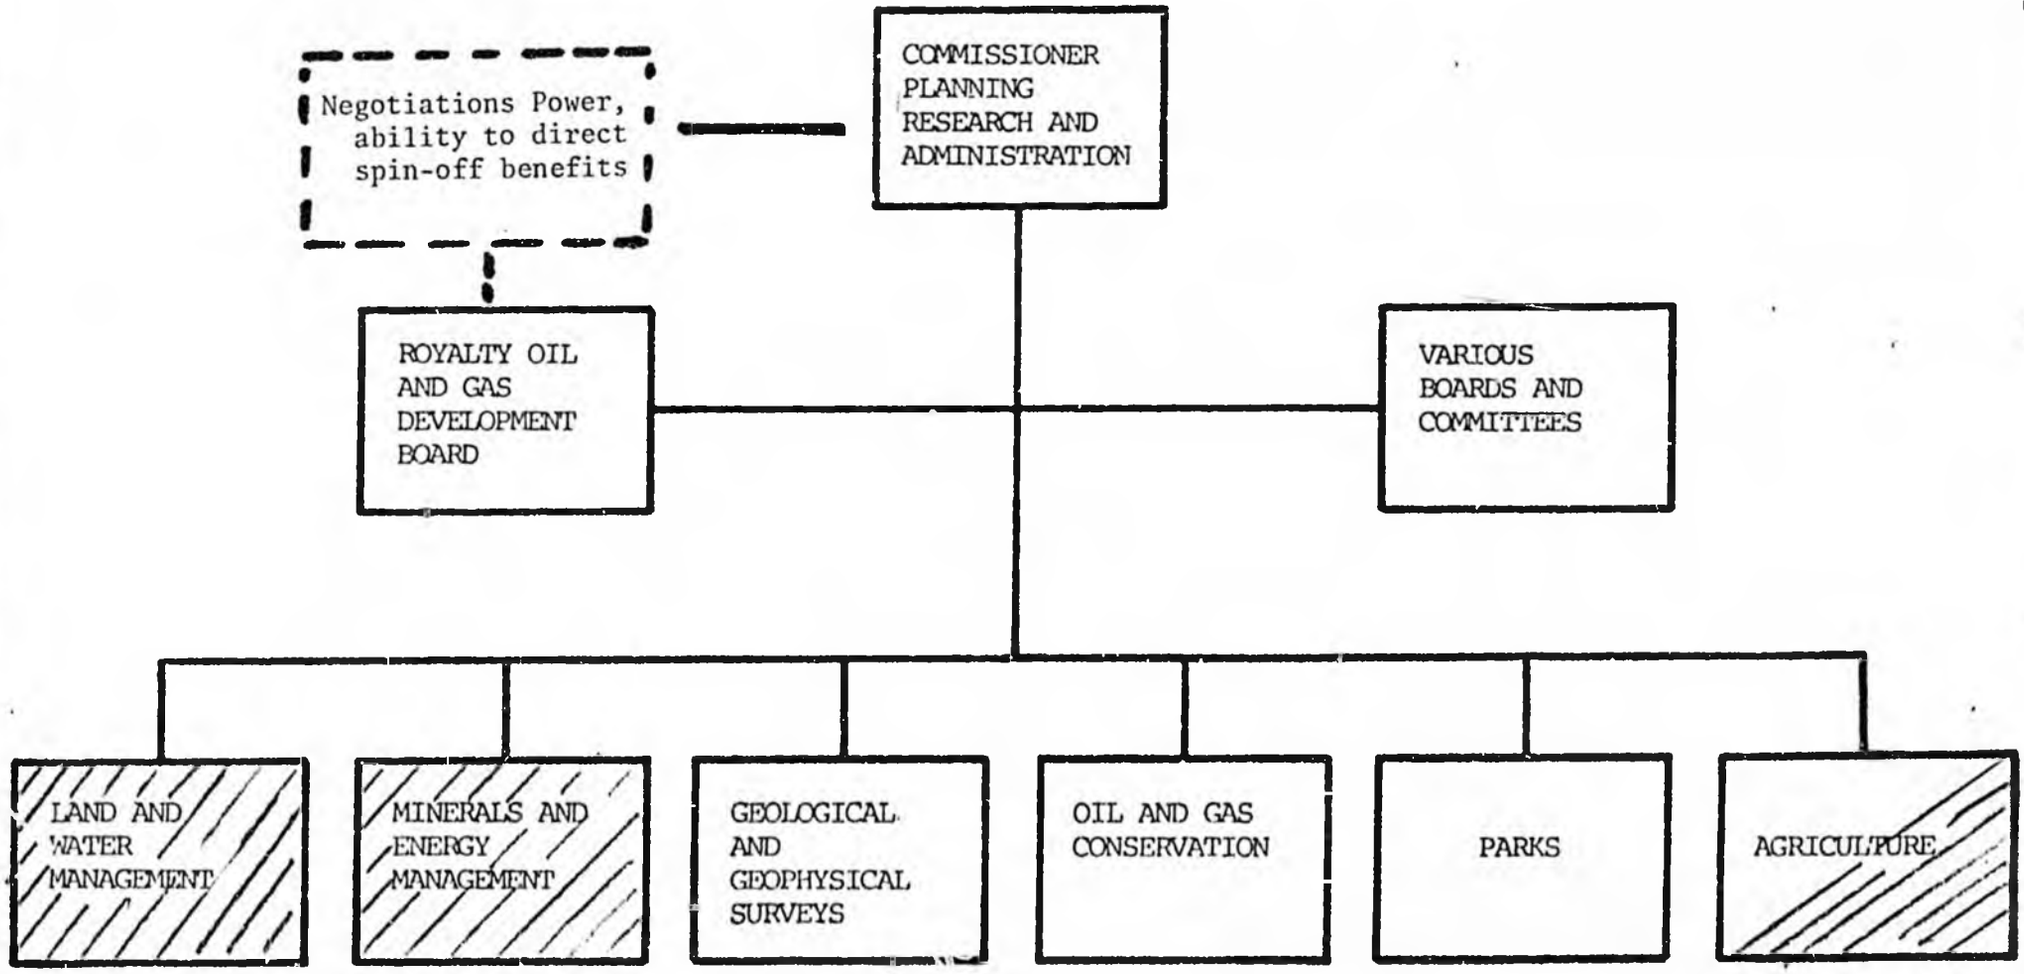
DEPARTMENT OF PUBLIC SAFETY

DEPARTMENT OF NATURAL RESOURCES

The Department has a small rural field operation, and that field operation is largely through the state's expanding development of park facilities. The Department is not a rural field "operative," but is and can be a significant department in terms of policy that can impact rural lifestyle and development.

The Department has primary say in disposition and/or management of a large portion of the state's surface and subsurface resource wealth.

Key divisions with rural policy impact in the department are:



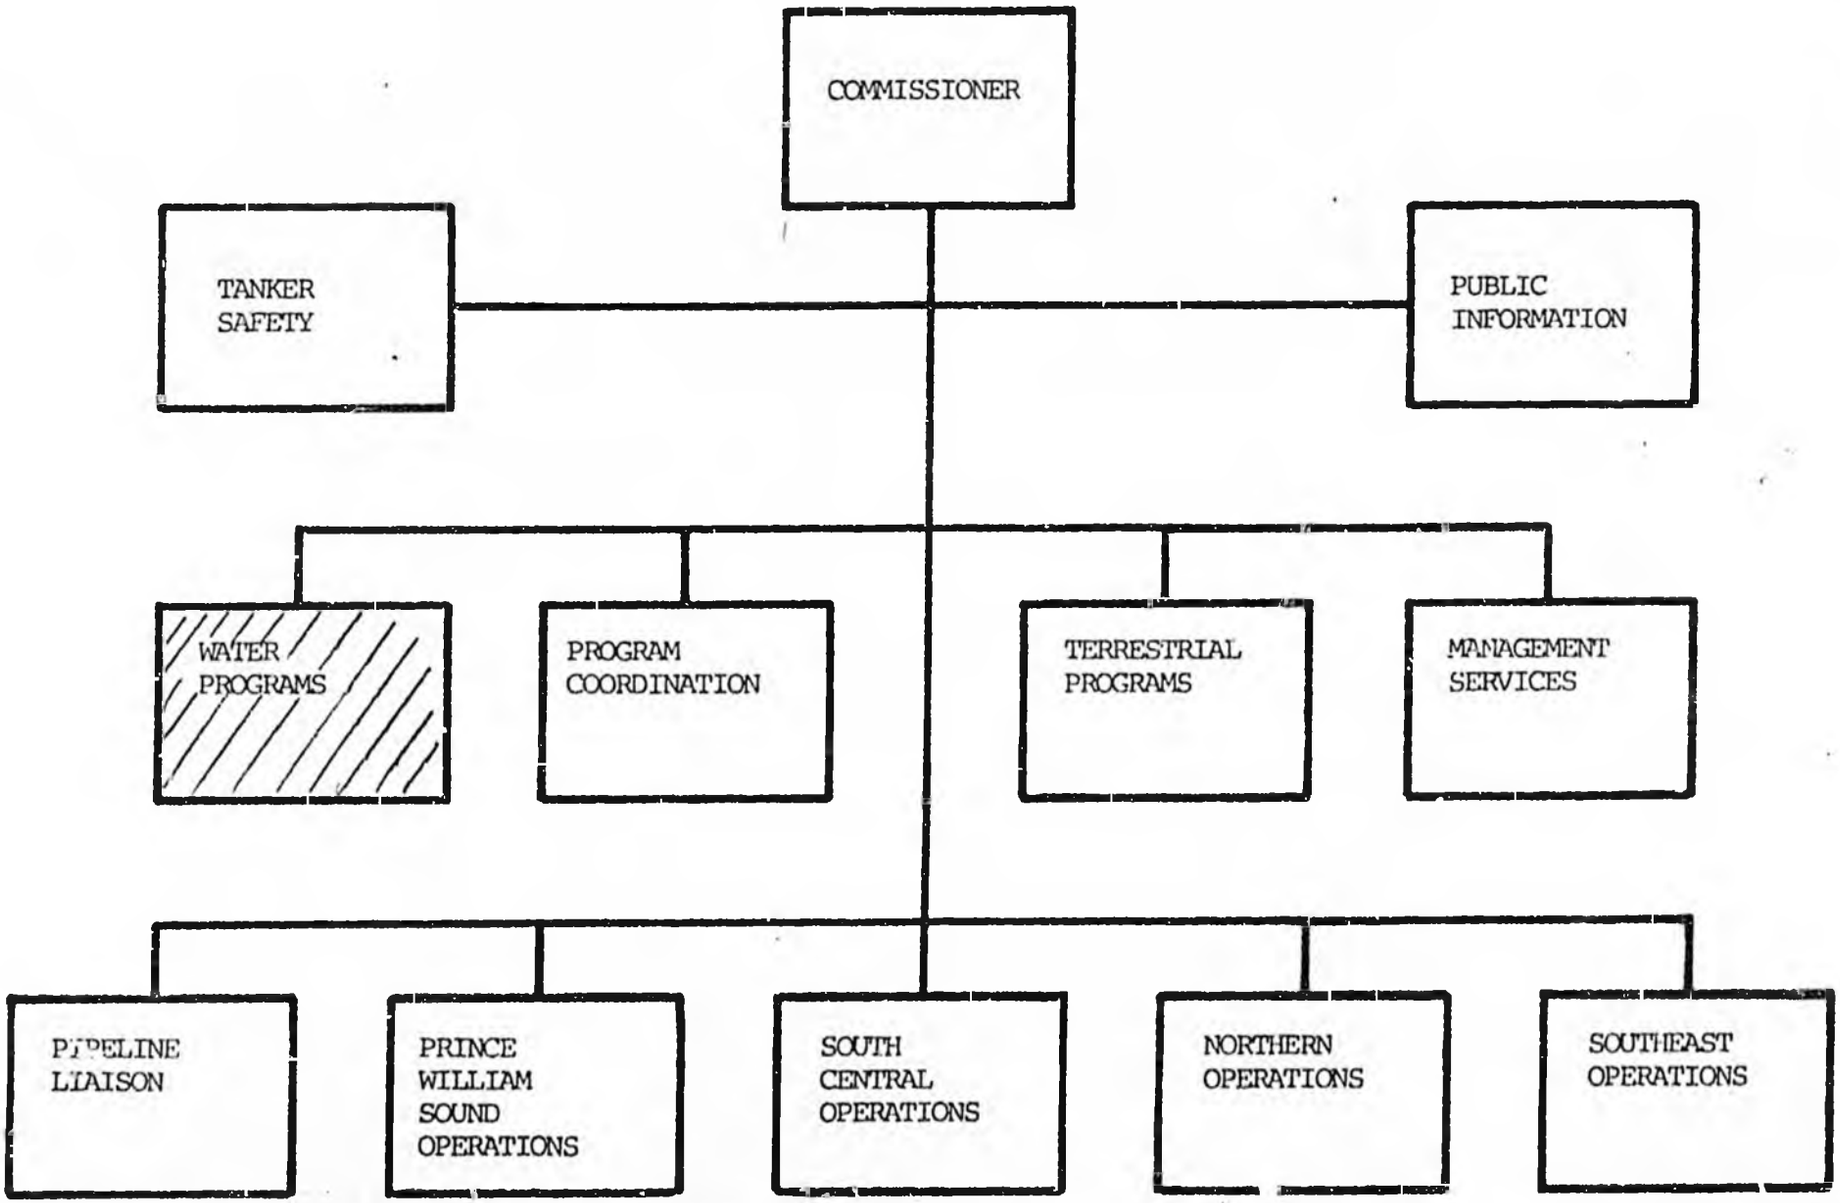
1) LAND AND WATER MANAGEMENT: Management and disposition of state land and water resources. This division can have a positive impact on cooperating with community projects, and/or cooperating with native land management and development.

2) MINERALS AND ENERGY MANAGEMENT: Manager of the state's oil disposition (together with Oil and Gas Conservation).

3) AGRICULTURE: Charged with Alaska agricultural policy, which will have an expanding place in the Alaska economy in the next quarter century.

The Department has tends to be the lead negotiator in major resource contracts of state leased resources (Alpetco, Gas Pipeline, as well as the specific resource lease). This role involves delicate decisions that concern spin-off, or soft benefits, and as a result the department could have a crucial place in determine whether "macro-scale" projects in some manner can be made to benefit or underwrite the "micro-economies" of small rural communities.

DEPARTMENT OF NATURAL RESOURCES



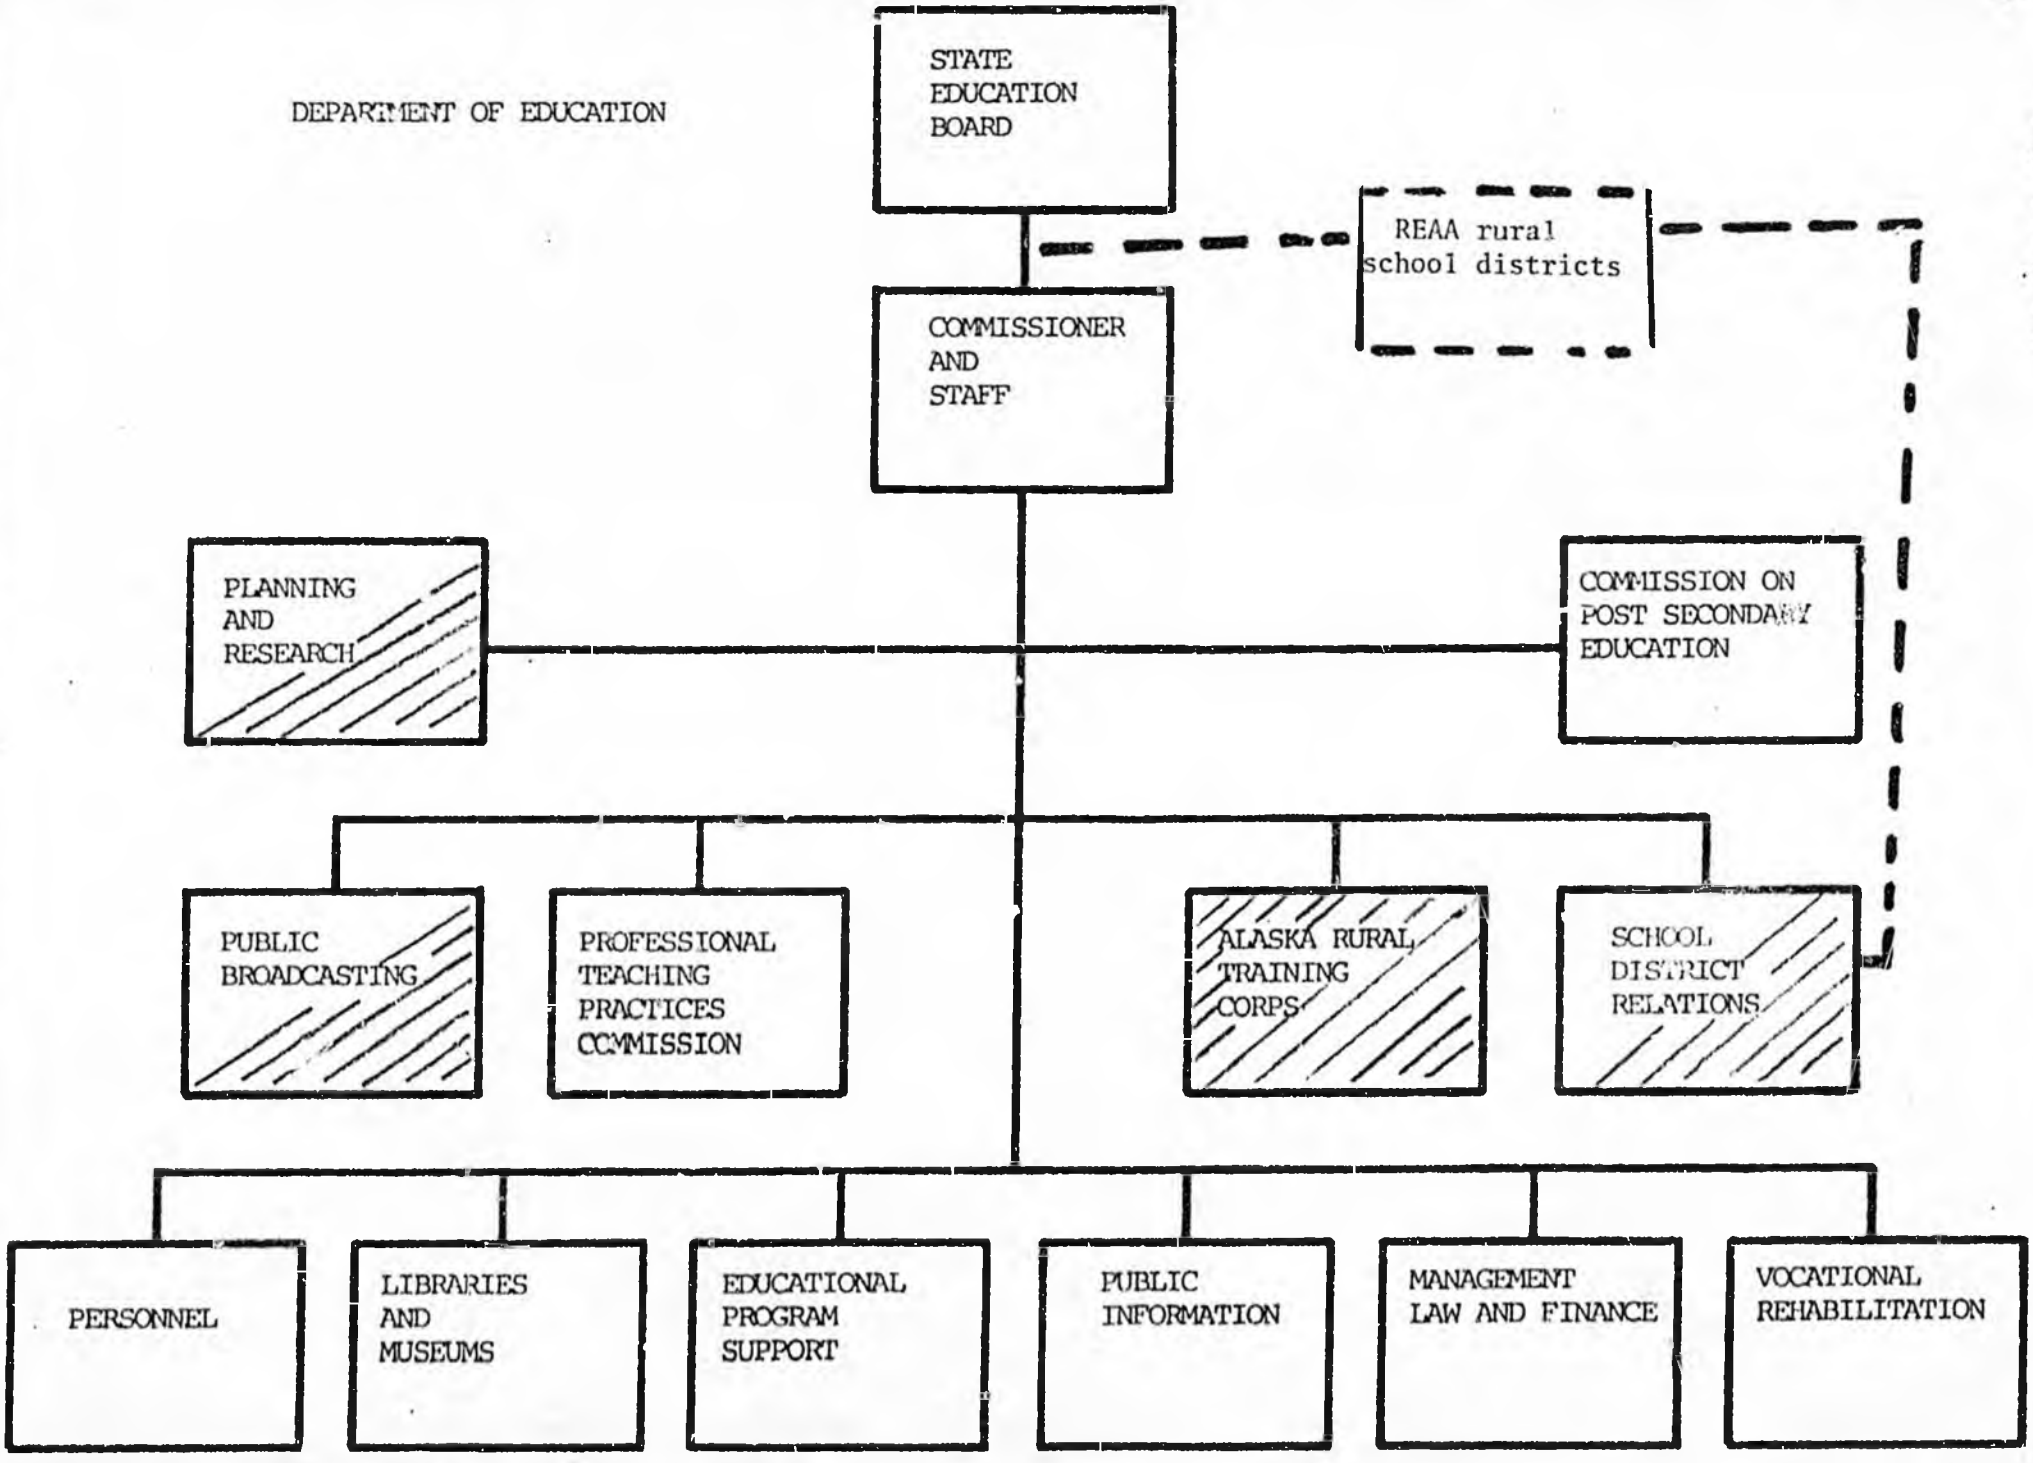
DEPARTMENT OF ENVIRONMENTAL CONSERVATION

The department is small and has responsibility for maintaining the state's environmental quality. As such DEC must be both the operator of several service programs and the state "advocate" of the environment. Such a role of advocacy would appear to prohibit to a certain extent its participation in rural economic development initiative. This is not to suggest DEC could not participate in coordination and attempts to speed consideration of a project. However, the DEC could not be expected to be THE ADVOCATE.

DEC does administrate the state's program of small community water and sewage development. Such programs are essential to rural community development, and could relate to private economic development. DEC must act as developer and policemen at times, and faces some conflicts in the sewer and water area. DEC must be the critic of systems at times to the extent that a technology is not realistic within the framework of a small rural community. The department can in such circumstances recommend the subsidy of systems, but this may reflect interdepartmental conflict since the agencies policemen role may lead to compacting its own future budget, and/or developing complicated utility projects that pull DEC into management to the extent of being perhaps undesirable and secondly the type of situation no bureaucracy will volunteer for.

DEPARTMENT OF ENVIRONMENTAL CONSERVATION

DEPARTMENT OF EDUCATION



The Department of Education no longer has a direct rural field operation as it did up until the creation of rural independent school districts (although 100% state supported).

The REAAs could be treated as an offshoot of the department, but since they also represent a very significant element of region-wide locally elected government in rural Alaska, they are best treated as seperate entities.

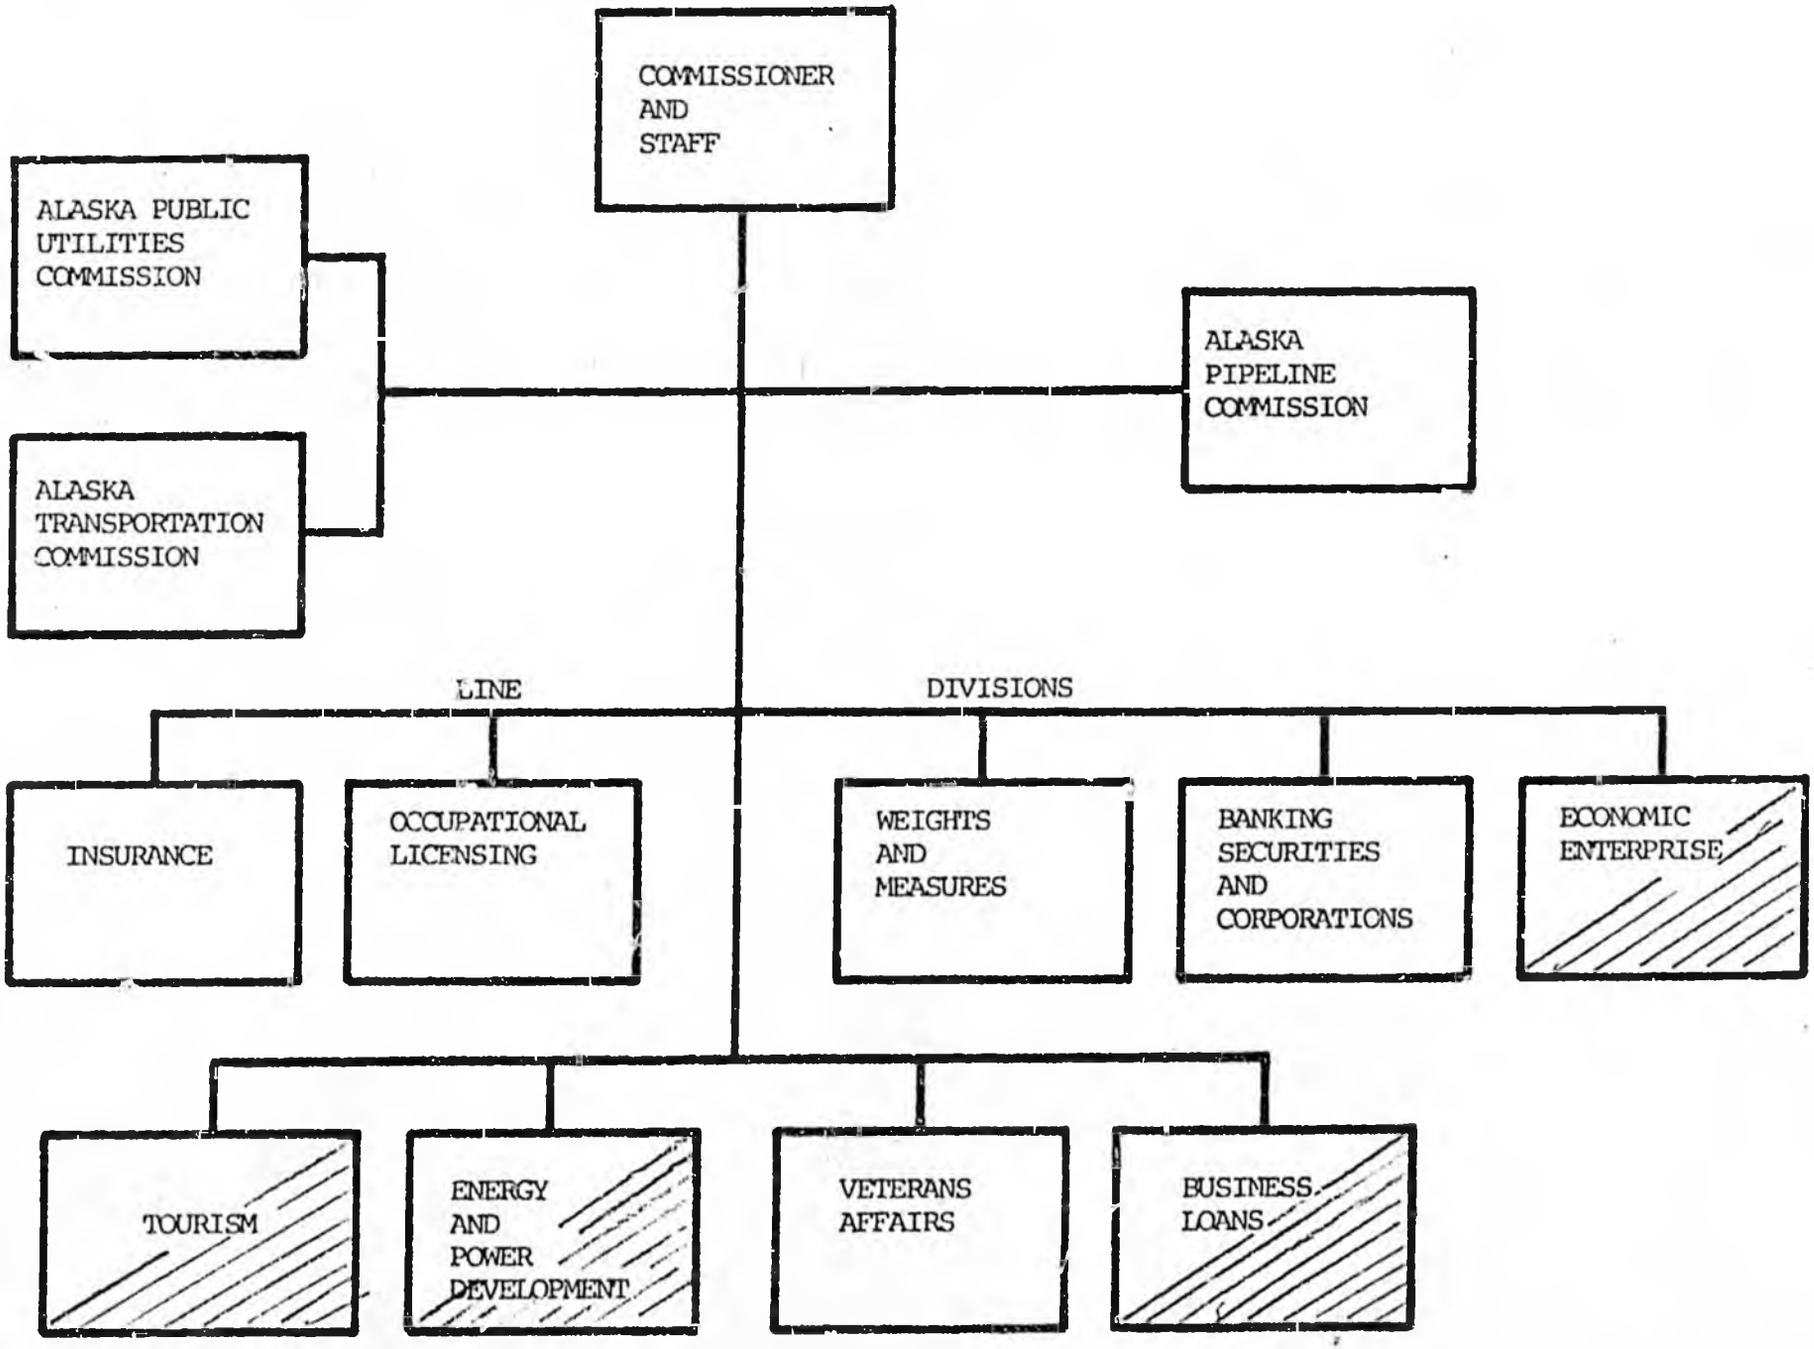
The significant divisions of the department therefore are the ALASKA RURAL TEACHING TRAINING CORPS, SCHOOL DISTRICT RELATIONS, PLANNING AND RESEARCH, and the PUBLIC BROADCASTING COMMISSION.

The Public Boardcast Commission has significant rural impact, since that agency is in charge of expanding public roadio stations in the rural areas of the state. The stations provide a unique sense of community contact in rural Alaska and provide a vital communications link.

DEPARTMENT OF EDUCATION

DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT

The department is a merger of the old Department of Economic Development and the Department of Commerce. The Development function has largely become the Division of Economic Enterprise, which carries out some research and keeps basic state economic data.



However, the department could take on substantial rural interests if the state becomes the department to which a variety of state loan programs are assigned under the current condition of excess revenue. The department already operates the state's business loan program.

The department could also take on various roles in terms of management assistance to development corporations, and could become "home" in the event rural conditions required an occassional "state corporation" to carry out certain functions.

Commerce to date has been something of a collection of state regulatory and licensing functions. However, in the future the role of the department may be well worth considering as a partner in carrying out a rural economic initiative.

Development related authorities, although more independent, tend to be attached to Commerce. Currently the Alaska Housing Authority, the Alaska Housing Finance Corporation, Alaska State Development Authority, and the Alaska Power Authority, all of rural development significance, are attached to the agency.

COMMERCE AND ECONOMIC DEVELOPMENT

OTHER STATE DEPARTMENTS

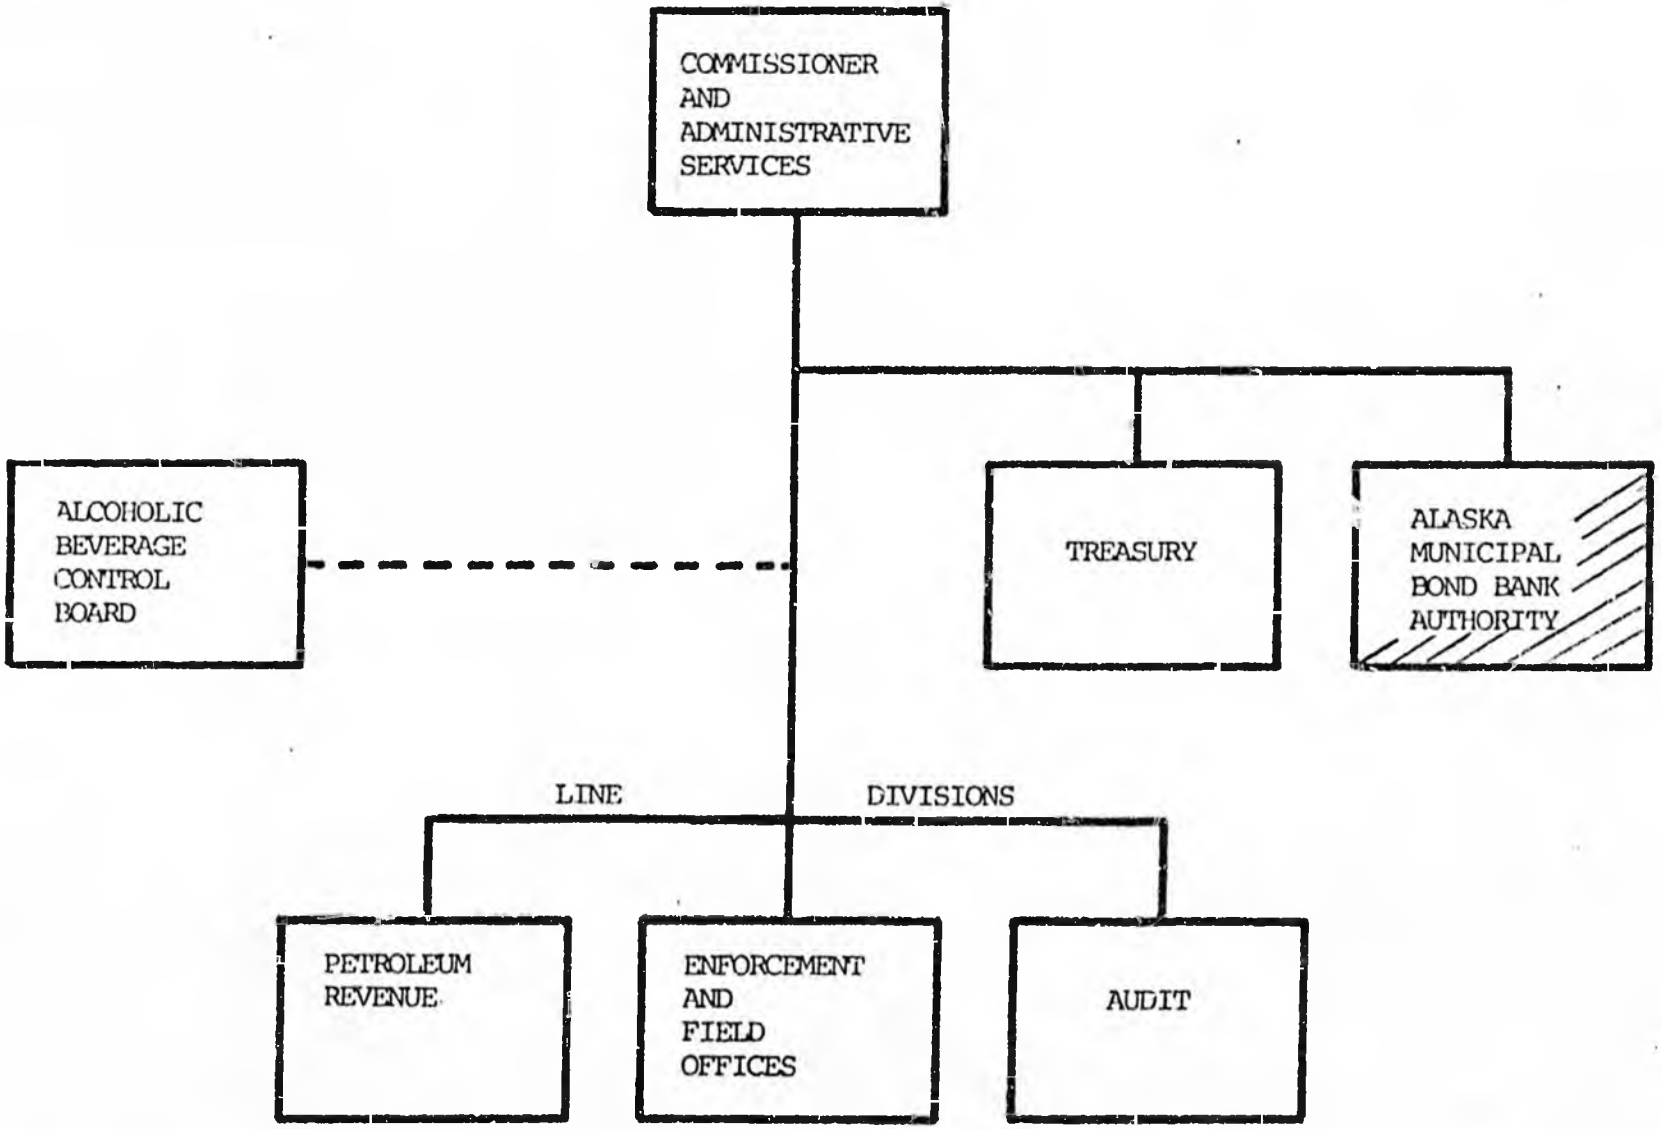
The other state departments do not carry out what might be termed either rural field operations or definitive rural policy.

The remaining departments are the departments of:

--REVENUE

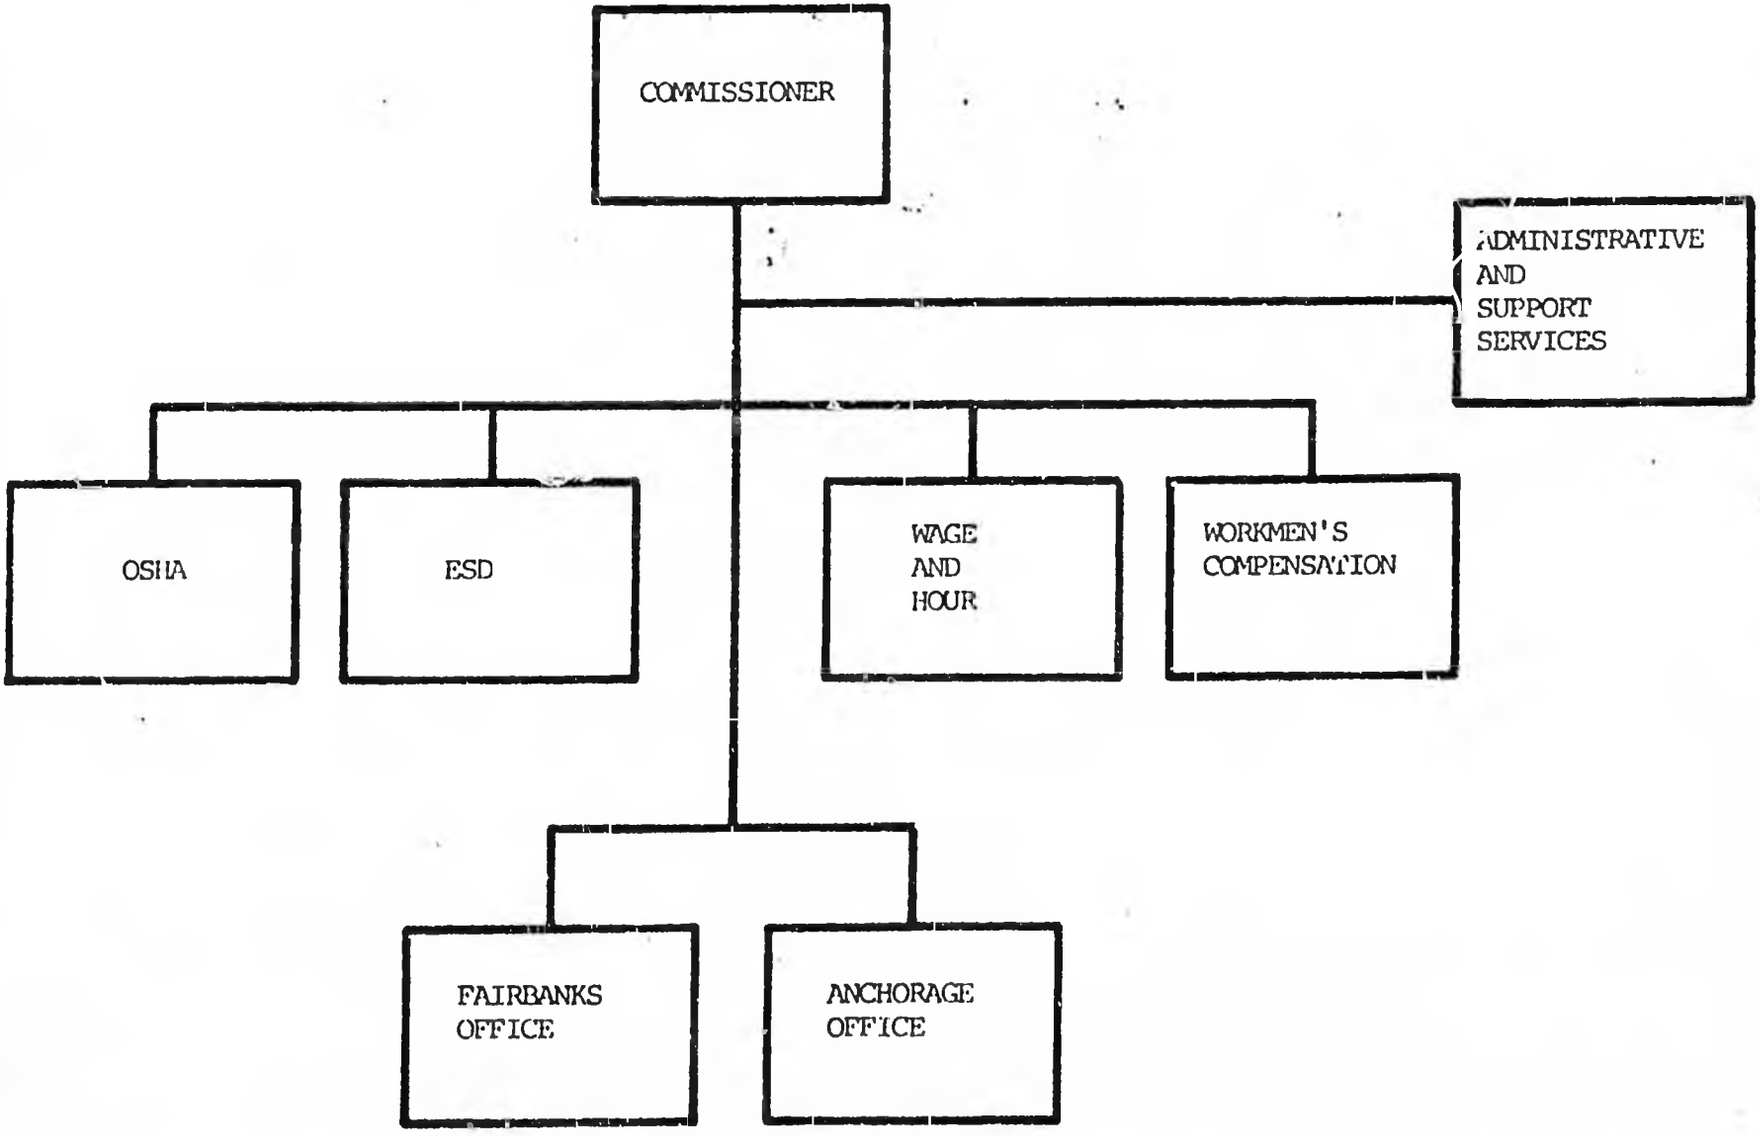
--LABOR

--ADMINISTRATION



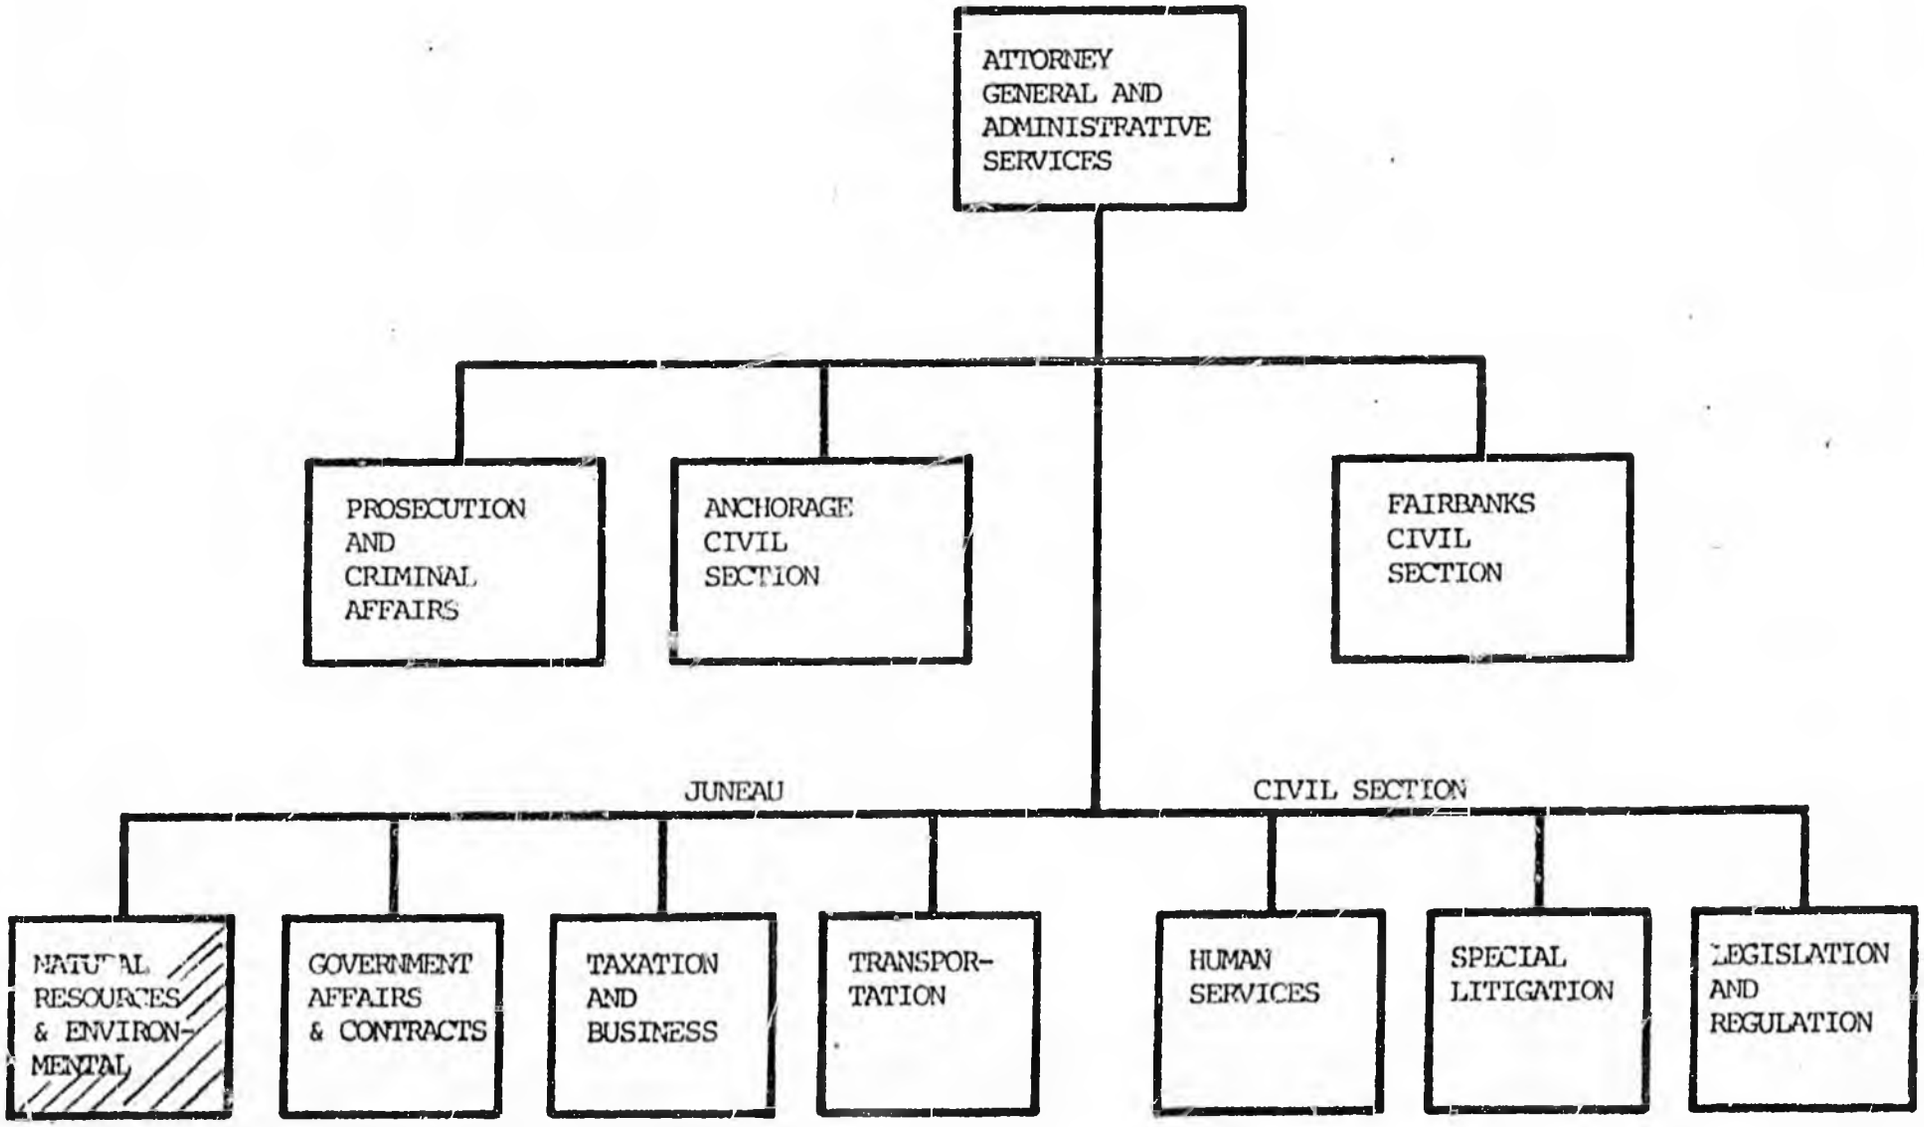
--LAW

--MILITARY AFFAIRS

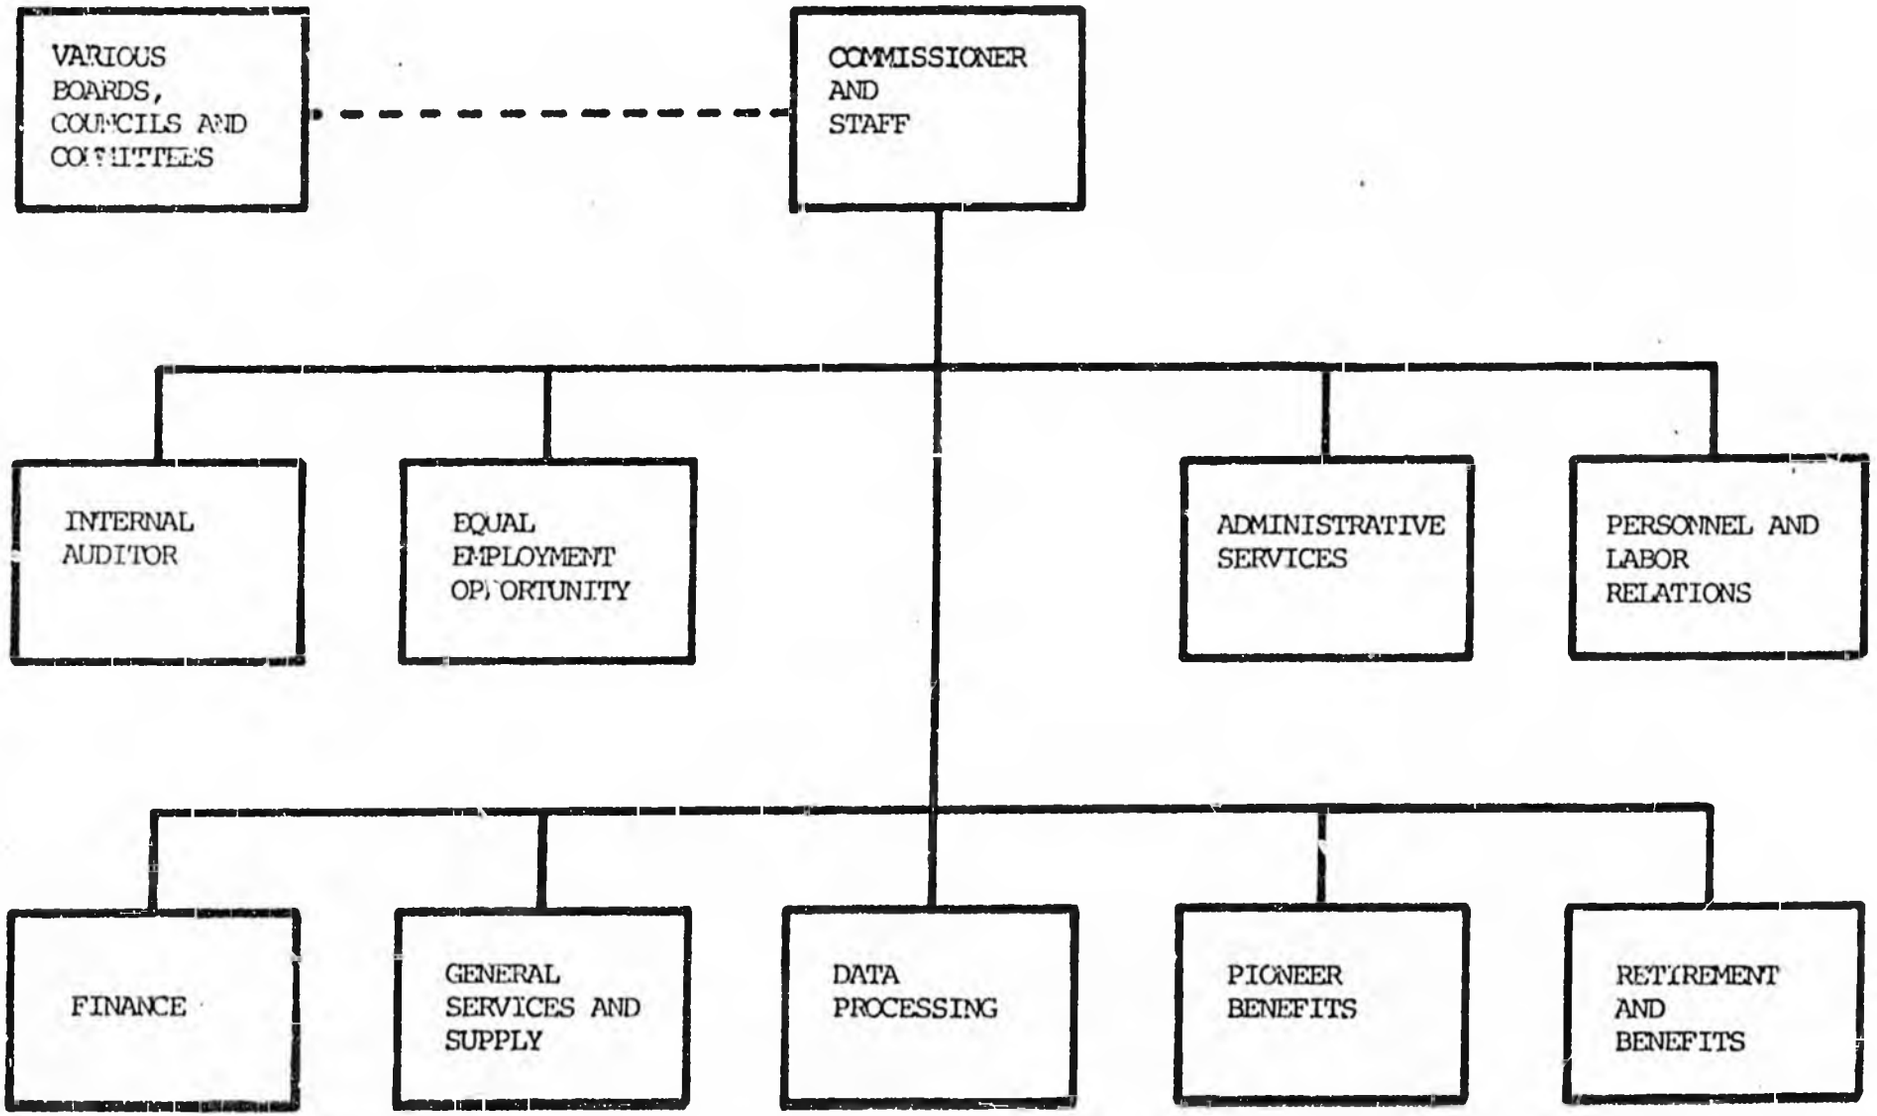


Each department has some rural functions, and several could at some point take on significance. For example, the functions discussed in relation to the Department of Commerce (loan funds etc.) might end up in revenue under new policy. Military Affairs includes the rural Alaska National Guard, and an active Department of Labor could have rural impact via innovative affirmative action programs.

It should be noted that one of the state's first corporate structures for handling a margin of excess revenues for investment, The Alaska Renewable Resources Corporation, was attached to the Department of Revenue (although independent in authority).



DEPARTMENT OF REVENUE



DEPARTMENT OF LABOR

DEPARTMENT OF LAW

DEPARTMENT OF ADMINISTRATION

OTHER SIGNIFICANT QUASI-STATE STRUCTURES

Two other organizations with significant rural organizations and/or impact which must be considered are:

--THE RURAL EDUCATION ATTENDANCE AREAS (REAAs)

--THE UNIVERSITY OF ALASKA (and Cooperative Extension Service)

The REAAs are significant in that they provide a framework of universal local government in rural Alask where there previously was no such framework. The function of the REAA is education, but regardless, it represents a source of input, decision making, and even possible administration from "duly elected" representatives of the public.

This paper does not suggest requiring REAAs to necessarily function beyond the educational function. However, in the past leadership and input in rural Alaska often came from non-elected leaders since there were no comprehensive other governments. The REAA structure now DOES PROVIDE for a source of input from "elected leaders."

Additionally, on a voluntary basis the REAAs could function as an administrative organization carrying out an assigned function, contract, or providing the framework for administration of some function on to a smaller and less able rural community. In any event, the REAAs provide a basis for rural regionalization, and a basis for a possible relationship to a rural economic initiative.

The University of Alaska has also grown into a statewide institution stretching from Ketchikan to Kotzebue, and functioning in rural areas through the Cooperative Extension Service attached to the university structure. The university in Alaska is also charged with post-secondary education delivery far beyond the "classic university." The university structure could prove valuable in training, management assistance, in technical assistance to communities, and in many other respects.

THE PRIMARY RURAL "FIELD AND POLICY" DEPARTMENTS

This review of state function and organization reflects certain key agencies which have useful rural field organizations. Those agencies therefore "stand-out" for selection in the sense the state's rural service organizations must be coordinated in relation to a rural economic initiative.

Agencies with primary field organizations are:

1) DEPARTMENT OF COMMUNITY AND REGIONAL AFFAIRS

2) DEPARTMENT OF TRANSPORTATION AND PUBLIC FACILITIES

3) DEPARTMENT OF HEALTH AND SOCIAL SERVICES

Agencies with primary policy impact:

4) DIVISION OF POLICY AND PLANNING (Office Governor)

PRIMARY RURAL AND FIELD POLICY DEPARTMENTS (Continued)

Agencies with secondary policy impact:

5) DEPARTMENT OF NATURAL RESOURCES

6) DEPARTMENT ENVIRONMENTAL CONSERVATION

Agencies with special rural relationship:

7) UNIVERSITY EXTENSION SERVICE

8) RURAL EDUCATION ATTENDANCE AREAS (REAAs)

STATE ADMINISTRATION TASK FORCE

The primary state agencies listed above are essentially a "de facto" rural problem task force and rural projects coordinating group (minus University Extension Service and REAAs)

Their role is a "de facto" one that exists whether formalized or not. The inherent responsibilities of the departments mean they can either function on a less formal basis, even to the extent of coordination via destructive "turf battles," or their existance and functional relationship can be recognized in any degree from simple "mutual recognition" and agreement to appointment to some highly institutionalized structure. It is likely in most instances that policy issues or projects will affect only a limited number of the above agencies.

THE ROLE OF STATE "RURAL DEPARTMENTS"

The previously discribed "rural" oriented departments can be marshalled to provide efficient new state service programs in rural Alaska. The structure of state government is simple enough in Alaska, and the structure of the departments in question is simple enough, to achieve coordination and cooperation. However, what is meant here is relatively "established" concepts of state services.

Next, as local government is created in rural Alaska, these respective departments likely can achieve a relative successful measure or cooperation in aiding that government, and in providing a measure of "substitution" where the local government framework is inadequate. It should be remembered that the difficult natural basis for local government in rural Alaska, may make the latter (substitution) the probable route for some years to come.

Last, we should recognize that the departments are primarily "service" departments with a broad range of responsibilities. Hence, their role as a rural advocate, or moreso, as a rural development advocate, may pose many conflicts. It is therefore likely that a structure designed for economic advocacy in rural Alaska must exist outside the departmental structure. Some seperate structure must be present to act as a rural advocate, leaving the departments free to cooperate and at times to oppose projects and proposals. However, the advocate must be present to push concepts into the policy forum.

Additionally, rural problems exist because their are a special set of problems, hence a special advocate. Hence, a rural structure is needed to isolate attention to those rural problems, but by nature that institution should be temporary and likely close to the seat of political policy.

Lastly, a rural advocate charged with the problems of developing a "private" rural economy, faces a sphere outside the usual provinces of government. Crossing into that opposite sphere is difficult, is likely beyond the capacity of routine departments with a myriad of other problems and demands, and will require a continued support and awareness of the makers of political policy.

Hence, a structure charged with rural economic advocacy will have to function seperate from the service departments, will likely have to remain free of "service" attachments of its own, will have to stand "between" govenment and the private sector, and will have to draw on a sustained executive/legislative political support (rather than a bureaucratic support).

The advocacy of rural development on occassion will be able to deal in "marco-size development," in attempts to tailor large projects to support rural needs. But by-and-large the structure will have to face the task of "micro" development, of thinking small for small communities, in terms of a half dozen jobs instead of a thousand jobs.

A STATE "ADVOCACY STRUCTURE:"

Kinda of Issues and Problems 28

This report suggests several alternative policy structures for guiding a special process of encouraging private economic development in rural Alaska, and for giving that process a "sustainable" emphasis over an extended period of time.

The suggested structures ARE NOT solutions in themselves, but merely represent functional vehicles that can help develop and sustain effort to create a private economic base in rural Alaska.

The proposals inherent in this report are based on the serious conditions of the economy of much of rural Alaska. Additionally, they make a case as to why the "present" might provide special conditions, resources, and a timeliness in attacking such difficult conditions.

PURPOSE IN THE BROADEST SENSE

In the broadest sense, the purpose of a special structure is to marshall, coordinate, and sustain existing and potential federal, state, and private resources capable of contributing to growth of a private economic base for the rural communities and regions of the state.

Further, the structure should provide a single focal point for involving rural Alaska people in the process. Such a structure would be a first attempt at building a state-relationship with Alaska rural development's mosy unique partner --the native land claims corporations.

The private land, capital, and social base of the rural village corporation represents a grassroots structural resource in itself. The availability of such a field level structure in a depressed region is a most favorable circumstance of infrastructure in such general conditions of third-world economic void. However, the state has essentially ignored the existance of the corporations and any inherent state interest in their success or failure.

Any structure must also address "community development" issues basic to a private economic base. However, care must be taken that community development does not dominate the structure, or tend to divert energy from more difficult to resolve economic tasks.

The most important purpose of a special structure must be a strong "missionery dedication" to creation of private economy in rural regions.

THE SPECIAL "PRIVATE" CHARACTER

Two basic features of the mission of rural development in Alaska appear to justify a special structure og government, whether that structure is temporary or permanent.

First, the charge to generate a "private economic base" is not a familiar role of government. Second, responsibilities of such a policy effort tend to overlap the established categories of government programs.

THE NEED FOR SPECIAL EMPHASIS

Special emphasis to a problem outside the bounds of traditional government services is difficult to achieve for line-agencies. A mission may be so critical, and so varied, that indeed it MUST OPERATE BEYOND THE BOUNDARIES OF TRADITIONAL SERVICE AGENCIES. But architects of such things "beyond" the bounds of those service agencies, often fashioned as so-called "coordinators," must concede that more often than not, such creations become quickly isolated and powerless to carry out their tasks within government.

A purported "special structure" cannot hope to invade the "turf" of entrenched agencies, unless first the legislature is thoroughly convinced of the depth of the target problem, and secondly unless the state executive is equally convinced.

In order to avoid the inevitable muted-isolation of such a special structure, the construction of the unit must build in strong political backing and involvement. Such backing is essential precisely because such a structure is being asked to INTERFERE WITH THE ESTABLISHED ROUTINES OF OLD LINE AGENCIES, or is being asked to "reach" where they cannot reach.

Confronted by an "outside structure" charged with coordination, or the like, an established line-agency will generally take the easiest path. Generally that easiest path is to resist outside interference. Only if there is a very strong commitment in high level policy ranks, or after an agency gets its fingers slapped, will traditional agencies opt to "cooperate," since that then becomes their "easiest path." In other words, in constructing a special structure policymakers must analyze how to give a separate structure special "clout."

A special structure, in commission or agency form, and whether permanent or temporary, cannot be justified unless lawmakers are convinced of the following:

(1) . . . that the economic problem in rural Alaska is catastrophic in scope, or lacking that extreme;

(2) . . . that the mission does not fit traditional program agencies, or spreads beyond the bounds of a number of agencies;

(3) . . . that the problems require a special emphasis, or perhaps are problems easy to slide off for "future action," therefore tending to submerge the mission under the day-to-day crisis of a department.

(4) . . . that the problems are so serious and complex that a line agency lacks the "clout" to deal with the issue, or to initiate action and propose solution without special political backing.

(5) . . . that the mission is genuinely not to "run program," but rather to coordinate and provide muscle for other existing state programs and resources, and to provide the same between government and other institutions (federal, state, local government, non-profit, private).

Additionally, inherent in many of the foregoing criteria is that a special rural development structure should be cast in the role of "advocate." The role of advocate could pose inherent conflicts within some departments, and in the case of a planning agency may compromise that agency by presupposing the outcome of careful planning work. The role of the planning agency may require a very close partnership with the advocate agency, but the planning agency may be something of an alter-ego partner, being required to occassionaly criticize and oppose the more active advocacy of its alter-ego partner.

THE MEASURE OF THE ALASKA "RURAL ISSUE"

The measure of the problem of "rural economy" in Alaska measures very high against most of the previous criteria. Individuals may differ in assessment of degree of the problem, or in the nature of solution, but few are likely to disagree that the condition of the state's rural community economy is indeed catastrophic and has been for more than three decades.

From another view, economic events of the past several decades in Alaska have wrought tremendous growth and changes in urban Alaska. But the economic gap, as well as the sense of alienation between urban and rural Alaska, has widened. This division also tends to follow unfortunate racial lines among Alaskans.

The economic contrasts of rural and urban Alaska presents a picture of prosperous urban islands floating in a sea of rural economic depression.

Whatever the cause or whomever, if anyone, is to blame, the economic condition of much of rural Alaska is undisputably a human tragedy and an embarassment to our democratic economic systems.

SPECIAL OPPORTUNITIES OF THE PRESENT

It is difficult for our system of government to reach into the private economic sector and participate in constructing economic equity. The independence and separate dynamics of our government systems and our private economic systems do not always relate to each other. However, in critical times our systems, while perhaps slow to respond, have generally proven able to rectify glaring inequities.

Looking for the means to build a public/private relationship, a case can be made that unused federal resources are available. Additionally, it appears that federal economic policy is shifting to emphasize priority policy: . . . that only "private jobs" can resolve severe economic problems in the long run.

Present federal policy is shifting resources to rural and development initiatives that stress private development and private employment. These so-called "White House Initiatives" hold out great opportunity to those who are ready for them, for those who can put them together with other available resources, and for those like Alaska, that have a genuine underdeveloped rural base that is starved for "risk capital."

CURRENT ACTION

Recognizing the federal opportunity, the Alaska Legislative Budget and Audit Committee, together with the State Administration, has been working to put together a series of federal/state agreements designed to coordinate federal economic resources through a single federal lead agency, and to put that agency together with a state working counterpart.

The effort would be to coordinate federal resources of value in a rural economic initiative, to maximize those resources, and to clear federal/state barriers to development (regulatory, etc.) on a timely basis.

The state working counterpart would be WHATEVER SPECIAL STRUCTURE THE LEGISLATURE AND EXECUTIVE chooses to approve (which is the primary subject of this report).

PRIVATE RESOURCES

A case can be made also that private resources are now available for rural development that were not present in the past.

The native corporate structure has matured and gained experience in the last eight years. The capital assets of the native corporations, and especially the village corporations represent a "resource" that should be assisted by state and federal development policy.

However, the capital of native corporations in many respects is no different than any other capital. Despite the fact such capital has a social base in the form of resident community stockholders, such capital must still find and/or develop viable projects which offer both reasonable security of the investment and adequate return. It must be stressed that under the law, the native corporations ARE NOT social welfare organizations, but are established as profit making private corporations. They have the same problems in facing high risk frontier development as other corporations, except that their personal motivation to "do it" in the face of higher risk is likely stronger. However, it is possible that the proper use of state and federal resources, in conjunction with native corporate resources, might be able to reduce risk to native capital and encourage the flow of such assets into rural development.

The current proposal to pre-pay the remainder of the state's obligation under land claims settlement will also add significantly to the financial base of native corporation capital. Such an action may be the single largest, and the simplest action, the state can take in regard to rural development.

The private land and resource base that is a part of the land claims structure is also a significant factor in rural development. The goal of a state structure should be to help assist and direct capital to grassroots rural development, regardless of whether that capital is private, state, federal, or native, and to encourage the use of state, federal, and native land and resources in a coordinated fashion in behalf of encouraging a rural private economic base.

Additionally, Alaska financial institutions are now considerably stronger and more varied than a decade ago. They have stronger ties to outside institutions, and due to such world scale developments as Prudhoe Bay, new significance of fisheries resources, a capital and resource base from land claims, Alaska commands a respect far beyond the measure of its present economic production.

STATE RESOURCES

The chief asset of the state is its "position" to act as a focal point in bringing together available existing resources, and to apply to an effort to construct a viable rural private economy.

The state must be, and is the natural initiator of a search for, and a marshalling of, economic resources. Obviously, federal agencies do not come seeking difficult and often risky development efforts.

The state also has basic resources of its own to offer that it did not have a decade ago. The state has the ability to act as initiator of community services related to private development, such as utilities, transportation facilities, and technical assistance. The state has the ability to participate in capital, or to attack basic private financing issues such as fire insurance in rural areas. The state has a "field network" available through program agencies, which with proper coordination, could assist in both local community development and private projects.

The state also offers a superior basic structure with which to coordinate with federal institutional participants. The Alaska structure has a strong central line of authority leading from the governor, and is vastly different than the fractured multi-elective structure that exists in many other states.

THE ALASKA DIFFERENCE: LENGTH AND DEPTH OF COMMITMENT

Alaska requires a long-term commitment to rural economic problems. The state's rural problems are not a result of recent economic recession, or existing sick industries, the problems are a result of more than a quarter century of economic collapse and difficult cultural adjustments. The Alaska effort may require the better part of a decade..

It is here --in length and depth of commitment-- where Alaska differs markedly from the manner in which other state's will approach the development of SPECIAL FEDERAL AGREEMENTS to enhance private economic development. A review of the few existing agreements, and potential agreements, indicates that the agreements appear geared towards one or two "priorities-of-the-day." They seem to carry a hidden presumption of temporariness about them, and lack a strong tie to "joint" executive/legislative commitment and development of intrastate mechanism to focus on more than the "issues-of-the-day." In this respect it is likely the initial motivation of Alaska is different from other states.

In reviewing the federal opportun :y for both the state to command and coordinate federal resources, there appears to be a significant opportunity for Alaska to be the only, or at minimum one of the few, states to approach the agreements with a much longer range view in mind.

Alaska has the opportunity to get the federal government committed to state rural development, committed to special treatment and coordination, and to keep that commitment going for a prolonged period. However, in order to command the long-term commitment of the federal government the state must first itself be committed.

As previously stated, economic initiatives under our separate public and private policy systems require a deep commitment to bridge the gap. In Alaska this means a commitment of the executive and the legislature, and further a broadbased commitment within the legislative body. Oddly, the effort must command the commitment of the urban legislator and the perception that the effort is also vital to the urban economies of the state.

Commitment of rural policymakers to such an effort is something to be taken for granted, with some exceptions. However, rural backing and rural development as a "rural issue, can isolate the effort as a regional issue, and one therefore elgible to be pushed, shoved, cut, threatened, bargained, and generally politically played-out in the precarious wars of short-term legislative policy. Unfortunately, long term issues requiring a breadth and depth of commitment, issues needing an expectation of sustainability over time, do not always fare well in the battles of more immediate political pie-cutting.

However, the commitment of urban legislators could provide the commitment to rural development the sustainability it needs. Urban lawmakers have an interest of their own in an expanding and healthy rural economy.

Previously Alaska was described as a series of urban economic islands floating in a sea of economic depression. Whether that picture is overstated can be argued, but the lesson of the protrayal cuts both ways. The picture not only reflects a non-existant rural economy, and all which that infers, but equally a precariously isolated urban economic structure.

The picture is one of precariously narrow urban economies based primarily on government spending, cycles of construction and singular resource development booms, and one of urban communities failing to develop themselves as broad commercial centers serving a growing economy far beyond their own borders.

In other words, for the state's narrow based and isolated urban economies, rural development is "urban development." It is not only urban development, but offers a strongly stabilizing ingredient for the urban economic structure. It is almost impossible to undertake development in most rural areas of the state that does not benefit the urban commercial centers. However, the converse is not true, since urban development may hold no benefits for rural communities.

Urban policymakers may also consider the long-range ramifications of continued neglect of a rural economy:

(1) . . . that the urban/rural economic contrast is both a serious ethical and functional problem for Alaska.

(2) . . . that the end-results of continued rural economic poverty tend to become urban social and economic problems due to out-migration into urban areas.

(3) . . . that in future general economic constrictions, urban unemployed will tend to outmigrate from the state, but that the rural unemployed, represented mostly by native Alaskans, are unlikely to outmigrate except to urban areas due to deep cultutal ties.

(4) . . . that while Alaskan urban economies have grown dramatically over the past several decades, those economies remain narrow.

(5) . . . that in order to develop a stable commercial center, the center must have an economy to serve "elsewhere."

(6) . . . that rural development promotes both direct, and indirect economic activity for urban centers.

(7) . . . . that rural development expands opportunity for larger scale rural resource development, since expanding economic benefits will increase confidence of both urban and rural parties that that such "development" can be managed for mutual benefit.

There must also be an awareness that rural Alaska needs a scale of development we might term "micro development." However, urban interests tend to key on "marco-development" scale projects, projects on a scale where it is often simply asssumed that there is enough "economic fall-out" to benefit everyone. However, this is not necessarily true, and especially so for non-urban areas.

Carefully managed "marco-scale" development may be made to pay some dividends to rural Alaska. But what rural Alaska does need is micro-development, development that is small, not nearly so exciting and romatic to advocate for policymakers, but which fits the needs and the life-style of rural communities. In a sense, a structure charged with rural economic advocacy will need to learn to "think small," and it will take some adapting on the part of policymakers to think in terms of thousands of dollars, tens of jobs, and etc., instead of on sweeping scales of billions of dollars, world scale resources, and thousands of jobs.

THE POSSIBLE ALASKA STRUCTURES

The purpose of creating a structure is to provide a functional vehicle for policy focus, and to put the label "special" on the structure. Such labeling tends to put the structure, and the policy community, "on notice" that they intend to do something, and to invite scrutiny if they show a lack of performance. A special structure also tends to isolate itself sufficiently to invite participation of interested parties.

Three types of structures appear possible:

(1) A SPECIAL COMMISSION, responsible to the Governor, and working out of the Office of the Governor.

(2) AN OFFICE created within the Office of the Governor. A small agency essentially part of the executive staff.

(3) Assignment to an existing agency with related interests, either creating a new unit thereto, or reorganizing an existing unit.

The basic alternative "settings" for a structure will be discussed in terms of the least viable first.

Assignment to Existing Department

The assignment of the task of rural development advocacy and coordination to an existing department immediately relegates the issue to whatever is the status of that agency.

If the agency is a sub-unit of an existing division, of an existing department, then it is likely the federal government would view the state effort in much the same manner of other states --that the structure has one of two priorities and little other interest.

It is not the intent here to be critical of the ability of any one of several possible agency operators, but rather to suggest that it is asking alot of a sub-component agency to be able to become not only an interagency coordinator among state agencies, but also between state and federal governments and between government and the private sector.

As a sub-component within a line-department, a rural economic development initiative would first have to command its fair share of attention by department heads from among the "daily crisis" of regular operating programs.

Next, since such a rural effort would reach beyond departmental confines, not only would the rural effort have to battle for survival among competing demands within the department, but also it would have to survive among competing demands outside the department. Such a program would constantly require the department chief officer to run interference in coordinating problems with other departments, as well as with key players in the governor's office and with other institutions. The sub-departmental assignment can be made to look good on an organizational chart, but likely asks a line-agency chief, already besieged with enough operational problems, to unrealistically wear thin their welcome in "unhappy" interdepartmental "turf" battles, much less to provide the "extra-energy" to provide leadership to draw together federal, state, and private interests.

The fact remains, that programs are just that, they are designed to deliver an established service in a beneficial manner and with a mimimum of bureaucratic boat-rocking both "within and "without" the departmental organization A department may well prove the exception, especially if it is new and must find its policy niche, when there is exceptional political backing, or when there is unusual leadership.

However, in viewing something as complex as a rural development effort involving multiple departments, governments, and other institutions, the process appears to supercede the primary "operations" role of a state line-department.

The structure must be capable of:

--FIRST, capable of refining its charge to projects which can be accomplished. The structure must participate in selecting rural priority efforts.

--SECOND, it must determine who, if anyone, is presently charged with a needed function, must encourage rural responsibilities be assigned departments, and give backing to departments in carrying out their rural functions.

--THIRD, the rural structure must be capable of some leeway in independent articulation. It cannot be just the state administration's spokesmen, since one of its purposes will be to inject "unfinished ideas" into the"

--executive policy forum
--legislative policy forum
--private policy forum
--and the public forum

--FOURTH, the rural structure must plow new ground in that it should not be a GOVERNMENT PROGRAM, but must be a facilitator of private effort. It must strike a respectful partnership with the "private policy" sector.

--FIFTH, the structure must be cast in a role of "advocate" for rural initiative --for rural action.

Last, there is always the very real problem of the tendencies in an operational department to convert potential of a popular effort into gain for its own agency budget needs.

If a departmental placement for structure is to be considered, there are a number of potential candidates with rural field organizations. Key among them would be the Department of Community and Regional Affairs, and the Department of Transportation and Public Facilities.

Additionally, the Division of Policy and Planning (DPDP) in the Office of the Governor, would serve as a home for such a structure, either as an intregal portion of the division, or as a more defined sub-component like the Office of Coastal Zone Management. However, there could also be conflicts of fundemental roles. The rural effort needs the partnership, the resources of DPDP, and DPDP should be encouraged to build a strong rural planning component. But DPDP also may need to be the alter-ego of the rural structure, as it functions as rural advocate. It would appear DPDP's planning role should be to put the product of advocacy into a larger scheme, and as alter-ego be the necessary critic of the much more activist rural advocacy agency.

A CABINET LEVEL AGENCY

The creation of a special agency in the Office of the Governor is perhaps the simplest creation. Such an office would be small and it is likely its ability to function, and command policy attention within that framework, would be largely dependent on the capability of the person heading such as office.

The office could serve well enough as the focal point for state interaction with the federal/state interagency agreements. And, in terms of carrying out the intrastate functions of the federal/state agreements, such an office would probably be able to carry out its task of state department coordination.

However, open to question is whether such an office could carry out the "expanded" mandate of a significant rural development initiative. Since rural Alaskans, and legislators, would not be on the inside of such a construction, it is likely the tendency would be for those interests to become critics of actions, lack of actions, or both.

It is also doubtful that such an office left simply in that form, could be the injector of unfinished ideas into various forums, or if so, that the injection would tend simply to be into the executive policy forum shielded from the dynamics of more public policy forums. Additionally, circumstances would tend to make the office "spokesmen" for the state administration on rural economic issues, limiting the dynamics of the structure.

If a simple agency structure is selected, then effort will be required to give the office high prestige, and to provide it with staff. The dimensions of the office might be expanded by merging the function with the Private Industries Councils created federal Title VII, thereby providing the agency with a rural private outreach and some dynamics of rural "input." However, at this point the Office begins to take on the posture of the commission/ agency form of structure.

Under conditions of other times a modified Office structure could suffice, but today the senior policy structure of the state is virtually besieged by "macro-issues," such as d-2, OCS, bottom fishery, gas pipeline, gas liquids development, excess revenue policy, Beaufort Sea development, and many others.

The heavy burdens of Alaska policy going into the 1980s would appear to suggest that a long-range rural policy structure most be given "something extra" to program it for survival.

STRUCTURAL SETTING

The structural setting of a cabinet level office would be much like the other "offices" of the governor, except that a portion of its responsibility would face "outward" from state government to interface with the federal interagency agreements and the federal/state joint function. In many respects the structural arrangement of the rural structure need not be much different if developed in a "commission" form.

The special office could be flanked on one side by the Private Industries Council (PIC), which could act as an advisory group, even to the extent of merging staff functions. The office should also be flanked by the Division of Policy and Planning (DPDP), which could beef up its own rural planning capability and establish direct liaison with the rural office.

It is preferrable under the Alaska strong executive concept that the office be clearly responsible to the governor, and that the governor in the final analysis be responsible for the rural office. The purpose of attaching other involvements is not to erode or substitute for executive responsibility, but to provide some of the special elements previous described. Such features could add political strength by tapping legislative input, involve input from rural advisory features, and achieve status by the involvement of a key political officer such as the Lt. Governor.

However, such features added to a cabinet level office transcends into the third alternative structure, esentially which seeks to construct involvement of other key interests without dilluting the final "executive" responsibility of the office

A RURAL COMMISSION/AGENCY STRUCTURE

The third alternative structure initially appears the most complex. However, the appearance of complexity is derived largely from trying to name the main compenents of the rural structure, and determine their basic purposes. In a sense naming such a structure merely formalizes what likely exists in a "de facto" sense anyway.

The concept of the commission structure would simply be to draw together in one place the "key parties" with rural roles, and then to balance out that more institutional group with a balance of rural field representatives. The structure should remain firmly within the executive framework. The policy group would bring together the following components.

--INSTITUTIONAL REPRESENTATIVES, not necessarily limited to state officials.

--LEGISLATIVE REPRESENTATION, providing a balance against administration.

--RURAL PUBLIC REPRESENTATION, providing for non-institutional balance from the rural field areas.

--PRIVATE SECTOR REPRESENTATION, providing representation from private business, possible finance.

The group would be a comission capable of acting as a "whole," but it would also be a commission capable of acting in the form of its natural "parts," the basic components of these subcommittees being drawn from the sectors they represent on the commission:

--DEPARTMENTAL COORDINATING SUBCOMMITTEE

--RURAL ADVISORY SUBCOMMITTEE

--PRIVATE SECTOR SUBCOMMITTEE

In order to allow the commission to function more efficiently it is suggested the governor name an executive committee of five:

--One agency representative
--One Legislative Representative
--Two rural representatives
--The chairman (of the commission)

The structure would be designed to allow, when appropriate, each subcomponent to operate on its own in special areas of concern and assignment. However, at the request of the subcommittees, or the direction of the chairman, the subcommittees would overlap depending on the problem being addressed. Additionally, legislators would be considered members of any of the subcommittees. The system would allow for each subcommittee to specialize in its natural area, with rural representatives minimizing rural outreach and input

The function of the executive committee would be to also operate as the key component in facing the federal government, and in efficiently dealing with the smaller issues of implementing the federal/state inter-agency agreements.

The executive committee would be the state salesperson in the federal market place, seeking to maximize federal resources.

An innovation in the executive committee structure might be to call the legislative representative the "Legislative Co-Chairman." The suggestion is that the legislative co-chairman would not have the same management perogratives of the chairman, but could be used to maximize the presence of the commission by carrying to the federal level the power of legislative position as well as being charged with rural leadership as (Legislative) Co-Chairman. In considering the latter suggestion, it should be remembered that there is a difference between the "elected" leaders and the agency presentatives reception in Washington offices. The elected representatives has no constraints in skipping middle-management, or in the unquestioned right of calling on Washington level political support and in involving them in deliberations. The posturing of the legislative co-chairmanship would solely to an attempt to sustain the rural effort by tapping political power and political presense as the state structure faces Washington D.C. Equally, the Lt. Governor might be used to be the Chairman of the state structure, thus again tapping the political strength and presense of the elective leaders.

The goal of tapping the state's political power structure is to provide a strong and unified executive/legislative policy face towards Washington D.C. (such policy links also facilitate federal links to the state).

In terms of excecutive functions on the internal Alaska level the legislative possition should not violate the integrity of the traditional Alaska executive system. In this area the position of legislators would be that of members.

In terms of the policy structure reaching out for input into rural Alaska, here the legislators could again play a stronger role, perhaps even facilitating common outreach efforts between legislative committees and the commission effort.

MEMBERSHIP

The Commission shall be composed of not more than 14-members, with four being institutional members, two being legislators, two being members of the private economic community, and six being members from rural areas.

Legislators could be appointed by the governor, or by the presiding officers of each chamber.

Legislation should provide for the membership of the director of the University Cooperative Extension Service on the commission as one of the four instititional members.

The legislation should name state departments with key rural field and/or planning responsibility, requiring the Governor to name two as institutional members. The legislation should state that other chief administrators shall serve ex-officio at the request of the Governor or Lt. Governor.

The legislation should name the Lt. Governor as an institutional member and name the Lt. Governor as Chairman of the Commission unless he chooses not to serve on the commission. In such event the Governor shall name another Chairman from any of the membership.

Two private economic community members should be appointed by the governor, representing private business and/or financial expertise.

Six members should be appointed who live in rural areas. It is suggested that these members be drawn from a list of nominations from the boards of the Rural Education Attendance Areas (REAAs). Requested should be first nomination of REAA board members willing to serve, and preferrably with private business experience in rural areas, and second for nominations other than board members. The intent is to move towards using the state's only region-wide elective rural officers for public input in state policymaking affecting their communities. The legislation should ask that the governor's appointment from those nominations recognize the various rural regions of the state as much as is possible comensurate with a small number of members to be appointed.

AGENCY DIRECTOR AND STAFF

The Legislation should provide for the appointment of th
of the rural structure by the governor.

The gubenatorial appointment makes clear the primary executive loyalty and nature of the structure. Additionally, the act of inviting legislators into a titular role of an executive commission denotes a certain amount of trust between the two branches of government on rural advocacy. As a practical matter, the governor may be well advised to consult with the commission in selecting a director, while making it very clear that the director has the support and confidence of the governor. In this regard, it should be considered that the director will have to function among other department heads in coordinating rural functions. If it is not clear that the director is the "governor's person," then the functionality or the ability to coordinate and cooperate with other agencies is open to question. Without executive recognition, the director is likely to quickly become the underling of whatever key administration official on the commission DOES HAVE THE GOVERNOR'S CONFIDENCE.

The legislation should also provide for commission staff within the provisions of legislative budgeting. The nature of the commission may also mean that some staff can be provided by federal grants. In staffing expertise should be split between employees with practical rural awareness and staff that has expertise in working within government and private agency structures.

AGENCY/COMMISSION DESIGN

The design of the commission appears complex. It is in reality quite simple. The appearance of complexity comes from trying to arrive at a design of any unit whereby the pieces of the unit can remain separate when necessary (or when working on issues and problens which need not involve the other components of the commission).

--The design allows for the federal government to design whatever cooperating unit it desires and attach it to the state creation.

--Whatever federal working unit could 1) function seperately, and 2) be part of a unified state/federal working council, depending on working goals and conflicts. And, 3) a federal designee (likely of the federal designated lead agency under interagency agreements), could be a federal vice-chairman of any combined unit.

--The state executive committee could function as a separate state unit in direct Washington lobby efforts.

--The state executive committee is designed to simplify the federal interface and internal state interagency coordination.

--The full state Rural Development Commission is designed to function as a whole in dealing with problems, policy, and projects.

--The State Rural Development Commission is designed to function in its natural "parts" in 1) attacking problems unique to those parts, and 2) in trying to fullfill obligations to have an "outreach and input" to and rural rural areas of the state.

--The State Rural Development Commission in its "parts" will also be able to accomodate overlapping between those parts based on the "overlap" of problems and the "overlap" of the individual "interest" of members.

--The state/federal structure at the top will be able to direct the function of state/federal subunits who actually exist in, and have practical field knowledge of, rural Alaska regions.

--In keeping with establishing a line of authority, the State Rural Development Agency would work under the "direction" of the Governor through the offices of the Lt. Governor acting as Chairman. The commission would provide the carry-through on rural issues.

THE KINDS OF ISSUES AND PROBLEMS

The kinds of issues and problems the rural structure will handle will be varied. The central theme of the commission at any period in "time" will depend on what is possible within the historical circumstances of that time period.

- --The development of a private economic base in terms of "specifics" will in part depend on practical economics --practical potentials of "what's" possible "where," and "when."

- --The structure may address the issue of "what the state should do" in helping prevent failure and default of smaller native/private corporations actually located in rural areas.

    - --possible maintenance of a village management assistance effort like attempted by Alaska Native Foundation (through CRA, or by contract).

- --State potential in encouraging native capital investment in rural areas, and in participating in the "security" of front-line rural investments.

- --The development of state loan instrumentalities, and state bonding authorities, in such a manner as to be practically useful for potential rural investors.

- --Identification and resolution of other rural "blockages" to private investment.

    - --fire insurance.
    - --bonding availability.
    - --utility infrastructure.
    - --transportation
    - --training Assistance

- --An advocate to "tailor" large "macro" economic projects, whether a major petroleum project, or an applicant for state industrial bonds, to respond not just to such things as generalized affirmative action, but more specifically to the "micro-economic" needs of more remote rural communities (if an employer can rotate an employee from Anchorage or Texas, it is possible to rotate an employee from a rural village.

STATE-FEDERAL INTERAGENCY AGREEMENTS

Prepared by:

Gordon Stockdale
Economic Development
Coordinator

In light of the New White House Small Communities and Rural Development Policy, we face a somewhat steeper effort than we were confronted with before in forging a meaningful agreement with the U.S. Department of Agriculture.

Although the option to negotiate an agreement is still available with the Department of Agriculture, the role of such an agreement as the key instrument for rural development is substantially diminished by President Carter's Rural Policy announcement. White House Aides perceive the President's dramatic invitation to all Governors to ally themselves with his rural effort as extinguishing the need for any special agreements with states.

In truth there is still much to gain from the negotiation of a State/FmHA agreement and if pursued vigorously, that option is still available for Alaska. The benefits of the agreement are obviously most relevant to specifically agricultural development and immediately related infrastructural areas such as transportation and marketing. The agreement may however, have significant impact on other rural development concerns, depending on the Governor's response to the White House Policy announcement, and how well the agreement is articulated with the objectives of the new policy.

There are two distinctly separate issues at this point which must be addressed: The first is the formation of the Rural Development Council in response to the White House Rural Policy announcement of December 20, 1979. The other is the State-Federal Interagency Agreement which should be negotiated to enhance the ability of the Council Chairman to forward Alaska policy recommendations to the Cabinet (agency signatory) level of as broad an agency representation as is possible. To gain the greatest advantage of these complimentary opportunities, it is imperative that we structure the Council to show an extraordinary breadth and depth of rural issue understanding, and a commitment to act.

The agreement for Alaska will probably differ from the existing agreements with other States in several key respects:

1. It should explain at the outset Alaska's unique rural character, the almost complete absence of certain basic government and economic infrastructure commonly perceived in the rural nature of the contiguous United States. (tacitly analogous to an emerging nation)

2. It should state that local community development, state capital improvements, private capital investment, and the investment of federal monies are all inseparable elements in the concept of economic development.

3. It should advance the formation of an Alaska rural development policy which recognizes that the common interests of a wide variety of capital sources and expertise can be brought to bear in the service of Alaska's public interest.

4. It should advance the federally perceived need to adapt the parameters of all programs to suit more specifically the problems they address on the basis of this State's uncharacteristic universe of needs.

5. It should show a long-term commitment to act as an instrument of change, directed to the solution of problems and not merely a forum to address symptoms of prevailing pressures.

There is much more to be done to identify the specific line items that will compose the agreement. At this time, in the absence of a well defined state rural development policy, several options can be considered.

The first of these is to undertake the negotiation of a very specific instrument which will address our current priorities as they are identified by those who are charged with the responsibility to negotiate. This position is laden with serious liabilities however. A rush into specific agreement, prematurely, risks obscuring our need for a representative and thoughtfully developed rural policy. We also risk

limiting the relationship described in the agreement to attending short-term pressing issues rather than committing to a constructive and lasting course of action. The most serious long-term liability in this option is the forfeiture of an Alaska/Federal Policy relationship that would be of real value.

Another possibility is to define development goals in much the same manner of the FmHA agreements with Arizona and Arkansas. These are agreements with very broadly defined general goals. Unlike the specific agreement, they are not very limited in scope and offer little risk of either generating, or being mistaken for policy. These agreements don't confine themselves to pressing, immediate issues, but instead set forth goals that may accommodate a substantial universe of needs and solutions. Unfortunately their generality is their weakness. Because no specific course of action is readily apparent in the text, there is little imperative for action. Also, because this type of agreement is open to a variety of interpretations and applications it offers little direction and is soon regarded as less than serious. Finally, as in the first example, this type of agreement would fail to establish a valuable Alaska/Federal Policy relationship.

An Alaska/FmHA interagency agreement should be a technical instrument, leaving the subject of goals and objectives description to the Governor's Rural Development Council. The instrument should define all state agency roles as they relate to Rural Development and assign the responsibility for coordination and oversight of these roles to a lead agency with a sufficient mandate of authority to direct and supervise. The instrument should further compliment the means and authority by which the Rural Development Council may develop the Governor's policy and instruct the lead agency to execute it.

The agreement should describe a similar structure on the Federal side, but the degree and extent to which Federal agencies may be expected to cooperate can be determined only after considerable negotiation. It must be remembered that Region X, in Seattle, has brokered most of Alaska's federal relationships for many years. It is deeply entrenched and only limited adaptation may be expected unless the Alaska/Federal relationship is important at the Cabinet and White House level in Washington, D.C.

This brings us back to the importance of the White House Small Community and Rural Development Policy announced by President Carter in December. Although it is separate and distinct from the State/FmHA interagency agreements, it can serve to help fuse a purposeful and lasting Alaska/Federal policy relationship.

March 23, 1980

Dear

House Bill 932 was introduced by the Budget and Audit Committee on March 4 and is presently in the hearing process.

This Bill seeks to establish the Rural Development Council in the Office of the Governor under the Chairmanship of the Lieutenant Governor, with the strongest possible mandate to pursue an aggressive State policy, committed to the improvement of rural economic conditions.

The Committee's investigation of Alaska's rural policies and agency relationships this past year has convinced me that the State must adopt a strong rural advocacy position in the best interest of every Alaskan.

This is not to say that it is the State's responsibility to impose development or affect local priorities. It is, however, a significant responsibility of the State to insure that economic options are more uniformly available to all Alaska residents.

The President has recently announced the new White House Small Community and Rural Development Policy. In this policy, President Carter recognizes that a healthy rural economy is essential to the economic health of all of America. I believe this principle is especially true in Alaska, the most rural of all states.

I am enclosing a copy of House Bill 932 and a brief description of the new federal policy. I would appreciate your review and comments as soon as possible so that your thoughts can be included. Please call if you have any concerns.

We are scheduled for statewide teleconference hearings on Friday, March 28, at 1:30 (Juneau time) in a Joint Session of the House and Senate Community and Regional Affairs Committees. Your comments and your support would be most welcome.

Sincerely,

Jim Duncan

HOUSE

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

IN THE HOUSE

CS FOR HOUSE BILL NO. 932

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An act creating the office of rural development, and the Rural Development Council; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS; POLICY, PURPOSE. (a) The legislature finds that there is a public interest in the development of a healthy private economic base in rural Alaska, that the rural areas of the state and the many small communities of the state have been in economic crisis for decades, and that in many rural communities a private economic base has ceased to exist which conditions endanger the economic, social, and cultural well-being of the state's rural citizens and the healthy growth and balance of the state's entire economy. The legislature further finds that while many opportunities for economic growth may be available to rural areas, the problems of the state's rural areas are many and complex, spreading beyond the confines or authority of any one program, any one government, or any one policymaker and therefore requiring a special initiative on the part of all concerned parties.

(b) It is the policy of the legislature that

(1) villages and small communities should HAVE ACCESS TO ECONOMIC DEVELOPMENT OPPORTUNITIES

(2) there is a special commitment to the development of a private economic base for villages and small communities;

(3) the state should use its resources and financial strength to encourage THE DEVELOPMENT OF A HEALTHY, SELF-SUSTAINING RURAL ECONOMY

(4) the state has the primary policy responsibility to act and to

catalyze commitment among many interests, including the state, federal government, local governments, and the private sector to promote a private economy in rural areas; and

(5) the advocacy of a private economy compatible with rural life-style should be of the highest priority of state policy.

(c) It is the purpose of this Act to create a governmental structure that will function as an advocate for rural areas and small communities, expressing development issues before state, federal, and local governments, and in the private sectors, and which will assist rural people and institutions in laying the foundations of a healthy rural private economic base.

* Sec. 2. AS 44.19 is amended by adding new sections to read:

ARTICLE 3C. OFFICE OF RURAL DEVELOPMENT.

Sec. 44.19.191. OFFICE OF RURAL DEVELOPMENT. There is established in the Office of the Governor the office of rural development. The director of the office is appointed by the governor and serves at his pleasure. The governor may consult with the council concerning the appointment or discharge of the director.

Sec. 44.19.201. COUNCIL ESTABLISHED. (a) There is established the Rural Development Council as the policy council for the office of rural development. The council consists of

(1) the lieutenant governor;

(2) a member of each house of the legislature appointed by the presiding officer of that house;

(3) the commissioners of the departments of transportation and public facilities, commerce and economic development, and community and regional affairs, and the director of the division of policy development and planning;

(4) six representatives of the private sector appointed by

the governor who are residents of the rural area or small communities;

(deleted)

(5) the Alaska state director of the Farmers Home Administration of the United States Department of Agriculture and a designated representative of the Region X Rural Development Task Force who are ex officio members of the council and may attend and participate in all meetings of the council but may not vote.

(b) The members of the council appointed by the governor serve at the pleasure of the governor.

(c) The lieutenant governor is chairman of the council and one of the legislative members shall be elected by the council as legislative co-chairman.

(d) Members of the council serve without compensation but are entitled to per diem and travel expenses provided by law for members of boards and commissions.

Sec. 44.19.211. PURPOSE OF THE COUNCIL. The purpose of the council is to provide policy direction to the office and to assist the office in the performance of the duties of the office. The council shall assist in coordinating the economic development activities of all departments and agencies of government so that the need for those activities and the impact of those activities on SMALL COMMUNITIES AND rural areas is considered and assist in coordinating the activities of departments and agencies of government which have field responsibilities in the rural areas to the extent that those activities relate to economic development. The council shall also assist the office in its advocacy function.

Sec. 44.19.216. MEETINGS. The council shall meet at the call of the chairman or legislative co-chairman, at the request of a majority of the members, and at least four times a year at a regularly scheduled

time as determined by the members. The council may convene meetings of heads of agencies or departments which are concerned with rural matters or economic development if the council determines a meeting to be useful.

Sec. 44.19.221. POWERS AND DUTIES OF THE OFFICE. The office shall

(1) act as advocate for the development of an economic base in rural Alaska, for community development and for public services which will enhance the opportunity for growth of an economic base in rural Alaska, and for other matters and programs useful to development of the private economy in rural Alaska;

(2) coordinate ECONOMIC DEVELOPMENT RELATED PROJECTS AMONG DEPARTMENTS AND AGENCIES.

(3) act as advocate for rural development programs which are not within the jurisdiction of a specific department or agency;

(4) act as advocate for appropriate technology development, AND THE ADVANCEMENT OF ENTREPRENEURIAL OPPORTUNITIES.

(*) (5) ENCOURAGE AND ASSIST IN THE ORGANIZATION OF LOCAL AND REGIONAL DEVELOPMENT STRUCTURES

Sec. 44.19.226. STAFF. Within budget and appropriation limits, the director may hire staff and determine their compensation. Except for making inquiries, neither the council nor an individual member of the council may give orders to the staff on administrative matters.

Sec. 44.19.231. REPORTS. Before January 15 of each year the office shall submit to the legislature a comprehensive report describing the activities of the council and the office for the preceding year.

Sec. 44.19.236. DEFINITIONS. In AS 44.19.191 - 44.19.236

(1) "council" means the Rural Development Council;

(2) "director" means the director of the office of rural development;

(3) "office" means the office of rural development.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Alaska State Legislature

Juneau, Alaska 99811

Notice sent to HC&RA attached 3/21/80

TELECONFERENCE NOTICE

The House Community and Regional Affairs Committee, chaired by Rep. Bill Parker, and the Senate Community and Regional Affairs Committee, chaired by Senator Arliss Sturgulewski, will hold a joint teleconference on Friday, March 28 at 1:30 P.M. Juneau time on

HB 932 Creating an Office of Rural Development and Rural Development Council

The teleconference will include testimony from all sites. Persons interested in testifying or observing at this hearing should contact the local Legislative Information Office in the following communities: Anchorage, Bethel, Fairbanks, Dillingham, Kotzebue, Nome, Kodiak, Soldotna, Ketchikan and Sitka. Further information may be obtained from the House Committee Chairman (465-3824) or the Teleconference Coordinator (465-4980).

As you may know, the Carter Administration has established a Small Community and Rural Development Policy in an effort to coordinate the various forms of federal assistance to rural America, and to better focus on the priority needs, as identified by the State. The mechanisms through which such coordination will be achieved at the federal level are an interagency group of assistant secretaries of major federal agencies in Washington, D.C. and regional task forces composed of members of the federal regional councils. The principal agency in charge of policy implementation at the federal level will be the U.S. Department of Agriculture. At the State level the identification of rural development priorities will be the responsibility of state organizations designated by each Governor. Last fall Governor Hammond designated the Agriculture Action Council as the entity to coordinate this federal policy in Alaska. Recognizing that the Council's mandate is somewhat narrower than the federal initiative, we are presently preparing recommendations to expand the Council's membership as it regards the federal rural development initiative. The proposed expanded membership generally follows the structure of the Rural Development Council proposed in HB932. It is our intent to finance this new organization (we understand that federal funds are available) and develop a work program which will identify priority rural development needs, help to initiate specific projects which will meet those needs and coordinate the state, federal and private resources necessary to bring such projects to fruition. In effect we are attempting to do within an existing framework what this Legislation seeks to accomplish by creating a new organizational structure.

For this reason, we feel this effort can be accomplished without any additional statutory authority.

Please let me know if there is any other information which we can share with the committee which might be helpful in its discussion of this issue.

Sincerely,

Frances A. Ulmer, Director
Division of Policy Development
and Planning

Mr. ~~Chairman~~ Bill:

You have requested that I appear before your committee and comment on HB932 "An act creating the office of rural development and the Rural Development Council." Although I will be unable to personally attend the hearing, I would like to share with you and your committee my comments on this legislation.

The Division of Policy Development and Planning has had some experience during the last three years in assisting some rural areas of the state undertake planning efforts which would help them direct the kind of development which will occur within their region.

The most notable of these has been the "Regional Strategy" planning program underway in the NANA region. In conjunction with the U.S. Department of Housing and Urban Development and the Alaska Department of Community and Regional Affairs, the Division has provided funds and assistance to the Mauneluk Association to develop a regional development plan. This planning process has served as a vehicle to coordinate the activities of all major government agencies in the region and to make their activities consistent with local needs and desires. The NANA Regional Strategy program which we began almost two years ago was designed to address the problems identified in Section 1 of HB932 which declares that "the problems of the state's rural areas are many and complex, spreading beyond the confines or authority of any one program, any one government, or any one policy maker...."

We agree with this statement and have been working within the executive branch to devise a process which recognizes the unique nature of rural Alaska. We are attempting to create a broadly based coordinating effort which will target the resources of the federal and state governments so that development activities will benefit Alaska's rural citizens to the maximum extent possible.

01-A3LH

"RURAL ALASKA IS IN A STATE OF
PROFOUND ECONOMIC DEPRESSION, - HAS BEEN
FOR MANY YEARS"

I. INTENT: Create Rural Development Council to advocate and assist in rural development.

TIMING: Carter has created new Rural Policy - One time opportunity for revising federal relationship; break Region X Policy brokerage.

II. BASIC PROBLEMS:

1. No comprehensive state commitment to rural economy.

2. Village economic institutions have been left to "go it alone."

3. State relates to rural Alaska through narrowly defined agency boundaries.

4. State now has capital resources to leverage private capital in fostering rural development. Existing structure and policy have a history of poor performance.

III. SOME OF THE OBSTACLES:

1. Need for executive commitment to "an active" rural development policy.

2. Failure to recognize private industry role in basic economies (not a strictly government role).

3. Traditional government/private industry adversity precluded partnership approach to development.

4. Failure to recognize rural development is fundamentally urban development.

5. Inadequate direction of public resources to build an economy - needs Executive Commitment.

IV. STATE'S INTEREST:

1. To begin to establish a very fundamental cash economy in rural Alaska - requires special government role.

2. Infrastructure development is an investment; returns are not immediately apparent.

FEDERAL/STATE INTERAGENCY AGREEMENT

1. State agency structure and operational limits are defined in large part by their federal counterpart agencies.

2. Alaska has had virtually no role in Alaska Federal Policy formation.

3. Seattle's Regional Administrators have exercised brokerage of Alaska interests for years - deeply entrenched.

4. Alaska still has an option to exercise the last of the Federal/State Interagency Agreements.

5. We will be the only state with this option under the new White House Rural Development Policy.

6. The structure of the Council is still open. Its membership is the key to taking advantage of the built-in ability to make things happen!

STATE OF ALASKA

DEPT. OF ENVIRONMENTAL CONSERVATION

JAY S. HAMMOND, GOVERNOR

465-2601

POUCH O – JUNEAU 99811

May 20, 1980

The Honorable Arliss Sturgulewski
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Sturgulewski:

It is my understanding that the Senate Community and Regional Affairs Committee is currently considering HB 932, the Rural Development Act. Your staff has asked me to provide the Committee with a list of functions of the Department of Environmental Conservation for the Committee's use in determining appropriate representation of State agencies on the Rural Development Council. That list follows:

1. Funding construction of water and sewer facilities under the federal and State water and sewer bond programs and the Village Safe Water program. Under legislation already passed by th Committee, solid waste facilities would be grant eligible. We also certify and assist in the training of water and wastewater system operators.

2. Review of plans for surveillance of air emission sources, sewerage systems including on-lot sewage disposal (subdivision review), drinking water supplies and solid waste disposal facilities.

3. Oil and hazardous waste spill prevention and cleanup. This fiscal year the department wil develop a model contingency plan for small communities for oil spill protection.

4. Certification of dredge and fill activities and other activities resulting in discharge into navigable waters for compliance with State water quality standards. Under the Federal Clean Water Act, a designated State agency must provide the certification of activities requiring permits from the Corps of Engineers, Environmental Protection Agency, Coast Guard (bridges), and Federal Energy Regulatory Commission (dams).

5. Membership on the Coastal Policy Council.

6. Analysis of various water related environmental problems, with proposed solutions, such as waste oil generation and disposal, and sewage disposal.

Because of the significant impact of our department's responsibilities and functions, the Committee may well find that our department should be represented on the Council. We would concur with such a Committee finding.

If I can be of any further assistance in this matter, please advise.

Sincerely,

C. Deming Coyles

1978

Alaska Rural Development Council

GOALS

Improved Communication Between Agencies

Coordinated Assistance to Community, Regional and State Developmental Programs

Broadening Understanding of Rural Development Potentials

Increased Awareness of Technical and Developmental Resources Available in Alaska

STRUCTURE

The Council is open to membership from State and Federal agencies and organizations with statewide developmental concerns.

Officers and directors are chosen annually from the Council members.

Council meetings are held quarterly, with meeting sites rotated throughout the State.

Regional councils are organized to serve Southeast Alaska, Kenai Peninsula, Kodiak Island, Matanuska Valley, and Tanana Valley.

REPORT

together with

MINORITY AND ADDITIONAL VIEWS

[To accompany S. 835]

The Committee on Environment and Public Works, to which was referred the bill (S. 835) to extend the Appalachian Regional Development Act and title V of the Public Works and Economic Development Act of 1965 and to provide for a nationwide system of multi-State regional development commissions to promote balanced development in the regions of the Nation having considered the same, reports favorably thereon with amendments and an amendment to the title and recommends that the bill as amended do pass.

GENERAL STATEMENT

Nearly 15 years ago, the Congress recognized the fact that certain regions of this nation were not enjoying the economic viability and prosperity common to the rest of the United States. Lagging regions could attribute their difficulties to a variety of reasons: depletion of natural resources; outmigration of population, technological changes resulting in obsolesence in single-industry areas and geographic isolation, among others. Most of the problems in these economically depressed areas transcended State boundaries.

To carry out an effective program of assistance in these distressed region, in 1965 the Congress authorized the creation of multi-state regional commissions through enactment of the Appalachian Regional Development Act and title V of the Public Works and Economic Development Act. These commissions are partnerships of the States and

the Federal Government. Under the shared guidance of the Governors of the States involved and a Federal representative, a commission's primary responsibility is to develop regional policy to address common problems. Commissions provide a cooperative structure for such problem identification. To carry out a regional investment strategy, a commission provides assistance in assembling, from the array of available existing State and Federal authorities, those programs and projects which will meet the special needs of an area. It works with Federal agencies in selecting and shaping activities appropriate to provide unique responses to regional problems.

It is through regional development commissions that local, State and Federal officials, in spite of individual concerns, can combine resources to address difficulties which are shared by contiguous units of governments. This kind of effort, stemming as it does directly from the people, is vital to the development of workable regional plans. Such a plan must encompass a set of goals and objectives jointly determined by the commission partners after consideration of the views of people from all sections and groups in the region.

The primary purpose and responsibility of the regional commissions established in 1965 was to aid lagging areas—areas of chronic and substantial unemployment and low incomes. This task has not been completed. Strides have been made over the last 10 years and disparities between regions have narrowed. But differences still exist and the widest disparities exist between areas within regions. The commissions are to continue to give first priority to areas of decline. These areas most need help to move forward. Because the problems are deep seated and long-standing, they require the combined ingenuity and resources of the States and Federal Government. Coherent, coordinated strategies must be planned and adhered to. Investment must be concentrated and planned over a long period. There is no short cut to remedy the years of decline. During consideration of this legislation, the Committee reaffirmed its intent that the first priority of a commission is to address declining areas.

States have argued that the commission structure is useful in helping them to cope with sudden, rapid growth and the dislocations such growth brings to a region. The Committee agrees and has expanded the authority to plan for and coordinate policies to deal with dislocations in areas of rapid growth.

Another purpose of the bill is to strengthen and improve the coordination role of the regional commissions. The growth planning process outlined in the bill will improve the ability of the commissions in carrying out this function.

As a result of the White House Conference on Balanced National Growth and Economic Development last year, the President announced in January his desire to institute a regional growth policy process. He reiterated the finding of the conference that the varied economic problems in regions of the Nation suggested a need for strong State and local action to develop regional balanced growth policies and to focus local, State, and Federal funds in accordance with these strategies. President Carter determined that the existing Appalachian Regional Commission and the title V commissions were the vehicles through which such policies should be channeled.

In a unique arrangement, decision making is shared by the chief elected State official—the Governor, and a representative of the Federal government—the Federal Co-chairman. This arrangement has made the Commissions valuable institutions for addressing on a cooperative basis other shared regional matters. While the primary purpose of the commissions is to overcome the gap in income and jobs, they have also become a forum for shared State action on other regional issues such as pollution, coastal zone management, and energy.

Through its unique partnership, the commissions have served a valuable liaison role between the region and the national government. The commissions have been able to represent particular regional issues and opportunities to the various Federal departments and agencies in the formulation of those agencies' policies and programs. Thus regional perspectives can be brought to national policy, helping to tailor national programs to situations as they exist in the particular regions of the country. For example, an energy consuming region of the country such as the Northeast brings a different focus to national energy policy than an energy producing area such as the West. Both of these views should be made known before policy is established. Unnecessary hardship could be avoided and adjustments could be provided for before dislocations occur rather than after the fact.

The commissions also serve as a liaison, bringing national goals and objectives to regional decision makers. Armed with this information, regional policy can be directed to take advantage of national policy where possible. At a minimum the region will avoid policies contrary to national goals.

The Appalachian Regional Commission and the title V commissions were originally authorized by separate acts of Congress. They were last extended by a single statute—the Regional Development Act of 1975. The Committee on Environment and Public Works feels that now, 14 years after their inception, all these commissions should be in a sense melded into a common framework, and made to demonstrate the viability and effectiveness of a well-conceived regional strategy. The committee believes that this legislation will further this objective.

Background

Appalachian Regional Commission

The special needs of the Appalachian Region were recognized by the Congress in 1965 when it passed the Appalachian Regional Development Act. It was envisioned at that time as a unique partnership between the Federal Government and the 13 member States. It was created to address the severe problems of the Appalachian area. In spite of its rich human and natural resources, the area traditionally lagged behind the rest of the Nation in its rate of growth and development.

In the 14 years since its inception, the Appalachian program has come a long way toward fulfilling expectations. It has helped to change the face of the area dramatically by fostering new hope, new initiative, and new enterprise. Some of these advancements are as follows:

Appalachia's poverty population has decreased since 1960 from 31 percent of the total populace to 14 percent in 1976. This represents a

55-percent decline in poverty incidence during a period when nationwide figures show a 48-percent decline.

In per capita income, between 1965 and 1976 Appalachian total personal income climbed from 78 to 85 percent of the national average.

An existing trend of outmigration has been reversed. An average of 58,000 persons per year have migrated to the area.

The region added approximately 1.35 million jobs between 1965 and 1977, bringing Appalachia's official unemployment rate down to a level more nearly approximating that of the rest of the Nation.

In education, as of 1960, only one-third of the region's adult population had completed high school. By 1976, the percentage is estimated to have risen to approximately 60 percent.

In the area of health, the average number of physicians in the region rose from 92 for every 100,000 residents in 1963, to 116 per 100,000 in 1976.

Another major accomplishment under the Appalachian program has been the development of vocational schools. To date, the Commission has invested more than $300 million in a regionwide system of vocational schools. There are now nearly 500 such schools serving 300,000 students.

The importance of the Appalachian development highway system to the economic growth of this mountainous region cannot be overemphasized. Of the entire 3,025 miles now authorized, approximately 1,700 miles, or 56 percent are either completed or under construction. An additional 680 miles of access roads have been built to serve industrial sites, hospitals, schools, or other public facilities. When the entire system is completed, 85 percent of the people of Appalachia will be within 30 miles of a high quality highway. The highway program is vital to the development of Appalachia.

These are significant advances. But much remains to be done. Of Appalachia's 19 million inhabitants, 2.7 million continue to live in poverty. Only six out of the region's 397 counties have a per capita income that has reached the national income average. Despite improvements in the availability of health facilities, serious health problems remain. Infant mortality rates still exceed those of the rest of the Nation. A high incidence of diseases such as hepatitis, streptococcus, tuberculosis, measles, and rubella remains. And the 1976 ratio of 116 physicians to every 100,000 people lags behind the national average of 174 per 100,000.

The Committee considers that the most significant aspect of the total Appalachian experiment has been the continuing development of the partnership role among all levels of government. The experiment is succeeding. This legislation extends the Appalachian Regional Commission for an additional 4 years, and provides it with additional authorities and responsibilities.

TITLE V REGIONAL COMMISSIONS

The Public Works and Economic Development Act of 1965 recognized that there were lagging regions in parts of the country outside of Appalachia. Title V of that Act provided for the establishment of regional development commissions in other sections of the country which had special problems and needs demanding individual analysis

and response. Like Appalachia, they were given broad authority to supplement other Federal grants, to undertake planning and studies, provide technical assistance, and encourage investment plans and the capability of State members to foster economic growth. Federal direction for these programs was placed in the Department of Commerce.

There are now eleven title V commissions, comprising all or parts of 48 States, three of which were designated in December, 1978.

The commissions have pursued a wide variety of programs. They have differed in their development programs as their regions have differed one from the other in the nature and scope of the problems that distinguish them as lagging regions.

Commission programs for the most part are directed toward closing the income gap, creating more jobs, and raising education levels. Programs dealing with transportation, natural resources, regional economic analysis, State investment planning, energy development, vocational education, tourism, and health are typical examples.

In the Regional Development Act of 1975, Congress expanded the program authorities of the commisions in the fields of energy, transportation, health and education—comparable authorities earlier provided the Appalachian Regional Commission. Congress also attempted to upgrade regional development through the commissions by raising the annual authorization from $150 million in 1975 to the present $250 million level. By all accounts, program performance under the commissions has been significantly limited because past Administrations have never requested adequate funding. But this legislation again expands their authorities and provides a more clearly defined framework for their operation within the executive branch.

Purpose of the Legislation

S. 835, as amended, extends the Appalachian Regional Development Act and title V of the Public Works and Economic Development Act, and provides for the creation of regional commissions to promote balanced development in all regions of the Nation to respond to economic distress.

The bill as approved by the Committee continues the operation of the Appalachian Regional Commission and its program for an additional four years, through fiscal year 1983. It also provides a mechanism for the implementation of a similar regional approach to areas of economic distress in the rest of the Nation, most of which are already included in commissions established under title V of the Public Works and Economic Development Act of 1965.

The regional commissions under title II of the reported bill are authorized at not to exceed $250 million for each of the fiscal years 1980, 1981, 1982, and 1983. The nonhighway program authorization for the Appalachian Regional Commission under title I of the bill is $340 million for the 2-fiscal-year period 1980 and 1981, and $380 million for the 2-fiscal-year period 1982 and 1983. The Appalachian Development Highway Program authorizations are $350 million for fiscal year 1981 (an increase of $180 million); $400 million for fiscal year 1982; $450 million for fiscal year 1983; $500 million for fiscal year 1984; and $500 million for fiscal year 1985.

Title III, the "Regional Growth Policy Process Act", provides a means whereby the Federal Government, the States, and regional, substate and local entities can together address, on a regional basis, problems experienced in two or more States.

While a primary purpose of the regional commission program is still to assist areas of economic decline, their authority has been expanded to include hardship caused by sudden rapid growth.

A key feature of the legislation is the creation of an interagency committee at the White House level which shall provide program coordination and support for the regional commissions and the Federal agencies. This will provide the commissions with a visibility which they have lacked under the existing title V program, and should assure them a greater voice in the cohesion and coordination of the multifaceted Federal programs established to assist States and local governments in the resolution of their shared economic problems.

Provisions are included in the legislation which will assure accountability and responsibility on the part of the Federal, commission and State entities under this Act.

In conclusion, the legislation expands the authorities of the regional commissions while at the same time more clearly defines their responsibilities. This is intended to assure the development of an integrated approach to problems of economic distress based on local, State, and regional perceptions, and ultimately reflected in actions by the Federal Government.

Regional Growth Policy Process

Title III of this legislation establishes a regional growth policy process to bring the Federal Government, regional commissions, States, and local governments into a cooperative structure for addressing regional issues.

FEDERAL COORDINATION

The President has proposed this new "process", based on recommendations of the 1978 White House Conference on Balanced National Growth and Economic Development. A January, 1979, memorandum from the President to agency and department heads on the subject of regional commission support provides appropriate background for a discussion of the growth policy process:

> In light of the changing patterns of economic activity across the country, and in order to extend the ability of States and localities to shape Federal policies in behalf of regional concerns, new processes for planning, coordination and policy support are required. To develop and carry them out will require cooperation on the part of the Secretary of Commerce, Federal departments and agencies, the Interagency Coordinating Council, the Federal Cochairmen of the Appalachian and title V Regional Commissions and the Federal Regional Councils
>
> * * * I am instituting a regional growth policy process to assist the regional commissions in developing and implementing their multiyear regional development plans and annual

> investment programs. These plans and, more importantly, the annual investment programs should be developed from the ground up, reflecting sub-state and State development plans. Through this policy process, the regional commissions will be given an opportunity to prepare recommendations to Federal departments and agencies for solutions to problems of regional growth and decline * * *

This important innovation expands the influence of the commissions beyond their limited funding base to all of the relevant Federal programs, including financial and technical assistance, direct development, and other Federal decisions. Use of the White House Interagency Coordinating Council assures that the regional commission point of view will have the attention of all units of the executive branch.

This opportunity for the governors and Federal cochairmen, acting together as commissions, to address the larger problems shared by the States of each region will require a spirit of constructive accommodation on the part of Federal agencies. Not every problem viewed by a commission to be of regional significance and requiring adaptation of some Federal policy or procedures can be accommodated by the affected Federal agencies. But this new process ought to identify those that can, and do so with reasonable speed.

Section 302 delineates the Federal role in coordinating with the regional commissions. The President is directed to establish an interagency committee for program coordination and support for the regional commissions and the Federal Government is determining policies and recommendations which will further the purposes of this Act. The committee is to be chaired by a senior White House official, and composed of the Chairman of the Regional Development Council, and senior officials of Federal departments and agencies concerned with regional development activities.

Each commission is required to prepare a multiyear regional development plan and annual investment strategies. The interagency committee authorized in section 302 is directed to establish a schedule for review of the recommendations contained in each commission's plan and annual regional growth policy recommendations by the Federal departments and agencies represented on the committee. The commissions are to participate in any discussions with those Federal agencies which are necessary to resolve any issues, and the Chairman is to attempt to identify and encourage solutions to regional issues involving the participations of more than one department or agency.

This section also requires Federal Cochairmen of regional commissions to be appointed Chairpersons of appropriate Federal Regional Councils where practicable. If the Federal Regional Councils are to serve any useful purpose, it is important for them to be linked to the regional commissions.

Federal departments and agencies are directed to cooperate with commissions to the maximum extent possible. They are also directed to assure that existing Federal programs are not inconsistent with commission activities, and to consult with appropriate commissions prior to providing financial assistance to any multistate organization engaged in activities related to regional growth purposes.

REGIONAL PLANNING

Title III also establishes a regional planning process involving all levels of government.

The regional growth policy process set forth in this title emphasizes the importance of a ground-up approach to planning. The participation of substate and local entities is emphasized and the goals, objectives and priorities of communities granted great respect in this process. The warp and woof of this planning fabric—from local to multicounty to State to regional—will be as durable as the imagination, hard work and persistence of those involved.

At the same time, there must be adequate guidance from the commissions to States and substate levels. The planning process within a State must be relevant to regional goals and regional planning needs. The committee has no illusions that the process envisaged in this title will be productive if Federal departments and agencies and State and local governments do not develop respect for the plans and strategies generated by it. Without such respect, participants cannot be faulted for resisting the adaptation of their policies or procedures to accommodate the goals and priorities of these plans and strategies.

Section 303 establishes the base for the development planning process, outlining the responsibilities of States and development districts. Each commission shall require State members to prepare and submit a development plan for each State in the region, updated annually. Criteria for such State plans are delineated.

Each commission is directed to develop and require execution of areawide action programs. These programs, prepared at the multicounty level, set forth interrelated projects and schedules of actions and the financial resources necessary to carry them out. Subsection (c) authorizes Governors to certify development districts for these purposes. States are directed to work with local units of government, development districts, citizens, and private interests. A Governor may not certify a development district unless it conforms with specific criteria.

Section 304 describes the commission responsibility to prepare a multiyear development plan and annual investment strategy. The multiyear plan is due within 18 months of enactment. It is to be reviewed annually and formally assessed every five years.

Investment strategies are to be transmitted to the interagency committee and, except for the Appalachian Regional Commission, to the Secretary for use as the basis of consultation with Federal departments and agencies through the mechanism described in section 302. This strategy identifies programs and projects, proposed funding, and proposed policies which may be adopted by Federal agencies and State and local governments to reflect in their respective programs and regulations ways to further the implementation of the regional plan.

After development of a regional development plan or investment strategy, the Federal Cochairman shall have no more than 75 days to review such plan or strategy and to obtain the Secretary's review. The Federal Cochairman is directed to consult with appropriate Federal agencies in the course of that review.

The Secretary of Commerce has disapproval authority over regional development plans of all commissions except the Appalachian Re-

gional Commission. Such disapproval must be made within 60 days of transmittal, and must be predicated on a finding that the plan is inconsistent with certain national and interregional policies and activities.

Regional commissions are to review multiyear plans annually and do a formal assessment of such plans every 5 years.

Section 305 states that the Development planning process and the regional growth policy process are to reflect the goals, objectives, priorities, and recommendations of development districts and local governments as they are presented in approved State development plans. To the extent practicable, regional development plans and annual investment strategies are to be developed from and shall incorporate such goals, objectives, priorities, and recommendations.

The preparation of State and regional plans shall accommodate and harmonize the multiplicity of goals, priorities, recommendations and needs identified by development districts and local governments.

Commissions are required to assure an adequate process of consultation with local governments and development districts.

Accountability

GAO report and Department of Commerce audit

On February 28 of this year the Department of Commerce released a report on its audit of selected activities of the title V regional commissions. In late April the General Accounting Office issued a report addressing the nonhighway activities of the Appalachian Regional Commission.

Both these reports were critical of existing commissions from several standpoints. The Department of Commerce report was directed to commission administrative activities rather than to specific program . It found deficiencies in coordination, both at the Commerce Department level and with other Federal agencies. Problems were found in the planning, selection, and evaluation of projects, as well as operation and monitoring of completed projects. Inconsistencies in expenditures from program monies and administrative funds exist.

Many of these same problems were also mentioned in the report of the General Accounting Office on the Appalachian Regional Commission. In addition, problems were cited concerning a possible decline in State participation in nonhighway programs and priority of program evaluation.

The Committee recognizes that many of the points raised in these reports are valid. Specific language has been included in this legislation which the Committee believes will alleviate existing problems. The procedure spelled out in title III, the Regional Growth Policy Process, spells out in detail the role of the Federal government in coordinating with the regional commissions. The specific duties of the commissions are outlined in several sections of the bill, principally sections 204 and 304.

State responsibilities for maintenance of effort are spelled out in section 207(h).

Fiscal responsi / and management standards are required on the part of the Federal government and commissions.

The Committee is aware of existing problems in commission administration and programs. This legislation seeks to alleviate those problems while at the same time expanding the regional commission concept to other parts of the Nation. The Committee expects to monitor commission activities closely as they carry out the directives of this legislation.

LEGISLATIVE PROVISIONS

The committee considered the question of accountability to be of grave importance in the development of this legislation. The careful spelling out of the specific responsibilities of each element in this unique Federal, State and substate partnership is essential both from the standpoint of ensuring the viability of the program and the protection of the participants.

Recent reports of the General Accounting Office and the Department of Commerce have criticized the operations of existing commissions. This legislation contains a number of safeguards to assure accountability on the part of the Federal, State and commission elements, as well as recipients of assistance from commissions.

For the commissions in title II, the Secretary of Commerce is required in section 208 to identify basic areas in which minimum standards of fiscal responsibility and management must be adopted, including uniform cost principles; to specify such minimum standards in regulations; to require each commission to adopt such standards as part of their internal regulations; and adopt procedures and regulations governing conditions under which the Secretary may withhold funds from a commission for violations of this Act or any regulations adopted under this act. The Secretary is further required to evaluate, on an annual basis, the performance of the commissions in adhering to such procedures and regulations, and in implementing the provisions of this act.

Section 204(b)(2) requires all Federal cochairmen to assure commission compliance with applicable Federal fiscal and management requirements either established under this legislation or by the ARC Federal Cochairman or that commission itself.

In section 210 the commissions themselves are mandated to keep records which will fully reflect the amount and disposition of the funds provided to them, and such other records which will facilitate an effective audit. They are also required, in section 208, to adopt policies to prevent fraud, waste, and abuse in their programs. They must adopt specific policies and procedures to assure that any program or project which receives assistance is properly and efficiently administered, operated, and maintained. Section 210 requires that approval by commissions of applications for grants or other assistance must be predicated upon a determination that there will be proper administration, operation, and maintenance of the project to be undertaken.

In section 208 the Appalachian Regional Commission is encouraged to adopt standards of fiscal responsibility and management. The Committee expects such standards to be no less stringent than those proscribed for the other commissions by the Secretary. The Appalachian Regional Commission is also directed, in section 113, to evaluate, on an annual basis, its effectiveness in achieving the goals and objectives of its program.

Finally, section 210 requires all recipients of assistance from a commission and all contractors of a commission to keep complete records, to be available to any member of the commission or the commission itself, the Comptroller General, and, except for the Appalachian Regional Commission, to the Secretary. Those refusing to comply with this requirement shall not be eligible for further funding under this act.

Role of the Federal Cochairman

Section 204(b)(1) describes the expanded role of the Federal Cochairmen. As the Presidentially appointed partner to Governors, each Federal Cochairman has the dual responsibility for (1) communicating regional concerns of the State members to the Federal Government, and (2) presenting the national perspective to the regional commission.

Title III, the Regional Growth Policy Process Act, significantly enhances the role of the Federal Cochairman. As a statutory participant of the White House-Chaired interagency committee process, his responsibility is to assist in the implementation of regional development plans. He has an expanded role in the preparation and submission of commission budgets. The bill throughout encourages a greater advocacy role for the Federal Cochairman to encourage Federal departments and agencies to support commission plans, programs, and priorities.

The "Federal presence" in the person of the Federal Cochairman is an essential responsibility in the act. It is expected that such Cochairmen will assure commission compliance with applicable Federal fiscal and management requirements established in the act. It is vital that Federal Cochairmen represent the Federal interest in commission determinations with respect to: State maintenance of effort requirements (section 207(h)); commission priority for assisting areas of economic decline; the exercise of commission waivers of the 20 percent limitation on funds for innovative and demonstration projects authorized under section 207(b); the integrity of the relationship between the planning and policy process and project selections; and assuring adequate commission attention to problems and solutions shared by two or more States with each region.

The committee realizes that too little policy guidance has been provided in the past within the Executive Branch to assist the Federal Cochairmen in the exercise of their duties. With a national system of regional commissions and a national commitment to address certain problems at a subnational level, the absence of policy guidance and support inside the Executive Branch is no longer excusable.

Participation of Appalachian Commission Partners

The 1975 amendments to the Appalachian Regional Development Act included provisions to enhance the participation of the Governors as active members of the Commission. The response of the Governors to those amendments has been gratifying. There are a few matters of concern, however, which have been observed in oversight on the Commission's implementation of the 1975 amendments.

While the Governors themselves have been active, occasionally alternates to the State Members have been appointed who do not meet the act's requirement that they be members of the cabinet or of the Governor's personal staff. It is important that only State officials with decision-making authority at the cabinet level or who have full access to the Governor serve as alternates. In addition, it is important that such an alternate attend all the Commission meetings when the State member is not present.

To maintain full gubernatorial participation, Commission meetings at which a quorum of State members must be present should not have to address administrative matters, contract approvals, or personnel questions not involving policy decisions. Minor modifications of annual investment programs also do not have to be decided at meetings which include the personal participation of a quorum of Governors.

In 1975 the Committee was concerned primarily with the role of Governors in the Appalachian Regional Commission. Historically, the Federal Cochairman, as the representative of the President, has been a key participant in the unique partnership experience of the Appalachian Regional Commission since its inception in 1965. The committee intends that the Federal Cochairman remain an active participant in the partnership.

The Federal Cochairman, in partnership with the Governors of the 13 Appalachian States, is charged by statute with working to bring about the growth and economic development envisioned by the Congress in the Appalachian Regional Development Act. There is no question that the Federal Cochairman should be a visible spokesman for the Commission throughout the Region. However, even more important are his responsibilities in Washington. It is the Federal Cochairman's personal responsibility to attend Commission meetings, and to work in concert with the States to develop programs and policies that will help shape the future of the Region. The Federal Cochairman has a full time position with a unique opportunity to influence the future of Appalachia by personal participation in dealings with Federal agencies, the Congress, and within the Commission itself.

There may be occasional instances when the Federal Cochairman must be absent from his duties, and the statute provides for an alternate to serve in his place at those times, and when not serving as such, to perform duties assigned him by the Federal Cochairman. The basic functions of the Federal Cochairman are, of course, not delegable to the alternate or anyone else.

Appalachian Highways

As stated in the general statement at the beginning of this report, approximately 56 percent of the 3,025 miles currently authorized for the Appalachian highway system is either complete or under construction.

The Administration bill (S. 912) authorized $300 million for fiscal years 1980 through 1985 for the highway program. S. 835 as introduced contained a total of $3.5 billion for 7 fiscal years for this purpose. This was the amount calculated by the States to be necessary for the completion of the entire system. The committee reduced these amounts to levels more compatible with anticipated appropriation levels and with

expected construction capabilities. Section 106 of S. 835 authorizes a total of $2.03 billion for 5 fiscal years, as follows:

Fiscal year:	Millions
1981 (an increase of $180 million over existing authorization)	$300
1982	400
1983	450
1984	500
1985	500

S. 835 as amended also provides for a 33-mile increase in the authorized mileage for the system, from 3,025 miles to 3,058 miles. This increase is for centerline alinement and minor rerouting due to environment problems.

The committee is aware that the Commission prepares cost estimates for the Appalachian development highway system as a basis for allocating highway funds among the States. In the past, authorizations and funds have been distributed among the States according to each State's relative share of remaining costs to complete the system, with a maximum limit for any one State. Up to now this has been a workable policy.

However, the committee is also aware of the need to complete individual highway corridors and that some States have accelerated their construction programs utilizing their own funds and by prefinancing. Under present procedures, as States approach completion of their portion of highway corridors within the Appalachian highway system, their relative share of remaining costs diminish, thereby lengthening the time it takes to complete individual highway corridors. Therefore, in allocating authorization and funds in the future, the Commission should take into consideration the need to complete individual highway corridors and the efforts individual States have made to accelerate completion using their own funds on corridor segments in the past or future, as well as prefinancing.

The committee wishes to make clear that the present prohibition on the use of section 214 funds for highway or road construction is intended to preclude section 214 supplemental funding for the Appalachian development highway system or access road projects authorized under section 201 of this Act, or for Federal and highway programs under title 23 of the U.S. Code.

The committee agrees that the Commission may continue to supplement development projects under other Federal grant-in-aid programs which include incidental road construction as project components, such as the industrial site development programs authorized under title I of the Public Works and Economic Development Act or section 310B of the Consolidated Farm and Rural Development Act; or recreational development projects under the Land and Water Conservation Fund Act.

Appalachian Housing

The problem of adequate basic housing in Appalachia has been severe for some time, and appears to be worsening. Over one million Appalachian homes are substandard—either unsafe, with insufficient plumbing, or overcrowded—in some cases all three. This figure is more compelling when it is realized that in central Appalachia, 38 percent of the housing is inadequate.

Under the housing program of the Appalachian Regional Commission, site development grants and planning loans have resulted in the construction or repair of an additional 1,900 homes. Technical assistance funds have been used by all 13 States to strengthen the technical competence of low and moderate income housing sponsors, and ten States have established an Appalachian housing fund to stimulate housing production in the region.

One of the primary reasons for the lack of adequate housing is the fact that there is not enough land suitable for development. In many cases, especially in coal-producing areas, the only land flat enough to build on is located in the flood plain, and is subject to frequent devastating floods. Due to the competition with industry for available land, building sites for housing are frequently sold at premium prices.

Another unique problem exists in some areas of Appalachia, particularly in West Virginia. In the southern part of this mountainous State, 10 major landholders own 90 percent of the land. If they are unwilling to sell the land for housing development, and this has proven to be the case in many instances, there may be no way to make the land available.

Section 108 of this legislation expands the existing section 207 of the Appalachian Regional Development Act to enable site development funds to be used for land acquisition for low- and moderate-income housing. The monetary limitation for grants and loans for site development purposes is raised from 10 percent to 25 percent. Any reduction in costs of housing units attributable to land acquisition under this section shall accrue to ultimate purchasers or tenants, and not to any profit-making entity.

Section 207 is further expanded to allow the Secretary of Agriculture, at the request of a State within the commission, to use land acquisition and condemnation authority under section 601 of the Powerplant and Industrial Fuel Use Act when land for housing cannot be obtained in any other way. The Appalachian Commission is also directed to undertake a demonstration of incentives or programs to attract large-scale housing developers to the Appalachian area.

Child Development

One of the most valuable programs developed under the Appalachian program has been the child development demonstration program.

The program was initiated to respond to the severe health problems and high mortality rates among infants and children of the region. Each of the States have begun early child development programs and are beginning to address the health needs of young children. This activity has enabled many low-income and single-parent families to augment their income by freeing family members to find employment while their pre-school children are being cared for. It is also an effective learning experience for these children.

The 1975 amendments allowed commission funding for the operation of child development centers to be continued for an additional two years beyond the 5-year limitation placed on all demonstration projects. This extension was granted because many of the worthwhile programs were having difficulty finding other funding sources for continued operation. During the extension period, the Commission and the States were to renew efforts to secure other funding.

Section 107(b) of S. 835 amends section 202(c) to permit continued operational funding for these centers upon the request of a State. The amendment applies only to those projects supported in fiscal year 1979, and is not intended to restore or resume funding for projects whose grant funds ceased prior to that time. Projects initially approved after September 30, 1979, must conform to the existing 5-year limitation. The committee supports current Commission policies which promote and assist projects funded under this section to achieve earliest possible independence from ARC funding. The ability of States and local project sponsors to attract other public and private resources to maintain activities stimulated by flexible ARC aid is vital to the ARC demonstration process and its ability to generate new programs in underserved areas. The Committee does not intend that the Commission become a direct operating program agency. Discretionary grants made in accordance with this amendment will follow the normal Commission approval process and will be included in state Appalachian development plans and programs, prior to being submitted by the Governor.

Business, Railroad, and Energy Resource Activities

S. 835 as amended adds a new section to title II of existing law authorizing the Appalachian Regional Commission to make grants for the stimulation of agriculture, mining, construction, manufacturing, commercial, and other economic activities. Such grants can be made for business related technical assistance, establishment of revolving funds for business, agricultural and forestry enterprise loans, acquisition and rehabilitation of rail properties by public bodies, and projects for development, production, utilization and conservation of energy resources. States may carry out such activities directly or through the private sector, public bodies, or private nonprofit organizations.

With regard to the railroad activities authorized by this section, acquisition or rehabilitation of rail properties must be deemed critical to State investment plans. The Federal share for acquisition is limited to no more than 80 percent of the total cost, and Federal funding for rehabilitation can be no more than 50 percent. Neither acquisition nor rehabilitation grants may be made for rolling stock.

Incentive Grants

Section 206 of S. 835 authorizes the Secretary to provide technical assistance and incentive grants to commissions. Each commission, in turn, is authorized to provide technical assistance to States, substate areas, and urban and rural communities.

Incentive grants to commissions by the Secretary are authorized for purposes such as improved coordination of development programs and planning; encouragement of procedures enabling Governors to participate in regional growth policy; development of cooperation of State and commission activities augmenting national energy, export, and urban policies; and encouragement of other special activities.

The committee amended this section by adding two additional technical assistance authorities for all commissions. Commissions are authorized to provide assistance to communities in maintaining, restor-

ing, or augmenting commercial air passenger service, excluding capital assistance or operating subsidies.

Further, each commission is directed to investigate, seek opportunities for, and report on the use of technical assistance and demonstration authority under this subsection and under section 207 to increase the use of solar energy equipment in residences in its region. Commissions are to assist in the standardization of such equipment, to encourage financing by regional credit institutions and Federal programs of installations of such equipment, and to facilitate inclusion of solar energy equipment installation costs in residential mortgage financing. Commissions are authorized to conduct pilot projects to put into practice the findings of such investigations.

The incentive grant authority in section 206 is an important element of this legislation. It is designed to further encourage commissions in their efforts under this Act, by providing funding for additional activities to those commissions displaying a determined effort to move forward in addressing regional economic problems.

Funds under this section are not to be used for State personnel or administrative costs which should be borne by the States. General concern has been expressed about the shifting of administrative costs to the Federal share of commission funding. The committee intends this matter to be addressed by the Secretary and all of the commissions in establishing rules and regulations.

Commission Authorities

Section 207 includes program authority for the commissions. Existing law is expanded to make clear that commission funds may be spent for broad spectrum of economic activities, including transportation, energy development and conservation, environmental and natural resource management agriculture, and development of indigenous arts and culture.

The bill continues the authority of the commissions to supplement other ongoing Federal programs, to provide "first dollar" and to undertake innovative projects which can not be initiated under other Federal agencies. The bill places a 20-percent limit on the amount of funds the commission may use to undertake innovative projects or demonstrations. A waiver is provided where a commission can show that a larger percentage necessary to carry out a major objective of the commission plan. The Committee is aware of the flexibility provided in the demonstration authority and that, indeed, much of the commissions' effort is to develop new approaches to problems. This flexible authority, however, can be abused and becomes a means of substituting commission funds for other investments in the region. The Committee wants to make clear that this authority will be used only where necessary and on innovative programs.

This section imposes a 5-year limitation on funding any component of any project under this Act, the existing Appalachian Regional Development Act, (Public Law 89–4, as amended,) or the Public Works and Economic Development Act (Public Law 89–136). Funding may be made for up to 80 percent of project costs. Grant approval is contingent upon certification by the Commission that the project is truly innovative.

Grants for project operation may be made only for nonprofitmaking projects for which funds are not available under any other Federal, State, or local program. Such grants may be up to 100 percent for two years from the commencement of project operation, and up to 75 percent for the following three years, after which time no grants may be made for project operation.

The section further specifies that financial assistance under this Act may not be provided to assist in the relocation of private establishments or to enable private contractors or subcontractors to undertake work previously performed in another area by other contractors or subcontractors.

Cultural resource development has been included as an important element in promoting balanced social and economic regional development, with funding for developing and carrying out programs that promote cultural resources development and growth, for research on the conservation and utilization of cultural resources, and for incentive grants at the State level to develop a unified set of development objectives.

Cultural resources are "people magnets"—stimulating tourism, attracting ancillary businesses, and encouraging rehabilitation. They generate large cast flow for a modest investment, and also provide jobs in supplying goods and services while humanizing the environment. Cultural resources are the human and physical assets which contribute to the creation of fine and folk arts, music, theater, dance, literature, design and architecture, including those traditional academic and other institutions and groups which practice, preserve and transmit such arts.

REGIONAL DEVELOPMENT COUNCIL/OFFICE OF REGIONAL DEVELOPMENT

Section 208 establishes a procedure for the Secretary to provide Federal policy guidance to the Federal Cochairmen. A Regional Development Council is established to serve as a mechanism for consultation on policy and administrative improvements in the program established under this act. This Council is to be composed of the Federal Cochairmen, and shall participate in the liaison and coordination responsibilities under section . The Council Chairman shall be selected by the Secretary after consultation with the members.

Additionally, this section directs the establishment in the Department of Commerce of an Office of Regional Development, to be headed by a Director appointed by the Secretary, after consultation with the Chairman of the Regional Development Commission and composed of such staff as necessary. This office is to assist the Secretary in carrying out her responsibilities under this act. In addition, the office is to assist commissions in their budget preparations and in their relationships with each other, as well as providing technical and support services as necessary to the Secretary and the Federal Cochairmen. Other related responsibilities are described in the section.

The Secretary is directed to assure that commission activities are consistent with this act by specifying minimum standards of fiscal responsibility and management, and by adopting procedures and regulations governing recognition of regions and boundary changes, record-keeping, administrative policies, and establishment of a man-

agement information system. The section also spells out other accountability requirements discussed elsewhere in this report.

Maintenance of Effort

S. 835 was amended to include a maintenance of effort and substitution section. Section 221 of the Appalachian Regional Development Act (Public Law 89–4) contains a maintenance of effort provision which is intended to assure that the States not view the act as an opportunity to divert from Appalachia those State funds which would have been spent if the Appalachian Act had not been enacted. This section requires States to maintain the same level of expenditures in the Appalachian portions of their States as was spent in the last 2 full fiscal years preceding the date of enactment, that is 1963 and 1964.

The recent report of the General Accountnig Office on the Appalachian Regional Commission suggested that it may be more appropriate to use "proportionate" levels of expenditures rather than "aggregate". The Committee chose instead, in section 207(h), to restate the maintenance of effort provision in an amended form, making it applicable to all regional commissions. The new base line for calculating past State expenditures will, however, be fiscal years 1977 and 1978.

The commissions are directed to give funding priority to areas affected by economic decline. Activities in areas experiencing rapid growth problems should be primarily directed to basic service needs.

The Committee suggests that the records to be kept by the commissions as required by these amendments should include data which will enable the commissions to monitor State financial participation in their programs.

The Committee has always been concerned that this program not be viewed as simply another conduit of Federal funds and that the States not use these funds to supplant other funding sources.

In its report on the Appalachian programs, the General Accounting Office indicated an increased use of that commission's first dollar authority and recommended the committee place a limit on the use of these funds. The committee does not believe a fixed limitation is warranted at this time, but is concerned about the increasing use of first dollar authority. The committee believes that the commissions need the flexibility provided by the first dollar authority. Regional policy is not bound by the availability of funding and gives commissions leeway in meeting their objectives. The committee is concerned, however, about excessive use of this authority. One of the primary goals and responsibilities of the commissions is to influence other Federal programs. Through excessive reliance on first dollar authority, the commissions duplicate existing programs and tend to become a direct, categorical grant program—a role that has never been intended for the commissions.

The committee believes the commissions must give more attention to this matter and take more effort to tap other funding sources. To assist the commissions in assessing the use of and need for first dollar funds, each annual investment strategy should identify where first dollar money is used.

The committee will continue to maintain a strong interest in this area.

Civil Service

Section 104 extends Federal employment and retirement benefits to Appalachian Regional Commission and title V commission employees whether o. nor they were previously Federal employees.

In accordance with existing legislation, ARC employees who were employed by the Federal Government immediately prior to Commission service are eligible for Federal retirement, life, health and disability programs. In establishing benefits for other Commission employees, the Commission has tried to provide comparability for all. With recent changes in the Social Security law and the Federal benefit system, the cost of providing comparability outside the Federal benefit program makes this virtually impossible. It is unfair to those who came to the Commission from State government, local communities and the private sector to receive lesser benefits than those who came from the Federal Government. Therefore, the bill authorizes the Office of Personnel Management to contract with the Commission for staff members' benefits. As the costs of benefits for the Commission staff are shared jointly by the Federal Government and the States, the savings realized would accrue to the Federal Treasury as well as the States.

Appalachian Boundary Study

From time to time since the inception of the Appalachian regional program, States have requested that additional counties be included within the Appalachian region. Such requests were received this year for several counties in Virginia and New York.

With the expansion of the regional commission concept to the rest of the Nation, the problem naturally arises of whether counties contiguous to the Appalachian region should be incorporated into that region or remain in another region established or recognized under this act.

Section 115, therefore, directs the Appalachian Regional Commission to conduct a study. The study shall evaluate the social and economic characteristics of the counties in the Appalachian region and contingous to it with the goal of identifying, to the extent possible, those characteristics which counties within the region have in common and which therefore constitute reasonable standards for transfer in or out of the region.

The study is to be conducted in conjunction with the Presidential study of commissions and Federal Regional Council boundaries mandated in section 308, and the study results and recommendations are to be submitted to the Congress no later than 2 years after enactment of this act.

Border Resource Research Institutes

Section 309 of S. 835 as amended authorizes the establishment of a system of Border Resource Research Institutes under the jurisdiction of the Southwest Border Regional Commission.

The section requires the Commission to designate one university in each of the States of California, Arizona, New Mexico, and Texas for the purpose of initiation and support of research programs into border resource problems.

Once the Border Commission has designated the four Border Resource Research Institutes and rules and regulations have been drafted, a reasonable annual level of funding for the institutes at the outset would be $250,000 per institute.

The committee realizes that the Research Institute program is new and must be meshed with other Southwest Border Commission efforts. Consequently, the committee recognizes that funding levels for this program must ultimately be determined by the Commission and implementation of the program may be in stages.

The designated universities need not be in one of the counties under the Southwest Border Commission, except when practicable. Instead, the Commission should select the university within the State that has the best capability to undertake studies on border resource problems.

Alaska Regional Commission

In addition to reauthorizing existing commissions, the reported bill recognizes a development region embracing just the State of Alaska and requires the Secretary, at the request of the Governor of Alaska, to establish the Alaska Regional Development Commission no later than October 1, 1979.

This action is based on two findings. First, section 502(f) of the Public Works and Economic Development Act currently authorizes the establishment of certain single-State regional economic development commissions, including Alaska. Second, the committee decided that the State of Alaska meets all the criteria for designation as a development region set forth in this bill.

The circumstances of geography and size call for a unique approach in Alaska. These circumstances result in the existence of several regions within the State which are distinguished from each other by cultural, climatological and economic attributes. Three geographically distinct native groups (Eskimo, Indian, and Aleut) and the dispersed character of timber, fishery, mineral and tourism sectors of the economic base contrast with the similarity of each Alaskan region's difficulties with transportation, communication, social services, promotion of exports, the high cost of living, the high unemployment rate, and the constant battle with a hostile climate.

Upon consideration of these issues, it appears appropriate for Alaska to form a single State commission. Therefore, section 202(c) of the bill recognizes Alaska as the Alaska development region. Section 203(a) requires the Secretary of Commerce, at the request of the Governor of Alaska, to establish and operate the Alaska Regional Development Commission no later than October 1, 1979.

In addition to having all the duties of other commissions, section 204(d) authorizes the following activities which may be undertaken by the Alaska Regional Development Commission: (a) review resource inventories of Federal agencies; (b) review and make recommendations to the Federal Government and State legislature on land use plans and proposed activities; and (c) assist Alaska Native regional corporations in preparing land use plans.

Section 307(c) of the bill authorizes a study by the Secretary of Commerce of the desirability of creating a joint Federal-State Economic Development and Land Use Planning Commission for Alaska,

with land use planning and classification powers. This study is to be completed not later than one year after the establishment of the Alaska Regional Development Commission and is to be conducted in consultation with the Secretaries of the Interior and Transportation and the Governor of Alaska.

Rollcall Votes

Section 133 of the Legislative Reorganization Act of 1970 and the rules of the Committee on Environment and Public Works require that any rollcall votes be announced in this report. During the committee's consideration of this measure six rollcall votes were taken. Each of those votes was publicly announced during the open meetings of the committee for marking up this legislation. The tabulation of the votes is available in the offices of the committee. S. 835, the Regional Development Act of 1979, was ordered reported on May 9 by a vote of 12 to 2. Senators Randolph, Muskie, Gravel, Bentsen, Burdick, Culver, Hart, Moynihan, Stafford, Baker, Domenici, and Pressler voted in the affirmative, and Senators Chafee and Simpson voted in the negative.

Regulatory Impact

The committee believes that this legislation will cause no change in regulatory activity by the Federal Government, or by private business.

Cost of Legislation

Section 252(a)(1) of the Legislative Reorganization Act of 1970 requires publication in this report of the Committee's estimate of the cost of the reported legislation, together with estimates prepared by any Federal agency. S. 835 as amended authorizes Federal expenditures of $2,765,500,000 for fiscal years 1980 through 1983, and an additional $1 billion for the Appalachian highway system for fiscal years 1984 and 1985. These amounts are allocated as follows:

Title I: Appalachian Regional Development Act Amendments:	
Administrative expenses:	
1980-81	$7,000,000
1982-83	8,500,000
Highways:	
1981	180,000,000
1982	400,000,000
1983	450,000,000
1984	500,000,000
1985	500,000,000
Nonhighway programs:	
1980-81	340,000,000
1982-83	380,000,000
Title II: Regional Commission Act:	
Programs:	
1980	250,000,000
1981	250,000,000
1982	250,000,000
1983	250,000,000
Total	3,765,500,000

Section 403 of the Congressional Budget and Impoundment Control Act requires each bill to contain a statement of the cost of such bill prepared by the Congressional Budget Office. The report follows:

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., May 15, 1979.

Hon. JENNINGS RANDOLPH,
Chairman, Committee on Environment and Public Works, U.S. Senate, 4204 Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for S. 835, the Regional Development Act of 1979.

Should the committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

ALICE M. RIVLIN, *Director.*

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

MAY 15, 1979.

1. Bill number: S. 835.
2. Bill title: The Regional Development Act of 1979.
3. Bill status: As ordered reported by the Senate Committee on Environment and Public Works on May 7, 1979.
4. Bill purpose: The bill authorizes the creation of regional commissions and provides a framework for these commissions to coordinate the development efforts of Federal, State and local governments in most areas requiring intergovernmental cooperation. The bill also extends the authorizations through 1983 for the Appalachian Regional Commission and title V of the Public Works and Economic Development Act of 1965, and it makes existing regional commissions part of a nationwide system of multi-State regional development commissions to promote balanced development in all region of the Nation.

TITLE I—APPALACHIAN REGIONAL DEVELOPMENT ACT AMENDMENTS OF 1979

Title I authorizes appropriations for the Appalachian Regional Commission (ARC), the Appalachian development highway system, and for the nonhighway, regional development activity of all commissions covered by the bill. The title also clarifies the status of existing commission employees within the new commission framework and adds new grant authority for projects involving methods of meeting the human services needs in the region.

Title II of the Appalachian Regional Development Act of 1965 is amended by adding a section designed to stimulate economic investment by providing funds to States to make grants and establish revolving funds for business loans. Grants under this authority are directed toward transportation systems infrastructure, specifically rail and air service.

TITLE II—REGIONAL COMMISSION ACT OF 1979

This title establishes the intent of Congress that every area of the Nation be included as part of a development region and be represented by a regional development commission. All existing commissions (the Appalachian Regional Commission and all commissions created through title V of the Public Works and Economic Development Act of 1965) are automatically covered by authorities established in this act, subject to boundary changes authorized by the bill. This title specifies the procedures for creating commissions, their mission, and their role in the intergovernmental regional development process. New commissions require the written initiative of the governors of concerned States and will function according to procedures specified in the act. The bill creates an Office of Regional Development within the Department of Commerce to support regional commissions at the Federal level.

TITLE III—REGIONAL GROWTH POLICY PROCESS ACT

This title establishes an interagency committee to coordinate and support regional commissions and the Federal Government in determining policies and recommendations which will further the programs supported by this bill. In addition, it establishes the requirement for annual development plans for each State in each region and further requires each regional commission to prepare multiyear development plans and annual investment strategies.

Section 309 of title III establishes a system of Border Resource Research Institutes under the jurisdiction of the Southwest Border Regional Commission (SBRC) to address issues crucial to the area. Funding would come from SBRC funds.

The authorization levels established by this bill allow the ARC and other existing commissions to be funded at the level requested by the President for fiscal year 1980. The President's 1980 budget request includes $208.6 million for regional commissions, excluding Appalachian highway funds. The bill authorizes approximately $423 million for those same activities. Additional funds, in excess of the President's request, are provided for all regional commissions for grants and development support activities.

5. Cost estimate:

[In millions of dollars]

Estimated authorization level:[1]	
Fiscal year:	
1980	423
1981	604
1982	844
1983	804
1984	500

[1] For the purpose of this estimate, when specific amounts are authorized to cover a 2-year period (that is, sections 105 and 401 of the Appalachian Regional Development Act of 1965), one-half of the authorized amount is shown in each year. The budget impact of this bill does not include $300 million in fiscal year 1979 and $170 million in 1980 previously authorized for the Appalachian development highway system.

In addition to the amounts shown in the above table, the bill authorizes $500 million for the Appalachian development highway system in 1985. A total of $1.6 billion in outlays from the authorizations in this bill will be incurred after fiscal year 1984.

Including existing authorizations, total funds authorized for these programs are approximately $723 million in fiscal year 1980 and $774 million in 1981.

The costs of this bill fall within budget function 450.

[In millions of dollars]

Estimated outlays:	
Fiscal year:	
1980	172
1981	333
1982	468
1983	635
1984	588

6. Basis of estimate: For the purposes of this cost estimate it is assumed that all authorized funds are appropriated and are available at the start of each fiscal year. The portion of costs attributable to the ARC is assumed to be spent at rates equal to the program's recent spending pattern, with highway and nonhighway spending treated separately. Of the sum authorized by section 113 of the bill, an amount equal to the President's 1980 budget request for ARC nonhighway programs was assumed to be allocated to those programs, with that value inflated in fiscal years 1981 to 1983 by the CBO inflator for the gross national product. The balance of the authorization was assumed to be distributed to regional commissions established by title II of this bill.

To estimate the outlays associated with title II it was necessary to make some assumptions about the number and nature of restructured regional commissions. For the purposes of this estimate it was assumed that the eight existing regional commissions would continue to operate essentially as in the past. Funding for these programs was assumed to be equal to the President's fiscal year 1980 request plus a prorated share of any additional funds. These funds were assumed to be spent at historical rates.

To meet the mandate for new commissions it was assumed that eight additional regional commissions would be recognized in fiscal year 1980. It was further assumed that these commissions would incur administrative expenses similar to the existing commissions, adjusted for startup costs and partial year administration expenses. Grants and other assistance from these new commissions were assumed to start late in fiscal year 1980 with normal activity first occurring in fiscal year 1981.

7. Estimate comparison: None.

8. Previous CBO estimate: On May 15, 1979, the Congressional Budget Office prepared a cost estimate for H.R. 2063, a bill which reauthorized the Appalachian Regional Commission and amended title V of the Public Work and Economic Development Act of 1965. The relevant portions of each bill are similar, except that the House provided authorizations for only 2 years in most instances and did not establish a number of reporting requirements provided for in S. 835.

9. Estimate prepared by: Linwood T. Lloyd (225-7760).

10. Estimate approved by:

C. G. Nuckols
(For James L. Blum,
Assistant Director for Budget Analysis).

HEARINGS

The Subcommittee on Regional and Community Development held 3 days of hearings on this legislation: April 3, 4, and 5, 1979. Issues relative to the subject of this legislation were also discussed in full Environment and Public Works Committee hearings on the proposed fiscal year 1980 budget requests for the Appalachian Regional Commission and the title V commissions. These hearings were held on February 21 and 22, 1979.

MINORITY VIEW OF MR. CHAFEE

As I said in our subcommitee on May 7, referring to the title V commissions:

> We are taking a program that is existing and we are changing it; we are broadening it in a period when we are trying to reduce the pervasive impact of the Federal government on everybody's lives.

These commissions have not achieved their purpose, to date, of trying to foster multistate cooperation in meeting challenges. It is essential that these commissions first prove they can achieve this purpose before we give them a broader mandate.

All too often, title V commissions have become a method of receiving Federal money which is then simply divided amongst the states according to population. In fact, only 20 percent of their projects have been interstate in nature. Because of this, I have tried in the last few weeks to restrict the broadened mandate that this bill encompasses. As the recent audit by the Department of Commerce state,

> The "regional" aspect of the title V program is the one unique quality that distinguishes this program from similar government program concerned with economic development.

Unless this program develops some form of accountability that ensures the funding of truly regional projects, it will not receive my full support.

I have offered several amendments that have strengthened the concept of regional and focused the program on its original goal of aiding distressed areas. For instance, the committee agreed with my motion to limit the primary purpose of the commissions to aiding declining areas.

As regards the Appalachian Regional Commission, I do not believe that its powers should be broadened, mileage added to its highway system and the spending authorization greatly increased (it uses from $450 million in the current fiscal year to $640 million in fiscal year 1983) when already its authorizations and appropriations are far greater than all the title V's combined ($368.7 million appropriated this year for ARC versus $63 million for all the others).

ARC and the title V's were originally conceived to help distressed areas and were to last a finite time. Now they have grown into a nationwide system of cor missions constantly conceiving of new rationale to justify their existence, and all viewed as permanent.

The time has come gradually to scale down authorizations for all these commissions with a view to blending their current responsibilities into existing Federal programs.

JOHN H. CHAFEE.

MINORITY VIEWS OF SENATOR SIMPSON

This legislation proposes to make permanent and extend the scope of a cluster of subnational quasi-governments known as Regional Development Commissions. Composed of Governors of the States lying within regional delineations of the country and a Federal cochairman—who has veto power over expenditures of Federal funds—the "title V commissions" are so named from their charter, title V of the Public Works and Economic Development Act of 1965.

The purpose of that act was to "help areas and regions of substantial and persistent unemployment and underemployment to take effective steps in planning and financing their public works and economic development." It was directed to "depressed areas", as they were then termed not only as a humane effort for the people of those neglected areas but also in the broad interest of a healthy national economy. Title V—which established the Regional Action Planning Commissions and which the bill before the Senate proposes to replace while also extending the authority of the separately organized Appalachian Regional Commission—begins by setting forth in section 501 the criteria for identifying seriously lagging regions: high unemployment, low family incomes, poor housing, a single or two-industry economy in long-term decline, substantial outmigration of labor or capital, and the like.

The Regional Commissions were presented at that time as temporary institutions, designed to direct sharply focused assistance to clearly defined problem areas which were unresponsive to the general growth patterns of the national economy—geographic areas suffering an underlying and intractable problem requiring extra-ordinary effort. In short, the Commissions were intended to be a kind of special task force addressing unique and severe problems. They were to concentrate the attention of the participating Governors, together with Federal funds and technical assistance, not only on ameliorating the manifest effects, but also to attack the root cause of distress.

I have reviewed this history because I consider the proposal now advanced to be wholly different—and that it cannot, therefore, be considered simply an extension of the title V commissions as originally conceived and generally accepted. The present proposal is, of course, one that comes to the Congress from the participants in the Regional Commissions and their advocates, so in that sense it is an extension of their hopes and desires for this form of "shadow government."

That this is so may illustrate several things: (1) the natural growth of a bureaucracy once established; (2) the building of a constituency where Federal funds are in prospect; (3) the difficulty of disbanding an organization when its term is done or its task mainly completed; or (4) the passion for coordinated planning and paperwork which may soon overwhelm constitutionally established State, local and Federal Government.

What began as a sharply focused effort directed to limited geographic areas in crisis or chronic distress is now to cover the entire United States "wall to wall."

What began as criteria of distress—the high unemployment and low income guidelines of section 501—has now been abandoned in favor of a type of planning for change through the growth policy process.

What began as "seed money"—supplemental funds designed to attract other Federal, State and local funds—became "first dollar money"; that is, extra funds whenever State priorities or Federal budgets failed to reach the desired project. Next comes 100 percent "demonstration project" funds. There is a curious type of logic here, as in the 50-percent matching programs of yore, which required a State or local "share" to be paid by communities of limited income, and now many of these programs are already 75 or 80 percent Federally funded. The "leverage" effect is to be found instead in the attempt to pry loose additional projects which might otherwise fail the criteria established by the Congress. The "multiplier" is a demonstration project which can be regenerated with Federal funds derived from all taxpayers.

What began as a tightly knit task force directed to priority goals has now become an organization which wants to coordinate all available Federal programs and play power broker for the taxpayer's dollar.

It will be argued that this reorientation of purpose, this change in the philosophy behind the title V commissions should come as no surprise; the trend has long been evident. That is appallingly quite true. The latest fashionable mode for regional commissions to embrace was most recently and effectively presented at the White House Conference on Balanced National Growth and Economic Development, sponsored by the chairman and members of the Senate Committee on Public Works and held in January 1978 as a precursor to the development of this legislation. The precise question before the Congress—upon which we are asked to vote—is whether or not to enact into law the direction of that Conference, as distilled and defined by the administration acting through the Department of Commerce in cooperation with representatives of the National Governors Association.

S. 835 as introduced, and the administration bill as reported by the House Public Works Committee, proposes "a nationwide system of multistate regional development commissions to promote balanced development in the regions of the Nation." The first purpose of that bill was

> planning for growth and change so as to maximize the social and economic benefits and to minimize the costs in activities which will improve the quality of life for the people in all the regions of the Nation.

I compliment my sincerely motivated colleague, Senator Chafee, in his capacity as ranking minority member of the Regional and Community Development Subcommittee, for his success in eliminating this stunningly broad purpose, and in striking the mandate to create a new political action device. He attempted to hold to the intention of existing law, by directing the clear purpose of the bill to "shared and interstate regional problems of economic decline and dislocation due to rapid growth." I am afraid, however, that these and the other improvements secured in subcommittee, substantial as they are, cannot change the

basic direction given throughout the bill, or the intent of the Administration and the zealous advocates and wily bureaucrats of the title V commissions who support it.

To discover this underlying direction and intent, it is necessary only to review title III of the bill, which I commend to my colleagues for its instructive text:

Section 302, for example, requires the President to establish a committee chaired by "a senior White House official," who is instructed to periodically call on the carpet the heads of various Federal departments and agencies so as to determine whether or not they are carrying out the regional development plans prescribed by the bill, who presumably will knock heads to get "the resolution of any issues" between the regional commissions and the line agencies, and who will fix a schedule "for review and response" to commission plans by the rest of the Federal Government. So begins title III, which we will come to know as the Regional Growth Policy Process Act.

The record of the regional commissions over the past 12 years has been decidedly mixed: some successes with mostly indifferent results, and when a bad result surfaces it is usually blamed on a lack of Federal funds, or upon confused authority. Except, that is, for the Appalachian region, which has been handsomely funded, where life has improved and where in its central region, which elicited the 1965 national response, coal field poverty is being daily exchanged for the problems of boom and "energy impact."

Most recently, the commissions have been criticized through careful and responsible audits by the Department of Commerce and the General Accounting Office. Their findings support observations made by knowledgeable experts for years: that the projects selected often are not regional, that clear priorities and specific objectives are neither formulated nor followed, that even after 14 years goals are not quantified nor progress measured against the goals.

There is simply no way to determine how much of the job has been actually accomplished in the last 2 or 5 or 14 years—or when, if ever, the work of the Regional Commissions will be completed. For example, the GAO report to the Congress of April 27, 1979, addresses—

> Problems and issues that need to be resolved by the Congress, the Office of Management and Budget, and the Commission before the Appalachian experience can be expanded to a nationwide system of multi-State regional commissions.

These evaluations are usually met with much strident philosophical rhetoric, and the full jargon of "creative federalism."

I can perceive four alternative outcomes if this legislation is enacted:

First, its rhetoric would become real, establishing a new political system coordinating all the rest of government; producing economic development planning, growth planning, and land-use planning; successfully presenting before the executive and legislative branches of the Federal Government regional views in which are incorporated State and grassroots goals—while in turn reflecting national policy back down the chain to the regional, State and local levels. Who can believe this will actually occur? It may be a worthy vision, but I think

we would be on fragile and treacherous ground if we believe writing this dream into law will make it so. It smacks of a total lack of confidence in the present American systems of government as we know them—at all levels. Passage of the legislation would implement the full coordination and planning potential of the adminstration bill and S. 835 as introduced. It would not, alone, require large project authority or grant funds. The great paradox of the administration bill, of course, is that this proposed mechanism of such enormous scope is accompanied by a request for only negligible funds in the President's budget.

So a second outcome could be that, realistically and hopefully, the proposed regional growth policy process will never replace the present institutional forms of government. The chief result of enacting this bill would then be only to open the doors of the treasury to rapidly increased funding for the title V commissions. Its advocates may well anticipate multiplying this year's budget of $74 million by tenfold, and then by 10 again. That would not be inconsistent with "parity with Appalachia." It would provide a wonderful cornucopia, largely outside established restraints—such as local taxpayer wrath—and in any event we would greet a new set of players at the game board.

A third outcome could be the limitation of this program to sharply defined areas having special needs of such severity that they merit a specific national contribution for their remedy. It would require each commission to settle on one or two high priority objectives—tackle them, stick to them, and attain them. This is the approach I understand Senator Chafee, to his credit, pursued in subcommittee. But the record of the commissions, including Appalachia, raises great doubt as to their ability or desire to set quantified goals, or to faithfully devote their resources to the specific accomplishment of those established goals.

A fourth outcome could be that even if this legislation is enacted—with all of its high blown promise, and with all its barely submerged hope of grasping at future billions—the Regional Commissions will continue to be ineffective and superfluous. They may continue to be largely ignored, even if given a desk in the White House. But they would retain their extraordinary capacity for stimulating more studies, more think tank capers that demand coordination and signoffs, and a fixed base of operations for yet another set of novel planners. Failing the great new institutional promise, lacking the great escalation in program and project funds, they could remain small and somewhat useful bureaucracies—just as they were originally intended.

To assure that hoped for outcome, however, we need no bill at all.

ALAN K. SIMPSON.

ADDITIONAL VIEWS OF SENATORS BAKER, CHAFEE, DOMENICI, STAFFORD, AND SIMPSON

During the markup of this bill, we opposed the adoption of the provisions establishing a special commission, with broad authority over land use in the State of Alaska. These appear as sections 204(d) and 307(c) in the bill. No hearings were held on these provisions, and legislative language on these subsections was not presented during markup to the committee for its consideration.

The issue is not whether Alaska should be eligible for a separate title V commission. That, indeed, may be reasonable. Rather, we oppose the special character of this commission for three basic reasons:

First, the language of this provision States that the Commission may "review and make recommendations * * * (on) land use plans and proposed activities" and "assist Alaska Native Regional Cooperations * * * in preparing land use plans." We believe that such language establishes a dangerous precedent for extending potential land use authorities to other title V Commissions. That is not, and should not be, the responsibility of these commissions.

It is difficult to find a more politically explosive issue than Federal involvement in local and state land use planning. The battles on this issue have been fought both in committees and on the floor over successive sessions of Congress. Regardless of the merits of Federal involvement—even at the request of the particular State in question—this bill presents neither an appropriate time or place or such legislation. These amendments are an attmept not only to circumvent the Congressional process with regard to Alaskan lands, but also the congressional process with regard to Federal land use planning generally.

Second, these amendments establish the Secretary of Commerce, rather than the Secretary of the Interior, as the focus for this land-use intrusion in Alaska. It should be noted that a land-use commission has existed for Alaska since the early 1970's.

Third, we do not believe that the volatile issues relating to the designation and use of Alaska lands should be determined or affected in this fashion, without benefit of hearings or more thorough evaluation. While we may have disparate views on the issues relating to the proper use of Alaska lands, we are agreed that such a determination should not be considered in the context of the title V program. Resolving the Alaska lands issue is the responsibility of the Congress, which has undertaken that process in other legislation through other committees, with hearings. The back-door approach in this legislation merely muddies the water, and could delay or subvert a reasonable solution.

For these reasons, we oppose strongly the adoption of these provisions in the Committee bill.

HOWARD H. BAKER.
JOHN H. CHAFEE.
PETE V. DOMENICI.
ROBERT T. STAFFORD.
ALAN K. SIMPSON.

Changes in Existing Law

In the opinion of the committee, it is necessary to dispense with the requirements of subsection (4) of rule XXIX of the Standing Rules of the Senate in order to expedite the business of the Senate.

○

MIKE GRAVEL
ALASKA

United States Senate

WASHINGTON, D.C 20510

September 13, 1979

The Honorable Arliss Sturgulewski
Alaska State Senate
2257 Sheldon Jackson
Anchorage, Alaska 99504

Dear Arliss:

Thank you for your letter of August 10 concerning S. 835.

As reported by the Senate Environment and Public Works Committee, S. 835 included a provision that would mandate the creation of the Alaska Regional Development Commission. Despite the fact that this Commission would be the only single state commission, the Committee decided that Alaska constituted a region unto itself and deserved a planning body that would focus its attention on the subcontinent of Alaska. Included in that provision was permissive authority for the Commission to review and make recommendations with respect to resource inventories and land use patterns. Also included was a study to find out how the linkage between economic development and the disposition of land resources could be strengthened within the institution of the regional commission. These provisions are described on page 20 of the enclosed committee report.

In floor action on the bill on July 31, the Senate decided to drop the permissive land evaluation authority and the study. In my judgement, this action was taken because of misplaced fear that these provisions constituted federal involvement in land use planning. However, following the vote, a short colloquy between myself, Senator Bumpers and Senator Stafford made it clear that the Alaska Commission is not prohibited from examining land disposition questions as long as they are related to the economic development function of the commission.

The authorization for an Alaskan Commission is still contained within the legislation. I expect to be a member of the conference committee that discusses this legislation with the House of Representatives and I have every reason to believe that the legal authority for the creation of the Alaska commission will be enacted this year.

Please let me know if you have any comments or further questions after your review of the enclosed committee report.

Warm regards.

Sincerely,

Mike Gravel

SUBJECT: SCS CSHB 947, sectional analysis
(Work Order Number 8564)

TO: Senator Arliss Sturgulewski
Chairman, Senate Community and Regional
Affairs Committee

FROM: John B. Chenoweth
Legislative Counsel

This bill

(1) changes substantially requirements of law applicable to the composition and apportionment of the assemblies of boroughs; and

(2) alters requirements relating to the term of office of a member of a borough assembly.

*

Note: In sections 1 - 3 of Ch. 83, SLA 1979, the first session of the Eleventh Legislature made substantial changes in the law relating to the composition and apportionment of borough assemblies. These changes are due to become effective on January 1, 1981. The changes, generally include

(1) general provisions and standards applicable to the composition and apportionment of all boroughs, set out at AS 29.23.021;

(2) composition and representation requirements for general law boroughs (that is, exclusive of home rule boroughs and unified municipalities), set out at AS 29.23.023; and

(3) recomposition and reapportionment procedures applicable to all boroughs, set out at AS 29.23.025.

SCS CSHB 947 alters many of the provisions adopted last year.

*

A principal change in this bill is the repeal of AS 29.-23.023 [* Sec. 14] and the retention of some of the key provisions of that repealed section elsewhere.

* Sec. 3 of this bill deletes a reference to AS 29.23.023, appearing in AS 29.23.021. If adopted, the assembly of a borough or unified municipality would be required to conform to standards of composition and apportionment applicable under the Constitution of the United States (popularly referred to as "equal protection"). Additionally, if adopted, the assembly of a borough could not provide for weighted voting, and, by the inclusion of the material in * Sec. 4 of the bill, could not include members appointed from city councils of cities in the borough (i.e. no "institutional representation").

* Sec. 4 "saves" a provision, now AS 29.23.023(c), and imposes it as a standard applicable to all boroughs and unified municipalities.

* Sec. 5 shortens, from four to two months, the period in which, after the report of census information, a borough is obliged to determine whether it meets existing apportionment standards under AS 29.23.021. (Last year, when AS 29.23.023 was enacted, it was understood that an official report of the 1980 census would be issued about April 1, 1981, and four months were allowed to boroughs to make the determination required.) Elsewhere in the section, the term "borough" is added to assembly, as clarification, and the reference to AS 29.23.023, repealed in sec. 14 of the bill, is corrected.

* Sec. 6: The operative provision is the inclusion of the words "by ordinance" to clarify how the borough shall provide for changes in composition as well as apportionment. Other changes in the section are for consistency.

* Sec. 7: The changes in AS 29.23.025(c) make more specific the requirements which are imposed on persons who wish to challenge a determination of the borough assembly concerning apportionment. "50 registered voters who are residents of the borough" is substituted for "50 borough voters" so that local elections officials may be able to determine with certainty whether a petition request is presented by bona fide residents of the borough. Additionally, when a determination is requested, the assembly is given two months to make that determination.

* Sec. 8 increases to six months (from four) the period of time in which the assembly, having ruled that it is malapportioned under the applicable standards, must (1) adopt a reapportionment ordinance and (2) submit it to the voters for approval. If no ordinance has been approved by the voters at the end of six months after a determination of the assembly that it is malapportioned, the commissioner of the Department of Community and Regional Affairs is given responsibility to impose a reapportionment plan. The plan is to be presented as an order of the commissioner delivered to the assembly for implementation.

* Sec. 9 establishes a plan for an advisory determination by the commissioner of community and regional affairs that an assembly is malapportioned or that an ordinance presenting a new apportionment plan, even after ratification by the voters, does not meet constitutional or statutory requirements. The provision has no legal effect as to any other procedures bearing upon changes of composition or apportionment, and appears to be available only for its local political effect.

By * Sec. 10, your committee clarifies which municipal election it is in which an apportionment or composition change becomes applicable.

New subsections of AS 29.23.025, added in * Section 11, indicate when voters may seek judicial review of a reapportionment ordinance or order, or an apportionment determination (whether of the borough assembly or of the commissioner of community and regional affairs), and delay implementation of an apportionment charge or composition change if the change is subject to review and approval (or determination of nonobjection) by the United States Department of Justice under the 1965 Voting Rights Act, as

amended. Your committee inserted language in subsection (j), added by section 11, to indicate that the provisions of AS 29.23.025 applied to boroughs -- home rule and general law -- eliminating, by implication (but not specifically), applicability of AS 29.23.025 to unified municipalities.

Related changes involving composition and apportionment of borough assemblies appear in * sections 1, 2, and 13: In section 1, the provisions of AS 29.23.021 (relating to standards of composition and apportionment and manner of voting) are made binding on home rule governments, including home rule boroughs and unified municipalities. By section 2, a requirement that the assembly of a newly-incorporated borough not exceed 11 members is removed. Section 13 rewrites a requirement imposed on unified municipalities to require that their charter contain, when applicable, procedures for reapportionment (necessary because unified municipalities are impliedly exempted from the reapportionment procedures of AS 29.23.025).

Because, generally, the statutory sections which * Sections 1 - 11 and * Sections 13 and 14 replace are not due to take effect until January 1, 1981, the effective date of these changes is delayed to that date. [* Sec. 15]

* Sec. 12, the remnant of the original House bill, makes further changes (in addition to those enacted last year at section 4, Ch. 83, SLA 1979) relative to the term of office of a borough assembly member. The principal operative amendment is the underscored language at page 5, lines 24 and 25, by which an exception to the date mandated for the start of the term of office of a borough assembly member may be made by a borough by charter or ordinance. The additional change -- the inclusion of new language in subsection (a) and the deletion of the second sentence of subsection (b) -- represents an attempt to make it clear that, except when required by a change in apportionment, the term of office of a member of a borough assembly may not be altered by action of the assembly, thus precluding foreshortening or extension of terms. AS 29.-23.040 is binding on home rule governments by AS 29.13.100(3), re-enacted in sec. 1 of this bill. This change is given immediate effect in order to avoid problems which may arise in certain home rule municipalities having charter provisions contrary to the law as it currently reads immediately following the October, 1980, regular municipal elections. [* Sec. 16]

RE: W.O. 8250

A sectional analysis is requested on SCS CS HB 947, the latest revised version as of this date.

Question - AS 23.025 (f) p. 3

If the commissioner determines maladjustment, what happens next? The Senate C/RA members feel the commissioner's findings should be advisory only and that there would be no legal ramifications involved. Page 4, line 14-16 -- scratch G-(3) to reflect above intent. Section 29.23.025. Judicial - should also reflect above intent.

Page 4 - change period to a semicolon and add the following, beginning in the next line:

"provided, if the change in subject to review by a federal agency, the change shall become effective with the first regular election of borough assembly members which is held more than 60 days after receipt of such agency approval of or nonobjection to the change or the expiration of the time during which the agency may object."

Above should apply to both sections (1) and (2).

Page 4, delete lines 25-29

Page 5, delete lines 1-3

Page 5, line 9, delete under AS 29.23.025

Page 5, line 22, delete borough assembly and insert "legislative body"

Page 5, end of line 22, delete "borough"

Page 5, line 23, delete "assembly"

SUBJECT: SCS CSHB 947 (Borough assemblies)

TO: Senator Arliss Sturgulewski
Chairman, Senate Community and Regional
Affairs Committee

FROM: John B. Chenoweth
Legislative Counsel

In this version (May 1), the following changes have been made to the bill designated "version 2" and dated April 22:

(1) A time limit of 60 days has been placed on the commissioner for the issuance of a decision on an appeal;

(2) The "appeal" mechanism provided in AS 29.23.025(f) has been made a prerequisite to judicial review: disgruntled citizens may not directly approach the courts without first petitioning the commissioner for review;

(3) Exemption from the provisions of AS 29.23.025 is extended to existing unified municipalities whose assemblies are elected at-large (I believe the City and Borough of Sitka may meet this test), and to existing unified municipalities where election is by district or section if the commissioner of community and regional affairs determines that the charter contains "adequate" reapportionment procedures, and so certifies (covering situations in Anchorage and Juneau: since the Anchorage charter was written to conform to AS 29.68.350(a)(2) of the 1972 Municipal Code, the procedures provided in it are almost certainly "adequate," leaving only Juneau's charter to stand the "test").

IN THE HOUSE BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

SENATE CS FOR CS FOR HOUSE BILL NO. 947

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to borough assemblies and amending the apportionment requirements of charters of unified municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.13.100(3) is repealed and re-enacted to read:

(3) AS 29.23.021 (borough assembly composition and apportionment), and AS 29.23.040 - 29.23.050 (borough assembly members)

* Sec. 2. AS 29.18.050(4) is amended to read:

(4) composition and apportionment of the assembly or council [, BUT THE NUMBER OF MEMBERS OF A BOROUGH ASSEMBLY MAY NOT EXCEED 11];

* Sec. 3. AS 29.23.021(b) is amended to read:

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of members and apportioned as set out in the incorporation petition approved by the voters. If the borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with the requirements of this section [AS 29.23.023] and prescribed by charter or ordinance.

* Sec. 4. AS 29.23.021 is amended by adding a new subsection to read:

(d) A member of the assembly of a borough may not be elected or appointed by and from the council of a city in the borough.

* Sec. 5. AS 29.23.025(a) is amended to read:

(a) Within two [NOT LATER THAN JULY 31, 1981, AND THEREAFTER

WITHIN FOUR] months after the official report of a federal decennial census, the borough assembly shall determine and declare by resolution if the existing apportionment of the assembly meets the applicable standards of AS 29.23.021 [AS 29.23.021 - 29.23.023].

* Sec. 6. AS 29.23.025(b) is amended to read:

(b) If the existing apportionment of the borough assembly does not meet the applicable standards of AS 29.23.021 [AS 29.23.021 - 29.23.023], the assembly shall provide by ordinance for its reapportionment. At the same time, the borough assembly may, by ordinance, change the composition of the assembly.

* Sec. 7. AS 29.23.025(c) is amended to read:

(c) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide by ordinance for its reapportionment and may provide, by ordinance, for a change in its composition whenever it determines, on the basis of federal census reports or other reliable population data, that the existing apportionment does not meet the standards for apportionment in AS 29.23.-021. If a petition signed by not less than 50 registered [BOROUGH] voters who are residents of the borough requests the borough assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.23.021, and the petition contains evidence that the existing apportionment does not meet those standards, the assembly may [SHALL] make the determination requested. The borough assembly shall make a determination when required by this subsection within two months of its receipt of a petition which meets the requirements of this subsection.

* Sec. 8. AS 29.23.025(e) is amended to read:

(e) Within six [FOUR] months of a determination by the borough assembly that the current apportionment does not meet the standards of

AS 29.23.021 [AS 29.23.021 - 29.23.025], the borough assembly shall adopt an ordinance providing for reapportionment, and submit the ordinance to the voters. If, at the end of the six-month [FOUR-MONTH] time period, an ordinance providing for reapportionment has not been approved by the voters, the commissioner of the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards of AS 29.23.021 [AS 29.23.021 - 29.23.023] by preparing an order of reapportionment and delivering the order to the borough mayor.

* Sec. 9. AS 29.23.025(f) is repealed and re-enacted to read:

(f) A reapportionment ordinance approved by the voters, or a determination of the borough assembly that the standards of AS 29.23.021 do not require a change in apportionment, may be appealed to the commissioner of the Department of Community and Regional Affairs. Fifty registered voters who are residents of the borough may submit a petition to the commissioner of community and regional affairs requesting the commissioner to determine whether the proposed reapportionment ordinance approved by the voters meets the standards of AS 29.23.021, or whether a determination of the borough assembly that the standards of AS 29.23.021 do not require a change of apportionment is correct. If the petition asks the commissioner of community and regional affairs to review an ordinance approved by the voters under (e) of this section, the petition shall be delivered to the commissioner not later than 20 days after certification of the election. If the petition asks the commissioner of community and regional affairs to review a determination of the borough assembly under (c) of this section, the petition shall be delivered to the commissioner within 20 days of the determination of the borough assembly. The commissioner of community and regional affairs shall review the petition and may make the determination requested. The

commissioner of community and regional affairs shall provide copies of his decision to the persons petitioning for appeal and to borough officials not later than 60 days after he receives the petition.

* Sec. 10. AS 29.23.025(g) is amended to read:

(g) A change in assembly apportionment or composition under this section is effective beginning with the first regular election for members of the assembly which is held more than 60 days after the latest of the following:

(1) approval of the reapportionment ordinance by the voters under (e) of this section;

(2) the delivery to the mayor of the reapportionment order of the commissioner of community and regional affairs under (e) of this section; or

(3) a final determination of the commissioner of community and regional affairs of an appeal under (f) of this section approving a revised [FOLLOWS APPROVAL OF A] reapportionment ordinance.

* Sec. 11. AS 29.23.025 is amended by adding new subsections to read:

(h) Each of the following is subject to judicial review:

(1) a reapportionment order of the commissioner of community and regional affairs made under (e) of this section; and

(2) a decision of the commissioner of community and regional affairs on an appeal made under (f) of this section.

(i) The provisions of this section apply to

(1) a home rule and a general law borough;

(2) a unified municipality incorporated under AS 29.68.240 - 29.68.440 before the effective date of this section, unless

(A) election of members of the assembly of a unified municipality occurs at large; or

(B) the commissioner of community and regional affairs

determines, not later than February 1, 1981, that the charter of the unified municipality contains procedures by which to apportion election districts or sections.

* Sec. 12. AS 29.23.040 is amended to read:

Sec. 29.23.040. REGULAR TERM OF OFFICE. (a) Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. Except when otherwise required by a change of apportionment under AS 29.23.025, if the term of an assemblyman is changed by charter or ordinance, the term of an assemblyman holding office at the time the change takes effect is not affected by that change.

(b) The regular term of office begins on the first Monday following certification of the election, unless a different date is prescribed by borough charter or ordinance. [THE CURRENT TERM OF INCUMBENT ASSEMBLYMEN MAY NOT BE ALTERED UNDER THIS SECTION.]

(c) This section applies to home rule and general law boroughs.

* Sec. 13. AS 29.68.350(a)(2) is repealed and re-enacted to read:

(2) provisions for

(A) the establishment of service areas; and

(B) the establishment of districts or sections for the election of members of the borough assembly, if election of borough assembly members is not areawide, and procedures by which to reapportion the election districts or sections;

* Sec. 14. AS 29.23.023 is repealed.

* Sec. 15. Sections 1 - 11, 13, and 14 of this Act take effect January 1, 1981.

* Sec. 16. Sections 12, 15 and 16 of this Act take effect immediately in accordance with AS 01.10.070(c).

(2) a. ORGANIZATIONAL SUPPORT FOR BILL		(2) b. ORGANIZATIONAL OPPOSITION TO BILL

(3) PROGRAM EFFECTS OF BILL

This bill would give home rule and general law boroughs the power to establish the date a newly elected assemblyman's term begins. Under current law, the term of office must begin on the first Monday following certification of the election.

The committee substitute adds the provision an assemblyman is not affected if his term is changed while he is holding office. He would complete the term for which he was elected.

Prime Sponsor (First Legislator Named)

33-001 (Rev. 12/79)

I wish to also point out a further minor problem. A.S. 29.23.~~130~~ 140 (c) as amended last year (and applicable to Home Rule Municipalities) has the term of office of new Assembly men begin ". . . . on the first Monday following Certification of the Election."

There are two problems with this in Sitka, First: The former practice in Sitka has been for the election to be certified at the next regular Assembly meeting following the election. Following certification, the new members are sworn in and take their seats. Under this new procedure, we would have to call a Special meeting the Monday following certification merely to swear in new members.

Second: The Mayor (while having no special powers in Sitka) may continue to be sworn into office at the meeting where the election is certified since the Legislative enactments covering the beginning of Mayors' terms are not made applicable to Home Rule Municipalities. That's also going to look real funny to the voters if we swear in a new Mayor at one meeting but have to wait until the next Monday to swear in the rest of the new Assembly members.

I wish that your collegues would someday quit poking the Legislative stick in the eye of the Home Rule Municipality and stop creating problems where none existed before.

I realize that my comments would have been more helpful if they had been made prior to passage of these Statutes, however, I am sure none of us realized the potential problems at that time.

If I can be of any aid to you, please let me know.

Sincerely,

Peter S. Hallgren
Municipal Attorney

cc: Senator Pete Meland

City and Borough of Sitka

P.O. BOX 79 · SITKA, ALASKA · 99835

February 25, 1980

Representative Richard Eliason
Pouch V
Juneau, Alaska 99811

Dear Representative Eliason:

It has recently been brought to our attention by Assembly member, Roberley Potter, that A.S. 29.23.023 was enacted last year. Unless amended, this statute will have many unintended effects on Sitka. Chief among these effects would be to cost the municipality money and to hold both the Assembly and the State Legislature up to ridicule.

29.23.023 (which applies to Home Rule Municipalities) provides that by July 31, 1981, all municipalities must hold an election and present to the voters various local apportionment schemes for Assembly representation.

In Sitka, since unification in 1971, all Assembly members have been elected at large; however, this law would require the City to spend a fair amount of time and money coming up with proposed election districts (containing equal populations) and to have a vote on the whole mess.

It seems obvious to me, at least, that the real purpose of the statute is to force various municipalities around the State which do have election districts to review them and to also give the citizens the right to vote for area-wide representation.

I don't believe that places already having area-wide representation were really intended to be covered by this Statute.

The Statute should be amended to allow for such an exemption or we're all going to have fun explaining why we are going through such an expensive waste of time in Sitka.

Could you please investigate this situation and consider sponsoring legislation to exempt municipalities like Sitka which already provide area-wide Assembly representation?

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

SENATE CS FOR CS FOR HOUSE BILL NO. 947

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to borough assemblies; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.18.050(4) is amended to read:

(4) composition and apportionment of the assembly or council [, BUT THE NUMBER OF MEMBERS OF A BOROUGH ASSEMBLY MAY NOT EXCEED 11];

* Sec. 2. AS 29.23.021(b) is amended to read:

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of members and apportioned as set out in the incorporation petition approved by the voters. If the borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with the requirements of this section [AS 29.23.023] and prescribed by charter or ordinance.

* Sec. 3. AS 29.23.021 is amended by adding a new subsection to read:

(d) A member of the assembly of a borough may not be elected or appointed by and from the council of a city in the borough.

* Sec. 4. AS 29.23.025(a) is amended to read:

(a) Within two [NOT LATER THAN JULY 31, 1981, AND THEREAFTER WITHIN FOUR] months after the official report of a federal decennial census, the assembly shall determine and declare by resolution if the existing apportionment of the assembly meets the applicable standards of AS 29.23.021 [AS 29.23.021 - 29.23.023].

* Sec. 5. AS 29.23.025(b) is amended to read:

(b) If the existing apportionment of the assembly does not meet the applicable standards of AS 29.23.021 [AS 29.23.021 - 29.23.023], the assembly shall provide by ordinance for its reapportionment. At the same time, the assembly may, by ordinance, change the composition of the assembly.

* Sec. 6. AS 29.23.025(c) is amended to read:

(c) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide by ordinance for its reapportionment and may provide, by ordinance, for a change in its composition whenever it determines, on the basis of federal census reports or other reliable population data, that the existing apportionment does not meet the standards for apportionment in AS 29.23.021. If a petition signed by not less than 50 registered [BOROUGH] voters who are residents of the borough requests the assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.23.021, and the petition contains evidence that the existing apportionment does not meet those standards, the assembly may [SHALL] make the determination requested. The assembly shall make a determination when required by this subsection within two months of its receipt of a petition which meets the requirements of this subsection.

* Sec. 7. AS 29.23.025(e) is amended to read:

(e) Within six [FOUR] months of a determination by the assembly that the current apportionment does not meet the standards of AS 29.23.-021 [AS 29.23.021 - 29.23.025], the assembly shall adopt an ordinance providing for reapportionment, and submit the ordinance to the voters. If, at the end of the six-month [FOUR-MONTH] time period, an ordinance providing for reapportionment has not been approved by the voters, the commissioner of the Department of Community and Regional Affairs shall

provide for the reapportionment in accordance with the standards of AS 29.23.021 [AS 29.23.021 - 29.23.023] by preparing an order of reapportionment and delivering the order to the borough mayor.

* Sec. 8. AS 29.23.025(f) is repealed and re-enacted to read:

(f) A reapportionment ordinance approved by the voters, or a determination of the borough assembly that the standards of AS 29.23.021 do not require a change in apportionment, may be appealed to the commissioner of the Department of Community and Regional Affairs. If, within 10 days after certification of the election held under (e) of this section, 50 registered voters who are residents of the borough submit a petition to the commissioner of community and regional affairs requesting the commissioner to determine whether the proposed reapportionment ordinance approved by the voters does not meet the standards of AS 29.23.021, or a determination of the borough assembly that the standards of AS 29.23.021 do not require a change of apportionment, the commissioner shall review the petition and may make the determination requested. shall ? timelimit?

* Sec. 9. AS 29.23.025(g) is amended to read:

(g) A change in assembly apportionment or composition under this section is effective beginning with the first regular election for members of the assembly which is held more than 60 days after the latest of the following:

(1) approval of the reapportionment ordinance by the voters under (e) of this section;

(2) the delivery to the mayor of the reapportionment order of the commissioner of community and regional affairs under (e) of this section; or

(3) a final determination of the commissioner of community and regional affairs of an appeal under (f) of this section approving

a revised [FOLLOWS APPROVAL OF A] reapportionment ordinance.

* Sec. 10. AS 29.23.025 is amended by adding a new subsection to read:

(h) Each of the following is subject to judicial review:

(1) a reapportionment ordinance approved by the voters under (e) of this section;

(2) a determination by the borough assembly under (c) of this section that the standards of AS 29.23.021 do not require a change in apportionment;

(3) a reapportionment order of the commissioner of community and regional affairs made under (e) of this section; and

(4) a decision of the commissioner of community and regional affairs on an appeal made under (f) of this section.

* Sec. 11. AS 29.23.040 is amended to read:

Sec. 29.23.040. REGULAR TERM OF OFFICE. (a) Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. Except when otherwise required by a change of apportionment under AS 29.23.025, if the term of an assemblyman is changed by charter or ordinance, the term of an assemblyman holding office at the time the change takes effect is not affected by that change.

(b) The regular term of office begins on the first Monday following certification of the election, unless a different date is prescribed by borough charter or ordinance. [THE CURRENT TERM OF INCUMBENT ASSEMBLYMEN MAY NOT BE ALTERED UNDER THIS SECTION.]

(c) This section applies to home rule and general law boroughs.

* Sec. 12. AS 29.23.023 is repealed.

* Sec. 13. Sections 1 - 10 and 12 of this Act take effect January 1, 1981.

* Sec. 14. Sections 11, 13 and 14 of this Act take effect immediately in

accordance with AS 01.10.070(c).

repealed by sec. 21 [24] of ch. 83, SLA 1979. of ch. 83, SLA 1979."

Sec. 29.23.021. Assembly composition and apportionment [Effective January 1, 1981]. (a) Assembly composition and apportionment shall be consistent with the equal representation standards of the Constitution of the United States.

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of members and apportioned as set out in the incorporation petition approved by the voters. If the borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with AS 29.23.029 and prescribed by charter or ordinance.

(c) An assembly may not provide for weighted voting. (§ 1 ch 83 SLA 1979)

(d)

Effective date. — Section 27, ch. 83, SLA 1979, makes this section effective January 1, 1981.

Editor's note. — Section 26, ch. 83, SLA 1979, effective June 2, 1979, provides: "Notwithstanding AS 29.23.040, amended by sec. 4 of ch. 83, SLA 1979, the terms of office of borough assemblymen elected or appointed to dual borough assembly-city council seats are not affected by the amendment made to AS 29.23.040 in sec. 4 of ch. 83, SLA 1979 until reapportionment of the borough assembly is required or proposed under AS 29.23.020, repealed by sec. 21 [24] of ch. 83, SLA 1979, or is effected as required or proposed under AS 29.23.021 — 29.23.025, added by sec. 1 of ch. 83, SLA 1979."

Statute superseded home-rule enactments. — See Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2210), 528 P.2d 450 (1974), decided under former AS 29.23.020.

Sec. 29.23.023. Composition and representation requirements for general law boroughs [Effective January 1, 1981]. (a) The borough assembly shall provide for its composition and for the form of its representation. Not later than July 31, 1981, and thereafter within four months after the report of a federal decennial census, the assembly shall propose and submit to the voters at a regular election or special election called for the purpose, alternative forms of representation by which members are

(1) elected at large by all qualified voters of the borough;

(2) elected at large by all qualified voters of the borough, but required to live within an election district or zone established by the borough for election of assembly members, with each district or zone being of substantially equal population; or

(3) elected by and from election districts or zones established by the borough for the election of borough assembly members.

(b) The proposals set out in (a) of this section shall be submitted to the voters. The vote on the proposals submitted to the voters shall be tabulated in two separate classifications. One classification shall consist of all votes cast in the first class and home rule cities in the borough.

The other classification shall consist of all votes cast in the remaining area of the borough. The borough assembly shall, within three months of the certification of the results of the election adopt an ordinance providing for its composition and the form of representation which conforms to the form of representation receiving a plurality of the votes in each classification at that election.

(c) A member of the assembly of a general law borough may not be elected or appointed by and from the council of a city in the borough. (§ 1 ch 83 SLA 1979)

Effective date. — Section 27, ch. 83, SLA 1979, makes this section effective January 1, 1981.

Editor's note. — Section 26, ch. 83, SLA 1979, effective June 2, 1979, provides: "Notwithstanding AS 29.23.040, amended by sec. 4 of ch. 83, SLA 1979, the terms of office of borough assemblymen elected or appointed to dual borough assembly-city council seats are not affected by the amendment made to AS 29.23.040 in sec. 4 of ch. 83, SLA 1979 until reapportionment of the borough assembly is required or proposed under AS 29.23.020, repealed by sec. 21 [24] of ch. 83, SLA 1979, or is effected as required or proposed under AS 29.23.021 — 29.23.025, added by sec. 1 of ch. 83, SLA 1979."

Sec. 29.23.025. Assembly recomposition and reapportionment [Effective January 1, 1981]. (a) ~~Not later than July 31, 1981, and thereafter~~ Within four months after the official report of a federal decennial census, the assembly shall determine and declare by resolution if the existing apportionment of the assembly meets the applicable standards of AS 29.23.021. ~~— 29.23.023.~~

(b) If the existing apportionment of the assembly does not meet the applicable standards of AS 29.23.021 — 29.23.023, the assembly shall provide by ordinance for its reapportionment. At the same time, the assembly may change the composition of the assembly.

(c) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide by ordinance for its reapportionment and may provide for a change in its composition whenever it determines, on the basis of federal census reports or other reliable population data, that the existing apportionment does not meet the standards for apportionment in AS 29.23.021. If a petition signed by not less than 50 borough voters requests the assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.23.021, and the petition contains evidence that the existing apportionment does not meet those standards, the assembly shall make the determination requested.

(d) An ordinance adopted by the assembly under (b) or (c) of this section shall be submitted to the voters for approval. In order for the ordinance to be approved it must receive the approval of a majority of the votes cast.

(e) Within four months of a determination by the assembly that the current apportionment does not meet the standards of AS 29.23.021 — 29.23.025, the assembly shall adopt an ordinance providing for

---

consolidate problem.

include this wording as part (d) in AS 29.23.021

(a) Eliminate 1st phrase, change "four" to "two", delete reference to 29.23.023

(b) Eliminate reference to 29.23.023 and add "by ordinance"

(c) Add "by ordinance" and a provision at the end requiring Dept of L+RA review if requested by petitioners.

(e) change "four" to "six"

(e) cont. change "four" to "six" and delete reference to 29.23.023.

(g) delete "which follows approval of a reapportionment ordinance" + replace with "held not sooner than sixty (60) days following approval of a reapportionment ordinance."

reapportionment, and submit the ordinance to the voters. If, at the end of the ~~four~~-month time period, an ordinance providing for reapportionment has not been approved, the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards of AS 29.23.021 —29.23.023.

(f) A reapportionment ordinance, or a determination of the borough assembly that applicable standards do not require adoption of a change in apportionment, is subject to judicial review.

(g) A change in assembly apportionment or composition under this section is effective beginning with the first regular election for members of the assembly ~~which follows approval of a reapportionment ordinance~~ held not sooner than sixty (60) days following approval of a reapportionment ordinance (§ 1 ch 83 SLA 1979)

Effective date. — Section 27, ch. 83, SLA 1979, makes this section effective January 1, 1981.

Editor's note. — Section 26, ch. 83, SLA 1979, effective June 2, 1979, provides: "Notwithstanding AS 29.23.040, amended by sec. 4 of ch. 83, SLA 1979, the terms of office of borough assemblymen elected or appointed to dual borough assembly-city council seats are not affected by the amendment made to AS 29.23.040 in sec. 4 of ch. 83, SLA 1979 until reapportionment of the borough assembly is required or proposed under AS 29.23.020, repealed by sec. 21 [24] of ch. 83, SLA 1979, or is effected as required or proposed under AS 29.23.021 — 29.23.025, added by sec. 1 of ch. 83, SLA 1979."

Statute superseded home-rule enactments. — See Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974), decided under former AS 29.23.029.

The legislature intended that all reapportionment ordinances be submitted to the electorate. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974), decided under former AS 29.23.020.

Sec. 29.23.040. Regular term of office. Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. The regular term of office begins on the first Monday following certification of the election. The current term of incumbent assemblymen may not be altered under this section. This section applies to home rule and general law boroughs. (§ 2 ch 118 SLA 1972; am § 13 ch 118 SLA 1972; am § 4 ch 83 SLA 1979)

Effect of amendment.

The 1979 amendment, effective June 2, 1979, rewrote the second sentence.

Editor's note. — Section 26, ch. 83, SLA 1979, effective June 2, 1979, provides that the terms of borough assemblymen elected or appointed to dual borough assembly-city council seats are not effected by the amendment made to AS 29.23.040 by sec. 4, ch. 83, SLA 1979 until reapportionment of the assembly is required or proposed under AS 29.23.020 or under AS 29.23.021 — 29.23.025.

Sec. 29.23.060. Procedure.

Cross reference.

As to abstaining from official action when there is a conflict of interests, see AS 29.23.555.

(1) class;

(2) name;

(3) boundaries;

(4) [Effective until January 1, 1981] composition and apportionment of the assembly or council;

[Effective January 1, 1981] composition and apportionment of the assembly or council, but the number of members of a borough assembly may not exceed 11;

(5) for a first class borough, a designation of areawide powers to be exercised;

(6) for a second class borough, a designation of areawide and nonareawide powers to be exercised;

(7) maps, documents, and other information required by the Department of Community and Regional Affairs;

(8) for first class city incorporation, the signatures and resident address of 50 permanent resident voters or of 15 per cent of the permanent resident voters within the proposed municipality, whichever is greater, based on the number who voted in the area in the last general election;

(9) for second class city incorporation, the signature and resident address of 25 permanent resident voters or of 15 per cent of the permanent resident voters within the proposed municipality, whichever is greater, based on the number who voted in the area in the last general election;

(10) for borough incorporation, the signature and resident address of 15 per cent of the permanent resident voters in each first class city and 15 per cent of voters in the area outside first class cities based on the number who voted in the respective areas in the last general election;

(11) for a city, a designation of the powers proposed by the petitioners to be exercised;

(12) a proposed operating budget for the municipality projecting sources of income and items of expenditure through the first full fiscal year of operation. (§ 2 ch 118 SLA 1972; am § 9 ch 200 SLA 1972; am § 2 ch 212 SLA 1976; am § 3 ch 83 SLA 1979)

Effect of amendments.

The 1976 amendment, effective June 21, 1976, substituted "and nonareawide powers to be exercised" for "powers to be exercised and of powers to be exercised in the area outside cities only" at the end of paragraph (6), deleted "to show that the proposed municipality meets the standards for incorporation" from the end of paragraph (7), inserted "or of 15 per cent of the permanent resident voters" in paragraph (8), added the language beginning "whichever is greater" to the end of paragraph (8), substituted "25 permanent resident voters or of 15 per cent of the permanent resident voters" for "10 permanent resident voters" in paragraph (9), added the language beginning "whichever is greater" to the end of paragraph (9), and added paragraphs (11) and (12).

The 1979 amendment, effective January 1, 1981, added "but the number of members of a borough assembly may not exceed 11" to the end of paragraph (4).

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M April 22, 1980

SUBJECT: SCS HB 947 (Borough assemblies)

TO: Senator Arliss Sturgulewski
Chairman, Senate Community and Regional Affairs Committee

FROM: John B. Chenoweth
Legislative Counsel

The proposed committee substitute version 1 is based on discussions held Friday, April 18th, with Twyla Hartsock, committee administrative assistant, and Ginny Chitwood, representing the Municipal League. The material that is new in the proposed Senate committee substitute was requested by the Municipal League and includes my additional editorial changes principally for the purposes of clarity of the procedure which is to be followed.

The proposed committee substitute version 2 is based on subsequent instructions from Twyla on Tuesday, April 22nd, in response to a request from Marilyn Miller of the Municipal League (subsequently withdrawn) asking that the provisions of AS 29.23.025 be drafted so that they apply only to home rule and general law boroughs (that is, they would not apply to unified municipalities).

The principal difference between the versions centers on the exemption, in version 2, of unified municipalities from the provisions of AS 29.23.025.

The purpose of this memo is to request committee guidance on one point. Ginny wanted language included by which, even after the voters of a borough approved a proposed change in apportionment, dissatisfied residents could still challenge the particulars of the proposed ordinance or charter change. That challenge would involve an appeal to the commissioner of community and regional affairs. Ginny's stated purpose in including the provision was to provide an alternative tc long and potentially expensive litigation on the questions

if presented to a court. I have included her suggestion in this bill draft, re-enacting AS 29.23.025(f), and removing the judicial review provision to AS 29.23.025(h). As this is written (based on Ginny's advice), a disgruntled party may either appeal to the commissioner or appeal to the court. The committee may want to redraft the provision to require the parties to appeal to the commissioner, and allow an appeal to the court only from the decision of the commissioner, assuring that the matter is administratively handled in the first instance.

yes preferable.

If it chooses to work with version 2, the committee should consider inclusion of language, probably in AS 29.23.025(i), added by sec. 11 of that version, to the effect that the provisions of AS 29.23.025 apply to a unified municipality only if that municipality does not provide by ordinance for procedures for assembly reapportionment substantially similar to the requirements of AS 29.68.350(a)(2), re-enacted in sec. 13 of the bill. If this is not included, it would be possible that one of the three unified municipalities -- Anchorage, Juneau, and Sitka -- would not provide by charter for procedures to handle reapportionment; there being no local provisions, and the provisions of state law being inapplicable, disgruntled residents could only approach the courts to handle the matter -- a situation which would be wholly inconsistent with the position stated by Ginny Chitwood in defense of the Municipal League's request to provide an alternative to long and expensive litigation. The changes made in AS 29.68.350(a)(2) by sec. 13 of the bill would apply to unified municipalities incorporated after the effective date of the bill.

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

SENATE CS FOR CS FOR HOUSE BILL NO. 947

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to borough assemblies and amending the apportionment requirements of charters of unified municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.13.100(3) is repealed and re-enacted to read:

(3) AS 29.23.021 (borough assembly composition and apportionment), and AS 29.23.040 - 29.23.050 (borough assembly members)

* Sec. 2. AS 29.18.050(4) is amended to read:

(4) composition and apportionment of the assembly or council [, BUT THE NUMBER OF MEMBERS OF A BOROUGH ASSEMBLY MAY NOT EXCEED 11];

* Sec. 3. AS 29.23.021(b) is amended to read:

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of members and apportioned as set out in the incorporation petition approved by the voters. If the borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with the requirements of this section [AS 29.23.023] and prescribed by charter or ordinance.

* Sec. 4. AS 29.23.021 is amended by adding a new subsection to read:

(d) A member of the assembly of a borough may not be elected or appointed by and from the council of a city in the borough.

* Sec. 5. AS 29.23.025(a) is amended to read:

(a) Within two [NOT LATER THAN JULY 31, 1981, AND THEREAFTER

WITHIN FOUR] months after the official report of a federal decennial census, the borough assembly shall determine and declare by resolution if the existing apportionment of the assembly meets the applicable standards of AS 29.23.021 [AS 29.23.021 - 29.23.023].

* Sec. 6. AS 29.23.025(b) is amended to read:

(b) If the existing apportionment of the borough assembly does not meet the applicable standards of AS 29.23.021 [AS 29.23.021 - 29.23.023], the assembly shall provide by ordinance for its reapportionment. At the same time, the borough assembly may, by ordinance, change the composition of the assembly.

* Sec. 7. AS 29.23.025(c) is amended to read:

(c) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide by ordinance for its reapportionment and may provide, by ordinance, for a change in its composition whenever it determines, on the basis of federal census reports or other reliable population data, that the existing apportionment does not meet the standards for apportionment in AS 29.23.-021. If a petition signed by not less than 50 registered [BOROUGH] voters who are residents of the borough requests the borough assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.23.021, and the petition contains evidence that the existing apportionment does not meet those standards, the assembly may [SHALL] make the determination requested. The borough assembly shall make a determination when required by this subsection within two months of its receipt of a petition which meets the requirements of this subsection.

* Sec. 8. AS 29.23.025(e) is amended to read:

(e) Within six [FOUR] months of a determination by the borough assembly that the current apportionment does not meet the standards of

AS 29.23.021 [AS 29.23.021 - 29.23.025], the borough assembly shall adopt an ordinance providing for reapportionment, and submit the ordinance to the voters. If, at the end of the six-month [FOUR-MONTH] time period, an ordinance providing for reapportionment has not been approved by the voters, the commissioner of the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards of AS 29.23.021 [AS 29.23.021 - 29.23.023] by preparing an order of reapportionment and delivering the order to the borough mayor.

* Sec. 9. AS 29.23.025(f) is repealed and re-enacted to read:

(f) A reapportionment ordinance approved by the voters, or a determination of the borough assembly that the standards of AS 29.23.021 do not require a change in apportionment, may be appealed to the commissioner of the Department of Community and Regional Affairs. If, within 10 days after certification of the election held under (e) of this section, 50 registered voters who are residents of the borough submit a petition to the commissioner of community and regional affairs requesting the commissioner to determine whether the proposed reapportionment ordinance approved by the voters does not meet the standards of AS 29.23.021, or a determination of the borough assembly that the standards of AS 29.23.021 do not require a change of apportionment, the commissioner shall review the petition and may make the determination requested.

* Sec. 10. AS 29.23.025(g) is amended to read:

(g) A change in assembly apportionment or composition under this section is effective beginning with the first regular election for members of the assembly which is held more than 60 days after the latest of the following:

(1) approval of the reapportionment ordinance by the voters under (e) of this section;

(2) the delivery to the mayor of the reapportionment order of the commissioner of community and regional affairs under (e) of this section; or

(3) a final determination of the commissioner of community and regional affairs of an appeal under (f) of this section approving a revised [FOLLOWS APPROVAL OF A] reapportionment ordinance.

* Sec. 11. AS 29.23.025 is amended by adding new subsections to read:

(h) Each of the following is subject to judicial review:

(1) a reapportionment ordinance approved by the voters under (e) of this section;

(2) a determination by the borough assembly under (c) of this section that the standards of AS 29.23.021 do not require a change in apportionment;

(3) a reapportionment order of the commissioner of community and regional affairs made under (e) of this section; and

(4) a decision of the commissioner of community and regional affairs on an appeal made under (f) of this section.

(i) The provisions of this section apply to a home rule and a general law borough, but do not apply to a unified municipality incorporated under AS 29.68.240 - 29.68.440.

* Sec. 12. AS 29.23.040 is amended to read:

Sec. 29.23.040. REGULAR TERM OF OFFICE. (a) Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. Except when otherwise required by a change of apportionment under AS 29.23.025, if the term of an assemblyman is changed by charter or ordinance, the term of an assemblyman holding office at the time the change takes effect is not affected by that change.

(b) The regular term of office begins on the first Monday following certification of the election, unless a different date is prescribed by borough charter or ordinance. [THE CURRENT TERM OF INCUMBENT ASSEMBLYMEN MAY NOT BE ALTERED UNDER THIS SECTION.]

(c) This section applies to home rule and general law boroughs.

* Sec. 13. AS 29.68.350(a)(2) is repealed and re-enacted to read:

(2) provisions for

(A) the establishment of service areas; and

(B) the establishment of districts for the election of members of the borough assembly, if election of borough assembly members is not areawide, and procedures by which to reapportion the election districts;

* Sec. 14. AS 29.23.023 is repealed.

* Sec. 15. Sections 1 - 11 and 14 of this Act take effect January 1, 1981.

* Sec. 16. Sections 12, 13, 15 and 16 of this Act take effect immediately in accordance with AS 01.10.070(c).

IN THE HOUSE BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

SENATE CS FOR CS FOR HOUSE BILL NO. 947

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to borough assemblies and amending the apportionment requirements of charters of unified municipalities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.13.100(3) is repealed and re-enacted to read:

(3) AS 29.23.021 (borough assembly composition and apportionment), and AS 29.23.040 - 29.23.050 (borough assembly members)

* Sec. 2. AS 29.18.050(4) is amended to read:

(4) composition and apportionment of the assembly or council [, BUT THE NUMBER OF MEMBERS OF A BOROUGH ASSEMBLY MAY NOT EXCEED 11];

* Sec. 3. AS 29.23.021(b) is amended to read:

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of members and apportioned as set out in the incorporation petition approved by the voters. If the borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with the requirements of this section [AS 29.23.023] and prescribed by charter or ordinance.

* Sec. 4. AS 29.23.021 is amended by adding a new subsection to read:

(d) A member of the assembly of a borough may not be elected or appointed by and from the council of a city in the borough.

* Sec. 5. AS 29.23.025(a) is amended to read:

(a) Within two [NOT LATER THAN JULY 31, 1981, AND THEREAFTER

WITHIN FOUR] months after the official report of a federal decennial census, the borough assembly shall determine and declare by resolution if the existing apportionment of the assembly meets the applicable standards of AS 29.23.021 [AS 29.23.021 - 29.23.023].

* Sec. 6. AS 29.23.025(b) is amended to read:

(b) If the existing apportionment of the borough assembly does not meet the applicable standards of AS 29.23.021 [AS 29.23.021 - 29.23.023], the assembly shall provide by ordinance for its reapportionment. At the same time, the borough assembly may, by ordinance, change the composition of the assembly.

* Sec. 7. AS 29.23.025(c) is amended to read:

(c) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide by ordinance for its reapportionment and may provide, by ordinance, for a change in its composition whenever it determines, on the basis of federal census reports or other reliable population data, that the existing apportionment does not meet the standards for apportionment in AS 29.23.-021. If a petition signed by not less than 50 registered [BOROUGH] voters who are residents of the borough requests the borough assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.23.021, and the petition contains evidence that the existing apportionment does not meet those standards, the assembly may [SHALL] make the determination requested. The borough assembly shall make a determination required by this subsection within two months of receipt of a petition which meets the requirements of this subsection.

* Sec. 8. AS 29.23.025(e) is amended to read:

(e) Within six [FOUR] months of a determination by the borough assembly that the current apportionment does not meet the standards of AS 29.23.021 [AS 29.23.021 - 29.23.025], the borough assembly shall

adopt an ordinance providing for reapportionment, and submit the ordinance to the voters. If, at the end of the six-month [FOUR-MONTH] time period, an ordinance providing for reapportionment has not been approved by the voters, the commissioner of the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards of AS 29.23.021 [AS 29.23.021 - 29.23.023] by preparing an order of reapportionment and delivering the order to the borough mayor.

* Sec. 9. AS 29.23.025(f) is repealed and re-enacted to read:

(f) A reapportionment ordinance approved by the voters, or a determination of the borough assembly that the standards of AS 29.23.021 do not require a change in apportionment, may be appealed to the commissioner of the Department of Community and Regional Affairs. Fifty registered voters who are residents of the borough may submit a petition to the commissioner of community and regional affairs requesting the commissioner to determine whether the proposed reapportionment ordinance approved by the voters meets the standards of AS 29.23.021, or whether a determination of the borough assembly that the standards of AS 29.23.021 do not require a change of apportionment is correct. If the petition asks the commissioner of community and regional affairs to review an ordinance approved by the voters under (e) of this section, the petition shall be delivered to the commissioner not later than 20 days after certification of the election. If the petition asks the commissioner of community and regional affairs to review a determination of the borough assembly under (c) of this section, the petition shall be delivered to the commissioner within 20 days of the determination of the borough assembly. The commissioner of community and regional affairs shall review the petition and may make the determination requested. The determination of the commissioner of community and regional affairs is

advisory. The commissioner shall provide copies of his advisory determination to the persons petitioning for appeal and to borough officials not later than 60 days after he receives the petition.

* Sec. 10. AS 29.23.025(g) is amended to read:

(g) A change in assembly apportionment or composition under this section is effective beginning with the first regular election for members of the assembly which is held more than 60 days after the later of:

(1) approval of the reapportionment ordinance by the voters under (e) of this section; or

(2) the delivery to the mayor of the reapportionment order of the commissioner of community and regional affairs under (e) of this section [FOLLOWS APPROVAL OF A REAPPORTIONMENT ORDINANCE].

* Sec. 11. AS 29.23.025 is amended by adding new subsections to read:

(h) Each of the following is subject to judicial review:

(1) a reapportionment ordinance approved by the voters under (e) of this section;

(2) a determination by the borough assembly under (c) of this section that the standards of AS 29.23.021 do not require a change in apportionment; and

(3) a reapportionment order of the commissioner of community and regional affairs made under (e) of this section.

(i) The provisions of this section apply to a home rule or general law borough, ~~but do not apply to a unified municipality incorporated under AS 29.68.240 - 29.68.440.~~

(j) The provisions of (g) of this section do not apply to a borough in which a change in assembly composition or apportionment is subject to review and approval or determination of nonobjection by the Attorney General of the United States under the Voting Rights Act of

1965, as amended (42 U.S.C. 1971 - 1974). A change in assembly composition or apportionment subject to review under the Voting Rights Act of 1965, as amended, is effective beginning with the first regular election for members of the assembly which is held more than 60 days after

(1) receipt by the borough assembly of approval by the Attorney General of the United States of the proposed change in the composition or apportionment of the assembly;

(2) receipt by the borough assembly of a statement of non-objection from the Attorney General of the United States to the proposed change in the composition or apportionment of the assembly; or

(3) the last day on which the Attorney General of the United States may review a proposed change in the composition or apportionment of the assembly.

* Sec. 12. AS 29.23.040 is amended to read:

Sec. 29.23.040. REGULAR TERM OF OFFICE. (a) Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. Except when otherwise required by a change of apportionment, if the term of an assemblyman is changed by charter or ordinance, the term of an assemblyman holding office at the time the change takes effect is not affected by that change.

(b) The regular term of office begins on the first Monday following certification of the election, unless a different date is prescribed by borough charter or ordinance. [THE CURRENT TERM OF INCUMBENT ASSEMBLYMEN MAY NOT BE ALTERED UNDER THIS SECTION.]

(c) This section applies to home rule and general law boroughs.

* Sec. 13. AS 29.68.350(a)(2) is repealed and re-enacted to read:

(2) provisions for

(A) the establishment of service areas; and

(B) the establishment of districts or sections for the election of members of the legislative body of the unified municipality, if election of members of the legislative body is not areawide, and procedures by which to reapportion the election districts or sections;

* Sec. 14. AS 29.23.023 is repealed.

* Sec. 15. Sections 1 - 11, 13, and 14 of this Act take effect January 1, 1981.

* Sec. 16. Sections 12, 15 and 16 of this Act take effect immediately in accordance with AS 01.10.070(c).

change to AS 29.23.021

add (d) - see next page

eliminate Sec. 29.23.023

is required or proposed under AS 29.23.020, repealed by sec. 21 [24] of ch. 83, SLA 1979, AS 29.23.021 — 29.23.025, added by sec. 1 of ch. 83, SLA 1979."

Sec. 29.23.021. Assembly composition and apportionment [Effective January 1, 1981]. (a) Assembly composition and apportionment shall be consistent with the equal representation standards of the Constitution of the United States.

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of members and apportioned as set out in the incorporation petition approved by the voters. If the borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with AS 29.23.020 and prescribed by charter or ordinance.

(c) An assembly may not provide for weighted voting. (§ 1 ch 83 SLA 1979)

(d)

Effective date. — Section 27, ch. 83, SLA 1979, makes this section effective January 1, 1981.

Editor's note. — Section 26, ch. 83, SLA 1979, effective June 2, 1979, provides: "Notwithstanding AS 29.23.040, amended by sec. 4 of ch. 83, SLA 1979, the terms of office of borough assemblymen elected or appointed to dual borough assembly-city council seats are not affected by the amendment made to AS 29.23.040 in sec. 4 of ch. 83, SLA 1979 until reapportionment of the borough assembly is required or proposed under AS 29.23.020, repealed by sec. 21 [24] of ch. 83, SLA 1979, or is effected as required or proposed under AS 29.23.021 — 29.23.025, added by sec. 1 of ch. 83, SLA 1979."

Statute superseded home-rule enactments. — See Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2213), 528 P.2d 450 (1974), decided under former AS 29.23.020.

Sec. 29.23.023. Composition and representation requirements for general law boroughs [Effective January 1, 1981]. (a) The borough assembly shall provide for its composition and for the form of its representation. Not later than July 31, 1981, and thereafter within four months after the report of a federal decennial census, the assembly shall propose and submit to the voters at a regular election or special election called for the purpose, alternative forms of representation by which members are

(1) elected at large by all qualified voters of the borough;

(2) elected at large by all qualified voters of the borough, but required to live within an election district or zone established by the borough for election of assembly members, with each district or zone being of substantially equal population; or

(3) elected by and from election districts or zones established by the borough for the election of borough assembly members.

(b) The proposals set out in (a) of this section shall be submitted to the voters. The vote on the proposals submitted to the voters shall be tabulated in two separate classifications. One classification shall consist of all votes cast in the first class and home rule cities in the borough.

The other classification shall consist of all votes cast in the remaining area of the borough. The borough assembly shall, within three months of the certification of the results of the election adopt an ordinance providing for its composition and the form of representation which conforms to the form of representation receiving a plurality of the votes in each classification at that election.

(c) A member of the assembly of a general law borough may not be elected or appointed by and from the council of a city in the borough. (§ 1 ch 83 SLA 1979)

include this wording as part (d) in AS 29.23.021

Effective date. — Section 27, ch. 83, SLA 1979, makes this section effective January 1, 1981.

Editor's note. — Section 26, ch. 83, SLA 1979, effective June 2, 1979, provides: "Notwithstanding AS 29.23.040, amended by sec. 4 of ch. 83, SLA 1979, the terms of office of borough assemblymen elected or appointed to dual borough assembly-city council seats are not affected by the amendment made to AS 29.23.040 in sec. 4 of ch. 83, SLA 1979 until reapportionment of the borough assembly is required or proposed under AS 29.23.020, repealed by sec. 21 [24] of ch. 83, SLA 1979, or is effected as required or proposed under AS 29.23.021 — 29.23.025, added by sec. 1 of ch. 83, SLA 1979."

Sec. 29.23.025. Assembly recomposition and reapportionment [Effective January 1, 1981]. (a) ~~Not later than July 31, 1981, and thereafter~~ Within four months after the official report of a federal decennial cer sus, the assembly shall determine and declare by resolution if the existing apportionment of the assembly meets the applicable standards of AS 29.23.021. ~~29.23.023.~~

(a) Eliminate 1st phrase, change "four" to "two", delete reference to 29.23.023

(b) If the existing apportionment of the assembly do s not meet the applicable standards of AS 29.23.021 — 29.23.023; the assembly shall provide by ordinance for its reapportionment. At the same time, the assembly may change the composition of the assembly.

(b) Eliminate reference to 29.23.023 and add "by ordinance"

(c) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide by ordinance for its reapportionment and may provide for a change in its composition whenever it determines, on the basis of federal census reports or other reliable population data, that the existing apportionment does not meet the standards for apportionment in AS 29.23.021. If a petition signed by not less than 50 borough voters requests the assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.23.021, and the petition contains evidence that the existing apportionment does not meet those standards, the assembly shall make the determination requested.

(c) Add "by ordinance" and a provision at the end requiring Dept of C+RA review if requested by petitioners.

(d) An ordinance adopted by the assembly under (b) or (c) of this section shall be submitted to the voters for approval. In order for the ordinance to be approved it must receive the approval of a majority of the votes cast.

(e) Within four months of a determination by the assembly that the current apportionment does not meet the standards of AS 29.23.021 — 29.23.025, the assembly shall adopt an ordinance providing for

(e) change "four" to "six"

(e) cont. change "four" to "six" and delete reference to 29.23.023.

(g) delete "which follows approval of a reapportionment ordinance" + replace with "held not sooner than sixty (60) days following approval of a reapportionment ordinance."

reapportionment, and submit the ordinance to the voters. If, at the end of the ~~four~~ six-month time period, an ordinance providing for reapportionment has not been approved, the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards of AS 29.23.021 —~~29.23.023~~.

(f) A reapportionment ordinance, or a determination of the borough assembly that applicable standards do not require adoption of a change in apportionment, is subject to judicial review.

(g) A change in assembly apportionment or composition under this section is effective beginning with the first regular election for members of the assembly ~~which follows approval of a reapportionment ordinance~~ held not sooner than sixty (60) days following approval of a reapportionment ordinance (§ 1 ch 83 SLA 1979)

Effective date. — Section 2[illegible] 83, SLA 1979, makes this section effective January 1, 1981.

Editor's note. — Section 26, ch. 83, SLA 1979, effective June 2, 1979, provides: "Notwithstanding AS 29.23.040, amended by sec. 4 of ch. 83, SLA 1979, the terms of office of borough assemblymen elected or appointed to dual borough assembly-city council seats are not affected by the amendment made to AS 29.23.040 in sec. 4 of ch. 83, SLA 1979 until reapportionment of the borough assembly is required or proposed under AS 29.23.020, repealed by sec. 21 [24] of ch. 83, SLA 1979, or is effected as required or proposed under AS 29.23.021 — 29.23.025, added by sec. 1 of ch. 83, SLA 1979."

Statute superseded home-rule enactments. — See Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974), decided under former AS 29.23.020.

The legislature intended that all reapportionment ordinances be submitted to the electorate. Roderick v. Sullivan, Sup. Ct. Op. No. 1099 (File No. 2243), 528 P.2d 450 (1974), decided under former AS 29.23.020.

Sec. 29.23.040. Regular term of office. Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. The regular term of office begins on the first Monday following certification of the election. The current term of incumbent assemblymen may not be altered under this section. This section applies to home rule and general law boroughs. (§ 2 ch 118 SLA 1972; am § 13 ch 118 SLA 1972; am § 4 ch 83 SLA 1979)

Effect of amendment.

The 1979 amendment, effective June 2, 1979, rewrote the second sentence.

Editor's note. — Section 26, ch. 83, SLA 1979, effective June 2, 1979, provides that the terms of borough assemblymen elected or appointed to dual borough assembly-city council seats are not effected by the amendment made to AS 29.23.040 by sec. 4, ch. 83, SLA 1979 until reapportionment of the assembly is required or proposed under AS 29.23.020 or under AS 29.23.021 — 29.23.025.

Sec. 29.23.060. Procedure.

Cross reference.

As to abstaining from official action when there is a conflict of interests, see AS 29.23.555.

(1) class;

(2) name;

(3) boundaries;

(4) [Effective until January 1, 1981] composition and apportionment of the assembly or council;

[Effective January 1, 1981] composition and apportionment of the assembly or council, but the number of members of a borough assembly may not exceed 11;

(5) for a first class borough, a designation of areawide powers to be exercised;

(6) for a second class borough, a designation of areawide and nonareawide powers to be exercised;

(7) maps, documents, and other information required by the Department of Community and Regional Affairs;

(8) for first class city incorporation, the signatures and resident address of 50 permanent resident voters or of 15 per cent of the permanent resident voters within the proposed municipality, whichever is greater, based on the number who voted in the area in the last general election;

(9) for second class city incorporation, the signature and resident address of 25 permanent resident voters or of 15 per cent of the permanent resident voters within the proposed municipality, whichever is greater, based on the number who voted in the area in the last general election;

(10) for borough incorporation, the signature and resident address of 15 per cent of the permanent resident voters in each first class city and 15 per cent of voters in the area outside first class cities based on the number who voted in the respective areas in the last general election;

(11) for a city, a designation of the powers proposed by the petitioners to be exercised;

(12) a proposed operating budget for the municipality projecting sources of income and items of expenditure through the first full fiscal year of operation. (§ 2 ch 118 SLA 1972; am § 9 ch 200 SLA 1972; am § 2 ch 212 SLA 1976; am § 3 ch 83 SLA 1979)

Effect of amendments.

The 1976 amendment, effective June 21, 1976, substituted "and nonareawide powers to be exercised" for "powers to be exercised and of powers to be exercised in the area outside cities only" at the end of paragraph (6), deleted "to show that the proposed municipality meets the standards for incorporation" from the end of paragraph (7), inserted "or of 15 per cent of the permanent resident voters" in paragraph (8), added the language beginning "whichever is greater" to the end of paragraph (8), substituted "25 permanent resident voters or of 15 per cent of the permanent resident voters" for "10 permanent resident voters" in paragraph (9), added the language beginning "whichever is greater" to the end of paragraph (9), and added paragraphs (11) and (12).

The 1979 amendment, effective January 1, 1981, added "but the number of members of a borough assembly may not exceed 11" to the end of paragraph (4).

Article 2. Home Rule Limitations.

Section
100. Limitation of home rule powers

Sec. 29.13.100. Limitation of home rule powers. Only the following provisions of this title apply to home rule municipalities as prohibitions on acting otherwise than as provided. They supersede existing and prohibit future home rule enactments which provide otherwise:

(3) **[Effective until January 1, 1981]** AS 29.23.020 — 29.23.050 (borough assembly representation)

[Effective January 1, 1981] AS 29.23.021; 29.23.025 — 29.23.050 (composition and apportionment of borough assembly; borough assembly recomposition and reapportionment; assembly representation)

(22) AS 29.53.010 — 29.53.400 (borough and city property taxes)

(34) AS 29.33.050, AS 29.41.010(a), AS 14.12.020(a) (responsibility for education on military reservations)

(35) AS 29.58.345 — 29.58.350 (bonded debt for school construction)

(36) AS 29.63.065 (exemption from special assessment)

(37) AS 29.33.090(d) (zoning of state land for homesite entry)

(38) AS 29.48.130(a)(12) (municipal exemption on contractor bond requirements)

(39) AS 29.33.150(b) (applicability of local platting regulations to state land in a municipality)

(am § 2 ch 32 SLA 1973; am § 43 ch 53 SLA 1973; am § 2 ch 137 SLA 1975; am § 2 ch 114 SLA 1975; am § 3 ch 218 SLA 1976; am § 4 ch 142 SLA 1977; am § 1 ch 20 SLA 1978; am § 2 ch 81 SLA 1978; am § 2 ch 83 SLA 1979; am § 1 ch 85 SLA 1979)

Effect of amendments.

The first 1973 amendment added paragraph (34).

The second 1973 amendment deleted "city representation and vote on" preceding "borough assembly" and added "representation" to the end of paragraph (3).

The 1974 amendment added paragraph (35).

The 1975 amendment added paragraph (36).

The 1976 amendment substituted "AS 29.58.345" for "AS 29.58.340" at the beginning of paragraph (35).

The 1977 amendment added paragraph (37).

The first 1978 amendment rewrote paragraph (22), which formerly read "AS 29.53.010 — 29.53.350, 29.53.400 (borough and city property tax)."

The second 1978 amendment added paragraph (38).

The first 1979 amendment, effective January 1, 1981, rewrote paragraph (3).

The second 1979 amendment, effective July 1, 1979, added paragraph (39).

As the rest of the section was not affected by the amendments, it is not set out.

Legislative committee report. — For report on ch. 53, SLA 1973 (CSHB 382), see 1973 House Journal, pp. 793, 885.

Senate CS for HB 947

* Section 1. AS 29.13.100(3) is repealed and re-enacted to read:

(3) AS 29.23.021 (borough assembly composition and apportionment), and AS 29.23.040 - 29.23.050 (borough assembly members)

* Sec. 2. AS 29.18.050(4) is amended to read:

(4) composition and apportionment of the assembly or council [, BUT THE NUMBER OF MEMBERS OF A BOROUGH ASSEMBLY MAY NOT EXCEED 11];

Article 2. Procedures.

Section		Section	
50.	Petition	100.	[Repealed]
70.	Investigation	110.	Incorporation election
80.	Report and hearing	120.	Election of initial officers
90.	Decision on municipal incorporation		

Sec. 29.18.050. Petition. Municipal incorporation is proposed by filing a petition with the Department of Community and Regional Affairs. The petition shall include the following information about the proposed municipality:

(1) class;

(2) name;

(3) boundaries;

(4) [Effective until January 1, 1981] composition and apportionment the assembly or council;

[Effective January 1, 1981] composition and apportionment of the assembly or council, but the number of members of a borough assembly may not exceed 11;

(5) for a first class borough, a designation of areawide powers to be exercised;

(6) for a second class borough, a designation of areawide and nonareawide powers to be exercised;

(7) maps, documents, and other information required by the Department of Community and Regional Affairs;

(8) for first class city incorporation, the signatures and resident address of 50 permanent resident voters or of 15 per cent of the permanent resident voters within the proposed municipality, whichever is greater, based on the number who voted in the area in the last general election;

(9) for second class city incorporation, the signature and resident address of 25 permanent resident voters or of 15 per cent of the permanent resident voters within the proposed municipality, whichever is greater, based on the number who voted in the area in the last general election;

(10) for borough incorporation, the signature and resident address of 15 per cent of the permanent resident voters in each first class city and 15 per cent of voters in the area outside first class cities based on the number who voted in the respective areas in the last general election;

(11) for a city, a designation of the powers proposed by the petitioners to be exercised;

(12) a proposed operating budget for the municipality projecting sources of income and items of expenditure through the first full fiscal year of operation. (§ 2 ch 118 SLA 1972; am § 9 ch 200 SLA 1972; am § 2 ch 212 SLA 1976; am § 3 ch 83 SLA 1979)

Effect of amendments. end of paragraph (8), substituted "25

reapportionment of the borough assembly is required or proposed under AS 29.23.020, repealed by sec. 21 [24] of ch. 83, SLA 1979, or is effected as required or proposed under AS 29.23.021 — 29.23.025, added by sec. 1 of ch. 83, SLA 1979."

Sec. 29.23.021. Assembly composition and apportionment [Effective January 1, 1981]. (a) Assembly composition and apportionment shall be consistent with the equal representation standards of the Constitution of the United States.

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of members and apportioned as set out in the incorporation petition approved by the voters. If the borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with AS 29.23.023 and prescribed by charter or ordinance.

(c) An assembly may not provide for weighted voting. (§ 1 ch 83 SLA 1979)

Effective date. — Section 27, ch. 83, SLA 1979, makes this section effective January 1, 1981.

Editor's note. — Section 26, ch. 83, SLA 1979, effective June 2, 1979, provides: "Notwithstanding AS 29.23.040, amended by sec. 4 of ch. 83, SLA 1979, the terms of office of borough assemblymen elected or appointed to dual borough assembly-city council seats are not affected by the amendment made to AS 29.23.040 in sec. 4 of ch. 83, SLA 1979 until reapportionment of the borough assembly is required or proposed under AS 29.23.020, repealed by sec. 21 [24] of ch. 83, SLA 1979, or is effected as required or proposed under AS 29.23.021 — 29.23.025, added by sec. 1 of ch. 83, SLA 1979."

Statute superseded home-rule enactments. — See Roderick v. Sullivan, Sup. Ct. Op. No. 1699 (File No. 2243), 528 P.2d 450 (1974), decided under former AS 29.23.020.

Sec. 29.23.023. Composition and representation requirements for general law boroughs [Effective January 1, 1981]. (a) The borough assembly shall provide for its composition and for the form of its representation. Not later than July 31, 1981, and thereafter within four months after the report of a federal decennial census, the assembly shall propose and submit to the voters at a regular election or special election called for the purpose, alternative forms of representation by which members are

(1) elected at large by all qualified voters of the borough;

(2) elected at large by all qualified voters of the borough, but required to live within an election district or zone established by the borough for election of assembly members, with each district or zone being of substantially equal population; or

(3) elected by and from election districts or zones established by the borough for the election of borough assembly members.

(b) The proposals set out in (a) of this section shall be submitted to the voters. The vote on the proposals submitted to the voters shall be tabulated in two separate classifications. One classification shall consist of all votes cast in the first class and home rule cities in the borough.

* Sec. 3. AS 29.23.021(b) is amended to read:

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of members and apportioned as set out in the incorporation petition approved by the voters. If the borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with the requirements of this section [AS 29.23.023] and prescribed by charter or ordinance.

* Sec. 4. AS 29.23.021 is amended by adding a new subsection to read:

(d) A member of the assembly of a borough may not be elected or appointed by and from the council of a city in the borough.

* Sec. 14. AS 29.23.023 is repealed.

* Sec. 5. AS 29.23.025(a) is amended to read:

(a) Within two [NOT LATER THAN JULY 31, 1981, AND THEREAFTER WITHIN FOUR] months after the official report of a federal decennial census, the borough assembly shall determine and declare by resolution if the existing apportionment of the assembly meets the applicable standards of AS 29.23.021 [AS 29.23.021 - 29.23.023].

* Sec. 6. AS 29.23.025(b) is amended to read:

(b) If the existing apportionment of the borough assembly does not meet the applicable standards of AS 29.23.021 [AS 29.23.021 - 29.23.023] the assembly shall provide by ordinance for its reapportionment. At the same time, the borough assembly may, by ordinance, change the composition of the assembly.

* Sec. 7. AS 29.23.025(c) is amended to read:

(c) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide by ordinance for its reapportionment and may provide, by ordinance, for a change in its composition whenever it determines, on the basis of federa census reports or other reliable population data, that the existing apportionment does not meet the standards for apportionment in AS 29.23.021. If a petition signed by not less than 50 registered [BOROUGH] voters who are residents of the borough requests the borough assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.23.021, and the petition contains evidence that the existing apportionment does not meet those standards, the assembly may [SHALL] make the determination requested. The borough assembly shal make a determination when required by this subsection within two months of its receipt of a petition which meets the requirements of this subsec tion.

The other classification shall consist of all votes cast in the remaining area of the borough. The borough assembly shall, within three months of the certification of the results of the election adopt an ordinance providing for its composition and the form of representation which conforms to the form of representation receiving a plurality of the votes in each classification at that election.

(c) A member of the assembly of a general law borough may not be elected or appointed by and from the council of a city in the borough. (§ 1 ch 83 SLA 1979)

Effective date. — Section 27, ch. 83, SLA 1979, makes this section effective January 1, 1981.

Editor's note. — Section 26, ch. 83, SLA 1979, effective June 2, 1979, provides: "Notwithstanding AS 29.23.040, amended by sec. 4 of ch. 83, SLA 1979, the terms of office of borough assemblymen elected or appointed to dual borough assembly-city council seats are not affected by the amendment made to AS 29.23.040 in sec. 4 of ch. 83, SLA 1979 until reapportionment of the borough assembly is required or proposed under AS 29.23.020, repealed by sec. 21 [24] of ch. 83, SLA 1979, or is effected as required or proposed under AS 29.23.021 — 29.23.025, added by sec. 1 of ch. 83, SLA 1979."

Sec. 29.23.025. Assembly recomposition and reapportionment [Effective January 1, 1981]. (a) Not later than July 31, 1981, and thereafter within four months after the official report of a federal decennial census, the assembly shall determine and declare by resolution if the existing apportionment of the assembly meets the applicable standards of AS 29.23.021 — 29.23.023.

(b) If the existing apportionment of the assembly does not meet the applicable standards of AS 29.23.021 — 29.23.023, the assembly shall provide by ordinance for its reapportionment. At the same time, the assembly may change the composition of the assembly.

(c) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide by ordinance for its reapportionment and may provide for a change in its composition whenever it determines, on the basis of federal census reports or other reliable population data, that the existing apportionment does not meet the standards for apportionment in AS 29.23.021. If a petition signed by not less than 50 borough voters requests the assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.23.021, and the petition contains evidence that the existing apportionment does not meet those standards, the assembly shall make the determination requested.

(d) An ordinance adopted by the assembly under (b) or (c) of this section shall be submitted to the voters for approval. In order for the ordinance to be approved it must receive the approval of a majority of the votes cast.

(e) Within four months of a determination by the assembly that the current apportionment does not meet the standards of AS 29.23.021 — 29.23.025, the assembly shall adopt an ordinance providing for

reapportionment, and submit the ordinance to the voters. If, at the end of the four-month time period, an ordinance providing for reapportionment has not been approved, the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards of AS 29.23.021 — 29.23.023.

(f) A reapportionment ordinance, or a determination of the borough assembly that applicable standards do not require adoption of a change in apportionment, is subject to judicial review.

(g) A change in assembly apportionment or composition under this section is effective beginning with the first regular election for members of the assembly which follows approval of a reapportionment ordinance. (§ 1 ch 83 SLA 1979)

Census Figures Available next April

Sec. 8. AS 29.23.025(e) is amended to read:

(e) Within six [FOUR] months of a determination by the borough assembly that the current apportionment does not meet the standards of AS 29.23.021 [AS 29.23.021 - 29.23.025], the borough assembly shall adopt an ordinance providing for reapportionment, and submit the ordinance to the voters. If, at the end of the six-month [FOUR-MONTH] time period, an ordinance providing for reapportionment has not been approved by the voters, the commissioner of the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards of AS 29.23.021 [AS 29.23.021 - 29.23.023] by preparing an order of reapportionment and delivering the order to the borough mayor.

* If it Fails — Existing law —

Sec. 9. AS 29.23.025(f) is repealed and re-enacted to read:

(f) A reapportionment ordinance approved by the voters, or a determination of the borough assembly that the standards of AS 29.23.021 do not require a change in apportionment, may be appealed to the commissioner of the Department of Community and Regional Affairs. Fifty registered voters who are residents of the borough may submit a petition to the commissioner of community and regional affairs requesting the commissioner to determine whether the proposed reapportionment ordinance approved by the voters meets the standards of AS 29.23.021, or whether a determination of the borough assembly that the standards of AS 29.23.021 do not require a change of apportionment is correct. If the petition asks the commissioner of community and regional affairs to review an ordinance approved by the voters under (e) of this section, the petition shall be delivered to the commissioner not later than 20 days after certification of the election. If the petition asks the commissioner of community and regional affairs to review a determination of the borough assembly under (c) of this section, the petition shall be delivered to the commissioner within 20 days of the determination of the borough assembly. The commissioner of community and regional affairs shall review the petition and may make the determination requested. The commissioner of community and regional affairs shall provide copies or his decision to the persons petitioning for appeal and to borough officials not later than 60 days after he receives the petition.

* Sec. 10. AS 29.23.025(g) is amended to read:

(g) A change in assembly apportionment or composition under this section is effective beginning with the first regular election for members of the assembly which is held more than 60 days after the latest of the following:

(1) approval of the reapportionment ordinance by the voters under (e) of this section;

(2) the delivery to the mayor of the reapportionment order of the commissioner of community and regional affairs under (e) of this section; or

(3) a final determination of the commissioner of community and regional affairs of an appeal under (f) of this section approving a revised [FOLLOWS APPROVAL OF A] reapportionment ordinance.

* Sec. 11. AS 29.23.025 is amended by adding new subsections to read:

... (h) Each of the following is subject to judicial review:

(1) a reapportionment order of the commissioner of community and regional affairs made under (e) of this section; and

(2) a decision of the commissioner of community and regional affairs on an appeal made under (f) of this section.

(i) The provisions of this section apply to

(1) a home rule and a general law borough;

(2) a unified municipality incorporated under AS 29.68.240 - 29.68.440 before the effective date of this section, unless

(A) election of members of the assembly of a unified municipality occurs at large; or

(B) the commissioner of community and regional affairs determines, not later than February 1, 1981, that the charter of the unified municipality contains procedures by which to apportion election districts or sections.

Sec. 29.23.040. Regular term of office. Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. The regular term of office begins on the first Monday following certification of the election. The current term of incumbent assemblymen may not be altered under this section. This section applies to home rule and general law boroughs. (§ 2 ch 118 SLA 1972; am § 13 ch 118 SLA 1972; am § 4 ch 83 SLA 1979)

Effect of amendment.

The 1979 amendment, effective June 2, 1979, rewrote the second sentence.

Editor's note. — Section 26, ch. 83, SLA 1979, effective June 2, 1979, provides that the terms of borough assemblymen elected or appointed to dual borough assembly-city council seats are not effected by the amendment made to AS 29.23.040 by sec. 4, ch. 83, SLA 1979 until reapportionment of the assembly is required or proposed under AS 29.23.020 or under AS 29.23.021 — 29.23.025.

* Sec. 12. AS 29.23.040 is amended to read:

Sec. 29.23.040. REGULAR TERM OF OFFICE. (a) Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. Except when otherwise required by a change of apportionment under AS 29.23.025, if the term of an assemblyman is changed by charter or ordinance, the term of an assemblyman holding office at the time the change takes effect is not affected by that change.

(b) The regular term of office begins on the first Monday following certification of the election, unless a different date is prescribed by borough charter or ordinance. [THE CURRENT TERM OF INCUMBENT ASSEMBLYMEN MAY NOT BE ALTERED UNDER THIS SECTION.]

(c) This section applies to home rule and general law boroughs.

(g) Costs, fees, and other expenses incurred by the charter commission are a debt of the borough and shall be paid upon proper verification. (§ 2 ch 118 SLA 1972)

Sec. 29.68.350. Charter preparation. (a) A charter commission established under this chapter shall prepare, adopt and submit a proposed home rule charter for the area to be unified to the voters for approval or rejection at a regular or special borough election called by the borough assembly held within 60 days of the date of publication and posting of the proposed charter as required in § 380 of this chapter. The charter shall include among its provisions:

(1) provisions for adjustment of existing bonded indebtedness and other obligations in a manner which will reserve a fair and equitable burden of taxation for debt service, subject to § 410 of this chapter;

(2) provision for the establishment of

(A) service areas;

(B) sections, if desired; and

(C) reapportionment of the sections, if established;

(3) provision for nonpartisan government and provision for the selection, organization, authority and responsibilities of the governing body and its executive and administrator;

(4) the transfer or other disposition of property and other rights, claims, assets and franchises of the local government to be unified under the charter;

(5) provision for exercise of the rights of initiative and referendum as required by AS 29.13.050;

(6) a method of amending the charter;

(7) the date on which the charter, if approved at the charter election required by § 390 of this chapter, is effective;

(8) designation of the new municipality's official name, subject to the provisions of (b) of this section;

(9) other charter provisions which the charter commission elects to include and which may be included in a home rule charter under this chapter and the state constitution.

(b) The area to be unified shall be known as a borough or a city or by some other designation consistent with existing law. (§ 2 ch 118 SLA 1972; am § 6 ch 147 SLA 1972)

Effect of amendment. — The 1972 amendment, effective September 10, 1972, deleted the language following "existing law" in subsection (b).

Sec. 29.68.360. Public hearings. Both before and after drafting the proposed charter, the charter commission shall hold a public hearing in each area of the borough represented on the borough assembly. Other public hearings may be held by the charter com-

* Sec. 13. AS 29.68.350(a)(2) is repealed and re-enacted to read:

(2) provisions for

(A) the establishment of service areas; and

(B) the establishment of districts or sections for the election of members of the borough assembly, if election of borough assembly members is not areawide, and procedures by which to reapportion the election districts or sections;

* Sec. 15. Sections 1 - 11, 13, and 14 of this Act take effect January 1, 1981.

* Sec. 16. Sections 12, 15 and 16 of this Act take effect immediately in accordance with AS 01.10.070(c).

(2) a. ORGANIZATIONAL SUPPORT FOR BILL		(2) b. ORGANIZATIONAL OPPOSITION TO BILL

(3) PROGRAM EFFECTS OF BILL

This bill would give home rule and general law boroughs the power to establish the date a newly elected assemblyman's term begins. Under current law, the term of office must begin on the first Monday following certification of the election.

The committee substitute adds the provision an assemblyman is not affected if his term is changed while he is holding office. He would complete the term for which he was elected.

Re: Borough Assembly Apportionment

Enclosed are copies of the current law on borough assembly apportionment and a draft of proposed revisions. Ron Larson, Legislative Committee Chairman, will preside at a hearing on this subject in Juneau on Friday, January 25 at 9:00 am in the Juneau Municipal Building. The purpose of the meeting is to bring all ideas together and draft a final version for presentation to the AML Board of Directors. Mayor Larson asks that you review the enclosed material. If you cannot attend the meeting, please forward your suggestions to him at the Matanuska-Susitna Borough or to the AML office.

BY THE COMMUNITY AND REGIONAL AFFAIRS COMMITTEE

HOUSE CS FOR CS FOR SENATE BILL NO. 137 am H

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the municipal code; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 29.23 is amended by adding new sections to read:

Sec. 29.23.021. ASSEMBLY COMPOSITION AND APPORTIONMENT. (a) Assembly composition and apportionment shall be consistent with the equal representation standards of the Constitution of the United States.

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of members and apportioned as set out in the incorporation petition approved by the voters If a borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with AS 29.23.-023 and prescribed by charter or ordinance.

(c) An assembly may not provide for weighted voting.

Sec. 29.23.023. COMPOSITION AND REPRESENTATION REQUIREMENTS FOR GENERAL LAW BOROUGHS. (a) The borough assembly shall provide for its composition and for the form of its representation. Not later than July 31, 1981, and thereafter within four months after the report of a federal decennial census, the assembly shall propose and submit to the voters at a regular election or special election called for the purpose alternative forms of representation by which members are

(1) elected at large by all qualified voters of the borough;

(2) elected at large by all qualified voters of the borough,

but required to live within an election district or zone established by the borough for election of assembly members, with each district or zone being of substantially equal population; or

(3) elected by and from election districts or zones established by the borough for the election of borough assembly members.

(b) The proposals set out in (a) of this section shall be submitted to the voters. The vote on the proposals submitted to the voters shall be tabulated in two separate classifications. One classification shall consist of all votes cast in the first class and home rule cities in the borough. The other classification shall consist of all votes cast in the remaining area of the borough. The borough assembly shall, within three months of the certification of the results of the election, adopt an ordinance providing for its composition and the form or representation which conforms to the form of representation receiving a plurality of the votes in each classification at that election.

(c) A member of the assembly of a general law borough may not be elected or appointed by and from the council of a city in the borough.

Sec. 29.23.025. ASSEMBLY RECOMPOSITION AND REAPPORTIONMENT. (a) Not later than July 31, 1981, and, thereafter, within four months after the official report of a federal decennial census, the assembly shall determine and declare by resolution if the existing apportionment of the assembly meets the applicable standards of AS 29.23.021 - 29.23.023.

(b) If the existing apportionment of the assembly does not meet the applicable standards of AS 29.23.021 - 29.23.023, the assembly shall provide by ordinance for its reapportionment. At the same time, the assembly may change the composition of the assembly

(c) In addition to providing for apportionment at the times required under (b) of this section, the borough assembly shall provide by

ordinance for its reapportionment and may provide for a change in its composition whenever it determines, on the basis of federal census reports or other reliable population data, that the existing apportionment does not meet the standards for apportionment in AS 29.23.021. If a petition signed by not less than 50 borough voters requests the assembly to determine whether the existing apportionment meets the standards for apportionment in AS 29.23.021, and the petition contains evidence that the existing apportionment does not meet those standards, the assembly shall make the determination requested.

(d) An ordinance adopted by the assembly under (b) or (c) of this section shall be submitted to the voters for approval. In order for the ordinance to be approved it must receive the approval of a majority of the votes cast.

(e) Within four months of a determination by the assembly that the current apportionment does not meet the standards of AS 29.23.021 - 29.23.025; the assembly shall adopt an ordinance providing for reapportionment, and submit the ordinance to the voters. If, at the end of the four month time period, an ordinance providing for reapportionment has not been approved, the Department of Community and Regional Affairs shall provide for the reapportionment in accordance with the standards of AS 29.23.021 - 29.23.023.

(f) A reapportionment ordinance, or a determination of the borough assembly that applicable standards do not require adoption of a change in apportionment, is subject to judicial review.

(g) A change in assembly apportionment or composition under this section is effective beginning with the first regular election for members of the assembly which follows approval of a reapportionment ordinance.

* Sec. 2. AS 29.13.100(3) is repealed and re-enacted to read:

(3) AS 29.23.021; 29.23.025 - 29.23.050 (composition and apportionment of borough assembly; borough assembly recomposition and reapportionment; assembly representation)

* Sec. 3. AS 29.18.050(4) is amended to read:

(4) composition and apportionment of the assembly or council, but the number of members of a borough assembly may not exceed 11;

* Sec. 4. AS 29.23.040 is amended to read:

Sec. 29.23.040. REGULAR TERM OF OFFICE. Assemblymen are selected for three-year terms and until their successors are selected and have qualified, unless different terms not exceeding four years are prescribed by borough charter or ordinance. The regular term of office begins on the first Monday following certification of the election. [HOWEVER, IF UNDER A BOROUGH APPORTIONMENT CITY COUNCILMEN ARE APPOINTED AS ASSEMBLYMEN OR ELECTED TO DUAL ASSEMBLY-COUNCIL SEATS, THEY MAY NOT BE REPLACED UNTIL THEIR ASSEMBLY TERM EXPIRES AS PROVIDED BY CITY CHARTER OR ORDINANCE, OR THEY CEASE TO BE A MEMBER OF EITHER THE ASSEMBLY OR COUNCIL.] The current term of incumbent assemblymen may not be altered under this section. This section applies to home rule and general law boroughs.

* Sec. 5. AS 29.23.130(c) is amended to read:

(c) The borough mayor's regular term of office is three years and until a successor is elected and has qualified and begins on the first Monday following certification of the mayor's [HIS] election [, WHICH IS HELD THE FIRST TUESDAY OF OCTOBER, UNLESS A DIFFERENT DATE OF ELECTION IS PROVIDED BY ORDINANCE]. The assembly may provide by ordinance for a different term not to exceed four years, except that the current term of an incumbent borough mayor may not be altered.

* Sec. 6. AS 29.23.130(d) is amended to read:

(d) A borough may adopt or abandon a manager plan at any time, as

provided in AS 29.23.410 - 29.23.480. The borough mayor may not veto an ordinance or resolution calling for an election on this question. The manager has all the powers and duties of the borough mayor as chief administrative officer. [IF THE MANAGER PLAN IS ADOPTED, IT BECOMES EFFECTIVE FOLLOWING CERTIFICATION OF THE RESULTS OF THE FIRST REGULAR ELECTION OCCURRING AT LEAST SIX MONTHS AFTER ADOPTION OF THE PLAN.] The borough mayor then serves as borough executive.

* Sec. 7. AS 29.23.200(c) is amended to read:

(c) Councilmen are selected [AN ELECTION IS HELD ANNUALLY ON THE FIRST TUESDAY OF OCTOBER, UNLESS A DIFFERENT ELECTION DATE OR INTERVAL OF YEARS IS PROVIDED BY ORDINANCE, TO CHOOSE COUNCILMEN] for three-year terms and until their successors are elected and have qualified. The regular term of office begins on the first Monday following certification of the election. The council may provide by ordinance for different terms not to exceed four years, except that the current term of incumbent councilmen may not be altered.

* Sec. 8. AS 29.23.210(a) is amended to read:

(a) The council shall meet at least once every month, unless otherwise provided by ordinance. Special meetings may be held on the call of the mayor or two councilmen upon not less than 24 hours written or oral notice communicated to each member. In an emergency a special meeting called on less than 24 hours notice is a legal meeting if all members are present or there is a quorum and all absent members have waived in writing the required notice. A waiver may be made either before or after the time of the meeting. The waiver shall be attached to and made a part of the journal for that meeting.

* Sec. 9. AS 29.23.250(c) is amended to read:

(c) The mayor of a second class city is elected by and from the council for a term of one year and until a successor is elected and

has qualified [EQUAL IN LENGTH TO A COUNCILMAN'S TERM].

* Sec. 10. AS 29.23.250(d) is amended to read:

(d) The mayor's regular term begins on the first Monday following certification of the mayor's [HIS] election [, WHICH IS HELD ON THE FIRST TUESDAY OF OCTOBER, UNLESS A DIFFERENT DATE OF ELECTION IS PROVIDED BY ORDINANCE]. The council of a second class city shall meet on the first Monday after certification of the regular election [DATE] and elect a mayor who takes office immediately.

* Sec. 11. AS 29.23.440(a) is amended to read:

(a) If the manager plan is approved, the assembly or council shall, within 60 days, adopt the plan by ordinance or resolution.

* Sec. 12. AS 29.33.010(b) is amended to read:

(b) No city, whether home rule or not, may exercise an areawide power [CONFERRED IN, OR ASSUMED BY MEANS OF AS 29.33.250 - 29.33.290] once that power is being exercised by a borough.

* Sec. 13. AS 29.33.070(b)(2) and (3) are amended to read:

(2) delegate other planning and zoning powers conferred by this chapter [ADMINISTRATIVE AND ENFORCEMENT RESPONSIBILITIES] to a [THE] city within the borough [, PROVIDED THAT BOROUGH JURISDICTION IS NOT IMPAIRED];

(3) revoke or modify any part or all of the [WITHDRAW] powers delegated under this subsection.

* Sec. 14. AS 29.33.110(a) is repealed and re-enacted to read:

(a) The assembly is the board of adjustment but may delegate by resolution or ordinance part or all of its functions to a city within the borough for the area within city boundaries in accordance with AS 29.33.070(b)(1), in addition to making delegations as provided for an assembly under AS 29.33.245. Meetings of the borough board are held at the call of the presiding officer and of the city board by the mayor.

The presiding officer or mayor may administer oaths and compel attendance of witnesses. Meetings and hearings of the board shall be open to the public and the board shall keep minutes of its proceedings as a public record.

* Sec. 15. AS 29.33.190(a) is amended to read:

(a) The owner or agent of the owner of land located within a subdivision who transfers, sells, or enters into a contract to sell land in a subdivision before a plat of the subdivision has been prepared, approved, and recorded, is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $500 for each lot or parcel transferred, sold, or included in a contract to be sold. The borough [PLATTING BOARD] may enjoin a transfer, sale, or contract to sell, and may recover the penalty by appropriate legal action.

* Sec. 16. AS 29.48.180(a) is amended to read:

(a) Each ordinance [AND RESOLUTION] after adoption shall be codified.

* Sec. 17. AS 29.48.180(c)(2) is amended to read:

(2) the ordinance is a provision which establishes a rule of conduct or behavior and which is included, or to be included, in a code of ordinances or other complete system of [POSITIVE] law enacted [PROMULGATED BY THE COUNCIL] and kept current [BY THE CITY] at reasonable intervals.

* Sec. 18. AS 29.48 is amended by adding a new section to read:

Sec. 29.48.185. RESOLUTIONS. The assembly or council shall provide for the maintenance of a permanent file of resolutions that have been adopted.

* Sec. 19. AS 29.48.200 is amended to read:

Sec. 29.48.200. PENALTIES. For the violation of an ordinance, the assembly or council may prescribe punishment not to exceed a fine of

$500 or imprisonment for 30 days, or both. However, the punishment authorized under this section may be imposed only if [AN ORDINANCE IS CODIFIED AND] copies of the ordinance are made available for distribution to the public at cost.

* Sec. 20. AS 29.58.200 is amended by adding new subsections to read:

(b) A municipality may issue its revenue bonds to finance the purchase of residential mortgage loans. The revenue bonds issued under this subsection are payable solely from the principal and interest of the mortgage loans and from any other amounts pledged by the municipality, except the pledge of revenues derived from taxes. Revenue bonds issued under this subsection do not constitute a general obligation of the municipality.

(c) A municipality may also issue revenue bonds for any lawful purpose. The bonds shall be payable from any amounts pledged by the municipality except taxes and shall not constitute general obligations of the municipality.

* Sec. 21. AS 29.58.210 is amended to read:

Sec. 29.58.210. FORMS AND TERMS. The assembly or council shall fix the date of the bonds, denominations, maturities, rate or rates of interest, place and manner of payment, redemption terms, registration privileges, manner of execution, [AND] signatures required, and other details of the bonds. If an officer whose signature appears on the bonds or coupons ceases to be an officer before delivery of the bonds, his signature is valid as if he had remained in office until delivery.

* Sec. 22. AS 29.58.220 is amended to read:

Sec. 29.58.220. PAYMENT. Bonds issued under AS 29.58.200 - 29.58.220 or the proceedings of the assembly or council authorizing their issuance may contain the covenants which the assembly or council considers advisable concerning

(1) the rates or fees to be charged for services rendered by the public facilities, the revenue of which is pledged to the payment of the bonds, or the terms and conditions of any other amounts collected which are pledged to the payment of the bonds;

(2) the deposit and use of the revenue of the public facilities or of other amounts collected which are pledged to the payment of the bonds;

(3) the issuance of additional bonds payable from revenue of the public facilities or of other amounts collected which are pledged to the payment of the bonds;

(4) the rights of the bondholders in case of default in the payment of the principal or interest on the bonds, including the appointment of a receiver to operate the public facilities;

(5) other covenants as the assembly or council determines."

* Sec. 23. AS 29.63.065(b)(2) is amended to read:

(2) a claimant receiving the exemption must file with the department by March [JANUARY] 15 of each subsequent year a separate application proving eligibility as of January 1 in order to retain the exemption. Within the same year the department [THE ASSEMBLY OR COUNCIL] for good cause shown may waive the claimant's failure to make timely application and approve the application as if timely filed.

* Sec. 24. AS 29.23.020 is repealed.

* Sec. 25. AS 29.59 is repealed.

* Sec. 26. Notwithstanding AS 29.23.040, amended by sec. 4 of this Act, the terms of office of borough assemblymen elected or appointed to dual borough assembly - city council seats are not affected by the amendment made to AS 29.25.040 in sec. 4 of this Act until reapportionment of the borough assembly is required or proposed under AS 29.23.020, repealed by sec. 21 of this Act, or is effected as required or proposed under AS 29.23.021 - 29.23.-

025, added by sec. 1 of this Act.

* Sec. 27. Sections 1 - 3 and 24 of this Act take effect January 1, 1981. Sections 4 - 23, 25 and 26 of this Act take effect immediately in accordance with AS 01.10.070(c).

Article 4. Planning, Platting and Zoning.

Section
70. Planning, platting and zoning
90. Zoning

Sec. 29.33.070. Planning, platting and zoning. (a) First and second class boroughs shall provide for planning, platting and zoning on an areawide basis.

(b) The assembly by ordinance may

(1) designate the council of a city within the borough as a board of adjustment within the city;

(2) delegate other planning and zoning administrative and enforcement responsibilities to the city, provided that borough jurisdiction is not impaired;

(3) withdraw powers delegated under this subsection. (§ 2 ch 118 SLA 1972; am § 1 ch 17 SLA 1977; am § 7 ch 93 SLA 1977)

Effect of amendments. — The first 1977 amendment, in subsection (b) deleted "If a city within a borough is located more than 25 miles from a boundary of the borough seat" from the beginning of the introductory language and substituted "a city within the borough" for "the city" in paragraph (1).

The second 1977 amendment substituted "First and second class boroughs" for "Boroughs" at the beginning of subsection (a).

Cited in Moore v. State, Sup. Ct. Op. No. 1284 (File Nos. 2551, 2587), 553 P.2d 8 (1976).

Sec. 29.33.090. Zoning. (a) In accordance with the comprehensive plan, the assembly shall regulate and restrict the use of land and improvements by districts or contract zoning to permit specific uses provided for in the contract. Regulations shall be uniform for each class or kind of building, structure, land or water area within each district, but the regulations may differ among districts and exceptions may be made in order to provide for the preservation, maintenance and protection of historic sites, buildings and monuments. In this section, "contract zoning" means a zoning reclassification to a less restricted use when the owner of the rezoned property, either through an agreement with the assembly or a covenant in favor of the borough, places restrictions on the use of the land beyond the zoning requirements generally attaching to the new district in which the property has been placed. The assembly shall hold a public hearing on the proposed contract zoning.

(d) The assembly shall regulate and restrict the use of state land within the borough which is vacant, unappropriated and unreserved and which is found suitable for classification and disposal for homesite entry under AS 38.08.010. Compliance with the provisions of this subsection is a prerequisite to issuance of homesite entry permits for land within the borough.

(am § 1 ch 104 SLA 1974; am § 3 ch 142 SLA 1977)

December 13, 1979
DRAFT

AN ACT

Relating to the composition and apportionment of borough assemblies; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Section 1: AS 29.23.021, AS 29.23.023, AS 29.23.025 are repealed.

Section 2: AS 29.23 is amended by adding new sections to read:

Sec. 29.23.021. ASSEMBLY COMPOSITION AND APPORTIONMENT.

(a) Assembly composition and apportionment shall be consistent with the equal representation standards of the Constitution of the United States.

(b) The assembly of a newly incorporated borough is, after incorporation and until the adoption of an ordinance providing for a change in composition or apportionment, composed of the number of members and apportioned as set out in the incorporation petition approved by the voters. If a borough is already incorporated, the assembly shall be composed and apportioned in a manner that is consistent with this chapter and prescribed by charter or ordinance.

(c) All assembly members shall have an equal vote with each other on all matters. Weighted or fractioned voting is prohibited.

Sec. 29.23.023. COMPOSITION AND REPRESENTATION.

(a) After the report of the 1980 Federal Decennial Census and not later than July 31, 1981, the assembly shall adopt a resolution selecting one of the following forms of representation:

1. members to be elected at large by all qualified voters of the borough;

2. members to be elected at large by all qualified voters of the borough, but required to live within an election district or zone to be thereafter established by the borough for election of assembly members, with each district or zone being of substantially equal population; or

3. members to be elected by and from election districts or zones to be thereafter established by the borough for the election of borough assembly members, with each district or zone being of substantially equal population; or

4. members to be elected by a specified combination of any of the above three forms as specified and set forth in the resolution.

(b) If the assembly fails to adopt such a resolution within the time specified the Department of Community and Regional Affairs shall be notified promptly and shall select the form of representation to be submitted to the voters for their approval under subsection (c) in the same manner as if it had been selected by the assembly.

(c) The form which is selected by the assembly shall be submitted to the voters for their approval at a regular election or special election called for that purpose within four months of the resolution. The vote on the proposal shall be tabulated in two separate classifications. One classification shall consist of all votes cast in the first class and home rule cities in the borough. The other classification shall consist of all votes cast in the remaining area of the borough. To be approved the proposed form of representation must be accepted by an affirmative vote of a majority of the qualified voters who vote on the question of approval in each classification at that election.

(d) If the form of representation selected by the assembly fails to be approved by the voters the assembly may select from among the other forms of representation and hold additional elections to seek the approval of the voters. Within four months of the certification of the results of the first election if a form of representation has not been approved, the Department of Community and Regional Affairs shall be promptly notified and shall select, within one month thereof, the form of representation to be implemented by the assembly. The Department shall notify the borough assembly of its selection at which time the assembly shall begin to implement this form of representation. Whether approved at an election or selected by the Department of Community and Regional Affairs the borough assembly shall implement that form of representation in the manner and according to the time limits provided in (e).

(e) If the form of representation approved or selected by the Department of Community and Regional Affairs is one by which assembly members are to be elected at large by all qualified voters of the borough, the borough assembly shall have two months from the date of certification of the results of the election or of notification of the selection by the Department of Community and Regional Affairs to devise and adopt an ordinance implementing that form of representation. If any other form or combination of forms of representation is approved or selected, the borough assembly shall have six months thereafter to devise and adopt an ordinance implementing such a form of representation. If the assembly does not adopt such an ordinance within the time specified the Department of Community and Regional Affairs shall devise such an ordinance within six months which shall then be adopted by the assembly.

(f) The provisions of the ordinance shall become applicable at an election to be held not later than six (6) months following the adoption of the ordinance. At such election all assembly positions shall be up for election. The borough assembly members elected at this election shall determine by lot the length of their term of office so that a proportionate number of terms expire each year, resulting in staggered terms of office for members subsequently elected.

(g) The borough assembly may change its form of representation by the procedures described in this section at such other times as it deems appropriate. The borough assembly may change the number of members of assembly by ordinance at such times as it deems appropriate. If this change affects the apportionment of the assembly it shall be accomplished according to the procedures provided for reapportionment in AS 29.23.025.

(h) A member of the assembly of a general law borough shall be elected directly by the voters to that position. A member shall not hold such position by virtue of appointment or election by the council of a city within the borough, except until the new assembly members elected at the first election held under the ordinance enacted according to subsections (a) through (f) of this section are sworn-in to office. This shall not prohibit nor preclude a member of the council of a city in the borough from being eligible for election as, and serving as a member of the assembly of that borough if so elected, nor a member of the assembly of a borough from being eligible for election as and serving as a member of the council of a city within that borough if so elected.

Sec. 29.23.025. ASSEMBLY REAPPORTIONMENT.

(a) Not later than July 31, 1981, and thereafter within two months after the official report of a Federal Decennial

with the applicable standards of AS 29.23.021. At the same time the assembly may alter its form of representation or composition.

(e) If the assembly chooses to alter the existing form of representation it shall do so according to the procedures and within the time limits described in AS 29.23.023 while concurrently effectuating the necessary change in its apportionment.

(f) If the reapportionment is to be accomplished without a change in the form of representation then the assembly shall have six (6) months to devise and adopt an ordinance which implements proper apportionment complying with the standards of AS 29.23.021. If the assembly does not adopt such an ordinance within the time specified the Department of Community and Regional Affairs shall be notified immediately and shall devise such an ordinance to accomplish proper reapportionment within six (6) months. That ordinance shall then be adopted by the assembly.

(g) The provisions of the ordinance shall become applicable at an election to be held not later than six (6) months following the adoption of the ordinance. At such election all assembly positions shall be available for election. The borough assembly members elected at this election shall determine by lot the length of their term of office so that a proportionate number of terms expire each year, resulting in staggered terms of office for members subsequently elected.

Section 3: Section 2 of this Act shall take effect on January 1, 1981. Section 1 of this Act shall take effect immediately in accordance with AS 01.10.070(c).

Census, the assembly shall determine and declare by resolution whether the existing apportionment of the assembly meets the applicable standards of AS 29.23.021. If it is determined that the existing apportionment of the assembly does not meet the applicable standards of AS 29.23.021, the assembly shall provide by ordinance for its reapportionment.

(b) The assembly shall also determine and declare by resolution whether the existing apportionment of the assembly meets the applicable standards of AS 29.23.021 within two months after being presented with evidence indicating that it does not so comply. This evidence may be presented in either of two ways. It may be presented at the initiative of the assembly or accompanying a petition which is filed with the assembly requesting such a determination. The petition must be signed by not less than fifty registered and qualified voters of the borough. The evidence presented must be based on federal census reports or other reliable population data which has been certified prior to presentation, as reliable by the Department of Community and Regional Affairs.

(c) A reapportionment moritorium shall exist for two years after the adoption of a resolution by the assembly determining that the existing apportionment does meet the applicable standards of AS 29.23.021 or after the adoption of an ordinance implementing a change in apportionment. During this period the assembly shall not accept or consider any petitions for reapportionment as described in (b), although this shall not limit or prevent reapportionment by any other methods.

(d) Upon the adoption of a resolution by the assembly declaring the existing apportionment to be improper, the assembly shall devise a new apportionment to comply

with the applicable standards of AS 29.23.021. At the same time the assembly may alter its form of representation or composition.

(e) If the assembly chooses to alter the existing form of representation it shall do so according to the procedures and within the time limits described in AS 29.23.023 while concurrently effectuating the necessary change in its apportionment.

(f) If the reapportionment is to be accomplished without a change in the form of representation then the assembly shall have six (6) months to devise and adopt an ordinance which implements proper apportionment complying with the standards of AS 29.23.021. If the assembly does not adopt such an ordinance within the time specified the Department of Community and Regional Affairs shall be notified immediately and shall devise such an ordinance to accomplish proper reapportionment within six (6) months. That ordinance shall then be adopted by the assembly.

(g) The provisions of the ordinance shall become applicable at an election to be held not later than six (6) months following the adoption of the ordinance. At such election all assembly positions shall be available for election. The borough assembly members elected at this election shall determine by lot the length of their term of office so that a proportionate number of terms expire each year, resulting in staggered terms of office for members subsequently elected.

Section 3: Section 2 of this Act shall take effect on January 1, 1981. Section 1 of this Act shall take effect immediately in accordance with AS 01.10.070(c).

January 18, 1980

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Tillion:

In accordance with the provision of House Concurrent Resolution No. 7 as amended, presented herewith is a report reviewing the progress made to provide services to the "urban" resident of the Kodiak Island Borough not residing within the City of Kodiak.

The report is a brief summary of the existing situation in Kodiak, progress that has been made this past year, and recommendations for further action to resolve the problems that still exist before water and sewer services can be provided to residents living outside the City of Kodiak boundary.

Sincerely,

Lee

Lee McAnerney

Report to the Second Session of the Eleventh Legislature Relating to Review of Services Provided to the Residents in the Kodiak Island Borough

Prepared and Submitted Pursuant
to House Concurrent Resolution No. 7AM
by the Department of Community and Regional Affairs

January 18, 1980

Background

As a result of a petition to annex a small area into the City of Kodiak the Local Boundary Commission (LBC) held two public hearings, one on December 12, 1977 and the other on May 20, 1978, to take public testimony on the annexation of a larger area to the City of Kodiak. This area included the Spruce Cape area, the Mill Bay Road area, the Monashka Bay area, and the United States Coast Guard Station. Following the public hearing the LBC recommended to the First Session of the Eleventh Legislature that all of the areas, except the Coast Guard Station, be annexed to the City of Kodiak. The Legislature disapproved this annexation by adoption of House Joint Resolution 10. The Legislature, in House Concurrent Resolution No. 7 amended, requested the Department of Community and Regional Affairs to study the various options to provide "services throughout the road system extending North and Northeast of the City of Kodiak" and to submit a report to the Legislature by January 20, 1980.

Progress to Date

During 1979, the City of Kodiak and the Kodiak Island Borough worked together to devise an acceptable compromise to provide services to the residents of Service District #1 which includes the area proposed by the LBC for annexation. The Department was kept apprised of these negotiations, and it was clear that the City and Borough wished to work its problem out without C&RA involvement.

The negotiations centered around providing water and sewer service to an area referred to as Service District #1, which includes the Island Lake and Spruce Cape areas. The City of Kodiak indicated in writing in December, 1979, that "the City's attitude does not preclude small annexations as requested through the presentation of 100% petitions, but does reject the idea of major annexations". This attitude would also preclude the provision of services by instituting a step annexation. The Local Boundary Commission has also stated that it will not pursue annexation in the City of Kodiak area on its own and will only become involved if petitioned.

The method of providing service through a service district approach appears to have the mutual support of the City and Borough. The City is willing to provide water at the city boundary to Service District #1 and to treat effluence from this area. The City will provide water meters to allow for the billing to the Borough for the residents getting water and sewer service in the area outside the c

The major concerns that need to be resolved deal with the operation and maintenance of the water and sewer utility service. A rate study needs to be conducted and the City and Borough have not, as of this date, reached an agreement on selection of a consulting firm to do this work. The City has stated that it does not wish to become involved in any contractual arrangement to operate and maintain the water and sewer systems within Service District #1. City Mayor Al Beardsley states that this "maintenance (within Service District #1) can just as easily be contracted (by the Borough) with a private firm". Agreement has been reached to allow the City inspection privileges during

installation of sewer lines to minimize infiltration into the sewer collection system within Service District #1.

Public Meeting

On January 12, 1980 Commissioner Lee McAnerney convened a public meeting for the purpose of receiving public comment regarding the "best" way to provide services to those residents of the Kodiak "urban" community outside the City of Kodiak. The managers of both the City and Borough, the city mayor, seven other assembly or council members, and fourteen public participants were present at the meeting.

Thirteen persons testified during the meeting. The overwhelming majority of those testifying favored the direction that the City and Borough have taken in negotiations between these two local governments. The testimony expressed a feeling that the service district approach gives the residents involved more alternatives in the level of service they will receive.

One person testified in favor of annexation of Service District #1 to the City of Kodiak as the best short-term alternative with unification of the City and Borough being the long-term or ultimate solution.

Future Outlook

This Department is prepared to assist the City of Kodiak and the Kodiak Island Borough in their attempt to work out remaining differences between them. Both the City and Borough should be commended for the progress that has been made to date. There is no reason to think that the remaining

differences cannot be worked out within the next few months.

The question of unification will again appear on the October, 1980 ballot. If this proposition is approved, jurisdictional problems in providing services to Kodiak Island residents would be resolved.

The Department concludes that no further action is required by the Legislature, the Local Boundary Commission or this Department, at this time, in the matter of provision of municipal services to residents living within the Kodiak "urban" area.

Legislative Resolve No.

3

Relating to Local Boundary Commission Recommendation I of January 23, 1979 for annexation of territory to the City of Kodiak.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS, under art. X, sec. 12 of the Constitution of the State of Alaska, the Local Boundary Commission has presented to the legislature its Recommendation I of January 23, 1979, entitled "Recommendation for Annexation of Territory to the City of Kodiak"; and

WHEREAS recommendations of the Local Boundary Commission presented to the legislature become effective 45 days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by the majority of the members of each house;

BE IT RESOLVED by the Alaska State Legislature that Local Boundary Commission Recommendation I of January 23, 1979 for annexation of territory to the City of Kodiak is disapproved.

Legislative Resolve No.: 4

Relating to an annexation of territory to the City of Kodiak.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS the road system extending north and northeast of the present boundaries of the City of Kodiak to those areas popularly known as Spruce Cape, Island Lake, Mill Bay, and Monashka Bay defines a natural community of residents whose lives and activities generally involve interaction with residents of and services provided in the City of Kodiak; and

WHEREAS, after public hearings and a public decisional meeting, the Local Boundary Commission of the State of Alaska has recommended annexation of a major portion of the area described by the road network to the City of Kodiak; and

WHEREAS the Legislature, by its adoption of House Joint Resolution 10, has disapproved the annexation submitted by the Department of Community and Regional Affairs on behalf of the Local Boundary Commission; and

WHEREAS, after opportunity for public comment before legislative committees, it appears that an adequate municipal services draft annexation plan was not earlier available for public review; and

WHEREAS there is ample evidence in the record of hearings before the Local Boundary Commission and the legislative committees that growth and development are occurring in the area; and

WHEREAS population growth and development have in some areas created a situation which endangers the public health, and require that certain services be provided;

BE IT RESOLVED by the Alaska State Legislature that the Governor is respectfully requested to direct the commissioner

of the Department of Community and Regional Affairs immediately to

(1) work with the appropriate departments of the state government, the City of Kodiak and the Kodiak Island Borough to alleviate the public health problem in the areas of Island Lake, Dark Lake and their drainage;

(2) work with the City of Kodiak and the Kodiak Island Borough to examine alternatives, including their impact, which might be applicable to the provision of appropriate services to the area located generally north and northeast of the corporate limits of the City of Kodiak, including but not limited to

(A) step annexation, by which residents of the annexed area would pay a percentage of the full city property tax rate equal to the total percentage cost of all services provided;

(B) annexation, with an adequate draft municipal services plan which may include provision for differential tax zones;

(C) unification; and

(D) any other methods of providing services throughout the road system extending north and northeast of the City of Kodiak; and

(3) convene one or more public meetings with interested residents of the area for the purpose of ascertaining the nature and degree of essential services and to review information relating to costs and benefits of the various alternatives for delivering services; and be it

FURTHER RESOLVED that the commissioner of the Department of Community and Regional Affairs evaluate, after consultation with the City of Kodiak and the Kodiak Island Borough, the alternatives and recommend a plan of implementation; and be it

FURTHER RESOLVED that the commissioner transmit a report to the Second Session of the Eleventh Legislature not later than January 20, 1980.

Report to the Second Session of the Eleventh Legislature Relating to Review of Services Provided to the Residents in the Kodiak Island Borough

Prepared and Submitted Pursuant
to House Concurrent Resolution No. 7AM
by the Department of Community and Regional Affairs

January 18, 1980

Background

As a result of a petition to annex a small area into the City of Kodiak the Local Boundary Commission (LBC) held two public hearings, one on December 12, 1977 and the other on May 20, 1978, to take public testimony on the annexation of a larger area to the City of Kodiak. This area included the Spruce Cape area, the Mill Bay Road area, the Monashka Bay area, and the United States Coast Guard Station. Following the public hearing the LBC recommended to the First Session of the Eleventh Legislature that all of the areas, except the Coast Guard Station, be annexed to the City of Kodiak. The Legislature disapproved this annexation by adoption of House Joint Resolution 10. The Legislature, in House Concurrent Resolution No. 7 amended, requested the Department of Community and Regional Affairs to study the various options to provide "services throughout the road system extending North and Northeast of the City of Kodiak" and to submit a report to the Legislature by January 20, 1980.

Progress to Date

During 1979, the City of Kodiak and the Kodiak Island Borough worked together to devise an acceptable compromise to provide services to the residents of Service District #1 which includes the area proposed by the LBC for annexation. The Department was kept apprised of these negotiations, and it was clear that the City and Borough wished to work its problem out without C&RA involvement.

The negotiations centered around providing water and sewer service to an area referred to as Service District #1, which includes the Island Lake and Spruce Cape areas. The City of Kodiak indicated in writing in December, 1979, that "the City's attitude does not preclude small annexations as requested through the presentation of 100% petitions, but does reject the idea of major annexations". This attitude would also preclude the provision of services by instituting a step annexation. The Local Boundary Commission has also stated that it will not pursue annexation in the City of Kodiak area on its own and will only become involved if petitioned.

The method of providing service through a service district approach appears to have the mutual support of the City and Borough. The City is willing to provide water at the city boundary to Service District #1 and to treat effluence from this area. The City will provide water meters to allow for the billing to the Borough for the residents getting water and sewer service in the area outside the city.

The major concerns that need to be resolved deal with the operation and maintenance of the water and sewer utility service. A rate study needs to be conducted and the City and Borough have not, as of this date, reached an agreement on selection of a consulting firm to do this work. The City has stated that it does not wish to become involved in any contractual arrangement to operate and maintain the water and sewer systems within Service District #1. City Mayor Al Beardsley states that this "maintenance (within Service District #1) can just as easily be contracted (by the Borough) with a private firm". Agreement has been reached to allow the City inspection privileges during

installation of sewer lines to minimize infiltration into the sewer collection system within Service District #1.

Public Meeting

On January 12, 1980 Commissioner Lee McAnerney convened a public meeting for the purpose of receiving public comment regarding the "best" way to provide services to those residents of the Kodiak "urban" community outside the City of Kodiak. The managers of both the City and Borough, the city mayor, seven other assembly or council members, and fourteen public participants were present at the meeting.

Thirteen persons testified during the meeting. The overwhelming majority of those testifying favored the direction that the City and Borough have taken in negotiations between these two local governments. The testimony expressed a feeling that the service district approach gives the residents involved more alternatives in the level of service they will receive.

One person testified in favor of annexation of Service District #1 to the City of Kodiak as the best short-term alternative with unification of the City and Borough being the long-term or ultimate solution.

Future Outlook

This Department is prepared to assist the City of Kodiak and the Kodiak Island Borough in their attempt to work out remaining differences between them. Both the City and Borough should be commended for the progress that has been made to date. There is no reason to think that the remaining

differences cannot be worked out within the next few months.

The question of unification will again appear on the October, 1980 ballot. If this proposition is approved, jurisdictional problems in providing services to Kodiak Island residents would be resolved.

The Department concludes that no further action is required by the Legislature, the Local Boundary Commission or this Department, at this time, in the matter of provision of municipal services to residents living within the Kodiak "urban" area.

HOUSE JOURNAL

ALASKA STATE LEGISLATURE

ELEVENTH LEGISLATURE - FIRST SESSION

JUNEAU, ALASKA Monday February 19, 1979

Thirty-sixth Day

Pursuant to adjournment, the House was called to order by Speaker Gardiner at 10:07 a.m.

The roll call showed all members present except Representatives Barnes, Martin, Randolph and Smith who had previously been excused from a call of the House and Representatives Carney and Guy.

The prayer was offered by the Chaplain, Lieutenant Floyd Bacon of the Salvation Army. Mr. Miller moved and asked unanimous consent that the prayer be spread on the journal. There being no objection, it was so ordered, and the prayer appears as follows:

"Heavenly Father;

In these days of confusion, we thank You for Your direction in our lives.

In times of turmoil and unrest, we thank You for the rest You bring to our hearts.

When arguments between men and nations strain relationships to near breaking, we thank You for the peace of Your love to bring us quiet and understanding.

Dear Lord, for these things and for another day in which to serve You, we praise Your Holy Name. We pray thy blessing upon this body. As issues are considered and decisions reached, may Your guidance be evident.

In Jesus' Name we pray.....

Amen."

Mr. Anderson moved and asked unanimous consent that the journals for the 33rd, 34th and 35th days, and House Journal Supplement No. 13, be approved as certified by the Chief Clerk. There being no objection, it was so ordered.

MESSAGES FROM THE SENATE

A message dated February 16, 1979, was read stating the Senate has approved the following Citation and it is transmitted for consideration:

In Memoriam - Franklin Warren Butte, by Senators Rodey and Ray and Representative Munson.

The Citation was sent to the Rules Committee for placement on the calendar.

REPORTS OF STANDING COMMITTEES

HJR 10 The Community and Regional Affairs Committee has had HOUSE JOINT RESOLUTION NO. 10 (Local Boundary Commission Recommendation I of January 23, 1979 for annexation of territory to the City of Kodiak) under consideration and a majority of the committee recommends it do pass. Concurring: Parker (Chairman), Branson, Carney, Parr, Zharoff, O'Connell and Metcalfe.

HJR 10 was referred to the Rules Committee for placement on the calendar.

HB 26 The Finance Committee has had HOUSE BILL NO. 26 (relating to insurance coverage for persons receiving benefits under the public employees' and teachers' retirement systems) under consideration and a majority of the committee recommends it be replaced with State Affairs COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 26 (same title) and that it do pass and attaches a fiscal note. Concurring: Meekins (Chairman), Duncan, McKinnon, Rogers, Schaeffer, Montgomery and Freeman. Not concurring: Smith and Moss have no recommendation.

HB 26 was referred to the Rules Committee for placement on the calendar.

The fiscal note on HB 26 appears in Journal Supplement No. 14.

HB 34 The Finance Committee has had HOUSE BILL NO. 34 (relating to the preparation and distribution of a taxpayers' survey of the budget) under consideration and a majority of the committee recommends it be replaced with State Affairs COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 34:

"An Act relating to the preparation and distribution of a taxpayers' summary of the budget."

and reports it back with individual recommendations and attaches a fiscal note. Duncan, McKinnon, Rogers, Moss and Montgomery recommend it do pass. Meekins (Chairman), Smith, Schaeffer and Freeman have no recommendation. HB 34

HB 34 was referred to the Rules Committee for placement on the calendar.

A fiscal note on HB 34 appears in House Journal Supplement No. 1.

The following State Affairs Committee Chairman's report was submitted on HOUSE BILL NO. 84 (relating to the refund of the unused balance of personal leave upon termination from state employment.): HB 84

Chairman's Report State Affairs

HB 84

During the consideration of this legislation, the Department of Administration indicated that its interpretation of the phrase "or in installments over a period of time" would not mean that an employee has the option of mandating the amounts or installment schedule for the payment of personal leave over a period of time. It would mean instead that, at the option of the employee, the lump sum payment would be waived and instead the employee would receive monthly payments equivalent to his normal pay schedule. The consensus of the committee was that this interpretation would be recognized as consistent with legislative intent regarding this proposed statute.

Rep. Mike Miller, Chairman

The Finance Committee has had HOUSE BILL NO. 93 (supplemental appropriation to the Office of the Governor, for supervisory bargaining unit contract; effective date) under consideration and a majority of the committee recommends it do pass. Concurring: Duncan, McKinnon, Smith, Rogers, Schaeffer and Freeman. Not concurring: Meekins (Chairman), Moss and Montgomery have no recommendation. HB 93

HB 93 was referred to the Rules Committee for placement on the calendar.

HB 98 The Health, Education and Social Services Committee has had HOUSE BILL NO. 98 (relating to the administration of questionnaires in public schools; effective date) under consideration and a majority of the committee recommends it do pass. Concurring: Buchholdt (Chairman), Chatterton, Hurlbert, Beirne, Miles and Munson.

HB 98 was referred to the Judiciary Committee.

HB 106 The State Affairs Committee has had HOUSE BILL NO. 106 (relating to state employees' leave) under consideration and a majority of the committee recommends it do pass. Concurring: Miller (Chairman), Martin, Metcalfe, Gardiner, Parker and Fuller.

HB 106 was referred to the Finance Committee.

HB 135 The following State Affairs Committee Chairman's report was submitted on HOUSE BILL NO. 135 (special appropriation to the Department of Transportation and Public Facilities for a Naknek River crossing study; effective date):

Chairman's Report State Affairs

CSHB 135

The intent of the State Affairs Committee in amending Sec. 1 was to broaden the scope of the crossing study to include options other than just a bridge as the original bill specified. It was the feeling of the committee that a bridge might be feasible, but that the cost of such a project would be very high for the few people in the area. However, this would not negate the need for crossing the Naknek River from South Naknek to North Naknek. The committee intent was that all feasible methods of crossing the river be considered.

Jack Fuller

Rep. Jack Fuller, Vice Chairman

The Finance Committee has had HOUSE BILL NO. 143 (making supplemental appropriations to the Department of Health, and Social Services, division of public assistance; effective date) under consideration and a majority of the committee recommends it be replaced with COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 143 (same title) and that it do pass. Concurring: Meekins (Chairman), McKinnon, Smith, Rogers, Schaeffer, Montgomery, Freeman and Moss. HB 143

HB 143 was referred to the Rules Committee for placement on the calendar.

The Health, Education and Social Services Committee has had HOUSE BILL NO. 152 (making a special appropriation to the residential care facilities revolving loan fund; effective date) under consideration and a majority of the committee recommends it do pass. Concurring: Buchholdt (Chairman), Chatterton, Miles, Beirne, Hurlbert and Munson. HB 152

HB 152 was referred to the Finance Committee.

The fiscal note that should have accompanied the Labor & Management Committee's report on HB 189 (elevator safety) has been received and will appear in House Journal Supplement No. 14. HB 189

INTRODUCTION, FIRST READING AND REFERENCE OF HOUSE RESOLUTIONS

HOUSE CONCURRENT RESOLUTION NO. 7 by the Community and Regional Affairs Committee: HCR 7

Relating to an annexation of territory to the City of Kodiak.

was read the first time with the following Community and Regional Affairs Committee report:

The Community and Regional Affairs Committee has had HOUSE CONCURRENT RESOLUTION NO. 7 (relating to an annexation of territory to the City of Kodiak) under consideration and a majority of the committee recommends it do pass. Concurring: Parker (Chairman), Branson, Parr, Zharoff and O'Connell.

HCR 7 was referred to the Rules Committee for placement on the calendar.

INTRODUCTION, FIRST READING AND REFERENCE OF HOUSE BILLS

HB 241 HOUSE BILL NO. 241 by Gardiner, entitled:

"An Act relating to state bonding."

was read the first time and referred to the Finance Committee.

HB 242 HOUSE BILL NO. 242 by the Rules Committee by Request of the Governor, entitled:

"An Act relating to public employment; and providing for an effective date."

was read the first time and referred to the Labor and Management Committee.

A fiscal note on HB 242 appears in House Journal Supplement No. 14.

The Governor's transmittal letter follows:

February 14, 1979

The Honorable Terry Gardiner
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

Under authority of art. III, sec. 18 of the Alaska Constitution, I am transmitting a bill which amends AS 23.40.070 - 23.40.260, the Public Employment Relations Act (PERA).

Sections 1 and 2 of the bill would alter the current statutory scheme which has established two entirely distinct labor relations agencies (LRA). One LRA, the state personnel board, deals only with the state and state employees. The other LRA, the Department of Labor, deals with all other public employers and public employees subject to the Act. The activities and responsibilities of each LRA are identical, yet they function independently.

HB 242

In order to use state resources more economically, use and maximize special expertise in labor relations matters under the Act, and assure the development and application of consistent procedures and a body of administrative law, it is recommended that there be only one labor relations agency to deal with all public employers and employees subject to the Act. The sole LRA should be the state personnel board since its role and experience under the Act have been much greater to date than that of the Department of Labor which has been called upon to act as an LRA only very infrequently. The bill would make this change, and at the same time make the Department of Labor available to assist the LRA on various matters which, because of lack of manpower, the LRA may be unable to take care of itself, in a timely manner.

Section 3 of the bill changes the definition of "public employee" to exclude department heads, assistant and deputy department heads, division directors, assistant and deputy division directors, and employees (other than secretarial or clerical) who report directly to those positions.

In the context of labor/management matters, the basic problem now is that there is no true "management" in the public sector in Alaska. The current definition of "public employee" encompasses all employees of the state and political subdivisions except elected or appointed officials and teachers and uncertificated employees of school districts. The only persons who currently represent the "public employer" in the executive branch are the governor and his immediate appointees.

This amendment would recognize the reality of employer-employee relationships in the public sector in Alaska by removing some additional employees with management responsibilities from the coverage of the PERA.

Section 4, establishing an effective date, is designed to avoid any conflict with enforceable contracts in effect on July 1, 1979.

Sincerely,

Jay S. Hammond
Governor

HB 243 HOUSE BILL NO. 243 by the Rules Committee by Request of the Governor, entitled:

"An Act relating to teachers' and public employees' retirement; and providing for an effective date."

was read the first time and referred to the State Affairs and Finance Committees.

A fiscal note on HB 243 appears in House Journal Supplement No. 14

The Governor's transmittal letter follows:

February 16, 1979

The Honorable Terry Gardiner
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18 of the Alaska Constitution, I am transmitting a bill relating to the Teachers' Retirement System, AS 14.25, and the Public Employees' Retirement System, AS 39.35.

The major thrust of the legislation relating to the Teachers' Retirement System is the revision of the definition section to establish a set of terms which may be used uniformly throughout the remainder of the chapter. Presently, several different terms are used to convey one meaning, single terms are used for more than one purpose, and there are no definitions for other terms appearing in the chapter.

In addition to changes in the definitions, certain sections have been consolidated and rearranged to clarify the numerous options available to a teacher seeking benefits under the chapter.

These clarifying amendments are patterned in both format and intent after the amendments to the Public Employees' Retirement System (PERS) enacted by the legislature in 1977.

Some of the amendments to the Teachers' Retirement System, however, go beyond mere housekeeping. One such change is in the definition of the term "actuarial adjustment." This term is used to describe the reduction in benefits stemming from either the nonpayment of an individual's indebtedness to the system or the individual's desire to retire before the normal retirement date. The present law specifies certain actuarial factors to be applied to the calculation of benefits. To maintain a financially sound retirement system and avoid the problems which have plagued similar systems, I believe that our actuary should be given more

flexibility in making actuarial adjustments to take into account increases and decreases in the fund's resources. Another change is the removal of a deadline for claiming and verifying military service. The bill also adds a waiver-of-adjustments statute similar to the one passed last session for the Public Employees' Retirement System. Both of these provisions will include the availability of relief to beneficiaries as well as members. HB 243

The bill also would provide additional benefits in the Teachers' Retirement System, including:

(1) removal of the "55 year old" requirement for receipt of a spouse's pension;

(2) provision of a benefit for a surviving spouse with minor children whose spouse was on deferred vested status;

(3) an increased benefit for the beneficiary of a teacher who dies while receiving a disability benefit;

(4) repurchase of credit in the TRS without re-employment in that system if a person is vested in the PERS.

The amendments to the Public Employees' Retirement System, AS 39.35, are all of a minor nature. The bill would remove the current deadline for claiming and verifying military service within one year of vesting. It would also permit former members to reinstate segments of prior credited service in the Public Employees' Retirement System if they are now vested in the Teachers' Retirement System.

Sincerely,

Jay S. Hammond
Governor

HOUSE BILL NO. 244 by the Rules Committee by Request of the Governor, entitled: HB 244

"An Act relating to the disposal and improvement of state land; authorizing the issuance of revenue bonds to pay the costs of improvements to state land; and providing for an effective date."

was read the first time and referred to the Resources and Finance Committees.

A fiscal note on HB 244 appears in House Journal Supplement No. 14.

HB 244 The Governor's transmittal letter follows:

February 16, 1979

The Honorable Terry Gardine.
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

Under art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill to establish the Alaska Land Improvement Fund to finance and speed the subdivision and sale of state land.

In order to subdivide and sell state land, it is necessary to survey, plat, build access roads, and -- frequently -- install water and sewer systems. The necessity arises from municipal regulation in some instances, state law in others, and the general obligation to protect the public interest in yet others. These improvements cost money -- a lot of money. Upwards of $50 million could be required annually to place the requisite amount of state land on the market.

Our budget is tight and growing tighter. We are not reasonably able to appropriate the amount of money required for a full-scale program for disposing of land. Another source of funding is required. The attached bill provides it.

The bill establishes an Alaska Land Improvement Fund as the mechanism for financing the improvements required by state law, municipal ordinance, or the general public interest. Aside from some seed money and insurance, it is financed entirely from revenue bonds which will be repaid from the proceeds of the land sales. The heart of the bill is contained in the first four pages. The remainder, with one exception, is standard terminology for revenue bond programs, essentially the same as the legislation which set up the Alaska Housing Finance Corporation.

The first section, 38.60.005, contains the legislative findings, setting out the problem and the proposed solution. The next section, 10, sets out the way in which the scope of the annual program will be determined. The program is made public in January to afford both the legislature and the public an ample opportunity to consider it.

The third and fourth sections, 20 and 30, provide for the disposal of land and the improvements to the land. With certain exceptions, the land is sold under the mechanisms prescribed by the Alaska Land Act. The improvements are sold under the provisions of this bill. The former allows for residency credits. The latter does not. Getting full value for the improvements is absolutely essential to the program. HB 244

Section 40 authorizes revenue bonds in the amount of $50 million. This is considered to be the size of an annual program. If the legislature approves the program results, further authorizations can be made in the future. Section 50 sets up the Alaska Land Improvement Fund.

The remainder of the bill is typical for a revenue bond authority, except for proposed AS 38.60.150 and bill section 2. The former enables municipalities to participate in the program where feasible. Whether any satisfactory agreements can be reached will have to be seen, but the opportunity to do so is worth including in the bill. The second exempts land disposed of under this program from the statutory requirement that it be disposed of within 5 weeks from the last day of printed public notice of its disposition. The reason for this is that making the land and improvement contracts mutually contingent necessarily creates delays which could, and probably will, take many of them beyond that deadline.

The bill addresses a big problem. It promises to be a most effective tool in solving that problem. It is virtually fool proof in that only a workable program will attract buyers for the revenue bonds. I urge its swift enactment.

Sincerely,

Jay S. Hammond
Governor

HOUSE BILL NO. 245 by Moss by Request, entitled: HB 245

"An Act relating to recall of municipal officials; and providing for an effective date."

was read the first time and referred to the Community and Regional Affairs and Judiciary Committees.

HOUSE BILL NO. 246 by Moss and Metcalfe by Request, entitled: HB 246

"An Act relating to the membership of the Alaska Pioneers' Home Advisory Board."

was read the first time and referred to the State Affairs Committee.

CONSIDERATION OF THE DAILY CALENDAR

SECOND READING OF HOUSE BILLS

HB 3 HOUSE BILL NO. 3 (relating to the restoration of the right to vote) was read the second time with the Judiciary Committee report (page 286 of the journal).

CS HB 3 Mr. Anderson moved and asked unanimous consent that COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 3 (relating to the loss and restoration of voting rights) be adopted in lieu of HB 3. There being no objection, it was so ordered.

Mr. Anderson moved and asked unanimous consent that CSHB 3 be considered engrossed, advanced to third reading and placed on final passage. There being no objection, it was so ordered.

CSHB 3 was read the third time.

The question being: "Shall CSHB 3 pass the House?" The roll call was taken with the following result: CS HB 3

Yeas:	33	Anderson, Beirne, Bettisworth, Branson, Brown, Buchholdt, Chatterton, Cotten, Duncan, Eliason, Freeman, Fuller, Gardiner, Halford, Haugen, Hayes Hurlbert, McKinnon, Malone, Meekins, Metcalfe, Miles, Miller, Moss, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Rogers, Schaeffer, Zharoff.
Nays:	1	Montgomery.
Excused:	4	Barnes, Martin, Randolph, Smith.
Absent:	2	Carney, Guy.

And so, CSHB 3 passed the House.

CSHB 3 was referred to the Chief Clerk for engrossment.

Mr. Anderson moved and asked unanimous consent that HOUSE BILL NO. 61 (creating the Toklat River critical habitat area) be returned to the Rules Committee. There being no objection, it was so ordered. HB 61

HOUSE BILL NO. 81 (relating to trapping license receipts; effective date) was read the second time with the Resources Committee report (page 275 of the journal). HB 81

Mr. Anderson moved and asked unanimous consent that HB 81 be considered engrossed, advanced to third reading and placed on final passage. There being no objection, it was so ordered.

HB 81 was read the third time.

Mr. Anderson moved and asked unanimous consent that HB 81 be taken from today's calendar and referred to the Finance Committee. There being no objection, it was so ordered. HB 81 was referred to the Finance Committee.

HB 131 HOUSE BILL NO. 131 (relating to location of Pioneers' Homes) was read the second time with the Health, Education and Social Services Committee report (page 275 of the journal)

CS HB 131 Mr. Anderson moved and asked unanimous consent that COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 131 (relating to Pioneers' Homes) be adopted in lieu of the bill. There being no objection, it was so ordered.

Mr. Anderson moved and asked unanimous consent that CSHB 131 be considered engrossed, advanced to third reading and placed on final passage.

Mr. Meekins objected.

Mr. Meekins withdrew his objection.

There being no further objection, CSHB 131 was considered engrossed, advanced to third reading and placed on final passage.

CSHB 131 was read the third time.

The question being: "Shall CSHB 131 pass the House?" The roll call was taken with the following result:

Yeas:	32	Anderson, Beirne, Bettisworth, Brunson, Brown, Buchholdt, Chatterton, Cotten, Duncan, Freeman, Fuller, Gardiner, Halford, Haugen, Hayes, Hurlbert, McKinnon, Meekins, Metcalfe, Miles, Miller, Montgomery, Moss, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Rogers, Schaeffer, Zharoff.
Nays:	0	
Excused:	4	Barnes, Martin, Randolph, Smith.
Absent:	4	Carney, Eliason, Guy, Malone.

And so, CSHB 131 passed the House.

CSHB 131 was referred to the Chief Clerk for engrossment.

SECOND READING OF HOUSE RESOLUTIONS

HJR 12 HOUSE JOINT RESOLUTION NO. 12 (relating to the tax exemption granted to federal employees in Alaska and in other locations outside the contiguous 48 states) was read the second time with the State Affairs Committee report (page 105 of the journal).

Mr. Anderson moved and asked unanimous consent that HJR 12 be considered engrossed, advanced to third reading and placed on final passage. There being no objection, it was so ordered. HJR 12

HJR 12 was read the third time.

The question being: "Shall HJR 12 pass the House?" The roll was taken with the following result:

Yeas:	32	Anderson, Beirne, Bettisworth, Branson, Brown, Buchholdt, Cotten, Duncan, Freeman, Fuller, Gardiner, Halford, Haugen, Hayes, Hurlbert, McKinnon, Malone, Meekins, Metcalfe, Miles, Miller, Montgomery, Moss, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Rogers, Schaeffer, Zharoff.
Nays:	1	Chatterton.
Excused:	4	Barnes, Martin, Randolph, Smith.
Absent:	3	Carney, Guy, Eliason.

And so, HJR 12 passed the House.

HJR 12 was referred to the Chief Clerk for engrossment.

UNFINISHED BUSINESS

Mr. Hayes moved and asked unanimous consent that Representative Eliason be excused from a call of the House February 20 through February 23. There being no objection, it was so ordered.

The Speaker announced the appointment of Representative Buchholdt to the Education Commission of the States.

ENGROSSMENT

Page 1, line 10: Delete "$85,635" and insert "$126,235"

Concurring: Parr (Chairman), Phillips, Martin, Anderson, Barnes and Malone.

HB 262 was referred to the Finance Committee.

The Judiciary Committee's letter of intent for HB 262 appears as follows:

March 2, 1979

The Honorable Terry Gardiner
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

It is the intent of the House Judiciary Committee that under House Bill 262 first priority be given to the training of police officers and village magistrates, second priority to the training of district attorneys and public defenders. Training of judges and members of the private bar has the lowest priority. HB 262

The C recommends that the Finance Committee seek tes[illegible] the office of the Public Defender.

Sincerely,

Charles H. Parr
Chairman

INTRODUCTION, FIRST READING AND REFERENCE OF HOUSE RESOLUTIONS

The Governor's transmittal letter follows:

March 5, 1979

The Honorable Terry Gardiner
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18 of the Alaska Constitution, I am transmitting a bill making a supplemental appropriation to the Department of Health and Social Services, Division of Social Services, for the purpose of replacing a shortfall in federal dollars during FY 78 in the program services BRU of that division.

Sincerely,

Jay S. Hammond
Governor

HOUSE BILL NO. 340 by Gardiner, entitled: HB
340

"An Act relating to fisheries business licenses."

was read the first time and referred to the Resources Committee.

CONSIDERATION OF THE DAILY CALENDAR

SECOND READING OF HOUSE RESOLUTIONS

HJR 21 HOUSE JOINT RESOLUTION NO. 21 (relating to the Northwest Alaskan Pipeline Company) was read the second time with the Resources Committee report (page 426 of the journal).

CS HJR 21 Mr. Anderson moved and asked unanimous consent that the COMMITTEE SUBSTITUTE FOR HOUSE JOINT RESOLUTION NO. 21 (same title) be adopted in lieu of HJR 21. There being no objection, it was so ordered.

Mr. Anderson moved and asked unanimous consent that CSHJR 21 be considered engrossed, advanced to third reading and placed on final passage. There being no objection, it was so ordered.

CSHJR 21 was read the third time.

The question being: "Shall CSHJR 21 pass the House?" The roll was taken with the following result:

Yeas:	35	Anderson, Beirne, Bettisworth, Branson, Brown, Carney, Chatterton, Cotten, Duncan, Eliason, Freeman, Fuller, Gardiner, Guy, Halford Haugen, Hayes, Hurlbert, Malone, Martin, Metcalfe, Miles, Miller, Montgomery, Moss, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Rogers, Schaeffer, Smith, Zharoff.
Nays:	2	Barnes, Meekins.
Excused:	3	Buchholdt, McKinnon, Randolph.

And so, CSHJR 21 passed the House.

Mr. Malone gave notice of reconsideration of his vote on CSHJR 21 and moved and asked unanimous consent that reconsideration be brought up at this time.

Mr. Freeman objected. Mr. Freeman withdrew his objection. There being no further objection, Mr. Malone's reconsideration was brought up at this time.

THIRD READING OF HOUSE RESOLUTIONS

CS HJR 21 CSHJR 21 was automatically before the House in third reading at this time and was read the third time.

The question to be reconsidered is: "Shall CSHJR 21 pass the House?" The roll was taken with the following result: CS HJR 21

Yeas:	31	Anderson, Beirne, Bettisworth, Branson, Brown, Carney, Chatterton, Cotten, Duncan, Eliason, Fuller, Gardiner, Guy, Halford, Haugen, Hayes, Hurlbert, Martin, Metcalfe, Miles, Miller, Montgomery, Moss, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Smith, Zharoff.
Nays:	5	Barnes, Freeman, Malone, Meekins, Rogers.
Excused:	3	Buchholdt, McKinnon, Randolph.
Absent:	1	Schaeffer.

And so, CSHJR 21 passed the House on reconsideration of the vote.

CSHJR 21 was referred to the Chief Clerk for engrossment.

LEGISLATIVE CITATIONS

Representative Duncan moved and asked unanimous consent that Representative Miller be added as a co-sponsor on the Citation in memory of Harvey Summers. There being no objection it was so ordered.

Representative Duncan moved and asked unanimous consent that the House approve the Citation in memory of Harvey Summers and that it be read in its entirety. There being no objection, it was so ordered.

The Citation was referred to the Chief Clerk for transmittal to the Senate.

Representative Brown moved and asked unanimous consent that all members of the House be shown as sponsors on the Citation in memory of Grant H. Pearson. There being no objection, it was so ordered.

Representative Brown moved and asked unanimous consent that the House approve the Citation in memory of Grant H. Pearson. There being no objection, it was so ordered.

The Citation was referred to the Chief Clerk for transmittal to the Senate.

UNFINISHED BUSINESS

HB 199 was referred to the Resources Committee.

The Free Conference Committee which has had SENATE JOINT RESOLUTION NO. 13 amended (encouraging the Alaska Congressional delegation to work together to resolve the problems created by the President's imposition of the Antiquities Act on lands in Alaska) and HOUSE COMMITTEE SUBSTITUTE FOR SENATE JOINT RESOLUTION NO. 13 amended House (enunciating the position of the Alaska State Legislature with respect to national interest lands in Alaska) under consideration, recommends that HCS SJR 13amH

FREE CONFERENCE COMMITTEE SUBSTITUTE
FOR SENATE JOINT RESOLUTION NO. 13
(enunciating the position of the
Alaska State Legislature with respect
to national interest lands in Alaska)

be adopted.

The report was signed by Senators Tillion (Chairman) and Ziegler; Senator Rodey signed do not concur; and by Representatives Miles (Chairman), Fuller and Hayes.

HCS SJR 13amH The Free Conference Committee Report on SJR 13 am and HCS SJR 13amH will be taken up under Unfinished Business.

INTRODUCTION, FIRST READING AND REFERENCE OF HOUSE RESOLUTIONS

HJR 22 HOUSE JOINT RESOLUTION NO. 22 by Anderson by Request:

Requesting the federal grand jury to hear charges and complaints against the Secretary of the Interior and other Interior Department officials.

was read the first time and referred to the Judiciary Committee.

INTRODUCTION, FIRST READING AND REFERENCE OF HOUSE BILLS

SSHB 30 SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 30 by Gardiner, entitled:

"An Act relating to the Commercial Fishing and Agriculture Bank."

was read the first time and referred to the Resources and Judiciary Committees.

HB 250 HOUSE BILL NO. 250 by McKinnon, entitled:

"An Act removing the exemption of banks and financial institutions from the state antitrust law."

was read the first time and referred to the Judiciary Committee.

HB 251 HOUSE BILL NO. 251 by McKinnon, entitled:

"An Act relating to the Alaska essential property insurance inspection and placement program; and providing for an effective date."

was read the first time and referred to the Judiciary Committee.

HOUSE BILL NO. 252 by Parker, entitled: HB 252

"An Act relating to the qualifications and selection of jurors."

was read the first time and referred to the Judiciary Committee.

HOUSE BILL NO. 253 by O'Connell, entitled: HB 253

"An Act permitting practicing pharmacists to claim exemption from jury service."

was read the first time and referred to the Judiciary Committee.

HOUSE BILL NO. 254 by Fuller, entitled: HB 254

"An Act relating to Alaska National Guard retirement; and providing for an effective date."

was read the first time and referred to the State Affairs and Finance Committees.

HOUSE BILL NO. 255 by Rogers, Beirne, Bettisworth, Buchholdt, Duncan, Freeman, Fuller, Gardiner, Haugen, McKinnon, Malone, Meekins, Metcalfe, Miller, Moss, Parker, Randolph and Zharoff, entitled: HB 255

"An Act relating to the sale of food from self-service bins."

was read the first time and referred to the Health, Education and Social Services Committee.

HOUSE BILL NO. 256 by the Rules Committee by Request of the Governor, entitled: HB 256

"An Act relating to the transporter law; and providing for an effective date."

was read the first time and referred to the Resources Committee.

There is a zero fiscal note on HB 256.

The Governor's transmittal letter follows:

February 20, 1979

HB 256
The Honorable Terry Gardiner
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the provisions of art. III, sec. 18 of the Alaska Constitution, I am forwarding a bill to amend certain portions of chapter 106, SLA 1976, the transporter law. My amendment is directed at removing the requirement for guides, air taxi operators and other transporters to furnish a report to the Department of Fish and Game and the Department of Public Safety giving details of persons and game transported.

It has become apparent that the reporting requirement does not serve the purpose that was intended when the measure was enacted and, therefore, it is advisable to remove an unnecessary administrative burden from those affected.

Sincerely,

Jay S. Hammond
Governor

HB 257 HOUSE BILL NO. 257 by Miles, entitled:

"An Act relating to mo-peds."

was read the first time and referred to the State Affairs and Judiciary Committees.

HB 258 HOUSE BILL NO. 258 by the Resources Committee by Request, entitled:

"An Act repealing the restriction of grounds upon which a mobile home park operator may evict a mobile home park dweller."

was read the first time and referred to the Commerce and Judiciary Committees.

HOUSE BILL NO. 259 by Osterback, entitled: HB 259

"An Act relating to permissible gear for taking scallops."

was read the first time and referred to the Resources Committee.

HOUSE BILL NO. 260 by Duncan, Cotten, Malone, Meekins, Miller, Parker, Rogers and Gardiner, entitled: HB 260

"An Act relating to the participation of legislators in state retirement systems; and providing for an effective date."

was read the first time and referred to the Health, Education and Social Services Committee.

CONSIDERATION OF THE DAILY CALENDAR

SECOND READING OF HOUSE BILLS

Mr. Anderson moved and asked unanimous consent that HOUSE BILL NO. 55 (relating to an employee suggestion award system; effective date) be taken from today's calendar and returned to the Rules Committee. There being no objection, it was so ordered. HB 55

HOUSE BILL NO. 102 (relating to rights in works of fine art) was read the second time with the State Affairs Committee report (page 203 of the journal). HB 102

Mr. Anderson moved and asked unanimous consent that COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 102 (same title) be adopted in lieu of HB 102. There being no objection, it was so ordered. CS HB 102

Mr. Anderson moved and asked unanimous consent that CSHB 102 be considered engrossed, advanced to third reading and placed on final passage. There being no objection, it was so ordered.

CSHB 102 was read the third time.

CS HB 102 The question being: "Shall CSHB 102 pass the House?" The roll call was taken with the following result:

Yeas: 38 Anderson, Barnes, Beirne, Bettisworth, Branson, Brown, Buchholdt, Carney, Chatterton, Cotten, Duncan, Freeman, Fuller, Gardiner, Guy, Halford Haugen, Hayes, Hurlbert, McKinnon, Malone, Martin, Meekins, Metcalfe, Miles, Miller, Montgomery, Moss, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Randolph, Rogers, Schaeffer, Zharoff.

Nays: 0

Excused: 2 Eliason, Smith.

And so, CSHB 102 passed the House.

CSHB 102 was referred to the Chief Clerk for engrossment.

SECOND READING OF HOUSE RESOLUTIONS

HCR 7 Mr. Anderson moved and asked unanimous consent that HCR 7 (relating to an annexation of territory to the City of Kodiak) be moved to the bottom of today's calendar. There being no objection, it was so ordered.

HJR 10 HOUSE JOINT RESOLUTION NO. 10 (relating to Local Boundary Commission Recommendation I of January 23, 1979 for annexation of territory to the City of Kodiak) was read the second time with the Community and Regional Affairs Committee report (page 304 of the journal).

Mr. Anderson moved and asked unanimous consent that HJR 10 be considered engrossed, advanced to third reading and placed on final passage. There being no objection, it was so ordered.

HJR 10 was read the third time.

The question being: "Shall HJR 10 pass the House?" The roll was taken with the following result:

Yeas: 38 Anderson, Barnes, Beirne, Bettisworth, Branson, Brown, Buchholdt, Carney, Chatterton, Cotten, Duncan, Freeman, Fuller, Gardiner, Guy, Halford, Haugen, Hayes, Hurlbert, McKinnon, Malone, Martin, Meekins, Metcalfe, Miles, Miller, Montgomery, Moss, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Randolph, Rogers, Schaeffer, Zharoff.

Nays: 0

Excused: 2 Eliason, Smith.

File of Kodiak annex

And so, HJR 10 passed the House. HJR 10

HJR 10 was referred to the Chief Clerk for engrossment.

HOUSE CONCURRENT RESOLUTION NO. 7 (relating to an annexation of territory to the City of Kodiak) was read the second time with the Community and Regional Affairs Committee report (page 307 of the journal). HCR 7

Amendment No. 1 by Parker:

Page 1, line 21: after "adequate"
insert "municipal services"

Mr. Parker moved and asked unanimous consent that Amendment No. 1 be adopted. There being no objection, Amendment No. 1 was adopted. HCR 7am

The question being: "Shall HCR 7am pass the House?" On voice vote, HCR 7am passed the House unanimously.

HCR 7am was referred to the Chief Clerk for engrossment.

UNFINISHED BUSINESS

The Free Conference Committee report on SJR 13am and HCS SJR 13amH (p. 321 of the journal) was before the House. HCS SJR 13amH

Mr. Anderson moved that the FCC report on the above resolutions be adopted.

The question being: "Shall the FCC report on the above resolutions be adopted?" The roll was taken with the following result:

Yeas:	36	Anderson, Barnes, Beirne, Bettisworth, Branson, Brown, Buchholdt, Carney, Chatterton, Cotten, Duncan, Freeman, Fuller, Gardiner, Guy, Halford, Hayes, Hurlbert, McKinnon, Malone, Martin, Meekins, Metcalfe, Miles, Montgomery, Moss, Munson, O'Connell, Osterback, Parker, Parr, Phillips, Randolph, Rogers, Schaeffer, Zharoff.
Nays:	1	Miller.
Excused:	2	Eliason, Smith.
Absent:	1	Haugen.

And so, the House adopted the report, thus adopting FCCS SJR 13 (enunciating the position of the Alaska State Legislature with respect to national interest lands in Alaska). FCCS SJR 13

The Chief Clerk was instructed to so notify the Senate.

The Speaker announced the receipt of the following Sunset Audit Report from the Division of Legislative Audit:

A Performance Review of the Alcoholic Beverage Control Board dated November 3, 1978.

The above report was referred to the Commerce Committee.

HB 242 The Speaker announced that HOUSE BILL NO. 242 (relating to public employment; effective date) will have a further referral to the State Affairs Committee.

ENGROSSMENT

The following were engrossed, signed by the Speaker and Chief Clerk and transmitted to the Senate for consideration:

SENATE JOURNAL

ALASKA STATE LEGISLATURE

ELEVENTH LEGISLATURE - FIRST SESSION

JUNEAU, ALASKA Wednesday February 21, 1979

Thirty-eighth Day

Pursuant to adjournment, the Senate was called to order by President Tillion at 10:05 a.m.

The roll call showed seventeen members present. Senators Mulcahy, Stimson and Sumner were excused from a call of the Senate.

The prayer was offered by the Chaplain, Reverend Curtis McClain of the Glacier Valley Baptist Church.

Senator Colletta moved and asked unanimous consent that the journal for the thirty-seventh legislative day be approved as certified. Without objection, it was so ordered.

MESSAGES FROM THE HOUSE

Message of February 20 was read stating the House has adopted the report of the Free Conference Committee which has had SENATE JOINT RESOLUTION NO. 13 amended (encouraging the Alaska Congressional delegation to work together to resolve the problems created by the President's imposition of the Antiquities Act on lands in Alaska) and HOUSE COMMITTEE SUBSTITUTE FOR SENATE JOINT RESOLUTION NO. 13 amended House (enunciating the position of the Alaska State Legislature with respect to national interest lands in Alaska), thus adopting: FCCS SJR 13

FREE CONFERENCE COMMITTEE SUBSTITUTE FOR SENATE JOINT RESOLUTION NO. 13 (enunciating the position of the Alaska State Legislature with respect to national interest lands in Alaska).

FCCS SJR 13 The Senate adopted the Free Conference Committee report on February 20.

FREE CONFERENCE COMMITTEE SUBSTITUTE FOR SENATE JOINT RESOLUTION NO. 13 was referred to the Secretary for engrossment and enrollment.

Message of February 20 was read stating the House has passed the following:

INTRODUCTION AND REFERENCE OF HOUSE RESOLUTIONS

HCR 7 am HOUSE CONCURRENT RESOLUTION NO. 7 amended, by the Community and Regional Affairs Committee,

Relating to an annexation of territory to the City of Kodiak,

was read the first time and referred to the Community and Regional Affairs Committee.

HJR 10 HOUSE JOINT RESOLUTION NO. 10 by Representative Zharoff,

Relating to Local Boundary Commission Recommendation I of January 23, 1979 for annexation of territory to the City of Kodiak,

was read the first time and referred to the Community and Regional Affairs Committee.

INTRODUCTION AND REFERENCE OF HOUSE BILLS

CSHB 102 COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 102 by the State Affairs Committee, entitled:

"An Act relating to rights in works of fine art."

was read the first time and referred to the State Affairs Committee.

STANDING COMMITTEE REPORTS

The Finance Committee has had SENATE JOINT RESOLUTION NO. 6 (relating to the Alaska Power Authority, the Phase I environmental economic, social and engineering studies of the Susitna Hydroelectric Project, and the incurring of indebtedness for Phase I) under consideration and a majority of the committee recommends it do pass. The report was signed by Senator Sackett, Chairman, and concurred in by Senators Bennett, Hackney and Dankworth. Senators Hohman and Ray signed "no recommendation". SJR 6

SENATE JOINT RESOLUTION NO. 6 was referred to the Rules Committee.

The Commerce Committee has had SENATE JOINT RESOLUTION NO. 18 (urging passage of a bill in Congress to amend the Shipping Act, 1916) under consideration and a majority of the committee recommends it do pass. The report was signed by Senator Bradley, Chairman, and concurred in by Senators Sturgulewski, Kelly and Stimson. Senator Ferguson signed "no recommendation". SJR 18

SENATE JOINT RESOLUTION NO. 18 was referred to the Rules Committee.

The Community and Regional Affairs Committee has had SENATE BILL NO. 6 (special appropriation to the Department of Community and Regional Affairs for purchase of public works equipment for Craig and Klawock) under consideration and the committee recommends it do pass. The report was signed by Senator Sturgulewski, Chairman, and concurred in by Senators Stimson, Rodey and Kelly. SB 6

SENATE BILL NO. 6 was referred to the Finance Committee.

The Judiciary Committee has had SENATE BILL NO. 56 (effect of homicide under the Uniform Probate Code) under consideration and the committee recommends it do pass. The report was signed by Senator Ziegler, Chairman, and concurred in by Senators Ray, Meland, Bennett and Dankworth. SB 56

SENATE BILL NO. 56 was referred to the Rules Committee.

SB 63 The Finance Committee has had SENATE BILL NO. 63 (special appropriation to the Alaska Power Authority for the Susitna Hydroelectric Project) under consideration and a majority of the committee recommends it do pass. The report was signed by Senator Sackett, Chairman, and concurred in by Senators Bennett, Hackney and Dankworth. Senators Hohman and Ray signed "no recommendation".

SENATE BILL NO. 63 was referred to the Rules Committee.

SB 70 The Judiciary Committee has had SENATE BILL NO. 70 (relating to volunteer service in state government) under consideration and the committee reports it back "without recommendation, but that it be further referred to the Finance Committee". The report was signed by Senator Ziegler, Chairman, and concurred in by Senators Ray, Meland, Bennett and Dankworth.

SENATE BILL NO. 70 was referred to the Finance Committee.

SB 125 The Commerce Committee has had SENATE BILL NO. 125 (special appropriation for operating expenses of radio station KYUK, Bethel) under consideration and a majority of the committee recommends it do pass. The report was signed by Senator Bradley, Chairman, and concurred in by Senators Sturgulewski, Kelly and Stimson. Senator Ferguson signed "no recommendation".

SENATE BILL NO. 125 was referred to the Finance Committee.

SB 165 The Commerce Committee has had SENATE BILL NO. 165 (special appropriation to mortgage insurance fund of the Alaska Housing Finance Corporation) under consideration and a majority of the committee recommends it do pass. The report was signed by Senator Bradley, Chairman, and concurred in by Senators Kelly and Stimson. Senator Sturgulewski signed "do pass with amendments" and Senator Ferguson signed "no recommendation".

SENATE BILL NO. 165 was referred to the Finance Committee.

CONSIDERATION OF THE CALENDAR

SECOND READING OF SENATE BILLS

SENATE BILL NO. 101 (relating to the disciplining of a licensed guide) was read the second time. SB 101

Senator Ziegler moved and asked unanimous consent for the adoption of the Judiciary Committee Substitute offered on page 277. Without objection, COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 101 was adopted. CS SB 101

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 101 was read the second time.

Senators Rodey and Bradley offered the following amendment No. 1:

Page 1, lines 6 and 7: delete "the disciplining of a licensed guide" and insert "licensed guides"

Page 1, line 10: add a new Section 1.
*Section 1. AS 08.54.144(c) is amended to read:
(c) Master guides, registered guides, class-A assistant guides or assistant guides are exempted from the license requirements for transporters under this chapter and may not be required to be certificated as air taxi operators under AS 02.05.040 for transporting activities incidental to their activities as guides. Master guides, registered guides, class-A assistant guides or assistant guides [BUT] shall comply with the reporting provisions as prescribed in AS 02.05.170(f).

renumber sections accordingly

Senator Rodey moved and asked unanimous consent for the adoption of amendment No. 1. Senator Sackett objected.

Senator Rodey moved and asked unanimous consent that amendment No. 1 be withdrawn. Without objection, it was so ordered.

CS SB 101 Senator Colletta moved and asked unanimous consent that the Rules be suspended and COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 101 be considered engrossed, advanced to third reading and placed on final passage. Senator Ray objected, then withdrew his objection. There being no further objection, the bill was advanced to third reading.

COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 101 was read the third time.

The question being: "Shall COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 101 (relating to the disciplining of a licensed guide) pass the Senate?" The roll was taken with the following result:

Yeas:	15	Bennett, Bradley, Colletta, Dankworth, Fahrenkamp, Hackney, Hohman, Kelly, Kerttula, Meland, Ray, Rodey, Sturgulewski, Tillion, Ziegler
Nays:	2	Ferguson, Sackett
Excused:	3	Mulcahy, Stimson, Summer

and so, COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 101 passed the Senate.

Senator Rodey gave notice of reconsideration on COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 101.

SECOND READING OF SENATE RESOLUTIONS

SJR 7 SENATE JOINT RESOLUTION NO. 7 (expressing disappointment in and disapproval of President Carter's recent withdrawal of Alaska land under the Antiquities Act) was read the second time.

Senator Colletta moved and asked unanimous consent that the Rules be suspended and SENATE JOINT RESOLUTION NO. 7 be considered engrossed, advanced to third reading and placed on final passage. Without objection, it was so ordered.

SENATE JOINT RESOLUTION NO. 7 was read the third time. SJR 7

The question being: "Shall SENATE JOINT RESOLUTION NO. 7 (expressing disappointment in and disapproval of President Carter's recent withdrawal of Alaska land under the Antiquities Act) pass the Senate?" The roll was taken with the following result:

Yeas:	16	Bennett, Bradley, Colletta, Dankworth, Fahrenkamp, Hackney, Hohman, Kelly, Kerttula, Meland, Ray, Rodey, Sackett, Sturgulewski, Tillion, Ziegler
Nays:	1	Ferguson
Excused:	3	Mulcahy, Stimson, Sumner

Senator Ferguson changed his yea vote to nay.

and so, SENATE JOINT RESOLUTION NO. 7 passed the Senate.

Senator Ferguson gave notice of reconsideration on SENATE JOINT RESOLUTION NO. 7

SENATE RESOLUTION NO. 4 (objecting to the termination of the Mutual Defense Treaty with the Republic of China) was read the second time. SR 4

Senator Colletta moved and asked unanimous consent that SENATE RESOLUTION NO. 4 be returned to the Rules Committee to be calendared to a time certain. Without objection, it was so ordered.

UNFINISHED BUSINESS

President Tillion stated that the following bills and resolution would have a further referral to the Finance Committee:

SENATE BILL NO. 114 (relating to competitive bidding under the Fiscal Procedures Act) SB 114

SENATE BILL NO. 121 (providing for the certification to compliance with minimum standards of companies engaged in welding) SB 121

SB 135	SENATE BILL NO. 135 (relating to private employment agencies)

Committee on Community & Regional Affairs

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

February 5, 1979

TO: The Honorable Clem Tillion
President, State Senate
The Honorable Mike Colletta
Chairman, Senate Rules

FROM: Arliss Sturgulewski
Senator

RE: Kodiak - Joint Public Hearing of the Senate and House Community and Regional Affairs Committees, February 10, 1979.

As discussed with you and Senator Colletta earlier, this memorandum explains in further detail the planned trip to Kodiak. This Joint Hearing is being held for the consideration of "Recommendation for Annexation of Territory to the City of Kodiak" as submitted to the Eleventh Legislature by the Alaska Local Boundary Commission; Senate Joint Resolution 12 and House Joint Resolution 10. The decision to go to Kodiak was made because of the great amount of interest expressed by affected citizens of the Kodiak community.

Although there are some individual differences in schedules, itinerary plans show the majority of the committee members leaving Juneau 5:30 p.m., Friday, February 9, 1979; overnighting Anchorage; going to Kodiak Saturday, February 10, and returning to Juneau 10 p.m., Sunday; thereby not missing any working legislative day.

The following Senate Community and Regional Affairs' members and staff will be traveling to Kodiak: Senators Mulcahy, Rodey, Kelly, and Sturgulewski. Staff includes Administrative Assistant Gene Walsh and Secretary Twyla Hartsock. See attached traveling schedule for complete details.

Expenses are to be handled in the following manner:

Each Committee will handle their own transportation costs and per diem for staff.

General expenses, phone calls, etc., will be handled by Senate Community and Regional Affairs Committee.

Advertising costs will be divided between the two Committees.

We understand written approval from you is needed in order to complete final travel arrangements and payments. Your approval would be appreciated as soon as possible.

FROM: Arliss Sturgulewski
Chairman

RE: February 10, 1979, Joint Public Hearing in Kodiak

Attached is a traveling schedule for those members attending the above Hearing. By going as a group, we will receive a group discount on our plane fares. My office made and received confirmed reservations for our block trip (transportation plus Travelodge rooms in Kodiak); and after coordinating with your offices, your schedules appear as stated on this attachment. If you anticipate any changes, please contact my secretary. Also attached is a copy of the proposed agenda for our Joint Hearing.

We all realize our primary reason for this trip. In the event we do have some time left following our Hearing Saturday evening, legislators and staff have been invited to a League of Women Voters meeting.

An informal breakfast is tentatively being arranged by concerned citizens who wish to speak on the Development City Act and its proposed use on Afognak Island. They would like to meet with as many of the Joint Committee members as possible. Other Kodiak citizens may wish to meet with legislators at this informal breakfast also.

More specifics on the above; time, place, etc., will be announced later.

RE: Other events in Kodiak, February 10-11, 1979.

As you no doubt already know, following our arrival in Kodiak, February 10, a bus tour will be given our (Joint) group, showing the proposed annexation area, before taking us to the Travelodge, and our Public Hearing at 2 p.m. (You already have your Public Hearing Agenda.)

Following the Public Hearing, or in the event a dinner break is taken, the Russian Dancers desire to perform for us at 7:30 p.m.. They are in the process of making dinner arrangements for our group at one of the dining places large enough to accommodate their performance.

Senator Rodey's office has advised there will be a no-host, informal, cocktail get-together at the Sheffield Travelodge, around 8 p.m., for anyone who would like to attend.

An 8 a.m. breakfast at the Travelodge is being arranged by citizens of Kodiak desiring to speak to our group, especially on the Development Cities Act in connection with Afognak Island.

The following reservations remain confirmed for our Committee members: Senators Mulcahy, Sturgulewski, Rodey, Kelly; and staff: Hartsock, Walsh.

2/10/79 Lv. Juneau 5:50 p.m. -- Arr. Anchorage 5:15 p.m. via Alaska Airlines
2/11/79 Lv. Anch. 9:30 a.m. -- Arr. Kodiak 10:20 a.m. via Wien Airlines

OVERNIGHT SHEFFIELD TRAVELODGE

STATE OF ALASKA

JAY S. HAMMOND, Governor

DEPT. OF COMMUNITY & REGIONAL AFFAIRS

OFFICE OF THE COMMISSIONER

POUCH B
JUNEAU, ALASKA 99811

January 18, 1980

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Tillion:

In accordance with the provision of House Concurrent Resolution No. 7 as amended, presented herewith is a report reviewing the progress made to provide services to the "urban" resident of the Kodiak Island Borough not residing within the City of Kodiak.

The report is a brief summary of the existing situation in Kodiak, progress that has been made this past year, and recommendations for further action to resolve the problems that still exist before water and sewer services can be provided to residents living outside the City of Kodiak boundary.

Sincerely,

Lee McAnerney
Commissioner

Enclosures

21-P2LH

Report to the Second Session of the Eleventh Legislature Relating to Review of Services Provided to the Residents in the Kodiak Island Borough

Prepared and Submitted Pursuant
to House Concurrent Resolution No. 7AM
by the Department of Community and Regional Affairs

January 18, 1980

Background

As a result of a petition to annex a small area into the City of Kodiak the Local Boundary Commission (LBC) held two public hearings, one on December 12, 1977 and the other on May 20, 1978, to take public testimony on the annexation of a larger area to the City of Kodiak. This area included the Spruce Cape area, the Mill Bay Road area, the Monashka Bay area, and the United States Coast Guard Station. Following the public hearing the LBC recommended to the First Session of the Eleventh Legislature that all of the areas, except the Coast Guard Station, be annexed to the City of Kodiak. The Legislature disapproved this annexation by adoption of House Joint Resolution 10. The Legislature, in House Concurrent Resolution No. 7 amended, requested the Department of Community and Regional Affairs to study the various options to provide "services throughout the road system extending North and Northeast of the City of Kodiak" and to submit a report to the Legislature by January 20, 1980.

Progress to Date

During 1979, the City of Kodiak and the Kodiak Island Borough worked together to devise an acceptable compromise to provide services to the residents of Service District #1 which includes the area proposed by the LBC for annexation. The Department was kept apprised of these negotiations, and it was clear that the City and Borough wished to work its problem out without C&RA involvement.

The negotiations centered around providing water and sewer service to an area referred to as Service District #1, which includes the Island Lake and Spruce Cape areas. The City of Kodiak indicated in writing in December, 1979, that "the City's attitude does not preclude small annexations as requested through the presentation of 100% petitions, but does reject the idea of major annexations". This attitude would also preclude the provision of services by instituting a step annexation. The Local Boundary Commission has also stated that it will not pursue annexation in the City of Kodiak area on its own and will only become involved if petitioned.

The method of providing service through a service district approach appears to have the mutual support of the City and Borough. The City is willing to provide water at the city boundary to Service District #1 and to treat effluence from this area. The City will provide water meters to allow for the billing to the Borough for the residents getting water and sewer service in the area outside the city.

The major concerns that need to be resolved deal with the operation and maintenance of the water and sewer utility service. A rate study needs to be conducted and the City and Borough have not, as of this date, reached an agreement on selection of a consulting firm to do this work. The City has stated that it does not wish to become involved in any contractual arrangement to operate and maintain the water and sewer systems within Service District #1. City Mayor Al Beardsley states that this "maintenance (within Service District #1) can just as easily be contracted (by the Borough) with a private firm". Agreement has been reached to allow the City inspection privileges during

installation of sewer lines to minimize infiltration into the sewer collection system within Service District #1.

Public Meeting

On January 12, 1980 Commissioner Lee McAneerney convened a public meeting for the purpose of receiving public comment regarding the "best" way to provide services to those residents of the Kodiak "urban" community outside the City of Kodiak. The managers of both the City and Borough, the city mayor, seven other assembly or council members, and fourteen public participants were present at the meeting.

Thirteen persons testified during the meeting. The overwhelming majority of those testifying favored the direction that the City and Borough have taken in negotiations between these two local governments. The testimony expressed a feeling that the service district approach gives the residents involved more alternatives in the level of service they will receive.

One person testified in favor of annexation of Service District #1 to the City of Kodiak as the best short-term alternative with unification of the City and Borough being the long-term or ultimate solution.

Future Outlook

This Department is prepared to assist the City of Kodiak and the Kodiak Island Borough in their attempt to work out remaining differences between them. Both the City and Borough should be commended for the progress that has been made to date. There is no reason to think that the remaining

differences cannot be worked out within the next few months.

The question of unification will again appear on the October, 1980 ballot. If this proposition is approved, jurisdictional problems in providing services to Kodiak Island residents would be resolved.

The Department concludes that no further action is required by the Legislature, the Local Boundary Commission or this Department, at this time, in the matter of provision of municipal services to residents living within the Kodiak "urban" area.

678 MEETING ADJOURNED

CSHB 1031

Representative Metcalfe changed his vote from "nay" to "yea."

And so, CSHB 1031 passed the House.

Representative Anderson moved and asked unanimous consent that the roll call on the passage of CSHB 1031 be considered the roll call on the effective date clause. There being no objection, it was so ordered.

CSHB 1031 was referred to the Chief Clerk for engrossment.

SECOND READING OF HOUSE RESOLUTIONS

HCR 67

HOUSE CONCURRENT RESOLUTION NO. 67 (relating to the Inuit Circumpolar Conference) was read the second time with the Community and Regional Affairs Committee report (page 1303 of the journal).

Representative Anderson moved and asked unanimous consent that COMMITTEE SUBSTITUTE FOR HOUSE CONCURRENT RESOLUTION NO. 67 (same title) be adopted in lieu of the original resolution.

Representative Malone objected.

Representative Zharoff moved and asked unanimous consent that he be allowed to change his recommendation on the Community and Regional Affairs Committee report from "do pass" to "do not pass as amended." There being no objection, it was so ordered.

The question being: "Shall CSHCR 67 be adopted?" The roll was taken with the following result:

HCR 67 HCR 67 MOTION

Yeas:	16	Barnes, Beirne, Bettisworth, Chatterton, Freeman, Halford, Hayes, McKinnon, Martin, Meekins, Montgomery, O'Connell, Parr, Phillips, Randolph, Smith
Nays:	22	Anderson, Branson, Brown, Buchholdt, Carney, Cotten, Duncan, Eliason, Fuller, Gardiner, Guy, Hurlbert, Malone, Metcalfe, Miles, Miller, Moss, Munson, Osterback, Parker, Rogers, Zharoff
Not Voting:	2	Haugen, Schaeffer

And so, CSHCR 67 was not adopted.

The question then being: "Shall HCR 67 pass the House?" The roll was taken with the following result:

HCR 67

Yeas:	23	Anderson, Bettisworth, Branson, Brown, Buchholdt, Cotten, Duncan, Eliason, Fuller, Gardiner, Guy, Hurlbert, McKinnon, Malone, Martin, Miles, Miller, Munson, Osterback, Parker, Rogers, Smith, Zharoff
Nays:	13	Beirne, Carney, Chatterton, Freeman, Halford, Meekins, Metcalfe, Montgomery, Moss, O'Connell, Parr, Phillips, Randolph
Not Voting:	4	Barnes, Haugen, Hayes, Schaeffer

Representative Meekins changed his vote from "yea" to "nay."

Representative Carney changed his vote from "yea" to "nay."

Representative Halford changed his vote from "yea" to "nay."

Representative Moss changed his vote from "yea" to "nay." HCR 67

Representative Freeman changed his vote from "yea" to "nay."

And so, HCR 67 passed the House.

Representative Randolph served notice of reconsideration of the vote on HCR 67. Not taken up 5-13-80

MEMBERS PRESENT:

Bill Parker	X	Pat Carney	X
Margaret Branson		Charlie Parr	X
Pat O'Connell	X	Fred Zharoff	X
		Ray Metcalfe	X

Rep. Parker reviewed the Resolution and discussed the purpose of the Circumpolar Conference as being an awareness builder and reinforcement for cultural identity.

The commitee decided to eliminate the wording related to "delegation" p. 1 lines 26-29

A committee substitute will be drafted to reflect this change and the bill, as a CS, was passed out of Committee.

HS. "CS" was voted down on floor 5-13-80

COMMITTEE ACTION: CS to be drafted to reflect above indicated intent and the bill was signed out.

Prime Sponsor (First Legislator Named)

(Rev. 12/79)

THELMA
BUCHHOLDT
Alaska State Legislature
House of Representatives
Juneau, Alaska 99811

May 16, 1980

To Senator Arliss Sturgulewski
Senate CRA Committee Chair

From Rep. Thelma Buchholdt TB
House HESS Chair

Subject HCR 67 am (Inuit Circumpolar Conference)

Arliss, I'd appreciate it if you'd schedule the above resolution and report it out as soon as possible so that it can get Senate floor action before we adjourn. I'm available to testify before your committee, if necessary.

I attended the first Inuit Circumpolar Conference in Barrow. I don't expect to attend this second conference that will be held in Nuuk which is the subject of HCR 67 am.

As far as the selection of participating legislators to the Second Inuit Circumpolar Conference, I assume 2 would be appointed by the Speaker and 2 by the President of the Senate.

Enclosed for your review are: 1) A booklet published following the Barrow conference which contains the list of participants and resolutions passed by the delegates; and 2) Informational material on the forthcoming conference in Nuuk from June 28 to July 1, 1980.

Thank you.

КОНФЕРЕНЦИЯ ИНУИТОВ /ЭСКИМОСОВ/ ПРИПОЛЯРНЫХ ОБЛАСТЕЙ
28 июня - 1 июля 1980 года
Нуук /Годтаб/, Гренландия

ОБЪЯВЛЕНИЕ

Я, майор Эбен Хопсон, Председатель, имею честь объявить, что очередная Конференция 1980 года инуитов /эскимосов/ приполярных областей будет проведена 28 июня - 1 июля 1980 года в Нууке, Гренландия. Мы с удовольствием сообщаем, что в результате голосования Парламента новое автономное /гомрульное/ правительство Гренландии, возглавляемое премьер-министром г-ном Йонатаном Мотцфельдтом, считая нашу Конференцию весьма важным событием, приглашает нас собраться в их стране.

Исполнительный Комитет представит собравшимся доклад о своей деятельности на основе резолюций, принятых на Конференции 1977 года инуитов /эскимосов/ приполярных областей, проведенной в Барроу, Аляска.

Уполномоченные делегаты от региональных и национальных организаций инуитов на Аляске, в Канаде и в Гренландии /по 18 делегатов от каждого из этих трёх больших регионов, трёх инуитских народов/ получат проект Хартии, объявляющей о создании постоянной приполярной организации.

В секциях Конференции мы обсудим следующие проблемы и вопросы:

- культурное наследие;
- техническое оснащение стойбища и его прогресс;
- образование и инуитский язык;
- защита природы и регулирование охоты;
- развитие арктических ресурсов в настоящем и будущем;
- здравоохранение и благосостояние;
- транспорт и связь в Арктике.

Инуиты-мастера народных промыслов организуют в Национальном Музее Гренландии выставку "Культурное наследие инуитов", в которую войдут как изделия современных мастеров, так и их предшественников. Будут показаны фильм и слайды о коренных обитателях Арктики. Во время нашего пребывания в Нууке инуиты-танцоры, певцы и актеры покажут нам свое искусство.

Размещение участников Конференции в Нууке - ответственная задача, поэтому абсолютно необходимо, чтобы каждый желающий принять участие в Конференции известил нас об этом, заполнив и переслав нам прилагаемую анкету не позднее 15 апреля 1980 года. Регистрационный взнос равен 100 долларам с каждого участника и должен быть уплачен в течение 30 дней с того момента, как вы получили подтверждение об этом до 15 апреля 1980 года, и этому же времени мы сообщим вам подробную информацию о маршруте. Исключительно важно помнить, что по законам Дании, составной частью которой является Гренландия, лицо, въезжающее в Гренландию, должно иметь на руках непросроченный, действительный паспорт.

Майор Эбен Хопсон,

Председатель.

КОНФЕРЕНЦИЯ ИНУИТОВ /ЭСКИМОСОВ/ ПРИПОЛЯРНЫХ ОБЛАСТЕЙ

Нуук, Гренландия

Я желаю принять участие в Конференции 1980 инуитов /эскимосов/ приполярных областей в Нууке, Гренландия. Будьте добры прислать мне регистрационные материалы.

Анкета должна быть возвращена не позднее 15 Февраля 1980 года.

INUIT CIRCUMPOLAR KONFERENCE

28 Juni - 1 Juli 1980

Nuuk (godthaab) Grønland

Det er mig en @re og fornøjelse at meddele at Inuit Circumpolar Konferencen 1980 skal holdes i Nuuk, Grønland fra den 28 Juni til 1 Juli 1980. Det er os en gl'de at den nye Hjemmestyre Regering ved Parliamentets valg under ledelse af premierminister Jonathan Motzfeldt har inviteret denne betydningsfulde konference til at møde der.

Den Executive Bestemmelses Komite vil give rapport til Konferencen om det framskridt der er fundet sted siden resolutionerne ved Inuit Circumpolar Konferencen i Barrow, Alaska i 1977.

De officielle deltagere fra regionale and nationale Inuit organisationer i Alaska, Canada og Grønland (18 personer fra hver nation) vil modtage et foreslaaet document for oprettelsen af en permanent Circumpolar Organisation.

Vi vil i smaa grupper diskutere problemer og resultater paa omraader som:

Kultur og Arv
Udsteds Teknologi og Udvikling
Undervisning og Inuit Sproget
Milieu Bevarelse og Dyrebeskyttelse
Eksisterende og Fremtidig Arktisk Naturkilde Udvikling
Arktisk Transport og Forbindelse

Inupiat kunstnere vil udstille nogle af deres arbejder og Inuit kunstgenstande vil blive udstillet i Grønlands National Museum. Film og lysbilleder vil blive vist. Inuit dansere, sangere, og skuespillere vil give mange opvisninger under besøget i Nuuk.

Der er yderst begr@nsede hotelmuligheder for konferencens deltagere, saa derfor er det nødvendigt for alle der ønsker at deltage at vise deres interesse ved at returnere det vedh@ftede postkort ikke senere end 1 April 1980. Registreringsbeløbet er $100 pro persona, og maa betales inden 30 dage fra hotelreservationen er bekr@ftet. Reservationen vil blive bekr@ftet inden 1 Maj 1980 og endelig oplysning om transport ruter vil blive givet paa det tidspunkt.

V@r venlig at huske at lovene for Danmark, inklusiv Grønland, kr@ver at enhver deltager der rejser ind i grønland har et g@ldende pas.

Borgmester Eben Hopson

Formand

INUIT CIRCUMPOLAR KONFERENCEN

Nuuk, Grønland

INUIT CIRCUMPOLAR CONFERENCE
June 28 - July 1, 1980
Nuuk, (Godthab), Greenland

It is my honor and privilege to announce the 1980 Inuit Circumpolar Conference to be held in Nuuk, Greenland, on June 28 - July 1, 1980. We are pleased that the new Home-Rule Government by vote of the Parliament, under the leadership of Premier Jonathan Motzfeldt has invited this important convention to meet there.

The Executive Resolutions Committee will report to the Convention on the progress achieved since resolutions were adopted by the 1977 Inuit Circumpolar Conference in Barrow, Alaska.

The official delegates from regional and national Inuit organizations in Alaska, Canada and Greenland (18 persons from each nation) will receive a proposed Charter for the establishment of a permanent circumpolar organization.

We will in workshops discuss the problems and issues in the areas of:

- Cultural Heritage
- Village Technology
- Education and Inuit Language
- Environmental Protection and Game Management
- Existing and Projected Arctic Resource Development
- Health and Welfare
- Arctic Transportation and Communication

Inuit Artistic people will display some of their works and the history of Inuit heritage will be exhibited in the National Museum of Greenland. Film and slides in and around the people of the Arctic will be shown. Inuit dancers, singers, and actors will offer many performances during our stay in Nuuk.

There are extremely limited accomodations for convention participants; therefore, it is absolutely necessary for everyone wishing to attend indicate their interest by returning the attached postcard no later than April 1, 1980. The registration fee will be $100.00 per person, and must be paid within 30 days of confirmation of accomodations. Accomodations will be confirmed by May 1, 1980, and definite information about transportation routes will be provided at that time. Please remember that the laws of Denmark, including Greenland, require any person entering Greenland to have a currently valid Passport.

MAYOR EBEN HOPSON,
CHAIRMAN

INUIT CIRCUMPOLAR CONFERENCE
Nuuk, Greenland

I am interested in attending the 1980 Inuit Circumpolar Conference in Nuuk, Greenland. Please send me registration materials.

	Pat O'Connell			Fred Zharoff	X
				Ray Metcalfe	X

Eric Yould, Executive Director, Ak. Power Authority

Yould gave the history of the projects and discussed the finances and feasibility of the hydro facilities. Indicated that $500,000 had already been expended in studing the feasibility of the projects (during 1977-78) and that $3.1 Million has been expended on the Swan Lake project and $2 Million on the Tyee.

Estimates indicate it would cost Petersburg $5,000000 extra to convert to electricity.

Yould indicated that in fact it might be a viable alternative to run Tyee to Ketchikan.

It appeared that on the life cycle analysis, Swan Lake is preferable to Mahoney.

The relationship between hydro and development is not always clear but the presence of cheap power can stimulate develpment.

Yould responded to the questions (see attached) asked by the Chairman.

Carney questions the feasibility of having later users share in the major costs of building the hydro projects. Response indicated that there would be potential psycholicial problems in voting on a bond which someone else was going to be paying for. This restriction on a bond might effect its marketability.

COMMITTEE ACTION: Passed bill out.

TAPE # 3 SIDE 1 Footage 0-024

Bill from Mayone

TYEE AND SWAN LAKES HYDRO PROJECTS

AREAS FOR DISCUSSION

Among the projects submitted by the Alaska Power Authority, how do Tyee and Swan Lake rank in terms of priority for funding?

Explanation of the funding approach involved in the projects--you might want to have "subordinated loans" explained.

What community growth rate was calculated in the development of the user and cost figures?

Was the public involved in the discussion of the relative costs of the alternatives explored?

What is the "backup" system requirement? Does it have to be a certain % of the capacity of the main system? And if so, does building a larger hydro facility necessitate a larger diesel backup and therefore increase the costs to the consumer? ✓

More Specific questions

What is the status of the City Creek hydroelectric project in Petersburg and how does it relate to the Tyee project?

Has there been full exploration of the possibility of Tyee serving the Ketchikan community? Or of Swan serving the Petersburg/Wrangell areas? Interties possibilities?

It appears that a factor which may lessen the adverse effect of excess capacity of the Swan Lake facility is the possible sale of power to Louisiana Pacific Corp. HOw likely is this possibility? Have the relative costs to the consumer of carrying the excess capacity anticipated in both these projects been evaluated ? Have the merits of a facility with smaller capacity been fully explored?

Questions generated by 2/25/80 hearing on bill:

Testimony was given that the existing diesel generators are old and will eventually need replacement. Was the cost of this replacement calculated in the cost figures for the hydro projects?

different financial options - service Petersburg/Wrangell - dependent on electrical conversion

Report
to the

ALASKA POWER AUTHORITY

in regard to

the Plan of Finance of
the Tyee Lake Hydroelectric Project

FIRST *Southwest* COMPANY
Anchorage, Alaska
Dallas, Texas

INTRODUCTION

The Thomas Bay Power Commission, having made the decision to discontinue its reliance on the use of diesel electric generation to meet existing and future power demands, has requested the assistance of the Alaska Power Authority (the "APA") in the financing and construction of the Tyee Lake Hydroelectric Project (the "Project") as a capital project of the State. The Thomas Bay Power Commission is composed of the Cities of Petersburg and Wrangell (the "Cities").

This report is a preliminary analysis of four alternatives containing various combinations of State funding and revenue bond funds. The impact of each alternative on electric costs has been estimated, based upon certain assumptions set forth in the report.

THE PROJECT

The Project is a major hydroelectric generating facility located at Tyee Lake, approximately 40 miles southeast of the City of Wrangell, Alaska. Tyee Lake is a natural lake perched 1,370 feet above the Bradfield Canal.

The Project,Stage 1 of two stages, consists of a ten foot diameter unlined tunnel, 6,785 feet in length, between Tyee Lake and Bradfield Canal, a gate shaft and gate, a surge tank, a steel penstock, a powerhouse containing two 10,000 KW impulse turbine-generator sets and a 115 KV transmission line approximately 83 miles in length connecting the Project with the Cities of Wrangell and Petersburg. (See Figure 1.) Stage 2 (a potential future addition) consists in large part of the addition of a dam.

The Project is designed to have an installed capacity of 20,000 KW and a firm capacity of 8,900 KW. It is designed to be capable of delivering 114,100,000 KWH average annual energy and 75,200,000 KWH of firm annual energy.

Robert W. Retherford Associates, a division of International Engineering Company, Inc., concluded in their Definite Project Report dated December, 1979, that the Project "is the most economical means by which the Cities can meet the immediate and future energy requirements of their service areas".

Although the Project output is not expected to be fully utilized for 11 years, the Cities will derive long term benefits from the Project by replacing their diesel generating facilities with power from relatively fixed cost hydroelectric facilities.

THE CITIES

The City of Petersburg, a community located in Southeast Alaska, has a current population of approximately 3,200. Petersburg has total of 7,630 KW installed capacity, 79% of which is diesel generation and 21% of which is hydroelectric generation. During the year ended December 31, 1979, Petersburg sold approximately 19,600,000 KWH and has experienced a load growth of approximately 4.7% per year over the last five years.

The City of Wrangell, located approximately 32 miles from Petersburg, has a current population of approximately 3,200. Wrangell has a total of 7,750 KW primary installed capacity, all of which is diesel generation. During the year ended December 31, 1979, Wrangell sold approximately 11,600,000 KWH and has experienced a load growth of

approximately 5% per year over the last five years.

PROPOSED PLAN OF FINANCE

It is proposed that APA revenue bonds be issued pursuant to an Indenture of Trust between APA and a trustee bank. From the proceeds of this bond issue and a proposed subordinated State loan, the Project would be constructed. APA would own and operate the Project and sell power to the Cities pursuant to a Wholesale Power Sales Agreement. APA would covenant to set its wholesale rates at the level projected to be necessary to generate gross revenues at least equal to (a) 1.25 times debt service on the Bonds, (b) projected operation and maintenance expenses of the Project, and (c) debt service requirements of the State loan. The funds the APA generates from the 25% coverage requirement would be used for improvements and extensions of the Project and to provide funds that could be used to redeem the APA revenue bonds (thus lowering future debt service requirements).

A Reserve Fund equal to average annual debt service requirements and a Contingency Fund equal to 6 months average annual debt service requirements would be capitalized from bond proceeds. The Contingency Fund could be used to pay extraordinary repairs and maintenance on the Project and, if needed, to pay debt service on the Bonds. Both funds would have to be replenished if drawn upon.

The Bonds would be amortized over 40 years with the Revenue and Contingency Funds being used to pay the last 18 months' debt service.

THE NEED FOR STATE ASSISTANCE

The need for State assistance arises when the Project is reviewed from the standpoint of financeability. The long term economic feasi-

bility of the Project appears to be established in that diesel fuel prices are expected to continue rising over time while the costs of capital intensive hydroelectric generating facilities are relatively fixed. The most critical concern in terms of ability to finance the Project in the tax-exempt bond market is the substantial excess capacity that may exist in the early years of Project operation and its adverse effects on electric costs in the short run. In the first full year of Project operation (1985), its firm energy of 75,200,000 KWH will result in significant excess capacity relative to the projected 33,726,000 KWH of energy from diesel generation which the Project would displace in that year. Thus, rates must be increased to the extent necessary to satisfy the debt service requirements attributable to this 41,474,000 annual KWH excess. Although high electric rates are certainly undesirable from the personal financial standpoint of the Petersburg/Wrangell consumer, they also increase the bond market's perceived risk of an obligation in that economic growth in the area may be retarded.

There are three significant factors which together may lessen the adverse effect of excess capacity on the Cities' electric costs. The first factor is the possible sale of a block of power in the distant future to Ketchikan Public Utilities ("KPU"). This sale could only occur after terms of the sale are negotiated following elimination of excess capacity in the Swan Lake Project and after a transmission line is constructed between the three electric systems (see fig. 2). The sale, in any case, could only assist the Project in the long run.

The second factor is the potential increased demand from conversion of oil-fired residential heating in the Cities to the use of electric

heatpumps. The extent and timing of such conversion cannot now be projected.

The third factor which ameliorates the adverse cost effects of excess capacity is a loan from the State, repayment of which would not be required until after full capacity is reached. State assistance in the form of a subordinate loan is justified in that the ability to obtain conventional financing for the Project under reasonable terms is enhanced. The State loan would lower electric rates in the following ways:

(1) Interest payments on the loan would be partially deferred and principal repayment fully deferred until full capacity is attained, thereby minimizing the adverse rate effects of excess capacity in the early years of Project operation.

(2) The loan is subordinated to the APA revenue bonds, thus enabling the APA to obtain a more favorable interest rate than would otherwise be possible.

(3) The 25% debt service coverage requirement would not be applied to the loan debt service requirements, thus resulting in significant rate relief.

The terms of the loan as proposed approximate the terms of the Sitka-Green Lake loan and are described in more detail in Appendix B. The assumed 7% interest rate approximates the State's own cost of borrowing. Although the actual interest rate could range from 5% to 7%, the more conservative rate was used in the analysis.

ANALYSIS OF STATE FUNDING ALTERNATIVES

Four alternative financings, assuming four different levels of State subordinated funding, are illustrated in Appendix B, based upon

the assumptions set forth in Appendix A. The estimated average wholesale cost per KWH for each alternative are set forth below:

		Estimated Average Cost per KWH (1985)	(1986)	(1991)	(1996)
I.	No State Loan*	20.7¢	20.2¢	14.4¢	12.0¢
II.	$ 5,000,000 State Loan	19.0¢	18.7¢	13.7¢	11.8¢
III.	$10,000,000 State Loan	17.4¢	17.1¢	13.0¢	11.6¢
IV.	$15,000,000 State Loan	15.8¢	15.5¢	11.0¢	9.7¢

The estimated average retail cost per KWH for each alternative and for each city are calculated in Appendix C and set forth below:

Petersburg

		Estimated Average Cost per KWH (1985)	(1986)	(1991)	(1996)
I.	No State Loan*	16.1¢	16.4¢	14.2¢	13.2¢
II.	$ 5,000,000 State Loan	15.1¢	15.5¢	13.7¢	13.0¢
III.	$10,000,000 State Loan	14.1¢	14.5¢	13.1¢	12.9¢
IV.	$15,000,000 State Loan	13.2¢	13.5¢	11.7¢	11.4¢

Wrangell

		Estimated Average Cost per KWH (1985)	(1986)	(1991)	(1996)
I.	No State Loan*	24.7¢	24.2¢	18.8¢	16.8¢
II.	$ 5,000,000 State Loan	23.1¢	22.6¢	18.0¢	16.6¢
III.	$10,000,000 State Loan	21.5¢	21.0¢	17.3¢	16.4¢
IV.	$15,000,000 State Loan	19.9¢	19.4¢	15.3¢	14.5¢

*Without a State loan, the actual interest rate would be higher than the assumed rate, thus resulting in electric costs higher than the estimates set forth here.

The retail costs for Petersburg are materially lower than the Wrangell costs because of the low cost of hydroelectric facilities presently existing in Petersburg. Although all of the above cost estimates appear high, they are reasonable in comparison to future diesel generated energy if the price of diesel fuel continues to increase faster than the rate of inflation.

The assumptions used to derive the above cost estimates (set forth in more detail in Appendix A) are, in our opinion, conservative but realistic. Conservatism is required in any analysis involving the question of financeability. Any changes in the assumptions will have a material effect on the projections. In particular, the assumptions as to future Petersburg/Wrangell demand, the levels of inflation of construction costs and operating expenses and the terms of the State loan yet to be determined are all assumptions that have a material bearing on the results.

SUMMARY AND CONCLUSION

The Project appears to be needed by the Cities of Petersburg and Wrangell in order to discontinue their present reliance on diesel electric generation and to meet their future power needs. The Project appears to be technically and economically feasible. The excess capacity of the Project in its early years will increase electric costs during that period, thus raising the question of financeability. Although some of that excess capacity may be used to produce power to sell to Ketchikan Public Utilities at some time in the distant future and some conversion of oil-fired residential heating to electric heatpumps may occur, a State loan will mitigate the adverse cost effects of excess capacity if repayment of the loan is delayed until full capacity is reached.

We therefore recommend that at the very minimum a $10,000,000 State loan in support of the Project be authorized and that serious consideration be given to a $15,000,000 or greater loan amount to insure a more favorable financing in light of the high electric costs during the early years of Project operation. We believe that a large State loan is justified in light of the following:

(1) Without substantial State assistance, the Project, in our opinion, cannot presently be financed in the tax-exempt bond market at a reasonable rate of interest.

(2) A large loan would provide funding for the Project during the early stages of the construction period. The loan would provide timing flexibility for the revenue bond financing, thus enhancing APA's ability to obtain the lowest possible interest rate.

(3) State assistance in the form of a large subordinated loan would strengthen the overall Project financing, thus increasing assurance of repayment of both the APA revenue bonds and the State loan.

Report
to the

ALASKA POWER AUTHORITY

in regard to

the Plan of Finance of
the Swan Lake Hydroelectric Project
of the
Ketchikan Public Utilities System

FIRST *Southwest* COMPANY
Anchorage, Alaska
Dallas, Texas

INTRODUCTION

The City of Ketchikan, Alaska, having made the decision to discontinue its reliance on the use of diesel electric generation to meet existing future power demands, has requested the assistance of the Alaska Power Authority (the "APA") in the financing of its Swan Lake Hydroelectric Project (the "Project").

A plan of finance is proposed for the Project and a preliminary analysis of four alternatives containing various combinations of State funding and revenue bond funds is set forth. The impact of each alternative on electric cost has been estimated, based upon certain assumptions set forth in the report. The report concludes with our recommendation and justification thereof.

THE PROJECT

The Project is a major hydroelectric generating facility located at Swan Lake, approximately 22 air miles northeast of Ketchikan near the north end of Carroll Inlet. Swan Lake, a low-elevation lake surrounded by mountains, drains westward through a narrow gorge into Carroll Inlet via Falls Creek. (See Figure 1.)

The Project consists of a 190 foot high thin arch concrete dam located downstream from the outlet of Swan Lake, a concrete lined power tunnel leading to a powerhouse, a permanent port facility, access roads connecting the dam, powerhouse and port facility, a switchyard and approximately 30.5 miles of 115 KW wood pole transmission lines.

Petersburg-Wrangell-Ketchikan Area Location Map

SCALE IN MILES

0 5 10 20 30 40

Figure 1

PETERSBURG-WRANGELL-KETCHIKAN AREA

The Project is designed to have an installed capacity of 22,000 KW and a dependable capacity of 18,900 KW delivered to the load center. It is designed to be capable of delivering 85,400,000 KWH average annual energy and 66,700,000 KWH of firm annual energy to the load center.

R. W. Beck and Associates, Engineers and Consultants, concluded in their Evaluation Report dated June 1978 that the "Project is technically and environmentally feasible." Nevertheless, R. W. Beck's Demand and Energy Forecast dated January 11, 1980 indicates that "it appears that even if electrical loads grow at the highest projected rate in future years, there would still be significant amounts of both firm and secondary energy available for sale during the initial years of Project operation."

Booz, Allen & Hamilton, Inc., Consultants, have reviewed the Project reports and generally concur with the findings as to technical and economic feasibility. Their assessment is contained in Appendix A.

The central factor emphasized in all of the economic feasibility reports is the long term benefits KPU will derive by replacing its diesel generating facilities with relatively fixed cost hydroelectric facilities.

THE CITY

The City of Ketchikan, a community located in Southeast Alaska has a current population of approximately 8,600. Ketchikan Public Utilities ("KPU"), the municipally-owned public utility system, operates the electric, water and telephone system and provides electricity for a service area with a population of approximately 12,600.

The Project is designed to have an installed capacity of 22,000 KW and a dependable capacity of 18,900 KW delivered to the load center. It is designed to be capable of delivering 85,400,000 KWH average annual energy and 66,700,000 KWH of firm annual energy to the load center.

R. W. Beck and Associates, Engineers and Consultants, concluded in their Evaluation Report dated June 1978 that the "Project is technically and environmentally feasible." Nevertheless, R. W. Beck's Demand and Energy Forecast dated January 11, 1980 indicates that "it appears that even if electrical loads grow at the highest projected rate in future years, there would still be significant amounts of both firm and secondary energy available for sale during the initial years of Project operation."

Booz, Allen & Hamilton, Inc., Consultants, have reviewed the Project reports and generally concur with the findings as to technical and economic feasibility. Their assessment is contained in Appendix A.

The central factor emphasized in all of the economic feasibility reports is the long term benefits KPU will derive by replacing its diesel generating facilities with relatively fixed cost hydroelectric facilities.

THE CITY

The City of Ketchikan, a community located in Southeast Alaska has a current population of approximately 8,600. Ketchikan Public Utilities ("KPU"), the municipally-owned public utility system, operates the electric, water and telephone system and provides electricity for a service area with a population of approximately 12,600.

The existing hydroelectric facilities have produced average annual energy of approximately 63,000,000 KWH and the existing diesel facilities could produce 77,900,000 KWH.

During the fiscal year ended December 31, 1979, KPU sold 72,213,615 KWH and has experienced a load growth of approximately 4.6% per year over the last 10 years.

PROPOSED PLAN OF FINANCE

It is proposed that contract revenue bonds be issued by APA pursuant to an Indenture of Trust between APA and a trustee bank. From the proceeds of this bond issue and a proposed subordinated State loan, the Project would be constructed. Although APA would nominally own the Project when construction is completed, KPU would operate the Project, control its output and would obtain title to the Project through a bargain option to purchase after all obligations have been repaid. APA would enter into a contract with KPU under which KPU would agree, in consideration for its use of the facilities, to timely pay (a) amounts to the trustee equal to the principal and interest on the Bonds; and (b) principal and interest requirements on the State obligation. All payments to be made by KPU pursuant to the Contract would constitute reasonable and necessary operating expenses of KPU. The Indenture of Trust and the Contract must insure that KPU's obligation to pay its reasonable operation and maintenance expenses, including payments due under this contract, has priority over its obligations to make principal and interest payments on any of its other debts. KPU would covenant to set rates projected to be necessary to generate gross revenues at least

equal to (a) 1.25 times the payments under this Contract, (b) projected operation and maintenance expenses and (c) all other debt service payments in the upcoming year. The funds KPU generates from the 25% coverage requirement would be used to finance capital expenditures of the electric, water and telephone system and to provide funds that could be used to redeem the APA contract revenue bonds (thus lowering future debt service requirements).

A Reserve Fund equal to average annual debt service requirements and a Contingency Fund equal to 6 months average annual debt service requirements would be capitalized from bond proceeds. The Contingency Fund could be used to pay extraordinary repairs and maintenance on the Project and, if needed, to pay debt service on the Bonds. Both funds would have to be replenished by KPU if drawn upon.

The Bonds would be amortized over 40 years, with the Reserve and Contingency Funds being used to pay the last 18 months' debt service.

To implement the proposed plan of finance, defeasance of KPU's outstanding revenue bonds may be required.

THE NEED FOR STATE ASSISTANCE

The need for State assistance arises when the Project is reviewed from the standpoint of financeability. The long term economic feasibility of the Project appears to be established in that diesel fuel prices are expected to continue rising over time while the costs of capital intensive hydroelectric generating facilities are relatively fixed. The most critical concern in terms of ability to finance the Project in the tax-exempt bond market is the substantial excess capacity that may exist in the early years of Project operation and its adverse effects on electric cost in

the short run. In 1985, the Project's average annual energy of 85,400,000 KWH, when added to the 63,000,000 KWH from KPU's existing hydroelectric facilities, will result in significant excess capacity relative to the projected 96,000,000 KWH sales. This estimate of sales was prepared by R.W. Beck and Associates in January, 1980 and represents the low load and energy forecast based upon conservative growth assumptions. Thus, rates must be increased to the extent necessary to satisfy the debt service requirement attributable to this potential annual excess of 52,400,000 KWH. Although high electric rates are certainly undesirable from the personal financial standpoint of the Ketchikan consumer, they also increase the bond market's perceived risk of an obligation in that economic growth in the area may be retarded.

There are two significant factors which together may lessen the adverse effect of excess capacity on KPU electric costs. The first factor is the possible sale of a block of power to Louisiana Pacific Corporation ("LPK"). The size of this block of power could range from 5,000,000 KWH to 25,000,000 KWH per year. The exact dimensions of the purchase and the price and terms have yet to be negotiated and will depend on LPK's power alternatives. The actual cost effect will be a function of the amount of power purchased and the differential between the LPK price and KPU's average cost per KWH. Nevertheless, even under the most favorable circumstances, some excess capacity is projected to exist until 1993.

The second factor which ameliorates the adverse cost effects of excess capacity is a loan from the State, repayment of which would not be required until after full capacity is reached. State assistance in the form of a subordinated loan is justified in that the ability to obtain conventional financing for the Project under reasonable terms is enhanced. The State loan would lower electric

rates in the following ways:

(1) Interest payments on the loan would be partially deferred and principal repayment fully deferred until full capacity is attained, thereby minimizing the adverse rate effects of excess capacity in the early years of Project operation;

(2) The loan is subordinated to the APA revenue bonds, thus enabling the APA to obtain a more favorable interest rate than would otherwise be possible;

(3) The 25% debt service coverage requirement would not be applied to the loan debt service requirements, thus resulting in significant rate relief.

The terms of the loan as proposed approximate the terms of the Sitka-Green Lake loan and are described in more detail in Appendix B. The assumed 7% interest rate approximates the State's own cost of borrowing. Although the actual interest rate could range from 5% to 7%, the more conservative rate was used in the analysis.

ANALYSIS OF STATE FUNDING ALTERNATIVES

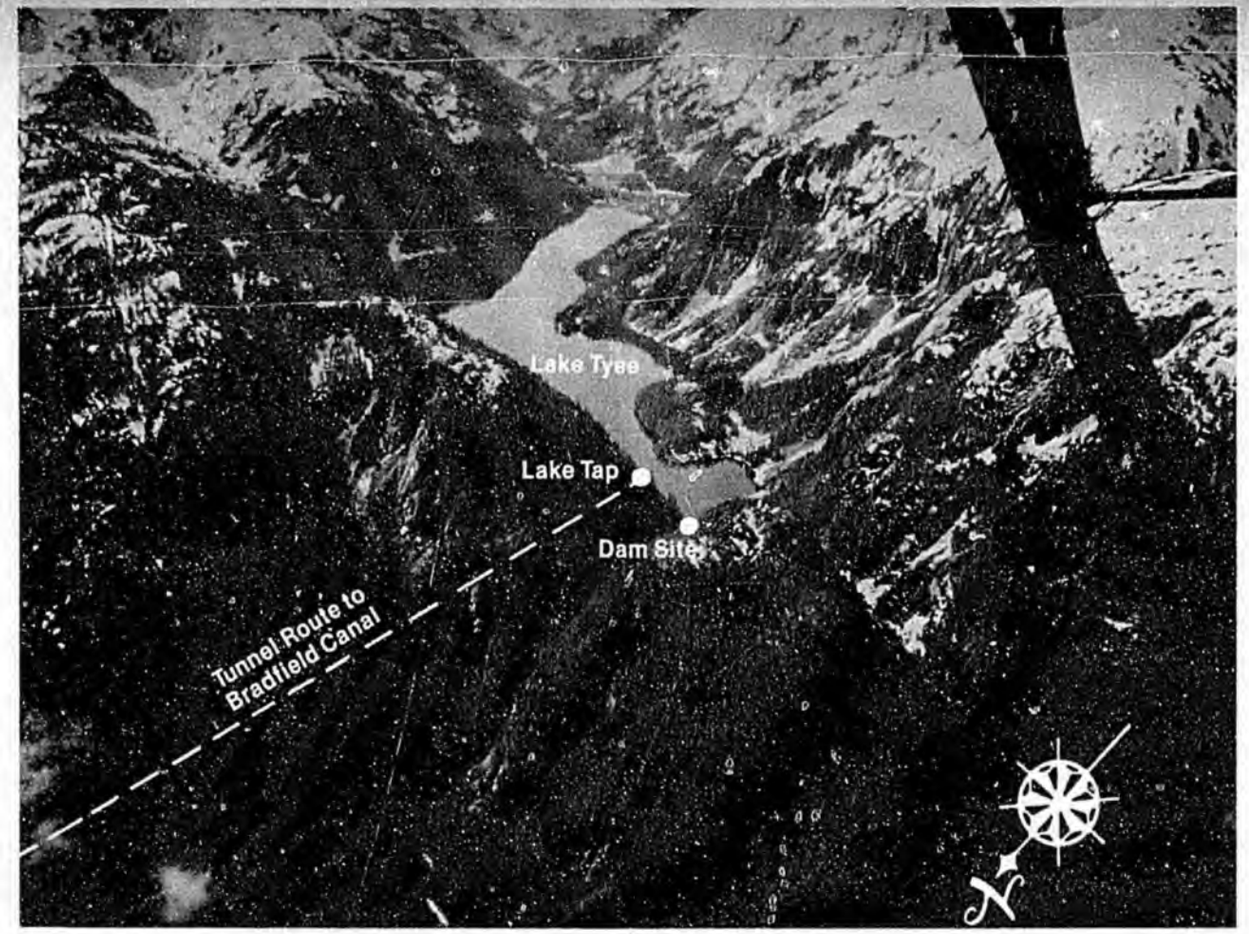
Four alternative financings, assuming four different levels of State subordinated funding, are illustrated in Appendix C, based upon the assumptions set forth in Appendix B. The estimated average cost per KWH for each alternative are set forth below:

Dam projects win House okay

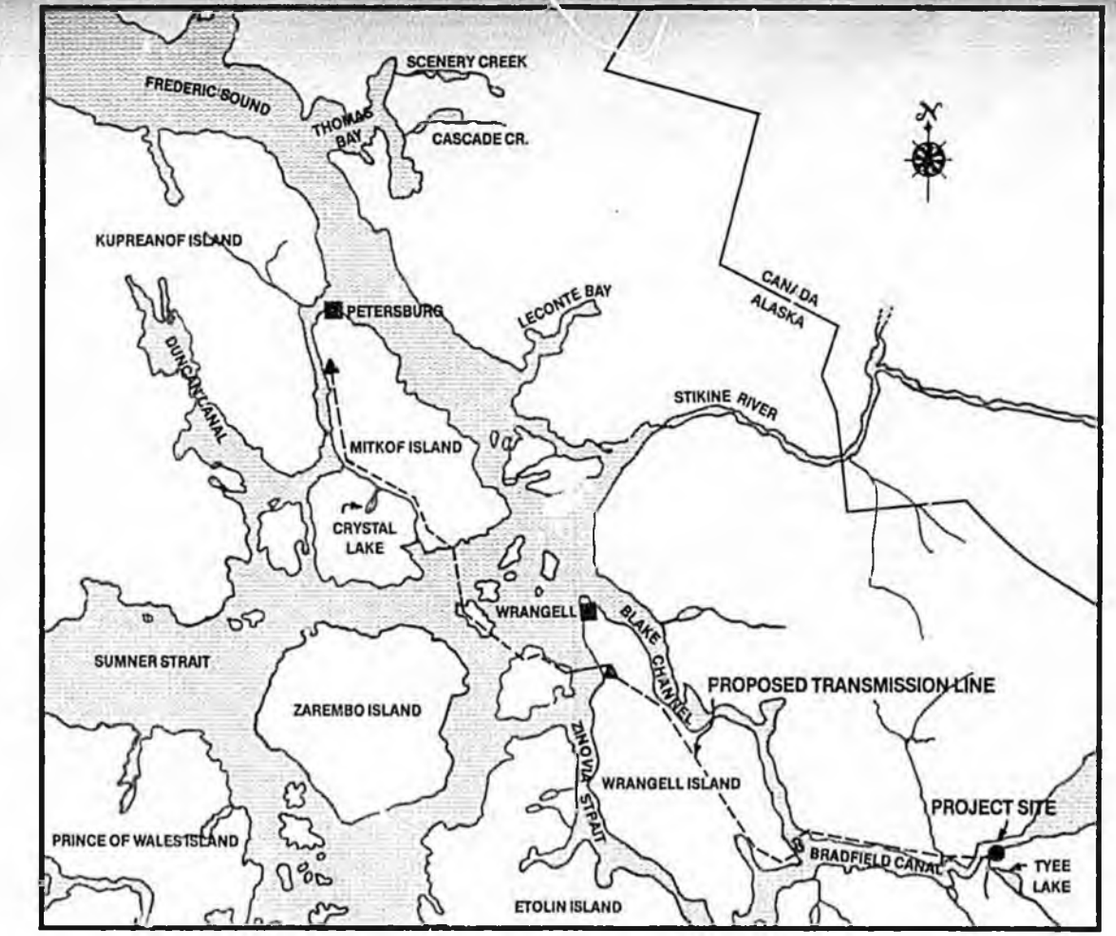
3/13/80

The Associated Press

JUNEAU — Two multi-million dollar hydroelectric projects in Southeast Alaska received the formal go-ahead from House lawmakers Wednesday.



The House unanimously passed a resolution approving the design plans for both the Tyee Lake hydroelectric project near Petersburg and the Swan Lake project near Ketchikan. The resolution now goes to the Senate.



The resolution (HJR 62) authorizes the Alaska Power Authority to proceed with revenue bond sales of up to $70 million for the Tyee project and up to $120 million for the Swan Lake project.

Rep. Oral Freeman, D-Ketchikan, explained to his colleagues that the the Alaska Power Authority already has completed feasibility studies and general design work on the two projects. However, he said state law requires the authority to receive legislative authorization to proceed with bond sales.

Several other state bonding authorities are not required to get legislative approval, although Finance Chairman Russ Meekins, D-Anchorage, said lawmakers are considering a requirement that all bonding authorities get legislative approval prior to issuing bonds.

The Tyee Lake project is to be designed, built, financed and owned by the power authority. The Swan Lake project is to financed by the authority, while it is to be designed and built by the City of Ketchikan under an agreement worked out with the power authority.

TYEE LAKE HYDROELECTRIC PROJECT - PETERSBURG & WRANGELL, ALASKA

TYEE: Looking Toward The Year 2000 And Beyond

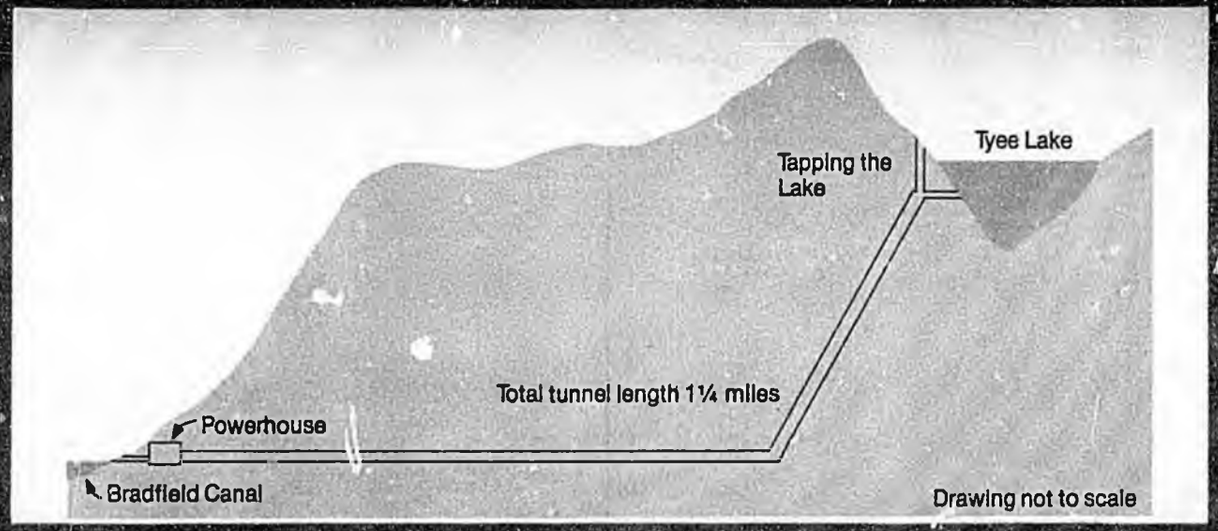
Efforts by the Thomas Bay Power Commission, in conjunction with work being done by the Alaska Power Authority, may result in ample and cheaper electric power for Petersburg and Wrangell residents. The Thomas Bay Power Commission was formed in 1973 to promote and develop dependable hydroelectric power for the area and to discontinue reliance on expensive diesel power generation. Its efforts have focused on the Tyee Lake Hydroelectric Project, located about 40 miles southeast of Wrangell in some of the most rugged wilds of Alaska.

"The Thomas Bay Power Commission originally investigated building a hydroelectric facility at Thomas Bay, but the proposal proved too costly," explains Richard Ballard, chairman of the commission.

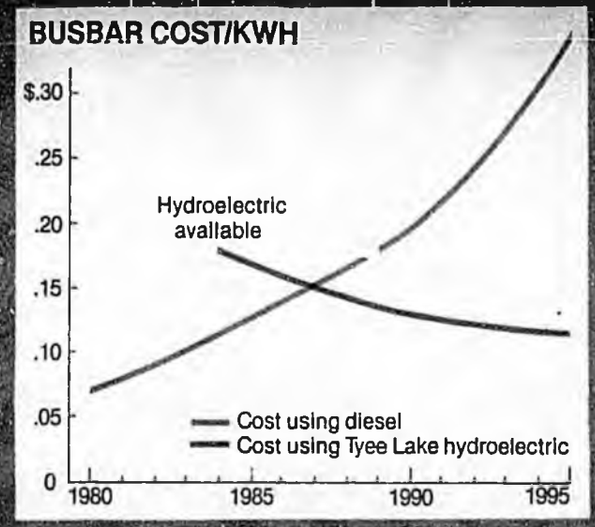
Harry Sundberg, secretary of the commission, said they then focused studies on Tyee Lake and turned to the Alaska Power Authority for feasibility studies and engineering assistance.

The Power Authority's investigation indicates that Tyee Lake could free Petersburg and Wrangell from the economic stranglehold of diesel generation, at an investment cost of $53,333,000. This figure approximates the value of taxable property in both Petersburg and Wrangell, which is about $56 million each.

Diesel fuel prices are going nowhere but up. In 1973, the Petersburg utility could produce electricity at a cost of about one cent per kilowatt hour. Today, the same amount costs seven cents per kilowatt hour. The reason is that in 1973, diesel fuel cost the utility 13 cents a gallon; today (January 1980) it costs 87 cents and is skyrocketing almost monthly.



Tyee power will not be cheap during the early years of operation. In fact, for the initial years of operation, Tyee may result in higher utility bills than would otherwise be realized from diesel generation.



After the excess energy has been fully absorbed by the two communities, however, and during the remainder of the Tyee project life, power costs in Petersburg and Wrangell will be significantly lower than diesel generation.

The beauty of hydroelectric power generation is that once a plant is producing power, energy is derived from falling water and the costs remain relatively constant. For example, electric bills for Petersburg residents already are materially lower than for Wrangell residents because of the existence of hydroelectric facilities in Petersburg.

The hydroelectric potential of Tyee Lake has been recognized for many years. Efforts were made as early as 1921 to build a dam at the Tyee Lake outlet, but the project never materialized.

The Tyee Lake Hydroelectric Project, designed to deliver 20 megawatts of power,

Tyee Lake Hydro-electric Project

would come on line early in 1984 and serve the residents of Petersburg and Wrangell and their service areas through an 83-mile long transmission line, nine miles of which would be under water.

During the first phase of the Tyee project, water drawn from the lake would pass through a 10-foot diameter tunnel into an underground powerhouse containing two turbine generators (there are provisions to add a third turbine about 1995) and then would be released into Bradfield Canal.

Engineering studies conducted by the Alaska Power Authority indicate that the total 20 megawatt output would be fully used within 11 years from the time Tyee goes on line. It is then that Tyee Phase II—a dam at the lake's outlet to raise the water level—would be constructed. Plans are to have the dam and the third turbine generator on line by the year 2000.

Where would the money come from to construct the Tyee Lake Project?

The Alaska Power Authority would issue revenue bonds in cooperation with a trustee bank, as well as receive a loan from the State of Alaska.

The Authority would own and operate the project and supply electricity to Petersburg and Wrangell through wholesale power sales agreements, or by lease agreements with the Thomas Bay Power Commission.

The mile-and-a-quarter long tunnel, above, measuring 10 feet in diameter, will draw water from Tyee Lake into an underground powerhouse containing two turbine generators. The water is released into Bradfield Canal. If tunnel construction begins in mid-August 1981, as planned, it will be completed by May 1982. Below are some of the more than a dozen permits and clearances required for the Tyee Lake project. These must be obtained before even the first shovel of earth can be dug. The Federal Energy Regulatory Commission (FERC) is the agency which issues license for construction.

This graph shows the cost of generating electricity in the Petersburg/Wrangell area. The orange line shows the continued use of diesel power generation based on 1980 fuel prices and escalated at 10 percent per year. The solid blue line represents the intermediate (expected) load growth forecast for the Tyee Lake Hydroelectric Project. The initial costs of Tyee are higher than diesel for the first years of operation. As potential power output is more fully used, the costs go down. This decreasing cost trend would be accelerated if homeowners, faced with rising fuel oil prices, convert to electric heating after Tyee Lake power is available.

SCHEDULE FOR CONSTRUCTION OF TYEE PHASE I

Mid-1980: Site planning at Tyee Lake.
1981-1982: Tunnel excavation at Tyee Lake.
1981: Build transmission line intertie between Petersburg and Wrangell. Construct substations.
1982: Build transmission line between Tyee and Wrangell.
1983: Lay nine miles of submarine transmission cable.
Late 1983-Early 1984: Testing and start-up of facility with power on line early 1984.

Conclusion

INTRODUCTION

The Ketchikan Public Utilities (KPU) submitted a Federal Energy Regulatory Commission (FERC) license application in February of 1979. Approval of the license for construction is expected by July of 1980. Ketchikan Public Utilities has applied for and received Project loans from the Water Resources Revolving Loan Fund and $3,450,000 in loans from the Power Project Revolving Loan Fund administered by the Power Authority. Loans to date have been principally for the preconstruction costs of Project development and for purchase of equipment to automate the KPU generation control system. The City of Ketchikan has requested that the Alaska Power Authority issue revenue bonds to finance construction of the Project.

The Alaska Power Authority desires to assist KPU by issuing revenue bonds to finance construction, interest during construction and a reserve fund for the Swan Lake Project. The financing will be accomplished through the tax exempt municipal market with security provided only by the merits of the Project and the strength of sales contracts for Project power. A request for $18,000,000 in state assistance in financing construction of the Project has been requested. This amount will permit flexibility in entering the bond market for the remainder of the construction financing needs, diminish the amount of bond indebtedness by $25,000,000, and indicate state support and interest in the Project to the benefit of the overall Project financing. State assistance in the form of a subordinate loan to the Project debt with graduated interest payments and/or deferred principal payments will permit lower cost power in the early years of operation and contribute to the overall security of the Project.

PROJECT DESCRIPTION

The Project site is located at Swan Lake in a remote area approximately 22 air miles northeast of Ketchikan near the northern end of Carroll Inlet. Swan Lake, a low-elevation lake surrounded by mountains, drains westward through a narrow gorge and into Carroll Inlet via Falls Creek. Historical stream gaging records and correlations with nearby basins indicate that the basin yields an average of 335,000 acre-feet of runoff per year. The site is extremely well suited for the development of a hydroelectric generating facility and, based on the optimization studies conducted, a project arrangement has been selected which will permit the maximum economical utilization of the site potential.

The selected Project arrangement will consist of: a 190 foot high thin arch concrete dam located approximately one mile downstream from the outlet of Swan Lake; a 2,280 foot long concrete lined power tunnel leading to a powerhouse located just north of the mouth of Falls Creek near tidewater; a permanent port facility located at tidewater approximately 1,000 feet north of the powerhouse site; about one mile of access roads connecting the port facility, powerhouse and dam; a switchyard located just north of the powerhouse; approximately 30.5 miles of 115 KV wood pole transmission line crossing Carroll Inlet from the powerhouse site with a single overhead span, extending south along the west side of the Inlet, and then west across the northern tip of George Inlet up the White River Valley and past Ward Cove and then south to the proposed substation site near the existing S. W. Bailey Diesel Plant. The Project will have an installed capacity of 22,000 KW, will operate under an average gross head of 311 feet and have a dependable capacity of 18,000 KW delivered to the load center. It will be capable of delivering 85,400,000 kwh average annual energy and 66,700,000 kwh of firm annual energy to the load center. For the scheduled on-line date of November 1983, the Project is estimated to have Total Capital Requirements of $107,000,000 including inflation, interest and issue costs.

Existing Capabilities and Projected Demand

The KPU system includes 8,550 KW of existing hydroelectric capacity which produces 62.7 Gwh of energy, and 17,320 KW of diesel generation capacity to supplement all additional demand. Peak power and average annual energy forecasts for Ketchikan are:

Year	Peak Power MW	Annual Energy kwh X 106
1975	14.5	76.6
1980	17.3	97.7
1985	22.5	124.7
1990	28.0	158.0

The capacity and energy of Swan Lake will be fully utilized by 1989 if the 10 year historic load growth of 5%/year is maintained. All excess energy may be marketed to the Louisiana Pacific Ketchikan Pulp Mill through a power sales contract, in which case the Project power may be fully utilized upon first operation.

Alternatives Considered

Lake Grace, Mahoney Lakes, and continued use of diesel generation were alternatives considered to the Swan Lake Project. Lake Grace is larger than Swan Lake and has potential environmental constraints that would preclude development since it is located in a restricted land status area. Mahoney Lakes, which has roughly 1/2 the power and energy potential of Swan Lake, was determined to be too samll to meet long term needs of the Ketchikan system. Continued dependence on diesel generation is determined to be the least feasible of all alternatives.

Environmental Impacts

The environmental impacts of the Swan Lake Project and associated transmission line are principally associated with the construction activity itself, and the visual distractions the completed system will have on the presently undisturbed surroundings. Over the long run, imbalances or alterations in the existing wildlife and fishery ecosystems of the area are not anticipated. There are no endangered species known to inhabit the Project area.

Air and Water Quality

Operation of the Project would not degrade air quality. However, some temporary impacts on air quality may be experienced during construction, due to exhaust and crankcase emissions from vehicles and construction equipment and the dust generated by drilling and movement of equipment. Noise levels will increase due to blasting, machinery operation, and other construction activities. Project operation will result in some increased noise, particularly in the vicinity of the powerhouse. However, this impact is expected to be minor.

Construction of the dam and dikes would introduce sediment into Falls Creek. Other surface waters may experience increased sediment loads due to clearing and earth moving operations along the transmission line route and quarrying and land clearing operations in other Project areas. During Project operation fluctuations in the water level of Swan Lake may cause soil erosion which would introduce sediments into Falls Creek.

Land Use

Direct impacts on land use would stem from the inundation of 450 acres of land presently covered with shrub and the removal from alternative uses of 240 acres along the transmission line routes. The impact of the Project on regional land use patterns is not expected to be severe. The inundated acres represent an addition to an existing reservoir. The main transmission line would be constructed in a route containing limited timber and recreational uses. The existence of the line would interfere with the area's scenic and aesthetic qualities.

Social and Economic Impacts

Project construction activity would focus on the Ketchikan area. The level and duration of social and economic impacts would depend on a number of factors, including the need to import a Project workforce, the number of workers who would be accompained by dependents, their length of stay, and the ability of Ketchikan to absorb a small increase in demand for housing, public services and consumer goods. Most workers will be physically located at a temporary field camp near the powerhouse location. These impacts would be primarily secondary, short-term economic impacts associated with personal consumption expenditures of the Project workforce.

Engineering Considerations

The dam site 2,800 feet upstream from the mouth of Falls Creek is a suitable location for a concrete arch dam. The crystalline schist bedrock at the site would provide an adequate foundation for this type of structure. To elimate the hazard of locating a surface penstock through an area which might be subject to landslides and snowslides, a concrete lined power tunnel constructed in bedrock is proposed. The powerhouse site adjacent to the mouth of Falls Creek on Carroll Inlet has adequate bedrock for the foundation of the p werhouse. The spillway preliminary design accommodates only 50% of the probable maximum flood inflow into the reservoir, therefore the non-overflow portions of the arch dam must be designed to accommodate this infrequent occurrence. The 115 KW transmission line is adequately sized to accomodate Swan Lake power transmission. The necessity to upgrade the transmission line to accommodate additional sources of power should be considered prior to construction.

Economic Feasibility

The Swan Lake Project was compared to the Lake Grace, Mahoney Lake, and all diesel alternatives in an economic analysis. Results of the analysis are that any hydroelectric alternative is superior to continued dependence on diesel. The Mahoney Lakes Project has a lower cost/KW than the Swan Lake Project, however, reliance upon supplemental diesel generation

occurs from first power-on-line of this Project which is too small to satisfy long term needs. The Lake Grace Project has environmental problems, it is larger than Swan Lake, and the cost/KW of power is equal to Swan Lake. The Swan Lake Project satisfies the long term needs of the KPU system, and depending upon the rate of escalation of diesel fuel over the normal rate of inflation, the Project can achieve cost savings to the system of between $2 and $22 million over the first 10 years of Project operation.

Project Costs and Financing

Without state assistance, an estimate of Project costs are:

Land and Land Rights	$ 572,000
Powerplant Structures and Improvements	4,010,000
Reservoirs, Dams and Waterways	23,232,000
Water Wheels, Turbines and Generators	5,866,000
Accessory Electric Equipment	1,649,000
Miscellaneous Power Plant Equipment	3,430,000
Construction and Access Facilities	9,082,000
Transmission Facilities	11,428,000
Subtotal - Direct Construction Cost	$59,269,000
Sales Tax	-0-
DIRECT CONSTRUCTION COST	$59,269,000
Contingencies,	8,761,000
Subtotal	$68,030,000
Engineering	8,396,000
TOTAL CONSTRUCTION COST	$76,426,000

The total amount of the revenue bond issue will be approximately $107,000,000 to include interest during construction, funding of reserve funds, and costs of issuance. This amount could be decreased by $25 million if the recommended amount and form of state assistance is approved. The $18,000,000 loan to the Ketchikan Public Utilities would be subordinate debt to the bond indebtedness, with graduated interest payments and deferred principal and interest payments to shape overall Project debt service in a manner to improve the revenue bond Project financing.

The ability of the Project to be financed without state assistance is questionable due to the Project size, amount of the bond issue, and the potential for power excess to system needs in the early years of operation. Without state assistance, an interest penalty on the overall bond issue will result in even higher power costs for Ketchikan consumers.

The Power Authority may issue contract revenue bonds (under an Indenture of Trust between the Power Authority and a trustee bank) for the difference between Project capital requirements and a subordinated State loan. Under the plan, the Power Authority would own the Project, KPU would have the option to purchase after obligations are repaid, KPU would operate/maintain the facilities, KPU would be responsible for debt service, KPU would set rates to collect revenues with a stipulated coverage. The bonds would be amortized over 40 years, with the Reserve and Contingency Funds paying the last years and one-half debt service.

CONCLUSION

This summary was prepared by the staff of the Alaska Power Authority to comply with Section 44.56.180 of the enabling statutes of the Power Authority. The maximum amount of bonds estimated to be necessary to finance the Swan Lake Project is $120 million. The Power Authority intends to assist the Ketchikan Public Utilities to finance the Project with state assistance in the form of an $18 million subordinate loan. The Power Authority does not intend to design, construct, or operate the Project itself. The Project will be designed, constructed, and operated by Ketchikan Public Utilities, with rights to the capacity remaining with the Utility, and ownership of the Project determined by the optimal acceptable form of revenue bonds issued for the Project. Ultimate ownership rights upon retirement of debt service will remain with the Utility. The general design and financial feasibility of the Swan Lake Project is acceptable, and the Project should proceed to construction. The Power Authority recommends that the Legislature adopt a joint resolution approving the general design and financial feasibility of the Swan Lake Project, approve action of the Power Authority to issue bonds in a maximum amount of $120,000,000 for the Project, and approve state assistance in the form of an $18 million subordinate loan for the Project.

Introduced: 3/21/80
Referred: Resources and Finance

IN THE HOUSE BY THE RULES COMMITTEE

HOUSE BILL NO. 967

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the Alaska Power Authority and approving the general design and maximum amount of bonds for power projects; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. Actions taken by the legislature before the effective date of this Act to approve the general design and maximum amount of bonds for power projects are confirmed and the Alaska Power Authority is authorized to issue its bonds for the following power projects in the maximum principal amount set out after each:

(1) Solomon Gulch, $20,000,000;

(2) Terror Lake, $120,000,000;

(3) Golden Valley Electric Association waste heat, $110,000,000;

(4) Tyee Lake, $70,000,000;

(5) Swan Lake, $120,000,000;

(6) Glacier Highway Electric Association, $800,000;

(7) Cordova Electric Cooperative, $6,500,000;

(8) Matanuska Electric Association, $2,500,000;

(9) Homer Electric Association, $3,360,000; and

(10) Naknek Electric Association, $730,000.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Re: Ability of Alaska Power Authority to Issue Revenue Bonds in Light of State v. A.L.I.V.E. Voluntary (No. 2022, February 19, 1980) - Our File No. 3610.

Dear Representative Miles:

On March 14, 1980 during a drafting session in regard to HB 953 we indicated to you that we had advised the Alaska Power Authority that in view of the recent Alaska Supreme Court decision in the A.L.I.V.E. Voluntary case referenced above the Authority could not now issue any of its revenue bonds even though previously approved by resolution. At the conclusion of that discussion we agreed to reiterate that opinion in the form of a letter to you, enclosing a bill which we believe will remedy the problem. Eric Yould has also requested that we communicate this information to Representative Gardiner with whom he has also discussed the matter.

The Alaska Power Authority Act in AS 44.56.180(c) provides that the Authority may not design, acquire and construct a new project, nor may it issue its bonds in that regard unless the Legislature has adopted "a joint resolution approving the general design and maximum amount of bonds". In addition, AS 44.56.180(b) requires prior approval of the Legislature by joint resolution before the Authority may proceed with the engineering or design phase of power projects the financing of which will include a guarantee of indebtedness by the permanent fund or an appropriation from the general fund. An occasion to utilize the latter of these approval processes where a project will be "subsidized" has not yet been presented. However, the Legislature has previously passed AS 44.56.180(c) joint resolutions approving the issuance of bonds in regard to three projects and joint resolutions approving an additional eight projects are now pending. In addition, HB 953 as introduced on March 11, 1980 would provide that the Legislature by concurrent resolution may prevent the Authority from proceeding beyond the completion of a reconnaissance study in regard to a new power project.

The Supreme Court of the State of Alaska in the A.L.I.V.E. Voluntary decision recently held that the Legislature may not annul a

regulation of an agency or department of the State by adopting a concurrent resolution which so provides. Holding that this method of proceeding violates Article II of the Alaska Constitution, the Court indicated that while the Legislature may express its views and desires (i.e., recommend or act in an advisory capacity) by resolution, when it expected to speak with the force and effect of law (i.e., exercise its legislative power) it must follow the constitutional safeguards which surround enactment of a bill. As Justice Matthews stated in writing the A.L.I.V.E. Voluntary decision,

> "Of course, when the legislature wishes to act in an advisory capacity it may act by resolution. However, when it means to take action having a binding effect on those outside the legislature it may do so only by following the enactment procedures. Other state courts have so held with virtual unanimity." [Slip Opinion at pp. 10, 11]

In view of the Court's decision and after an analysis of the language of the decision, including that quoted just above, we have advised the Alaska Power Authority that, under the present language of the Alaska Power Authority Act which provides for legislative approval of Authority bond issues by joint resolution, it may not issue bonds which have been approved by resolution.

Further, we have advised the Authority that, in our opinion, the approval by resolution provisions of the Act are not severable so that the Authority may not go forward in the absence of legislative approval which meets the mandate of the Alaska Constitution as interpreted by the Supreme Court in A.L.I.V.E. Voluntary. Faced with such a situation we believe that a court would hold that the Legislature clearly had in mind a process involving approval by the Legislature prior to the issuance of bonds and that, therefore, the court would hold that the bonds could not be issued until the process was lawfully completed, or the approval requirement modified by the Legislature.

In view of the doubtful constitutionality of the use of a joint resolution to approve the bonds of the Authority, we have drafted legislation in the form of a bill which would allow the Authority to issue its bonds to finance the projects heretofore approved or expected to be

approved this Session by joint resolution. A copy of that bill is attached.

Very truly yours,

WOHLFORTH & FLINT

Senator Arliss Sturgulewski
Pouch V
Juneau, Alaska 99811

Dear Arliss:

After talking to you the other day regarding the proposed hydro project at Ketchikan I got out some old information R.W. Beck had given me as well as the more up to date data from Eric Yould. Other than a general interest in hydro development I enjoyed studying this project since I am familiar with the area. I grew up there and still have family and friends in Ketchikan.

As I stated before it is not possible to correctly evaluate a power project without information on all energy requirements of the area. This is becoming even more the case as it becomes clear that dependence upon petroleum must be reduced and eventually eliminated. The handwriting is also on the wall that all combustion of carbon based fuels must be reduced to an absolute minimum. Current technology can now provide the required alternatives for all except transportation related requirements. In time hydrogen and improved batteries will be available for transportation needs. The use of biomass such as burning wood, wood waste or organically produced alcohol is also being advocated by some but it cannot be a long term solution. The immediate effect of burning carbon is the same whether it comes from wood, alcohol, coal or oil. Even though biomass carbon comes from the carbon dioxide in the air a long residence time in a fixed state is necessary for a stable carbon cycle. In fact it is now believed that at least half of the CO_2 build up is due to shorting the carbon residence time in the biosphere by human activities. I am certainly not advocating that we stop using wood as a domestic fuel supplement, or as a total supply where appropriate, but I do want to see that we avoid future problems and restrictions which are sure to come as global pollution problems become more pressing.

Returning to the immediate question, I have made an estimate of the Ketchikan area stationary energy requirements. These are current needs and do not include any allowance for growth. They are as follows:

K.P.U. Current generation	82.2 million KWH
Space heating (now primarily oil)	105.5 million KWH
L.P.K. pulp mill (now primarily oil)	15.0 million KWH
Total area stationary energy use	202.6 million KWH

The figure for heating requirements is based upon data on estimated needs if conversion from oil to electric heat occurred. The total number is mine based on that data and the number of residential and commercial customers they now have. I checked this against the electric and oil equivalent of our own home gas use and even allowing for differences in the climate I believe the number I used is quite low.

Their currently existing hydro capacity can produce 62.7 million KWH and the proposed Swan Lake project could produce an average of 85.4 million KWH, so in terms of absolute need for energy the project is not too large. Ultimately they will need this project and more. The problem is financial and one of the proper sequence of development. While to stop using oil for space heating and power generation is the ony rational action in the long run, people are not going to willingly replace $1.00 per gallon oil with electricity at over twice the price just for the sake of conservation. On the other hand the longer the hydro is delayed the more it will cost and delay will just make the inevitable transition more painful. I don't think anyone could live in Southeast long without realizing that sunshine there comes in the form of rain.

Now as to the other smaller project, Mahoney Lake. The data on the Mahoney Lake project in the Electric Power in Alaska report done by I.S.E.R. I found highly suspect. However, among the Beck material I did find what appears to be a reasonable estimate for the project. If fact, if the Beck data and projections had been properly interpreted, Mahoney Lake is the project that should have been pushed for first.

The current construction cost estimate for Swan Lake is $75 million, the remainder of the required funds are for interest during construction, reserves, financing costs, etc. Escalating the old Beck estimate for Mahoney Lake by the same factor (1.23) as required to bring the old Beck estimate for Swan Lake up to current costs yields a construction cost of $36.5 million. Assuming both plants are built for 50% load factor (more or less standard practice), one gets a cost of $3847/Kw for Swan Lake and $3313/Kw for Mahoney Lake. Thus Mahoney Lake should produce cheaper energy if escalation and inflation factors are removed. Beck analyzed the first ten years energy costs for four alternatives. Swan Lake, Lake Grace (a larger project yet), Mahoney Lake and continued expansion of the diesel plant. They showed that the first ten years energy cost was lower for Swan Lake. Under their assumptions this was true but from an engineering and financial standpoint, one should look at the present worth of future costs not just future costs. Present worth analysis takes into account the time value of money and of course shows the benefits of deferring investments which can be deferred while for a simple sum a future cost counts the same as a present one. Using

the present worth approach the Beck numbers indicate a lower levelized life cycle cost for Mahoney Lake. Looking at the year to year cost of these alternatives shows Swan Lake power costing initially about 50% more than Mahoney Lake power. It is only in the sixth year that the annual cost of Swan Lake power becomes cheaper. These are old estimates and projections and I have not taken the time to update them except as noted. Current oil costs and escalations have been higher than anticipated and load growth somewhat less, but all in all I think a good job was done in everything except interpreting the results.

Clearly they should have worked on Mahoney Lake first, but it does not automatically follow that is what should be done now. If because of licensing and/or design problems it would take two years longer to start actual construction on Mahoney Lake it would no longer be the more economical producer of power. At 15% annual inflation, which may be on the low side just now, Mahoney Lake goes to $3810/Kw with one year delay and to $4381/Kw in two years. Since escalation will effect the cost of energy over 40 years, it will utltimately make up for differences in the available load during the early years. Therefore the correct project to build is the one which can be built first.

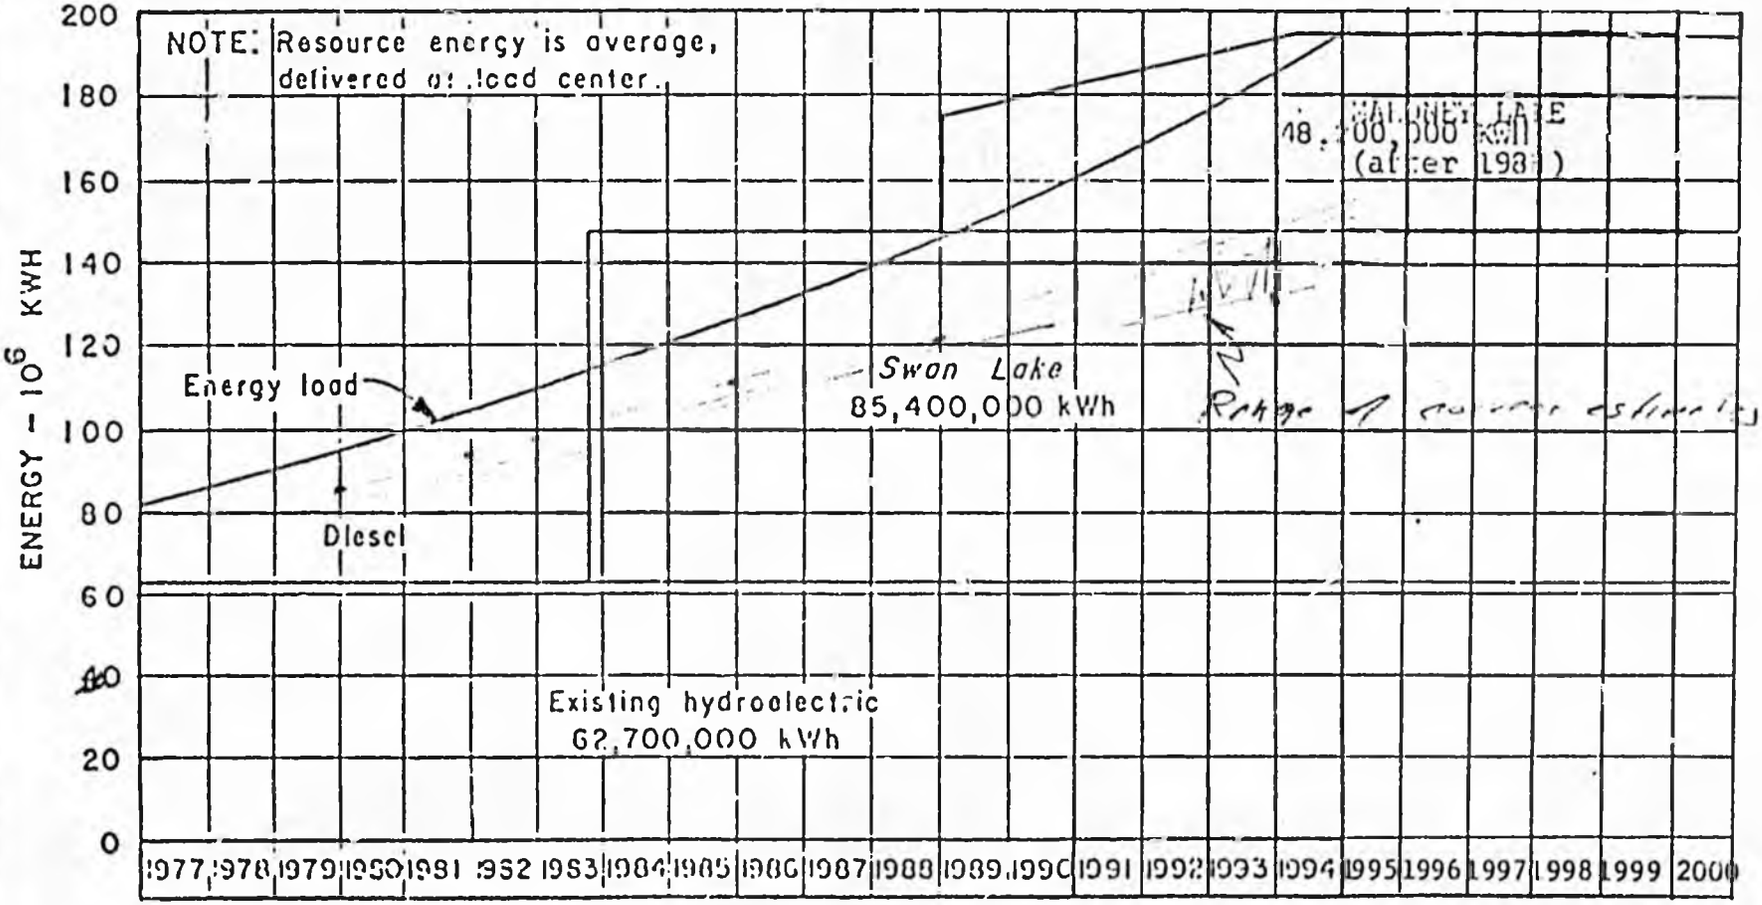
The other factor is what the people are willing to pay at the front end for power rates. I would assume that the elected representatives from Ketchikan should be able to evaluate community feeling on that issue.

Since transmission line problems have been such a problem in Juneau it may become a issue here. I have walked over a good portion of the proposed Swan Lake route and have seen from the water most of the remainder so I feel confident the proposed route will not have severe problems such as the Snettisham line or even the Turnagain line has had.

Sincerely,

Thomas R. Stahr

TRS:slg



SWAN LAKE, LAKE GRACE AND MAHONEY LAKE PROJECTS

Table 1

COST ESTIMATE SUMMARY

ITEM	PROJECT SWAN LAKE	LAKE GRACE	MAHONEY LAKE
1. Preparatory Work	$ 3,378,000	$ 5,611,000	$ 3,460,000
2. Dam and Reservoir	9,719,000	8,498,000	629,000
3. Power Tunnel	4,785,000	9,720,000	7,229,000
4. Power Plant Civil Work	2,614,000	2,905,000	2,125,000
5. Power Plant Mechanical Equipment ...	2,772,000	2,890,000	1,200,000
6. Power Plant Electrical Equipment ...	2,534,000	2,700,000	1,400,000
7. Transmission and Switchyards	9,540,000	13,600,000	420,000
TOTAL DIRECT CONSTRUCTION COST ...	$35,342,000	$45,924,000	$16,463,000
Contingencies	5,301,000	6,889,000	3,293,000
Subtotal	$40,643,000	$52,813,000	$19,756,000
Engineering & Owner Administration	5,081,000	6,602,000	2,469,000
TOTAL CONSTRUCTION COST (Bid Date January 1977)	$45,724,000	$59,415,000	$22,225,000
Interest During Construction (5%/yr.)	3,429,000	4,456,000	1,667,000
TOTAL INVESTMENT COST (Bid January 1977, On-Line September 1980)	$49,153,000	$63,871,000	$23,892,000
Escalation (7%/yr.)	15,277,000	19,851,000	7,426,000
TOTAL INVESTMENT COST (Bid January 1981, On-Line September 1983)	$64,430,000	$83,722,000	$31,318,000
subtract IDC	− 3,429.000		− 1,667,000
	61,001.000		29,651,000
Current estimate	75,000,000		36,455,550
Factor	1.23

present worth of costs*	3,137	3,394	3,693	3,946	4,681	5,334	5,559	5,845	6,128	6,547
Generation Required to Meet Load -	59.5	66.6	69.6	72.9						
(10^6 kWh)	52.8	58.6	64.7	71.2	77.8	84.8	92.1	99.8	108.0	113.8

(1) - Costs of meeting Ketchikan loads during first ten years of project operation (1983-1993) exclusive of costs of existing hydro resources and diesel debt service.

(2) - Power Year, July 1983 through June 1984, typical.

(3) - Basis for hydro debt service is the same as shown in Table VI-1.

(4) - All O&M costs and diesel fuel costs are escalated at 7% per year.

(5) - Assumed 4,000,000 kWh/year of energy from the Swan Lake Project would be sold to LPK during first five years at 90% of diesel fuel cost.

(6) - Capital costs of all new diesels are based on current estimated costs escalated at 7% per year to on-line date.
