It is my understanding from reading Senate Bill 214 that Medicaid eligible recipients over 21 years of age who are presently eligible for emergency treatment only under the GRM program, will be entitled to receive limited services under the EPSDT program.

1. Services curtailed under the proposed bill

Services under the proposed bill will be greatly curtailed. Specifically excluded are the following emergency services involving pain, infection and bleeding:

a. Sedative filling and palliative treatment. This category include services as follows:

i. Apicoectomy. This is an excision and drainage of the tooth root or tip to treat an abscessed tooth. This service is presently a benefit under GRM and would be excluded under the proposed bill.

ii. Root canal treatment. This involves treatment for an abscessed tooth, or exposed nerve. Treatment includes completely removing the pulp (dying tissue) of the tooth, sterilization of the pulp chamber and root canals of the tooth, and then filling the spaces with an inert sealing material. The opening is then sealed with a temporary filling material, typically IRM. The term "temporary" is a misnomer, since the temporary filling material not only lasts for months or years, but can often end up being a permanent restoration because the patient may never return for treatment if he/she is no longer in pain. The dentist may use a silver alloy filling material also; however, under the GRM program payment is restricted to not more than the maximum allowance for a two-surface filling. Root canal treatment is presently a benefit under GRM and would be excluded under the proposed bill.

iii. Sedative filling. This service is required as a medication for an inflamed or exposed pulp area of the tooth, enabling the tooth to be saved rather than extracted or filled by root canal treatment. Under the proposed bill this service would be eliminated, thus leaving the dentist no choice but to remove the tooth. Good dentistry always encourages saving the teeth, not automatic extraction if the patient has pain, infection or bleeding in the tooth. Sedative filling is presently a benefit under GRM and would be excluded under the proposed bill.

iv. Restoring a severely fractured tooth where protection of the treated pulp is necessary. If a temporary filling or permanent alloy filling will not be adequate to protect the tooth pulp, as a temporary measure a stainless steel crown or preformed acrylic-type crown would be considered the best treatment. This device is presently a benefit under the GRM program and would be excluded under the proposed bill. The more permanent-type gold or porcelain crown should not be covered as a benefit under any emergency-type program.

b. Examination. Typically, patients seeing a dentist on an emergency basis under the GRM program have neglected their teeth and mouths for years and are only visiting the dentist because the pain is too much to bear. Under the present GRM program and the proposed of the area in which the patient complains of pain. However, good dentistry would dictate the dentist check the patient's entire mouth at least visually to determine any other problems which might exist - these could be tissue lesions or cancer of the mouth, which could be deadly to the patient if not caught in time.

A complete examination includes medical/dental history information from the patient, oral structure evaluation (the contour of the bite) visual examination of the teeth (with an explorer) and checking the gingival (gum) tissues. Consideration should be given to allowing the dentist reimbursement for the time required to conduct this complete history and examination, which acts as a preventive measure and protection to the patient.

2. Additional services of the proposed bill.

a. Dentures - Dentures are not presently covered under the GRM program except in unusual circumstances where it is necessary to eliminate pain or spreading of infection. In these cases the GRM program would then cover dentures to replace the teeth removed under the program. The proposed bill would greatly increase costs under the program. We would also like to correct a minor point of dental terminology in the bill which appears to be a clerical error. The terms "acrylic bodies" and "case clamps" are foreign to dentistry. The intention would appear to be Acrylic saddles for acrylic bodies and cast metal clasps for case clamps. However, if the proposed bill is excluding payment of dentures composed of acrylic bases, it would appear the intent is to have all dentures be made of cast metal, which would be more costly.

b. Fractures - Another service under the proposed bill will cover emergency treatment for fractures or dislocation of the upper or lower jaw and related services requiring a qualified oral surgeon. These services are not presently covered under the dental portion of the GRM program. If these services are intended to be added under the dental rather than considered medical-related services, this will increase the cost of the dental program under Medicaid. Although the bill makes reference to use of a "qualifed oral surgeon" to treat fractures, many physicians also treat fractures. Would Detla begin paying physicians, also, or will fractures of any kind be paid under the medical portion of the Medicaid program?

3. GRM patients not Medicaid eligible will lose coverage

Some 47% of the patients treated under the GRM program are not Medicaid eligible. They represent approximately 40% of the dollars paid out in 1978 by Delta under the GRM program. If the proposed bill is intended to move adults age 21 and over presently covered under GRM to the EPSDT/Medicaid program what will happen to the 47% not Medicaid eligible who have received emergency treatment under the GRM program? Will the State continue the GRM program for these individuals who do not qualify for Medicaid but are in need of a dentist to control bleeding, or eliminate pain or acute infection and cannot afford to pay for the treatment?

The opportunity to present comments on this bill is much appreciated. I hope the committee will feel free to direct any questions to me concerning this statement or other related matters. Thank you on behalf of Delta Dental Plan of Alaska.

Delta Dental Plan of Alaska is a not-for-profit dental service corporation licensed in the State of Alaska under AS 10.20 and AS 21.87, supervised through the Department of Commerce and Economic Development, Division of Insurance. Delta was formed in 1973 by the dental profession through the Alaska Dental Society to assure quality dental care at a reasonable price to the public at large.

Dear Senator Hackney;

Please excuse my lateness in getting this information to you about your Senate Bill No. 214.

Our North Central District Dental Society met and discussed the bill at length and came to some concerns about it.

First, we do not see the need for the bill, and if the bill were to become a law, probably the state would see much abuse of it.

To explain the first and most important part of my conclusion: Dr. Hansen here in Fairbanks, and several other dentists have been trying an access program for the aged in this area.

Since the first of this year, we have seen only 21 individuals who have presented for examination and treatment and this has all been at no charge to the individuals. We were very surprised at the low number of people who presented for examination or treatment.

There is no question in my mind that there are others in need of care, but this initial access program has shown that the need may not be as great as one would be led to believe.

FRED D. BAST, D.D.S.
A PROFESSIONAL CORPORATION
570 UNIVERSITY AVENUE
FAIRBANKS, ALASKA 99701

TELEPHONE 479-2206

The initial definition most dentists had trouble with, specifically, "needy person", is open for abuse by all concerned. Part B under sec. 47.07.035 under what is allowed should be eliminated completely, because the individual who wrote this for you is trying to define how a dentist should practice, which is impossible; for by the defination of an emergency one cannot limit the number of teeth extracted at one time, or the necessity of radiographic knowledge necessary for a correct diagnosis.

I could go on with other parts of the bill but won't at this time. If you are totally convinced you wish to proceed with this, please drop me a note about same and I will be glad to discuss this with you.

Sincerely,

Fred D. Bast, D.D.S.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
SENATE BILL NO. 214

Senate Bill 214 would amend the Medicaid statutes to add coverage for emergency dental services and dentures. The bill proposes to amend the Medicaid statutes largely through the addition of a new section to the statutes on dental services. The bill contains estensive definition of the coverage and limitations of a dental program. By placing this administrative language in statute, the administrative flexibility necessary to properly administer the program is restricted. Professional medical judgment must be exercised in each case and exceptions granted in those instances where unusual medical circumstances exist.

A more appropriate means of adding emergency dental services and dentures as covered services under Medicaid would be for Sections 1 and 2 to be substituted with a section which would add the words "emergency dental services and dentures" to AS 47.07.030, the section of the Medicaid statutes which sets out categories of service to be covered under Medicaid. The Department would then have the authority under AS 47.07.050 and AS 47.05.010 to describe in regulation the detail set out in the proposed bill so as to properly define the limits of coverage.

We understand that Legislative Affairs has worked on a fiscal analysis of this bill based on information obtained from our Dental Fiscal Agent. We have no reason to believe that that information is not a valid estimate of the potential cost of this bill.

Since this bill proposes to add services which would exceed the Governor's budget request for FY 1980, the Department cannot support the bill.

Dear Ms. Knapp:

As we discussed, I am enclosing a copy of SB 214, adding dental services and complete dentures, to the state's Medicaid program. I am in need of obtaining cost estimates for relating to the bill. Please don't forget to itemize the cost of these services currently being provided to Medicaid clients under General Relief-Medical program. These costs can be used to reduce the total cost of the bill. I have enclosed standard fiscal note forms for your use. If you are unfamiliar with the fiscal note form, please call me at 465-4917 and I will be glad to advise you on procedures for completing them. As we discussed, I would appreciate any comment your organization might care to make regarding the provisions in the bill. As I mentioned to you, I am contacting HEW directly to obtain a statement as to whether or not the bill meets the requirements for Medicaid reimbursements.

Thank you for your cooperation. We are on a tight time frame, so that a response by Wednesday, February 21 would be appreciated. Please do not hesitate to contact me regarding any questions you may have in connection with this request.

Sincerely,

Deborah Behr

Dear Dr. Sonken:

Attached please find the draft proposal for coverage of limited dental program under Medicaid. I have also enclosed a copy of the bill that was just introduced in the legislature. I am in need of receiving your comments in writing regarding:

(1) Does the limited Medicaid dental assistance program outlined in SB 214 meet the necessary requirements for federal reimbursement under the Medicaid program?

(2) Do you have any suggestions to improve SB 214 or comments that you would care to offer concerning the bill?

(3) Would the dental program outlined on the attached memo meet basic requirements for federal reimbursement under Medicaid?

We also discussed the possibility of incorporating the American Dental Association's definition for emergency dental services in SB 214. Were you able to locate a copy of that definition and do you recommend incorporation of it in the bill?

Thank you for your cooperation. We are working on a tight time frame, so that I would appreciate receiving your comments in writing as soon as possible. Please call me at (907) 465-4917 regarding any questions you may have.

Sincerely,

Deborah Behr

DRAFT PROPOSAL FOR COVERAGE OF LIMITED DENTAL PROGRAM
UNDER MEDICAID FOR ADULTS AND CHILDREN NOT COVERED UNDER EPSDT
(Children receiving care through the EPSDT will continue
to have the same comprehensive program that is currently in force.)

I. Dental services paid without prior authorization

A. No preauthorization is necessary if total cost of eligible dental services is $50 per episode or less. In all cases, restorative care is limited to the use of amalgam, silicate, or plastic fillings.

B. Emergency services need no preauthorization

1. Basic definition of emergency treatment

a. Palliative treatment for the relief of pain or acute infection

b. Control of bleeding

c. Treatment of injuries of oral cavity or related structures, including reduction of fractures of the maxilla or mandible and dislocation of the mandible

d. Emergency surgery to the jaw or related structures requiring services of a qualified oral surgeon

2. Limitations on emergency coverage, exceptions granted only on extreme basis

a. Covers only up to three extractions at one sitting

b. Covers only one visit payable per emergency, including necessary follow-up as direct result of the emergency

c. X-rays that are single films of involved areas

d. Covers only two emergencies per year

C. Diagnostic and preventative care, if cost is $50 per episode or less

1. Limitations

a. Only one initial diagnostic visit in 12 months is eligible for coverage

b. Dental prophylaxis is limited to once every 12 months

c. Dental X-rays are limited to one set of bitewing X-rays during a 12 month period and one full mouth X-ray during a three year period, during which period bitewing X-rays may be taken, according to the above conditions

II. Dental services requiring prior authorization

A. Required when the total cost of dental services exceeds $50 per episode

B. Required for any dental consultation, other than dealing with an emergency condition

C. Required for restorative dentistry

1. Limited to the use of amalgam, silicate, or plastic fillings

D. Required for removal of impacted teeth

E. Required for extraction of more than three teeth

III. Dentures - always requiring preauthorization

A. The program pays for only <u>complete</u> upper or lower dentures.

B. No dentures, except under unusual physiological circumstances, will be replaced more often than every five years.

C. New dentures will not be authorized under circumstances when a reline or duplication will satisfactorily resolve the existing problem.

D. Any denture provided by the program that is lost or stolen generally will not be replaced.

E. Relines and rebases are limited to once in three years unless authorization allows an exception. The first reline of dentures obtained under Medicaid is covered no sooner than 12 months after the receipt of dentures paid for by Medicaid, unless exception is granted.

F. Only standard materials (such as acrylic body and case clamps) are covered. Chrome alloy devices are not covered.

G. Immediate dentures are not covered.

H. Partial dentures are not covered.

IV. Dental or denture services not covered under proposed Medicaid plan

A. General restrictions

1. Cosmetic procedures

2. Broken dental appointment

3. Hospital, home or nursing home visits (except on emergency basis)

4. No payment is made for sedative filling or palliative treatment in lieu of permanent repair

5. Extractions on asymptomatic teeth

B. Restrictions on restorative care

1. Gold restoration (gold foil, gold inlay)

2. Porcelain restoration

C. Restrictions on speciality services

1. Orthodontics

2. Periodontics

3. Prosthodontics and fixed and partial bridgework (excludes de tures, which are listed separately)

4. Endodontics

5. Crowns

D. Preventative Services

1. Fluoride treatment (for those over 21)

E. Dentures

1. Immediate dentures

2. Partial dentures

SB 222

MINUTES

SB 222

Heather Flynn: I have virtually nothing to say about 222 directly, only in concept. I don't know why there is a sum of $177,500 in there if you really want to balance the budget for the money we didn't get this year, it ought to be $3.2 million. If you are willing to make that recommendation out of this committee into Finance . . . $177,000. I understand the Department of Education wants to balance its books. The problem is that we were underfunded, every school district in the state was underfunded this year. $177,000 doesn't cover it. Anchorage alone was underfunded by $364,000.

I also have the problem of the entire FY 80, 81 figures. One of the things when we were going into our budget process was trying to deal with the fact that we were underfunded from last year, and then being given direction from the Department of Education that we would only get a 6% increase over last figure. Since last year's figure was underfunded, that made us doubly in the hole. Almost $600,000 right there. Mr. Greene from the school boards association started doing some checking around and frankly, these are his figures. What is built in the DOE budget does not jive with what we have requested. We are a whole heck of a lot better off than we thought we were. If we were really smart we would keep our mouths shut and keep the money and run.

I would request that the committee look at those figures carefully and see what is the basis upon which the DOE recommendations are being made for transportation

Sen. Sturgulewski. May we have the significance of these figures? We are talking about next year's budget.

Heather Flynn. I'm saying that we're making a request for $6.3 million to cover our needs and the DOE budget from what Bob Greene has been able to indicate is $7 million plus. We don't understand the discrepancy.

Sen. Sturgulewski. You are bringing this up not because it relates to 222 but the concept . . .

Heather Flynn. The other problem is we contract a great deal of our transportation and because it is a flow-through payback to us, we go out for proposals. We don't get bid specs, we take proposals. When those proposals were done last year, they were done with daily, sometimes hourly contact with DOE and complete acquiescence, they knew exactly what was every single line. They were involved because of the K&E bus contract in Eagle River. It is a little bit of bad faith bargaining if then you come back in and you know exactly what it is going to cost us to pay those contracts and then you come back and say we're going to limit you to 6% when you know well there is an 8% built in there.

Sen. Ferguson. Wasn't it about two years ago the school districts didn't have to comply with any DOE requirements, didn't have to comply with any statute limitations on contractual services for student transportation. You could go out and get a contract and pay excessive amounts of money and the State has no control over that. Two years ago the legislature I believe requested the DOE try and find some formula or put a limit on it. In the legislative finance intent there was no more than 5% increase or 6%. Maybe Nat could direct us on that, because I think that relates to what we are going here.

Nat Cole. You are really talking about three things here Mr. Chairman. The bill you have in front of you deals with FY 78. It does not even pretent to fully fund FY 78. That is not the intent of the bill at all. What happened is during the process of the fiscal year 78 we had a supplemental request before the legislature. It had passed both houses and as is possibly in any year at any time, it fell through the cracks in the last hours. So, the supplemental didn't come about.

What we had done in pretty good faith and anticipation because past practices had shown us that, we had paid some district more than they would get on a proration when that supplemental did not pass. So what this bill does is simply allow us to collect from those who are overpaid and deposit back to the general fund . . . take this appropriation and distribute to the ones that were underpaid on the proration on what should have been a statewide proration and simply even out 78 at lower dollars than the costs that were required in those school districts.

Sen. Hackney. This is an entirely separate matter from what has come up here.

Nat Cole. That's the bill and that's all that bill intends to do.

Sen. Sturgulewski. This bill before us then straightens out some injustices so it sounds like it needs to be.

Bill Thomson. REally its an accounting transaction except the state books are closed and according to the division of finance and internal audit this is the only way to handle it.

Sen. Sturgulewski. I would move that we pass out of committee SB 222 with individual recommendations and I intend to vote do pass.

Sen. Hackney. No objections? So ordered. Let's talk about the state situation here.

Nat Cole. That brings us up to a point where FY 78 was not paid at 100%. It was prorated at around 94%. Because for the 79 appropriation the legislative intent said you will fund 78 plus 6%. Whatever was paid in 78. That intent, again I think in total good faith, was placed in there feeling that 78 would be fully funded according to the contract. I don't think because the

supplemental was in front of them both houses has passed the supplemental and that would have fully funded 78. That was the basis that the intent was based then. But the intent does say 78 plus 6%. That was passed by both houses, placed in the free conference with a letter of intent and we take it as a matter of statute. That's we're told to do. So we took 78 and have added 6% to it.

Because we had estimated slightly high on our needs for 79 and on our supplemental needs for 78 and placed the actual cost that we though would accrue on 79 on that, we actually got an appropriation for 79 which exceeds 78 plus 6%. It exceeds it by $2 million or rather a $1.5. In essence, based on the intent we have in front of us right now, we will not spend $1.5 million of our 79 appropriation. That elapsed because our distribution formula that is given to us by the legislature is 78 plus 6%. We still have some lapse I think if we went back somehow and the legislature says fully fund 78 which would be about another million dollars and then if we put 6% on that we would still have a half million dollar lapse.

Sen. Hackney. We could actually do that in considering these figures right here and come out just about a push. In other words, the State general fund wouldn't be impacted.

Nat Cole. Yes, in terms of the appropriation. Other than the fact that, and we discussed this with your subcommittee, we have reported to your subcommittee that based on what we have as intent in front of us and the 78 actual payments . . .

Sen. Hackney. Did you have these figures at that time?

Nat Cole. Those aren't our figures.

Sen. Ferguson. This is the Alaska State School Board Association.

Nat Cole. Going on. We are talking 79. Based on 78 was actually paid plus 6%, 79 is a million and one-half high. If we took those baloon figures for 79 and projected for 80 which we did in addition to just looking over some historical percentage increases over the past 5 or so many years, recognizing about 1/3 of the contracts in the state will be up. We add all those together and requested the $23.5 million for FY80. That is in front of the legislature at this time. The governor's allowance was $19,900,000 and what Bob Greene is saying here and what I can't confirm or refute, I can argue that you don't have all of the cards in this deck. What he is saying is that $19.9 might be close to 100% of what is actually going to be costing for FY80 for pupil transportation. We're not very confortable with that. We know that historically when new contracts come up they come at something more than a 6% increase.

Sen. Hackney. That's not always the case though, Nat. There have been cases where they rebid and they actually come out way ahead by rebiding for a number of very valid reasons.

Heather Flynn. That is exactly what Anchorage did last year, was rebid on those contracts and we negotiated them down considerably. I don't mean that to be making nasty comments about any bad faith bargaining, but we got caught in the calendar. We were negotiating the contract and went back and rebid and re-negotiated in the meantime it was literally after our negotiations were completed that you ended up with what your appropriation levels were going to be and the bills that were being submitted for them. So, we were all done and we got caught in a crack too When you said 78 level plus 6%, all of a sudden we found ourselves with about a $700,000 deficit, which we eat in local funds and that becomes a problem.

Bill Thomson. One of the things too, that may account for budget differences and that is we budget on a maximum reimbursement. We know that the maximum that we could pay out in 79 plus 6% equals the governor's figure in the budget which is $19.9 million. That would be the maximum. We have, of course, the private contract pretty well determined and then you have the school district offers. Anchorage is the biggest and it is reimbursable.

Sen. Ferguson. Has a study ever been made on whether prior to the time that we really had a handle on how much school districts paid for transportation whether in fact those rates may have been inflated at the time?

Bill Thomson. Definitely. We did have an internal audit, the legislature, particularly Senate Finance Committee for several years questioned us estensively because being appalled at the tremendous jumps in pupil transportation costs. Two years ago as a result of the audit we revamped our pupil transportation regulations to tighten up some things. Particularly where it really came to bear we had same transportation contractors running activities, let's say tour buses, pipeline buses and school buses and they ordered loads of tires and bulk oil and being able to determine from their statement of operation, did the tires really go on the bus? where did they go? We now have as a requirement is a year-end statement of operation certified by an auditor. This has really helped in having someone work fulltime in pupil transportation getting a handle, we still have some problems and a lot of times the district doesn't want to accept what we take as recommendations. Then it comes back to it that if you don't want to accept the recommendations, there are costs that we can tie back to our recommendations and if you don't accept them, then the local board must be willing to pay for it. I know that several things, I'm very interested to see what happens when Fairbanks opens up as far as . . . This is where in one large contract for all of the buses in Fairbanks one of the things we recommended, frankly at our insistence is dividing it into service areas similar to Anchorage. We felt it would encourage competitition among contractors.

Sen. Hackney. They were prepared to do that and then they jerked that back and went to a single didn't they?

Bill Thomson. No. Here is what has happened with the Fairbanks

situation. Right now the buses are built on what's called a medium size chasis. Right now the demand for trucks that use them is full capacity in the U. S. Therefore, if someone has to go out and buy buses, the minimum of 9 months and 12 months in advance is when you have to order them. Getting ready for this coming fall, there was no bus manufacturer that we could get hold of that would state us a guaranteed delivery date in any contract. Therefore, we recommended to Fairbanks that they extend the contract for one year under the existing terms. Then invite proposals this spring and make awards next year.

Sen. Fahrenkamp. Then the contracts this year went out under the same price and everything as last year?

Bill Thomson. Yes, plus an inflation factor. (The COLA factor that is in the contract.) There are reductions for dropping of loads, that is all part of the contract.

THE END

Glenn

SB 222

BUS TRANSPORTATION FIGURES FY 80

Contacts with business offices of selected districts indicate D.O.E. figures somewhat high. Listed here are D.O.E. and AASB figures:

	AASB	DOE
Juneau	685,000	853,869
Kenai	2,100,000	2,850,706
Mat-Su	2,400,000	3,138,088
Anchorage	6,300,000	7,006,681
Nenana	78,625	145,250
Kodiak	152,913	243,970

This list constitutes all districts contacted. My point being, that my sampling showed a pattern of high figures for D.O.E.

Health Care Legislation

HCS CS SS SB 227

HCS CS SS SB 227 "An Act relating to the health of residents of the state" is an omnibus health bill extending health coverage to several new groups of people and expanding the scope of coverage available.

* HIGH RISK INSURANCE POOL

People who have high risk medical conditions often are considered "uninsurable" and cannot purchase comprehensive health insurance. Section one of the bill establishes a high risk insurance pool to be administered by the largest carrier in the state. Premiums would be limited to reasonable levels and the carrier would be allowed to pass excess claims losses from this coverage on to the state through the tax system.

* ALCOHOLISM COVERAGE FOR STATE EMPLOYEES

Model benefits for coverage of alcoholism, including inpatient detoxification, inpatient treatment and outpatient treatment are added to the state employees health insurance plan. While the original bill mandated these benefits for all health insurance policies, the HESS Committee substitute bill would field test these new benefits on state employees.

* MEDICAID BY INSURANCE POLICIES OR HEALTH SERVICE CONTRACTS

Section eight of the bill directs the commissioner of Health and Social Services to provide Medicaid coverage through the purchase of private health insurance policies or health service contracts on behalf of Medicaid recipients, when this is found to be cost effective.

* RELIEF FOR MEDICAID PROVIDERS

The bill requires that the state pay interest at the rate of one percent per month to Medicaid providers on bills that are more than one month overdue, and two percent per month on bills that are more than three months overdue. It also allows the state to make an interim payment to large volume Medicaid providers prior to billing and processing of the claims.

* EXPANSION OF SERVICES AND ELIGIBLE PEOPLE COVERED UNDER MEDICAID

Sections nine and ten of the bill expand the state's Medicaid program to include all groups and all services for which federal funding is available. New additions include such eligible and services as unborn children, unemployed fathers, prescription drugs, adult dental care and physical therapy.

* COVERAGE FOR THE MEDICALLY NEEDY

Section eleven of the bill creates a new program of medical assistance for medically needy people under the state's General Relief-Medical program. The income threshold for eligibility is set at 150% of the poverty guideline for Alaska. People whose income exceeds that amount can still become eligible for assistance after they spend their "excess" income on medical bills.

* FISCAL IMPACT

The fiscal note for all these programs includes approximately $8 million from the General fund, $23 thousand from other state funds and $8 million in federal funds for FY81.

IN THE SENATE BY THE FINANCE COMMITTEE

HOUSE CS FOR CS FOR SPONSOR SUBSTITUTE FOR SENATE BILL NO. 227 (Finance)

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the health of residents of the state; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21 is amended by adding a new chapter to read:

CHAPTER 50. COMPREHENSIVE HEALTH CARE PLANS.

Sec. 21.50.010. RESIDUAL MARKET HEALTH INSURANCE POOL. (a) The carrier which writes the largest premium volume of health insurance in the state as determined by the director shall, as a condition of transacting health insurance, establish and operate a residual market health insurance pool. Individual, group, and Medicare supplemental comprehensive health care plans as described in AS 21.50.020 shall be available through the residual market health insurance pool to every eligible individual or employer resident in the state. Applicants shall have a choice of the low option, the middle option, or the high option deductible established under AS 21.50.020.

(b) The administering carrier shall submit to the director for approval a plan of operation for the residual market health insurance pool which assures the fair, reasonable, and equitable operation of the pool. The plan shall establish procedures for administration, accounting, record keeping, and reporting for the pool, amendment of the plan, and advertising of the coverage provided. If the carrier fails to submit a plan within six months after the effective date of regulations implementing this Act, the director may adopt a plan to carry out the provisions of this section.

(c) Rates for comprehensive health coverage issued through the residual market health insurance pool may not be excessive, inadequate, or unfairly discriminatory. The rate for a given classification or group in the pool may not be more than 125 percent of the rate for a classification or group of at least 25 persons with similar characteristics at standard risk, for equivalent coverage not written through the pool. All policy forms and rates shall be filed with the director and may be disapproved within 30 days from the filing.

(d) Following the close of a fiscal year, the administering carrier shall determine the net premiums, administrative expenses, and incurred losses for the year from the operation of the residual market health insurance pool. Net gains, if any, shall be held at interest to offset future pool losses or allocated to reduce future pool premiums. Net losses may be credited against the carrier's income tax payable under AS 43.20 or its premium tax payable under this title. If the administering carrier's total assessment exceeds its tax liability for the year, the commissioner of revenue shall directly reimburse the carrier in the amount of the excess.

Sec. 21.50.020. COMPREHENSIVE HEALTH CARE PLANS. (a) Each of the three types of comprehensive health care plans (individual, group, and Medicare supplemental) shall provide minimum standard major medical benefits required by regulation.

(b) A comprehensive health care plan shall provide for a choice of deductibles. The low option deductible is $100 per person, the middle option deductible is $500 per person, and the high option deductible is $1,000 per person. The $100 maximum, the $500 maximum and the $1,000 maximum established under this subsection shall be adjusted periodically ~~yearly~~ by the director by regulation to correspond with the change in the medical care component of the consumer price index. The base year for the

computation is the first full year of operation of the plan.

(c) The sum of the deductible and copayments required in a calendar year under an option may not exceed a maximum limit of $1,000 per covered individual or $2,000 per covered family. The $1,000 and $2,000 maximums shall be adjusted ~~yearly~~ periodically by the director to correspond with the change in the medical care component of the consumer price index.

(d) A comprehensive health care plan may limit lifetime benefits to a maximum of not less than $1,000,000 per insured person.

(e) Benefits payable under a comprehensive health care plan written by the residual market health insurance pool are paid net of all health care benefits provided by or under another state or federal law including Title XVIII of the Social Security Act, Medicare, but not including Medicaid.

(f) The director shall adopt regulations establishing subrogation rights and coordination of benefits.

Sec. 21.50.030. ELIGIBILITY. (a) An individual comprehensive health care plan is open to enrollment by a resident of the state who is under 65 and can provide evidence, with respect to major medical coverage, of rejection, requirement of restrictive riders, a rate up (resulting in rates higher than the comprehensive health care plan), or a preexisting conditions limitation by two carriers within six months before the application for enrollment in an individual comprehensive health care plan, the effect of which is to substantially reduce coverage from that available to a person considered standard risk.

(b) A group comprehensive health care plan is available to a resident employer of three or more employees whom the employer seeks to enroll in a group plan, who can provide evidence, with respect to major medical coverage, of rejection, requirement of restrictive riders, a rate up (resulting in rates higher than the comprehensive health care plan), or a preexisting conditions limitation by two carriers within six months before the application for a group comprehensive health care plan, the effect of which is to substantially reduce coverage from that available to a group considered standard risk or a group of 25 members.

(c) A Medicare supplemental comprehensive health care plan is open to enrollment by a resident of the state who is enrolled in Medicare Parts A and B and who can provide evidence, with respect to major medi-

cal coverage, of rejection, requirement of restrictive riders a rate up, or a preexisting conditions limitation by a carrier within six months before the application for enrollment in an individual comprehensive health care plan, the effect of which is to substantially reduce coverage from that available to a person considered a standard risk.

(d) An individual may not purchase or renew coverage under a comprehensive health care plan established under this chapter after ceasing to be a resident of the state.

Sec. 21.50.040. ADDITIONAL CRITERIA FOR ELIGIBILITY. The director may adopt by regulation supplemental or alternative eligibility criteria which reflect the inability of an applicant to obtain coverage substantially similar to that which may be obtained by an applicant who is considered a standard risk or by a group with 25 members.

Sec. 21.50.050. POWERS OF DIRECTOR. The director may

(1) formulate general policies to advance the purposes of AS 21.50.010 - 21.50.040 and may adopt regulations under AS 21.06.090 to carry out the provisions of AS 21.50.010 - 21.50.040;

(2) adopt by regulation reasonable limits on administrative expenses of the administering carrier which may be paid from comprehensive health care plan premiums, and minimum standards for the proportion of comprehensive health care plan premiums to be paid out in claims;

(3) examine and investigate the operation of the residual market health insurance pool and shall have reasonable access to the books, records, files, papers, and documents of the administering carrier that relate to the operaton of the pool;

(4) examine directors, officers, agents, brokers, or employees of the administering carrier for the purpose of determining if coverage is being adequately and fairly provided through the pool;

(5) contract with the federal government or with another unit

of government to ensure coordination of the comprehensive health care plan with other governmental assistance programs;

(6) undertake directly or through studies or demonstration programs to develop awareness of the benefits of AS 21.50.010 - 21.50.040 so that residents of the state may avail themselves of the health care benefits provided by these sections.

Sec. 21.50.100. DEFINITIONS. In this chapter,

(1) "administering carrier" means the carrier with the largest premium volume of health insurance in the state which is obligated under AS 21.50.010 to establish and operate a residual market health insurance pool;

(2) "carrier" means an insurer, hospital service corporation, or medical service corporation;

(3) "comprehensive health care plan" means health insurance which provides the benefits required under AS 21.50.020;

(4) "director" means the director of the division of insurance in the Department of Commerce and Economic Development;

(5) "family" means the primary insured and the covered dependents of the primary insured;

(6) "health insurance"

(A) means hospital and medical expenses incurred policies written on a direct basis, nonprofit service plan contracts, and self-insured or self-funded employee health benefit plans;

(B) does not include accident only policies, disability income policies or casualty insurance coverages subject to regulation under AS 21.39;

(7) "Medicare supplement plan" means a health insurance plan which provides benefits which complement or supplement the benefits provided by Medicare;

(8) "Medicare supplemental comprehensive health care plan" means a plan which, in conjunction with Medicare Parts A and B coverage, provides the benefits required under AS 21.50.020;

(9) "resident employer"

(A) means a person, partnership, association, trust, estate, corporation, whether foreign or domestic or the legal representative, trustee in bankruptcy or receiver or trustee of one of these, or the legal representative of a deceased person, including the state and a municipality of the state which has in its employ one or more individuals during a calendar year;

(B) refers only to an employer with a majority of employees employed in the state.

* Sec. 2. AS 21.27.410(a) is amended by adding a new paragraph to read:

(10) if an agent, solicitor, or broker transacting health insurance in the state fails to refer an applicant for health insurance whom the agent, solicitor, or broker has reason to believe may be eligible for a comprehensive health plan through the residual market health insurance pool to the administering carrier of the residual market health insurance pool.

* Sec. 3. AS 21.87.340 is amended by adding a new paragraph to read:

(17) AS 21.50.

* Sec. 4. The director of the division of insurance, Department of Commerce and Economic Development, shall adopt regulations implementing sec. 1 of this Act by January 1, 1981.

* Sec. 5. AS 39.30.090(1) is amended to read:

(1) A group insurance policy shall provide one or more of the following benefits: life insurance, accidental death and dismemberment insurance, weekly indemnity insurance, hospital expense insurance, surgical expense insurance, dental expense insurance, audio-visual insurance, alcoholism and drug dependency insurance, or other medical

care insurance.

* Sec. 6. AS 39.30 is amended by adding a new section to read:

Sec. 39.30.092. COVERAGE FOR ALCOHOLISM AND DRUG DEPENDENCE. (a) The group insurance policy required by AS 39.30.090(1)

(1) shall provide coverage for alcoholism and drug dependence to include

(A) inpatient detoxification benefits for not less than 14 days of benefit each calendar year in a state-approved treatment facility or licensed hospital; payment of institutional and professional benefits shall be equal to and payable as any other covered condition, except a covered condition which, by the terms of the policy, has an internal restriction;

(B) inpatient treatment coverage benefits for not less than 30 days of benefit each calendar year in a state-approved treatment program; payment of institutional and professional benefits shall be at the same level as any other covered condition, except a covered condition which, by the terms of the policy, has an internal restriction; and

(C) outpatient treatment coverage benefits of not less than 30 visits each calendar year if treatment is provided by a licensed physician, state-approved treatment program, or state-certified professional substance abuse counselor; coverage shall include individual, family or group therapy; benefits shall be paid at not less than 75 percent of the usual, customary and reasonable charge for a medical procedure, treatment or service in the geographic area;

(2) may not exclude dependents otherwise covered and may not limit coverage for alcoholism or drug dependence because of age, sex or state of illness;

(3) may not apply preexisting or named condition exclusions to deny coverage for alcoholism or drug dependence; and

(4) may require a physician's certification of necessity as a condition of payment for alcoholism or drug dependence treatment.

(b) The provisions of this section apply to group health insurance contracts and group service or indemnity type contracts issued to provide coverage for employees of the state and may apply to contracts for the benefit of employees of other participating governmental units only if the governing body of the governmental unit elects to have the provisions apply.

(c) In (a) of this section,

(1) "alcoholism" means an illness or condition characterized by the habitual lack of self control in the use of alcoholic beverages, or use of alcoholic beverages to the extent that health is substantially impaired or endangered, or social or economic function is substantially disrupted;

(2) "drug dependence" means the condition of being physically or psychologically addicted to an opiate, opiate derivative, tranquilizer, amphetamine, barbiturate, or similar substance, but excluding nicotine, caffeine and alcohol;

(3) "state" means any state in the United States and includes the District of Columbia.

* Sec. 7. AS 39.30.100 is amended to read:

Sec. 39.30.100. DEFINITIONS. In AS 39.30.090 - 39.30.100 [AS 39.30.090]

(1) "eligible employee" means

(A) an employee who has served in permanent full-time or part-time employment with the same governmental unit for 30 days or more, except an emergency or temporary employee, and

(B) an elected or appointed official of a governmental unit, effective upon taking the oath of office;

(2) "governmental unit" means the state, a borough, municipal corporation, or other political subdivision of the state, and the North Pacific Fishery Management Council;

(3) "insurance", "insurance carrier" and "insurance policy" include health care services, health care service contractors and contracts.

* Sec. 8. The provisions of secs. 5 - 7 of this Act apply to group policies or contracts which provide coverage under AS 39.30.090 - 39.30.100 and which are delivered, issued for delivery, or renewed in this state after the effective date of this Act. A policy or contract providing coverage for eligible employees in this state delivered, issued for delivery, or renewed after the effective date of this Act provides the minimum coverage required by this Act even if the language of the policy or contract does not so specifically provide.

* Sec. 9. AS 47.05 is amended by adding new sections to read:

Sec. 47.05.070. MEDICAL ASSISTANCE BY INSURANCE OR SERVICE CONTRACTS. (a) The commissioner shall use available medical assistance funds to purchase and pay premiums on policies of insurance or pay the expenses on health maintenance organization service contracts or medical or hospital service contracts that provide one or more of the medical services available under state medical assistance programs.

(b) The policy of insurance or the contract must by its terms guarantee

(1) to provide the medical services allowed under state law;

(2) to provide medical services under policies of insurance or contracts in compliance with applicable laws and regulations;

(3) to provide the statistical data, records, and reports

relating to the provision, administration, and costs of providing medical services as required by the commissioner.

Sec. 47.05.080. CONTRACTS WITH DIRECT PROVIDERS OF CARE AND SERVICE. (a) The commissioner may enter into nonexclusive contracts under which funds available for medical assistance may be administered and disbursed by the contractor to direct providers of medical and remedial care and services available under medical assistance for services rendered and supplies furnished by them.

(b) A contract under this section shall

(1) oblige the contractor to make payments under the contract promptly and not later than 30 days after receipt of the proper evidence of the claim; and

(2) provide data, records, and reports required by the commissioner.

Sec. 47.05.090. IMPLEMENTATION. The commissioner shall implement the provisions of AS 47.05.070 - 47.05.090 when the commissioner determines that comparable benefits are available at equal or less cost than direct payments by the department to the providers of medical assistance.

Sec. 47.05.100. INTERIM PAYMENT. The department may make an interim payment before receipt of billing for service to providers who serve a large volume of state medical assistance clients under regulations of the department.

Sec. 47.05.110. INTEREST ON LATE PAYMENTS. When presented by a provider of medical services with a clean claim, the state shall pay

(1) interest at the rate of one percent per month when payment is delayed more than 30 days after presentation of the clean claim;

(2) interest at the rate of two percent per month when

payment is delayed more than 90 days after presentation of the clean claim; and

(3) a full months interest entitlement if the claim is not paid by the 15th day of a calendar month.

Sec. 47.05.120. DEFINITIONS. In AS 47.05.070 - 47.05.120

(1) "clean claim" means a claim for payment which can be processed without obtaining additional information from the provider of the service or from a third party; it includes a claim with errors originating in the department's claims processing system, but does not include claims from a provider who is under investigation for fraud or abuse, or a claim under review for medical necessity;

(2) "commissioner" means the commissioner of health and social services;

(3) "department" means the Department of Health and Social Services;

(4) "medical assistance" means Medicaid (AS 47.07), general relief medical (AS 47.25.120), catastrophic illness (AS 47.08) and crippled children's and maternal and child health programs (AS 18.05.-010).

* Sec. 10. AS 47.07.020(b) is repealed and re-enacted to read:

(b) Residents of the state for whom the Social Security Act allows optional medical coverage qualifying for federal financial participation are eligible for medical assistance.

* Sec. 11. AS 47.07.030 is repealed and re-enacted to read:

Sec. 47.07.030. MEDICAL SERVICES TO BE PROVIDED. Medical services to be offered to eligible persons include services eligible for federal financial participation under Title XIX of the federal Social Services Act.

* Sec. 12. AS 47.25.120 is amended to read:

Sec. 47.25.120. ELIGIBILITY FOR ASSISTANCE. Financial assistance may be given under AS 47.25.120 - 47.25.300 [, SO FAR AS PRACTICABLE UNDER THE CONDITIONS IN THIS STATE,] to

(1) a needy person who is eligible under the regulations of the department; and

(2) a medically needy person whose income is less than the medically needy income standard or who has incurred medical expenses which equal or exceed the difference between the person's monthly income and the medically needy income standard; the medically needy income standard is 150 percent of the current Federal Community Services Administration poverty income guidelines for Alaska (45 C.F.R., sec. 1060.2).

* Sec. 13. AS 47.07.020(d) is repealed.

* Sec. 14. Sections 2 - 8 and 10 - 13 of this Act take effect January 1, 1981.

* Sec. 15. Sections 1, 9, 14, and 15 of this Act take effect July 1, 1980.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to insurance for alcoholism and drug dependence; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.42 is amended by adding a new section to read:

Sec. 21.42.347. REQUIRED PROVISION OF COVERAGE FOR ALCOHOLISM AND DRUG DEPENDENCE. (a) Group health insurance policies providing coverage on an expense-incurred basis and group service or indemnity type contracts issued by a nonprofit corporation

(1) shall provide coverage for alcoholism and drug dependence to include

(A) inpatient detoxification benefits for not less than 14 days of benefit each calendar year in a state-approved treatment facility or licensed hospital; payment of institutional and professional benefits shall be equal to and payable as any other covered condition, except a covered condition which, by the terms of the policy, has an internal restriction;

(B) inpatient treatment coverage benefits for not less than 30 days of benefit each calendar year in a state-approved treatment program; payment of institutional and professional benefits shall be at the same level as any other covered condition, except a covered condition which, by the terms of the policy, has an internal restriction; and

(C) outpatient treatment coverage benefits of not less than 30 visits each calendar year if treatment is provided by a

Prop. care travel would not be precluded by

licensed physician, state-approved treatment program, or state-certified professional substance abuse counselor; coverage shall include individual, family or group therapy; benefits shall be paid at not less than 75 per cent of the usual, customary and reasonable charge for a medical procedure, treatment or service in the geographic area;

(2) may not exclude dependents otherwise covered and may not limit coverage for alcoholism or drug dependence because of age, sex or state of illness;

(3) may not apply preexisting or named condition exclusions to deny coverage for alcoholism or drug dependence; and

(4) may require a physician's certification of necessity as a condition of payment for alcoholism or drug dependence treatment.

(b) In this section,

(1) "alcoholism" means an illness or condition characterized by the habitual lack of self control in the use of alcoholic beverages, or use of alcoholic beverages to the extent that health is substantially impaired or endangered, or social or economic function is substantially disrupted;

(2) "drug dependence" means the condition of being physically or psychologically addicted to an opiate, opiate derivative, tranquilizer, amphetamine, barbiturate, or similar substance, but excluding nicotine, caffeine and alcohol;

(3) "state" means any state in the United States and includes the District of Columbia.

* Sec. 2. AS 21.87.340 is amended by adding a new paragraph to read:

(17) AS 21.42.347.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M March 29, 1979

SUBJECT: CSSB 227, relating to alcoholism and drug dependence insurance

TO: Senator Mike Colletta

FROM: John B. Chenoweth, Legislative Counsel

I do not want to belabor the explanation you requested of this bill. The one-page summary provided by the insurance division seems more than adequate. I did question Don Koch concerning the distinctions among the several types of policies mentioned or referenced in lines 11-13 of page 1 of the bill, and thought I would share that informaton with you.

The subsection mentioned speaks to

(1) "group insurance policies providing coverage on an expense-incurred basis"; and

(2) "group service or indemnity type contracts issued by a non-profit corporation."

(1) identifies the contracts normally issued by private insurance contracts. Private corporation contracts are typically indemnification contracts, by the terms of which the insurance company agrees to reimburse the insured for covered expenses. These contracts are usually one of three types: the "specified sickness" policy, the "flat rate" policy (paying so much per day for hospitalization for whatever the reason), and the "expense-incurred" policy (reimbursing for certain expenses designated in the policy). This bill addresses only the "expense-incurred" policy, the insurance division spokesman says, for this is the type of policy usually written by companies for the benefit of employees, and is more nearly related to the kind of coverage for hospitalization and outpatient services than other kinds of company-written policies. By the term of the bill, only group policies must now provide for the coverage.

(2) above -- the service or indemnity-type policy -- is typically the kind of coverage written by carriers providing direct subscription coverage. In a service contract, payment is made by the carrier to the hospital or health facility (and in some states to physicians) for medical services provided to persons covered. In Alaska, Blue Cross of Washington/Alaska is the principal carrier of service contracts for health care coverage. My understanding of the explanation is that only nonprofit corporations are able to enter into service contract relationships directly with hospitals and health facilities. The reference to "indemnity-type" contracts in this line extends the mandatory coverage for alcoholism and drug dependence to nonprofits who indemnify insureds as well as to those whose business follows the service approach.

I trust this helps to explain the differences in the types of coverage. From the explanation, it appears certain that the intended alcoholism and drug dependence coverage does reach all providing coverage on an expense-incurred basis, including, of course, "profit-seeking" insurance corporations writing this type of coverage.

JBC:nem

3/9/79

SB 227

Sen. Colletta. This is the result of some extensive public hearings in two plus years of work trying to address a problem that conceptually everyone is in accord with. During the interim last year, we approached the problem in a different manner. The Budget and Audit Committee was generous enough to authorize $15,000 expenditure to try to accomplish the task of writing a third-party alcoholism insurance bill. Rather than using the normal routes of hiring consultants or experts in the field, what we did was go to experts in the work ethic field of the problem and the result that is before us today is their product.

It has virtually universal support, the major insurance companies participated to a great degree in a candid manner and did providers and in some cases, a couple of users. I would hope that the committee and the Senate as a whole would look upon it very favorably because I believe you are going to hear some testimony that shows the application of many minds can usually afford at least a workable style solution to accomplish any task that is put before them.

Mr. Moore. Director of Insurance for the State of Alaska. We prepared a position paper. We appear here not as opposed to the bill. We also did bring questions up in our position papers, these questions are of costs, we aren't totally sure that the cost factor is yet determinable. The other is an unequal distribution of premiums versus benefits. Thirdly, we raise the question of whether it is appropriate or not to mandate a parallel coverage. We take no standing on any one of these questions and there may be other experts here who would like to address them. We do not oppose the bill.

My associate, Mr. Don Koch, may wish to address some particular points.

Don Koch. Chief of market surveillance with the Division of Insurance. On two occasions I was acting chairman for Senator Colletta's panel to study third-party insurance coverages. It was a pleasure to me to work with a group like that that really got down to brass tacks and came up with something we believe is a workable bill.

2515

The original SB 227 was an initial workdraft of the committee. It came out of their second meeting. There was a subsequent meeting at which point in time we came up with additional amendments and I have here a copy of a marked up version of SB 227 with the two additional pages listing the specific changes.

The committee recognized early on that employed persons in a disproportionate share of hours spent on alcoholism problems in the State of Alaska and felt that this ought to be addressed. We had some statistics before us provided by Blue Cross in an article that they have in their magazine called Perspective, their 78 version of it. Basically it indicated of employed problem

problem drinkers represent about 5% of the employed population. That may or may not be true of Alaska, there have been some suspician that it probably higher. That 5% represents roughly 15% of the expenditures of the available health care dollars, so they are using three times the amount of health care dollars that their employed counterparts (non-drinking) are utilizing. One of the first concepts that the committee dealt with was the idea that to the degree that an alcoholism benefit was utilized, it would tend to reduce the utilization of other benefits. The article that I mentioned did discuss problems that problem drinkers do have. There is an increased incidence of cancer, for instance, that surprised me. That was supported by the doctor that was on the panel. There are increased problems with some liver conditions and gastrointestinal problems. Blue Cross did some studies that did show in the use of control groups what some of these relationships were, at least as to the groups they used for their studies. They were pretty convincing.

One of the concepts or considerations that the committee dealt with was the fact that after last year there were substantial quality controls placed in the Division of Alcoholism. They are now able to establish standards in the treatment of alcoholism, they are able to deal with quality controls on the personnel that will deal with this treatment. They have a number of things that they are now able to do that lend themselves to providing some kind of insurance benefit for alcoholism because there is some reasonable and meaning limitations on those persons who can deliver those kinds of benefits.

The committee recognized that there would have to be some kind of reasonable limitation just to make the bill workable. But determined that rather than use a dollar limitation they would use a time period limitation which would tend to be responsive to inflation as time goes on. One of the concepts they deal with was that that alcoholism should be treated as any other illness rather then setting up a specific degree or kind of care limitation on care. One of the primary flaws with the bill that was before the legislature last year, SB 545, is it didn't deal with some of the things that would tend to wipe out the coverage such as pre-existing conditions exclusions. Most health care policies have a condition in the policy that says if this condition existed before coverage began, you don't have any coverage. Well, alcoholism generally is something that is a long term thing or its been accumulated over a period of time so you could well end up with a situation where you provide a benefit but no body can collect on the benefit because its a pre-existing condition from the time that coverage began. That has been dealt with by saying that you cannot have a pre-existing condition exclusion for the kinds of things that we are providing a benefit for under this bill.

The panel determined that this package should be considered a minimum package and that the package should be a reasonable package, something that could work to provide rehabilitation for persons who would be collecting the benefit. The thought being that to the degree that a bargaining unit or employer/employee

group wished to have expended coverages those would be something subject to the negotiation of the collective bargaining process.

The committee determined that they would address not only alcoholism but drug dependence, so that the benefits that are listed in the bill are somewhat of a compromise which will probably be fairly liberal in some cases for alcoholism and will pretty tight in some cases for drug dependence. It also determined that it would not deal with two areas of drug dependence mainly nicotine and caffine. They figure those are issues whose time has not come.

Another concept that the committee dealth with was that this would provide for an added source of funding for some facilities who are now hard pressed to get funds. It would also provide an incentive for those facilities or programs to come up to a standard established by the state. So to that degree we'll probably have an increase in the quality of the treatment and care for alcoholism within the state.

You'll notice that within the definition of state within the bill, there is a reference to the fact a state means all 50 states or the District of Columbia. The reasoning there was that the committee felt that this coverage should be provided wherever it can be provided by facilities that meet controls that the Division of Alcoholism has indicated, or those levels of quality and that it shouldn't be confined necessarily to Alaska since perhaps in many areas we don't have the facilities. We may have somebody who originally came up from another area or has family in another area and therefore that person might best respond to treatment and rehabilitation in that area. However, the committee determined that it wouldn't be proper to provide transportation funds for that kind of situation.

The end result of that feature is that it may well provide for a less expensive treatment since it is likely that treatment in another area is going to be less expensive than it would be here in Alaska.

Basically those were the concepts and considerations the panel dealt with. They did also look to where the opposition might be coming from on a bill of this kind. They considered a number of these issues, they dealt with a number of them, positively in some cases, in other cases they just determined that that is going to be a matter for somebody to determine policy. Cost of course is a concern. We had testimony from members on the panel that the cost would likely run somewhere between 2 and 5%. However, that is going to be controlled greatly by the utilization of the benefits to the degree that utilization of the benefit increases, that cost diminishes. I think there are others here who can speak better to that than I can.

There was a cuestions brought up about how you distinguish between the drunk and the alcoholic. The committee felt that the

benefit package was developed in such a way that the person who is just drunk and is not necessarily an alcoholic isn't necessarily going to be the guy who is collecting the benefit under this policy anyway. The bill calls for several areas of coverage, one of those is a detox or drying-out coverage these are people that generally are into an emergency medical situation anyway. We are told that quite often policies are presently paying for this but they are identifying it as something else, liver problem or dehydration, any number of things.

The idea is that this would tend to cause an outright identification of alcoholism problems. The Divsion of Insurance takes the position that we wish to be involved in some kind of a statistical approach to this thing so that we can work in conjunction with the carriers and the division of alcoholism to develop some meaningful insurance statistics for a bill of this type. That we think is an intrical part of the operation of legislation like this. There were some arguments that were presented as opposing views -- the primary one is the mandate versus option feature. As the director indicated, we don't have a position that. I do know that there are others who are looking to this and there are employers that would be concerned with it, the Health Insurance Association of America will also probably address that particular issue.

The committee did recognize that there are going to be employers and employees who will fall through the cracks. These generally fall into two categories one is those where this question of jurisdiction such as federal employees. The state law doesn't have a way to reach those. The other would be the self insured employers. The committee determined that it didn't wish to address that issue either, since that would involve something that would be very difficult as a matter of practicality to effect, it would be a difficult kind of legislation to approach. So, they felt comfortable with the bill as far as they went.

It's our opinion that what you have before you aside from the considerations the director has mentioned is a highly workable bill, it does respond to the problems that previous directors saw and addressed with Sen. Colletta last year.

Sen. Hackney. Where did you come up with that description of alcoholism?

Don Koch: The initial definition of alcoholism that you see in the first version of SB 227, when the committee saw that they felt that it was negative. I don't pretend to understand why they felt that way, but they addressed that as one of the primary concerns with the bill. They sat down and came up with another one and frankly, I don't know what the source of the other definition was but everyone seemed pretty happy with it. There was even some talk about not having a definition at all and that thought was prevelent for a while until the thought came to mind, well, if you don't define alcoholism the insurer will in his policy. They didn't want to lose to the insurer

what was meant by alcoholism.

Sen. Colletta. I concur with the proposed amendments and was made aware of them.

Don Koch. This bill does one other thing tht is perhaps a little unusual from a state standpoint, That is, it addresses contracts that are not initiated in the state. This would be the employer who is domiciled in other locations and has employees in the state, but all his negotiations take place in another location. What the comments in sec. 3 of the current bill, not of the revision, what it basically says is that if you have a contract that is issued in another location and ends up covering employees in this state that contract will be deemed to provide at least a minimum benefits that we are requiring of other insurers in the state. Even thought that language may not specifically appear in their contract.

Sen. Hackney. Would that not cover federal employees?

Don Kock. No. You can't superimpose a state law on a federal This would speak to a policy that is written under another state law, Washington, Oregon, They have reason to send employees into our state and those employees are here on a permanent basis. Those people who are here and living in this state would be entitled to the level of benefit that any other employee would from his employer.

Sen. Fahrenkamp. I was wondering what the cost will be fo the state for its employees.

Paul Arnoldt. Director for the Divsion of Retirement. I apologize that we don't have a formal fiscal note in front of you, but I have just talked to John Hopkins of Blue Cross and he advised me that the rate would run about $2.64 month per employee based upon a cover group of the state of around 8,000, I think that comes to around $250,000 plus per year. We could probably anticipate that rate going up about 20%, I think around 12 to 16% would be the rate increase then there would be some growth in the actual number of employees covered, so we figure about a 20% increase in this area.

John Hopkins. Representing Blue Cross of Washington and Alaska. I served n the panel that helped to develop the legislation.

I would like to speak to the area of cost of the bill. As we were going through the deliberations, many of the panel members came to me and said ' what is this whole thing going to cost'. I used the broad range of 3 to 5% over existing premiums. As Mr. Arnoldt has pointed out, we have now developed a firm premium or rate for the state. I think it is interesting that the $2.64 which projects out to a quarter of a million dollars a year is rally only 3% of the premium. What must be considered is the fact that on the long range the mandating of an alcoholism benefit will probably be cost effective which means you will get a higher return than what you are paying in. Earlier Mr. Koch referred to some articles prepared in a Blue Cross publication and the evidence is really conclusive that the treating of alcoholism lowers the cost to other health insurance benefits. Therefore ultimately

ultimately offsetting the cost of the alcoholism benefit. I think it is fair and necessary for me to point out that from a carriers point of view we are taking risk and you are not going to see that benefit until out there two or three years. So, we do have to go in with an initial charge. Ultimately there will be a return on that. I support the way the bill is constructed, the levels of care I think are appropriate. The committee tryed to design the legislation so that it would get two appropriate types of treatment and yet not be subject to abuse.

You take your first year and you have a quarter of a million dollars of premium coming in. For example, on state employees we are going to pay out approximately that much in claims for the treatment of alcoholism. If that corrects the alcoholism problem in 100 people, the theory is that those 100 people are going to have less of the general medical type of claims in successive years. The evidence is conclusive.

I have to say in all honesty is it going to be extremely difficult to pinpoint because you've got several curves on your graft. You've got the cost of the alcoholism benefit, medical inflation puts it up, the decrease on other medical services puts it down a little bit, and it will be tough. But conclusive evidence came from these companies that established control groups. the cold hard facts are there that it reduces the cost of medical care.

Sen. Fahrenkamp. Could you address mendated service and pre-existing . . .

John Hopkins. On pre-existing, that was put into the legislation that than an insurance carrier in writing a policy could not avoid paying for the treatment of alcoholism because of a pre-existing condition.

The question of mandating has been discussed by the panel, we tryed to say that that is not what we are here for, the panel is here to construct legislation that is workable. My own feeling is a mixed opinion on what are you trying to mandate. The Blue Cross supports this bill which does in effect mandate.

Sen. Hackney. The 8,000 is just state employees? (Yes) What wuld it do to coverage if you covered municipal employees also.

Paul Arnoldt There are currently about 2,500 employees covered under the municipalities of the state who participate in the state's in the plan that the state sponsors. Other municipalities have their own plan. The $253,440 figure that translates to is only the cost to the state. (The municipality 2,500 figure is not included in the 8,000)

John Hopkins. I recognize the state as being very cautions fiscally. One of the things that is happening right now is the general cost of medical care as reflected in insurance premiums

is not going up nearly as rapidly as it has in past years. Right now, in the last year and again in 1979 we are looking at in some cases no rate increase and in some cases very small rate increase. So I guess I would say if there was ever a time to mandate a benefit where it may have a 3% effect on premiums, now is probably a pretty good time.

Sen. Hackney. What you are really saying is among other things, hospital costs containment has perhaps been more effective in Alaska . . .

John Hopkins. Moreso than the rest of the country. Its a combination of cost containment and people going to the hospital less frequently, staying shorter, etc.

Bob Cole. Supportive of measure. It shouldn't be difficult to measure certain critical variables that should show up after this benefit if it is enacted among the state employee work force t the extent that this benefit is utilized, you should see a downturn over time of sick leave utilization, productiviy problems, death and disability payments, etc.

Out to accept SS. and then out of committee with/ indiv. recs.

SB 227 - SECTIONAL BREAKDOWN

SECTION 1 - Incorporates alcohol/drug treatments into insurance package with the following coverage:

1(A) - inpatient detox benefits for NLT 14 days of each calendar year in a state approved facility/hospital; benefits shall be equal and payable as any other covered condition.

(B) - inpatient treatment coverage benefits for NLT 30 days of each calendar year in state approved treatment program; payment of institutional & professional benefits shall be at the same level as any other covered condition.

(C) - outpatient treatment benefits NLT 30 visits each calendar year if treatment provided by a licensed physician or state approved program; payments at NLT 75% of usual charge for medical procedure, treatment or service in geographic area.

(2) - may not exclude dependents otherwise covered

(3) - may not apply preexisting or named conditions to deny coverage

(4) - may require physician's certification of necessity.

(b) Definition section.

SECTION 2 & 3 - Provisions will be applicable to all group policies and minimum coverage will be required even if language of policy/ contracts does not so specifically provide.

SECTION 4 - Effective Date.

must pay at least 80%.

SECTION ANALYSIS SS for SB 227

Sec 1 AS 21.42

Requires that all group health insurance policies issued by insurance companies and all service or indemnity type contracts issued by non-profit corporations such as Blue Cross, provide as a minimum, specified coverages related to alcoholism and drug dependence.

COVERAGES are:

A. not less than 14 days detoxification benefit at a rate equal to other benefits provided in the policy.
B. not less than 30 days inpatient treatment benefit
C. not less than 30 visits to specified outpatient treatment facilities.

Alcoholism and drug dependence coverage is to be provided for all persons covered under the group policy without regard to age, sex, state of illness, or pre-existing condition.

Section 1 also provides key definitions of alcoholism and drug dependence.

Section 2 Amends AS 21.87.347 to provide that Hospital Medical Service Corporations ie. Blue Cross, are also subject to the provisions of AS 21.42 as created by this bill.

Section 3 Specifies that coverage for alcoholism and drug dependence shall automatically apply to all persons covered by a group policy issued for delivery, delivered or renewed in this state after the effective date of the act; whether the policy wording specifically provides coverage or not.

Section 4 Provides for an effective date of November 1, 1979 in order for insurance companies to amend policies and adjust rates prior to the effective date.

POSITION PAPER/Department of Health and Social Services

POSITION PAPER SB 227

"An Act relating to insurance for alcoholism and drug dependence."

The State Office of Alcoholism and Drug Abuse is very supportive of this bill for the following reasons:

There are a great number of basically middle-class employed professional administrative and technical people in Alaska, in need of Alcoholism and Prescription Drug Abuse Treatment Services, who by and large are not showing up in State funded treatment program at the present time unless they are convicted OMVI offendors. There is every reason to think that the majority of these prople are either not availing themselves of treatment services, or are going to outside treatment programs, such as Schick-Shadel, for treatment.

There is reason to believe that a major share of all costs for acute medical care in Alaska (and elsewhere) are created by injuries and illnesses brought on by the abuse of beverage alcohol (See: excerpts from recent Blue Cross publication for an example.)

Because of the work done by SOADA and local programs over the past few years, in getting local programs brought up to Nationally recognized standards, some of them now appear to be in a position to begin to offer services that could and would be reimbursed by private insurance companies. Most notable among this group would be the outpatient programs in Anchorage, Fairbanks, Juneau, Ketchikan and Seward.

There is a new, private medically supervised Substance Abuse treatment program being opened at the Alaska Medical Center in Anchorage, this Spring.

Additionally, a new, medically supervised facility is scheduled for construction in Juneau this Summer.

Both these programs should be able to provide inpatient treatment services that will be reimbursable through the coverage proposed in this bill.

Evidence from public and private organizations around the country (Kennecott Copper, Kemper Insurance, State of California, as examples) indicates that utilization of these benefits actually cuts costs to individuals and firms for acute medical care for accidental injury and numerous illnesses.

Provision of these benefits is an encouragement for people to avail themselves of the services. To the extent that they do so, lost production, absenteeism, sick leave utilization, disability benefit payments, and hospitalization for accidental injury and related diseases should diminish. This would particularly be true if companies and/or units of government have also adopted Employees Assistance provisions in their personnel policies. (See Attachment 2)

Provision of these benefits is an encouragement for hospitals in Alaska to begin to provide structual Alcoholism/Drug Abuse Treatment services, and for physicians to begin to state diagnoses of alcoholism and/or prescription drug addiction on their claims to insurance companies, instead of utilizing

inappropriate euphemistic diagnoses for claiming benefits, as they now admittedly do in apparently somewhat massive numbers. The effect of proper physician diagnosis and structured treatment will be to upgrade both the quality and appropriateness of care throughout the State.

Lastly, this bill was written mostly by the Insurance companies who serve Alaska, with the assistance of the Division of Insurance and some input from this Office. It appears therefore to address most of the concerns they had with the earlier version, while providing appropriate levels of coverage for Alcoholism/Drug Addiction Treatment.

The Office will be pleased to provide additional information on this bill as requested.

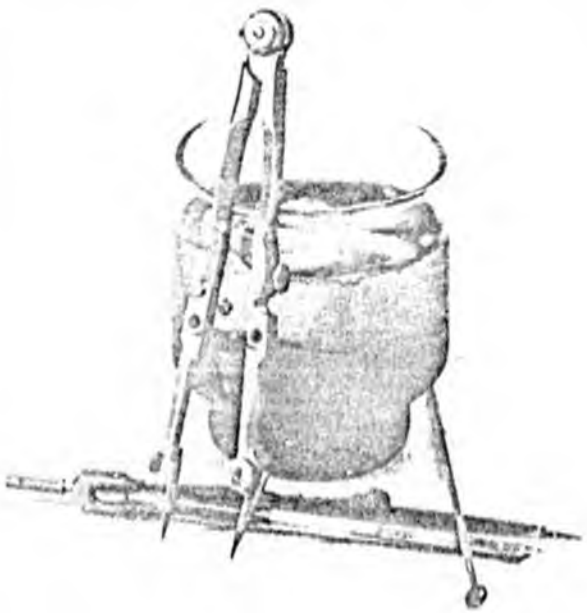
POSITION PAPER/Department of Health and Social Services



PROBLEM-DRINKING EMPLOYEES

70% Can Be Rehabilitated
(And Millions Of Dollars Saved In The Process?)

Here's a quiz on "drinking and working" . . . and the answers:

Questions	Answers
• What percentage of an employee population are problem drinkers?	5%
• How many more company dollars in health benefits does a problem-drinking employee use than the average employee uses?	3 to 1
• What share of employee health claims are by problem drinkers?	15%
• What can be done about problem-drinking employees?	Rehabilitation
• What percentage of problem-drinkers can an employer expect to rehabilitate successfully?	70%
• At what cost to the employer?	None?

Large employers such as Scovill, Economics Laboratory, Illinois Bell, the Philadelphia Fire Department and Kennecott Copper have an edge on most readers. They knew the answers even before PERSPECTIVE provided them. That's because these five employers helped contribute the data.

But Kenneth Sarvis, insurance consultant to the Florida Department of Health & Rehabilitative Services, brought the facts into focus.

His report, INSURANCE COST SAVINGS DUE TO AN ADEQUATE ALCOHOLISM HEALTH BENEFIT, makes four major contentions borne out by employer data:

1. "Problem drinkers utilize a disproportionately high portion of health benefits."
2. "There is a high rehabilitation rate for problem-drinking employees."
3. "There is a significant reduction in the utilization of health and sickness benefits by rehabilitated problem drinkers."
4. "An employer can expect significant health insurance cost savings by providing employees health insurance for alcoholism."

Sarvis' data to support each of these contentions are considerable.

THE TOLL . . .

The U.S. Department of Health, Education & Welfare has issued a report on alcohol abuse. It says:

- An estimated 10 million Americans are either problem drinkers or alcoholics.
- Drinking may be to blame for as many as 205,000 deaths a year.
- The economic toll from alcohol problems was about $43 billion in 1975 (lost production, medical bills, other expenses).
- Alcohol may be involved in: up to one-third of all suicides, half of all murders, half of all traffic deaths, one-fourth of all other accidental deaths.
- Alcohol is "indisputably involved" in causing cancer.

But . . .

- Programs to treat problem drinkers and alcoholics increased from 500 in 1973 to nearly 2,400 in 1977.

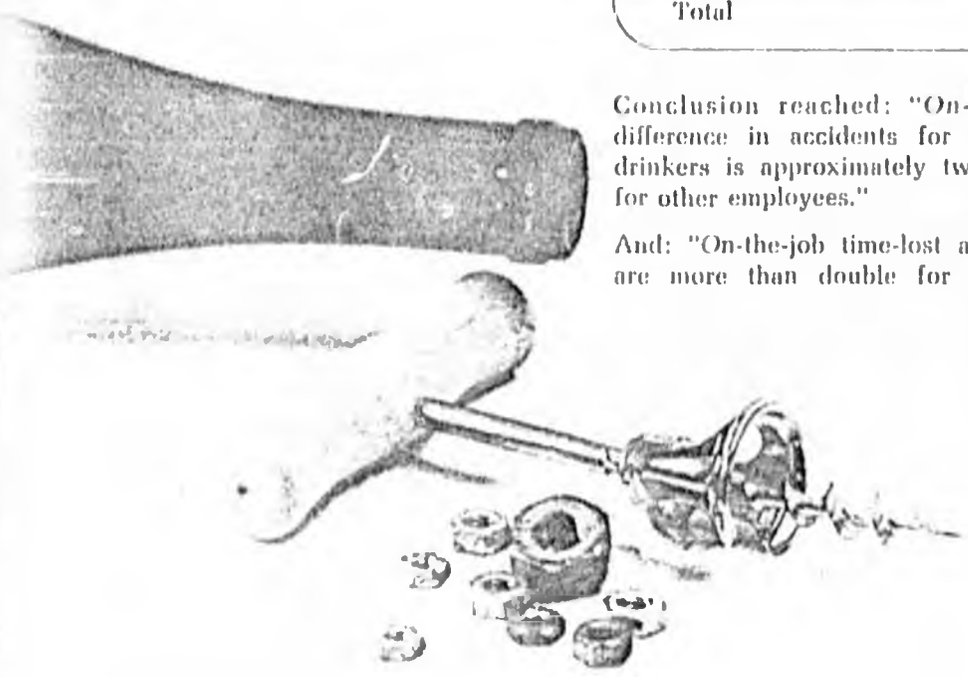
CONTENTION NO. 1:

"Problem drinkers utilize a disproportionately high portion of health benefits."

Sarvis says:

"Employee health is considerably affected by problem drinking."

He cites work done by Dr. Wilton Maxwell, studying a sample of employees with sickness or injury absence of eight days or more for which sickness payment was made. Each eight-day absence is called a "case" in the following tabulation:



Description	Problem Group	Control Group
Number of cases	364	149
Average number of cases per employee	7.6	3.1
Total days absent	11,672	4,648
Average number of days absent per employee	243.2	96.8
Total sickness payments	$108,495	$36,862
Average sickness payment per employee	$ 2,260	$ 768

Conclusion reached: *"The average and total sickness payments indicate alcoholics cost employers three times the sickness payments of other employees."*

Moreover: "The problem group's total days absent is 2½ times that of the control group, indicating a tremendous loss in production time to the employer."

Maxwell, a PhD in sociology, also studied how frequently accidents happened to members of the two study groups:

Accident Class	Problem Group	Control Group
On job (no time lost)	29	16.0
On job (time lost)	26	11.5
Off job (eight days or more lost time)	44	0.0
Total	99	27.5

Conclusion reached: "On-the-job difference in accidents for problem drinkers is approximately twice that for other employees."

And: "On-the-job time-lost accidents are more than double for problem drinkers, indicating that the type of accident attributable to problem drinkers is more costly to the employee than other non-alcohol related accidents."

Worst of all: "*Off*-the-job accidents numbered 44 for the problem-drinking group, zero for the control group."

Overall: "The problem-drinker accident rate was 3.6 times that of other employees, a distinctive cost differential to the employer."

Maxwell explored the question of "how many hospital stays are attributable to problem drinking?" He cites the work of S. Peli and C.A. D'Alonzo in establishing frequency rates by type of illness or injury:

Selected Digestive Disorders		No. of Absences	Frequency Rate %
Gastrointestinal upsets	A	167	21.9
	C	66	7.6
Cirrhosis of liver	A	6	0.8
	C	0	0.0
Peptic ulcer	A	18	2.4
	C	13	1.5
Hernia	A	11	1.4
	C	4	0.5
Gall bladder disease	A	6	0.8
	C	7	0.8
Other digestive disorders	A	7	0.9
	C	13	1.5
Total	A	215	28.1
	C	103	11.9

A = Alcoholics C = Controls

Selected Respiratory Infections		No. of Absences	Frequency Rate %
Upper respiratory infection	A	173	22.6
	C	116	13.4
Influenza	A	71	9.3
	C	51	5.9
Bronchitis	A	35	4.6
	C	24	2.8
Pneumonia	A	15	2.0
	C	4	0.5
Total	A	294	38.5
	C	194	22.5

Selected Musculoskeletal Disorders		No. of Absences	Frequency Rate %
Arthritis	A	18	2.4
	C	5	0.6
Rheumatism	A	15	2.0
	C	7	0.8
Low back disorders, cause unspecified	A	22	2.9
	C	7	0.8
Bursitis	A	17	2.2
	C	5	0.6
Disc disorders	A	14	1.8
	C	2	0.2
Muscular strain	A	16	2.1
	C	6	0.7
Other	A	9	1.2
	C	14	1.6
Total	A	111	14.5
	C	46	5.3

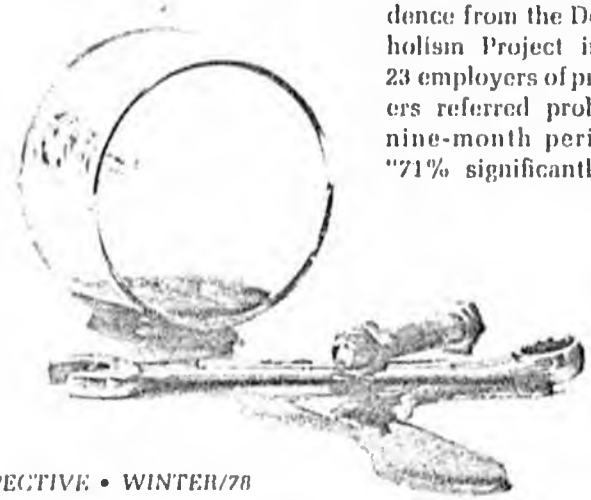
Conclusion reached: *"The frequency rate of alcoholics is about three times that of other employees* for digestive and musculoskeletal disorders, and about two times that of other employees for respiratory infections," replicating other findings.

Sarvis comments: "These and similar studies indicate that problem-drinking employees are sick people who use a disproportionately high portion of employee group health insurance, contributing to high group insurance costs."

CONTENTIONS NO. 2 & 3:

"There is a high rehabilitation rate for problem-drinking employees."

"There is a significant reduction in the utilization of health & sickness benefits by rehabilitated problem drinkers."



Sarvis finds "the success rate for rehabilitation of problem-drinking employees" to be "very high," indicating that "the possibility of job loss is an incentive for employees to seek rehabilitation."

He also finds that, "after problem drinkers are rehabilitated, there is a great reduction in their utilization of health and sickness benefits," thereby "significantly decreasing the cost of group health insurance."

He cites five employers who have proven track records at rehabilitating problem-drinking employees through a formal mechanism for early identification and referral:

Employer	# of Employees	"Processed"	% Rehabilitated	Savings
Scovill Mfg. Co. Waterbury, Conn.	6,500	180 in 3 years	78%	$186,550
Economics Laboratory, Inc. St. Paul, Minn.	3,500	N/I	80% for employees; 50% for dependents	Not indicated; but treatment costs were cut as much as 65% by using non-hospital facilities, such as alcoholism treatment centers.
Illinois Bell Telephone Co. Chicago, Ill.	N/I	402 in 5 years	72%	46% reduction in sickness disability and "a tremendous decrease in utilization of insurance plans."
Philadelphia Fire Department	3,410	N/I	N/I	55% decrease in sick leave for referred cases; 67% reduction in injuries; "a significant decrease in health insurance utilization."
Kennecott Copper Corp. New York City	N/I	N/I	N/I	After a year, costs for hospital, medical and surgical care were reduced 55%; alcoholics vs. other employees cost 5-to-1 for all sickness & accident activity, 3-to-1 for hospital, medical & surgical care.

N/I = not indicated

Sarvis also cites equally pointed evidence from the DePaul Industrial Alcoholism Project in Milwaukee, where 23 employers of primarily factory workers referred problem-drinking over a nine-month period. Their findings: "71% significantly improved, 46% of them reporting total abstinence and 26% 'essential' abstinence."

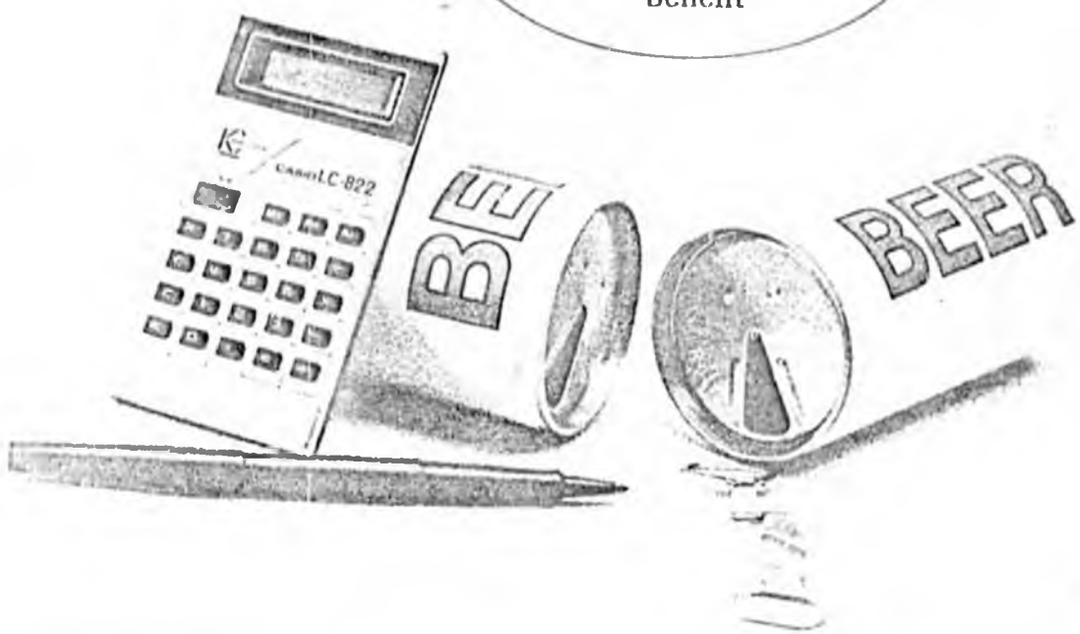
The consultant concludes that "*an employer can expect a high rehabilitation success rate for problem-drinking employees* — 70% is average — and a tremendous decrease in the utilization of health benefits." Savings are "maximized when an employer couples a formal mechanism for early identification and referral with appropriate health insurance coverage for alcoholism."

CONTENTION NO. 4:

"An employer can expect significant health insurance cost savings by providing employees health insurance for alcoholism."

Sarvis quotes some key numbers:

- *"5% of an employee population are problem drinkers."* (Source: National Institute on Alcohol Abuse & Alcoholism)
- *"A problem-drinking employee uses $3 in health benefits to $1 for the average employee."* (Source: Dr. Maxwell)
- "An employer can therefore estimate that *problem-drinking employees are responsible for 15% of claims paid annually*" . . . by multiplying the 5% times the 3 in the 3-to-1 ratio.
- If all problem drinkers could be rehabilitated and it could then be "assumed that alcoholism did not exist in an employee group, *the employer would pay 10% less in claims*" . . . reducing the 15% above by the difference between the numbers in the 3-to-1 ratio to arrive at the use by non-problem-drinkers.
- "It is impractical to believe that 100% of such savings could be achieved. *Some* can. If an employer provided adequate coverage for alcoholism and only 20% of problem-drinking employees were rehabilitated, *this minimal number alone could save the employer around 2% of total claims paid*" . . . multiplying the maximum 10% savings by the 20% rehabilitated.



Sarvis then addresses four types of employer situations and presents evidence of savings from each.

A.
With an employee assistance program, *and* an alcoholism health benefit

B.
With an employee assistance program *but not* an alcoholism health benefit

C.
With an alcoholism health benefit, *but not* an employee assistance program

D.
With *neither* an employee assistance program *nor* an alcoholism health benefit

PROBLEM DRINKERS

Savings depend on the use of the following data:

Expected REDUCTION IN CLAIMS PAYMENTS As A Percent Of Total Claims Payments*

Problem Drinkers Referred As Percent Of Total Employee Population	Percent Increase In Total Premiums Due To Cost Of Alcoholism Benefit				
	0.5%	1.0%	1.5%	2.0%	2.5%
1.0%	1.0%	0.5%	0.1%	—	—
2.0%	2.4%	1.9%	1.4%	1.0%	0.6%
3.0%	3.7%	3.2%	2.8%	2.3%	1.9%
4.0%	5.1%	4.6%	4.2%	3.7%	3.3%
5.0%	6.5%	6.0%	5.6%	5.1%	4.7%

* Problem-drinking employees should have been rehabilitated for at least one year to achieve the expected reduction in claims payments.

Expected REDUCTION IN PREMIUMS As A Percent Of Total Premiums*

Problem Drinkers Referred As Percent Of Total Employee Population	Percent Increase In Total Premiums Due To Cost Of Alcoholism Benefit				
	0.5%	1.0%	1.5%	2.0%	2.5%
1.0%	0.8%	0.3%	—	—	—
2.0%	2.2%	1.7%	1.1%	0.6%	0.0%
3.0%	3.5%	3.0%	2.4%	1.9%	1.3%
4.0%	4.8%	4.3%	3.8%	3.3%	2.7%
5.0%	6.3%	5.8%	5.2%	4.7%	4.1%

* An actual reduction in total premiums from one year to the next could be expected only if overall insurance program costs did not increase.

Here's what the tables tell an employer with 1,000 employees whose total premium is $1,200,000 a year ($100 a month x 12 months x 1,000 employees) and whose total claims payment is $1,080,000 — a 90% claims ratio (claims as a percentage of total premium):

If PROBLEM-DRINKING EMPLOYEES were referred at the rate of:	If the ALCOHOLISM BENEFIT increased total annual insurance premiums by:	These decreases would occur in		For net savings of				
		CLAIMS PAYMENTS	PREMIUMS PAID	CLAIMS PAYMENTS		PREMIUMS PAID		TOTAL
				%	Dollars	%	Dollars	Dollars
2% a year	1%	1.9%	1.7%	.9%	$ 9,720	.7%	$ 8,400	$18,120
5% a year	2.5%	4.7%	4.1%	2.2%	$23,760	1.6%	$19,200	$42,960

The two tables also alert employees to these facts:

Employer "A"—with both referral program and benefit -- can determine the percent of problem drinkers who need to be referred vs. the cost of the alcoholism benefit to reach the cost savings he desires.

Employer "B" can determine what it will cost to add an alcoholism health benefit in order to achieve desired insurance cost savings.

Employer "C" can determine how the cost of establishing an employee assistance program in order to increase problem-drinking referrals would net out insurance cost savings.

Employer "D" can determine the cost of both referral program and benefit to produce desired insurance cost savings. ■

I. INTRODUCTION

Over the past decade the work environment has become an effective setting for identification of the problem drinker. The nature of the working environment which involves frequent contact with supervision and others facilitates recognition of behavioral changes and impaired performance. Because of this and recognition of the costs associated with impaired work performance there has been substantial development and growth of formal occupational programs geared to identify problem drinking employees and to motivate them to receive treatment. Certain of such programs also handle clients with behavioral, financial, and mental problems among others. Occupational programs usually involve several different functions including supervisory training, employee counseling and follow-up services.

The emphasis on and growth in occupational programming has spawned the development of several different professional work arenas. The first of these is the occupational program director who is usually company based and is charged with all facets of management and administration of the program. The second is the occupational programming consultant (OPC). OPC's were originally established by Federal government grants to the various states. Through these grants the states were able to hire two professionals whose function was to aid companies in the development and operation of occupational programs. Although the original grants establishing state-based OPC's have now expired, many of the states are continuing these positions and in fact, there is now a growing number of people in both public and private sectors who function in this work arena.

Occupational programs are not islands of activity, rather they are a part of a process which involves identification, counseling, referral, treatment and follow-up. As a client moves from initial identification and referral to the treatment phase, other important aspects of this process come into play. First, the treatment sequence itself may be variable from client to client. For some persons a period of inpatient care followed by intensive outpatient care may be necessary. For others, only outpatient care may be necessary and desirable. For still others an intermediate or transitional type of care is dictated. Second, the provision of care, whether of an inpatient, outpatient or intermediate basis, involves costs. Certain of these costs are borne by the client or possibly the provider. In many instances costs of care are borne by a third party, such as private health insurance. In this instance, the client and/or his company have made premium payments to an insurance carrier, who in turn pays all or part of the costs of care. Health insurance coverage for alcoholism is not as common as insurance coverage for physical disease and is frequently subject to limitations and exclusions. Because of the nature of his work the OPC is in a unique position to advise companies who have (or who do not have) occupational programs on the most effective forms of insurance coverage. Historically, little information on this subject has been available to OPC's or indeed other alcoholism professionals. Thus it is the purpose of this paper to provide guidance to persons in occupational programming and related areas who have an interest in the nature and extent of health insurance coverage for alcoholism for business and industry.

This guide is presented in three additional sections. Section II describes employee benefit plans and health insurance coverage for alcoholism. Section III

identifies the major factors in health insurance coverage for alcoholism. Finally, Section IV presents several alternative strategies which OPC's may wish to consider in providing guidance in the development of health insurance coverage for alcoholism.

II. EMPLOYEE HEALTH BENEFIT PLANS AND HEALTH INSURANCE COVERAGE FOR ALCOHOLISM

A. Background

An employee health benefit plan is any type of health care plan sponsored (in whole or part) by an employer on behalf of its employees to provide benefits to meet health care expenses associated with injury or illness. Such plans may cover hospital, surgical and regular and major medical expenses. Hospital insurance covers the cost of charges for hospital room and board and associated auxillary services. Surgical and regular medical insurance provides for reimbursement of surgical fees and for the medical expense of physician services other than surgery. Major medical expense insurance is designed to pay the majority of illness costs not covered by the basic insurance package and in fact may replace the basic package.

There are three major types of companies which provide insurance in the United States. These include commercial carriers, service plans and independent plans. Commercial carriers usually involve life and casualty insurance companies who do not limit their activities only to the health area. Service plans usually imply Blue Cross/Blue Shield, which is actually a confederation of two private nonprofit organizations. Blue Cross is concerned with hospital and other related services, and Blue Shield with professional services. These organizations operate in consort with one another through independent area plans; frequently an area will cover an entire state. Independent plans are a conglomerate of employer-employee plans, community plans, private group clinics and dental service corporations. Actual payment of health care claims varies from carrier to carrier. Some reimburse the employee directly according to a fixed schedule,

and others reimburse the provider. Currently commercial carriers underwrite about 55 percent of all hospital and surgical care for the total U.S. population enrolled in a health insurance plan. Blue Cross/Blue Shield covers about 40 percent and independent plans about 5 percent. Commercial carriers account for about 70 percent of all major medical enrollees, and Blue Cross/Blue Shield accounts for about 30 percent.[1]

Over the past 25 years employee health benefit plans have increased dramatically in the United States. The number of employees with hosptial insurance rose from 24.5 million in 1950 to about 58 million in 1974. In similar fashion, surgical expense insurance went from about 18 million employees to 56 million employees during the same period of time. Perhaps even more dramatic has been the rise in major medical insurance. Though there were only some 200,000 workers covered in 1952, by 1974 coverage was being provided to about 28 million workers.[2]

Table 1 shows the percentage of all employees (public and private) covered by health insurance plans. Currently about 70 percent of the employee population has some form of hospital insurance, with nearly the same proportion of insurance having surgical and regular medical expense benefits. About one-third of the population has major medical expense benefits.

B. The Historical Development of Health Insurance Coverage for Alcoholism

While public and private activities in health insurance can be traced back to the 1930's, only in recent years has coverage for mental health in general and alcoholism in particular been included. Much of the early interest in health insurance coverage for alcoholism can be traced to 1968 when the National Center for Prevention and Control of Alcoholism initiated a study to examine beneficiary experiences and coverage provided by certain carriers.[3] Following that report the Center embarked on a series of informal meetings with carriers and other interested organizations and in 1972 (as

---

[3] N. Rosenburg, "Survey of Health Insurance for Alcoholism: Inpatient Coverage," National Center for Prevention and Control of Alcoholism, Washington, D.C., National Institute of Mental Health, 1968.

NIAAA) sponsored a state-of-the-art review of health insurance coverage for alcoholism offered by private and public insurance carriers.[4] This study found: (1) such coverage was often excluded from regular health insurance policies or available only in limited form; (2) public and private insurance carriers lagged considerably behind expressed needs for such coverage; (3) among carriers with alcoholism treatment benefits, coverage was often restricted to inpatient hospital care rather than less expensive forms of treatment; (4) the cost of alcoholism care, although poorly known at the time, was frequently used as an argument against underwriting such benefits; and (5) while the insurance industry frequently applied sanctions against claims for alcoholism treatment per se it appeared to condone the use of proxy diagnoses used as a cover for alcoholism treatment.

In 1973 a number of other studies were initiated which expanded the scope of knowledge concerning health insurance coverage for alcoholism. A report published that same year examined provider experiences in health insurance coverage for alcoholism, insurance coverage for alcoholism among a small sample of employee benefit plans provided by large United States corporations, and legislative proposals for national health insurance.[5] The survey of providers of alcoholism treatment revealed that carrier response to inpatient claims was highly variable--only in rare instances were outpatient claims reimbursed. The study also noted that the use of

[5] J. B. Hallan, "Health Insurance Coverage for Alcoholism: Proposed Benefit Provisions," Report prepared for the National Institute on Alcohol Abuse and Alcoholism, 1973.

proxy diagnoses in the billing of insurance claims for alcoholism treatment was a common practice. The survey of 21 large corporations (employee size 2,400 to 70,000) revealed that only one corporation did not provide any type of alcoholism coverage for employees. About 40 percent of the companies provided for outpatient visits and nearly all provided coverage for inpatient care. Of those companies studied about 14 percent were self-insured, 38 percent were insured by Blue Cross/Blue Shield and the remainder by other carriers. The survey was significant inasmuch as it revealed in a preliminary sense the general existence of some form of third party payment mechanism for alcoholism treatment among employee benefit plans of major industries. Finally, a study was made of legislative proposals for national health insurance which were introduced during the period January through May in 1973. Among those proposed only one appeared to provide adequate coverage for alcoholism.

During 1972-1973 the problems associated with inadequate insurance coverage for alcoholism began to come to the attention of state legislators. By early 1974 four states had passed legislation which mandated or defined the nature of alcoholism treatment coverage which carriers must provide in policies offered within those states.[6] Since that time state legislative activities in this area have increased dramatically (see Section III).

In addition to state legislative activities during this period certain health insurance carriers began to make significant moves toward assuring health insurance coverage for alcoholism for their beneficiaries. In 1972, The Prudential Insurance Company began to honor claims for treatment in

---

[6]J. B. Hallan, "Health Insurance for Alcoholism: State Legislative and Regulatory Activities," Report prepared for the National Institute on Alcohol Abuse and Alcoholism, 1974.

facilities other than the usually identifiable and accredited surgical, medical and diagnostic facilities. In mid-1973, Kemper Insurance Company broadened its group accident and health insurance coverage to provide for inpatient and outpatient treatment of alcoholism in hospitals and state licensed alcoholism treatment facilites. Similar coverage began to be provided by Employers of Wausau in 1974. Finally, in 1974 the Hartford Insurance Group indicated that alcoholism would be covered on the same basis as any other disease in its group policies, and that it would approve claims from alcoholism treatment facilities.[7]

In 1973, a model health insurance benefit plan for alcoholism treatment was developed for the NIAAA to reflect current treatment regimens and a need for alternatives for inpatient care.[8] These model provisions are currently undergoing study and experimentation. For example, the State of California in 1974 implemented a variation of the model benefit plan in a pilot program for State and public employees.

More recent activities concerning health insurance coverage for alcoholism have focused on (a) the development of standards for alcoholism treatment services; (b) development of standards leading toward certification of non-degreed professional treatment staff; (c) the development of several for-profit alcoholism treatment programs which are oriented to maximize third party payments; (d) training programs in third party mechanisms for NIAAA funded centers; and (e) experimental programs with

selected insurance carriers and health maintenance organizations.[9]

In summary, although there appear to have been some advances in providing or assuring health insurance benefits for alcoholism treatment, such benefits continue to be highly limited and frequently unavailable. Occupational programming personnel should be aware that a number of relevant issues are yet to be resolved, including: (1) the extent to which health insurance benefits actually underwrite costs of treatment of alcoholism; (2) the impact of availability of health insurance for alcoholism on demand for treatment services; (3) the effectiveness and efficiency of alternative forms of health insurance; and (4) the potential impact of health insurance coverage for alcoholism on demands for other health services.

III. MAJOR FACTORS IN DEVELOPING HEALTH INSURANCE COVERAGE FOR ALCOHOLISM

A. Introduction

This section shall identify and describe those elements of health insurance of importance to occupational programming personnel who have responsibility for, or interest in, the development of private health insurance coverage for alcoholism. Areas to be covered include: (1) a description of the carrier industry, and (2) health insurance premiums and coverage for alcoholism.

B. The Health Insurance Industry

1. Nature and Extent of the Health Insurance Industry

All health insurance companies vendor a similar product, i.e., a mechanism (insurance) which reduces for any one individual financial risk associated with illness or injury through a pooling of the population at risk. Such insurance involves an agreement (contract, policy, certificate) for a specified period of time between the insurance company (carrier) which stipulates the parties involved, the events (sickness, injury) which may produce a loss and the monetary charge (premium) imposed by the carrier on the insured for participation in the insurance program.

The health insurance industry in the United States today is a major business enterprise. Currently some 78 percent of the civilian population (163 million) has some form of private health insurance coverage and as indicated before about three-fourths of the worker population has hospital or surgical expense insurance. In their most recent

report on the private health insurance industry, the Social Security Administration states that total revenues derived from premiums for Blue Cross/Blue Shield and commercial carriers were $12.4 billion and $13.9 billion respectively; independent plans accounted for only about $2.2 billion.[10] Currently about 58 million workers in the U.S. are covered by some form of health insurance benefits -- the most popular form of such coverage being hospitalization insurance. A list of major health insurance carriers operating in the U.S. today and their estimated group enrollments for hospitalization insurance is shown in Table 2.

Table 2

Major United States Health Insurance Carriers and Hospitalization Insurance

Insurance Company	Number of Employees Covered for Hospitalization in U.S. (in millions)
Blue Cross	25.3
Aetna	2.0
Connecticut General	1.1
Equitable Life Assurance	1.2
Metropolitan	1.7
Prudential	1.1
Travelers	3.2
Occidental Life	0.6
Provident Life	0.6

Source: 1) A.M. Skolnik, "Twenty Five Years of Employee Benefit Plans," Social Security Bulletin, XXXIX, No. 91 (Sept. 1976) pp. 3-10.
2) EBPR Research Reports: Carrier Enrollments. Chicago: Charles Spencer and Assoc., 1975 and 1976.

As can be seen, Blue Cross accounts for considerably more enrollees than do other individual carriers. Collectively, however, all non-Blue Cross companies (including many not shown in the above table) provide benefits for slightly more than half of all employees with hospitalization insurance.

[10] M. Mueller and P. A. Piro, "Private Health Insurance in 1974: A Review of Coverage, Enrollment and Financial Experience," Social Security Bulletin (March 1976), pp. 3-20.

2. Health Insurance Company Income

Health insurance carriers derive revenues through underwriting, rate making, marketing and sale of insurance contracts. Underwriting is a process which involves the selection, classification and rating of risks. The purpose of underwriting is to determine the probability of loss (or the level of risk to the carrier) and if the group to be insured has a similar possibility of loss as the universe of groups on which carrier charges (premiums) are based. Carriers thus aggregate their insured population into groups which have similar expectations of loss. Rate making involves the determination of premiums for the various classifications of groups.

Marketing of health insurance in many ways is similar in nature to those processes used in the vendoring of ordinary products such as hardware or liquor. First, while many insurance carriers use traditional advertising media (newspapers, television, magazines) to deseribe their "wares," other carriers conduct their sale operations by direct mail. Second, health insurance carriers frequently employ or contract with salaried representatives, agents, or brokers who sell insurance policies or contracts to individuals or groups. Commercial carriers utilize agents or brokers, while Blue Cross/Blue Shield uses salaried representatives. Third, health insurance is generally sold as a package or individualized program. The package sale involves the vendoring of an established or fixed set of benefits, while the program sale is a set of benefits specifically tailored to the needs of the client.

C. Health Insurance Premiums

A health insurance premium is the amount of money collected by a carrier in exchange for a promise to the insured that certain payments will be made to the insured or the health care provider if the insured incurs health care expenses. Premiums (usually payable annually or some division thereof) are determined in advance of the period actually covered. Thus the derivation of a premium by a carrier involves the use of historical data and expected future trends for the population group covered. Premiums usually consist of two components -- the first of which is "pure" premium, i.e., the anticipated amount of benefits to be paid to beneficiaries. Thus the pure premium can be attributed to the product of the claim frequency rate (probability of loss) and the average claim rate (average severity of claims expensed in dollars). The second component is a "loading" factor or indirect cost which covers a variety of administrative expenses, taxes, contingencies, etc. In general, actual computations (rate making) of a premium for a group such as an industry or business will depend on a variety of factors including size of the group, population make-up (age, sex), nature of work activity, etc. These factors are then compared with historical data concerning utilization and cost experience for hospital, surgical and major medical benefits. Thus the annual premiums for a given group is estimated by approximating the collective costs associated with health care utilization for similar groups.

Premiums associated with health insurance coverage for alcoholism are poorly known. Some carriers in adding alcoholism treatment benefits to an existing policy will charge an additional premium for such coverage. Other carriers will add these benefits at no additional charge. For example,

Capital Blue Cross and Blue Shield of Maryland made available benefits for care in special alcoholism treatment facilities at no additional charge. While little, however, is known about the actual mechanics employed by carriers in estimating premiums for this condition, there is a major constraint associated with this process, i.e., the lack of accurate data (for a given population) on not only the prevalence of the disease, but also the number of people who seek treatment. Interestingly, the widespread use of proxy diagnoses for treatment of alcoholism and acceptance thereof by the various carriers impedes their ability to adequately project the extent of the problem. Further, because of the continuing social stigma surrounding alcoholism, many individuals are highly reluctant to even file insurance claims.

Some indication of recent premiums for the cost of adding alcoholism treatment benefits has been documented in the Pilot Program to provide health insurance coverage for alcoholism to California state and public employees. The program, which is described in Section III-E of this report, employed a number of carriers, four of which provided coverage to over 90 percent of all the state employee subscribers. Though the Pilot Program agreed to cover costs of alcoholism treatment for this population, reimbursement by the Program to the carriers for provider costs was initially based on premium estimates derived by the carriers. These premium estimates, which are shown in Table 3, are actually additions to the premiums required for the regular policy or plan purchased by the subscriber. As can be seen, there is substantial variation between the prepaid group practice plan premium (35¢ per member) and the service and commercial plans (about 10¢-13¢ per member).

Table 3

Premiums Required By Carriers for the California Pilot Program

Carrier	Premiums (monthly)
California Western Occidental Life	$0.35 per member
Blue Cross/Blue Shield	0.35 per member
Kaiser-North	0.10 per member 0.20 per member and one dependent 0.30 per member and two or more dependent
Kaiser-South	0.13 per member 0.26 per member and one dependent 0.30 per member and two or more dependent

Source: "Alcoholism Care Utilization and Costs - California Pilot Health Insurance Coverage for Alcoholism," H-2, Inc., Raleigh, N.C., November 1975.

Analysis of two years of experimental data from the Pilot Program concerning utilization and costs revealed that the actual premiums should have been about 33¢ per month per subscriber. A rate of this magnitude should be viewed with caution, however, for (1) utilization over the two year period was low, i.e., 760 persons out of a worker population of about 141,000 and (2) alcoholism is treated under an alcoholism diagnosis as opposed to a cover or proxy diagnosis health care costs do not increase. Information is available from other carriers concerning premiums and their derivation. Note, however, that in recent years both Capital Blue Cross of Pennsylvania and Blue Cross of Maryland have introduced contracts (policies) with provisions for alcoholism care which have not involved premium increases. Finally, certain commercial carriers, such as Prudential and Hartford, who are offering insurance benefits for alcoholism allude to the possibility of premium increases for such coverage.

D. Management and Labor

Corporate management has a responsibility to provide for the design,

development and operation of employee benefit plans. As such, they are responsible for: (1) determining the nature and extent (structure) of health insurance benefits; (2) determining the insurance carrier who will provide the health insurance plan; and (3) obtaining the widest range of benefits at minimum cost. Health insurance may be provided without cost to the employee as a part of his fringe benefit package - more frequently, however, there is a monthly premium cost to the employee which represents a share of the total cost based on a scale derived by management. The nature and location of administration of the health insurance plan varies substantially from company to company. Not infrequently the plan is administered by the corporate office which oversees personnel and related activities.

In those companies which employ organized labor, unions have become an important force in determining health insurance benefits for their members. In recent years unions have become increasingly cognizant about the nature and extent of mental health problems in general and alcoholism in particular. Among the more notable efforts to date have been those of the United Auto Workers and the United Mine Workers. The United Mine Workers (which is self-insured) has for years provided for the inpatient and outpatient treatment of alcoholism. The United Auto Workers recently negotiated a comprehensive benefit package for their members which provides for treatment of substance abuse. In addition, the Teamsters Union recently indicated that alcoholism coverage would be a <u>necessary</u> bargaining item. Given that such coverage may well become a collective bargaining point over the next several years by major labor unions, occupational programming personnel are in a unique position to provide information and counsel to labor and management on this important insurance issue.

E. Benefit Structure

As indicated earlier, though the current status of health insurance coverage for alcoholism in the United States leaves much to be desired, there are encouraging trends as evidenced by actions of public agencies, state legislatures, insurance carriers and purchasers. Continued development of health insurance coverage for alcoholism must take into account the growing use of effective non-traditional forms of care, such as intermediate care facilities, recovery home care and outpatient care as opposed to the more expensive and traditional inpatient care. Accordingly, this section will focus on: health insurance benefit structures in use; a model insurance benefit plan; the impact of state legislation on benefit plans; and accreditation and licensing as they affect benefit plans.

1. Benefit Plans Used in Industry with Occupational Programs

Benefit plans for alcoholism treatment differ by virtue of their nature (inpatient, outpatient, other care, etc.) and extent (i.e., the limits of care in terms of hospital inpatient days, dollar benefits, etc.). Unfortunately, specific benefits for alcoholism treatment available to worker populations through employee benefit plans are imperfectly known. There are available several references which describe in varying detail benefit plans which can be purchased from various insurance carriers.[11, 12] These references provide a general indication of the availability of coverage for alcoholism treatment.

---

[11] Time Saver for Health Insurance, Cincinnati, Ohio: The National Underwriters Company.

[12] EBPR Research Reports, Charles Spencer and Associates, Inc., Chicago, Ill.

The Bureau of Labor Statistics* periodically publishes a digest of health and insurance plans available to employees of large corporations.[13] This source indicates the availability of psychiatric or mental health care coverage but does not mention alcoholism.

To provide more specific information of use to occupational programming personnel on existing benefit plans a survey was conducted of 31 large scale companies (average employee population = 34,000) which had ongoing occupational programs. These companies, which are scattered throughout the United States, were selected for survey in a systematic manner from the master list of programs currently on file with the Association of Labor-Management Consultants on Alcoholism (ALMACA). A composite picture of the nature of health insurance benefits for alcoholism treatment provided to the employee population by the surveyed industries is presented in Table 4. As shown, 30 of the 31 companies made specific provisions for inpatient care. About three-fourths of the companies provided special treatment center benefits (i.e., care in an alcoholism treatment center), while only one-half of the companies covered outpatient care costs. Two firms cover the cost of care in an intermediate care facility such as a halfway house. Only one company provides no benefits for alcoholism treatment of any kind.

---

[13] U.S. Bureau of Labor Statistics.

*In addition, the U. S. Department of Labor is required to keep on file details of welfare and pension plans (including health insurance) under the Welfare and Pension Plan Disclosure Act. Many of the plans on file are unfortunately out of date.

Table 4

Composite of Alcoholism Treatment Benefits Provided to Employees of 31 Large United States Companies

Type of Alcoholism Treatment	Number of Companies	Percent
Inpatient Care	30	97%
Special Treatment Center	23	74%
Outpatient Care	15	50%
Halfway House	2	7%
No Care Provided	1	3%

Source: Data from a survey of 31 employee benefit plans.

Tables 5 through 11 provide an indication of the extent of benefits available for each of the care forms usually available in insurance policies, i.e., inpatient hospital care, alcoholism treatment center care, and outpatient care. The distribution of annual inpatient days provided for alcoholism care by the companies surveyed is shown in Table 5. About 60 percent of the companies provided for about 60 annual inpatient days or less, 35 percent provided greater than 60 days; five companies provided unlimited inpatient days. One company, which does provide for inpatient care of alcoholism treatment, has a benefit structure whose exact limits are unclear.

Table 5

Distribution of Number of Annual Hospital Inpatient Days for Alcoholism Treatment Covered by Health Insurance

Days of Inpatient Care (Range)	Number of Firms	Percent
7 - 30	9	29%
31 - 60	9	29%
61 - 120	2	6%
121 - 365	4	13%
Unlimited	5	16%
Not Clear	1	3%
Not Covered	1	3%

Source: Data from a survey of 31 employee benefit plans.

Reimbursable hospital daily board and room charges for alcoholism treatment are shown in Table 6. About 40 percent of the companies will reimburse at a rate of not to exceed the prevailing semi-private room and board charges. Health insurance coverage for two companies is reimbursed at fixed daily rates of $72 and $85 respectively, while only one company provided for full coverage. Responses from ten companies which cover inpatient care were not sufficiently explicit to characterize reimbursable costs.

Table 6

Distribution of Maximum Allowable Hospital Inpatient Daily Rates for Alcoholism Treatment

Maximum Allowable Rate	No. of Benefit Plans	Percent
$72.00	1	3%
$85.00	1	3%
Prevailing Semi-Private	12	39%
Full Cost	1	3%
Covered but Not Clear	10	32%
No Response	6	19%

Source: Data from a survey of 31 employee benefit plans.

The distribution of alcoholism treatment center benefits is shown in Table 7. Eight of the companies do not provide such coverage while eighteen provide for care ranging from 7 - 120 days. About 10 percent of the companies place no annual limits on this form of care. The provisions for reimbursable daily costs for care at a treatment center differ from hospital inpatient care provisions (see Table 8). About 35 percent provide for full reimbursement of room and board charges, while only one of the companies provides for reimbursement of the prevailing semi-private room and board rate. Two companies reimburse at

daily flat rates of $72.00 and $85.00 respectively. Alcoholism treatment benefits also differ from other benefits in that about one-third of the health insurance plans surveyed required that the carrier actually approve the alcoholism treatment facility before care could be initiated.

Table 7

Distribution of Annual Number of Alcoholism Treatment Center Days

Days of Care	Number of Benefit Plans	Percent
Not Covered	8	26%
7 - 30	7	23%
31 - 60	10	32%
61 - 120	1	3%
121 - 365	2	7%
No Limit	3	10%

Source: Data from a survey of 31 employee benefit plans.

Table 8

Distribution of Maximum Allowable Alcoholism Treatment Center Daily Rates

Maximum Allowable Rate	Number of Benefit Plans	Percent
$72.00	1	3%
$85.00	1	3%
Prevailing Semi-Private	1	3%
Full Cost	11	36%
Covered but Not Clear	6	19%
Not Covered	8	26%
No Response	3	10%

Source: Data from a survey of 31 employee benefit plans.

Outpatient care benefits are shown in Table 9. Nearly one-half of the firms do not provide for outpatient care of any type. Three companies provide for a specified number of annual outpatient visits (ranging from 12 - 35 visits per year) and seven place no limits on

the number of annual outpatient visits. Note that five firms specifically covered outpatient alcoholism treatment but the extent of such care could not be ascertained from their responses.

Table 9

Distribution of Annual Outpatient Visits for Alcoholism Treatment

Number of Visits	Number of Benefit Plans	Percent
Not Covered	15	48%
12	1	3%
35	2	6%
No Limit	7	23%
Covered but Not Clear	5	16%
No Response	1	3%

Source: Data from a survey of 31 employee benefit plans.

Finally, the extent to which individual, family and group therapy are covered by the various companies is displayed in Table 10. Over one-half of the firms provide for individual or group therapy, and about one-third provide for therapy of the family. Allowable annual visits for these forms of therapy are presented in Table 11. Unlimited visitation is provided by about 30 percent of the employee benefit plans which cover individual therapy, with about 25 percent of the companies providing unlimited benefits for group and family therapy. About 10 percent specify a fixed number of visits (i.e., 35 or 40) for all types of therapy. In some instances actual benefits, though available to employees, could not be interpreted from the replies of the survey respondents.

Table 10

Distribution of Individual, Group and Family Therapy Benefits for Alcoholism Treatment

Nature of Care	Number of Firms	Percent
Individual Therapy	19	61%
Family Therapy	10	33%
Group Therapy	17	53%

No Limit	10	32%	8	26%	7	23%
Covered but Not Clear	6	19%	6	19%	1	3%

Source: Data from a survey of 31 employee benefit plans.

To summarize the findings of the survey, it must first be pointed out that the survey sample (N=31) is quite small in comparison to the number of functioning occupational programs in the United States, which may be as high as 1,200. Second, the mere existence of a benefit structure capable of effectively covering alcoholism treatment costs in no way assures that such benefits are in fact utilized, nor does it provide an indication of the extent to which total alcohol treatment costs are being met by insurance benefit payments. The survey findings do, however, indicate that benefit plans are surprisingly liberal, i.e., adequate inpatient care and, importantly, a high

proportion of plans with coverage for less expensive forms of care. Further, the extent of benefits available in each of the care forms is favorable for treatment of alcoholism, i.e., about one-fourth of the plans place no limits on outpatient care benefits while about one-third cover the entire cost of care in an alcoholism treatment center. Importantly, the findings indicate that the health insurance industry is capable of responding to occupational program needs by providing broadly based health insurance plans.

2. The California Pilot Program Benefit Plan

Another benefit plan of interest is that employed by the State of California during their Pilot Program to determine the feasibility of providing health insurance coverage for alcoholism for state civil service workers and certain other public workers in the State of California. This two year program involved four indemnity (commercial) carriers, four prepaid group practices, two statewide service carriers and one individual practice plan. The majority of coverage, however, was provided by three organizations: Blue Cross/Blue Shield, California Western Occidental (Cal-West), and Kaiser Foundation Group Health Plan (North and South Plan).

The benefit plan employed by the State of California was similar across all carriers and included the following types of care:

a. Inpatient Care: (hospital or other medical or non-medical facility licensed by the state)

Acute: 6 days of detoxification services/year

Intermediate: 21 days of treatment/year

b. Day or Night Controlled Residential Care: (recovery home licensed by the state)

30 days of care/year

c. Outpatient Care:

up to 45 visits per year to be provided by a:

- licensed physician
- licensed counselor
- licensed clinical social worker
- licensed psychologist
- paraprofessional (working under the supervision of a licensed professional)

While utilization of benefits was low during the first year of the program, the rate of inpatient admissions and outpatient visits during the second year of operation increased dramatically. Recovery home use during the entire two year period was quite low, possibly because it was a care form unfamiliar to both carriers and practitioners. Evaluation of the plan to date indicates that the benefit structure is a feasible means of meeting the needs for third party payments for alcoholism treatment costs, and that it is capable of being implemented by different types of carriers, i.e., health maintenance organizations, non-profit service plans, and profit-making commercial carriers. Following the pilot test, the prepaid HMO (Kaiser) decided and obtained permission to continue essentially the same benefit package at only a small increase in premiums.[14]

---

[14] For further information on the California Pilot Program see (1) "Historical Development of the California Pilot Program to Provide Health Insurance Coverage for Alcoholism," H-2, Inc., Raleigh, N.C., November 1975; (2) "Alcoholism Care Utilization and Costs - California Pilot Health Insurance Program - First Twelve Months," H-2, Inc., March 1976; and (3) "Longitudinal Study of Alcoholic Patients and Their Families," H-2, Inc., Raleigh, N.C., January 1977.

3. Model Benefit Plan

Several years ago the NIAAA sponsored the development of a model benefit plan which de-emphasized the traditional and costly forms of care used in alcoholism treatment.[15] The purpose of that plan was to serve as a resource which can be utilized to develop a health insurance policy or to enhance provisions of existing policies. This plan defined and described treatment settings (inpatient, outpatient, transitional care) treatment locations (facility or service settings) and treatment attributes (form or nature of service provided, i.e., detoxification, psychotherapy, etc.). Minimum benefit provisions defined in the plan are as follows:

a. Inpatient Care: (licensed treatment facility)
   14 days in any benefit period

b. Intermediate Care: (licensed day or night hospital)
   30 days of care in any benefit period

c. Outpatient Care: (licensed treatment facility)
   45 outpatient visits during a benefit period

The benefit period specified in the Plan was 12 calendar months. It was suggested that additional care beyond the maximum specified could be sanctioned providing that a special group (called a Facility Audit Committee) reviewed the case and found the patient suitable for continued treatment.

Over time the model benefit plan has proven to be a useful resource. For example, it served as a basis for development of the

---

[15] J. B. Hallan, "Health Insurance Coverage for Alcoholism: Proposed Benefit Provisions," Report prepared for the National Institute on Alcohol Abuse and Alcoholism, 1973.

benefit plan used in the California Pilot Program (see above) and has received wide distribution to public and private agencies, insurance regulators and insurance carriers. The model plan is not an end in itself, but can provide benchmark benefit provisions in the development of an insurance program.

4. State Legislation and Health Insurance Coverage for Alcoholism

As was mentioned earlier a number of states have taken or are considering legislative actions to either mandate or define insurance coverage for alcoholism. There has been a rapid growth in state legislative activity since 1974, with 24 states considering some form of action between January 1975 and March 1976. Cu ently, legislation has passed in 16 states and is pending in an additional 13 states. Such legislation either outright mandates the nature and extent of coverage for alcoholism or defines that such coverage is an option which must be provided by the carrier.

Table 12 provides some details of legislation which has been enacted by the states. Note that while 11 of the 16 states cover inpatient care, only 7 provide for outpatient care. There is also a considerable range of benefits specified by the legislation enacted by the states. Inpatient care limits range from a low of 10 days per benefit period (usually a year) to some 70 days. Regretably, most states which have enacted such legislation cover only group contracts. Finally, eight of the states with legislation have determined that alcoholism treatment benefits will actually be mandatory; the remaining eight states merely require that insurance carriers offer the benefits to potential purchasers.

Table 12

Summary of Health Insurance Coverage for Alcoholism Treatment in Existing State Legislation

Description		No. of States
(1)	States with enacted legislation	16
	(Colorado, Connecticut, Hawaii, Illinois, Louisiana, Massachusetts, Michigan, Minnesota, Mississippi, Nevada, North Dakota, Oregon, South Dakota, Tennessee, Washington, and Wisconsin)	
(2)	States which specifically cover inpatient care	11
	(Colorado, Connecticut, Hawaii, Louisiana, Massachusetts, Minnesota, Nevada, North Dakota, Oregon, South Dakota, and Wisconsin)	
(3)	States which specifically cover outpatient care	7
	(Colorado, Hawaii, Massachusetts, Minnesota, Nevada, Oregon, and Wisconsin)	
(4)	States which specifically cover other forms of care	2
	(Wisconsin and North Dakota)	
(5)	States which specify that benefits shall be the same as those for other conditions	2
	(Hawaii and Mississippi)	
(6)	Range of inpatient benefits:	
	(a) Days of care	10-70 days/benefit period
	(b) $ benefits	$500-$1000/benefit period Oregon = $2500 max/36 months
(7)	States covering:	
	(a) Group contracts	16
	(b) Individual contracts	1
(8)	States with mandatory alcoholism treatment benefits	8
(9)	States with optional alcoholism treatment benefits	7

Several aspects of this legislation should be of interest and/or concern to occupational programming personnel. First, it is apparent that legislatively mandated or defined health insurance coverage for alcoholism is becoming popular among the various states. Legislative trends to date suggest that a large majority of the states will enact or consider such legislation in the near future. Second, legislators who are interested or engaged in development of this type of legislation frequently have poor information upon which to base legislative proposals. Currently, there is no single source of information nor uniform legislation upon which to base their legislative proposals. Third, passed and pending bills may be characterized by their lack of uniformity—a situation which may complicate the operations of interstate carriers. Fourth, among those states with enacted legislation there now exists a minimum level of coverage which must be provided to beneficiaries regardless of the insurance vendor. Fifth, not all legislation mandates insurance coverage for alcoholism. Frequently, such legislation merely encourages carriers to promote the development of such coverage. Sixth, state experiences in developing and enforcing mandated health insurance coverage for alcoholism treatment may provide insights useful in the foundations of national health insurance. Finally, occupational programming personnel are in a unique position to advise legislators about deficiencies in coverage provided by carriers operating in their respective states and to provide them with information useful in the development and formulation of legislation.

5. Accreditation and Licensing

A major concern of health insurance carriers in the development of health insurance coverage for alcoholism treatment has been accreditation of treatment facilities and certification of professional personnel providing treatment. The concern stems from the traditional view held by carriers that quality and effective care cannot be assured unless provided in an accredited hospital by a physician. As a result, insurance policies frequently severely limit or outright exclude coverage of alcoholism treatment if in a facility other than a hospital and/or if provided by a non-physician. Such restrictions considerably limit possible reimbursement for the alcoholism treatment alternatives now available and, unfortunately, encourage the utilization of the more expensive (and often the least appropriate) forms of care. Federal and state governments and certain carriers have begun to seek resolutions in this issue. First, the NIAAA developed accreditation standards for alcoholism treatment facilities under a contract with the Joint Commission on Accreditation of Hospitals (JCAH). With these standards the JCAH began a program to accredit facilities; and to date some 300 facilities across the United States have been examined and duly accredited. Second, the NIAAA has encouraged a coalition of professional organizations to address the various issues involved in certification of professional personnel in the treatment of alcoholism. The intent of such a coalition would be to develop a means for the formal recognition of alcoholism treatment personnel. Third, various states through their own legislative activities (see the previous section) have specified

that insurance benefits must be applicable to care received in a treatment facility duly licensed (as opposed to accreditation) by that state. Finally, several interstate carriers have begun to specify in their policies that treatment costs will be reimbursed if the facility/service providing such care has been duly approved by the carrier.

In spite of these actions, it is not uncommon at this point in time to find insurance carriers who are lethargic in their recognition of non-traditional care forms. While the situation is not impossible, experiences of consultants and various treatment programs suggest that a lengthy program of marketing and selling to insurance carriers may be necessary before effective reimbursement is achieved.[16]

---

[16]See for example W. Williams and D. Descoteau, "Assumption, Flexibility and Perseverance," a paper presented at the Fifth Annual Meeting of the Association of Labor-Management Administrators and Consultants on Alcoholism, San Diego, California, October 20-23, 1976.

IV. ALTERNATE STRATEGIES FOR DEVELOPING HEALTH INSURANCE COVERAGE

Several alternative strategies may be employed by occupational programming personnel in an effort to increase or develop insurance coverage for alcoholism care. Each strategy has as a goal increasing coverage or making available coverage for alcoholism care as a result of an increased awareness of decision makers representing employees, employers, legislators, or carriers themselves.

The first alternative strategy is to convince carriers to voluntarily provide such coverage, either through including alcoholism coverage specifically in the policies they offer, or removing barriers which exclude such coverage from existing policies. This strategy, while likely the most difficult, is feasible. Carriers are historically conservative in extending coverage, particularly in the case of alcoholism care for which there is little actuarial data. Furthermore, as has already been mentioned, a number of concerns exist in the health insurance industry about the alcoholic population--primarily based on the view that the typical alcoholic is a street bum or public inebriate.

While either increased awareness and sophistication of a key decision maker with one or more health insurance companies may produce the desired coverage, a major factor for voluntary coverage will be that of competition between carriers. Increased sales by a competitor who is more responsive to consumer demands for health insurance coverage for alcoholism treatment may be a motivating factor of far greater significance than corporate social responsibility. In general, the term for employing this strategy is "create competition."

The following steps are suggested for occupational programming personnel in employing this strategy:

1. Review current health insurance practices offered by insurance carriers in the state to determine if coverage for alcoholism is adequate or in need of improvement. Compare current coverage with the "model" benefit plan recommended by NIAAA or a good plan offered in another state.

2. Develop not only an understanding of what coverage is available but also what can be made available through marketplace competition. Each health insurance company should be contacted individually (either by an OPC or a group purchaser) to negotiate for an increase in coverage. Remind the company that there are other carriers who can be contacted and point out that large group purchasers may go to those carriers.

3. Prepare a plan for bringing current employee benefit policies in given industries up to at least a minimum level.

4. Encourage group purchasers to shop around and let carriers know that they are doing so.

This strategy is more likely to work when used in conjunction with some of the other strategies which follow.

A second strategy is to encourage major purchasers of health insurance demand alcoholism coverage. This strategy can be most effective because employee representatives such as labor unions and other employee groups are continuously seeking better fringe benefits. Recommended steps in this strategy include:

1. Locate the largest employee groups in the state, including both public or private employee groups, and document the nature of

alcoholism treatment insurance coverage.

2. Prepare plans for alcoholism care which are suitable additions or changes in coverage provided under current plans.

3. Contact representatives of the employee groups, review the plan, and show why the increase is both needed and is desirable for their members. If specific information is available about the extent of associated problems such as absenteeism or sickness for an employee group, this may help establish the case. However, establishing direct rapport and credibility in the presentation is the major factor. In most states, the largest employer, or certainly one of the largest, will be the state government. If the OPC is state-employed, it is possible to press the case as an enlightened member and as a professional.

4. Suggest specific action steps for the employee representatives in demanding coverage.

A third alternative strategy is to encourage the enactment of mandated health insurance coverage for alcoholism treatment by the state legislature. Currently, there are 16 states with legislation which requires that any health insurance carrier offering coverage in that state must include, or at least provide as an option, coverage of alcoholism treatment. This strategy will involve the preparation of data and testimony and most likely the development of bills in conjunction with a supportive legislator or group of legislators. Since legislators are elected officials, they are likely to be supportive of coverage if it is believed to be demanded or desired by employees and their representatives. The steps in this strategy include:

1. Contact a legislator likely to be sympathetic, based on prior legislative bills, campaign promises or expressed interests concerning

alcoholism.

2. Prepare (before the first meeting with the legislator) model legislation for review with him and his staff, which could be added to the existing statutes concerning health insurance. Be informed, understand the current statutes, be aware of activities in other states with similar interests and of similar size, and provide information about the extent of alcoholism on the employed population in that state.

3. Work out a strategy with the legislator for introducing the bill into an upcoming or current legislative session.

4. Be prepared for testimony and for organizing the testimony of others. A fact sheet and suggested write up of the testimony could be distributed to all members of the committee and to those who are likely to testify themselves for the legislation.

5. Contact employee representatives and encourage them to testify and/or to exert influence on the legislature in favor of the bill. In general, function as a staff support for the key legislator(s) who are promoting the bill. Good staff work will be very beneficial in assuring rapid passage of the bill through the legislative channels. While the initial piece of legislation proposed may be the most desired, be prepared to compromise and accept a more restricted version. Once the current laws have been altered to require alcoholism coverage of some type, it is easier in subsequent sessions to lobby for increased coverage and to break down barriers imposed by health insurance carriers.

Attached is a study on health costs associated with alcohol abuse.

The intended audiences for this report are health care administrators, third party payors, legislators, and other interested citizens.

CONCLUSION

This study has shown that the direct health care costs associated with alcohol abuse are a significant portion of the total health care costs in Central Maryland.

The study has estimated the associated costs of alcohol abuse in four settings; general hospitals, state hospitals, physicians offices, and public clinics. In these settings approximately $187,567,272 were spent for alcohol related health care in 1977 for the residents of Central Maryland. The additional costs associated with other settings have yet to be calculated.

SUMMARY OF COSTS BY SETTING

SETTING	COSTS	
Hospital		
General	$157,290,027	
State	13,043,576	
		$170,333,603
Physicians		15,005,993
Community Programs		2,227,676
Sub-Total		$187,567,272
Nursing Homes		-
Pharmacy		-
Other		-
Social Services & Counselling		-
Total		

There are several implications of this report. They include:

1. That alcohol abuse as a disease is an expensive drain on health resource of the entire population.

2. That as in other illnesses, alcohol is currently being treated primarily in hospital settings; and then as an end-stage medical crisis rather than in its early stages.

3. That third-party payors (both private and public) are currently paying for alcohol abuse under other diagnostic labels.

PURPOSE

This paper is an attempt to quantify the direct health care costs due to or associated with alcohol abuse in Central Maryland residents for one year.

METHODOLOGY

At the outset it must be noted that it is difficult to precisely assess alcohol related health cost since in many cases alcohol abuse is not listed as the primary diagnosis. The studies discussed in this paper sought to overcome this problem by developing estimates based on either direct clinical surveys of inpatient records or direct surveys of providers. While this method is still flawed and most likely underestimates the involvement of alcohol in such health specialties as orthopedics and emergency/trauma admission, the methodology is best available.

The formal literature on this question is limited; basically, there is one major study on the subject which represents the "state of the art". The study, entitled "The Economic Cost of Alcohol Abuse - 1975", developed under contract for NIAAA[1], by Ralph Berry, etal, uses a combination of literature review and direct clinical survey of physicians and health care institutions to estimate the amount of health care used by alcohol abusers. While the NIAAA study sought to examine costs in a variety of settings, this study has been limited to those costs in only four settings, general hospital, state hospitals, physicians offices, and publicly supported alcoholism programs.

The primary methodology used in the hospital survey's was an interview with the patient or patient's relative. In addition, treatment histories were taken which noted past medical problems usually associated with alcohol such as cirrhsis or pancreatitis. Concerning hospital based data, eight separate studies were reviewed and their findings were compiled. Appendix 1 summarizes those studies and their findings.

In the area of physician's out-patient visits, there was essentially only one study (Jones & Helrich) undertaken in 1970. This study involved 13,000 general practitioners, osteopaths, internists, and psychiatrists, and consisted of a survey of their patient mix. Unfortunately the information gathered in this study was open to some question since it concentrated on primary diagnosis. To offset some of the difficulties of this earlier work the Berry report was forced to rely heavily on the special experts' survey undertaken in 1974. The survey's conclusion regarding physicians utilization are provided in Appendix 2.

The conclusion of these studies were then checked against an expert panel of national authorities in the field of alcohol abuse. The experts were prominent researchers or clinicians and were surveyed through the use of a structured questionnaire.

This panel tended to independently confirm the research findings. Appendix table 3 provides a summary of the panel's conclusion.

Based on these studies, the CMHSA applied the averaged estimates of alcohol related abuse to the local health system and calculated out the costs of these services based on either the known or estimated cost per unit of service.

ANALYSIS:

NATIONAL

Nationwide hospital costs make up the largest single portion of health care costs. The Berry study concentrated its analysis on this treatment setting.

The Berry study reported that the number of alcohol related in-patient days varied by the soci-economic status of the hospitals service area. The range was 37 percent for low income communities, 15 percent for middle income communities, and 17 percent for high income areas. The mean number of inpatients with alcohol-related illness was 20 percent of all hospital patient days.

As noted in the methodology section, Berry compared these research findings to a survey of national experts (Appendix 3). The experts independently confirm the range of the research findings, and on average projected that 22.5% of all general hospital inpatient days are alcohol-related.

Nationwide, it is estimated that 42.3 billion dollars were spent for hospital care (approximately 40 percent of all personal health care dollar (Appendix 4).

Applying the national average of alcohol-related general hospital in-patient costs (20% of total) to the national totals of general hospitals costs results in a projected expenditure of 8.5 billion dollars for alcohol related hospital stays in 1975.

Using a similar mode of analysis in the area physicians office visits, the Berry study found that physician utilization by alcohol abuse patients ranged from 4.1 to 17 percent of all office visits.

However, since not all visits by alcohol abusers are necessarily caused by the alcohol abuse, the study sought to further refine this range be determining what percentage of visits actually resulted from the alcohol abuse and therefore could be identified as excess utilizarion of health services attributable to alcohol abuse.

The method of calculating of excess utilization was to determine the average number of out-patient visits by alcohol abusers and to subtract the average number of out-patient visits from non-alcohol abusers. The difference is the number of excess out-patient visits for alcohol abusers. This is then multiplied to the extimated number of alcohol abusers. (Most national estimates place the number around 10 million people.)

The Berry Study (based on the special survey of experts and the earlier work of Jones & Helrich) concluded that alcohol abusers average 8.5 ambulatory visits per year, non-alcoholics average 5.1 such visits, therefore, 3.4 visits for abusers are considered excessive. Thus, alcoholics cause some thirty-four million excess visits per year. Excess costs, according to Berry, thus amount to some $734 million (assuming an average cost per visit of approximately $21).

A similar method for calculating excess costs was to determine pre-capital out-patient costs of alcohol abusers minus the pre-capital out-patient costs of non-alcohol abusers. The difference is cost attributable to alcohol abuse.

Using the upper range of the Berry Study, an estimated 17 percent of an average physician's practice involves alcoholics. Seventeen percent of the $17.9 million spent for physician's services by adults in 1975 is $3.0 billion. Thus, alcoholics spent an average of $300.00 per capita for the year. Non-alcoholics averaged only $102.62 per capita in 1975 ($14.9 billion in costs and 145.2 million population). Thus, alcoholics averaged $197.38 per person in excess of non-alcoholics. Total alcohol-related excess expenditures are estimated at 1.97 billion (Appendix 2).

The Berry Study in effort to reconcile the difference between calculating costs by number of visits or by costs per capita selected the mid-point of the range and used 1.3 billion dollars as excess out-patient costs associated with alcohol abuse in 1975. This is approximately 7.3 percent of all out-patient costs.

CENTRAL MARYLAND

In applying this methodolgoy to the local population and health care systems, the CMHSA sought to quantify local direct health care cost attributable t alcohol abuse.

IN-PATIENT SETTINGS

As Central Maryland comprises approximately 1 percent of the country's population, it is possible to use this as a base for calculating local figures. In this case, the estimate for hospital care expenditures related to alcohol abuse would be one percent of the national estimates or about $84 million for Central Maryland.

However, to get a more refined estimate, the CMHSA returned to the literature used in the original study. By classifying local hospitals according to high, middle, or lower income patient populations, three sub-totals of prevalence were calculated. These various prevalence rates reflect the relationship of alcohol abuse to socio-economic conditions in a community.

The hospitals in the Central Maryland area were classified by the health planning districts in which they are located along the following median family income categories: High: over $12,000; middle: $10,000 to $12,000; lower: under $10,000. The national percentages were then applied to local in-patient revenue for each hospital expenditure.* This figure derived is slightly over $157 million (Table 1). This represents approximately 28 percent of all in-patient revenue.

In addition, for comparison the CMHSA applied the average estimates of the NIAAA alcoholism experts survey (22.5 percent of all in-patient days) and found that using this method over $124 million were attributed to alcohol abuse (Table 1).

---

*The range for hospital days associated with alcohol-abuse was:

High: 17 percent; middle: 15 percent and low: 37 percent (for a more detailed review of the literature, see Appendix Table 1).

[1]Disclosure of Hospital Financial and Statistical Data, HSCRC, February 1, 1978.

Independent of which methodology is used, it is clear that alcohol abuse is a significant expense within our region.

Table 2 attempts to identify the source of payments for alcohol related general hospital in-patient costs using the Berry Study methodology. Appendix table 5 presents costs and source of payments for just the primary diagnosis, alcohol intoxification. This table is presented to illustrate how the data is organized. Other diagnosis for which the costs were not broken out, but which are highly correlated with alcohol abuse are presented in Appendix table 6.

Costs Attributed to Alcohol Abuse
by Source of Payment

[1] Rate based on population estimates for July 1, 1975.

[2] Based on average State-wide institutional cost of $5,453 per admission.

Source: Central Maryland Health Systems Agency analysis of Maryland Center for Health Statistics, Statistical Printout and Mental Hygiene Administration FY 1976 Budget.

Combining the Berry Study and the cost for alcoholism admission to State mental hospitals a total estimation of $170,333,603 hospital cost* is attributed to alcohol abuse for Central Maryland in FY 1976.

*This figure still excludes speciality hospitals, chronic hospitals, V.A. hospitals, and Public Health Service Hospitals.

PHYSICIAN SERVICE

Again, given that Central Maryland is one percent of the national population, one percent of the projected $1.3 billion spent nationally for alcohol related physicians services is $13 million.

However, using the 7.3 percent national estimate of excess utilization, and applying it to local population data the estimated cost attributed to alcohol abuse is slightly over $15 million.

Estimated Expenditures for Physician's Services Related to Alcohol Abuse, Central Maryland, FY 1976.

Jurisdiction	Population 18 and Over[1]	Expenditure for Physician's Services[2] (Adult)	Expenditure Attributable Alcohol Abuse	Based on 1% National Estimate
Central Maryland	1,484,450	$205,561,543	$15,005,993	$13,000,000
Anne Arundel County	229,260	30,549,295	2,230,098	
Baltimore City	592,000	84,935,391	6,200,284

Carroll County	55,680	7,828,398	571,473	
Harford County	98,100	11,788,864	860,587	
Howard County	85,860	8,535,930	623,123	

[1] MCHS Population Estimates, July 1, 1975.

[2] "Estimated Per Capita Personal Health Care Expenditures", SSA, FY 1976. The figures used are $120.85 per person, aged 19-64, and $258.92, aged 65 and over.

[3] 7.3 percent of total expenditure for physician's services is used as derived in the NIAAA study (p. 4 of this report).

In addition to the direct cost of alcohol abuse discussed thus far, there are several settings in which funding is specifically for the treatment of alcoholism. These costs are more easily quantified and are discussed in greater detail in the CMHSA 1978 HSP.

During FY 1976, $2,227,676 were spent on alcohol abuse programs (counselling, halfway houses, quaterway houses, and shelter services) in Central Maryland. The distribution of these funds among the jurisdictions is shown on the following page.

TABLE 4

PUBLIC EXPENDITUTRE FOR ALCOHOLISM BY SOURCE OF FUNDS, CENTRAL MARYLAND, FY 1977

Jurisdictions	General	Federal	Local	Total	Per Capita
Anne Arundel County	$ 51,110	$ 203,536	-	$ 254,646	$ .74

Source: Maryland State Department of Health and Mental Hygiene, Health Programs Delivered in Local Jurisdictions, FY 1976 and FY 1977 (1977).

SUMMARY

The health care cost attributable to alcohol abuse calculated thus far is $187,567,272 and several categories of health services are still uncounted. Among these are "other professional services, other government public health programs, nursing home care, and other counselling and psycho-social treatment programs. Again, this report has focused only on direct health care costs. Social costs including crime, work productivity, family disruption, etc. have not been assessed.

The $187,567,272 identified calculates out to approximately $87.55 per capita. This is approximately 22 percent of the per capita expenditures for similar services.

In other words, approximately 22 percent of the individual health dollar spent on hospital and physician costs in Central Maryland was for the treatment of alcohol abuse. Appendix table 8 illustrates the percent of the per capita costs - excluding the State hospitals and publicly funded alcoholism programs. The per capita for just these services is 20 percent.

BY COLLETTA AND STIMSON

SENATE BILL NO. 227

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to insurance for alcoholism and drug dependence; AND PROVIDING FOR AN EFFECTIVE DATE."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.42 is amended by adding a new section to read:

Sec. 21.42.347. REQUIRED PROVISION OF COVERAGE FOR ALCOHOLISM AND DRUG DEPENDENCE. (a) Group health insurance policies providing coverage on an expense-incurred basis and group service or indemnity type contracts issued by a nonprofit corporation

(1) shall provide coverage for alcoholism and drug dependence to include

(A) inpatient detoxification benefits for not less than 14 days of benefit each calendar year in a state ~~certified~~ APPROVED treatment facility or licensed hospital; payment of ~~inpatient~~ institutional and professional benefits ~~for the first admission during a calendar year~~ shall be equal to and payable as any other covered condition; ~~a subsequent admission during the calendar year shall be paid at not less than 50 per cent of the usual, customary and reasonable charge for a medical procedure, treatment or service in the geographic area;~~

(B) inpatient ~~care~~ TREATMENT coverage benefits for not less than 30 days of benefit each calendar year in a state ~~certified facility or licensed hospital~~ APPROVED TREATMENT PROGRAM; payment of ~~inpatient~~ institutional and professional benefits shall be at the same level as any other covered condition; and

(C) outpatient treatment coverage benefits of not less than 30 visits each calendar year if treatment is provided by a licensed physician, state ~~certified~~ APPROVED treatment program, or state certified PROFESSIONAL substance abuse counselor; coverage shall include individual, family or group therapy; benefits shall be paid at not less than 75 per cent of the usual, customary and reasonable charge for a medical procedure, treatment or service in the geographic area;

(2) may not exclude dependents otherwise covered and may not limit coverage for alcoholism or drug dependence because of age, sex or state of illness;

(3) may not apply preexisting OR NAMED condition exclusions to deny coverage for alcoholism or drug dependence; and

(4) may require a physician's certification of necessity as a condition of payment for alcoholism or drug dependence treatment.

(b) In this section,

(1) "alcoholism" means (INSERT NEW DEFINITION) ~~a condition related to alcohol and concerns a physical compulsion which exists, coupled with a mental obsession~~; (INSERT NEW SECTION (2))

(~~2~~ 3) "drug dependence" means the condition of being physically or psychologically addicted to an opiate, opiate derivative, tranquilizer, amphetamine, barbiturate, or similar substance, BUT EXCLUDING NICOTINE, CAFFEINE AND ALCOHOL;

(~~3~~ 4) "state" means any state in the United States and includes the District of Columbia.

* Sec. 2. AS 21.87.340 is amended by adding a new paragraph to read:

(17) AS 21.42.347.

* Sec. 3. (INSERT NEW SECTION 3) ~~The requirements of sec. 1 of this Act apply to all policies or contracts delivered, issued for delivery, or issued covering persons in this state more than 120 days after the effective date of this Act. A policy or contract required to contain provisions of coverage for alcoholism and drug~~

~~dependence by AS 21.42.347(a)(1) shall be considered to provide the minimum coverage even if the language of the policy or contract does not so specifically provide.~~

(4) FISCAL IMPACT: ☒ NONE ☐ FISCAL ANALYSIS ATTACHED

(5) AMENDMENTS PROPOSED:

Amendments proposed by Senator Colletta's panel to study third party alcoholism insurance coverage provide for a more workable bill.

(6) COMMENTS:

During the last legislature, SB 545 was introduced to require that insurance companies providing indemnity against medical expense and health care contractors, such as Blue Cross or HMO's and other prepaid health programs, provide coverage for medical treatment of alcoholism to the same extent it would provide medical treatment for any other disease.

At that time the Division indicated that it does not basically oppose the concept, but, as drafted, SB 545 presented substantial problems of interpretation when approving policies for use in this state.

* CONTINUED ON ATTACHED SHEET

As a result, the Legislature took no action on the bill, and the division agreed to participate in a panel to study and draft a proposal for third party alcoholism insurance coverage. Senator Colletta appointed a panel and SB 227 represents an early draft of the panel's work. Using SB 227 as a starting point the panel developed further amendments which result in a reasonable and workable piece of Legislation which overcomes the primary concerns expressed with SB 545. These include clear expressions to deal with preexisting conditions exclusions, level of coverage intended for detoxification or "drying out," inducement to rehabilitation, and cost.

The cost of the coverage is a concern. The panel deliberated under the concept that to the degree that the benefit proposed by this bill was utilized, the benefits otherwise available would have a disproportionate decrease ultimately providing a net savings. Convincing data was provided to support this concept.

The final aspect of concern is that coverage is mandated. With respect to group programs it may be the intent of the Legislature to establish, as a matter of public policy, that group sponsors incur the cost of providing additional coverage for alcoholic rehabilitation, but to the extent that there is contribution to the cost of medical insurance by the employee or member of the group, it is imposing this burden on a large segment of society for the benefit of the few who would have the opportunity to take advantage of the coverage. The division would not particularly oppose this aspect of the bill so long as it is clearly understood by the Legislature that it could have this impact.

Introduced: 2/13/79
Referred: Health, Education and Social Services and Judiciary

IN THE SENATE BY COLLETTA AND STIMSON

SENATE BILL NO. 227

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to insurance for alcoholism and drug dependence."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 21.42 is amended by adding a new section to read:

Sec. 21.42.347. REQUIRED PROVISION OF COVERAGE FOR ALCOHOLISM AND DRUG DEPENDENCE. (a) Group health insurance policies providing coverage on an expense-incurred basis and group service or indemnity type contracts issued by a nonprofit corporation

(1) shall provide coverage for alcoholism and drug dependence to include

(A) inpatient detoxification benefits for not less than 14 days of benefit each calendar year in a state certified treatment facility or licensed hospital; payment of inpatient institutional and professional benefits for the first admission during a calendar year shall be equal to and payable as any other covered condition; a subsequent admission during the calendar year shall be paid at not less than 50 per cent of the usual, customary and reasonable charge for a medical procedure, treatment or service in the geographic area;

(B) inpatient care coverage benefits for not less than 30 days of benefit each calendar year in a state certified facility or licensed hospital; payment of inpatient institutional and professional benefits shall be at the same level as any other covered condition; and

(C) outpatient treatment coverage benefits of not less than 30 visits each calendar year if treatment is provided by a licensed physician, state certified treatment program, or state certified substance abuse counselor; coverage shall include individual, family or group therapy; benefits shall be paid at not less than 75 per cent of the usual, customary and reasonable charge for a medical procedure, treatment or service in the geographic area;

(2) may not exclude dependents otherwise covered and may not limit coverage for alcoholism or drug dependence because of age, sex or state of illness;

(3) may not apply preexisting condition exclusions to deny coverage for alcoholism or drug dependence; and

(4) may require a physician's certification of necessity as a condition of payment for alcoholism or drug dependence treatment.

(b) In this section,

(1) "alcoholism" means a condition related to alcohol and concerns a physical compulsion which exists, coupled with a mental obsession;

(2) "drug dependence" means the condition of being physically or psychologically addicted to an opiate, opiate derivative, tranquilizer, amphetamine, barbiturate, or similar substance;

(3) "state" means any state in the United States and includes the District of Columbia.

* Sec. 2. AS 21.87.340 is amended by adding a new paragraph to read:

(17) AS 21.42.347.

* Sec. 3. The requirements of sec. 1 of this Act apply to all policies or contracts delivered, issued for delivery, or issued covering persons in this state more than 120 days after the effective date of this Act. A policy or contract required to contain provisions of coverage for alcoholism and drug

dependence by AS 21.42.347(a)(1) shall be considered to provide the minimum coverage even if the language of the policy or contract does not so specifically provide.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

POUCH K–STATE CAPITOL
JUNEAU, ALASKA 99811

March 23, 1979

Senator Glenn Hackney, Chairman
Senate Health, Education & Social
Services Committee
Pouch "V"
Juneau, AK 99811

Re: Powdered Alcohol and
Proposed Section 04.05.120
Our File: J-66-583-79

Dear Senator Hackney:

You have requested our opinion concerning the proposed amendment to SB 228 which would add the following to AS 04.05:

> "AS 04.05.120. SALE OF POWDERED ALCOHOL PROHIBITED. No substance having alcoholic content and intended for human consumption may be sold in the state unless in liquid form."

This office, as a preliminary matter, has determined that there would be no problem from a legal standpoint with the idea of prohibiting powdered alcohol. States have been given broad authority to regulate the sale and distribution of alcohol within their borders, and this prohibition would be within that authority. As a practical matter, however, the specific language in the proposed amendment may be overbroad. It is perhaps possible that some prescription or over-the-counter drugs may contain some percentage of powdered alcohol. Authorities in that area should be consulted to determine if the language of AS 04.05.120 is over inclusive.

In addition, you have requested our opinion concerning whether there would be any violation of the Single Subject Rule of the Alaska State Constitution, Article II, Section 13, or the descriptive Title Rule of that same section if this section were to be added to SB 228 which deals with liquor excise taxes and license fees. SB 228 has been modified, and in its stead CS for SB 228 deals with excise taxes and with restrictions on sales to and from wholesalers. The title has been modified to read "An Act relating to intoxicating liquors; and providing for an effective date". The Single Subject Rules and Descriptive Title Rules have been liberally construed by the Alaska Supreme Court. See Gellert v. State, 522 P.2d 1120 (Alaska 1974). We therefore feel that neither of those constitutional restrictions would be violated in this case.

Sincerely,

AVRUM M. GROSS
ATTORNEY GENERAL

SB 228

SENATE BILL NO. 228 by the Rules Committee by request of the Governor (relating to excise tax on and license fees for sale of intoxicating liquors) is now available in the Documents Room.

Fiscal note is zero.

Governor's transmittal letter on SENATE BILL NO. 228 follows:

February 14, 1979

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill providing for an increase in liquor taxes and liquor license fees to produce necessary revenues. It is identical to last legislature's Committee Substitute for Senate Bill 167, except that the first section of that bill has been relocated to sec. 8 of this bill (to follow Alaska Statutes numerical order). Section 8 of the bill amends AS 43.60.010(a) to increase the tax on liquor sold in the state.

The remaining sections of this bill provide for increases in liquor license fees, including the wholesale liquor license fees and wholesale malt beverage and wine license fees for those businesses which transact more than $500,000 of business per year. Increases for other license fees are: beverage dispensary licenses -- from $500 to $750 and from $1,000 to $1,500; restaurant licenses -- from $300 to $500; roadhouse licenses -- from $150 to $250; club licenses - from $400 to $800; bottling works licenses --from $100 to $500; retail licenses -- from $600 to $1,000.

SB 228

These increases are necessary in order to provide continued funding for alcohol-related programs.

Sincerely,

Jay S. Hammond
Governor

SEN. HACKNEY,

I'VE BEEN ATTEMPTING TO GET A HOLD OF JOHN MESSENGER, DEPUTY COMMISIONER ON TAXATION, TO ASCERTAIN WHAT THE POSITIVE FISCAL IMPACT WILL BE IF SB 228 IS ~~E~~ enacted, BUT SO FAR NO LUCK. HOWEVER, HE WILL BE AT THE HEARING TO TESTIFY ON THE BILL + HE WILL PASS ALONG THE INFO AT THAT TIME according to ~~the~~ his secretary. Paul

INTRODUCTION AND REFERENCE OF SENATE BILLS AND RESOLUTIONS

SS SJR 11 President Tillion stated that SPONSOR SUBSTITUTE FOR SENATE JOINT RESOLUTION NO. 11 (proposing to Congress an amendment to the Constitution of the United States relating to the budget of the United States of America) which had been referred to the Finance Committee on February 13 (page 225) would be changed to the State Affairs Committee only.

SB 227 SENATE BILL NO. 227 by Senators Colletta and Stimson (relating to insurance for alcoholism and drug dependence) is now available in the Documents Room.

SB 228 SENATE BILL NO. 228 by the Rules Committee by request of the Governor (relating to excise tax on and license fees for sale of intoxicating liquors) is now available in the Documents Room.

Fiscal note is zero.

Governor's transmittal letter on SENATE BILL NO. 228 follows:

February 14, 1979

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill providing for an increase in liquor taxes and liquor license fees to produce necessary revenues. It is identical to last legislature's Committee Substitute for Senate Bill 167, except that the first section of that bill has been relocated to sec. 8 of this bill (to follow Alaska Statutes numerical order). Section 8 of the bill amends AS 43.60.010(a) to increase the tax on liquor sold in the state.

The remaining sections of this bill provide for increases in liquor license fees, including the wholesale liquor license fees and wholesale malt beverage and wine license fees for those businesses which transact more than $500,000 of business per year. Increases for other license fees are: beverage dispensary licenses -- from

$500 to $750 and from $1,000 to $1,500; restaurant licenses -- from $300 to $500; roadhouse licenses -- from $150 to $250; club licenses - from $400 to $800; bottling works licenses --from $100 to $500; retail licenses -- from $600 to $1,000. SB 228

These increases are necessary in order to provide continued funding for alcohol-related programs.

Sincerely,

Jay S. Hammond
Governor

CONSIDERATION OF THE CALENDAR

CITATIONS

Senator Colletta moved and asked unanimous consent that the Citation - In Memoriam Franklin Warren Butte, by Senators Rodey and Ray and Representative Munson, be approved.

The Senate approved the Citation unanimously and it was referred to the Secretary for transmittal to the House.

UNFINISHED BUSINESS

Senator Hackney requested that the Judiciary Committee referral on SENATE BILL NO. 41 (exemption from income tax for senior citizens) be waived and the bill be referred to the Finance Committee. SB 41

SENATE BILL NO. 41 was referred to the Health, Education and Social Services Committee and the Finance Committee.

Bill Thomson, Director
Management, Law & Finance

February 1, 1979

Ray Minge, Program Manager
Career & Vocational Education

A revision in the current vocational foundation formula to the proposed formula change would increase the total number of vocational Instructional Units by twelve for FY'80, or $511,995.

The proposed change is:

Current	Proposed
11-25 F.T.E. = 2 I.U.'s	11-18 F.T.E. = 2 I.U.'s
26-40 F.T.E. = 3 I.U.'s	19-40 F.T.E. = 3 I.U.'s

The following school districts and schools would be increased by one unit:

District and School	Unit Value
Anchorage Borough School District	
Evening High School	$ 31,900.00
Annette Island School District	
Metlakatla High School	33,176.00
Bristol Bay Borough School District	
Bristol Bay Consolidated High School	49,445.00
Craig City School District	
Prince of Wales High School	34,452.00
Kenai Borough School District	
Seward	34,452.00
Lower Yukon School District	
Mountain Village	49,445.00
Hooper Bay	49,445.00
North Slope Borough School District	
Anaktuvik Pass	49,445.00
Nuiqsut High School	49,445.00
Northwest Arctic School District	
Kiana	49,445.00

District and School	Unit Value
Yukon-Koyukuk Satellite Schools	49,445.00
Correspondence Study	31,900.00
	$511,995.00

OFFICE OF THE COMMISSIONER / POUCH S – JUNEAU 99811

April 19, 1979

The Honorable Glenn Hackney
Chairman
Senate Health, Education &
Social Services Committee
Assembly Building, Room 105
Juneau, AK 99801

Dear Senator Hackney:

SENATE BILL NO. 260

Senate Bill 260, an Act repealing the school tax, was introduced in the Senate on April 3, 1979, and was referred to the Senate Health, Education and Social Services, Finance and Labor and Management Committees.

For the consideration of the Senate Health, Education and Social Services Committee, I am enclosing a copy of a Fiscal Note prepared by Mr. Gary L. Jenkins, Director, Audit Division, Department of Revenue, concerning the proposed legislation.

Sincerely,

R. D. Stevenson
Special Assistant

MEMORANDUM

TO: R. D. Stevenson
Special Assistant
Department of Revenue

DATE: April 17, 1979

FILE NO:

TELEPHONE NO:

FROM: Gary L. Jenkins
Director
Audit Division

SUBJECT: Senate Bill No. 260

This bill would repeal the school tax which is ch. 45 of Title 43. The result of this action would be a loss of revenue to the State for 1980 of approximately $2,500,000.

There would be no affect on the administrative costs as a result of this legislation.

March 5, 1980

TO: Senator Terry Stimson

FROM: Sandy Perry

RE: SB 260; "An Act repealing the school tax"

As stated in the letter attached to the FY note of April '79, the loss of revenue to the State would be approximately $2,500,000.

According to Mr. Gary Jenkins of the Dept. of Revenue, there is NO distinction as to "Program Management Costs".....collections, with holdings, etc. are not single entities and therefore a figure can not be put to it.

As to how many people it takes to manage the School Tax Program, the above holds true also.

As far as forms are concerned ..... all that would need to be done would be a line drawn thru the School Tax portion. Postage and paper handling would not change significantly.

Repealing the School Tax would however relieve Excedrin Headache # 43.45.010.

Glenn—

I hope this answers some of your questions and will help move this bill out of H&S as expeditiously as possible.

Terry SP

SUBJECT: Senate Bill No. 260

This bill would repeal the school tax which is ch. 45 of Title 43. The result of this action would be a loss of revenue to the State for 1980 of approximately $2,500,000.

There would be no affect on the administrative costs as a result of this legislation.

Article 2. Disaster Severance Tax.

Section
110 — 160. [Repealed]

Secs. 43.43.110 — 43.43.160.
Repealed by § 2 ch 247 SLA 1970.

Editor's note. — The repealed article derived from § 1, ch. 31, FSSLA 1967.

Section 2, ch. 247, SLA 1970, effective July 1, 1970, provides that this repeal does not prevent the expenditure of funds authorized by other disaster relief legislation.

Chapter 45. School Tax.

Section
10. Tax imposed
20. Persons exempt from tax
30. Record of withholding
40. Overpayment, credit, and refund
50. [Repealed]
60. Penalties

Sec. 43.45.010. Tax imposed. (a) There is imposed a school tax of $10 a year upon each person 19 years of age or older gainfully employed in the state or on the waters of the state, except (1) a married person who is unemployed and entirely dependent upon the income of the spouse and whose spouse has paid a school tax, and (2) a person exempt under § 20 of this chapter.

(b) The proceeds of the tax levied by this chapter shall be paid into the general fund of the state.

(c) The tax is due on January 1 and shall be paid before April 16 of the calendar year following the year for which it is imposed. An employer upon the first regular payroll after January 1 of each calendar year or, in the cases of employees on later payrolls, on the first payroll after their employment, shall deduct the tax from the employee's salary or other compensation and send it to the commissioner of revenue at the same time the quarterly state net income tax withholding return is filed, except that no deduction may be made in the first pay period from the compensation of a person casually employed unless the amount earned in the first pay period is $25 or more. Return forms for this purpose shall be prescribed and provided by the commissioner of revenue. (§ 1 ch 41 SLA 1957; am § 1 ch 175 SLA 1957; am § 1 ch 149 SLA 1959; am § 1 ch 179 SLA 1960; am § 111 ch 127 SLA 1974)

Effect of amendment. The 1974 amendment, in item (1) of subsection (a), substituted "person" for "woman," "the spouse" for "her husband," and "whose spouse" for "whose husband."

Am. Jur. and C.J.S. references. — 47 Am. Jur., Schools, §§ 76 to 82; 51 Am. Jur., Taxation, §§ 132 to 137, 147, 184, 337, 387 to 407, 443, 565, 805, 894 to 900, 970, 1020, 1066, 1098, 1128, 1275.

84 C.J.S. Taxation § 640.

Sec. 43.45.020. Persons exempt from tax. Persons in the active military or naval service of the United States, paupers, insane persons, persons cared for by the state and persons permanently injured, infirm, maimed or crippled so as to be disabled from earning a livelihood are exempt from the payment of the school tax. (§ 37-4-3 ACLA 1949; am § 2 ch 179 SLA 1960)

Sec. 43.45.030. Record of withholding. Every employer making a deduction and withholding a school tax shall furnish to the employee upon request a record of the amount of tax withheld from the employee on a form prescribed and furnished by the commissioner of revenue. (§ 37-4-4 ACLA 1949; am § 3 ch 179 SLA 1960)

Sec. 43.45.040. Overpayment, credit, and refund. The commissioner of revenue may credit or refund an overpayment of the tax, a tax erroneously or illegally assessed or collected, a penalty collected without authority, and any tax unjustly assessed or excessive in amount or wrongfully collected. (§ 37-4-5 ACLA 1949; am § 4 ch 179 SLA 1960)

Sec. 43.45.050. Failure to file return.
Repealed by § 3 ch 166 SLA 1976.

Cross reference. — For civil penalty imposed for failure to file a return or report, or pay the full amount of a tax, or a portion or a deficiency of the tax, see AS 43.05.220.

Editor's note. — The repealed section derived from § 1, ch. 41, SLA 1957; § 1, ch 175, SLA 1957; § 1, ch. 149, SLA 1959; § 1, ch. 179, SLA 1960.

Sec. 43.45.060. Penalties. (a) If a person required under this chapter to collect, account for, and pay over the school tax imposed by this chapter, wilfully fails to do so or if a person wilfully attempts to evade or defeat the tax imposed by this chapter, he is, in addition to other penalties provided by law, guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both, together with the costs of prosecution.

(b) An individual who wilfully makes and signs a return which he does not believe to be true and correct as to every material matter is guiity of a misdemeanor, and upon conviction is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both, together with the costs of prosecution.

(c) In this section "person" includes an officer or employee of a corporation or a member or employee of a partnership who is under a duty to perform the act in respect to which the violation occurs. (§ 37-4-6 ACLA 1949; am § 5 ch 179 SLA 1960)

Physical Therapists

SENATE BILL NO. 261, (see p. 467, 1979 report). Reported back to the Senate March 25 by Health, Education and Social Services with the committee recommending it be replaced with SUBSTITUTE and do pass. Senator Ferguson, Chairman of the Labor and Management Committee, waived referral on SB 261. To Rules.

SUBSTITUTE, which makes minor changes to original bill, amends statutes relating to the licensing of Physical Therapists in Alaska (AS 08.84, Physical Therapists Practice Act). Changes membership on State Physical Therapy Board and deletes provision for staggered terms. Deletes "registration of" and inserts "licensing of" throughout AS 08.84. SUBSTITUTE takes away from Physical Therapy Board the responsibility for conducting examinations for applicants. Adds new section to AS 08.84 relating to the licensure of foreign-trained therapists. Increases application, licensure, and renewal fees and fees for a temporary permit. Deletes requirement that application for examination be submitted to Department at least 40 days before the examination date. Licenses shall be renewed every four years rather than every two years. SUBSTITUTE adds: "A license may not be renewed unless the applicant demonstrates his competence as a physical therapist or physical therapy assistant in a manner established by the board . . . " Amends section relating to refusal, revocation and suspension of license. Allows person licensed under chapter to practice only under the prescription and direction of a person licensed to practice medicine, osteopathy, dentistry or podiatry. (last two added). Repeals and re-enacts definition of "physical therapy." No effective date.

SB 261

Article 1. State Medical Board.

...Physical Therapy Board
...sability of Administrative ...edure Act

...08.84.010. State Physical Therapy Board. (a) There is created ...State Physical Therapy Board, which consists of five members ...ted by the governor. The membership consists of one physician ...d to practice medicine in the state, three physical therapists ...ed in the state, and one lay person. Members of the board shall ...nted for terms of one, two and three years, respectively; all ...ent appointments shall be made for a term of three years and ...their successors are appointed.

The Physical Therapy Board shall conduct examinations for ...nts and shall control all matters pertaining to the registration of ...al therapists and physical therapy assistants and the practice of ...al therapy. The board shall

...pass upon the qualifications of applicants;

...conduct examinations;

(3) issue temporary permits and registration certificates to physical therapists and physical therapy assistants qualified under this chapter;

(4) suspend or revoke registration certificates, when necessary;

(5) keep a current register listing the name, business address, date and number of registration certificate of each physical therapist and physical therapy assistant who is registered to practice in this state;

(6) keep a record and minutes of its meetings, proceedings and hearings. (§ 15 ch 74 SLA 1957; am § 8 ch 49 SLA 1969; am § 1 ch 71 SLA 1974; am § 1 ch 208 SLA 1975; am § 2 ch 43 SLA 1977)

Effect of amendments. — The 1974 amendment rewrote this section.

The 1975 amendment substituted "American Physical Therapy Association" for "American Physical Therapist Association" at the end of the former third sentence of subsection (a).

The 1977 amendment, in subsection (a), deleted the former third, fifth, and sixth sentences, which read, respectively, "The members shall be selected from a list of 10 persons which shall be submitted by the Alaska Chapter of the American Physical Therapy Association", "Vacancies on the board shall be filled by appointment in like manner", and "Board members are not entitled to a travel or per diem allowance."

Legislative committee report. — For report on ch. 43, SLA 1977 (SB 110), see 1977 Senate Journal, p. 173.

Am. Jur. reference. — 41 Am. Jur., Physicians and Surgeons, § 31.

Sec. 08.84.020. Applicability of Administrative Procedure Act. The board shall comply with the Administrative Procedure Act (AS 44.62).

Article 2. Registration.

Section		Section	
30.	Qualifications for registration	80.	Examinations
35.	Malpractice insurance	90.	Registration
40.	Application for registration	100.	Renewal of registration
50.	Fees	110.	[Repealed]
60.	Registration by endorsement	120.	Refusal, revocation and suspension of registration
65.	Temporary permit		
70.	[Repealed]		

Sec. 08.84.030. Qualifications for registration. To be eligible for registration by the board as a physical therapist or physical therapy assistant, an applicant shall

(1) be of good moral character;

(2) have graduated from a school of physical therapy approved by the Council on Medical Education and Hospitals of the American Medical Association, or the American Physical Therapy Association;

(3) pass to the satisfaction of the board an examination from the Professional Examination Service Association, to determine his fitness for practice as a physical therapist or physical therapy assistant, or be entitled to registration without examination as provided in § 60 of this chapter. (§ 3 ch 74 SLA 1957; am §§ 1, 8 ch 49 SLA 1969; am §§ 1, 2 ch 26 SLA 1970; am § 25 ch 245 SLA 1970; am § 2 ch 71 SLA 1974; am § 2 ch 208 SLA 1975)

Effect of amendments. — The 1974 amendment repealed and re-enacted this section, renumbering the paragraphs and inserting "or physical therapy assistant" in the introductory language and in present paragraph (3).

The 1975 amendment substituted "Professional Examination Service Association" for "professional examination service of the American Public Health Association" in paragraph (3).

Legislative committee report. — Chapter 245, SLA 1970 (HCSSB 399 am H), was identical to CSHB 406 (Jud.). For report on CSHB 406 (Jud.), see 1970 House Journal Supplement No. 6.

Sec. 08.84.035. Malpractice insurance. If medical malpractice insurance for physical therapists becomes unavailable on the voluntary market and the director of insurance finds, after public hearing, that the unavailability is impairing the delivery of physical therapist services to the public, the director of insurance may require all persons registered under this chapter to carry medical malpractice insurance and to purchase their insurance from the Medical Indemnity Corporation of Alaska established under AS 21.88. If a finding of unavailability of insurance on the voluntary market and impairment of services has been made under this section, purchase of medical malpractice insurance from the Medical Indemnity Corporation of Alaska is a condition of registration under this chapter. The provisions of this section are satisfied if the registrant's employer maintains insurance for him from the Medical Indemnity Corporation of Alaska. (§ 29 ch 102 SLA 1976)

Sec. 08.84.040. Application for registration. To be registered as a physical therapist or physical therapy assistant, an applicant shall apply to the board on a form prescribed by the board. An applicant shall include in his application, evidence under oath that he possesses the qualifications required by § 30 of this chapter. (§ 4 ch 74 SLA 1957; am § 3 ch 71 SLA 1974)

Effect of amendment. — The 1974 amendment inserted "or physical therapy assistant" in the first sentence.

Sec. 08.84.050. Fees. The following fees shall be imposed under this chapter when applicable:

(1) application	$25
(2) registration by examination	25
(3) registration by endorsement	25
(4) biennial renewal	25
(5) temporary permit	10

(§ 4 ch 74 SLA 1957; am § 2 ch 49 SLA 1969; am § 3 ch 26 SLA 1970)

Sec. 08.84.060. Registration by endorsement. The board may register without examination an applicant who is a physical therapist or physical therapy assistant registered under the laws of another state or territory, if the requirements for registration in that state or territory were, at the date of his registration, substantially equal to the

requirements in this state. (§ 6 ch 74 SLA 1957, am § 4 ch 26 SLA 1970; am § 4 ch 71 SLA 1974)

Effect of amendment. — The 1974 amendment inserted "or physical therapy assistant" near the middle of the section.

Sec. 08.84.065. Temporary permit. (a) The board may issue a nonrenewable temporary permit to an applicant for registration by endorsement or by examination who meets the requirements of § 30(1) and (2) of this chapter and pays the required fee.

(b) A temporary permit issued to an applicant for registration by endorsement is valid for eight months or until the board considers the applicant's endorsement application, whichever occurs first.

(c) A temporary permit issued to an applicant for registration by examination is valid for eights months or until the results of the first examination for which the applicant is scheduled are published, whichever occurs first. If the applicant fails to take the first examination for which he is scheduled his temporary permit lapses on the day of the examination. (§ 5 ch 26 SLA 1970; am § 5 ch 71 SLA 1974; am § 3 ch 208 SLA 1975)

Effect of amendments. — The 1974 amendment substituted "registration" for "licensure" in subsections (a) and (b) and in the first sentence of subsection (c).

The 1975 amendment substituted "§ 30(1) and (2)" for "§ 30(1), (2) and (3)" in subsection (a).

Sec. 08.84.070. Registration fee.
Repealed by § 8 ch 49 SLA 1969.

Editor's note. — The repealed section derived from § 6, ch. 74, SLA 1957.

Sec. 08.84.080. Examinations. (a) The board shall examine applicants for registration as physical therapists or physical therapy assistants at the times and places it determines.

(b) An application for examination shall be submitted to the department at least 40 days before the examination date. (§ 7 ch 74 SLA 1957; am § 3 ch 49 SLA 1969; am § 6 ch 26 SLA 1970; am § 6 ch 71 SLA 1974)

Effect of amendment. — The 1974 amendment, in subsection (a), inserted "or physical therapy assistants" and deleted the former second sentence.

Sec. 08.84.090. Registration. The board shall register an applicant who meets the qualifications for registration under this chapter. It shall issue a certificate of registration to each person registered. A certificate of registration is prima facie evidence of the right of the person to

represent himself as a registered physical therapist or registered physical therapy assistant. (§ 8 ch 74 SLA 1957; am § 7 ch 71 SLA 1974)

Effect of amendment. — The 1974 amendment added "or registered physical therapy assistant" to the end of the third sentence.

Sec. 08.84.100. Renewal of registration. (a) A registered physical therapist or physical therapy assistant shall renew his registration biennially with the Department of Commerce and Economic Development on or before the date set by the department under AS 08.01.100(a). If the registration is not renewed on or before that date, it lapses.

(b) A penalty of $10 shall be charged in addition to all delinquent renewal fees for reinstatement of a registration which remains lapsed for more than 60 days. If the registration remains lapsed for more than three years, the board may require the applicant to take and pass the examination given under § 30(3) of this chapter. (§ 9 ch 74 SLA 1957; am § 4 ch 49 SLA 1969; am § 8 ch 71 SLA 1974; am § 4 ch 208 SLA 1975; am § 54 ch 218 SLA 1976)

Effect of amendments. — The 1974 amendment inserted "or physical therapy assistant" near the beginning of the first sentence of subsection (a).

The 1975 amendment substituted "§ 30(3)" for "§ 30(4)" in the second sentence of subsection (b).

The 1976 amendment substituted "Department of Commerce and Economic Development" for "Department of Commerce" in the first sentence of subsection (a).

Sec. 08.84.110. Renewal fee.
Repealed by § 8 ch 49 SLA 1969.

Editor's note. — The repealed section derived from § 9, ch. 74, SLA 1957.

Sec. 08.84.120. Refusal, revocation and suspension of registration. The board may refuse to register an applicant, may refuse to renew the registration of a person, and may suspend or revoke the registration of a person who

(1) is habitually drunk or addicted to the use of narcotic drugs;

(2) is, in the judgment of the board, guilty of immoral or unprofessional conduct;

(3) has been convicted of violating a state or federal narcotic law;

(4) has been convicted of a crime involving moral turpitude;

(5) is guilty, in the judgment of the board, of gross negligence in his practice as a physical therapist;

(6) has obtained or attempted to obtain registration by fraud or material misrepresentation;

(7) has been declared mentally ill by a court and has not thereafter

(8) has treated or attempted to treat ailments of human beings otherwise than by physical therapy, or has attempted to practice independent of the prescription and direction of a person licensed to practice medicine or osteopathy;

(9) as a physical therapy assistant, has attempted to practice physical therapy which has not been initiated, supervised and terminated by a registered physical therapist. (§ 10 ch 74 SLA 1957; am § 5 ch 49 SLA 1969; am § 9 ch 71 SLA 1974)

Effect of amendment. — The 1974 amendment added paragraph (9).

Cited in Leege v. Martin, Sup. Ct. Op. No. 131 (File No. 256), 379 P.2d 447 (1963).

Article 3. Unlawful Acts.

Section
130. False claim of registration forbidden
140. Penalty for fraud in obtaining registration
150. Registration of physical therapists
160. Practice of registered physical therapist
170. Penalty
189. Investigation by board
185. Limits or conditions on license discipline

Sec. 08.84.130. False claim of registration forbidden. (a) A person not registered as a physical therapist, or whose registration is suspended or revoked, or whose registration is lapsed, who uses in connection with his name the words or letters "R.P.T.," "Registered Physical Therapist," or other letters, words, or insignia indicating or implying that he is a registered physical therapist, or who in any way, orally, or in writing, directly or by implication, represents himself as a registered physical therapist is guilty of a misdemeanor.

(b) A person not registered as a physical therapy assistant, or whose registration is suspended or revoked, or whose registration is lapsed, who in any way, orally, or in writing, directly or by implication, represents himself as a registered physical therapy assistant is guilty of a misdemeanor. (§ 11 ch 74 SLA 1957; am § 10 ch 71 SLA 1974)

Effect of amendment. — The 1974 amendment designated the provisions of this section as subsection (a) and added subsection (b).

Sec. 08.84.140. Penalty for fraud in obtaining registration. A person who wilfully makes a false oath or affirmation or who obtains or attempts to obtain registration by a fraudulent representation is guilty of a misdemeanor. (§ 12 ch 74 SLA 1957)

Sec. 08.84.150. Registration of physical therapists. (a) It is unlawful for anyone to practice physical therapy without being registered in accordance with this chapter.

(b) A person practicing physical therapy without being registered on April 27, 1969 may continue to practice for a period of six months. At

in order to continue to practice physical therapy in the state. (§ 14 ch 74 SLA 1957; am § 6 ch 49 SLA 1969)

Sec. 08.84.160. Practice of registered physical therapist. A person registered under this chapter may not treat human ailments by physical therapy or otherwise except under the prescription and direction of a person licensed to practice medicine or osteopathy. This chapter does not authorize any person to practice medicine, osteopathy, chiropractic, or other method of healing. A person who violates this section is guilty of a misdemeanor. (§ 13 ch 74 SLA 1957; am § 7 ch 49 SLA 1969)

Sec. 08.84.170. Penalty. A person who violates this chapter is guilty of a misdemeanor, and upon conviction is punishable by a fine of not less than $50 nor more than $500, or by imprisonment for not more than 30 days. (§ 17 ch 74 SLA 1957)

Sec. 08.84.180. Investigation by board. The board shall investigate every supposed violation of this chapter coming to its notice and shall report all cases which in the judgment of the board warrant prosecution to the proper law enforcement officials. (§ 17 ch 74 SLA 1957)

Sec. 08.84.185. Limits or conditions on license; discipline. (a) In addition to action under § 180 of this chapter, upon a finding that by reason of demonstrated problems of competence, experience, education or health the authority to practice physical therapy should be limited or conditioned or the practitioner disciplined, the board may reprimand, censure, place on probation, restrict practice by specialty, procedure or facility, require additional education or training, or revoke or suspend a registration.

(b) The Administrative Procedure Act (AS 44.62) applies to any action taken by the board under this section. (§ 29 ch 102 SLA 1976)

Article 4. General Provisions.

Section
190 Definitions
200 Short title

Sec. 08.84.190. Definitions. As used in this chapter, unless the context otherwise requires,

(1) "board" means the State Physical Therapy Board;

(2) "physical therapist" means a person who practices physical therapy;

(3) "physical therapy" means the treatment of a bodily or mental condition of a person by the use of the properties of heat, light, water, electricity, massage, therapeutic exercise including physical rehabilitation procedures, and physical therapy evaluation, treatment planning, instruction and consultative services; the use of roentgen rays

electricity for surgical purposes, including cauterization, are not included within the term "physical therapy";

(4) "physical therapy assistant" means a person who assists in the practice of physical therapy or portions of it as initiated, supervised, and terminated by a registered physical therapist; his responsibilities do not include testing or evaluation. (§ 2 ch 74 SLA 1957; am § 11 ch 71 SLA 1974)

Effect of amendment. — The 1974 amendment substituted "State Physical Therapy Board" for "State Medical Board" in paragraph (1), inserted "and physical therapy evaluation, treatment planning, instruction and consultative services" in paragraph (3), and added paragraph (4).

Sec. 08.84.200. Short title. This chapter may be cited as the Physical Therapists Practice Act. (§ 1 ch 74 SLA 1957)

Chapter 86. Psychologists and Psychological Associates.

Article
1. Board of Psychologist and Psychological Associate Examiners (§§ 08.86.010 — 08.86.050)
2. Administration of Board Affairs (§§ 08.86.070 — 08.86.100)
3. Licensing of Psychologists (§§ 08.86.120 — 08.86.150)
3A. Licensing of Psychological Associates (§§ 08.86.160 — 08.86.162)
4. Prohibitions and Penalties (§§ 08.86.170 — 08.86.220)
5. General Provisions (§ 08.86.230)

Article 1. Board of Psychologist and Psychological Associate Examiners.

Section
10. Creation and membership of board
20. Appointment and term of office
30. Board meetings
40. Assistants
50. [Repealed]

Sec. 08.86.010. Creation and membership of board. There is created a Board of Psychologist and Psychological Associate Examiners. It consists of three licensed psychologists, and two persons who have no direct financial interest in the health care industry. (§ 1 ch 136 SLA 1967; am § 1 ch 65 SLA 1973; am § 30 ch 102 SLA 1976)

Effect of amendments. — The 1973 amendment inserted "and Psychological Associate" in the first sentence.

The 1976 amendment added "and two persons who have no direct financial interest in the health care industry" at the end of the second sentence.

(8)

Sec. 08.86.020. Appointment and term of office. Members of the board are appointed by the governor and confirmed by the legislature for staggered terms of three years. The terms of the public members shall be set so that they do not expire at the same time. A member serves

at the pleasure of the governor. (§ 1 ch 136 SLA 1967; am § 31 ch 102 SLA 1976)

Effect of amendment. — The 1976 amendment added the present second sentence.

Sec. 08.86.030. Board meetings. The board shall hold a regular annual meeting. The board may hold special meetings at the call of the chairman or of two board members. (§ 1 ch 136 SLA 1967)

Sec. 08.86.040. Assistants. The board may employ assistants to prepare and grade examinations and to investigate alleged violations of this chapter. (§ 1 ch 136 SLA 1967)

Sec. 08.86.050. Transportation and per diem. Repealed by § 1 ch 42 SLA 1977.

Editor's note. — The repealed section derived from § 1, ch. 136, SLA 1967.

Article 2. Administration of Board Affairs.

Section
70. Duties of the board
80. Board regulations
90. Administrative duties of the department
100. Applicability of the Administrative Procedure Act

Sec. 08.86.070. Duties of the board. The board shall

(1) pass on qualifications of applicants for licenses;

(2) prepare, administer and grade written examinations;

(3) after hearing, suspend or revoke the license of a licensed psychologist or psychological associate who violates a regulation of the board;

(4) set fees which are charged for psychological associates. (§ 1 ch 136 SLA 1967; am §§ 2, 3 ch 65 SLA 1973)

Effect of amendment. — The 1973 amendment inserted "or psychological associate" in paragraph (3) and added paragraph (4).

Sec. 08.86.080. Board regulations. The board shall adopt regulations to carry out the purposes of this chapter. (§ 1 ch 136 SLA 1967)

Cited in Allred v. State, Sup. Ct. Op. No. 2343 (File No. 2343), 554 P.2d 411 (1976).

Sec. 08.86.090. Administrative duties of the department. The department shall furnish administrative services for the board. (§ 1 ch 136 SLA 1967)

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SENATE BILL NO. 261

"An Act relating to physical therapists."

Senate Bill No. 261 provides for licensure rather than registration of physical therapists, permits the appointment of a licensed physical therapy assistant to the board, deletes the requirement that the Professional Examination Service Association examination be the only examination recognized as a condition of licensure, adds provisions governing the licensure of foreign trained therapists, permits the board to adopt regulations and updates the definition of physical therapy.

The Department of Health and Social Services believes that the amendments to the existing Physical Therapists Practice Act would enable the board to function effectively. The Department endorses this bill.

Re: SB 263 relating to naturopathy

Dear Senator Hackney:

Naturopathic physicians have been practicing in Alaska outside the law for some time. One, in particular, has created a great deal of trouble for the Division of Occupational Licensure and Department of Law, and was served a Cease and Desist Order in Fairbanks for operating a cancer detection clinic, consisting in part of hair analysis. It is our understanding that they are now performing home deliveries. If your office can acquire any information the State has accumulated, you can more readily appreciate the difficulties we may expect by legalization of this group.

Many of us have encountered patients made physicially ill from drug overdose, i.e. thyroid and misuse of cortisone, etc. I have personal experience in attempting to treat a woman who eventually died of breast cancer, after a prolonged naturopathic treatment with laetrile and enzymes while the cancer progressed to inoperability.

I cannot stress too strongly that naturopathy poses no threat whatsoever to the medical profession. It has, in fact, presented some clinical situations we might not otherwise encounter. While we may feel that a caveat emptor policy has some merit, it is clear that much of the public is simply gullible and this is reinforced by the FTC rulings on professional advertising.

Were naturopathy harmless it would be no concern of ours how the public wastes its money, but as I have indicated, many of the "natural drugs" are both potent and potentially toxic; others are worthless. As naturopathy encompasses the gamut of non-surgical illness, there is considerable opportunity for both misuse or inadequate or delayed proper treatment. In addition, it is probable that there will be pressure for access to public funding, as well as to medical and hospital facilities, radiology, laboratory, etc. A separate board would put naturopathy completely outside any control.

We urge you, therefore, to carefully consider what, if any, possible benefit would result from SB 263.

Sincerely,

Winthrop Fish, M.D., Chairman
Legislative Committee

BY THE COMMERCE COMMITTEE BY REQUEST

IN THE SENATE

SENATE BILL NO. 263

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the licensing of practitioners of naturopathic healing; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08 is amended by adding a new chapter to read:

CHAPTER 45. NATUROPATHS AND NATUROPATHIC PHYSICIANS.

ARTICLE 1. BOARD OF NATUROPATHIC EXAMINERS.

Sec. 08.45.010. ESTABLISHMENT; MEMBERSHIP; APPOINTMENT OF BOARD. (a) There is created the Board of Naturopathic Examiners, consisting of three members appointed by the governor.

(b) Members shall be licensed naturopathic physicians who have been actively engaged in the practice of naturopathy in the state for at least two years immediately preceding their appointment.

Sec. 08.45.020. TERM OF OFFICE; COMPENSATION. (a) Board members serve overlapping three-year terms. Vacancies on the board shall be filled for the unexpired portion of the term.

(b) Board members serve voluntarily except that members are entitled to travel expenses and per diem as allowed by law for other boards.

Sec. 08.45.030. CHAIRMAN. (a) The board shall annually elect a chairman from its members.

Sec. 08.45.040. MEETINGS. The board shall hold a regular meeting annually and other meetings as may be necessary. Special meetings may be called by the chairman or by concurrence of two board members.

Sec. 08.45.050. DUTIES AND POWERS. The board shall

(1) adopt regulations necessary to carry out the purposes of this chapter;

(2) evaluate the qualifications of applicants;

(3) conduct hearings and keep records and minutes necessary for carrying out the purposes of this chapter;

(4) provide for the issuance of temporary permits for persons who are apparently qualified to engage in naturopathic medicine to engage in the practice of naturopathic medicine until certification of the results of the next examination given under AS 08.45.120.

ARTICLE 2. LICENSING OF NATUROPATHIC PHYSICIANS.

Sec. 08.45.100. LICENSING REQUIREMENT. A person may not engage in the practice of naturopathy or naturopathic medicine unless he first obtains a license as provided in this chapter.

Sec. 08.45.110. LICENSURE AS A NATUROPATHIC PHYSICIAN. To be eligible for a license as a naturopathic physician, an applicant shall

(1) hold a high school diploma or the equivalent;

(2) have completed two years of postsecondary education at an accredited college of liberal arts or sciences;

(3) have graduated from an accredited school or college of naturopathic medicine that has as a requirement for graduation successful completion of a course of instruction of at least nine months in each of four years; and

(4) successfully complete an examination given by the board.

Sec. 08.45.120. EXAMINATION. Examination for licensing as a naturopathic physician shall be held at a time and place and conducted in a manner determined by the board. The examination may include practical demonstration and oral and written testing in those subjects usually taught in accredited schools of naturopathic medicine.

Sec. 08.45.130. ENDORSEMENT. The board may license a person as a naturopathic physician if the person is currently licensed as a naturopathic physician in another state or in Canada and that state or province in Canada maintains professional licensing standards equivalent to those in this chapter, and if the state or province extends the same privilege to those holding a license in this state.

Sec. 08.45.140. DENIAL, SUSPENSION OR REVOCATION OF LICENSE. The board may deny, suspend, or revoke the license of a person or applicant who

(1) has obtained or attempted to obtain a license under this chapter by fraud or deceit;

(2) wilfully violates a provision of this chapter or a regulation adopted under this chapter; or

(3) engages in unprofessional conduct.

Sec. 08.45.150. RENEWAL OF LICENSE. Licenses expire biennially on a date set by the department and may be renewed by making an application to the department and meeting the requirements established in this chapter.

Sec. 08.45.160. FEES. The following fees shall be imposed under this chapter:

(1)	application for examination	$ 25
(2)	application for reexamination	10
(3)	license issuance or biennial renewal	100
(4)	issuance of temporary permit	25

ARTICLE 3. GENERAL PROVISIONS.

Sec. 08.45.200. APPLICABILITY OF ADMINISTRATIVE PROCEDURE ACT. The board shall adopt regulations and conduct hearings in accordance with the Administrative Procedure Act (AS 44.62).

Sec. 08.45.210. VIOLATIONS. (a) It is unlawful for a person to

(1) fraudulently obtain or furnish a license, renewal or record required by this chapter;

(2) wilfully violate a provision of this chapter or a regulation adopted under this chapter.

(b) A person who violates this section is guilty of a misdemeanor and upon conviction is punishable by a fine of $500, or by imprisonment for one year, or by both.

Sec. 08.45.220. PRACTICING WITHOUT A LICENSE. A person who practices naturopathy or naturopathic medici ithout first obtaining a license is guilty of a misdemeanor and, upo viction, is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both.

Sec. 08.45.230. DEFINITIONS. In this chapter

(1) "board" means the Board of Naturopathic Examiners;

(2) "naturopathy" and "naturopathic medicine" means the treatment of the human body through the use of natural agencies, forces, processes, and products, with emphasis on the response of the individual to the disease rather than its treatment in isolation; the term

(A) allows use of all systems of diagnosis, including use of X-ray;

(B) allows treatment by physiological, nutritional, psychological, mechanical, electrical, manual, hydrotherapeutic, phytotherapeutic, mineral and organic substances and agencies which are effective in stimulating normal fun tion of tissues and organs sensitized by disease;

(C) includes

(i) minor surgery, including the drawing of blood for laboratory purposes;

(ii) use of local anesthetic for surgical repair or

care; and

(iii) the practice of natural childbirth in obstetrics, including related minor surgical procedures;

(D) excludes major surgery, the use of narcotics, radiation therapy, and the use of synthetic prescription drugs;

(3) "unprofessional conduct" means

(A) habitual overuse of alcoholic beverages or depressant, hallucinogenic or stimulant drugs, as defined in AS 17.12.-150(3), or addiction to the use of narcotic drugs as defined in AS 17.10.230(13); or

(B) conviction of an offense involving moral turpitude.

* Sec. 2. AS 08.01.010 is amended by adding a new paragraph to read:

(22) Board of Naturopathic Examiners.

* Sec. 3. AS 08.01.050(19) is amended to read:

(19) provide investigative services to the boards established under AS 08.20 AS 08.32, AS 08.36, AS 08.45, AS 08.64, AS 08.68, AS 08.71, AS 08.72, AS 08.80, AS 08.84, and AS 08.86, for the purpose of assisting those boards in matters of professional discipline.

* Sec. 4. AS 08.03.010(c) is repealed and re-enacted to read:

(c) The following board has the termination date provided by this subsection: Board of Naturopathic Examiners (AS 08.45.010) -- June 30, 1983.

* Sec. 5. AS 08.03 is amended by adding a new section to read:

Sec. 08.03.020. TERMINATION, CONTINUATION, AND REESTABLISHMENT OF REGULATORY BOARDS. (a) Upon termination, each board listed in AS 08.-03.010 shall continue in existence until June 30 of the next succeeding year for the purpose of concluding its affairs. During this period, termination does not reduce or otherwise limit the powers or authority of each board. One year after the date of termination, a board

continued shall cease all activities.

(b) The termination, dissolution, continuation or reestablishment of a regulatory board shall be governed by the legislative oversight procedures of AS 44.66.050.

(c) A board scheduled for termination under this chapter may be continued or reestablished by the legislature for a period not to exceed four years.

* Sec. 6. INITIAL TERM OF OFFICE. (a) One member of the Board of Naturopathic Examiners first appointed under AS 08.45.010(a) shall serve a term of one year; one shall serve a term of two years; and one shall serve a term of three years. The length of the term of each of the members first appointed shall be designated by the governor.

(b) The provisions of AS 08.45.010(b) do not apply to the members of the first Board of Naturopathic Examiners appointed under AS 08.45.

* Sec. 7. LICENSING OF PRACTITIONERS OF NATUROPATHY OR NATUROPATHIC MEDICINE WITHOUT EXAMINATION. The Board of Naturopathic Examiners shall license all persons who, on the effective date of this Act, meet the qualifications of AS 08.45.110(1) - (3) and who apply for licensure under AS 08.45 not later than one year after the effective date of this Act.

* Sec. 8. AS 08.03.010(d) and (e) are repealed.

* Sec. 9. This Act takes effect July 1, 1979.

Senate Bill 267

Originally Introduced 4/17/79
Preliminary Fiscal Note and Analysis

Section 1.AS 14.03.150

No fiscal estimate. DOE does not keep data on number of children/class.

Section 2.AS 14.17.041(f)

Estimated $20.7 (Based on final report 78-79 school year) an increase of $2.0.

Section 3.AS 14.17.041(h)

Estimated $3.1 (1979-80) based on FY'80 Initial Foundation Report.

Section 4 AS 14.30.180

Philosophy, no fiscal impact

Section 5.AS 14.30.192

Covered under current regulations, no fiscal impact

14.30.193

Allowed under current regulations
Fiscal impact not estimable

14.30.194

No fiscal impact

14.30.195

Fiscal impact not estimable

14.30.196

No fiscal impact

14.30.197

Includes additional programs not currently under regulation or funded as a program by the State. There would be significant impact.

Subsections

		Level of service required
1.	$5,039,225	.25
2.	5,039,225	.25
3.	2,845,690	.75
4.	4,093,806	1.00
5.	4,093,806	1.00
6.	4,093,806	1.00
7.	4,093,806	1.00
8.	4,093,806	1.00
9.	4,093,806	1.00
10.		.25, .50, .75, 1.0
11.	(A)$12,765,819	.25, .50, .75
	(C) 16,859,625	.25, .50, .75, 1.0
	(D) 16,859,625	.25, .50, .75, 1.0

Total = $100,831,670

Numbers of students in each level of service catagory (computer data as of 6/7/79 x average Instructional Unit value).

11.(A) 8978 students levels .25, .50, .75 at an average cost of $300 per student equals $2,693,400. This cost reflects medical/psychological evaluation only. Does not include cost of social services.

Mental Health services based on average cost or of $45.00 per hour. An average of 6 hours counseling is estimated. This would be very low in some cases.

12(B) 15/hour x 6 hours = 270 x 8978 students equals $2,421,900 (estimates from Juneau Mental Health).

Section 14.30.198(c)

Out-of-District placements currently total $212,846.

Section 14.30.199

Already in statute except that reevaluation required annually.

Section 14.30.201

Redundent with existing statute and regulation.

Section 14.30.202

(A) Redundent with existing statute and regulation.

(B) Fiscal impact unknown.

Section 14.30.203

(3) Requires school psychologist. 1 psychologist per 1500 students, 60 new positions = $1,511,100. This would be difficult to achieve in terms of availability of staff.

(4) Nurse x 52 districts = $1,309,620
Social worker x 52 districts = $1,309,620
Guidance counselor x 52 districts = $1,309,620
No figures are available to indicate number under subsection 4 average/ADM. Estimates based on 1/district would increase drastically during first year.

Section 14.30.204

Redundent with current regulations.

Section 14.30.206

Redundent with current regulations.

Section 14.30.207

Redundent except for subsection (5) requires counseling, not considered district responsibility.

Section 14.30.208

Redundent

Section 14.30.209

Fiscal impact not estimable.

14.30.211

Under the weighted formula the impact would equal the impact of 10,000 new students and cause districts to hire 1000 new teachers.

Computed 9931 exceptional children deleted from 90,000 = 80,069 students. Exceptional children added back with weighted formula attached = 100,014.

Section 14.30.211

Under section #1 AS 14.03 maximum class size is established for the regular classroom. This section would have massive fiscal impact especially when small districts would be required to have additional staff during the school year. Law suits, etc., would result due to lack of space for classrooms, etc.

(b) Weighing factors would escalate allowing the team to cause districts to hire or release staff prior to school board action. Inconsistant with school board's power under the law.

(c) Redundent with subsection (b) above.

Section 14.30.213

Surrogate parents are not currently legally defined in Alaska Law. The impact cannot be estimated.

Section 14.30.214

Subsection (a) does not allow for due process with LEA.

Subsection (b) due process requirements redundent with current regulation except that the DOE does not currently approve such program placements.

Section 14.30.215 - 222

Redundent with current regulation.

Section 14.30.223

Subsection (1) inconsistent with current State Statutes. District's may expend State support in any way approved by the Board.

Subsection (5) public hearings are not currently required.

Section 14.30.225

Redundent with current regulations.

Section 14.30.226

Current school term is minimum of 180 days.

Fiscal impact with Programs in Valdez (Harborview), API, Hope Cottage. Impact not estimable at this time.

Section 14.30.227

Impact estimated at $1.2 for 79-80 school year.

Transportation, DOE estimated
325/child/year $ 3,022,800

Subsection (B) $199,933 (DHSS figures)

Subsection (D) 325/child/year $ 3,022,800

Subsection (E) diagnostic costs prior estimates by DOE indicate $1.9 for 79-80 school year.

Nuclear Waste Material (disposal)

SENATE BILL NO. 269, by Senator Kerttula. Amends AS 18.45.075 (Ch. 45, "Atomic Energy," "Facilities Siting Permit Required") to read: "No person may construct a nuclear fuel production facility, utilization facility, and reprocessing facility [, OR NUCLEAR WASTE DISPOSAL FACILITY] in the state unless he has first obtained a permit from the Department of Environmental Conservation ....." Adds new section to AS 18.45 which prohibits storage and disposal of nuclear waste material in Alaska. Does not provide for effective date.

Introduced April 18 and referred to HESS, then to Judiciary.

SB 269

Suggested language to prohibit transportation of nuclear waste material yet allow Alaskan users, such as hospitals, to dispose of their material:

Prepared by DOT

18.45.028 TRANSPORTATION OF NUCLEAR WASTE MATERIAL. The transportation of nuclear wastes, other than for disposal outside the boundaries of Alaska, are prohibited on the State highway system.

This act becomes effective immediately.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SENATE BILL NO. 269

"An Act prohibiting the disposal of nuclear waste material."

Senate Bill No. 269 prohibits the storage and disposal of nuclear waste material in Alaska. This prohibition is without qualification as to quantity, origin, and kind.

Alaska has approximately 35 licensed users of radioactive materials. Since Alaska is not an Agreement State under the Atomic Energy Act, the Department of Health and Social Services does not have jurisdiction over these sources. They are licensed and controlled by the United States Nuclear Regulatory Commission.

Presently, nuclear waste material in some form or other is either stored and/or disposed of in Alaska. It is estimated that from eight to ten of the facilities licensed in the State by the Nuclear Regulatory Commission use unsealed sources which require some storage and disposal following use.

Unsealed sources, as differentiated from sealed sources, are those not encapsulated in a container. Unsealed sources, kept in openable bottles or other containers, are necessary in research and nuclear medicine so they can be used in various laboratory procedures or in medical practice by ingestion, inhalation or injection. This use results in various kinds of radioactive wastes. Facilities presently using unsealed sources are four hospitals located in Juneau, Anchorage, and Fairbanks. Unsealed sources are also frequently used in private, Federal, and State research and/or educational facilities carrying out activities such as those conducted by the NOAA Auke Bay Fisheries Laboratory, U.S. Geological Survey, and the University of Alaska Institutes of Marine Science and Arctic Biology. Some of these unsealed sources may also be used in industrial applications--for example, activities related to the oil industry.

Radioactive wastes are in the form of liquids, contaminated laboratory articles, biological samples, and such items as towels and clothing. Generally these would be stored in liquid-tight barrels, on site, in an area with limited and controlled access. Storage is necessary until materials can be shipped to a licensed radioactive waste disposal site, such as the one in Richland, Washington. Alaska does not have an approved waste disposal site, and the present low volume of such waste has not yet caused a problem for users in Alaska.

Presently, hospitals in Alaska store radioactive waste until it has decayed to very low levels (near background). The material is then either incinerated or disposed of in sanitary sewerage systems according to regulations established by the Nuclear Regulatory Commission.

POSITION PAPER/Department of Health & Social Services

This Bill, if passed as presently worded, will eliminate the use of unsealed radioactive sources in Alaska--a situation which will have a harmful impact on the delivery of medical services and research activities within the State. Accordingly, the following changes in wording are recommended:

Line 12: Leave in the phrase "OR NUCLEAR WASTE DISPOSAL FACILITY".

Lines 26-28: Section 18.45.027. DISPOSAL OF NUCLEAR WASTE STORAGE & DISPOSAL MATERIAL. The disposal of high levels of nuclear waste material in the State from nuclear power plants is prohibited.

The changes recommended above are suggested only to protect the use of radioactive materials in nuclear medicine facilities, research, and education. It is recognized that the prohibition of the disposal of high level waste from nuclear power plants may directly affect future State policy and the interest of other State agencies. This matter of State policy regarding disposal of high level waste has ramifications far beyond the authority of this Department, and consequently is not addressed by this position paper.

With the above recommended changes, the Department of Health and Social Services takes a neutral stand on Senate Bill No. 269.

The Honorable Glenn Hackney
Chairman
Senate Health & Social
Services Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

The Alaska Department of Environmental Conservation would like to submit the following comments and recommendations on SB 269 concerning the disposal of nuclear wastes in Alaska. We support this bill and the several minor changes which have been recommended. We would be more than willing to present these comments and answer any questions you might have at the 3:00 pm Committee meeting on April 16, 1980.

Sincerely,

Ernst W. Mueller
Commissioner

Enclosure

ALASKA DEPARTMENT OF ENVIRONMENTAL CONSEPVATION

REVIEW OF SB-269
AN ACT PROHIBITING THE DISPOSAL OF NUCLEAR WASTE MATERIAL

Submitted to the
Senate Health, Education and Social Services Committee

SB 269 makes changes in the current Alaska Statutes 18.45.025 FACILITIES SITING PERMIT REQUIRED, to prohibit the siting of any facilities which would allow the storage or disposal of radioactive waste materials within the State of Alaska. The Department strongly supports this legislation, particularly as it relates to the disposal of highly radioactive waste materials from nuclear power plants.

Wastes from nuclear power generating facilities require extremely long storage times before their radioactivity is reduced to safe levels. These wastes are difficult to contain in a safe manner, require extremely expensive containment technology which up to now has not proven reliable for long-term storage. While wastes from existing plants in other states will require some form of disposal method, Alaska should not become a dumping ground for these wastes. SB 267 would prohibit this from occurring, except in the unlikely event of federal preemption.

In supporting this legislation, we understand that a change has been or is going to be made in the legislation to expressly prohibit only the disposal of high level radioactive wastes from nuclear power plants. We support this change, because the disposal of small amounts of low level radioactive wastes generated from medical, laboratory and industrial facilities can be accomplished without creating a hazard to public health and the environment. Many of these low-level wastes cause no danger to the public if they are disposed in a safe and environmentally sound manner. Therefore, the existing authority to establish regulations under AS 46.03.250 should be adequate to assure proper handling and safe disposal of the low-level radioactive waste materials presently being generated in Alaska.

We thank you for the opportunity to comment on this legislation.

Re: Nuclear Waste Transportation
Our file J-66-606-30

Dear Senator Hackney:

On April 4, you requested this department's views on whether the State of Alaska could prohibit the Federal Government from utilizing state roads to transport nuclear waste for disposal within the state. The state of the law in this matter is fluid, and we cannot give a definitive answer.

Many states, and local governments, have enacted legislation prohibiting or restricting the transportation of radioactive wastes across their roads. In response, the Federal Department of Transportation has proposed regulations which, if enacted, would preempt states from imposing outright prohibitions on nuclear waste transport, at least on federal aid highways, although states would be allowed a voice in particular routing decisions. A copy of these regulations is enclosed. Several states are actively protesting these

regulations, and are contemplating litigation in the event that they are adopted -- on the grounds that the regulations are statutorily and constitutionally unauthorized.

Absent the adoption of these regulations, the state probably could prohibit private carriers from transporting nuclear wastes across state roads. A different problem exists with respect to transportation by the Federal Government and its instrumentalities. Unless a specific statutory waiver could be found, direct federal transport would be immune from state regulation. Hancock v. Train, 426 U.S. 167 (1976). Congress has waived federal sovereign immunity with respect to solid waste activities in section 6001 of the Resource Conservation Recovery Act of 1976 (P.L. 94-950). The applicability of that waiver to nuclear waste transportation by the Federal Government would be questioned under section 1006(a) of the Act, which provides that:

> Nothing in this Act shall be construed to apply to (or to authorize any state, interstate, or local authority to regulate) any activity or substance which is subject to the . . . Atomic Energy Act of 1954 (42 U.S.C. 2011 and following) except to the extent that such application (or regulation) is not inconsistent with the requirements of such acts.

As implemented, the regulation of the transportation of nuclear wastes is governed not by the Atomic Energy Act, but rather by the Hazardous Materials Transportation Act.

49 U.S.C. § 1801 et seq. Thus, the exceptions to the sovereign immunity waiver contained in the Resource Conservation and Recovery Act, at least potentially, may not include the transportation of nuclear waste materials. However, because sovereign immunity waivers are strictly construed in favor of the Federal Government (Hancock v. Train, supra) the argument may be a difficult one to make. */

As I hope this letter indicates, the subject of the permissible scope of state regulation with respect to nuclear power involves an accommodation of several major federal regulatory programs, and ongoing federal agency activities. Certainly, 42 U.S.C. § 2021 -- the state cooperation section of the Atomic Energy Act -- has certain preemptive effects. For example, it has been held that states may not prohibit the construction of a nuclear plant for reasons premised on radioactivity hazards, although it may deny siting approval on other environmental or land use grounds. See Northern States Power Co. v. State of Minnesota, 447 F.2d 1143 (8th Cir. 1971); United States v. City of New York, ___ F. Supp. ___, 12 ERC 1600 (SDNY, December 26, 1978); Pacific Legal Foundation v. California State Energy Comm'n,

---

*/ The sovereign immunity waiver in the Clean Air Act (sec. 118: P.L. 95-95) may also be applicable, to the extent that transportation of nuclear waste poses a threat of atmospheric radioactive release.

___ F. Supp. ___ 12 ERC 1899 (S.D. Cal., March 6, 1979). The extent to which this rationale is applicable to direct regulation of nuclear waste disposal activities is unclear. Because it is unsettled, many state and local governments have chosen to legislate in this area. Moreover, it is my understanding the Nuclear Regulatory Commission has taken a cooperative attitude in this respect -- although the Department of Transportation, as noted previously, may differ. In sum, it does not appear from initial review that there exists any clear legal obstacle at this time which would override the public interest which would be served by state nuclear power regulation.

Sincerely,

AVRUM M. GROSS
ATTORNEY GENERAL

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SENATE BILL NO. 269

"An Act prohibiting the disposal of nuclear waste material."

Senate Bill No. 269 prohibits the storage and disposal of nuclear waste material in Alaska. This prohibition is without qualification as to quantity, origin, and kind.

Alaska has approximately 35 licensed users of radioactive materials. Since Alaska is not an Agreement State under the Atomic Energy Act, the Department of Health and Social Services does not have jurisdiction over these sources. They are licensed and controlled by the United States Nuclear Regulatory Commission.

Presently, nuclear waste material in some form or other is either stored and/or disposed of in Alaska. It is estimated that from eight to ten of the facilities licensed in the State by the Nuclear Regulatory Commission use unsealed sources which require some storage and disposal following use.

Unsealed sources, as differentiated from sealed sources, are those not encapsulated in a container. Unsealed sources, kept in openable bottles or other containers, are necessary in research and nuclear medicine so they can be used in various laboratory procedures or in medical practice by ingestion, inhalation or injection. This use results in various kinds of radioactive wastes. Facilities presently using unsealed sources are four hospitals located in Juneau, Anchorage, and Fairbanks. Unsealed sources are also frequently used in private, Federal, and State research and/or educational facilities carrying out activities such as those conducted by the NOAA Auke Bay Fisheries Laboratory, U.S. Geological Survey, and the University of Alaska Institutes of Marine Science and Arctic Biology. Some of these unsealed sources may also be used in industrial applications--for example, activities related to the oil industry.

Radioactive wastes are in the form of liquids, contaminated laboratory articles, biological samples, and such items as towels and clothing. Generally these would be stored in liquid-tight barrels, on site, in an area with limited and controlled access. Storage is necessary until materials can be shipped to a licensed radioactive waste disposal site, such as the one in Rickland, Washington. Alaska does not have an approved waste disposal site, and the present low volume of such waste has not yet caused a problem for users in Alaska.

Presently, hospitals in Alaska store radioactive waste until it has decayed to very low levels (near background). The material is then either incinerated or disposed of in sanitary sewerage systems according to regulations established by the Nuclear Regulatory Commission.

POSITION PAPER/Department of Health & Social Services

This Bill, if passed as presently worded, will eliminate the use of unsealed radioactive sources in Alaska--a situation which will have a harmful impact on the delivery of medical services and research activities within the State. Accordingly, the following changes in wording are recommended:

Line 12: Leave in the phrase "OR NUCLEAR WASTE DISPOSAL FACILITY".

Lines 26-28: Section 18.45.027. DISPOSAL OF NUCLEAR WASTE MATERIAL. The disposal of high levels of nuclear waste material in the State from nuclear power plants is prohibited.

The changes recommended above are suggested only to protect the use of radioactive materials in nuclear medicine facilities, research, and education. It is recognized that the prohibition of the disposal of high level waste from nuclear power plants may directly affect future State policy and the interest of other State agencies. This matter of State policy regarding disposal of high level waste has ramifications far beyond the authority of this Department, and consequently is not addressed by this position paper.

With the above recommended changes, the Department of Health and Social Services takes a neutral stand on Senate Bill No. 269.

LEGISLATIVE AFFAIRS AGENCY

M E M O R A N D U M April 4, 1980

SUBJECT: CSSB 269, relating to nuclear wastes

TO: Senator Glenn Hackney, Chairman
Senate Health, Education and Social Services Committee

FROM: John B. Chenoweth
Legislative Counsel

There was some confusion concerning instructions to complete the second redraft of this committee substitute. While the department's "position paper" wanted a ban only on "high level nuclear wastes" from nuclear power plants, your committee's actual request was limited to "high level nuclear wastes", presumably from any source. I do not know how to quantify "high level" with precision. Not wanting to tie to a figure expressed in terms of measurements that delight physicists and trouble legislators, I have suggested language in the draft that leaves the determination (other than as to wastes from nuclear plants) to an administrative agency. I note that, at 18 AAC 85, the Department of Environmental Conservation has already defined permissible disposable nuclear wastes.

The bill draft also makes clear that the prohibition is not intended to preclude storage and disposal of quantities of nuclear wastes generally used in education, research and medicine.

Enclosure

ATE OF ALASKA

JAY S. HAMMOND, Governor

DEPT. OF HEALTH AND SOCIAL SERVICES

DIVISION OF PUBLIC HEALTH

POUCH H-06-JUNEAU 99811

April 15, 1980

The Honorable Glenn Hackney
Chairman
Health, Education
and Social Services Committee
Alaska State Senate
Pouch "V", State Capitol Building
Juneau, Alaska 99811

Document# 79-80

Dear Senator Hackney:

Sid Heidersdorf, Radiological Physicist for the Division of Public Health, is out of town this week and therefore unable to testify at the Wednesday hearing on CSSB 269. He has asked that I convey his concerns regarding this bill to you for consideration by your committee.

We are pleased to note that the Committee Substitute for Senate Bill 269 allows the storage and disposal of nuclear waste resulting from medicine, scientific research and education. We have a few additional concerns we feel should be weighed by the committee in their deliberations on this bill.

Consideration No. 1

Section 18.45.025 removes nuclear waste disposal facilities from the permit requirements listing. At some time in the future, if disposal requirements from medical, scientific and educational sources become great enough, a waste disposal facility may be required within the state for wastes generated from these sources. In that event, any such facility should be required to receive a permit from the Department of Environmental Conservation.

Consideration No. 2

Section 18.45.027 prohibits the transportation of nuclear waste material in the state except for purposes of disposal outside the state. It is suggested that the prohibition should be directed against high level nuclear waste materials since there may be necessity to transport low level wastes from medical, scientific and educational sources. The State has regulations covering the transportation of nuclear materials (18 AAC 85.320).

Consideration No. 3

Section 18.45.029(b)(1)(B) seems to add to the potential for confusion

over the term "high level nuclear material" rather than to clarify the definition as intended. For example, low level wastes from medical, research and educational uses, when improperly stored or disposed of, could be "material of a kind or quantity which .... would constitute a threat to the health or safety of the public....". Safe disposal of radioactive wastes is already covered by regulation in 18 AAC 85.270 - 310.

Recommendations

1. In Section 18.45.025, retain the requirement for a permit for the siting of a nuclear waste disposal facility.

2. In Section 18.45.029, delete subpart (1) (B) since it does not appear to add clarity to the definition of "high level nuclear material" and rephrase 18.45.029 (1) (A) to read "nuclear waste material produced by nuclear power plants and nuclear fuel processing facilities".

3. A preferable alternative to Recommendations 1 and 2 is to delete Section 18.45.029 in its entirety and rephrase Section 18.45.027 as follows:

> Section 18.45.027. TRANSPORTATION, STORAGE AND DISPOSAL OF NUCLEAR WASTE MATERIAL. The transportation, except for purposes of disposal outside the state, storage and disposal of high level nuclear waste material from nuclear power plants or nuclear fuel processing facilities is prohibited.

Such phrasing would be consistent with the continued use of low level nuclear materials for medical, scientific or educational purposes and would eliminate the need for defining "high level nuclear waste".

Department's Position

The Department of Health and Social Services is neutral on CSSB No. 269 if these recommendations are incorporated in the final draft.

Thank you for the opportunity to present Mr. Heidersdorf's testimony to you in this letter. He will be back in his office Monday, April 21st and will be able to provide you or your committee members with any additional information you may require.

Sincerely,

Dean F. Tirador, M.D.
Director

AFTER DIVORCE

Grandparents Have Rights, Too

By Dr. Melvyn A. Berko and Joanne Grant

Question: Since our son's ivorce we don't feel welcome in ur grandchildren's home. The hildren live with their mother nd we would like to visit them ore often. We're still grandparnts. What can we do?

Answer. You bet you're still grandparents! Enjoy and fulfill your wishes by clearly stating your position along with the "how and when" you can be with them.

Do this in writing or by visiting your former daughter - in - law. If she agrees, be sure to hold up your end of the bargain. If your plans change, give her plenty of notice.

Remember, she's their mother so don't criticize her. If she refuses to let you see the children, you now have recourse through the courts.

Growing numbers of grandparents are beginning to press for visitation rights. Did you know that grandparents have organized into self-help groups like Grandparents Anonymous?

The leadership typically comes from paternal grandparents as they are the ones most likely to lose contact with the children as a result of the divorce.

According to family counseling agencies, generally it is the ex daughter-in-law who severs ties with the grandparents. She may be punishing them for the "sins" of their son or believe they have contributed to the breakup of the marriage.

She may also have found a new life with a new husband and doesn't want to be with old and awkward relationships.

Less frequently the divorced son breaks off contact with his children and hence, his parents' link to them.

Dr. Doris Freed, chairman of the committee on research of the Family Law section of the American Bar Association, reported that as little as 18 months ago grandparents did not have the right to seek visitation unless their own children had died. Recently the law has been amended to allow grandparents whose children are living to seek visitation.

Noting the increase in the number of grandparents fighting for visitation and even custody, Dr. Freed stated, "It's not always their right that they are seeking to perpetuate ... It's more or less the rights of the children to love and affection."

The tendency in today's courts is to protect the rights of the child independently of the rights of the parents. As a result, the courts seem to be looking more favorably on grandparents' petitions for visitation.

The love of a grandparent can have a very special place in the lives of their grandchildren.

Your divorce crisis may last one to two years. The booklet, "Color Me Happy," provides a realistic and practical road map for the way back and beyond. For your copy, send $1 and a long, stamped, self-addressed envelope with your request to "After Divorce," Box 4994, Des Moines, Iowa 50306.

GRAND PARENT RIGHTS

Rights Of Grandparents

NEW YORK — (AP) — Grandparents have a right to visit their grandchildren, in spite of disagreements between the child's parents and grandparents, a state court has ruled.

"Visits with a grandparent," the court said, "are often a precious part of a child's experience, and there are benefits which devolve upon the grandchild from the relationship with his grandparents which he cannot derive from any other relationship.

"Neither the legislature nor this court is blind to human truths which grandparents and grandchildren have always known."

The five-member Appellate Division of state Supreme Court in Brooklyn unanimously reversed a lower court decision that kept Gabriel Vacula and his wife Julia, of the Bronx, from visiting their granddaughter, Amy Vacula, 7.

The grandparents had tried on numerous occasions to visit Amy, who remained in the custody of her mother, Carolyn, following the mother's divorce in 1971 from Robert Vacula. The split between the grandparents and Amy was widened by the death of the father in an auto accident in 1974.

Bitter feelings between Amy's parents were carried over to the grandparents, resulting in the mother's rebuffal of the grandparents' attempts to see Amy. The mother subsequnelty was remarried.

The court ruled that "animosity between the mother of children and their grandparents is not a proper basis for the denial of visitation privilages to the grandparents; nor is it a proper yardstick by which to measure the best interests of children."

The case was sent back to the lower court to set terms of visiting privileges.

(ERA continued)

Economic pressure is being exerted on the 15 states which have failed to ratify the amendment (Alabama, Arizona, Arkansas, Florida, Georgia, Illinois, Louisiana, Mississippi, Missouri, Nevada, North Carolina, Oklahoma. South Carolina, Utah, and Virginia.

Some 40 national organizations, which hold some of the largest conventions in the United States, have agreed not to meet in states where ERA has not been ratified. Some major cities report feeling the impact of loss of business. Many conventions, however, are booked far in advance and organizations may be locked into contracts they cannot break in non-ERA states.

The political battle between pro- and anti-ERA forces is likely to be intense in 1978 legislative sessions. For example, pro-ERA forces claim responsibility for the election defeat of Virginia House Majority Leader James M. Thomson, who had opposed ERA.

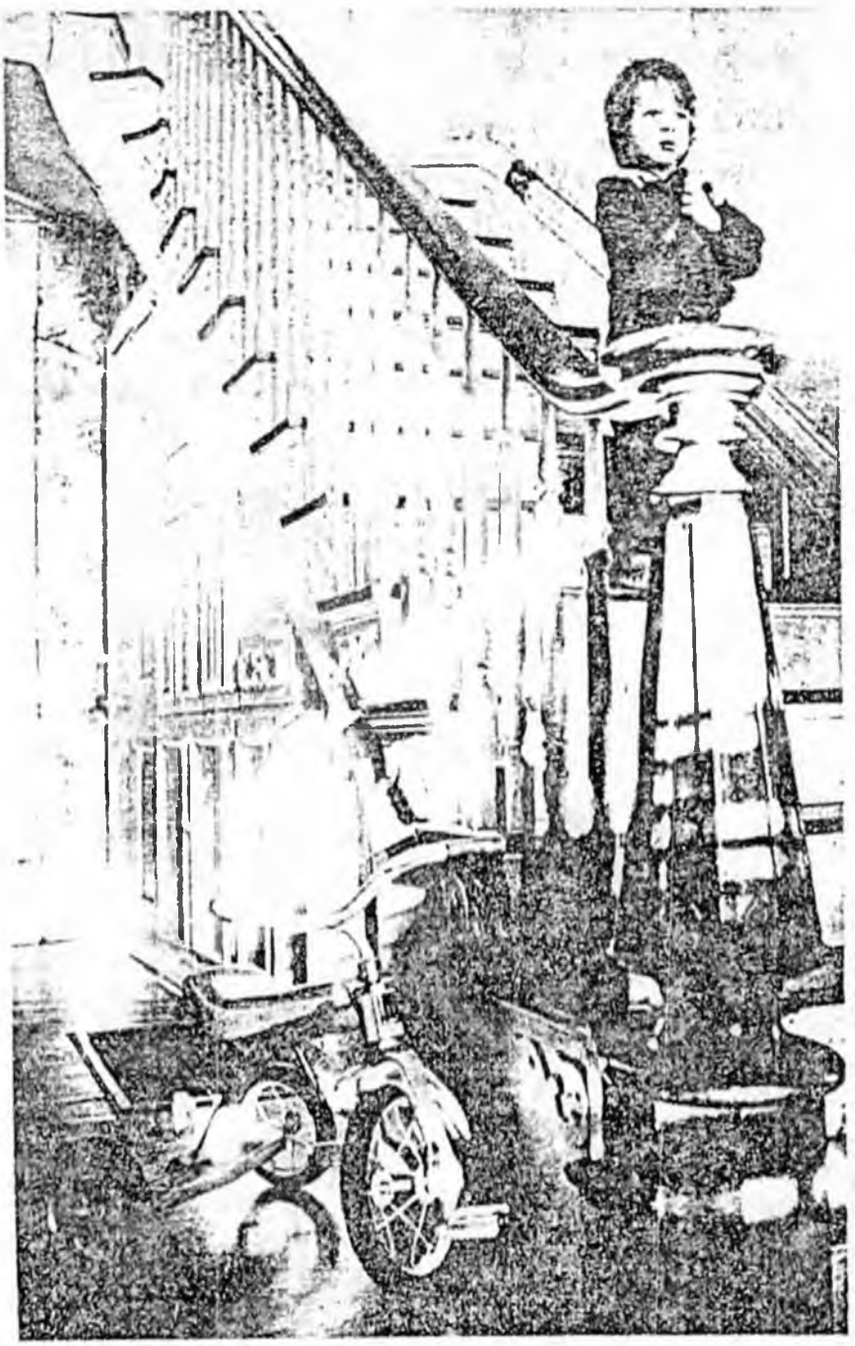
Pro-ERA forces, spearheaded b ERAmerica, view the last few states as the toughest to corral. But they claim momentum is building, and the amendment will pass. Just as confide are anti-ERA forces, who point to de feats in state legislatures in 1977 as evidence that the ERA will not be adopted.

(By Elaine S. Knapp, CSG, Lexington.)

Divorce blocks road to grandma's house

"Why don't we go to see Grandma and Grandpa anymore?" is the question often asked by children of divorced parents. To a young child, divorce not only means absence of one parent, but, all too often, absence of his grandparents as well.

States have begun to legislate in this area with laws passed in 1976 and 1977 giving visiting privileges to grandparents in Delaware (HB 1196), New York (SB 314), and Utah (HB 142). Arkansas and Wisconsin (S 11) passed similar laws in 1975.



A bill which would have given visiting rights to grandparents in Pennsylvania (HB 2265) was vetoed in 1976 by the governor, who said he feared it would bring about lawsuits by one family member against another, and that the question of visiting rights is a moral issue- not a legal one.

A bill in the Maine Legislature (LD 885) would have allowed judges to award visitation rights to grandparents on a case-by-case basis. The measure failed in the 1977 legislature.

Its sponsor, Representative Gail Tarr, described the divorce rate in Maine as "astronomical" and said visitation rights for grandparents is an important issue.

"When the parents of a child get divorced, the experience can be traumatic enough," she said. "And when Grandma and Grandpa suddenly don't show up anymore, the effect that it would have on a young child just adds to the trauma that the child is already going through."

(By Karen McElroy, CSG, Lexington.)

-AFTER DIVORCE-

By Dr. Melvyn A. Berke and Joanne Grant

COMMENT: Many grandparents whose children are divorced are cut off from contact with their grandchildren. In a previous column we dealt with the psychological and legal aspects of this issue. Your calls and letters, particularly in regard to the legal aspects, prompt us to give you an update.

We had reported that Dr. Doris Freed, co-chairman of the Custody section of the Family Law section of the American Bar Association, saw a trend in the expansion of legal rights of grandparents. Freed recently reported the following states now have a law which provides grandparents an opportunity to obtain visitation: Arkansas, California, Connecticut, Florida, Georgia, Hawaii, Idaho, Iowa, Louisiana, Michigan, Minnesota, Missouri, New Jersey, New York, Ohio, Texas, Wisconsin and Vermont.

In the past, a stepmother or ex-wife whose spouse had died could prevent grandparents from seeing their grandchildren. Now it is the court's decision whether visitation should be granted. The decision is more likely to be favorable if there was frequent contact between the grandparents and grandchildren prior to the death or divorce of the custodial parent's spouse.

For further information you can contact Freed at 425 Park Ave., New York, N.Y. 10022.

Dear Ann Landers: A while back you printed a heartbreaking letter from grandparents who were cut off completely from their only grandchild because the boy's mother (their son's ex-wife) wanted to be punitive. I hope they live in Texas. The law is now on their side. The new Family Code, Senate Bill 168, Section 14.03, Clause D, provides grandparents with legal visiting rights.—Good For Us

Dear Good: Thank you for letting me know. I happily pass the word and hope that the example of the Texas legislature will be followed by all the other 49.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
SENATE BILL 276

"An Act providing for the award of visitation rights to grandparents."

Senate Bill 276 adds to the section on visitation rights in judgements for custody during divorce or legal separation actions. It provides that grandparents be allowed visitation rights. The fact that parents choose to divorce each other should not automatically preclude the child from visiting grandparents who love a child and can give him emotional support. Sometimes the conflict between parents serves to cutoff a child from his grandparents. This may not be in the best interests of the child.

The Department of Health and Social Services is therefore supportive of Senate Bill 276.

January 21, 1980

Senator Glen Hackney
Pouch V
Juneau, Alaska 99801

Dear Glen:

The student loan fund which has a maximum of $2500.00 is an excellent program which isn't costing the State very much money. When it first started the max of $2500.00 was quite sufficient. While it didn't cover all costs it did take care of 80% of them and most students could earn the balance during the summer months. However with inflation on the rise schools are now costing students around $6,000.00/yr and it seems timely to increase the student loan fund max that students can obtain.

If you hear of any bills in the hopper good or bad for the mining industry I would appreciate a call from you.

Sincerely,

Mark B. Ringstad

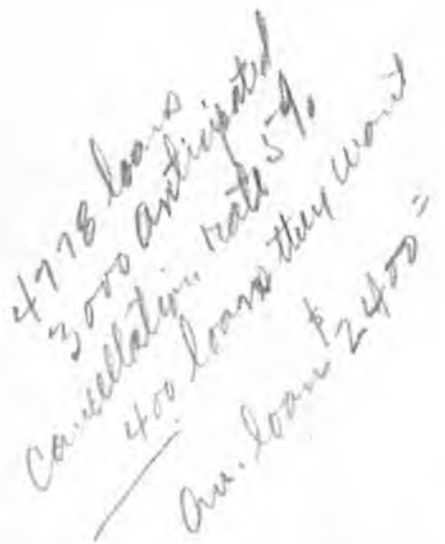
Alaska Student Loan Critique from Counselor Point of View:

1. Counselors have not been kept properly appraised of changes in the loan program. For example, the federal insurance requirement was not made apparent until applications were received.

2. The federal insurance requirement which mandates that students must seek intitutional verification of loan is a hassle. The outside institutions could care less regarding the timelines for processing and thus students are denied priority status. Also, some institutions (Oregon State University, for one) demanded that a student file their institutional financial aid forms before verifying the loan application for Alaska.

3. We have serious questions regarding the statement by loan administrators that staffing or lack of staffing is the problem for processing the loans in a timely fashion. In one case, a student filed an addendum for loan due to a change in college in the month of July and the loan has yet to be received at the college (November).

4. Is it possible that the loan program is lost in a multitude of concerns of the Post-secondary Commission? Would it be feasible to operate the program as an independent "business"?



5. Why does the administrative office send so few applications to schools and why is it not possible to zerox copies. The color-coding excuse hardly seems logical if the system provides for a organized maintenance of records.

6. Counselors need workshops to inform us of changes.

7. Repayment provisions should be spelled out in an organized manner and be disseminated with the applications.

8. How are the senior surveys being utilized? We devote much time and effort to seeing that this process is done and receive little or no feedback on how the statistics are put to use.

9. What can we do as practicing counselors to get our message across at the state level? We care about the future of our kids and want to provide the best information possible.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This funding would allow loan processing to begin early in t : Spring thereby distributing the work load over a larger number of months. This would accomplisy two objectives:

1. Loans would be processed more timely and students will receive money on time.

2. Staff need for 4.0 temporary employees for peak periods would be reduced to 2.0.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Benefits would be provided to approximately 1,050 medically needy persons who are blind, disabled or over 60 but have income exceeding the need standards for the APA program. Based on the cost of data processing time, approximately $70,000 would be needed to process these additional cases. Based on approved staffing requirements, approximately 5 new positions would be required in field offices around the state, and one new administrative position would be required to provide program support to administer this new program.

Medical Assistance (gen. relief assistance)

SENATE BILL NO. 320, by the Rules Committee by request of the Legislative Council (for the Interim Committee on Services for the Elderly). Amends eligibility requirements for general relief assistance (AS 47.25.120) by adding: "(2) an aged, blind or disabled person who does not receive a payment under the old age assistance program..., the aid to the blind program ..., or the aid to the permanently and totally disabled program ... because the person's income exceeds the income standards of those programs, but who has incurred medical expenses which equal or exceed the difference between the person's monthly income and the income standard applicable to him under a program for which he would otherwise qualify." Provides Act effective July 1, 1980.

POSITION PAPER/Department of Health & Social Services

Addendum to Position Paper
on Senate Bill No. 320

Senate Bill 320 proposes to create a medically needy program under the state-funded General Relief Medical Assistance program administered by the Department of Health & Social Services through the Division of Public Assistance. As written, the bill would extend coverage to persons in Alaska who meet the categorical definitions of eligibility contained in Alaska statute for the Adult Public Assistance (APA) program for the aged, blind, and disabled, but who have income that exceeds the established need standards for the APA program. Senate Bill 321 proposes to create the same program using state-federal funding under the Medicaid Program.

Research by the Department into the income limits of Medicaid medically needy coverage has disclosed that federal statute requires the state to use the AFDC need standard as the base line from which the 133 1/3% medically needy income standard is established. Because the AFDC need standard in Alaska is extremely low compared to the APA need standard, a Medicaid medically needy program in Alaska would be required to have a need standard below the existing APA need standards (see chart below).

Household	AFDC	APA	Medicaid MN Limit
1 Person		$355/ $414	$466.55
2 Adults		$502/ $608	$466.55
1 Adult/ 1 Child	$350		$466.55

POSITION PAPER/Department of Health & Social Services

The Department proposes that the bill be amended to set the need standard for medically needy coverage at 133 1/3% of the APA need standard for a comparably situated indevidual or family. In addition, the Department proposes that the bill be amended to lower the eligibility limit for the need category under the medically needy program to individuals age 60 or older rather than 65 or older as is the limit under the categorical assistance program. The chart below indicates the income levels under the present APA program and under the proposed medically needy program and what they will be in fiscal year 1981 based on the projected 13% cost-of-living increase. To be eligible under the medically needy program, persons would be required to have countable income at or below the standard, or would be required to show that they have incurred medical expenses which require them to spend a portion of their income down to the need standard, with the State paying for the remainder of their covered medical expenses.

	FY 80	
Household	APA	MN (133 1/3%)
1 Person	$335/ $414	$447/ $552
2 Adults	$502/ $608	$669/ $810
	FY 81	
1 Person	$379/ $468	$505/ $624
2 Adults	$567/ $687	$756/ $916

The Department supports in concept SB 320 with the proposed amendments.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
SENATE BILLS 320 AND 321

"An Act authorizing state medical assistance payments under the program of general relief assistance for persons who are 'medically needy'; and providing for an effective date."

"An Act authorizing Medicaid-reimbursable assistance payments for persons who are 'medically needy'; and providing for an effective date."

Senate Bill 320 and Senate Bill 321 would establish a medically needy program for persons who meet all the eligibility requirements for cash assistance to the aged, blind or disabled, except that their countable income exceeds the applicable cash assistance need standard. Medically needy would allow eligible persons to use a portion of their excess income to meet their medical need by spending down to the cash assistance need standard. After they have made payment the medically needy program would provide the remaining coverage necessary.

The Department is awaiting financial data on medically needy programs in other states in an effort to put together a fiscal note for this legislation. While the bills approach the question of medically needy coverage only for aged, blind or disabled persons, the fiscal note will also present information that will include medically needy coverage for persons who meet all AFDC eligibility requirements except income. Half of the required information has arrived and a fiscal note is being prepared. Preliminary analysis has shown that this program will cost in excess of $1 million.

Initial contact with federal staff indicates they will not authorize 50% federal financial participation under Medicaid unless the medically needy program includes coverage of the existing AFDC category as well as the aged, blind, and disabled categories. This federal position appears supported by the federal regulations but not by the federal statutes creating the Medicaid program. If the Department of Health, Education, and Welfare is unwilling to provide financial participation for a medically needy program that does not include AFDC coverage, it may be less costly to the State to include the AFDC category (because of the 50% federal financial participation) than to have a state only medically needy program limited to aged, blind, and disabled persons. Because of the question concerning federal financial participation, both bills would be needed to assure some type of medically needy program may be created.

Two identified gaps exist between the current Medicaid and Catastrophic Illness programs. First the Catastrophic Illness program has a minimum deductible or $1,000 per illness making it impossible for many people to receive coverage for minor cost illnesses, catastrophic or otherwise, when their income exceeds the existing income limits for Medicaid coverage. Second, the catastrophic illness program has largely excluded

POSITION PAPER/Department of Health & Social Services

nursing home coverage. Several persons whose income exceeds the income limits for Medicaid coverage are being covered on a special exception basis under general relief-medical (GR-Med) simply because there is no other coverage available to meet their high medical costs. This coverage then depletes the funds available for other persons eligible to receive GR-Med coverage. A medically needy program would provided additional coverage in these two areas.

The Department does not oppose the addition of a medically needy program which covers the aged, blind, and disabled categories, however, we must oppose passage of S.B. 320 and S.B. 321 as implemented would require substantial funding increases to the Governor's Budget and such a change has not been approved by the Governor's Budget and Management Division or the Budget Review Committee.

SB 32 D COVERAGE FOR THE MEDICALLY NEEDY

In the history of mankind, this is the first generation of extended longevity. Dr. Robert Butler, gerontologist, Director of the National Institute on Aging, has stated that this over-65 generation can expect to live to be from 125 to 150 years. For those who retired at 65, this means that they will live on a fixed income for one-third to one-half of their lives. With inflation, the dollars saved for old age, wither to 35¢ or less.

In 15 years, health costs for the aging have increased 500%. Lower-middle-income aging persons with increased medical bills are rapidly becoming paupers. Becoming a pauper, or an indigent person, not only reduces the person to full dependency upon government, but it also reduces the feeling of self worth and creates a feeling of failure. For Older Alaskans, this is devastating. They feel that they lose control over their own lives. They ask themselves "How long will this last?". Suicide is a way out, especially for older men who protected their wives and provided for them.

I recommend the passage of this bill

Re: Testimony for Committee Hearings
January 28, 1980
Senate Bills 320, 321, & 322

Dear Senator Hackney:

SB 320 and SB 321

The "medically needy" of the State of Alaska are in great need of the relieff that these two bills would provide by broadening income standards. We see, on a frequent basis, dignity being destroyed and families broken as individuals slightly over-income attempt to cope with the increasing costs of catastrophic illness. Legislation providing for the financial gaps in health care has long been needed. We commend the Interim Committee on Services on the Elderly for identifying this as a priority need.

SB 322

We wish to express our strong support for the concept of payment to certain institutions and agencies for Medicaid-eligible persons on the basis of prospectively determined rates. We believe that a "prospective rate" system in the State of Alaska would greatly enhance the quality of care available for a cost-effective dollar. The consequences of this bill are far reaching and of a major importance to the future of health care in this state. Detailed comments on this proposed legislation will be provided to you in the near future. I regret that this is not available to you at this time, but we do want to provide you with accurate and careful consideration on the details of this bill, while at this time expressing our firm conviction that "prospective rates" can be an appropriate solution to a crucial problem.

Respectfully yours,

Dr. Helen Beirne, Commissioner
Department of Health & Social Services
Pouch H-01
Juneau, Alaska 99811

Dear Dr. Beirne:

This is in response to a January 4, 1980, letter from Ms. Deborah Behr of your staff. Ms. Behr's letter requested our review and comments regarding three proposals scheduled to be presented to the current session of the Alaska legislature. This letter contains our comments regarding two drafts of Senate bills, identified as Work Orders (WO) #7522 and #7531.

WO #7522 proposes a Medicaid funded medically needy program for those who would be cash recipients under the State Supplementary Payments (SSP) program except for the level of their income.

Federal regulations at 42 CFR 435.310(a) require that states which provide medically needy coverage include coverage to families and children.

Therefore, WO #7522 would not comply with requirements of 42 CFR 435.310(a).

In addition, any medically needy program must utilize requirements of 42 CFR, Part 435, Subpart I in determining financial eligibility of medically needy individuals.

WO #7531 proposes a state-only funded medically needy program for those who would be cash recipients under the Alaska SSP program except for the level of their income.

Since no federal funds would be involved in such a program, it is beyond our role to comment on the technical correctness of that

If we can be of further assistance in either of the above discussed areas, please contact Mr. Ken Call at (206) 442-0506.

Sincerely,

Albert J. Benz
Regional Medicaid Director

ISSUES RAISED/ANCHORAGE PUBLIC HEARINGS

1. Duplication and overlap of services/comprehensive state policy
2. Residential care in rural Alaska
3. Audits of aging grants
4. State and federal expenditures on aging
5. Lack of information on aging programs/single agency/reorganization
6. People falling through the cracks
7. Outreach workers
8. Long-term care coverage: (1) Medicaid; (2) Medicare; (3) private companies
9. Senior housing
10. In-home services/homemakers
11. Paperwork
12. Operational funds for senior centers
13. Local control of aging programs
14. Anchorage Pioneers' Home addition/longevity bonus
15. State match for Office on Aging
16. Appropriations for rural services
17. Catastrophic relief
18. Senior day care
19. Property tax exemption

Summary of Public Hearing/Anchorage September 10, 1979

The following is an edited version of comments made at the public hearing. The tapes containing the complete testimony are available through the committee office in Juneau, or through the Legislative Council.

PRESENT

The hearing was called to order at 1:30pm by Sen. Pat Rodey, chairman of the committee. All 11 members of the committee were present. Also in attendence were 104 participants (see attachment).

Rodey explained the purpose of the committee, and then allowed each member of the committee to introduce him/herself.

HEALTH AND SOCIAL SERVICES

Helen Beirne, commissioner of Health and Social Services, was the first to testify. She explained that her department has long been interested in coming up with alternative forms of care for the aging, and that a study completed some 18 months ago revealed that there are, in fact, a number of examples of duplication and overlap in the provision of services. She said she was "delighted" that the legislature had created this committee.

Allen Korhonen, deputy commissioner of Health and Social Services, gave a slide presentation explaining the programs for the elderly presently operated by the department (see exhibit #17). He cited the need for a "consistent policy on services to the aging", particularly in view of the changing needs since many of the programs were first established. He also mentioned that the department was failing to provide equivalent residential care in rural Alaska compared to urban Alaska.

ADMINISTRATION

Bill McMurtry, manager of the Anchorage Pioneers' Home, testified regarding programs operated by the Department of Administration: Pioneers' Homes and Longevity Bonus. The latter started in 1973 as an incentive to keep the older Alaskans from moving outside. In June, 1979, there were 7,353 recipients at a total cost of $13,607,000. He said the program would continue to increase until 1984, when it would start to taper off due to the requirement for 25 years of residency beginning before statehood. (EDITOR'S NOTE: This is inaccurate. Theoretically, the last persons to be eligible to claim longevity bonus payments would be those who were born on Jan. 2, 1959, in Alaska. Those persons - if they lived to be 100 years old - could still be collecting payments in the year 2059. In fact, the "tapering off" will not take place until the year 2005, by which time the number of recipients will be nearly double the number today.)

The total budget for the Pioneers' Homes is $10,800,400, he said. That is for four homes with a residency of approximately 500, with beds of approximately 520. Started in 1913 in Sitka, he said the program was designed for pioneers 65 years or older who have lived in the state for 15 years, with a physical or financial need to be admitted to the Pioneers' Home, and stay there until he decides to move or passes on.

COMMUNITY AND REGIONAL AFFAIRS

Louise Crane and LaDonna Brown, from the Department of Community and Regional Affairs, were next to testify. Crane told of the housing program which grew out of a $7.5 million bond issue passed in 1976. Approximately $1.7 million still remains. The money was used to provide about 400 units of senior citizens' housing in 28 Alaskan communities. Designed to maxi-

mize the leverage of federal dollars, the program requires the person to spend no more than one-quarter of their income on housing. Brown testified about the property tax and renters' eqivalency program (see exhibit # 2).

Lloyd Robinson, a planner with the Department of Public Transportation/ Public Facilities, testified next about the single program for the aging run by DOT/PF: UMPTA. (See exhibit #8.) This completed the presentations by the administration. DOT/PF

Regarding a question from Rodey about accountability of grants' program, Helen Bierne said all of the grants are audited regularly by - in some cases - all three levels of government. The specific process enacted for those programs under the Office on Aging, according to Danny Plotnick, director, is "We require each grantee to submit both a monthly narrative report and a quarterly financial report. In addition to these, we require each grantee to perform annually - and not less than once every two years - a complete aduit report on their own." AUDITS

"Our audits are not as program- and performance-oriented, at the present time, as they should be. We're interested in that the money gets to the place it's going, if it's spent in the way they said they were going to spend it in the grant. And we would like to think that we are going to get better performance audits in the future." This from Commisioner Bierne.

In response to a question from the audience, Korhonen said the Office on Aging is presently funded 95 percent by the federal government and five percent by the state. Discussion ensued about the need to provide accurate figures broken down by federal and state appropriations for all aging programs. OFFICE ON AGING

In response to a question from Bill O'Connor, Plotnick said, in comparison to offices on aging in other states, Alaska gets the minimum amount because the allocations are based on population of elderly; we, of course, have the smallest number in the nation.

In response to a question from Margaret Mitchell regarding the dental grant appropriated by the legislature, he explained that $25,000 was granted to the Southcentral Dental Society, on a one-time basis, "to provide a pilot demonstration program for needy elderly persons in the Anchorage area." DENTAL GRANT

Doris Southall questioned whether the $1.2 million under winterization was all for seniors. Louise Crane answered it is for all low-income people in Alaska. Anchorage uses about 40 percent of its money on elderly; from a budget of approximately $350,000. The rest of the money is administered by RuralCap. Some boroughs are not part of the program, e.g. Mat-Su Borough. WINTERIZATION

Hazel Heath asked how a senior citizen is supposed to find out about these programs. Ted Drahn responded that "as long as significant resources for older people are largely from the federal government, I think that it tends to operate in a way to take responsibility off of state and local governments." He added that the resources for getting the information out come largely through the 22 programs being supported by the Older Americans Act. LACK OF INFORMATI

"One of the things that this points up is that we have no central way in this state of consolidating information about old people. That was one of the reasons why this committee came into existence. There is no single agency in state government that has responsibility for the development of policy toward aging." Heath added that the problem is in how the information "filters down" to the person in the local community. SINGLE AGENCY

Sen. Glenn Hackney asked Commissioner Bierne if she saw the need for a division on the elderly with Health and Social Services. She said, "Right now, in our division of Social Services, we have Adult Protective Services. There's very little funding coming through our Adult Protective Services; most of it's going through the Office of Aging. I would see no problem whatsoever - and I think it would be better coordinated - if there was indeed within that division, a section or a subdivision of Adult Protective Services and Child Protective Services." She added that a division on elderly would be all right, but her concern is "when you call elderly 65 and older, then we have a large gap of people who are not being served between 21 and 65. But, if we could make arrangements so that we are not doing a disservice to the other age groups, I would say a Division on Aging - Adult Protective Services - whatever one would wish to call it, would be commendable."

She said that Adult Protective Services means development of "levels of care". In response to another question, she said, "I don't think we're being innovative enough in our Office of Aging. I think we are getting federal money, and we're following federal criteria. In order to become innovative, we do have to spend state money. If you're going to call the Division on Aging or Elderly, or Adult Protective Services something from 21 on up, then we would get into a much broader-scope difinition - which I would like to see so we're taking care of all the people." She agreed that if we do have a state policy on aging, it would be "to appropriate a minimum amount of state funds in order to get an optimum amount of federal funds." ADULT PROTECTIVE SERVICES

Edna Adrian commented at this time that senior citizens programs are too often the first ones cut by the Department of Health and Social Services.

From questioning, it was revealed that persons who want additional information about any of the individual programs should write to the appropriate department for details.

Lennie Kapuscinski, from the Anchorage Salvation Army, spoke of additional needs of that organization: parking, more space and more money. SALVATION ARMY

Virginia Blanchard, a resident of the Anchorage Pioneers' Home, was next to testify. She is 73-years old. She criticized the committee for the building in which the hearing was conducted (APU Student Center) because of the numerous steps both inside and outside the building. She criticized the flyer distributed by the committee: "I think this has been badly put together. Number one, they left off the name of one of the committee members - which was an oversight. Number two, it doesn't give the proper information, it has mixed up state and federal monies." She asked to have the flyer repreparec accurately differentiate between state and federal. She also asked tc ge figures on Pioneers' Homes broken down by debt

service on each facility. She also wanted the flyer to show the offsets, for example, money paid by residents of the homes. She questioned the amount of money appropriated for the Kotzebue Senior Center. She questioned the absence of any mention in the handout prepared by the Department of Health and Social Services of aging programs relating to drug abuse, a problem she cited as serious. She praised the Pioneers' Home in Anchorage.

REORGANIZATION

She said she would be opposed to putting all the aging programs under Health and Social Services. She favors keeping Pioneers' Homes and the Longevity Bonuse under Administration. She did say, however, that the Office on Aging should become a division. She also said, "I am opposed to direct appropriations that should be under the department in their program, and aren't."

FIXED INCOME

Doris Southall, a member of the Governor's Advisory Committee on Aging from Fairbanks, testified next. Her greatest concern is for people on moderate or fixed income. "They do not come under subsidized rent, food stamps, welfare, Social Security Supplement or Medicaid." She said these are "proud people" who want to stay in their own homes; the state needs to do more for them. She said that Medicare is of little value. Only retired state employees and teachers have good insurance coverage, she said. She also criticized the private companies. She also lamented the fact that senior housing, particularly in Fairbanks, is not restricted solely to seniors (handicapped are included).

OUTREACH WORKERS

Regarding the income limitations on the winterization program, she said if the federal government puts the limitations on, then perhaps the state government should get involved. Outreach workers are the key persons in the aging network, she said, because "they see more people every year than any of us."

SENIOR HOUSING

Dove Kull spoke up here in support of Mrs. Southall's statements, and cited her experience with senior housing in Juneau in which the citizens there were successful in getting an increase in allowable income. She also mentioned the state housing committee which is supposedly looking into the possibility of foundation funding for senior housing. She urged all seniors to work together.

WILLS

Betty Warren, chairperson for the Governor's Advisory Committee on Aging, testified next. She cited the problems that seniors have with wills. She stressed the importance of having a will before you pass away. She also stressed the importance of keeping people in their own homes, and said she supports additional funding for programs aimed at that. Much discussion ensued regarding wills, and Ted Drahn urged the people present to consider community colleges as a resource for help with wills.

IN-HOME CARE

Regarding in-home care, Dove Kull spoke of the need to refund home nursing, and to add the component of health to homemakers.

PAPERWORK

Hanna Miller, director of the senior program in Nome, spoke next. She has been working there for five years, and laments the increasingly heavy burden of paperwork. This is a particular problem fo Natives, many of whom have not had much schooling. She cited a problem with homemakers - not enough personnel. She asked for help in that area, as well as for a new senior center. Senior centers need funding sources too, for operation. She added that she is grateful for the help already provided by the state.

She also mentioned the need for more services to help people stay in their own homes.

John Hauser, an administrator for Health Care Services, Alaska Inc., testified next. Because of his experience in the nursing home business, he has seen many proud people forced into welfare because of the high cost of institutional care. Consequently, he said, "My personal feeling is anti-institutionalization of people." He added that he supports the state providing home support services. He said he would submit written testimony. He cited the apparent differing policies between Administration and Health and Social Services - the former supporting institutionalization and the latter, deinstitutionalization. He called for a single policy, and he favors keeping people in their own homes. INSTITUIONALIZATION

He said, "As far as I'm concerned Medicare is a lousy insurance policy. It pays halfway decent in the hospital setting, halfway decent in the outpatient setting, but lousy in the nursing home situation. Less than three percent of the people that are put into nursing homes in the nation, qualify for Medicare." He said many studies have shown that Medicare is not cost-justifiable. Other problems he mentioned with Medicare are: limits in the number of physician visits per month, the limits on the amount of treatment per month. Because many people who enter nursing homes have no one to represent them, he sees the need for the state to consider "some good guardianship legislation, or else have some legal services available." He said his corporation has had no success with community colleges or Legal Services. MEDICARE GUARDIANSHIP

He mentioned the proposed regulations about to go into effect on the Medicaid program, and said they might be appropriate for the lower 48, but were unsatisfactory here. He spoke in favor of additional senior centers, particularly a mechanism for funding operating services. MEDICAID SENIOR CENTER

On a question from Sen. Glenn Hackney, Hauser said the total cost for the three facilities they own averaged out to $101/day - that includes three different levels of care.

Bill McMurtry spoke up from the audience at this point to say, "I'd like to go on record for the Department of Administration: we are 100 percent in favor of the home care program. He said the average age of the people in the Pioneers' Home is 80-years old. On a question from Jewel Jones, he said that approximately 10 percent of the people presently in the Anchorage home wouldn't be there if there were better home services. ADMINISTRATION

Dennis Murray, director of the senior programs in Kodiak, testified next. He submitted written testimony from the board in Kodiak. It cites as the first priority need: the state should recognize that the best way to deliver services is at the local community level, and to do that, a multi-purpose senior center is probably the most viable means. To that end, he said, the state needs to develop a state policy supporting that. He cited the problems faced by programs like his which are supported entirely by diminishing federal dollars. He opposes using political clout as a basis for funding; a policy would be better. LOCAL CONTROL

The second priority is for better consolidation and coordination in the delivery of services. The third priority is for more and less expensive long-term care alternatives. He cited the case of a man from Kodiak who in six and a half months spent $26,000 in the Kodiak and Anchorage facility. He said Pioneers' Home was not an alternative in this case because he was terminally ill. "In my opinion, in my community, the best use of aging funds, is not to build another facility, but to appropriately utilize the one we have." There are 14 elderly presently in the Kodiak long-term care facility; 11 of them qualify as Pioneers. All are Medicaid-sponsored. Regarding homemakers, he stressed that Kodiak wants local control. He also submitted a resolution from the Kodiak Island Borough Health Resources Advisory Committee which urged the committee to introduce legislation "to authorize and provide sufficient funding for the decentralized home health care program, which will allow local areas to receive funding and provide such services,"

COORDINATION

Harold Maxwell, a resident of the Anchorage Pioneers' Home, spoke next. He praised the Pioneers' Home program as the best in the country. Regarding a nursing home adjacent to the present home, he said, "That is as it should be. It's a place where those who have entered the Pioneers' Home with the idea of their remaining years among friends, that they would be able to be near those friends when they approach the dying time." He favors immediate construction of the $7.5 million facility.

ANCHORAGE PIONEERS' HOME

Bruce Kovarik, the division comptroller for the Salvation Army, testified next about Salvation Army programs. He said the funding for his program comes from the federal government through the Office on Aging. Additional sources are contributions from participants of the programs, and money from within the Salvation Army network. He also cited local in-kind contributions and volunteer hours. He recommended that state tax dollars be used to help programs like the Salvation Army. He also urged the state to do a better job getting out information about what is available, and to communicate more with other states about better ways to provide services. He spoke against increased limitations on local programs. Regarding residential care, he informed the committee that, effective 7/1/79, the Salvation Army closed its Palmer-Susitna residence, which did not receive state support for its operation. He said it was closed because it did not have enough business. "Purely and simply, we closed because we could not compete with the Pioneers' Homes and the subsidized programs in the rest of the state. We only charged $390/month for our senior residents, and provided room and board. Just as short as two years ago, that program was full with 21 seniors who wanted to be there." He added, "I hope that the committee will be aware that there are other means besides state, federal or local tax dollars, for accomplishing a given end.

SALVATION ARMY

RESIDENTIAL CARE

Regarding audits, he said many programs do independent audits on their own, as well as state and federal programs. He said audit exceptions are common, and that's a problem. They need to know what risks are involved in assuming state or federal programs. He praised the committee, urged state funding for the Office on Aging, praised them, and asked for an Anchorage office for the Office on Aging.

AUDITS

Bob Lohr, executive director for the Upper Tanana Development Corporation in Tok, testified next. He described the programs he runs in

their region - transportation, meals, homemakers (through CETA) - and said funding does indeed need to be differentiated between federal and state. "Rural Alaskans, especially Alaska Natives, have totally inadequate access to services for the elderly." One of the reasons for this he cited as federal regulations which don't apply to rural Alaska. That's why he thinks it's so important to consider state funding - because state dollars do not come under the "unreasonable federal restrictions". RURAL ALASKA

Additional problems he cited as:

* inadequate funding for programs for the elderly;
* lack of coordination in delivery mechanisms (supports a division on aging - provided there is sensitivity to rural problems); based on the record, he said, Community and Regional Affairs and the Governor's Office would be most appropriate. REORGANIZATION

He suggested that the state match - dollar for dollar - federal funds received in the state through the Office on Aging. He said that doubling of resources would still only meet "between 20-33 percent of the present need." He praised the homemakers program, but asked for additional funds for it. He also said that in the provision of any services to rural Alaska, Native corporations have proven to be the most efficient, and future funding should come through them. He added that his corporation receives about $300,000 through different programs. to serve about 100 elderly. STATE MATCH NATIVE CORPORATIONS

Next to testify was Bill O'Connor of the Salvation Army. Regarding the proposed senior center in Anchorage, he noted that Salvation Army would like to be a sponsor of the center. His concerns relate to the lack of planning, the lack of a needs assessment, and the lack of input by local Native organizations. He wondered where the operational monies for the center would come from. ANCHORAGE MULTI-PURPOSE SENIOR CITIZENS' CENTER

Edna Adrian, a member of the Mayor's Commission on Senior Citizens in Anchorage, was next to testify. She stated her support for the statements of Bob Lohr, particularly in the area of local control. She praised the efforts of the Easter Seals Society, but said "there is no way this program should be statewide." Her first priority is in-home support services. She also criticized the breakdown on the committee flyer. She cited the need for an Area Agency on Aging office in Anchorage so "we would be able to go to bat for ourselves." She is opposed to duplication of services, which she said does exist. She said there is too much money going into nursing homes in the area. She favors ICF and congregate living, but is appalled at the state paying for empty beds in nursing homes. She also said that Catastrophic relief under Medical Relief is inadequate. Additionally, she agreed with earlier comments about the need to take care of people who fall through the cracks. LOCAL CONTROL IN-HOME CARE AREA AGENCY ON AGIN NURSING HOMES

Chuck Mundorff, the consultant on aging for the Anchorage Community Mental Health Center, testified next. According to his experience, the greatest needs are with mental health problems relating to social isolation. He also cited the need for a comprehensive policy on aging on the state level for better coordination. He mentioned a commission on aging as an alternative. He spoke in favor of the homemakers program, and a day-care program for seniors. He said three big reasons why seniors like to stay in their own homes are: ISOLATION

* self determination

* retain a sense of autonomy
* continue traditional roles in familiar environment

RECOMMENDATIONS

He also recommended funding through the Office on Aging to operate multi-purpose senior centers around the state. Similarly, he advocated state match for the Office on Aging, "especially to help in the employment of seniors". Lastly, he urged the use of Title XX monies for senior day-care centers - funding which he said occurs in other states.

HOMEMAKERS' PROGRAM

On a question from Sen. Hackney regarding the specific needs for additional homemaker support, he said, even more important than additional funds is provision of consistent reliable service. He also mentioned that he sees two or three families a week in need of homemaker services. He said it would probably make good administrative sense to create an umbrella agency to oversee homemakers and home health programs. Art Holmberg noted that last year, the division of social services was forced to lapse over $200,000 in homemaker funds because of the inability of the service provider (Alaska Federation of Natives) to provide that service in the rural areas. He didn't anticipate that problem with Easter Seals.

RED CROSS

Pat Bonney and Jerry Ivey from the Red Cross spoke next. They mentioned that the Red Cross runs a home nursing program. The funds come from CETA. The local program is modeled after a national Red Cross program. There are 15 volunteer instructors.

CENTER FOR GERONTOLOGY

Chuck Hines testified next to inform the committee of a proposal submitted by Alaska Pacific University to establish a Center for Gerontology in Anchorage. The center would provide the means for people to receive academic credit in the area of aging; it would also provide training opportunities for the many agencies involved with services for the aging.

PROTECTIVE SERVICE

John Thomas, a 40-year Alaskan resident, spoke next. He mentioned the need for protective services for persons incapable of taking care of their own money. Regarding the Longevity Bonus, he suggested paying for that program from the interest of the Permanent Fund. He also recommended adding $50/month to the present $150/month. He spoke of the need for more employment opportunities for seniors.

PROPERTY TAX EXEMPTION

Waldo and Ruby Coyle spoke next on the property tax exemption program administered by the Department of Community and Regional Affairs. Mrs. Coyle said C&RA has put a limit on that program to only five acres. She said their whole homestead was exempt in 1977 and 1978, the first two years they were eligible. However, in 1979, only five acres were exempt. She said she received a letter from C&RA at the time stating their policy of only exempting one acre inside boroughs and five outside. She said this is at variance with state statutes, though apparently efforts are underway to change the administrative regulations in that regard to place that restriction into effect officially. The Administrative Regulations Review Committee recommended against that change, however, because it doesn't relate to state law.

Florence Orr testified to say that people who stay in their own homes need recreational activities, and she hopes that the committee will support continued funding for the Caverly Senior Center which provides these services. RECREATION

Ed Dodd, chairman of the Pioneers' Home Advisory Board, testified next. He questioned the delay on the Anchorage addition. He said once the 75-bed addition is completed, the cost of operating will come to $1,020,000 per year - a figure he compared to the $3,500 000 he said it would cost for equivalent care in private nursing homes. He criticized the Kotzebue Senior Center, noting that his advisory committee advised against it because of the extreme cost. He also criticized the cost and quality of care at Nakoyia. ANCHORAGE PIONEERS HOME ADDITION

Poldine Carlo mentioned here that Natives in the villages also don't like to leave their own homes, but appreciate it when they have a facility in their own community - like in Kotzebue - to which they can go when they need to.

Lorena Showers closed the hearing by speaking of the need for the multi-purpose senior center in Anchorage.

The Anchorage members of the committee reconvened the hearing three days later, on September 14, to receive additional comments from the project directors under the Office on Aging, many of whom were unable to attend the earlier meeting. Their testimony follows.

Dennis Murray presented written testimony prepared by the project directors urging more state support for in-home services (see exhibit #9).

Beth Bishop with the Southeast Nutrition program urged the state to match federal monies through the Office on Aging. She said many local communities in southeast don't have any local money to use for that purpose. Priorities would depend on local communities, but if the state made some additional money available, much more of what is presently being provided could be offered.

Loretta French, from the Chugiak Senior Center, spoke next. She explained their program, and cited the need for operational funds for the senior centers. She stressed she meant program monies. SENIOR CENTERS

Doris Southall added that she would support a bill which would allow seniors receiving the Longevity Bonus to go outside for longer periods of time and still receive payments. She also said she would support cost-of-living increases for retired teachers and state employees. LONGEVITY BONUS

Ellen Evans of Bethel testified that the biggest problem in Southwest Alaska is the lack of home health care. She said, "There is nothing." She added that Natives need an alternative, in times of need, to going to the Alaska Native Hospital in Anchorage. HOME HEALTH CARE

BY THE RULES COMMITTEE BY REQUEST OF THE LEGISLATIVE COUNCIL (for the Interim Committee on Services for the Elderly)

IN THE SENATE

PROPOSED COMMITTEE SUBSTITUTE
SENATE BILL NO. 320

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An act authorizing state medical assistance payments under the program of general relief assistance for persons who are 'medically needy'; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

*Section 1. AS 47.25.120 is amended to read:

Sec. 47.25.120. ELIGIBILITY FOR ASSISTANCE. Financial assistance may be given under AS 47.25.120 - 47.25.300 [, SO FAR AS PRACTICABLE UNDER THE CONDITIONS IN THIS STATE,] to

(1) a needy person who is eligible under the regulations of the department; and

(2) an aged, blind or disabled person who does not receive a payment under the old age assistance program (AS 47.25.610) the aid to the blind program (AS 47.25.620 - 47.25 780), or the aid to the permanently and totally disabled program (AS 47.25.790 - 47.25.970) because the person's income exceeds the income standards of those programs, but who has incurred medical expenses which equal or exceed the difference between the person's monthly income and 133 1/3% off the income standard under one of these programs.

*Section 2. AS 47.25.300 is amended by adding a new paragraph to read:

(5) "aged" means a person who is age 60 or older.

*Section 3. This Act takes effect July 1, 1980.

Per Bettie

SB 320

Suggested draft Language

(3) A person aged 60 ~~to 64~~ who meets all the requirements under the Old Age Assistance program (AS 47.25.610) except as to, but does not received a payment because the person's income ~~is~~ income exceeds the income standard of that program, but who has incurred medical expenses which equal or exceed the difference between the person's monthly income and 133 1/3 % of the income standard under that program

Undecided

Section 2. This Act takes effect July 1, 1980

IN THE SENATE

SENATE BILL NO. 320

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act authorizing state medical assistance payments under the program of general relief assistance for persons who are 'medically needy'; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Secion 1. AS 47.25.120 is amended to read:

Sec. 47.25.120. ELIGIBILITY FOR ASSISTANCE. Financial assistance may be given under AS 47.25.120 - 47.25.300 [, SO FAR AS PRACTICABLE UNDER THE CONDITIONS IN THIS STATE,] to

(1) a needy person who is eligible under the regulations of the department; and

(2) an aged, blind or disabled person who does not receive a payment under the old age assistance program (AS 47.25.430 - 47.25.610), the aid to the blind program (AS 47.25.620 - 47.25.780), or the aid to the permanently and totally disabled program (AS 47.25.790 - 47.25.970) because the person's income exceeds the income standards of those programs, but who has incurred medical expenses which equal or exceed the difference between the person's monthly income and the income standard applicable to him under a program for which he would otherwise qualify.

* Sec. 2. This Act takes effect July 1, 1980.

Dear Dr. Beirne:

This is in response to a January 4, 1980, letter from Ms. Deborah Behr of your staff. Ms. Behr's letter requested our review and comments regarding three proposals scheduled to be presented to the current session of the Alaska legislature. This letter contains our comments regarding two drafts of Senate bills, identified as Work Orders (WO) #7522 and #7531.

WO #7522 proposes a Medicaid funded medically needy program for those who would be cash recipients under the State Supplementary Payments (SSP) program except for the level of their income.

Federal regulations at 42 CFR 435.310(a) require that states which provide medically needy coverage include coverage to families and children.

Therefore, WO #7522 would not comply with requirements of 42 CFR 435.310(a).

In addition, any medically needy program must utilize requirements of 42 CFR, Part 435, Subpart I in determining financial eligibility of medically needy individuals.

WO #7531 proposes a state-only funded medically needy program for those who would be cash recipients under the Alaska SSP program except for the level of their income.

Since no federal funds would be involved in such a program, it is beyond our role to comment on the technical correctness of that

If we can be of further assistance in either of the above discussed areas, please contact Mr. Ken Call at (206) 442-0506.

Sincerely,

Albert J. Benz
Regional Medicaid Director

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
SENATE BILLS 320 AND 321

"An Act authorizing state medical assistance payments under the program of general relief assistance for persons who are 'medically needy'; and providing for an effective date."

"An Act authorizing Medicaid-reimbursable assistance payments for persons who are 'medically needy ; and providing for an effective date."

Senate Bill 320 and Senate Bill 321 would establish a medically needy program for persons who meet all the eligibility requirements for cash assistance to the aged, blind or disabled, except that their countable income exceeds the applicable cash assistance need standard. Medically needy would allow eligible persons to use a portion of their excess income to meet their medical need by spending down to the cash assistance need standard. After they have made payment the medically needy program would provide the remaining coverage necessary.

The Department is awaiting financial data on medically needy programs in other states in an effort to put together a fiscal note for this legislation. While the bills approach the question of medically needy coverage only for aged, blind or disabled persons, the fiscal note will also present information that will include medically needy coverage for persons who meet all AFDC eligibility requirements except income. Half of the required information has arrived and a fiscal note is being prepared. Preliminary analysis has shown that this program will cost in excess of $1 million.

Initial contact with federal staff indicates they will not authorize 50% federal financial participation under Medicaid unless the medically needy program includes coverage of the existing AFDC category as well as the aged, blind, and disabled categories. This federal position appears supported by the federal regulations but not by the federal statutes creating the Medicaid program. If the Department of Health, Education, and Welfare is unwilling to provide financial participation for a medically needy program that does not include AFDC coverage, it may be less costly to the State to include the AFDC category (because of the 50% federal financial participation) than to have a state only medically needy program limited to aged, blind, and disabled persons. Because of the question concerning federal financial participation, both bills would be needed to assure some type of medically needy program may be created.

Two identified gaps exist between the current Medicaid and Catastrophic Illness programs. First the Catastrophic Illness program has a minimum deductible or $1,000 per illness making it impossible for many people to receive coverage for minor cost illnesses, catastrophic or otherwise, when their income exceeds the existing income limits for Medicaid coverage. Second, the catastrophic illness program has largely excluded

POSITION PAPER/Department of Health & Social Services

nursing home coverage. Several persons whose income exceeds the income limits for Medicaid coverage are being covered on a special exception basis under general relief-medical (GR-Med) simply because there is no other coverage available to meet their high medical costs. This coverage then depletes the funds available for other persons eligible to receive GR-Med coverage. A medically needy program would provided additional coverage in these two areas.

The Department does not oppose the addition of a medically needy program which covers the aged, blind, and disabled categories, however, we must oppose passage of S.B. 320 and S.B. 321 as implemented would require substantial funding increases to the Governor's Budget and such a change has not been approved by the Governor's Budget and Management Division or the Budget Review Committee.

MEDICALLY NEEDY COVERAGE UNDER MEDICAID

321

Under federal laws the Medicaid program has the flexibility to provide medical coverage for individuals whose income exceeds the present limits of the Adult Public Assistance (APA) program. Coverage may be provided by the State of Alaska by amending AS 47.07.020 to allow for payment of medical services on behalf of medically needy aged, blind, and disabled Alaskans. Although the medically needy program also may be used to extend Medicaid coverage under AFDC, it is most urgently needed for persons who are ineligible for APA coverage due to excess income.

If an individual's countable income exceeds the current need standard under the APA program, they are not eligible for Medicaid regardless of the cost of their medical need. Cases are encountered almost daily by the Division of Public Assistance where an applicant has an identifiable medical need but their income exceeds the need standard. Under current program limitations, these persons must be denied and they will have to meet their own medical needs. In some instances they may be eligible for the state funded Catastrophic Illness program. In a few instances, where the individual has been institutionalized, the Commissioner of the Department of Health and Social Services has been forced to waive the income limitations under the state funded General Relief Medical program in order to provide financial assistance for extremely expensive on-going medical needs. In one case alone, the Division has paid almost $4000 per month using GRM funds for nursing home care provided to a comatose patient for over two years, simply because his income from Social Security exceeds the income limitation by less than $100 per month! A medically needy program would allow an individual's excess income to be applied to their cost of care with Medicaid covering the balance.

By establishing a medically needy program under Medicaid for aged, blind, and disabled Alaskans, the State would accomplish three purposes:

1. Individuals with on-going medical needs would not have to choose between necessary health care and heating their homes or buying groceries.

2. Individuals with severe health care problems requiring home care, extended hospitalization, or nursing home care would not have to sell their homes in order to pay their medical expenses.

3. Individuals requiring long term care at home or in a nursing home would not have to choose between staying in Alaska or going outside just because the cost of care in Alaska is higher than in other states.

The creation of a medically needy program would take some pressure off of GRM and Catastrophic Illness, two programs that are already facing potential revenue shortages in attempting to meet the cost of medical care for needy Alaskans. Any funding for a medically needy program for the aged, blind, or disabled would be in addition to those already available. The major difference between a medically needy program under Medicaid and any similar proposal is that 50% federal funding is available to provide for the coverage and to meet the costs of administering the program.

Re: Testimony for Committee Hearings
January 28, 1980
Senate Bills 320, 321, & 322

Dear Senator Hackney:

SB 320 and SB 321

The "medically needy" of the State of Alaska are in great need of the relieff that these two bills would provide by broadening income standards. We see, on a frequent basis, dignity being destroyed and families broken as individuals slightly over-income attempt to cope with the increasing costs of catastrophic illness. Legislation providing for the financial gaps in health care has long been needed. We commend the Interim Committee on Services on the Elderly for identifying this as a priority need.

SB 322

We wish to express our strong support for the concept of payment to certain institutions and agencies for Medicaid-eligible persons on the basis of prospectively determined rates. We believe that a "prospective rate" system in the State of Alaska would greatly enhance the quality of care available for a cost-effective dollar. The consequences of this bill are far reaching and of a major importance to the future of health care in this state. Detailed comments on this proposed legislation will be provided to you in the near future. I regret that this is not available to you at this time, but we do want to provide you with accurate and careful consideration on the details of this bill, while at this time expressing our firm conviction that "prospective rates" can be an appropriate solution to a crucial problem.

Respectfully yours,

January 25, 1980

Senator Glenn Hackney
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

Careful consideration has been given to the following proposed legislative bills and we would appreciate at this time providing you and your committee with the following comments, which we hope will be of value in your considerations.

S.B. #308 - ASHA Endorses

S.B. #309 - ASHA Endorses

S.B. #320 - ASHA (Qualified) Endorsement

Presently lacks specific definition of eligibility defining "medically needy".

S.B. #321 - ASHA (Qualified) Endorsement

Increasing the number of eligible claims paid under the state medicaid program, which is unable to keep up with those presently eligible, may compound an already less than satisfactory system. This bill also does not speak to the eligibility of family members of those who would be elibible under this proposal.

S.B. #322 - ASHA (Unqualified) Opposition

The question that needs to be asked is, the basis on which this bill would be justified. A review of the data contained on pages (4&5) of the 1980 ASHA Cost Containment Report shows:

1. Alaska has the smallest number of licensed beds per 1000/population.

2. Alaska has the smallest number of admissions per 1000/population.

3. Alaska has the highest per capita income in the nation.

4. Alaska has the lowest hospital expense per capita as per cent of per capita income.

5. Alaska hospital expenses per admission is within $6.00 of the national average, and is lower than all but one of the states which now have a "perspective hospital reimbursement rate control program".

WHY DOES ALASKA NEED A PERSPECTIVE REIMBURSEMENT PROGRAM SINCE WE LEAD THE NATION IN THE SHORTEST LENGTH OF STAY AND APPROXIMATE THE NATIONAL AVERAGE ON EXPENSE PER ADMISSION?

If such legislation is passed, particularly this bill, we would ask, "who would determine and how would the determination of a fair rate for the reasonable costs" be calculated. What type of interim adjustments would be allowed during the reimbursement period for our present inflation? Would the prospective rate be by type of service? cost per patient day? by occupied beds? regionally or state wide rate? etc. There appear to be a number of unanswered questions at this time.

Colorado had a rate control program and has just resinded that law. New York has just completed a study which indicates that 25% of hospital cost can be attributed to government regulations. We feel that voluntary cost containment is a better way to accomplish this control.

Due to the question of need for this type of legislation and the information obtained from other states concerning ineffectiveness and costs, we recommend that action on this bill be deferred until a greater analysis of the information supporting its need or justification is presented.

S.B. #323 - ASHA (Qualified) Endorsement

As written, this is a blank check authorization, we recommend that stated monitary guidelines be incorporated in the bill by program or catagory of service. How the program will administer these funds should also be spelled out.

Thank you for consideration of our comments, and if we can be of further service by presenting supporting data or testimony, please contact us at your convience.

Sincerely,

Max Kersbergen

SENATE BILL No.322 - "PROSPECTIVE RE-IMBURSEMENT"

Bartlett Memorial Hospital supports the intent of the bill. Prospective reimbursement negotiations would give both the State and the health care facility some concrete figures for budgeting.

However, this is an extremely complex issue that requires an orderly well planned program. Since October 1977, hospitals have been working with HEW's Health Care Financing Administration on the System for hospital Uniform Reporting (SHUR). This has evolved into the Annual Hospital Report (AHR) and it is hoped that this proposal will be accepted. (see attached excerpt)

UNIFORM REPORTING: All health care facilities must be set-up on a uniform data base. The above mentioned AHR should be the keystone for this procedure. We recommend that the State of Alaska utilize one of the major national accounting firms for this step. This outside agent should be mutually agreed upon by the hospitals and the State.

This cost should not be passed on to the hospital's patients; it should be borne by the State of Alaska.

RATE NEGOTAITION: Concurrently, have a national accounting firm (the same or another) establish a procedure for prospective rate setting. Subject procedure to be arrived at mutually with the hospitals. Place this procedure into effect after the data base year has been completed.

RATE APPEALS: Utilize a national accounting firm as an arbitrator on all appeals. This will preclude the need for an expensive rate commission and eliminate more bureaucracy.

SENATE BILL No. 322 - PROSPECTIVE RE-IMBURSEMT (con'd)

PROPOSED TIME SCHEDULE:

1st Year - set-up the reporting system
2nd Year - establish one year data base
3rd Year - negotiate rate

Every additional cost must be passed on to the patient or third party payor. Containment of cost is our goal - new legislation/rules must be cost effective for all concerned. I will assist in any way to provide information to your committee.

James R Burns

JAMES R. BURNS, ADMINISTRATOR

Kaple: New report "dramatically" changed from SHUR

The Annual Hospital Report (AHR) is a "dramatically changed document" from the proposal it replaces — SHUR, the System for Hospital Uniform Reporting — and takes into account the hospital industry's concerns about cost and burden.

Kaple

This is the opinion of James M. Kaple, Ph.D., acting director of the Office of Research, Demonstrations and Statistics of the Health Care Financing Administration (HCFA).

Kaple noted, however, that "the one issue the industry raised and we disagreed upon and therefore have not changed is the linkage of uniform reporting and reimbursement."

"We clearly believe," he said, "that the data contained in the new Annual Hospital Report is that on which to base reimbursement decisions. It does not make sense, in my opinion, to put in place two reporting systems — one to gather uniform reporting data and another upon which to base reimbursement decisions.

Data for reimbursement purposes

"Furthermore, Congress tended to believe that this data should be linked and used for reimbursement purposes. In fact, the General Accounting Office (GAO) studied our implementation approach to Section 19 of P.L. 93-641. GAO's conclusion, presented in testimony, was that Congress did intend the use of this information for reimbursement purposes.

"Nevertheless, we have made a lot of changes, which are clearly responsive to the industry's request that the burden be reduced and the cost of collecting the data and maintaining it be reduced."

Kaple, noting the controversy that the SHUR proposal generated in 1979, said that "we have changed a great number of the reporting requirements that were contained in the original system — with an eye on reducing the burden on hospitals filling out the report and reducing the cost of maintaining and reporting the information."

"The resulting Annual Hospital Report," he explained, "takes into account virtually all of the specific comments on ways to reduce the reporting burden that were generated by the industry. There were one or two issues in which there were compromises. But, basically, we took the industry's recommendations on most of the burden and cost reduction issues."

Kaple commented:

"The Annual Hospital Report will become the cost information upon which reimbursement will be predicated for the federal programs. It will be an integral part of our operating program. The purpose of the report is to collect uniform, operable cost and utilization information for our operating programs. It has been developed in such a way that it also should provide information for other parts of the department and other users at the state and local levels. This was done purposely in an effort to try to reduce the redundant reporting burden that hospitals now face from various segments of the third party payor industry and other regulators.

HCFA to collect data

"We, for example, will be collecting the facility data through the Annual Hospital Report as opposed to having a separate system managed by the National Center for Health Statistics.

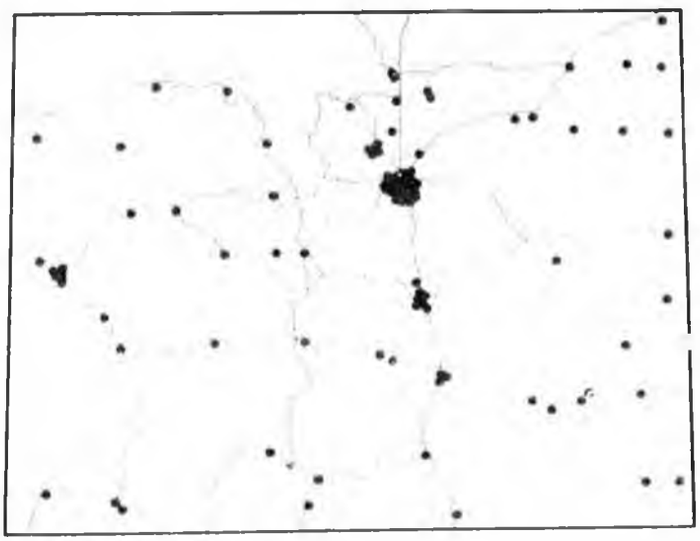
"We also will be supplying information to planners from this report on the range of services and the utilization of service by institutions in their areas. Again, this will preclude the necessity of developing new reporting systems specifically to support those activities.

"Internally, this report will, for the first time, provide us with a comparable uniform data base on which to analyze trends and costs in the hospital industry. We will be working directly with the fiscal intermediaries to bring the Annual Hospital Report data, possibly in summary form, into the central office for policy review and analysis and to support decisions on these programs within the Administration."

Kaple says there probably will be no increase in the size of his division's present staff to handle the report data.

"In the long run," he noted, "there may be some cost savings through the introduction of a uniform reporting system at the source of the data. We will use fiscal intermediaries to manage and reduce the data. Our early discussions with Blue Cross and certain other intermediaries suggest that receiving the data in the uniform form probably will permit management of the information with no net increase in personnel at the intermediary level. In the central office, we will be receiving the data in machinery that will actually expedite our collection and management of the information." □

Deregulation:
A Report from Colorado Hospitals



Printed on 100% Recycled Text

We are the 105 Colorado hospitals employing 40,000 people and caring for more than 460,000 patients each year.

These facts distinguish us from a "national average," much as Colorado distinguishes itself from the rest of the nation by its natural resources and quality of life.

Quality health care is available in Colorado, yet the cost of the average hospital stay in Colorado is still 6.3% below the rest of the nation, even as Denver's Consumer Price Index (CPI) climbed to 8% above the national CPI.

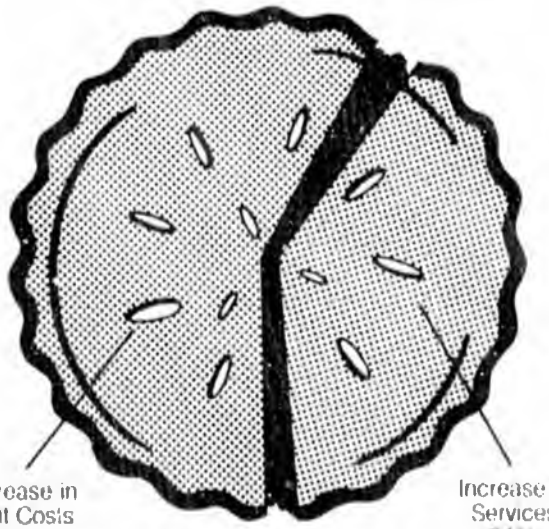
The purpose of this report is to present the facts about hospital costs in Colorado and to describe the internal and

U.S. AND DENVER CONSUMER PRICE INDEX (1967 = 100)

CUMULATIVE % INCREASE TOTAL HOSPITAL EXPENSES

Colorado hospitals are proud that our costs are 6.8% below the national average, even as Denver's CPI climbed to 8% above the national CPI. This leveling-off trend in hospital expenses started a full two years before the Commission began reviewing budgets. During the period CHC has been in operation, costs in Colorado have closely paralleled the national average, indicating no measurable impact by the Commission.



external forces that have brought us to this point. We will trace the recent history of voluntary cost containment efforts and hospital cost regulation to provide the information needed to make decisions about the quality, cost and availability of health care in the 1980's. We will make the following points:

1. Other than general inflation, improved quality and availability of care is the main reason for the increase in hospital costs.
2. Colorado hospitals have led the effort to contain health care costs long before the rush to regulation.
3. The responsibility and accountability of hospitals to their communities for the quality, cost and availability of health care must remain with the local representatives on Boards of Trustees.
4. The Colorado Hospital Commission failed, practically and philosophically.
5. Nationwide, the hospital industry's own "Voluntary Effort" to contain health care costs is working.

Where it all started. The first hospitals were charitable institutions where people went to die. Care was simple and mortality high. Health professionals, as we know them today, did not exist. The average "hospital" stay lasted several weeks and cost less than $5 per day.

By the early 1900's scientifically-educated physicians and trained nurses were providing increasingly effective care, and some insurance companies were writing policies that covered hospital care. Most people, when they could afford to, were still paying their own hospital bills.

The Causes of Hospital Expense Increases

Total Hospital Expenses = Unit Costs × Growth

- Labor Costs
- Prices of Goods Hospitals Purchase
- Capital Expenditures
- Expanded Regulations
- Quality Changes
- Population Growth
- Aging Population
- Technology
- Expansion of Coverage
  - Government Programs
  - Private Insurance
- Growth of Real Income
- Specialization

External factors, ranging from inflation to increased demand for services, have greatly contributed to the increase in hospital expenses.

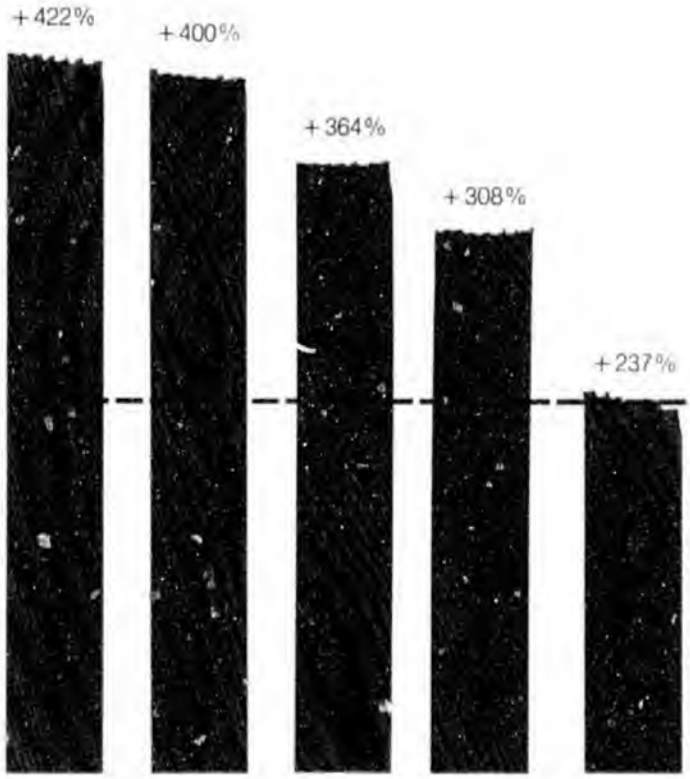
In the 1930's hospital reimbursement plans were introduced, providing hospitalization coverage for many patients who would have otherwise been unable to afford hospital care. After World War II, medical science gave us wonder drugs, new equipment and advanced surgical methods. Better quality medicine cost more, but insurance paid for more hospital care. With more people demanding hospital care, and with more effective treatments available, "reimbursement" from "third-party-payors" became more complex.

Under contracts with Blue Cross, hospitals were reimbursed based on **costs,** while other insurance carriers and private patients paid **charges.** Because insurors guaranteed prompt, full payment, hospitals allowed them discounts. Thus began a system of different levels of payment for the same service. Cost-based reimbursement system provided no incentive for holding down costs since hospitals and physicians were paid retrospectively for whatever they spent.

In fact, these cost-based payment mechanisms were used in Medicare and Medicaid programs to encourage growth and spending as a means of promoting wider availability and improved quality of health care.

In 50 years the effectiveness of medical treatment grew, the availability of services grew, the demand for health care grew and so did costs. Everything grew and everyone called it progress.

Why costs went up. With the advent of the government insurance programs, Medicare and Medicaid, in the mid-1960's, the rise in health care costs began to exceed general inflation. The causes can be grouped into four broad categories:



- ☐ Increased demand for services
- ☐ General inflation
- ☐ Government regulation
- ☐ More effective care

Demand created an intensive period of growth for the whole health industry. One third of the total increase in hospital costs is due to increased demand for services. In 1955, America's hospitals admitted 21 million patients — in 1975, 36 million. In the same period outpatient visits increased from 126 million to 255 million annually. Under Hill-Burton financing, the federal government encouraged communities to build or renovate 60 hospitals in Colorado. More people, with greater access to health care and more comprehensive insurance coverage, demanded more hospital services.

Simple **inflation** accounts for more than 50% of the increases in hospital costs. Supplies, services and staff cost more each year. Malpractice insurance rates have risen 450% over the last 5 years. Salaries and benefits (60% of total hospital expenditures) have increased rapidly to catch up with other industries.

Regulation, bureaucracy and "red tape" have added significantly to the cost of health care. In the last 15 years, Medicare, Medicaid, EEOC, NLRB, OSHA and Fair Labor Practices contributed to rising expenses. A New York study identified 164 agencies regulating hospitals. Compliance with these regulations costs $40 per patient day. The list on page 10 shows the agencies and regulations that affect hospitals in Colorado. Last year HEW alone issued almost 600 new or proposed health-related regulations. At the same time the Colorado Hospital Commission was requiring hospitals to submit up to 100 pages of budget information.

Hospital care is more effective, more available and of higher quality than ten years ago, yet the cost of the average hospital stay has not increased nearly as much as the cost of government

Rising hospital costs also reflect more **effective care** resulting from new treatments and technology. Because these improvements cure diseases, save lives and speed recovery, hospital care today cannot be realistically compared to 50, 25 or even 10 years ago. Intensive care units save 100,000 lives a year. The heart attack recovery rate has gone from under 50% in 1946 to over 85% today. Twenty-five years ago x-ray therapy, chemotherapy, hemodialysis and many orthopedic and

surgical procedures did not even exist. Health care costs more today than it did in 1940, but during that same period, life expectancy rose from age 63 to 72½ years.

In the 1960's the Great Society could afford guns, butter and men on the moon. Health care quality and availability increased substantially and no one counted costs. In the 1970's, the nation's outlook shifted to conservation, accountability and allocation of scarce resources. The last ten years have given us tremendous medical advances and the highest quality of health care in the world.

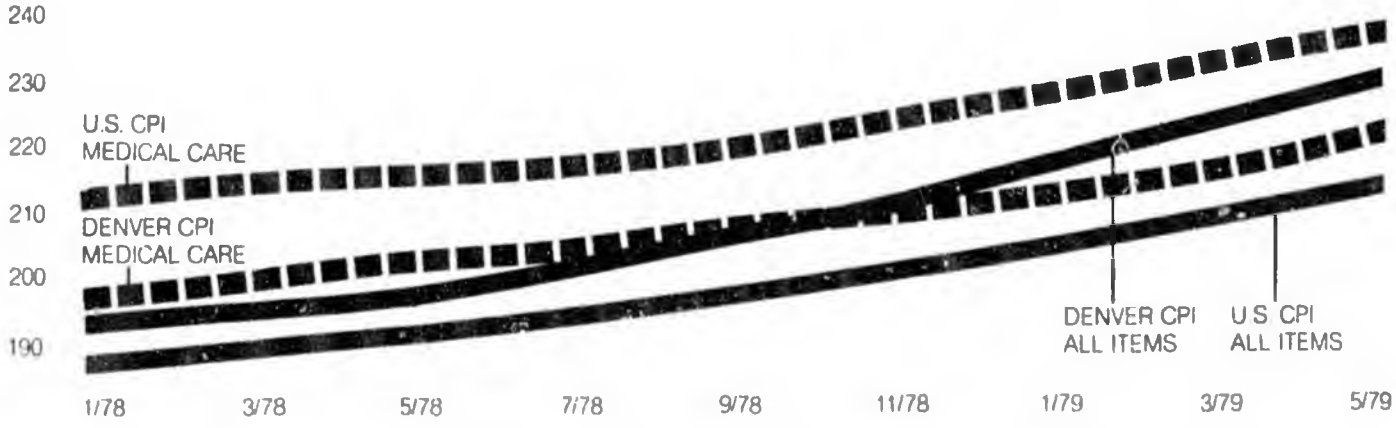
What happened in Colorado.

Early in the 1970's, Colorado hospitals became increasingly involved in cost containment measures. Hospital management introduced more effective systems and developed a wide range of cooperative programs, such as group purchasing, combined data processing and other shared services. Colorado hospitals also became more involved in the legislative process, developing the 1973 prospective reimbursement legislation. This law created a pilot project which successfully demonstrated the cost savings incentives of a prospective payment system and provided a basis for developing a uniform accounting and reporting system. In 1975 and 1976 the Colorado legislature considered hospital rate review systems, but ultimately rejected them. Colorado hospitals actively opposed these early measures because they were poorly drafted and certain to undermine the quality and availability of health care.

By 1977, several hospital cost containment bills had been proposed nationally. However, Colorado hospitals were already working with former State Representative Frank Traylor (R-Jefferson Co.) to draft a bill for Colorado that would address issues without sacrificing local control over the quality and availability of care. These efforts resulted in HB 1582, which a majority of Colorado hospitals supported. The act provided for three commissioners to prospectively review

hospital budgets, to approve the level of charges for each institution, and to provide for more equitable payment by all third-party-payors. HB 1582 was signed into law in July, 1977, and the Colorado Hospital Commission began its work in October.

The optimism of both hospitals and legislators was ultimately proved wrong. Within one year it became clear to many legislators that the Commission had become a perfect example of ill-advised, bureaucracy-ridden rules and regulations. Frustration with this system finally prompted legislators to seek repeal of the Commission. The legislation (SB-38) was introduced in January, 1979, by Colorado Senate President Fred Anderson (R-Loveland), one of the original sponsors of HB 1582.



Hospitals did not initiate the effort to repeal the Commission. Over a full year they had met with the commissioners frequently to suggest constructive changes to make the system work. When these efforts finally proved fruitless, hospitals supported the effort to repeal. Third-party-payors, the Governor's office and several consumer groups opposed the repeal measure. The Senate passed SB-38 quickly by a 2/3 majority. At the request of the Governor, the House added amendments postponing the repeal date to March, 1980,and giving the Governor discretionary power to remove the commissioners. The amended version of SB-38 was passed and signed by the Governor on May 18, 1979, repealing the statute that had created the Colorado Hospital Commission, effective March 1, 1980.

Why the hospital commission failed.

The primary problem with the Colorado Hospital Commission was bureaucracy. From the very beginning, the Commission was counter-productive. It got off to a slow, disorganized start, fell behind and never caught up. It created frustrations by adopting an adversary stance and compounded it with legalistic procedures and arbitrary decisions.

- On the key issue of financial requirements for hospitals, the Commission seemed to act contrary to the intent of the legislation. The rules developed by the Commission allowed for no growth and development funds for hospitals to modernize and replace equipment in the future. Because of Commission actions, some hospitals had to use financial reserves for current operations.
- The Commission's budget review process concentrated on forms — over 40 pages of them. The forms, taken directly from the Maryland rate review system, were complicated, often not applicable, sometimes misleading and occasionally illegible. In some instances the Commission required accounting contrary to generally accepted practice in the hospital industry.
- Rule-making sessions often altered the intent of the law, especially on the issue of payment differentials for third-party-payors. The law decreed that they must be "quantified" to be allowed. No quantification took place.
- The Commission hearings were adversarial and this negative environment discouraged the resolution of substantive issues.
- The Commission created so much paperwork that both hospitals and the Commission staff staggered under the weight.
- After two years of operation, the Commission still had not defined what constituted compliance, nor had it put

U.S./DENVER MEDICAL CARE COSTS

Since January, 1978, the medical care component of the CPI is up 11.9% nationally and 11.5% in Denver. The gap has remained roughly the same, indicating no measurable impact by the Colorado Hospital Commission. The overall Denver CPI increased substantially compared to the rest of the nation.

into place the uniform accounting system the law required.

- Overall, the Commission did little to reduce expenditures, especially when the direct and indirect costs of compliance are calculated.

In the Commission's Report to the Governor, three different methods are used for measuring effectiveness. The three justifications show savings of $28 million, $18 million or $9 million, depending on the method of computation. Detailed examination of the $28 million, the $18 million and the $9 million figures reveals basic fallacies in the arguments and supporting data.

The data available on actual hospital costs shows that Colorado continues to parallel the national trend. The graph on page 3 shows the comparison between Colorado and the rest of the nation for total hospital expenses. The graph above shows the comparison between medical care costs in Denver and the rest of the nation, measured by the Consumer Price Index. Costs began leveling off before the Commission came into being and have shown no measurable deviation from the national (non-regulated) trend since the Commission completed its first cycle of budget reviews.

$28 MILLION?

The Commission uses CPI figures to claim that $28 million was saved as the rate of increase of the Denver CPI medical care cost component dropped below the overall Denver CPI. The graph above shows that medical costs in Colorado have followed the national trend, while the overall Denver CPI has escalated considerably.

$18 MILLION?

The Commission uses rate of increase data from several sources to claim $18 million in savings as the difference between

the level of approved budgets in Colorado and the target of the national Voluntary Effort. Aside from having the wrong data and attempting to compare apples and avocados, review of the actual expenses (shown in graph on page 3) shows no deviation from the national trend.

$9.8 MILLION?

The Commission cites $9.8 million removed from budget submissions as savings, but over $6.3 million of that was in requests for growth and development. The rules on these other financial requirements have since been changed to effectively eliminate the $6.3 million "saved."

No substantial evidence exists to show that the Commission saved any money. Comparisons between Colorado and non-regulated states indicate conformance to the national trend.

The Colorado Hospital Commission failed. On the practical level, it was not worth the paperwork, the bureaucracy and the estimated $1.8 million cost of compliance. Philosophically, it removed the responsibility and accountability from the locally appointed/elected Boards of Trustees, who should be making the community decisions on the quality, cost and availability of health care.

Where do we go from here: local board responsibility.

Among the nine states that have regulated hospital costs, Colorado is the first to repeal a hospital rate review system. This happened two years after the Commission had been voted in with the support of Colorado hospitals. Other states, federal bureaucrats and congressional leaders are watching to see what happens next.

Now that the Legislature has passed SB-38 repealing the Colorado Hospital Commission, Colorado has an opportunity to show that local control, accountability and responsible management can work. Hospital Boards have the authority and the will to make a voluntary approach to cost containment work without undermining the quality and availability of health care in their communities. Certainly local Trustees, elected or appointed from the community, can better judge what the local hospital should provide than governmental bureaucrats in distant capitols.

To assist local hospital Boards, Colorado hospitals are now implementing **InitiatiVE,** a program to monitor, analyze and report health care costs. This system will provide comprehensive management information to individual hospital Boards, and comparative data on similar-sized hospitals, regionally and nationally. Aggregate data on all participating hospitals in Colorado will be compiled quarterly through the Colorado Hospital Association. In coordination with the Colorado Voluntary Effort, this statewide data with national and regional comparisons will provide the public with the facts on health care costs in Colorado. A sample of this quarterly report is on page 10.

Regulatory and bureaucratic efforts to contain hospital costs have failed. The voluntary approach is working nationwide. A reporting system for hospitals that can assist local Boards of Trustees as a management tool and provide the public with aggregate data is the best way to contain costs while preserving local control over the quality and availability of health care in Colorado.

Colorado hospitals fully support the intent of SB-38 as passed by the legislature and signed by the Governor.

Document# 90-80

The Honorable Glenn Hackney
Chairman, Senate HESS Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

In the course of testimony on Senate Bill 312 - State Aid for Service Programs for the Benefit of Older Alaskans - the Committee requested that the Department provide a priority listing for additional state service dollars. The Committee asked that the list be based on broad categories of services in order to allow the proposed Older Alaskans Commission latitude in defining the specific services to be covered.

The Office on Aging in our Department prepared the enclosed priority listing and is available to provide further clarification, if needed. The contact person who coordinated the preparation of the project is Danny Plotnick, who can be reached at 465-4903.

Thank you for allowing us the opportunity to comment on the matter.

Sincerely,

Deborah E. Behr

OFFICE ON AGING PRIORITIES FOR ADDITIONAL SERVICE DOLLARS

- April, 1980 -

Priority	Category of Service	Examples
1	Services to sustain more older persons in the least restrictive home environments	Increased availability of homemaker and home health services; adult day care; home repair
2	Services to fill gaps in health care	Purchase of hearing aids, eyeglasses, dentures; supplementary health screening and maintenance
3	Cost-effective alternatives to traditional nutrition service delivery methods	Bush meal services; shopping services; native and ethnic foods services; special diet services
4	Services to provide economic stability	Additional senior employment job slots; cottage industries
5	Services to increase accessibility to other services	More transportation; expanded and improved information and referral services; more outreach; bush transportation
6	Services to upgrade the knowledge and skills of service deliverers to enable them to provide services more effectively	Service provider staff, board/council, volunteer training; circuit rider training
7	Services to provide social stimulation and combat isolation	More recreational and leisure-time services; visitor services; continuing education
8	Services to help older Alaskans receive public benefits to which they are entitled and resolve legal problems	Legal assistance; public benefits counseling
9	Services to extend lifetime productivity and promote feelings of usefulness	Volunteer programs, such as foster grandparents; continuing education
10	Counseling support	Personal counseling; tax counseling; employment counseling

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

OFFICE OF THE COMMISSIONER

POUCH H 01 – JUNEAU 99811

April 25, 1980

Document# 90-80

The Honorable Glenn Hackney
Chairman, Senate HESS Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

In the course of testimony on Senate Bill 312 - State Aid for Service Programs for the Benefit of Older Alaskans - the Committee requested that the Department provide a priority listing for additional state service dollars. The Committee asked that the list be based on broad categories of services in order to allow the proposed Older Alaskans Commission latitude in defining the specific services to be covered.

The Office on Aging in our Department prepared the enclosed priority listing and is available to provide further clarification, if needed. The contact person who coordinated the preparation of the project is Danny Plotnick, who can be reached at 465-4903.

Thank you for allowing us the opportunity to comment on the matter.

Sincerely,

Deborah E. Behr

Deborah E. Behr
Special Assistant to
the Commissioner

OFFICE ON AGING PRIORITIES FOR ADDITIONAL SERVICE DOLLARS

- April, 1980 -

Priority	Category of Service	Examples
1	Services to sustain more older persons in the least restrictive home environments	Increased availability of homemaker and home health services; adult day care; home repair
2	Services to fill gaps in health care	Purchase of hearing aids, eyeglasses, dentures; supplementary health screening and maintenance
3	Cost-effective alternatives to traditional nutrition service delivery methods	Bush meal services; shopping services; native and ethnic foods services; special diet service:
4	Services to provide economic stability	Additional senior employment job slots; cottage industries
5	Services to increase accessibility to other services	More transportation; expanded and improved information and referral services; more out-reach; bush transportation
6	Services to upgrade the knowledge and skills of service deliverers to enable them to provide services more effectively	Service provider staff, board/council, voluntee training; circuit rider training
7	Services to provide social stimulation and combat isolation	More recreational and leisure-time services; visitor services; continuing education
8	Services to help older Alaskans receive public benefits to which they are entitled and resolve legal problems	Legal assistance; public benefits counseling
9	Services to extend lifetime productivity and promote feelings of usefulness	Volunteer programs, such as foster grandparents continuing education
10	Counseling support	Personal counseling; tax counseling; employ-ment counseling

Chris Beardsley left this memo for you. SB 322

3-19-80
3:05 P.M.

Senator Hackney:

The Alaska State Hospital Assoc. met this MORNING AND PASSED A motion relating to suggested language you could use for a Committee Substitute for SB 322 (re. to prospective rate setting for medicaid/medicare eligible patients). It was unanimously endorsed by all members including the long term care people.

A typed up version of this language will be submitted to you as soon as we can get it to you (probably within a couple of weeks).

A skeleton outline of the language includes:

① A 2½ year study Commission

② Commission membership qualifications will be outlined.

③ although it may not be noted, the intent ~~would~~ probably would be to have the Commission be appointed by the Governor.

④ A suggested funding amount will be indicated (for per diems, transportation, making up of a report and hiring a consultant), however, we would appreciate your guidance and suggestions as to whether the amount is too little or too much.

Thank you for your help & guidance, and should you have any questions, please call me or Al Cannon.

Chris Beardsley

DRAFT

IN THE LEGISLATURE OF THE STATE OF ALASKA ELEVENTH LEGISLATURE - SECOND SESSION.

For an Act entitled: "An Act relating to nursing home care for elderly persons."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section ___. AS 47.25.301

Sec. 47.25.301. PURPOSE. It is declared as a matter of public concern that elderly persons in this state receive necessary quality nursing home care that they need. Certain elderly persons on fixed or low-incomes have been denied access to care because of the inability to pay.

Sec. 47.25.302. ELIGIBLE PERSONS. All residents of the state who are 65 years or older and determined to be needy based on regulations adopted by the department are eligible to receive assistance under this chapter. Eligibility shall be reviewed by the department as frequently as considered necessary.

Sec. 47.25.303. ~~MEDICAL~~ NURSING HOME CARE ASSISTANCE PAYMENTS. The payment and the length of time for which a ~~medical~~ NURSING HOME CARE assistance payment is granted are left to the discretion of the commissioner and may vary from a small sum to an amount not exceeding the existing rate paid under 47.07.010-.080. The commissioner may require the patient and the family to contribute to the cost of care.

~~Sec. 47.25.304. MEDICAL SERVICES TO BE PROVIDED. Medical services to be offered to eligible persons include skilled and intermediate~~

Sec. 47.25.304. MEDICAL SERVICES TO BE PROVIDED. Medical services to be offered to eligible persons include skilled and intermediate nursing home care ONLY.

Sec. 47.25.305. REIMBURSEMENT OF PROVIDERS. According to the provisions of this chapter, the department of health and social services shall reimburse providers of medical care for allowable unpaid costs of skilled or intermediate nursing home care.

VENDOR PAYMENTS

Sec. 47.25.306. CALCULATION OF THE PATIENT'S SHARE. (a) The department shall ~~adjust~~ establish, by regulation, a formula to determine the

patient's share of ~~institutional~~ nursing home care expenses, based on the applicant's annual gross income, number of dependents, amount of assets, and forthcoming third-party payments.

(b) In applying the formula to determine the applicant's share, the total gross income and the total assets of the family of the applicant may be taken into account with the following exceptions:

(1) the applicant's permanent place of abode;

(2) one noncommerical vehicle;

(3) tools, equipment, vehicles and other assets required in a trade of business;

(4) ordinary household and personal effects;

(5) $1,000 of liquid assets;

(6) all nonliquid assets unless such an exclusion would bring about an inequitable result; however, all income derived from such property shall be taken into consideration in determining the recipient's gross income;

(7) inalienable shares in a Native corporation created under the Alaska Native Claims Settlement Act, P.L. 92-203; 43 U.S.C. § 1601 et seq., for the period of their inalienability as specified in the Act;

(8) Alaska longevity bonus payments;

(9) any other assets specifically restricted for the use of the recipient by state or federal law;

(10) assets received by the applicant as a custodian, guardian, conservator, or trustee for another are not considered assets of the custodian, guardian, conservator, or trustee himself.

Sec. 47.25.307. OBTAINING ASSISTANCE BY FRAUD. A person is guilty of a violation of AS 47.25.120 - 47.25.300 if he (1) by a statement, representation, or impersonation which he knows is false or by another fraudulent device, obtains or attempts to obtain or aids or abets another to obtain (A) assistance to which he is not entitled, (B) greater assistance than he is entitled to, or (C) payment of a forfeited ~~grant or~~ allowance; (2) aids and abets in buying or otherwise disposing of the property of the recipient of assistance for the

DRAFT

purpose of avoiding liability for the assistance granted; or (3) gives false or incorrect information, knowing it to be false or incorrect, as part of the procedure to obtain assistance, even if he does not actually obtain or use the assistance.

Sec. 47.25.308. PENALTY FOR VIOLATION. A person who violates a provision of AS 47.25.120 - 47.25.300 is guilty of a misdemeanor, and upon conviction is punishable by a fine of not more than $1,000, or by imprisonment for not more than one year, or by both.

Sec. 47.25.309. DEFINITIONS. In this chapter (1) "applicant" means a person ~~to has suffered a catastrophic illness~~ IS IN NEED OF NURSING HOME CARE and is applying for assistance in this chapter or is the subject of an application for assistance under this chapter;

(2) "commissioner" menas the commissioner of the department of health and social services;

(3) "department" means the department of health and social services;

(4) "family" means two or more persons related by blood or marriage or adoption living as one economic unit;

(5) "liquid assets" means assests which can be readily converted to cash;

(6) "nonliquid assets" means all assets which are not liquid assets;

(7) "permanent place of abode" means a dwelling, or a dwelling unit in a multiple dwelling, including lots and out-buildings or an appropriate portion of these, which are necessary to convenient use of the dwelling unit;

(8) "provider" means a licensed hospital, skilled nursing home, or intermediate care facility, ~~providing skilled or intermediate care needs which has provided services not excluded by AS 47.08.050 to an applicant;~~

(9) "third-party payments" means payments of medical expenses related ~~to a catastrophic illness~~ by sources other than the nursing home care

DRAFT

the applicant or the ~~committee~~ chapter, including but not limited to state and federal medical assistance programs, private health insurance, employment-related health insurance, military health insurance, workmen's compensation, violent crimes compensation, Indian Health Service of the United State Department of Health, Education, and Welfare, and awards in legal actions.

SB322 Prospective Reimbursement

The hospitals don't want this bill --- Nursing homes do.

Rod Betit explained line 13 mentioned in position paper. Hospitals & etc. use
The words intermediate and skilled- by adding "skilled we spell it out for them.
Good IDEA He further mentioned that you had stated you might favor a CS and eliminate hospitals???????Max Kersbergen, executive director of Alaska State Hospital Assn. along with members thereof will be in Juneau March 17th,18th and 19th. They have left their afternoons open should you schedule this bill on any of days mention ed..

Let me know that I can advise them.

Last meeting we had on this Bill was Jan.28th at which time we also had SB 320, SB321 and the minutes reveal that YOU said quote "We are treating these three bills more or less in the same package. Actually the first two are, I think it's safe to say, and either/or type of situation. Either we take one concept or the other. One being that the Sate of Alaska pays and the other being that the federal government pays half the money. I think that that's something we are going to have to work out philosophically as to whether we think it's worth the $500,000 or whatever to get the federal government involved.."

Our agenda reveals SB 320 and SB321 scheduled for March 17th. Do you wan't to add SB322 inasmuch as Alaska State Hospital Association will be here. March 17th is a Monday, the 19th is a Wednesday and these members will still be here in Juneau sooooo you have your choice as to whether you desire to have 3 bills of this type on one day or hold SB322 until Wed. the 19th.

INTRODUCTION OF BILLS (Senate)(cont'd)

Medicaid Reimbursable Payments

SENATE BILL NO. 322, by the Rules Committee by request of the Legislative Council (for the Interim Committee on Services for the Elderly. Repeals and re-enacts AS 47.07.070 regarding medicaid reimbursable payments to providers of health care. States payments to institutions for medicaid-eligible persons shall be made on the basis of a "prospective determination of fair rates for the reasonable costs of services rendered...." Provides Act effective July 1, 1980.

Introduced January 15 and referred to HE&SS and Finance.

Dear Senator Hackney:

I am writing to indicate an opportunity for the Alaska State Hospital Association members to provide direct testimony on S.B. 322, during the spring meeting scheduled in Juneau on March 17-19. We have left our afternoons open for legislative availability, therefore, if your committee has questions or wished to have direct provider input we would gladly make any necessary arrangements.

You already have our position paper, however, we would offer still further testimony if you feel it would be meaningful.

Sincerely,

Max Kersbergen

Re: Testimony for Committee Hearings
January 28, 1980
Senate Bills 320, 321, & 322

Dear Senator Hackney:

SB 320 and SB 321

The "medically needy" of the State of Alaska are in great need of the relieff that these two bills would provide by broadening income standards. We see, on a frequent basis, dignity being destroyed and families broken as individuals slightly over-income attempt to cope with the increasing costs of catastrophic illness. Legislation providing for the financial gaps in health care has long been needed. We commend the Interim Committee on Services on the Elderly for identifying this as a priority need.

SB 322

We wish to express our strong support for the concept of payment to certain institutions and agencies for Medicaid-eligible persons on the basis of prospectively determined rates. We believe that a "prospective rate" system in the State of Alaska would greatly enhance the quality of care available for a cost-effective dollar. The consequences of this bill are far reaching and of a major importance to the future of health care in this state. Detailed comments on this proposed legislation will be provided to you in the near future. I regret that this is not available to you at this time, but we do want to provide you with accurate and careful consideration on the details of this bill, while at this time expressing our firm conviction that "prospective rates" can be an appropriate solution to a crucial problem.

Respectfully yours,

DRAFT

POSITION PAPER
ON
SENATE BILL 322
HOUSE BILL 612

"An Act authorizing payment for services provided by certain institutions and agencies to Medicaid-eligible persons on the basis of prospectively determined rates; and providing for an effective date."

Senate Bill 322 and House Bill 612 would require that Medicaid reimbursement for services provided by hospitals, long term care facilities, and home health agencies be based on a prospective determination of reimbursement.

Under the present State and Federal statutory language, such reimbursement is permissive.

The Department of Health and Social Services supports the concept of prospective determination of reimbursement. Major benefits of such a program are:

could be either prospective/retro

1.) Standardization of Health facilities Reporting and Budgeting.

2.) Centralization of hospital operational data.

pro-prospective

3.) Reimbursement based on budgeted costs instead of historical cost settlements.

4.) Concurrent communication between the Department and health facilities manager.

5.) Billing and Payment simplification based on pre-negotiated reimbursement.

While Senate Bill 322 or House Bill 612 would authorize, if passed, a prospective reimbursement system, however, it does not provide for the implementation of a Unform Reporting Budgeting System which is paramont to the development of an efficient prospective reimbursement system.

After a historical review of prospective reimbursement programs, in other states, it was determined that propective reimbursement requires basic provider education, technically qualified experienced staffing, and a systematic approach to operations.

Historical review also shows that it takes approximately two-three years to develop an effective uniform data base which provides for informed decisions in determining reimbursement.

In accordance with our agreement with the Senate Health Education Social Services committee hearing on January 28, 1980, the following alternative proposal to Senate Bill 322 has been developed.

The development of these alternatives have been in consultation with the Alaska State Hospital Association and Long Term Care Division, Health Service, Incorporated, a Proprietary Nursing Home Corporation in Alaska, and the Department of Health and Social Services.

Alternative #1: Tableing of both bills and the passage following resolution:

BE IT RESOLVED BY THE SENATE:

WHEREAS; The current systems for the payment of services provided by health facilities have become cumbersome, and unnecessarily complicated, and

WHEREAS; The cost of providing care has increased due to the administrative support involved in maintaining these systems, and

WHEREAS; The State costs for monitoring and administrating these cumbersome and complicated systems has increased, and

WHEREAS; The Alaska Legislature, State of Alaska, and the Health Care Industry wishes to limit escalating costs for non-patient related services, and

WHEREAS; A State and Federally approved system for Hea th Facility Uniform Reporting and Budgeting (S.U.R) would provide a solution, and

WHEREAS; a uniform system of prospective rate negotiation and reimbursement would assist in reducing non-patient service costs; therefore

BE IT RESOLVED that the Alaska Legislature provide funding for the establishment of an Alaska System for Health Facilities Uniform Reporting and Budgeting using the National Manual on Systems for Uniform Reporting as a guide, and

FURTHER RESOLVED that this system, once developed be accepted by the Federal government and State of Alaska as the system for all health facilities in the State of Alaska; and

FURTHER RESOLVED that the Alaska Legislature establish and fund a committee composed of representatives from the State Department of Health and Social Services, U.S. Department of Health and Welfare, and Alaska State Hospital Association, and Long Term Care Division to develop proposed legislation which would establish a uniform system for prospective rate negotiation and reimbursement in the State of Alaska, and

February 1, 1980

Senator Glen Hackney
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator:

Recently I received a copy of Senate Bill 322 which is an act authorizing payment for services provided by certain institutions and agencies to Medicaid eligible persons on the basis of prospectively determined rates and providing for an effective date.

As I am sure you are aware, hopsitals in the State of Alaska are currently being reimbursed on a cost basis as it relates to the Medicaid program. Some hospitals feel that the costs which Medicaid recognizes does not include the full cost of services. Since this mechanism is set up through the Federal Medicaid/Medicare regulations, the state has very little ability to change these.

As my understanding goes, the purpose of a prospective rate determination is for the distinct advantage of having hospitals lower their length of stay and/or occupancy rate. Fairbanks currently has a length of stay of less than four days while the national average is approximately 7.5. In addition, Fairbanks Memorial Hospital currently boasts a bed per thousand ratio of approximately 2.3, whereas the national average is 4.5. These are two main reasons why Senate Bill 322 should not be passed. In addition, the bill is very unclear as to who will determine a "fair rate or reasonable costs of services rendered". It is my impression that what Medicaid is attempting to do is to pay the hospitals less than their actual costs which they are receiving at the present time. In addition, it would be interesting to know the definition of reasonable costs of services which is located in paragraph 070 of the proposed legislation.

We at Fairbanks Memorial Hospital strongly oppose Senate Bill 322 for the reasons listed above and many reasons for which are not outlined here due to lengthy explanations which would be required to explain the prospective reimbursement system.

On another matter we at Fairbanks Memorial Hospital are having severe nursing shortage problems, and since we are the only hospital in the area we have severe staffing problems especially when several of our nursing service personnel are picked for jury duty. We would be interested to see if you, as a legislator, could get the statute amended to exclude registered nurses in addition to teachers, etc. We feel that this is not unreasonable since these professionals play a very key part in the functioning of an acute care hospital.

Sincerely,

Tom Mingen
Administrator

RE: Senate Bill No. 322
Prospective Rate-Setting

Dear Senator Hackney:

Thank you for providing St. Ann's Nursing Home this opportunity to express its views on Senate Bill No. 322 relating to prospectively determined rates of reimbursement for care provided to Medicaid-eligible patients.

We readily understand the concern of the legislature concerning ever escalating costs to the taxpayer, and the very urgent need to put a lid on purchases of whatever kind. However, we are also concerned that prospectively determined rate-setting will, of itself, add to the cost push of this inflationary cycle. The Department of Health and Social Services has, in their position paper, given testimony to the need for development of an effective data base to provide information for informed decisions in determining reimbursement, and they show that it takes two to three years to achieve this readiness to start!

In our view, the Senate Bill No. 322 has significant short-comings. It says payment shall be made on the basis of a prospectively determined fair rate for reasonable costs, but fails to say who will determine what the fair rate is. It includes payment for patient care, without defining which of our patients' every-day needs are included in this designation of patient care. It leaves the whole field of determining the details of legislation open, presumably for some regulatory body to determine either with or without consultation of the providers that will be regulated. With such open-ended legilsation, I would hope to see appeal processes spelled out in great detail.

As we at St. Ann's understand the proposal for Prospective Rate-Setting, all costs of patient-care, including the ancillary charges for Physiotherapy and Occupational Therapy, as well as drugs and supplies would be included in the rate

assigned as fair reimbursement. Since the above services are totally unpredictable, there is a clear danger that we would be forced to budget our costs aggressively in order to be sure that we could break even. This would clearly cause a precipitous jump in the cost to the state of doing Medicaid business. The alternative would be to specifically exempt such unpredictable costs and retrospectively reimburse at year-end, a situation that would completely negate the purpose of this bill.

Another possibility does exist, one that any concerned citizen would have to reject out-of-hand, and that is the possibility of reducing the level of care given to the patients by such a margin as to maintain the current cost level. Clearly, no provider is willing to take such measures, and we are convinced the legislature would condemn this method of cost containment.

It is our understanding that an alternative has been proposed that would involve only the free-standing nursing homes. This nursing home does not support that stand. St. Ann's Nursing Home has been in business just two and a quarter years, is still growing, and hopes to attain eighty percent census late this year. It can be seen that prospective costing would be a serious impediment to our doing business, in that we have not yet acquired sufficient data base to forcast with any great deal of accuracy.

We do understand that such a method of budgeting would have immediate advantages to the proprietory sector of the nursing home business. In the proprietory sector, it would be a distinct advantage to be able to show a predictable profit in case of negotiations to borrow funds, or to sell, or even to market stock or securities. Therefore, we offer as yet another alternative, the possibility that the proprietory sector of the Skilled and Intermediate Care Nursing Home industry be subject to prospective rate-setting for a developmental period.

Sincerely,
ST. ANN'S NURSING HOME

Options for State Only Medical Assistance Program
for Medically Needy

DRAFT

I. Who should be eligible for the program?

a. All medically needy (including intact families, single adults, etc.)

b. Select groups:

1. Elderly (need to define cut-off age - 55, 60, 65).

2. Blind.

3. Disabled (need to define degree of disability).

4. Families with children.

A. AFDC-related (at least one parent away from home).

B. All families.

5. Single adults

A. Employable (work requirements?).

B. Unemployable.

II. To what income level should people spend down to?

a. Same as General Relief-Medical.

1. $_____ - single.

$_____ - couple.

2. Higher level.

III. What kinds and amounts of resources allowed?

a. General Relief-Medical level.

b. Higher or lower level.

c. Special consideration.

1. Home.

IV. What services to cover?

a. Same as General Relief-Medical.

b. Same as General Relief-Medical plus residential care or other home care (adult - foster care; adult - day care).

c. Select services:

DRAFT

1. Hospital.

2. Physician services.

3. Nursing home.

4. Drugs.

5. In-patient psychiatric services.

6. Mental health clinic.

7. Eyeglasses and optometric exams.

8. Hearing ~~aids~~ aids and evaluation.

9. Residential care.

10. In-home services (home health; adult-foster care; adult-day care).

11. Out-patient surgical center.

12. Medically necessary transportation.

V. Legal Mechanism:

~~a. Modify Catastrophic Illness Statute (payment after the services).~~

a. Modify Catastrophic Illness statute (payment after the services).

b. Modify General Relief-Medical statutes.

c. Separate new programs administered by Public Assistance.

VI. Funding.

a. Open-ended appropriation (supplementals will be honored).

b. Fixed sum "full need" appropriation (supplemental will not be honored).

c. Pilot project or limited funded statewide project.

Re: Testimony for Committee Hearings
February 1980
Senate Bill 322

Dear Senator Hackney:

Speaking for our association, I wish to elaborate on our position related to S.B. 322/H.B. 612 concerning "prospective reimbursement for hospitals, nursing facilities, intermediate care facilities, etc." Due to the briefness of the bill as it now stands, we cannot effectively comment other than to state that an effective date of July 1, 1980, we feel, is overly optimistic. Other states who presently have prospective reimbursement have implemented their system after several months of preparation, and we recognize the need for similar time in Alaska.

Identification should be clearly made that the primary interest in a prospective reimbursement program in Alaska at this time is most closely aligned with some free-standing nursing facilities rather than hospitals. Health Care Services of Alaska Inc., a proprietary nursing home corporation, has spearheaded the movement because it would address a number of problems they are now faced with under the retrospective system. Due to the nature of long-term care reimbursement (a per diem rate) it more readily identifies with a prospective settlement. It is our recommendation that if a prospective reimbursement program is necessary at this time in Alaska, consideration be given to limiting the program to free-standing nursing homes who wish to participate as a pilot for other health care providers.

The purpose for which such legislation was initiated should be clearly spelled out and a follow-up program to evaluate its effectiveness should be developed at its inception. I have enclosed a report from the State of Colorado showing where a similar program has just been deregulated due to a lack of effectiveness.

Association endorsement for an inclusive prospective reimbursement system for both hospitals and long-term care institutions requires some assurances to the following:

1. That a reporting and budgeting system be established which would provide for uniformity in establishing the reimbursement for Medicare/Medicaid patients throughout the state, taking into consideration geographic and other unique variables.

2. That adequate time prior to implementation be allowed to develop the software, education and appeal processes for an effective program.

3. That the costs associatiated with the change-over in programs not be assessed the institutions participating or their private patients.

4. That allowable reimbursement include all of the necessary costs of operation including: bad debts; charity (mandated by federal law for Hill-Burton hospitals'; debt service costs; adequate depreciation and an equity factor allowing for new technology and expansion.

5. That the present Medicare/Medicaid reimbursement program be replaced by the prospective system so as not to add an additional billing requirement.

6. That the determination of rates, i.e. the "rate authority", would be truly a representative body, including providers.

7. That the initial and ongoing cost of the regulatory body not be borne by the providers.

8. That an appeal process be established at the very outset of the program to deal with inequities which may surface and could be substantiated.

9. That the program be monitored by the legislature to determine if the regulatory body is carrying out the intent of the legislation.

10. That the regulations for this program be developed through cooperative efforts between representatives who are providers, working in conjunction with the regulatory agencies.

11. That special consideration be given to institutions providing both acute and long-term care in determining their budgeting and reporting requirements.

12. That reporting requirements be based on a recognized standard in the industry and be as simplified as possible.

Major concerns rest with the fact that many of our hospitals are operating with a limited census, with approximately 85% of their budget accounted for in wages and fixed overhead. Smaller facilities may not have the manpower or financial resources to comply with an immediate prospective program.

A final concern relates to the lack of success in other states in making significant improvement in containing costs through this mechanism. We have been more successful than many who already have a rate commission and prospective budget approval.

If we can be of further service to your committee, please contact our office at your convenience.

Sincerely,

Max Kersbergen
Executive Director

MK/ic

Enclosure

POSITION PAPER/Department of Health & Social Services

ADDENDUM TO
POSITION PAPER
ON
SENATE BILL 322
(Identical to House Bill 612)

"An act authorizing payment for services provided by certain institutions and agencies to Medicaid-eligible persons on the basis of prospectively determined rates; and providing for an effective date."

Senate Bill 322 would require that Medicaid reimbursement for services provided by hospitals, long term care facilities, and home health agencies be based on a prospective method of reimbursement by July 1, 1980.

Under the present State and Federal statutory language, such reimbursement is allowed.

Overview

The current systems and methods of reimbursing health facilities for services to Medicare and Medicaid beneficiaries is retrospective in nature. That is, health facilities are paid for their services based on a cost report submitted after the fact at the end of each facilities fiscal year. The Medicare intermediary (Blue Cross) and the Medicaid intermediary (State Department of Health and Social Services) review these year end cost reports and pay the facilities the lessor of allowable costs or charges. During each year the intermediaries pay the health facilities an interim rate based on the prior year's cost report.

This system of reimbursement was established with the advent of Medicare in the 1960's. It has been revised and added to, over the years so that today it has become very cumbersome, complicated and duplicative. Nationally, the "retrospective" system is considered one of the major causes of the escalation in health care costs as the system lacks incentives to control expenditures. The current system is static and inflexible. Decisions are often made by accountants, based on "generally acceptable accounting principles", rather than on the merits of each individual situation.

In response to this situation, twenty-seven to thirty-four States have instituted a "prospective" system of reimbursement. These prospective systems have taken many forms, each state's structure a little different. However, the philosophic purposes seem to be common "To encourage economy and efficiency to establish a uniform system of reporting and determination of a health facilities future reimbursement."

POSITION PAPER/Department of Health & Social Services

Department's Position

The Department of Health and Social Services supports the concept of prospective reimbursement. Major benefits of such a program would be:

1.) Standardization of Health Facilities Reporting and Budgeting.

2.) Uniform Collection of hospital operating data for the purpose of determining reasonable rates.

3.) Reimbursement based on current budgeted costs instead of historical cost settlements.

4.) Routine communication between the Department and health facilities managers.

While Senate Bill 322 would authorize, if passed, a prospective reimbursement system, it does not require the implementation of a Uniform Reporting and Budgeting System which is critical to the development of an efficient prospective reimbursement model.

After a historical review of prospective reimbursement programs in other states, it was determined that installation of a prospective system requires basic provider education, technically qualified and experienced cost accounting staff, and a phased approach to implementation.

Based on our analysis of other state's experience with prospective reimbursement, the department recommends a phased approach to the development of a prospective reimbursement system be considered as follows:

1.) The Legislature authorize and fund the development of a State and Federal approved system of health facilities uniform reporting and budgeting. In meetings with the Alaska State Hospital Association, it has been clear that the hospitals and long term care facilities in the State agree that this is a necessary pre-requisite prior to implementing a prospective reimbursement system.

A Uniform Reporting and Budgeting system should be implemented as a first priority. This system should be patterened after the nationally recognized System for Hospital Reporting (SUHR) and the American Health Care Associations, Chart of Accounts. It is

POSITION PAPER/Department of Health & Social Services

envisioned that this system would be developed with the intention of consolidating in the State of Alaska, all State and Federal Budget and Reporting requirements, ie: Medicare, Medicaid, Alaska Native Health, General Relief Medical, etc.

2.) That a task force be formed composed of representatives of the United States Department of Health, Education and Welfare, Alaska Department of Health and Social Services, and two representatives of the Alaska State Hospital Association. That this task force be charged with publishing a report recommending legislative actions; proposed regulations to support the recommended legislative action and that these recommendations be published prior to the January 1981 legislative session.

A fiscal note and estimated time line for this approach is attached. If this suggested phased approach were used a prospective reimbursement system could be operational by July 1, 1981.

If the legislature simply passes legislation beginning a prospective system effective July 1980, the Department would be in a position of "pushing" a system that has not received adequate health facility education, would impose yet another budgeting and reporting system on health facilities without their support, and would require holding public hearings over a very compressed period of time. This method of implementing a prospective system could result in as much or more time being required to implement a working system as will be required through the Department's suggested method.

The Department supports Senate Bill 322 in concept but would prefer a more phased method of implementing a prospective rate setting system.

Department of Health & Social Services

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
SENATE BILL 322

"An Act authorizing payment for services provided by certain institutions and agencies to Medicaid-eligible persons on the basis of prospectively determined rates; and providing for an effective date."

Senate Bill 322 would require that Medicaid reimbursement for services provided by hospitals, long term care facilities, and home health agencies be based on a prospective determination of rates based on reasonable cost. Under present statutory language, such reimbursement is permissive.

Line 13 of the bill should be amended to add "skilled" between "hospital," and "nursing."

The Department of Health and Social Services supports the concept of a prospective method of determining reasonable rates of reimbursement. A prospective system would provide for an up-front negotiation between the State and the provider before services are provided rather than an after-the-fact review as exists under the present retroactive reimbursement system. Providers, the Department, and the Legislature would know in advance what budgetary limitations exist, how much would be spent, and for what services. Barring major emergency or extreme economic change, cost-settling practices should be eliminated for these categories of service.

While this bill would begin to address cost containment in the area of hospitalization and long term care, additional administrative costs would be incurred due to the requirement for contract development and negotiations. Various approaches may be used to implement a prospective reimbursement system. The Department is drafting a detailed explanation of those options and will have additional information on cost, program, and administrative impact.

The Department supports S.B. 322 in concept but must oppose its passage as the Governor's Budget Review Committee has not had an opportunity to approve the additional funding in administrative costs which would be required.

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

DIVISION OF SOCIAL SERVICES

POUCH H-05
JUNEAU, ALASKA 99811

REPORT REGARDING SENATE BILL NO. 323

HOMEMAKER HOME HEALTH AIDE SERVICES

Regardless of whether or not there is a single statewide contract or regional/local contracts, the administrative costs as well as the unit cost for a contractor will increase with the addition of home health aide services. The additional unit cost will be approximately $5/unit in an urban area. The additional cost per unit results from the need for:

additional 35 hours of training for home health aides;
licensed nursing supervision of home health aides;
increased supervisory visits and travel;
increase in salary for home health aides.

The present homemaker contractor, Easter Seal Society, receives $9.34 per unit. The contractor anticipates the unit cost for homemaker services to increase to between $12-15/unit for FY 81 since the current unit cost is not adequate. The increase will enable the contractor to have full time regional supervisors and adequate supervisory travel. An additional supervisor is needed in Anchorage. In addition, workmen's compensation costs are approximately $3,500 more than their original estimate.

Currently at $9.34/unit with the FY 80 funding level of $1150.0 there are 123,126 units of service available.

If the unit cost of homemaker services increased to $12/unit at a funding level of $2500.0 there would be 208,333 units of homemaker service available, an increase of 85,207 units or 69% over FY 80.

If home health aide services were added to homemaker service at a unit cost of $12, the additional $5/unit for home health aide service would result in a $17/unit cost for combined homemaker-home health aide services. At a funding level of $2,500.0 there would be 147,058 units of service available, an increase of 23,932 units of service or 19% over FY 80.

The following table shows what the increase in units of service would be at various funding levels.

UNITS OF HOMEMAKER-HOME HEALTH AIDE SERVICE

		# of Units	% of Increase Over Current Year
($17/unit) Funding Levels	$2,500,000	147,058	19%
	$3,000,000	176,470	43%
	$3,500,000	205,882	67%
	$4,000,000	235,294	91%

The current rate of $9.34/unit includes homemaker wages as well as administrative costs which were figured at 30% of the $1150.0. The contractor's administrative costs include:

Travel
Supervisor's salaries
¼ time executive director's salary
Program director's salary
Bookkeeper's salary
Secretary's salary
Fringe benefits 18% (workmen's compensation, F.S.C., employer's FICA, and Blue Cross coverage for full-time employees)

The increased workmen's compensation costs, additional supervisory travel, full-time nursing supervision, and additional training will increase the administrative costs. For comparative purposes, the administrative costs for Alaska Homemaker-Home Health, Inc. were 51%.

During the first year of implementation of a homemaker-home health aide program a great deal of developmental work will need to be done including:

development of program standards based on the standards of the National Council of Homemaker-Home Health Aide Services;
development of a training program based on national standards;
educating medical providers and potential clients regarding home health aide services;
hiring full time nursing supervisors;
developing an adequate supervisory system to meet the needs of rural areas;
developing a unified referral system;
developing a unified case recording system;
developing protocols and agreements with medical providers;
developing a case monitoring system.

Given the number of developmental tasks and the fact that at the present time it is difficult to determine what the actual need and demand for home health aide services are, during the first year a single statewide contractor is preferred. Once a program is developed and fully operational it would be easier to then move to have regional contracts.

It should be noted that with regional or local contracts the administrative costs would increase since each contractor would need to have administrative staff and depending on the area of the state travel costs may be higher, as well as wages. At the present time it is also difficult to determine on a regional basis what the need is for home health aide services. In addition, the more contracts let, the higher the overall administrative costs will be.

The Division would, as a result, prefer to let a single statewide contract for FY 81. In developing the request for proposals, the Division would appreciate the assistance of members of the Interim Committee on Services for the Elderly to ensure input regarding the expectations of the contractor and specific requirements to meet regional needs. In urban areas, for example, it may be practical to have both homemakers and homemaker-home health aides, whereas in rural areas it would be more practical to have homemaker-home health aides.

During the first year, once some of the developmental tasks have been accomplished, various models of decentralization/regionalization can be developed so that quality services with local/regional control can be delivered in a cost effective manner. With input from potential regional/local providers, as well as the Interim Committee, a smooth transition plan could be developed. During FY 81 visits will be made to the various regions and communities of the State to provide information regarding the program and to encourage prospective contractors.

The Division, while favoring regionalization and decentralization, would like to ensure that a quality homemaker-home health aide service program is developed which addresses both urban and rural needs and which includes adequate training and supervision to ensure that clients receive quality service.

The Division supports allowing physicians or certified home health care agencies to make direct referrals to the contractor for home health aide services. Anyone, of course, who wanted homemaker-home health aide services and was able to pay for the service could go directly to the contractor for service as is now possible with homemaker service.

HOME HEALTH AIDE SERVICES

The following information is to provide the reader with an understanding of home health aide services.

Objectives of Home Health Aide Services:

1. Providing physical and emotional relief for a family member who has been caring for the patient.

2. Maintaining the patient at home, if that is the best plan for the patient and conforms with the medical overall plan for the patient/family.
3. Hastening rehabilitation and independence through concentrated service.
4. Stabilizing a situation until the family can make a better plan.
5. Enabling a family member to continue employment.
6. Reducing the length of frequency of nursing visits.
7. Making a patient more comfortable during terminal illness.
8. Perform functions which could be carried out by a family member if one were available.

Examples of Home Health Aide Services:

Under the supervision of the professional nurse gives health related personal care to the convalescent, disabled or chronically ill patient.

The professional nurse, by virture of her license to practice, is legally responsible for the non-professional worker she supervises.

Care for the patient's hair including shampoo
Change patient's bed linen
Rub patient's back
Help the patient with a bed bath
Help the patient wash hands and face
Care for fingernails
Care for patient's feet-skin and nails
Offer and remove bedpan and/or urinal
Turn the patient
Help the patient with oral hygiene
Help the patient with transfer activities
Encourage the patient's participation in active exercises
Monitor, with supervision, certain drugs and treatments
Perform dressing changes.

Examples of Homemaker Service:

Homemakers provide housekeeping and personal care services which are not health related and do not require the supervision of a health professional.

Home Management

a. light general cleaning

   1. Vacuuming
   2. Making beds
   3. Washing reachable windows

b. washing dishes

c. chopping wood

d. shoveling snow

e. keeping kitchen and bathrooms clean and orderly

f. Marketing for food supplies and other simple errands

g. planning and preparing nutritious, varied meals, fitting them into the cultural and economic standards of the family

h. serving meals

i. preparation of infant formulas and special diets

j. light washing, ironing, and mending of personal clothing and linens

k. listing of needed supplies

l. assisting members of the family, both young and adult, to learn household routines and skills

m. transportation.

Personal Care

a. Ambulation - walking the client

   1. Purpose must be to get someplace - NOT for exercise

   2. NO gait problems associated with specific health problems, e.g., stroke

b. Transfers - lifting/moving the client

   1. homemaker must be trained

   2. standby assistance only - no major lifting

c. Bathing

   1. standby assistance into bathtub/shower only

   2. may bathe in bed

   3. no acute medical or skin problems, no major lifting

d. Grooming

1. may wash hair - no giving of permanents

2. no cutting of toenails

3. may shave

4. no cleaning of ears

5. may clean dentures, brush teeth for oral hygiene

6. may cut fingernails if no nail problems.

Responsibilities of the Nursing Supervisor in Home Health Aide Program

1. Responsible for home health aide care given to all patients in her district.

2. Assesses need for home health aide service. All personal care to be performed by home health aides should have been first given by the nurse.

3. Interprets home health service to family.

4. Accompanies the home health aide on her first visit to the patient's home introduces home health aide to family. Demonstrates personal care to be given. Discusses and plans with home health aide for housekeeping and meal planning and preparation to be done.

5. Conferences on a scheduled basis with home health aide at least once a month.

6. Evaluates use of service, need for continuing service, plans for termination of service.

7. Visit at least once per month. At first it may be necessary to visit more frequently, every day or every week may be indicated in unusual or difficult situations. The need for each specific patient and home health aide will determine frequency of visits by the nursing supervisor.

8. Notify patient if home health aide is unable to visit on assigned day. Does patient's personal care, if necessary, especially if home health aide misses more than one assigned day.

NOTE: A means of adjusting this for rural areas will have to be developed.

Federal Funding

Home health aide services, when they are provided by a home health agency, are covered by Medicaid and Medicare. The eligiblity requirements of these programs are restrictive and, as a result, many people in need of home health care are not eligible to receive services under these programs. Homemaker-home health aide services can be provided under Title XX. Personal care services can be provided under Title XIX for eligible individuals. It would require an amendment to AS 47.07.030 which lists categories of services covered under Medicaid. It would also require the appropriation of additional funds.

Current Services Available

At the present time home-health aide services are available in Anchorage through the Anchorage Home Health Agency. Home health aide services are provided as a part of their home health care program which includes skilled nursing services, rehabilitative services (physical therapy, speech therapy and occupational therapy) and home health aide services. Home health aide services began in June, 1978. The cost per unit for home health care is $108.67. Their FY 80 budget is $400,000. Approximately 13%, or $52,000, is for home health aide services at a unit cost of $15.00. The number of units is 3466.

National Council on Homemaker-Home Health Aide Services

The Division has contacted the National Council for materials to assist the Division in the planning of homemaker-home health aide services. Upon receipt of these materials we will be able to more adequately address more specific questions.

The Senator Glenn Hackney
Chairman - Health, Education, and
Social Services Committee
Alaska State Legislature
Pouch U
Juneau, Alaska 99811

Re: Testimony for Committee
Hearings - January 30, 1980
Senate Bills 323, and 325

Dear Senator Hackney:

SB 323

Homemaker Home Health aides are greatly needed through out the State of Alaska to complete the continuim of care in the health care system, allowing more persons to remain in their own homes and communities as long as possible. Although some studies show that supporting persons with chronic illness in the home can be as expensive as institutionalization, we must also recognize that as long as home support is feasibly possible, the quality of life for the individual is usually greatly enhanced. The cost-concept ratio must certainly be explored as we in the State of Alaska develop a philosophy of care for our ill, elderly, and handicapped citizens. Please remember that national statistics show that only 5% of those over 65 ever require long term institutionalization. As the percentage of persons in our population over 65 grows, we must have support services such as Homemaker Health Aide systems in place and functioning. Now is the time to act.

This bill also brings to mind several questions that, in our opinion, should be addressed:

1) What provisions should be made to ensure in the administration of this appropriation that supervision of the health component will be made?

2) What specifically is a Homemaker Health Aide Service and how does it differ both in funding and concept from the currently existing Home Health agencies and Easter Seal Homemaker's functions?

3) Is $2,500,000 an appropriate amount for the appropriation and how will it be distributed through out the State?

SB 325

Again, we wish to express our support of the concept of the State providing assistance to the elderly to increase the quality of life by mechanisms that allow our elders to live independently as long as possible. Our Social Workers have found that more senior citizen housing such as is available in Anchorage at the Chugach View Apartments, in Chugiak at the Chugiak Senior Citizen's Center, and in Fairbanks at the Golden Towers would be of great assistance in our discharge planning efforts. We also have identified a need for subsidized housing for the handicapped individual under 60 and would like to see this bill amended to take those persons into consideration.

There are currently many models through out the nation for "Senior Citizen Housing" from totally independent apartments or condominiums in one structure to units with common eating areas and meals provided along with recreational opportunities and health supervision. We, therefore, also recommend that the bill be amended to indicate the legislature's intent of what exactly "Senior Citizen Housing" means.

Senate bills 323 and 325 compliment each other. For your information, we have attached one concept of the continuim need in long term care.

If we can be of further assistance in providing information, please do not hesitate to contact us.

Sincerely,

HEALTH CARE SERVICES - ALASKA, INC.

THE LONG TERM CARE CONTINUUM

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

2,500,000
1,150
1350

SENATE BILL NO. 323
(Identical to H.B. 616)

"An Act making a special appropriation to the Department of Health and Social Services for homemaker health aide services; and providing for an effective date."

The Department of Health and Social Services supports in concept the addition of home health aide services under the Division of Social Services. In the FY 81 budget the Governor has included an additional $303.5 over the FY 80 funding level of $1150.0 for homemaker services. The Department can support additional services up to that level of funding.

Home health aides provide personal care services such as bathing, assistance with transfer activities, assistance with ambulation, and assistance with passive exercises. These services alone would have an impact on reducing unnecessary institutionalization of disabled and chronically ill Alaskans. The impact would be more substantial if home health aide services were a component of a comprehensive home health care program ranging from skilled nursing to homemaker-home health aide services.

Currently the availability of home health services in Alaska is limited. The Division of Public Health has a limited amount of money available for skilled nursing home health services in Juneau and Fairbanks. Payment for home health care is also available under Medicare (Title XVIII) and Medicaid (Title XIX). The home health care available under these federal programs include home health aide services and are limited to medicaid and medicare eligible individuals. The eligibility requirements of these programs are restrictive and, as a result, many people in need of home health care are not able to receive needed services. They may be ineligible due to age, income or a disability which does not fall within the federal requirements.

If the Department developed either a homemaker-home health aide service or a comprehensive home health care program, this program would include the present homemakers who, after additional training, would be capable of providing health aide services under supervision of medical/nursing professionals. In order to implement a new program, much developmental work would need to be accomplished during Fiscal Year 1981. The contractor would need to set up a safe home health delivery service which includes, on a continuing basis, training and professional supervision. The addition of a home health component would result in a higher unit cost during the development phase and increase ongoing administrative costs.

Clarification is needed regarding interim committee intent with respect to eligibility for home health services. Currently, homemaker service is provided to all Alaskans based on need and service availability, regardless of age or income, under the Division of Social Services' child protection and adult protection programs.

POSITION PAPER/Department of Health & Social Services

Clarification is also needed regarding any interim committee intent with respect to contract limitations, i.e., whether or not regional contracts are mandatory. This information will assist the Department in preparing a request for proposals and in determining the allowable administrative costs for contractors. The Department recommends that this not be a requirement for FY 81.

Although the Bill authorizes a $2500.0 appropriation, the Department's understanding is that the interim committee intent is for an additional $1046.5 over the Governor's FY 81 budget request for homemaker services. The Governor's FY 81 budget request contains $1453.5 for homemaker service in the Division of Social Services.

The Department would like clarification regarding interim committee intent with respect to the use of additional funds. It is anticipated that the unit cost of homemaker services will increase in FY 81.

The Department views the addition of home health care services as a means of further assisting Alaskan citizens to receive the services they need in the least restrictive setting possible, as well as reducing the cost of unnecessary institutionalization.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

A. Assumption

1. Both positions budgeted for 12 months.

2. A 9% inflation rate for line items 100, 300 and 400.
A 10.8% inflation rate for line item 200.

IV. DATE January 25, 1980 PREPARED BY Art Holmberg

AGENCY Division of Social Services

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

Reviewed by Michael Delong
Division of Mgt. Budget
DHSS 1/25/80

33-001 (Rev. 12/78)

TITLE: "An Act making a special appropriation to the Department of Health and Social Services and Social Services for homemaker health aide services; and providing for an effective date."

III. ANALYSIS (Continuation)

Coordinator for the homemaker-home health aide service would be responsible for:

-the development and maintenance of program policy
-coordination of homemaker-home health aide service with other services and programs
-establishing and maintaining standard of service
-technical assistance
-preparation of program requirements, contract preparation, contract monitoring and program evaluation
-collection analysis and interpretation of statistical data.

At the present time the responsibility for the management of the homemaker contract is being shared by several staff. The addition of a home health aide component would result in the need for a single central office position to establish standards of service, work with the contractor to develop a uniform referral system, record keeping system and establish monitoring guidelines.

Clerk Typist III

The additional work resulting from the new program component would double the present authorization level thus resulting in twice the paper flow, therefore, a clerk typist is needed.

Program Summary

1. New Positions

Range 18 - 6 mos @ $2,465 =		$14,790
6 mos @ $2,640 =		$15,840
		$30,630
fringe benefits @ 25.5% =		$ 7,810
		$38,440
Clerk Typist III - Range 8		
6 mos @ $1,277 =		$ 7,662
6 mos @ $1,393 =		$ 8,358
		$16,020
fringe benefits @ 25.5% =		$ 4,085
		$20,105
TOTAL		$58,545

2. Other Expenses

Travel - for fiscal and program monitoring

2 Trips to Bethel	468 x 2 =	$936
Anchorage	255 x 2 =	$510
Fairbanks	301 x 2 =	$602

A BILL RELATING TO IN-HOME SERVICES

SB 323 (2)

I. PREAMBLE:

It is the right of every individual to live his life in circumstances which enable him to make the fullest use of his capacities. This right is protected when the society in which he lives provides those safeguards which ensure his basic economic security in a decent environment, and the services which are necessary to promote his physical, mental and emotional health. These services are only effective when they are available in a comprehensive system which includes all of the skills and facilities essential to the promotion and maintenance of optimum health.

In-home services are a major component in this system. They ensure appropriate utilization of all other components in the system; they utilize the home and the family as a valuable resource; they prevent the unnecessary displacement of persons which occurs when services are lacking; they guarantee the right of the individual to remain in the place of his choice. In the absence of in-home services, no system may be considered either comprehensive or effective. They must, therefore, be an integral part of this system and top state priority must be given to the development of a rational system of comprehensive in-home services for the whole population.

The state policy must provide:

* that in-home services which are comprehensive will be available, accessible and acceptable to every member of the population who needs them;

* that they will be available without restrictions as to diagnosis, race, religion, ethnic origin, age or sex;

* that they will be based on the needs of the consumer rather than the provider;

* that they will be provided without financial barriers;

* that they will be provided in circumstances which guarantee high quality;

* that they will be provided without barriers between health and social services, but as a coordinated blend which promotes and supports optimum health in the broadest sense;

* that they will be based upon a philosophy which recognizes the right of the individual to participate with professionals in making decisions about the place, type,

and extent of care and services he needs and receives.

II. DEFINITIONS:

(1) The term "in-home services" is meant to describe an array of services which can be brought into the home, singly or in combination, and which can be adapted to meet the needs of persons in all age groups, in all diagnostic categories, and in all economic and psychosocial situations when such services can be used therapeutically, or to prevent or arrest illness and disability, to supplement limited function and to protect and support those whose capacities for optimum development, function and participation in family and community life are threatened.

In-home services include, but are not limited to, the following:

* skilled nursing services as ordered by a physician;

* physical, occupational and speech therapy as ordered by a physician;

* personal care services as recommended by a physician or registered nurse;

* homemaker-home health aide as recommended by a professional person;

* chore services, friendly visits, escort services, shopping assistance, telephone reassurance, home repairs and maintenance, and nutrition services.

III. RECOMMENDATIONS:

(1) The FY 81 budget for Homemakers Services under the Department of Health and Social Services be increased from the current $1.15 million to $2.5 million with the following intent:

* the department shall double the amount of hours available for client service;

* the department shall contact with one organization to provide administration of the grant with provision for subcontracts to regional or local providers;

* the department shall provide for full-time (40 hrs/week) supervisors at an increased salary;

* the department shall allow local providers the option of homemaker-home health aide service according to standards set by the National Council of Homemaker-Home Health Aide Services, Inc.

* the department shall provide funds enough for a minimum of 40 hours of

training for homemakers, and 60 hours of training for homemaker-home health aides.

(2) The Department of Health and Social Services be instructed to take the necessary steps to include "personal care services" as an available coverage option under Medicaid.

(3) The State of Alaska be instructed to take the necessary steps to require that voluntary and commercial insurance plans include coverage of comprehensive in-home services.

MIDPOINT REPORT

Advocacy Project

MIDPOINT REPORT

ADVOCACY PROJECT

National Council
for
Homemaker-Home Health Aide Services, Inc.

MARCH 1, 1979

Introduction

The National Council for Homemaker-Home Health Aide Services, Inc. was awarded a three year grant from the Administration on Aging early in 1977 to refine an "advocacy model" for application at the state level. The advocacy model operates by marshalling a state's and community's resources via technical assistance from the National Council to develop comprehensive, integrated, and coordinated in-home services, using volunteer leadership in concert with professionals. Volunteers and professionals act as advocates for further steps. This model will be disseminated throughout the country for states to use in establishing in-home services of good quality.

The advocacy approach to service development is demonstrated each year in one community in each of two states in one D/HEW region. A National Advocacy Advisory Committee, which provides the guidance of this project, recommends the selection of each year's region and states. They arrive at this decision after Project staff visit several regions and states to meet with department representatives of aging, health, social services, and health planning. The National Advocacy Advisory Committee is made up of representatives of governmental departments related to home care, national consumer groups, citizen organizations, and direct service providers. In all, six states and three regions will be involved in the Administration on Aging demonstration over the three year period. Additional regions, states, and communities will be involved through funds made available by Exxon, United States Steel, and American Telephone & Telegraph corporations. A diversity of statewide models is being developed with technical assistance from the National Council and will be disseminated to states throughout the country. Accomplishing this will advance the nation towards the goal of having homemaker-home health aide and other home care services of good quality widely available for the functionally dependent elderly, families, and the ill and handicapped of all ages.

There are several steps in the development of the advocacy model in each state and region, and these occur over varying periods of time, depending on local conditions. In general, however, the following steps may be taken as representative of the model development for all states and regions.

Steps in Model Development

Lead Agency is Chosen

Project staff work closely with a lead state agency, an assigned in-home services staff person and a core committee of state staff related to aging, health, social services, and health planning. They help form a state advisory committee on home care which brings the public and private sectors together with the executive and legislative branches of government. Together they select a demonstration community and develop a strategy for the statewide development of home care services, using a community as a model.

Community is Selected

This community is selected in each state to demonstrate to state and regional staff how to develop and expand a homemaker-home health aide service system. The service developed thus integrates health and social services and is coordinated with other services in a continuum of in-home care for all age groups in the community.

Advocacy Team is Formed

A three member advocacy team is formed for each "advocacy" community. They act to stimulate interest in in-home services in their community. The team is lead by a volunteer, a citizen-at-large. This advocate is assisted by a professional and another volunteer or professional. They work with state and community advisory committees and with regional, state, and National Council staff to develop and coordinate homemaker-home health aide service activities. After selection the teams attend a special National Council sponsored advocacy orientation and statewide seminar on these services. The National Council arranges for $5,000 in start-up funds provided by the Exxon Corporation for each community funded under the Administration on Aging grant, and gives guidance in the development of the proposals for the use of these funds.

Technical Assistance Given by the National Council

The technical assistance provided by the National Council to the D/HEW "advocacy" regions, states, and communities consists of a series of training sessions on the development and management of in-home care services. The assistance also includes on-site, telephone, and mail consultation, and copies of written and audiovisual materials. Each year the lead regional agency convenes a one day meeting of regional, and state staff representing aging, health, social services, and health planning from all states in the region. The National Council provides information on the basics of quality in-home services, issues facing the field, and use of the advocacy model. This meeting lays the groundwork for the expansion of home care services in the region.

Management Institute is Held

A five day management institute is held by the end of the second six months for new administrators of home care services from the states within the region. Through its regional activities, the National Council has an impact on the development of home care in all the states within the region. Training sessions draw on expertise from other states within the region, providing lateral technical assistance which is well received by both state and local participants.

Summary

Developing and expanding home care services that are comprehensive and coordinated is a slow process. Careful groundwork must be laid, new relationships developed and traditional mistrust overcome on all levels. Project staff often act as facilitators in this process, bringing together various departments and agencies around the same table to talk and to learn together. As neutral parties, staff members help them pool knowledge and reach consensus on needed action.

Such is the typical progression of activities in a region, state, and community selected for creation of an advocacy model. What follows is a report on the progress of activities in the regions selected through February 1979. The first two of these were Region IV* and VII**. In addition, is information on other states and communities with whom Project staff have worked with funding from corporate sources. These reports are cast in a common capsule format, and each contains information on:

-- the Need articulated by the region, state, or community;

-- a review of Changes brought about through intervention of the advocacy model;

-- the Status of meeting that need in each region, state, or community; and

-- a catalog of the Agents of those changes.

---

* Kentucky, Mississippi, Tennessee, Georgia, Florida, North Carolina, South Carolina, and Alabama

** Missouri, Nebraska, Iowa, and Kansas

Region IV

Site visits were made by Project staff to Regions III, IV, V, VI, and VIII; and to the states of Wisconsin, Indiana, Arkansas, Kentucky, and Mississippi. After careful review, Region IV and the states of Kentucky and Mississippi were selected for special attention the first year. With the help of the regional director of aging, Project staff then held an orientation meeting on home care in Atlanta. It was attended by 45 professionals from the fields of aging, social services, health, and health planning departments in the region. Discussion focused on trends and issues in home care and on strategies to overcome barriers to the development of comprehensive home care. In addition, the participants identified needs for additional local and state funds, for coordination of state and local home care services, the importance of integrating the funding of homemaker-home health aide service, the need for standardization of eligibility criteria for service, and the importance of decreasing the hostility of hospitals and nursing homes toward the idea of home care.

A management institute was held at the University of Georgia, organized by Project staff. Thirty-five new administrators of home care services attended the meeting; state Title XX directors identified and selected participants with help from health and aging administration staff.

Further, the Regional Director of the Administration on Aging has initiated discussion with health systems agencies on the integration of home care in their planning; and has assigned one of his own staff members the task of developing interagency agreements on integration of home care services in their own planning efforts. Such integration was presented as part of the national effort toward initiating cost-cutting innovative procedures.

A model statewide training program for homemakers, supervisors and case managers was set up in Georgia, using Title XX training funds. Georgia hopes soon to bring their homemaker program into the Accreditation Program of the National Council. This homemaker program has expanded from 60 homemaker-home health aides in 27 counties in 1975 to 193 in 106 counties in 1979; by 1980, all of the counties in the state will be covered.

Accelerating this growth trend will be the special attention paid to Birmingham, Alabama. This site has been selected by the National Council's Advocacy Project staff as the one in which the attempt to help expand and coordinate homemaker-home health aide services will be made, using grant funds received from the United States Steel Foundation.

As a result of the efforts reported above, some concrete consequences of intervention by the Advocacy Project have been reported out at seminars held by the National Council in Mississippi and Kentucky. These include more effective proposal writing, more effective use by agencies of multiple funding sources, greater expansion rates for integrated programs of services, and more attention paid to the details involved in the contracting for services. Technical help provided by National Council staff has thus been effectively used to enhance the impact of homemaker-home health aide services on regionwide planning of home care as part of a coordinated series of support activities for individuals and families in need.

Kentucky

Need: To use what is learned in the demonstration community to facilitate statewide development of in-home services through Operation Independence; to identify all sources of available in-home services funds, and to develop a plan for allocating in-home service dollars; to develop definitions and guidelines for the purchase of services; and to plan for data collection.

Changes:

- Project Independence, a state funded project providing an array of in-home services as an alternative to institutional care whenever possible, has been extended to two additional area planning and development districts, both of which have requested National Council technical assistance.

- The adoption of regulations for the licensure of homemaker and other in-home services was delayed pending adoption of state guidelines.

- The Secretary for Human Resources appointed a technical advisory group to develop regulations; members include a representation from the Purchase area and Ms. Fanny Dorsey, a member of the Federal Council on Aging.

- Representatives of the state citizens advisory committees chose the expansion of in-home services as their number one priority.

Status: It is hoped that state support will be increased for the integration of homemaker and home health aide, especially because of the support of the new Secretary for Human Resources. He is considering institutionalizing Project Independence statewide. The in-home services task force is ranking in-home services by categories such as aging, children and the developmentally disabled. Preliminary talks are under way for the development of a statewide approach to homemaker-home health aide and supervisory training.

Agents: The Secretary for Human Resources created an in-home service task force drawn from related state agencies and citizen statewide advisory committees.

COMMUNITY: Purchase Area

Need: To locate multiple funding sources that will maintain and expand home care as Project Independence funds are reduced to the district; and to integrate the homemaker and home health aide tasks by contract with county health departments.

Changes:

- The medical screening team has helped gain support of local physicians for home care.

- A conference on the array of in-home services helped to educate the community and state in-home services task force.

- Fifty-two workers from West Kentucky Allied Services and the Bureau of Social Services, along with their supervisors, were trained as homemaker-home health aides. This has resulted in improved case assessments, plans of care, and more effective, efficient, and cost-effective work in the homes.

- Bureau of Social Service workers have increased requests for health assessments.

- A nurse from a home health agency is supervising West Kentucky Allied Services homemaker-home health aides in one county -- one step toward integration.

Status: Negotiations are underway between county health departments to contract with West Kentucky Allied Services so that Medicare and Medicaid, rather than Project Independence, funds cover the personal care tasks of the aides in eligible cases. This approach, plus tapping other third-party funding sources, is particularly crucial since Project Independence funds will be cut back further next year as this program is spread across the state.

Agents: The advocacy team in the Purchase district was led by a prominent local resident and assisted by a nurse. The latter is a member of the medical screening team for the West Kentucky Allied Services homemaker program and the public relations director of the planning district. These persons helped expand a subcommittee of the planning district's aging committee. West Kentucky Allied Services, the agency which delivers in-home services for this Project Independence community, was chosen to develop an aide training program.

Mississippi

Need: To expand homemaker-home health aide service statewide; develop interagency agreements between health, social services, and aging departments; and encourage the integration of homemaker and home health aide tasks on the community level.

Changes:

- Home care has become a high priority in state and area agency on aging plans.
- A Management training team has been formed for aging programs in AAA's; all attended Project training sessions.
- CETA homemakers are working throughout the state under the Welfare Department's Helping Hands program.
- An Appalachian Regional Commission grant was awarded to Choctaw County to initiate in-home services for aging.

Status: Interagency agreements have been delayed because of top staff changes in the Welfare Department. Fiscal restraints have led to an increased emphasis on volunteer in-home service programs such as friendly visitors. It is hoped the Title XX office will increase the number of Title XX contracts with non-profit agencies and develop state standards for such contracts. There has been a growth in the number of Medicare-only home health agencies throughout the state.

Agents: A state advisory committee composed of citizens appointed by the governor and with the leadership of the Mississippi Council on Aging initiated project work. Representatives from Title XX, Medicaid, Medicare, the Mississippi Council on Aging, and Project staff oriented this committee to in-home services in Mississippi.

COMMUNITY: Lee County

Need: To expand in all counties in the Trace AAA quality, well coordinated, and efficient homemaker-home health aide services with health and social services integrated using multiple funding sources, beginning in Lee County.

Changes:

- Title III, Appalachian Regional Commission, and United Way funds have been used to expand service.
- A Title XX contract was renegotiated.
- Contract discussions are almost completed with two certified home health agencies for Medicare to cover home health aide tasks.

Status: The funding base of the agency needs to be expanded further. This can be accomplisned when the regional planning district, which is separate from the AAA, is persuaded of the value of increasing programs for the aging, particularly in-home services.

Agents: The advocacy team, led by a recently retired executive and assisted by the AAA planner and a black community leader, formed the community committee. This committee includes, in addition to related human service agencies, the local newspaper publisher and representatives from the medical center, extension service, AARP, board of supervisors, and community development. Methodist Senior Services, part of a non-profit retirement complex, was selected as the auspice for the homemaker-home health aide program.

Region VII

Region VII was selected for Advocacy efforts for the second year after review of a number of locations.

Two states were selected in Region VII: Missour' and Nebraska. Within these states, two communities were also selected: the Meramec Area and Morrill County.

The Advocacy effort in Region VII was enhanced by the initiative taken by the Director of the region's Administration on Aging to develop a continuum of care of older people. It was obvious that homemaker-home health aide services, a key element in this continuum, needed expansion in this underserved area.

To aide in this effort, the National Council has brought in technical assistance laterally; that is, from neighboring Plains states. This was in addition to technical assistance from the Project staff.

The regional AoA staff helped by arranging for a progress report by staff of the Nebraska and Missouri programs, and by National Council staff, at the Mid-America Congress on Aging, held in Kansas City on February 21-23. This liaison has been maintained. The area's AoA staff keep other regional offices informed of project activities, attend meetings like the Nebraska state seminar, and plan visits to one of the demonstration communities. In this way, it is felt, they can increase the capacity of the regional office to provide leadership for the development of home care services.

Missouri

Need: To provide technical assistance in coordinating funding to allow for integration of funding sources; to identify and obtain new funding sources including a state appropriation; to expand services in rural areas; and to develop state standards.

Changes:

- Information on funding and legislation was provided to the Missouri State Health Commission at its request.

- National Council reviewed the Division of Family Services' standards for in-home services at its request.

- The 1978 Silver Haired Legislature has set the appropriation of state funds for home care as high priority.

- Publicity on the state thrust for home care has appeared in a number of statewide health and social service newsletters.

Status: The concept of the integration of the homemaker and home health aide tasks, seen as a priority item of the state health department, needs to be accepted in local health departments throughout the state. Homemaker service is purchased primarily at a flat rate throughout the state. This rate does not meet expenses and may be increased. Twenty-five percent of these Title XX contracts are with proprietary agencies. Home health aide coverage in some rural areas looks better on paper than in practice and needs to be expanded.

Agents: The state agencies on aging and home health have taken the leadership statewide with close involvement of Title XX personnel. The Office on Aging is the lead state agency, using the state home health consultant "loaned" from the health department. The state advisory committee includes, in addition to related state agencies, representatives from the St. Louis Alliance for Home Health Services, Upjohn, Visiting Nurse Association of Greater St. Louis, a retired Blue Cross executive, HSAs, and Catholic Charities of Kansas City and St. Joseph.

COMMUNITY: Meramec Area

Need: To expand and coordinate home care services as part of a continuum of care, integrating health and social services, with close cooperation of the home health agency, homemaker agency, and Senior Companion Program as part of an arr y of in-home services.

Changes:

- A community committee, chaired by the Advocate, met and agreed to formulate an action plan to:

  . add a social worker to enhance the home health agency, hospital discharge planning, nursing home services, and case management of the homemaker agency;

- increase the maximum number of Title XX purchase of service hours from 40 to 60 per client as a demonstration;

- develop central intake using trained RSVP workers with professional back-up;

- explore contractual arrangements between the home health and homemaker agencies with expanded training for selected homemakers as homemaker-home health aides;

- expand community education to overcome present misunderstandings about in-home services and to gain support for expansion and coordination through talks, the media, and word of mouth;

- expand the community committee with representatives from local volunteer health organizations, fire and sheriff departments, and churches and schools.

Status: It may be difficult to hire a Master's level social worker in this rural area. It is hoped that a recent graduate from the University of Missouri School of Social Work might be located. The state advisory committee will be helpful in obtaining permission to experiment by adding case management capability to the Senior Services Council and by increasing the number of hours. The state representative from the American Cancer Society on the state advisory committee was helpful in suggesting additional community committee representatives.

Agents: The advocacy team is headed by a community leader whose late husband chaired the Governor's Council on Aging. He had been instrumental in obtaining funding to begin home care services in this multicounty area in south central Missouri. She is assisted by the President of Missouri's Homemaker Council and a registered nurse from the Phelps County Health Department. The committee, with strong representation from the country health departments, is soon to be expanded to assure more citizen and consumer interests.

Nebraska

Need: To advocate for the expansion of in-home services as part of Nebraska's continuum of care initiative, identifying gaps and effecting changes in rules and regulations on statutes, and facilitating funding and greater coordination; to develop measurable standards; to provide public information; and to develop a statewide approach to homemaker-homehealth aide training.

Changes:

- Project staff spoke at the quarterly meeting of the Nebraska Home Health Care Association at its invitation, discussing homemaker services as part of a community home care system and the necessity for multiple funding sources, especially in rural areas.

- Project staff provided technical assistance to Holdrege in Phelps County to help plan the development of a homemaker-home health aide service. Both a nonprofit retirement center which includes an intermediate care facility and the local hospital have expressed interest in delivering the service.

Status: The National Council is eager to demonstrate the value of training for homemakers and chore workers, and of placing them on staff with appropriate benefits and wages. The role of intermediate care and skilled nursing facilities (ICF and SNF's) in the delivery of home care needs to be defined (particularly in light of Nebraska's goal to reduce the number of nursing beds) and the reluctance of physicians to use home care needs to be overcome.

Agents: The Nebraska Commission on Aging assigned a staff member (the coordinator of research, planning, and evaluation) who has taken the leadership to form and expand a state advisory committee. The home health association, nursing home and hospital associations, AMA Auxiliary, Commission on the Status of Women, and the University of Nebraska Medical Center representatives will all be invited to serve on this committee and/or on subcommittees.

COMMUNITY: Morrill County

Need: To develop a homemaker-home health aide service that meets the needs of all age groups and is available to all economic groups, then to expand to additional counties in the Panhandle and serve as a model for the rest of the state.

Changes:

- Community organization work is well underway with plans to contract with a nearby hospital-based certified home health agency.

- The superintendent of schools has offered the use of school space for training of homemaker-home health aides. He has also offered to add the concept of home care to health education classes in the upper grades and to be a vehicle for publicizing the work of the advocacy team and community committee.

Status: The county welfare department, soon to have new leadership; the area agency on aging, which was instrumental in bringing the project to Morrill County; and the certified home health agency in nearby Scottsbluff -- all will be involved more closely as the community plans its activities. A staff member from the regional public welfare office with Medicaid responsibility has been very supportive to Project work, as have the director of the HSA subarea and staff of the local ICF. Project staff will provide technical assistance to them in locating both public and voluntary sources of funds and set up a community-based nonprofit agency.

Agents: The advocacy team is lead by a community leader active on the hospital board and assisted by another community leader and an employee of the local ICF. The community committee in this western Panhandle county of 5000 has drawn support from the hospital, several ministers, the health systems agency, and the superintendent of schools.

OTHER ACTIVITIES

As indicated above, the Advocacy Project staff has continued the activities initiated under the Clark Foundation grant efforts to find and develop opportunities for community based advocacy models. It has also continued to seek corporate funding for targets of special opportunity in communities of special concern to the funding corporations.

These activities are useful on two grounds. The first is that even the earliest localities in which the Advocacy Project staff intervened are given the benefit of the latest experience and newest wisdom the Project has accumulated in its work across the nation; in a similar way, all of the Advocacy communities and states are kept equally well informed as the staff cycles its visits as opportunity arises to do so. The second is that localities are identified with special properties that add to the special knowledge needed to deal with nonstandard problems and organizational difficulties, or variants on other experience in urban settings; this latter has been the case, for example, in Pittsburgh.

The distillation of experience and expertise is also disseminated through newly prepared audiovisual materials, the development of curricula for training, the creation of a "how-to" manual for advocacy, development of a new brochure for consumers of services, encouraging newspaper accounts of Project work, promotion of the Project's Program Development and Consultation Unit, and holding of national management institutes. In the following, we outline these activities.

Region III

The National Council has been able to provide technical assistance to Region III because it is providing technical assistance to Pittsburgh and Delaware through corporate funding sources. The Director of the Administration on Aging in Region III has emphasized the need for planning for long term care in concert with HSAs and Title XX agencies for the frail elderly. The Advocacy Project Director was invited to outline the role of homemaker-home health aide service in long term care at an Administration on Aging meeting. She followed an analysis by Dr. Steve Brody of the University of Pennsylvania School of Medicine of Region III HSAs' plans related both to long term health and other health needs of the elderly.

American Telephone & Telegraph Corporation funding is making possible the Advocacy Project's technical assistance to the "community" of the State of Delaware during 1979. The local advocacy team, still in formation, is headed by a community leader who has been closely involved with the YWCA and United Way. Assisted by a state staff member from Social Services for Families and Adults, she is seeking a citizen leader from one of the two southern counties to round out the team. The development and expansion of integrated homemaker-home health aide services, coordinated with other in-home services, and the adoption of state standards for homemaker-home health aide services, are objectives in Delaware.

United States Steel Foundation funding will enable the Advocacy Project to provide technical assistance to Pittsburgh/Allegheny County, which has a high concentration of United States Steel employees. The threatened closing of a Pittsburgh long term care hospital and the ensuing debate brought the issue of home care to the fore in this city. A 60-member task force on long term care for the elderly with a subcommittee on in-home services has been formed with a charge to develop a plan within six months. The Project role will dovetail with this initiative to develop and expand a coordinated system of home care and integrated homemaker-home health service. The Project work here is enhanced by the sponsorship of the Health & Welfare Planning Council. A countywide homemaker-home health aide training program initiative may be explored in this urban setting.

Region IX

Sun City in Arizona has been selected as an American Telephone & Telegraph Corporation funded community. It will serve as a model for the development of home care of good quality for retirment communities both in Arizona and throughout the nation. Boswell Hospital will expand its home care program to include homemaker-home health aide service to this community of over 40,000 older people. Sun City West is under construction with a projected population of over 80,000 people over 50. Project staff met with state and AAA staff and with state legislative leaders to discuss the development and expansion of home care services of good quality in the state. The possibility of a training contract with the Arizona Aging Department is under active exploration.

Following a presentation on homemaker-home health aide service at a quarterly meeting of the National Indian Council on Aging, the Navajo Indian Services to the Aging has requested the National Council's technical assistance to develop their homemaker-home health aide service and to locate funding sources.

"Clark" Communities Update

The National Council's Advocacy Project was initially funded for two years by The Edna McConnell Clark Foundation, beginning in 1975. Eight communities developed 14 programs, including a statewide program, and were helped to develop homemaker-home health aide services. These experiences were invaluable in refining the local community advocacy model and demonstrated the necessity for advocacy on the state level which strengthens local service development. Project staff continue to keep in touch with many of these communities.

Considerable progress has been made in the last three and a half years. The "Clark" phase experiences were invaluable in refining the local community advocacy model subsequently adapted for statewide use. Project staff provided technical assistance to these communities and conducted seminars in most of the states in which the Clark communities were located. These activities strengthened local actions and encouraged sharing with other communities and state staff the communities' experiences. A statewide approach has been made possible in some of these states, involving both provider agencies and state staff.

The Home Services Project, a project of a senior center in Sunnyside, Queens, New York City, was the impetus toward involvement of the Community Council of Greater New York and the New York City Department of Aging in the investigation and improvement of the home attendant program in New York City. Volunteers in the senior center have been trained to check on home care clients between the nurse's and social worker's supervisory visits. Efforts are underway at the state and city levels to structure this program more safely including having the attendants become employees of an agency.

Directors of the Anderson County/Tennessee, the Tulsa/Oklahoma and Linn-Benton/Oregon programs are active in the development of state standards for homemaker-home health aide services. The latter two programs have now come through the National Council's Approval Program successfully and are in conformity with basic national standards.

The amount of homemaker-home health aide service and the expansion of service areas has increased considerably in the "Clark" communities. Expansion has come through new funding sources which broaden the base of support, and through the integration of the health and social service funding sources by contracts with health and social service departments. New funding sources include local county funding, community development, Title III, Title XX, CETA and state funds, and local fund raising such as Bingo games events for clients not eligible for public funds. Explorations are underway in several communities to expand service for hospice and cancer care patients. In Oregon, service is now available in 29 of 36 counties -- up from 11 counties in 1975, thanks to increased state funding. Project Independence, which received technical assistance from Advocacy Project staff, has been a model for the country. The homemaker program in Tulsa has grown so much it was necessary to bring in a director experienced in more sophisticated management techniques.

Ohio's Commission, with Project help, instituted a statewide training program for homemaker-home health aides working under its Aide to Independent Living Program. The State Vocational Education System conducts the training. The curriculum of the advocacy agency in Delaware was the model. The Sunnyside training program, which was initiated through the New York City Board of Education, is the model for a citywide proposal for training aides in vocational schools throughout the City.

Several participants in the National Council training sessions have moved on to other positions in the home care field, spreading their expertise to agencies in other parts of the country.

Other Project Activities

New written and audiovisual materials, and new curricular for training, are being developed and refined. A training module on aide supervision and case management is near completion and will be tested and evaluated this year. A "how-to" guide for advocates is in draft form and is being tested by second year advocacy teams and states. Someone I Can Trust..., a consumer's guide to quality care in homemaker-home health aide services has been published.

Recent articles about the Project have appeared in the National Association of Counties newspaper and in Geriatric and Residential Care, a monthly newsletter. These resulted in many inquiries for information about the Advocacy Project and for requests for help in the development of home care services.

National Council staff provided information to Lou Cottin (a national syndicated columnist who writes on aging) about homemaker-home health aide services and standards and the Advocacy Project for his book, Elders in Rebellion, to be published in the fall.

Inquiries about the National Council's Program and Consultation Unit continue to come in. Negotiations have been completed with four area agencies on aging in Michigan to provide training for supervisors of homemaker-home health aides.

Project staff conducted a National Management Institute for Administrators of Homemaker-Home Health Aide Services at Mills College in Oakland, California. Tuition was charged for this five day management institute which was structured to meet the management and service delivery needs of both new and experienced administrators. Registration was limited to 70 participants, 35 in each group. The program covered such areas as planning, organizing and directing work; techniques of organizational change; financial management; proposal writing; time management; expansion through new uses of services; service evaluation; data collection use and interpretation; marketing; effective communication; wage and salary administration; and public policy and legislation. Continuing education units (CEU's) were granted by the University of California at San Jose. Thirty hours of continuing education for nurses were also negotiated for Institute attendance.

OBSERVATIONS AT MIDPOINT

We are now at the midpoint of the Administration on Aging's three year grant to the National Council to fund an Advocacy Project for homemaker-home health aide services throughout the nation. We have accumulated a fair amount of experience during the first year and a half of work with Regions IV and VII. This experience plus that gained in the several years of work in communities before the Administration's grant leads to some observations that can be made that others may find helpful. Some of these are candidates for formal recommendations to be made at the termination of the Administration's grant.

First, we are convinced that it is an appropriate role for aging offices on regional, state, and community levels to act as catalyst in convening staff of health and social services and discussing home care and long term care for the aging. We caution that comprehensive home care services should be the goal, since home care development is needed also for groups other than the aged. In fact, should area agencies on aging become direct deliverers of homemaker-home health aide services, they should draw upon several funding sources and assure comprehensiveness and availability to other age groups. This is particularly important in rural areas and in small towns, where it simply is not cost effective to erect services for one group alone. The thrust toward comprehensive care can also blunt the perception of some that aging offices tend to be age-divisive in their strong advocacy of services for older people.

Second, we are convinced that it is an appropriate role for regional offices to convene state level meetings with the purpose of developing standards for services; most states want to develop home care services of good quality and will accept help in achieving this goal. The regional office can then arrange for technical assistance, both from the National Council and from other states. The National Council is considered "nonthreatening" because it is nongovernmental and it relates to both health and social services.

Third, we have learned through experience that it takes both exposure and learning for community health and social service agencies to understand their need for each other in providing comprehensive services; each tends to perceive home care through its own eyes, to the detriment of the other. When the idea that: one person can be trained generically to perform both environmental and personal care tasks; mechanisms can be developed for nursing and social worker supervision when appropriate; and the need for skilled nursing care does not decrease when home health aide tasks are contracted out -- when these ideas are communicated clearly, the integration of homemaker-home health aide services comes about. The experience in the Purchase area has shown that with appropriate training and supervision, more home care service can be delivered for the same amount of money. This message must also be carried to consumer groups and taxpayers, though it is granted that it is a complex and difficult message to convey simply. Yet, it is indisputable that improved training and supervison, plus the coordination and integration of services, can lead to the delivery of safe, effective, yet cost effective home care services. Indeed, the need for advocacy of this message is imperative at every level, from the consumer to the regional and national levels. The National Council seeks to convey this message through its Advocacy Project, and thus can help to mobilize in-home services to meet this vital and growing need of the nation.

Fourth, we have become increasingly confident that it is cost effective for states and communities to request technical assistance from the National Council, rather than to create home care systems unaware of what has worked and not worked elsewhere. In the Advocacy Project, we have dealt with a wide variety of communities, states, and regions. We are aware of and sensitive to the questions of turf, of levels of awareness, of pitfalls, of coordinating and articulating mechanisms and procedures that work. Moreover, we are able to tailor this information to the particular public and particular situation in a given locality. Taken together, these advantages tend to enhance the likelihood that viable and enduring home care systems can be created and sustain themselves within reasonable periods of time.

Fifth, we have become aware of the fact that, supplementing these manifest functions and advantages of the Advocacy Project, we are serving an important but little recognized latent function -- namely, the creation of a way of thinking about homemaker-home health aide services, about the creation of such services from the parts of the health systems now extant, about the creation of standards and the implications of their application in practice. Since we carry a consistent message to many parts of the country, with consistent standards of performance, we are helping to create a national climate or posture toward uniform quality levels in the delivery of homemaker-home health aide services. In a sense, we are the carriers of a de facto, rather than a de jure, application of standards of service. Moreover, we carry these uniform definitions and practice standards with a fine sense of adaptation necessary to match local conditions and situations. In the long run, it may be found that this is one of our most important functions.

Sixth, and finally, by testing the realities faced by individuals and groups in the communities, states, and regions in which we work, we are able to interpret the national needs in ways not accessible easily to fixed field offices and stationary staff. This "pollinating" function serves two purposes. The first is to bring the message of common difficulties in delivering services on the local level to central staff, not only at the National Council, but to governmental and other national agencies. The second is our increasing awareness of the need for documentation to fill in gaps in the literature. We have touched upon (in "Other Activities") our involvement in the creation of literature of the field. We continue to be alert to the need for further literature -- in training aides, in helping administrators cope with organizational difficulties, in informing the several publics that agencies serve.

In conclusion, it is our hope that the reader will have gathered some sense of the excitement we feel at the scope, depth, and variety of problems and solutions we have tested for the provision of homemaker-home health aide services throughout the nation. In the coming decades, the importance of such services in keeping the costs of national health maintenance care in line, in improving the quality of life of our citizens, and in extending a humane and knowing hand to those most in need of it -- all with benefit from the most careful yet enthusiastic dedication to the extension of these services. We are glad to have the chance to share in this adventure in concert with our colleagues in the federal, state, community, and local levels across the nation.

GEORGE M. SULLIVAN, MAYOR

DEPARTMENT OF HEALTH AND ENVIRONMENTAL PROTECTION

SB 323

HOUSEMAKER

October 30, 1979

State Committee on Services
to the Elderly
Pouch V
Juneau, Alaska 99811

Dear Committee Members:

As per my conversation with Jim Kelly in Anchorage October 17, I will outline what I see as the home care needs of Alaskan senior citizens. The Anchorage Home Health Agency is at present the only certified Home Health Agency in the State of Alaska. As a section of the Municipal Health Department, Home Health serves the entire Municipality of Anchorage. The Agency carries a case load of 30-40 patients monthly with approximately 50% of the patients being Medicare recipents and an additional 12-15% Medicaid recipents.

Under federal guidelines for Medicare reimbursement, a Home Health patient must be homebound, require skilled care, and the care must be directed by a licensed physician. In Alaska, Medicaid regulations used these same guidelines for authorizing Home Health care.

In considering the possibility and advisability of combining Homemaker and Home Health Aide Services in Alaska, I would like to first address the existing gaps in services provided at present.

The Homemaker Services in Alaska, as you know, are provided statewide by Easter Seal Society. To my knowledge, Home Health Aide Services are available only in the Municipality of Anchorage through the Home Health Agency. There are distinct differences between the services provided by these two providers, the most noteable being that the Homemakers do not give personal care and Home Health Aides do. Also, while a Home Health Aide might provide some homemaking tasks, these are very limited in scope and through existing Titles 18 and 19 regulations can be only for the person receiving skilled care and cannot add significantly to the time spent in the home.

The gaps that exist, then, in Anchorage are: 1) a person receiving only Homemakers Services receives no assistance with

personal care. 2) Home Health Aide Services may be given only in conjunction with skilled care, meaning that when the need for skilled services ends so must aide services end, even when the need for those personal care services still exists.

The Anchorage Home Health Agency and the Easter Seal Society coordinate services in Anchorage, often seeing the same client or referring clients to each other as our assessments indicate a possible need for service. At present, Anchorage Home Health Agency contracts with the Alaska Nurses Registry for Home Health Aide Services. If Homemakers and Home Health aides were combined into a single service we would be willing to consider contracting with the provider of the combined services for Home Health aides, as we could view this as a potential advantage to our patients. This could mean that persons requiring both services could conceiveably receive them from the same person, thereby decreasing the numbers of people whom the patient would have in their home and providing continuity of care.

State funding or "personal care services"

Under existing regulations, however, the scope of services given through a Home Health Agency could not be increased, meaning that the actual service of available to the patient with Titles 18 and 19 funding would remain unchanged.

Should Homemakers and Home Health aides become a combined service in Alaska, it would be important that there be adequate supervision of both services, but particularly Home Health Aide Service which is frequently given to frail people who have multiple health problems and need continued medical follow-up even when skilled care is not indicated. During this past week I have attended the Ninth Annual Conference of the National Association of Home Health Agencies. During that conference I heard many issues addressed that related to those matters of importance to your committee. Leonard Schaeffer of Health Care Financing Administration spoke at the conference of the narrow scope of the existing law and its failure to meet the social and demographic changes occuring in the country. There are changes being proposed in that law at the federal level. HR3990, currently in committee, would relax some of the Title 18 requirements for provision of home care, specifically removing prior hospitalization requirements as well as eliminating other limits imposed by the existing law.

Many states provide for greater Home Health coverage under Title 19 then is allowed under Title 18. An example is the provision of services in the home beyond the acute phase of illness, thereby providing some maintenance services in the home. Under current regulations in Alaska home care can be only intermittent skilled care to homebound individuals under the direction of the physician. Example of patients who could be better served at home are terminally ill and chronic lung patients, requiring maintenance care (chronic care) to prevent increased need for more costly services. Home care has been documented as being less costly then institutional care and the revision of existing regulations in Alaska could provide for more comprehensive home

care programs for our senior citizens, thereby more readily keeping them in their homes and out of the more costly institutions.

Finally, I would propose the provision of grants to new agencies in Alaska, providing monies to encourage the development of Home Health Agencies in the state and making it possible for those communities considering such a move to afford expert consultation on complex matters such as those regulations governing the provision of care under Titles 18 and 19. The potential for maintaining people in their home is great given adequate funding and adequate supervision of those people giving the care. I have described some of the gaps that I see existing in the current available services. Also I have discussed one or two proposals for improving this service to senior citizens. If there is anything further that I can do to assist in this matter, I would be glad to do so.

Sincerely,

Janice Wills

EASTER SEAL SOCIETY/HOMEMAKER PROJECT: Progress Report, August 1, 1979

The program now has functioning Regional Homemaker Supervisors in all six regions. (List attached).

This first month has been devoted primarily to establishing an accurate list of clients and homemakers and working closely with the Division of Social Services to insure that all clients are receiving the services requested. The Regional Supervisors have already begun to travel to the villages to do this.

Nancy Farrington, Project Director, expressed her pleasure at all the help forthcoming from all of the DSS Regional offices and the DSS Central office.

August 7-9 all Regional Homemaker Supervisors will be in Anchorage for a training session. Subjects to be covered are recruitment, supervision, interagency coordination, and training, for a few.

Easter Seal/Homemakers will now begin directing its efforts towards upgrading services, training, and setting up advisory committees as well as providing service.

SB 323 HOMEMAKER-HOME HEALTH AIDE SERVICES

Every community in Alaska should have available a homemaker-home health aide service program. The homemaker-home health aides should be trained and supervised by professional personnel and work as part of a team with doctors, social workers, nurses, nutritionists, therapists, and home economists.

Homemaker-home health aides not only provide personal care of the aging, but they strengthen and extend the service of the nurse who instructs in such care as oil massages and exercise; the dietitian who oversees a special diet; or the social worker who helps with mental, emotional and social disturbances.

If our goal is to train one aide per hundred of the aging, that would mean 200 professionally trained and supervised aides just for the aging. (This is a national norm.)

This service respects the rights of Older Alaskans to remain in their own homes in times of crisis dut to illness, disability, or social problems. Its goal is to help the client to learn to help him/her self as much as possible, to achieve or retain independent functioning and self-sufficiency.

Older persons find it difficult or even traumatic to be removed from their own homes and communities, from their familiar surroundings, their families and friends.

They may be inclined to lose touch with reality.

In 1974-75, there were 242 persons aged 60 to 113 being served in Alaska by trained homemeaker-home health aides. This number did not include service by home helpers who were not professionally trained. The number of persons 60 and over has increased since then.

With the continuing increase in the population of Older Alaskas, it is urgent that the funding for this service and for training be increased.

I recommend the passage of this bill; also, that the service be decentralized in order to adapt it to the special needs of the various regions.

Member of the State Commission on
Services to the Elderly

January 30, 1980

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SENATE BILL NO. 323
(Identical to H.B. 616)

"An Act making a special appropriation to the Department of Health and Social Services for homemaker health aide services; and providing for an effective date."

The Department of Health and Social Services supports in concept the addition of home health aide services under the Division of Social Services. In the FY 81 budget the Governor has included an additional $303.5 over the FY 80 funding level of $1150.0 for homemaker services. The Department can support additional services up to that level of funding.

Home health aides provide personal care services such as bathing, assistance with transfer activities, assistance with ambulation, and assistance with passive exercises. These services alone would have an impact on reducing unnecessary institutionalization of disabled and chronically ill Alaskans. The impact would be more substantial if home health aide services were a component of a comprehensive home health care program ranging from skilled nursing to homemaker-home health aide services.

Currently the availability of home health services in Alaska is limited. The Division of Public Health has a limited amount of money available for skilled nursing home health services in Juneau and Fairbanks. Payment for home health care is also available under Medicare (Title XVIII) and Medicaid (Title XIX). The home health care available under these federal programs include home health aide services and are limited to medicaid and medicare eligible individuals. The eligibility requirements of these programs are restrictive and, as a result, many people in need of home health care are not able to receive needed services. They may be ineligible due to age, income or a disability which does not fall within the federal requirements.

If the Department developed either a homemaker-home health aide service or a comprehensive home health care program, this program would include the present homemakers who, after additional training, would be capable of providing health aide services under supervision of medical/nursing professionals. In order to implement a new program, much developmental work would need to be accomplished during Fiscal Year 1981. The contractor would need to set up a safe home health delivery service which includes, on a continuing basis, training and professional supervision. The addition of a home health component would result in a higher unit cost during the development phase and increase ongoing administrative costs.

Clarification is needed regarding interim committee intent with respect to eligibility for home health services. Currently, homemaker service is provided to all Alaskans based on need and service availability, regardless of age or income, under the Division of Social Services' child protection and adult protection programs.

POSITION PAPER/Department of Health & Social Services

Clarification is also needed regarding any interim committee intent with respect to contract limitations, i.e., whether or not regional contracts are mandatory. This information will assist the Department in preparing a request for proposals and in determining the allowable administrative costs for contractors. The Department recommends that this not be a requirement for FY 81.

Although the Bill authorizes a $2500.0 appropriation, the Department's understanding is that the interim committee intent is for an additional $1046.5 over the Governor's FY 81 budget request for homemaker services. The Governor's FY 81 budget request contains $1453.5 for homemaker service in the Division of Social Services.

The Department would like clarification regarding interim committee intent with respect to the use of additional funds. It is anticipated that the unit cost of homemaker services will increase in FY 81.

The Department views the addition of home health care services as a means of further assisting Alaskan citizens to receive the services they need in the least restrictive setting possible, as well as reducing the cost of unnecessary institutionalization.

Senate Bill No. 323 FISCAL NOTE Continuation

TITLE: "An Act making a special appropriation to the Department of Health and Social Services and Social Services for homemaker health aide services; and providing for an effective date."

III. ANALYSIS (Continuation)

Coordinator for the homemaker-home health aide service would be responsible for:

-the development and maintenance of program policy
-coordination of homemaker-home health aide service with other services and programs
-establishing and maintaining standard of service
-technical assistance
-preparation of program requirements, contract preparation, contract monitoring and program evaluation
-collection analysis and interpretation of statistical data.

At the present time the responsibility for the management of the homemaker contract is being shared by several staff. The addition of a home health aide component would result in the need for a single central office position to establish standards of service, work with the contractor to develop a uniform referral system, record keeping system and establish monitoring guidelines.

Clerk Typist III

The additional work resulting from the new program component would double the present authorization level thus resulting in twice the paper flow, therefore, a clerk typist is needed.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SENATE BILL NO. 323
(Identical to H.B. 616)

"An Act making a special appropriation to the Department of Health and Social Services for homemaker health aide services; and providing for an effective date."

The Department of Health and Social Services supports in concept the addition of home health aide services under the Division of Social Services. In the FY 81 budget the Governor has included an additional $303.5 over the FY 80 funding level of $1150.0 for homemaker services. The Department can support additional services up to that level of funding.

Home health aides provide personal care services such as bathing, assistance with transfer activities, assistance with ambulation, and assistance with passive exercises. These services alone would have an impact on reducing unnecessary institutionalization of disabled and chronically ill Alaskans. The impact would be more substantial if home health aide services were a component of a comprehensive home health care program ranging from skilled nursing to homemaker-home health aide services.

Currently the availability of home health services in Alaska is limited. The Division of Public Health has a limited amount of money available for skilled nursing home health services in Juneau and Fairbanks. Payment for home health care is also available under Medicare (Title XVIII) and Medicaid (Title XIX). The home health care available under these federal programs include home health aide services and are limited to medicaid and medicare eligible individuals. The eligibility requirements of these programs are restrictive and, as a result, many people in need of home health care are not able to receive needed services. They may be ineligible due to age, income or a disability which does not fall within the federal requirements.

If the Department developed either a homemaker-home health aide service or a comprehensive home health care program, this program would include the present homemakers who, after additional training, would be capable of providing health aide services under supervision of medical/nursing professionals. In order to implement a new program, much developmental work would need to be accomplished during Fiscal Year 1981. The contractor would need to set up a safe home health delivery service which includes, on a continuing basis, training and professional supervision. The addition of a home health component would result in a higher unit cost during the development phase and increase ongoing administrative costs.

Clarification is needed regarding interim committee intent with respect to eligibility for home health services. Currently, homemaker service is provided to all Alaskans based on need and service availability, regardless of age or income, under the Division of Social Services' child protection and adult protection programs.

POSITION PAPER/Department of Health & Social Services

Clarification is also needed regarding any interim committee intent with respect to contract limitations, i.e., whether or not regional contracts are mandatory. This information will assist the Department in preparing a request for proposals and in determining the allowable administrative costs for contractors. The Department recommends that this not be a requirement for FY 81.

Although the Bill authorizes a $2500.0 appropriation, the Department's understanding is that the interim committee intent is for an additional $1046.5 over the Governor's FY 81 budget request for homemaker services. The Governor's FY 81 budget request contains $1453.5 for homemaker service in the Division of Social Services.

The Department would like clarification regarding interim committee intent with respect to the use of additional funds. It is anticipated that the unit cost of homemaker services will increase in FY 81.

The Department views the addition of home health care services as a means of further assisting Alaskan citizens to receive the services they need in the least restrictive setting possible, as well as reducing the cost of unnecessary institutionalization.

33-001 (Rev. 12/78)

TITLE: "An Act making a special appropriation to the Department of Health and Social Services and Social Services for homemaker health aide services; and providing for an effective date."

III. ANALYSIS (Continuation)

Coordinator for the homemaker-home health aide service would be responsible for:

-the development and maintenance of program policy
-coordination of homemaker-home health aide service with other services and programs
-establishing and maintaining standard of service
-technical assistance
-preparation of program requirements, contract preparation, contract monitoring and program evaluation
-collection analysis and interpretation of statistical data.

At the present time the responsibility for the management of the homemaker contract is being shared by several staff. The addition of a home health aide component would result in the need for a single central office position to establish standards of service, work with the contractor to develop a uniform referral system, record keeping system and establish monitoring guidelines.

Clerk Typist III

The additional work resulting from the new program component would double the present authorization level thus resulting in twice the paper flow, therefore, a clerk typist is needed.

Program Summary

Alaska STATE HOUSING AUTHORITY

February 4, 1980

Mr. Paul Conger
Administrative Assistant
Senate Health, Education and
Social Services Committee
Pouch V
Juneau, Alaska 99811

Re: Inquiries Concerning Senate Bill 325

Dear Mr. Conger:

In accordance with our conversation of last Wednesday when I was in Juneau, I attempted to call you on Thursday. However, I was unable to make contact with you. Since I was out of Anchorage Friday, this is my first opportunity to contact you.

I expressed in our conversation concerning SB 325 a concern regarding how the $15 million appropriation that is proposed for use in the construction and development of elderly housing can be used. The first question that comes to mind is whether there shall be any obligation to repay the money appropriated under SB 325. While the bill, on its face, appears to be a straight appropriations bill, questions regarding the requirement that the recipient agency of the funds eventually repay the money to the general fund have arisen.

Secondly, it is our experience and our position that one of the most effective uses for the money is that it be used as "seed money" for attracting money available under federal programs, or that it be used in the form of direct grants or loans in order to pick up a commonly experienced "short fall" between the monies available for development and construction under federal programs and the actual cost of development and construction in the State of Alaska. Under this "seed money" mode of utilization, the Alaska State Housing Authority (ASHA) estimates that one state dollar can attract approximately three to five federal dollars that might not otherwise be useable in the State of Alaska. Thus, ASHA would envision a program whereby loans and grants to the regional housing authorities may be an appropriate method of utilizing these funds to most advantageously attract federal elderly housing dollars to the state and address the needs of both the rural and urban communities.

Another question that may need to be answered is whether the funds can be used in order to preserve failing elderly housing projects. For

TELEPHONE (907)279-7643 BOX 80 ANCHORAGE, ALASKA 99510

example, if an elderly housing project is a financial failure due to unforeseen cost overruns--e.g. through contractors claims, unforeseen increases in interest rates or increased costs due to unforeseen or concealed soils or other conditions--can the bond funds be utilized to "bail the project out". The preservation of a failing project does not necessarily fall squarely within the language of the bill requiring that the money be used for "construction and development" of elderly housing. However, in the event that a public housing project of this nature is failing, it would seem to be a prudent use of the monies to preserve the project that is failing rather than to allow the project to fail and simply build another one with the "construction and development" funds.

Last, since ASHA is not a line agency of the state, but rather a "public corporate authority", and since it has been unusual for ASHA to be the recipient of an appropriation of this type since the early 1970's, the question has arisen as to whether the entire corpus of the appropriated bond funds can be immediately drawn down by ASHA to be included in an investment program that would allow ASHA to not only preserve the corpus of the fund to the greatest extent possible by increasing it through prudent investment policies, but would also allow ASHA to cover the costs of administering the program, to the greatest extent possible, from investment earning proceeds rather than from the corpus of the appropriation.

I greatly appreciate the opportunity to make these comments and inquiries regarding SB 325. If ASHA can be of any assistance in providing further information concerning our elderly housing programs or our ideas on how these funds can most effectively be utilized, please contact me at your convenience.

Sincerely,

ALASKA STATE HOUSING AUTHORITY

The Honorable Charles Webber, Commissioner of Commerce and
Economic Development

SB 325 SENIOR HOUSING

In many of the homes of Older Alaskans, there is a woman living alone. The life of the older woman is centered in her home, her cabin, her apartment. The house itself is important to her. Eight years ago, one of seven households of Older Alaskans did not have running water, flush toilets, bathing facilities, or heat in every room. Health, mental health, and safe hosuing are necessities for the aging.

The majority of Older Alaskans prefer independent or semi-independent (with residential environment factors built in) housing to an institution. Many older persons who are living in institutions isolate themselves in their own rooms to avoid the distressing emotional impact of sitting around the nurses station, or in the recreation room along with patients extremely mentally retarded or mentally ill.

The mentally alert Older Person wants independent living as in a congregate facility. 87% of persons over 65 are fully ambulatory.

I recommend the passage of SB 325.

According to our grand old congressman from Florida, Claude Pepper, every dollar spent on congregate senior housing, results in a 50¢ saving in federal nursing home expenditures.

Re: Senate Bill 325

Dear Jim:

In regard to our conversation of a few weeks ago concerning Senate Bill 325, please find enclosed the information you requested. This information includes the housing assistance plan (HAP) for the Municipality of Anchorage as well as the type of survey instrument that we used to supplement the information provided by HUD to establish a needs evaluation for senior citizen housing in the Seward and Cordova areas.

You also inquired whether the State of Alaska had lost conventional housing funds from the United States Department of Housing and Urban Development as a result of the fact that the amounts of money available are inadequate to perform construction in the State of Alaska. My impression based upon prior conversations with HUD officials indicated a positive response to that question. However, upon further and more specific questioning of HUD officials they have indicated that the State has not lost any conventional funding because of the short fall inherent in the HUD funding methods for conventional housing. However, it is very clear based upon my conversations with HUD that many projects were saved by the availability of State dollars to supplement the inadequate HUD funds.

If I can be of any further assistance in this matter, please contact me at your convenience.

Sincerely,

ALASKA STATE HOUSING AUTHORITY

POSITION PAPER
ON
SENATE BILL NO. 325
(Identical to House Bill #617)

"An Act providing for the issuance of general obligation bonds in the amount of $15,000,000 for the purpose of paying the cost of construction and development of senior citizen housing; and providing for an effective date."

The Department of Health and Social Services, Office on Aging supports the concept included in Senate Bill 325.

Our Office of Aging has found that there is a the need for senior housing. Seniors living on fixed income, from Old Age Assistance or a retirement program, cannot always afford to pay the current high cost of housing in many areas of Alaska. For example, a senior receiving the maximum monthly benefit under Old Age Assistance is eligible for $413 a month. That $413 must cover the costs of housing, fuel, food, transportation, clothing, and other necessities. Seniors report difficulties in making ends meet under such situation. Low cost housing program could serve to supplement their income.

Also, it may be appropriate for some of the housing dollars to be earmarked for residential care housing units as these could serve as an alternative to institutionalization in a nursing home. This could serve to provide care to seniors in the least restrictive setting possible and at a much lower cost.

DATE: July 6, 1979

FILE NO:

TELEPHONE NO:

SUBJECT: Chapter 122 Bond Facilities as of July 2, 1979 Senior Citizens Centers

FROM:
Janice Gates
Special Assistant
to the Commissioner
Department of Health & Social Services

Status of Chapter 122 Bond Facilities as of July 2, 1979

Senior Citizen Centers

1. ANCHORAGE MULTI-PURPOSE SENIOR CENTER ($800,000)

Letters of interest have been received from the Anchorage Municipality's Senior Citizens Advisory Commission and from the Salvation Army. Departmental representatives have met on two occasions with the Municipality's Senior Citizens Advisory Commission to discuss procedures for application of the funds and the conceptual design of an Anchorage facility. The most recent meeting was held on June 21, 1979, and was attended by all pertinent agencies interested in programs for the aging in the Anchorage area.

An Attorney General's Opinion stating that bond funds are to be disbursed through a governmental entity to assure public ownership, has been shared with both groups. The Municipality has the option of operating the facility itself or contracting with an appropriate sponsor. The Municipality is recognized as the lead agency in planning for the facility, and coordination with other local groups and the State is good.

2. HOMER SENIOR CITIZEN CENTER ($433,500)

Conceptual plans from the City of Homer have been received by the Department. The City of Homer anticipates entering into an agreement with the State in October, 1979, and selecting an architect in November. A construction contract is scheduled for award around May of 1980 with construction to be completed by October, 1980. Consideration is being given to the possibility of the City of Homer and the Homer Senior Citizen's entering into an agreement with a non-profit social organization for the management of the facility.

3. NOME SENIOR CITIZEN CENTER ($872,400)

Departmental staff has discussed the project with personnel from the Nome Community Center, being advised that a newly remodeled Senior Center with a capacity of 40 is presently available. The facility is owned by the Methodist Church and leased to the Senior Center. A new Community Center in Nome was also completed this

Spring. Community Center personnel question the need for another facility and the ability of the community to support it. No intent for utilization of the bond funds has been received.

4. BETHEL SENIOR CITIZEN CENTER ($1,565,000)

Several telephone conversations have been held with City of Bethel staff related to the planning of a Senior Center. The community has organized an Inter-Agency Committee consisting of representatives of the Public Heath Service, the Division of Public Health, the Yukon-Kuskokwim Health Corporation, the Division of Social Services, the AVCP Housing Authority and private citizens. Preliminary plans are expected in a month or so. Some consideration is being given a residential plus day-care center. Public Health Service support is being solicited and PHS statistics are being consulted to determine the need for such services. Another option being considered is the construction of a senior center in Bethel with senior "support headquarters" in larger villages in the region. The Department expects to receive a request for $2500 of bond funds for consultants' travel from Anchorage to Bethel and for village representatives from the villages to Bethel for planning purposes.

5. DILLINGHAM SENIOR CITIZEN CENTER ($565,000)

Telephone conversations and correspondence relating to th Senior Center have been transacted between Department staff and stff of the Bristol Bay Area Health Corporation. The City of Dillingham has cited land for such a Center as one of its land needs under 14(c, village selection. Both the City of Bethel and the BBAHC are considering the possibility of combining a Center with a University of Alaska Extension Center to be constructed in Dillingham. Another option being considered is to combine the $1 million authorized for a "nursing home" in Dillingham in a 1974 bond issue with the Chapter 122 funds to construct a residential facility/senior center complex. The Department sought an Attorney General's Opinion regarding the propriety of such utilization and has informed the community that such alternative applications of the funds are indeed appropriate. The Bristol Bay Area Health Corporation is the lead agency for this project to date and is working with community representatives to design a plan to meet Dillingham's needs.

6. TANANA

Although Tanana did not receive an allocation of Chapter 122 bonds funds, the Attorney General's Opinion mentioned above (see #5) affects that community as well. Chapter 132 SLA 1974 allocated $1 million

for a "nursing home" in Tanana. The bond issue is unsold to date due to the lack of application for the funds authorized. The Tanana Chiefs Health Authority has developed a comprehensive plan to turn the Tanana Public Health Service Hospital into a comprehensive alternative care complex serving all ages and villages in the surrounding region. The legal opinion referenced above appears to support the direction in which the community wishes to go. The bond monies may be utilized to acquire, construct and equip a facility based less on a medical model and more on a residential and/or social model. Departmental staff will meet with representatives of the Tanana Chiefs and Public Health Service personnel on July 12 to further consider the comprehensive alternative care plan in Tanana.

Note: All recipients of Senior Citizen Center bond funds were sent the attached list of services available through a Senior Center.

Chapter No.

122

AN ACT

Providing for the issuance of general obligation bonds in the amount of $25,000,000 for the purpose of paying the cost of capital improvements for health facilities, senior citizen centers and pioneers' homes; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. For the purpose of paying the cost of capital improvements for health facilities, senior citizen centers, and pioneers' homes, general obligation bonds of the state in the principal amount of not more than $25,000,000 shall be issued and sold. The full faith, credit and resources of the state are pledged to the payment of the principal of and interest and redemption premium, if any, on these bonds. These bonds shall be issued under the provisions of AS 37.15 as those provisions read at the time of issuance.

* Sec. 2. If the issuance of these bonds is authorized by the qualified voters of the state, a special fund of the state to be known as the "1978 Health Facilities, Senior Citizen Centers and Pioneers' Home Construction Fund" shall be established, to which shall be credited the proceeds of the sale of the bonds described in sec. 1 of this Act except for the accrued interest and premiums. The amount of $12,500,000 is appropriated from the "1978 Health Facilities, Senior Citizen Centers and Pioneers' Homes Construction Fund" to the Department of Health and Social Services to be allocated as follows:

	Project	Location	Amount
(1)	Community hospital	Sitka	$5,600,000
(2)	Harborview Hospital fire prevention system	Valdez	305,000
(3)	Alaska Psychiatric Institute fire prevention system	Anchorage	206,100
(4)	Health facility	Hooper Bay	100,000
(5)	Health facility	Nenana	200,000
(6)	Health facility	McGrath	100,000

17)	Health facility	Shungnak	100,000
18)	Health facility	Kivalina	100,000
19)	Health facility	Kobuk	100,000
20)	Health facility	Buckland	100,000
21)	Health facility	Ambler	100,000
22)	Health facility	Unalakleet	200,000
23)	Health facility	Kaktovik	150,000
24)	Health facility	Gambell	100,000
25)	Health facility	Savoonga	100,000
26)	Health facility	Pedro Bay	15,000
27)	Health facility	Platinum	20,000
28)	Health facility	Togiak	20,000
29)	Health facility	Ekwok	20,000
30)	Health facility	Portage Creek	20,000
31)	Health facility	King Salmon	35,000
32)	Health facility	Nondalton	20,000
33)	Health facility	Goodnews Bay	20,000
34)	Nursing home	Juneau	283,000
35)	Multipurpose senior citizen center	Anchorage	800,000
36)	Care center	Kenai Peninsula	250,000
37)	Senior citizen center	Homer	433,500
38)	Senior citizen center	Nome	972,400
39)	Senior citizen center	Bethel	1,565,000
40)	Senior citizen center	Dillingham	565,000

* Sec. 3. The amount of $12,500,000 is appropriated from the 1978 Health Facilities, Senior Citizen Centers and Pioneers' Homes Construction Fund" to the Department of Administration to be allocated as follows:

	Project	Location	Amount
(1)	Pioneers' Home addition	Anchorage	$7,500,000
(2)	Pioneers' Home	Ketchikan	5,000,000

* Sec. 4. If the issuance of these bonds is authorized by the qualified voters of the state, the amount of $87,500 or as much of that amount as is found necessary is appropriated from the general fund of the state to the state bond committee to carry out the provisions of this Act and to pay expenses incident to the sale and issuance of the bonds authorized in this Act. The amounts expended from the appropriation authorized by this section shall be reimbursed to the general fund from the proceeds of the sale of the bonds authorized by this Act.

* Sec. 5. The amount withdrawn from the public facility planning fund for the purpose of advance planning for the improvements financed under this Act shall be reimbursed to the fund from the proceeds of the sale of bonds authorized by this Act.

* Sec. 6. The question whether the bonds authorized in this Act are to be issued shall be submitted to the qualified voters of the state at the next general election and shall read substantially as follows:

Proposition

State General Obligation Health Facilities and Senior Citizen Centers and Pioneers' Homes Construction Bonds $25,000,000

Shall the State of Alaska issue its general obligation bonds in the principal amount of not more than $25,000,000 for the purpose of paying the cost of capital improvements for health facilities, senior citizen centers and pioneers' homes?

Bonds Yes [ ]

Bonds No [ ]

* Sec. 7. This Act takes effect immediately in accordance with AS 01.10.070(c).

Approved by the Governor. July 8, 1978

(Identical to Senate Bill 326)

"An Act authorizing state aid for service programs for the benefit of older Alaskans."

House Bill 611 creates a state aid program for providing services to benefit older Alaskans. The program would be administered by the Older Alaskans Commission, (created by House Bill 618). House Bill 611 would provide for grants for pilot projects and community service programs. Each sponsor receiving a grant would be required to provide cash or in-kind match, as a condition of receiving state grant funds. The amount of the sponsor contribution would be based on the community's ability to pay, which is determined by property values and the population planned to be served by the grants. The cost of the grants provided for in H.B. 610 is $1 million dollars in state general funds in FY 81.

The Department of Health and Social Services recognizes that there are many programs and services needed by seniors that are currently not routinely provided by any public or private source. House Bill 610 would help bridge the gap by provided funds for pilot project to experiment on innovative and potential cost-saving ways to provide services to seniors and by providing funds for expanded community service grants.

Potential Discussion Areas

1. With no requirement that the Commission consider geographical diversity of grant awards, it may be possible for the entire appropriation to go to a single area of the state, rather than be distributed equally throughout Alaska.

2. The Department of Health and Social Services prepares extensive needs assessments and state plans, especially in the areas of health and facility construction. It may be useful to include a requirement that the Commission utilize existing state plans and needs assessments in its evaluation of the merits of proposed projects.

3. The multitude of programs eligible for grants may provide a scattergun approach to service needs of seniors, rather than a clearly defined comprehensive look to solve a specific problem. For example, the needs for residential care in the state are great and could easily absorb the entire $1 million dollars appropriation. It may be useful for the bill to include a list of priorities to assist the Commission in its deliberations. Such as, in the first year, a priority might be funding projects that have potential of long run cost effectiveness and provide for increased self-sufficiency of seniors.

POSITION PAPER/Department of Health & Social Services

4. We can foresee that such an extensive grant program that covers a multitude of services will attract alot of interest from many parties. This would require the Commission to process and evaluate many grant applications. These extensive grant reviews and evaluation processes could serve to bog down the Commission. Since it plans to meet only six (6) times a year, necessary coordination of programs and providing advice to state departments may be potentially neglected, as a result.

The Department of Health and Social Services supports the concepts embodied in House Bill 611. We would also like to refer the Committee to the Department's position paper on H.B. 618 - the creation of the Older Alaskans Commission - and reconfirm our position that we do not believe it appropriate for the Commission to handle day-to-day management functions such as those anticipated by House Bill 610 and House Bill 611.

Discussion Paper: OLDER ALASKANS COMMISSION

PROPOSAL: To establish an Older Alaskans Commission under the Office of the Governor.

* The commission would assume responsibility for all programs, functions and services of the Office on Aging and the Governor's Advisory Committee on Aging.

* Powers would include:
1) formulate a comprehensive state plan and annually analyze and evaluate services for older Alaskans;
2) make recommendations to the governor and the legislature;
3) aid in the development of local commissions; and
4) employ an executive director.

* To accomplish its duties, the commission would be able to do a number of things, the most important of which are:
1) review, evaluate and comment upon state programs concerned with the problems and needs of older Alaskans; and
2) set standards for levels of services for older Alaskans for programs administered by the commission.

* The commission would have 11 members: commissioners of Administration, Health & Social Services, and Community & Regional Affairs; the chairman of the Pioneers' Homes Advisory Board; and seven citizens, six of whom must be over the age of 60 and two of whom must be over the age of 65. Appointments would have to assure representation for low-income persons, minorities, urban, rural and geographic areas.

* The enabling legislation would also include a state policy in regard to older Alaskans.

BACKGROUND:

* This commission is being proposed by the State Committee on Services to the Elderly, a joint legislators/citizens committee established by the legislature during the 1979 interim. The committee's charge was to "consider the problems and make recommendations regarding improved delivery of benefits and services to elderly Alaskans."

* The assumptions upon which the committee acted are as follows:
1) the state presently provides more than 25 different services and benefits to senior citizens, administered by at least 11 different agencies;
2) the state presently spends over $50 million in General Fund monies for the benefit of approximately 20,000 Alaskans over the age of 60;
3) older Alaskans now facing the disabilities and financial limitations of their retirement years deserve the best the state can provide them; and
4) older Alaskans could perhaps be more conveniently, economically and effectively served by consolidating and coordinating the administration of these various state services and expenditures.

RATIONALE:

* Prior to the development of this proposal, the committee held four public hearings three meetings and two teleconferences. The committee had 96% attendence at the public hearings which drew 238 persons. (See summaries of public hearings for specific comments relating to the commission.)

* The committee has intentionally and continuously involved persons from the affected departments from the beginning of the developmental process, including Administration, Health & Social Services, Community & Regional Affairs, DOT/PF and the Office of the Governor.

SB 328

* The Older Alaskans Commission is intended to be the "single agency" responsible for policy development, planning and coordination of all state-operated services and benefits programs unique to citizens over the age of 60. To be effective in performing its duties - which reach across several departments - the committee believes the commission should be located under the Office of the Governor. To do otherwise would be to invite in-fighting between departments. Is it possible that the commissioner of one department would be happy to "take orders" from the commissioner of another department? The membership of the commission, and its placement, is designed to put everyone on an equal footing.

* Establishment of the commission would enable all departments involved to better coordinate and deliver services and benefits without causing any drastic shifts within the different administrative units. The only change in the staus quo would be the transfer of the Office on Aging from the Department of Health & Social Services to the commission under the Office of the Governor. The committee believes this is necessary for the following reasons:

1) To keep the commission and the Office on Aging separate would be duplicative since many of the functions of both would be identical. The idea is to reduce duplication and fragmentation of effort, not increase it. Older Alaskans want and need a "single agency" to whom to turn for information and assistance. The commission would be the focal pt.

2) Including the Office on Aging's programs within the commission, under the Office of the Governor, would effectively remove any stigma of "welfare" which is presently associated with any and all programs within the Department of Health & Social Services.

3) The Department of Health & Social Services has not compiled a good record on programs for the aging. The Office on Aging is consistently given low budget priority, little direct support from the department, and interaction with the advisory committee has been effectively non-existent. If the department had been innovative with the Office on Aging, there would have been no need for our interim committee, much less the commission.

4) With the proposed abolition of the Governor's Advisory Committee on Aging, the commission would, because of the federal requirements of the Older Americans Act, have to have a special relationship with the Office on Aging anyway. In the past, the GACA has had responsibility for determining where and how the Older Americans Act monies are spent; this proposal would continue that practice of allowing citizen participation in the decision-making while enhancing the members' ability to do an effective job.

5) Under this proposal, the commissioner of Health & Social Services would have even greater involvement - as a member of the commission - with the functions of the Office on Aging than ever before.

6) Review of other states' statutes reveals that in those states which have some version of a Commission on Aging (Tennessee, Nebraska, Ohio, Alabama, Iowa, Indiana, Hawaii, California, West Virginia and Georgia), the majority of them are also designated as the state agency on aging.

7) In 1975 a bill similar to the one here proposed was before the legislature (SB 196). That bill would have created a Commission on Aging under the Office of the Governor. At that time, the position of the Department of Health & Social Services, according to the April 10, 1975 position paper signed by Commissioner Francis Williamson was:

> "This office recognizes the needs and desires to attempt to provide for the inclusion into a single new chapter within Alaska statutory law of a comprehensive and coordinated program pertaining to aging... positioning of the Commission on Aging in the Governor's Office will give this Commission visibility that the present Office on Aging lacks... Proposed Amendment 1: change title (from An Act creating the Commission on Aging) to 'Creating the Commission on Aging to replace the Office on Aging and transferring that Office to the Office of the Governor.' Rationale: This would remove the necessity of having two bodies...as the powers and duties of the Commission.., duplicate almost exclusively the work being performed presently by the staff of the Office on Aging."

SB 314

Section 3: STATE ASSISTANCE FOR MULTI-PURPOSE SENIOR CENTERS

* AS 47.60.065 would allow for the commission to make grants available to local sponsors of centers not to exceed one-half of the estimated annual costs for utilities, custodial services, and routine maintenance and repair.

Section 4: SERVICE PROGRAMS FOR OLDER ALASKANS

* AS 47.65.010 would establish this account under the commission subject to annual appropriation by the legislature. This is money for senior programs.

* AS 47.65.020 would set up a mechanism for appropriating that money to local programs. Intended to effect real local control, this section requires that not less than 60 percent of the above-mentioned account (comprised of federal Older Americans Act monies as well as state General Fund monies) would be distributed to community programs on the basis of a formula-funding centered on persons served. Includes an increment for area differentials. If the account is insufficiently funded to meet 100 percent of the formula, then what money is available is distributed pro rata among eligible sponsors.

* AS 47.65.030 would set up a mechanism to distribute the remainder of the account as pilot projects grants. These would be discretionary to the commission, as opposed to the above which is more categorical in nature. The commission would determine who gets what, and would set the standards and administer the grants.

* AS 47.65.040 would require local match for program monies as a function of the size and wealth of the community sponsoring the grant. Communities with a greater tax base would pay a higher match than those with a lesser tax base; ranges from a maximum of 30 percent to a minimum of one percent. The match formula is identical to one passed into law last year in the Cultural Facilities program.

* AS 47.65.050 lists the requirements of a program sponsor in order to be eligible:

- fiscal accountability;
- demonstration of the actual cost of service;
- audit trail;
- accountability to commission standards.

FACT SHEET: "An act establishing an Older Alaskans Commission, and relating to programs of benefit to persons 60 years of age and older; and providing for an effective date."

SB328

(1)

Section 1: FINDINGS AND PURPOSE

* Establishes by law a state policy regarding older Alaskans (persons over age 60).

* Section 1 (a) 1-9 is fashioned after the policy statement of the Older Americans Act.

* Section 1 (b) 1-4 describes the purpose of this legislation: to provide

- more and better programs for older Alaskans;
- special attention to programs for older Alaskans;
- improved delivery of services for older Alaskans;
- monitoring of programs for older Alaskans by older Alaskans.

Section 2: OLDER ALASKANS COMMISSION

* AS 44.19.970 establishes the commission in the Office of the Governor as an 11-member policy development, planning and coordinating body. The membership consists of:

- commissioners of Administration, Community & Regional Affairs, and Health & Social Services;
- chairman of the Pioneers' Homes Advisory Board;
- seven citizens-at-large, a majority of whom must be over 60, two of whom must be over 65.

* The citizens-at-large are appointed by the governor for four year terms; no member may serve more than two terms.

* AS 44.19.972 establishes that the commission shall meet at least six times/year.

* AS 44.19.974 establishes that members receive no pay, only per diem.

* AS 44.19.976 lists the powers and duties of the commission. Essentially a policy planning, development and coordinating body, it would be the single state agency overseeing all state aging programs. Specifically, it would:

-formulate a comprehensive state plan annually for the benefit of the governor and the legislature;
- conduct an annual conference;
- make budgeting recommendations to the governor and the legislature;
- assist local programs;
- assist in the development of local commissions;
- hire its own executive director;
- review, evaluate and comment on all state aging programs;
- be the focal point for inquiries regarding aging and older Alaskans;
- administer the Older Americans Act programs;
- administer state assistance for multi-purpose senior centers; and
- administer grants for community programs.

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR SENATE BILL NO. 328

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act establishing an Older Alaskans Commission; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS AND PURPOSE. (a) The legislature finds that the changing pace of modern life, economic inflation, the infirmities of advancing years, and alterations in the traditions and values of family life have combined to place many older Alaskans in an unenviable position of poverty and dependency that endangers their health, well-being and safety. In keeping with the inherent dignity and respect due the individual in our society, older Alaskans are entitled to secure equal opportunity to the full enjoyment of

(1) an adequate income in accordance with a decent standard of living;

(2) sound physical and mental health, without regard to economic status or condition;

(3) suitable housing, selected, designed and located with reference to the special needs and concerns of older Alaskans at reasonable cost;

(4) full restorative health services for those older Alaskans in need of institutional care;

(5) opportunity for employment without discrimination;

(6) pursuit of meaningful activity within a wide range of civic, cultural and recreational opportunities;

(7) appropriate in-home care and readily available community social assistance;

(8) independence and the fullest exercise of individual initiative on the part of older Alaskans in the planning and management of their lives.

(b) It is the purpose of this legislation to assure that the years remaining to people over the age of 60 are years of good health, honor, and dignity by

(1) providing necessary social services, health services, employment services, and educational opportunities to older Alaskans;

(2) giving special attention to the needs of older Alaskans in the planning and delivery of state and local programs;

(3) improving the delivery of all public services essential to the lives of older Alaskans; and

(4) requiring that the planning and provision of programs of benefit to older Alaskans will be undertaken with the participation, knowledge, advice, and comments of people served.

* Sec. 2. AS 44.21 is amended by adding new sections to read:

ARTICLE 4. OLDER ALASKANS COMMISSION.

Sec. 44.21.200. OLDER ALASKANS COMMISSION. (a) There is established in the Department of Administration the Older Alaskans Commission. The members of the commission include

(1) the commissioner of the Department of Administration, or his designee;

(2) the commissioner of the Department of Community and Regional Affairs, or his designee;

(3) the commissioner of the Department of Health and Social Services, or his designee;

(4) the chairman of the Pioneers' Homes Advisory Board appointed under AS 44.21.100 - 44.21.130; and

(5) seven Alaskans selected on the basis of their knowledge and demonstrated interest in the concerns of older Alaskans, appointed

by the governor in accordance with (b) of this section.

(b) After requesting from senior citizen organizations the names of persons who are qualified for and interested in serving on the commission, the governor shall appoint the members of the commission under (a)(5) of this section. Appointments shall be made by the governor to assure representation of low-income persons and minorities, and representation from rural and urban areas of the state, and to secure statewide geographical representation on the commission. At least five of the persons appointed by the governor shall be 60 years of age or older. At least two of these persons shall be 65 years of age or older.

(c) The persons appointed under (a)(5) of this section serve overlapping four-year terms. A member may be reappointed, but no member appointed under (a)(5) of this section may serve more than two consecutive terms or eight consecutive years, whichever is longer.

(d) If a person appointed under (a)(5) of this section fails to attend three consecutive meetings of the commission, a majority of the members of the commission may request the governor to terminate the membership of the member and to fill the vacancy.

(e) A vacancy in the membership of persons appointed under (a)(5) of this section shall be filled by appointment by the governor. The person appointed shall serve for the unexpired portion of the term.

Sec. 44.21.210. MEETINGS. (a) The commission shall meet at the call of the chairman, at the request of a majority of the members, or at a regularly scheduled time as determined by a majority of the members. The commission shall meet at least six times each year.

(b) A majority of the members of the commission constitutes a quorum for conducting business and exercising the powers of the commission.

(c) The commission shall elect one of its members as chairman, and

may select other officers it considers necessary.

Sec. 44.21.220. COMPENSATION. Members of the commission receive no compensation for their services, but are entitled to per diem and travel allowances authorized by law for other boards and commissions.

Sec. 44.21.230. POWERS AND DUTIES. (a) The commission shall

(1) formulate a comprehensive statewide plan which identifies the concerns and needs of older Alaskans and, with reference to the plan adopted, prepare and submit to the governor and legislature an annual analysis and evaluation of the services which are provided to older Alaskans;

(2) make recommendations to the appropriate state agencies and to the legislature with respect to legislation, regulations, and appropriations made for programs or services which benefit older Alaskans;

(3) encourage the development of municipal commissions serving older Alaskans and community-oriented programs and services for the benefit of older Alaskans;

(4) employ an executive director who serves at the pleasure of the commission;

(5) administer federal programs relating to older Alaskans requiring state action which are not specifically assigned to a state agency;

(6) request and receive reports and audits from state agencies and local institutions concerned with the conditions and needs of older Alaskans.

(b) To accomplish its duties, the commission may

(1) review, evaluate and comment upon state programs concerned with the problems and the needs of older Alaskans;

(2) collect facts and statistics, and make studies of condi-

tions and problems pertaining to the employment, health, financial security, social welfare, and other concerns which bear upon the well-being of older Alaskans;

(3) provide information about public programs which would be of interest or benefit to older Alaskans;

(4) appoint special committees, including persons who are not members of the commission, to complete necessary studies;

(5) promote community education efforts regarding the problems and concerns of older Alaskans;

(6) apply for and accept grants, contributions, and appropriations, including making application for and accepting federal funds provided under the Older Americans Act, P.L. 89-93, as amended;

(7) consult and cooperate with persons, organizations, and groups interested in or concerned with programs of assistance to older Alaskans;

(8) advocate improved programs of benefit to older Alaskans; and

(9) set standards for levels of services for older Alaskans for programs administered by the commission.

Sec. 44.21.240. DEFINITIONS. In AS 44.21.200 - 44.21.240, "commission" means the Older Alaskans Commission.

* Sec. 3. AS 44.66.010(a) is amended by adding a new paragraph to read:

(8) Older Alaskans Commission (AS 44.21.200) -- June 30, 1984.

* Sec. 4. TRANSFER OF PROGRAM RESPONSIBILITIES. The programs and personnel of the office on aging in the Department of Health and Social Services and the Governor's Advisory Committee on Aging are transferred to the Older Alaskans Commission in the Department of Administration.

* Sec. 5. INITIAL MEMBERSHIP AND MEETING OF COMMISSION. (a) Of the

seven public members first appointed by the governor to the Older Alaskans Commission under AS 44.21.200(a)(5),

(1) two shall serve a term of two years;

(2) three shall serve a term of three years;

(3) two shall serve a term of four years.

(b) In making appointments of the initial public members of the Older Alaskans Commission under AS 44.21.200(a)(5), the governor shall designate an expiration date of the terms of members first appointed in accordance with (a) of this section.

(c) The governor shall determine the date and place of the initial meeting of the Older Alaskans Commission.

* Sec. 6. CONTINUING RESPONSIBILITY OF THE DEPARTMENT OF ADMINISTRATION. This Act does not affect the responsibility of the Department of Administration for the Alaska longevity bonus program (AS 47.45) or the Alaska Pioneers' Homes (AS 44.21.100 - 44.21.130).

* Sec. 7. EFFECTIVE DATE. This Act takes effect July 1, 1980.

Introduced: 1/15/80
Referred: Health, Education & Social Services and Finance

BY THE RULES COMMITTEE BY REQUEST OF THE LEGISLATIVE COUNCIL (for the Interim Committee on Services for the Elderly)

ARTICLE 4. OLDER ALASKANS COMMISSION.

Sec. 44.21.200. OLDER ALASKANS COMMISSION. (a) There is established in the Department of Administration the Older Alaskans Commission. The members of the commission include

(1) the commissioner of the Department of Administration, or his designee;

(2) the commissioner of the Department of Community and Regional Affairs, or his designee;

(3) the commissioner of the Department of Health and Social Services, or his designee;

(4) the chairman of the Pioneers' Homes Advisory Board

appointed under AS 44.21.100 - 44.21.130; and

(5) seven Alaskans selected on the basis of their knowledge and demonstrated interest in the concerns of older Alaskans, appointed by the governor in accordance with (b) of this section.

(b) At least six of the persons appointed under (a)(5) of this section shall be 60 years of age or older. Not less than two of these persons shall be 65 years of age or older. Appointments shall be made by the governor to assure representation of low-income persons and minorities, and GEOGRAPHICAL representation from rural and urban areas of the state, and to secure statewide [geographical] representation on the commission.

(c) The persons appointed under (a)(5) of this section serve overlapping four-year terms. A member may be reappointed, but no member appointed under (a)(5) of this section may serve more than two consecutive terms or eight consecutive years, whichever is longer.

(d) If a person appointed under (a)(5) of this section fails to attend three consecutive meetings of the commission, a majority of the members of the commission [shall] MAY request the governor to terminate the membership of the member and to fill the vacancy.

(e) A vacancy in the membership of persons appointed under (a)(5) of this section shall be filled by appointment by the governor. The person appointed shall serve for the unexpired portion of the term.

Sec. 44.21.210. MEETINGS. (a) The commission shall meet at the call of the chairman, at the request of a majority of the members, or at a regularly scheduled time as determined by a majority of the members. The commission shall meet at least six times each year.

(b) [The members of the commission who serve under AS 44.21.-200(a)(1) - (3) may not vote on matters before the commission.] A majority of the members of the commission [who serve under AS 44.21.-200(a)(4) and (5)] constitutes a quorum for conducting business and

exercising the powers of the commission.

(c) The commission shall elect one of its members as chairman, and may select other officers it considers necessary.

Sec. 44.21.220. COMPENSATION. Members of the commission receive no compensation for their services, but are entitled to per diem and travel allowances authorized by law for other boards and commissions.

Sec. 44.21.230. POWERS AND DUTIES. (a) The commission shall

(1) formulate a comprehensive statewide plan which identifies the concerns and needs of older Alaskans and, with reference to the plan adopted, prepare and submit to the governor and legislature an annual analysis and evaluation of the services which are provided to older Alaskans;

(2) make recommendations to the [governor] and legislature with respect to legislation, regulations, and appropriations made for programs or services which benefit older Alaskans;

(3) encourage [and aid] the development of municipal commissions serving older Alaskans and [community-based] programs and services for the benefit of older Alaskans;

(4) employ an executive director who serves at the pleasure of the commission;

(5) administer federal programs relating to older Alaskans requiring state action which are not specifically assigned to a state agency;

[(6) help older Alaskans lead dignified, independent and useful lives;] and

(7) request and receive reports and audits from state agencies and local institutions concerned with the conditions and needs of older Alaskans.

(b) To accomplish its duties, the commission may

(1) review, evaluate and comment upon state programs concerned with the problems and the needs of older Alaskans;

(2) collect facts and statistics, and make studies of conditions and problems pertaining to the employment, health, financial security, social welfare, and other concerns which bear upon the well-being of older Alaskans;

(3) provide information about public programs which would be of interest or benefit to older Alaskans;

(4) appoint special committees, including persons who are not members of the commission, to complete necessary studies;

(5) promote community education efforts regarding the problems and concerns of older Alaskans;

(6) apply for and accept grants, contributions, and appropriations, including making application for and accepting federal funds provided under the Older Americans Act, P.L. 89-93, as amended;

(7) contract for necessary services;

(8) consult and cooperate with persons, organizations, and groups interested in or concerned with programs of assistance to older Alaskans;

(9) advocate improved programs of benefit to older Alaskans; and

(10) set standards for levels of services for older Alaskans for programs administered by the commission.

Sec. 44.21.240. DEFINITIONS. In AS 44.21.200 - 44.21.240, "commission" means the Older Alaskans Commission.

* Sec. 3. AS 44.66.010(a) is amended by adding a new paragraph to read:

(8) Older Alaskans Commission (AS 44.21.200) -- June 30, 1984.

Replace with Body #6

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The Older Alaskans Commission, which would be established by these bills, would provide statewide coordination for all efforts to provide services to the elderly of Alaska. As written, these bills would bring the Office on Aging into the Department of Administration as an agency directly operated by the Older Alaskans Commission. The Office on Aging is presently a part of the Department of Health and Social Services.

In order to accomplish the duties prescribed under Section 44.21.230, five new positions will be required:

Executive Director	(R24)
Clerk Typist III	(R 8)
Accounting Clerk III	(R10)
Research Analyst III	(R18)
Planner IV	(R19)

IV. DATE 3/5/80 PREPARED BY George T. Michael

AGENCY Administration

PHONE 465-4401

Original: Legislative Finance

cc: Budget and Management

Prime Sponsor (First Legislator Named) Senator Rodey

Office of the Governor (Keith Specking)

33-001 (Rev. 12/79)

The need for two of the requested positions has been questioned. The Department of Administration would like to reiterate that to take over the existing Office on Aging plus additional responsibilities mandated in this bill, all positions in this fiscal note will be required. The two positions for which the need has been questioned are the Planner and the Accounting Clerk. The Planner will be needed because the additional appropriation for grants will permit grantees to apply for grants in areas for which grants are not presently awarded. This will greatly increase the number of grant applications. In addition there is a need for statewide coordination of all programs which affect the aged. The accounting clerk position will be needed to provide support now given to the Office on Aging by centralized support staff in the Department of Health and Social Services. The Division of Administrative Services in the Department of Administration cannot provide centralized fiscal and personnel services to a program the size of the Office on Aging without the addition of at least one position.

The position of Executive Director has been requested at the level of Range 24 as these positions are generally classified at either Range 24 or 26.

The Governor's Advisory Board on Aging, consisting of 7 members, would be abolished and replaced by the Commission. Travel costs are based on meeting at least 6 times per year, rather than 4 times per year now done by the Governor's Advisory Board on Aging. Therefore, travel and per diem expense is included in above costing for the 11 member commission, plus the Executive Director and 2 meetings for the Planner.

Inflation is computed at 10% per year for years beyond FY 81. Inflation is included in all categories, including grants, except for one time purchases of equipment items. Items of equipment for years beyond FY 81 are for replacement of worn out office furnishings only.

Because the amount of Federal receipts cannot be accurately projected for future years, we have assumed that they will remain constant.

JUSTIFICATION:

This position is needed to oversee and plan for the orderly review and evaluation of State programs concerned with the problems and needs of older Alaskans, and for making recommendations for improvement in these programs. This position is also instrumental in formulating a State plan, which may increase federal participation in funding services to the elderly. The position will supervise a Research Analyst III in collecting and analyzing facts and statistics which bear upon the well being of older Alaskans.

AGENCY Administration
PHONE 465-4401

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

33-001 (Rev. 10/78)

Also, included in the above computation of costs is $1,000,000 in grant funds which is proposed for the Older Alaskans Commission by S.B. 327/H.B. 610. It is assumed that these additional grant funds will be handled by the present Office on Aging staff, except for the additional Accounting Clerk which is included above.

The Governor's Advisory Board on Aging would be abolished and replaced by the Commission. Therefore, travel and per diem expense is included in above costing for the 11 member commission, plus the Executive Director and 2 meetings for the Planner.

Inflation is computed at 10% per year for years beyond FY 81. Inflation is included in all categories, including grants, except for one time purchases of equipment items. Items of equipment for years beyond FY 81 are for replacement of worn out office furnishings only.

Projects list set for regents' nod

By DAN JOLING
Staff Writer

University of Alaska President Jay Barton will seek Board of Regent approval next week for a revised capital improvement budget of $34 million, a listing already submitted to the state Senate.

On the list of items designated for UA-Fairbanks is $2 million for a marine center in Seward, $1.3 million for a receiving center and $800,000 for utilities modification.

The list also includes a $600,000 request for upgrading the Yak Estates housing complex and $774,000 for instructional equipment at Tanana Valley Community College.

Following legislative approval of a university general obligation bond package, the request will go before voters on the November ballot.

A preliminary list of projects worth $71.1 million was submitted by the regents to Gov. Jay Hammond, who chopped the list to $20 million.

But Sen. Glenn Hackney, chairman of the senate Health, Education and Social Services Committee, requested Feb. 20 that Barton prepare another list with improvements totaling $34 million.

Barton submitted the list about a week later, and now it is in the Senate Finance Committee as SB 343. The list is expected to be approved by the regents at their meeting March 20-21 in Juneau.

The request asks that $6.2 million be designated for UAF, $6.7 million for Anchorage and $7.1 million for Juneau. It also asks $917,000 for three statewide projects and $13.6 million for the 12 community colleges and the cooperative extension service.

The Marine Center in Seward, taking up almost a third of the funds directed for UAF, would be for both research and community use, under the jurisdiction of the Fairbanks campus.

The $1.3 million central receiving facility, a warehouse to store equipment and bulk purchases, would be built as an extension of UAF's physical plant.

The physical plant itself will be in line for $500,000 of preventive maintenance and improvements if the budget is approved. Another $800,000 would be spent on improving utilities, and $200,000 for a utilities monitoring system, coordinating utilities in UAF buildings by computer to improve energy efficiency.

The $600,000 designated for Yak Estates would be used for remodeling. The controversial 96-unit energy inefficient apartment complex has been a source of vigorous discussion at recent regents meetings, with at least one board member recommending the units be boarded up. Administrators hope instead to attract more tenants and minimize losses on long-term debt.

Low-interest federal funds of about $496,000 are also being sought for Yak Estates to make the apartments more energy efficient.

The overall request to the Legislature calls for $2.5 million in road, streets and parking improvements, of which $500,000 would be used in Fairbanks.

Across the state the budget calls for $2.8 million for instructional equipment, including $353,000 for UAF and $774,000 for TVCC.

The three state-wide projects listed include $470,000 for a computer system, $395,000 for a campus development plan and $52,000 for a teleconference link to the Legislature. The computer system would allow all branches of the university to hook into the central computer in Fairbanks. Campus development plan funds would be used to study physical and academic needs of the university.

The requests ask for $525,000 for handicap barrier removal at seven campuses: Anchorage, Juneau, Anchorage Community College, Ketchikan Community College, Kuskokwim Community College in Bethel, Mat-Su Community College in Palmer and Northwest Community College in Nome.

The biggest chunk of the community college request would go for a classroom-shop building at the Kenai Penninsula Community College in Soldotna.

Another $1.5 million would be designated for classroom, office and library space for Prince William Sound Community College in Valdez.

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR SENATE BILL NO. 343

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act providing for the issuance of general obligation bonds in the amount of $34,616,000 for the purpose of paying the cost of capital improvements for University of Alaska facilities; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. For the purpose of paying the cost of capital improvements for University of Alaska facilities, general obligation bonds of the state in the principal amount of not more than $34,616,000 shall be issued and sold. The full faith, credit and resources of the state are pledged to the payment of the principal of and interest and redemption premium, if any, on these bonds. These bonds shall be issued under the provisions of AS 37.15 as those provisions read at the time of issuance.

* Sec. 2. If the issuance of these bonds is authorized by the qualified voters of the state, a special fund of the state to be known as the "1980 University of Alaska Facilities Construction Fund" shall be established, to which shall be credited the proceeds of the sale of the bonds described in sec. 1 of this Act except for the accrued interest and premiums. The amount of $34,616,000 is appropriated from the "1980 University of Alaska Facilities Construction Fund" to the University of Alaska. The proceeds of these bonds shall be allocated in accordance with the following projects and estimates:

Project	Amount
STATEWIDE ADMINISTRATION:	
(1) campus development plan	$ 395,000

(2) on-line computer system	470,000
(3) university/legislative teleconference link	52,000
UNIVERSITY OF ALASKA, FAIRBANKS:	
(4) instructional equipment	353,000
(5) Seward Marine Center	2,000,000
(6) roads, streets and parking	500,000
(7) central receiving facility	1,300,000
(8) utilities modification	800,000
(9) utilities monitoring system	200,000
(10) physical plant and improvements	500,000
(11) Yak Estates improvements	600,000
UNIVERSITY OF ALASKA, ANCHORAGE:	
(12) instructional equipment	296,000
(13) handicap barrier removal	100,000
(14) building improvements	100,000
(15) roads, streets and parking	500,000
(16) engineering equipment	300,000
(17) art department equipment	220,000
(18) construct bookstore to serve university and community college campuses	5,200,000
UNIVERSITY OF ALASKA, JUNEAU:	
(19) instructional equipment	162,000
(20) handicap barrier removal	100,000
(21) roads, streets and parking	150,000
(22) construct University Center, phase I	6,000,000
(23) land acquisition	150,000
(24) Pratt/Ely property improvements	600,000
COMMUNITY COLLEGES, RURAL EDUCATION, AND EXTENSION CENTERS:	

	Project	Community College	Amount
(25)	instructional equipment	Anchorage	$ 492,000
(26)	handicap barrier removal	Anchorage	150,000

(60)	construct learning center	Galena	750,000
(61)	vocational-technical equipment for rural education extension	statewide	50,000
(62)	instructional equipment for cooperative education service	statewide	51,000

* Sec. 3. If the issuance of these bonds is authorized by the qualified voters of the state, the amount of $122,000 or as much of that amount as is found necessary is appropriated from the general fund of the state to the state bond committee to carry out the provisions of this Act and to pay expenses incident to the sale and issuance of the bonds authorized in this Act. The amounts expended from the appropriation authorized by this section shall be reimbursed to the general fund from the proceeds of the sale of the bonds authorized by this Act.

* Sec. 4. The amount withdrawn from the public facility planning fund for

the purpose of advance planning for the improvements financed under this Act shall be reimbursed to the fund from the proceeds of the sale of bonds authorized by this Act.

* Sec. 5. The question whether the bonds authorized in this Act are to be issued shall be submitted to the qualified voters of the state at the next general election and shall read substantially as follows:

Proposition

State General Obligation University of Alaska Facilities Construction Bonds $34,616,000

Shall the State of Alaska issue its general obligation bonds in the principal amount of not more than $34,616,000 for the purpose of paying the cost of capital improvements for University of Alaska facilities?

Bonds Yes [ ]

Bonds No [ ]

* Sec. 6. This Act takes effect immediately in accordance with AS 01.10.070(c).

Vice President For Finance

UNIVERSITY OF ALASKA
Statewide System of Higher Education
Fairbanks, Alaska 99701

February 15, 1980

Senator Glenn Hackney
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

This letter is to provide information which I understand that one of your assistants, Mary Isaac, requested in relation to Senate Bill # 343.

One question which I understand that she had was the position of the board of regents with respect to that legislation. The board of regents submitted a request, in priority order, for capital projects to be funded by direct appropriation and by general obligation bonds. The governor has recommended funding of certain items from that listing. The board of regents has not changed its initial request. Related matters are explained in the first attachment, which is material that I earlier sent to Representative Brian Rogers on 31 January.

I understand that Mary also asked for information on outstanding bond funds for construction to include information on where projects funded by 1978 general obligation bonds are located. This information, and related information, is presented in the second attachment, which is material I sent to Representative Brian Rogers on 29 October.

President Jay Barton and I are scheduled to be in Juneau for hearings on 19 and 20 February. Therefore, if you wish, we can discuss the capital budget needs of the university at that time.

Thank you very much for the help which you give to the University of Alaska.

Sincerely,

Sherman Carter

Chancellor Harrison
Chancellor Paradise
Chancellor O'Rourke

FROM: Sherman Carter
Vice President for Finance

RE: FY81 Budget Request

The Governor's Budget Message to the legislature has indicated full support of the University of Alaska FY81 Operating Budget request. Thus the Governor's recommendation for the University of Alaska operating budget expenditure level for FY81 is at the same level as approved by the Board of Regents.

However, the Governor's recommendation for the University of Alaska Capital Budget is not as encouraging. We notified the Governor's Office of concern expressed by the Chancellors. The following represents the Governor's decision on the capital budget.

Approved General Fund Projects, FY81:	
Instructional Equipment - All Units	$ 1200.0
Repair Elvey Building - UAF	120.0

Approved G.O. Bond Projects, FY81:	
Handicap Barrier Removal - All Units	525.0
General Building Upgrade - All Units	950.0
Utilities Modification - UAF	800.0
Yak Estates Changes - UAF	600.0
Arts Classroom - UAA	12000.0
Sitka Sewer Connection	75.0
Kenai Classroom	5600.0

UA's request for instructional equipment of $4044.0 was reduced to $1200.0 by the Governor's Office. Individual major administrative units' recommended amount for the instructional equipment, divided proportionately, is 29.67% of the Board of Regents requested amount for each of the major administrative units. Funding for Handicap Barrier Removal and General Building Upgrade has been recommended for the units as approved by the Board of Regents.

MEMORANDUM

To: Sherman Carter
Vice President for Finance

From: Howard A. Cutler
Chancellor

Subj: FY81 Budget Request

Ref: Your memo dated Jan. 21, 1980

Thank you for your memorandum regarding the Governor's Budget Message to the Legislature on the capital budget. I am distressed that the Governor ignored the Regents first priority, the Seward Educational Center. This can mean the loss of the land adjacent to the Marine Research Station and, hence, the long-range future of our fishing program in Seward.

If you have any instructions as to how I can cooperate, such as rallying some people from the city of Seward, please let me know.

We are very grateful for what you are doing in behalf of this important project.

HAC:lfk

Second Attachment

UNIVERSITY OF ALASKA
Statewide System of Higher Education
Fairbanks, Alaska 99701

October 29, 1979

Representative Brian Rogers
P. O. Box K
College Branch
Fairbanks, Alaska 99708

Dear Representative Rogers:

This is the report on the status of pending University of Alaska capital projects which you and Representative Russ Meekins requested last Thursday, and which I said that I would send to you today.

The first attachment summarizes the status of expenditures for the university's capital projects. The university draws money from the state as necessary to pay for such projects. The state holds funds' balances. The university's audited financial statements indicate that on June 30, 1979, the university's unexpended plant funds receivable from the state amounted to $37,256,378.

The second attachment shows specific information which you and Representative Meekins requested, namely (a) a listing of individual projects, (b) funding sources, (c) the current status of each project, (d) estimated completion dates for projects, (e) problems and related information. Requests for more information about any specific project may be referred to Mr. Greg Kasprzak, Director of Facilities Planning and Construction for the University of Alaska or to me.

The third attachment is correspondence illustrating problems we have had in making expenditures for such things as library construction in Nenana and a facility in Point Barrow.

You asked if there were any of these projects on which the board of regents did not plan to proceed. My understanding is that the board plans to go ahead with all the projects which the legislature funded. Some of the projects however have been held up because of academic program decisions. These cases are noted on the second attachment. For example, academic program decisions have changed plans as to how most effectively to use the $2.3 million for a building for TVCC.

The Univer ity of Alaska is doing everything properly possible to expedite the completion of all authorized capital projects. Projects currently authorized will essentially be completed in 1981 although small amounts of money in some cases will remain to be used for such things as rectifying certain problems in connection with the buildings. We will proceed as quickly as possible to close out accounts for each building, lapsing unexpended funds to the state.

Sincerely,

Sherman Carter
Vice President for Finance

FY81 Capital Projects - Possible Conversion from G.O. Bonds to Direct Appropriation.

The University of Alaska would be in a better position to recommend coversion from G.O. Bonds to Direct Appropriation if it had knowledge of what projects are being approved by the legislature. However, since that is not possible at this time, the following projects currently being requested under G.O. Bonds could be considered for Direct Appropriation, if the legislature so desires.

Priority Number	Unit	Project Title	Amount
1	All	Instructional Equipment	$4044.0
2	UA/Fairbanks	Seward Marine Educ. Ctr.	2000.0
5	All	General Building Upgrade	950.0

First Attachment

UNIVERSITY OF ALASKA
Statewide System of Higher Education
Fairbanks, Alaska 99701

January 31, 1980

Representative Brian Rogers
House of Representatives
Pouch V
Juneau, AK 99811

Dear Brian:

This letter is to coordinate with you and to bring you up-to-date regarding the capital budget request for the University of Alaska for FY81.

The total request submitted by the board of regents is summarized on the first attachment by major administrative unit. Individual projects are listed in priority order on the second attachment. As those papers indicate, the request totaled $76.1 million.

When your sub-committee held hearings on the university's budget requests, as you remember, numerous other possible additions were discussed. Also discussed was the possibility of moving some of the items which the university had requested be funded by general obligation bonds into funding provided from the general fund.

After the hearings, the university administration reviewed the entire capital request to see which items seemed to be the most logical choices to be moved from funding by bonds to the general fund. A listing of such projects is shown on the third attachment.

The action which the governor took on the university's capital request is summarized on the fourth attachment. The items proposed for funding by general obligation bonds as listed on that attachment are covered by Senate Bill # 343. They total $20,550.0.

The fifth attachment is a copy of a paper written by Chancellor Howard Cutler regarding the proposed Seward Marine Education Center. It is listed as priority # 2 of the university's capital request (shown in the second attachment). However, no funding was proposed for that facility by the governor.

The univeristy would have preferred that the governor support projects requested by the university in priority order, and we do not know exactly why he didn't. We appreciate his support of the projects listed, but the university's priority # 1 (instructional equipment) and priority # 2 (the Seward Marine Education Center) are much more important to the university than items of

lower priority which are included within the governor's proposals for funding. We do not want to cause any trouble over this, but I am simply telling you the truth.

Brian, again, on behalf of President Jay Barton, please let me thank you for all that you do to help the university. We do not want to request that you do too many things for the university, in view of the pressures and problems which I know that you must face. However, we are extremely anxious to cooperate with you 100%, to give you the information that you need, and to be of service to you in any way that we properly can.

In summary, this letter is not necessarily a request for any further action on your part to help the university but is merely to ensure that you are fully informed with respect to the capital budget request situation of the University of Alaska.

Sincerely,

Sherman Carter

34 PROPOSED SIX—YEAR CAPITAL PROGRAM

REVISED DATE 10/11/79

01-1034 (7/79)

Representing:
ANCHORAGE
FAIRBANKS
JUNEAU

ALASKA STUDENT LOBBY

P.O. BOX 548
DOUGLAS, ALASKA 99824

February 20, 1980

Senator Glenn Hackney
The Alaska Senate
Juneau, Alaska 99811

Dear Senator,

The Alaska Student Lobby representing Students from Anchorage, Fairbanks, and Juneau support Senate Bill 343 providing for issuance of general obligation bonds in the amount of $20,550,000 for the purpose of paying the cost of capital improvements for the University of Alaska facilities.

We feel that this funding will greatly enhance the education capabilities of the University of Alaska. Many students will be directly effected by this funding, especially the handicapped. For these reasons and others we respectifully request that you support Senate Bill 343.

Thank you,

Rob Mourant
Facilitator
Alaska Student Lobby

rtm

Rec'd 4:30 P.M. 2-20-80

UNIVERSITY OF ALASKA

FY81 CAPITAL BUDGET REQUEST

1. Instructional Equipment. (Various Units)

   This is a six-year program which will maintain a continuous supply of instructional equipment for teaching purposes for the entire University. Most of the needs are determined or based on the existing program needs, the deterioration of the current equipment and projected needs.

2. Seward Marine Education Center. (UA/Fairbanks)

   This will be a new facility and will provide conference rooms, library spaces, office and reception areas for marine advisory agent, a public display area, aquarium, etc. This will be located in Seward. This facility will be built on the land that is currently owned by the City of Seward, which has extended the lease agreement with the University for the next two to three years, within which time this project can be implemented.

3. Handicapped Barrier Removal. (Various Units)

   This item is in response to the requirement of Section 504 which requires removal of handicapped barriers within the University buildings and campuses.

4. Campus Development Plan. (Statewide Administration)

   This project, if approved, would provide a resource to properly develop the expansion and growth of the physical aspects of the University. It would also afford coordination between the academic master plan, physical master plan and land management. It would provide basis and document from which the requests for capital projects in the future could be extracted and coordinated. It will provide a general plan document which is necessary not only for the development of the major campuses, but also the community college campuses as well as coordination of the entire University system.

5. General Building Upgrade and Replacement. (Various Units)

   This is a six-year program that will keep vigilence and maintenance over the buildings within the University system, providing continuously good quality space for educational needs, resulting in a lower maintenance cost.

6. Roads, Streets and Parking. (Various Units)

   This project is part of the six-year schedule within the capital projects program. It is intended to serve as a maintenance type of project to prevent deterioration of streets, roads and parking, and will therefore result in an economical way of maintaining the vehicular communication lines within the campus.

7. Classroom Building. (UA/Anchorage)

   Because of lack of large space the department is currently located in a variety of sites which is not conducive to proper educational development. Enrollment has increased to such a level that it is difficult to handle program needs in current facilities. Therefore, it is proposed that a new classroom building will provide for Departments of Music, Theatre and Art.

8. Galena Learning Center. (Rural Education)

This request will provide space facilities for the Rural Education needs. The student population and interests in technical education are growing, and at this point there is no facility to provide these kinds of programs in the rural areas of this state.

9. Repair Elvey Annex Roof. (UA/Fairbanks)

The existing roof is leaking water around the periphery of the building, resulting in a deterioration of the structure. Spaces below, like the electronics shops, are out of use due to seepage, especially during the winter months. This should be stopped, and the space returned to the user. It is estimated that about 20% of this space is unused during the major portion of the year.

10. University Center - Phase I. (UA/Juneau)

Included in this phase of the project would be a cultural center, student recreational center, administrative center, plus mechanical and other types of spaces necessary for the building's functions. It will house a number of interrelated programs, making an interaction between them much simpler and easier, resulting in a much more efficient operation. It is thought that one single complex approach has numerous advantages; there are economies related to a large building construction rather than numerous small ones. It is thought that the economies of maintenance are better in a single structure rather than numerous buildings located all over the area. It is expected that the program development and attraction of students would increase having a facility that is of a centralized type.

11. Land Acquisition. (UA/Juneau)

It is necessary to purchase property because of the potential need for the location of water supply tank, since this is the highest point on campus. The water would flow by gravity rather than be assisted by mechanical means.

12. Central Receiving. (UA/Fairbanks)

Currently, the Physical Plant is using about one-third of its space for unrelated storage and warehousing. This is an inefficient use of space, therefore it is proposed that a new central warehouse be constructed. A control warehouse would be much more efficient and will lower current operating costs by a significant amount.

13. Prince William Sound Community College.

Projects that are requested are only those listed before you. All listed projects are new. There are no facilities, at the moment, that the college owns. They are currently in a "borrowed space". The justification simply reads: "We have no buildings. We are an established community college; therefore it is appropriate for us to ask for new facilities as soon as possible."

14. Utilities Modification. (UA/Fairbanks)

This request will include water chiller for environmental science labs, a refrigeration system for Irving Building. water chiller for Elvey Building, heating and cooling systems in Elvey Building, steam system upgrading, ventilation and air handling for KUAC, etc.

15. Sewer Connection. (CC-Sitka)

This project is necessary to connect the college buildings to the Sitka community sewer system. Presently the septic tank system must be frequently cleaned. This is costly. It is felt that it would be more advantageous to connect into the city utility system.

16. Engineering Equipment. (UA/Anchorage)

This equipment is necessary to furnish engineering laboratories in the new building. This building is near completion, and the equipment that will be purchased will serve areas such as thermodynamics, electric power, fluid mechanics, electronic communication, etc. This will provide basic furnishing for the educational needs.

17. Applied Science Building. (UA/Anchorage)

This particular request is based on the consolidation of nursing programs. The programs that will be housed in this building are dental and health occupations, chemistry, biology and general type of classrooms. If approved, this will contribute highly to the education of applied science programs and professions within the Anchorage area.

18. On-Line Computer System. (Statewide Administration)

The funds requested for the UACN will be used to: (1) provide increased accessibility and improved service to the Network for all users throughout the University system; (2) provide improved computer hardware and software support for the Division of Community Colleges, Rural Education and Extension; (3) provide needed life support systems in the Anchorage Computer Center and a security system in the Fairbanks Computer Center.

19. Utilities Monitoring and Building Security. (UA/Fairbanks)

It is intended that a computerized system for monitoring of the utility usage and building security be provided for the Fairbanks campus.

20. Physical Plant - Various Programs. (UA/Fairbanks)

This project includes items such as swimming pool chlorinator, re-roofing of some of the buildings, domestic water cooling tower, carpet replacements, elevator safety devices, etc. All items are too numerous to be listed here. There are improvements that have to be made for which no money has been allocated up to this point.

21. Administrative Equipment. (CC-Tanana Valley)

FY81 requests are administrative equipment. This equipment is necessary for college functioning. The technological areas of the programs require more expensive equipment. Although initial investment costs are high, they do decrease over time.

22. Purchase ABE Facility. (CC-Anchorage)

Currently the college is leasing the space for this particular program. The Board of Regents have decided that it would be wiser to purchase the building rather than continue renting.

23. University/Legislature Teleconference Link. (Statewide Administration)

The purpose of this project is to provide a coordinated system of communication between all the campuses and facilitate the contact between the President and Chancellors and all the community colleges within the University system. It is anticipated that the development of the system will be staggered, and that in the long term the entire teleconferencing will be operational throughout the state.

24. Art Department Equipment. (UA/Anchorage)

Due to the lack of space and proper equipment in the art studios, the student body is decreasing - this action is intended to reverse this process. The equipment and the space improvements will be in areas such as ceramic studios, sculpture studios, printmaking studios, painting and drawing, art education, jewelry, photography, etc.

25. Bookstore - UAA/ACC

Currently, a provisional bookstore exists and it does provide a service on a limited basis to both of the units. However, the facility is limited in size and service. It is intended that the new facility will provide full services to both units within the Anchorage area.

26. Yak Estates Plumbing and Heating Conversions. (UA/Fairbanks)

The current state of plumbing in Yak Estates is rather poor. Also, the existing energy source for the heating system should be converted from electric to oil, because operating costs of the electrical heating system is extremely high. Oil conversion would result in significant savings. Capital investments need to be made on this project so that occupancy rates can be increased, so that the university can cover outstanding indebtedness on the project and so that it will not cause financial loss to the university.

27. Statewide Administration Building.

This is the only other statewide capital project anticipated at this time. The reasons for this project is that currently all the statewide administrative units are dispersed all over the Fairbanks campus. There is no identity to a statewide function. This building will afford a possibility to bring all those statewide units into one central location. It is also thought that by centralizing the activity of the statewide functions a better coordination will be attained between the departments responsible for the entire University system.

28. Vocational/Technical Equipment. (Rural Education)

This is a media services need to provide programs to the rural education which presently aren't available.

29. Classroom/Shop Building - Phase IV. (CC-Kenai Peninsula)

This request is made with the hope that since community demand on the college programs is so great and increase in the student enrollment is rapid, this building is proposed so that no delay occurs for the program to be accessible to the public. Spaces that will be included in this structure are: heavy duty electrical equipment shop, petroleum electronics, cooperative extension facilities, etc.

30. Vocational Building and Equipment. (CC-Chukchi)

Besides the "standard" programs described previously, the new project requested by Kotzebue is Item No. 2, Vocational Building and Equipment. This building is a staging area for the delivery of programs in the bush. There is a great student interest in these programs, and having a facility as proposed would be extremely helpful for the community college to expand its service in this area of the state.

31. Arctic Health Incenerator. (UA/Fairbanks)

This will be an incinerator for the disposal of waste from the health experimental labs and controlled by Physical Plant operations.

32. Pratt/Ely Property Renovation. (UA/Juneau)

This is a recently acquired property which has existing structures located there. The structures are rather run down and require extensive remodeling and repair. The remainder of the money from the project when it was purchased will be used for that purpose; however, the funds are insufficient and the additional money is requested for that purpose. It will provide new vocational programs in power technology, marine and fish technology, etc.

33. Phase II Rasmusson Library Addition. (UA/Fairbanks)

The library is overcrowded, making use of the facility difficult and time consuming. It is anticipated that addition to the existing space will occur at this time to allow the expansion of stack area, book collections, media and computer services, creating a centralized and functional facility.

34. Conference Center. (UA/Fairbanks)

This facility will serve the entire University. The development of this facility would not only provide a conference center for outside agencies, but also expand information about the University and provide facilities for adult education. It is anticipated that it will increase the student enrollment, as well as the income to the University. The facility would consist of classroom space, registration areas, food areas and offices for the conference staff as well as exhibition areas and meeting spaces.

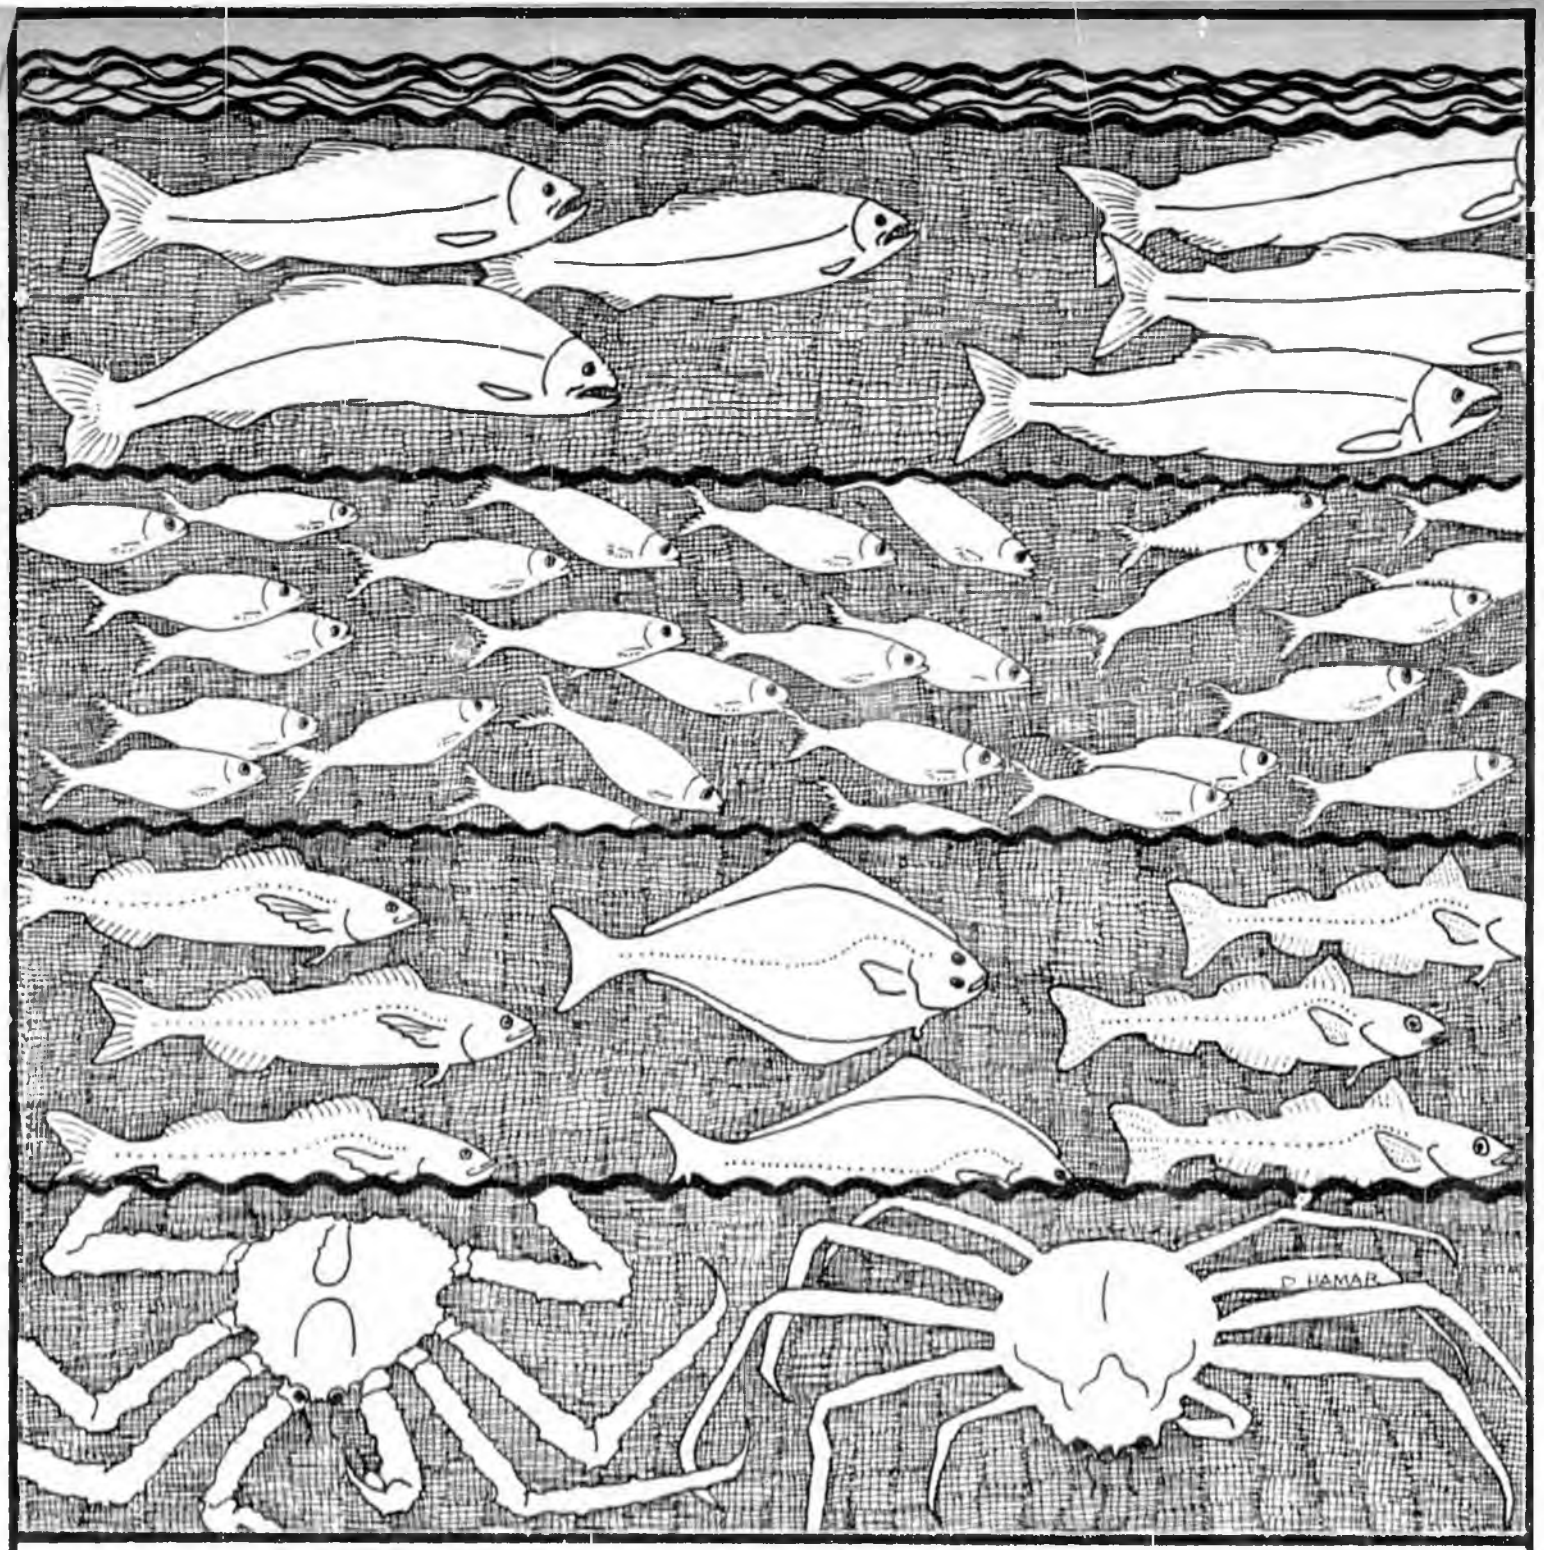
JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

February 4, 1980

Our office would like to see Fisheries Education a major component of the State's present educational system.



This report will give you a brief description of the current fisheries education programs in the State.

Sincerely,

Jim Edenso

Jim Edenso
Bottom Fish Coordinator

Enclosure

A Plan for the Organization of Vocational and Technical Fisheries Education for the State of Alaska

A Plan for the Organization of Vocational and Technical Fisheries Education for the State of Alaska

Submitted to:
The State of Alaska
Office of the Governor
Bottomfish Coordinator
and the
Alaska Department of Education
Juneau, Alaska
October 19, 1979

By:
Richard S. Lee, Ph.D.
Lee, Pennington and Associates
Rural Route 3, Box 3997-A
Juneau, Alaska 99801
907-586-3056

PREFACE:

This report provides a brief overview of some of the problems of fisheries education in the State of Alaska. A complete analysis with a set of fully developed scenarios is, due to constraints of time, beyond the scope of this project. This is a brief outline of a possible organizational and communication network with which the State may maximize the efficiency of current efforts and resources and direct additional future development. It should be emphasized that no current efforts should be abandoned, but should be more fully developed in a coordinated fashion.

The material used in this report came from many sources. Much of it is the result of the author's impressions during four years as an Education Specialist for the Alaska Marine Advisory Program and from conversations with many people vitally interested in Alaska fisheries education. A letter signed by Ms. Marilou Madden (Department of Education) at the outset of this project elicited a wide variety of responses which have proven to be of great value in compiling this document. Funding for this report was provided by the Office of the Governor, through the Department of Commerce and Economic Development and the Department of Education.

Particular credit is due to Jim Edenso, Bottomfish Coordinator, Office of the Governor; Tony Mecklenberg and Richard Reynolds (Department of Commerce and Economic Development); John Doyle and Hank Pennington (Marine Advisory Program); and Jerry Hiley (Department of Education) for their help.

I. INTRODUCTION

The fishing industry in Alaska is of prime importance. Since fisheries are renewable resources, they supercede the long-term value of even oil and gas, which will eventually be depleted. The advent of the 200 mile limit law helps to insure the future conservation and proper management of our fish stocks through the foreseeable future. At the present time, Alaska is dependent on traditional fisheries for a very few of the potentially marketable species. The white fish resources have traditionally been harvested and processed only by foreign interests. Many other resources are currently underutilized or not harvested at all. However, the state's fishermen and processors, as well as investors, are carefully examining the white fish resource and other domestically underutilized resource fisheries to insure Alaska's status as a major producer of the world's seafood.

One of the major factors hindering, or at least slowing, the development of Alaskan fisheries, is the lack of a statewide coordinated fisheries education and training program. The past and current efforts at education and training in this vital field have been either sporadic or redundant, and often marred by an inability to satisfy the needs of the fishing industry.

Past problems have been addressed primarily at the local level. The needs of the fisheries community (e.g., fishermen, processors, etc.) have been approached most consistently by the Alaska Sea Grant Program through its subsidiary, the Alaska Marine Advisory Program, with aid from other state-supported programs. Since funds, personnel and time are limited, these programs are severely over-extended at present. Several of the state's community colleges have made various attempts to develop vocational or technical fisheries programs. In terms of investment of funds and effort, the most notable has been the Kodiak Community College. Both Juneau-Douglas and Prince William Sound Community College are either actively pursuing fisheries programs or are attempting to organize them. Sheldon Jackson, a private two-year college which is located in Sitka, has developed a successful vocational aquaculture program and is looking toward possible expansion in other areas of fisheries education.

Various rural high schools in the state have attempted to establish vocational or technical programs in either fisheries or aquaculture, but their rate of success has been rather low. There are several reasons for the lack of success in these programs. A high rate of teacher turnover, lack of involvement by local fishing community members, and academic ability of students, are among the reasons for a low rate of success in these programs.

The University of Alaska, through Sea Grant and other University branches, is also involved with fisheries education. Other than the extension oriented Marine Advisory Program, the University's efforts are primarily aimed at the more esoteric aspects of management and basic or applied marine and fresh water research - topics that are outside the scope of this report.

II. REVIEW OF EXISTING EFFORTS

A. Alaska Sea Grant Program

The University of Alaska Marine Advisory Program, under joint funding from the National Office of Sea Grant and the Cooperative Extension Service, has historically been the leading agency in fisheries education within the state. Sea Grant's effectiveness is limited in meeting the statewide demands because of underfunding and understaffing. While the Marine Advisory program represents an excellent effort (certainly the best in the state to date), it is severely limited both geographically and topically. The vast areas of southwestern, western and arctic Alaska are represented by only one agent supported on a nine-month contract. It is also of interest that he is the only member of the program staff that is fluent or even conversant in both English and any of the native languages.

The inevitable result of this understaffing is difficulty in focusing on the development and maintenance of long-range programs. Much of the effort must be expended in answering immediate and often unforeseen problems. Those workshops and fisheries institutes that have been carefully planned over an adequate time period have usually been effective and relevant. The biggest drawback is that there has not been enough of them.

It does not appear that the problems associated with underfunding and understaffing will be solved in the near future. As an example, for several years one of the greatest needs in the state fisheries has been for a gear specialist; associated, ideally, with the Marine Advisory Program. Yet, funding for this position has been impossible to secure. One answer to this problem could be the development of much broader cooperation and coordination with all other fisheries education entities within the state which would insure a more effective approach.

The Sea Grant Program outside of the Marine Advisory efforts, is also involved with pertinent fisheries education. Their mission is to perform applied research on scientific problems that impinge on any aspects of marine resource utilization, including, but not limited to, fisheries.

An example, is the on-going research program of Drs. Nishiyama and Niebauer and their students relative to the problems of the Kodiak shrimp populations. The information produced by this study will have strong implications both in shrimp management and more effective methods of shrimp fishing.

Much of the Sea Grant effort (as well as most of the other University efforts) is aimed at the higher education level with little relevance to vocational education for the average fisherman. Education of this sort is outside the realm of upper division university course work. The role of the Alaska Sea Grant Program (ASGP) is more appropriately in the training of research and management personnel.

B. Community Colleges

1. Juneau-Douglas Community College: JDCC is deeply committed to a fisheries technology program. Their current curriculum includes the following courses: small boat construction and repair; repair and maintenance of gas and diesel engines; and an assortment of regular classes and clinics (short courses). Courses are offered in welding, which stress repair and fabrication using all common techniques (e.g., oxy-acetylene, arc). Hydraulics maintenance and repair are also offered, and self-help programs on such topics as navigation and marine electronics are planned. (M. Metty, Personal Communication).

   In preparation for future development of their fisheries education program, JDCC has purchased a shoreside facility, formerly known as the "Northern Commercial Property." Although plans for its use are still undefined, it seems clear that this property will house JDCC's entire marine and fisheries programs. It is ideally located with a ways and a small boat yard for repair and maintenance of smaller commercial fishing vessels. It will be the only such facility in Alaska that is tied to an educational institution and thus presents some ideal and unique educational opportunities. One other similar facility is planned for Alaska, the Alaska Skill Center at Seward on the southcentral coast, discussed elsewhere in this report.

   In planning for future fisheries education, JDCC has advertised two openings for "gear specialists": one in the area of white fish fisheries; and one to be more of a generalist. The effort is constructive, but the needs do not seem well articulated. More appropriate at this juncture would be the creation of a single position of "fisheries education coordinator", whose primary function would be to clearly plan both present and future curriculum and facility needs relevant to the fishing industry. The fisheries education coordinator could then work to build the program around the two positions advertised at this time.

2. Prince William Sound Community College: PWSCC's efforts are still at the proposal stage, although the course outline is certainly impressive and comprehensive. The course descriptions indicate a strong attempt toward the development of a technical fisheries program similar to that found at the Rhode Island School of Fisheries. Dr. John Devens, Campus President, has told me that students are already signed up for this program; however, other than a fisheries coordinator, faculty and facilities are not in place. The PWSCC effort requires extensive funding, with both federal and state support. Two factors are even more important than funding to insure the ultimate success of this program: (1) patient and long-term time allotment and (2) very careful selection of instructors for the program. Judging from the experience of the Rhode Island School of Fisheries, seven to ten years may be required to successfully establish and demonstrate the merits of a fisheries technical school. Without the exact combination of familiarity with the region fisheries and fishermen and the ability to communicate and teach on the part of every member of the faculty, the program cannot succeed.

3. Kodiak Community College: An ambitious program in fisheries technology was established at KCC in 1972. The program was expanded in 1974 to include a two-year course in seafood processing (Atkinson, 1974). Kodiak was envisioned by the University to be the ideal location for this program. There were indications of strong support for the concept throughout all phases of the industry, yet by 1978, the program was virtually dead. In my discussions with various representatives of the industry and the community college, the reasons for this appear to be: (1) the program was not structured to meet the needs of the industry in terms of format or content; (2) not enough time was allotted to bring the program to fruition; and (3) while the instructional staff was well qualified, in terms of their experience and academic ability, they were evidently unable to build a rapport with the various segments of the industry and to take direction from them in structuring the program. This last is of extreme importance, but it is also necessary to be able to go one step further and intuitively anticipate needs that the industry does not express.

   KCC has not lost its determination to take a strong lead in Alaskan fisheries education. A recent grant proposal has been submitted and funded to reimplement the program on a different level. The approach is to develop a multi-agency cooperative effort on an island-wide basis.

This will involve not only KCC, but also Kodiak High School's existing fisheries program, and all the region's village high schools. Much of the effort will be devoted to the development of modular material that can be used in or out of the classroom. Emphasis will not be restricted to the harvesting end of the fisheries but will also stress the many ancillary skills needed by today's modern fishermen to compete successfully in the business world. In conjunction with the University's Criminal Justice Center, a strong multi-level fisheries law component is being built-in. If the new Kodiak program lives up to its promise, it could serve as a model for all regional fisheries education development programs throughout the state.

4. Other Community Colleges: Kuskokwim Community College is in the process of organizing a land resources program, including fisheries and wildlife management, leading to an A.A. degree. The nucleus of their fisheries program will encompass the river fisheries of the river country of Western Alaska. Ketchikan Community College, Sitka Community College as well as others about the state, have expressed interest in various aspects of technical programs. Most offer some sort of marine technology programs, including small engine repair and maintenance as well as related courses.

5. Sheldon Jackson College: While Sheldon Jackson is a private college, and thus lies outside the domain of the community college system, it is practical to consider it within that province, for the purposes of this report. Since it is a two-year college, SJ's interest in fisheries are currently limited to salmon aquaculture, although both the staff and the administration have expressed interest in expanding into a much broader program, possibly including, training for the white fishery. (Charles Bovee, Personal Communication).

   In its speciality, SJ provides the only upper level academic aquacultural training within Alaska. It is a successful program, but limited in potential by a rather small and defined job market available to graduates from the program. SJ draws students from all over the state, as well as from the lower 48 states. Courses include not only the standard fish husbandry and fish biology offerings, but also a strong "hands-on" approach to the hatchery work, and courses in mechanical equipment operation and maintenance, emergency medical care, and fish pathology. (Mel Sieffert, Personal Communication).

Due to the restricted job market, it is impractical for other two-year programs in the State to try and duplicate the aquacultural curriculum offered by SJ, unless, for some unforeseen reason, their program was to be discontinued.

C. Secondary Schools:

Secondary schools have expressed strong interest in both fisheries and aquaculture programs, but with few exceptions, most attempts at these programs have met with limited success.

In looking at these programs, one can find several common denominators that contribute to the lack of success: lack of experienced teachers; high rate of teacher turnover; and lack of information resources. Inadequate funding and lack of community support are also cited as reasons. Complicating the situation are factors unique to rural Alaskan schools such as poor communication within and between interested districts and individual teachers. Too often mistakes made in one region are simply repeated by other districts because there is no forum of interested parties that can initiate an exchange of ideas, experience and information.

Yet the secondary school fisheries picture is not entirely bleak. Several schools have made strong, sustained and successful efforts. For example, Ketchikan and Kodiak have long been leaders in the field of fisheries. Kake, Ketchikan and Sand Point have established hatchery programs that show good potential.

These specialized programs at the secondary level often miss a valid point. Too often competency in writing, reading and computation is slighted in favor of special interest courses. If we are going to train young Alaskans to take over our resources and industries, we cannot afford to slight their ability to communicate and to develop mathematical skills. They must be competent in these areas before they can enter the specialities. This does not preclude the use of fisheries as a vehicle to approach the basics. Indeed, every rural teacher should be encouraged to use all the resources at hand to individualize his or her curriculum and materials to local relevancy.

Another problem that may contribute to the failure of fisheries programs at the secondary level lies in the selection of student participants. If they are not highly motivated toward the fishing industry, they will be unable to extract the maximum benefit from the program. Ultimately, the program is apt to become a holding pen for students who are merely passing time.

D. Alaska Skill Center:

The Alaska Skill Center in Seward is a unique institution in the state. Although it presently does not offer fisheries courses, parts of the curriculum (e.g., welding, diesel, mechanics) are strongly applicable to the fishing industry. Many of the courses are open entry/open exit and all have definite practical orientation.

ASC is currently looking at participation in the development of the shipyard at the mouth of the 4th of July Creek. If implemented, this facility will directly influence the Alaska fishing industry as a training facility for future boatwrights and repairmen. However, it will not, and cannot, meet all the vocational or technical education needs in this area for the state. There will always be a strong need for the dissemination of this knowledge at the village level. For many rural residents it is impractical or undesirable to travel to Seward for their education. At the recent Aleutian-Pribilof Bottomfish Conference at St. Paul (September 1979), this idea was expresssed by many of the Aleut representative attending the meeting.

E. State Government:

In addition to the University system and the State Department of Education, the state government is becoming increasingly interested in fisheries education.

In the past year, the State Department of Commerce and Economic Development and the Office of the Governor have sponsored projects of an educational nature, including several white fish harvesting demonstration projects, fishing trials, and jointly sponsored with the Marine Advisory Program a class on white fish processing. The latter was held last in Kodiak in April 1979, involving personnel from Scandivania and conveyed up-to-date information on all phases of white fish processing. A processor's training manual (in press) has resulted from this course.

In the FY '81 budget request recently submitted by DCED are two line item requests directly relevant to fisheries education. The first is entitled Bottomfish Production Trials/Demonstration and requests monies from the general fund to provide demonstration projects in cooperation with the Alaska Fisheries Development Foundation. The second budget request deals with three phases of fisheries education: (1) to establish a fisheries education coordination committee; (2) to implement the training of a "cadre of qualified resident instructors"; and (3) direct involvement in fisheries education at the community college level. This is exemplary of the support needed to provide the impetus for an organized fisheries education and training effort within Alaska, which in turn, will allow future generations of Alaskans to be masters of their own resources.

F. Alaska Fisheries Development Foundation has proposed a $90,000 budget for a training component in their planned ground fisheries demonstration project. In cooperation with the Marine Advisory Program, an on-board training program will be implemented. This program will be limited, by restricted bunk space on existing Alaska fishing vessels, and the rigors of utilization of new and unfamiliar fishing gear, economic constraints, etc. (AFDF, 1979). Yet even with all these restrictions, AFDF does offer a sound, if modest, start on this problem of training in this emerging field. The on-board efforts will be supplemented by workshops and media development and presentations in the primary fishing ports. This will include extensive news coverage and the development of specialized audio visual materials which may be used as a foundation for future training efforts.

III. ALASKAN FISHERIES EDUCATION NEEDS

The needs in Alaskan fisheries education can be viewed from several standpoints. Regional needs are quite diverse and these should be considered if one is establishing or bolstering fisheries in coastal or river-based fisheries. For example, the fishing communities of Southeastern Alaska and Kodiak can expect to harvest, process and market a much broader range of resources than the communities of the Arctic-Yukon-Kuskokwim regions. Yet certain common themes are prevalent throughout the state. One of these themes was best summed up by James Branson, Executive Director of the North Pacific Fisheries Management Council, during a recent conversation, "Our job would be many times simplified if the fishermen had, somewhere in their background, some strong knowledge about the resources." The state is embarking on a new bottomfish enterprise, one which is capturing the imagination of everyone from fishermen to bureaucrats. The question "what is a bottomfish?" remains very difficult for most to answer. The herring fishery is emerging as a very profitable operation in the Southern Bering Seacoast villages and other districts but many fishermen know little of the basic biology of the resource. Throughout the state, salmon has been the richest of the traditional fisheries. However, the life histories of the five species are poorly understood by the average fisherman. In all schools, at all levels, one of the greatest needs is basic resource information. This may be approached in the schools by abandoning the textbooks which are traditionally oriented toward terrestrial botany and zoology, and training with a local marine ecosystems approach. This involves much greater innovative effort on the part of the teacher, but would prove more effective in the long run. An excellent example of this sort of program is that instituted by Ms. Lucile Holden of Ketchikan High School about nine years ago, and with which she is still working.

Another statewide need which has been expressed in almost all communities which I have visited is fiscal management; for business management, financial planning, taxes. Other fiscal matters are becoming increasingly important to insure the greatest rewards for their efforts. In today's increasingly complex and inflationary society, this will become even more important.

With the emerging white fish fishery, Alaska fishermen must learn to use modern and complex equipment and deal with non-traditional (for Alaskans) resources. Machines such as the new Mustad Autoline system, on-board heading and gutting equipment, and new advanced methods of on-board refrigeration must be mastered in order for the bottomfish fisherman to compete successfully on the world market.

Boat repair and fabrication, diesel mechanics, electronics and navigation all are becoming increasingly important to Alaska's successful fishermen. For the small boat fishermen, the skipper needs to be familiar with all of those skills, while on larger vessels, crew members with specialized skills in these fields are important, and at shore-based support facilities (such as the proposed Alaska Skill Center or the Juneau-Douglas Community College Boatyards), individuals with these skills will be in demand.

In examining Alaskan fisheries education needs, it is helpful to look at two possible "systems" approaches: vocational education and technical education. Ultimately, both approach the same goal of strong fisheries education and training for future members of the industry.

Vocational fisheries education may be best addressed by the community college system, the Alaska Skill Center and Sheldon Jackson College through a network which will be described later in this report. It should be directed toward specific needs, with materials which are modular in concept and format and suitable for delivery to either small audiences throughout a given region or on board a vessel for crew use. The new Kodiak Community College program can provide an excellent model for such a delivery system. The viability of this concept may be thoroughly tested with this program before implementation in other regions.

Technical education, on the other hand, should provide a resident a two or four year program leading to degrees in some aspect of commercial fisheries. An example of such a program is found at the University of Rhode Island Department of Fisheries and Marine Technology.

The technical approach to Alaskan fisheries education is highly desirable for Alaska. It does not, however, answer our immediate needs, due to the length of time required to put a technical school of fisheries into place and nurture it to success. Captain G.A. Motte, Chairman of Rhode Island's Department of Fisheries and Marine Technology, spoke of problems they encountered in getting started; at the outset, there was opposition from the skippers to hiring a classroom trained crewperson. It was difficult to convince students that it was a valid expense of time, money and effort to spend two, three, or four years in the classroom when he or she could be at sea, earning a paycheck.

In the ten years that the department has been in existence, the attitudes gradually changed. Now skippers demand that their prospective crew members have attended the URI program, and the waiting list calls for more candidates than the school can accept. As a result, they are highly selective in accepting students, though it has taken ten years to reach their present status.

Alaska needs to have a technical school of this type and caliber. It will not, however, answer our immediate problems. Even if all our fisheries education efforts were focused on this approach, we could not meet the immediate needs of our people and industry. This is not to say that we should not work toward this goal, but rather we should start today with a well-organized and strongly funded vocational education network. Even with an excellent, well-accepted technical school in place, the vocational network will still be extremely important. Because of Alaska's size and diverse needs, there should be no redundancy in ultimately approaching fisheries education from both directions. Besides, even the finest technical school can only answer the needs of a limited segment of future Alaskan fishermen. There will always be a majority of people who cannot afford, for one reason or another, to attend such a school, as well as people who need only courses on particular discrete topics. These people may be best served on an out-reach basis through the community college or other vocational programs.

The College of Fisheries, Navigation, Marine Engineering and Electronics in St. John's Newfoundland may serve as a useful example for Alaskans to consider. Newfoundland, located on the east coast of the continent, has much in common with Alaska. Fishing is a major industry; the ports are frequently small and remote and communication problems between population centers are similar to those of rural Alaska. While there is a strong on-campus program at St. John's, each year since the school opened in 1964 a third or more of the enrollment has been through the extension program of travelling schools.

While the majority of course offerings detailed in their "List of Programs" are offered principally at the St. John's campus, most of the courses are of one and two weeks duration and are designed to upgrade skills of people who are already in the industry.

It was not possible for Lee, Pennington and Associates' personnel to visit the St. John's campus due to the school's summer break. However, it would be highly desirable for us, or someone interested in Alaska fisheries education delivery systems to do so.

IV. ORGANIZING ALASKAN FISHERIES EDUCATION EFFORTS

Does Alaska's fisheries education effort need organization? In my mind, the answer is yes. We have too often seen programs attempted, only to watch them fail. We have witnessed duplicative efforts leading to redundancy because of poor communications. We have regions and schools which are unable to profit from mistakes or successes of other entities simply because they don't have knowledge of them. We have heard repeated requests from rural residents for stronger programs in fisheries, but no one seems to know where to find assistance to set up fisheries education programs, or how to maintain them at functional and efficient levels.

Currently, there are two major entities vitally interested in promotion of fisheries education within the State of Alaska: The Alaska State Department of Education and the University of Alaska. Other agencies and associations have also expressed interest and need. The various native associations and corporations, the Alaska Native Foundation, Alaska Fisheries Development Foundation, various state departments (e.g., Department of Fish and Game, Department of Commerce and Economic Development) and others, all have strong contributions to make. However, it would be an inefficient expense of effort and capital for all these entities to plunge into this effort without some form of organized coordination.

Since the two major organizations (DOE and U of A) in fisheries education approach this topic from rather different, or at least rarely overlapping approaches, it would be logical for representatives of their governing boards (the State Board of Education and the Board of Regents, respectively; as well as a representative from the Post-Secondary Commission) to form an oversight board to oversee the policy formulation for fisheries education. They, however, are not necessarily in touch with the needs of the industry, or the rural fisherman, and they haven't the time to follow up policy or delivery. To fill this role, a coordinating council, whose members would be appointed by the oversite board should be directly responsible for implementation at the state level. Members of this council should include at least one representative from the community college system, the Governor's Office, the Alaska Native Foundation, the Department of Education, the University of Alaska Sea Grant/ Marine Advisory Programs, and other interested groups.

The council should have a person in the role of secretary, to carry out the council's directives. It is desirable to have this person housed either within the community college system or the central office of the Department of Education. A major role to be carried out will be interfacing with the fisheries coordinators at the various community colleges and other institutions. A flow chart of this organization is presented. (Table 1).

On the next level fisheries coordinators should be responsible for developing and disseminating materials, not only within their own institutions, but also through the rural secondary schools of their region. In the village, it will be the role of the principal teacher or his or her designee to further disseminate the materials to skippers and other interested people.

Perhaps the most critical part in this scheme lies at the village level. It will require a great deal of grass roots effort to establish strong and effective liaisons between the village fishermen and the rest of the program. An accurate needs assessment for each village served within a region, with priorities for answering those needs, is extremely delicate and very important. It is essential, if this program is to work, that it demonstrates its ability to meet local needs very early in the program, and continue to do so. The proposed Kodiak Community College fisheries program offers an excellent opportunity to demonstrate this ability on a regional scale before the entire program is implemented statewide.

Needs at the village level may be communicated through the principal teacher and the coordinators, to the coordinating council. Furthermore, in this fashion, an effective talent bank system may be set up to operate on a statewide basis.

This talent bank would consist of a roster of people with definite skills for use throughout the State, much in the fashion of the present DOE Talent Bank. Funding for the fisheries education talent bank should be handled in a similar manner to or as a part of the DOE talent bank system.

While this organizational scheme would encompass most situations, demonstration projects and fishing trials conducted by the State and Alaska Fisheries Development Foundation are special cases. The need for projects of this nature can be communicated through the channels outlined above, and the coordination council and the local educational agency may be of great assistance in staging them. However, it may be more expeditious and advantageous to have them funded directly.

I believe, however, that one requirement must be written into each and every demonstration project: they must be designed to develop a local information core. Too often the Alaska fishing industry has had to (and will, in the future, have to) rely on out-of-state or foreign expertise, particularly in the white fish industry. Recognizing that we must take our expertise from whatever available resources, we should also be training a cadre of people within our own industry to not only use new equipment and fishing techniques, but also to pass this information on to other Alaskan fishermen, processors, and marketers. It is unlikely that we will ever be totally independent of out-of-state expertise. Indeed, it would not be in our best interest to become totally dependent on local expertise. It would, however, make good economic and educational sense to reduce this dependency gradually.

There is another possible approach to the reduction of dependence upon foreign and out-of-state expertise. This lies in the strengthening of the existing Marine Advisory Program, especially in the area of gear specialists. As mentioned earlier in this report, MAP has attempted to add a gear specialist to its staff, but funding has been unavailable. Most of the State demonstration projects include various specialized gear uses. Therefore, it would be in the best interest of the State and its fishing industry to directly fund at least one, and preferably three gear specialists for statewide service within MAP. While three gear specialists may seem extravagant, consider the expense in constantly importing outside knowledge to the vast reaches of the Alaska coastline. Again, the development of these specialists could be effectively aided by close involvement of the MAP with the coordinating council.

It should be realized, however, that merely adding to the Marine Advisory staff will not be sufficient to provide the needed fisheries education effort. This step should be regarded as a supportive measure to help fill the gaps while a completed and functional statewide fisheries education network is being developed. Subsequently, there will still be a need to maintain that Marine Advisory expertise throughout the state to supplement the proposed educational delivery system.

It is our recommendation that this proposal be implemented on a regional basis since Kodiak Community College has been awarded a grant to initiate a Regional Community College - community fisheries program, we suggest that Kodiak is the logical site to act as a model for future efforts. After one year of operation, the program should be expanded and initiated in another region, utilizing and adopting materials and experience developed in Kodiak. Further expansion could be accomplished step-wise each successive year.

The first year operating costs, though, partly depend on already appropriated funds (see attached Kodiak Community College project budget Table 2). The added funds needed will cover initiation of the state network, and preliminary work on needs assessment of individual regions to be served by the plan at a later date. These expenses should cover the selection of the five-member oversight board (Board of Education, Board of Regents, Post-Secondary Commission), as well as their attendant travel expenses; the selection, travel and meeting costs of a state fisheries education coordinator; and finally the costs of initial needs assessment and preparation for implementing the program in the successive regions. Possible funding patterns are outlined in Table 3.

V. PROPOSED BUDGET

1st Year Operation

1.	Oversight Board Expenses	$ 3,000
2.	Selection and Operational Expenses-Coordinating Committee	5,000
3.	Travel Coordination Committee	6,000
4.	State F. E. Coordinator	
	a. Salary	36,000
	b. Secretary	20,000
	c. Fringe at 17.5%	9,800
	d. Travel	7,000
	e. Communication	5,000
5.	Subsequent Needs Assessment (to be contracted)	60,000
	Total First Year	$151,800

2nd Year Operation

1.	Oversight Board	3,000
2.	Coordinating Committee	10,000
3.	a. State F. F. Coordinator salary	38,000
	b. Support	21,000
	c. Fringe at 17.5%	11,000
	d. Travel	8,000
	e. Communication	5,000

4.	Subsequent Needs Assessment	60,000
5.	Curriculum Development (contract)	60,000
6.	Community College Coordinator Salary	38,000
7.	Support	15,000
8.	Fringe	9,000
9.	Travel and per diem for regional teachers	4,000
10.	Community College Coordinator travel	3,000
11.	Supplies	11,000
12.	Evaluation	16,000
13.	Communication	4,000
14.	Printing	5,000
	Total Second Year	$321,000

Beyond the second year the Kodiak Community College program must be refunded to continue it. As a rough prediction it will cost approximately $200,000 a year to maintain the program. Using that figure in conjunction with the state advisors first year cost to estimate the total overall costs of running this program on a coastal statewide basis at the following locations: Ketchikan, Juneau, Prince William Sound, Kodiak, Kenai, the Aleutian Region, Bethel, Nome, and Barrow, one arrives at an annual cost of $1,800,000.

There are, however, some problems with using this estimate. For example, there is currently no community college in the Aleutian Region. It has been suggested that a fisheries extension center be placed at Dutch Harbor to act in this capacity. Expenses of running this sort of program in the Aleutian Region may be perceptibly higher than in other regions, but this will also be offset by lower costs at other centers, such as Nome or Barrow where the commercial fisheries, while potentially very important, will probably always remain at a far lower intensity than those of the more southern centers.

VI. SUMMARY

The Alaskan fishing industry is of vital importance to the future of this state. It stands on the edge of great expansion into new fisheries, new processing techniques, new markets, and new regions of the state. No longer is it a local cottage industry, but, instead, is now a rapidly growing multimillion dollar investment in which all Alaskans share directly or indirectly.

To allow this industry to provide maximum benefit for all of our citizens, be they producers, processors, marketers, investors, or consumers, we must initiate a coordinated fisheries education program, designed to (1) reach every portion of the state concerned with fisheries; (2) produce readily usable educational materials for all segments of the fishing industry statewide; (3) tailor these materials to local relevance; (4) make use of all available means to transfer out-of-state expertise into our educational system.

To accomplish these ends, Lee, Pennington and Associates recommends the following:

1. Setting up an educational and communications network consisting of:

    a. An oversight board consisting of two members of the Board of Education, two from the Board of Regents, and one from the Post-Secondary Commission;
    b. A coordinating council consisting of representatives from the community college system and all pertinent public and private agencies; and
    c. Developing a statewide coordinated vocational fisheries program which would be regionally specialized and associated with the community colleges, university extension centers or other suitable regional entities.

2. The materials developed by this effort be modular in nature, and be suitable for non-classroom teaching.

3. The Kodiak Community College Program be used as a model for this effort, and that this program be fully supported financially.

4. Using the Kodiak experience and materials, a similar program be instituted and fully supported in at least one other coastal community college during the following year. Thereafter, one or two new programs should be added each year.

5. Those agencies responsible for funding these programs should realize that, in order to be successful, there must be a long term commitment of time, funds and energy.

6. The Marine Advisory Program be strengthened by the addition of one to three gear specialists for statewide service.

7. Ultimately, the State should consider supplementing their vocational fisheries by the development of Technical Fisheries Education College, similar to Rhode Island's School of Fisheries.

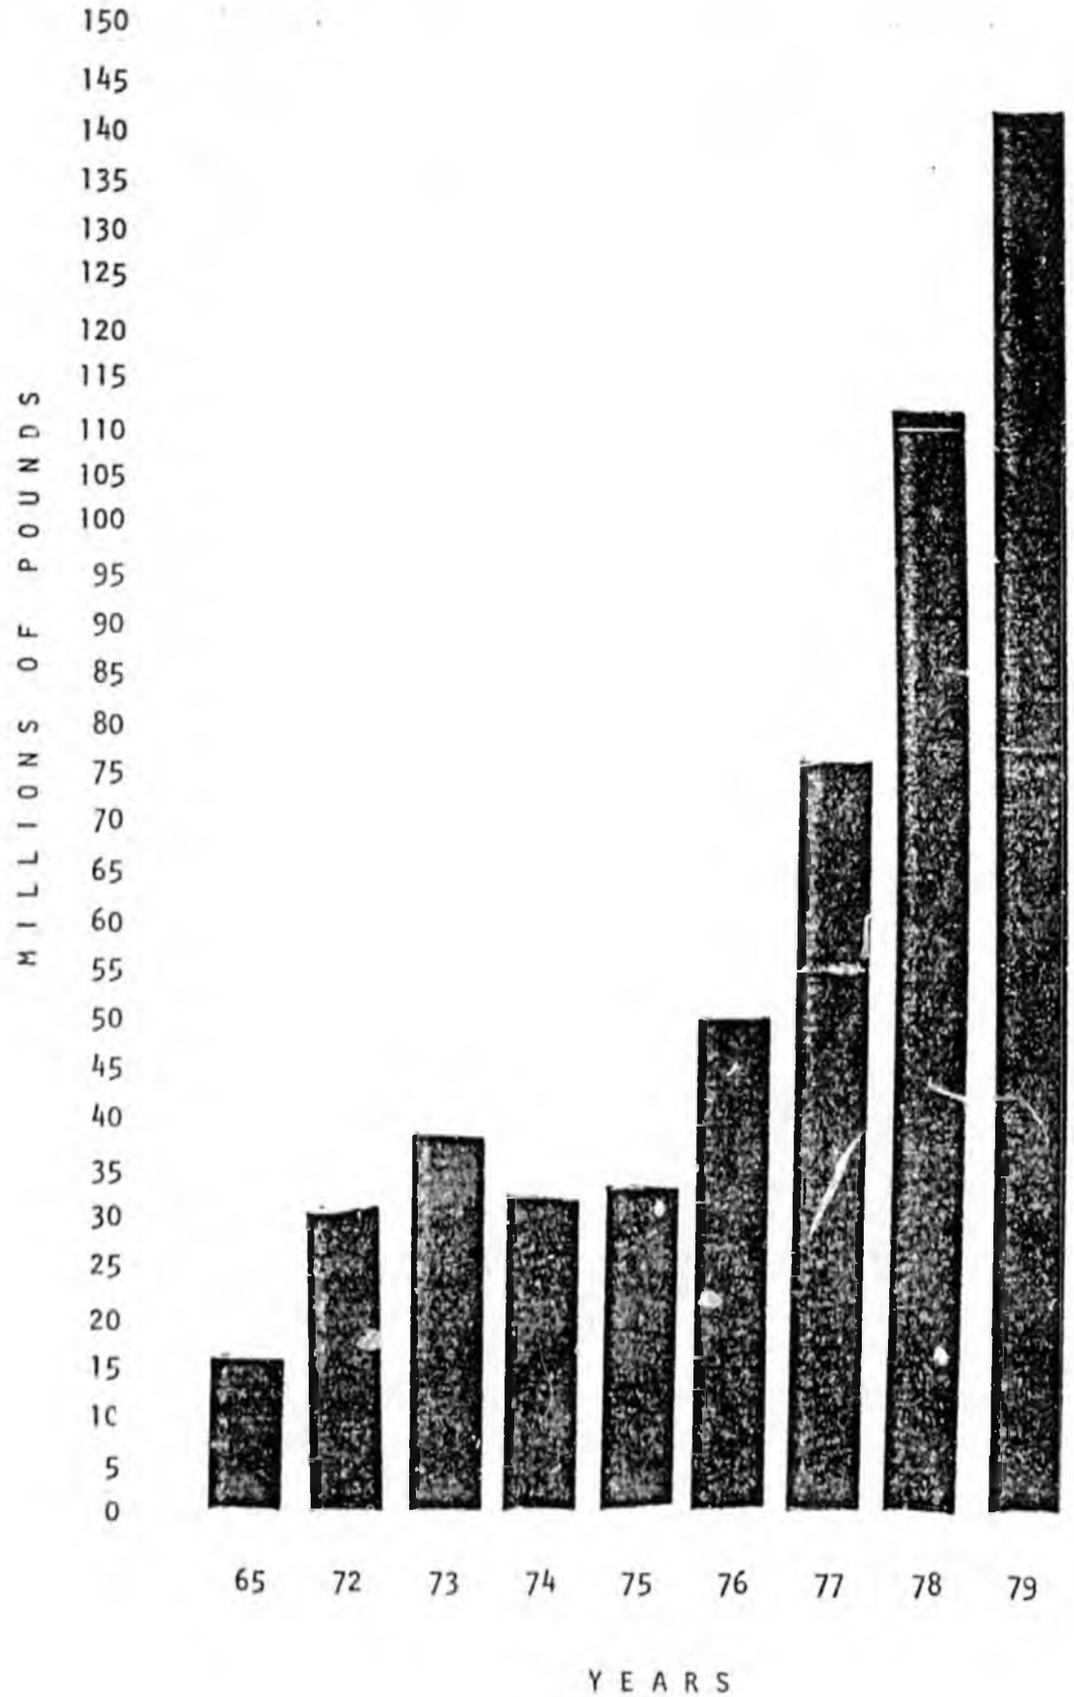
REPORT O. THE ALASKA SENATE COMMITTEE ON QUALITY ASSURANCE IN THE SALMON FISHING INDUSTRY BY THE SUBCOMMITTEE ON EDUCATION

Background and Need



The Alaska salmon industry has undergone a major change in the last ten years. This change consisted of a shift from a primary emphasis on canned salmon to a heavy emphasis on fresh and frozen salmon processing (Fig. 1). This shift is as dramatic as, and is economically more significant than the development of the tanner crab fishery.

Traditionally, the fresh and frozen salmon markets were supplied by troll-caught salmon from Southeast Alaska and the Pacific Northwest. These were high-quality silver and king salmon, bled and dressed immediately after capture and iced within a short period of time. The supply was supplemented by gillnet-caught salmon, again principally silvers and kings.

As the market for fresh and frozen salmon expanded, it had to be filled with net-caught salmon. This move was accompanied by an increase in cold storage capacity in the Gulf of Alaska and air shipments from Bristol Bay and the AYK district.

During the last four years the growth has been dramatic (Fig. 1). In 1979 over 100 million pounds of salmon, including sockeye, chums and pinks that would previously have gone into the can, went to the frozen market. This is accomplished

ALASKA FROZEN SALMON PRODUCTION

by "high grading" at the plant, which has resulted in an overall lowering of quality in both the canned and frozen product.

Many of the fishermen and processors who are now producing for the fresh and frozen market formerly canned all of their product. Therefore, they are not familiar with the proper methods of handling fish to attain a high quality frozen product.

In Japan and Europe the devaluation of the U.S. dollar has put salmon within the buying range of more people. The Japanese market is for high quality dressed salmon with the head on, which are sold whole on the retail market. In Europe, the demand is for frozen salmon which are thawed and split for mild curing and smoking. Both markets demand a quality fish with no external or internal blemishes or visible flaws. North America, too, is experiencing a shift toward fresh and frozen salmon for use as steaks and fillets and, to a lesser extent, the mild cure and smoking market.

European and Asian markets are looking to our competition for a high quality product. This includes Canada and Norway, both of whom have high quality standards set by government regulation.

Processors in Europe complain about bruises, soft flesh, belly burn, rancidity and poor butchering of the product they receive from the U.S., including Alaska. These are all caused by improper handling and processing.

Problem

The Alaska fish are as good as any when they come from the water, but several million pounds of frozen salmon were condemned by state and federal inspectors after the 1979 season. Quality loss occurs in the hands of humans.

The problem of salmon quality is statewide, but is more critical in areas where the production of frozen salmon is a relatively new form of processing.

Goals and Objectives

The goal of this project is to "Raise the quality of Alaska frozen salmon to a level that will meet or exceed that of any other country's product competing on a world market."

Our immediate objective is to improve the overall quality of Alaska salmon. Clearly, efforts need to be made in assisting the industry to improve the quality of salmon submitted to the world markets. Education is needed in proper techniques for handling salmon.

A committee has been appointed to determine these educational needs and the kinds of educational efforts the state should support. A broad-based educational program, directed at fishermen, tendermen and fish processors, is recommended by the committee.

Approach

A broad-based education program will be developed. This program must be delivered to the largest number of industry members possible. The project will reach fishermen, tendermen, processors and shippers of salmon; i.e., all segments of the industry. In order to reach most of the industry, a number of different audio and visual educational techniques will be employed. These will include, but not be limited to:

1. Seminars, workshops and conferences
2. Consultation services
3. Public service radio spots
4. "How-to" fact sheets
5. Slide series on handling salmon
6. 16-mm educational film on salmon handling and processing methods
7. Salmon handler's manual

In order to provide these educational services it will be necessary to employ a full-time specialist in the care, handling and processing of frozen salmon. This will need to be a long-term project. Current practices are ingrained and will take a number of years to change.

Outline of Education Activities

1. Seminars, workshops and conferences. Seminars and workshops will be conducted in fishing ports throughout the

state. These will be directed at fishermen and processing personnel. This mechanism is helpful in making industry members aware of the problem and will offer solutions to specific problems of each fishery and region. This has been demonstrated to be one of the best methods for provoking a desirable change.

A conference will be held to bring together the leaders of the fishermen's organizations with the objective of informing them of the problems poor quality has caused in the marketplace; to obtain their ideas for a long-range solution; and to enlist their support. A second conference will be held with the quality assurance personnel in the processing plants to inform them of the problems that occur in plants and to provide them with information and materials for training their in-plant workers.

2. Consultation services. In order to improve the quality of fish landed it will be necessary to do conversion work on many of the salmon vessels presently in use. This will include the installation of slush ice, refrigeration systems, or other types of cooling systems on the vessel. In some areas of the state the older or smaller vessels are not lined. Fish lay in the bilge or against hot engineroom bulkheads. In some cases boxing may be justified. The specialist would be available to provide technical information on these and other specific problems. In many cases, the

fishermen or processors could make the necessary changes themselves with technical assistance made available through this program.

3. Public service radio announcements (PSA's). All radio stations make time available for public service announcements. Several stations have been contacted and have expressed a willingness to air educational spots relating to good handling practices for salmon. A series of PSA's will be produced and distributed to all radio stations in coastal communities. The PSA's will contain "how-to" tips as well as what not to do. They will each contain an educational message; however, their prime function will be to raise the general awareness of the necessity for good handling practices. Through personal contact with participating radio stations it is expected that the PSA's will be aired at a time most fishermen listen to the broadcast band--at the time of the marine weather forecast.

4. "How-to" fact sheets. A series of "how-to" fact sheets will be written. They will be developed for each fishery by region. It is necessary to develop them by fishery and region because of the differences in the harvesting methods employed and the different conditions existing in each region. Fact sheets will also be developed for in-plant handling. Subjects to be covered will include, but

not be limited to, effects of temperature; sanitation; use of ice; refrigeration; etc. These fact sheets will be given broad distribution to fishermen and processors and be used in workshops and seminars.

5. Slide series on salmon handling and processing. A series of slides is presently being assembled that shows the effect of poor handling and butchering practices. This series will be expanded to show proper methods. The series will be duplicated for use in workshops and seminars and will be available for fish processors to use in their own in-plant training sessions. These slides must be considered as a tool rather than standing on their own as an educational program.

6. 16-mm movie film/television tape on salmon handling and processing methods. A 16-mm educational movie film will be developed showing proper handling and icing and the processing of frozen salmon in the plant. Television tape copies of this film will be made available for circulation to schools and educational TV, and will be used in workshops, seminars, etc. A film will not be a complete educational program but will augment the other educational efforts.

7. Salmon handler's manual. The fact sheets will be completed and supplemented with additional materials to produce a salmon handler's manual. This manual will in-

clude the why as well as the how to. The major use of this manual will be for in-plant training by company personnel. It will also be used to train new quality control people in the plants.

Interactions

It is necessary that this project interact with present education efforts in salmon quality enhancement in both the private and public sectors. This would include the University of Alaska, the National Food Processors Association, fishermen's associations, and the state legislature.

It is recommended that a permanant advisory committee be appointed to monitor the program. This committee should meet on a quarterly basis to review progress and to identify problem areas.

Teachers' Retirement

SENATE BILL NO. 371, by Senator Sumner by request. Repeals and re-enacts AS 14.25.143 (Post-Retirement Pension Adjustment) to provide that beneficiary of teachers' retirement system shall receive an annual percentage adjustment to his retirement salary and survivor's benefits effective July 1 of the current year. Adjustment shall equal percentage of any cost-of-living increase determined by the U.S. Bureau of Labor Statistics for Anchorage for year period ending March 31 of current year. Increase may not exceed 7% a year (currently 4%). Provides Cost-of-Living allowance granted under AS 14.25.142 is part of retirement salary for purposes of calculating adjustment under this section. (Currently the Administrator of teachers' retirement increases benefits when he determines C-O-L has increased and the financial condition of the fund permits. Increase limited to 4% per year.) Provides Act effective January 1, 1980.

Introduced February 1 and referred to Health, Education & Social Services, then to Finance.

ALASKA DEPARTMENT OF EDUCATION
POSITION STATEMENT

SB-372

The State Board of Education is in full support of the bill, and the services its enactment would provide.

There are currently seven (7) regions in the state receiving little or no adult basic education funding. It is the intent of Senate Bill 372 to provide minimum basic program funding to each of those regions. If these funds are put into the regions, it is anticipated that the program will generate from $100,000 to $300,000 for their respective programs from other sources.

Approved by: William D. Thomson

William D. Thomson
Deputy Commissioner
March 19, 1980

A PROPOSAL FOR EDUCATION LEGISLATION TO SERVE SEVEN REGIONS IN ALASKA

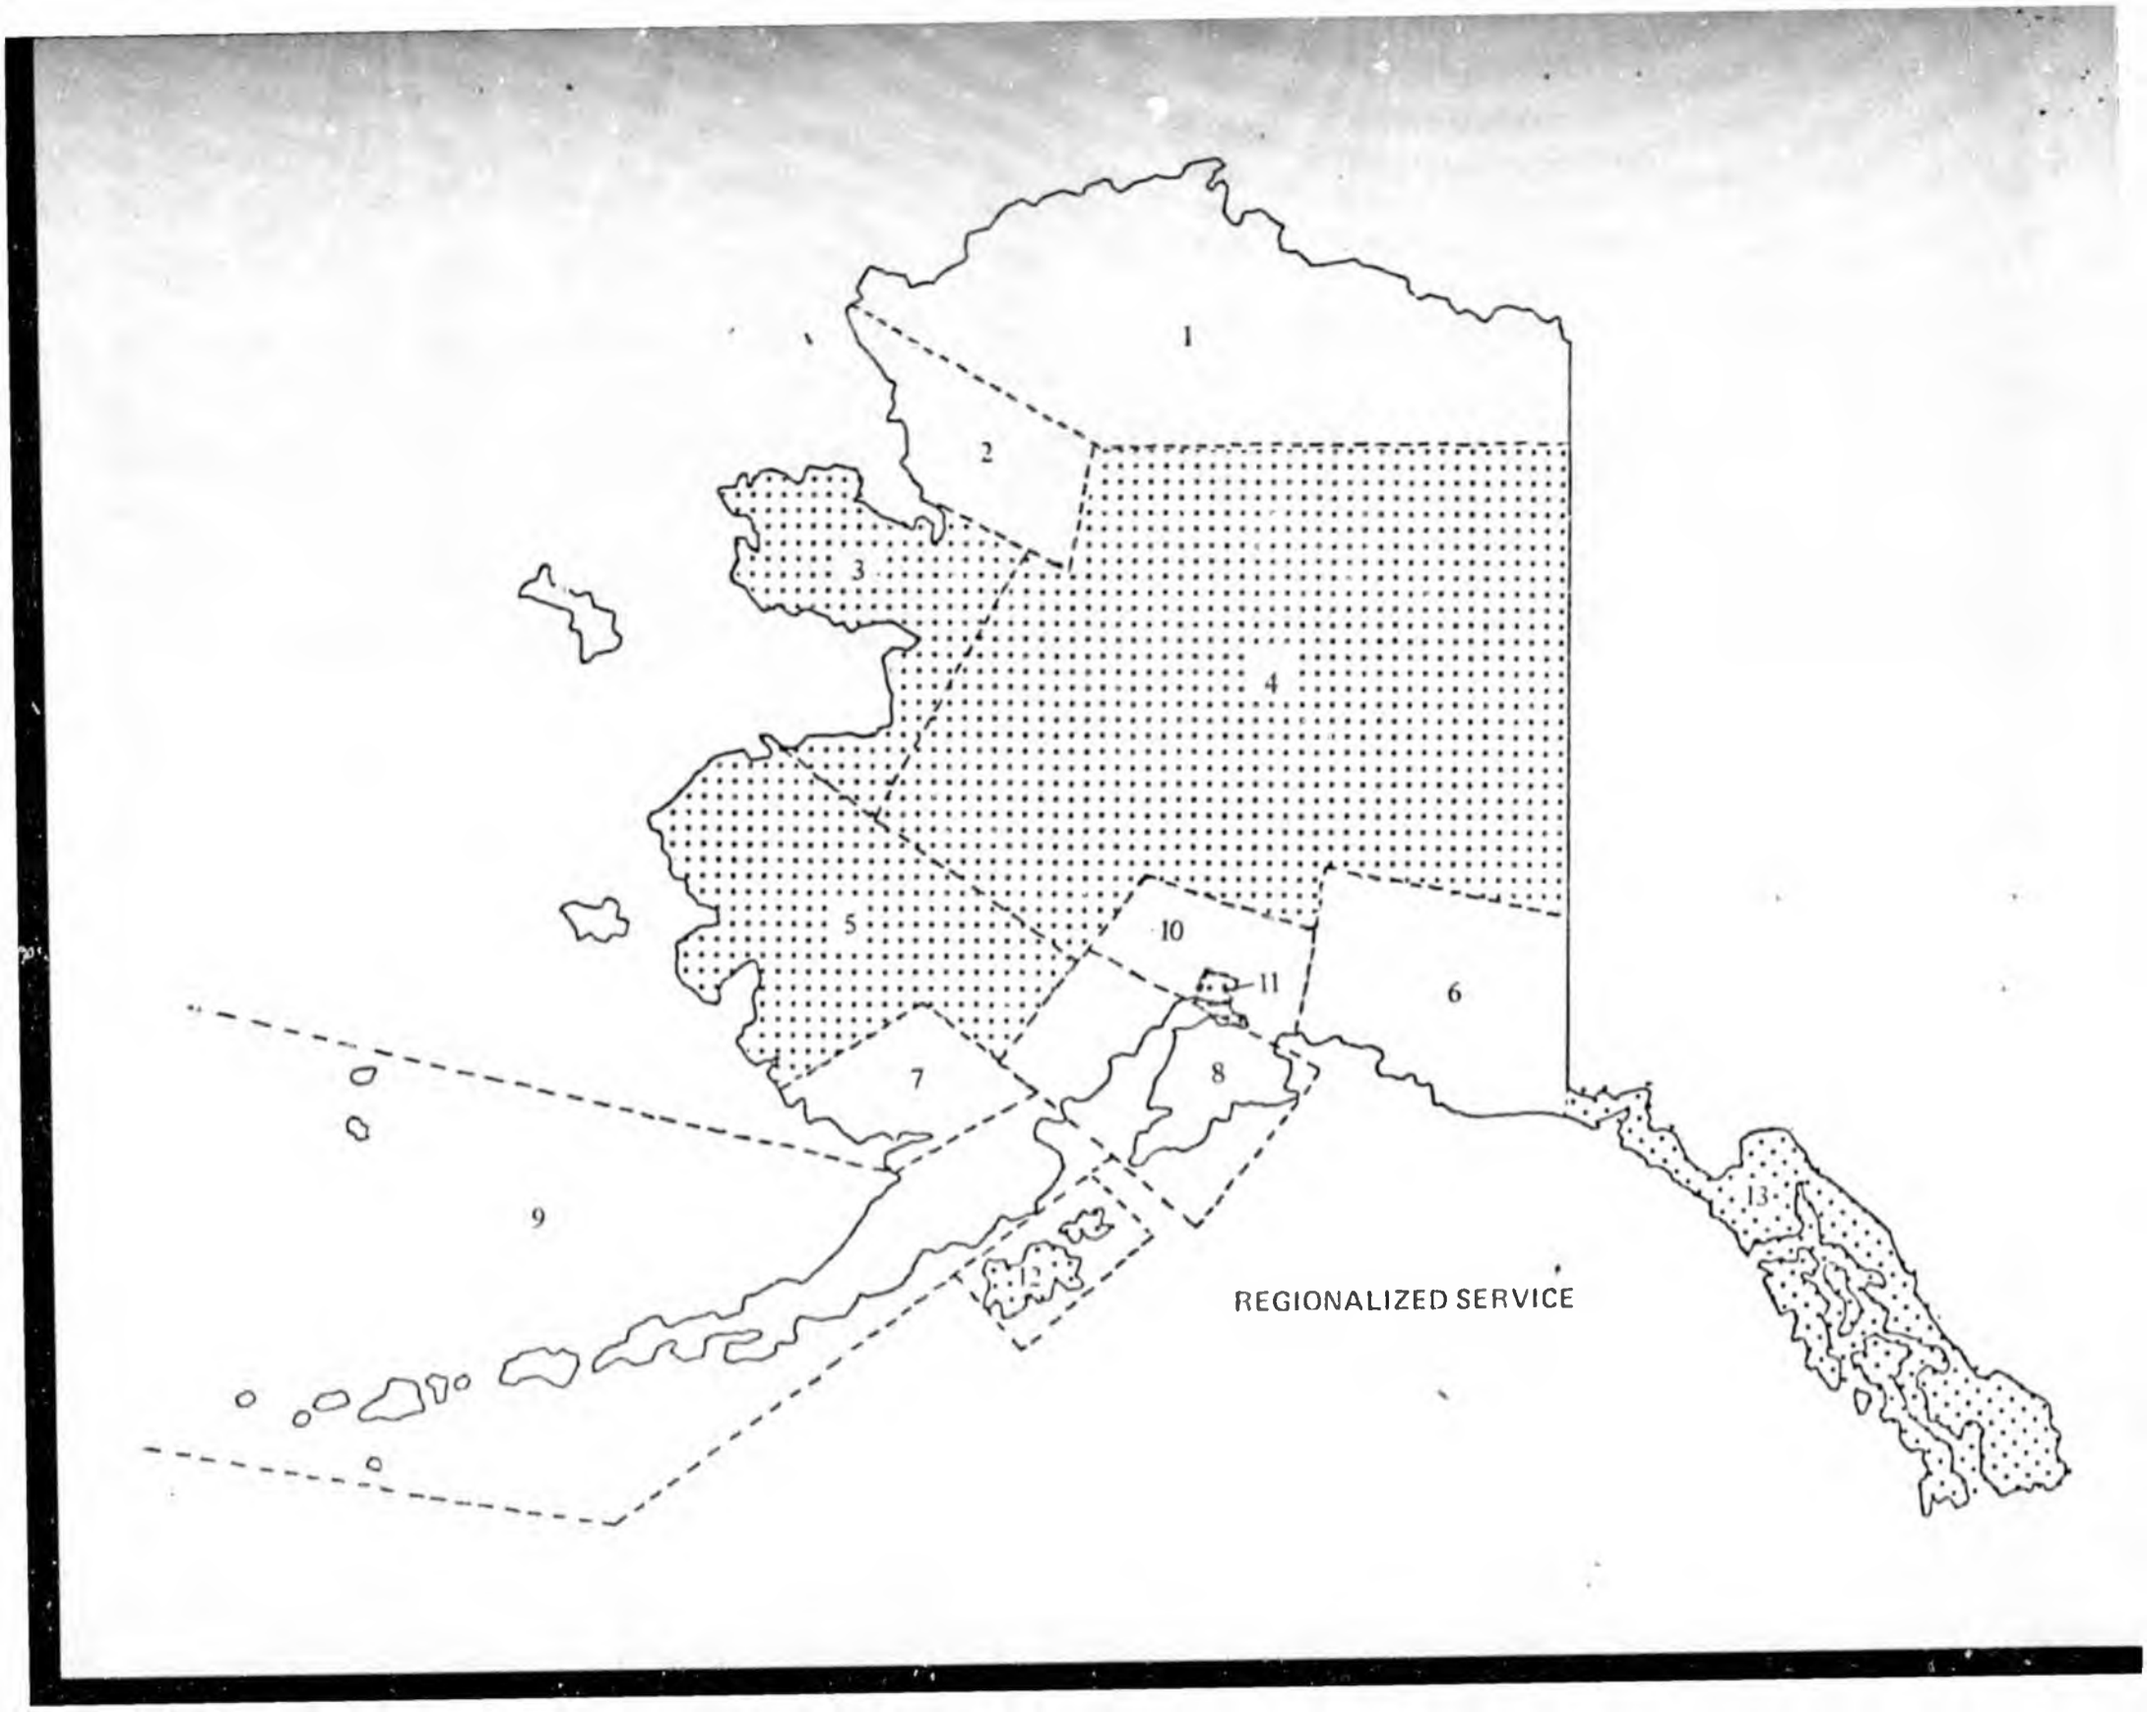
INTRODUCTION

This state offers a free education to every member of its varied society. Even so, there are many adults among us who either could not or would not finish (or, in some cases, even start) their elementary or secondary education. Because these adults are poorly educated, they have, throughout an entire lifetime, held some of the least rewarding jobs in our society. Frequently, they have held no jobs at all. They find themselves on the welfare roles, and each generation begets yet another generation of those who are uneducated, unskilled, and unemployed.

There are men and women in the state who cannot fill out job applications, who cannot read labels on prescriptions or prices at the grocery store, and who cannot help their children with even the simplest homework. They are people who need Adult Basic Education.

On the other hand, there are men and women among us who have recently applied for and received either their first job or a better job. We have adults who no longer must depend upon others to read for them on shopping trips. We have people who take new pride in helping their children learn, who pass that pride in education along to their formerly indifferent families. These are men and women who have received and are now demonstrating the benefits of Adult Basic Education.

DEFINITION



Adult — A person sixteen years of age or older who is not enrolled in a regular public or private school program and who is in need of basic literacy skills, English Language instruction, life skills instruction or other assistance up to secondary school completion.

STATEMENT OF NEED

The goals of Alaska Adult Basic Education are:

> ...to provide the best possible educational opportunities for all undereducated adults in Alaska ... to provide adults opportunities to continue their education to at least the level ... of secondary school ... (to make these) opportunities available for adults who have not completed secondary training as well as adults who have received a certificate of graduation from a school providing a secondary education but are functioning at less than a secondary competency.

There are presently seven geographic regions in the state receiving little or no instructional money for Adult Basic Education. The North Slope, Northwest Arctic, Aleutian/Pribilof Islands and Bristol Bay and Rural Anchorage Regions receive no funding. The Kenai Region receives

REGIONALIZED SERVICE

funding for two part-time classes and Valdez is funded for one teacher. This means that approximately 68,000 Alaskans are being denied access to the advantages of adult education.

At current funding level options are limited. Programs could be drawn out of one region and relocated in another region, but this would cause the loss of experienced staff in whom the state has a considerable investment in training. This would further cause the discontinuation of programs for many students who have had a long term commitment and are in the advanced stages of completion.

A second alternative would be to trim a percentage of money from existing programs and put into the unserved regions. Once again this would cause many people to lose service and take away from programs which already operate at only a minimal level. A case in point is the Kuskokwim Region which serves fourteen out of fifty-three villages now.

The third alternative and that being suggested by this proposal is to leave present funding in place and add minimum funds necessary to complete the network. The state is already in the unfortunate position of denying many of its citizens equal access to educational opportunity. To reduce or remove the programs currently thinly spread over the state would be a denial to our responsibility.

Great social pressure is being exerted upon the Native populations of the state. With Indian Self Determination, the advent of Native Land Claims and localization of the schools people with little education are being required to sit on boards of directors of corporations making decisions with great environmental and financial impact, sitting on school boards making decisions in hiring and firing professional staff as well as judgements on quality of education.

This press for educated adults cannot depend strictly upon the new young graduates to fill the need. Every effort must be made to tap the knowledge and experience of the mature adult in the older geneations. This can be done only through basic education.

The following statistics corroborate the need for basic education in the proposed regions to be served.

REGIONAL NEEDS STATEMENTS

1. Bristol Bay:

"In a special report prepared by Robert Natham and Associates for the Federal Government, a number of statistics were identified relative to the well being of Alaska Natives. For Bristol Bay, the figures are indeed stark:

The Median education in school years completed by
Alaska Native (as a whole) is:.....7.4
For Bristol Bay.....3.5

Further, the studies identified 50.3% of the population 25 years of age or older as having an educational attainment of 0-4 years of formal schooling. In this same population group, only 8.6% have

completed four years of high school or have an equivalent high school diploma. There is an immediate need for Adult Basic Education Courses in virtually all Bristol Bay villages."

No Adult Basic Education courses are currently being taught, therefore, there is no existing program or vehicle for adults within the villages to obtain the basic skills necessary to even apply for and pass the five sub-tests for a General Education Diploma (GED). An Adult Basic Education program would not only provide this service but would help provide for equal educational and growth opportunities for those adults who have been and are still being neglected.

2. Northwest Arctic:

An active, comprehensive program of adult education, based on the conceptual framework of Adult Performance Levels, is a prime requisite for growth of political, social, personal, and economic skills of NANA Region residents. In a recent (December 1978) survey, it was found that 42% of respondents had attended school to eighth grade of less. Another 13% attended between nine and eleven years. 45% were at least high school graduates. Teachers and other relatively transient professionals were included in the random sample and contributed to this last category. The indigenous, stable population is primarily of Inupiaq Eskimo heritage and fewer of this group have completed high school than the survey results suggest. Complicated further by multilingualism, the adult populations thus has a high rate of functional illiteracy. The region's people also suffer a high rate of unemployment. Inuit respondents, 52% had not had a job for the past year. An additional 41% were employed part-time. Only 7% had fulltime jobs. Besides unemployment, alcoholism, high prices, and lack of something to do, were seen by the respondents as the region's major problems.

The above statistics would in themselves suggest a need for an adult basic education/adult education program. But there is further evidence as well. When asked the question, "If a school for adults was available here, would you be likely to go?", 73% replied they would. And 90% said they would attend workshops or classes to teach people self-health care.

In follow-up interviews by school district personnel (April 1979), Ambler adults indicated that an average of 36% of respondents would attend each of sixteen (16) vocationally oriented classes. An average of 61% would enroll in each of two (2) consumer education classes, and in each of four (4) health and safety classes. Three (3) ABE courses would each have an enrollment of 10% of the adult population of this village, and a GED preparation course 32%. If extrapolated to the region's adult residents (approximately 2,500 people in eleven villages), one could anticipate about 150 people interested in a ABE program, 800 in a GED program, 900 in job skills, and 1,525 in other life skills program. Of course, many people indicated interest in several programs, and actual attendance would be well below the level of interest, but the need for an adult education program is apparent.

MEDIAN YEARS OF SCHOOL COMPLETED BY REGIONAL POPULATIONS

The following chart was compiled in an effort to show both the educational services needs and the income levels of the target area populations the A.S.H.E.S. Talent Search Project would be aimed at.

Region	Median Years School Completed		Highest Grade Completed by largest % of population				Eligible youth age 14-24 (17.4% of poverty population	Total below poverty pop.		Total Pop.

TOTAL	7.5	12.6					6197	35614	12.7	280586

Data compiled from 2(c) Report, Task I. Excerpt from 2(c) Report, Task II, "The lack of basic statistical information prevents educational agencies from evaluating current educational efforts and identifying unmet needs."

3. Aleutian/Pribilof

Due to limited educational opportunities in the past, the people of the Aleutian/Pribilof region have faced many difficulties coping with 20th Century corporate life thrust upon them by the Native Claims Settlement Act. Leadership has been developing with incredible rapidity and effectiveness, but the heavy pressures involved in rapid change have caused frustrations resulting in social disorganization. Village corporations, councils, school committees and school boards have all been forced into leadership decisions for which they often lack basic training and experience. According to the 1970 U.S. Census in the Aleut Corporation area, 15% of the Native people 25 years or older completed grades 1-4; 25% grades 5-6; and 16% grades 7-8. Unless educational needs are met, the following will continue to occur:

A. Village and city governments will fail or falter or will be dominated by non-Natives.
B. School boards will be dominated by non-Natives, and Native parents will have little to say about education of their children.
C. Village corporations will not function at their full potential.
D. Outside investors will reap fortunes in the Aleutian/Pribilof area while the majority of Aleut people will subsist virtually at poverty level.
E. The Aleut cultural heritage will be overrun and lost, leaving behind the vicious circle of poverty, alcoholism, drug abuse, family disintegration and loss of identity.

4. Matanuska-Susitna

Matanuska-Susitna Community College identified 4,600 adults having less than a secondary education in the Matanuska-Susitna service area. Bureau of Labor statistics revealed a July unemployment rate of 15.1 percent and November 23.3 percent combined with Decembers 24.9 percent are symptomatic of the need for basic education and life coping skills training.

5. North Slope

The native residents of the North Slope have a median school completion level of 5.6 years. This lack of education has significant impact upon the ability of natives to compete for and maintain jobs in the now technologically oriented North Slope Region. Additionlly, a bank of educated persons is necessary to train for the roles necessary if the new affluence introduced by massive oil revenues is to remain under control of its rightful owners. The few individuals represented in the leadership need many more trained, educated people to take on the many emerging roles in business, education, industry and arctic leadership.

6. Kenai Region

During the summer of 1979, an assessment of the available educational resources and needs of the adult client population was done under a federally funded program named NETWORK. (Network of Education, Training and work Opportunity Resources Knowledge Bank). The final report will not be in this office until October 30, however, preliminary analysis indicates that the statistics presented last year were in the ball park. Thus, they are repeated here.

The population of the Kenai Peninsula is approximately 25,000 with most of the people living in the Kenai-Soldotna area. In Level I (1-9), it is estimated that 1,500 adults could be served. Additional estimates [illegible] that there are approximately 3,000 adults in Level II and 150 ne[illegible] ESL training.

7. Valdez/Copper River

The Valdez/Copper River Region encompases a population of nearly ten thousand people. Of this ten thousand an estimated 2,400 have less than a high school education. The Native adult population has a median school completion level of 5.8 years. With the pipeline terminal, pumping and maintenance stations throughout the region it is apparent that employment opportunities are fast appearing, but they are at a level which demand solid-scholastic background. Unless the region is given the benefit of ABE services, these opportunities will once again fall to outsiders.

PROPOSED SERVICES

Services shall include instruction in basic literacy, English as a Second Language, life coping skills and vocational counseling in the form of:

an "individualized educational program" a written statement jointly developed by a qualified instructor and by the person, to include:

- present achievement level analysis
- short range and long range goals
- identification of specific services that will be provided toward meeting those goals
- when and where these services will be provided and how long they will last
- a schedule for checking progress achieved under the plan and for rating necessary revisions

These services shall take place in the towns and villages of the respective regions as selected by the educational institution providing the service. Curriculum shall be determined by the student, local educational institution in concert with their local advisory council and the citizens participatory planning process used by the state ABE program.

PROGRAM IMPLEMENTATION

Organization for Delivery of Services

State Organization: In an effort to prevent proliferation of state bureacracy, these funds should be located in the Alaska Department of Education, Adult Basic Education Section.

This section already has in place the mechanisms for granting and administering funds. A statewide network of curriculum assistance, technical assistance and staff development. The addition of this program to the present network could achieve maximum benefit at minimum cost.

LOCAL DELIVERY

Local/Regional delivery is currently conducted throughout the state by a variety of organizations. These organizations include school districts, community colleges, Native Non-profits, private non-profits and public non-profit agencies. The funds are placed on a competitive basis to the organization offering the most service for the available dollars. Programs in most regions reflect cooperation between two or more agencies for delivery of service. The competition between agencies has been very effective in holding down costs without causing instability in the program. In the case of similar bids the program operator with the proven history of performance is always funded.

Program operators not performing will have historically been given one year grace to upgrade and it has been necessary to pull only a program in six years.

FUNDS NECESSARY TO IMPLEMENT NEW REGIONS

North Slope	$80,000
Northwest Arctic	80,000
Bristol Bay	75,000
Aleutian/Pribilof Islands	85,000
Kenai Peninsula	75,000
Rural Anchorage (Mat-Su)	75,000
Valdez/Copper River	75,000
Total Program	$545,000
Staff Development @ 10%	54,500
Support Services - 1 clerk typist III @ 18,000 including fringe, etc.	18,000
Total Cost	$617,500

Justification:

Regional Allotments

North Slope, Northwest Arctic and Aleutian/Pribilof Islands Regions are suggested at a higher level of support due to unusual travel costs. Although travel will be much cheaper in the Kenai and Rural Anchorage regions extra funds are justified due to the population density they must serve.

Staff development is a vital compontent to ABE. Rural teachers are taken from the indigenous population and trained as ABE instructors. This training is a rich source of leaders in the rural areas. Attached find statements of what have happened to many of the ex-instructors once the role of ABE instructor gave them responsibility in the political/social process.

Furthermore, staff development is inherent in quality instruction, particularly when dealing with people who have never taught before or even experienced teachers dealing for the first time with adult students.

Support services are necessary if reasonable service is to be available to the new regions. Although ABE is funded over three times as high as four years ago and is offering many more services to field programs, the present administrative staff need not be expanded but the present 1/2 time secretarial clerical arrangement simply cannot keep up with present volume let alone be expected to handle nearly double the number of contracts currently served.

Matching funds are available from many sources including C.E.T.A., B.I.A., Indian Education, Labor, Social Services, boroughs, etc., once a knowedgable organize services and negotiate contracts. It is anticipated that the first fiscal year funds at least equally the inital grant will be generated by and the third year they would be generating as much as three dolllars per state dollar.

Definitions
ABE - Adult basic education
CETA - Comprehensive employment & training act

The money being generated tends to be dollars that previsously created overlap programs or furnish ancillary services which, though useful, were not coordinated with ABE, therefore seldom used.

United States Council of State Directors

Adult Education Economic Impact Survey
Alaska - FY79

A. Public Assistance

1. List the number of Adult Education Learners removed from public assistance in FY77 (as reported in Table 5, Item 12 in Annual Report). 24

2. Average annual cost per adult for public assistance in your state. Households average 1 adult and 2 dependents nationally and FY77 statistics from USOE reveal Alaska costs to be 12,948 per household including case work, etc. 12,948

3. Total projected savings per year. (Multiply answer in number one times the answer in number two.) 310,752

B. Employment

1. List the number of Adult Education learners who became employed in FY77 as a result of Adult Education (as reported in Table 5, Item 13 in Annual Report). 112

2. Projected income earned by adults who became employed. Take the number of adults receiving jobs as a direct or indirect result of attending Adult Education class: Multiply this number by the minimum hourly rate (now $2.30) times 40 X 52. If the actual income is known, then use this instead of minimum rate. 1,397,760

Minimum average in Alaska is just over $6.00

EXAMPLE: 112 persons who became employed X $6.00 per hour = $672.00 per hour X 40 hours per week = $26,880 X 52 weeks = $1,397,760 per year new income.

C. Job Promotions

1. List the number of adults who were promoted as a result of Adult Education (as reported in Table 5, Item 14 in Annual Report). 222

2. Using Employers State salary scale minim is 18¢ per hour. Projected additional money earned by adults who were promoted as a result of Adult Education. Multiply the number of adults receiving a promotion by .10 per hour (which is a minimal figure) X 40 hours X 52. 230,880

EXAMPLE: 222 promotions X .50 per hour = $111.00 per hour X 40 hours per week = $4,440 per week X 52 weeks = 230,880 per year.

Resolution of Impasses (teacher & school dist.)

SENATE BILL NO. 376, by Senator Colletta and Stimson. Amends AS 14.20.580(c) which allows Governor to appoint an "advisory arbitrator" to review the issues and make recommendations for solutions of an impasse in the event the final mediation report is rejected by either side in negotiations between teachers and a school district. Amendment deletes "advisory." Adds new subsection (d) which provides that "If a party rejects the recommendations of an arbitrator appointed by the governor . . ., that party will be bound to the position of the other party. The recommendations of the arbitrator, if accepted, or the position of the party not objecting to the recommendations of the arbitrator, if substituted for the arbitrator's decision, are binding on the parties for a period of one year, and may be extended by mutual agreement of the parties. . . ." Provides Act effective immediately.

Introduced February 1 and referred to Health, Education & Social Services, Community & Regional Affairs, and Judiciary.

THE CORDOVA PUBLIC SCHOOL BOARD OF EDUCATION IS DEFINITELY OPPOSED TO THE CONCEPT OF BINDING ARBITRATION. TYPICALLY CASES INVOLVING ARBITRATION OF LABOR DISPUTES BETWEEN PUBLIC AUTHORITIES AND EMPLOYEES ARE CONCERNED WITH SALARY OR TERMS AND CONDITIONS OF EMPLOYMENT. PRESENTLY, ALASKA STATUES MAKE PROVISIONS FOR SETTLEMENT OF THIS TYPE OF DISPUTES OR NEGOTIATIONS AND ARBITRATIONS. ALTHOUGH THE ISSUE OF ARBITRATION OF LABOR DISPUTES IN RECENT YEARS HAS BEEN COMMONPLACE IN PRIVATE INDUSTRY, THE CONCEPT IS STILL RELATIVELY NEW IN THE PUBLIC SECTOR. AT THIS TIME ABOUT 20 STATES HAVE MADE SOME STATUTORY PROVISIONS FOR THE SETTLEMENT OF DISPUTES THROUGH ARBITRATION. THE CASE THAT BINDING ARBITRATION IS A PARTIAL SUBSTITUTE FOR THE RIGHT TO STRIKE IS OFFERED AS A REASON FOR THE ACTION. IN ALMOST EVERY STATE THE SCOPE OF THE ARBITRATION HAS BECOME A COMMON PROBLEM. IT MAY WELL BE THAT THE SOLUTION TO THE SETTLEMENT OF EMPLOYEE DIFFICULTIES USING A MODEL DERIVED FROM INDUSTRY WILL ONLY SERVE TO ESCALATE THE PROCESS OF NEGOTIATIONS AND LABOR DISPUTES. PLEASE REMEMBER THAT WHOLE PROCESS OF LABOR NEGOTIATIONS STEM DIRECTLY FROM AN UNSUCCESSFUL PRACTICE ORIGINATING IN INDUSTRY. THE BINDING ARBITRATION PROCESS AS AN EXTENSION OF THIS MODEL NEEDS TO BE EXAMINED VERY CAREFULLY.

Dear Senator Hackney:

The School Board and Administration of the Bristol Bay Borough School Board wishes to express their gratitude for your concern and actions concerning Binding Arbitration for teachers and staff.

The school board in their unique position as policy makers for the community and their representation of the citizens would definitely lose a valuable part of their decision making capacity if a binding arbitration bill was to become law.

We applaud your efforts and insight on this issue.

Sincerely,

Dear Senator Hackney:

The Board of Directors of the Bering Strait School District has asked that I write you to express our opposition to binding arbitration. We believe binding arbitration would disadfranchise the village people of our region by denying to our duly elected school board the right to control our schools.

The exercise of local control of public education by the parents and citizens served by the schools is the foundation of our democratic system.

We were elected to develop programs to meet the local needs of our village children. We cannot effectively advocate for our students and build programs to meet these needs if the legislature should pass a law implementing binding arbitration.

Binding arbitration would enable teacher union leadership to bring before an outside arbitrator decisions regarding district governance, and the allocations of district resources which could effect the welfare of our students.

We urge you to stand fast and hold the line against binding arbitration. Our schools must be for the children and the parents and not for the largess of any special interest organization.

Your efforts in opposing binding arbitration are vital to our efforts to implement a quality educational program for our children.

Thank you,

Sincerely,

Chuck Degnan III

Juneau, Alaska 99801

Dear Senator Colletta:

Thank you for the time you gave me to express the concerns of the Kuspuk School District regarding your efforts to get Binding Arbitration into law. We sincerely believe that what you are proposing is wrong and will have long range detrimental effects on the people of this state. We view your effort to impose this requirement on the elected boards as destructive to the decision-making role presently entrusted to local school boards by the parents and other voters of our state.

Certainly, we realize that the tremendous pressure presently being exerted by the teachers' union, while obviously self-serving, is extremely difficult to resist; and while resistance may not be politically profitable, we ask that you please consider the source.

We respectfully request that you reconsider your position toward binding arbitration.

Sincerely,

Bob R McHenry

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM January 30, 1980

SUBJECT: Teacher/school district negotiations (Work Order Number 7855)

TO: Senator Mike Colletta

FROM: John B. Chenoweth
Legislative Counsel

The enclosed was prepared on the basis of the draft submitted with the work order request. The legislation, as presented, is not without its problems, among them:

(1) appointment of the arbitrator remains discretionary with the governor; there is no mechanism by which both sides may present the request for appointment to him;

(2) the approach contemplates only acceptance of the arbitrator's award by both sides, or its rejections in full by only one of the parties; one wonders what happens if both sides evidence displeasure, or if one side is willing to accept the award in all particulars save but one or two;

(3) arbitrator's decisions, styled "awards", are generally binding on parties; here, the "arbitrator's" role is rather more one of suggesting solutions;

(4) when a party rejects the arbitrator's decision and, under this bill, binds itself to "the position of the other party" for purposes of resolving the points in dispute, what is meant, specifically, by "the position of the other party"? How is that position to be ascertained? Which expression of that position is the one which is to be followed? I do think that this must be stated with more specificity in order to help the parties.

The bill is presented in draft so that these points may have your attention. Thank you.

Re: SB 376, Relating to Resolution of Impasses in Teacher Negotiations

Dear Senator Hackney:

The following comments regarding SB 376 (Resolution of impasses in teacher negotiations) are submitted on behalf of various school districts which we represent.

SB 376 would mandate a form of binding arbitration as the final step in employment contract negotiations between teacher bargaining groups and local school boards. The issue of binding arbitration, of course, has been fervently (and often emotionally) debated over the last few years, with the Anchorage teachers' strike of last Fall serving to punctuate emphatically the need for some orderly and reasoned approach to the problems of collective bargaining impasse. In fact, the path of resolution followed by the Superior Court in Anchorage in responding to that strike seems to indicate that, in the absence of a legislative framework for resolution of bargaining impasses, the courts will take it upon themselves to act as binding arbitrators, rather than permit the civil disobedience and disruption which can arise in teacher strikes. The task, therefore, becomes one of identifying alternative solutions to the impasse problem and analyzing their respective merits in the light of the various policy considerations which impact upon labor relations between public schools and their teacher employees.

The binding arbitration approach proposed in SB 376 is one possible solution. However, until this approach can be examined and analyzed in comparison with the other approaches to bargaining impasse, there is no assurance that this impasse resolution mechanism is the most appropriate one for education in Alaska. As you probably know, the Governor has recently appointed a panel to study and develop alternative solutions to the bargaining impasse problem. Consequently, we would suggest that further consideration on SB 376 be delayed until the Governor's panel has had an opportunity to carry out its tasks and report back with its findings and recommendations. Once this has been accomplished, your committee could review the available alternatives and decide which of them most closely fits with the various policy considerations which are important to it in the area of education.

With respect to the particular approach to bargaining impasse proposed by SB 376, we have a couple of comments. First of all, it is not clear from the bill precisely what elements of the collective bargaining process are intended to be subject to binding arbitration. For instance, while it seems clear that the arbitrators would decide disputes concerning salary and other financial benefits of teachers, it is not clear whether the bill intends that those items of negotiations which are not mandatory subjects of bargaining would nonetheless be subject to binding arbitration. We would certainly hope not. Since neither party to collective bargaining negotiations is ever required to bargain at all over non-mandatory (i.e., permissive) subjects of bargaining, it would be unfortunate if an outside arbitrator could rule on negotiations disputes over those kinds of subjects.

Similarly, we also wonder whether the bill would require that disputes over questions of precise contract language be subject to binding arbitration, rather than just the general outlines of disputed proposals. Clarification of these kinds of questions seems vital if an impasse resolution procedure adopted by the Legislature, whatever its form, is to have any hope of achieving its desired effect.

On behalf of our district clients, I thank you for the opportunity to present our concerns on SB 376.

Sincerely yours,

JOSEPHSON, TRICKEY & LORENSEN, INC.

Med-Alert Inc.

405 West 27th Avenue • Suite 101A • Anchorage, Alaska 99503
Telephone 272-1911

Feb.4,1980

Dear Senator Hackney

Enclosed you will find a copy of the corporate plan for Med-Alert,Inc. This will familiarize you and your committee members with the service and structure of Med-Alert,Inc. I have also included a cost analyis based on a single unit purchase, including the cost of installation, records and monthly monitoring fees. The cost for purchase, rental or lease would be negotiable in proportion to the quantity of units ordered. This would make a large scale program amiable for State funding and Med-Alert,Inc. Many options are available with in-house monitoring probable for large scale housing projects.

I appreciate your time and interest regarding the capabilities of Med-Alert,Inc. I will be in Juneau thru Friday,Feb 11. and will be available to meet with you at your convenience.

Sincerely,

Bob Smith

Med-Alert Inc.

405 West 27th Avenue • Suite 101A • Anchorage, Alaska 99503
Telephone 272-1911

The following prices are the ones marketed to the general public for each Med-Alert unit. This is the basic costs with no extras.

Rentals:	$100.00	Deposit (refundable)
	100.00	Installation Fee
	25.00	Set Up Fee(paperwork)
	90.00	a month monitoring fee
	$315.00	First month then $90.00 a month thereafter

A rental is for three months or less.

Leases:	$100.00	Deposit(refundable)
	100.00	Installation Fee
	25.00	Set Up Fee(paperwork)
	45.00	a month monitoring fee
	$270.00	First month then 45.00 a month thereafter

A lease is considered four months or more.

Sale of equipment:	$350.00	Sale of unit
	100.00	Installation Fee
	25.00	Set Up Fee(paperwork)
	30.00	a month monitoring fee
	$505.00	First month then 30.00 a month thereafter

If the equipment is under a rental or lease agreement, it is repaired at no added expense to the client. For a sale, the equipment is under a 90 day warranty then it will cost $10.00 an hour for repairs. The $10.00 an hour is from the time the maintaince repairman is dispatched to the time he reports in that he has completed the repairs and is available to go to another location.

Med-Alert,Inc.,uses the existing public telephone lines into Alaska General Alarm (AGA). The FCC registration number is AC698R-67314-AL-R which is through AGA. AGA is approved by Underwriters Labatories and monitors several Med-Alert accounts. Each digital communicator that AGA uses to monitor can handle 1000 Med-Alert accounts. These accounts are coded in series and can work in conjunction with the AGA monitoring equipment. This service is provided at a minimal cost to Med-Alert,Inc.

INTRODUCTION

TO

MED-ALERT INC.

405 West 27th Avenue
Anchorage, Alaska 99503
(907) 272-1911

NOTICE

This document contains confidential information proprietary to Med-Alert, Inc. It is submitted solely for the purpose of allowing interested parties to understand the Company's operations. This document may not be reproduced in whole or in part without the express written consent of the Company.

BACKGROUND

Med-Alert, Inc. was incorporated in Oct. 1979. It's product line is Medical Alert Alarm Systems. A major goal, realized early in the Corporation's history, was to provide a sole source of Medical Alarm Systems. The founding management recognized that this type of system would make subscribers feel secure if they had a way of knowing that help was just a push of a button away.

In 1979 three aggressive local businessmen developed the Corporation. They perceived Alaska's ever increasing need for dependable emergency alarm systems for the people prone to physical incapacitation and also physical injury. They also caught the vision of the excellent growth potential throughout the state. Quality, integrity and dependability are company cornerstones that have been established by its current owners.

To date, the company has started to achieve a high level of respect because of the aggressive, professional and high level of technical capability to design Med-Alert systems to meet customer requirements.

OPERATIONS

In the broadest terms, the principles of Med-Alert, Inc. have stated the company will acquire and provide the most advanced and sophisticated equipment available in the field of electronic emergency medical alert service.

In achieving the goals and objectives of the company, management recognizes the importance of having knowledge in the areas of products, service, alert management and aggressive and dynamic sales force. Med-Alert, Inc. plans to accomplish these goals and objectives by structuring what is called a "mastermind alliance", through working closely with the medical profession, hospital staff, paramedics and Alaska General Alarm.

Even though Med-Alert has just started, there have been several milestones reached. There is currently an Agreement with Alaska General Alarm (AGA) which has a Central Monitoring Station, manned by trained personnel 24 hours a day. It is recognized as the most modern and complete monitoring complex in Alaska. AGA is the only facility that Underwriters Laboratories recognizes in Alaska.

In addition, Med-Alert will have their own computer equipment in use with AGA's. Between both systems the clients can receive prompt medical service when it is required.

The Municipality of Anchorage has also agreed to use the system in the aid of emergency services it renders pursuant to a call for assistance from Med-Alert via the "Hot Line".

CAPABILITIES

Materials and technology used in design engineering of Med-Alert systems are continually being expanded and refined to keep Med-Alert the front runner in current state-of-the-art.

Med-Alert, through its association with AGA, can provide medical-electronic security on a large scale. This affiliation is in keeping with the Company's objectives and philosophy to provide single source responsibility on major products.

ORGANIZATION

Med-Alert is made up of an Executive Staff and five departments; Marketing, Engineering, Quality Control Purchasing, and Accounting.

The entire staff is composed of carefully selected career personnel who possess a diverge range of knowledge and abilities. This team is recognized throughout the State of Alaska as the best in the Med-Alert industry.

THE EXECUTIVE STAFF

CORPORATE PRESIDENT

RICHARD MARRON

Mr. Marron has been the acting President since the inception of Med-Alert in Aug. 1979. Prior to becoming president, he worked for the State of Alaska as a social worker. He has an equity interest in the business. Mr. Marron was the Director of the Residence Education Center for Chapman College located on Elmendorf AFB and acted as chief administrator over the educational programs prior to joining social services. He attended the University of Alaska, Anchorage majoring in the area of

Psychology. He later attended in the Masters of Business program. He has experience in organizational management and marketing. Mr. Marron also worked in hospital settings for a number of years.

DIRECTOR OF ENGINEERING

MAURICE ABELL

Mr. Abell has seven years experience in the electronics and phone installation industry prior to joining Med-Alert. He is an equity owner and has contributed significantly to the Company's success. He owned his own installation company for two years. Mr. Abell attended the Western Kentucky University until 1972. He has an extensive background in alarm systems. Mr. Abell also is licensed in Electrical Administration for Inside Communications in the State of Alaska.

VICE-PRESIDENT OF MARKETING

BOBI SMITH

Ms. Smith has combined her medical and public relations background to provide the marketing for Med-Alert. Prior to her joining Med-Alert she spent five years with the Anchorage Fire Department, Emergency Medical Service as a Paramedic. Ms. Smith attended the University of Alaska, Anchorage, earning as Associate Degree in Paramedicine and holds a current Alaska State Paramedic License. Ms. Smith was an assistant to the Public Relations Officer for the Atomic Energey Commission in Anchorage for two years. In addition to Ms. Smith's paramedical background she worked as a laboratory assistant. Ms. Smith has been in Alaska for twenty-nine years and has become very active in many social services and civic organizations.

Other members of the management team have not been selected as of this time, however, it is anticipated this will be accomplished within the near future. It should be noted that management plans are to put together an advisory board

that will consist of experts in the fields of hospital administration, emergency rescue service, medical doctors, and members of the electronic alarm industry. This advisory board would assist in giving direction and identity of the marketplace and the overall scope of service that Med-Alert would provide.

Supporting the executive staff and five department heads will be a staff of trained and dedicated personnel. The staff will be assigned as administrators, marketing representatives, field installation techicians, service technicians, and clerical help.

THE PRODUCT AND SERVICE

Management has recently completed an analysis and evaluation of the need for a full service 24-hour medical alert service for those individuals that might be victims of heart attack, stroke, convulsion or other disorders that would require immediate medical or rescue service. After talking to a number of professionals in the various fields and receiving a very positive response from them regarding such service, conclusions were made to establish a company that would provide such a service.

The product line that would be used to implement and provide emergency medical service would consist of an assortment of sophisticated wireless electronic equipment. A portable distress transmitter, approximately the size of a cigarette pack, would be utilized which the user could carry on his person at all times. In the event of emergency, the transmitter would be activated to transmit a signal to the receiver located in a common area within the home or business, which in turn is directly connected to a small mini-computer terminal directly tied into Alaska General Alarm's 24-hour computerized Central Station. Each client could be identified by a particular assigned number with a specific zoned coding arrangement, which would enable the Central Station to immediately ascertain the account that was in alarm condition. Upon receiving the signal a computer printout is generated, giving the time, account number and zone condition and through

the direct "hot line" to medics, hospital and other emergency services, immediate service could be dispatched to give assistance to the victim.

In providing the patient with this type of life safety emergency service when time is of the essence, much advance preparation could be made by the hospital as well as the doctors being notified that a condition has occurred with one of their patients. There will also be the added service of two people of choice being notified so that someone who is a friend will know of the emergency.

MARKET AND COMPETITION

The marketplace primarily referred to for the purpose of this document would be the Greater Anchorage, Alaska area. Based on the research and in relation to the population of some 200,000 people, it is reasonable to project there is a minimum of 1,500 potential patients that would have need for the services that will be provided by Med-Alert, Inc.

Med-Alert, Inc's marketing strategy will consist primarily of working directly with doctors, hospitals, convalescent centers and medical treatment centers. Upon the receipt of a referral, a direct contact would be made with the patient, explaining the emergency service program and the life safety service that is provided.

In addition to the contact and coordination with the above referenced, the company's intent is to do some direct advertising as well as conducting small group seminars to explain the Med-Alert, Inc. program.

It should be noted that contact has been made with major cities such as Seattle, Los Angeles and several major cities back east and the above described program is being very successfully accomplished with a high level of acceptance, both by patients and the medical profession.

In regards to the competition in the greater Anchorage area, at this point there is no independent service being offered to the citizens of the community. It should be noted, however, that emergency service is being handled by the paramedics through the public services of the fire department.

Based on the above facts, Med-Alert, Inc. is optimistic about the acceptance and fulfilling a need which exists in the marketplace and is projecting to establish a minimum of 600 clients by the end of the first year, 900 by the end of the second year and 1,200 by the end of the third year.

For elderly, 'beep' can signal survival

By Richard Phillips

WHEN ETHEL RAYBURN'S daughter suggested her mother needed help to live alone, the 88-year-old widow flared indignantly.

"I am an independent critter. I like living alone," Mrs. Rayburn bristled.

The daughter persisted, producing a tiny box with a button on it as the 24-hour companion in Mrs. Rayburn's Downstate farm home. The box was a new kind of alarm, smaller than a package of cigarets and louder than a cry for help, as it turned out.

Eventually her resistance wilted, and Mrs. Rayburn put the unfamiliar device in her apron pocket. She never expected to use it, and doubted that it would work anyhow.

NOW, AFTER an episode of immobility in freezing temperatures outside her Bondville home this winter, the one-time skeptic credits the tiny box with saving her life.

The box is a wireless transmitter. Its makers claim it is the ideal invention for older people who want the independence of living alone but not the worry of lying helpless with no immediate prospect of emergency aid. Mrs. Rayburn became one of its first users last January when she stepped outside her farmhouse to gather in a newspaper blowing on her icy sidewalk.

"I slipped on the ice. I couldn't get up. I tried again and again and I couldn't get my legs under me," she recalled.

THE TEMPERATURE was near zero. Darkness was falling fast. When Mrs. Rayburn saw her son, Jay, rumble past in his pickup truck oblivious to her flailing arms and her shouts, she realized she might never see her children again.

"I began to think I would freeze to death. I expected nobody would come."

"But then I remembered that thing in my apron pocket."

Finding the transmitter with a numbing hand, Mrs. Rayburn pressed repeatedly on the recessed button. Once was enough. The beep activated a transistorized box attached to her telephone, which dialed a distress call to a computer in Linden, N.J. The computer translated the coded beep into a lengthy printout to a private operator, who started calling Mrs. Rayburn's family and the police department.

THE WHOLE PROCESS took about 95 seconds from the time she first hit the button. Help arrived minutes later, and Mrs. Rayburn was carried inside and thawed.

UNLIKE TAPE dialers, which are prone to false alarms and can't draw a distinction between a "busy" telephone signal and a dial tone before regurgitating a message, the new digital alarms keep dialing until a connection is acknowledged by the computer at the other end, Smith said. From there, operators draw upon a pre-arranged list of persons to call in emergencies. Smith said the leased service costs $20 monthly, excluding installation charges and telephone line rental.

THE WIRELESS transmitter is not cheap, and it is not really new.

It has been around more than a decade. But until a few months ago, no one thought there might be a market for it among the elderly, according to Len Rosenfeld, vice president of Amcest, Inc., whose computers and telephone operators Mrs. Rayburn relied upon for help.

The wireless transmitter broadcasts its signal on a special radio frequency. To avoid accidental triggerings from similar devices such as garage-door openers and even electrical storms, the signal must be broadcast on both AM and FM frequencies simultaneously or the transistorized dialer connected to the telephone won't work, Smith said.

Spokesmen for other alarm companies said they don't sell or rent such devices for use by older people. One said, "It's simply something the alarm industry has not examined. I think there is an assumption that the market is not there."

Amcest's Rosenfeld said the Lifeguard and Safewatch systems probably are the beginning of a burgeoning industry that will enrich its first promoters and enable the elderly to stay out of nursing homes longer.

"The sky is the limit. A lot of people with infirmities are brave enough to face being alone; what they want is someone out there to hold their hand when they need it—even if it comes through an electrical signal."

MEDICAL EMERGENCY ALARM SYSTEM: A GROWING MARKET, A GROWING PROBLEM

By Don D. Darling

Personal alarm systems that summon medical assistance in an emergency can mean the difference between life or death or between having to be confined to a medical facility at a very high personal or public cost or being at home.

Various public medical assistance programs, as well as private, state and federal government agencies, are recognizing this fact of life and are now examining various systems with a view toward approving certain ones for use on a "doctor's prescription" basis. This means that the approved supplier would be reimbursed by medical program funds in the same manner as suppliers of hospital beds, oxygen systems and other home patient care items.

The concept, as well as the private and public dollar savings, is beautiful. From the industry standpoint there will be a lot of guaranteed dollars out there for those offering equipment and service. With the large number of high quality-high reliability components available, there appears to be no excuse not to be able to design and market a good system at a reasonable price.

Basic Components

Administrators of these government medical programs, in a position of "approving" such alarm systems for use by their patients under reimbursement with private or government funds, cannot be expected to be both administrators and alarm experts; therefore they will be depending upon professional counsel for approval. And, although I don't presume to set standards here, I do offer the minimal requirements that I would establish for a client with a medical problem and describe in generic terms the systems and components I would consider.

For the bedridden, with someone on the premises 24 hours a day, the system could be as simple as a bedside pushbutton, a smoke detector, a bell or bells with power supplied by a transformer whose power supply cord cannot be accidentally disconnected. In other cases, a bell could be run to a neighboring residence.

The more typical case, however, is when the patient is ambulatory or partially ambulatory with partial ability to care for himself and resident assistance may or may not be constantly available. In these cases, an RF transmitter-receiver system that is carried at all times by the patient is recommended. Spare transmitters should be conspicuously located in the bathroom and kitchen. Where practical, the system could be hard wired into a number of pushbuttons or could be a combination of hard wired buttons and RF systems.

Smoke detectors would be recommended in both the bedroom and the kitchen simply because, aside from the medical problem, the second biggest life safety problem is fire, which in medical cases is most often caused by the patient becoming ill in bed while smoking or in the kitchen with foodstuff being prepared on a stove or in an appliance.

Where the RF transmitter-receiver system is concerned, they would be tested throughout the residence to assure that no dead spots exist, and if dead spots are found, a supplemental "slave" antenna system would be specified to eliminate the problem.

Central Station vs Dialer

In cases where direct connection dedicated phone lines to an approved central station are beyond the financial capabilities of the client or are impractical for technical reasons, a reliable two-channel

continued on page 76

ABOUT THE AUTHOR

A consultant on governmental, industrial and institutional security, Don D. Darling is a former chief (1955-59) of the Western Industrial Security Regional Office, Office of the Inspector General, Air Research and Development Command of the United States Air Force.

Darling also served as a security agent-inspector for the Department of Energy, Nuclear Regulating Commission (formerly the Atomic Energy Commission), as well as vice president of the Security Operations Division at McMillan Science Associates.

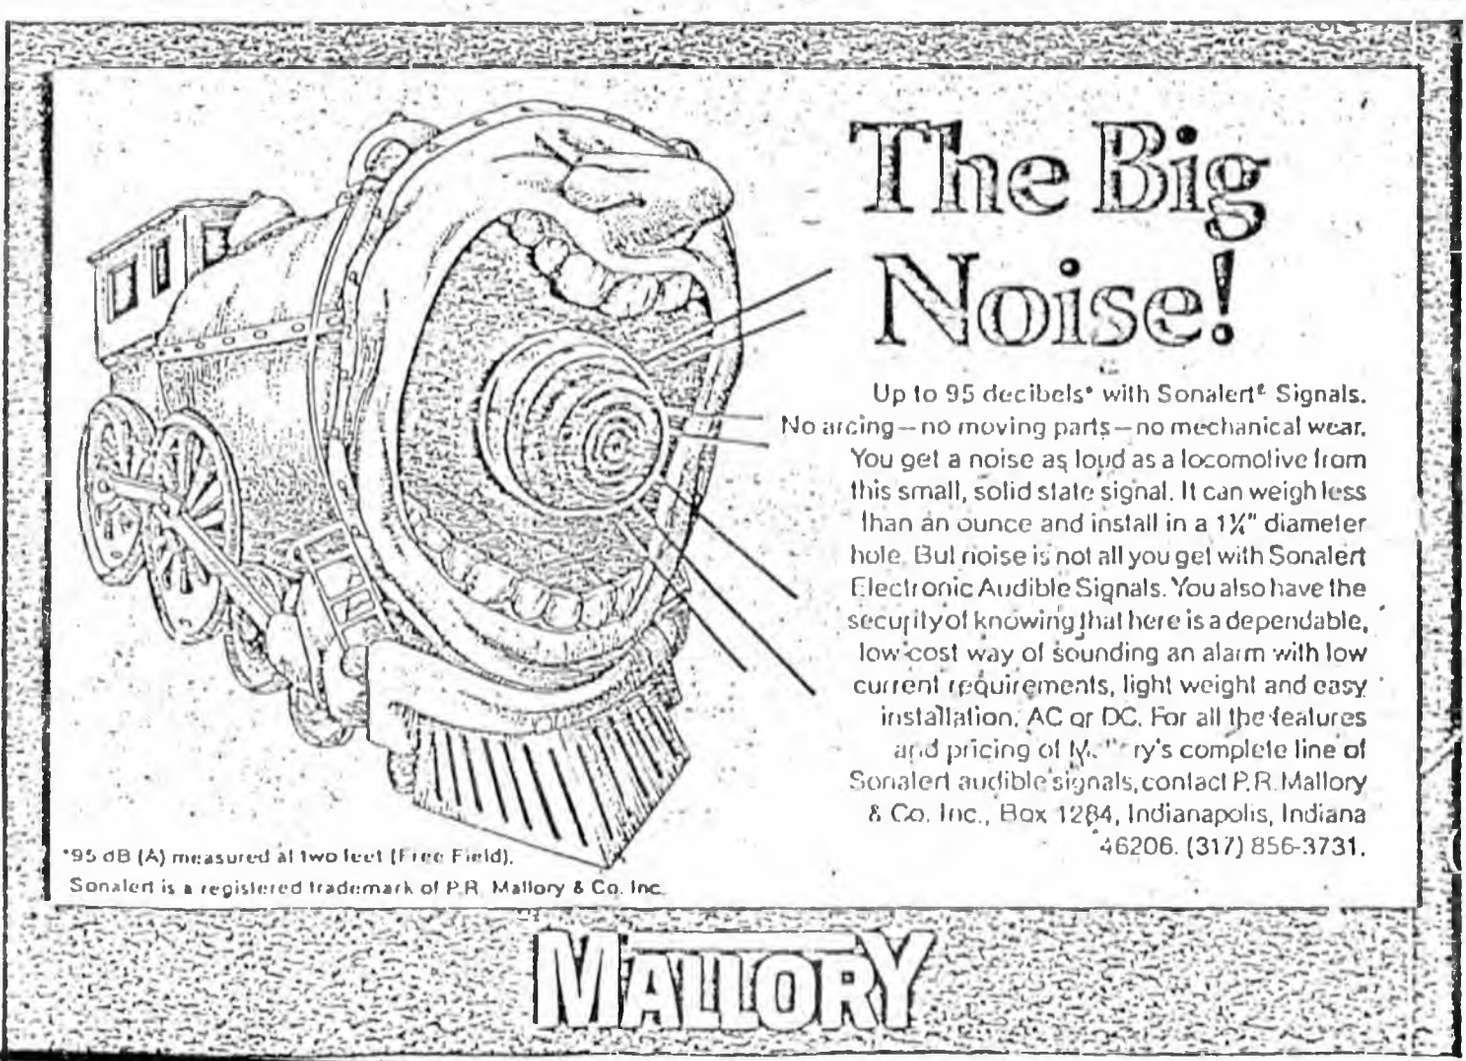
Currently, he is president of Don D. Darling and Associates, an El Segundo, CA-based security consulting firm; a contributor to "Security World Magazine;" and a frequent speaker at the International Security Conference.

continued from page 74

(minimum) digital dialer programmed to an approved central station manned 24-hours would be specified. An additional requirement is that the station has receiving-decoding and printout equipment compatible with the dialer. The system should be capable of printing out, as a minimum, time and date of alarm, subscriber's number and type of emergency, as well as corresponding information with corrective action note' at the station.

The central station should have an immediate "call back" alarm verification requirement to the subscriber's phone number to both validate the alarm and to assure that the line is intact. Ideally, systems with a listen-back capability in the event of an alarm signal would be recommended if the client could afford the added cost of the equipment.

I also suggest that the basic signal be sent to appropriate authorities immediately and that a second report be made to supply call back response or to report no response from the subscriber, indicating the validity of the alarm signal or defining the seriousness of the problem. As any nurse will tell you, they have responded thousands of times to a patient's signal in a hospital only to find that the patient had rolled over the bell signal in their sleep or accidentally pushed the button while having a nightmare.



Keep the Power Constant

Where battery operated sensors, such as the RF transmitters, are concerned, I recommend that the central station services supplier have and follow a policy of either sending replacement batteries or, on a regular schedule, send out a service representative on a date well before the end of the warranted shelf life of the batteries.

All other parts of the system and central station service being equal, the last system I would recommend to my clients is a system that uses a tape dialer instead of a direct line connect or a digital dialer. This is based on a simple fact of life — on a reliability ration, any solid state device has a higher reliability than any electromechanical device. Where tape dialers are used, I specify those of known high reliability and preferably those that have an Underwriters Laboratories label.

Like all alarm systems, there will be predictable and unpredictable equipment failures, telephone line failures and resultant "no signal" or false alarm situations. By specifying central station requirements such as "call back" or "listen in," the human failure factors can be minimized, which is all we can do. And with user instructions as part of the service package, the "user failure factor" can be minimized.

By following these comparable recommendations there is a high probability of providing adequate equipment and services to your client. I don't claim to meet the same "doctor's prescription" standards the medical authorities might come up with, but I do know that a number of doctors with medical problems have installed the first or second levels of these systems for their own use. ■

West Salem man dies in apartment blaze

By ALAN GUGGENHEIM
Oregon Statesman Reporter

Pride and stubborn independence may have killed Robert Claude McDaniel on Saturday.

The 66-year-old cancer-stricken polio victim, whose 32-year-old wife left him last week, died about 8 a.m. when fire gutted his apartment in West Salem.

McDaniel, called "Bob" by his friends and neighbors, lived at 1250 8th St. NW.

His wife, Connie, said she moved out their apartment last week;

"We more or less got into a big argument. His doctors and I have tried to talk him into a nursing home and he wouldn't go. I was hoping he would."

NEIGHBORS TOOK CARE of the invalid McDaniel, cooking his meals, helping him to the bathroom and, in the end, trying to save his life.

Felix "Pop" Geninatti, 60, had risen early Saturday to pack his belongings and get ready for his new job Monday as a caretaker of a Rogue River resort. He noticed smoke pouring from the bedroom window of McDaniel's apartment and ran over to Verla Dawson's apartment, banging on her door to tell her to call the fire department.

Then he ran the 25 feet or so back across the courtyard and crawled — with a towel over his head — in the front door of McDaniel's single-story, one-bedroom apartment.

"I crawled in there on my hands and knees and he was lying there just black" beside his reclining chair, said Geninatti.

WHEN GENINATTI exited the burning apartment, he ran into another neighbor, Patricia Mann, who was McDaniel's hired housekeeper. She was on her way in and later said it was a good thing he blocked her way. The ceiling gave way and crashed into the blaze at that moment, Mann said.

The Salem Fire Department answered Dawson's call and brought the blaze under control in about 14 minutes — almost before she was able to wake up her sound-sleeping 14-year-old son, Shawn.

Shawn was one of the last people McDaniel saw. He was one of several apartment neighbors who befriended the man.

"Patty (Mann) and I made a deal. She would fix him breakfast and lunch and I would fix him dinner. He slept in the reclining chair a lot. Since his wife moved out, he's sat there in the living room with his door unlocked so we can see him and he can wave if he wants anything," Mrs. Dawson said.

MANN LOOKED IN ON McDaniel after she returned from bowling at 1 a.m.

"I asked if he wanted anything and he said some milk and his tubes (oxygen tank extension tubes). He had emphysema. He said, 'I want to sleep in tomorrow; breakfast about 10 o'clock.' He said he wanted fried eggs, not poached," said Mann.

A half hour later, Shawn Dawson went in to check in on McDaniel and got him a blanket.

Some time later, Mann went back by and knocked on McDaniel's picture window. He was reading, she said, adding that he said, "Remember fried, not poached."

BEFORE SHAWN TURNED out his bedroom lights at 2:30 a.m., said Dawson, he opened his curtains and waved to McDaniel, sitting in his recliner inside his living room. The old man waved back.

McDaniel was friendly; he read books, magazines and newspapers in his recliner and while sitting in the bathroom, where he would stay as long as four hours at a time, just to keep from using up his strength and breath, said Mann. He used a wheelchair and a "walker" to get around.

"He would sit in there and say, 'I need something to read. I'm going crazy,'" she said. He tried to take care of himself but simply wasn't able to; his blue jeans were almost ready to fall off his hips, and would have if not for his suspenders, said Mann. She was paid $2.65 an hour by the state to do housecleaning for the McDaniels, who were on welfare because of their medical problems.

THE CAUSE OF THE FIRE may have been a dropped cigarette, according to what the firemen told Dawson and Mann.

McDaniel did smoke heavily, s Geninatti, with Dawson adding, "It took every ounce of strength for him to take a

Felix "Pop" Geninatti and Patricia Mann reflect on the death of their friend and neighbor, Robert Claude McDaniel, Saturday morning when fire gutted his one-bedroom apartment in West Salem.

West Salem man killed in blaze

(From Page 1A)

breath." He probably died instantly, the three neighbors agreed, as they pondered his death in front of McDaniel's home.

The neighbors suspect, though, that McDaniel wanted some hot chocolate or something early that morning but he didn't want to telephone one of his neighbors for assistance.

He didn't want to bother them. So, he tried to do it himself. That's their speculation about why McDaniel was found on the floor beside his chair.

Mann said that during her house cleaning, she often found scorched pans sitting on the stove, forgotten, or left there because a man didn't have the breath to tend to the stove.

"WE TOLD HIM TO CALL us for anything," said Dawson, adding, "We wanted to help him, he was such a nice old guy.

"But he was still independent. He had his pride still."

McDaniel's funeral service will be 10:30 a.m. Tuesday in Bollman mortuary, Dallas. Interment will be in Dallas Cemetery.

3

New firm to help ill

A new business in town, Med-Alert, offers a medical emergency alarm system tied to a 24-hour monitoring station.

Bobi Smith, vice president and formerly a paramedic for five years with the Anchorage Fire Department, said clients of the system carry a pocket-sized transmitter that requires only a push of a button to summon help.

"The person with an emergency doesn't have to talk," she said. "The dispatcher receiving the signal immediately notifies the municipality's emergency medical service that an emergency exists at a certain address."

This means, she said, that help will be on the way within a couple of minutes.

The general public currently can summon help by dialing the emergency number listed in the telephone book, 911.

Other officers in the new business are Richard Marshall, president; and Maurice Abell, director of engineering.

Ms. Smith said the Anchorage business is not affiliated with any other organization.

24-hour monitoring service available

Dear Bud:

My grandmother is planning a three month stay in Anchorage. She has chronic heart disease and I am concerned about her being home alone while I work. She has a medical alert system in own home that provides 24-hour monitoring so emergency care is always available.

I recall reading about a similar service being established in Anchorage but neglected to make a note of the name and address. Could you help me get in touch with their office so I can arrange for my grandmother's visit?

Barb Van Buren

Dear Barb:

I hope your grandmother enjoys her visit to Anchorage and doesn't have to use the Med-Alert system. It's nice to know it's there though, in case it's needed.

You're right, the service is new and will be listed in both the white and yellow pages under burglar alarms of the new telephone directory.

The monitoring equipment can be leased, rented or purchased and the monthly monitoring charge varies with the program selected.

Maurice Abell of Med-Alert told me their service is approved by Medicaid. Since your grandmother already has one system at home, you should check w.) Medicaid to see if a second system is also be covered.

Bud

AS A MEMBER OF THE ADVISORY BOARD FOR THE ANCHORAGE PARAMEDICS AND AS A ACTIVE CARDIOLOGIST IN THE LARGEST CARDIOLOGY PRACTICE IN THE STATE OF ALASKA, I WOULD VOICE MY STRONG OBJECTIONS TO SB 300.

I BELIEVE THE MED-ALERT SYSTEM TO BE UNNECESSARY AND REDUNDANT. A TELEPHONE IS SUFFICIENT AND SUPERIOR.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
ON
SENATE BILL NO. 380

"An Act making a special appropriation to the Department of Health and Social Services for the purchase of medical emergency alarm systems; and providing for an effective date."

The bill provides for $1,000,000 in general funds to be appropriated to the Office on Aging, Department of Health and Social Services to purchase Med-Alert medical alarm systems for distribution to elderly Alaskans.

Brief Overview

Med-Alert is a tradename for a medical emergency alarm which is a pocket size electronic transmitter that people wear on their person for contacting automatically a central station by simply depressing a button on the transmitter. The transmitter links to the person's home telephone to send an emergency signal to a central base station over established telephone lines. The range of transmission is 200 feet under optimal conditions. The central base station would be monitored for emergency calls on a 24-hour basis. Emergency care then can be dispatched immediatelyto respond to the medical crisis. The system has the potential of responding to threatening situations by quickly dispatching necessary life-saving care expeditiously to persons in medical emergencies.

System Administration in Alaska

The bill provides for the purchase of 3,000-3,500 emergency alarm systems for elderly persons. We envision our Office on Aging purchasing the equipment and distributing it to local senior citizen's centers based on a formula reflecting the number of elderly in the community that the center serves and the feasibility of utilization of the product in their locale. The center would have complete independence to design a distribution system to meet community needs. The center would select the persons who were to receive such systems on loan at no cost from the center, except for the monthly monitoring fee which the patient or his family must cover. The center would be responsible for proper record-keeping for audit purposes, in addition to the retrieval and disbursement of loaned equipment.

Discussion Areas

1. There are many medical alarm systems available in the United States and prior to the purchase of $1 million worth of them a comparison review and evaluation of other manufacturers' models might be appropriate. We offer the assistance of our State Advisory Council on Emergency Medical Services or its Executive Council to review the need for, and the effectiveness of this and other medical emergency alarm systems.

POSITION PAPER/Department of Health & Social Services

2. Since the emergency alarm systems are targeted for use by elderly persons, it may be reasonable to earmark a portion of the funding to provide for such systems in all public financed senior housing.

3. Since the bill only covers the purchase of the units, we see a problem with covering the $30 monthly monitoring fee that is presently being charged for such systems to be linked to emergency response systems. To our knowledge, Medicaid, Medicare, and private insurance do not routinely cover such items. The $30 a month fee may prove to be burdensome to elderly persons on a fixed or low income.

4. In checking with the Department of Administration, we find that although Med-Alert is the sole manufacturer of emergency alarm systems in Alaska, we cannot avoid going to competitive bid with other contractors from outside of Alaska which can supply similar alarm systems. The Med-Alert product would have to compare favorably on price, quality, service, and durability.

5. The stage of Alaska's communications may prove to hinder the full development of the emergency alarm system. The extensive use of party telephone lines and single village telephone may limit its applicability in many areas of our state.

6. The bill earmarks funds solely for the elderly. There are many disabled and ill persons who might benefit from such a system who have not yet reached the age of 60 or 65.

7. The emergency medical alarm is only as good as the available back-up emergency medical support services. In some areas of the state, such as Anchorage, there are trained emergency medical specialists available on a 24-hour basis. In others, there is not such a sophisicated network of trained professionals to respond to crisis calls.

8. Repair of machines may be difficult, especially for those consumers who would no have a repairman in their vicinity and the machine would have to be shipped by mail to a central repair source. Customer service would be necessarily delayed and cumbersome.

The Department recognizes the need for rapid response to medical emergency and views these systems as one possible way to speed up the response time in a medical situation crisis.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Comment: No fiscal impact on the Office on Aging.

It would be the intent of the Office on Aging, after purchase of the emergency alarm systems, distribution and accountablility would be made with the various local Senior Centers situated in the various communities of the State. Each interested Senior Center would make all determinations as to persons in need of equipment at the local level and keep necessary inventory and distribution records working with both this Office and the approved vendor.

TO: Senator Glenn Hackney

FROM: Donna Spragg Pegues
Co-Revisor of Statutes

Enclosed is the new version of the Committee Substitute for Senate Bill 380. From your notes, I gathered that only one appropriation section was to be included. If I am incorrect, please give me a call (or have Mary give me a call) so we can straighten it out.

I am not certain of the effect of the sentence which requires that the medical emergency alarm systems be MED-ALERT or like systems. As you know, under the state constitution, appropriation bills must be confined to appropriations. The requirement that a specific type of system or its equivalent be purchased with the appropriation is not really a part of the appropriation. However, it could be argued that it is a legally justifiable condition on the appropriation.

The attached CS for SB 380 was not adopted by the H.E.S.S. Comm.
Please draw us a new CS along the following lines:

Change title to: An act making a special approp. for a pilot program to provide medical emergency alarm systems etc

Sec. 1 The sum of $250,000 is appr. from the G F to the Dept. of H + SS, div. of soc. ser. for purchase, installation and monitoring ~~for~~ for medical emergency alarm systems. These systems will be provided to* ~~elderly Alaskans, to~~ living alone or in Congregate housing arrangements, and to handicapped and developmentally disabled individuals. The system shall be med-alert medical emergency alarm or a system of like design.

* individuals 60 years of age or older who live in their own or rented homes or - - -

M E M O R A N D U M

TO: Billy G. Berrier, Director
Division of Legal Services

FROM: Senator Glenn Hackney, Chairman
Senate HESS Committee

DATE: February 19, 1980

SUBJECT: SB 380

Please give us some language for the appropriation suggested in SB 380 as follows:

1. $500,000 to be disbursed through the contractor or contractors selected to administer homemaker/ home health aide services to senior citizens who could thereby be enabled to remain in their own homes with greater security and peace of mind.

2. $250,000 to be distributed by the Office on the Aging to recognized senior citizen groups for the purpose stated above, and for public housing where congregate living for seniors is practiced.

3. $250,000 to purchase units for distribution to the handicapped, developmentally disabled, and medically fragile.

Item No. 3 would best be distributed through the Division of Mental Health and Developmental Disabilities, I believe.

INTRODUCTION OF BILLS (Senate)(cont'd)

Appropriation (special) (medical emergency alarm systems)

SENATE BILL NO. 380, by Senators Colletta and Hackney. Appropriates $1,000,000 to the Department of Health and Social Services, Office of Aging, to purchase MED-ALERT medical emergency alarm systems for distribution to elderly Alaskans. Unexpended and unobligated portion of appropriation lapses June 30, 1981. Provides Act effective immediately.

Introduced February 1 and referred to Health, Education & Social Services, then to Finance.

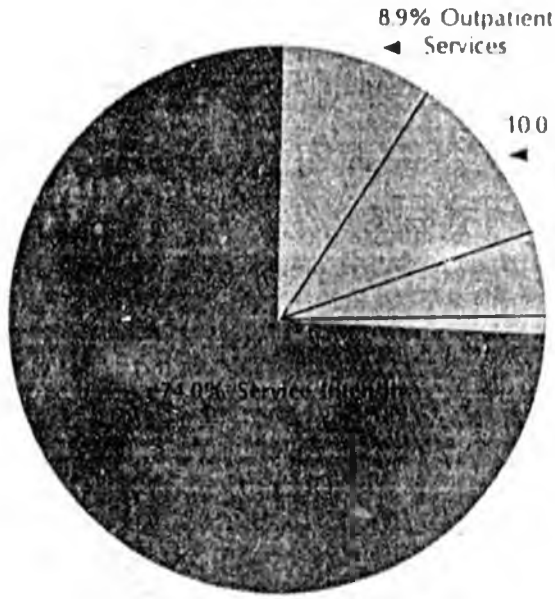
1979 HOSP. COST CONTAINMENT REPORT

ALASKA STATE HOSP. ASSN.

Growth in Hospital Service Volume

Nationally since 1973, the total volume of hospital services has increased at an average annual rate of 6.8 percent. Between 1977 and 1978, the total volume of services increased 5.5 percent.

Increasing service intensity accounted for 74 percent of the increase in the total volume of services provided by hospitals during the 1973 to 1978 period. Increasing service intensity reflects:



a. Changes in patient mix, particularly increases in the number of patients over-65 years of age.

b. The development of new services.

c. Shorter average length of stay which requires more services to be provided on each day.

d. Regulations requiring hospitals to provide more services, particularly in the administrative area.

Available information indicates that trends in Alaska correspond to the national pattern.

Factors Contributing to Growth of Hospital Service Volume, 1973-1978

Source: American Hospital Association Office of Research Affairs

Note:
The 0.9 percent net increase in under 65 utilization represents the combined effect of a 3.02 percent growth of population offset by a 2.12 percent decline in the patient day use rate. As population growth outpaced the reduction in the use rate, the volume of services to the under-65 population increased

Sr. Citizens (state assistance, purchase of drugs)

SENATE BILL NO. 393, by Senator Ferguson. Adds new chapter to Title 47 (Welfare, Social Services and Institutions) which establishes within the Department of Health and Social Services the pharmaceutical assistance program. Provides for payment by department to pharmacies and pharmacists the cost of prescription drugs purchased by a state resident 65 years or over. States that department may not pay for drugs paid by another plan of medical assistance or insurance or if purchaser refuses to accept substitute drug product with the same generic name, and states that if product exceeds maximum allowable cost purchaser must pay the difference. Provides for establishment by commissioner of system of payments and reimbursements, preparation of list of maximum allowable costs, and issuance of identification cards. Provides Act takes effect October 1, 1980.

Introduced February 6 and referred to HESS, then to Finance.

SB 393 ~~S H~~ ~~S~~ ~~S~~ ~~B~~ a state program to assist persons who are 65 years of age or over to purchase prescription drugs.

3-12-80

State Senator Frank H. Ferguson
Pouch U
Juneau, Alaska 99811

Dear Senator Ferguson:

The Alaska Pharmaceutical Association passed the following resolution regarding SB 393, at our recently-completed convention:

RESOLUTION #8

Whereas SB 393 has been introduced, establishing a State program to assist residents who are 65 years of age or over to purchase prescription drugs, therefore be it resolved that the association will support SB 393 if the following recommendations are observed:

(1) Establish an actual need for this program.
(2) Place this program into the current Medicaid Program with pharmacy reimbursement at usual & customary fee.
(3) Do not ask pharmacies to re-bill another third-party program for reimbursement.
(4) Delete that portion of the bill dealing with substitution as it may conflict with our current law.
(5) Establish eligibility of Alaska natives over 65 years of age for program.
(6) Delete Section II of the bill (Report to Legislature) because a study has already been done by Touche Ross on the original Medicaid legislation.

Our main feeling was that most Alaska residents over 65 are already covered by another program, (such as Medicaid), or eligible to receive drugs & other medications from USPHS facilities or contracts (Alaska Natives), covered by insurance or can well afford to pay for prescriptions. Granted, there will be a few exceptions.

Our current medicaid program is satisfactory to the majority of pharmacies in the state, except for the current payment problem, which we hope will be corrected soon. The pharmacies feel that our Medicaid program is far superior to those of our sister states, who are tied up with the bureaucracy of unwieldy federal programs, and we appreciate this.

We are willing to meet with anyone with questions regarding our position on this bill. Please contact our secretary, Chuck Decker, Box 1185, Anchorage 99510 phone (work--276-3921 or home--243-5976), so that he may arrange a meeting with a small representative group.

Very truly yours,

Dave Heinke, Pres.

Sec. 14.07.010. Department of Education. The Department of Education includes the commissioner of education, the state Board of Education, and the staff necessary to carry out the functions of the department. (§ 1 ch 98 SLA 1966)

Quoted in Begich v. Jefferson, Sup. Ct. Op. No. 481 (File No. 894), 441 P.2d 27 (1968).

Sec. 14.07.020. Duties of the department. The department shall

(1) exercise general supervision over the public schools of the state except the University of Alaska;

(2) study the conditions and needs of the public schools of the state and adopt or recommend plans for the improvement of the public schools;

(3) provide advisory and consultative services to all public school governing bodies and personnel;

(4) prescribe by regulation a minimum course of study for the public schools;

(5) establish, in coordination with the Department of Health and Social Services, a program for the continuing education of children who are held in detention facilities in the state during the period of detention;

(6) accredit those public, private, and denominational schools which meet accreditation standards prescribed by regulation by the department; See additional to #6 in Supplement

(7) prescribe by regulation, after consultation with the Department of Health and Social Services, standards that will assure healthful and safe conditions in the public schools of the state;

(8) in cooperation with the Department of Health and Social Services, exercise general supervision over public and private pre-elementary schools and over the educational component of nurseries as defined in AS 47.35.080(4); pre-elementary schools in this paragraph means schools for children ages three through five years when the schools' primary function is educational;

(9) provide accredited elementary and secondary correspondence study programs available to any Alaskan through a centralized office of correspondence study. (§ 1 ch 98 SLA 1966; am § 2 ch 69 SLA 1971; am § 6 ch 104 SLA 1971; am § 1 ch 190 SLA 1975)

Effect of amendments. — The first 1971 amendment added paragraph (8).

The second 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" in paragraphs (5) and (7).

The 1975 amendment, effective July 1, 1975, added paragraph (9).

Legislative committee report. — For report on ch. 190, SLA 1975 (HCS CSSB 367), see 1975 House Journal, p. 1277.

(3) Repealed by § 34 ch 46 SLA 1970.

(4) Repealed by § 34 ch 46 SLA 1970.

(5) enter into contractual agreements with the Bureau of Indian Affairs or with a school district to share boarding costs of secondary school students;

(6) provide for citizenship night schools when and where expedient;

(7) provide for the sale or other disposition of abandoned or obsolete buildings and other state-owned school property;

(8) prescribe a classification for items of expense of school districts;

(9) acquire and transfer personal property, acquire real property, and transfer real property to federal agencies, state agencies, or to political subdivisions;

(10) enter into contractual agreements with school districts to provide more efficient or economical education services;

(11) provide for the issuance of elementary and secondary diplomas to persons not in school who have completed the equivalent of an eighth or twelfth grade education, respectively, in accordance with standards established by the department;

(12) exercise disapproval power under AS 14.08.100. (§ 1 ch 98 SLA

Effect of amendment. — The 1976 amendment added the present second sentence.

Sec. 14.03.110. Questionnaires and surveys administered in public schools. A school district, principal or other person in charge of a public school, or teacher in a public school may not administer or permit to be administered in a school any questionnaire or survey, whether anonymous or not, which inquires into private family affairs of the student not a matter of public record or subject to public observation unless written permission is obtained from the student's parent or guardian. (§ 1 ch 23 SLA 1979)

Effective date. — Section 2, ch. 23, SLA 1979, makes this section effective April 25, 1979, in accordance with AS 01.10.070(c).

54. Alaska school activities fund

Sec. 14.07.020. Duties of the department. The department shall

(6) accredit those public schools which meet accreditation standards prescribed by regulation by the department; these regulations shall be adopted by the department and presented to the legislature during the first 10 days of any regular session, and become effective 45 days after presentation or at the end of the session, whichever is earlier, unless disapproved by a resolution concurred in by a majority of the members of each house;

(7) prescribe by regulation, after consultation with the Department of Health and Social Services, standards that will assure healthful and safe conditions in the public and private schools of the state; the standards for private schools may not be more stringent than those for public schools;

(10) accredit private elementary and secondary schools which request accreditation and which meet accreditation standards prescribed by regulation by the department;

(11) review plans for construction and new public elementary and secondary schools and for additions to and major rehabilitation of existing public elementary and secondary schools and, in accordance with regulations adopted by the department, determine the extent of eligibility for state aid of a school construction project begun after July 1, 1978; for purposes of this paragraph, a "plan" includes educational specifications, schematic designs, and final contract documents;

Supplement

(12) provide educational opportunities in the areas of vocational education and training, basic education, and fire service training to individuals over 16 years of age who are no longer attending school. (am § 6 ch 50 SLA 1977; am §§ 1—3 ch 126 SLA 1978; am § 10 ch 147 SLA 1978; am § 1 ch 86 SLA 1979)

adding paragraph #13

Effect of amendments.

The 1977 amendment added the language beginning "these regulations shall be adopted" to the end of paragraph (6).

The first 1978 amendment deleted "private, and denominational" preceding "schools" near the beginning of paragraph (6), inserted "and private" preceding "schools" in paragraph (7), added the language beginning "the standards for private schools" to the end of paragraph (7), and added paragraph (11).

The second 1978 amendment, effective July 1, 1978, added paragraph (11).

The 1979 amendment added paragraph (12).

As the rest of the section was not affected by the amendments, it is not set out.

Sec. 14.07.053. Alaska School Activities Association. (a) There is created within the Department of Education the Alaska School Activities Association.

(b) The purposes of the association are to provide for the efficient governing of interscholastic activities through the promotion of those activities and other interschool contests or programs sanctioned by the association and to assist in the promotion of those other activities and interests as it may from time to time elect.

(c) A public or private school or school district in the state may become a member of the association if it applies for membership. The Department of Education shall make applications available to all public or private schools or school districts in the state.

(d) The governing body of the association shall be the board of control with at least one member from each judicial district on the board of control. A member of the board shall be elected from each regional activities association by the members of that region. The term of office for each member is two years, except that one-half of the members elected to the first elected board shall be elected for one-year terms under regulations prescribed by the commissioner of education.

(e) The board in consultation with the Department of Education shall appoint an executive secretary, prescribe his duties and fix his compensation. He shall serve at the pleasure of the board.

(f) The board of control of the existing Alaska High School Activities Association in office on July 1, 1976 shall serve as the initial board of control for no longer than six months.

(g) The Department of Education shall approve the association's constitution and bylaws to ensure that all regions of the state are treated on an equitable basis and in the best interests of the state. (§ 1 ch 128 SLA 1976)

(7) prescribe by regulation, after consultation with the Department of Health and Social Services, standards that will assure healthful and safe conditions in the public schools of the state;

(8) in cooperation with the Department of Health and Social Services, exercise general supervision over public and private pre-elementary schools and over the educational component of nurseries as defined in AS 47.35.080(4); pre-elementary schools in this paragraph means schools for children ages three through five years when the schools' primary function is educational;

(9) provide accredited elementary and secondary correspondence study programs available to any Alaskan through a centralized office of correspondence study. (§ 1 ch 98 SLA 1966; am § 2 ch 69 SLA 1971; am § 6 ch 104 SLA 1971; am § 1 ch 190 SLA 1975)

Effect of amendments. — The first 1971 amendment added paragraph (8).

The second 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" in paragraphs (5) and (7).

The 1975 amendment, effective July 1, 1975, added paragraph (9).

Legislative committee report. — For report on ch. 190, SLA 1975 (HCS CSSB 367), see 1975 House Journal, p. 1277.

Stated in Hootch v. Alaska State-Operated School Sys., Sup. Ct. Op. No. 1154 (File No. 2157), 536 P.2d 793 (1975).

Cited in Alaska State-Operated School Sys. v. Mueller, Sup. Ct. Op. No. 1157 (File No. 2138), 536 P.2d 99 (1975).

Sec. 14.07.030. Powers of the department. The department may

(1) establish, maintain, govern, operate, discontinue, and combine area, regional, and special schools;

(2) Repealed by § 34 ch 46 SLA 1970.

(3) Repealed by § 34 ch 46 SLA 1970.

(4) Repealed by § 34 ch 46 SLA 1970.

(5) enter into contractual agreements with the Bureau of Indian Affairs or with a school district to share boarding costs of secondary school students;

(6) provide for citizenship night schools when and where expedient;

(7) provide for the sale or other disposition of abandoned or obsolete buildings and other state-owned school property;

(8) prescribe a classification for items of expense of school districts;

(9) acquire and transfer personal property, acquire real property, and transfer real property to federal agencies, state agencies, or to political subdivisions;

(10) enter into contractual agreements with school districts to provide more efficient or economical education services;

(11) provide for the issuance of elementary and secondary diplomas to persons not in school who have completed the equivalent of an eighth or twelfth grade education, respectively, in accordance with standards established by the department;

(12) exercise disapproval power under AS 14.08.100. (§ 1 ch 98 SLA

ALASKA DEPARTMENT OF EDUCATION
POSITION STATEMENT

SB-413

The State Board of Education is in support of SB-413 with two recommendations:

1. The exchange program should extend to urban students as well as rural students; and,

2. The department be given one fiscal year to plan and develop in cooperation with school districts the activities and resource demands of the program.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This analysis includes only sufficient funds to plan and prepare for implementation of the program. FY-82 impact would include, additionally, substantial travel and probably boarding home costs. The planning and student identification will be done in conjunction with the RSVP program. Contractual costs include personal services and travel for one professional level person.

Dear Senator Hohman:

This letter is in opposition to SB-414 titled, "AFT to participate in TRS."

You may already know that there continues to be a large rift between those two mentioned groups, namely American Federation of Teachers and National Education Association. I am opposed to the inclusion of those individuals in the Alaska TRS because the line of argumentation purported by AFT has always encompassed only their points of view and never those of NEA. This has applied on every element of the relationship and never do the two meet. In light of that continuing rift, why consider including AFT on a system which exists and was lobbied for for years by NEA and its representatives. I am greatly disturbed at a union's advance so boldly as this.

Consequently, I strongly oppose this bills passage.

Sincerely,

Sasha I. Soboleff

Dear Senator Stimson:

This letter pertains to the SB-409 titled,".....minimum qualification for Chief School Administrators."

While the belief to improve the quality of training for administrators exists and is avidly sought by those administrators, this effort is not emcompassed by the Dept. of Education. To my knowledge, only a select gourp of administrators opted on their own to attend an Alaska Native Foundation workshop in Anchorage on 3/24 to 3/27, 1980 to improve their academic skills. I further feel that many current administrators would not be in compliance, and would find it very difficult to meet this proposed requirement.

I consequently am opposed to passage of this bill.

Sincerely,

Sasha I. Soboleff

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

(g) Bilingual education schedule:

Weighted ADM	No. Instructional Units
1—12	1
13—18	2
19—42	3
43 and over	3 plus 1 for each 24 weighted ADM or fraction of 24 weighted ADM

(§ 4 ch 238 SLA 1970; am § 1 ch 137 SLA 1972; am § 4 ch 81 SLA 1976; am § 7 ch 90 SLA 1977; am § 2 ch 115 SLA 1978)

Effect of amendments. The 1977 amendment, effective July 1, 1978, rewrote this section. The 1978 amendment, effective July 1, 1978, added subsection (g).

Sec. 14.17.051. Instructional unit allotment. The instructional unit allotment for each school district or regional educational attendance area is as follows:

(1) for Gateway Borough School District, City and Borough of Juneau School District, and Anchorage School District, the district is entitled to receive the base instructional unit allotment;

(2) for Annette Island School District, Petersburg City School District, Wrangell City School District, Sitka Borough School District and Matanuska-Susitna Borough School District, the district or area is entitled to receive 104 per cent of the base instructional unit allotment;

(3) for Craig City School District, Hydaburg City School District, Klawock City School District, Kake City School District, Chatham School District, Skagway City School District, Southeast Island School District and Kenai Peninsula Borough School District, the district or area is entitled to receive 108 per cent of the base instructional unit allotment;

(4) for Pelican City School District, Hoonah City School District, and North Star Borough School District, the district or area is entitled to receive 112 per cent of the base instructional unit allotment;

(5) for Copper River School District, Cordova City School District, Valdez City School District, and Haines Borough School District, the district or area is entitled to receive 115 per cent of the base instructional unit allotment;

(6) for Nenana City School District, Delta School District, Alaska Gateway School District, Upper Railbelt Regional School District, Yakutat City School District, and Chugach School District, the district or area is entitled to receive 120 per cent of the base instructional unit allotment;

(7) for Adak Regional School District the area is entitled to receive [illegible] per cent of the base instructional unit allotment;

(8) for Pribilof Islands School District, Aleutian Chain School District, King Cove City School District, and Unalaska City School District, the district or area is entitled to receive 150 per cent of the base instructional unit allotment;

(9) for Yukon Flats School District, Dillingham City School District, Bristol Bay Borough School District, Southwest Regional School District, Lake Peninsula School District, Lower Kuskokwim School District, Galena City School District, Kuspuk School District, Yukon-Koyukuk School District, Northwest Arctic School District, Selawik City School District, Nome City School District, Bering Straits School District, Iditarod Area School District, North Slope Borough School District, Lower Yukon School District, and St. Mary's City School District, the district or area is entitled to receive 155 per cent of the base instructional unit allotment.

(10) for Kodiak Island School District, the district is entitled to receive 1[illegible] per cent of the base instructional unit allotment. (§ 4 ch 238 SLA 1970; am § 1 ch 40 SLA 1971; am § 5 ch 81 SLA 1975; am § 12 ch 124 SLA 1975; am § 8 ch 90 SLA 1977; am §§ 3 — 6 ch 115 SLA 1978)

Effect of amendments.

The 1977 amendment, effective July 1, [illegible] rewrote the section.

The 1978 amendment, effective July 1, [illegible] inserted "Southeast School District" following "Annette Island School District" in paragraph (2), inserted "Southeast [illegible] School District" in paragraph (3), inserted "Kodiak Island Borough School [illegible] following "Pelican City School [illegible]" in paragraph (4), and added paragraph (10).

Editor's notes.

Section 9, ch. 90, SLA 1977, effective July 1, 1977, provides: "Notwithstanding the provisions of AS 14.17.051, as re-enacted by § 8 of this Act, the value of the instructional unit allotment for any school district or regional educational attendance area is not less than it would have been for the fiscal year beginning July 1, 1977 if sec. 8 of this Act had not been enacted."

Sec. 14.17.056. Base instructional unit. (a) The base instructional unit for the fiscal year beginning July 1, 1978 and ending June 30, 1979 is $29,000.

(b) The base instructional unit for fiscal years beginning on or after July 1, 1979 is $31,900. (§ 4 ch 238 SLA 1970; am § 1 ch 88 SLA 1973; am § 1 ch 140 SLA 1974; am § 6 ch 81 SLA 1975; am § 3 ch 173 SLA 1976; am § 10 ch 90 SLA 1977; am § 7 ch 115 SLA 1978)

Effect of amendments.

The 1976 amendment, effective July 1, [illegible] substituted "July 1, 1976 and ending June 30, 1977 is $25,000" for "July 1, 1975 and ending June 30, 1976 is $23,500" in subsection (a) and substituted "July 1, 1977 and ending June 30, 1978 is $27,500" for "July 1, 1976 and ending June 30, 1977 is $25,000" at the end of subsection (a) and "July 1, 1978 is $29,000" for "July 1, 1977 is $27,500" at the end of subsection (b).

The 1978 amendment, effective July 1, 1978, substituted "July 1, 1978 and ending June 30, 1979 is $29,000" for "July 1, 1977 and ending June 30, 1978 is $27,500" at the end of subsection (a) and "July 1, 1979 is $31,900" for "July 1, 1978 is $29,000" at the end of subsection (b).

Juneau, AK 99811

Dear Senator Hackney:

I spoke with your administrative assistant, Ms. Mary Isaacs, on Thursday morning about SB428. I would like to voice strong support of that portion of the bill which deals with State Foundation Support for preschool (pre elementary) programs.

The St. Mary's School District has operated preschool classes for 3 and 4 year old children for seven years. All 3 and 4 year old children in our community attend preschool. Before learning about SB428 and the possibility of State support of our program, we made plans to expand the amount of time the preschoolers spend with their teacher. We will also offer kindergarten for a full day. The children have made significant progress in our existing program, and we anticipate even greater gains if the children spend more time in the classroom.

The existing educational literature and research support the "extended" day concept for pre elementary children.

Thank you for this opportunity to provide you with information on pre elementary education in St. Mary's. If you have any other questions, please do not hesitate to call me at 438-2311.

Sincerely,

William Mailer

William T. Mailer
Superintendent

S.B 428 - will it be possible to reschedule it - perhaps before end of month? Request of Ron Kirkmeyer. He mentioned taking out post-secondary with CS. Told him I'd ask you.

M.

Hildebrand, Sup. Ct. Op. No. 741 (File No. 1550), 491 P.2d 120 (1971).

The state supplies a minimum of 90% of school operating funds under subsection (c)(5) of this section. Macauley v. Hildebrand, Sup. Ct. Op. No. 741 (File No. 1550), 491 P.2d 120 (1971).

Sec. 14.17.022. Funds for centralized correspondence study. Funds for providing centralized correspondence study programs for students not enrolled in an approved school district correspondence study program shall include an appropriation from the public school foundation account in an amount calculated by multiplying the base instructional unit by the total number of instructional units as determined by applying the number of correspondence students to § 41 (a) of this chapter. (§ 3 ch 190 SLA 1975)

Effective date. — Section 6, ch 190, SLA 1975, provides: "This Act takes effect July 1, 1975."

Legislative committee report. — For report on ch. 190, SLA 1975 (HCS CSSB 367), see 1975 House Journal, p. 1277.

Sec. 14.17.030. Required local effort.

Repealed by § 11 ch 95 SLA 1969.

Editor's note. — The repealed section derived from § 1.07, ch. 164, SLA 1962, as amended by § 1, ch. 70, SLA 1963.

Sec. 14.17.031. Instructional units. (a) The total number of instructional units within each school district is the sum of

(1) the number of units for elementary schools and the number of units for secondary schools as determined from § 41 (a) or § 41 (b) of this chapter;

(2) the number of units for vocational education determined from § 41 (c) of this chapter as approved by the department;

(3) the number of units from special education determined from § 41(d) of this chapter as approved by the department; and

(4) if the district has five or more correspondence pupils enrolled in an approved district correspondence study program, the number of units for correspondence pupils determined by applying the number of correspondence pupils to § 41(a) of this chapter.

(b) A school district shall compute separately the number of allowable instructional units for each of its secondary schools.

(c) The commissioner may authorize any school district operating a school in a remote area to calculate the number of units to which that school would be entitled if it were a separate district and to include that number of units in the total number of instructional units within that district. (§ 4 ch 238 SLA 1970; am § 3 ch 81 SLA 1975; am § 4 ch 190 SLA 1975)

Effect of amendments. — The first 1975 amendment, effective July 1, 1975, inserted "as approved by the department" in paragraph (3) of subsection (a).

The second 1975 amendment, effective July 1, 1975, inserted "enrolled in an approved district correspondence study program" in paragraph (4) of subsection (a).

Legislative committee report. — For report on ch. 190, SLA 1975 (HCS CSSB 367), see 1975 House Journal, p. 1277.

Sec. 14.17.040. Basic need.

Repealed by § 1 ch 238 SLA 1970, effective July 1, 1970.

Editor's note. — The repealed section derived from § 1.02, ch. 164, SLA 1962.

Sec. 14.17.041. Table of allowable instructional units.

(a) Elementary and secondary schools in districts with ADM under 1,000:

ADM	No. Instructional Units
under 10	1
10 — 20	2
21 — 32	3
33 — 46	4
47 — 62	5
63 — 80	6
81 — 999	6 plus 1 for each 18 pupils or fraction of 18.

(b) Elementary and secondary schools in districts with ADM of 1,000 or over:

ADM	No. Instructional Units
under 10	1
10 — 20	2
21 — 32	3
33 — 46	4
47 — 62	5
63 — 80	6
81 — 99	7
100 — 3005	7 plus 1 for each 19 pupils or fraction of 19
3006 and over	160 plus 1 for each 23 pupils or fraction of 23.

(c) Vocational education schedule:

ADM Full-Time Equivalent	No. Instructional Units
5 — 10	1
11 — 25	2
26 — 40	3
41 and over	3 plus 1 for each 20 pupils or fraction of 20 pupils in Full-Time Equivalent ADM

(d) Special education schedule:

ADM Full-Time Equivalent	No. Instructional Units
5 -- 8	1
9 — 15	2
16 — 24	3
25 — 35	4
36 and over	4 plus 1 for each 11 pupils or fraction of 11 pupils in Full-Time Equivalent ADM

See Supplement

(§ 4 ch 238 SLA 1970; am § 1 ch 137 SLA 1972; am § 4 ch 81 SLA 1975)

Effect of amendments. — The 1972 amendment rewrote subsection (c). The 1975 amendment, effective July 1, 1975, rewrote subsection (d).

Sec. 14.17.050. Teachers' salary ... ent.

Repealed by § 1 ch 238 SLA 1970 ... ctive July 1, 1970.

Editor's note. — The repealed section derived from § 1.04, ch. 164, SLA 1962; §§ 2, 3, ch. 70, SLA 1963; § 1, ch. 78, SLA 1964; §§ 2, 3, ch. 98, SLA 1966; and § 1, ch. 153, SLA 1966.

Sec. 14.17.051. Instructional unit allotment. (a) The instructional unit allotment for each school district or regional educational attendance area is as follows:

(1) if the district or area is in that part of the state lying within the boundaries of election district 1, 4 or 8, the district or area shall receive the base instructional allotment;

(2) if the district or area is in that part of the state lying within the boundaries of election district 2, 3 or 7, the district or area shall receive 103.75 per cent of the base instructional unit allotment;

(3) if the district or area is in that part of the state lying within the boundaries of election district 5, 9, 10 or 11, the district or area shall receive 107.50 per cent of the base instructional unit allotment;

(4) if the district or area is in that part of the state lying within the boundaries of election district 16, south of the Arctic Circle, the district or area shall receive 111.25 per cent of the base instructional unit allotment;

(5) if the district or area is in that part of the state lying within the boundaries of election district 6, the district or area shall receive 115 per cent of the base instructional unit allotment;

Effect of amendments. — The 1973 amendment inserted "or State-Operated School System" in paragraph (1) of former subsection (c).

The 1975 amendment, effective July 1, 1975, in subsection (a), substituted "regional educational attendance area" for "state" twice in the first sentence and once in the second sentence, and inserted "city or borough" twice in the first sentence and once in the second sentence. The amendment also inserted "city or borough school" in subsection (b), and deleted subsection (c).

Legislative committee report. — For report on ch. 53, SLA 1973 (CSHB 382), see 1973 House Journal, pp. 793, 885.

Section spells out duties of department of education. — The duties of the department of education, in regard to a state-operated school located in a newly incorporated city, are spelled out by this section. 1963 Op. Att'y Gen., No. 24, issued prior to 1975 amendment.

Responsibility of department to previously state-operated school. — After the formation of an organized borough or a city, the only special responsibility of the department of education toward a previously state-operated school within the boundaries of the city or borough, is to provide financial support as provided by statute. The department of education must transfer the school to the local political subdivision so that such political subdivision may carry out its function of providing, operating, and maintaining schools. The department has no authority to continue maintaining and insuring such school buildings after the formation of a newly organized borough or city. If a brief period is necessary for the details of the transfer to be arranged, a use agreement must be executed, whereby the political subdivision assumes the major responsibilities of ownership, including costs of maintenance and insurance. 1963 Op. Att'y Gen., No. 24, issued prior to 1975 amendment.

Sec. 14.17.215. State aid to districts affected by state activities. (a) A school district which provides free public education to a student whose parent or guardian works on or lives on state property shall receive an additional yearly allotment under this chapter equal to the percentage of the state average cost of education, as reflected in the audit report of district schools for the prior fiscal year, per student times the number of qualifying students in average daily membership, as follows:

(1) 50 per cent for a student whose parent or guardian lives on and works on state property;

(2) 25 per cent for a student whose parent or guardian works on state property;

(3) 25 per cent for a student whose parent or guardian lives on state property.

(b) In this section "state property" means real property which is owned by the state or is leased by the state and which is not subject to taxation or payments in lieu of taxes by the state or a political subdivision of the state; the term includes real property owned by the state and leased from it, as well as improvements leased from it, even though the lessee's interest, or an improvement on the property, is subject to taxation by a state or a political subdivision of the state. (§ 7 ch 95 SLA 1969)

Sec. 14.17.220. Purpose. It is the intention of the legislature, in enacting this public school foundation program, to assure an adequate level of educational opportunities for those in attendance in the public schools of the state. This chapter shall not be interpreted as preventing a public school district from providing educational services and facilities

(4) "elementary school" means a school consisting of grades one through eight, kindergarten through eight, or an appropriate combination of grades within this range;

(5) "fiscal year" means the year beginning July 1 and ending June 30 for which allotments and entitlements are computed or distributed;

(6) "pre-fiscal year" means the year immediately before the fiscal year;

(7) Repealed by § 3 ch 238 SLA 1970.

(8) "public school foundation account" means the account created by § 10 of this chapter for use in financing education in public elementary and secondary schools;

(9) "secondary school" means a school of grades seven through twelve, or an appropriate combination of grades within this range. When grades seven through eight, nine, or ten are organized separately as a junior high school, or grades ten through twelve are organized separately as a senior high school and are conducted in separate school plant facilities, each is considered a separate secondary school for the purposes of this chapter;

(10) Repealed by § 3 ch 238 SLA 1970.

(11) "taxable real and personal property" means all real and personal property taxable under the laws of the state, but does not include household goods and personal effects;

(12) Repealed by § 3 ch 238 SLA 1970.

(13) Repealed by § 2 ch 40 SLA 1971.

(14) Repealed by § 2 ch 40 SLA 1971.

(15) Repealed by § 2 ch 40 SLA 1971.

(16) Repealed by § 2 ch 40 SLA 1971.

(17) "ADM full-time equivalent" means the quotient of the aggregate periods of pupil membership per day in specified classes, divided by the number of class periods in the school day;

(18) "instructional unit" means the aggregate of all direct and indirect services necessary to provide a standard level of instruction for a group of pupils;

(A) "direct services" include, but are not limited to supplying teacher services, textbooks, reference materials, pupil and teacher supplies, as well as utilities and custodial services;

(B) "indirect services" are those auxiliary or supporting functions that complement direct services and include, but are not limited to administration, transportation, food, attendance and activities;

(C) "instructional unit" does not include items of community service, capital outlay or debt service. (§ 4.02 ch 164 SLA 1962; am §§ 7, 8 ch 98 SLA 1966; am § 3 ch 153 SLA 1966; am § 18 ch 69 SLA 1970; am §§ 3, 11 ch 238 SLA 1970; am § 2 ch 40 SLA 1971; am § 14 ch 124 SLA 1975)

Sec. 14.17.250. Definitions. In this chapter, unless the context otherwise requires

(19) "weighted ADM" means the number of students in average daily membership in an educational program, adjusted to reflect the level of service required by them in that program as determined by the department.

(am § 8 ch 115 SLA 1978)

Supplement added #19

Effect of amendments.

The 1976 amendment, effective July 1, 1977, in subsection (c), substituted "95 per cent" for "93 per cent" in paragraphs (2) and (5).

Section 2, ch. 90, SLA 1977, effective July 1, 1977, added the second sentence of subsection (a). Section 3 of ch. 90, effective July 1, 1978, substituted "97 per cent" for "95 per cent" in paragraphs (2) and (5) of subsection (c).

As the rest of the section was not affected by the amendments, it is not set out.

Sec. 14.17.031. Instructional units. (a) The total number of instructional units within each school district is the sum of

(1) the number of units for elementary schools and the number of units for secondary schools as determined from § 41(a), (b), (c), or (d) of this chapter;

(2) the number of units for vocational education determined from § 41(e) of this chapter as approved by the department;

(3) the number of units from special education determined from § 41(f) of this chapter as approved by the department;

(4) if the district has five or more correspondence pupils enrolled in an approved district correspondence study program, the number of units for correspondence pupils determined by applying the number of correspondence pupils to § 41(a) of this chapter; and

(5) the number of units for bilingual education determined from § 41(g) of this chapter as approved by the department.

(b) A school district shall compute separately the number of allowable instructional units for each of its secondary schools except as provided in (c) of this section.

(c) The commissioner shall authorize any school in a remote location to establish an associated secondary school when the sum of the average daily membership in grades five through eight is greater than 20. Notwithstanding § 41 of this chapter, any school or school district operating a remote elementary school with 20 or fewer total average daily membership in grades five through eight may conduct a secondary program subject to approval of the commissioner and use the following table to calculate the number of allowable instructional units for the combined elementary and secondary program of the remote school:

ADM	No. Instructional Units
under 12	3
12—20	4
21—32	5

(d) If the instructional units which a school district is entitled to under (a) of this section decrease by 10 per cent or more from one year to the next, the school district may use the last year before the reduction as a base year and offset its reduction according to the following schedule: (1) for the first year after the base year, the school district is entitled to the instructional units determined under (a) of this section plus 75 per

Supplemental

cent of the difference in instructional units between the base year and the first year; (2) for the second year after the base year, the school district is entitled to the instructional units determined under (a) of this section plus 50 per cent of the difference in instructional units between the base year and the second year; (3) for the third year after the base year, the school district is entitled to the instructional units determined under (a) of this section plus 25 per cent of the difference in instructional units between the base year and the third year. The schedule established in this subsection is available to a school district for the three years following the base year only so long as the entitlement in instructional units under (a) of this section for each year is less than the entitlement in the base year. (§ 4 ch 238 SLA 1970; am § 3 ch 81 SLA 1975; am § 4 ch 190 SLA 1975; am §§ 4-6 ch 90 SLA 1977; am § 1 ch 171 SLA 1978)

Effect of amendments.

Sections 4 and 5, ch. 90, SLA 1977, effective July 1, 1978, substituted "§ 41 (a), (b), (c), or (d)" for "§ 41 (a) or § 41 (b)" in paragraph (1), "§ 41 (e)" for "41 (c)" in paragraph (2), and "§ 41 (f)" for "41 (d)" in paragraph (3), all in subsection (a), added "except as provided in (c) of this section" at the end of subsection (b), and enacted subsection (c). Section 6 of ch. 90, effective July 1, 1977, added subsection (d).

The 1978 amendment, effective July 1, 1978, added paragraph (5) of subsection (a).

Sec. 14.17.041. Table of allowable instructional units. (a) Elementary schools in districts with ADM under 1,000:

ADM	No. Instructional Units
under 20	2
20—32	3
33—46	4
47—62	5
63—80	6
81—999	6 plus 1 for each 18 pupils or fraction of 18

(b) Elementary schools in districts with ADM of 1,000 or over:

ADM	No. Instructional Units
under 20	2
20—32	3
33—46	4
47—62	5
63—80	6
81—99	7
100—3005	7 plus 1 for each 19 pupils or fraction of 19
3006 and over	160 plus 1 for each 21 pupils or fraction of 21

Supplement

c. Secondary schools in districts with ADM under 1,000:

ADM	No. Instructional Units
under 33	3
33—46	4
47—62	5
63—80	6
81—999	6 plus 1 for each 18 pupils or fraction of 18

d. Secondary schools in districts with ADM of 1,000 or over:

ADM	No. Instructional Units
under 33	3
33—46	4
47—62	5
63—80	6
81—99	7
100—3005	7 plus 1 for each 19 pupils or fraction of 19
3006 and over	160 plus 1 for each 21 pupils or fraction of 21

e. Vocational education schedule:

ADM Full-Time Equivalent	No. Instructional Units
5—10	1
11—25	2
26—40	3
41 and over	3 plus 1 for each 20 pupils or fraction of 20 pupils in Full-Time Equivalent ADM

f. Special education schedule:

ADM Full-Time Equivalent	No. Instructional Units
5—8	1
9—15	2
16—24	3
25—35	4
36 and over	4 plus 1 for each 11 pupils or fraction of 11 pupils in Full-Time Equivalent ADM

(g) Bilingual education schedule:

Weighted ADM	No. Instructional Units
1—12	1
13—18	2
19—42	3
43 and over	3 plus 1 for each 24 weighted ADM or fraction of 24 weighted ADM

Bill would add paragraphs k & l

(§ 4 ch 238 SLA 1970; am § 1 ch 137 SLA 1972; am § 4 ch 81 SLA 1975; am § 7 ch 90 SLA 1977; am § 2 ch 115 SLA 1978)

Effect of amendments. The 1977 amendment effective July 1, 1978, rewrote this section. The 1978 amendment, effective July 1, 1978, added subsection (g).

Sec. 14.17.051. Instructional unit allotment. The instructional unit allotment for each school district or regional educational attendance area is as follows:

(1) for Gateway Borough School District, City and Borough of Juneau School District, and Anchorage School District, the district is entitled to receive the base instructional unit allotment;

(2) for Annette Island School District, Petersburg City School District, Wrangell City School District, Sitka Borough School District, and Matanuska Susitna Borough School District, the district or area is entitled to receive 104 per cent of the base instructional unit allotment;

(3) for Craig City School District, Hydaburg City School District, Klawock City School District, Kake City School District, Chatham School District, Skagway City School District, Southeast Island School District, and Kenai Peninsula Borough School District, the district or area is entitled to receive 108 per cent of the base instructional unit allotment;

(4) for Pelican City School District, Hoonah City School District, and North Star Borough School District, the district or area is entitled to receive 112 per cent of the base instructional unit allotment;

(5) for Copper River School District, Cordova City School District, Valdez City School District, and Haines Borough School District, the district or area is entitled to receive 115 per cent of the base instructional unit allotment;

(6) for Nenana City School District, Delta School District, Alaska Gateway School District, Upper Railbelt Regional School District, Yakutat City School District, and Chugach School District, the district or area is entitled to receive 120 per cent of the base instructional unit allotment;

(7) for Adak Regional School District the area is entitled to receive 140 per cent of the base instructional unit allotment;

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The above impact is with respect to the early childhood development program only, and is only an estimate based upon information from 23 school districts, extrapolated over all districts, with the assumptions being that 25% of present ADM levels will participate at .5 FTE each. We have no way of calculating the costs of the postsecondary education program. *Cost does not include facilities needs ocassioned by increased ADM.

SENATE BILL 428

Proposed Amendments

1. Limit the scope of 428 to pre-school education only.

2. Amend the following statutes:

   (a) Expand A.S. 14.03.060 to include "early childhood development program" within the definition for elementary schools.

   (b) Add a section to A.S. 14.03.080 to allow children to enter the system at age 2.

   (c) Amend A.S. 14.17.250 (4) to define "early childhood development program" as a program adopted by the local district for education of children aged 2 through 5.

   (d) Add a provision to A.S. 14.03.083 which exempts agencies who contract with districts for the purpose of providing early childhool development programs so long as the contracting agency is in compliance with the requirements imposed by the federal headstart act and regulations promulgated thereunder.

3. Add legislative intent to encourage the local districts to contract with agencies such as head start and others which emphasize parental input in structuring pre-school programs.

4. Add a provision which will exempt the certification requirements of A.S. 14.20 to those agencies which contract with the local district to provide education for children enrolled in an early childhood development program. (Subject to the requirements of 14.03.083.)

Dear Rod:

Receipt of your letter of March 7 is acknowledged, and your comments are noted.

I shall watch SB 428 very carefully.

In the meantime, I have taken the liberty of sending a copy of this letter and a copy of your letter to Senator Hackney, a most knowledgeable senator, who chairs the Senate Health, Education and Social Services Committee.

Regards,

Robert H. Ziegler, Sr.

Pouch V
Juneau, AK 99801

Dear Bob:

Senate Bill 428 entitled "An Act Amending the Public School Foundation Program to Provide State Support for Pre-School and Postsecondary Education Programs and Providing for an Effective Date" was brought to my attention and I would like to respond to it.

In Paragraph 21 a meaning of postsecondary adult education program is given. It states, "a program established by the district or operated for the district by the University of Alaska and approved by the Commissioner with the principal purpose of which is to provide academic and vocational instruction for two academic years after grade twelve."

It would appear that if this passed, we are creating a possibility of a second community college system within the state under the auspices of the local school boards. It also appears that it would be giving the Commissioner of Education the approval process for establishing community colleges throughout the state.

Having served in a community college that was under the K-12 local school district authority, I feel that any move in this direction would be taking the community college movement and its education philosophy back many, many years. In that experience, the money first went to the elementary and secondary schools and then the community college received the remainder. The feeling being that the adults had had their opportunities for education, the board should concentrate the monies on the younger people.

I would hope that this does not pass and that we continue to be postsecondary educational institutions under the leadership of postsecondary educational leaders.

Sincerely,

Rod Enos

RE:sl

Preschool & Postsecondary Programs (state support for)

SENATE BILL NO. 415, by the Rules Committee by request of the Legislative Council by request. Amends "PURPOSE" for Public School Foundation Program (AS 14.17.220) to read: "It is the intention of the legislature, . . . to assure an adequate level of educational opportunities for those in attendance in the public schools of the state, for those enrolled in early childhood development education programs, and for those enrolled in postsecondary education programs. . . ." (Underlined material added.) Defines "early childhood development program" as course or program for children under six who do not attend an elementary school and "postsecondary adult education program" as a program whose principal purpose is to provide academic or vocational instruction for two academic years after grade 12. Adds new subsections to AS 14.17.041 which set out number of instructional units allowed for varying levels of ADM's (Average Daily Memberships) for early childhood dev. programs and for postsecondary adult education programs. Provides Act effective July 1, 1980.

April 21, 1980

Dear Senator Hackney,

I am writing to support the concept of the establishment of a coordinating body for children's services (designated an Office of Child Development in HB 935 and SB 506). The need to orchestrate the many services offered to Alaska children and their families, and the need to properly evaluate the effectiveness of such programs, are salient reasons for such an "Office".

I am not convinced that an Office of Child Development is the proper placement for such functions, although I know that Rural CAP wants such an office and will make a strong case for such in any needs assessment it performs for the Legislature.

I am definitely against the expenditure of $250,000 for a needs assessment. Many agencies of the Alaska State government are currently required by law to produce yearly assessments of the needs of children. Piles of studies already exist on the subject. (I have just finished re-reading an extensive LONG-RANGE, COMPREHENSIVE PLAN FOR EARLY CHILDHOOD EDUCATION IN ALASKA, prepared by the Northwest Regional Educational Laboratory, for the State Department of Education, in June 1972, which never received public discussion.)

State personnel are in place, all over Alaska, to conduct on-site meetings about the needs of children. Agency files are bulging with reports which can be abstracted. The results of the 1980 Census will soon be available through State channels. Early childhood people will gladly participate as part of their professional duties. A special request from the Legislature might even re-activate a study by the League of Women Voters who, in 1970-71, did the best piece of work on children's needs ever completed in Alaska.

The point is that many people are available, without the expenditure of a quarter of a million dollars, to participate in assessing the needs of children in every corner of the State. The placement of a short-term planner in the Governor's Planning Office or the use of an additional person in Charlie Mae Moore's pre-school section, at the State Department of Education, would do the job at much less cost and with much more availability to public and private agency information.

If it is your wish to fund an outside agency to carry out the assembling of material on early childhood needs, please at least amend the bills to use a Request for Proposals approach to contract. The Legislature and the public deserve a rather special study for that amount of money.

I would like to see the State of Alaska contract for a study which will command respect for its thoroughness and objectiveness. I know many planning firms which have experience in this particular subject. Objective studies has never been Rural CAP's forte since their business is advocacy.

If these bills are really a means of enlarging the State subsidy for Rural CAP's Headstart Program, from about $300,000 to $550,000, I apologize for the waste of time in submitting this letter. I know that Rural CAP is experiencing money trouble in funding its state-wide Headstart Program. I believe that the current money crunch will lead Rural CAP to re-evaluate the way it provides Headstart in many Alaska communities. I hope that soon the program controlled by Rural CAP will be distributed to the various school districts as a means of providing seed money for starting up pre-school programs under local parent control. An increase of Rural CAP subsidy will be well-spent if it will help to implement SB 428.

TO RE-CAP: (Not a pun)

1. Please implement a study of the needs of young children and the needs for coordination and evaluation of existing children's programs. (A Request for Proposals method would be more equitable.)

2. Please try to find a less costly way to conduct such a study by using knowledgeable State and private persons ready to assist.

3. Please pass SB 428 which will allow local school districts to start pre-school programs as a local option, using State funds.

4. Please encourage Rural CAP to spin-off its Headstart programs to local communities and contribute funds to the start-up of locally operated preschool classes, articulated to regular school programs.

Thank you for your attention.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SENATE BILL NO. 506

"An Act making a special appropriation to RurAl CAP for a study identifying the needs of preschool age children and for a plan to meet those needs; and providing for an effective date."

Senate Bill No. 506 appropriates the sum of $250,000 for a study identifying the needs of preschool age children in Alaska and a plan for meeting those needs.

The need for a comprehensive plan for services for preschool age children in Alaska is uncontested. It certainly will require some commitment of high caliber staff time, clerical support and travel funds. It might even entail support for a public input forum. The Department of Health and Social Services is neutral on the amount of the appropriation.

RurAl CAP would be a very suitable agency to accomplish this task if it can be made very clear that the plan should address all areas and all economic strata within Alaska.

Notified Dept of Educ. Lowe informed Mary Lou Madden would be here. also requested F/N.

SENATE BILL NO. 522, by the Health, Education and Social Services Committee. Enacts the Compact for Education into law and enters into it on behalf of the State of Alaska with all other states and jurisdictions legally jointing in it. Outlines terms and provisions of the compact.

Basic purpose of compact is to establish and maintain close cooperation on a nationwide basis at the state and local levels among the various leaders in the field of education, provide a forum for public policy alternatives, provide a clearinghouse of information on educational problems and how they are being met in different places in the country, and facilitate the improvement of state and local educational systems.

Establishes the Education Commission of the States consisting of seven members representing each party state. Not more than 10 nonvoting commissioners may be selected by the steering committee for one year terms. They shall represent leading national organizations of professional educators or persons concerned with educational administration. Provides for officers and staff and outlines powers of Commission, cooperation with the federal government, committees of the Commission, financial provisions, entry into and withdrawal from compact by eligible parties, construction and severability of compact, and the members of the Commission (the Governor, the Commissioner of Education, two members from the legislature, the President of the State Board of Education, and two appointed at large by Governor). Provides Act effective immediately.

Introduced March 13 and referred to Health, Education and Social Services and Finance.

There has been in the three year history, there has been 6 recalls.

Sen. Sturgulewski. There will be quite a lot of work done in the interim having to do with elections and certainly in recalls, but this is just a very simply thing. All it does is to move from you (DOE) to Elections.

Sen. Ferguson. The House has introduced HB 245 dealing with elections and I believe that Sen. Kelly with his election reform bill is going to take a look at the whole works in recall and not to necessarily hinder people from having someone recalled, but to stipulate certain items.

Bill Thompson. Section 4 would change who appoints the non-voting member of the military community when the department contracts with the contiguous municipalities for educational services in the on-base schools. That representative would be appointed by the affected school board rather than the State Board of Education.

Section 5, This clarifies restrictions on employment and nepotism and what exactly is the course.

Sen. Hackney. THe repealers are as simply pointed out in Sen. Ferguson's memorandum.

Bill Thompson. Section 6 is repealors dealing with community school committees because it becomes superfluous with the adoption of section 2 of the bill.

Se Section 7 repeals the Alaska participation in the education compact of the states which is the educational commission of the states. Our recommendation for that is that each year the dues are increasing and we can get the same information as far as an informative service from other sources, U. S. Office of Education, Teacher councils, National School Boards Association, and so on. As you know there is a fiscal note attached that becomes effective in 1981. The way the law reads, for Alaska participation, we have to notify them a year ahead that we are no longer going to participate therefore we would have to pay our dues in FY 80. But in FY 81 it would have a negative impact of $18.8 thousand.

Basically the ~~community school advisory committees are~~ more political than professional. Alaska's membership is made up as legislators, the governor's office, state board of education and the commissioner and what they do is an exchange of information between states. That's as far as what they provide in professional assistance to the department on educational finance, teacher certification, whatever.

Sen. Sturgulewski. I move CSHB 211am move from committee with a do pass recommendation.

NO objections so ordered.

HB 211

MARCH 17, 1980

NATIONAL SCENE — NEW - DEPT. of ED

SB 522

Marylu Maddan. The State Board is meeting in town and it just took a position on SB 522 to support reenactment of the Compact and also asking the Department of Education to do an annual evaluation of the benefits to the Department and the educational community from ECS membership.

The Board asked me to relay to the committee that some of our earlier concerns which prompted us last year to ask for the repeal of 14.47.100 has changed significantly. Number 1 being the financial picture of the state. The dues went up tremendously last year, from our point of view, to $18,500. That was the major reason for asking for the repeal. But also, the question was just asked, "but what is the difference between the compact and some of the other education organizations?". In our opinion, that is the heavy involvement of the legislative branch and other areas of the executive branch. We see a renewed interest from those two areas in working with the compact so we are now ready to support it again.

We'd be happy to share the results of our evaluation with you people to put together with your own evaluation the benefits of the compact to the legislature.

One of the greatest strengths of the compact is that it is not just educators talking to the Department of Education or any other federal agency. It's real success depends upon the involvement of the legislatures from the various states and getting that other point of view across to federal officials.

Sen. Colletta. On page 10, line 8, why should one of the designated members be the president of the state board of education?

Marylu Maddan. The language of this particular legislation was taken directly out of the language of the compact. I have no idea why when the compact was originally drawn up that they chose the president of the state board of education to be a mandated member except, I assume, because of the central policymaking role that state boards of education do play in educational policy in the various states.

Sen. Colletta. It's my recollection of what this board did, and if it parallels what its done in the past, it's no different than the national assication that legislators belong to. We do have an exception with ours, they are for two year terms, but here you are appointing an individual who is president of the board and which

is generally is a one year term. So by the time he or her activities could come to pass, they are no longer in that position.

Marylu Maddan. My only response is that this language was drafted by the commission itself and I can only . . . it is uniform across the country. I don't know what kind of flexibility, quite frankly, the legislature does have in changing members of the commission from the different states. We can look into that if you'd like.

Sen. Colletta. It would seem you should because although it is uniform language, nonetheless, it is Alaskan statute.

Marylu Maddan. We'd be happy to inquire into that if you'd like.

Our copy

Introduced: 3/13/80
Referred: Health, Education & Social Services and Finance

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

SENATE BILL NO. 522

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act enacting and entering into the Compact for Education and designating the members of the Education Commission; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40 is amended by adding new sections to read:

ARTICLE 8. COMPACT FOR EDUCATION.

Sec. 14.40.700. Entry into Compact. The Compact for Education is enacted into law and entered into in behalf of the State of Alaska with all other states and jurisdictions legally joining in it in a form substantially as contained in AS 14.40.710.

Sec. 14.40.710. TERMS AND PROVISIONS OF COMPACT. The terms and provisions of the compact referred to in AS 14.40.700 are as follows:

COMPACT FOR EDUCATION.

ARTICLE I. PURPOSE AND POLICY.

Section A. It is the purpose of this compact to:

(1) establish and maintain close cooperation and understanding among executive, legislative, professional educational and lay leadership on a nationwide basis at the state and local levels;

(2) provide a forum for the discussion, development, crystallization and recommendation of public policy alternatives in the field of education;

(3) provide a clearinghouse of information on matters relating to educational problems and how they are being met in different places throughout the nation, so that the executive and legislative

branches of state government and of local communities may have ready access to the experience and record of the entire country, and so that both lay and professional groups in the field of education may have additional avenues for the sharing of experience and the interchange of ideas in the formation of public policy in education;

(4) facilitate the improvement of state and local educational systems so that all of them will be able to meet adequate and desirable goals in a society which requires continuous qualitative and quantitative advance in educational opportunities, methods and facilities.

Section B. It is the policy of this compact to encourage and promote local and state initiative in the development, maintenance, improvement and administration of educational systems and institutions in a manner which will accord with the needs and advantages of diversity among localities and states.

Section C. The party states recognize that each of them has an interest in the quality and quantity of education furnished in each of the other states, as well as in the excellence of its own educational systems and institutions, because of the highly mobile character of individuals within the nation, and because the products and services contributing to the health, welfare and economic advancement of each state are supplied in significant part by persons educated in other states.

ARTICLE II. THE COMMISSION.

Section A. The Education Commission of the States, hereinafter called "the commission," is hereby established. The commission shall consist of seven members representing each party state. In addition to any other principles or requirements which a state may establish for the appointment and service of its members of the commission, the guiding principle for the composition of the membership on the commission from

each party state shall be that the members representing such state shall, by virtue of their training, experience, knowledge or affiliations be in a position collectively to reflect broadly the interests of the state government, higher education, the state education system, local education and lay and professional public and nonpublic educational leadership. In addition to the members of the commission representing the party states, there may be not to exceed 10 nonvoting commissioners selected by the steering committee for terms of one year. Such commissioners shall represent leading national organizations of professional educators or persons concerned with educational administration.

Section B. The members of the commission shall be entitled to one vote each on the commission. No action of the commission shall be binding unless taken at a meeting at which a majority of the total number of votes on the commission are cast in favor thereof. Action of the commission shall be only at a meeting at which a majority of the commissioners are present. The commission shall meet at least once a year. In its bylaws, and subject to such directions and limitations as may be contained therein, the commission may delegate the exercise of any of its powers to the steering committee or the executive director, except for the power to approve budgets or requests for appropriations, the power to make policy recommendations pursuant to Article III and adoption of the annual report pursuant to Article II (j).

Section C. The commission shall have a seal.

Section D. The commission shall elect annually, from among its members, a chairman, who shall be a governor, a vice chairman and a treasurer. The commission shall provide for the appointment of an executive director. Such executive director shall serve at the pleasure of the commission, and together with the treasurer and such other

personnel as the commission may deem appropriate shall be bonded in such amount as the commission shall determine. The executive director shall be secretary.

Section E. Irrespective of the civil service, personnel or other merit system laws of any of the party states, the executive director subject to the approval of the steering committee shall appoint, remove or discharge such personnel as may be necessary for the performance of the functions of the commission, and shall fix the duties and compensation of such personnel. The commission in its bylaws shall provide for the personnel policies and programs of the commission.

Section F. The commission may borrow, accept or contract for the services of personnel from any party jurisdiction, the United States, or any subdivision or agency of the aforementioned governments, or from any agency of two or more of the party jurisdictions or their subdivisions.

Section G. The commission may accept for any of its purposes and functions under this compact any and all donations, and grants of money, equipment, supplies, materials and services, conditional or otherwise, from any state, the United States, or any other governmental agency, or from any person, firm, association, foundation, or corporation, and may receive, utilize and dispose of the same. Any donation or grant accepted by the commission pursuant to this paragraph or services borrowed pursuant to paragraph (f) of this article shall be reported in the annual report of the commission. Such report shall include the nature, amount and conditions, if any, of the donation, grant, or services borrowed, and the identity of the donor or lender.

Section H. The commission may establish and maintain such facilities as may be necessary for the transacting of its business. The commission may acquire, hold, and convey real and personal property and any interest therein.

Section I. The commission shall adopt bylaws for the conduct of its business and shall have the power to amend and rescind these bylaws. The commission shall publish its bylaws in convenient form and shall file a copy thereof and a copy of any amendment thereto, with the appropriate agency or officer in each of the party states.

Section J. The commission annually shall make to the governor and legislature of each party state a report covering the activities of the commission for the preceding year. The commission may make such additional reports as it may deem desirable.

ARTICLE III. POWERS.

In addition to authority conferred on the commission by other provisions of the compact, the commission shall have authority to:

(1) collect, correlate, analyze and interpret information and data concerning educational needs and resources;

(2) encourage and foster research in all aspects of education, but with special reference to the desirable scope of instruction, organization, administration, and instructional methods and standards employed or suitable for employment in public educational systems;

(3) develop methods for adequate financing of education as a whole and at each of its may levels;

(4) conduct or participate in research of the types referred to in this article in any instance where the commission finds that such research is necessary for the advancement of the purposes and policies of this compact, utilizing fully the resources of national associations, regional compact organizations for higher education, and other agencies and institutions, both public and private;

(5) formulate suggested policies and plans for the improvement of public education as a whole, or for any segment thereof, and make recommendations with respect thereto available to the appropriate

governmental units, agencies and public officials;

(6) do such other things as may be necessary or incidental to the administration of any of its authority or functions pursuant to this compact.

ARTICLE IV. COOPERATION WITH FEDERAL GOVERNMENT.

Section A. If the laws of the United States specifically so provide, or if administrative provision is made therefor within the federal government, the United States may be represented on the commission by not to exceed 10 representatives. Any such representative or representatives of the United States shall be appointed and serve in such manner as may be provided by or pursuant to federal law, and may be drawn from any one or more branches of the federal government, but no such representative shall have a vote on the commission.

Section B. The commission may provide information and make recommendations to any executive or legislative agency or officer of the federal government concerning the common educational policies of the states, and may advise with any such agencies or officers concerning any matter of mutual interest.

ARTICLE V. COMMITTEES.

Section A. To assist in the expeditious conduct of its business when the full commission is not meeting, the commission shall have a steering committee of 32 members which, subject to the provisions of this compact and consistent with the policies of the commission, shall be constituted and function as provided in the bylaws of the commission. One-fourth of the membership of the steering committee shall consist of governors, one-fourth shall consist of legislators, and the remainder shall consist of other members of the commission. A federal representative on the commission may serve with the steering committee, but without vote. The voting members of the steering committee shall serve

for terms of two years, except that members elected to the first steering committee of the commission shall be elected as follows: 16 for one year and 16 for two years. The chairman, vice chairman, and treasurer of the commission shall be members of the steering committee and, anything in this paragraph to the contrary notwithstanding, shall serve during their continuance in these offices. Vacancies in the steering committee shall not affect its authority to act, but the commission at its next regularly ensuing meeting following the occurrence of any vacancy shall fill it for the unexpired term. No person shall serve more than two terms as a member of the steering committee; provided that service for a partial term of one year or less shall not be counted toward the two term limitation.

Section B. The commission may establish advisory and technical committees composed of state, local and federal officials, and private persons to advise it with respect to any one or more of its functions. Any advisory or technical committee may, on request of the states concerned, be established to consider any matter of special concern to two or more of the party states.

Section C. The commission may establish such additional committees as its bylaws may provide.

ARTICLE VI. FINANCE.

Section A. The commission shall advise the governor or designated officer or officers of each party state of its budget and estimated expenditures for such period as may be required by the laws of that party state. Each of the commission's budgets of estimated expenditures shall contain specific recommendations of the amount or amounts to be appropriated by each of the party states.

Section B. The total amount of appropriation requests under any budget shall be apportioned among the party states as follows: one-third

in equal shares; and the remainder in proportion to the population of each party state as shown in the most recent decennial census of population taken by the United States Bureau of the Census, or any agency successor thereto.

Section C. The commission shall not pledge the credit of any party state. The commission may meet any of its obligations in whole or in part with funds available to it pursuant to article II(g) of this compact, provided that the commission takes specific action setting aside such funds prior to incurring an obligation to be met in whole or in part in such manner. Except where the commission makes use of funds available to it pursuant to article II(g) thereof, the commission shall not incur any obligation prior to the allotment of funds by the party states adequate to meet the same.

Section D. The commission shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the commission shall be subject to the audit and accounting procedures established by its bylaws. However, all receipts and disbursement of funds handled by the commission shall be audited yearly by a qualified public accountant, and the report of the audit shall be included in and become part of the annual reports of the commission.

Section E. The accounts of the commission shall be open at any reasonable time for inspection by duly constituted officers of the party states and by any persons authorized by the commission.

Section F. Nothing contained herein shall be construed to prevent commission compliance with laws relating to audit or inspection of accounts by or on behalf of any government contributing to the support of the commission.

ARTICLE VII. ELIGIBLE PARTIES: ENTRY INTO AND WITHDRAWAL.

Section A. This compact shall have as eligible parties all states,

territories, and possessions of the United States, the District of Columbia, and the Commonwealth of Puerto Rico. In respect of any such jurisdiction not having a governor, the term "governor," as used in this compact, shall mean the closest equivalent official of such jurisdiction.

Section B. Any state or other eligible jurisdiction may enter into this compact and it shall become binding thereon when it has adopted the same; provided that in order to enter into initial effect, adoption by at least 10 eligible party jurisdictions shall be required.

Section C. Any party state or jurisdiction may withdraw from this compact by enacting a statute repealing the same, but no such withdrawal shall take effect until one year after the governor of the withdrawing state or other jurisdiction has given notice in writing of the withdrawal to the governors of all other party states and jurisdictions. No withdrawal shall affect any liability already incurred by or chargeable to a party state or jurisdiction ~~prior to the time of~~ such withdrawal.

ARTICLE VIII. CONSTRUCTION AND SEVERABILITY.

This compact shall be liberally construed so as to effectuate the purposes thereof. The provisions of this compact shall ' severable and if any phrase, clause, sentence or provision of this compact is declared to be contrary to the constitution of any state or of the United States, or the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person, or circumstance shall not be affected thereby. If this compact shall be held contrary to the constitution of any state participating therein, the compact shall remain in full force and effect as to the state affected as to all severable matters.

ARTICLE IX. STATE DEFINED.

As used in this compact, "state," means a state, territory, or possession of the United States, the District of Columbia or the Commonwealth of Puerto Rico.

Sec. 14.40.720. MEMBERS OF THE COMMISSION. (a) One of the commission members shall be the governor; one shall be the state commissioner of education; two shall be members of the state legislature selected by its respective houses and serving in the manner the legislature may determine; one shall be the president of the state Board of Education; and two shall be appointed at large by and serve at the pleasure of the governor.

(b) The terms of office of the at-large members shall be four years; however, the first members shall be appointed as follows: one for two years, and one for four years. Each member shall hold office until his successor is appointed and qualified.

(c) The legislative and at-large members of the commission serve without compensation but are entitled to per diem and travel expenses provided by law for other state boards and commissions.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

SENATE BILL NO. 522

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act enacting and entering into the Compact for Education and designating the members of the Education Commission; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.40 is amended by adding new sections to read:

ARTICLE 8. COMPACT FOR EDUCATION.

Sec. 14.40.700. Entry into Compact. The Compact for Education is enacted into law and entered into in behalf of the State of Alaska with all other states and jurisdictions legally joining in it in a form substantially as contained in AS 14.40.710.

Sec. 14.40.710. TERMS AND PROVISIONS OF COMPACT. The terms and provisions of the compact referred to in AS 14.40.700 are as follows:

COMPACT FOR EDUCATION.

ARTICLE I. PURPOSE AND POLICY.

Section A. It is the purpose of this compact to:

(1) establish and maintain close cooperation and understanding among executive, legislative, professional educational and lay leadership on a nationwide basis at the state and local levels;

(2) provide a forum for the discussion, development, crystallization and recommendation of public policy alternatives in the field of education;

(3) provide a clearinghouse of information on matters relating to educational problems and how they are being met in different places throughout the nation, so that the executive and legislative

branches of state government and of local communities may have ready access to the experience and record of the entire country, and so that both lay and professional groups in the field of education may have additional avenues for the sharing of experience and the interchange of ideas in the formation of public policy in education;

(4) facilitate the improvement of state and local educational systems so that all of them will be able to meet adequate and desirable goals in a society which requires continuous qualitative and quantitative advance in educational opportunities, methods and facilities.

Section B. It is the policy of this compact to encourage and promote local and state initiative in the development, maintenance, improvement and administration of educational systems and institutions in a manner which will accord with the needs and advantages of diversity among localities and states.

Section C. The party states recognize that each of them has an interest in the quality and quantity of education furnished in each of the other states, as well as in the excellence of its own educational systems and institutions, because of the highly mobile character of individuals within the nation, and because the products and services contributing to the health, welfare and economic advancement of each state are supplied in significant part by persons educated in other states.

ARTICLE II. THE COMMISSION.

Section A. The Education Commission of the States, hereinafter called "the commission," is hereby established. The commission shall consist of seven members representing each party state. In addition to any other principles or requirements which a state may establish for the appointment and service of its members of the commission, the guiding principle for the composition of the membership on the commission from

each party state shall be that the members representing such state shall, by virtue of their training, experience, knowledge or affiliations be in a position collectively to reflect broadly the interests of the state government, higher education, the state education system, local education and lay and professional public and nonpublic educational leadership. In addition to the members of the commission representing the party states, there may be not to exceed 10 nonvoting commissioners selected by the steering committee for terms of one year. Such commissioners shall represent leading national organizations of professional educators or persons concerned with educational administration.

Section B. The members of the commission shall be entitled to one vote each on the commission. No action of the commission shall be binding unless taken at a meeting at which a majority of the total number of votes on the commission are cast in favor thereof. Action of the commission shall be only at a meeting at which a majority of the commissioners are present. The commission shall meet at least once a year. In its bylaws, and subject to such directions and limitations as may be contained therein, the commission may delegate the exercise of any of its powers to the steering committee or the executive director, except for the power to approve budgets or requests for appropriations, the power to make policy recommendations pursuant to Article III and adoption of the annual report pursuant to Article II (j).

Section C. The commission shall have a seal.

Section D. The commission shall elect annually, from among its members, a chairman, who shall be a governor, a vice chairman and a treasurer. The commission shall provide for the appointment of an executive director. Such executive director shall serve at the pleasure of the commission, and together with the treasurer and such other

personnel as the commission may deem appropriate shall be bonded in such amount as the commission shall determine. The executive director shall be secretary.

Section E. Irrespective of the civil service, personnel or other merit system laws of any of the party states, the executive director subject to the approval of the steering committee shall appoint, remove or discharge such personnel as may be necessary for the performance of the functions of the commission, and shall fix the duties and compensation of such personnel. The commission in its bylaws shall provide for the personnel policies and programs of the commission.

Section F. The commission may borrow, accept or contract for the services of personnel from any party jurisdiction, the United States, or any subdivision or agency of the aforementioned governments, or from any agency of two or more of the party jurisdictions or their subdivisions.

Section G. The commission may accept for any of its purposes and functions under this compact any and all donations, and grants of money, equipment, supplies, materials and services, conditional or otherwise, from any state, the United States, or any other governmental agency, or from any person, firm, association, foundation, or corporation, and may receive, utilize and dispose of the same. Any donation or grant accepted by the commission pursuant to this paragraph or services borrowed pursuant to paragraph (f) of this article shall be reported in the annual report of the commission. Such report shall include the nature, amount and conditions, if any, of the donation, grant, or services borrowed, and the identity of the donor or lender.

Section H. The commission may establish and maintain such facilities as may be necessary for the transacting of its business. The commission may acquire, hold, and convey real and personal property and any interest therein.

Section I. The commission shall adopt bylaws for the conduct of its business and shall have the power to amend and rescind these bylaws. The commission shall publish its bylaws in convenient form and shall file a copy thereof and a copy of any amendment thereto, with the appropriate agency or officer in each of the party states.

Section J. The commission annually shall make to the governor and legislature of each party state a report covering the activities of the commission for the preceding year. The commission may make such additional reports as it may deem desirable.

ARTICLE III. POWERS.

In addition to authority conferred on the commission by other provisions of the compact, the commission shall have authority to:

(1) collect, correlate, analyze and interpret information and data concerning educational needs and resources;

(2) encourage and foster research in all aspects of education, but with special reference to the desirable scope of instruction, organization, administration, and instructional methods and standards employed or suitable for employment in public educational systems;

(3) develop methods for adequate financing of education as a whole and at each of its may levels;

(4) conduct or participate in research of the types referred to in this article in any instance where the commission finds that such research is necessary for the advancement of the purposes and policies of this compact, utilizing fully the resources of national associations, regional compact organizations for higher education, and other agencies and institutions, both public and private;

(5) formulate suggested policies and plans for the improvement of public education as a whole, or for any segment thereof, and make recommendations with respect thereto available to the appropriate

governmental units, agencies and public officials;

(6) do such other things as may be necessary or incidental to the administration of any of its authority or functions pursuant to this compact.

ARTICLE IV. COOPERATION WITH FEDERAL GOVERNMENT.

Section A. If the laws of the United States specifically so provide, or if administrative provision is made therefor within the federal government, the United States may be represented on the commission by not to exceed 10 representatives. Any such representative or representatives of the United States shall be appointed and serve in such manner as may be provided by or pursuant to federal law, and may be drawn from any one or more branches of the federal government, but no such representative shall have a vote on the commission.

Section B. The commission may provide information and make recommendations to any executive or legislative agency or officer of the federal government concerning the common educational policies of the states, and may advise with any such agencies or officers concerning any matter of mutual interest.

ARTICLE V. COMMITTEES.

Section A. To assist in the expeditious conduct of its business when the full commission is not meeting, the commission shall have a steering committee of 32 members which, subject to the provisions of this compact and consistent with the policies of the commission, shall be constituted and function as provided in the bylaws of the commission. One-fourth of the membership of the steering committee shall consist of governors, one-fourth shall consist of legislators, and the remainder shall consist of other members of the commission. A federal representative on the commission may serve with the steering committee, but without vote. The voting members of the steering committee shall serve

for terms of two years, except that members elected to the first steering committee of the commission shall be elected as follows: 16 for one year and 16 for two years. The chairman, vice chairman, and treasurer of the commission shall be members of the steering committee and, anything in this paragraph to the contrary notwithstanding, shall serve during their continuance in these offices. Vacancies in the steering committee shall not affect its authority to act, but the commission at its next regularly ensuing meeting following the occurrence of any vacancy shall fill it for the unexpired term. No person shall serve more than two terms as a member of the steering committee; provided that service for a partial term of one year or less shall not be counted toward the two term limitation.

Section B. The commission may establish advisory and technical committees composed of state, local and federal officials, and private persons to advise it with respect to any one or more of its functions. Any advisory or technical committee may, on request of the states concerned, be established to consider any matter of special concern to two or more of the party states.

Section C. The commission may establish such additional committees as its bylaws may provide.

ARTICLE VI. FINANCE.

Section A. The commission shall advise the governor or designated officer or officers of each party state of its budget and estimated expenditures for such period as may be required by the laws of that party state. Each of the commission's budgets of estimated expenditures shall contain specific recommendations of the amount or amounts to be appropriated by each of the party states.

Section B. The total amount of appropriation requests under any budget shall be apportioned among the party states as follows: one-third

in equal shares; and the remainder in proportion to the population of each party state as shown in the most recent decennial census of population taken by the United States Bureau of the Census, or any agency successor thereto.

Section C. The commission shall not pledge the credit of any party state. The commission may meet any of its obligations in whole or in part with funds available to it pursuant to article II(g) of this compact, provided that the commission takes specific action setting aside such funds prior to incurring an obligation to be met in whole or in part in such manner. Except where the commission makes use of funds available to it pursuant to article II(g) thereof, the commission shall not incur any obligation prior to the allotment of funds by the party states adequate to meet the same.

Section D. The commission shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the commission shall be subject to the audit and accounting procedures established by its bylaws. However, all receipts and disbursement of funds handled by the commission shall be audited yearly by a qualified public accountant, and the report of the audit shall be included in and become part of the annual reports of the commission.

Section E. The accounts of the commission shall be open at any reasonable time for inspection by duly constituted officers of the party states and by any persons authorized by the commission.

Section F. Nothing contained herein shall be construed to prevent commission compliance with laws relating to audit or inspection of accounts by or on behalf of any government contributing to the support of the commission.

ARTICLE VII. ELIGIBLE PARTIES: ENTRY INTO AND WITHDRAWAL.

Section A. This compact shall have as eligible parties all states,

territories, and possessions of the United States, the District of Columbia, and the Commonwealth of Puerto Rico. In respect of any such jurisdiction not having a governor, the term "governor," as used in this compact, shall mean the closest equivalent official of such jurisdiction.

Section B. Any state or other eligible jurisdiction may enter into this compact and it shall become binding thereon when it has adopted the same; provided that in order to enter into initial effect, adoption by at least 10 eligible party jurisdictions shall be required.

Section C. Any party state or jurisdiction may withdraw from this compact by enacting a statute repealing the same, but no such withdrawal shall take effect until one year after the governor of the withdrawing state or other jurisdiction has given notice in writing of the withdrawal to the governors of all other party states and jurisdictions. No withdrawal shall affect any liability already incurred by or chargeable to a party state or jurisdiction prior to the time of such withdrawal.

ARTICLE VIII. CONSTRUCTION AND SEVERABILITY.

This compact shall be liberally construed so as to effectuate the purposes thereof. The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared to be contrary to the constitution of any state or of the United States, or the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person, or circumstance shall not be affected thereby. If this compact shall be held contrary to the constitution of any state participating therein, the compact shall remain in full force and effect as to the state affected as to all severable matters.

ARTICLE IX. STATE DEFINED.

As used in this compact, "state," means a state, territory, or possession of the United States, the District of Columbia or the Commonwealth of Puerto Rico.

Sec. 14.40.720. MEMBERS OF THE COMMISSION. (a) One of the commission members shall be the governor; one shall be the state commissioner of education; two shall be members of the state legislature selected by its respective houses and serving in the manner the legislature may determine; one shall be the president of the state Board of Education; and two shall be appointed at large by and serve at the pleasure of the governor.

(b) The terms of office of the at-large members shall be four years; however, the first members shall be appointed as follows: one for two years, and one for four years. Each member shall hold office until his successor is appointed and qualified.

(c) The legislative and at-large members of the commission serve without compensation but are entitled to per diem and travel expenses provided by law for other state boards and commissions.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Licensing/ Regulation of Opticians

SENATE BILL NO. 341, by the Health, Education and Social Services Committee. Relates to professional licensing and to the regulation of the practice of dispensing opticians. Adds new sections to AS 08.71 (Dispensing Opticians) relating to the removal of board members (states that a member may be removed by the governor for cause, and that the board may by regulation provide that unexcused absences constitutes cause for removal); powers and duties of the board, stating that the board may examine and issue licenses to applicants, renew licenses, hold hearings and order disciplinary sanctions, supply forms, keep records and enforce provisions and adopt or amend regulations. New section added relating to licensure by credentials, stating that a person with a valid license from another state, territory, district or possession of the United States shall be issued a license without examination for those areas in which he is licensed upon payment of fees. Adds new section relating to contact lenses, stating that lenses may be dispensed only upon the written contact lens prescription of a licensed physician or optometrist, except duplicate contacts may be dispensed under an original prescription. States patient shall be instructed to return for inspection of fit of lenses. New definitions added for "dispensing optician" and "supervision" (of work being performed). Amendments made relating to membership of the board and term of office, stating that the board consists of four opticians and one public member (now reads seven persons) who serve staggered terms of four years (now reads three), and states that a person who has served two succesive complete terms may not be reappointed until four years from the expiration of the second term. Amends qualifications for examination by reducing the number of hours a practicing optician has in good standing from 10,000 hours to 6,000, and amends renewal fee for license from a biennial fee of $50 to a fee every four years of $200. Amends provisions relating to practicing without a license by stating that a person who violates section is guilty of a class B misdemeanor. Deletes employees working under the personal supervision of a licensed physician or optometrist from provisions relating to exemptions from and limitations on the application of the chapter. Repeals various sections including qualifications of board members (AS 08.71.030); Board regulations (AS 08.71.050); Record of proceedings (08.71.060); Applicability of Administrative Procedure Act (AS 08.71.070); Contact lenses (AS 08.71.200) and definitions of "dispensing opticians" (AS 08.71.240(3)). Repeals and re-enacts sections relating to Grounds for revokation, suspension or denial of license to read "Imposition of disciplinary sanctions" and adds new language throughout relating to securing a license through decite, fraud or intentional misrepresentation; advertising in a false or misleading manner, conviction of a crime, negligence practicing after becoming unfit and engaging in lewd or immoral conduct. Repeals and re-enacts Limitations or conditions on license; discipline (AS 08.71.175) to read: "Displinary Sanction" and adds new language throughout relating to permanent revokation of license, suspension, censure, reprimand, probationary status and imposition of limitations. Also addresses reinstatement. Provides Act takes effect immediately.

Introduced April 3 and referred to HESS.

SENATE BILL NO. 541

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to professional licensing and to the regulation of the practice of dispensing opticians; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.100(a) is amended to read:

(a) Except as otherwise provided in this title, [ALL] licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

* Sec. 2. AS 08.71.020 is amended to read:

Sec. 08.71.020. MEMBERSHIP [OF BOARD; SOURCE OF APPOINTMENT;] AND TERM OF OFFICE. The board consists of four opticians licensed under AS 08.71.080 and one public member [SEVEN PERSONS] appointed by the governor. Members serve staggered terms of four [THREE] years which [. THE TERMS OF THE PUBLIC MEMBERS OF THE BOARD] shall be set so that they do not expire at the same time. Vacancies on the board shall be filled for the unexpired term. A person who has served two successive complete terms may not be reappointed until four years from the expiration of the second term.

* Sec. 3. AS 08.71 is amended by adding new sections to read:

Sec. 08.71.045. REMOVAL OF BOARD MEMBERS. A member of the board may be removed from office by the governor for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal.

Sec. 08.71.055. POWERS AND DUTIES. The board shall have the

following powers and duties:

(1) to examine and issue licenses to applicants;

(2) to renew licenses;

(3) to hold hearings and order disciplinary sanctions against a person who violates this chapter or the regulations of the board;

(4) to supply forms for applications, licenses, and other needed documents;

(5) to keep a record of all proceedings open to the public, including the name of each applicant for examination and each licensee;

(6) to enforce the provisions of this chapter and adopt or amend regulations necessary to make these provisions effective.

* Sec. 4. AS 08.71.110(1)(B) is amended to read:

(B) been engaged for at least 6,000 [10,000] hours as a practicing optician in good standing in a state, territory, district or possession of the United States; and

* Sec. 5. AS 08.71.120(3) is amended to read:

(3) [BIENNIAL] renewal fee, due every four years ..... 200 [50]

* Sec. 6. AS 08.71.130(a) is amended to read:

(a) A licensed dispensing optician shall renew his license every four years [BIENNIALLY] with the department [DEPARTMENT OF COMMERCE] on or before the date set by the department under AS 08.01.100.

* Sec. 7. AS 08.71 is amended by adding a new section to read:

Sec. 08.71.145. LICENSURE BY CREDENTIALS. A person with a valid license as a dispensing optician from another state, territory, district or possession of the United States shall be issued a license without examination for those professional areas in which he is licensed upon payment of any fee and documentation which the board may require by regulation.

* Sec. 8. AS 08.71.160 is amended to read:

Sec. 08.71.160. DISPENSING OPTICIAN'S APPRENTICE. (a) A person may be employed by a licensed dispensing optician as an apprentice. An apprentice shall be designated as such in the records of the board at the request of a licensed physician, optometrist or dispensing optician and shall be in training and under the [DIRECT] supervision of a licensed physician, optometrist or dispensing optician. No apprentice may be employed under this section for longer than six years unless the board determines that an apprentice is prevented by circumstances beyond his control from obtaining a license as a dispensing optician within that time.

(b) No more than two apprentices may be under the [DIRECT] supervision of one licensed dispensing optician at the same time.

* Sec. 9. AS 08.71.170 is repealed and re-enacted to read:

Sec. 08.71.170. IMPOSITION OF DISCIPLINARY SANCTIONS. The board may revoke or suspend the license of a dispensing optician, or the licensee may be reprimanded or otherwise disciplined when the board finds after a hearing that he

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a crime which affects his ability to continue to practice competently and safely;

(5) intentionally or negligently engaged in or permitted the performance of patient care by persons under his supervision which does

not conform to minimum professional standards regardless of whether actual injury to the patient occurred;

(6) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or other drugs which impairs his ability to practice safely;

(D) physical or mental disability;

(7) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(8) participated in the division, assignment, rebate or refund of fees to a physician or optometrist in consideration of patient referrals;

(9) advertised the services of any other segment of the healing arts.

* Sec. 10. AS 08.71.175 is repealed and re-enacted to read:

Sec. 08.71.175. DISCIPLINARY SANCTIONS. (a) When it finds that a dispensing optician is guilty of an offense under AS 08.71.170, the board may impose the following sanctions singly or in combination:

(1) permanently revoke a dispensing optician's license to practice,

(2) suspend a dispensing optician's license for a determinate period of time;

(3) censure a dispensing optician;

(4) issue a letter of reprimand;

(5) place a dispensing optician on probationary status and require him to

(A) report regularly to the board upon matters involving

the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a dispensing optician.

(b) The board may withdraw probation status of a dispensing optician if it finds that the deficiencies which required the sanction have been remedied.

(c) The board may summarily suspend a dispensing optician's license before final hearing or during the appeals process if the board finds that he poses a clear and immediate danger to the public health and safety if he continues to practice. A dispensing optician whose license is suspended under this section shall be entitled to a hearing by the board no later than seven days after the effective date of the order. The dispensing optician may appeal the suspension after a hearing to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with skill and safety.

(e) The board shall seek consistency in the application of disciplinary sanctions, and significant departure from prior decisions involving similar situations shall be explained in findings of fact or orders.

* Sec. 11. AS 08.71.180 is amended to read:

Sec. 08.71.180. PRACTICING WITHOUT A LICENSE. It is unlawful for a person to practice as a dispensing optician without a license issued under this chapter or while his license is suspended or revoked. A

person who violates this section is guilty of a class B misdemeanor.

* Sec. 12. AS 08.71 is amended by adding a new section to read:

Sec. 08.71.190. CONTACT LENSES. (a) Contact lenses may be dispensed only upon the written contact lens prescription of a licensed physician or optometrist, except duplicate contact lenses may be dispensed under an original prescription.

(b) The dispensing optician shall instruct a patient to return to the prescribing physician or optometrist for inspection of the fit of contact lenses.

DELETING

* Sec. 13. AS 08.71.230(1) is amended to read:

(1) limit or restrict a licensed physician or optometrist [OR EMPLOYEES WORKING UNDER THE PERSONAL SUPERVISION OF A LICENSED PHYSICIAN OR OPTOMETRIST] from the practices enumerated in this chapter, and each licensed physician and optometrist has all the rights and privileges which may accrue under this chapter to dispensing opticians licensed under it;

* Sec. 14. AS 08.71.240 is amended by adding new paragraphs to read:

(4) "dispensing optician" means a person who, on written prescription from a licensed physician or optometrist, prepares and dispenses to the intended wearer or person who writes the prescription, original or duplicate lenses, eyeglasses, contact lenses, and appurtenances to them, and interprets, measures, adapts, fits, and adjusts lenses, eyeglasses, contact lenses, and appurtenances to them* to the face for the aid or correction of visual or ocular anomalies of the human eye;

(5) "supervision" means the provision of any needed direction, control, consultation, instruction, evaluation, and personal inspection of work being performed.

* Sec. 15. AS 08.71.030, 08.71.050, 08.71.060, 08.71.070, 08.71.200, and

08.71.240(3) are repealed.

* Sec. 16. This Act takes effect immediately in accordance with AS 01.10.-070(c).

WORKSHOP RECOMMENDED CHANGES

SB 541 - Dispensing Opticians

1) Delete "reasonable" in Sec. 10 (AS 08.71.175(6)(d)) — P5, L21

SB 549 - Nursing Home Administrators

1) Make board's composition comply with federal regulations - suggest reducing to three member board — P1, L22

SB 550 - Pharmacy

1) Rationale for wholesale licenses

SB 551 - Optometry

1) Include Canada — P3, L12

2) Remove "certificate number" — P6, L21

3) Include definition of optometry/practicing optometry — P7, L1

CSSB 541 - SECTIONAL (DISPENSING OPTICIANS)

* Sec. 1 -- Provides "exception" to current statute which renews licenses biennally and allows our "health boards" to renew every four years

Sec. 2 -- Changes composition of board--decreases number of board members from seven to five, membership is to be composed of four dispensing opticians and one public member. Also the members' term of service is increased from three to four years. Limits board member to two successive four year terms

Sec. 3 -- Allows for "removal of board members"

Enumerates "powers and duties" of board

Sec. 4 -- Reduces number of hours, 10,000 to 6,000, that an individual must be engaged in the practice of dispensing optician "outside" in order to qualify to take the exam to be licensed in this state

Sec. 5 -- Renewal Fee - $200 - due every four years

Sec. 6 -- Provides for license renewal to occur every four years instead of biennially

Sec. 7 -- Allows for "licensure by credentials"

Sec. 8 -- Deletes "direct" in reference to "direct supervision"

Sec. 9 -- Delineates circumstances in which disciplinary sanctions may be imposed

Sec. 10 -- Provides for "disciplinary sanctions"

Sec. 11 -- Makes practicing as a dispensing optician without a license as a class B misdemeanor

Sec. 12 -- Deletes the exemption clause which allows employees working under the personal supervision of a physician/optometrist from being licensed as a dispensing optician

Sec. 13 -- Definitions: "dispensing optician"; "supervision"

Sec. 14 -- Repealers:

08.71.030 (Qualifications of Board Members) Repeals current composition of board to account for change to composition of board proposed in this bill

08.71.050 (Board Regulations) Repeals current "board regulation" section to account for our "powers and duties" section proposed in this bill

08.71.060 (Record of Proceedings) Repeals this section because "maintenance of records" section is incorporated in the "powers and duties" section proposed in this bill

* 08.71.070 (Applicability of Administrative Procedures Act) Not necessary to have this appear in this chapter because AS 08.01.090 provides for applicability of administrative procedure act which is applicable to all boards.

08.71.240(3) (Dispensing Opticians) Repeals this current definition of dispensing optician because new definition is provided for in our bill

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SENATE BILL NO. 549am

"An act relating to professional licensing and to the regulation of Nursing home administrators, and providing for an effective date."

Senate Bill 549am revises current statutes and adds new sections to clarify and strengthen the administration of nursing home administrators licensing procedures. The bill gives the Board of Nursing Home Administrators the authority to develop regulations for the purpose of requiring disciplinary sanctions and making renewal of licenses dependent upon proof of continued competency.

The bill provides specific administrative procedures for applying disciplinary sanctions, and spells out specific grounds for discipline.

The terms of members of the Board of Nursing and limited to approximately eight years and the nursing home administrators license is to be renewed every four years rather than annually.

The Department of Health and Social Services supports Senate Bill 549am as it is written.

As evidenced by the attached letter from Rod Betit, Director, Division of Public Assistance, the existance of and the smooth operation of a Board of Nursing Home Administrators is important to the operation and funding of the State of Alaska's Medicaid program.

The bill does not fiscally affect the cost of operation of the Department of Health and Social Services other than the federal fund participation for the Medicaid program.

Document Number 59-80

The Honorable Glenn Hackney
Chairman, Senate HESS Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

House Bill 447 proposes terminating the existence of the Board of Nursing Home Administrators on January 1, 1981 and reassigns its responsibilities to the Department of Commerce and Economic Development.

At the time various Boards and Commissions were being considered for "sunsetting" by the Legislature in 1979, it was found that the existence of the Board of Nursing Home Administrators or some similar type of "peer review" system was, by federal law, (U.S. Code 42 Sub-Chapter XIX S. 1396 a(29)) necessary if the State of Alaska was to continue to receive federal fund participation for Medicaid nursing home services.

Federal fund participation is an essential part of the Medicaid nursing home services funding. Nursing home services comprise 70% of the total Alaska Medicaid budget (twenty-nine million dollars) and therefore, approximately fourteen million dollars (50% matching) could be lost in federal fund participation if some type of "peer review" licensing function is not provided for in Alaska Statute.

When viewed superficially, it is difficult to justify the need for, and cost of a statewide, regionally represented, five member Board of Nursing Home Administrators when only approximately 35 licenses have been issued since 1976. However, with approximately fourteen million dollars in federal fund participation dependent upon the state having "either a Board of Nursing Home Administrators or an agency of the state responsible for licensing under the Healing Arts Act of the state" the cost and need is easier rationalized.

What seems needed is a method of administrating the issuance of Nursing Home Administrators licensured through the Department of Commerce and Economic Development while at the same time providing a method of inexpensive "peer review." Some alternatives that we have considered are as follows:

1. Establish the Long Term Care Division of the Alaska State Hospital Association as the board the Department of Commerce and Economic Department must consult with regarding:

a. Promulgating of regulations.

b. Revocation of licenses.

c. Establishment of procedures to insure that licenses uphold standards.

d. Adoption of criteria for educational requirements.

The Long Term Care Division of the Alaska State Hospital Association meets at least bi-annually and at no expense to the State could provide the professional support needed to fulfill federal statute requirements. The Long Term Care Division of the Alaska State Hospital Association is composed of all the nursing home administrators in the State of Alaska.

II. Establish a Board, for federal purposes, composed of state employees who's offices are in Juneau. This type of board should meet during regular working hours and therefore, should be no added expense to the State.

a. Director of Occupational Licensing.

b. Director of Public Assistance.

c. Director of Public Health.

d. Director of Nursing Board.

III. The development of a comprehensive healing arts act, which would encompass all healing professions.

IV. Reinstatement of the existing Board of Nursing Home Administrators with appropriate funding and staffing in the Division of Occupational Licensing to accomplish the tasks required.

The Division of Public Assistance opposes House Bill 447 and support the reinstatement of the Board of Nursing Home Administrators. We feel the cost of supporting the operation of such a board are justified when compared to the amount of federal fund participation involved.

Sincerely,

Rod Betit
Director

STATE of ALASKA

MEMORANDUM

TO: Debra Behr, Special Assistant to the Commissioner
Health & Social Services

DATE: April 18, 1980

FILE NO.

TELEPHONE NO.

FROM: Portia Kaufmann, Administrator
State Health Planning & Development
Certification & Licensing

SUBJECT: Position Paper - Senate Bill 549

For an act entitled: "An Act relating to professional licensing and to the regulation of nursing home administrators; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA.

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(22) Board of Nursing Home Administrators.

Discussion:

1. A current license is required by Federal regulations for nursing home administrators.

2. Federal regulations do not require the administrator of a hospital with long term care beds to be a licensed nursing home administrator unless state regulations have this requirement.

   As of this date, the State of Alaska has required a hospital administrator to be licensed as a nursing home administrator if the hospital has a long term care unit.

3. Intermediate Care Facilities for the mentally retarded federal regulations require the administrator to be a qualified Mental Retardation Specialist (A educational background in preference to medical background), unless the State requires him/her to be a licensed nursing home administrator.

   Intermediate Care Facilities for the mentally retarded (ICF/MR) that care for persons with developmental disabilities have an orientation to normalization and a wellness model as opposed to the medical model. Therefore, the administrator of an ICF/MR must have a different background. Alaska has adopted for licensure the Federal Regulations for ICF/MR. Therefore, ICF/MRs are not licensed as nursing homes, but as ICF/MRs.

Senate Bill No. 549 refers to the re-establishment of the Board of Nursing to administer the required licensure program for nursing home administrators.

Comment: The De-partment of Health & Social Services concurs with the content of this Bill.

WORKSHOP RECOMMENDED CHANGES

Separate file

SB 541 - Dispensing Opticians

1)	Delete "reasonable" in Sec. 10 (AS 08.71.175(6)(d))	P5, L21

* SB 549 - Nursing Home Administrators

1)	Make board's composition comply with federal regulations - suggest reducing to three member board	P1, L22

SB 550 - Pharmacy

1)	Rationale for wholesale licenses	

SB 551 - Optometry

1)	Include Canada	P3, L12
2)	Remove "certificate number"	P6, L21
3)	Include definition of optometry/practicing optometry	P7, L1

PART 252—MEDICAL ASSISTANCE PROGRAMS: RELATED RESPONSIBILITIES

§ 252.10 State programs for licensing administrators of nursing homes.

(a) *Purpose.* This section establishes the procedures for States to follow to comply with the requirement for States participating in a title XIX program to establish programs for the licensure of administrators of nursing homes.

(b) *Definitions.* When used in this section:

(1) "Nursing home," for purposes of requiring supervision by a licensed administrator, means any institution or facility, or distinct part of a hospital, which, regardless of its designation, is licensed or formally recognized as meeting State nursing home standards under State law. In those States that do not employ the term "nursing home" in their licensing statutes, "nursing home" means the equivalent term or terms as determined by the administrator, Social and Rehabilitation Service. For purposes of obtaining such determination, the single State agency responsible for the administration of the title XIX program in such State shall submit to the Regional Commissioner copies of current State statutes which define for licensure purposes institutional health care facilities. Not included in this definition is a Christian Science sanatorium operated, or listed and certified, by the First Church of Christ, Scientist, Boston, Mass., or a distinct part of a hospital, which hospital meets the definition in § 249.10(b)(1) or (14)(iv) of this chapter, that is designated or certified as a skilled nursing facility but is not licensed separately or formally approved as a nursing home by the State.

(2) "Nursing home administrator" means any individual who is charged with the general administration of a nursing home, whether or not such individual has an ownership interest in such home, and whether or not his functions and duties are shared with one or more other individuals.

(3) "Board" means a duly appointed State board established for the purpose of carrying out a State program for licensure of administrators of nursing homes, and which is assigned all the duties, functions, and responsibilities prescribed in paragraph (c)(2) of this section. Said board shall be composed of individuals representative of the professions and institutions concerned with the care and treatment of chronically ill or infirm elderly patients; provided that less than a majority of the board membership shall be representative of a single profession or institutional category, and provided further that the noninstitutional members shall have no direct financial interest in nursing homes. For purposes of this definition, nursing home administrators are considered representatives of institutions. This definition is effective July 1, 1973, or earlier at the option of the State.

(4) "Agency," unless otherwise indicated, means the agency of the State responsible for licensing individual practitioners under the healing arts licensing act of the State.

(5) "License" means a certificate or other written evidence issued by a State agency or board to indicate that the bearer has been certified by that body to meet all the standards required of a licensed nursing home administrator under this section.

(6) "Provisional license" means a temporary license issued by the State agency or board to an individual who does not meet all the qualifications for licensure.

(7) "Calendar year" means the period from January 1 through December 31.

(c) *State plan requirements.* A State plan for medical assistance under title XIX of the Social Security Act must include a State program for the licensure of administrators of nursing homes which:

(1) Provides that no nursing home within the State may operate except under the supervision of an administrator licensed in the manner provided in this section.

(2) Provides for licensing of nursing home administrators by the single agency of the State responsible for licensing individual practitioners under the healing arts act of the State, or, in the absence of such an act or agency, a State licensing board representative of the professions and institutions concerned with the care of chronically ill and infirm aged patients and established to carry out the purposes of section 1908 of the Social Security Act. It shall be the function and duty of such agency or board to:

(i) Develop, impose, and enforce standards which must be met by individuals in order to receive a license as a nursing home administrator, which standards shall be designed to insure that nursing home administrators will be individuals who are of good character and are otherwise suitable, and who, by training or experience in the field of institutional administration, are qualified to serve as nursing home administrators;

(ii) Develop and apply appropriate techniques, including examinations and investigations, for determining whether an individual meets such standards;

ST. ANN'S NURSING HOME
415 Sixth Street, Juneau, Alaska 99801 (907) 586-3883

MARCH 30, 1980

THE SENATE HESS COMMITTEE
THE ASSEMBLY BUILDING, ROOM 106
JUNEAU, ALASKA

REF: ~~HOUSE BILL NO. 447~~

SENATOR HACKNEY, AND MEMBERS OF THE HESS COMMITTEE:

ST. ANN'S NURSING HOME AND I APPRECIATE THIS OPPORTUNITY TO ADDRESS THIS HEARING CONCERNING THE SUNSETTING OF THE BOARD OF NURSING HOME ADMINISTRATORS.

LADIES AND GENTLEMEN, WE ARE, TO PUT IT MILDLY, CONCERNED FOR THE WELFARE OF NOT ONLY THE TWENTY-EIGHT MEDICAID PATIENTS IN RESIDENCE AT ST. ANN'S, BUT ALSO THE MEDICAID PATIENTS AT INSTITUTIONS SUCH AS OURS THROUGHOUT THE STATE. THERE MUST BE BETWEEN 400 AND 500 ELDERLY CITIZENS OF THE STATE WHO ARE TOTALLY DEPENDENT UPON MEDICAID FOR MAINTENANCE OF THEIR HEALTH CARE IN INSTITUTIONS.

AS AN ADMINISTRATOR OF A NURSING HOME, I AM ACUTELY FEARFUL THAT, SHOULD THIS BILL PASS AND THE UNFORTUNATE SUNSETTING OF THE BOARD OF NURSING HOME ADMINISTRATORS NOT BE REVERSED, THE STATE WILL - WITHIN 30 DAYS - BE OUT OF THE FEDERAL MEDICAID PROGRAM AS FAR AS NURSING HOME CARE IS CONCERNED. UNLESS THE STATE IS WILLING TO PICK UP THE 50% OF COST THAT THE FEDERAL PROGRAM NOW PAYS, AS AN ADMINISTRATOR, I WILL HAVE TO FIND OTHER (AND I'M CERTAIN) LESS SATISFACTORY PLACEMENT FOR THESE TWENTY-EIGHT PATIENTS AT ST. ANN'S.

WHERE CAN THEY GO -- THOSE PATIENTS WHO HAVE SUFFERED SO MUCH BECAUSE OF PHYSICAL DISABILITIES BROUGHT ON BY ADVANCE AGE. WHERE IS THE LOVING AND THOUGHTFUL AND SKILLED NURSING CARE GOING TO COME FROM. THE COMMUNITY HOME HEALTH CARE AND HOMEMAKERS PROGRAMS ARE STRAINED TO THE LIMIT NOW. NO OTHER FACILITIES CAN TAKE UP ALL THE EXTRA LOAD. DOES THE LEGISLATURE WANT NURSING HOMES TO CUT DOWN ON CARE TO FIT THE SHRUNKEN DOLLARS? NO ONE BELIEVES YOU ARE ASKING THAT -- THE EMPHASIS HAS ALWAYS BEEN ON INCREASED AND BETTER CARE.

UNDER THE TERMS OF THE FEDERAL SOCIAL SECURITY ACT THAT ESTABLISHES STATE MEDICAID PROGRAMS, IT IS CLEARLY STATED THAT THERE MUST BE A "HEALING ARTS ACT" OR A "BOARD OF NURSING HOME ADMINISTRATORS" TO EXAMINE AND LICENSE ADMINISTRATORS. THERE IS NO ROOM FOR DEVIATION SINCE THIS IS A STAUTORY PROVISION RATHER THAN A DEPARTMENTAL REGULATION. HOWEVER, NO DEFINITIONS AS TO SIZE AND COMPOSITION ARE GIVEN EXCEPT THAT A "BOARD" MUST INCLUDE ONE MEMBER FROM THE INSTITUTIONAL SETTING. WE FEEL THAT THE STATE SHOULD HAVE THE RIGHT TO DETERMINE WHAT DEPARTMENT SUCH A "BOARD" WOULD FUNCTION IN, AND WE DO UNDERSTAND THAT THE DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT IS A LOGICAL CHOICE. HOWEVER, THE NECESSITY FOR THE "BOARD" TO BE A DISTINCT AND RECOGNIZABLE ENTITY (WITHIN THE DEPARTMENT) REMAINS.

ST. ANN'S NURSING HOME FEELS STRONGLY THAT THE STATE HAS AN OBLIGATION TO THESE ELDERLY CITIZENS. THEY HAVE SUFFERED MUCH BY REASON OF HAVING FIXED AND LOW INCOMES AT A TIME OF SPIRALLING AND SKYROCKETING COSTS. THEY ARE TRULY LIVING AT SUBSISTENCE LEVELS EVEN IF THEY ARE LUCKY ENOUGH TO AVOID THE RAVAGES OF TIME. ON THEIR RESTRICTED INCOME, IF ILLNESS, INJURY, STROKE OR HEART PROBLEMS HIT THEM, THEY ARE ABSOLUTELY DEPENDENT ON PUBLIC ASSISTANCE AND MEDICAID. THESE CITIZENS, POOR ONLY BECAUSE OF CIRCUMSTANCES OUT OF THEIR CONTROL, ARE DOWN FOR THE COUNT. I, FOR ONE, DON'T WANT TO BE THE ONE TO KICK THEM WHEN THEY ARE HELPLESS.

LADIES AND GENTLEMEN, THE BOARD OF NURSING HOME ADMINISTRATORS IS THE SMALLEST CONCERN HERE. WHAT FORM THE "BOARD" TAKES IN SIZE AND LOCATION WITHIN THE STRUCTURE OF GOVERNMENT IS RELATIVELY UNIMPORTANT AND WITHIN YOUR POWER TO CONTROL. THE IMPORTANT --- THE OVERRIDING CONCERN WE MUST DEAL WITH IS "DO WE REALLY HATE OUR ELDERS SO MUCH THAT WE WANT TO DENY THEM THE ONLY SECURITY THEY HAVE?"

WE MUST HAVE A DISTINCT "BOARD OF NURSING HOME ADMINISTRATORS".

THE PATIENTS AT ST. ANN'S AND I THANK YOU FOR YOUR KINDNESS AND CONSIDERATION IN ALLOWING US TO PRESENT THIS TESTIMONY.

SINCERELY,
ST. ANN'S NURSING HOME

Jack W Buck

FROM: Portia Kaufmann, Administrator State Health Planning & Development Certification & Licensing

SUBJECT: Position Paper - Senate Bill 549

For an act entitled: "An Act relating to professional licensing and to the regulation of nursing home administrators; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA.

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(22) Board of Nursing Home Administrators.

Discussion:

1. A current license is required by Federal regulations for nursing home administrators.

2. Federal regulations do not require the administrator of a hospital with long term care beds to be a licensed nursing home administrator unless state regulations have this requirement.

   As of this date, the State of Alaska has required a hospital administrator to be licensed as a nursing home administrator if the hospital has a long term care unit.

3. Intermediate Care Facilities for the mentally retarded federal regulations require the administrator to be a qualified Mental Retardation Specialist (A educational background in preference to medical background), unless the State requires him/her to be a licensed nursing home administrator.

   Intermediate Care Facilities for the mentally retarded (ICF/MR) that care for persons with developmental disabilities have an orientation to normalization and a wellness model as opposed to the medical model. Therefore, the administrator of an ICF/MR must have a different background. Alaska has adopted for licensure the Federal Regulations for ICF/MR. Therefore, ICF/MRs are not licensed as nursing homes, but as ICF/MRs.

Senate Bill No. 549 refers to the re-establishment of the Board of Nursing to administer the required licensure program for nursing home administrators.

Comment: The Department of Health & Social Services concurs with the content of this Bill.

March 31, 1980

Document Number 59-80

The Honorable Glenn Macleay
Chairman, Senate HESS Committee
Alaska State Legislature
Couch V
Juneau, Alaska 99811

Dear Senator Macleay:

House Bill 447 proposes terminating the existence of the Board of Nursing Home Administrators on January 1, 1981 and reassigns its responsibilities to the Department of Commerce and Economic Development.

At the time various Boards and Commissions were being considered for "sunsetting" by the Legislature in 1979, it was found that the existence of the Board of Nursing Home Administrators or some similar type of "peer review" system was, by federal law, (U.S. Code 42 Sub-Chapter XIX S. 1396 a(29)) necessary if the State of Alaska was to continue to receive federal fund participation for Medicaid nursing home services.

Federal fund participation is an essential part of the Medicaid nursing home services funding. Nursing home services comprise 70% of the total Alaska Medicaid budget (twenty-nine million dollars) and therefore, approximately fourteen million dollars (50% matching) could be lost in federal fund participation if some type of "peer review" licensing function is not provided for in Alaska Statute.

When viewed superficially, it is difficult to justify the need for, and cost of a statewide, regionally represented, five member Board of Nursing Home Administrators when only approximately 35 licenses have been issued since 1976. However, with approximately fourteen million dollars in federal fund participation dependent upon the state having "either a Board of Nursing Home Administrators or an agency of the state responsible for licensing under the Healing Arts Act of the state" the cost and need is easier rationalized.

It seems needed as a method of administering the issuance of Nursing Home Administrators licensure through the Department of Commerce and Economic Development while at the same time providing a method of [illegible] peer review. [illegible] have considered [illegible]

[illegible]

a. Promulgating of regulations.

b. Revocation of licenses.

c. Establishment of procedures to insure that licenses uphold standards.

d. Adoption of criteria for educational requirements.

The Long Term Care Division of the Alaska State Hospital Association meets at least bi-annually and at no expense to the State could provide the professional support needed to fulfill federal statute requirements. The Long Term Care Division of the Alaska State Hospital Association is composed of all the nursing home administrators in the State of Alaska.

II. Establish a Board, for federal purposes, composed of state employees who's offices are in Juneau. This type of board should meet during regular working hours and therefore, should be no added expense to the State.

a. Director of Occupational Licensing.

b. Director of Public Assistance.

c. Director of Public Health.

d. Director of Nursing Board.

III. The development of a comprehensive healing arts act, which would encompass all healing professions.

IV. Reinstatement of the existing Board of Nursing Home Administrators with appropriate funding and staffing in the Division of Occupational Licensing to accomplish the tasks required.

The Division of Public Assistance opposes House Bill 447 and support the reinstatement of the Board of Nursing Home Administrators. We feel the cost of supporting the operation of such a board are justified when compared to the amount of federal fund participation involved.

Sincerely,

Red Rutit
Director

but were not because the person was not enrolled in part B. This limit applies to all recipients eligible for enrollment under part B, whether individually or through an agreement under sec. 1843(a) of the Act. However, FFP is available in expenditures required by §§ 435.914 and 436.901 of this subchapter for retroactive coverage of recipients.

[43 FR 45188, Sept. 29, 1978, as amended at 44 FR 17965, Mar. 24, 1979]

§ 431.630 Coordination of Medicaid with Professional Standards Review Organizations.

The State plan must provide that the Medicaid agency will comply with provisions of Part 463 of this chapter, relating to the activities of PSROs.

[44 FR 16398, Mar. 19, 1979]

Subpart N—State Programs for Licensing Nursing Home Administrators

§ 431.700 Basis and purpose.

This subpart implements sections 1903(a)(29) and 1908 of the Act which require that the State plan include a State program for licensing nursing home administrators.

§ 431.701 Definitions.

Unless otherwise indicated, the following definitions apply for purposes of this subpart:

"Agency" means the State agency responsible for licensing individual practitioners under the State's healing arts licensing act.

"Board" means an appointed State board established to carry out a State program for licensing administrators of nursing homes, in a State that does not have a healing arts licensing act or an agency as defined in this section.

"Licensed" means certified by a State agency or board as meeting all of the requirements for a licensed nursing home administrator specified in this subpart.

"Nursing home" means any institution, facility, or distinct part of a hospital that is licensed or formally recognized as meeting nursing home standards established under State law, or that is determined under § 431.704 to be included under the requirements of this subpart. The term does not include—

(a) A Christian Science sanatorium operated, or listed and certified, by the First Church of Christ, Scientist, Boston, Mass.; or

(b) A distinct part of a hospital, if the hospital meets the definition in §§ 440.10 or 440.140 of this subchapter, and the distinct part is not licensed separately or formally approved as a nursing home by the State even though it is designated or certified as a skilled nursing facility.

"Nursing home administrator" means any person who is in charge of the general administration of a nursing home whether or not the person—

(a) Has an ownership interest in the home; or

(b) Shares his functions and duties with one or more other persons.

§ 431.702 State plan requirement.

A State plan must provide that the State has a program for licensing administrators of nursing homes that meets the requirements of §§ 431.703 through 431.713 of this subpart.

§ 431.703 Licensing requirement.

The State licensing program must provide that only nursing homes supervised by an administrator licensed in accordance with the requirements of this subpart may operate in the State.

§ 431.704 Nursing homes designated by other terms.

If a State licensing law does not use the term "nursing home," the HCFA Administrator will determine the term or terms equivalent to "nursing home" for purposes of applying the requirements of this subpart. To obtain this determination, the medicaid agency must submit to the Regional Medical Director copies of current State laws that define institutional health care facilities for licensing purposes.

§ 431.705 Licensing authority.

(a) The State licensing program must provide for licensing of nursing home administrators by—

(1) The agency designated under the healing arts act of the State; or

(2) A State licensing board.

(b) The State agency or board must perform the functions and duties specified in §§ 431.707 through 431.713 and the board must meet the membership requirements specified in § 431.706 of this subpart.

§ 431.706 Composition of licensing board.

(a) The board must be composed of persons representing professions and institutions concerned with the care and treatment of chronically ill or infirm elderly patients. However—

(1) A majority of the board members may not be representative of a single profession or category of institution; and

(2) Members not representative of institutions may not have a direct financial interest in any nursing home.

(b) For purposes of this section, nursing home administrators are considered representatives of institutions.

§ 431.707 Standards.

(a) The agency or board must develop, impose, and enforce standards that must be met by individuals in order to be licensed as a nursing home administrator.

(b) The standards must be designed to insure that nursing home administrators are—

(1) Of good character;

(2) Otherwise suitable; and

(3) Qualified to serve because of training or experience in institutional administration.

§ 431.708 Procedures for applying standards.

The agency or board must develop and apply appropriate procedures and techniques, including examinations and investigations, for determining if a person meets the licensing standards.

§ 431.709 Issuance and revocation of license.

Except as provided in § 431.714 of this subpart, the agency or board must—

(a) Issue licenses to persons who meet the agency's or board's standards; and

(b) Revoke or suspend a license if the agency or board determines that the person holding the license substantially fails to meet the standards.

§ 431.710 Provisional licenses.

To fill a position of nursing home administrator that unexpectedly becomes vacant, the agency or board may issue one provisional license, for a single period not to exceed 6 months. The license may be issued to a person who does not meet all of the licensing requirements established under § 431.707 but, who—

(a) Is of good character and otherwise suitable; and

(b) Meets any other standards established for provisional licensure by the agency or board.

§ 431.711 Compliance with standards.

The agency or board must establish and carry out procedures to insure that licensed administrators comply with the standards in this subpart when they serve as nursing home administrators.

§ 431.712 Failure to comply with standards.

The agency or board must investigate and act on all complaints it receives of violations of standards.

§ 431.713 Continuing study and investigation.

The agency or board must conduct a continuing study of nursing homes and administrators within the State to improve—

(a) Licensing standards; and

(b) The procedures and methods for enforcing the standards.

§ 431.714 Waivers.

The agency or board may waive any standards developed under § 431.707 of this subpart for any person who has served in the capacity of a nursing home administrator during all of the 3 calendar years immediately preceding the calendar year in which the State first meets the requirements in this subpart.

§ 431.715 Federal financial participation.

No FFP is available in expenditures by the licensing board for establishing and maintaining standards for the li-

NURSING HOME ADMINISTRATORS

Sec. 1 -- Brings Nursing Home Administrators under "Centralized Licensing" Chapter of Title 8

Sec. 2 -- Allows for OL to provide investigative services to the nursing home administrators board

Sec. 3 -- Provisions of this chapter will not affect other boards and commissions provided for in Title 8

BY FED. REG.

Sec. 4 -- Changes board composition

Sec. 5 -- Allows for board members to serve terms of four years instead of three. Limits board membership to two consecutive four year terms

Sec. 6 -- Gives board power of approving issuance of licenses and renewals

Sec. 7 -- Provides for the imposition of disciplinary sanctions

Sec. 8 -- "Continued Competency requirement" before license can be renewed

Sec. 9 -- Provides for removal of board members by governor for cause.

Sec. 10 - Deletes provision "unless excepted by this chapter." The reason for this is that the board feels that if they were to make exceptions this would put them in a volunerable position --i.e. if they made an exception in one case they might be setting a precedent to make an exception in other matters and they would just as soon avoid this

Sec. 11 - Allowing for license renewal to occur every four years

- Provides for continued competency to be established before license can be renewed

Sec. 12 - Provides for individual to apply for examination if his license has expired for a period of 24 months (it currently is 12 months)

Sec. 13 - FEE revision

Sec. 14 - Grounds for imposition of disciplinary sanctions

Sec. 15 - Disciplinary sanctions enumerated.

Sec. 16 - Penalty for violating chapter

Sec. 17 - Brings nursing homes administrators under the "administrative adjudication" section of Title 44

Sec. 18 - Repeal section

Sec. 19 - Effective date

WO 8317
Cook

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to professional licensing and to the regulation of nursing home administrators; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(22) Board of Nursing Home Administrators.

* Sec. 2. AS 08.01.050(19) is amended to read:

(19) provide investigative services to the boards established under AS 08.20, [AS 08.32,] AS 08.36, AS 08.64, AS 08.68, AS 08.70, AS 08.71, AS 08.72, AS 08.80, AS 08.84, and AS 08.86, for the purpose of assisting those boards in matters of professional discipline.

* Sec. 3. AS 08.01.100(a) is amended to read:

(a) Except as provided in this title, [ALL] licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

* Sec. 4. AS 08.70.020(a) is amended to read:

(a) The board consists of five members: three [TWO] nursing home administrators licensed under this chapter and practicing in the state, one [A] registered nurse licensed in the state, and one public member [TWO PERSONS FROM THE GENERAL PUBLIC].

* Sec. 5. AS 08.70.020(c) is amended to read:

(c) Board members serve staggered terms of four [THREE] years or until their successor is appointed, except that a member appointed to a vacated term serves the duration of that term. A person who has served

two successive complete terms may not be reappointed until four years from the expiration of the second term [ON THE FIRST BOARD TWO MEMBERS SERVE ONE-YEAR TERMS, TWO MEMBERS SERVE TWO-YEAR TERMS AND ONE MEMBER SERVES A THREE-YEAR TERM].

* Sec. 6. AS 08.70.050(a)(2) is amended to read:

(2) examine, approve issuance of licenses and renewal of [LICENSE, AND RENEW THE] licenses of qualified persons;

* Sec. 7. AS 08.70.050(a)(3) is amended to read:

(3) establish procedures to insure that licensees continue to uphold the board's standards; impose disciplinary sanctions upon [REVOKE, SUSPEND, OR REFUSE TO RENEW LICENSES OF] persons who fail to uphold the standards;

* Sec. 8. AS 08.70.050(a) is amended by adding a new paragraph to read:

(6) adopt regulations insuring that renewal of a license is contingent upon proof of continued competency by the licensee.

* Sec. 9. AS 08.70 is amended by adding a new section to read:

Sec. 08.70.055. REMOVAL OF BOARD MEMBERS. A member of the board may be removed from office by the governor for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal.

* Sec. 10. AS 08.70.080 is amended to read:

Sec. 08.70.080. LICENSE REQUIRED. Only a licensed nursing home administrator may manage, supervise, or be generally in charge of a nursing home [UNLESS EXCEPTED BY THIS CHAPTER]. Only a nursing home which is supervised by a licensed nursing home administrator may operate in Alaska [UNLESS SPECIALLY EXCEPTED BY THE BOARD. THIS SECTION DOES NOT APPLY TO THE ALASKA PIONEERS' HOMES].

* Sec. 11. AS 08.70.140(b) is amended to read:

(b) An administrator may apply to the board for renewal of his

license every four years by submitting an application for renewal and proof of continued competency as required by regulation [TO THE BOARD]; application forms for renewal are provided by the department.

* Sec. 12. AS 08.70.140(c) is amended to read:

(c) A person whose license has expired for a period of 24 [12] months or more must apply for a license and be examined in the same manner as an applicant who has not been licensed before.

* Sec. 13. AS 08.70.150 is amended to read:

Sec. 08.70.150. FEES. The following fees shall be imposed under this chapter when applicable:

(1) examination fee . . . . . $50 [$25]

(2) investigation fee for persons applying for a license under AS 08.70.110(b) . . . . $50 [$25]

(3) [ANNUAL] license renewal fee (required every four years) . . . . . $200 [$50]

* Sec. 14. AS 08.70 is amended by adding a new section to read:

Sec. 08.70.155. GROUNDS FOR IMPOSITION OF DISCIPLINARY SANCTIONS. After a hearing the board may impose disciplinary sanctions when it finds that a licensee

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice competently and safely;

(5) intentionally or negligently engaged in or permitted the

performance of patient care by persons under his supervision which does not conform to minimum professional standards regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or other drugs which impairs his ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(9) sold or furnished a license to another;

(10) practiced as a nursing home administrator or used a designation tending to imply that he is a nursing home administrator without a license issued under this chaper.

* Sec. 15. AS 08.70.160 is repealed and re-enacted to read:

Sec. 08.70.160. DISCIPLINARY SANCTIONS. (a) When it finds that a licensee is guilty of an offense under AS 08.70.155, the board may impose the following sanctions singly or in combination:

(1) permanently revoke a license to practice;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require him to

(A) report regularly to the board upon matters involving

the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a licensee.

(b) The board may withdraw probation status if it finds that the deficiencies which required the sanction have been remedied.

(c) The board may summarily suspend a license before final hearing or during the appeals process if the board finds that the licensee poses a clear and immediate danger to the public health and safety if he continues to practice. A person whose license is suspended under this section shall be entitled to a hearing by the board no later than seven days after the effective date of the order. The person may appeal the suspension after a hearing to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with reasonable skill and safety.

(e) The board shall seek consistency in the application of disciplinary sanctions, and significant departure from prior decisions involving similar situations shall be explained in findings of fact or orders.

* Sec. 16. AS 08.70.170 is amended to read:

Sec. 08.70.170. PENALTIES. A person convicted of violating a provision of this chapter is <u>guilty of a class B misdemeanor</u> [PUNISHABLE BY A FINE OF NOT MORE THAN $500, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH].

* Sec. 17. AS 44.62.330(a) is amended by adding a new paragraph to read:

(47) Board of Nursing Home Administrators (AS 08.70.010).

* Sec. 18. AS 08.70.060, 08.70.070, and 08.70.140(a) are repealed.

* Sec. 19. This Act takes effect immediately in accordance with AS 01.10.-070(c).

NURSING HOME ADMINISTRATORS

The following changes are to be incorporated into the practice act revisions re: the following health boards - Dental, Dispensing Opticians, Veterinarians, Physical Therapists, Optometrists, Psychologists, Chiropractors, Pharmacy, Nursing Home Administrators, Medical.

P1, L22 #1 - Board members and composition, NURSING HOME ADMINISTRATORS / 1 REGISTERED NURSE / 1 PUBLIC MEMBER

P1, L29 - Limit board membership to two consecutive four year terms.

P3, L9 #2 - Revise fee schedule,

P3, L1 Allow for license renewal to occur every four years

#3 - Eliminate re: to "good character," "professional conduct," etc., unless behavior defined.

* #4 - Consider giving boards responsibility of determining licensing standards through regulations.

** #5 - Out-of-state licensees credentialed through a process/by standards equivalent to ours - should be licensed by endorsement.

#6 - Eliminate standards protecting economic interest of occupational groups, reducing information flow or restricting competition.

#7 - License renewal provisions have been revised which allow for renewal to occur every four years.

P3, L2 MAKE license renewal contingent upon proof of continued competency with BOARDS DETERMINING BY REGULATION how continued competency will be demonstrated.

P4, L7 #8 - Licensing violations: make sure that each board may revoke, suspend or take any other disciplinary action necessary to correct incompetency.

P2, L17 #9 - Establish section providing for removal of board members. Grounds for removal should include: (1) unexcused absences, (2) license violation, (3) anything detrimental to public interest served by board.

* PROVIDED FOR IN 08.70.050(b)

** " " 08.70.110(b)

(Nursing Home Admins already have provided for these provisions)

Sec. 4 -- Removes requirement that board members residing in another judicial district grade examination

Sec. 5 -- Allows for license renewal to occur every four years

Sec. 6 -- Provides for removal of board members by governor for cause

Sec. 7 -- Housekeeping

Sec. 8 -- Reduces number of internship hours registration applicant must have after graduation

Sec. 9 -- This section was mistakenly repealed so it is necessary to have it put back in. The section dealing with "malpractice" is the section to be repealed which is provided for in this bill

Sec. 10 - Provides for licensure by credentials

Sec. 11 - Provides flexibility in allowing a member of the board, rather than entire board, to issue a temporary license for an individual filing for a license by credentials

Sec. 12 - Again provides for flexibility in allowing a member of the board rather than entire board, to issue an emergency permit

Sec. 13 - Places qualifications on retail and wholesale drug dealers. Currently the only thing that covers these individuals is the amount of fees they are required to pay. This provision will mandate qualifications.

Sec. 14 - Revises fees

Sec. 15 - Imposes grounds for disciplinary sanctions

Sec. 16 - Enumerates "Disciplinary Sanctions"

Sec. 17 - Provides for penalty for individual who is found guilty of violating chapter

Sec. 18 - Defines "controlled substance"

Sec. 19 - Repeal section

Sec. 20 - Effective date

PHARMACY - SECTIONAL

Sec. 1 — 08.01.50(10) mandates that Dept. of Commerce (DOL) will issue a duplicate license for a fee of $2. This provision is allowing DOL to make an "exception" in regards to duplicating a pharmacy license. The fee for duplicating a pharmacy license is being raised to $10 (See Sec. 15, Fees).

Sec. 2 — Provides for "exception" to current statute which renews licenses biennally and allows our "health boards" to renew licenses every four years.

Sec. 3 — Makes boardmembers term 4 years instead of 5

— Limits board membership to two consecutive four year terms

Sec. 4 — Expands board's authority for establishing license requirements

Sec. 5 — Removes requirement that board members residing in another judicial district grade examination

Sec. 6 — Provides for board to adopt regulations making license renewal contingent upon continued competency

— Provides for board to hold hearings & order disciplinary sanctions

Sec. 7 — Provides for removal of board members by governor for cause

Sec. 8 — Housekeeping - deletes re: to board

Sec. 9 — Reduces number of internship hours applicant must have after graduation

Sec.10 — This section inadvertently repealed. The section dealing with "malpractice" is the section to be repealed which is provided for in this bill

Sec.11 — Provides for licensure by credentials

Sec.12 — Provides flexibility in allowing a member of the board, rather than entire board, to issue a temporary license for an individual filing for a license by credentials

Sec.13 — Again provides for flexibility in allowing a member of the board, rather than entire board, to issue an emergency permit

Sec.14 — Deletes "shopkeeper" permit. Places qualifications on retail and wholesale drug dealers in the state. Currently the only control over these people is that they must pay a fee and they are issued a permit, but there are no standards regulating these people. This provision will mandate standards.

Sec.15 — Revises fees.

Sec.16 — Imposes grounds for disciplinary sanctions

Sec.17 — Enumerates "disciplinary sanctions"

Sec.18 — Penalty clause

Sec.19 — Defines "controlled substance"

-continued on next page-

Sec. 20 -- Repealers:

08.80.030(6) - Repeals board's power to "examine applicants for shopkeeper permits."

08.80.040(3) - Repeals board's duty to "initiate prosecution of any person violating this chapter."

08.80.040(7) - Repeals board's duty to "issue shopkeeper permits."

08.80.117 - Repeals malpractice insurance

08.80.160(13)- Repeals shopkeepers permit fee

08.80.250 - Repeals "Renewal of lapsed registration." This repeal is necessary because this bill is providing for the board to establish regulations in which renewal will be based upon continued competency

08.80.260 - Repeals "Grounds for refusing or revoking a license." We are replacing this with our "Grounds for imposition of disciplinary sanctions" section.

08.80.265 -Repeals "Limits or conditions on license; discipline." We are replacing this with our "Disciplinary sanctions" section.

08.80.365(2) -Repeals subsection (2) of this section. Partial closure of pharmacy. A pharmacy or pahrmacy drug department which is open for business at times different than the remainder of the store or building in which the pharmacy is located shall.....
(2) be advertised by the methods described in secs. 420 and 430 of this chapter only if the signs or symbols are attached or located within the portions of the store or building where the pharmacy is located.

08.80.380 - Repeals "issuance of shopkeeper permits."

08.80.420(b) - Repeals subsection (b) of this section. Certain advertising prohibited.....(b) A person may not advertise in any manner, prices, percentiles of prices or discounts for drugs requiring a prescription.

08.80.480(19)-Repeals definition of shopkeeper.

Sec. 21 -- Effective date.

Copy of our committee's amendments attached.

S 70

MARCH 31, 1980

BOARD OF PHARMACY

No problem with section 1-4

Section 5. Sen. Fahrenkamp. Does this require the department to notify these people if their licenses are out or is it the person who has got the license job to see that they get their license?

Ann Griggs. As it reads in here, it looks as though they are going to be on their own which is something that we don't mind at all.

Sen. Hackney. Does this cause any problem as far as you are concerned?

McCorcle. No, that's the way I think it should be.

Sen. Hackney. As long as they know when it expires, its up to them to renew it.

Jana Varatti. I, as a board member, do not agree with that in that if we are increasing the length of time between renewing licences, I think it would be very helpful if only once every four years a notice was sent out to the people. We're cutting it in half by saying "from two to four" and I think that it would be very helpful with all the licenses and registrations and everything that professionals have to maintain to have the department send out a notice. I don't see anything in this proposed statute that addresses that. I can't remember in the statute what the requirements on the department are, but I don't think it addresses that in this bill.

Sen. Hackney. It doesn't say that the division can't go ahead and notify them, so I would almost say that if the Pharmacy Board was to decide they wanted notification, I think Ann would be willing to say 'ok, we'll blow 15¢ every four years.

Sen. Fahrenkamp. Another part of that wording bothers me . . . "contingent upon proof of continued competency". Who makes that determination, how, where, when and why?

Sen. Hackney. That would be by regulation that the method of determining that continued competency would be . . . that's something we can't write into law.

Sen. Fahrenkamp. Well, I'm sure of that, but I'm just wondering if they have something on which they base that determination now.

McCorcle. As of now, we have no way of proof of continued competency. The national board has tried to put together an exam for people that have been practicing for a number of years of a similar type as the entrance exam. At this point nothing has been developed.

Sen. Fahrenkamp. Is there offered within this state or within the U.S. updated materials, or can you get them through teleconferencing or can you get them throuch cassettes or training sessions. It seems to be just unreasonable to state we are going to require this, this or this when it's not offered in this state or not available.

McCorcle. The board actually feels this way too. This was not our putting in.

Sen. Hackney. The reason for this particular one being added, were concerns brought up during the hearings held on the Sunset last year . . .

Sen. Fahrenkamp. My only problem with it is, it's all right to require people keeping up with their education if the means of doing so is available, but if it isn't then I think we are being unreasonable and we should look at that.

Sen. Hackney. I agree, but this, again, really depends on the people who make up that Pharmacy board because they are going to be the ones who determine for their own profession what criteria should be set up for determining that continuing competency.

McCorcle. This is going to make us do that?

Sen. Hackney. Yes. It says you 'shall adopt regulations'.

Section 6 of the bill provides for removal of board members by the governor for cause. You'll notice that unexcused absences from meetings constitute cause for removal. But again, the board can determine how many absences that might . . . that was something that we heard during testimony that often board members flat don't show up and there is no way to get rid of them.

Section 7 is housekeeping.

Sen. Sturgulewski. I have a question on Sec. 8. 160 visa-vi the 540, is that a reasonable thing?

Conger. We got that from the board.

McCorcle. Yes, we discussed that at the last meeting and we agreed . . .

Sen. Sturgulewski. That 160 is enough after the kind of training they are getting. OK, no problem with that.

Sen. Hackney. Section 9 . . .

Conger. That section was deleted by mistake and it should have been the section dealing with malpractice insurance so now they are coming back putting this intern pregraduate and postgraduate pharmacist program back into the statute and deleting the malpractice insurance section that was supposed to have been taken out.

Sen. Hackney. No problem with that Mr. McCorcle?

McCorcle. No.

Sen. Hackney. Section 10. Instead of endorsement, it simply changes the word.

Section 11.

Sen. Sturgulewski. As I recall, the reason for that was if the board didn't meet it might keep someone from being licensed for too long a period of time.

Conger. This permits just a member of the board, not the entire board.

Ann Griggs. That's good. Some times they have to sit and wait for six or seven weeks.

Sen. Hackney. Section 12.

Section 13. Qualifications on retail and wholesale drug dealers. Mr. McCorcle, you might address the difference between a retail and a wholesale drug dealer.

McCorcle. Well, the wholesaler would be one that would sell to another, not the consumer . . .

Sen. Hackney. Do we have any wholesale drug dealers in the state?

Sen. Sturgulewski. Well, like V.F. Grace (?). This is something different. He would not be issued a license by the board of pharmacy whereas he was not licensed before.

Conger. What this is doing is deleting the shopkeeper permit provision and what happened before is retail and wholesale licenses were granted, however, the only thing that dealt with those subjects in the law was the permit. How much they would pay for a fee but would not discuss their qualifications or anything like this so that is what this section is attempting to do.

And they are getting rid of the shopkeeper permit business.

Sen. Sturgulewski. What about land facilities and equipment, etc. in Sec. 13. What about out of state distributors now, I don't quite understand what we are saying here. Are we saying they have to be physically land based in Alaska in order to be a wholesale, to have a wholesale license. Isn't that kind of a radical thing. Let's take a look of how it really works out there, we've got Pay N Save and we've got all of these different kinds of things. What are we saying by this? Are we adding a new, OK, the current law, as I understand it, allows for licensing of these wholesalers but does not require any conditions. What I seem to be reading, and I just got this, it looks like you are talking about having to be physically located within Alaska. What if I sell to a chain, to Pay N Save, to Safeway, to whoever, are we talking about completely revolutionizing the drug business here by this bill?

McCorcle. I don't think so.

Sen. Sturgulewski. But there is a difference. If ~~XXXXXXX~~ we're saying here they have to be locatedin Alaska we are doing a major change in the whole distribution. I'm not saying that's good or bad, I'm merely saying I want to know what I am doing. And, I don't know what we are doing by adding section 13.

Ann Griggs. What you are saying is that then the detail men that come in from Parke Davis and these outfits would not be physically located in Alaska.

Sen. Sturgulewski. Well, they aren't now. That's what I am saying.

Ann Griggs. This is non-controlled legend drugs.

McCorcle. I'm still not sure that I understand your question. The mail order places outside are not licensed in Alaska, but we say nothing about those people.

Sen. Sturgulewski. Why don't you tell me what section 13 says.

McCorcle. It just says that if anybody wants to set up a business, a wholesale business, in Alaska, he has to have the equipment to do it.

Sen. Sturgulewski. Can he be a wholesale drug dealer from outside? And have a licensed if he is based outside.

McCorcle. I don't see how we could license an outside firm. No.

Sen. Hackney. But, that woulsd't prevent a salesman from coming in though, would it?

Sen. Sturgulewski. Well, I wonder if it would.

Ann Griggs. I don't know. I'm wondering as Sen. Sturgulewski says, if it would in the long run prevent . . .

Sen. Sturgulewski. What are non-controlled legend drugs again?

McCorcle. They are those that require prescription, but are not narcotic in the classified section.

It seems to me that we are only dealing with our own people. We are writing laws to govern the practice in this state.

Sen. Sturgulewski. I understand that, but what's the difference between a wholesale drug dealer that happens to reside in the state and any one of the national firms that have their warehousing out there and they sell to the druggist who stocks it. So, why do we say we will license just the ones that happen to have their facilities here.

Sen. Fahrenkamp. I think I can clear that up. We don't issue any license to out of state we have no control over them. That doesn't mean we prohobit them in the state. But, if we do license one within the state then they must show that they are not just getting a fluke license, that they do have the capability of carrying it out.

We have no control over outside business. We cannot license a large drug company outside, but that doesn't mean we can't use their drugs withing the state. If they are setting up a business here though as a wholesaler in the state then they must show that they have what ever is necessary to do the job they say they can do in the state before they are issued a license.

Sen. Hackney. Then when a salesman comes through, would you read that that the salesman would have to have a license?

Sen. Fahrenkamp. No, the salesman wouldn't be a wholesaler, he'd be a salesman for the wholesalers of the outside compnay.

Sen. HAckney. That's right, he's not wholesaler himself.

Tam Cook. It seems to me that the salesman would be affected if he is distributing drugs.

Sen. Hackney. But, what if he is only taking orders?

Tam Cook. If he is taking orders, I'm sure that that would be called distributing drugs because once he's got the order, he's got to fill it doesn't he?

Sen. Hackney. Well, I don't think we want to cover that individual. How do we get it out of there.

Tam Cook. We can simply describe that this section does not apply in the case of an out of state salesman who is working for a wholesaler which is located out of state.

Sen. Sturgulewski. Why do we want to cover the one in state? Are we doint it because we inspect their, if they are doing manufacturing, to see if they are doing the right kind of manufacturing. Are we checking them to see that they . . . why some and why not all, and why not anybody?

Tam Cook. I think along that line, one might muse upon why we would subject our in state salesman to a licensing procedure and then not subject an out of state person to the same procedure if the purpose of the license is to impose some kind of control upon their activities, I would think it would be in the state's interest to control everybody.

Sen. Sturgulewski. But, the point is that we've tied it in. If he furnishes proof that he is equipped with land, facilities, equipment and so on to carry on the business, then we are going to license him. But, apparently, we are not going to license in this case, and here is where I get confused, if we have a salesman for anybody and he lives here, we are not going to license him and we are not going to license somebody that flied into the state, so why are we licensing the one that have a physical facility?

Sen. Hackney. Why don't we just exclude anyone who . . . .

Sen. Sturgulewski. Didn't this come from the pharmacists?

Conger. Yes. This section did.

McCorcle. Well, for one thing the wholesale needs something to hang his hat on too. If you are going to be in business you need some reason to be in business. You need something to be legal.

Sen. Sturgulewski. Are you talking about a business license?

McCorcle. Partly, yes.

Sen. Sturgulewski. This is different. This is a professional license by the Board of Pharmacy.

Tam Cook. My suspicion is that because so many of these drugs that these manufacturers or wholesalers will be dealing with have both federal and state controls on them that unless a person did have some kind of a license he would not be able to manufacture or have them within the state. So, pershpas this is a necessary section to enable industries to be established within our state and to enable them to go ahead and manufacture especailly federally controlled drugs. Is this what you were getting at sir?

McCorcle. Well, it seems to me that the wholesale outfit should I mean if it is only separating the wholesale from the retail . . .

Sen. Sturgulewski. I'm trying to look for the public protection here and I don't see that I have enough information.

Jana Varrati. It seems that all states provide for the wholesaling procedure in their states. It seems to me that this provides for the setting up of a wholesaling process in Alaska and that it is not necessary to license people coming in from other states if they are already licensed in the state from which they are coming?

Sen. Sturgulewski. Where we do we have anybody that has the power to check to see that somebody does in fact . . . for instance on mobile homes we have a procedure where the department of Commerce, there are certain manufacturers that are licensed to have their produce within the state.

If that's what the case is, that everybody that wells drugs is licensed, but we are just taking care of our own . . .

I have no objection if this is a reasonable thing. It has not been shown to me that this is a reasonable thing.

Sen. Hackney. OK, we'll take that up with Mr. Ulmer.

Sec. 16 of the bill describes what the board may do in the way of disciplinary sanctions. Any problem with that?

Section 17

Sen. Hackney. Section 14 of the bill is the fee section.

Sen. Fahrenkamp. What happens when we set fees by legislation? Are we taking away one of the duties of the board if we set the fees ourself and is it going to mean that in order to change any fees in the future that you have to come to the legislature with a bill to change them?

Ann Griggs: You do anyway because they are all set by statute.

Sen. Hackney. It gives the legislature an opportunity to look at the fees . . .

McCorcle. Mr. Ulmer was concerned about being only one, well $200 for four years. Is it going to be pro-rated then? Four years is getting to be quite a long time for a license. Suppose the guy dies the first six months or the second six months or whatever?

Ann Griggs. No, the pharmicist himself is licensed, not the store.

Licenses are pro-rated in most cases.

Sen. Hackney. Section 15 poses grounds for disciplinary sanctions. Does anyone have any problems with the 12 items listed?

Sen. Sturgulewski. This has always been a problem. It would certainly help the board.

Ann Griggs. I will eventually have to have clarification on #12 under that.

Tam Cook. The reason for number 12. #12 was included in the old, original bill that the pharmacy board was set up under. It is one of the recently added provisions. In Title 9 there is now as a part of the medical malpractice insurance section tere is now a provision where essentially it provides #12. For some reason when that was adopted, this section was added to all of the health boards. I picked it up and put it in here, but there is no reason to leave it in there. Essentially, that provision is in effect anyway as a part of the medical malpractice provisions if they apply to this board. I believe it was put automatically into all of the health boards because when you read it it doesn't sound very syncicle when you apply it to the various boards.

Sen. Hackney. Let's say that someone had a malpractice against a pharmacist and they came to that pharmacy with a prescription to be filled and the pharmacist said OK, but you sign off on . . . but that is covered elsewhere in law?

Tam Cook. Yes, and how it applies exactly to the pharmacist, I'm not sure. It was a general provision under the medical malpractice health laws that were passed and the only way that I can imagine it would come up in regards to a pharmacy would be if a pharmicist actually filled a prescription with a incorrect drug.

Sen. Hackney. LET"S STRIKE IT.

Sec. 16 of the bill describes what the board may do in the way of disciplinary sanctions. Any problem with that?

Section 17 provides the class of misdemeanor that the person may be guilty of who violates a provision of the chapter. Any problem with that?

Section 18. Defines controlled substances. I presume that is in line with the laws that took place two years ago.

Tam Cook. The criminal code uses the term "controlled substance" and they refer us to these statutes so in order to be somewhat consistent I used the criminal codes' treatment. The two statues in question actually come from the health department controlled foods and drugs and they each provide a fairly lengthy description of what constitutes a controlled substance.

Sen. Hackny. Section 19 simply repeals present sections of law.

Section 20 is the effective date.

So, our only real problem with this is section 13 and Paul, would you work with Miss Cook and get hold of Eldon Ulmer maybe in a three-way conversation and see if we can't get that things straightened out.

C 4/9/80 hearing committee made amendments as they appear on forms

PHARMACY - SECTIONAL

Sec. 1 -- 08.01.50(10) mandates that Dept. of Commerce (DOL) will issue a duplicate license for a fee of $2. This provision is allowing DOL to make an "exception" in regards to duplicating a pharmacy license. The fee for duplicating a pharmacy license is being raised to $10 (See Sec. 15, Fees).

Sec. 2 -- Provides for "exception" to current statute which renews licenses biennally and allows our "health boards" to renew licenses every four years.

Sec. 3 -- Makes boardmembers term 4 years instead of 5

-- Limits board membership to two consecutive four year terms

Sec. 4 -- Expands board's authority for establishing license requirements

Sec. 5 -- Removes requirement that board members residing in another judicial district grade examination

Sec. 6 -- Provides for board to adopt regulations making license renewal contingent upon continued competency

-- Provides for board to hold hearings & order disciplinary sanctions

Sec. 7 -- Provides for removal of board members by governor for cause

Sec. 8 -- Housekeeping - deletes re: to board

Sec. 9 -- Reduces number of internship hours applicant must have after graduation

Sec.10 -- This section inadvertently repealed. The section dealing with "malpractice" is the section to be repealed which is provided for in this bill

Sec.11 -- Provides for licensure by credentials

Sec.12 -- Provides flexibility in allowing a member of the board, rather than entire board, to issue a temporary license for an individual filing for a license by credentials

Sec.13 -- Again provides for flexibility in allowing a member of the board, rather than entire board, to issue an emergency permit

Sec.14 -- Deletes "shopkeeper" permit. Places qualifications on retail and wholesale drug dealers in the state. Currently the only control over these people is that they must pay a fee and they are issued a permit, but there are no standards regulating these people. This provision will mandate standards.

Sec.15 -- Revises fees.

Sec.16 -- Imposes grounds for disciplinary sanctions

Sec.17 -- Enumerates "disciplinary sanctions"

Sec.18 -- Penalty clause

Sec.19 -- Defines "controlled substance"

-continued on next page-

Sec. 20 -- Repealers:

08.80.030(6) - Repeals board's power to "examine applicants for shopkeeper permits."

08.80.040(3) - Repeals board's duty to "initiate prosecution of any person violating this chapter."

08.80.040(7) - Repeals board's duty to "issue shopkeeper permits."

08.80.117 - Repeals malpractice insurance

08.80.160(13)- Repeals shopkeepers permit fee

08.80.250 - Repeals "Renewal of lapsed registration." This repeal is necessary because this bill is providing for the board to establish regulations in which renewal will be based upon continued competency

08.80.260 - Repeals "Grounds for refusing or revoking a license." We are replacing this with our "Grounds for imposition of disciplinary sanctions" section.

08.80.265 -Repeals "Limits or conditions on license; discipline." We are replacing this with our "Disciplinary sanctions" section.

08.80.365(2) -Repeals subsection (2) of this section. Partial closure of pharmacy. A pharmacy or pahrmacy drug department which is open for business at times different than the remainder of the store or building in which the pharmacy is located shall.....
(2) be advertised by the methods described in secs. 420 and 430 of this chapter only if the signs or symbols are attached or located within the portions of the store or building where the pharmacy is located.

08.80.380 - Repeals "issuance of shopkeeper permits."

08.80.420(b) - Repeals subsection (b) of this section. Certain advertising prohibited.....(b) A person may not advertise in any manner, prices, percentiles of prices or discounts for drugs requiring a prescription.

08.80.480(19)-Repeals definition of shopkeeper.

Sec. 21 -- Effective date.

✓ PHARMACY

The following changes are to be incorporated into the practice act revisions re: the following health boards - Dental, Dispensing Opticians, Veterinarians, Physical Therapists, Optometrists, Psychologists, Chiropractors, Pharmacy, Nursing Home Administrators, Medical.

#1 - Board members and composition, NO CHANGE

P1, L21 - Limit board membership to two consecutive four year terms.

P5, L1 #2 - Revise fee schedule.

P2, L5 Allow for license renewal to occur every four years

#3 - Eliminate re: to "good character," "professional conduct," etc., unless behavior defined.

P1, L25 #4 - Consider giving boards responsibility of determining licensing standards through regulations.

P3, L8 #5 - Out-of-state licensees credentialed through a process/by standards equivalent to ours - should be licensed by endorsement.

#6 - Eliminate standards protecting economic interest of occupational groups, reducing information flow or restricting competition.

P2, L5 #7 - License renewal provisions have been revised which allow for renewal to occur every four years.

MAKE license renewal contingent upon proof of continued competency with BOARDS DETERMINING BY REGULATION how continued competency will be demonstrated.

P6, L18 #8 - Licensing violations: make sure that each board may revoke, suspend or take any other disciplinary action necessary to correct incompetency.

P2, 10 #9 - Establish section providing for removal of board members. Grounds for removal should include: (1) unexcused absences, (2) license violation, (3) anything detrimental to public interest served by board.

WO 8316
Cook

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to professional licensing and to the practice of pharmacy; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.100(a) is amended to read:

(a) Except as otherwise provided in this title [ALL] licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

* Sec. 2. AS 08.80.020 is amended to read:

Sec. 08.80.020. TERM OF OFFICE. Members of the board are appointed by the governor, and confirmed by the legislature in joint session, for overlapping terms of four [FIVE] years, or until their successors are appointed and qualified. The terms of the public members shall be staggered so that they do not [NO] expire at the same time. An appointment to fill a vacancy is for the unexpired term. The term of office begins on April 1 of each year. A person who has served two successive complete terms may not be reappointed until four years from the expiration of the second term.

* Sec. 3. AS 08.80.030 is amended by adding a new paragraph to read:

(9) adopt requirements for licensing in addition to the requirements set out in this chapter.

* Sec. 4. AS 08.80.040(1) is amended to read:

(1) examine qualified applicants for registration as pharmacists; [EACH EXAMINATION SHALL BE GRADED BY A MEMBER WHO RESIDES IN A

JUDICIAL DISTRICT OTHER THAN THE DISTRICT IN WHICH THE APPLICANT RESIDES;]

* Sec. 5. AS 08.80.040 is amended by adding new paragraphs to read:

(8) adopt regulations insuring that renewal of licenses occurs every four years and is contingent upon proof of continued competency;

(9) hold hearings and order disciplinary sanctions against a person who violates this chapter or the regul tions of the board.

* Sec. 6. AS 08.80 is amended by adding a new section to read:

Sec. 08.80.105. REMOVAL OF BOARD MEMBERS. A member of the board may be removed from office by the governor for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal.

* Sec. 7. AS 08.80.110(4) is amended to read:

(4) pass an examination by a board of pharmacy which [BOARD] has been approved by the National Association of Boards of Pharmacy;

* Sec. 8. AS 08.80.110(5) is amended to read:

(5) have completed at least 1,500 hours of internship training under the direct supervision of a licensed pharmacist in a licensed pharmacy, 160 [540] hours of which must have been completed after graduation.

* Sec. 9. AS 08.80 is amended by adding a new section to read:

Sec. 08.80.116. LICENSE OF PREGRADUATE AND POSTGRADUATE INTERN PHARMACIST. (a) An applicant for licens as a postgraduate intern pharmacist shall meet the requirements of AS 08.80.110(1) - (3) and pay the required fee.

(b) An applicant for license as a pregraduate pharmacist shall meet the requirements of AS 08.80.110(1) and (2) and shall be enrolled in a pharmacy school recognized by the National Association of Boards of

Pharmacy as a junior. An applicant may be on recognized vacation from the pharmacy school; however, the vacation may not exceed one quarter or one semester. The pregraduate internship pharmacist shall pay the required fee.

(c) The license of a postgraduate or pregraduate internship pharmacist is valid for one year and may be renewed upon application.

* Sec. 10. AS 08.80.140 is amended to read:

Sec. 08.80.140. LICENSE BY CREDENTIALS [ENDORSEMENT]. The board may license [REGISTER WITHOUT EXAMINATION] an applicant who has been certified as a registered pharmacist by the National Association of Boards of Pharmacy [,] if the applicant meets the requirements under AS 08.80.110 and passes the state jurisprudence examination [OF AS 08.-80.110(1) - (4)].

* Sec. 11. AS 08.80.150 is amended to read:

Sec. 08.80.150. TEMPORARY LICENSE [REGISTRATION]. The board , or a member of the board, may [SHALL] issue a temporary license to an applicant applying for a license under AS 08.80.140 [REGISTRATION AS A PHARMACIST UNDER AS 08.80.140] upon written or oral examination before a member of the board and certification by the member to the secretary of the board that the applicant is competent to receive a temporary license. The temporary license is valid for three months, or until the next regular meeting of the board, whichever is longer. A temporary license is not renewable, but at the discretion of the issuing board member may be extended for a period not to exceed 60 days, and an applicant may not receive more than one temporary license. An applicant whose license [REGISTRATION] has been denied by the board is not eligible to receive a temporary license.

* Sec. 12. AS 08.80.155(a) is amended to read:

(a) The board, or a member of the board, may [IN ITS DISCRETION]

grant an emergency permit to a pharmacist for the purpose of providing coverage in a pharmacy which is temporarily without the services of a pharmacist due to death, illness or other emergency circumstances.

* Sec. 13. AS 08.80 is amended by adding a new section to read:

Sec. 08.80.157. RETAIL AND WHOLESALE LICENSES. (a) If an applicant furnishes proof satisfactory to the board that he is equipped with land, facilities, and equipment, in fee or leased, necessary to carry on the business described in the application and the applicant complies with this chapter, applicable regulations adopted by the board, and pays fees provided for under AS 08.80.160, the board may issue

(1) a wholesale drug dealer license to an applicant who manufactures or distributes noncontrolled legend drugs to licensed retail pharmacists, dentists, physicians, surgeons, or veterinarians, who may purchase noncontrolled legend drugs at a wholesale level, or to government agencies which may purchase noncontrolled legend drugs at a wholesale level;

(2) a wholesale drug dealer license to a qualified applicant who is in compliance with the Federal Controlled Substance Act of 1969 as amended; or

(3) a license to a retail pharmacy.

(b) A license under this section may not be issued to a person who has been convicted of a wilful violation of a federal law or a law of any state relating to a drug or controlled substance, or who is addicted to a drug or controlled substance. A license may not be issued to a corporation with a managing officer who has been convicted of a wilful violation of a federal law or a law of any state relating to a drug or controlled substance, or who is addicted to a drug or controlled substance.

* Sec. 14. AS 08.80.160 is amended to read:

Sec. 08.80.160. FEES. The following fees shall be imposed under this chapter when applicable:

(1) examination fee..... $50

(2) re-examination fee..... $15

(3) [RECIPROCITY] investigation fee <u>for licensing by credentials</u>..... $25

(4) [BIENNIAL] pharmacist license fee <u>and renewal fee due every four years</u>..... <u>$200</u> [$50]

(5) temporary license fee..... <u>$20</u> [$10]

(6) wholesale drug dealer [BIENNIAL] license fee <u>and renewal fee due every four years</u>..... <u>$200</u> [$50]

(7) retail pharmacy [BIENNIAL] license fee <u>and renewal fee due every four years</u>..... <u>$200</u> [$50]

(8) pharmacy intern <u>license</u> [REGISTRATION] fee..... $10

(9) emergency permit fee..... $10

(10) hospital pharmacy [BIENNIAL] license fee <u>and renewal fee due every four years (in and outpatient)</u>..... <u>$200</u> [$50]

(11) hospital drug room [BIENNIAL] license fee <u>and renewal fee due every four years (inpatient)</u>..... $25

(12) nursing home and related facilities [BIENNIAL] license fee <u>and renewal fee due every four years</u> for inpatient dispensing..... <u>$100</u> [$25]

[(13) SHOPKEEPERS BIENNIAL PERMIT FEE..... $10]

(14) license amendment or replacement fee..... <u>$10</u> [$2]

* Sec. 15. AS 08.80.260 is repealed and re-enacted to read:

Sec. 08.80.260. GROUNDS FOR IMPOSITION OF DISCIPLINARY SANCTIONS. The board may, after a hearing, impose a disciplinary sanction on a

Sec. 08.80.160. FEES. The following fees shall be imposed under this chapter when applicable:

[(13) SHOPKEEPERS BIENNIAL PERMIT FEE..... $10]

(14) license amendment or replacement fee..... $10 [$2]

* Sec. 15. AS 08.80.260 is repealed and re-enacted to read:

Sec. 08.80.260. GROUNDS FOR IMPOSITION OF DISCIPLINARY SANCTIONS. The board may, after a hearing, impose a disciplinary sanction on a

person licensed under this chapter when the board finds that he

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice competently and safely;

(5) intentionally or negligently engaged in or permitted the performance of patient care by persons under his supervision which does not conform to minimum professional standards regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or a drug which impairs his ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(9) made a controlled substance available to a person except upon prescription issued by a licensed physician;

(10) was convicted of selling federal legend drugs without the prescription of a licensed physician, surgeon, dentist, or veterinarian;

(11) violated state or federal regulations pertaining to the provision of adequate security of dangerous drugs;

(12) denied care to a person seeking assistance from a pharmacist if the sole reason for the denial was the refusal of the person to execute an agreement to arbitrate an issue arising out of the care sought.

* Sec. 16. AS 08.80.265 is repealed and re-enacted to read:

Sec. 08.80.265. DISCIPLINARY SANCTIONS. (a) When it finds that a licensee is guilty of an offense under AS 08.80.260, the board may impose the following sanctions singly or in combination:

(1) permanently revoke a license;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require the licensee to

(A) report regularly to the board upon matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a licensee.

(b) The board may withdraw probation status if it finds that the deficiencies which required the sanction have been remedied.

(c) The board may summarily suspend a license before final hearing or during the appeals process if the board finds that the licensee poses a clear and immediate danger to the public health and safety if the

licensee continues to practice. A person whose license is suspended under this section shall be entitled to a hearing by the board no later than seven days after the effective date of the order. The person may appeal the suspension after a hearing to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with reasonable skill and safety.

(e) The board shall seek consistency in the application of disciplinary sanctions, and significant departure from prior decisions involving similar situations shall be explained in findings of fact or orders.

* Sec. 17. AS 08.80.460(a) is amended to read:

(a) A person who violates a provision of this chapter [FOR WHICH NO PUNISHMENT IS PROVIDED] is guilty of a <u>class B</u> misdemeanor [AND IS PUNISHABLE BY A FINE NOT TO EXCEED $1,000, OR BY IMPRISONMENT FOR A PERIOD NOT TO EXCEED THREE MONTHS OR BY BOTH].

* Sec. 18. AS 08.80.480 is amended by adding a new paragraph to read:

(20) "controlled substance" means a narcotic drug as defined in AS 17.10.230(13) or a depressant, hallucinogenic or stimulant drug as defined in AS 17.12.150(3).

* Sec. 19. AS 08.80.030(6), 08.80.040(3) and (7), 08.80.117, 08.80.160(13), 08.80.250, 08.80.260, 08.80.265, 08.80.365(2), 08.80.380, 08.80.420, and 08.80.480(19) are repealed.

* Sec. 20. This Act takes effect immediately in accordance with AS 01.10.070(c).

[redacted]

OPTOMETRISTS

PROVIDES "EXCEPTION" to current statute WHICH RENEWS licenses biennially AND ALLOWS our "health boards" to RENEW licenses every four years.

Sec. 1 -- ~~Provisions of this chapter will not affect other boards and commissions under Title 8.~~

Sec. 2 -- Gives board provision to regulate and control their profession

✓ Sec. 3 -- Changes ~~boards membership~~ terms from three to four years.

Sec. 4 -- Provides for board members removal

✓ Sec. 5 -- changes board composition 4 optns / public

✓ -- limits board membership to two consecutive four year terms

Sec. 6 -- Broadens boards authority to establish license requirements

Sec. 7 -- Allows board to define professional conduct and adopt rules of professional conduct

Sec. 8 -- Broadens boards powers to "order a licensee TO submit to a reasonable physical or mental examination if his physical or mental capacity to practice safely is at issue"

Sec. 9 -- Removes "may" and states the board "shall" issue a branch office certificate of registration

Sec. 10 - Eleminates "normal color perception" requirement to be qualified for optometrist exam.

✓ Sec. 11 - Parts 1 & 2 of the National Optometry Exam will comprise the written part of the Alaska examination

Sec. 12 - Removes a person currently licensed in a territory or foreign country from being eligible for waiver of written examination

✓ Sec. 13 - Provides for license renewal to occur every four years

Sec. 14 - License renewal continuing education requirement

Sec. 15 - Continued competency requirement attached to license renewal

Sec. 16 - Fee revision -- go to sec 17 on next page

CHANGES MADE TO SB 55 / OPTOMETRY -- CSSB 55 1

Sec. 12, page 3, line 12 -- insert "or a province of Canada"

under "disciplinary sanctions"

Sec. 17, page 4, line 11 -- insert "(9) failed to refer a patient to the appropriate health care practitioner after ascertaining the possible presence of ocular disease."

Sec 21 and Sec. 22 -- DEFINITION OF "OPTOMETRY" AND "PRACTICING OPTOMETRY" TO INCLUDE LANGUAGE "OTHER THAN THE USE OF DRUGS."

CHANGES MADE TO SB 55 1

Sec. 17 - Imposition of disciplinary sanction provision

Sec. 18 - Disciplinary sanctions enumerated

Sec. 19 - Removing the requirement that an optometrist temporarily practicing in a place other than his normal place of business, SIGN the receipt for a person supplied with glasses

Sec. 20 - This provision provides for an individual that does not want glasses "impact resistant" that he must sign a waiver stating so

Sec. 21 - Repeal

Sec. 22 - Effective date clause

5/1/80 Met with Sen. Colletta + Bob Page, LA.

Preliminary Agreement between the Alaskan Association of Optometry represented by Roy Box, O. D. and James N. Matson, O. D. with the Alaska Association of Ophthalmology represented by Peter Canava, M. D., Samuel A. McConkey, M. D., Robert Page, M. D., Ron Tokar, M. D.

Others attending the meeting were: Rick Urion, lobbyist for the State Optometric Association; Jeff Landry, lobbyist for the Alaska State Medical Association.

RE: House Bill 79 and Senate Bill 75 - concerning the use of medications in the eye by Optometry

It is agreed by both parties that if a solution in this endeavor is to be reached that a compromise position has to be made. That compromise is as follows:

1. Optometry would be allowed to use proparacaine 0.5% as a topical anesthetic for diagnostic purposes, 1% tropicamide or phenylephrine hydrochloride 2.5% - 5% for dilatation of the pupil for diagnostic purposes.
2. Any changes in this list of medications will be by the combined concurrence of the State Board of Optometry and the State Board of Medical Examiners.
3. A training course will be completed by each optometrist desiring to use drugs prior to any examination. The course shall consist of the following minimum subject matter:
   A. Clinical pharmacology and drug organ interactions.
   B. Cardiopulmonary resuscitation and emergency training.
   C. Techniques of clinical examination.
   D. Thorough review of clinical signs of fundus, anterior segment, and external disease as well as referral guidelines.

4. Optometrists will take a written exam on the above given by a special test committee comprised of two Optometrists and two Ophthalmologists chosen by each respective professional organization to prove competence in the above subjects. *The point of a clinical proficiency demonstration is unsettled by both parties at this time. Any course taken by an Optometrist desiring to use medications in the eye for diagnostic purposes will have to be approved by a committee of two Optometrists and two Ophthalmologists chosen by each respective professional organization.
5. In the current State Statutes regarding Optometry, the word "diagnosis" wherever it appears will be changed to "detection".
6. Mandatory referral guidelines will be followed by all Optometrists. Referral guidelines will be clearly delineated in the Bill and adhered to by all Optometrists whether or not they wish to use drugs in the exam. Those referral guidelines are as follows:

When an Optometrist examines any person, he shall inform that person, parent, guardian, or other responsible party, prior to prescribing or providing eyeglasses or other services that examination by a licensed physician specializing in diseases of the eye (or if no such licensed physician is available then by a duly licensed physician) is indicated whenever one or more of the following conditions is present. These conditions fall generally into four categories where there is:

1. An abnormality of vision.
2. An abnormality of tissue.
3. An abnormality of motor function.
4. Other.

1. Abnormality of Vision:

A. Failure on the part of an individual to obtain 20/30 vision in each eye, 20/30 in children under 8 years of age by refractive correction by lenses. unless the cause has been medically determined by a physician and is stable or unless there is improvement within two weeks with visual therapy.

B. A complaint by the individual of a sudden appearance of spots or flashing lights, scintillating images, transient dimming or loss of vision, or distortion in the shape of objects.

C. A complaint by the individual of temporary or permanent loss of any part of the visual field.

D. A history of rainbow halos around lights in the absence of contact lens causes.

E. Diplopia (double vision) of sudden onset.

2. Tissue Abnormalities:

A. Presence of redness, swelling, mass or ulceration of the eye or its surrounding tissues in the absence of contact lens causes.

B. Opacities of the cornea, lens or vitreous.

C. Changes in the appearance of the optic discs.

1. Cupping greater than 0.5 cup-disc ratio (C-D).
2. Difference greater than 0.2 C-D ratio between the two eyes, that is .2 C-D one eye and .5 C-D the other eye.
3. Difference in appearance between the optic discs of each eye.
4. Change in appearance of the optic discs from a pervious exam.
5. Suspicion of elevation of the optic nerve head.

D. Observation of a deviation from the normal appearance of the retina or its vessels.

3. Abnormalities of Motor Function:

A. Strabismus. A deviation of the eyes from their normal parallel position in straight ahead gaze or gaze in any direction. *This needs to be further defined and refined for Optometry to accept.

B. A difference in the size of the pupils or failure to constrict with illumination or with near vision.

C. Ptosis or lag ophthalmus (drooping of the eyelids) with onset within one week of examination.

D. Nystagmus (rapidly oscillating eye movements).

4. C SR:

A. Continuous tearing of longer than 24 hours duration or complaints of watering eyes not associated with visual tasks.

B. Intraocular tension of 22 or more on any occasion or a family history of glaucoma.

C. Any other observation or deviation from the usual appearance of the eye and related tissues or any complaint which is not attributable to the refractive state or muscle balance, or which is not amenable to lenses, prisms, or visual training.

Exception to any of the preceeding conditions would be previous evaluation by a physician and discharge from medical treatment and followup for that condition.

Failure to comply with the provisions of the Act shall subject the offender to revocation or suspension of his licenses to practice Optometry and this Act shall take effect immediately.

It is completely understood at the outset that there is to be no Grandfather Clause attached to any of the above.

WORKSHOP RECOMMENDED CHANGES

SB 541 - Dispensing Opticians

1)	Delete "reasonable" in Sec. 10 (AS 08.71.175(6)(d))	P5, L21

SB 549 - Nursing Home Administrators

1)	Make board's composition comply with federal regulations - suggest reducing to three member board	P1, L22

SB 550 - Pharmacy

1)	Rationale for wholesale ~~licenses~~	

SB 551 - Optometry

1)	Include Canada	P3, L12
2)	Remove "certificate number"	P6, L21
3)	Include definition of optometry/practicing optometry	P7, L1

OPTOMETRISTS

Sec. 1 -- Provisions of this chapter will not affect other boards and commissions under Title 8

Sec. 2 -- Gives board provision to regulate and control their profession

Sec. 22 - Effective date clause

OPTOMETRIST

The following changes are to be incorporated into the practice act revisions re: the following health boards - Dental, Dispensing Opticians, Veterinarians, Physical Therapists, Optometrists, Psychologists, Chiropractors, Pharmacy, Nursing Home Administrators, Medical.

OPTOMETRIST -

P2,L4 #1 - Board members and composition, 4 OPTOMETRIST/1 public member

P2,L4 - Limit board membership to two consecutive four year terms.

P4,L1 #2 - Revise fee schedule.
Allow for license renewal to occur every four years

P4,L29 #3 - Eliminate re: to "good character," "professional conduct," etc., unless behavior defined.

P2,L10 #4 - Consider giving boards responsibility of determining licensing standards through regulations.

* #5 - Out-of-state licensees credentialed through a process/by standards equivalent to ours - should be licensed by endorsement.

#6 - Eliminate standards protecting economic interest of occupational groups, reducing information flow or restricting competition.

P3,L17 #7 - License renewal provisions have been revised which allow for renewal to occur every four years.
MAKE license renewal contingent upon proof of continued competency with BOARDS DETERMINING BY REGULATION how
P3,L26 continued competency will be demonstrated.

#8 - Licensing violations: make sure that each board may revoke, suspend or take any other disciplinary action necessary to
P5,L2 correct incompetency.

#9 - Establish section providing for removal of board members. Grounds for removal should include: (1)
P1,26 unexcused absences, (2) license violation, (3) anything detrimental to public interest served by board.

* OPTOMETRISTS ALREADY PROVIDE FOR CREDENTIALING AS 08.72.170

Showed to Dr. Page 5/1/80
S.H.

Definition of Optometry as listed in _____

"Optometry" is the examination, other than by the use of drugs, of the human eyes and the visual system for the purpose of ascertaining a departure from the normal, ascertaining the status of the human visual system, including refractice and functional abilities, or ascertaining the presence of ocular disease and any other departure from the normal, which [MAY] require referral to other health care practitioners, or [IS THE EMPLOYMENT OF MEANS OR METHODS, OTHER THAN THE USE OF DRUGS, FOR] the diagnosis of an optical deficiency or deformity, visual or muscular anomaly of the human eye, or the prescription or application of lenses, prisms or ocular exercises for the correction of relief of the human eye;

Under Grounds For Imposition of Disciplinary Sanctions. The board may impose disciplinary sanctions when the board finds after a hearing that a licensee.....

(9) failed to refer a patient to the appropriate health care practitioner after ascertaining the possible presence of ocular disease.

WHAT THIS DOES

1) Bars optometrists from using drugs "other than by the use of drugs,"

2) Statutorily authorizes the optometrists to examine the eye for the purpose of ascertaining the presence of ocular disease

3) Imposes disciplinary sanctions on the optometrists if they fail to refer the patient to the appropriate practitioner after ascertaining the presence of ocular disease.

WO 8318
Cook

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to professional licensing and to the regulation of the practice of optometry; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.100(a) is amended to read:

(a) Except as otherwise provided in this title, [ALL] licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

* Sec. 2. AS 08.72.010 is amended to read:

Sec. 08.72.010. CREATION AND PURPOSE OF BOARD OF EXAMINERS. There is created the Board of Examiners in Optometry to regulate and control the practice of optometry and to protect and promote the public health, welfare, and safety and the public interest.

* Sec. 3. AS 08.72.020 is amended to read:

Sec. 08.72.020. MEMBERSHIP OF BOARD AND TERMS OF OFFICE. The board consists of five persons, appointed by the governor. Members serve staggered terms of four [THREE] years. [THE TERMS OF THE PUBLIC MEMBERS OF THE BOARD SHALL BE SET SO THAT THEY DO NOT EXPIRE AT THE SAME TIME.]

* Sec. 4. AS 08.72 is amended by adding a new section to read:

Sec. 08.72.025. REMOVAL OF BOARD MEMBERS. A member of the board may be removed from office by the governor for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal.

* Sec. 5. AS 08.72.040 is amended to read:

Sec. 08.72.040. QUALIFICATIONS. Four [THREE] board members shall be licensed, practicing optometrists who have been residents for at least three years. One board member shall be a public member. A person who has served two successive complete terms may not be reappointed until four years from the expiration of the second term that he served [TWO SHALL BE PERSONS WHO HAVE NO DIRECT FINANCIAL INTEREST IN THE HEALTH CARE INDUSTRY].

* Sec. 6. AS 08.72.050 is amended by adding new paragraphs to read:

(5) establishing requirements for licensing in addition to those established in this chapter;

(6) prescribing requirements which a person licensed under this chapter must meet to demonstrate continued professional competency.

* Sec. 7. AS 08.72.060(b) is repealed and re-enacted to read:

(b) The board may

(1) adopt a seal;

(2) define professional conduct and adopt rules of professional conduct.

* Sec. 8. AS 08.72.060(c) is repealed and re-enacted to read:

(c) The board shall

(1) elect a president and secretary from among its members;

(2) order a licensee to submit to a reasonable physical or mental examination if his physical or mental capacity to practice safely is at issue.

* Sec. 9. AS 08.72.125(a) is amended to read:

(a) The board shall [MAY] issue a branch office certificate of registration to an Alaskan licensee who maintains a full-time practice in the state but who serves other communities in the state on a part-time basis [A BRANCH OFFICE CERTIFICATE OF REGISTRATION].

* Sec. 10. AS 08.72.140(2) is amended to read:

(2) he has [NORMAL COLOR PERCEPTION AND] a visual acuity of a standard of at least 20/40 in at least one eye as corrected;

* Sec. 11. AS 08.72.160(a) is amended to read:

(a) The examination shall be written, practical, and oral in nature. The National Board of Examiners in Optometry Examination, Parts I and 2, shall comprise the written portion of the Alaska examination. The oral portion of the examination shall be recorded and retained for two years.

* Sec. 12. AS 08.72.170(a)(2) is amended to read:

(2) holds a current license by examination in another state [, TERRITORY OR FOREIGN COUNTRY] and has been established in ethical optometric practice for at least three years before the application, or shows satisfactory evidence of having passed the written portion of the examination given by the National Board of Examiners in Optometry; and

* Sec. 13. AS 08.72.181(a) is amended to read:

(a) To remain in force a license must be renewed every four years [BIENNIALLY].

* Sec. 14. AS 08.72.181(d) is amended to read:

(d) Before a license may be renewed the licensee shall submit to the board evidence of 24 hours of post graduate continuing education instruction as prescribed by regulations of the board. The board may specify by regulation those circumstances under which the requirements of this subsection may be waived.

* Sec. 15. AS 08.72.181 is amended by adding a new subsection to read:

(e) Before a license may be renewed, the licensee shall provide evidence of continued professional competency in accordance with the regulations adopted by the board under AS 08.72.050(6).

* Sec. 16. AS 08.72.191 is amended to read:

Sec. 08.72.191. FEES. The following fees shall be imposed under this chapter when applicable:

(1) examination fee..... $50 [$35]

(2) re-examination fee for written portion..... $50 [50]

(3) waiver of examination fee..... $50 [25]

(4) certificate fee..... $100 [50]

(5) [BIENNIAL] renewal fee

(due every four years)..... $200 [50]

(6) branch office [BIENNIAL] registration fee

(due every four years)..... $100 [25]

* Sec. 17. AS 08.72.240 is repealed and re-enacted to read:

Sec. 08.72.240. GROUNDS FOR IMPOSITION OF DISCIPLINARY SANCTIONS. The board may impose disciplinary sanctions when the board finds after a hearing that a licensee

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice competently and safely;

(5) intentionally or negligently engaged in or permitted the performance of patient care by persons under his supervision which does not conform to minimum professional standards regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or other drugs which impairs his ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients.

* Sec. 18. AS 08.72.250 is repealed and re-enacted to read:

Sec. 08.72.250. DISCIPLINARY SANCTIONS. (a) When it finds that a licensee is guilty of an offense under AS 08.72.240, the board may impose the following sanctions singly or in combination:

(1) permanently revoke a license to practice;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require him to

(A) report regularly to the board upon matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a licensee.

(b) The board may withdraw probation status if it finds that the deficiencies which required the sanction have been remedied.

(c) The board may summarily suspend a license before final hearing or during the appeals process if the board finds that the licensee poses a clear and immediate danger to the public health and safety if he continues to practice. A person whose license is suspended under this section shall be entitled to a hearing by the board no later than seven days after the effective date of the order. He may appeal the suspension after a hearing to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with reasonable skill and safety.

(e) The board shall seek consistency in the application of disciplinary sanctions, and significant departure from prior decisions involving similar situations shall be explained in findings of fact or orders.

* Sec. 19. AS 08.72.270(a) is amended to read:

(a) A registered optometrist, who temporarily practices optometry away from his regular place of business, shall display his registration certificate and deliver to each patient or person fitted or supplied with glasses a receipt [WITH HIS SIGNATURE] showing his permanent place of business or post office address[, certificate number] and the amount charged. A licensee who fails to comply with any of the [FOREGOING] provisions of this section for six months after issuance of the certificate shall forfeit his certificate.

* Sec. 20. AS 08.72.275 is amended by adding a new subsection to read:

(d) A licensee may sell, exchange or deliver eyeglasses or sunglasses which do not meet the requirements of (a) of this section if the sale, exchange or delivery is authorized in a written request signed by the patient.

* Sec. 21. AS 08.72.060(e), 08.72.070, 08.72.090, and 08.72.140(6) are

repealed.

* Sec. 22. This Act takes effect immediately in accordance with AS 01.10.-070(c).

CSSB 561 RULES

Sec. 1 -- AS 08.01.065(10) mandates DEPT. OF COMMERCE TO ISSUE A DUPLICATE LICENSE FOR A FEE OF $2. THIS PROVISION IS ALLOWING DOL TO MAKE AN "EXCEPTION" IN REGARDS TO DUPLICATING A DENTAL LICENSE. THE FEE FOR DUPLICATING A DENTAL LICENSE IS BEING RAISED TO $10. (SEE SEC 27, P.11)

Sec. 2 -- Deletes dental hygienists from the list of boards DOL will provide investigative services to because there is no board of dental hygienists. Dental hygienists come under the Board of Dentistry.

Sec. 3 -- Currently the statute mandates that "all" licenses be renewed biennally on dates set by Dept (DOL). Since we are having renewals occur every fours years for the health boards, we have to account for this exception to the statute.

Sec. 4 -- Provides that only those individuals exempted under AS 08.32.095 may practice dental hygiene without a license.

Sec. 5 -- Provides for licensing by credentials (dental hygienists)

Sec. 6 -- Adds language "determination of qualification for" licensing by credentials and provides for this determination to be accompanied by a $25 review fee.

Sec. 7 -- Provides for dental hygienists exam to be given at the same time, location as examination of dentists.

Sec. 8 -- Provides for license to be issued if applicant passes exam and pays appropriate fee.

-- Provides for registration renewal to occur every four years.

-- Includes continued competency provision.

Sec. 9 -- Provides for "lapsed" license to be reinstated without licensee taking examination if licensee submits a written application, provides proof of continued competency, pays all required fees within two years of original renewal due date.

Sec. 10 -- Provides provisions permitting dental hygiene students to be exempt from licensure requirements.

Sec. 11 - Section enumerates grounds for discipline, suspension or revocation of license. ~~Amendment proposed by Lois Reader~~: SUBSECTION (9) HAS BEEN ADDED

→ (9) performed clinical procedures for compensation without being under the supervision of a licensed dentist.

Sec. 12 - Changes dental board's composition - reduces number of dentists from five to four, increases the number of public members from one to two and leaves one dental hygienist on the board.

CSSB 561 by Rules Comm SECTIONAL

Sec. 13 - Changes board members' terms from five to four years and limits board membership to two consecutive four year terms.

Sec. 14 - Allows for "removal of board members".

Sec. 15 - ADDS "LICENSED DENTAL HYGENIST" ~~"Licensed dentist" is replaced with "practitioner". (Practitioner is defined in definition section as a "person licensed to practice dentistry or dental hygiene in the state.~~)

Sec. 16 - Gives board power to impose disciplinary sanctions.

Sec. 17 - Brings dental hygenist under the "general powers" section of the board.

Sec. 18 - Expands board's powers / ALLOWS BOARD TO ADOPT REGS CONCERNING OUR "CONTINUED COMPETENCY REQUIREMENT"

Sec. 19 - Provides that only those individuals exempted under AS 08 36.238 may practice dentistry without a license.

Sec. 20 - Council on Dental Education is replaced with Commission on Accreditation of the American Dental Association, or its successor agency. ~~SHOULD READ "CREDITED"~~

Sec. 21 - Provides for dental examination to be administered at least once a year and more often if board deems necessary.

- Provides for the board to appoint an examination committee, consisting of dentists, to conduct examination for dental applicants.

- Provides for the board to appoint an examination committee, consisting of two dentists and one dental hygienist, to conduct the exam for the dental hygienist applicants.

Sec 22 - Provides for dentists licensed in this state, but practicing "outside", to keep license current by registering with DOL quadrennially and submitting proof of competency.

Sec. 23 - Licensure by credentials provision. ~~SHOULD READ "ACCREDITED"~~

- Provides provisions permitting dental students to be exempt from licensure requirements.

Sec. 24 - Brings suspension/revocation of "speciality licenses" under AS 08.36.315 to conform with changes made in this bill.

Sec. 25 - Provides for registration to be renewed every four years (instead of biennally) and provides for "continued competency" requirement.

Sec. 26 - Provides for branch office registration.

Sec. 27 - Fee revisions.

Sec. 28 - Spells out grounds for discipline, suspension or revocation of license.

Sec. 29 - Enumerates disciplinary sanctions.

Sec. 30 - Penalty provision.

Sec. 31 - Definitions

Sec. 32 - Repeal section.

Sec. 33 - Effective date.

* Sec. 15. AS 08.36.070(2) is amended to read:

(2) to register licensed dentists and licensed dental hygienists who are in good standing;

* Sec. 16. AS 08.36.070(5) is amended to read:

(5) to hold hearings, and order the disciplinary sanction [, REVOKE, ANNUL, OR SUSPEND THE LICENSE] of a person who violates this chapter, AS 08.32, or the [RULES AND] regulations of the board;

* Sec. 17. AS 08.36.070(7) is amended to read:

(7) to enforce the provisions of this chapter and AS 08.32, and adopt [MAKE, ALTER,] or amend the [RULES AND] regulations necessary [OR DESIRABLE] to make the provisions of this chapter and AS 08.32 effective.

* Sec. 18. AS 08.36.070 is amended by adding new paragraphs to read:

(8) to adopt regulations insuring that renewal registration is contingent upon proof of continued competency by a licensed dentist or licensed dental hygienist;

(9) to provide the department with the requirements for proof of continued competency and to request the department to make these requirements available to each licensed dentist an licensed dental hygienist at least one year before the date on which the dentist or dental hygienist must renew his registration;

(10) to order a licensed dentist or licensed dental hygienist to submit to a reasonable physical or mental examination if his physical or mental capacity to practice safely is at issue;

(11) to join regional professional testing boards and enter into professional licensing reciprocity agreements with other jurisdictions under AS 08.36.234.

* Sec. 19. AS 08.36.100 is amended to read:

Sec. 08.36.100. LICENSE REQUIRED. Except as provided in AS 08.36.

4-14-80 Passed Rptd 4-24-80

Introduced: 4/15/80
Referred: Health, Education & Social Services

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

SENATE BILL NO. 561

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to professional licensing and to the regulation of dentists and dental hygienists; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.050(a)(10) is amended to read:

(10) except as otherwise provided in this title, issue duplicate licenses or certificates upon proof by the licensee of loss of the original and payment by the licensee of a fee of $2;

* Sec. 2. AS 08.01.050(a)(19) is amended to read:

(19) provide investigative services to the boards established under AS 08.20, [AS 08.32,] AS 08.36, AS 08.64, AS 08.68, AS 08.71, AS 08.72, AS 08.80, AS 08.84, and AS 08.86, for the purpose of assisting those boards in matters of professional discipline.

* Sec. 3. AS 08.01.100(a) is amended to read:

(a) Except as otherwise provided in this title, [ALL] licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

* Sec. 4. AS 08.32.010 is amended to read:

Sec. 08.32.010. LICENSE REQUIRED. Except as provided in AS 08.32.095, a person may not [NO PERSON MAY] practice, offer or attempt to practice, or advertise or announce oneself as prepared or qualified to practice dental hygiene without a license.

* Sec. 5. AS 08.32.030 is repealed and re-enacted to read:

Sec. 08.32.030. LICENSURE BY CREDENTIALS. The board may provide

for the licensing without examination of a dental hygienist who

(1) meets the criteria of AS 08.32.020(a);

(2) has successfully passed a state or regional dental hygiene clinical examination which the board has determined is at least equivalent in scope, quality, and difficulty to the Alaska clinical examination;

(3) has been in active clinical dental hygiene practice averaging no less than 14 hours per week for the two years immediately preceding application for state licensure;

(4) has not failed the clinical dental hygiene examination of this state;

(5) has not previously had a license to practice dental hygiene issued by any state or region revoked;

(6) is personally interviewed by a board member;

(7) pays all fees required under AS 08.36.290;

(8) is not the subject of an unresolved complaint, review procedure, or disciplinary proceeding undertaken by a professional dental or dental hygienics association.

* Sec. 6. AS 08.32.040 is amended to read:

Sec. 08.32.040. APPLICATION AND FEE. An application for examination or <u>determination of qualification for</u> licensing by credentials shall be accompanied by the applicant's certificate of graduation from an accredited dental hygiene school and <u>the fee provided under AS 08.36.290(1)</u> [A FEE OF $25].

* Sec. 7. AS 08.32.060 is amended to read:

Sec. 08.32.060. FREQUENCY AND CONTENT OF EXAMINATION. The examination shall be held [ONCE EACH YEAR] at the same <u>times and places</u> [TIME] as the examination of dentists <u>under AS 08.36.130</u>. The examination shall cover subjects considered essential by the board for

the practice of dental hygiene including a clinical examination on the removal of calcareous deposits, accretions, and stains from the exposed surfaces of the teeth beginning at the epithelial attachment by scaling and polishing techniques.

* Sec. 8. AS 08.32.070 is amended to read:

Sec. 08.32.070. REGISTRATION AND LICENSING OF DENTAL HYGIENISTS. If the applicant passes the examination, the board shall register the applicant and issue a license upon payment of all fees required under AS 08.36.290. A licensed dental hygienist shall renew registration and offer proof of continued competency as required by regulation of the board every four years [CERTIFICATE. THE FEE FOR REGISTRATION IS $20. BEFORE MAY 1 OF EVERY OTHER YEAR AFTER THE YEAR OF REGISTRATION, EVERY REGISTERED DENTAL HYGIENIST SHALL PAY A REGISTRATION FEE OF $20].

* Sec. 9. AS 08.32.081 is amended to read:

Sec. 08.32.081. LAPSE AND REINSTATEMENT OF LICENSE. The failure, neglect, or refusal of a licensed dental hygienist to pay the renewal [BIENNIAL] registration fee constitutes a forfeiture of the license. The board may reinstate the license without examination within two years of the date on which payment was due upon written application, proof of continued competency, and payment of all fees required under AS 08.36.290 [$25].

* Sec. 10. AS 08.32 is amended by adding a new section to read:

Sec. 08.32.095. EXEMPTION FROM LICENSE REQUIREMENT. (a) A person enrolled as a full-time student in an accredited school of dental hygiene may perform dental hygiene procedures as part of a course of study without a license if

(1) the procedures are performed under the direct supervision of a member of the faculty who is licensed under AS 08.36, or under the direct supervision of a team of licensed faculty dentists, at least one

of whom is licensed under AS 08.36; and

(2) the clinical program has received written approval from the board.

(b) A person practicing dental hygiene under (a) of this section is subject to all other provisions of this chapter and laws and regulations which apply to the practice of dental hygiene by a licensed dental hygienist.

* Sec. 11. AS 08.32.160 is repealed and re-enacted to read:

Sec. 08.32.160. GROUNDS FOR DISCIPLINE, SUSPENSION OR REVOCATION OF LICENSE. The board may revoke or suspend the license of a dental hygienist, or the licensee may be reprimanded, censured, or disciplined when the board finds after a hearing that he

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice competently and safely;

(5) failed to comply with this chapter, with a regulation adopted under this chapter, under AS 08.3., or with an order of the board;

(6) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

C) addiction or severe dependency on alcohol or other

drugs which impairs his ability to practice safely;

(9) physical or mental disability;

(7) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(8) performed clinical procedures for compensation without being under the supervision of a licensed dentist.

* Sec. 12. AS 08.36.010 is amended to read:

Sec. 08.36.010. CREATION AND MEMBERSHIP OF BOARD. There is created the Board of Dental Examiners [, REFERRED TO IN THIS CHAPTER AS THE BOARD,] consisting of seven members. Four [FIVE] members shall be qualified resident dentists who have been engaged in the practice of dentistry in the state for five years immediately preceding appointment, one member shall be a dental hygienist licensed under AS 08.32, and two public members [ONE MEMBER WITH NO DIRECT FINANCIAL INTEREST IN THE HEALTH CARE INDUSTRY].

* Sec. 13. AS 08.36.020 is amended to read:

Sec. 08.36.020. APPOINTMENT AND TERM OF OFFICE [SERVICE OF MEMBERS]. Members of the board are appointed by the governor, subject to confirmation by the legislature in joint session. Each board member serves for a term of four [FIVE] years, and until his successor is appointed and qualified. The term begins on February 1. An appointment to a vacancy is for the unexpired term. A person who has served two successive complete terms may not be reappointed until four years from the expiration of the second term.

* Sec. 14. AS 08.36 is amended by adding a new section to read:

Sec. 08.36.025. REMOVAL OF BOARD MEMBERS. A member of the board may be removed from office by the governor for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal.

* Sec. 15. AS 08.36.070(2) is amended to read:

(2) to register licensed dentists and licensed dental hygienists who are in good standing;

* Sec. 16. AS 08.36.070(5) is amended to read:

(5) to hold hearings, and order the disciplinary sanction [, REVOKE, ANNUL, OR SUSPEND THE LICENSE] of a person who violates this chapter, AS 08.32, or the [RULES AND] regulations of the board;

* Sec. 17. AS 08.36.070(7) is amended to read:

(7) to enforce the provisions of this chapter and AS 08.32, and adopt [MAKE, ALTER,] or amend the [RULES AND] regulations necessary [OR DESIRABLE] to make the provisions of this chapter and AS 08.32 effective.

* Sec. 18. AS 08.36.070 is amended by adding new paragraphs to read:

(8) to adopt regulations insuring that renewal of registration is contingent upon proof of continued competency by a licensed dentist or licensed dental hygienist;

(9) to provide the department with the requirements for proof of continued competency and to request the department to make these requirements available to each licensed dentist and licensed dental hygienist at least one year before the date on which the dentist or dental hygienist must renew his registration;

(10) to order a licensed dentist or licensed dental hygienist to submit to a reasonable physical or mental examination if his physical or mental capacity to practice safely is at issue;

(11) to join regional professional testing boards and enter into professional licensing reciprocity agreements with other jurisdictions under AS 08.36.234.

* Sec. 19. AS 08.36.100 is amended to read:

Sec. 08.36.100. LICENSE REQUIRED. Except as provided in AS 08.36.-

238, a person may not [NO PERSON, EXCEPT THOSE SPECIFICALLY EXEMPTED FROM THE APPLICATION OF THIS CHAPTER, MAY] practice, or attempt to practice, dentistry without a license or permit, and a current certificate of registration.

* Sec. 20. AS 08.36.110(4) is amended to read:

(4) a graduate of a dental college accredited [APPROVED] by the Commission on Accreditation [COUNCIL ON DENTAL EDUCATION] of the American Dental Association, or its successor agency, at the time of graduation, and holds a D.D.S. or D.M.D. degree or the equivalent;

* Sec. 21. AS 08.36.130 is amended to read:

Sec. 08.36.130. EXAMINATION. An examination shall be given at least once a year and at other times and places determined by the board to be convenient and economical for the applicants and the state. At least once each year the board shall appoint [FROM ITS MEMBERSHIP] an examination committee of at least three licensed dentists who have been engaged in the practice of dentistry in the state for five years immediately preceding appointment to conduct the examination for applicants for licenses to practice dentistry. The board shall also appoint an examination committee of at least two licensed dentists who have been engaged in the practice of dentistry in the state for five years immediately preceding appointment and one person licensed to practice dental hygiene in the state to conduct the examination for applicants for licenses to practice dental hygiene [PERSONS]. The examination committees [COMMITTEE] shall [CONDUCT AN EXAMINATION AT LEAST ONCE A YEAR AND] report the results to the board for official action.

* Sec. 22. AS 08.36.230 is amended to read:

Sec. 08.36.230. PRACTICE OUTSIDE THE STATE. A dentist licensed to practice in this state and residing and practicing dentistry outside of this state, may maintain his eligibility to practice in this state by

[BIENNIALLY] registering his name and place of residence with the division of occupational licensing every four years and submitting proof of competency as required by the board. If the dentist fails to register, the board may reinstate his license without examination upon payment of a penalty of $25, payment of the delinquent registration fee under AS 08.36.290(7), presentation of proof of continued competency [ALL DELINQUENT REGISTRATION FEES], and presentation of proof of active practice [AT HIS PLACE OF RESIDENCE,] certified by the dental board having jurisdiction [AT HIS PLACE OF RESIDENCE,] or, if there is no board, by evidence satisfactory to the board.

* Sec. 23. AS 08.36 is amended by adding new sections to read:

Sec. 08.36.234. REGIONAL TESTING BOARDS AND RECIPROCITY. The board may join regional professional testing boards, such as the Western Regional Testing Board, and enter into professional licensing reciprocity agreements with other jurisdictions, as long as an applicant for a license in this state under the agreement has

(1) graduated from a dental school accredited by the Commission on Dental Accreditation, or its successor agency;

(2) held a license and practiced dentistry in the jurisdiction for five years before application;

(3) met licensure requirements which are substantially equivalent to or higher than those required by this state;

(4) not failed the clinical examination of this state;

(5) not previously had a license to practice dentistry revoked;

(6) not been the subject of an unresolved complaint, review procedure, or disciplinary proceeding undertaken by a professional dental association.

Sec. 08.36.238. EXEMPTION FROM LICENSE REQUIREMENT. (a) A person

enrolled as a full-time student in an accredited school of dentistry may perform procedures as part of a course of study without a license if

(1) the procedures are performed under the direct supervision of a member of the faculty who is licensed under AS 08.36, or under the direct supervision of a team of licensed faculty dentists, at least one of whom is licensed under AS 08.36; and

(2) the clinical program has received written approval from the board.

(b) A person practicing dentistry under (a) of this section is subject to all other provisions of this chapter and to other laws and regulations which apply to the practice of dentistry.

* Sec. 24. AS 08.36.248 is amended to read:

Sec. 08.36.248. SUSPENSION OR REVOCATION OF SPECIALTY LICENSES. The board may suspend or revoke a specialty license upon any grounds set out in AS 08.36.315 [AS 08.36.310], and the procedure [FOR SUSPENSIONS AND REVOCATIONS] shall be the same as for the revocation or suspension of a [REGULAR] license to practice dentistry.

* Sec. 25. AS 08.36.250 is amended to read:

Sec. 08.36.250. RENEWAL OF [BIENNIAL] REGISTRATION. At least 60 days before January 1 of every fourth [OTHER] year, the division of occupational licensing shall mail a form for renewal of [BIENNIAL] registration to each licensed dentist and licensed dental hygienist. Each licensee shall complete the form and return it together with the registration fee and offer proof of continued competency as required by the board. The division of occupational licensing shall, as soon as practicable, issue a registration certificate valid for the years for which it is issued. Each licensee shall keep the registration certificate beside or attached to his license. Failure to receive the registration form does not exempt a licensee [DENTIST] from renewing [BI-

FNNIAL] registration.

* Sec. 26. AS 08.36.260 is amended to read:

Sec. 08.36.260. BRANCH OFFICE REGISTRATION. A licensee who practices in an established office with an address other than that address for which his [BIENNIAL] registration certificate is issued shall obtain a branch office registration certificate for each office.

* Sec. 27. AS 08.36.290 is repealed and re-enacted to read:

Sec. 08.36.290. FEES AND PENALTIES. The following fees and penalties shall be imposed by the board as applicable:

(1) filing fee for examination and licensing application..... $ 25

(2) examination fee:

dentist..... $200

dental hygienist..... 75

(3) credential review fee:

dentist..... $200

dental hygienist..... 75

(4) initial license fee:

dentist..... $ 30

dental hygienist..... 20

(5) registration fee (due every four years):

dentist..... $200

dental hygienist..... 100

(6) filing fee for reexamination application..... $ 25

(7) specialty license fee..... $ 30

(8) branch office registration fee..... $100

(9) temporary permit to practice dentistry..... $ 50

(10) penalty for delinquent registration..... $ 10

(11) duplicate license fee..... $ 10

* Sec. 28. AS 08.36 is amended by adding a new section to read:

Sec. 08.36.315. GROUNDS FOR DISCIPLINE, SUSPENSION OR REVOCATION OF LICENSE. The board may revoke or suspend the license of a dentist, and the licensee may be reprimanded, censured, or disciplined when the board finds after a hearing that he

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional dental services or engaging in professional activities;

(3) advertised professional dental services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice dentistry competently and safely;

(5) intentionally or negligently engaged in or permitted the performance of patient care by persons under his supervision which does not conform to minimum professional standards of dentistry regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or other drugs which impairs his ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the

delivery of professional service to patients;

(9) permits a dental hygienist who is employed by him or working under his supervision to perform a dental procedure other than those permitted under AS 08.32.110.

* Sec. 29. AS 08.36.320 is repealed and re-enacted to read:

Sec. 08.36.320. DISCIPLINARY SANCTIONS. (a) When it finds that a dentist or dental hygienist is guilty of an offense under AS 08.32.160 or AS 08.36.315, the board may impose the following sanctions singly or in combination:

(1) permanently revoke a license to practice;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require him to

(A) report regularly to the board upon matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a licensee.

(b) The board may withdraw probation status if it finds that the deficiencies which required the sanction have been remedied.

(c) The board may summarily suspend a license before final hearing or during the appeals process if the board finds that the licensee poses a clear and immediate danger to the public health and safety if he continues to practice. A person whose license is suspended under this

section shall be entitled to a hearing by the board no later than seven days after the effective date of the order. He may appeal the suspension after a hearing to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with skill and safety.

(e) The board shall seek consistency in the application of disciplinary sanctions, and significant departure from prior decisions involving similar situations shall be explained in findings of fact or orders.

* Sec. 30. AS 08.36.340 is amended to read:

Sec. 08.36.340. PENALTIES. A person who violates any provision of AS 08.32 or AS 08.36 [THIS CHAPTER] for which no specific penalty is provided [,] is guilty of a class B misdemeanor [AND IS PUNISHABLE BY A FINE OF NOT MORE THAN $500, OR BY IMPRISONMENT FOR NOT MORE THAN SIX MONTHS, OR BY BOTH].

* Sec. 31. AS 08.36 is amended by adding a new section to read:

Sec. 08.36.370. DEFINITIONS. In this chapter, unless the context requires otherwise,

(1) "board" means the Board of Dental Examiners;

(2) "department" means the Department of Commerce and Economic Development.

* Sec. 32. AS 08.32.020(a)(1), 08.32.150; AS 08.36.110(2), 08.36.210, 08.36.220, 08.36.310, 08.36.325, 08.36.330, and 08.36.350(2) are repealed.

* Sec. 33. This Act takes effect immediately in accordance with AS 01.10.-070(c).

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to professional licensing and to the regulation of the practice of dentistry and dental hygienics; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.050(a)(19) is amended to read:

(19) provide investigative services to the boards established under AS 08.20, [AS 08.32,] AS 08.36, AS 08.64, AS 08.68, AS 08.71, AS 08.72, AS 08.80, AS 08.84, and AS 08.86, for the purpose of assisting those boards in matters of professional discipline.

* Sec. 2. AS 08.01.100(a) is amended to read:

(a) Except as otherwise provided in this title, [ALL] licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

* Sec. 3. AS 08.32.010 is amended to read:

Sec. 08.32.010. LICENSE REQUIRED. Except as provided in AS 08.32.095, a person may not [NO PERSON MAY] practice, offer or attempt to practice, or advertise or announce oneself as prepared or qualified to practice dental hygiene without a license.

* Sec. 4. AS 08.32.030 is repealed and re-enacted to read:

Sec. 08.32.030. LICENSURE BY CREDENTIALS. The board may provide for the licensing without examination of a dental hygienist who

(1) meets the criteria of AS 08.32.020(a);

(2) has successfully passed a state or regional dental hygiene clinical examination which the board has determined is at least

equivalent in scope, quality, and difficulty to the Alaska clinical examination;

(3) has been in active clinical dental hygiene practice averaging no less than 14 hours per week for the two years immediately preceding application for state licensure;

(4) has not failed the clinical dental hygiene examination of this state;

(5) has not previously had a license to practice dental hygiene issued by any state or region revoked;

(6) is personally interviewed by [the] board;

(7) pays all fees required under AS 08.36.290;

(8) is not the subject of an unresolved complaint, review procedure, or disciplinary proceeding undertaken by a professional dental or dental hygienics association.

* Sec. 5. AS 08.32.040 is amended to read:

Sec. 08.32.040. APPLICATION AND FEE. An application for examination or determination of qualification for licensing by credentials shall be accompanied by the applicant's certificate of graduation from an accredited dental hygiene school and the fee provided under AS 08.36.290(1) [A FEE OF $25].

* Sec. 6. AS 08.32.060 is amended to read:

Sec. 08.32.060. FREQUENCY AND CONTENT OF EXAMINATION. The examination shall be held [ONCE EACH YEAR] at the same times and places [TIME] as the examination of dentists under AS 08.36.130. The examination shall cover subjects considered essential by the board for the practice of dental hygiene including a clinical examination on the removal of calcareous deposits, accretions, and stains from the exposed surfaces of the teeth beginning at the epithelial attachment by scaling and polishing techniques.

* Sec. 7. AS 08.32.070 is amended to read:

Sec. 08.32.070. REGISTRATION AND LICENSING OF DENTAL HYGIENISTS. If the applicant passes the examination, the board shall register the applicant and issue a license upon payment of all fees required under AS 08.36.290. A licensed dental hygienist shall renew registration and offer proof of continued competency as required by the board every four years [CERTIFICATE. THE FEE FOR REGISTRATION IS $20. BEFORE MAY 1 OF EVERY OTHER YEAR AFTER THE YEAR OF REGISTRATION, EVERY REGISTERED DENTAL HYGIENIST SHALL PAY A REGISTRATION FEE OF $20].

* Sec. 8. AS 08.32.081 is amended to read:

Sec. 08.32.081. LAPSE AND REINSTATEMENT OF LICENSE. The failure, neglect, or refusal of a licensed dental hygienist to pay the renewal [BIENNIAL] registration fee constitutes a forfeiture of the license. The board may reinstate the license without examination within two years of the date on which payment was due upon written application, proof of continued competency, and payment of all fees required under AS 08.36.290 [$25].

* Sec. 9. AS 08.32 is amended by adding a new section to read:

Sec. 08.32.095. EXEMPTION FROM LICENSE REQUIREMENT. (a) A person enrolled as a full-time student in an accredited school of dental hygiene may perform dental hygiene procedures as part of a course of study without a license if

(1) the procedures are performed under the direct supervision of a member of the faculty who is licensed under AS 08.36, or under the direct supervision of a team of licensed faculty dentists, at least one of whom is licensed under AS 08.36; and

(2) the clinical program has received written approval from the board.

(b) A person practicing dental hygiene under (a) of this section

is subject to all other provisions of this chapter and laws and regulations which apply to the practice of dental hygiene by a licensed practitioner.

* Sec. 10. AS 08.32.160 is repealed and re-enacted to read:

Sec. 08.32.160. GROUNDS FOR DISCIPLINE, SUSPENSION OR REVOCATION OF LICENSE. The board may revoke or suspend the license of a dental hygienist, or the licensee may be reprimanded, censured, or disciplined when the board finds after a hearing that he

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice competently and safely;

(5) intentionally or negligently engaged in or permitted the performance of patient care by persons under his supervision which does not conform to minimum professional standards regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, under AS 08.36, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or other

drugs which impairs his ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(9) performed professional service without being under the supervision of a licensed dentist.

* Sec. 11. AS 08.36.010 is amended to read:

Sec. 08.36.010. CREATION AND MEMBERSHIP OF BOARD. There is created the Board of Dental Examiners [, REFERRED TO IN THIS CHAPTER AS THE BOARD,] consisting of seven members. Four [FIVE] members shall be qualified resident dentists who have been engaged in the practice of dentistry in the state for five years immediately preceding appointment, one member shall be a dental hygienist licensed under AS 08.32, and two public members [ONE MEMBER WITH NO DIRECT FINANCIAL INTEREST IN THE HEALTH CARE INDUSTRY].

* Sec. 12. AS 08.36.020 is amended to read:

Sec. 08.36.020. APPOINTMENT AND TERM OF OFFICE [SERVICE OF MEMBERS]. Members of the board are appointed by the governor, subject to confirmation by the legislature in joint session. Each board member serves for a term of four [FIVE] years, and until his successor is appointed and qualified. The term begins on February 1. An appointment to a vacancy is for the unexpired term. A person who has served two successive complete terms may not be reappointed until four years from the expiration of the second term.

* Sec. 13. AS 08.36 is amended by adding a new section to read:

Sec. 08.36.025. REMOVAL OF BOARD MEMBERS. A member of the board may be removed from office by the governor for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal.

* Sec. 14. AS 08.36.070(2) is amended to read:

(2) to register practitioners who are [LICENSED DENTISTS] in good standing;

* Sec. 15. AS 08.36.070(5) is amended to read:

(5) to hold hearings, and order the disciplinary sanction [, REVOKE, ANNUL, OR SUSPEND THE LICENSE] of a person who violates this chapter, AS 08.32, or the [RULES AND] regulations of the board;

* Sec. 16. AS 08.36.070(7) is amended to read:

(7) to enforce the provisions of this chapter and AS 08.32, and adopt [MAKE, ALTER,] or amend the [RULES AND] regulations necessary [OR DESIRABLE] to make the provisions of this chapter and AS 08.32 effective.

* Sec. 17. AS 08.36.070 is amended by adding new paragraphs to read:

(8) to establish requirements for licensing in addition to those requirements set out in this chapter and in AS 08.32;

(9) to adopt regulations insuring that renewal of registration is contingent upon proof of continued competency by a practictioner;

(10) to order a practitioner to submit to a reasonable physical or mental examination if his physical or mental capacity to practice safely is at issue.

* Sec. 18. AS 08.36.100 is amended to read:

Sec. 08.36.100. LICENSE REQUIRED. Except as provided in AS 08.36.238, a person may not [NO PERSON, EXCEPT THOSE SPECIFICALLY EXEMPTED FROM THE APPLICATION OF THIS CHAPTER, MAY] practice, or attempt to practice, dentistry without a license or permit, and a current certificate of registration.

* Sec. 19. AS 08.36.110(4) is amended to read:

(4) a graduate of a dental college approved by the Commission

on Accreditation [COUNCIL ON DENTAL EDUCATION] of the American Dental Association, or its successor agency, at the time of graduation, and holds a D.D.S. or D.M.D. degree or the equivalent;

* Sec. 20. AS 08.36.130 is amended to read:

Sec. 08.36.130. EXAMINATION. An examination shall be given at least once a year and at other times and places determined by the board to be convenient and economical for the applicants and the state. At least once each year the board shall appoint [FROM ITS MEMBERSHIP] an examination committee of at least three licensed dentists who have been engaged in the practice of dentistry in the state for five years immediately preceding appointment to conduct the examination for applicants for licenses to practice dentistry. The board shall also appoint an examination committee of at least two licensed dentists who have been engaged in the practice of dentistry in the state for five years immediately preceding appointment and one person licensed to practice dental hygiene in the state to conduct the examination for applicants for licenses to practice dental hygiene [PERSONS]. The examination committees [COMMITTEE] shall [CONDUCT AN EXAMINATION AT LEAST ONCE A YEAR AND] report the results to the board for official action.

* Sec. 21. AS 08.36.230 is amended to read:

Sec. 08.36.230. PRACTICE OUTSIDE THE STATE. A dentist licensed to practice in this state and residing and practicing dentistry outside of this state, may maintain his eligibility to practice in this state by [BIENNIALLY] registering his name and place of residence with the division of occupational licensing every four years and submitting proof of competency. If the dentist fails to register, the board may reinstate his license without examination upon payment of a penalty of $25, payment of the delinquent registration fee under AS 08.36.290(7), presentation of proof of continued competency [ALL DELINQUENT REGIS-

TRATION FEES], and presentation of proof of active practice [AT HIS PLACE OF RESIDENCE,] certified by the dental board having jurisdiction [AT HIS PLACE OF RESIDENCE,] or, if there is no board, by evidence satisfactory to the board.

* Sec. 22. AS 08.36 is amended by adding new sections to read:

Sec. 08.36.234. LICENSURE BY CREDENTIALS. The board may provide for the licensing without examination of a dentist who

(1) is a graduate of a dental college approved by the Commission on Accreditation of the American Dental Association, or its successor agency;

(2) has been licensed to practice dentistry in another state, territory, or region with licensing requirements similar to or higher than those of this state at the time of licensure;

(3) has been engaged in continuous active practice averaging at least 20 hours per week for the five years immediately preceding the application;

(4) is not the subject of an unresolved complaint, review procedure, or disciplinary proceeding undertaken by a professional dental association;

(5) has not previously had a license to practice dentistry revoked;

(6) has not failed the clinical examination of this state;

(7) is personally interviewed by the board;

(8) pays all fees required under AS 08.36.290.

Sec. 08.36.238. EXEMPTION FROM LICENSE REQUIREMENT. (a) A person enrolled as a full-time student in an accredited school of dentistry may perform procedures as part of a course of study without a license if

(1) the procedures are performed under the direct supervision of a member of the faculty who is licensed under AS 08.36, or under the

direct supervision of a team of licensed faculty dentists, at least one of whom is licensed under AS 08.36; and

(2) the clinical program has received written approval from the board.

(b) A person practicing dentistry under (a) of this section is subject to all other provisions of this chapter and to other laws and regulations which apply to the practice of dentistry, by practitioners.

* Sec. 23. AS 08.36.248 is amended to read:

Sec. 08.36.248. SUSPENSION OR REVOCATION OF SPECIALTY LICENSES. The board may suspend or revoke a specialty license upon any grounds set out in AS 08.36.315 [AS 08.36.310], and the procedure [FOR SUSPENSIONS AND REVOCATIONS] shall be the same as for the revocation or suspension of a [REGULAR] license to practice dentistry.

* Sec. 24. AS 08.36.250 is amended to read:

Sec. 08.36.250. RENEWAL OF [BIENNIAL] REGISTRATION. At least 60 days before January 1 of every fourth [OTHER] year, the division of occupational licensing shall mail a form for renewal of [BIENNIAL] registration to each practitioner [LICENSED DENTIST]. Each licensee shall complete the form and return it together with the registration fee and offer proof of continued competency as required by the board. The division of occupational licensing shall, as soon as practicable, issue a registration certificate valid for the years for which it is issued. Each licensee shall keep the registration certificate beside or attached to his license. Failure to receive the registration form does not exempt a practitioner [DENTIST] from renewing [BIENNIAL] registration.

* Sec. 25. AS 08.36.260 is amended to read:

Sec. 08.36.260. BRANCH OFFICE REGISTRATION. A licensee who practices in an established office with an address other than that address for which his [BIENNIAL] registration certificate is issued shall obtain

a branch office registration certificate for each office.

* Sec. 26. AS 08.36.290 is repealed and re-enacted to read:

Sec. 08.36.290. FEES AND PENALTIES. The following fees and penalties shall be imposed by the board as applicable:

(1) filing fee for examination and licensing application..... $ 25

(2) examination fee:

dentist..... $200

dental hygienist..... 75

(3) credential review fee:

dentist..... $200

dental hygienist..... 75

(4) initial license fee:

dentist..... $ 30

dental hygienist..... 20

(5) registration fee (due every four years):

dentist..... $200

dental hygienist..... 100

(6) filing fee for reexamination application..... $ 25

(7) specialty license fee..... $ 30

(8) branch office registration fee..... $100

(9) temporary permit to practice dentistry..... $ 50

(10) penalty for delinquent registration..... $ 10

(11) duplicate license fee..... $ 10

* Sec. 27. AS 08.36 is amended by adding a new section to read:

Sec. 08.36.315. GROUNDS FOR DISCIPLINE, SUSPENSION OR REVOCATION OF LICENSE. The board may revoke or suspend the license of a dentist, and the licensee may be reprimanded, censured, or disciplined when the board finds after a hearing that he

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional dental services or engaging in professional activities;

(3) advertised professional dental services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice dentistry competently and safely;

(5) intentionally or negligently engaged in or permitted the performance of patient care by persons under his supervision which does not conform to minimum professional standards of dentistry regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or other drugs which impairs his ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(9) permits a dental hygienist who is employed by him or working under his supervision to perform a dental procedure other than those permitted under AS 08.32.110.

* Sec. 28. AS 08.36.320 is repealed and re-enacted to read:

Sec. 08.36.320. DISCIPLINARY SANCTIONS. (a) When it finds that a practitioner is guilty of an offense under AS 08.32.160 or AS 08.36.315, the board may impose the following sanctions singly or in combination:

(1) permanently revoke a practitioner's license to practice;

(2) suspend a practitioner's license for a determinate period of time;

(3) censure a practitioner;

(4) issue a letter of reprimand;

(5) place a practitioner on probationary status and require the practitioner to

(A) report regularly to the board upon matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a practitioner.

(b) The board may withdraw probation status of a practitioner if it finds that the deficiencies which required the sanction have been remedied.

(c) The board may summarily suspend a practitioner's license before final hearing or during the appeals process if the board finds that the practitioner poses a clear and immediate danger to the public health and safety if he continues to practice. A practitioner whose license is suspended under this section shall be entitled to a hearing by the board no later than seven days after the effective date of the order. The practitioner may appeal the suspension after a hearing to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with reasonable skill and safety.

(e) The board shall seek consistency in the application of disciplinary sanctions, and significant departure from prior decisions involving similar situations shall be explained in findings of fact or orders.

* Sec. 29. AS 08.36.340 is amended to read:

Sec. 08.36.340. PENALTIES. A person who violates any provision of AS 08.32 or AS 08.36 [THIS CHAPTER] for which no specific penalty is provided [,] is guilty of a class B misdemeanor [AND IS PUNISHABLE BY A FINE OF NOT MORE THAN $500, OR BY IMPRISONMENT FOR NOT MORE THAN SIX MONTHS, OR BY BOTH].

* Sec. 30. AS 08.36 is amended by adding a new section to read:

Sec. 08.36.370. DEFINITIONS. In this chapter, unless the context requires otherwise,

(1) "board" means the Board of Dental Examiners;

(2) "department" means the Department of Commerce and Economic Development;

(3) "practitioner" means a person licensed to practice dentistry or dental hygiene in the state.

* Sec. 31. AS 08.32.020(a)(1), 08.32.150; AS 08.36.110(2), 08.36.210, 08.36.220, 08.36.310, 08.36.325, 08.36.330, and 08.36.350(2) are repealed.

* Sec. 32. This Act takes effect immediately in accordance with AS 01.10.-070(c).

DENTAL BOARD

Sec. 1 -- Deletes dental hygienists from the list of boards DOL will provide investigative services to because there is no board of dental hygienists. Dental hygienists come under the Board of Dentistry.

Sec. 2 -- Currently the statute mandates that "all" licenses be renewed biennally on dates set by Dept (DOL). Since we are having renewals occur every fours years for the health boards, we have to account for this exception to the statute.

Sec. 3 -- Provides that only those individuals exempted under AS 08.32.095 may practice dental hygiene without a license.

Sec. 4 -- Provides for licensing by credentials (dental hygienists)

Sec. 5 -- Adds language "determination of qualification for" licensing by credentials and provides for this determination to be accompanied by a $25 review fee.

Sec. 6 -- Provides for dental hygienists exam to be given at the same time, location as examination of dentists.

Sec. 7 -- Provides for license to be issued if applicant passes exam and pays appropriate fee.

-- Provides for registration renewal to occur every four years.

-- Includes continued competency provision.

Sec. 8 -- Provides for "lapsed" license to be reinstated without licensee taking examination if licensee submits a written application, provides proof of continued competency, pays all required fees within two years of original renewal due date.

Sec. 9 -- Provides provisions permitting dental hygiene students to be exempt from licensure requirements.

Sec. 10 - Section enumerates grounds for discipline, suspension or revocation of license. Amendment proposed by Lois Reeder:

(9) performed clinical procedures for compensation without being under the supervision of a licensed dentist.

Sec. 11 - Changes dental board's composition - reduces number of dentists from five to four, increases the number of public members from one to two and leaves one dental hygienist on the board.

Sec. 12 - Changes board members' terms from five to four years and limits board membership to two consecutive four year terms.

Sec. 13 - Allows for "removal of board members".

Sec. 14 - "licensed dentist" is replaced with "practitioner". (Practitioner is defined in definition section as a "person licensed to practice dentistry or dental hygiene in the state.)

Sec. 15 - Gives board power to impose disciplinary sanctions.

Sec. 16 - Brings dental hygenist under the "general powers" section of the board.

Sec. 17 - Expands board's powers

Sec. 18 - Provides that only those individuals exempted under AS 08.36.238 may practice dentistry without a license.

Sec. 19 - Council on Dental Education is replaced with Commission on Accreditation of the American Dental Association, or its successor agency.
- SHOULD READ "ACCREDITED" -

Sec. 20 - Provides for dental examination to be administered at least once a year and more often if board deems necessary.

- Provides for the board to appoint an examination committee, consisting of dentists, to conduct examination for dental applicants.

- Provides for the board to appoint an examination committee, consisting of two dentists and one dental hygienist, to conduct the exam for the dental hygienist applicants.

Sec. 21 - Provides for dentists licensed in this state, but practicing "outside", to keep license current by registering with DOL quadrennially and submitting proof of competency.

Sec. 22 - Licensure by credentials provision.
- SHOULD READ "ACCREDITED"

- Provides provisions permitting dental students to be exempt from licensure requirements.

Sec. 23 - Brings suspension/revocation of "speciality licenses" under AS 08.36.315 to conform with changes made in this bill.

Sec. 24 - Provides for registration to be renewed every four years (instead of biennally) and provides for "continued competency" requirement.

Sec. 25 - Provides for branch office registration.

Sec. 26 - Fee revisions.

Sec. 27 - Spells out grounds for discipline, suspension or revocation of license.

Sec. 28 - Enumerates disciplinary sanctions.

Sec. 29 - Penalty provision.

Sec. 30 - Definitions

Sec. 31 - Repeal section.

Sec. 32 - Effective date.

JOSH WRIGHT'S PROPOSED AMENDMENTS

Section 08.36 - Issuance of license by credentials.

If an applicant for licensure currently holds a valid license to practice dentistry in Arizona, Idaho, Oregon, and Utah, the Board may issue the appropriate dental license to the applicant upon evidence that:

(1) The applicant is a graduate from a dental school accredited by the Commission on Dental Accreditation, or its successor agency, if any, and;

(2) The applicant has practiced dentistry in one of the above states full-time at least 5 years out of the 5 years immediately preceeding application, and;

(3) Licensure requirements in the other states are substantially similar to or higher than those required by this state, and;

(4) The applicant has not failed the clinical exaimination of this state, and;

(5) No disciplinary proceeding, unresolved complaint or professional association's peer review procedure is pending anywhere at the time a license is to be issued by this state, and;

(6) The applicant has not previously had a license revoked in any state.

Section 08.36 - Expanded duties that may be delegated to dental auxiliaries. a. Only functions which do not require the composite judgment, knowledge and skill attained through dental education and which contribute to a meaningful role in dental care delivery should be delegated.

b. The board shall specify by regulation those additional intra-oral functions which may be performed by dental auxiliaries. Provisions for delegation of expanded functions shall include general specifications of education, training requirements and supervision by the dentist.

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

SENATE BILL NO. 578

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the practice of chiropractic; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.100(a) is amended to read:

(a) Except as otherwise provided in this title, [ALL] licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

* Sec. 2. AS 08.20.020 is amended to read:

Sec. 08.20.020. MEMBERS OF BOARD. Four [THREE] members of the board shall be licensed chiropractic physicians who have practiced chiropractic in this state not less than two years. One member [TWO MEMBERS] of the board shall be a person [PERSONS] with no direct financial interest in the health care industry. Each member serves without pay but is entitled to per diem and travel expenses allowed by law.

* Sec. 3. AS 08.20 is amended by adding a new section to read:

Sec. 08.20.025. REMOVAL OF BOARD MEMBERS. A member of the board may be removed from office by the governor for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal.

* Sec. 4. AS 08.20.030 is amended to read:

Sec. 08.20.030. MEMBERS' TERMS; VACANCIES. (a) Members serve for staggered terms of four [THREE] years. [THE TERMS OF THE PUBLIC MEMBERS OF THE BOARD MAY NOT EXPIRE AT THE SAME TIME.] Vacancies on the board shall be filled for the unexpired term.

(b) A member who has served two successive four-year terms may not be reappointed until four years after the expiration of the second term.

* Sec. 5. AS 08.20.120 is repealed and re-enacted to read:

Sec. 08.20.120. QUALIFICATIONS FOR LICENSE. (a) An applicant shall be issued a license to practice chiropractic if he

(1) has a high school education or its equivalent;

(2) has successfully completed at least two academic years of study in a college of liberal arts or sciences or he has engaged in the active practice of chiropractic for three of the four years preceding the filing of this application;

(3) is a graduate of a legally chartered accredited school or college of chiropractic approved by the board which requires for graduation a residence course of instruction of not less than four years of nine months each;

(4) passes an examination given by the board;

(5) passes to the satisfaction of the board Part I and Part II of the examination of the National Board of Chiropractic Examiners.

(b) The board may issue a license without examination to an applicant under AS 08.20.140.

* Sec. 6. AS 08.20.135 is amended by adding a new subsection to read:

(b) A license may not be issued under (a) of this section after July 1, 1980.

* Sec. 7. AS 08.20.140 is amended to read:

Sec. 08.20.140. LICENSURE BY CREDENTIALS [OUT-OF-STATE LICENSES]. The board may issue a license without examination to an applicant presenting satisfactory proof of the possession of a license or certificate of registration in good standing in a state or territory of the United States, or a foreign country, if the requirements for registration at

the date of his license are essentially [CONSIDERED BY THE BOARD AS] equivalent to those in this chapter [, AND IF THE LICENSING JURISDICTION EXTENDS THE SAME PRIVILEGE TO THOSE HOLDING A LICENSE FROM THIS STATE].

* Sec. 8. AS 08.20.170(a) is repealed and re-enacted to read:

(a) The board may, after a hearing, impose a disciplinary sanction on a person licensed under this chapter when the board finds that he

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice competently and safely;

(5) intentionally or negligently engaged in or permitted the performance of patient care by persons under his supervision which does not conform to minimum professional standards established by regulation regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or a drug which impairs his ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the

delivery of professional service to patients.

* Sec. 9. AS 08.20.170 is amended by adding a new subsection to read:

(d) The board shall adopt regulations which insure that renewal of license is contingent on proof of continued competency by a practitioner.

* Sec. 10. AS 08.20.175 is repealed and re-enacted to read:

Sec. 08.20.175. DISCIPLINARY SANCTIONS. (a) When it finds that a chiropractor is guilty of an offense under AS 08.20.170, the board may impose the following sanctions singly or in combination:

(1) permanently revoke the chiropractor's license to practice;

(2) suspend the chiropractor's license for a determinate period of time;

(3) censure the chiropractor;

(4) issue a letter of reprimand to the chiropractor;

(5) place the chiropractor on probationary status and require him to

(A) report regularly to the board upon matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of the chiropractor.

(b) The board may withdraw probationary status of a chiropractor if it finds that the deficiencies which required the sanction have been remedied.

(c) The board may summarily suspend a chiropractor's license before final hearing or during the appeals process if the board finds

that he poses a clear and immediate danger to the public health and safety if he continues to practice. A chiropractor whose license is suspended under this section is entitled to a hearing by the board no later than seven days after the effective date of the order. The chiropractor may appeal the suspension after a hearing to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with skill and safety.

(e) The board shall seek consistency in the application of disciplinary sanctions, and significant departure from earlier decisions involving similar situations shall be explained in findings of fact or orders.

* Sec. 11. AS 08.20.180 is amended to read:

Sec. 08.20.180. FEES. The board shall impose and collect the following fees:

(1) upon the filing of an application for examination, $50 [$25];

(2) upon application for re-examination, $20 [$10];

(3) for issuance of temporary permit, $50 [$25];

(4) initial and renewal [BIENNIAL] license, due every four years, $200 [$50;

(5) ASSOCIATE LICENSE, $30].

* Sec. 12. AS 08.20.135 is repealed on July 1, 1983.

* Sec. 13. This Act takes effect June 30, 1980.

IN THE SENATE

BY THE HEALTH, EDUCATION AN
SOCIAL SERVICES COMMITTEE

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act continuing the Board of Chiropractic Examiners relating to the practice of chiropractic; and providin for an effective da:e."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.100(a) is amended to read:

(a) Except as otherwise provided in this title, [ALL] licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

* Sec. 2. AS 08.20.020 is amended to read:

Sec. 08.20.020. MEMBERS OF BOARD. Four [THREE] members of the board shall be licensed chiropractic physicians who have practiced chiropractic in this state not less than two years. One member [TWO MEMBERS] of the board shall be a person [PERSONS] with no direct financial interest in the health care industry. Each member serves without pay but is entitled to per diem and travel expenses allowed by law.

* Sec. 3. AS 08.20 is amended by adding a new section to read:

Sec. 08.20.025. REMOVAL OF BOARD MEMBERS. (a) The governor may remove a member of the board only for cause.

(b) As used in (a) of this section, "cause" means

(1) unexcused absenses which harper the work of the board;

(2) the suspension of the license of a board member for a

violation of AS 08.20.170(a);

(3) disability; and

(4) malfeasance in office.

* Sec. 4. AS 08.20.030 is amended to read:

Sec. 08.20.030. MEMBERS' TERMS; VACANCIES. (a) Members serve for staggered terms of four [THREE] years. [THE TERMS OF THE PUBLIC MEMBERS OF THE BOARD MAY NOT EXPIRE AT THE SAME TIME.] Vacancies on the board shall be filled for the unexpired term.

(b) A member who has served two successive four-year terms may not be reappointed until four years after the expiration of the second term.

* Sec. 5. AS 08.20.120 is repealed and re-enacted to read:

Sec. 08.20.120. QUALIFICATIONS FOR LICENSE. (a) An applicant shall be issued a license to practice chiropractic if he

(1) has a high school education or its equivalent;

(2) has successfully completed at least two academic years of study in a college of liberal arts or sciences or the applicant has engaged in the active practice of chiropractic for three of the four years preceding the filing of this application.

(3) is a graduate of a legally chartered accredited school or college of chiropractic approved by the board which requires for graduation a residence course of instruction of not less than four years of nine months each;

(4) passes an examination given by the board;

(5) passes to the satisfaction of the board Part I and Part II of the examination of the National Board of Chiropractic Examiners.

(b) The board may issue a license without examination to an applicant under AS 08.20.140.

(c) The board may establish requirements for licensing in addition to the requirements set out in this chapter.

Sec. 6. AS 08.20.135 is amended by adding a new subsection to read:

(b) A license may not be issued under (a) of this section after July 1, 1980.

* Sec. 7. AS 08.20.140 is amended to read:

Sec. 08.20.140. LICENSURE BY CREDENTIALS [OUT-OF-STATE LICENSES] The board may issue a license without examination to an applicant presenting satisfactory proof of the possession of a license or certifica of registration in a state or territory of the United States, or a foreign country, if

the requirements for registration at the date of his license are essentially [CONSIDERED BY THE BOARD AS] equivalent to tho in this chapter.

* Sec. 8. AS 08.20.170(a) is repealed and re-enacted to read:

(a) The board may, after a hearing, impose a disciplinary sancti on a person licensed under this chapter when the board finds that he

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleadi manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice competently and safely

(5) intentionally or negligently engaged in or permitted th performance of patient care by persons under his supervision which doe

not conform to minimum professional standards regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or a drug which impairs his ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients;

(9) made a controlled substance available to a person except upon prescription issued by a licensed physician;

(10) was convicted of selling federal legend drugs without the prescription of a licensed physician, surgeon, dentist, or veterinarian;

(11) violated state or federal regulations pertaining to the provision of adequate security of dangerous drugs.

* Sec. 10. AS 08.20.170 is amended by adding a new subsection to read:

(d) The board shall adopt regulations which insure that renewal of license is contingent on proof of continued competency by a practitioner.

* Sec. 11. AS 08.20.180 is amended to read:

Sec. 08.20.180. FEES. (a) The board shall impose and collect the following fees:

(1) upon the filing of an application for examination, $[illegible];

(2) upon application for re-examination, $[illegible];

(3) for issuance of temporary permit, $[illegible].

(4) license to practice chiropractic, $200. [INITIAL AND RENEWAL BIENNIAL LICENSE, $50;

(5) ASSOCIATE LICENSE, $30.]

(b) A license issued under (a)(4) of this section shall be renewed under AS 08.20.170(d) four years from the date of its issuance.

* Sec. 12. AS 08.20.135 is repealed on July 1, 1983.

* Sec. 13. This Act takes effect July 1, 1980.

SENATE BILL NO. 580

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to professional licensing and to the regulation of the practice of medicine; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.050 is amended by adding a new subsection to read:

(c) After consulting with the State Medical Board (AS 08.64.010), the department shall employ an individual to be assigned as the investigator for that board. The investigator shall

(1) not be a member of the State Medical Board;

(2) conduct investigations into alleged violations of AS 08.64, and into alleged violations of regulations and orders of the State Medical Board;

(3) at the request of the State Medical Board, conduct investigations based on complaints filed with the department or with the State Medical Board; and

(4) be directly responsible and accountable to the State Medical Board, except that only the department has authority to terminate his employment.

* Sec. 2. AS 08.01.100(a) is amended to read:

(a) Except as otherwise provided in this title, [ALL] licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

* Sec. 3. AS 08.64.010 is amended to read:

Sec. 08.64.010. CREATION AND MEMBERSHIP OF STATE MEDICAL BOARD.

The governor shall appoint a board of medical examiners, to be known as the State Medical Board, consisting of five [LICENSED] physicians licensed in the state and [,] residing in as many separate geographical areas of the state [ALASKA JUDICIAL DISTRICTS] as possible, and two persons with no direct financial interest in the health care industry.

* Sec. 4. AS 08.64.020 is amended to read:

Sec. 08.64.020. [STATE MEDICAL BOARD] TERM OF OFFICE. Members shall be appointed for staggered terms [A TERM] of four years, subject to confirmation by a majority of the members of the legislature in joint session, and shall hold office until their successors are appointed and qualified. The terms of the public members of the board shall be staggered so that they do not expire at the same time. A person who has served two successive complete terms may not be reappointed until four years from the expiration of the second term.

* Sec. 5. AS 08.64.040 is amended to read:

Sec. 08.64.040. REMOVAL OF MEMBERS. The governor may remove a member of the board for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal.

* Sec. 6. AS 08.64 is amended by adding new sections to read:

Sec. 08.64.085. MEETINGS OF THE BOARD. The board shall hold meetings at least four times a year.

Sec. 08.64.115. DUTIES. The board shall

(1) after a hearing, impose disciplinary sanctions on persons who violate this chapter, or the regulations or orders of the board;

(2) adopt regulations insuring that renewal of licenses is contingent upon proof of continued competency on the part of the licensee.

* Sec. 7. AS 08.64.240 is amended to read:

Sec. 08.64.240. LICENSE REFUSED. If the applicant fails the exam-

ination, or is determined by the board to be [MORALLY OR] professionally unfit to practice medicine or osteopathy in this state, or fails to comply with any of the other requirements of this chapter, the board shall refuse to grant the license.

* Sec. 8. AS 08.64.250 is amended to read:

Sec. 08.64.250. LICENSURE BY CREDENTIALS [ENDORSEMENT]. The board may waive the examination requirement and license by credentials [ENDORSEMENT] if the physician or podiatry applicant meets the requirements of AS 08.64.200 or 08.64.209, submits proof of continued competency as required by regulation, pays the required fee and has

(1) an active license from a board of medical examiners established under the laws of a state or territory of the United States or a province of Canada issued after thorough examination; or

(2) passed an examination given by the National Board of Medical Examiners or the Federation of State Medical Boards of the United States if the applicant is a physician, or passed an examination given by the National Board of Podiatry Examiners if the applicant is a podiatrist.

* Sec. 9. AS 08.64.270(a) is amended to read:

(a) The board may issue a temporary permit to an applicant who meets the requirements of AS 08.64.200, [OR] 08.64.205, or 08.64.209 and pays the required fee.

* Sec. 10. AS 08.64.311 is amended to read:

Sec. 08.64.311. [BIENNIAL] LICENSE RENEWAL. Licenses shall be renewed every four years [BIENNIALLY].

* Sec. 11. AS 08.64.315 is amended to read:

Sec. 08.64.315. FEES. The following fees are imposed under this chapter:

(1) application..... $ 50 [$25]

(2) license by examination..... $200 [125]

(3) license by credentials [ENDORSEMENT] or waiver of examination..... $100 [100]

(4) temporary permit..... $50 [25]

(5) locum tenens permit..... $50 [25]

(6) license renewal due every four years [, BIENNIAL], active..... $300 [100]

(7) license renewal due every four years [, BIENNIAL], inactive..... $100 [25]

(8) license by reexamination..... $75 [75]

* Sec. 12. AS 08.64.325 is repealed and re-enacted to read:

Sec. 08.64.325. GROUNDS FOR IMPOSITION OF DISCIPLINARY SANCTIONS. The board may impose a sanction when the board finds after a hearing that a licensee

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice competently and safely;

(5) intentionally or negligently engaged in or permitted the performance of patient care by persons under his supervision which does not conform to minimum professional standards regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or other drugs which impairs his ability to practice safely;

(D) physical or mental disability;

(8) engaged in unprofessional conduct or in lewd or immoral conduct in connection with the delivery of professional service to patients.

* Sec. 13. AS 08.64.330 is repealed and re-enacted to read:

Sec. 08.64.330. DISCIPLINARY SANCTIONS. (a) When it finds that a licensee is guilty of an offense under AS 08.64.325, the board may impose the following sanctions singly or in combination:

(1) permanently revoke a license to practice;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require him to

(A) report regularly to the board upon matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a licensee.

(b) The board may withdraw probation status if it finds that the

deficiencies which required the sanction have been remedied.

(c) The board may summarily suspend a license before final hearing or during the appeals process if the board finds that the licensee poses a clear and immediate danger to the public health and safety if he continues to practice. A person whose license is suspended under this section shall be entitled to a hearing by the board no later than seven days after the effective date of the order. He may appeal the suspension after a hearing to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with reasonable skill and safety.

(e) A license may be suspended until a hearing can be held to determine the licensee's fitness to practice in the state upon receipt of certified evidence that his license to practice medicine in another state, territory or province of the United States or Canada has been suspended or revoked.

(f) The board shall seek consistency in the application of disciplinary sanctions, and significant departure from prior decisions involving similar situations shall be explained in findings of fact or orders.

* Sec. 14. AS 08.64.360 is amended to read:

Sec. 08.64.360. PENALTY FOR PRACTICING WITHOUT A LICENSE OR IN VIOLATION OF CHAPTER. (a) Except for a physician assistant and a physician-trained mobile intensive care paramedic under AS 08.64.170, a person practicing medicine or osteopathy in the state without obtaining and filing an appropriate license is guilty of a class B misdemeanor [AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT LESS THAN $50 NOR MORE THAN $100, OR BY IMPRISONMENT FOR NOT LESS THAN 10 DAYS NOR MORE THAN 90 DAYS, OR BY BOTH]. Evidence that the defendant has failed to

file a license with the clerk of the court is prima facie evidence that the defendant is not licensed. Each day of illegal practice is a separate offense.

(b) A person who practices or attempts to practice or who holds himself out as practicing a system or mode of treating the sick or afflicted in the state or who diagnoses, treats, operates for, or prescribes for an ailment, blemish, deformity, disease, disfigurement, disorder, injury or other mental or physical condition of any person, without having a valid unrevoked and unsuspended license or authorization as provided in this chapter, or without being authorized to perform the acts under a license, authorization or certificate obtained in accordance with another provision of law, is guilty of a class B misdemeanor.

* Sec. 15. AS 08.64.380(3) is amended by adding a new subparagraph to read:

(I) refusing to provide emergency care which, in the professional judgment of the licensee, is essential to prevent loss of life, limb or immediate undue pain and suffering, and is within the licensee's area of competence.

* Sec. 16. AS 08.64.030, 08.64.110, 08.64.160, 08.64.200(1), and 08.64.-380(3)(C) are repealed.

* Sec. 17. This Act takes effect immediately in accordance with AS 01.10.-070(c).

WORK DRAFT

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to professional licensing and to the regulation of the practice of medicine; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.050 is amended by adding a new subsection to read:

(c) After consulting with the State Medical Board (AS 08.64.010), the department shall employ an individual to serve as the investigator for that board. The investigator shall

(1) not be a member of the State Medical Board;

(2) conduct investigations into alleged violations of AS 08.64, and into alleged violations of regulations and orders of the State Medical Board;

(3) conduct investigations based on complaints directed at the department or the State Medical Board; and

(4) be directly responsible and accountable to the State Medical Board.

* Sec. 2. AS 08.01.100(a) is amended to read:

(a) Except as otherwise provided in this title, [ALL] licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

* Sec. 3. AS 08.64.010 is amended to read:

Sec. 08.64.010. CREATION AND MEMBERSHIP OF STATE MEDICAL BOARD. The governor shall appoint a board of medical examiners, to be known as the State Medical Board, consisting of five [LICENSED] physicians

licensed in the state and [,] residing in as many separate [ALASKA] judicial districts as possible, and two persons with no direct financial interest in the health care industry.

* Sec. 4. AS 08.64.020 is amended to read:

Sec. 08.64.020. [STATE MEDICAL BOARD] TERM OF OFFICE. Members shall be appointed for staggered terms [A TERM] of four years, subject to confirmation by a majority of the members of the legislature in joint session, and shall hold office until their successors are appointed and qualified. The terms of the public members of the board shall be staggered so that they do not expire at the same time. A person who has served two successive complete terms may not be reappointed until four years from the expiration of the second term.

* Sec. 5. AS 08.64.040 is amended to read:

Sec. 08.64.040. REMOVAL OF MEMBERS. The governor may remove a member of the board for cause. The board may by regulation provide that unexcused absences from meetings constitute cause for removal.

* Sec. 6. AS 08.64 is amended by adding new sections to read:

Sec. 08.64.085. MEETINGS OF THE BOARD. The board shall hold meetings at least four times a year.

Sec. 08.64.115. DUTIES. The board shall

(1) after a hearing, impose disciplinary sanctions on persons who violate this chapter, or the regulations or orders of the board;

(2) as needed, establish requirements for licensing by regulation in addition to requirements set out in this chapter;

(3) adopt regulations insuring that renewal of licenses is contingent upon proof of continued competency on the part of the licensee.

* Sec. 7. AS 08.64.240 is amended to read:

Sec. 08.64.240. LICENSE REFUSED. If the applicant fails the exam-

ination, or is determined by the board to be [MORALLY OR] professionally unfit to practice medicine or osteopathy in this state, or fails to comply with any of the other requirements of this chapter, the board shall refuse to grant the license.

* Sec. 8. AS 08.64.250 is amended to read:

Sec. 08 64.250. LICENSURE BY CREDENTIALS [ENDORSEMENT]. The board may waive the examination requirement and license by credentials [ENDORSEMENT] if the physician or podiatry applicant meets the requirements of AS 08.64.200 or 08.64.209, submits proof of continued competency as required by regulation, pays the required fee and has

(1) an active license from a board of medical examiners established under the laws of a state or territory of the United States or a province of Canada issued after thorough examination; or

(2) passed an examination given by the National Board of Medical Examiners or the Federation of State Medical Boards of the United States if the applicant is a physician, or passed an examination given by the National Board of Podiatry Examiners if the applicant is a podiatrist.

* Sec. 9. AS 08.64.270(a) is amended to read:

(a) The board may issue a temporary permit to an applicant who meets the requirements of AS 08.64.200, [OR] 08.64.205, or 08.64.209 and pays the required fee.

* Sec. 10. AS 08.64.311 is amended to read:

Sec. 08.64.311. [BIENNIAL] LICENSE RENEWAL. Licenses shall be renewed every four years [BIENNIALLY].

* Sec. 11. AS 08.64.315 is amended to read:

Sec. 08.64.315. FEES. The following fees are imposed under this chapter:

(1) application..... $ 50 [$25]

(2) license by examination..... $200 [125]

(3) license by credentials [ENDORSEMENT] or waiver of examination..... 200 [100]

(4) temporary permit..... $50 [25]

(5) locum tenens permit..... $50 [25]

(6) license renewal due every four years [, BIENNIAL], active..... $300 [100]

(7) license renewal due every four years [, BIENNIAL], inactive..... $100 [25]

(8) license by reexamination..... $75 [75]

* Sec. 12. AS 08.64.325 is repealed and re-enacted to read:

Sec. 08.64.325. GROUNDS FOR IMPOSITION OF DISCIPLINARY SANCTIONS. The board may impose a sanction when the board finds after a hearing that a licensee

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice competently and safely;

(5) intentionally or negligently engaged in or permitted the performance of patient care by persons under his supervision which does not conform to minimum professional standards regardless of whether actual injury to the patient occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or other drugs which impairs his ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the delivery of professional service to patients.

* Sec. 13. AS 08.64.330 is repealed and re-enacted to read:

Sec. 08.64.330. DISCIPLINARY SANCTIONS. (a) When it finds that a licensee is guilty of an offense under AS 08.64.325, the board may impose the following sanctions singly or in combination:

(1) permanently revoke a license to practice;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require him to

(A) report regularly to the board upon matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a licensee.

(b) The board may withdraw probation status if it finds that the deficiencies which required the sanction have been remedied.

(c) The board may summarily suspend a license before final hearing or during the appeals process if the board finds that the licensee poses a clear and immediate danger to the public health and safety if he continues to practice. A person whose license is suspended under this section shall be entitled to a hearing by the board no later than seven days after the effective date of the order. He may appeal the suspension after a hearing to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with reasonable skill and safety.

(e) A license may be suspended until a hearing can be held to determine the licensee's fitness to practice in the state upon receipt of certified evidence that his license to practice medicine in another state, territory or province of the United States or Canada has been suspended or revoked.

(f) The board shall seek consistency in the application of disciplinary sanctions, and significant departure from prior decisions involving similar situations shall be explained in findings of fact or orders.

* Sec. 14. AS 08.64.360 is amended to read:

Sec. 08.64.360. PENALTY FOR PRACTICING WITHOUT A LICENSE OR IN VIOLATION OF CHAPTER. (a) Except for a physician assistant and a physician-trained mobile intensive care paramedic under AS 08.64.170, a person practicing medicine or osteopathy in the state without obtaining and filing an appropriate license is guilty of a class B misdemeanor [AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT LESS THAN $50 NOR MORE THAN $100, OR BY IMPRISONMENT FOR NOT LESS THAN 10 DAYS NOR MORE THAN 90 DAYS, OR BY BOTH]. Evidence that the defendant has failed to file a license with the clerk of the court is prima facie evidence that

the defendant is not licensed. Each day of illegal practice is a separate offense.

(b) A person who practices or attempts to practice or who holds himself out as practicing a system or mode of treating the sick or afflicted in the state or who diagnoses, treats, operates for, or prescribes for an ailment, blemish, deformity, disease, disfigurement, disorder, injury or other mental or physical condition of any person, without having a valid unrevoked and unsuspended license or authorization as provided in this chapter, or without being authorized to perform the acts under a license, authorization or certificate obtained in accordance with another provision of law, is guilty of a class B misdemeanor.

* Sec. 15. AS 08.64.380(3) is amended by adding a new subparagraph to read:

(I) refusing to provide emergency care which, in the professional judgment of a licensee, is essential to prevent loss of life, limb or immediate undue pain and suffering, and is within a licensee's area of competence.

* Sec. 16. AS 08.64.030, 08.64.110, 08.64.160, 08.64.200(1), and 08.64.380(3)(C) are repealed.

* Sec. 17. This Act takes effect immediately in accordance with AS 01.10.070(c).

MEDICAL BOARD - SECTIONAL

Sec. 1 -- Establishes investigative position to be assigned to Medical Board

Sec. 2 -- With the exception of our health boards, DOL is mandated to issue licenses biennally as currently provided for in statute

Sec. 3 -- Adds language, physicians licensed in the state instead of "licensed" physicians; and deletes reference to "Alaska" judicial district so it reads . . . "in as many separate ~~judicial~~ ~~districts~~ geographical areas of THE STATE ~~as possible~~ . . ."

Sec. 4 -- Provides for board members to serve "staggered terms" of four years and limits board membership to two consecutive four year terms

Sec. 5 -- Allows the board to constitute unexcused absences as grounds for removal of a board member

Sec. 6 -- Adds a new section allowing the board to have four meetings annually (they currently have three) -- AND ADDS "CONTINUED COMPETENCY" REQUIREMENT

Sec. 7 -- Deletes reference to "morally"

Sec. 8 -- Provides for "licensure by credentials: and includes podiatry as a specialty whereby an individual can be licensed under this section. Also this section adds the "proof of continued competency requirement" provision to the licensure by credentials requirements

Sec. 9 -- Allows issuance of temporary permit to podiatrist

Sec. 10 - Provides for license renewal to occur every four years

Sec. 11 - Fees section

Sec. 12 - Grounds for disciplinary sanction

Sec. 13 - Enumerates disciplinary sanctions

Sec. 14 - Penalty section. Subsection (b) is added

Sec. 15 - Adds sec (I) to definition of unprofessional or dishonorable conduct

Sec. 16 - Repeal section

Sec. 17 - Effective date

REPEALERS — PSYCH BOARD

Sec. 08.86.070. Duties of the board. (a) The board shall
(1) pass on qualifications of applicants for licenses;
(2) prepare, administer and grade written examinations;
(3) after hearing, suspend or revoke the license of a licensed psychologist or psychological associate who violates a regulation of the board;

Sec. 08.86.185. Practice of counseling and psychometrics. (a) Unless he is licensed under this chapter, no person may practice counseling or psychometrics, offer to practice counseling or psychometry, or represent to the public that he is a counselor or psychometrist.

(b) This sections does not apply to:

(1) a person employed by a governmental unit, educational institution or private agency who may be required to engage in some phase of work of a counseling nature in the course of his employment, if the employer maintains appropriate supervision of psychological activities and professional conduct;

(2) a student, intern or resident in psychology pursuing a course of study approved by the board as qualified training and experience for counseling, if his activities constitute a part of his supervised course of study;

(3) pastoral counselors.

(c) Nothing in this chapter authorizes a person licensed as a psychological associate to engage in the practice of medicine, as defined by the laws of the state. (§ 8 ch 65 SLA 1973)

Sec. 08.86.230. Definitions. In this chapter

(6) "counselor" means a person who practices counseling;

(7) "to practice counseling" means to apply established principles of learning, motivation, perception, thinking, and emotional relationships to problems of group relations, and behavior adjustment,

(A) counseling and guidance;

(B) using counseling techniques with persons or groups of persons who have adjustment problems in the family, school or at work;

(C) limited use of testing including tests of intelligence or tests of motor skills;

(8) "psychometrist" means a person who practices psychometrics;

(9) "to practice psychometrics" means to apply the recognized principles, methods and procedures of the science and profession of psychology, but limited to the administering, scoring, and interpreting of tests of mental abilities, aptitudes, interests, motor skills and objective tests of personality characteristics for purposes such as psychological evaluation or for educational or vocational selection, guidance or placement;

SB583

BOARD OF PSYCHOLOGISTS - SECTIONAL

Sec. 1 -- Provides "exception" to current statute which renews licenses biennally and allows our "health boards" to renew licenses every four years.

Sec. 2 -- Changes board's composition: increases number of psychologists from three to four and reduces number of public members from two to one.

Sec. 3 -- Changes board members' terms from three to four years and limits board membership to two successive four-year terms.

Sec. 4 -- Allows for "removal of board members".

Sec. 5 -- Increases number of board meetings from one to three annually.

Sec. 6 -- Under "duties section" this provision allows the board to adopt by regulation continued competency requirements. In addition, the board is to define areas requiring "specialty training" and adopt standards delineating criteria whereby a psychologist can be certified to practice as a specialist.

Sec. 7 -- Allows board authority to order disciplinary sanctions.

Sec. 8 -- This section stipulates than at individual qualifying to take the exam for licensure must hold a doctorate degree from an accredited school with "an approved program." The American Psychological Association has adopted standards designed to evalute psychological programs and schools meeting these standards and are endorsed as having "an approved program". The board wants to use these standards in determining whether the applicant has received adequate training in attaining his degree.

Sec. 9 -- FEES

Sec. 10 -- "Licensure by credentials" section.

Sec. 11 -- This section modifies the qualifications for the "associate" exam. This provision requires that the applicant have a masters degree from a school with "an approved program" with primary emphasis on psychology and 24 credit semester hours of the applicant's course work relating to the "specialized area" in which licensure is requested.

Sec. 12 -- This section provides that the applicant for associate licensure be required to have three years "supervised" experience AFTER obtaining the masters degree.

Sec. 13 -- Adds a new section allowing the associate to be licensed to practice in the specific field in which he is trained.

Specifies that associate will function under the "supervision" of a psychologist.

Specifies that the supervising psychologist will consult with the associate and insure that work of the associate is consistent with accepted professional practices.

Specifies that the supervising psychologist and associate submit a statement to the board designating the "specialty area" in which the associate intends to work and the conditions governing supervision.

Sec. 14 -- Adds new language to the definition of "practice of psychology" delineating when a person is "representing himself to be a psychologist".

Sec. 15 -- Adds new language to the exemption provision. Exempts an individual from licensure if he is employed by a governmental unit, educational institution, or private agency, whose activities require some involvement of work of a psychological nature but is supervised and does not render psychological services for renumeration above his salary.

Adds language to the "exemption provision" allowing certain professions to be exempt from licensure (e.g. social worker, pastoral counselor) as long as they do not hold themselves out to be a psychologist.

Sec. 16 -- "Grounds for imposition of disciplinary sanctions" and "disciplinary sanction" section.

Sec. 17 -- Penalty provision

Sec. 18, 19, 20, 21, 22 -- DEFINITIONS

Sec. 23 -- Brings board under "Administrative Adjudication" section of the Administrative Procedures Act.

Sec. 24 -- Repealers

Sec. 25 -- Effective date

EXAMPLES OF "SPECIALTY AREAS" PSYCHOLOGICAL ASSOCIATES COULD BE LICENSED IN ---

1) Psychological Examiner (Psychometrist)

B) Educational/Vocational Counselors

C) Drug and Alcohcl Abuse Counselors

D) School Psychologist

E) Mental Health Associate (Mental Health Clinians)

F) Industrial/Organizational consultant

G) Personnel/Guidance Counselors

SECTIONAL - SB 584

VETERINARIAN BOARD

Sec. 1 -- 08.01.100(a) — Provides "exception" to current statute which renews licenses bienally and allows our "health boards" to renew licenses every four years.

Sec. 2 -- 08.98.010 — Changes board's composition - Increases number of members from three to five consisting of four veterinarians and one public member.

Sec. 3 -- 08.98.020 — Provides for members to serve "staggered" terms of four years and limits board membership to two successive four year terms.

Sec. 4 -- 08.98.025 — Allows for "removal of board members".

Sec. 5 -- 08.98.040 — Increases number of annual meetings from one to three and adds language defining a "quorum" as a "majority of board members" and provides for "a majority vote of those present" to represent the decision of the board.

Sec. 6 -- Board's "powers and duties" section is reenacted deleting reference to grounds for revocation/suspension of license (so that it will appear in our "grounds for imposition of disciplinary sanctions" section similar to our other health board bills) and provides for the board to:

- -- adopt regulations to safisfy our "continued competency" requirement
- -- prepare an annual report discussing board's activities
- -- collect data and monitor standards/availability of veterinary services
- -- establish education/training/examination for veterinary technicians

Sec. 7 -- Allows those with "temporary permits" to practice veterinary medicine and provides for veterinary technicians to perform certain functions as prescribed in regulation.

Sec. 8 -- Under "content of examination" the various subject categories are deleted and provides for the following to be incorporated into the exam administered by the board:

1. National Exam;
2. practical skills exam;
3. demonstration of practical skills.

Sec. 9 -- Establishes criteria to be qualified for licensure--specifically adds language requiring the applicant to have no disciplinary santions pending against him and exempting the applicant from taking the National Exam if he passed it within the past five years or has been in active practice within five of the past seven years.

Sec. 10 -- Provides for a "temporary license" to be issued to applicant until results of examination are published.

Sec. 11 -- "Licensure by credential" section. Also provides for issuance of temporary permit.

Sec. 12 -- FEES

Sec. 13 -- "Grounds for imposition of disciplinary sanction" section

Sec. 14 -- Definitions: "accredited veterinary school", "animal", "practice of veterinary medicine", "veterinary technician".

Sec. 15 -- Prings board under "administrative adjudication" section of the Administrative Procedures Act.

Sec. 16 -- Repealers

Sec. 17 -- Effective date

REPEALERS - VET BOARD

Sec. 08.98.030. Executive secretary of board. The commissioner of commerce and economic development is the executive secretary of the board. (§ 1 ch 91 SLA 1963; am § 59 ch 218 SLA 1976)

Sec. 08.98.060. Board regulations. (a) The board shall adopt procedural regulations describing how a person applies for and takes an examination under this chapter.

(b) The board shall adopt substantive regulations

(1) defining conduct which, if engaged in by a veterinarian, is evidence of incompetence;

(2) specifying approved schools under § 170(1) of this chapter;

(3) specifying the subject matter to be covered in an examination for veterinarians. (§ 1 ch 91 SLA 1963)

Sec. 08.98.130. Examination. A person who passes the examination given by the board is entitled to be licensed as a veterinarian. (§ 1 ch 91 SLA 1963)

Sec. 08.98.170. Qualification for examination. A person is entitled to take the examination who

(1) was graduated from a school of veterinary medicine approved by the board;

(2) Repealed by § 25 ch 245 SLA 1970.

(3) has completed application forms and returned them to the board;

(4) has paid the fee specified in § 190 of this chapter;

(5) has not had a veterinarian license revoked for cause in another jurisdiction;

(6) is of good moral character. (§ 1 ch 91 SLA 1963; am §§ 5, 6 ch 94 SLA 1966; am § 25 ch 245 SLA 1970)

Sec. 08.98.230. Injunction. When it appears that a person has engaged in or is about to engage in an act constituting a violation of § 120 of this chapter, the board, through its executive secretary, shall bring an action in the superior court to enjoin the act and to enforce compliance with § 120 of this chapter. (§ 1 ch 91 SLA 1963)

Sec. 08.98.210. Out-of-state veterinarian. A veterinarian in good standing in a veterinary association of another state or territory or the District of Columbia which licenses veterinarians to practice veterinary medicine may be licensed without examination and otherwise upon substantially the same terms and conditions as are fixed in the jurisdiction from which he has come for the licensure of a veterinarian from this state. As a prerequisite to licensure the board shall require a veterinarian to take and pass an examination, unless the applicant has

(1) passed a state veterinarian examination;

(2) engaged in the active practice of veterinary medicine for at least five out of the previous seven years before filing the application excluding time spent in the military service of the United States;

(3) graduated from an accredited school of veterinary medicine

(4) met the character requirements established by the board in the manner [illegible] (§ 1 ch 91 SLA 1963; am § 4 ch 94 SLA 1966; am § 2 ch 34 SLA 1967)

Sec. 08.98.250. Definitions. In this chapter

(1) a person who practices veterinary medicine, surgery, or dentistry is one who does any of the following:

(A) appends to his name a title or abbreviation indicating to the public that he is a veterinarian;

(B) for compensation, diagnoses or treats diseases, injuries, or deformities of domesticated animals;

(C) holds himself out to the public as one who diagnoses or treats diseases, injuries, or deformities of domesticated animals;

(D) maintains premises for receiving, examining, and treating a domesticated animal for compensation;

International Year of the Child

SENATE CONCURRENT RESOLUTION NO. 10, by Senator Rodey. RESOLVED clause states: "...Alaska State Legislature acknowledges the important role of children in our society and joins with other states and nations throughout the world in recognizing 1979 as 'International Year of the Child;' and...encourages the citizens of Alaska to create and participate in local observances... which will enhance our understanding and appreciation of our children, which will stimulate improvements in our parenting skills and public services, and which will help us create a better world for our children to grow up in."

Introduced February 13 and referred to HESS.

United Nations Up-Date

it of underprivileged chil-
universal problem. Child
s and illiteracy are just a few
cerns that affect every com-
mun...,

This year, the United Nations is observing the International Year of the Child. It is a time to create an awareness of the needs of children and to serve as a catalyst to implement legislation to solve these problems. The International Year of the Child also marks the 20th anniversary of the UN Declaration of the Rights of the Child. This declaration points out that the child shall enjoy special protection, and shall be given opportunities, by law, to develop physically, mentally, spiritually, and socially in a healthy and normal manner and in conditions of freedom and dignity.

International Year of the Child National Commissions

There will not be a World Conference to set up a plan of action. In lieu of such a world conference, there will be National Commissions established in many countries around the world to recommend needed reforms. Mrs. Jean Young, wife of Ambassador Andrew Young, is the Chairman of the United States National Commission. Addressing a meeting on the issues that affect children world-wide, Chairman Young

International Year of the Child 1979

said, "We want to be able to celebrate childhood, we want to engage in new and rewarding experiences with our children, we simply want to express our love and care for them. We want to highlight their achievements and glory in their accomplishments."

The United Nations has designated UNICEF to coordinate the activities for the International Year of the Child (IYC). Dr. Aldaba-Lim, Assistant Secretary-General, is the Special Representative for IYC.

UN Decade for Women

We are now entering the fourth year of the United Nations Decade for Women: Equality, Development and Peace. A UN Preparatory Committee is planning for the World Conference in 1980. The conference, scheduled for a two-week period, will evaluate the results of the objectives of the first half of the decade and will then set up a program of action for the second half. Denmark will be the host government for this particular conference which will be held in Copenhagen in 1980.

The secondary theme of the conference is "Employment, Health and Education." Emphasis will be on elaborating action oriented plans for integrating women in the developmental process, particularly by promoting economic activities and employment opportunities on an equal footing with men, through the provision of adequate health and educational facilities.

The Preparatory Committee recommendations were submitted in a report to the UN General Assembly for approval. The Committee has recommended the appointment of a Secretary-General for the Conference from ourside the UN system and from a developing country. The Conference Secretary-General will be assisted by the Centre for Social Development and Humanitarian Affairs, headed by Mrs. Helvi Sipila, Assistant Secretary-General. The Centre is moving to Vienna this year, so it has been recommended that the Conference Secretariat remain in New York for full access to the UN organizations.

Work is progressing on a Draft Convention on the Elimination of Discrimination Against Women to be completed at the 34th General Assembly.

In BPW, we have a ten-year commitment to advance the goals of the World Plan of Action that are in accord with BPW objectives. We were in Mexico City for IWY, in Houston for the National Women's Conference, and now we can look ahead to the World Conference in Denmark in 1980 to accelerate these goals.

UN Day

October 24th, UN Day, commemorates, each year, the day the United Nations Charter came into being in 1945. At that time there were 51 member nations. There are now 151 member nations with the admittance of the Solomon Islands and Dominica at the beginning of the 33rd UN General Assembly Session.

During that session, the General Assembly observed the 30th anniversary of the Universal Declaration of Human Rights on December 10th—Human Rights Day. Mrs. Eleanor Roosevelt, one of the principal authors of the Declaration, was a distinguished member of BPW.

A Conference on Science and Technology for Development will be held in Vienna next August. The objective is to strengthen the technological capacity of developing countries to enable them to apply science and technology to their own development.

A future date to remember: in 1981, the United Nations will observe the International Year for Disabled Persons. The theme will be "Full Participation."

International Week Kit Available

International Week, celebrated the third full week in February, is a time for BPW members throughout the world to identify the achievements they share and examine the problems they have in common.

During International Week members should become more fully aware of our affiliation with the International Federation and should renew their commitment to advancing The World Plan of Action during this Decade for Women.

The International Week Kit contains information that will make your club's observance of International Week an exciting BPW event. This kit is available at no cost from the Program Department.

The Candlelighting Ceremony which traces the history of the International Federation is available from the Sales/Order Department for $.35.

IN THE SENATE BY RODEY

SENATE CONCURRENT RESOLUTION NO. 10

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

Recognizing International Year of the Child and encouraging Alaskans to participate in local observances.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS children with all their joy, curiosity, creativity, insight, and trust are a perpetual source of delight and inspiration; and

WHEREAS children are our most valuable resource and our hope for the future; it is up to them to carry our work and dreams forward and to determine whether our diverse Alaskan cultures and lifestyles flourish or die; and

WHEREAS the third of our population in Alaska who are children are substantially dependent on adults for their care and well being, and how well we as adults fulfill our responsibilities to our children is one measure of the greatness of this or any society; and

WHEREAS the United States as a whole is one of the richest and most technologically advanced nations of the world, yet the high rates of infant mortality, the prevalence of child abuse and neglect, and the insufficiency of medical care and pre-school and after school care, indicate that the quality of care for our children is sometimes wanting; and

WHEREAS even in Alaska, despite the levels of assistance and service provided by both the public and private sector, children at times still face serious obstacles to their healthy physical, emotional, and intellectual development, such as poor nutrition, untreated disease, inadequate shelter, and education not suited to their culture or special needs; and

WHEREAS as soaring rates of teenage alcoholism and drug abuse, vandalism and crime, the falling educational achievement scores, and the prevalence of

teenage pregnancy appear to indicate our failure to provide a world for our children where social responsibility, achievement, and self-respect are valued and attainable goals for them; and

WHEREAS times are rapidly changing, and the lives of our children are substantially different than our own childhoods; we must therefore learn more about our children and their lives before we can provide them with meaningful guidance; and

WHEREAS each child is unique, with his or her own personality, abilities, and special needs, and it is up to us to see that each child receives the love, personal attention and education suited to both that child's special abilities and disabilities, to enable that child to become a useful and productive member of society;

BE IT RESOLVED that the Alaska State Legislature acknowledges the important role of children in our society and joins with other states and nations throughout the world in recognizing 1979 as "International Year of the Child;" and be it

FURTHER RESOLVED that the Alaska State Legislature encourages the citizens of Alaska to create and participate in local observances of International Year of the Child which will enhance our understanding and appreciation of our children, which will stimulate improvements in our parenting skills and public services, and which will help us create a better world for our children to grow up in.

OFFICE OF THE GOVERNOR
POUCH AV
JUNEAU, ALASKA 99811

OFFICE (907) 465-3510
RES. (907) 789-2035

Caretaker states by 1982. This would give state time to react to closure.

March 17, 1980

Testimony of J. Christopher Noah

on SCR 45

"Relating to Research and Support Activities by the Naval Arctic Research Laboratory at Barrow"

Senate Concurrent Resolution 45 does a good job briefly outlining the situation with regard to the Naval Arctic Research Laboratory (NARL). SCR 45 parallels the thinking of most people involved in arctic research in that it acknowledges the need for such a unique research facility. However, most also agreed that NARL has had difficulties of such magnitude that it cannot continue to function without addressing these problems.

Although there has been concern over the closing of the NARL and there are many examples as to what NARL has accomplished in the past and how present programs would be affected, with its closure insufficient study has gone into how NARL relates to the ever changing research needs of the state and nation.

Experts have recommended that money and personnel are needed to keep NARL afloat but have not devised a plan which would clearly explain what the scientific research function of the installation should be. Neither has a study been proposed as to what the economic effects of closure on Barrow and Fairbanks would be.

The federal government and the University of Alaska have a good start on this question, especially in the document entitled "THE NAVAL ARCTIC RESEARCH LABORATORY IN CHANGING TIMES - Report and Recommendations", January 1980. However, more needs to be done, not on what activities should be undertaken at NARL - but the basic purposes and functions of a far north research laboratory.

The impetus behind SCR 45 is that:

1) with NARL on the verge of being dismantled, to look into the effects this would have on research and arctic policy in Alaska and the economic ramifications associated with closure; and

2) if indeed, NARL should be kept open, what changes need to be instituted to ensure that it continues as a viable research facility; well attuned to the needs of the state and nation.

Building on the good work of the past, additional questions need to be addressed concerning:

1) Who will manage the facility?
2) What is its value to Alaska?
3) What is the role of the facility in state research?
4) How does the facility fit into the overall national arctic policy? and finally
5) If there is no well defined arctic policy, then how can one be developed?

SCR 45 would not only give Alaska a chance to determine the function and "being" of NARL, but to begin to determine what Alaskans think should be the United States' research priorities in the arctic; policies which have been heretofore nonexistent.

It is also a chance to show that the United States through Alaska can be a leader in research in the circumpolar region.

March 17, 1980

Social Service Programs (exclusion of Title XX funding)

SENATE CONCURRENT RESOLUTION NO. 46, by Senators Rodey, Meland and Hackney. Requests that the Governor prepare and submit a budget for social services of the Department of Health and Social Services for FY 82 that excludes federal support under Title XX of the Social Security Act due to complexity of planning, needs assessment, monitoring, and specific service reporting requirements on social services programs administered by the state, and the regulations of Title XX have the effect of limiting those who may be served by state programs because of income, eligibility, and service restrictions based on national needs and income standards.

Introduced February 18 and referred to HESS, then to Finance.

Sen Rodeys office
Def'd.
attd.

Title XX of the Social Security Act
Implications in Alaska

Title XX, as originally intended and as misleadingly titled, "Grants to States for Social Services," was designed to be a revenue sharing grant to states for services to low-income individuals. The Act, 93-647, after a thorough going over by various lobbying interests contrary to original intention did not result in a grant with options for services chosen by each individual state as to its local need. On the contrary, it is highly regulated federal matching monies best suited for the delivery of services to urban poor.

Administratively, Title XX requires states to fulfill a series of idealistic planning and needs assessment activities. It requires two plan documents. One, the Administrative Plan, must be updated depending on changes in Federal and State law. The other, the Annual Comprehensive Social Services Plan, must be published twice annually, one in Proposed form and one in Final. Both documents must include a long list of requirements pertaining to the design of the State agency responsible for Title XX services, such as cost allocation and budgeting, federal funding parameters, eligibility requirements, location of services, specifics as to the type of services which can be federally funded, public comment and planning requirements, reporting of technical information, monitoring and auditing requirements and annual needs assessment. It specifies the income level of those eligible for services and requires the state to offer certain social services to certain individuals.

Title XX for Alaska

Although Alaska receives the smallest federal grant under Title XX, $4,620 million for 1981, it has the highest delivery costs and the largest land mass to cover. Although it does not have county governments with which to share administrative and delivery costs as other states do, it must meet the same federal requirements - there are no exceptions. The following is a very brief list of the requirements of Title XX and the resulting program effects and estimated costs in Alaska. They are listed in general order of appearance in 45 CFR 228 - Title XX of the Social Security Act.

1. (228.5-6) Designation by the Governor of a single state agency responsible for Title XX operation including:

    a. development and maintainence of the State Administrative Plan
    b. the Annual Proposed and Final Social Services Plan
    c. projection of estimated expenditures
    d. accountability of Federal funds
    e. establishing and maintaining standards for determining eligibility for the services
    f. administration and supervision of the provision of services
    g. operating the program on a statewide basis - to all geographic areas
    h. complying with Federal program reporting requirements.

Effects to Alaska: The cost impact of this regulation on Alaska by comparison to other states is enormous since Alaska does not have county governments nor a consistent local tax formula. Alaska must assure statewide delivery of services by administering the entire program centrally. Although a state may purchase services from local providers, it must continue to provide the administrative and social services worker assessment oversight and must assure that federal dollars are buying statewide services. Without the requirements of Title XX, the state could contract for services from local private providers in entirely without costly state oversight. For Example, Homemaker Services could be contracted in entirety without "Adult Protective Services" social worker supervision and assessment. This results in double the administrative costs; administrative costs for the state and administrative costs for each local service providers both necessarily having data/reporting systems, accounting systems, payment systems, supervisors, managers, etc. As we progress further through the regulations in Title XX, one can see why administrative costs are high especially for Alaska.

2. (228.7) State financial participation. "A State Plan under Title XX shall provide that state funds will be included in meeting the cost of the program" - while the federal funds available for Title XX programs totaled $4,728,000 in FY 1980, the state share totaled nearly $12,000,000. Certainly the state is participating; the federal 4.7 million could not produce a viable program. Paramount to this regulation is the question - how much of the federal dollar is spent meeting requirements to receive the federal funds? Estimates depend on the variables included. This writer believes that while the majority of the 4.7 million in Alaska is used to meet federally imposed administrative and service requirements not suited to Alaska's social service needs and clientele and could be used to buy more efficient and appropriate services, much of the 4.7 million can be viewed as offsetting costs which the state would incur with or without federal regulations. The question then really boils down to whether Alaskans would prefer a service program designed for and in behalf of the Alaskan people or spending the service dollar to both meet federal requirements and provide a marginally suitable service program. The state already provides the lion's share of the funds. On the other hand, the federal government provides less than one third of the funding and nearly 100% of the service requirements.

3. (228.8) Statewide operation - the argument continues from item #2 in that the federal government requires statewide operation (something all Alaskans want but usually ask for different services in different locations depending on the residents priority needs), but only foots less than one third of the bill.

4. (228.12 & 13) Federal regulations in this section set forth standards for residential facilities and day care centers and homes. Alaska has already been forced to discontinue federal funding for day care, foster care and institutions, since Alaskan facilities typify Alaskan conditions and don't fall within lower 48 urban architectural conditions and staffing standards. However, we must still meet these requirements for eligiblity for general Title XX funding. This is an example of inappropriate requirements for Alaska causing additional administrative costs.

5. (228.17) Reports and maintainence of reports. This requirement, a paperwork requirement, requires the state to supervise and maintain records and provide regular federal reports on the services, service costs, determination of individual eligibility, etc. Most of these records and reports are of absolutely no interest or worth to state program and financial operations. This requires the state to maintain an expensive computerized management and individual client record system which is designated primarily to meet federal regulation. Information requests from our own Alaska legislature, state auditors and administrators, also necessitates operation of such a system; however, it is often frustrating to not be able to provide appropriate and accurate information for one's own use since the system must provide the necessary federal reports required for federal funding and is primarily designed to do so. Eliminating federal reports and requirements from the system design would free up the system for appropriate and meaningful state use.

   Probably the most frustrating effect of the federal requirements for reports and records comes from the social worker's point of view. An estimated 15% of all direct service staff time is spent complying with various federal reporting and paperwork requirements. Inherent in the field of professional social work practice is the necessity to maintain case summaries and reports, court testimony and reports, etc. These items are necessary. However, federal requirements are often unnecessary and impractical bureaucratic paperwork, creating tasks of little meaning to their casework, their supervision, or their clients. This is 15% of social worker's time wasted translating in dollar amounts to $700,000 in FY 1980 Social Serivces BRU which could be better spent in providing services to individuals or providing information or reports on Alaska's own service needs and problems.

6. (Subpart C beginning with 228.20) "Comprehensive Annual Social Services Program Plan" - this section requires the publication of the Proposed and Final Annual Social Services Plan and specifies what must be in the plan, including specifications concerning:

   a. a time-line for the planning process (does not synchonize with the State's own budget planning process)

b. methods of receiving public comments - this is designed for an urban ear in mind and is not workable in Alaska's rural vastness. We have to comply regardless, thus preventing the expenditure of funds for more appropriate public input in the services program.

c. Federal goals and objectives each service must be directed towards accomplishing.

7. (Subpart C, D, E, and F beginning with 228.24) The individuals which federal regulations allow to be served. This includes requirements of maximum income for eligiblity, services to people on public assistance programs, requirements for fee schedules for services to individuals with incomes over 80% of the national median income, etc.

The services eligibility and financial limitation sections of Title XX regulation are the primary restrictions in Title XX with reference to Alaska's social service program. Title XX which started out being revenue sharing grants to states for any social service program desired and neeeded by a state, became a program restricted for delivery to the "urban-type" poor. As an example, the "Fifty Percent Rule" (228.56) requires that one-half of the federal funds must be used for services to individuals receiving AFDC, SSI or Medicaid. In an urban low income area of the lower 48 states, there are high concentrations of people receiving federal assistance. Social service programs may be directed to these populations with relative ease. In Alaska, public assistance recipients are scattered widely in bush locations. Furthermore, the average income in Alaska is nearly double the national standard, making individuals with low incomes in regard to Alaskan standards ineligible for federal assistance programs. Finally, Alaskans generally believe that individuals and families having problems should receive services no matter what their income; this is the reasoning behind our current program design - services are provided without regard to income only. Federal regulation provides that services to victims of abuse, neglect, or exploitation can be without regard to income eligiblity. However, the 50% Rule for public assistance recipients still applies, meaning that although victims of abuse, neglect, or exploitation are eligible for services without regard to their income, one-half of the service expenditures must be in behalf of federal financial or medical assistance recipients.

As an example of the constraints caused by federal services and eligiblity requirements on Alaska's services program, homemaker services is probably the most critical. Homemaker support as it is now incorporated into the services offered to Alaskans (mostly to the elderly and handicapped) provides over 1.0 million in Alaska's federal match. Since Alaska chooses to offer this service without

regard to income and with regard to an individual's circumstances and needs, it must be a "protective service." After service is initiated, data clerks in Central Office must search public assistance records to verify federal financial assistance eligibility for meeting the "50% Rule." Sixty-seven percent (67%) of all homemaker recipients are receiving federal public assistance, meeting a large percentage of Alaska's requirements under the "50% Rule." Many advocates for de-institutionalization, the aging and handicapped would like to disassociate homemaker service from both Adult Protective Services as well as restrictive federal income eligibility requirements. Social service administrators, direct service personnel and professional homemaker service providers agree with this effort. However, such a move would jeopardize the state's claim for federal funds in the amount of over 1.0 million.

The State's child protective services program is another example: Alaskans generally believe that a child in danger of abuse or neglect deserves services whether their family is financially stable or not. This is in keeping with national efforts and beliefs as well. However, the 50% Rule applies. As in homemaker service, data clerks in Central Office must verify a child's eligiblity for federal categorical assistance programs. In the case of Child Protective Services, only 30 percent of all children receiving services qualify for meeting the 50% Rule. The largest portion of these children are eligible due to their being placed out of their home by the state in foster care. Foster care placement makes them eligible for medicaid. If children are served while in their own home, they are not eligible. In other words, services to children in their own homes jeopardizes federal funds. This is contrary to all goals for children services in Alaska.

3. Title XX Training (45 CFR 228.80 Subpart H) Under Title XX there is a separate federal funding allotment for states to be used for training of staff providing Title XX social services. In Alaska, these funds are used to train social workers in delivery of adult and child protective services. Since it must be used only for Title XX services, state funded social services are restricted from utilizing this resource. Foster parents, local private contractors, municipalities, other state agencies - all providing valued Alaskan social services may not use the states only social services training program since it is partially funded with federal Title XX money.

To Summarize:

1. Federal regulation under Title XX has the effect of restricting the service clientele in Alaska from those who need services due to income, eligibility and service limitations based on national needs and income standards.

2. Federal regulations indirectly result in social service administrators not being able to design an appropriate program for Alaskan's with reference to local Alaska's social service needs.

3. The social services dollar in Alaska could be utilized for more effective direct services if federal regulations causing unnecessary administrative overhead were eliminated.

4. Federal Title XX training funds may not be utilized to train staff who are providing services funded through other resources such as Indian Child Welfare monies, state-only funded services, such as the State's aging and youth programs, etc.

F. Bruce Steadman
Title XX Planner

FISCAL IMPACT

DSS programs for FY 81 will exceed $20,000,000. The Title XX ceiling is $4,649,000 (plus $280,000 for training), less than one quarter of the total expenditures, yet because of federal regulatory requirements, the federal government, in effect, "drives" the Division's overall program. Sensible, forthright innovations, as seen by Alaskans, are difficult to put in place. It's a bargain for the Federal government: for 4.6 million they get to control, in a significant way, 20 million and social services delivery in Alaska.

Title XX, in itself, is not an innately bad law. Not in intent. The intent was to assist low income families in avoiding dependency, or becoming victims of abuse and neglect, or becoming institutionalized. The problem is, those things can happen to any of us, no matter what our economic status may be. Yet, to be eligible for Title XX monies, state programs making Title XX claims must spend at least one half of the claim on services provided to low income families. Or face withdrawal of funds.

But whereas the Title XX law is not innately bad (helping the poor, after all, it not an ignoable objective) the regulations that followed the law, are. All regulations are restrictive. Some are positively so. Some are mindlessly so. And some, like Title XX regulations, are destructively restrictive. Two short examples:

1. If a child is taken into custody, because of abuse or neglect, and placed in an institution, he is considered to be without income and, therefore, on the "good" (poor) side of the 50% rule. This applies regardless of the family income. But if a treatment plan is developed, whereby the the child remains in his home, and the family's income is above the national poverty line, he falls on the "bad" side of the rule. Too many children treated at home jeopardizes Title XX funding. Better to institutionalize them.

2. The Division wants to train staff and providers of Title XX services. The regulations state that any training session must last at least five days. Four days - Title XX funds withdraws. This might fall more into the mindless (and wasteful) category, except that it does jeopardize valuable training possibilities. For example, DSS plans training for specialized foster parents. The initial session lasts five days, but it would be more appropriate to have follow-up two day sessions after foster parents begin providing care for children. Five days are unnecessary; to extend these sessions would be padding, both in training content and in money spent. Furthermore, many foster parents could not take that much time away from their homes - and the children they are trying to help! It may, therefore, be necessary to cancel the follow-up sessions.

All of the above may not have much relevance to "fiscal impact." To lose Title XX means a loss of 4.9 million dollars in Federal funding. To free the state from strings which attach to these dollars probabaly cannot result in concomittment offsetting reductions in the state budget. That is, it is estimated that 15% of staff time is taken up with Title XX compliance; in dollars this runs to about $7,000,000; therefore, a 15% reduction in staff could take place and offset $7,000,000 of the $4,900,000 federal loss. This would be difficult to implement. Smaller offices would be reduced (e.g., 15% of one or two social workers?). Reduction would be have to be made only in the larger offices, such as Anchorage, Fairbanks, Juneau and Ketchikan. To make such reductions could save about $400,000.

The real fiscal impact would not be seen in this coming budget year. But the implications for the future would be significant. Alaska would not run its social services program in isolation from the other states and the Federal government. It would accept all the valuable information and consultation it could obtain. BUT ALASKA WOULD MAKE ITS OWN DECISIONS. And we, as Alaskans, ultimately being the only legitimate experts on Alaska, could not help but make more responsible fiscal plans, decisions, and implementations. Not to mention a drastically improved quality of social services delivery.

With the demise of Title XX and with the retention of staff as provided for in the FY 81 legislative budget, DSS could make this promise: no further requests in future years for Division staff unless warranted by an increase in state population. This is, in fact, a very large promise, for social service needs in Alaska are awesome. But with the freedom to act independently (independently of HEW, responsible to Alaska) DSS is confident it could provide a first rate program for our state, one that could match any other state. Well that's almost a cop out. Matching any other state's record in the delivery of social services wouldn't be all that difficult. We would have the best.

TITLE XX TRAINING
Implications for Alaska

Under Title XX of the Social Security Act, states are granted funds for personnel training. Training includes in-service training, and short and long term training for personnel directly related to providing services under the State's approved Annual Title XX Plan. Regulations and restrictions to allowable costs for federal financial participation in training are found in 45 CFR 228, subpart H.

Federal funds are available, then, to Alaska for training staff individuals who are directly, or through contract, providing services which are claimed for federal financial participation in the State's Annual Title XX Plan. In Alaska this means that we may only claim for training Division of Social Services' personnel, foster parents directly serving child protective service clients and homemaker support service providers. As with all federal funding, there are many restrictions and program consequences associated with receipts.

Many of these restrictions are generated from regulations and requirements of the general Title XX services program. Other problems result from the fluctuation of federal funding available after state budgets are prepared. For the most part, however, Alaska's unique geography, service needs and political subdivisions were not taken into account when Washington bureaucrats and big-city lobbying interests developed the training regulations. The following is a list of funding limitations and program restrictions and their consequent implications for Alaska's social services training program.

Training Funds Amount

Until October of 1979, federal training funds were not limited as they are in the general Title XX services allottments to states. Training programs were, therefore, only limited in Alaska by the amount of the 25 percent match appropriated by the legislature (federal training funding is based on a 75/25 federal matching formula).

On October 1, 1979, following the beginning of Alaska's 1980 fiscal year on July 1st, the Division was notified that the federal money available to Alaska for Title XX training was being reduced from $270,300 to $154,000. This is currently a tentative reduction pending action by Congress which will reportedly change the appropriation again. Obviously, it is virtually impossible for the Division to plan and manage a training program for Alaskans when funding is not stable nor the amount of funding is not known before administrative and legislative budget planning.

Providing that Congress acts on pending training legislation, Alaska will be allotted training funds based on population. Once again, Alaska's relatively small population will prevent adequate delivery of a service to a state service network where cost is higher due to expensive travel and per diem costs. To be more specific: the proposed funding formula will allow each state 3 or 4% of its general Title XX allottment (4.620 million for Alaska FY 81) for training. This allottment is based on Alaska's percent of the total United States population. In an urban state where training centers and programs are available with little or no travel costs, and where population is densely distributed, this allocation formula is not unreasonable. As an example - at the 4% formula for training, Alaska will receive $184,000 compared to the state of Washington's $1,730,676. Washington has virtually no travel costs in providing training. The majority of training expenses in Alaska is travel to and from training locations.

Who May be Trained (228.81)

Due to the inadequate federal funding received to operate Alaska's Title XX services program, Alaska limits its Title XX plan to claiming federal funds on three services - Information and Referral, Child Protection, and Adult Protection. Other states' federal Title XX funds are claimed for vocational rehabilitation services, alcohol and drug abuse services, aging services, correctional services, mental health services, local preventative services, and so on.

Federal regulation only allows states to train individuals (state, local, private providers, and volunteers who are directly involved with Title XX program services. Consequently, in Alaska, our training program is limited to DSS staff whose salaries are claimed for federal Title XX financial participation, foster parents who provide a resource to Child Protective Service children and Homemaker Service providers who provide an Adult Protective service. This compares to other states who may provide training to nearly everyone in their state who provide some sort of human service.

One of the stated objectives of the Department of Health and Social Services and the Division of Social Services is to shift the emphasis on provision of services from state agency services to local private provider services. Native corporations and municipalities would, therefore, be funded by contract to provide early intervention and prevention services. However, much to the disappointment of both the local providers and state administrators, Title XX regulation prevents the state from assisting in the training of these non-Title XX providers. Effective delivery of services and effective use of state funds often relies on the abilities and preparedness of the staff. Specialized training has a significant impact on the ability of human services staff to provide meaningful and practical services to Alaskans. Since Title XX funds the only human services training center in the State, and most private provider agencies are small with meager administrative resources,

it seems appropriate that they could receive training from the State's training center, sharing the resource with other state and locally funded agencies. Unless the state funds, other than the required 25 percent match, are provided for training, or the state expand its limited Title XX program, other providers of Alaskan human services may not utilize this training resource.

Training Activities Federally Matchable

Federal regulations are very specific as to the type, conditions and length of training which will be paid by federal funds. The following is a list of Title XX training activities which are seventy-five percent (75%) federally funded.

1. State agency employees and Title XX service contractual providers in full-time training of eight consecutive weeks or longer...feds will match salaries, fringe benefits, travel and education costs for state employees and travel and education costs for providers.

2. For state employees and private providers in full-time training for five full consecutive days or longer - travel, per diem, and education costs.

3. For state employees and private providers in part-time training less than five consecutive days - only education costs.

Comment: Item 2 and 3 above have been particularly troublesome for Alaska. In plain language, we may not pay for travel to and from training unless the training itself lasts five full days or more. Many times, the particular training need does not require five days. However, in order to get federal matching we must ask foster parents, homemakers, and social workers to be gone from their jobs or home for an entire week resulting in loss of time and costly administrative arrangements. In other states where travel is usually by personal care and is an insignificant cost factor, the five day training requirement is not a problem. In Alaska, where travel from one small town to the next is by expensive air travel, the costs are significant and as a result of the five day minimum administrative and service delivery time loss is also significant.

Alaska has fought this regulation on the basis that a training activity should include the time spent traveling to and from training, since in Alaska training participants must often travel a great distance (i.e., Barrow to Anchorage) to receive training. Therefore, a day of travel before and after three days of training would equal five days. This concept has been rejected, causing providers and state personnel to frequently be gone seven days instead of five and requiring additional time away from the job and additional per diem expenses. Once again, it seems that federal regulation has been written for urban areas without flexibility for Alaskans operating in different geographic and unique population distribution circumstances.

4. Purchasing Training Activities From Private Sector Experts

Federal funds are only available to pay private individuals and agencies (not state agency training employees) specializing in human service training for salary, fringe benefits, travel and per diem. Federal funds will not pay overhead costs such as clerical, equipment and rent. This prevents the state from purchasing training services from private providers since they are not able to pay their overhead costs. The state is able to contract with individual trainers and experts from local agencies as long as only their salaries are claimed for federal matching.

JUNEAU, ALASKA

TO: Senator Hackney

FROM: Senator Ferguson

SUBJ: SCR 48, Continuation of the Satellite Television Project

DATE: March 14, 1980

I would first of all like to thank you for scheduling hearings on SCR 48, and to apologize for not being able to be present. Prior committments in Kotzebue have necessitated delaying my return to Juneau until Tuesday evening.

SCR 48 was introduced at the request of the Alaska Public Broadcasting commsision in an effort to further their endeavours to reach an agreement with the Department of the Air Force to provide satellite television coverage to their Alaska Division. Additionally if this agreement is reached the Air Force would share with the State of Alaska Transponder #9. This would enable us to have two transponders for use in providing live television coverage to the urban and rural areas of the state.

Mr. Porcaro of the Broadcasting Commission asked our assistance in showing support for his efforts in securing this agreement and in response we introduced this resolution.

It is my understanding that negotiations are continuing on this agreement and that passage of the resolution would be helpful in showing support on behlaf of the state legislature.

Thank you for your consideration in this matter. I will be glad to answer any questions upon my return to Juneau.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)
It does not appear that implementation of the intent of Senate Concurrent Resolution Number 48 would have any appreciable financial impact on the existing costs.

The State and the Air Force are currently leasing satellite transponders to provide television services to their respective audiences. Some duplication of effort exists when the Air Force system carries programs which are also carried by the State system. These are generally commercial network programs carried by urban broadcast stations. If an agreement can be negotiated with the Air Force whereby certain programs of theirs can be made available to Alaska broadcasters, more time would be available on the State system for intra-State television delivery.

Because the State has leased full-time satellite television service and because of the tape delay center, from which most intra-State programs originate and which is manned during normal TV viewing hours, increasing the amount of intra-State programming would have little or no effect on the cost of this service.

Alaska Baptist Association

Resolution # 15-6
Adopted at 15th Annual Conference
held on March 1 & 2, 1979

Whereas we see continuing attempts by the Internal Revenue Service to control our churches and Christian schools through regulations and procedures that would deprive us of our first Amendment rights, and whereas Senator Bradley has introduced Senate Joint Resolution # 14 which eloquently and forthrightly expresses our cause,

Be it resolved that we, the Alaska Baptist Association, convened in our Annual Conference in Sterling Alaska, March 1 & 2, 1979, do immediately inform our elected officials in Juneau that we desire them to pass this resolution without delay, and be it further resolved that copies of this resolution be sent to President Carter and other officials as are vitally involved in the investigation of this matter, and to National Association of Christian Schools, and the Alaska Association of Christian Schools.

Alaska Baptist Association

Resolution # 15-5
Adopted at 15th Annual Conference
held on March 1 & 2, 1979

Whereas, many of our members are bearing a double financial burden in the education of their children by supporting public education thru taxation while sending their children to Christian Schools, because it is their religious conviction that they should do so,

Be it resolved that we, the Alaska Association of Baptist Churches as convened for our annual meeting in Sterling on March 1& 2, 1979, recommend the passage of SB-48 currently under consideration by our State Legislators, if underlines 23-36 of the bill be amended to include "or church denominational school".

SJR 14

Alaska Pacific University

Anchorage, Alaska 99504 907-276-8181

A STATEMENT TO THE SENATE HEALTH AND SOCIAL SERVICES COMMITTEE

As a representative of Alaska Pacific University, I would like to voice our support for Senate Bill 48 and Senate Joint Resolution 14, currently under consideration by the Senate Health and Social Services Committee.

The escalating costs of education, both public and private, have had a profound effect on the numbers of students in Alaska who are going on to a post-secondary education after graduation from high school. Although there is an apparent surplus of college-trained professionals in some areas, there continue to be serious shortages in others. Alaskan colleges and universities are faced with the responsibility of--in fact are charged by the public with--the development of accessible professional programs, the staffing and administration of those programs, and with informing the public of the availability of those programs in an efficient and economical manner. Increasing costs are adversely restricting these responsibilities. Ultimately the burden for maintaining well-educated leadership in Alaska rests with the taxpayer, with respect to public institutions, and the individual student or the parents of students enrolling in private institutions. Often that burden is too great. The alternative is increased reliance upon state or federal financial assistance programs. Invariably, these include educational loans, the availability of which is becoming more and more limited. Most of us are aware of the tremendous default rates for government loans; these defaulted loans not only escalate the costs of program administration, they also encumber the graduating student with considerable liabilities at the beginning of a career, liabilities in the form of debts that are more often than not uncollectable.

A reasonable tuition credit against taxes is an alternative that encourages participation in higher education and provides relief directly to those who need

it most--the career-bound students or students who seek a change in careers.

For these reasons, Alaska Pacific University supports Senate Bill 48 and Senate Joint Resolution 14, and we encourage their passage.

Thank you.

James E. Stevens
Assistant Dean

Alaska State Legislature
Teleconference Hearings
Legislative Information Office
1024 West Sixth Avenue
Anchorage, Alaska
February 28, 1979

With respect to SJR No. 14, I want to commend Senator Bradley for his keen understanding of the attempt of the IRS to force the closing of many of the Christian schools that have come into existence in the last two decades. His insight into the value of a "free marketplace of ideas" in order to keep our nation great clearly indicates that he is a man who has valuable ideas to promote in State and National governmental circles in behalf of the people he represents.

If the clear violation of the First Amendment as proposed by the IRS were to go unchallenged by our elected officials, we would lose hope of our survival as a church because both compliance or noncompliance with that proposal would dictate the demise of our Christian schools. We are praying for the passage of SJR14.

On the subject of Senate Bill No. 48 Senator Bradley's intent is welcomed with great enthusiasm by citizens who, whether by religious conviction or because they seek an educational and disciplinary philosophy differing from that offered by most public schools, have been paying double for the education of their children. Such discrimination against certain taxpayers is borne by them to demonstrate their sincere concern for the education and welfare of their children.

Relief from the double cost burden, or even a 50% credit as proposed strikes me as a right approach to the present inequity. But I see in SB48 that the "eligible educational institutions" are required to "meet accreditation or approval criteria established by the department by regulation."

Inasmuch as past attempts by the department to regulate private schools have included such regulations as would abridge our rights and could conceivably force us to compromise our religious convictions, I would respectfully ask that part (d) of SB48 and any reference to "eligible educational institutions" be excluded from the bill. This becomes a necessity to us because of the First Ammendment Rights, and would be in accord with the thinking of Senator Bradley as expressed in SJR #14.

Dear Sir:

I am very much interested in SB 48 regarding educational tuition credit. I believe it is a fair bill, and one that is overdue. Some fear that it will hurt the public school system, but I believe to the contrary, that it will strengthen the public schools. It will finally convince the public school administrators and people that they must do something to improve the educational programs for our children today.

I believe part D under section 1 should be amended to read that an "eligible educational institution is one which meets accreditation or approval by criteria established by the Alaska State Legislature." This could be done by adding the words at the end "or Section 4 of AS 14.40.010 (b)1." This is the Alaska Compulsory Education Statute that states that a child must attend a public school or one of the three other kinds of schools. Since those schools have been approved by the Legislature, they should automatically be approved as eligible educational institutions. We believe this needs to be spelled out clearly by the Legislature in order to prevent the Department of Education from coming up with regulations beyond those which the Legislature has already prescribed.

Of course, this will not give any relief to parents who send their children to a church-sponsored school unless House Joint Resolution 11 is passed, which will allow indirect aide to religious sponsored schools.

Also, we are very much interested in SJR 14, protesting Internal Revenue Service regulations removing tax exempt status of certain private schools. Your support of this resolution will be very much appreciated. Action on this bill is very important, since IRS is steadily moving forward to invoke these unconstitutional regulations.

Thanks in advance for your help.

Sincerely,

Jerry Prevo

February 28, 1979

Testimony before the House H.E.S.S. Committee
Legislative Information Office, Anchorage

SJR14

Good afternoon Senator Hackney and Committee members.

I am Burton Carney, Principal of Harvester Christian Academy in Anchorage which is the teaching ministry of Harvester Christian Church, Paul Glover, Pastor. Harvester Christian Academy is an active member of the Alaska Association of Christian Schools and affiliated with the American Association of Christian Schools.

I am strongly in favor of SJR14 and seek to enlist your support for its passage. The bill is well written and directly addresses the problem that church schools face in this state.

The U.S. government, acting through the IRS, presently requires each private religious school to register with the IRS, using their standard form 5578, which provides the IRS with certain information regarding the control of the school, and what exemption covers the school, and requires a statement of non discrimination. The schools are also presently required to include a policy statement of racial nondiscrimination in all of its brochures and catalogues dealing with student admissions, programs and scholarships. It must also presently make known its racially nondiscriminatory policy through publication in a newspaper, or communication through use of the broadcast media, of such nondiscriminatory policy.

The newly proposed guidelines go even further in extending the control of the IRS over private Christian schools. This includes a determination by the government as to the number of minority students actually enrolled, as well as an inquiry into the various activities of the school, covering such things as student admissions, the hiring of teachers and other staff personnel, the use of the building, which, in many cases is a church facility, and an examination of the curriculum to determine whether there is any special minority oriented curriculum or orientation programs.

With the new guidelines, the government proposes to control the school's ability to admit or deny admittance to any student applying to the school, as well as the school's ability to hire or fire the teachers. As many Christian schools only hire teachers who have the same religious belief, and admit only those students who either belong to the church or are willing to subscribe to the same religious beliefs, this decision to include private schools under the

proposed guidelines infringes upon the right of our churches and parents to have their children taught by someone who holds the same values as they do, and to have the necessary religious atmosphere, generated by a unanimity of faith among the students. This not only infringes upon the religious liberties of the parents, the students, and the teachers, it does so in a way that is completely contrary to the reasons why exemptions were originally given to churches and church schools.

We object to the new IRS proposal because it puts the financially expensive burden of proof as to whether churches are operated in a nondiscriminatory manner on the churches themselves. It really uses the GUILTY UNTIL PROVEN INNOCENT APPROACH which is contrary to the basic American way for doing things.

For these reasons I ask that you please support SJR14 and pass it quickly so that it may be sent on to Washington.

SB48

I also wish to speak today concerning SB48 Tuition Credits.

I appreciate the fact that SB48 recognizes the fact that parents exercising their freedom of choice by sending their children to private schools bear an undue financial burden. They must not only pay taxes for public education, but also tuition that averages $1,000 per child in this state. Tax relief is needed.

However, our church, its staff, and the church families are OPPOSED to the passage of SB48 unless an additional phrase is added to line 26 that includes the words, "OR school operated as a ministry of a church."

Without the additional wording being added, the State of Alaska would have to approve my church's educational ministry before our parents could receive the tax benefit. Not only does this violate the Constitutional separation of church and state, but sets a dangerous precedent for state intervention into church programs.

To be state approved implies that our school would have to conform to the same regulations as the public schools in this state. Our church schools purposefully operate in a manner different than the public schools. There is always the chance that an over-zealous official will attempt to interfere with our church school program, as has occurred in some other states, if we were to be state accredited or state approved.

I would seek to remind members of the Committee that SB323 was passed into law last year. Alaskan statutes NOW recognize as private schools not only those that are state accredited or state approved, but ALSO those private schools which have their own teacher training and academic programs as long as they can demonstrate that the children are learning equally well as their public school counterpart.

Since an Alaskan statute NOW recognizes as a school one that is NOT state approved or state accredited, please add wording to SB48 that would likewise recognize this change in our laws.

I do want to say that if this Committee does not add this wording to protect the integrity of our church, we will find it necessary to do everything in our means to oppose its final passage into Alaskan law.

In summary, SB48 attempts to alleviate a definite problem that our parents face, but needs additional wording to PROTECT our church according to the principle of separation of church and state.

Thank you.

Burton Carney

Burton Carney

SJR 14

Sen. Bradley. Mr. Chairman, I introduced both of these bills, SJR 14 and SB 48 by request of a lot of private schools in the Anchorage area. In regards to SJR 14, this resolution simply supplements hundreds of thousands of letters that have been sent to the President of the United States, U. S. Senators and Representatives, and the Internal Revenue Service, not to mention those sent to state legislators such as ourselves.

If we do not take action now, of which the resolution is a part, to inform the powers in Washington, D. C. of our intention to resist and hopefully prevent proposed IRS regulations which threaten our private schools at the loss of their tax-exampt status. Our contributions to these schools will eventually be considered a government subsidy if you claimed them as a tax exemption even though your contribution may be to a church or some other private and nonprofit school. If it is a church school this could even include your offerings. A government subsidy means only one thing: government control. If we permit, government will either eliminate or take over control of our private schools which are, for the most part, much superior to most of our public schools. Achievement tests have proven this. Many of the private high schools are graduating our youth from school as competent graduates at the age of 15 and 16 and are even teaching additional courses such a the principals of free enterprise, economic development and business, which made our nation the greatest on earth.

Passage of this resolution may subsequently assist in passage of U. S. Senate Bill 103 which has been introduced in the 94th Congress. This bill would delay implemention of the proposed IRS regulations and permit time for hearing in federal legislation if necessary. Our Congressman Don Young has joined numerous other congressmen in requesting Congressman Ulman, who is Chairman of the House Ways and Means Committee, to hold public hearings on the IRS regulations. The Internal Revenue Code now gives a tax exemption to charitable, religious and educational institutions. Tax exempt status is valuable to private schools for two reasons: it means that the government itself, they and their employees are not required to participate in the social security program; more important it means that the contributions to these schools are tax deductible by the donor. The effective government subsidy inherent in this tax deduction amounts to billions of dollars a year for all private schools and their benefactors. One of the purposes of the exemption is to encourage educational diversity.

To save time I shall provide a hand our which is a synopsis of the IRS regulation demands and the members of the committee can read it for themselves.

26 people from Anchorage proceded to testify on both SJR 14 and SB 48. No one was opposed to SJR 14.

Sen. Sturgulewski. Line 19, I wonder if you would have a major . . . .

Overall I think there has been a very excellent idea expressed in your whereas's and conclusions, I think it is important that Congress does in fact allow for full public debate on an issue like this. I do, however, have a concern on line 19 when it begins "which do not meet stringent and capricious affirmative action requirements and quotas." I wonder if you might consider a deletion of that portion. I do not know all of the things that may be good, bad and indifferent about the particular regulations that are being proposed and I think that your statement is very strong without singling out a part of it and its really my personal feeling that weakens the ability of this particular resolution to go forward. I think it is an important resolution. I wonder if you would consider dropping that wording or having the bill amended to delete it?

Sen. Bradley. yes, I think it suggests something we don't need to suggest.

Sen. Sturgulewski. With that I see no reason I could not support with a do pass.

Sen. Fahrenkamp. Since this same type of bi[illegible]s being heard at the present time in Congress in the House [illegible]s and Means committee, I think it would be appropriate if we planned on having this bill be effective in influencing those hearings It would be good for us to address this just as quickly as we can and get it out.

Motion to make amendment. No objection to amendment. So ordered. Out with individual recommendations as amended.

Office Copy

Introduced: 1/31/79
Referred: Health, Education & Social Services

IN THE SENATE BY BRADLEY

SENATE JOINT RESOLUTION NO. 14

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

Protesting Internal Revenue Service regulations removing the tax-exempt status of certain private schools.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS a free marketplace of ideas is the cornerstone of a democratic society, and a flourishing of private schools offering a choice of religious and educational philosophies is essential to the greatness of our nation; and

WHEREAS Congress has recognized the important educational role of private schools and implemented the constitutional requirement of separation of church and state by granting tax-exempt status to private schools; and

WHEREAS most private schools cannot cover their operating costs with tuition but depend heavily on tax-exempt donations; and

WHEREAS the Internal Revenue Service has threatened the very existence of private schools by writing regulations which would remove the tax-exempt status of private schools which do not meet stringent and capricious affirmative action requirements and quotas; and

WHEREAS this precedent-setting decision by the Internal Revenue Service, which would have a major impact on the future course of American education, is a profound change in the policies established by Congress, and is in effect usurping the policy-making responsibilities of Congress;

BE IT RESOLVED that the Alaska State Legislature protests the regulations proposed by the Internal Revenue Service which threaten private schools with the loss of their tax-exempt status; and be it

FURTHER RESOLVED that the Alaska State Legislature urges Congress to enact legislation similar to S. 103, now introduced in the 94th Congress,

which would delay the promulgation and effective date of the Internal Revenue Service regulations and would give Congress a chance to weigh the effects of such regulations and take appropriate action.

COPIES of this resolution shall be sent to the Honorable Jimmy Carter, President of the United States; Mr. Jerome Kuntz, Commissioner, Internal Revenue Service; the Honorable Orrin G. Hatch, U. S. Senator from Utah and prime sponsor of the Save Our Schools Act; and to the Honorable Ted Stevens and the Honorable Mike Gravel, U S. Senators, and the Honorable Don Young, U. S. Representative, members of the Alaska delegation in Congress.

FOR ALLIED HOSPITAL ASSOCIATION PUBLIC RELATIONS DIRECTORS

EXHIBIT #3

January 1979 Vol. 7, No. 1

Allied Public Relations Directors to Meet in April

The annual meeting of the allied association PR directors will be held at LaMansion, San Antonio, TX, April 25-27. The program will include discussions of industry issues, and problems and programs as they relate to the public affairs function in state, regional and metropolitan hospital organizations.

Members are urged to begin making plans to attend and to send any program suggestions to Dick Bregstein, director, public affairs, Illinois Hospital Association, 1200 Jorie Blvd., Oak Brook, IL 60521, (312) 325-9040.

Update on Voluntary Effort Includes National and State-Level Priorities and Physician Involvement

For those who were not able to take part in the PR Commo-Net call on November 29 and requested information on the Voluntary Effort (VE), here is a summary.

The National Steering Committee met November 20 and reviewed the VE work plans from the state associations and approved them, asking that key staff of participating organizations assure that all figures are in sync.

National and state-level priorities

The committee set four priorities for state and national levels next year: 1) Continue to build awareness of and commitment to VE on the part of hospitals and physicians; 2) Increase monitoring and reporting activities on state and national levels; 3) Provide technical assistance to hospitals in their cost containment efforts; and 4) Lay the foundation for VE beyond 1979 and deal with issues in addition to hospital costs.

A package was mailed in mid-November to institutional members to aid them with suggestions on how to achieve compliance with the Administration's wage and price guidelines. The subject heading on the VE Technical Assistance Program letterhead was "Salary Guidelines Under Voluntary Wage and Price Guidelines." Any questions about the mailing should be directed to Emily Johnson, Financial Systems Department, AHA.

Tips on resources for physician involvement

The primary resources for information on how to involve physicians in private practice as well as in hospitals are Bill Cohan and Robin Menes at the AMA, 535 N. Dearborn St., Chicago, IL 60610.

The AMA has produced a kit for use by individual physicians or medical staffs. It was mailed to state and county medical societies and is available to state hospital associations from the individual societies.

AHA resources for information about physician involvement are Patricia Parks, Division of Medical Services, (312) 280-6453; Paul Earle, VE executive director, (312) 280-6634; and Joe Rosmann, VE assistant director, (312) 280-6583.

National Hospital Week to Focus on Costs

The theme for National Hospital Week, May 6-12, is "The Voluntary Effort -- It's Working for You." Hospitals' strides in delivering cost-effective care in the best interests of the American people will be emphasized, as well as efforts to maintain the unique concept of voluntarism in this country.

Kits, which will be mailed to members in February, will contain materials and artwork that will help hospitals demonstrate how patients and the community can best utilize hospital services to get the most cost-effective care. Suggestions for involving employees will stress the importance of their contributions to reducing the cost of health care.

Maryland Survey Tells Pols' Views on Health

Maryland voters were able to find out, for the first time, how gubernatorial candidates stood on health issues through the laudable efforts of the Maryland Hospital Association (MHA).

An Editorial

ve

Voluntary Effort advances at surprising pace for such a task

The Voluntary Effort (VE) — which was just an idea only a few short months ago — is moving toward reality with surprising speed when you consider the enormity of such an undertaking and the diversity of the elements of the health care industry that are involved.

The National Steering Committee on Voluntary Cost Containment drafted a 15-point program in mid-December, 1977, as a blueprint for an unprecedented grass roots movement to hold down health care costs. Within less than two months, state-level cost containment committees were organized — or were in the process of being organized — in all 50 states and the District of Columbia, thanks to the joint cooperation of the hospital and medical associations in each state.

It is true, of course, that some states are moving faster than others to implement the program. But, take into consideration the fact that the various entities of the health care industry are better organized in some states than in others.

The Voluntary Effort was never intended to be something that could be accomplished easily. The vast complexities within the health delivery system would most certainly prevent any such eventuality.

By and large, the Voluntary Effort has been well received throughout the country by state hospital and medical associations and individual hospital administrations and medical staffs. There has been, of course, some skepticism. This is only natural because there are many questions to be answered and much restudy to be done to find out where and how to cut costs without affecting the quality of care.

It must be emphasized that the Voluntary Effort is not a one-shot program confined to a definite time frame. It will — and must — continue indefinitely, regardless of what happens legislatively because its success or failure is not tied directly to legislation. It was not undertaken to thwart one piece of legislation — although, admittedly, the threat of mandatory cost controls was a major catalyst in getting the effort under way. Health care industry leaders are convinced that voluntary cost containment is a far better alternative than more government regulation.

The voluntary program is designed to tackle the tough problem of reducing the rate of increase in hospital costs. Thus, it is tied to the peaks and valleys of the nation's economy, and the dilemma of inflation is likely to be with us for a long time to come.

Also, voluntary cost containment must be an ongoing effort because there always will be those who believe that government can do a better job of holding down costs by law or regulation than the private sector can — or is willing to do — voluntarily. It is time to prove how wrong the skeptics can be, including those within our own industry.

It is very difficult to understand why leaders in the Executive Branch, especially the President and Secretary of HEW, won't support the industry's Voluntary Effort to police itself. The President said in his State of the Union Message in January that he did not believe in wage and price controls and stated that "a sincere commitment to voluntary restraint provides a way, perhaps the only way, to fight inflation without government interference." Yet, his Administration insists on going ahead with its mandatory cost control legislation.

We often hear various members of Congress say that anything government can do, the private sector can do better. Now is the time for them to back that belief.

To put it bluntly, the Voluntary Effort has placed the integrity of the health care industry on the line. We must not fail.

Steering Committee guides grass roots effort to curb health costs

When Congressman Dan Rostenkowski (D-Ill) challenged the health care industry late in 1977 to voluntarily contain costs as a means of avoiding mandatory controls, he touched off a massive grass roots program of unprecedented proportions in the private sector of the health delivery system.

The challenge carried the weight of authority because Rostenkowski is chairman of the Health Subcommittee of the House Ways and Means Committee and a sponsor of the Carter Administration's hospital cost control legislation.

The American Hospital Association (AHA), American Medical Association (AMA) and Federation of American Hospitals (FAH) joined forces, and, in November, 1977, launched the historic, industry-wide voluntary cost containment program — called the Voluntary Effort (VE).

The first major step was the appointment of a blue ribbon National Steering Committee on Voluntary Cost Containment — composed of representatives of providers, carriers, business and consumers.

The committee co-chairmen are:

□Samuel Tibbitts, chairman of the AHA and president of the Lutheran Hospital Society of Southern California.

□Robert B. Hunter, M.D., chairman of the AMA board of trustees and a general practitioner from Sedro Wooley, Washington.

Other committee members are:

□Andrew W. Miller, president-elect of the FAH and senior vice president of Hospital Corporation of America (HCA).

□Robert Froehlke, president of the Health Insurance Association of America (HIAA).

□Harold Buzzell, president of the Health Industry Manufacturers Association (HIMA).

□Walter McNerney, president of the Blue Cross/Blue Shield Association.

□Mrs. Virginia Knauer, former presidential special assistant on consumer affairs and president of Virginia Knauer and Associates, consumer consultants.

Then came the second major step.

Goals drafted

At its initial meeting in December, 1977, the National Steering Committee drafted a 15-point program of guidelines and goals — which is the crux of the Voluntary Effort.

The major goals of the program are:

A reduction in the rate of increase in hospitals expenditures of 2 percentage points a year over the next two years.

No net increase in hospital beds during 1978.

A reduction in new capital investment during 1978 and 1979.

Here is a summary version of the 15 points established by the National Steering Committee:

1. Affirmed the action taken by the AHA, AMA, and FAH urging the immediate creation of state-level voluntary cost containment committees, established through the leadership of the state hospital association and state medical society.

2. Affirmed the action called for by the AHA in its recent mailgram to member institutions requesting an immediate reassessment of planned budget and charge adjustment to be implemented beginning January 1, to see if anything further can be done in

National Steering Committee

the short term to reduce these increases, consistent with sound medical practices.

3. Established as the primary objective of the voluntary cost containment program a reduction in the rate of increase in hospital and health care expenditures so that the gap between this rate of increase and that of the Gross National Product is significantly narrowed over the next several years. The first step would be to reduce the rate of increase in total non-federal expenditures by 2 percentage points each year for 1978 and 1979.

4. Established interim guidelines linked to No. 3 above for consideration by (a) all hospitals for reassessing their current budget, and (b) the newly created state committees to identify those hospitals where special cost containment efforts need to be carried out and to provide directions for state-level committees in developing their cost containment and review activities.

Would trim investment

5. Establish a national goal of significantly reducing new capital investment over the next couple of years, including an objective of no net additions to the total stock of hospital beds as of December 31, 1977, and reducing capital expenditures to 80% of the price adjusted annual average for 1975, 1976, and 1977.

6. Requested that all hospital medical staffs reaffirm their commitment to carry out effective utilization review programs to assure the efficient provision of health care services and, consistent with

sound medical practice, all hospital medical staffs should consider ways to further tighten their utilization review programs.

7. Called for expanded study and development between state committees of programs to significantly improve productivity in hospitals, giving special emphasis to ways in which hospitals can hold the line on or reduce man hours per admission. The objective is for each hospital to improve productivity by 2% per year for 1978 and 1979.

8. To accelerate current trends to improve the health delivery system through multihospital systems, shared service programs, increased accessibility to primary care, and to increase the alternatives for delivery of health services, particularly through HMOs and single and multispecialty medical groups.

9. Called for the immediate communication of the above stated goals and guidelines to all hospital chief executive officers, chiefs of medical staffs, hospital board chairmen, state hospital and medical societies and all other allied associations, urging their support and cooperation of this program.

10. Called upon the AHA, AMA, and FAH to develop technical assistance programs to assist both hospitals and state committees in meeting the goals of the voluntary cost containment programs.

Supplier's support asked

11. Urged each hospital supplier to support the voluntary cost containment program and to exercise restraint in its pricing policies.

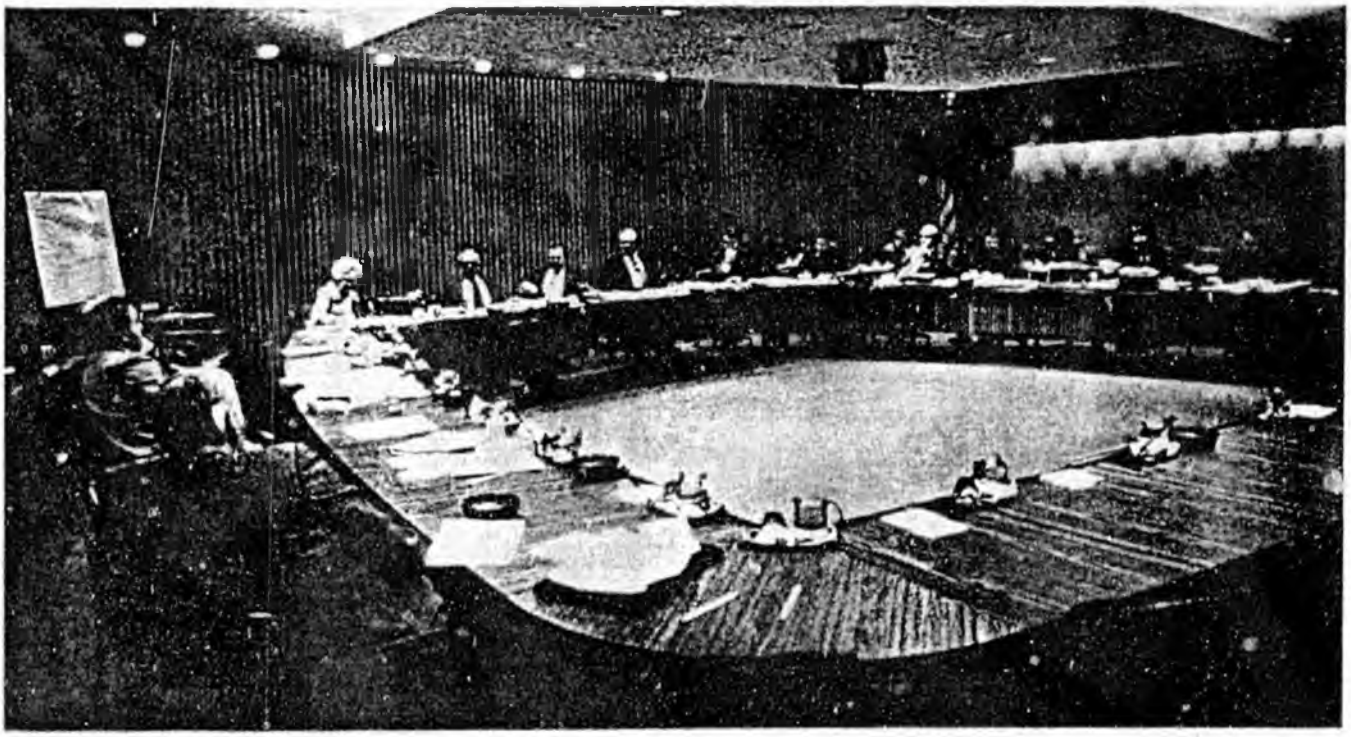
12. Established a subcommittee for public education to develop approaches for explaining the voluntary program to the public. This committee also should consider ways to actively involve consumers, providers, trustees, industry, labor, and others in an effort to contain hospital and health care costs and to consider ways to resolve the problem of increasing public demand for health services.

13. Called upon the CEOs of the AHA, AMA, and FAH to contact the Department of Health, Education and Welfare, the Council on Wage and Price Stability, congressional leaders and the White

Model resolution in support of Voluntary Effort

Here is a model resolution that the governing boards of hospitals have been asked to adopt in support of the Voluntary Effort:

WHEREAS, the American Hospital Association, the American Medical Association, and the Federation of American Hospitals, in recognition of the need to restrain the rate of increase in health care expenditures, agreed to organize a Voluntary Cost Containment Program and urged each hospital to reassess its operating and capital budgets to see if anything further can be done to reduce these budgets, consistent with sound medical practice, and



WHEREAS, the American Hospital Association, the American Medical Association, and the Federation of American Hospitals have organized a National Steering Committee on Voluntary Cost Containment, which has developed a 15-point program to be implemented through state-level voluntary cost containment committees and through voluntary action of individual hospitals, and

WHEREAS, the State **(name)** Voluntary Cost Containment Committee has been organized, has endorsed the National Steering Committee's 15-point program, and has developed a Provisional Certification Program, and

WHEREAS, the Governing Board **(or other title)** of the **(name)** Hospital has thoroughly reviewed these developments with the medical staff and the chief executive officer and is in agreement with the steps that have been taken at the national and state levels, and

WHEREAS, the Governing Board **(or other title)** of the **(name)** Hospital is strongly committed to voluntary action as the key to cost containment and desires to play a leadership role in demonstrating the value of voluntary action in cost containment,

THEREFORE BE IT RESOLVED, that the Governing Board **(or other title)** of the **(name)** Hospital strongly supports the program of the State **(name)** Voluntary Cost Containment Committee, has independently initiated a reassessment of its operating and capital budgets to see if any further reductions or postponements can be made, consistent with sound medical practice, pledges the use of all reasonable means to keep operating expenditures and capital budgets at the lowest levels on a continuing basis, consistent with sound medical practice, and seeks formal certification by the State **(name)** Voluntary Cost Containment Committee.

The National Steering Committee on Voluntary Cost Containment meets at the Chicago headquarters of the American Hospital Association.

House with respect to the program's goals and guidelines for the purposes of obtaining their support and cooperation, as well as industry and labor.

14. Called upon insurance carriers, other purchasers of care, industry and organized labor to examine alternatives to existing health insurance programs that would include expanded consumer cost sharing and cost effective alternatives to existing coverages, and other approaches to heighten the awareness of health care consumers regarding the cost of health services.

15. Called upon the Department of Health, Education and Welfare and other federal agencies to carry out cost effectiveness studies regarding all existing federal regulations affecting the health care industry to be completed by the end of 1978.

Committees formed

By January 30, 1978, state-level voluntary cost containment committees had been organized in 48 states and the District of Columbia by state hospital and medical associations — and the final two states formed committees in February.

Thus, the program was set in motion at the national and state levels in less than two months.

New impetus was added to the Voluntary Effort in early February when Rostenkowski addressed the annual meeting of the AHA in Washington, D. C. He praised the industry for launching the voluntary program and then made the surprise announcement that he would introduce legislation calling for standby cost controls, which would be implemented if it failed.

The sponsors of the Voluntary Effort are seeking antitrust clearance from the U. S. Justice Department on two primary issues relating to the use of specific numerical objectives by state committees in implementing the program with individual hospitals in the state, and the use of public disclosure as an incentive to gain participation by individual hospitals.

The massive Voluntary Effort has included the mailing of 23,000 letters to the nation's hospital chief executive officers, board of trustee chairmen and chiefs of medical staffs, urging their support of the program.

In separate interviews with the *Review*, members

of the National Steering Committee expressed appreciation over the response of the health care industry to the voluntary program, but their predictions of success ranged from "optimistic" to "wait-and-see."

Progress 'remarkable'

Committee co-chairman Tibbitts, AHA chairman, described the progress to date as "remarkable."

"We are getting all of the states lined up, and most of their committees have met. Also, I am amazed by the agreements that we have had on the National Steering Committee as to what our goals and objectives should be. I have to give credit to the AMA for really coming forward and saying — yes, the doctors have to be involved and recognize their part in hospital costs."

Tibbitts admitted that he was concerned about the psychological factors involved with the introduction of legislation for standby controls. He said he feared some hospitals might become discouraged because of the belief that "whatever we do, we might get the boom lowered on us anyway."

Speaking of the steering committee, Tibbitts commented, "I would say that, so far, our discussions have been very good, healthy and cooperative. Each member has a little different problem. Unfortunately, we don't have a labor representative as yet, but, we hope to get one in the future. Expansion of the committee is planned, and we soon expect to have a representative from the Association of County Governments."

The AHA chairman emphasized that he was a firm believer in the Voluntary Effort, and "I would encourage every state hospital association, every hospital, and every medical society to really get behind this program and work and push as hard as possible to make it a success."

Miller, president-elect of the FAH and the investor-owned hospitals' representative on the committee, believes the next two months will be "extremely critical to the success of this effort."

Cooperation needed

"In the next two months," he explained, "state committees will complete their organizational process, and hospitals will be endorsing and committing themselves to the objectives of the program. What is needed, of course, is 100 percent cooperation."

Miller said that hospital administrators and chiefs of medical staffs "are going to have to put the success of this program above their own immediate interests because it is important to the long-term progress of health care in this country."

"Personally, I feel that administrators and chiefs of staff will respond very positively to this challenge, and I believe that investor-owned hospitals will take the forefront in this effort," he said.

He believes that the Voluntary Effort "will accomplish more than just asking hospitals to re-examine their budgets and redouble their cost containment efforts."

"This effort will serve as a communications vehicle and a focal point to relate better to Congress, health insurance companies, consumers, and even to physicians, regarding the problems facing hospitals," Miller explained. "We must build on this foundation. We must focus first on the hospitals and then move beyond that into the physicians' influence on health care costs. Then, we need to expand to other areas. So, I foresee that this effort will go on for several years before being replaced by something else."

Buzzell, who heads the Health Industry Manufacturers Association (HIMA), said that his organization had endorsed the concept of the Voluntary Effort and "specifically endorses No. 11 of the 15-point program, which urges each hospital supplier to support the voluntary cost containment program and to exercise restraint in its pricing policies."

"So, our commitment is one of enthusiasm and full of cooperation to make this program work," he said.

Buzzell believes that standby controls could have both a positive and a negative impact. The positive impact, he explained, is that it would warn the hospital industry of the consequences if the voluntary program failed.

"The negative impact," he said, "is that the legislation would enable the federal government to expand its regulatory arm — and I think that would be disastrous."

Buzzell said he was disappointed that the Voluntary Effort had not been endorsed by both the federal and state governments.

"Also," he noted, "I see a major flaw in the sense that we have not yet obtained the cooperation of the segment of our society that really causes a good portion of the costs of hospitals to occur. I am referring, of course, to labor, and labor costs can only be controlled if we get the cooperation of labor unions."

Sees opportunity

McNerney, head of Blue Cross/Blue Shield, believes the Voluntary Effort "is an excellent opportunity for the private sector to display initiative and to establish itself as a socially accountable and publicly accountable force."

McNerney said he would like to see the AHA, AMA, and FAH "move more aggressively and faster" in implementing the voluntary program.

He also believes that industries serving the hospital industry "are going to have to be part of the dialogue (of cost containment) and exercise as much restraint as possible."

McNerney says it is essential that each hospital have a cost containment committee — involving the trustees, administration and the medical staff in the format and procedures of such a panel.

"This is a very important point," he stressed. "It is very essential that a hospital administrator — and I mean all of them — does not sit back and wait to see how things are going — whether this is a successful venture — whether somebody else is going to give more or less. It concerns me that, in a situation like this, some people tend to be cozy and adopt a wait-and-see attitude.

"Now is the time for some individual leadership,

AHA vice president wears second hat . . .

Paul W. Earle, vice president of the American Hospital Association (AHA), is wearing a second hat as executive director of the Voluntary Effort.

He is responsible for the day-to-day activities connected with the first joint, voluntary program of its kind in the health care industry.

Earle

Organization and communication are the prime objectives as the Voluntary Effort moves through the embryonic stages. The emphasis has shifted from the National Steering Committee on the Voluntary Cost Containment Program to the state voluntary cost containment committees.

"We are now in the process of starting a provisional certification program," Earle said. "Some of the states have already done this.

"This is Stage One of the program wherein each state committee will ask every hospital in its state to take the cost containment issue up with its board of trustees and medical staff," he explained. "Boards will be asked to approve resolutions supporting the voluntary program and indicating to the state committee or the state hospital association what its rates of increase will be and what it is doing to contribute to voluntarily restraining increases."

Earle has served in several executive capacities since joining the AHA staff in 1968. He is a graduate of Princeton University and holds a master's degree in business administration from the University of Chicago Graduate School of Business.

He became an associate director of AHA in 1971, and in 1973 was promoted to director of management services. He was named vice president in 1975. He is responsible for three major AHA divisions — health delivery systems, human resources management and medical services.

expressed at the individual hospital level. If the administrator is frustrated about his potential loss of control — his potential loss of flexibility — his ability to manage the institution — now is the time to pay a small price toward a very large end — a future where there is more flexibility to get things done, rather than less."

Effort required

Froehlke, head of the Health Insurance Association of America (HIAA), believes that the Voluntary Effort is going "to take much effort and sacrifice on the part of hospital people throughout the country."

He expressed the viewpoint that the program was not moving fast enough, because "we should have been moving three years ago."

"But, having had a late start, and looking at all the problems involved, I think the industry is moving as fast as it can — but not fast enough," he said.

Froehlke said that the HIAA board "applauded and endorsed the Voluntary Effort and urged member companies to cooperate," at its February, 1978, meeting. He qualified this by noting that the HIAA was "not going to put all of its eggs in the Voluntary Effort basket."

"We are going to continue to stress peer review, prospective budget review and alternate methods of delivering health care," he said.

Froehlke said that the HIAA board had endorsed the Rostenkowski standby controls bill — just as it had endorsed the Administration's cost control legislation. He noted that the Rostenkowski bill "is the only piece of cost containment legislation in the hopper now that does, in effect, endorse the Voluntary Effort."

He believes that hospitals can show their sincerity in the voluntary program by statistically proving that they are holding down the inflationary spiral and making the kind of tough management decisions that will ensure this.

To explain program

Mrs. Knauer, who served as a special assistant on consumer affairs in both the Nixon and Ford Administrations, has been given the responsibility by the steering committee to develop a program to explain the Voluntary Effort and the impact on cost of

as executive director of VE campaign

Earle said he was gratified, generally, over the progress that was being made at the state level although, understandably, some states were moving faster than others.

"One of the encouraging things about the committees that are being appointed," he said, "is that they are broadly based, similar to the National Steering Committee. A key aspect of this whole program is the fact that we are not talking just about hospitals but the whole private sector of health care delivery. Some state committees that have been organized are involving government, business, and, in some cases, labor, too, or at least getting labor's support. Also planning agencies are involved, too. So, this is a broad direction for the state committees to follow."

Earle said that many questions, received by his office regarding the program, seek clarification of the various points of the 15-point guidelines and goals, established by the National Steering Committee.

"Actually, what we are doing is asking every hospital in the country to take another look at its budget and operating capital and see what they can do beyond what they already have done to constrain costs," he explained. "Then we are asking every hospital to make an ongoing commitment to voluntarily restrain their increases. What one hospital can do is going to be different from another. For example, some hospitals are looking at the possibility of shutting down wings while others are thinking about postponing capital spending or cutting back in capital projects. So it really varies all over the map."

Earle conceded that it was too early to tell how successful "this whole program is going to be, but the response that we have received from various states and individual hospitals — and from physicians — give us cause to be optimistic that we can get the job done."

cerned with utility shortages and uncertainties of supplies. Last winter many Kansas hospitals reported curtailment of natural gas supplies and were forced to switch to alternate, higher priced fuel at substantially higher fuel bills. Many reported increases of approximately 300 percent in their fuel bills during that period. For example, an 80-bed Kansas hospital reported it was required to burn propane instead of natural gas for 22 days last winter which resulted in a

Hospital Commended For Cost Containment

Johns Community Hospital has received a Certificate of Recognition from the Texas Statewide Hospital Productivity Center which is dedicated to effecting immediate and continuing savir in individual hospitals. To date, substantial cost savings have been demonstrated. Reduction in costs to date amount to more than $56 million."

In issuing the Certificate of Recognition, Johns Community Hospital was praised by Hurst for its efforts to contain health care costs, improve the overall productivity of the hospital system in Texas and maintain high quality community health care. Administrator Louis West and his staff were recognized for attaining high productivity goals.

THA, based in Austin, is the trade association of hospitals in Texas with a membership of over 690 health care institutions.

A LEGISLATOR'S VIEW OF THE VOLUNTARY EFFORT

by Dan Rostenkowski (D-IL)

The following remarks were made by Rep. Dan Rostenkowski, chairman of the Subcommittee on Health of the House Ways and Means Committee, before the National Invitational Symposium on the Voluntary Effort in Chicago, November 8, 1978.

This afternoon, I hope that you will forgive me if I do not focus primarily on the statistical evidence of the accomplishments of the Voluntary Effort [VE]. The results of your activities—as measured by the hospital panel survey data—have been quite broadly reported. So broadly reported that, in recent months, I have come to know hospital expenditure percentages almost as well as voting percentages in Chicago's Eighth Congressional District, and believe me, those latter percentages are ones that I really know quite well.

But to be serious for a moment or two, I would like to express my sincere recognition and appreciation of your achievements to date. As major inflation indicators have progressed steadily upward in recent months, hospital costs, for a change, have not been leading the charge. Your promises of last year and your efforts to fulfill them have resulted in a considerable improvement in the status quo—much to the surprise of many. For that, everyone in this room is to be commended.

When I addressed the House of Delegates of the American Hospital Association in Washington not quite nine months ago, I noted that your efforts to voluntarily restrain the rapid rise in hospital costs were consistent with the President's 1978 State of the Union address, which expressed the view that "a *sincere* commitment to voluntary constraint" provides a way to best grapple with inflation without direct government controls. You have made that *sincere* commitment, and the results of your commitment are being acknowledged more openly in Washington every day.

Just two weeks ago the President outlined his program to deal with inflation throughout our economy. In detailed fact sheets accompanying his prepared remarks, the President did again call for the enactment of hospital cost containment—a subject I would like to return to in a few moments. But at least as significantly, the President's explanatory papers discuss in specific detail the need to decelerate the inflation in medical care costs—primarily hospital costs—by a rate greater than the one-half percent which was being asked of other industries. To be specific, and I quote, "A more appropriate standard for this industry is a deceleration of at least two percentage points next year and continued deceleration in future years until the rate of growth in medical expenditures is brought into line with the rate of growth of the overall Gross National Product." Those goals sound quite familiar to me. Although the VE may not be loved by all in Washington, your goals and your accomplishments certainly now are recognized in high places.

If I correctly interpret the President's goals, he wants to couple this year's accomplishments with a similar success next year so that the growth in total hospital expenditures is brought into line with the GNP growth rate. Sounds like somebody has been analyzing the effect of my compromise bill.

In my opinion, the President's goals, which also happen to be your goals, and consistent with the goals endorsed by my subcommittee—are reasonable. Simply stated, they mean the growth in overall hospital expenses each year—expenses which are related to increased utilization, improvement in your product (and growth of the hospital sector) as well as general inflation of the economy—should be approximately the same as the sum of real growth and inflation in the rest of the economy.

So, after two years of rather emotional debate on the issue of hospital cost containment, it appears that we all now agree on our major goal, where we should be heading to improve the present situation. In witnessing the Administration and your industry slowly narrowing the distant poles that once separated you, I have observed significant concessions on both sides. From the industry, I have for the first time seen a genuine admission that there is a real problem here; you have stopped being negative and publicly recognized that maintenance of the status quo was just

not acceptable. From the Administration, there have been concessions as well. The President's recently stated goal of keeping the growth in hospital costs consistent with the overall growth in the economy is certainly far more flexible than the original cost containment proposal which emerged from HEW in April of 1977.

So now that we have considerable agreement on where we want to go, the question remains what is the best way to get there. This is where your industry and I continue to have our differences.

Long experience in government has given me an acute sense of the limitations of government intervention and a deep respect for the importance of freedom of choice and diversity in the health industry. Like you, I want to see a system that handles cost containment through healthy competition and real bargaining processes, a system marked by voluntary efforts within bounds acceptable to the public and the government. And I believe that this is the kind of system the American people would prefer.

I have been well aware, however, that this view is not shared by everyone. Many sincere people—both within and outside the government—are discouraged by the hospital industry's past record in controlling costs, and what they view as unkept promises made by the industry when wage and price controls were removed several years ago. I cannot, in all good conscience, ignore their views or their assessment of the record. And I have found that it is necessary, within the framework of our pragmatic political system, to take these views into account. Thus, I offered in the last Congress what I believed to be a reasonable reconciliation of divergent views—primary reliance on the industry's voluntary efforts to achieve a goal we all share, with recourse to a federal fallback program only if the industry's voluntary program fails to meet its objectives. Given the universal recognition of the fact that a serious problem does exist, I believe we can do no less than face up to the reality that a failure of the voluntary approach will leave no alternative but government intervention.

I must say that the response of the health community to my challenge to develop a voluntary program has persuaded me that my initial judgment was correct. I want to assure you that I—and many others—remain aware of what has been accomplished and that we will continue to closely follow and acknowledge your efforts.

In our habit of measuring successes and failures in this area strictly in terms of percentages, we can lose sight of the real dollar impact of the Voluntary Ef-

fort. From fiscal year 1977 to 1978, Medicare hospital benefit outlays increased by 17.1 percent. In the congressional budget for the fiscal year which began October 1, 1978, the projected Medicare increase for these same benefits is 12.5 percent. The sharp drop in percentage growth for this part of the Medicare program is $805 million; $680 million of this reduction is being attributed to the effect of the Voluntary Effort. Your work is making a difference.

I hope, however, that I will not be misunderstood. My compliments, like all compliments given to or by politicians, are provisional. Every politician knows that he cannot stand only on his past record—he has to be able to provide a program for the future, assurances as to what he will do tomorrow. You are all familiar with the question every constituency regularly poses: "Yes, but what have you done for me lately?"

The moral I draw from this is that you dare not think you can rest on your laurels. Nine months or even one year of success will not persuade those who need to be persuaded that the voluntary program can achieve its goals on a long-range basis and that we can rely on all within the industry to subordinate more narrow interests to the larger public interest. To accomplish that purpose you will have to repeat your success, maintain the high level of dedication and enthusiasm so far attained, and produce long-term results that continue to justify your faith in the capacity of the industry to meet freely and responsibly defined goals.

I believe that the critical test of the industry's sincerity and capacity to responsibly manage itself without the direct intervention of the federal government still lies ahead. There can be no letting up, no backsliding, no self-congratulation. Too much is at stake for all of us. Too much yet remains to be proved. And let me say, also, that it is an effort worth undertaking—not just for the negative reason of avoiding government controls, but for the positive reason of restoring public confidence in the industry's total commitment to the health and welfare of the American people.

As we look ahead to next year in the Congress, I cannot help but believe that progress on federal legislation to control hospital costs will inevitably be linked to progress that you make on the Voluntary Effort. Although I have not recently discussed next year's legislative agenda with anyone in the Administration, I am quite sure that some revised form of hospital cost containment legislation will be advocated early in the next session. From my standpoint, I continue to believe a rational standby program would be the most effective incentive to help you pursue your goals. In either event, much legislative improvement can of course be made— both in the Administration's original approach and in my standby program. These both surely will be considered during the next session.

But as I say this, it should also be noted that I am a political realist. I know—and you know—that whatever happens during legislative debate on this issue will be done with a full appreciation of the performance of the Voluntary Effort. Just as it is clear that your failure to continue to achieve your goals will accelerate congressional action next year on this issue, the continued success of the Voluntary Effort cannot be ignored. To put it simply, your best weapon to slow the advancement of federal legislation in this area—is to preempt the need for it. Continued success of the Voluntary Effort might well just do that.

In first discussing this issue at the American Hospital Association meeting last February, I compared your response to President Carter's proposal to the impact of the old army draft—I said that nothing stimulates volunteers as effectively as the genuine fear of the draft. So in closing today, let me remain consistent in my analogy. There are some in Washington who today regret that the Congress has done away with the old Selective Service System. They still believe compulsory military service should be required for all. There are others who believe that the draft should be available on a standby basis, in case there isn't sufficient voluntary effort to meet our military goals. Finally, there is a third group—the one which to date has prevailed. They argue that the voluntary army is working, so we should forget about the draft and focus on other legislative priorities.

For cost containment, the Administration has urged mandatory, and I have urged standby approaches, but you are going to make it tough for us to sell either program as long as your voluntary army is producing solid statistical results. Your future, ladies and gentlemen, is in your hands. Your cost containment performance in each of the 50 states will strongly influence what the Congress does during the next year. ■

AHA, READER'S DIGEST TEAM UP TO BENEFIT LTC INSTITUTIONS

During 1978, the Reader's Digest Association, in cooperation with the AHA's Office of Public Affairs, conducted a special program through which it donated more than 400 stereo home entertainment systems worth more than $200,000 to AHA member institutions.

The quadraphonic systems, which included turntables, dust covers, AM-FM stereo radios, eight-track stereos, and four speakers, were part of a discontinued line of equipment that Reader's Digest Association wished to phase out. In exchange for its donation, Reader's Digest Association wanted the AHA to select the recipient institutions and publicity for the program.

The AHA recommended that the systems be offered to long-term care institutions, because they usually have recreation rooms where the equipment can be used and because the number of such institutions closely matched the number of available stereo systems. The AHA issued a general press release about the donation program, notified the selected institutions about the donation, and supplied them with sample press kits to publicize the donation.

Reader's Digest Association was delighted with the press coverage the program received and believed that it was very successful, especially because of the AHA's cooperation. AHA membership response to the program was overwhelmingly favorable, as shown by some of the comments that appeared in members' publications or in letters of thanks received by the Reader's Digest Association:

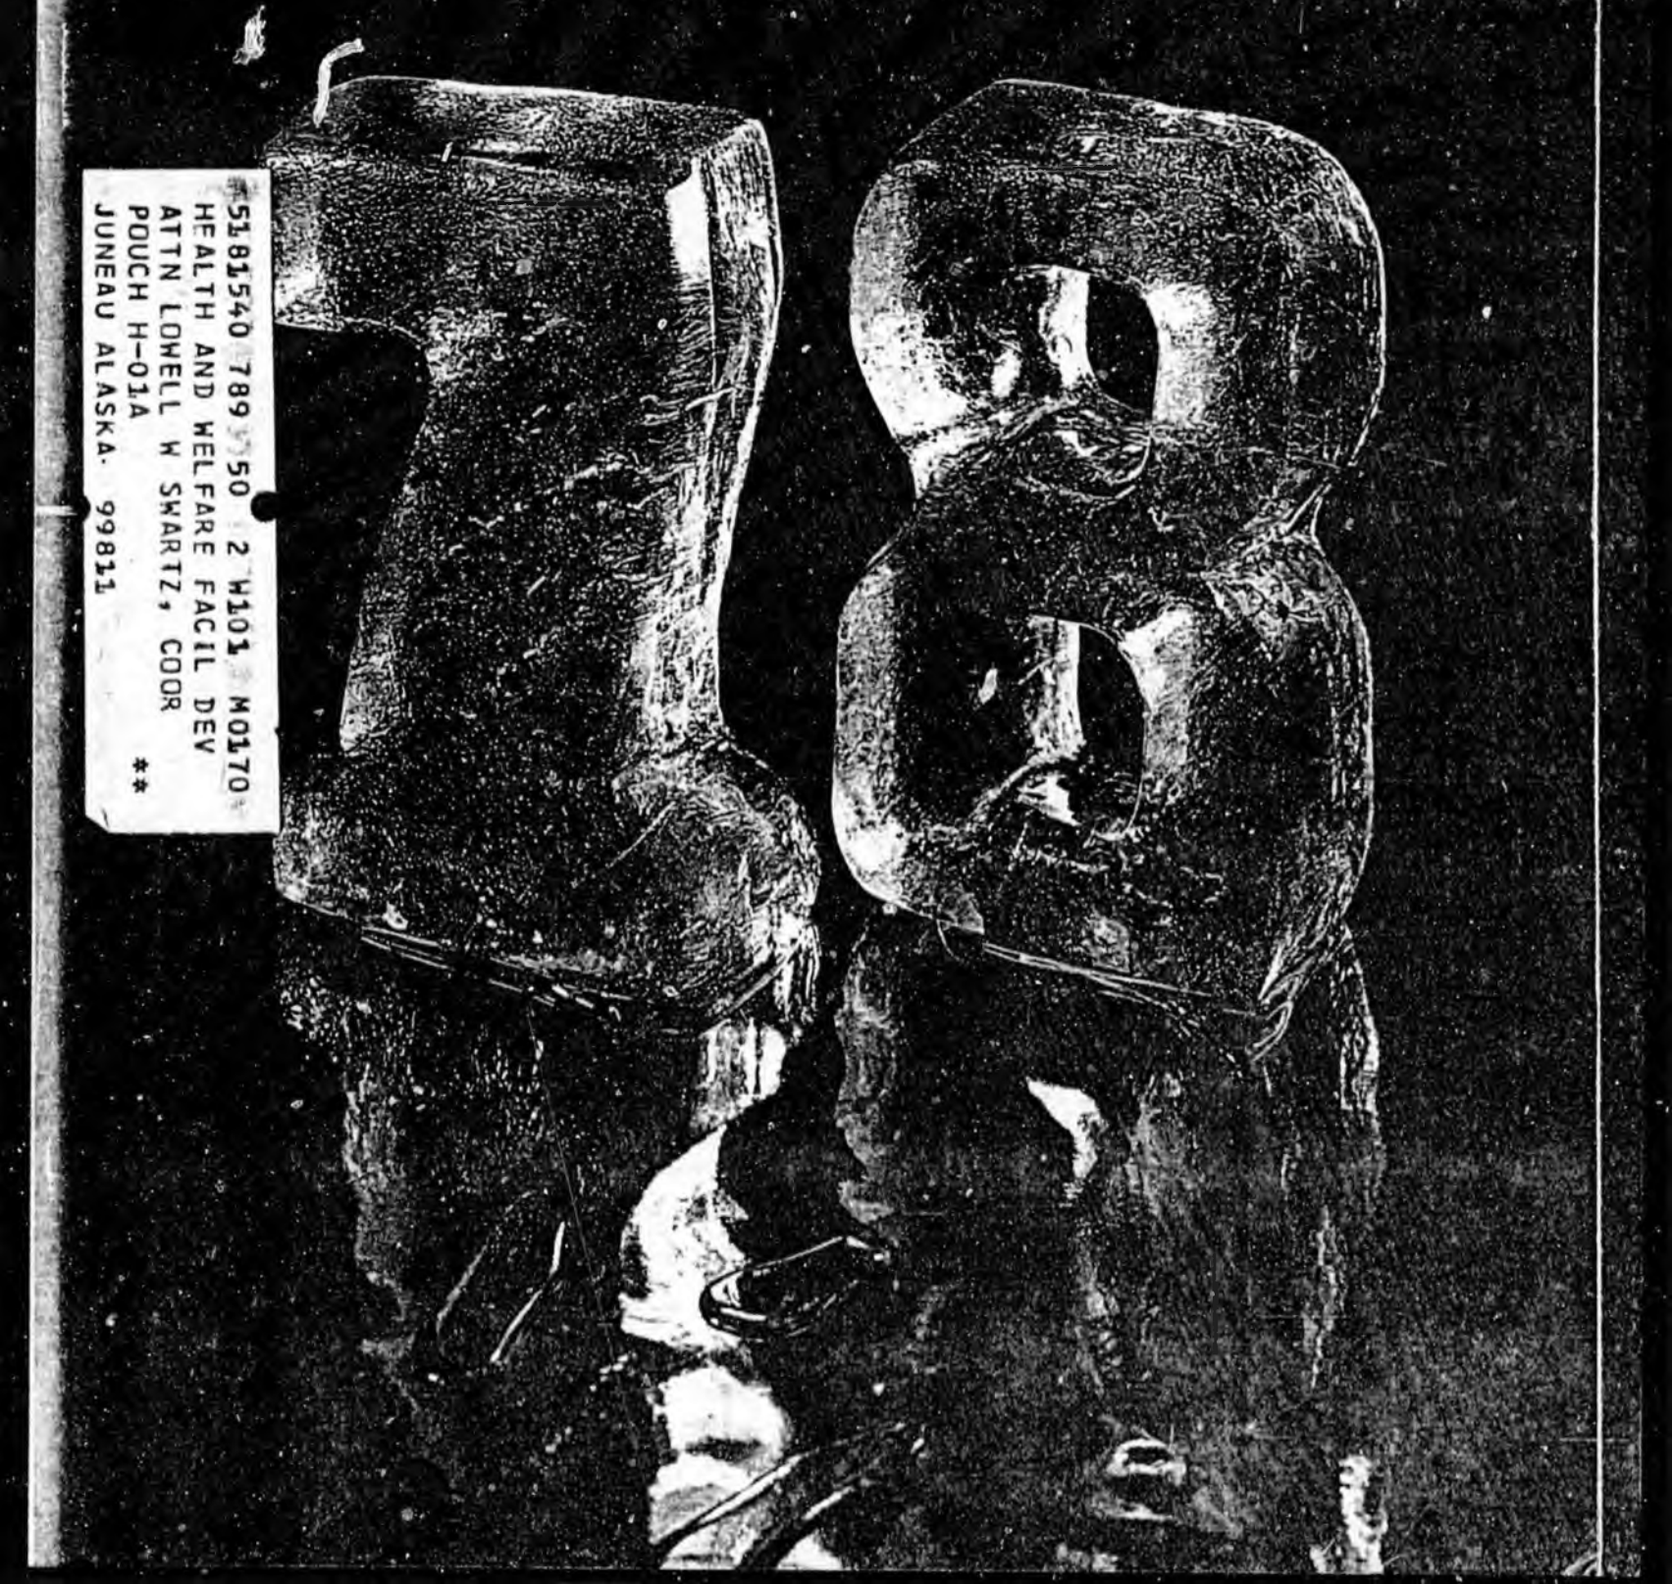
"The system serves as a constant reminder that there is a way and a role for private enterprise to show its concern for people who are institutionalized."

"Our employees are devising methods of making the system portable so that a maximum number of our residents, located in separate wards, might enjoy the excellent sound reproduction."

"The Entertainment System has been installed in our main hospital dining room, where approximately 400 patients will now have the opportunity of listening to background music during meal periods."

"I hope that you have an idea of the limited recreation budget in a state hospital so that you will know just how much this fine system will add to the pleasure of our patients."

"Our kids are deriving a tremendous amount of pleasure from this great audio equipment."



In addition, this program was a valuable undertaking for the AHA, enabling it to provide a tangible benefit to its member institutions and their patients and providing it with an opportunity to work effectively with a segment of private business. ■

SUBJECT: House Bill 2 - Mental Illness

TO: Senator Glenn Hackney

FROM: Kenneth E. Vassar, Legislative Counsel

I would like to bring to your attention a typographical error which is in CSHB 2 (Rules). It is in the definition of "provider of outpatient care" on page 3 , lines 18 - 22 of that bill. A line was inadvertently deleted from the definition. This error can be cured by the following amendment:

Page 34, line 21

Before "by" insert the following:

"patients who are ordered to undergo involuntary outpatient treatment"

KEV:nem

Alaska State Legislature

Pouch V
State Capitol
Juneau, Alaska 99811

March 17, 1979

The Honorable Terry Gardiner
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

In recommending passage of HB 2, it is the intent of the Judiciary Committee that:

1. No funds be diverted from existing community mental health centers to carry out this legislation.

2. Not all facilities be designated at once, rather that the designation program start with a few key facilities and expand as agreements can be negotiated and funds become available.

3. In designation of facilities consideration should be given to surplus capacity in existing hospitals and medical facilities.

Sincerely,

Charles H. Parr
Chairman

FISCAL NOTE
CS FOR HOUSE BILL 2 (Judiciary) **Revised**

III. ANALYSIS

The first fiscal impact is the requirement of Article 8, 47.30.700. In community programs where a single mental health professional is employed and service demands are already high, we project a need to add an additional mental health professional. This would be an immediate first-year need. Each staff and related salary costs is projected at 50.0:

8 X 50.0 = 400.0 new community resources.

FY 81 following this will become a part of the regular program costs.

All in BRU Community Mental Health Grants, 03-36-03, Object Code 700.

The Department would project some increase in escort and transportation costs associated with the required periodic hearings in AS 12.45.090 and AS 12.45.110.

Year 1 will require a full review of at least 10 patients currently in Atascadero. Each patient requires 2 trooper escorts, therefore, 4 round trips X 10 patients = 40 round trips @ $400 = 16.0. 2 days per diem for 2 troopers for 30 trips = 60 days per diem @ $50 = 3.0.

Year FY 81 thereafter we project 4 new cases per year.
5 round trips each = 2.0.
4 days per diem X 4 trips = 16 days @ $50 = .8.

All in BRU Contract Forensic Service, 03-36-02, Object Code 200.

The cost of designating a facility is projected as the associated costs of one professional who must assume the designated title as the head of the designated facility. The projected schedule and cost is:

1980 - Fairbanks, Juneau @ 50. = 100.0
1981 - Ketchikan, Kodiak @ 50. = 100.0
1982 - Valdez @ 50. = 50.0
1983 - Kenai, Bethel @ 65. = 130.0
1984 - Nome @ 70. = 70.0

All in Contract Forensic Service 03-36-02, Object Code 300.

We project an increase in State costs associated with patients in the new designated facilities. When no other party is found to pay these expenses, the emergency hospital fund of the Division of Mental Health and Developmental

Disabilities must make payment. Costs are estimated at bed years on a statewide basis (1 bed year is 365 X daily cost).

1980 5 bed years @ 185/day = 337.6
1981 6 bed years @ 203/day = 444.6
1982 7 bed years @ 223/day = 569.8
1983 8 bed years @ 246/day = 718.3
1984 8 bed years @ 270/day = 788.4

All in Regional Community Mental Health Services, 03-36-03, Object Code 700.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

This act provides for new hearing procedures for involuntary committment for persons suffering from mental illness. Probable cause hearings, (with right of defense counsel) are to be held according to the following schedule:

1. 72 hours 2. 14 days 3. 90 days, 4. 120 days
5. every 120 day period thereafter.

An indigent respondent is entitled to be represented by the Public Defender Agency. In addition, the respondent is entitled to have his/her own medical professional testi-

This new hearing schedule would require an additional attorney in Anchorage, plu legal secretary. Six thousand dollars would be needed in contractual services to pay for expert testimony.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

The primary fiscal impact of HB 2 on the Alaska Court System will come in two areas: 1) increased number of hearings will require additional professional and clerical staff time; 2) the Court System must , when requested, appoint and pay for independent physicians to examine patients prior to the hearing held within 14 days of their commitment. This analysis looks at each cost area separately.

The Court System, in conjunction with the staff of API, has developed rough estimates of the number of hearings required under HB 2. These estimates are:

72 hour hearing - 200-250/year
14 day hearing - 150/year
90 day hearing 10-20/year

IV. DATE February 26, 1979 PREPARED BY Richard P. Barrier
AGENCY Alaska Court System
PHONE 264-0545

Original: Legislative Finance
cc: Budget and Management
Prime Sponsor (First Legislator Named)

At the present time, the court is conducting 50-100 hearings per year, which require an average of one afternoon per week for 2 hours. Hearings are conducted at API, and the Probate Master and In-Court Clerk for the Court System travel to API for the hearings. It is projected that the increase of approximately 300 hearings/year will add about 7 hours/week to the hearing schedule, or roughly 20 percent of a full-time work week. The Attorney General, API staff, and generally the Public Defender also must attend each of these hearings.

In addition to in-court time, the calendaring, noticing, and clerical follow-up of the additional hearings will require approximately 20 percent of a full-time clerical position.

The personnel cost associated with this bill is therefore:

Probate Master	(Range 24)	$38,868	X	20%	=	7,774
In-Court Clerk	(Range 12)	16,296	X	20%	=	3,259
Court Clerk	(Range 10)	14,328	X	20%	=	2,866
						13,899
		Benefits at 30%				4,169
						$18,068

The cost to the Court System for psychiatric examination by independent physicians is projected as follows:

150 evaluations at $200 = $30,000

The projected fiscal impact for FY 80 reflects 75 percent of a total year's cost, due to the October 1, 1979 effective date. The following years are projected at 6 percent inflation increases.

COMPARISON - AS 47.30 and CS FOR HOUSE BILL 2
4/9/80

CURRENT STATUTE

NEW SECTION

CSHB 2

* Section 1. AS 47.30 is amended by adding new sections to read:

ARTICLE 6. MENTAL HEALTH PROGRAM.

Sec. 47.30.655. PURPOSE. The purpose of this major revision of Alaska civil commitment statutes is to more adequately protect the legal rights of persons suffering from mental illness. The legislature has attempted to balance the individual's constitutional right to physical liberty and the state's interest in (1) protecting society from persons who are dangerous to others; and (2) protecting persons who are dangerous to themselves, by providing due process safeguards at all stages of commitment proceedings. In addition, the following principles of modern mental health care have guided this revision:

(1) that persons be given every opportunity to accept voluntary treatment before involvement with the judicial system;

(2) that persons be treated in the least restrictive alternative environment consistent with their treatment needs;

(3) that treatment occur as promptly as possible and as close to the individual's home as possible;

(4) that a system of mental health community facilities and supports be available;

(5) that patients be informed of their legal rights and be informed of and allowed to participate in their treatment program as much as possible;

(6) that persons who are mentally ill but not dangerous to others be committed only if there is a reasonable expectation of improving their mental condition.

CURRENT STATUTE

Sec. 47.30.010. Powers and duties of department. (a) The department is the mental health authority of the state, and shall (1) develop and submit to the surgeon general of the United States Public Health Service, and administer a complete and comprehensive program for the prevention of mental illness and the care and treatment of the mentally ill, including in-patient and out-patient care and treatment; (2) take the actions and undertake the obligations which are necessary to participate in federal grants-in-aid programs and accept federal or other financial aid from whatever sources for the study, examination, care and treatment of the mentally ill; and (3) shall administer AS 47.30.010 — 47.30.340.

(b) The department may

(1) designate, operate, and maintain hospitals and other health facilities equipped and qualified to provide in-patient and out-patient care and treatment for the mentally ill;

(2) take the actions necessary to carry out a program for the prevention of mental illness or for the furnishing of in-patient and out-patient care or treatment for the mentally ill, including the procurement of services of specialists or other persons on a contractual or other basis;

(3) provide for the hospitalization of mentally ill patients in designated hospitals;

(4) enter into arrangements with the surgeon general of the public health service for the care or treatment of the mentally ill in hospitals of the public health service in the state or in another state;

(5) enter into contracts with hospitals for the custody and care or treatment of the mentally ill;

(6) enter into contracts which incorporate safeguards consistent with AS 47.30.010 — 47.30.340 and the preservation of the civil rights of the patients with another state for the custody and care or treatment of patients previously committed from this state under 48 U.S.C. § 46 et seq., and P.L. 830, 84th Congress, 2nd Session, 70 Stat. 709;

(7) prescribe the form of applications, records, reports, and medical certificates required by AS 47.30.010 — 47.30.340;

CSHB 2

Sec. 47.30.660. POWERS AND DUTIES OF DEPARTMENT. The department is the mental health authority of the state and shall

(1) administer a comprehensive program for the prevention of mental illness and the care and treatment of the mentally ill, including inpatient and outpatient care and treatment and the procurement of services of specialists or other persons on a contractual or other basis;

(2) take the actions and undertake the obligations which are necessary to participate in federal grants-in-aid programs and accept federal or other financial aid from whatever sources for the study, examination, care, and treatment of the mentally ill;

(3) administer AS 47.30.655 - 47.30.915;

(4) designate, operate, and maintain treatment facilities equipped and qualified to provide inpatient and outpatient care and treatment for the mentally ill;

(5) provide for the placement of mentally ill patients in designated treatment facilities;

(6) enter into arrangements with governmental agencies for the care or treatment of the mentally ill in facilities of the governmental agencies in the state or in another state;

(7) enter into contracts with treatment facilities for the custody and care or treatment of the mentally ill;

CURRENT STATUTE

(8) require reports from the head of a hospital concerning the care of patients;

(9) visit each hospital to review methods of care or treatment for patients;

(10) investigate complaints made by a patient or an interested party on behalf of a patient;

(11) delegate upon mutual agreement to another office or agency of it, or a political subdivision of this state, or a hospital designated, any of the duties and powers imposed upon it by AS 47.30.010 — 47.30.340; and

(12) provide for and pay the costs of transportation of patients and of the attendants who are needed, if transportation is necessary to secure appropriate examinations or hospitalization of the mentally ill, or for returning a patient discharged or placed on convalescent status from a hospital to his home or place of convalescence. (§ 102 ch 87 SLA 1957)

ARTICLE 7. VOLUNTARY ADMISSION FOR TREATMENT.

Sec. 47.30.670 STANDARDS FOR VOLUNTARY ADMISSION. A person 14 years of age or older may be voluntarily admitted to a treatment facility if he is suffering from mental illness and he voluntarily signs the admission papers.

Sec. 47.30.675. NOTICE OF RIGHTS. (a) Upon application for voluntary admission a person shall be given a copy of the following documents which shall be explained to him as necessary:

(1) notice of rights as set out in AS 47.30.825 - 47.30.865 and an explanation of any document served upon him; and

(2) notice that should he desire to leave at a time when the treatment facility determines that he is mentally ill and as a result is likely to cause serious harm to himself or others or is gravely disabled, the faciiity could initiate commitment proceedings against him.

(b) If the applicant for voluntary admission does not understand English, the explanation shall be given in a language he understands.

Sec. 47.30.680. DISCHARGE OF VOLUNTARY PATIENTS. The professional person in charge of the treatment facility or his designee shall discharge any patient who no longer meets the standards established in AS 47.30.670.

CURRENT STATUTE

NEW SECTION

CSHB 2

Sec. 47.30.685. NOTICE OF INTENT TO LEAVE FACILITY; COMMITMENT. A voluntary patient who is 14 years of age or older and who desires to leave a treatment facility must submit to the facility a written notice of intent to leave on a form provided to him by the facility. Upon immediate investigation, the professional person in charge of the treatment facility or a designated mental health professional shall evaluate the patient in writing and discharge the patient immediately or give him written notice that involuntary commitment proceedings will be initiated against him. The treatment facility may detain the patient for no more than 48 hours after receipt of the patient's notice of intent to leave in order to initiate involuntary commitment proceedings.

Sec. 47.30.690. VOLUNTARY ADMISSION OF MINORS UNDER 14 YEARS OF AGE. (a) A minor under the age of 14 may be admitted for 30 days evaluation, diagnosis and treatment at a designated treatment facility if his parent or guardian signs the admission papers and if, in the opinion of the professional person in charge of the facility,

(1) he is gravely disabled or is suffering from mental illness and as a result he is likely to cause serious harm to himself or others;

(2) there is no less restrictive alternative available for his treatment; and

(3) there is reason to believe that the patient's mental condition could be improved by the course of treatment.

CURRENT STATUTE

New Section

CSHB 2

(b) The minor may be released by the treatment facility at any time during the 30-day period if the professional person in charge of the facility or his designated mental health professional determines the minor would no longer benefit from continued hospitalization and the minor is not dangerous. The minor's parents or his guardian must be notified by the facility of the contemplated release and that, unless they initiate involuntary commitment proceedings, the minor will be released.

Sec. 47.30.695. NOTICE OF REQUEST FOR RELEASE OF MINORS UNDER 14 YEARS OF AGE FROM VOLUNTARY DETENTION AND COMMITMENT. The parent or guardian of any minor who is less than 14 years of age may request and obtain immediate release of the minor at any time.

CURRENT STATUTE

Sec. 47.30.070. Hospitalization upon court order. (a) An interested party, a licensed physician, a peace officer or the head of an institution in which an individual is hospitalized, or the department may, by filing an application with the superior court, start proceedings for the hospitalization of an individual by judicial commitment.

(b) On receipt of a . application, the superior court shall give notice of the commencement of proceedings to the proposed patient, to his legal guardian, and to other interested parties.

(c) As soon as practicable after notice of the commencement of proceedings is given, the superior court shall appoint one or more designated examiners to examine the proposed patient and report within 48 hours to the court their findings as to the mental condition of the patient and his need for care or treatment in a hospital. The court may consider the choice of the patient in appointing an examiner. If the designated examiner reports that the proposed patient refuses to submit to an examination, the court shall give notice to the proposed patient and order him to submit to the examination. The order may direct that he be taken into custody and detained pending a hearing.

(d) The examination shall be held at a hospital or other medical facility, at the home of the proposed patient, or at another suitable place, inside or outside this state, not likely to have a harmful effect on his health.

(e) If the report of the designated examiner states that the proposed patient is not mentally ill, the court shall terminate the proceedings and dismiss the application. Otherwise, the court shall immediately fix a date for a hearing and give notice of the hearing. The hearing shall be held not more than 15 days from receipt of the report of the designated examiner.

(f) The proposed patient, the applicant, the legal guardian and other interested parties, as determined by the superior court, shall be given notice of the hearing and an opportunity to appear at the hearing, to testify, and to present and cross-examine witnesses. The court may, in its discretion, receive the testimony of any other person. The proposed patient shall not be required to be present, and the court may exclude all persons not necessary for the conduct of the proceedings.

(g) The hearing shall be conducted as informally as is consistent with orderly procedure and in a physical setting not likely to have a harmful effect on the mental health of the proposed patient. The entire proceedings may be recorded stenographically or with the use of mechanical recording devices which the superior court approves. The

CSHB 2

ARTICLE 8. INVOLUNTARY ADMISSION FOR TREATMENT.

Sec. 47.30.700. INITIATION OF INVOLUNTARY COMMITMENT PROCEDURES. (a) Upon petition of any adult person, a judge shall immediately conduct a screening investigation or direct a local mental health professional employed by the department or by a program which receives money from the department under AS 47.30.520 - 47.30.620 to conduct a screening investigation of the person alleged to be mentally ill and, as a result of that condition, alleged to be gravely disabled or to present a likelihood of serious harm to himself or others. Within 48 hours after the completion of the screening investigation, a judge may issue an ex parte order orally or in writing, stating that there is probable cause to believe a person is mentally ill and that condition causes the person to be gravely disabled or to present a likelihood of serious harm to himself or others. The court shall provide findings on which the conclusion is based, appoint an attorney to represent the respondent, and may direct that a peace officer take the person into custody and deliver him to the nearest designated appropriate facility for emergency examination or treatment. The ex parte order shall be provided to the respondent and made a part of the respondent's clinical record.

(b) The petition required in (a) of this section shall allege that the respondent is reasonably believed to present a likelihood of serious harm to himself or others or is gravely disabled as a result of mental illness and shall specify the factual information on which that belief is based including the names and addresses of all persons known to the petitioner who have knowledge of those facts through personal observation.

CURRENT STATUTE

CSHB 2

court shall prepare and maintain a summary record of all relevant and material evidence which is offered concerning the mental condition and the residence of the proposed patient and may relax the rules of evidence to the extent of receiving affidavits, certificates of licensed physicians and other writings of similar apparent authenticity and reliability.

(h) An opportunity to be represented by counsel or advisor shall be given to the proposed patient, and if neither he nor others provide counsel or advisor, the superior court shall appoint a counsel or advisor. If not less than two days before the date fixed for the hearing, the proposed patient or his counsel or advisor files a written request with the superior court, the court shall summon and impanel a jury of six adult residents of the judicial district in which the court officiates, preferably from the court's jury list or the last voters' list, if available, to hear and consider the evidence concerning the mental condition and residence of the proposed patient.

(i) The superior court shall terminate the proceedings and dismiss the application upon completion of the hearing and consideration of the record, except that the court shall order the hospitalization of the proposed patient for an indeterminate period if the court or the jury finds the proposed patient is mentally ill and (1) because of his illness is likely to injure himself or others if allowed to remain at liberty; or (2) is in need of immediate care or treatment in a hospital, and because of his illness, lacks sufficient insight or capacity to make responsible decisions concerning hospitalization.

(j) If the superior court orders the hospitalization of the proposed patient, a finding shall be made as to the residence of the patient. A copy of the finding and the summary of proceeding shall accompany the patient to the hospital. The order of hospitalization shall be directed to the department. The department shall assure the order's execution.

(k) Notwithstanding any other provision of AS 47.30.010 — 47.30.340, except AS 47.30.170, commitment proceedings under this section shall not be commenced with respect to a patient admitted under AS 47.30.020 unless release of the patient is first requested in accordance with AS 47.30.050.

(l) An order for hospitalization under this section is not a judicial determination of legal incompetency, except to the extent provided in AS 47.30.130(b). Proceedings for a determination of legal incompetency and the appointment of a guardian for a patient who has been ordered hospitalized may be started before, during or after proceedings under this section, if the circumstances of the case require and the condition of the patient permits. (§ 103 ch 87 SLA 1957; am §§ 5 — 7 ch 127 SLA 1959)

COMPARISON - AS 47.30 and CS FOR HOUSE BILL 2
4/9/80

CURRENT STATUTE

This section and AS 47.30.060 are silent on burden and standard of proof. State v. Alto, Sup. Ct. Op. No. 1777 (File No. 3748), 589 P.2d 402 (1979).

Different treatment of persons civilly committed by reason of insanity and of persons acquitted of crime by reason of insanity. — See State v. Alto, Sup. Ct. Op. No. 1777 (File No. 3748), 589 P.2d 402 (1979).

Cited in Clark v. State, Sup. Ct. Op. No. 187 (File No. 311), 388 P.2d 816 (1964); Kostic v. Smedley, Sup. Ct. Op. No. 103 (File No. 2140), 522 P.2d 535 (1974).

Sec. 47.30.030. Emergency hospitalization. (a) If the certificate by a licensed physician under AS 47.30.020 states a belief that the individual is likely to injure himself or others if allowed to remain at liberty, or is in need of immediate hospitalization, an interested party or peace officer may, upon endorsement of the certificate for this purpose by the department or by a superior court, take the individual into custody, apply to a designated hospital for his admission, and transport him to the hospital.

(b) An interested party or peace officer who has good and valid reason to believe that an individual is mentally ill, and because of his illness is likely to injure himself or others if not immediately restrained, may, pending examination or certification by a licensed physician, or pending endorsement of the certification as provided in (a) of this section, take the individual into custody, and transport him to the most accessible medical facility and obtain a certificate for endorsement under (a) of this section, or take the steps which are necessary to arrange for a judicial commitment under AS 47.30.070. Transportation shall be allowed as is set out in AS 47.30.110. The application for admission shall state the circumstances under which the individual was taken into custody and the reason for the belief.

(c) AS 47.30.010 — 47.30.340 do not limit the availability and utilization of designated hospitals or designated parts of them for other appropriate purposes except that the use of the designated hospitals or parts of them shall be primarily for the care and treatment of the mentally ill. (§ 104 ch 87 SLA 1957)

CSHB 2

Sec. 47.30.705. EMERGENCY DETENTION FOR EVALUATION. A peace officer who has probable cause to believe that a person is gravely disabled or is suffering from mental illness and is likely to cause serious harm to himself or others of such an immediate nature that considerations of safety do not allow initiation of involuntary commitment procedures set out in AS 47.30.700, may cause the person to be taken into custody and delivered to a treatment or evaluation facility. Upon arrival at the treatment facility, the peace officer shall complete an application for examination of the person in custody and be interviewed by a mental health professional at the facility.

CURRENT STATUTE

CSHB 2

REFER TO AS 47.30.705

Sec. 47.30.090. Detention under special circumstances. (a) Pending removal to a hospital, a patient taken into custody under AS 47.30.030 or AS 47.30.070 or ordered hospitalized under AS 47.30.070 or pending the hearing under AS 47.30.070 may be detained in a medical facility, his home, a licensed foster home, or any other suitable facility under the reasonable conditions which the department fixes. The patient shall not, except because of and during an extreme emergency, be detained in a nonmedical facility used for the detention of individuals charged with or convicted of penal offenses. The department shall take the reasonable measures, including provision for medical care, which are necessary to assure proper care of an individual temporarily detained under this section.

(b) No patient may be released or discharged from custody during the pendency of proceedings for judicial hospitalization if, in the opinion of the head of the hospital, it would be unsafe to the patient or others, unless the superior court, upon the application of the patient or an interested party, determines justifiable reason exists for release or discharge.

(c) No patient held on order of a court in an action or proceeding arising out of a criminal offense may be discharged except after 15 days' written notice to the court. (§ 110 ch 87 SLA 1957)

COMPARISON - AS 47.30 and CS FOR HOUSE BILL 2
4/9/80

CURRENT STATUTE

Sec. 47.30.040. Newly-admitted patients. (a) The head of a designated hospital shall have a preliminary examination of each patient held within 48 hours after the close of the day of his admission by a designated examiner, to determine if there is a reasonable necessity existing for the patient's continued hospitalization and immediate medical attention.

(b) At the end of the 48 hours, a patient admitted under AS 47.30.020 or AS 47.30.030, shall be discharged without application if a preliminary examination has not been held or if, upon examination, the designated examiner refuses or fails to certify to the head of the designated hospital that in his opinion the patient is mentally ill and is either likely to injure himself or others if allowed at liberty, or in need of care or treatment in a hospital and because of his illness lacks sufficient insight or capacity to make responsible decisions concerning it. All other patients shall be discharged when, in the opinion of the head of the designated hospital, there is no further need for their hospitalization. Notice of discharge shall be given to the department and the court or person responsible for the order of hospitalization, who shall have an additional 48 hours within which to make other arrangements under AS 47.30.070 or otherwise.

(c) A patient admitted under AS 47.30.020 or AS 47.30.030 may remain for treatment on a voluntary basis under the same conditions prescribed for patients admitted under AS 47.30.020, with the conditions stated in AS 47.30.050 applying with respect to discharge. If a patient admitted under AS 47.30.020 or AS 47.30.030 elects to remain for treatment on a voluntary basis, the head of the designated hospital in that instance shall ascertain that the patient has at the time sufficient insight or capacity to make responsible application for his own hospitalization and the head of the hospital or his designee shall certify his opinion to this. Notice of the patient's decision to remain on a voluntary basis shall be given to the court that issued the order. (§ 105 ch 87 SLA 1957; am § 4 ch 127 SLA 1959)

CSHB 2

Sec. 47.30.710. EXAMINATION. (a) A patient who is delivered under AS 47.30.700 or 47.30.705 for emergency examination and treatment to a treatment facility shall be thoroughly examined and evaluated as to his mental and physical condition by a mental health professional and by a physician within 24 hours after arrival at the facility.

(b) If the mental health professional who performs the emergency examination has reason to believe that the patient is (1) mentally ill and that condition causes the person to be gravely disabled or to present a likelihood of serious harm to himself or others, and (2) is in need of care or treatment, the mental health professional may hospitalize him on an emergency basis. If a judicial order has not been obtained under AS 47.30.700, the mental health professional shall apply for an ex parte order authorizing hospitalization for emergency treatment.

Sec. 47.30.715. ACCEPTANCE OF ORDER. When a facility receives a proper order for evaluation, it must accept the order and the person for an evaluation period not to exceed 72 hours. The facility shall promptly notify the court of the date and time of the respondent's arrival. The court shall set a date, time and place for a 14-day commitment hearing, to be held if needed within 72 hours after the respondent's arrival, and the court shall notify the facility, the respondent, his attorney, and the prosecuting attorney of the hearing arrangements. Evaluation personnel, where used, shall similarly notify the court of the date and time when they first met with the respondent.

CURRENT STATUTE

Sec. 47.30.120. Notice of hospitalization. When a patient is admitted to a hospital under AS 47.30.010 — 47.30.340 other than upon his own application, the head of the designated hospital shall notify immediately the patient's legal guardian, parent, spouse, or next of kin, if known. The head of the designated hospital admitting an individual under a provision of AS 47.30.010 — 47.30.340, or discharging an individual so admitted, shall immediately make a report of the discharge to the superior court and to the department. (§ 114 ch 87 SLA 1957)

CSHB 2

Sec. 47.30.720. RELEASE BEFORE EXPIRATION OF 72-HOUR PERIOD. If at any time in the course of the 72-hour period the mental health professionals conducting the evaluation determine that the respondent does not meet the standards for commitment specified in AS 47.30.700, the respondent shall be discharged from the facility or the place of evaluation by evaluation personnel and the petitioner and the court so notified.

Sec. 47.30.725. COMMITMENT PROCEEDING RIGHTS; NOTIFICATION. (a) When a person is detained for evaluation under this chapter, he shall be immediately notified orally and in writing of his rights under this section. Notification shall be in a language understood by the respondent. His guardian, if any, and if the respondent requests, an adult designated by the respondent, shall also be notified of the respondent's rights under this section.

(b) Unless a person is released or voluntarily admits himself for treatment within 72 hours of his arrival at the facility or, if he is evaluated by evaluation personnel, within 72 hours from the beginning of his meeting with evaluation personnel, he is entitled to a court hearing to be set for not later than the end of that 72-hour period to determine whether there is cause to detain him after the 72 hours have expired for up to an additional 14 days on the grounds that he is gravely disabled or mentally ill and as a result presents a likelihood of serious harm to himself or others. The facility or evaluation personnel shall give notice to the court of the releases and voluntary admissions under AS 47.30.700 - 47.30.820.

CURRENT STATUTE

CSHB 2

(c) The respondent has a right to communicate immediately, at the department's expense, with his guardian, if any, or an adult designated by the respondent and the attorney designated in the ex parte order, or any attorney of the respondent's choice.

(d) The respondent has the right to be represented by an attorney, to present evidence and to cross-examine witnesses who testify against him at the hearing.

(e) The respondent has the right to be free of the effects of medication and other forms of treatment to the maximum extent possible before the 14-day commitment hearing; however, the facility or evaluation personnel shall be able to treat him with medication under prescription by a licensed physician or a less restrictive alternative of his preference if, in the opinion of a licensed physician and another mental health professional, these treatments are necessary to

(1) prevent bodily harm to the respondent or others;

(2) prevent such deterioration of the respondent's mental condition that subsequent treatment might not enable him to recover; or

(3) allow the respondent to prepare for and participate in the proceedings.

(f) A respondent, if he is represented by counsel, may waive, orally or in writing, the 72-hour time limit on the 14-day commitment hearing and have the hearing set for a date no more than seven calendar days after his arrival at the facility. The respondent's counsel shall immediately notify the court of the waiver.

CURRENT STATUTE

CSHB 2

Sec. 47.30.730. PROCEDURE FOR 14-DAY COMMITMENT; PETITION FOR COMMITMENT. (a) In the course of the 72-hour evaluation period, a petition for commitment to a treatment facility may be filed in court. The petition must be signed by two mental health professionals who have examined the respondent. The petition must

(1) allege that the respondent is mentally ill and as a result is likely to cause harm to himself or others or is gravely disabled;

(2) allege that the evaluation staff has considered but has not found that there are any less restrictive alternatives available that would adequately protect the respondent or others; or, if a less restrictive involuntary form of treatment is sought, specify the treatment and the basis for supporting it;

(3) allege with respect to a gravely disabled respondent that there is reason to believe that the respondent's mental condition could be improved by the course of treatment sought;

(4) allege that a specified treatment facility or less restrictive alternative that is appropriate to the respondent's condition has agreed to accept the respondent;

(5) allege that the respondent has been advised of the need for, but has not accepted, voluntary treatment, and request that the court commit the respondent to the specified treatment facility or less restrictive alternative for a period not to exceed 14 days;

(6) list the prospective witnesses who will testify in support of commitment or involuntary treatment;

CURRENT STATUTE

CSHB 2

(7) list the facts and specific behavior of the respondent supporting the allegation in (1) of this subsection.

(b) A copy of the petition shall be served on the respondent, his attorney, and his guardian, if any, before the 14-day commitment hearing.

Sec. 47.30.735. 14-DAY COMMITMENT. (a) Upon receipt of a proper petition for commitment, the court shall hold a hearing at the date and time previously specified according to procedures set out in AS 47.30.-715.

(b) The hearing shall be conducted in a physical setting least likely to have a harmful effect on the mental or physical health of the respondent, within practical limits. At the hearing, in addition to other rights specified in this chapter, the respondent has the right

(1) to be present at the hearing; this right may be waived only with the respondent's informed consent; if the respondent is incapable of giving informed consent, the respondent may be excluded from the hearing only if the court, after hearing, finds that the incapacity exists and that there is a substantial likelihood that the respondent's presence at the hearing would be severely injurious to his mental or physical health;

(2) to view and copy all petitions and reports in the court file of his case;

(3) to have the hearing open or closed to the public as he elects;

(4) to be proceeded against according to the rules of evi-

CURRENT STATUTE

CSHB 2

dence applicable to civil proceedings;

(5) to have an interpreter if he does not understand English;

(6) to present evidence on his behalf;

(7) to cross-examine witnesses who testify against him;

(8) to remain silent.

(c) At the conclusion of the hearing the court may commit the respondent to a treatment facility for not more than 14 days if it finds, by clear and convincing evidence, that the allegations required in AS 47.30.730(a) are true.

(d) If the court finds that there is a viable less restrictive alternative available and that the respondent has been advised of and refused voluntary treatment through the alternative, the court may order the less restrictive alternative treatment for not more than 14 days.

(e) The court shall specifically state to the person committed, and give the person written notice, that if commitment or other involuntary treatment beyond the 14 days is to be sought, the person shall have the right to a full hearing or jury trial.

Sec. 47.30.740. PROCEDURE FOR 90-DAY COMMITMENT FOLLOWING 14-DAY COMMITMENT. (a) At any time during the respondent's 14-day commitment, the professional person in charge of the treatment facility to which the person has been confined, or his professional designee, may file with the court a petition for 90-day commitment of that person. The petition must include all material required under AS 47.30.730(a) except that references to "14 days" shall be read as "90 days"; and

CURRENT STATUTE

CSHB 2

(1) allege that the respondent has attempted to inflict or has inflicted serious bodily harm upon himself or another since his acceptance for evaluation, or that he was committed initially as a result of conduct in which he attempted or inflicted serious bodily harm upon himself or another, or that he continues to be gravely disabled;

(2) allege that the respondent has received appropriate and adequate care and treatment during his 14-day commitment;

(3) be verified by the professional person in charge of the facility providing treatment during the 14-day commitment, or his professional designee.

(b) The court shall have copies of the petition for 90-day commitment served upon the respondent, his attorney, and his guardian, if any. The petition for 90-day commitment and proofs of service shall be filed with the clerk of the court, and a date for hearing shall be set, by the end of the next judicial day, for not later than five judicial days from the date of filing of the petition. The clerk shall notify the respondent, his attorney, and the petitioner of the hearing date at least three judicial days in advance of the hearing.

(c) Findings of fact relating to the respondent's behavior made at a 14-day commitment hearing under AS 47.30.735 shall be admitted as evidence and may not be rebutted except that newly discovered evidence may be used for the purpose of rebutting the findings.

CURRENT STATUTE

CSHB 2

Sec. 47.30.745. 90-DAY COMMITMENT HEARING RIGHTS. (a) A person subject to a petition for 90-day commitment has, in addition to the rights specified elsewhere in this chapter, or otherwise applicable, the rights enumerated in this section. Written notice of these rights shall be served on the respondent, his attorney, his guardian, if any, and an adult designated by the respondent at the time the petition for 90-day commitment is served. An attempt shall be made by oral explanation to insure that the respondent understands the rights enumerated in the notice. If the respondent does not understand English, the explanation shall be given in a language he understands.

(b) Unless the respondent is released or voluntarily admits himself following the filing of a petition and before the hearing, he is entitled to a judicial hearing within five judicial days of the filing of the petition as set out in AS 47.30.740(b) to determine whether the allegations required in AS 47.30.740(a) are true. If the respondent voluntarily admits himself following the filing of the petition, the voluntary admission constitutes a waiver of any hearing rights under AS 47.30.740 or under AS 47.30.685. If at any time during the respondent's voluntary admission under this subsection, the respondent submits to the facility a written notice of intent to leave, the professional person in charge of the treatment facility may file with the court a petition for 120-day commitment of the respondent under AS 47.30.770. The 120-day commitment hearing shall be scheduled for a date not earlier than 90 days after the respondent's voluntary admission.

CURRENT STATUTE

CSHB 2

(c) The respondent is entitled to a jury trial upon request filed with the court if the request is made at least two judicial days before the hearing. If the respondent requests a jury trial, the hearing may be continued for no more than 10 calendar days. The jury shall consist of six persons.

(d) If a jury trial is not requested, the court may still continue the hearing at the respondent's request for no more than 10 calendar days.

(e) The respondent has a right to retain an independent licensed physician or other mental health professional to examine him and to testify on his behalf. Upon request by an indigent respondent, the court shall appoint an independent licensed physician or other mental health professional to examine him and testify on his behalf. The court shall give consideration to an indigent respondent's request for a specific physician or mental health professional. A motion for the appointment may be filed in court at any reasonable time before the hearing and shall be acted upon promptly. Reasonable fees and expenses for such expert examiners shall be determined by the rules of court.

(f) The proceeding shall in all respects be in accord with constitutional guarantees of due process and, except as specifically provided in this chapter, the rules of evidence and procedure in civil proceedings.

CURRENT STATUTE

CSHB 2

(g) Until the court issues a final decision, the respondent shall continue to be treated at the treatment facility unless the petition for 90-day commitment is withdrawn. If no decision has been made within 20 days of filing of the petition, not including extensions of time due to jury trial or other requests by the respondent, he shall be released.

Sec. 47.30.750. CONDUCT OF HEARING. The hearing shall be conducted in the same manner, and with the same rights for the respondent, as set out in AS 47.30.735(b).

Sec. 47.30.755. COURT ORDER. (a) After the hearing and within the time limit specified in AS 47.30.745, the court may commit the respondent to a treatment facility for no more than 90 days if the court or jury finds by clear and convincing evidence that the allegations required in AS 47.30.740(a) are true.

(b) If the court finds that there is a less restrictive alternative available and that the respondent has been advised of and refused voluntary treatment through the alternative, the court may order the less restrictive alternative treatment after acceptance by the program of the respondent for a period not to exceed 90 days.

Sec. 47.30.760. PLACEMENT AT CLOSEST FACILITY. Treatment shall always be available at a state-operated hospital; however, if space is available and upon acceptance by another treatment facility, a respondent who is committed shall be placed by the court at the treatment facility closest to his home unless the court finds that

(1) another treatment facility in the state has a program

CURRENT STATUTE

CSHB 2

more suited to the respondent's condition, and this interest outweighs the desirability of the respondent being closer to home;

(2) another treatment facility in the state is closer to the respondent's friends or relatives who could benefit him through their visits and communications; or

(3) the respondent wants to be further removed from his home, and the mental health professionals who sought his commitment concur in the desirability of removed placement.

Sec. 47.30.765. APPEAL. The respondent shall have the right to an appeal from any order of involuntary commitment. The court shall inform the respondent of this right.

Sec. 47.30.770. ADDITIONAL 120-DAY COMMITMENT. (a) The respondent shall be released from involuntary treatment at the expiration of 90 days unless the professional person in charge of the treatment facility, or his designee, files a petition for a 120-day commitment conforming to the requirements of AS 47.30.740(a) except that all references to "14-day commitment" shall be read as "the previous 90-day commitment" and all references to "90-day commitment" shall be read as "120-day commitment".

CURRENT STATUTE

CSHB 2

(b) The procedures for service of the petition, notification of rights and judicial hearing shall be as set out in AS 47.30.740 -47.30.-750. If the court or jury finds by clear and convincing evidence that the grounds for 90-day commitment as set out in AS 47.30.755 are present, the court may order the respondent committed for an additional treatment period not to exceed 120 days from the date on which the first 90-day treatment period would have expired.

(c) Successive 120-day commitments are permissible on the same ground and under the same procedures as the original 120-day commitment. No order of commitment may exceed 120 days.

(d) Findings of fact relating to the respondent's behavior made at a 14-day commitment hearing under AS 47.30.735, a 90-day commitment hearing under AS 47.30.750, or a previous 120-day commitment hearing under this section shall be admitted as evidence and may not be rebutted except that newly discovered evidence may be used for the purpose of rebutting the findings.

CURRENT STATUTE

CSHB 2

Sec. 47.30.775. COMMITMENT OF MINORS. The provisions of AS 47.-30.700 - 47.30.820 are applicable to minors; however, all notices required to be served on the respondent in AS 47.30.700 - 47.30.820 shall also be served on the parent or guardian of respondents who are minors, and parents or guardians of minor respondents shall be notified that they may appear as parties in any commitment proceeding concerning the minor and that as parties they are entitled to retain their own attorney or have one appointed for them by the court. A minor has the same rights to waiver and informed consent as an adult under this chapter; however, he shall be represented by counsel in waiver and consent proceedings.

COMPARISON - AS 47.30 and CS FOR HOUSE BILL 2
4/9/80

CURRENT STATUTE

Sec. 47.30.050. Application for discharge and emergency detention. (a) An individual, 30 days after admission to a designated hospital under AS 47.30.020 or an individual admitted to a designated hospital under AS 47.30.030, shall be immediately discharged upon his request or upon the request in writing of an interested party or peace officer, except that

(1) if admitted upon his own application, his discharge may be conditioned upon his agreement;

(2) if under 18 years of age and admitted under AS 47.30.020, his discharge before becoming 18 years of age may be conditioned upon the consent of his parent or guardian; and

(3) if the head of a designated hospital within 48 hours after receiving the request, files with the superior court a certification that in his opinion the discharge of the patient would be unsafe to the patient or others, the discharge may be postponed for not more than five days to begin commitment proceedings under AS 47.30.070; if the court finds that because of justifiable circumstances, proceedings for judicial hospitalization cannot reasonably be instituted in that time, the discharge may be postponed for not more than 15 days.

(b) The head of the designated hospital shall provide reasonable means and arrangements for informing patients of their right to discharge, as provided in AS 47.30.010 — 47.30.340, and for assisting the patients in making requests for discharge under this section. (§ 106 ch 87 SLA 1957)

Sec. 47.30.060. Petition for judicial determination. A patient who is hospitalized under AS 47.30.020, AS 47.30.030 or AS 47.30.070 may have the need for his continued hospitalization determined or redetermined on his own petition or that of an interested party or a peace officer, to the superior court. On receipt of the petition, the superior court shall conduct proceedings in accordance with AS 47.30.070 except that the proceedings need not be conducted if the petition is filed sooner than (1) six months after the issuance of an order of hospitalization under AS 47.30.070; (2) one year after the filing of a previous petition under this section; or (3) 30 days after the voluntary application and admission of a patient. (§ 107 ch 87 SLA 1957)

Superior courts have exclusive jurisdiction over proceedings under this article. 1959 Op. Att'y Gen., No. 34.

This section and AS 47.30.070 are silent on burden and standard of proof. State v. Alto, Sup. Ct. Op. No. 1777 (File No. 3748), 589 P.2d 402 (1979).

Different treatment of persons civilly committed by reason of insanity and of persons acquitted of crime by reason of insanity. — See State v. Alto, Sup. Ct. Op. No. 1777 (File No. 3748), 589 P.2d 402 (1979).

CSHB 2

Sec. 47.30.780. EARLY DISCHARGE. The professional person in charge of a treatment facility or his designee shall at any time discharge a committed person on the ground that the person is no longer gravely disabled or likely to cause serious harm as a result of mental illness. A certificate to this effect shall be sent to the court which shall enter an order officially terminating the involuntary commitment.

Sec. 47.30.785. AUTHORIZED ABSENCES. A respondent undergoing involuntary treatment on an inpatient basis under this chapter may be given authorization to be absent from the treatment facility during times specified by the professional person in charge of the facility, or his professional designee, when an authorization to be absent is in the himself or others. [illegible]ondent and he is not likely to cause harm to

Sec. 47.30.790. RETURN FROM UNAUTHORIZED ABSENCE. When a respondent undergoing involuntary treatment on an inpatient basis under this chapter is absent from the treatment facility without, or in excess of, authorization under AS 47.30.785, the professional person in charge of the facility or his professional designee may cause the respondent to be taken into custody and returned to the treatment facility.

Sec. 47.30.795. INVOLUNTARY OUTPATIENT CARE FOR COMMITTED PERSONS. (a) A committed person who was not originally committed to involuntary outpatient care under the provisions of this chapter may be released before the expiration of his commitment period on the condition that he receive specified outpatient treatment from a provider of outpatient care, for a length of time not to exceed the duration of his commitment period, when the professional person in charge of the treatment facility or his professional designee finds that

CURRENT STATUTE

Sec. 47.30.200. Release on convalescent status. The head of a designated hospital may release a patient on convalescent status when he believes that convalescent status is in the best interest of the patient. Convalescent status shall, so far as practicable, include provisions for continuing responsibility to and by the hospital, and for a plan of treatment on an out-patient basis or under the direction of a licensed physician. Periodically, at intervals consistent with good medical practice and with existing circumstances, the head of the designated hospital shall re-examine the facts relating to the condition of the patient on a convalescent status and, if he determines that hospitalization is no longer necessary, he shall discharge the patient. (§ 121 ch 87 SLA 1957)

Stated in Clark v. State, Sup. Ct. Op. No. 127 (File No. 311), 388 P.2d 816 (1964).

Sec. 47.30.210. Readmission. Before the discharge of a patient under AS 47.30.200 the head of the designated hospital from which the patient is given convalescent status may readmit the patient. If there is reason to believe that it is to the best interest of the patient to be rehospitalized, the department or head of the designated hospital may issue an order for the immediate rehospitalization of the patient. The order, if not voluntarily complied with, upon the endorsement by the court, authorizes a peace officer to take the patient into custody and transport him to the designated hospital or, if the order is issued by the department, to a hospital designated by it. (§ 122 ch 87 SLA 1957)

Sec. 47.30.220. Discharge upon medical review. The head of a designated hospital shall have the condition of every patient reviewed as often as is consistent with good medical practice. If the head of a designated hospital determines that the conditions justifying hospitalization no longer exist, the patient shall be discharged, even if he was admitted on his own application, notwithstanding AS 47.30.050(a)(1), and the department shall be notified immediately. If the patient was not admitted on his own application, notice of the discharge shall also be given to one of the following persons: the patient's legal guardian, parent, spouse, or next of kin, if known, and, if the patient was hospitalized by judicial process, to the superior court which ordered him committed. (§ 123 ch 87 SLA 1957; am § 12 ch 127 SLA 1959)

Stated in Clark v. State, Sup. Ct. Op. No. 127 (File No. 311), 388 P.2d 816 (1964).

CSHB 2

(1) security for the person or others no longer requires that he be treated on an inpatient basis; and

(2) there is reason to believe that the person's mental condition would improve as a result of the specified outpatient treatment.

(b) A copy of the conditions for early release shall be given to the person, his attorney, his guardian, if any, the provider of outpatient care, and the court.

(c) If at any time during the commitment period the provider of outpatient care determines that the person can no longer be treated on an outpatient basis because he is likely to cause harm to himself or others or is gravely disabled, the provider shall give the patient oral and written notice, with copies to the patient's attorney, his guardian, if any, the court and inpatient treatment facility, that he must return to the inpatient treatment facility within 24 hours for a length of time

CURRENT STATUTE

CSHB 2

not to exceed the duration of his commitment period. If the person fails to arrive at the treatment facility under a 24-hour notice, the facility shall cause the person to be taken into custody and transported to the facility. A peace officer shall assist the provider of outpatient care or the facility if requested.

(d) If the provider of outpatient care determines that the patient will require continued outpatient care after the expiration of his commitment period, the provider is entitled to initiate further commiment proceedings in the same manner as if the provider were the professional person in charge of a treatment facility, and the provisions of this chapter are applicable, except that provisions relating to inpatient treatment shall be read as applicable to outpatient treatment.

Sec. 47.30.800. CONVERSION OF INVOLUNTARY OUTPATIENT TREATMENT TO INPATIENT COMMITMENT. (a) A respondent ordered by the court under the provisions of this chapter to receive involuntary outpatient treatment may be required to undergo inpatient treatment when the provider of outpatient care finds that (1) the respondent is mentally ill and is likely to cause serious harm to himself or others or is still gravely disabled; (2) the respondent's behavior since the hearing resulting in court-ordered treatment indicates that he now needs inpatient treatment to protect himself or others; (3) there is reason to believe that the respondent's mental condition will improve as a result of inpatient treatment; and (4) there is an inpatient facility appropriate to the respondent's need which will accept him as a patient. Treatment for these respondents shall be available at state-operated hospitals at all times.

CURRENT STATUTE

CSHB 2

(b) Upon making the findings specified in (a) of this section, the provisions of AS 47.30.795(b) relating to notice and AS 47.30.745 relating to hearing are applicable.

Sec. 47.30.805. COMPUTING PERIODS OF TIME. (a) Except as provided in (b) of this section,

(1) computations of a 72-hour evaluation period do not include Saturdays, Sundays, legal holidays, or any period of time necessary to transport the respondent to the treatment facility;

(2) a 14-day commitment period expires at the end of the 14th day after the 72 hours following initial acceptance;

(3) a 90-day commitment period expires at the end of the 90th day after the expiration of a 14-day period of treatment;

(4) a 120-day commitment period expires at the end of the 120th day, after the expiration of a 90-day period of treatment or previous 120-day period, whichever is applicable.

(b) When a respondent has failed to appear or absented himself contrary to any order properly made or entered under this chapter, the relevant commitment period shall be extended for a period of time equal to the respondent's absence if written notice of absence is promptly provided to the respondent's attorney and his guardian, if there is one, and if, within 24 hours after the respondent has returned to the evaluation or treatment facility, written notice of the corresponding extension and the reason for it is given to the respondent, his attorney, and to the court.

CURRENT STATUTE

Sec. 47.30.100. Writ of habeas corpus. An individual who is detained under AS 47.30.010 — 47.30.340 is entitled to a writ of habeas corpus upon proper petition by himself or an interested party to a court authorized to issue writs of habeas corpus in the jurisdiction in which he is detained. (§ 111 ch 87 SLA 1957)

Sec. 47.30.330. Criminal penalties. A person who intentionally causes, or attempts to cause, or conspires with another person to cause an individual to be committed to a hospital under AS 47.30.010 — 47.30.340, knowing or having reasonable grounds for believing that the individual is not mentally ill and in need of hospitalization, is punishable by a fine of not more than $10,000, or by imprisonment for not less than one year nor more than 10 years, or by both. The court may order all or part of the fine paid to the injured individual. (§ 133 ch 87 SLA 1957; am § 37 ch 43 SLA 1964)

Amendment of section inapplicable to offense committed before October 1, 1964. — See 1964 Op. Att'y Gen., No. 8.

CSHB 2

Sec. 47.30.810. HABEAS CORPUS. Nothing in this chapter may be construed as limiting a person's right to a writ of habeas corpus.

Sec. 47.30.815. LIMITATION OF LIABILITY; PENALTY FOR FALSE APPLICATION. (a) A person acting in good faith upon either actual knowledge or reliable information who makes application for evaluation or treatment of another person under this chapter is not subject to civil or criminal liability.

(b) The following persons may not be held civilly or criminally liable for detaining a person under AS 47.30.700 - 47.30.915 or for releasing a person under AS 47.30.700 - 47.30.915 at or before the end of the period for which the person was admitted or committed for evaluation or treatment if the persons have performed their duties in good faith and without gross negligence:

(1) an officer of a public or private agency;

(2) the superintendent, the professional person in charge, the professional designee of the professional person in charge, and the attending staff of a public or private agency;

(3) a public official performing functions necessary to the administration of AS 47.30.700 - 47.30.915;

(4) a peace officer responsible for detaining a person under AS 47.30.700 - 47.30.915.

CURRENT STATUTE

CSHB 2

(c) A person who wilfully initiates an involuntary commitment procedure under AS 47.30.700 without having good cause to believe that the other person is suffering from a mental illness and as a result is gravely disabled or likely to cause serious harm to himself or others, is guilty of a felony.

Sec. 47.30.820. RETROACTIVITY. Except as provided in this chapter, the provisions of this chapter do not in themselves impair any action taken in a proceeding pending under statutes in effect before October 1, 1979, nor do they apply retroactively to terminate the detention of a person previously committed under statutes in effect before October 1, 1979. However, 90 days after October 1, 1979, the provisions of this chapter apply to all persons committed under statutes in effect before October 1, 1979.

CURRENT STATUTE

Sec. 17.30.130. Right to humane care and treatment and consent to surgery, certain psychiatric therapies and autopsies. (a) The department shall be guided by the principles of humane care and treatment, and, to the extent that facilities, equipment and personnel are available, shall provide medical care or treatment in accordance with the highest standards of accepted medical practice.

(b) Consent to surgery, the psychiatric therapies which the department determines, and autopsies must be obtained for a patient before the undertaking of the surgery, psychiatric therapies or autopsies from one of the following persons: spouse, guardian, either parent, or eldest adult child. If none of these persons is found in this state within a reasonable time, or in the case of an emergency, the commissioner of health and social services or his designee, upon being notified of the pertinent medical facts, may give the consent. However, when the head of the hospital is of the opinion that the patient has insight or capacity to make a responsible decision, the patient's consent shall be obtained before the surgery or psychiatric therapies; his consent shall be determinative, and no other consent is necessary. However, in the case of a minor, consent shall also be obtained from the parent or guardian. The person giving the consent, or a person who acts after the consent is given and is authorized to perform the act undertaken by him is not liable civilly or criminally if the act is done by him in his official capacity or in the capacity set out in AS 47.30.010 — 47.30.340. (§ 115 ch 87 SLA 1957; am § 9 ch 127 SLA 1959; am § 29 ch 70 SLA 1964; am § 6 ch 104 SLA 1971)

Sec. 47.30.110. Mechanical restraints. Mechanical restraint shall not be applied to a patient unless the head of the hospital or his designee determines that the medical needs of the patient require it. The use of a mechanical restraint and reasons for it shall be made a part of the clinical record of the patient over the signature of the head of the hospital or his designee. (§ 116 ch 87 SLA 1957)

CSHB 2

ARTICLE 9. PATIENT RIGHTS.

Sec. 47.30.825. PATIENT RIGHTS; MEDICAL. All patients who are receiving services from a treatment facility licensed under AS 18.20.-020, have the following rights:

(1) The patient, or his counsel, guardian, or the adult designated in accordance with AS 47.30.725 if the patient is mentally incapable of participation, shall be entitled to participate in formulating his individualized treatment plan and in the evaluation process as much as possible, at minimum to the extent of requesting specific forms of therapy, inquiring why specific therapies are or are not included in his treatment program, and being informed as to his present medical and psychological condition and prognosis. The treating physician may not withhold any of this information from the patient.

(2) Counsel and guardian for a patient, or if there is no guardian the adult designated in accordance with AS 47.30.725, have the right at all reasonable times to examine all records of, and plans for, the patient's treatment and to make copies, upon payment of costs if requested, of any portion of these records.

(3) Every patient has the right to know the name of medication that he is asked to take, what its purpose is, and what side effects may occur with this medication. If the patient is incapable of understanding the purpose and side effects of the medication, the treating physician or mental health professional shall explain it to the patient's counsel or guardian, or if there is no guardian the adult designated in accordance with AS 47.30.725.

CURRENT STATUTE

Sec. 47.30.150. Rights of patient. (a) Subject to the general rules and regulations of the hospital and except to the extent that the head of the hospital determines that it is necessary for the medical welfare of the patient to impose restrictions, every patient may

(1) communicate by sealed mail or other manner with persons, including official agencies, inside or outside the hospital;

(2) receive visitors; and

(3) exercise all civil rights, except as modified by AS 47.30.130(b) including the right to dispose of property, execute instruments, make purchases, enter contractual relationships, and vote, unless he has been adjudicated incompetent and has not been restored to legal capacity.

(b) Notwithstanding the limitations authorized by this section on the right of communication, every patient may communicate by sealed mail with the department, the governor, and the superior court which ordered his hospitalization.

(c) The limitations imposed by the head of a hospital on the exercise of these rights by a patient and the reasons for the limitations shall be made a part of the clinical record of the patient. (§ 117 ch 87 SLA 1957)

CSHB 2

(4) The quiet room, or other form of physical restraint, may not be used, except as provided in this paragraph unless a patient is likely to physically harm himself or others unless restrained. The form of restraint utilized shall be that which is in the patient's best interest and which constitutes the least restrictive alternative available. When practicable, the patient shall be consulted as to his preference among forms of adequate, medically advisable restraints including medication, and his preference shall be considered. Nothing in this section is intended to limit the right of staff to use the quiet room at the patient's request or with his knowing concurrence when deemed in the best interests of the patient. Patients placed in a quiet room or other physical restraint shall be checked at least every 15 minutes or more often if good medical practice so indicates. Patients in the quiet room must be visited by a staff member at least once every hour and must be given adequate food and drink and access to bathroom facilities. At no time may a patient be kept in the quiet room or other form of physical restraint against his will longer than necessary to accomplish the purposes set out in this paragraph. All uses of the quiet room or other restraint shall be recorded in the patient's medical record, the information including but not limited to the reasons for its use, the duration of use, and the name of the authorizing staff member.

(5) All persons have the right to be free from unnecessary or excessive medication. Psychotropic medication shall be administered only on the order of a licensed physician when the physician determines that such medication is in the best interest of the patient or will

CURRENT STATUTE

CSHB 2

(6) A patient capable of giving informed consent shall have the absolute right to accept or refuse electro-convulsive therapy or aversive conditioning. Patients who lack substantial capacity to make this decision may not be given such therapy or conditioning without a court order following a hearing compatible with full due process.

(7) In no event may treatment include psychosurgery, lobotomy or other comparable form of treatment without specific informed consent of the patient, including a minor unless he is clearly too young or disabled to give an informed consent in which case the consent of his legal guardian shall be required. In addition, no such treatment may be given without a court order after hearing in accord with full rights of due process.

(8) When, in the written opinion of a patient's attending physician, a true medical emergency exists and a surgical operation is necessary to save the life, physical health, eyesight, hearing or member of the patient, the professional person in charge of the treatment facility or his professional designee may give consent to the surgical operation if time will not permit obtaining the consent of the proper relatives or guardian or appropriate judicial authority. However, no operation may be authorized if the patient is not a minor and knowingly withholds consent on religious grounds.

CURRENT STATUTE

CSHB 2

(9) Each person upon discharge shall have a discharge plan specifying the kinds and amount of care and treatment he should have after discharge and such other steps as he might take to benefit his mental health after leaving the facility. The patient shall have the right to participate, as far as practicable, in formulating this plan. A copy of the plan shall be given to him, his guardian, the court, if appropriate, and any follow-up agencies.

Sec. 47.30.830. PROHIBITION OF EXPERIMENTAL TREATMENTS. (a) No experimental treatments involving any significant risk of physical or psychological harm may be administered to any patient.

(b) If the personnel of an evaluation or treatment facility are uncertain as to whether a proposed technique is experimental or is experimental applied to a particular respondent or would involve a significant risk of mental or physical harm to the patient, the matter may be referred to the commissioner of health and social services for a determination. The patient, his attorney, his guardian, if any, and an adult designated by the patient, shall, simultaneously with the referral to the commissioner, be provided with copies of all the documents by which the referral is made and shall have the opportunity to provide evidence to the commissioner on the question.

(c) A determination that a treatment technique is experimental and entails significant risks of mental or physical harm shall be binding upon all persons involved in the administration of treatment to a patient for purposes of this section.

CURRENT STATUTE

CSHB 2

Sec. 47.30.835. CIVIL RIGHTS NOT IMPAIRED. No person undergoing evaluation or treatment under this chapter may be denied a civil right, including but not limited to, the right to free exercise of religion and the right to dispose of property, sue and be sued, enter into contractual relationships and vote. Court-ordered treatment or evaluation under this chapter is not a determination of legal incompetency.

Sec. 47.30.840. RIGHT TO PRIVACY AND PERSONAL POSSESSIONS. A person undergoing evaluation or treatment under this chapter shall

(1) not be photographed without his consent and that of his guardian if a minor, except that he may be photographed upon admission to a facility for identification and administrative purposes of the facility; all photographs shall be confidential and may not be released by the facility except under court order;

(2) at the time of admission to an evaluation or treatment facility, have reasonable precautions taken by the staff to inventory and safeguard his personal property; a copy of the inventory signed by the staff member making it shall be given to the patient and made available to his attorney and any other person authorized by the patient to inspect the document;

(3) have access to individual storage space for his private use while undergoing evaluation or treatment;

(4) be permitted to wear his own clothing, to keep and use his own personal possessions including his toilet articles if they are not considered unsafe for him or other patients who might have access to

CURRENT STATUTE

Sec. 47.30.260. Disclosure of information. (a) All certificates, applications, records and reports, other than an order of a court made for the purposes of AS 47.30.010 — 47.30.340, and directly or indirectly identifying a patient or former patient or an individual whose hospitalization was sought under AS 47.30.010 — 47.30.340, together with clinical information relating to the patients, shall be kept confidential and shall not be disclosed by a person except insofar as

(1) the individual, or his legal guardian or, if he is a minor, his parent or legal guardian consents;

(2) disclosure is necessary to carry out a provision of AS 47.30.010 — 47.30.340; or

(3) a court directs, upon its determination that disclosure is necessary for the conduct of proceedings before it and that failure to make the disclosure would be contrary to the public interest.

(b) Nothing in this section precludes disclosure, upon proper inquiry, of information concerning current medical condition to the members of the immediate family of a patient.

(c) A person who violates this section is guilty of a misdemeanor, and is punishable by a fine of not more than $500, or by imprisonment for not more than one year, or by both. (§ 127 ch 87 SLA 1957; am § 14 ch 127 SLA 1959)

CSHB 2

them, and to keep and be allowed to spend a reasonable sum of his own money for his own needs and comfort;

(5) be allowed to have visitors at reasonable times;

(6) have ready access to letter writing materials, including stamps, and have the right to send and receive unopened mail;

(7) have reasonable access to a telephone, both to make and receive confidential calls.

Sec. 47.30.845. CONFIDENTIAL RECORDS. Information and records obtained in the course of evaluation, examination or treatment are confidential and are not public records, except as the requirements of a hearing under this chapter may necessitate a different procedure. Information and records may be disclosed under regulations established by the department only to

(1) physicians and providers of health, mental health or social and welfare services involved in caring for, treating or rehabilitating the patient;

(2) individuals to whom the patient has given written consent to have information disclosed;

(3) persons authorized by a court order;

(4) persons doing research or maintaining health statistics, if the anonymity of the patient is assured, and the facility recognizes the project as a bona fide research or statistical undertaking;

CURRENT STATUTE

CSHB 2

(5) the division of corrections in cases in which prisoners confined to the state prison are patients in the state hospital on authorized transfers either by voluntary admission or by court order;

(6) governmental or law enforcement agencies when necessary to secure the return of a patient who is on unauthorized absence from a facility where the patient was undergoing evaluation or treatment.

Sec. 47.30.850. EXPUNGEMENT OF RECORDS. Following the discharge of a respondent from a treatment facility or the issuance of a court order denying a petition for commitment, a respondent may at any time move to have all court records pertaining to the proceedings expunged on condition that he file a full release of all claims of whatever nature arising out of the proceedings and the statements and actions of persons and facilities in connection with the proceedings.

Sec. 47.30.855. POSTING OF RIGHTS. The rights set out in AS 47.-30.825 - 47.30.855 shall be prominently posted in all treatment facilities in places accessible to all patients. A patient who does not understand English shall have his rights explained to him in a language he understands.

Sec. 47.30.860. NOTICES IN LANGUAGES OTHER THAN ENGLISH. Where practicable all documents and notices required by this chapter to be served on a respondent, or on his parents, guardian or adult designee, shall be explained in a language the person understands if he is not competent in English.

CURRENT STATUTE

CSHB 2

Sec. 47.30.865. DISCRIMINATION PROHIBITED. (a) The fact that a person is or has been evaluated or treated for mental illness may not be a basis for discrimination in:

(1) seeking employment;

(2) resuming or continuing professional practice or previous occupation;

(3) obtaining or retaining housing;

(4) obtaining or retaining licenses or permits, including but not limited to motor vehicle licenses, motor vehicle operator's and chauffeur's licenses, and professional or occupational licenses.

(b) Applications for positions, licenses and housing may contain no requests for information concerning evaluation or treatment experiences.

(c) It is unlawful for a person to aid, abet, incite, compel or coerce the doing of an act forbidden under this section or to attempt to do so.

CURRENT STATUTE

Sec. 47.30.110. Transportation. (a) When an individual is to be hospitalized under AS 47.30.010 — 47.30.340, the department shall arrange, upon the request of a person having a proper interest in the individual's hospitalization, and is authorized to pay for the individual's transportation to the designated hospital, with appropriate medical or nursing attendants and by the available means which are appropriate and suitable. The department may pay return transportation of an individual and appropriate medical and nursing attendants after a finding under AS 47.30.010 — 47.30.340 that the individual is not mentally ill. When practicable, one or more relatives or friends of the individual to be hospitalized shall be permitted to accompany him. The department may pay necessary travel, housing and meal expenses incurred by one relative or friend in accompanying the individual to the hospital if the department determines

(1) that the best interests of the individual's health require that he be accompanied by the relative or friend;

(2) the relative or friend accompanying the individual is indigent.

(b) When necessary, the department shall arrange for a peace officer or other suitable person to accompany the individual. (§ 113 ch 87 SLA 1957; am § 8 ch 127 SLA 1959; am § 1 ch 36 SLA 1966)

CSHB 2

ARTICLE 10. MISCELLANEOUS PROVISIONS.

Sec. 47.30.870. TRANSPORTATION. When a person is to be evaluated or involuntarily committed to a facility, or presented for a judicial hearing under this chapter, the department shall arrange, and is authorized to pay for, the person's necessary transportation to the designated facility or hearing with appropriate medical or nursing attendants and if necessary a peace officer. The department shall pay return transportation of a person, appropriate medical and nursing attendants, and if necessary a peace officer, after a determination that the person is not committable, at the end of a commitment period, or at the end of a voluntary stay following an evaluation conducted in accordance with AS 47.30.715 at a treatment facility. When advisable, one or more relatives or friends shall be permitted to accompany the person. The department may pay necessary travel, housing and meal expenses incurred by one relative or friend in accompanying the person if the department determines that the person's best interests require that he be accompanied by the relative or friend and the relative or friend is indigent.

CURRENT STATUTE

Sec. 47.30.170. Nonresident patients. (a) The admission papers of a person who is hospitalized under AS 47.30.010 — 47.30.340 shall include a statement as to his residence. The department may return a patient who is not a resident of the state to the state of his residence. If the state in which he has residence does not accept him as a patient, the department may order the discharge of the patient. The department may initiate proceedings for judicial hospitalization under AS 47.30.070, if the patient is certified by the head of a hospital to be mentally ill and (1) dangerous to himself or to others if allowed at liberty, or (2) in need of immediate custody and care or treatment, and lacking sufficient insight and capacity to make responsible decisions concerning hospitalization.

(b) To facilitate the return of nonresident patients, the department may enter a reciprocal agreement or compact with another state, providing for the prompt return, under appropriate supervision, of residents of that state who are mentally ill. Mentally ill residents of this state who have been hospitalized outside this state may be admitted, with the approval of the department, to a hospital designated by the department.

(c) The department may enter reciprocal agreements or contracts with another state, providing for custody and care or treatment of mentally ill residents of this state by the other state, and for the custody and care or treatment of mentally ill residents of that state by this state, on a reimbursable basis.

CSHB 2

Sec. 47.30.875. NONRESIDENT PATIENTS. (a) The admission papers of a person who is admitted to a treatment facility under this chapter shall include a statement as to his residence. The department may return a patient who is not a resident of the state to the state of his residence with court approval if the person has been committed. If the state in which he has residence does not accept him as a patient, the person shall be treated as a resident under the provisions of this chapter.

(b) To facilitate the return of nonresident patients the department may enter a reciprocal agreement or compact with another state providing for the prompt return under appropriate supervision of residents of that state who are mentally ill. Mentally ill residents of this state who have been placed in a facility outside this state may be admitted with the approval of the department to a treatment facility in the state designated by the department. The department may enter into reciprocal agreements or contracts with another state providing for custody, care or treatment, or return of mentally ill residents of this state by the other state and for the custody and care or treatment of mentally ill residents of that state by this state on a reimbursable basis. A resident of this state who has been committed in another state and is returned in accordance with this section shall, within 72 hours of his admission to the designated facility, be examined. After examination the mental health professional in charge of the facility shall release him or shall petition for involuntary commitment as prescribed in AS 47.30.740.

CURRENT STATUTE

Sec. 47.30.180. Interstate compact. This state ratifies and adopts by reference "The Interstate Compact on Mental Health" consisting of 14 articles approved on September 30, 1955, by the Northeast State Governments Conference on Mental Health. The department is designated as compact administrator with full power to carry out the purpose of the compact and to make all necessary regulations to implement the compact. (§ 119(e) ch 87 SLA 1957; added by § 11 ch 127 SLA 1959)

Sec. 47.30.190. Rights outside state. Nothing in AS 47.30.010 — 47.30.340 alters or impairs the application or availability to a patient, while hospitalized in another state, under contractual arrangements entered in accordance with AS 47.30.010 — 47.30.340 of the rights, remedies, or protective safeguards provided by the laws of this state or of the other state. (§ 120 ch 87 SLA 1957)

CSHB 2

(c) In taking action under (a) and (b) of this section, consideration shall be given to the best interests of the patient particularly to the relationship of the patient to his family, legal guardian, or friends to maintain relationships and encourage visits beneficial to the patient.

Sec. 47.30.880. INTERSTATE COMPACT. This state ratifies and adopts by reference "The Interstate Compact on Mental Health" consisting of 14 articles approved on September 30, 1955, by the Northeast State Governments Conference on Mental Health. The department is designated as compact administrator with full power to carry out the purpose of the compact and to make all necessary regulations to implement the compact.

Sec. 47.30.885. RIGHTS OUTSIDE STATE. Nothing in this chapter alters or impairs the application or availability to a patient, while hospitalized in another state under contractual arrangements entered in accordance with the provisions of this chapter, of the rights, remedies or protective safeguards provided by the laws of this state.

CURRENT STATUTE

Sec. 47.30.230. Provision for personal needs upon discharge. The department shall make arrangements which are necessary to insure that

(1) no patient is discharged or placed on convalescent status from a designated hospital without suitable clothing; and

(2) an indigent patient discharged or placed on convalescent status is furnished suitable transportation to his permanent residence in this state or other suitable place at the discretion of the department, and a reasonable amount of money to meet his immediate needs. (§ 124 ch 87 SLA 1957)

Sec. 47.30.240. Disposition of personal effects and unclaimed funds. (a) All articles of personal property in the custody of the head of the designated hospital which belong to a patient who dies before his release on convalescent status or discharge, or to a patient who leaves the hospital without authority, if unclaimed by the patient or his legal heirs or representatives within one year after the death or departure of the patient, shall be disposed of in the manner prescribed by the department, and the proceeds shall be deposited in the state treasury. The money remaining to the credit of the patient, if unclaimed by his legal heirs or representatives or by the patient within the period of one year after the death or departure of the patient, shall be deposited in the treasury.

(b) If a mentally ill individual has died in a foreign hospital and the department desires to recover the patient's personal property under this section, the commissioner of health and social services or his designated representative may secure the property and for that purpose only is designated the decedent's administrator. All property so recovered shall be disposed of as provided by law. (§ 125 ch 87 SLA 1957; am § 13 ch 127 SLA 1959; am § 1 ch 138 SLA 1962; am § 1 ch 35 SLA 1968; am § 6 ch 104 SLA 1971)

CSHB 2

Sec. 47.30.890. PROVISION FOR PERSONAL NEEDS UPON DISCHARGE. The department shall make arrangements which are necessary to insure that

(1) no patient is discharged from a treatment facility without suitable clothing; and

(2) an indigent patient discharged is furnished suitable transportation to his permanent residence in this state or other suitable place at the discretion of the department and a reasonable amount of money to meet his immediate needs.

Sec. 47.30.895. DISPOSITION OF PERSONAL EFFECTS AND UNCLAIMED FUNDS. (a) All assets in the custody of a treatment facility which belong to a patient who dies before his discharge, or to a patient who leaves the hospital without authority, if unclaimed by the patient or his legal heirs or representatives within four years after the death or departure of the patient, shall be disposed of in the manner prescribed by the department and the proceeds shall be deposited in the state treasury.

(b) If a mentally ill individual has died in a foreign facility and the department desires to recover the patient's personal property under this section, the commissioner of health and social services or his designated representative may secure the property and for that purpose only is designated the decedent's administrator. All property so recovered shall be disposed of as provided by law.

CURRENT STATUTE

Sec. 47.30.250. Disposition of funds subject to claim. The department shall make diligent inquiry in every instance after departure without authority or death of a patient, to ascertain his whereabouts or that of his legal heirs or representatives, and shall turn over to the proper person the money or articles of personal property in the custody of the head of the hospital to the credit of the patient. Claims to the money or articles of personal property, including claims by this state, may be presented to the department at any time. Claims by this state have priority, as set out in AS 47.30.270. If a claim other than by this state is established by clear and convincing evidence more than one year after the death or departure without authority of a patient, it shall be certified to the legislature for consideration, and the legislature may pay the claim. (§ 126 ch 87 SLA 1957)

For meaning of "clear and convincing" evidence required to prove heirship where property has escheated, see Waks v. State, Sup. Ct. Op. No. 111 (File No. 163), 375 P.2d 136 (1962), and note under AS 09.50.110.

Sec. 47.30.280. Fees and expenses for judicial proceedings. The witnesses and the jury in proceedings for judicial hospitalization are entitled to the fees, compensation and mileage established by law. Compensation, mileage, fees and other expenses arising from judicial hospitalization proceedings shall be audited and allowed by the superior court of the district in which the proceedings are held, and when audited and allowed shall be paid by the clerk of the court in the same manner and from the fund as he pays the other incidental expenses of the court. To the extent that services of a peace officer are used to carry out AS 47.30.010 — 47.30.340, he is entitled to fees and actual expenses from the same source and in the same manner as for his other official duties. (§ 129 ch 87 SLA 1957)

CSHB 2

Sec. 47.30.900. DISPOSITION OF FUNDS SUBJECT TO CLAIM. The department shall make diligent inquiry in every instance after departure without authority or death of a patient, to ascertain his whereabouts or that of his legal heirs or representatives, and shall turn over to the proper person the money or articles of personal property in the custody of the head of the facility to the credit of the patient. Claims to the money or articles of personal property, including claims by this state, may be presented to the department at any time. If a claim other than by this state is established by clear and convincing evidence more than four years after the death or departure without authority of a patient, it shall be certified to the legislature for consideration and the legislature may pay the claim.

Sec. 47.30.905. FEES AND EXPENSES FOR JUDICIAL PROCEEDINGS. (a) The witnesses and the jury in commitment proceedings are entitled to the fees, compensation and mileage established by law. Compensation, mileage, fees and other expenses arising from commitment proceedings shall be audited and allowed by the superior court of the district in which the proceedings are held and when audited and allowed shall be paid by the clerk of the court in the same manner and from the fund as he pays the other incidental expenses of the court. To the extent that services of a peace officer are used to carry out the provisions of this chapter, he is entitled to fees and actual expenses from the same source and in the same manner as for his other official duties.

CURRENT STATUTE

Sec. 47.30.270. Liability for expense of hospitalization and transportation. (a) A patient, or his legal representative acting in a representative capacity, or his parents if the patient is under the age of 18, shall pay or contribute to the payment of the charges for the care or treatment of the patient when hospitalized under AS 17.30.010 — 47.30.340, in the manner and proportion which the department finds is not detrimental to the patient's rehabilitation and which is within their ability to pay. The charges may not exceed the actual cost of the care or treatment as determined by the department. Notwithstanding the amount of the charge determined to be due, parents may not be required to pay more than $50 a month for each child. The order of the department relating to the payment of charges by parents shall be prospective in effect and shall relate only to charges to be incurred after the order, except that if the parent intentionally conceals his ability to pay, he shall be ordered to pay to the extent of his ability the charges accruing during the period of the concealment. The order of the department relating to the payment of charges by the patient or his legal representative shall be issued within six months of the date on which the charge was incurred. The department may make necessary investigations to determine the ability to pay, and may require sworn statements of income by the parents. The order shall remain in full force and effect unless modified by subsequent court or department orders.

(b) As used in (a) of this section, the term "actual cost of the care and treatment" means either the rate provided for by a contract entered into under AS 47.30.010 — 47.30.340, or, in the absence of a contract, a daily rate fixed by the department, and includes expenses of transportation incidental to examination or hospitalization.

(c) The department may charge, or accept from a person money or property, for the care or treatment of an in-patient or out-patient or for other purposes, even if the payment is not required by an order of the department, so long as the total payments received do not exceed the actual cost of care or treatment.

CSHB 2

(b) An attorney appointed for a person under this chapter shall be compensated for his services as follows:

(1) the person for whom an attorney is appointed shall, if he is financially able under standards as to financial capability and indigency set by the court, bear the costs of the legal services;

(2) if the person is indigent under those standards, the costs of the services shall be borne by the state.

Sec. 47.30.910. LIABILITY FOR EXPENSE OF PLACEMENT IN A TREATMENT FACILITY. (a) A patient, or his legal representative acting in a representative capacity, or his spouse, or his parents if the person is under the age of 18, shall pay or contribute to the payment of the charges for the care or treatment of the patient when hospitalized under AS 47.30.655 - 47.30.915. The charges may not exceed the actual cost of the care and treatment as determined by the department. The department may order payment of charges by the patient or by the person responsible for payment of the charges for the patient's care and treatment under this subsection, according to ability to provide for payment. The department may make necessary investigations to determine the ability to provide for payment and may require sworn statements of income by the patient, or his legal representative acting in a representative capacity, or his spouse or parent. In the exercise of his descretion, the commissioner may impose full liability for the patient's actual cost of care and treatment on the patient, his legal representative, his spouse or parent for refusal to supply a sworn statement of income.

CURRENT STATUTE

(d) The amount of liability for care and treatment which is ordered by the department to be paid and which is not paid for by the patient or by his legal representative acting in a representative capacity constitutes a lien in favor of this state against all property of the patient. The unpaid amount of liability is a debt to the state and is a first, prior and preferred claim against the estate of the patient after death, and after expenses of administration and all just claims for medical care of last illness and burial expenses have been paid. The claim based upon information submitted by the department shall be prepared and filed by the attorney general. The amount of liability for care and treatment which is ordered by the department to be paid and which is not paid by the parent before the parent's death, shall be discharged or collected from the patient. No claim lies against the assets or estate of the deceased parent.

(e) All money paid by the patient or on his behalf, under this section, shall be deposited in the state treasury.

(f) If an order of payment is entered by the department under this section and delinquency in the payment of any amount due the state under the order continues for a period of more than 30 days after the notification of the legal representative or parent of the patient by the department, the state may proceed to collect the amounts due by appropriate proceedings. Actions to enforce the collection of payments may only be brought within three years after the date of notification of a delinquent payment. (§ 12 ch 87 SLA 1957; am §§ 15, 16 ch 127 SLA 1959; am § 2 ch 35 SLA 1968; am §§ 1—3 ch 98 SLA 1974)

CSHB 2

An order for payment of charges shall be issued by the department within six months after the date on which the charge was incurred. The order shall remain in full force and effect unless modified by subsequent court or department order. Liability under this subsection shall be determined as follows: a patient hospitalized under AS 47.30.655 - 47.30.915, or the person responsible for payment of charges for the patient, may be required to pay according to his ability to provide for payment, as determined by the department, and in the manner and proportion which the department finds is not detrimental to the patient's rehabilitation; however, after the patient has been hospitalized under this chapter for an aggregate period of 12 months, the patient or person responsible for payment may not be required to pay more than $50 a month toward the charges for the care and treatment of the patient.

(b) As used in (a) of this section, the term "actual cost of the care and treatment" means either the rate provided for by a contract entered into under AS 47.30.655 - 47.30.915, or, in the absence of a contract, a daily rate fixed by the department, and includes expenses of transportation incidental to examination or hospitalization.

(c) The department may charge, or accept from a person money or property, for the care or treatment of an in-patient or out-patient or for other purposes, even if the payment is not required by an order of the department, so long as the total payments received do not exceed the actual cost of care or treatment.

CURRENT STATUTE

Sec. 47.30.275. Property taken under eminent domain powers. (a) If a recipient's property to which, under AS 47.30.270(d), a lien for assistance has attached is taken for urban renewal or other public purposes, the department, with the approval of the attorney general, may release its lien upon the property or the proceeds which are paid the recipient as a result of the taking.

(b) If the recipient expresses his intention to purchase a personal dwelling, the proceeds shall be paid by the taking authority into an escrow account under escrow instructions approved by the department. If the proceeds are paid into such an account and are applied by the recipient within one year to the purchase of a personal dwelling, the proceeds may not cause a reduction of the amount of assistance to which the recipient would otherwise be entitled. The department shall inform the recipient of the provisions of this section at the time of the taking.

(c) Nothing in this section prohibits a lien in an amount equal to the total of all assistance granted the recipient from attaching to property purchased with the proceeds paid by the taking authority. (§ 2 ch 60 SLA 1968)

Legislative history report. — For report on ch. 60, SLA 1968 (CSHB 583 am), see 1968 House Journal, p. 540.

CSHB 2

(d) All money paid by the patient or on his behalf, under this section, shall be deposited in the state treasury.

(e) If an order of placement is entered by the department under this section, and delinquency in the payment of any amount due the state under the order continues for a period of more than 30 days after the notification to the patient or the legal representative, spouse, or parent of the patient by the department, the state may proceed to collect the amounts due by appropriate proceedings. Actions to enforce the collection of payments may only be brought within three years after the date of notification of a delinquent payment.

(f) The orders of the department issued under this section shall relate only to charges incurred after October 1, 1979.

COMPARISON - AS 47.30 and CS FOR HOUSE BILL 2
4/9/80

CURRENT STATUTE

CSHB 2

Sec. 47.30.915. DEFINITIONS. In this chapter

(1) "court" means a superior court of the state;

(2) "department" means the Department of Health and Social Services;

(3) "evaluation facility" means a health care facility that has been designated or is operated by the department to perform the evaluations described in this chapter, however, no correctional institution or facility or jail may be used as an evaluation facility for purposes of this chapter;

(4) "evaluation personnel" means mental health professionals designated by the department to conduct evaluations as prescribed in this chapter who conduct evaluations in places in which no staffed evaluation facility exists;

(5) "gravely disabled" means a condition in which a person, as a result of mental illness, is in danger of physical harm arising from such complete neglect of basic needs for food, clothing, shelter, or personal safety as to render serious accident, illness or death highly probable if care by another is not taken;

(6) "inpatient treatment" means care and treatment rendered inside or on the premises of a treatment facility, or a part or unit of a treatment facility for a continual period of 24 hours or longer;

COMPARISON - AS 47.30 and CS FOR HOUSE BILL 2
4/9/80

CURRENT STATUTE

Sec. 47.30.340. Definitions. In AS 47.30.010 — 47.30.340, unless the context otherwise requires,

(1) "court" means the superior court;

(2) "department" means the Department of Health and Social Services or its designee;

(3) "designated examiner" means a licensed physician designated by the department as specially qualified, under standards established by it for the purpose of AS 47.30.010 — 47.30.340, in the diagnosis of mental illness, except that for areas in which no licensed physician so qualified is available, any licensed physician may be designated;

(4) "designated hospital" means a "hospital" which is designated and authorized by contract with the department to provide care and treatment of the mentally ill;

(5) "head of a hospital" means the individual in charge of a hospital, or his designated representative, except that when the individual or his designee in charge of a hospital is not a licensed physician, authority placed in the head of a hospital by AS 47.30.010 — 47.30.340 which involves in major part the exercise of medical judgment shall be exercised by a licensed medical official of the hospital who is designated by the individual in charge of the hospital;

(6) "hospital" means a public or private hospital or institution located in the state or in another state equipped and qualified to provide care and treatment for the mentally ill;

(7) "individual," as used in AS 47.30.020, 47.30.030 and 47.30.070, means a resident of or a person in the state;

(8) "interested party" means an interested, responsible adult including the legal guardian, spouse, parent, adult children, or next of kin of an allegedly mentally ill individual or patient;

(9) "licensed physician" means (A) an individual licensed under the laws of the state to practice medicine, (B) a medical officer of the government of the United States while in the state in the performance of his official duties, (C) a medical officer of the state, or (D) a physician licensed under the laws of another state;

(10) "mentally ill individual" means an individual having a psychosis or senile changes which substantially impair his mental health to the degree that he is a danger to himself or others; the definition does not include an individual suffering from acute alcoholism or drug addiction;

(11) "patient" means a resident of or person in the state qualified under AS 47.30.010 — 47.30.340 for hospitalization as a mentally ill individual;

CSHB 2

(7) "least restrictive alternative" means mental health treatment facilities and conditions of treatment which are

(A) no more harsh, hazardous or intrusive than necessary to achieve the treatment objectives of the patient; and

(B) involve no restrictions on physical movement nor supervised residence or inpatient care except as reasonably necessary for the administration of treatment or the protection of the patient or others from physical injury;

(8) "likely to cause serious harm" means

(A) a substantial risk of imminent and substantial bodily harm to the person himself, as manifested by recent attempts at suicide or bodily harm; or

(B) substantial risk of imminent and substantial bodily harm to one or more other persons as manifested by behavior causing, or attempting harm, including, in regard to evaluations, at least one incident within 30 days before the filing of a petition for emergency hospitalization;

(9) "mental health professional" means a psychiatrist or physician who is licensed to practice in this state; a clinical psychologist certified by the state Board of Psychologist and Psychological Associate Examiners; a registered nurse with psychiatric training, licensed by the State Board of Nursing; and a social worker with a master's degree and experience in the field of mental illness;

CURRENT STATUTE

(12) "peace officer," when used in connection with cases which involve individuals who, because of mental illness, are likely to injure themselves or others if allowed to remain at liberty, includes a state police officer, municipal or other local police officer, state, municipal, or other local health officer, public health nurse, U.S. Marshal or Deputy U.S. Marshal, or a person authorized by a court;

(13) "resident" means a person who is residing in the state; a married woman may establish a residence apart from her husband, and an unemancipated minor takes the residence of the parent or guardian with whom he is living;

(14) "state" includes a state of the United States, the District of Columbia, the territories and possessions of the United States, and the Commonwealth of Puerto Rico, and, with the approval of the United States Congress, Canada. (§ 101 ch 87 SLA 1957; am §§ 1, 2 ch 127 SLA 1959; am § 1 ch 115 SLA 1961; am § 65 ch 32 SLA 1971; am § 6 ch 104 SLA 1971; am § 3 ch 165 SLA 1978)

Cross reference. — As to persons with handicaps by reason of mental or physical disabilities, see AS 47.80.

Effect of amendment. -- The 1978 amendment deleted "or a mentally deficient and severely mentally retarded person whom the commissioner of health and social services or his designee admits for treatment subject, however, to all the other admission and discharge procedures provided for in §§ 10—3.50 of this chapter" following "danger to himself or others" in paragraph (10).

Editor's note. — As to intent of 1978 amendatory act, see § 1, ch. 165, SLA 1978, effective July 1, 1978, in the 1978 Temporary and Special Acts and Resolutions.

Legislative history report. — For report on ch. 32, SLA 1971 (HB 111 am), see 1971 House Journal, p. 138.

Sec. 47.30.020. Authority to receive patients. The head of a hospital designated by the department under AS 47.30.010 may receive for observation, diagnosis, care, and treatment an individual

(1) upon application by the individual, including a minor with the consent of parent or guardian; (2) upon application by an interested party, by a peace officer, by the department, or by the head of an institution in which the individual may be, subject to the approval of the head of the hospital if the application is accompanied by a certificate of a licensed physician stating that on a basis of an examination held not more than 15 days before the individual's admission, the individual is in the physician's opinion mentally ill, or has symptoms of mental illness, and because of his illness is (A) likely to injure himself or others if allowed to remain at liberty, or (B) in need of care or treatment in a hospital. (§ 103 ch 87 SLA 1957; am § 3 ch 127 SLA 1959)

CSHB 2

(10) "mental illness" means an organic, mental or emotional impairment which has substantial adverse effects on an individual's ability to exercise conscious control of his actions or ability to perceive reality or to reason or understand; mental retardation, epilepsy, drug addiction and alcoholism do not per se constitute mental illness, although persons suffering from these conditions may also be suffering from mental illness;

(11) "peace officer" includes a state police officer, municipal or other local police officer, state, municipal, or other local health officer, public health nurse, United States marshal or deputy United States marshal, or a person authorized by the court.

(12) "provider of outpatient care" means a mental health professional or hospital, clinic, institution, center or other health care facility who has been designated by the department to accept for treatment by the court or who are released early from inpatient commitments on condition that they undergo outpatient treatment;

(13) "screening investigation" means the investigation and review of facts which have been alleged to warrant emergency examination or treatment, including interviews with the persons making such allegations, any other significant witnesses who can readily be contacted for interviews, and, if possible, the respondent;

(14) "state" means a state of the United States, the District of Columbia, the territories and possessions of the United States, and

CURRENT STATUTE

CSHB 2

the Commonwealth of Puerto Rico, and, with the approval of the United States Congress, Canada;

(15) "treatment facility" means a hospital, clinic, institution, center or other health care facility which has been designated by the department for the treatment or rehabilitation of mentally ill persons and for the receipt of these persons by court-ordered commitment, but does not include correctional institutions;

(16) "professional person in charge of the treatment facility" means the senior mental health professional at the facility; in the absence of a mental health professional it means the chief of staff or other senior physician.

CURRENT STATUTE

Sec. 47.30.080. Commitment or transfer to a United States agency. (a) If, before or during the commitment proceeding conducted under AS 47.30.070, the superior court receives a certificate from an agency of the United States showing that accommodations are available and that the individual is eligible for care, the court may, if the individual is found to be in need of hospitalization, order the individual to be placed in the custody of that agency for hospitalization. When by court order an individual is admitted to a hospital or institution operated by an agency of the United States inside or outside of the state, the patient is subject to the rules and regulations of the agency. The head of a hospital or institution operated by the agency and in which the individual is hospitalized has, with respect to the individual, the same powers as the department or the head of a hospital, concerning the detention, transfer, custody, conditional release, or discharge of patients. However, the court retains the jurisdiction to inquire into the mental condition of an individual so hospitalized, and to determine the necessity for continuing his hospitalization, and every order of hospitalization issued under this section is so conditioned.

(b) An order of a court of another state to an agency of the United States authorizing hospitalization of an individual has the same effect as to the individual while in this state as in the jurisdiction in which the court entering the order is located, and the courts of the jurisdiction issuing the order retain jurisdiction of the individual for the purpose of inquiring into his mental condition and of determining the necessity for continuance of his hospitalization. This state consents to the application of the law of the state in which the court issuing the order for hospitalization is located, with respect to the authority of the head of a hospital or institution operated in this state by an agency of the United States to retain custody, transfer, conditionally release or discharge the individual hospitalized. This section does not prevent the state from entering into a contract with a federal agency for the custody and care or treatment of persons coming under the jurisdiction or assistance of the federal agency. (§ 109 ch 87 SLA 1957)

CURRENT STATUTE

Sec. 12.45.090. Commitment after judgment of not guilty. If the jury finds the defendant not guilty on the ground of mental disease or defect and the court considers his being at large dangerous to the public peace or safety, the court shall order him to be committed to an institution authorized by the commissioner of health and social services to receive that person, and held in custody until the disease is cured or the defect corrected or he is otherwise discharged from the institution by authority of law. (§ 6.10 ch 34 SLA 196:; am § 6 ch 104 SLA 1971; am § 2 ch 119 SLA 1972)

CSHB 2

* Sec. 2. AS 12.45.090 is repealed and re-enacted to read:

Sec. 12.45.090. COMMITMENT AFTER JUDGMENT OF NOT GUILTY. (a) If the court or jury finds the defendant not guilty on the ground of mental disease or defect as excluding responsibility and the court considers his being at large dangerous to the public peace or safety, the court shall immediately commit the defendant to the custody of the commissioner of health and social services.

(b) If the defendant asserts at the time a verdict of not guilty on the ground of mental disease or defect as excluding responsibility is returned that he is not presently suffering from a mental disease or defect which causes him to be a danger to the public, a hearing shall be set within 60 days to determine the necessity of further commitment. The hearing shall be held before either the court or a jury of six persons who may be drawn from the jury impaneled for a trial on the underlying charge in accordance with rules promulgated by the supreme court. At the hearing, the defendant has the burden of proving by a preponderance of the evidence that he is not presently suffering from a mental disease or defect which causes him to be a danger to the public.

(c) If the court or jury determines that the defendant has failed to sustain his burden of proof, the court shall order him to be commited to the custody of the commissioner of health and social services and held in custody for a period of time not to exceed the maximum sentence for the offense committed by the defendant or until the disease is cured or the defect corrected or he is otherwise discharged from the institution by authority of law.

CURRENT STATUTE

CSHB 2

(d) The defendant may file a petition in the superior court for a hearing to have the need for his continued hospitalization determined or redetermined. The defendant is entitled to a hearing on the question no sooner than six months after his initial commitment and annually thereafter. The burden and standard of proof at a release hearing shall be the same as at the initial hearing and the defendant shall be entitled to a hearing before a jury of six upon request filed not later than 15 days before the date set for the hearing with the court.

(e) Continued hospitalization following the expiration of the maximum term of sentence of the criminal offense for which the defendant was acquitted on the ground of mental disease or defect shall be governed by the standards and burden of proof relating to civil commitments under AS 47.30.700 - 47.30.915.

(f) A person committed under this section may not be released during the term of commitment except upon court order following a hearing under this section. The state may at any time request the court to release the defendant on the grounds that the defendant has been cured of the mental disease or defect and is no longer a danger to the public peace or safety.

(g) The committing court in its commitment order shall require the commissioner of health and social services or his authorized representative to submit periodic written reports on the mental condition of a person who is committed under (a) of this section.

(h) A copy of all petitions for release shall be served on the state attorney general. A copy shall also be served upon the attorney of record, if he is not the attorney general, who represented the state

CURRENT STATUTE

Sec. 12.45.110. Commitment on finding of insanity. (a) When the trial court determines, in accordance with § 100 of this chapter, that an accused is or was so mentally incompetent that he is unable to understand the proceedings against him or properly to assist in his own defense, the court may commit the accused to the custody of the commissioner of health and social services or his authorized representative until the accused is mentally competent to stand trial, or until the pending charges against him are disposed of according to law. The accused is not subject to expenses of hospitalization and transportation incurred as a result of his commitment under this section and the liability for payment in AS 47.30.270 does not apply to commitments under this section.

(b) The committing court in its commitment order shall require the commissioner or his authorized representative to submit periodic written reports upon the mental condition of an accused person who is committed under (a) of this section. (§ 6.12 ch 34 SLA 1962; am § 1 ch 43 SLA 1966; am § 6 ch 104 SLA 1971)

CSHB 2

* Sec. 3. AS 12.45.110 is repealed and re-enacted to read:

Sec. 12.45.110. COMMITMENT ON FINDING OF INCOMPETENCY. (a) When the trial court determines by a preponderance of the evidence, in accordance with AS 12.45.100, that a defendant is so mentally incompetent that he is unable to understand the proceedings against him or properly to assist in his own defense, the court shall order the proceedings against him stayed, except as provided in (d) of this section, and may commit the defendant to the custody of the commissioner of health and social services or his authorized representative for further evaluation and treatment until the defendant is mentally competent to stand trial, or until the pending charges against him are disposed of according to law, but in no event longer than 90 days.

(b) On or before the expiration of the initial 90-day period of commitment the court shall conduct a hearing to determine whether or not the defendant remains incompetent. If the court finds by a preponderance of the evidence that the defendant remains incompetent, the court may recommit the defendant for a second period of 90 days. The court shall determine at the expiration of the second 90-day period whether the defendant has become competent.

CURRENT STATUTE

CSHB 2

If at the expiration of the second 90-day period the court determines that the defendant continues to be incompetent to stand trial, the charges against him shall be dismissed without prejudice and continued commitment of the defendant shall be governed by the provisions relating to civil commitments under AS 47.30.700 - 47.30.915 unless the defendant is charged with a crime involving force against a person and the court finds that the defendant presents a substantial danger of physical injury to other persons and that there is a substantial probability that the defendant will regain competency within a reasonable period of time, in which case the court may extend the period of commitment for an additional six months. If the defendant remains incompetent at the expiration of the additional six-month period, the charges shall be dismissed without prejudice and either civil commitment proceedings shall be instituted or the court shall order the release of the defendant. If the defendant remains incompetent for five years after the charges have been dismissed under this subsection, the defendant may not be charged again for an offense arising out of the facts alleged in the original charges, except if the original charge is murder.

(c) The defendant is not subject to the expenses of hospitalization or transportation incurred as a result of his commitment under this section. Liability for payment under AS 47.30.910 does not apply to commitments under this section.

CURRENT STATUTE

Sec. 12.45.115. Determination of sanity after release from commitment. (a) When, in the medical judgment of the custodian of an accused person committed under § 110(a) of this chapter, the accused is considered to be mentally competent to stand trial, the committing court shall hold a hearing, after due notice, as soon as conveniently possible after release of the accused from custody. At the hearing, evidence as to the mental condition of the accused may be submitted including reports by the custodian to whom the accused was committed for care.

(b) If at the hearing the court determines that the accused is presently mentally competent to understand the nature of the proceedings against him or to assist in his own defense, appropriate criminal proceedings shall be commenced against the accused.

(c) If at the hearing the court determines that the accused is still presently mentally incompetent, the court shall recommit the accused as provided in § 110(a) of this chapter.

(d) A finding by the court that the accused is mentally competent to stand trial in no way prejudices the accused in a defense based on mental disease or defect excluding responsibility. This finding may not be introduced in evidence on that issue or otherwise be brought to the notice of the jury. (§ 2 ch 43 SLA 1966; am §§ 4—6 ch 119 SLA 1972)

CSHB 2

(d) A defendant receiving medication for either a physical or a mental condition may not be prohibited from standing trial, if the medication either enables him to understand the proceedings against him and to properly assist in his own defense or does not disable him from understanding the proceedings and assisting in his own defense.

* Sec. 4. AS 12.45.115 is amended to read:

Sec. 12.45.115. DETERMINATION OF SANITY AFTER [RELEASE FROM] COMMITMENT. (a) When, in the medical judgment of the custodian of an accused person committed under AS 12.45.110 [AS 12.45.110(a)], the accused is considered to be mentally competent to stand trial, the committing court shall hold a hearing, after due notice, as soon as conveniently possible [AFTER RELEASE OF THE ACCUSED FROM CUSTODY]. At the hearing, evidence as to the mental condition of the accused may be submitted including reports by the custodian to whom the accused was committed for care.

(b) If at the hearing the court determines that the accused is presently mentally competent to understand the nature of the proceedings against him and [OR] to assist in his own defense, appropriate criminal proceedings may [SHALL] be commenced against the accused.

(c) If at the hearing the court determines that the accused is still presently mentally incompetent, the court shall recommit the accused in accordance with AS 12.45.110 [AS PROVIDED IN AS 12.45.-110(a)].

CURREN ATUTE

CSHB 2

(d) A finding by the court that the accused is mentally competent to stand trial in no way prejudices the accused in a defense based on mental disease or defect excluding responsibility. This finding may not be introduced in evidence on that issue or otherwise be brought to the notice of the jury.

* Sec. 5. AS 47.30.010 - 47.30.340 are repealed.

* Sec. 6. This Act takes effect October 1, 1979.

Re: House Bill 22
Donation of Blood

Dear Senator Hackney:

This letter is in support of House Bill 22, which would permit 17 year olds to become blood donors without the need of obtaining specific written permission from their parents.

Many states have such legislation at this time and I am sure that Alaska blood banks and patients would benefit considerably by having this statutory privilege.

This identical bill was submitted to the previous Legislature, passed through the House and was approved by the Senate HESS Committee and was in the Senate Rules Committee at the time of adjournment. So, the bill has been considered before by the Senate HESS Committee and was approved.

The purpose of this bill is to permit 17 year olds to donate blood without the specific written permission of the parents. This substantially expands the number of young, healthy donors available for blood donations. Presently, a 17 year old may be inspired to donate blood but the simple complication of getting the parents' written consent requires an extra trip to the blood bank

and most of the donors then do not return.

Physically, there is no medical reason why a 17 year old is not physically able to donate a unit of blood. Each donor completes a medical questionnaire and takes a blood test and other medical tests prior to being approved as a donor.

The present system tends to delay and discourage the young people from joining in this community activity. All blood banks in Alaska are nonprofit operations. Permitting the young people to participate in this part of society that they can so well do builds in them a sense of belonging to the community, a community responsibility consciousness, and is, in a sense, a Junior Achievement program.

I can think of no reason why this privilege should not be extended to 17 year olds. Further, the blood banks would find this very helpful to them, and I have never heard any opposition to this program.

I hope that the Committee will again favorably consider this legislation.

Sincerely,

Mike Beirne /js
Dr. Mike Beirne
State Representative

THE BLOOD BANK OF ALASKA APPRECIATES YOUR SUPPORT OF HB52
ALLOWING 17 YEAR OLDS TO CONTRIBUTE BLOOD. THE BLOOD BANK
SERVES THE ENTIRE STATE. WE FEEL THIS LEGISLATION DOES MUCH
TO PROMOTE A SENSE OF COMMUNITY SERVICE AND PRIDE OF GIVING
AMOUNG THE YOUNG, WHILE AT THE SAME TIME ASSURING AN ADEQUATE
SUPPLY OF BLOOD FOR ALASKANS IN NEED OF IT. WE HOPE THAT WE
CAN COUNT ON YOUR CONTINUED SUPPORT FOR THIS NEEDED LEGISLATION.

ELIZABETH A. KARALUNAS, EXECUTIVE DIRECTOR

BLOOD BANK OF ALASKA

POSITION PAPER/Department of Health and Social Services

POSITION PAPER
ON
HOUSE BILL NO. 22

"An Act relating to the donation of blood by those who have reached the age of 17 years."

This bill has two medical considerations:

1. Is there a shortage of blood donors in Alaska that could be relieved by allowing 17 year old persons to donate without permission of their parents or guardians? Hospital blood banks could answer this question based on their experience. The Department of Health and Social Services could investigate this issue if it is desired by the Legislature.

2. Is a 17 year old a suitable blood donor?

   Yes, at this age an adolescent can safely donate blood under the same guidelines as an adult.

This bill also has a significant sociologic consideration:

Why should the age of majority be lowered for this particular reason?

Until there has been demonstration of a compelling reason under the first medical consideration or the sociologic consideration, the Department of Health and Social Services is neutral towards this bill.

March 28, 1979

HB 66

Rep. Chatterton. I'm here to testify in favor of CSHB 66. You have been furnished with things that will lead to this. As you see from the title, this is going to exempt senior citizens from payment of annual rental costs if their place of abode is on state land.

You have in your packet a copy of the chapter 97, session laws 1977 which in effect (1) exepmts senior citizens from payment of real property tax (2) a copy of chapter 73, specifically title 29.73.060 which also provides senior citizens over 65 a property tax equivalence payment which in effect could lead to the payment of up to $375 per year to a person who does not own real property but is renting his place of abode.

It seems to me, having taken care of those two situations, we only had one situation left. And to bring parity to people over 65 regardless of where they live either on real property owned by themselves or on property they are renting from someone else or possibly having their home on land that is leased from the state, we should give them their annual rental costs. That is, in essence, what CSHB 66 accomplishes.

It technically carries a zero fiscal note and the reason for that is that it becomes a negative income to the state. It doesn't cost the state anything, but you lose revenue.

We did have testimony in the House HESS Committee given by Director Ted Smith of the Division of Lands and they have no actual real estimate, but probably this bill will affect all of something less than two dozen or a dozen and one half people in the entire State of Alaska at the present time.

Sen. Hackney. If I'm 65 and am sitting on an oil well, is that exempted?

Rep. Chatterton. I know that your question is facetious,because you do know that on State property all of the mineral rights beneath the surface of the land belong to all of the people.

Sen. Sturgulewski. Would we tend to find in leased land more commercial value that might we find more similar situations to that where there are extraordinarily pieces of property. Are there many chances for abuse of people coming in.

Alaska State Legislature

Juneau, Alaska 99811

Rep. Chatterton. That was one of the amendments that was made in the House. Let me call you attention to lines 17 and 18. "No exemption may be granted for any portion of the lease which is used by the leaseholder for any purpose other than his permanent place of abode."

Pat Conheady. The department has no objections to the bill.

Sen. Sturgulewski. I move that we pass out CSHB 66 with individual recommendations

So ordered

MEMO

3/27/79

TO: SEN HACKNEY

FROM: PAUL

Rundown on tommorrow's bills:

HB 22 - Provides for exception to Age of Majority statute (18 years old) allowing a person 17 years old to donate blood.

D-H/SS is taking a neutral position on this bill on the ground that there has not been a demonstrated/compelling need to lower the age limit; however, they state that a 17 year old can safely donate blood.

Dr. Beirne, sponsor of the bill, says by enacting this bill it will substantially expand the number of young, healthy donors available for blood donations. Dr. Beirne also hastens to add that an identical bill was approved by this committee last year.

CSHB 66 - Bill designed to exempt residents 65 years and over whose homes are situated on state leased land from the annual lease rent payment as prescribed in AS 38.05.085 which states "(1) for the initial 25 year period of the lease, the lessee shall pay the state a fixed base annual rent to be agreed upon by the parties in compliance with the provisions of this chapter. (2) the fixed based annual rent to be paid by the lessee shall be readjusted when the initial 25 year period of the lease has expired and thereafter, every 10 years; and....." CSHB 66 would remove this fixed based annual rent payment for those 65 years and over

The fiscall note on the bill is zero. The reason is because DNR says they do not maintain the type of information necessary to ascertain the number of individuals that would be eligible for this exemption. Rep. Chatterton says their is only a handful of perople out there that would be affected, approximately six or so. UP TO DOZ. OR TWO DOZ.

NOTE: property owners 65 and over are exempt from property taxes (AS 29.53.020(e)) and those 65 years and over who rent a permanent place of abode are eligible for the tax equivalency payments from the state. Property Tax Equivalency Payments are good for up to $375 per year for persons 65 and over who rent. (AS 29.73.060)

HB 98 - Bill designed to prohibit schools from administering any questionnaires which inquire into private family affairs of the student without written permission of the parent.

CSHB 108 - See attached transmittal letter for synopsis of bill. Also fiscal notes are attached. Difference between Dept. of Ed's fiscal note and House Finances fiscal note is the impact on the general fund. House Finance places zero impact on the general fund and places the cost on the Feds (100% 1st year) with interagency receipts/ program receipts picking up a portion of the tab in the next two FYs. In contrast, Dept of Ed's fiscal note has

right to vote in charter commission election. — Where the Eagle River-Chugiak Borough was officially incorporated on September 12, 1974, but the act authorizing the residents of that area to vote on the question of whether or not to form a second class borough was held unconstitutional in Abrams v. State, Sup. Ct. Op. No. 1142 (File Nos. 2407, 2418), 534 P.2d 91 (1975) on April 15, 1975, and the Eagle River-Chugiak area was automatically reincorporated into the Greater Anchorage Area Borough, the Eagle River-Chugiak area residents were not unconstitutionally denied the right to vote in a February 11, 1975 election held in the Greater Anchorage Area Borough in which the creation of a charter commission was approved, and its members elected. Jordan v. Reed, Sup. Ct. Op. No. 1217 (File No. 2586), 544 P.2d 75 (1975).

Denying residents of the Eagle River-Chugiak area the right to vote on the question of who sits on the charter commission in the Greater Anchorage Area Borough was not a denial of fundamental fairness since the realignment of political boundaries which occurred as a result of the Abrams v. State, Sup. Ct. Op. No. 1142 (File Nos. 2407, 2418), 534 P.2d 91 (1975) decision is functionally equivalent to an annexation, and the general rule regarding annexation is that when territory has been lawfully and finally annexed, the new area becomes, ipso facto, a part of the municipality subject to municipal jurisdiction and it may be governed as the original municipal territory was governed prior to the change. Jordan v. Reed, Sup. Ct. Op. No. 1217 (File No. 2586), 544 P.2d 75 (1975).

And composition of commission need not reflect them. — Where the area encompassed within the former Eagle River-Chugiak Borough had a separate status under the de facto municipal incorporation doctrine, the composition of the charter commission need not reflect a group of citizens not part of the Greater Anchorage Area Borough at the time the charter commission was formed. Jordan v. Reed, Sup. Ct. Op. No. 1217 (File No. 2586), 544 P.2d 75 (1975).

Chapter 73. Miscellaneous Provisions.

Section
60. Property tax equivalency payments

Provides for property tax equivalency payments up to $375.00 per year for persons over 65 who rent

Sec. 29.73.060. Property tax equivalency payments. (a) A resident of the state 65 years of age or older who rents a permanent place of abode is eligible for tax equivalency payments from the state through the Department of Community and Regional Affairs.

(b) For purposes of determining payments to eligible persons, the department shall calculate a property tax equivalent percentage for each home rule or general law municipality, which levies a general property tax, at the rate of ½ per cent per mil. This percentage applied to the annual rent charged to the applicant or $375, whichever is less is the property tax equivalency payment.

(c) To obtain tax equivalency payments the eligible resident must apply to the department for payment for the preceding year by January 15 of each year on forms and in the manner prescribed by the department. Each applicant shall submit with the application rental receipts or, if rental receipts are not available, other evidence satisfactory to the department for determination of the fact of payment of rent and the amount paid.

(d) If two or more persons occupy a residence as tenants, not all of whom are eligible for tax equivalency payments under this section, the assessor shall determine equitable partial payments to be made to the eligible tenants. However, tax equivalency payments to an eligible

applicant may not be reduced because the spouse is less than 65 years of age. If all occupants in a residence are eligible for tax equivalency payments under this section, the occupants shall decide between and among themselves which shall receive payment. (§ 2 ch 217 SLA 1976)

Chapter 78. General Provisions.

Section
10. Definitions

Sec. 29.78.010. Definitions. In this title, unless otherwise provided, or the context otherwise requires,

(1) "borough" means a general law first, second or third class organized borough;

(18) "areawide power" means a power of an organized borough exercised throughout the borough;

(19) "nonareawide power" means a power of an organized borough exercised by the borough only in the area outside of cities.
(am § 7 ch 212 SLA 1976; am § 10 ch 93 SLA 1977)

Effect of amendments. — The 1976 amendment, effective June 21, 1976, added paragraphs (18) and (19).

The 1977 amendment substituted "first, second or third class" for "first or second class" in paragraph (1).

As the rest of the section was not affected by the amendments, it is not set out.

S 60 (Rev. 12/78)

Senior Citizens (exemption--lease rent)

HOUSE BILL NO. 66, by Reps. Chatterton, Malone, and Phillips. Amends AS 38.05 by addition of new section, "SENIOR CITIZENS EXEMPTION," which exempts persons 65 or older from payment of lease rent to state if property is occupied as permanent place of abode and leased under AS 38.05.070-105. Persons must file a written request for exemption. Legislature shall appropriate sums to cover amounts lost by operation of above. Does not provide for effective date.

Introduced January 24 and referred to HESS, then to Finance.

Senior Citizens (exemption--lease rent)

HOUSE BILL NO. 66, (see page 60). Reported back to the house February 14 by the HESS Committee with a majority of the committee recommending do pass with amendment. (Amendment is technical in nature). To Finance.

Senior Citizens (exemption--lease/rent)

HOUSE BILL NO. 66, (see pages 60; 228). Reported back to the House on February 26 by Finance with a majority recommending replace with SUBSTITUTE (same title) and that it do pass and attaches a fiscal note. SUBSTITUTE changes wording refering to exemptions granted for purposes other than permanent abode. Original bill stated that no exemptions would be granted "if the lease is used by the leaseholder for any purpose other than his permanent place of abode." SUBSTITUTE states: "No exemption may be granted for any portion of the lease which is used by the leaseholder for any purpose other than his permanent place of abode." Also changes reference to "director of land and water' to "commissioner".

Offered February 26 and referred to Rules.

IN THE HOUSE BY THE FINANCE COMMITTEE

CS FOR HOUSE BILL NO. 66

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act providing an exemption for senior citizens from payment for land leased from the state."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 38.05 is amended by adding a new section to read:

Sec. 38.05.098. SENIOR CITIZENS EXEMPTION. (a) The real property occupied as a permanent place of abode by a resident 65 years of age or over and leased by that resident from the state in accordance with AS 38.05.070 - 38.05.105 is exempt from the payment of an annual lease rent. Only one exemption may be granted with respect to the same property and, if two or more persons are eligible for an exemption with respect to the same property, the parties shall decide between or among themselves which shall receive the benefit of the exemption. No exemption may be granted for any portion of the lease which is used by the leaseholder for any purpose other than his permanent place of abode.

(b) No exemption may be granted except upon written application for the exemption on a form provided by the commissioner. The leaseholder must file the application not later than 60 days before the anniversary date of the lease, and shall file a separate application for each lease year for which the exemption is sought. If an application is filed within the required time and is approved by the commissioner, he shall allow a rental exemption for the lease year commencing on the anniversary date in accordance with the provisions of this section. The commissioner may at any time require proof in the form he considers necessary of the right to an exemption claimed under this section.

(c) The legislature shall annually appropriate from the general fund to a trust fund the amount necessary to reimburse the trust fund for revenue lost to it by the operation of (a) of this section.

Pouch V
Juneau, Alaska 99811

Dear Senator Hackney,

We are writing this letter to thank you for twice passing the Omnibus or as it has been dubbed, Christmas Tree Bill# 94. As you know, an appropriation for $85,170.00 was included in this bill for the Studio Club. It is imperative that we receive this monies, as we are operating without monies and without salaries and have been for some time. If it were not for our CETA, Title VI Grant and our Older American, Title V Grant, we wouldn't even be operating. All of our in-kind monies have now been spent and we're looking at nothing. Just plain nothing.

It is our understanding that the bill is now on Governor Hammonds desk for signature and we are sincerely hoping that he will sign it, not veto it, and that he will do it in a short while and not take the 30 days which he can if he wishes.

It's difficult for us to say how much we appreciate this. In the above paragraphs, you can see how much we need the monies, but more than that is the fact that you have allowe! us more time to help people.

The Studio Club will endeavor even harder to prove that your faith in us was not misplaced and that your monies are not misspent, and that the people receive help they need and deserve. As you have seen run through everything that we do, everything that we write, WE BELIEVE THAT EVERYONE DESERVES A CHANCE. We thank you for the chance you have given us again. If you have any questions, if you wish any information, please do not hesitate to contact us. We are always happy to answer questions or provide information. Again we appreciate you, we thank you. We'll work hard, we will produce results that Alaska can well be proud of.

Sincerely,

Leonard & Henrietta

Dear Senator Hackney:

Please support House Bill 94 to provide temporary supplemental support for the efforts to curb the incidence of child abuse and neglect.

As you know, Alaska has a very high incidence of child abuse; resources are scarce. These funds are small but essential to support the Anchorage Child Abuse Board and the Fairbanks Child Protection Task Force to continue services to abusive families and abused children.

Thankyou for your support of HB 94.

Sincerely,

Kaaren J. Riehle

Juneau, Alaska 99811

Dear Senator Hackney:

I am presently on the Board of Directors of the Anchorage Child Abuse Board. As a child psychologist, and as a concerned citizen of Anchorage, I am 100% in support of HB 94.

It is extremely important that private community efforts get funded for the serious problem of child abuse. As our community grows, it will become more and more important that we be able to deal with the problem existing in our community at the grass roots level. However, in order for us to do that, we must obtain the necessary funding to educate the community and to provide services for it. The additional six social workers will be a welcome and needed addition in helping to deal with the problem of child abuse.

I strongly encourage the Senate to vote favorably for the passage of HB 94.

Sincerely,

Ivonne Heras

Ivonne Heras, Ph.D.

Feb 15

Dear Senator Glenn Hackney,

I am writing to express my support for House Bill 04. I have worked in the field of child abuse in Anchorage for the last four years. I am aware of the program that the Anchorage Child Abuse Board offers to the community and feel that these programs have been of great benefit to Anchorage. However, I am also aware that the Anchorage Child Abuse Board has not been able to provide as many services as needed due to lack of funding.

I strongly urge you to do all that is possible to see that House Bill 04 is passed by the legislature this spring.

Sincerely,

Brenda Foster

Dear Senator Hackney:

As a citizen of Alaska, I am strongly in support of House Bill 94, which has recently been introduced into the State Legislature. This bill provides for much-needed funds for the Anchorage Child Abuse Board and the State Division of Social Services, Anchorage Office, to carry on their much-needed work.

I and other supporters of these efforts urge your support of this bill.

Respectfully,

Gerald C. MacLaren MEC

February 15, 1979

Senator Glenn Hackney
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

I recently learned that HB94 has been reported to your committee for consideration. I feel that Alaska's children need our help, as they are our future resource. In talking with personel at the Division of Social Services, I have learned that they have set priorities in reacting to child abuse as their linited staff compels tham to spend their time with the most serious cases. More funds for staff would certainly be a boom in allowing their agency to react to problems before they reach crisis level. Due to growing awareness of the extent of abuse in Anchorage, we need to provide additional family counseling, parenting classes, and an expanded Parent Aide program. The Child Abuse Board is working to fill this need. I strongly urge you to support funding for them.

Sincerely,

Marie Brown

ALASKA CHAPTER
American Academy of Pediatrics

February 15, 1979

Senator Glenn Hackney
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

On behalf of the American Academy of Pediatrics, Alaska Chapter, I would urge you to give priority consideration to the issue of child abuse during the 11th legislative session. Both the State and National Academy of Pediatrics have set this issue as a top priority.

Alaska has one of the most severe child abuse problems in the nation. As physicians working in the Anchorage area, we deal frequently with serious child abuse cases. We are concerned about the lack of adequate staffing for the local office of the Division of Social Services. Without sufficient D.S.S workers to intervene with abusing families, children are needlessly put at risk.

We further support funding of the Anchorage Child Abuse Board which provides additional vital services to abusing and high risk families.

Attached please find additional support for the efforts of the legislators in the area of child abuse. The signatures are from many other members active in our academy.

Your assistance in this urgent matter is greatly appreciated.

Sincerely,

Marian T. Witt MD

Marian T. Witt, M.D.
Chairman, Alaska Chapter
American Academy of Pediatrics

WE THE UNDERSIGNED SUPPORT THE PASSAGE OF HB 94 TO PROVIDE ADDITIONAL CHILD PROTECTION WORKERS FOR ANCHORAGE DSS AND FUNDING FOR THE ANCHORAGE CHILD ABUSE BOARD. THE ISSUE OF CHILD ABUSE IS VERY IMPORTANT AND NEEDS TO BE DEALT WITH IMMEDIATELY.

February 13, 1979

Senator Glenn Hackney
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

House Bill 94 will be up for your consideration soon. This bill will provide temporary, supplemental support to agencies in Anchorage and Fairbanks seeking to curb the incidence of child abuse and neglect.

The incidence of abuse in our area is very high the resources available to meet it are very scarce. The amounts, made available through HB94, though small, are critical. The Anchorage Child Abuse Board will be able to continue serving abusive families, the Division of Social Services will able to provide better service with lower case loads, the Fairbanks Child Protection Task Force will be able to implement a useful program in that interior city, and related alcoholism problems can be treated as well.

I hope you will be able to suppor this bill for it will greatly enhance our ability to combat the tragic problem.

Thanks for your cooperation.

Best wishes,

Gary H. Holthaus

Representative Sally Smith
Pouch V
Juneau Alaska 99811

Dear Representative Smith:

It is with regret that the Fairbanks Rehabilitation Association must make a request for a supplemental appropriation of $70,000.00 during this year of austerity in state government. However, we make this request in a state of dire need caused by a variety of circumstances, many of which were beyond our control. We believe that the denial of this request may very well render our agency, which provides statewide training and rehabilitation services to the developmentally disabled, insolvent.

Fairbanks Rehabilitation Association operates four residential group homes and Hope Industries, both of which provide training to the developmentally disabled. In the past year, we have serviced clients from Barrow, Venetie, Nenana, Delta Junction, Copper Center, Kotzebue, Beaver, Fairbanks, Anchorage, Valdez, Ft. Yukon, Huslia, North Pole, Palmer and Dillingham. Our residential program has been called the finest in the state and we have been vigigent in our attempt to develop innovative and sophisticated training programs as well as sheltered workshop activities.

Nearly half of our deficit outlined above was caused by the complete breakdown of the boiler system at Hope Industries. Bills for the purchase of new equipment and installation total nearly $30,000.00. The rest of the debt resulted from a variety of problems. Major contributing factors include our move from a warehousing living situation for clients to more humane group homes, a client load often above our block funding from the state, the acquisition of businesses intended to expand sheltered workshop opportunities and the lack of a competent fiscal management capability in the organization's former administration. Details of the above situations will be available during a visit to Juneau by four board members (Beverly Staley, President; Mickey Rutherford, Vice President; Candace Magnusson, Secretary and James Arthur, Member). We hope to schedule visits with individual legislators as well as a presentation to the Fairbanks delegation between February 7 and 9.

In recognition of the state's severe financial problems, we are requesting a bare minimum of the funds which we feel we need to survive with our program intact. The impact of not receiving this assistance would be the liquidation of equipment,

property, etc. which would make continued operation unfeasible. At best, services would be curtailed for all but a few clients at a time when our waiting list has numbered up to 10 persons.

We would like to emphasize that we are not relying on the state to solve our financial difficulties. When the administration's lack of fiscal responsibility became apparent, the board responded by taking action to change the leadership and running the organization itself on a voluntary basis. We have reduced our staff from 29 persons in 1977 to 22 persons in 1979 with no reduction in clients or programs. Our administrative costs have been reduced through the combination of facilities and centralizing purchasing. We have arranged for free professional consulting to further cut costs, increase efficiency and upgrade the training program. We are actively recruiting for a new executive director with proven management experience and an excellent reputation in the rehabilitation field. We can document improvements in our training program over the last year in spite of the financial crisis. Finally, we will make a major effort to renegotiate our contract with the state when efficiency moves are complete and our program refined.

We sincerely believe and can show documentation that the above listed moves in concert with the supplemental appropriation of $70,000.00 will pull Fairbanks Rehabilitation Association out of financial chaos. We believe that the management ground work being laid at the expense of many hours of donated board of director's time will begin a new history of efficient management and fiscal responsibility for Fairbanks Rehabilitation Association.

Sincerely,

Beverly S. Staley

1841 E. 56th Avenue
Anchorage, Alaska 99504

Senator Glenn Hackney
and Members of the Senate HESS Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney and Committee Members:

We are writing to express our concern regarding the special appropriation of $85,000 for alcoholism services for Anchorage as proposed by Representative Russ Meekins.

It is our understanding that these funds are intended for the Studio Club alcoholism program.

Our concerns are as follows:

1. The Studio Club is not a State-approved treatment program;

2. Other alcoholism and drug abuse treatment, prevention and education programs must apply to the State Office of Alcoholism and Drug Abuse for State monies in response to a Request for Proposals;

3. All other alcoholism and drug abuse programs must submit to local community and/or regional HSA review;

4. All other alcoholism and drug abuse programs must compete for funding available through (limited) State General Fund appropriations;

5. All other alcoholism and drug abuse programs in Anchorage are effectively precluded from receiving (and effectively prevented from applying for) grant funds directly from the State Office of Alcoholism and Drug Abuse;

6. All other alcoholism and drug abuse programs in Anchorage (unfortunately) must apply to and sub-contract with the Municipality of Anchorage in order to obtain State funds;

7. The amount of money proposed is exhorbitant given the type of program operated by the Studio Club and given the operational time period to be covered by such funds.

Senator Len Hackney
And Members of the Senate HESS Committee

From Segal and Wasserman
February 13, 1979

Page Two

It seems quite clear that to fund the Studio Club, or any other alcoholism or drug abuse program, as proposed by Rep. Meekins would represent an exceedingly irregular, preferential and unwise expenditure of State tax dollars.

Therefore, although we may sympathize with the Studio Club's needs and with the grant-in-aid restrictions imposed on Anchorage programs, we must urge you to amend Rep. Meekins' proposal deleting the allocation of any funds for alcoholism or clearly alcohol-related services.

We hope that our comments will be both useful and persuasive to you in your deliberations.

Thank you for your consideration.

Respectfully yours,

Bernard Segal

Paul Z. Wasserman

Senator Glenn Hackney
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Sen. Hackney,

We are all aware that alcoholism is the number one disease in this country. This certainly holds true for the Municipality of Anchorage, as well as all of Alaska.

Also, most of us are aware that many many dollars are spent in trying to combate this illness. Too much of this is spent on programs that just aren't doing the job.

I know of a program that IS doing a good job in this field. It is the Studio Club - located at 546 E. 15th Ave., in Anchorage. If you are not already acquainted with this remarkable program, may I suggest that you contact them to learn of their work.

As a ten year resident of Anchorage and a life time Alaskan, I urge you to support the Studio Club, if or when they ask you for your assistance in the future.

Sincerely,

Mrs. W. E. Butts, Jr.

Mrs. Walter E. Butts, Jr.

Dear Mr. Hackney

It has been brought to my attention that in the budget for 1977 the amount for the Student Club 546 E 15th has been over looked. I am concerned about this as I am an alumni.

I have been active now & no in part thanks to the guidance and direction received. The meetings, the movies the group sessions, the committees, and the family atmosphere played a large part in my recovery.

I am a wife, mother in Palmer with the only thing I can for me and the knowing I could go to the club anytime, but not knowing how to get there.

I was given the chance to enter and have with Student Club with the stipulation that I stay in the home under their care & able to do and a few days after completion of the study program. I was able to have a stronger bond and more peace with the hope that when the time is right I could be able to be employable in any trade and have more faith in myself & accomplishment given back something to you.

What ever you can do to see that the funds for 1977 are made available for the Student Club 546 E 15th would be appreciated by me and many others like me. That their funds be allocated to the Student Club to help

Sincerely yours
Jack R. Smith

Dear Mr. Hackney

It has been brought to my attention that in the budget for 1978 the money for the Shades Club 546 E 15th has been over looked. I am concerned about this as I am an alumni.

I have been collecting money in part thanks to the guidance and direction received. The meetings, the movies, the group sessions, the counselors, and the family atmosphere played a large part in my recovery.

There is no where else in Gabriel with the only thing going for us and the drinking. Socially I want to the drunk anymore but not knowing how to live sober.

I was given the chance to continue our work in the Shades Club with the responsibility by the house until this I was able to do and a few days after completion of the 30 day program I was able to have my own apartment. I am now working, and the day that I reach the limit of eight I will be able to be employed in any bank and have since finally an Society a responsible person with something to give.

Whatever you can do to see that the funds for 1978 are made available for the Shades Club 546 E 15th will be appreciated by me and many others who may that they might be available the Shades Club to help.

Sincerely yours
Jack R. Smith

Senator Glenn Hackney
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney,

Each year it seems that we appeal to you for monies to continue the operation of the Studio Club. We always somehow or another seem to be left out, forgotten, or missed. In 1978, that appears to be what has happened to us. We have [redacted] as you already know, received $40,000.00 from the Municipality of Anchorage, and $30,000.00 from the Governors contingency fund. These monies have ran us into January and are expiring. We are asking for monies to continue from January to the end of June of 1979. And we are also hoping that you will consider us for monies for the 1979-80 year.

We realize that the cost is a factor that must be looked at closely. But we doubt that you will find a more cost effective program than the Studio Club. We not only produce results, we also save bucks. Our cost is $22.00 a day. Our operating cost is $16,700.00 a month. We are depending completely on state monies and what few in-kind monies we can garner from other sources. And believe me, we are scratching for the other sources.

You probably have received our Newsletter and probably you look at it and say well, it sounds good. You can look at Leonard and myself and you can say they've been around a long time. They seem to be pretty straight people. We cannot deny that we have been around a long time. We hope that we are pretty straight people. Our results are for real. They are real people and they are getting help, at a reasonable price. Believe me, you get more than a dollars worth for every dollar you give us. We also have two contracts, one with the Municipality of Anchorage for CETA employees for full-time, and one with the state for Older American employees for part-time. We would be lost without these contracts because they provide us with employees we need and have no funds to pay for any other way. This is getting into a long drawnout letter, and it was not our intention to write such a missile. All we ask is that you consider funding us for the remainder of 1979 and look at us hard for funding thru 1980.

We believe that everybody deserves a chance. We do not believe that we should feed and clothe the constant repeater, who only uses programs. We do not believe that we should produce people to go out and misuse welfare and other help programs. We believe that we must produce people who can care for themselves, who can return to the field of employment, pay taxes, and lead a straight life, clean, sober, and happy. We are not 100% successful. If we were, everybody would be flocking to us for help. We have received much praise, little monies, but we have a lot of hope.

Please look at us and let us know if you feel we can be funded with immediate funds, and in the coming 1980 budget. As we have stated before, we feel that everybody deserves a chance. We feel that you have given us a chance and we proved ourselves. Now we need your help to continue on.

Sincerely,

Leonard and Henrietta

Leonard & Henrietta Nugen

Anchorage, Alaska 99504

Dear Glenn,

I realize there will be a lot of demands for funding coming your way but I am hoping this request will be top proirity. I am writting you in behalf of the Studio Club at 540 E 15th Street in Anchorage. I am on the advisory board and have worked with the Studio Club for seven years now.

I have seen the alcholic and drug abusers come in beaten and down and leave there with hope and now good citizens. We don't win all the time but our sucess is great. People learn they are not alone and find how to like themselves and thus can cope with lifes problems better.
We are in need of emergency funding from Jan. to July 1979 and permanent funding for 1980. The Studio Club is a well run cost concious organization. With the need to get the most from our poor dollar this is one place it can be done. We serve the community and State well. This is a place that is needed.

We will gladly show you around the club if you havenot already been there. You can see how the money is spent and talk to some of the ones that have left and arenow out in the world paying taxes. You can also talk to some of the people at the club to learn more about the program. The phone number is 279-2124.

So Please do whatever you can to keep the doors of the Club open.

Thankyou for reading this

Sincerely
Allegra

Fairbanks, Ak.

Dear Mr. Hackney

I am writing you this letter in regards to the Studio Clubs situation. As you may be aware , the Studio Club is a halfway house for people with a drug or alcohol problem, and they are in very serious financial trouble due to lack of funding. This lack of funding will force them to close the doors at the end of January.

The reason I am writing you this letter is that I was a client of the Studio Club about a year ago. I personally believe that if I hadn't found the Studio Club, I would either be locked up or dead today. Before I came to the Studio Club I was a very sick person and didn't even know it. I was drinking most of the time and about to lose my job (which I did.) This was ussally the way I lost most of my other jobs in the past, because of my drinking.

On the 17th of January this year, I will have one year of total sobrity, one day at a time.

I really can't say enough about the Studio Club, Because it gave me a new way to live again, a life that I never thought could be possible for me. I feel that if they have to close the doors it would be shutting off help to other people that have the same problem that I have with alcohol. I would deeply appreciate any help you can give to get some funds appropriate for the Studio Club.

Thank You.

Yours Truly

Roger Solberg

Glenn Hackney

Sen. Hackney,

My name is William Hawley and I am a resident client at the Studio Club, 546 E 15th Avenue in Anchorage. I have been here for app. 3 1/2 mos. When I got here I had little or no use for myself or anyone else. Because of my alcoholism, I had a very negative attitude towards everything in particular and life in general.

My stay here at the Studio Club has helped me immensely. As a direct result of my stay here, I have acheived a smalll measure of self- cinfidence and maturity.

It has come to my attention recently that the Studio Club is in dire need of financial support. I find it difficult to beleive that such a worthwhile establishment as the Studio Club is having trouble finding support.

The job that is done here is not one that can be determined a success interms of dollars and cents. It is vastly more than that. People's lives are almost miraculously changed from worthless hopeless alcoholic and drug-addicted individuals to responsible, sober, and productive members of society. The dedication of the staff is one of the biggest reasons for its success. One example of this is that the director, Leonard Nugen,has been working since January 1, 1979, without a salary. Even with this limited supply of funds, the program has been operating very successfully. For istance the food here is better than I have had in a long time. The best that can be done with what is available is being done and for this I, and everyone here, is very grateful.

It is for this reason Sen. Hackney, that I would ask for your support for the Studio Club. If you could help us obtain the financial support necessary it would be greatly appreciated by many who have alredy been through this program, and also by the countless alcoholics and drug addicts who have not yet found a way out of their misery.

If funding is obtained, I feel certain that a great many more people may be helped by the Studio Club. I personally know many people who have been here at the Studio Club and have left and been able to return to normal, productive lives.

Thank you for taking the time to read this letter and if I can be of any further assistance to you please feel free to contact me. I would be interested to hear from you about this matter which is of grve concern to all of Alaska.

Sincerely Yours,
William Hawley

William Hawley
546 E 15th Ave.
Anchorage, Ak.

753o Stanley Drive,
Anchorage, Alaska 99502,
January 10, 1979.

Honorable Glenn Hackney,
1136 Sunset Drive,
Fairbanks, Alaska 99701

Honorable Senator Hackney,

You know, I am sure, of the great alcohol abuse problem that exists in Alaska, but are you aware of the paucity of successful programs that are in existence to help these alcoholics recover from their addiction?

The Studio Club at 546 E. 15th Avenue in Anchorage has such a program. It serves people from all over Alaska and I am certain some of your contituents are among them. So far, its recovery program is the best in the state.

At this time, there is danger of it terminating the treatment and rehabilitation of alcoholics by the end of January, for lack of funds. It is urgent that the Studio Club obtain some State funding in order to continue its rehabilitation program for alcoholics.

Please feel free to visit the facility at any time and to make any inquiries as to the validity of the program.

Good rehabilitation programs are too few to let this one die. I urge your support on this issue.

Yours truly,

Dr. Dorothy M. Forest

January 4, 1979

Bob Donathan
1303 W. 46th
Anchorage, AK 99503

Glenn Hackney
1136 Sunset Drive
Fairbanks, AK 99701

Dear Mr. Hackney:

I hope you can find the time to read this letter. It is a matter of great concern to the people of the state of Alaska. Except for the people of this state, I would not be able to write it.

My name is Bob Donathan and I am an alcoholic. By the grace of God, I have been able to live and work among the beautiful people that are called normal people.

I had put myself down in the slime for so long, I didn't have the courage to ask these normal people for help.

Here in Anchorage, we have a treatment center. The treatment center is not here to save the world. It is here to give hope to those who want and need it. The people who run this center are not saints and don't claim to be. They are just folks who don't mind reaching down in dirt and picking people up, saying to them, "you don't have to live in the slime anymore if you don't want to." I have known these people about a year now, and I don't know of anyone they have turned away. I thank God they helped me get up.

The reason I am writing this letter, these people are out of funds to keep going. I don't know much about this funding, but it would be wonderful if you could give the matter some thought about a solution. This center is called the Studio Club.

I am very grateful to be able to write this letter.

Thank you.

Sincerely yours,

Bob Donathan

Bob Donathan

Juneau, AK 99811

Dear Senator Hackney:

My name is Elvis Cole and I am a resident of Anchorage. In 1976, I was a client at the Studio Club. Since that time I have been sober, I am employed and I have found a happier way of life.

Leonard and Henrietta tell me that they were left out of last years budget and they have been given enough money to exist until the middle of January. At that time they must look to the legislature for refunding. They also tell me that legislators and people who can appropriate money cast a suspicious eye on programs dealing with alcohol abuse. They doubt that they produce any sober results. I am one of the sober results and I am not ashamed to say so.

If there is any way that you can help the Studio Club get emergency funding and then funding on a regular basis, I am appealing to you to please do so. My voice is little enough payment for what I received and have reaped the rewards since I have left there. This program works, I know.

Sincerely yours,

Elvis Cole

Dear Senator Hackney:

The Studio Club needs funding immediately as the small amount of do[illegible] they receive will be exhausted in January.

Does this program work? It did for me. I went through the Studio Cl[illegible] in 1975. I drank one time since then but I am now sober two and a half yea[illegible] I am employed, paying taxes, taking care of myself. I did not before.

When I came to the Studio Club I was so confused and sick I hardly knew my own name. They never asked me for any promises, they just said, if you want help you are at the right place, come on in. When I drank that one time, they encouraged me to try again. I have. It has worked. The Studio Club helps people. Leonard and Henrietta are always there. They know how to help us alcoholics and addicts.

Please, help them keep this vital, useful, successful program going.

I am one of the Studio Club's success stories. It works.

Dear Senator Hackney

I strongly urge your support of House Bill 94. The supplementary appropriation for the Anchorage Child Abuse Board will enable that agency to continue its invaluable work. I have seen how effective they are in working with families to help not only the child who is abused or neglected but working with families so that children may safely live at home. The appropriations for this agency are well spent.

The Anchorage Child Abuse Board does a good job of training and supervising many volunteers to work with families, thus adding to its effectiveness.

The additional child protection workers provided in this bill are urgently needed since child abuse/neglect are so prevalent in the Anchorage area.

With earlier intervention and more adequate follow-up this problem of abuse may be better treated and recurrence of severe problems are less likely.

Please do vote to pass House Bill 94.

Thank you,

Margaret Sharrow

Dear Senator Hackney:

House Bill 94 is a very important bill to many Alaskans, including myself. The child abuse funds included in this legislation are vitally needed to help combat the staggering numbers of child abuse cases in our state. The efforts of the Anchorage Child Abuse Board need to be assured of continuing. Abusive parents can be helped if the services are available to them. By supporting the efforts of this largely volunteer agency, we are committing ourselves to helpingcombat the severe abuse problems in Anchorage.

The local Division of Social Services office is accutely understaffed. The additional funds in HB94 can help provide better coverage for the Anchorage area.

Your efforts in helping HB 94 pass are greatly appreciated.

Sincerely,

I. Future:

Now we would like to ask you a few questions about your hopes for your future education and work.

1. How much school would you like to finish? (check one)

____ Junior High ____ High School ____ Community College

____ University ____ Vocational Training School

a. What do you think your chances are for getting this much education?

____ Poor ____ Fair ____ Good

b. What are the chances that you will drop out or quit school before completing high school?

____ Poor ____ Fair ____ Good

c. How many of your friends will go to college or university?

____ None ____ Some ____ Most

d. Do you have a better, equal, or worse chance than others to get a good education?

____ Worse ____ Equal ____ Better

2. What kind of job would you like to have as an adult?

_____

a. What do you think your chances are of getting that kind of job?

____ Good ____ Fair ____ Poor

b. What are the chances of you getting a job as an adult that pays well?

____ Good ____ Fair ____ Poor

c. How good are the chances for you to be successful at your future job?

___ Poor ___ Fair ___ Good

d. Do you have a better, equal, or worse chance than others to get the job you want?

___ Better ___ Equal ___ Worse

J. Behavior:

Circle the answer you choose for each question. Remember, all of your answers will be kept secret.

	Never 1	Once or Twice 2	Several Times 3	Very Often 4
In the past year, how often have you...				
1. given a teacher a fake excuse for being absent from class?	1	2	3	4
2. taken little things that don't belong to you?	1	2	3	4
3. broken into a locked place without permission?	1	2	3	4
4. taken a car or truck for a drive without the owner's permission?	1	2	3	4
5. taken something from a student's locker without asking him?	1	2	3	4
6. intentionally (on purpose) damaged private or public property.	1	2	3	4
7. beat up on other young people?	1	2	3	4
8. taken something worth $50 or more that didn't belong to you?	1	2	3	4
9. run away from home?	1	2	3	4
10. used force to take money from another person?	1	2	3	4
11. smoked cigarettes?	1	2	3	4
12. smoked marijuana?	1	2	3	4

	Never 1	Once or Twice 2	Several Times 3	Very Often 4
13. shared marijuana with others?	1	2	3	4
14. sold marijuana?	1	2	3	4
15. sniffed glue or inhaled fumes (gas)?	1	2	3	4
16. used hard drugs ("downers", heroin)?	1	2	3	4
17. sold hard drugs?	1	2	3	4
18. used alcohol ("booze")?	1	2	3	4
19. tried to hurt yourself?	1	2	3	4

K. Self Image:

Circle the answer for each statement that best describes how you feel about yourself.

	Always 1	Often 2	Sometimes 3	Never 4
1. I am a person of worth, at least equal with others.	1	2	3	4
2. Other people think I have good qualities.	1	2	3	4
3. All in all, I feel that I am a failure.	1	2	3	4
4. I am able to do things as well as most people.	1	2	3	4
5. I am not respected by others.	1	2	3	4
6. Iam fun to be with.	1	2	3	4
7. I find it easier to talk to a person of my own race or ethnic background.	1	2	3	4

L. Peers:

The next ten statements have to do with your friends. Read them and circle the answer which best describes them.

3/28/79

HB 98

Rep. Anderson. The bill is quite simple. I introduced this bill in response to what I consider to be a problem area in the administration of questionnaires and surveys. This came out of controversy that erupted in Juneau last year and would have caused some problems in the Dillingham school district, but I wrote a letter to the school board and asked them not to administer a survey that I felt inquired into private family affairs that are not any of the state's business or should not be a matter of public record; unless permission is obtained from the student's parent or guardian.

There are some people here today that would like to testify on the bill as to why they feel very strongly about having a bil of this nature pass the legislature and hopefully be signed into law.

I believe you have a copy of the survey . . .

Sen. Hackney. Is the survey that you are speaking of in the Dillingham area, was it similar to this one.

Rep. Anderson. Yes it was. As a matter of fact, the only different between this one and that one is that it had Dillingham School District inserted.

Sen. Fahrenkamp. I curious who put out this questionnaire and for what purpose.

Rep. Anderson. The City and Borough of Juneau, the particular one that you have in your packet. As I understand the purpose for administering this survey was to determine what type of youth services were available and what type of youth services were needed or required in the community for students or young people in their leisure time.

Sen. Sturgulewski. Were any of these actually used or did parents being alerted come into, was it actually administrered either in Juneau or in Dillingham.

Rep. Anderson. It was administered in Juneau, I believe, and there were a number of parents who were really quite inscensed by the administration of the questionnaire. Mr. Thetford I think can answer that answer that specific question on how it was done. As I understand it the students were brought into school and were told that it was a questionnaire. Because of peer pressure and so forth, there aren't a lot of students that wouldn't walk out and say no, they would would not participate in what could be construed as a good purpose to be served by answering the questions in here. There were a lot of them that

didn't have the courage to just walk out and say 'no, I don't want to be part of this.'

I would like to point out the survey is suppose to be confidential. But if you look at the questions, it wouldn't take very long to determine who was being questioned when you have questions such as: 'what school do you go to'; 'how old are you'; 'what is your sex'; 'which ethnic group do you belong to'; 'what grade are you in now'; 'how long have you lived in your present home'; 'which of the following best describes where you live'; 'how many rooms are in your home'; 'how many people live in your house'. Then on the second page it has a map of the City and Borough of Juneau and it asks you to check the named area which is closed to where you live. I think just on those two pages along, it wouldn't take very long to determine precisely who the person being questioned was.

I understand this was suppose to be confidential, but again, the survey does go into private family affairs and if a school district principal or any other person in the school desires a questionnaire of this nature then they should be required to get written permission from the student's parent or guardian.

Terry Thetford. I've probably been more closely involved with these surveys than probably anyone else. I was involved in a lawsuit with the City over the thing.

Nels already went through the first page which blows the thought that the surveys were anonymous. But what really inscensed us was that here was another instance where a government entity, be it a school district or anyone else, was able to invade a person's domicile without his consent. Basically just opening the door and walking around looking in the drawers.

To the point of being negative: 'there are not enough classes that are useful and important in school'; 'most of my teachers really do not care about me'; 'I have been discriminated against in school because of my race or ethnic background. That is very negative.

The stated objective of the survey was to evaluate youth services in the community. Originally the survey was in three parts; (1) sexual activities of the youth; (2) abstract questions about family life, where you went after school, what you did, how well your parents took care of you, how much they drank; and (3) evaluating the youth services in the community, the boy scouts, the girl scouts, parent planning. The third section I can see as very valuable. The first section was thrown out because they said it was too sensitive. Parents were not notified of the questionnaire. The students were selected at random. There were 260 some. I understand there were several pairs of twins which doesn't leave much creedance to the random sampling. The were not told; they were asked to report to a room, they reported to the room, the vice principal stood in front of the room. I talked to several students, The principal held up a survey and said ' this is a questionnaire to help improve Juneau, if anybody doesn't want to take it they don't have to, they can leave.' They were not

informed as to what was in the survey. They were not informed as to the types of questions or anything. When they were given the questionnaire and they realized it, the peer pressure would prevent them from being the firxt one to get up and walk out.

The crux of the whole thing, we fought this thing in court to the tune of $17,000. And not a word of this was ever used. The youth advisory council which was the only entity who had ever endorsed it threw it away and said it was not a valid survey they could not use.

I'm saying if it is a truly good survey, send it home to the parents and say we want your children to fill this out. If the parents think it is a good survey let them go. It doens't prevent the surveys from being given; it doesn't prevent a counsellor or teacher from taking a problem child into an office in a professional situation and asking if he has problems at home. That is a professional confidence that isn't for general public information.

This information was all compiled on a computer. Put on the banks at the U of A computer and with full access terminals out in the libarary here and all over the state, anybody had acess to the information. There is enough information compiled on all of us on computers that we don't need anymore of this kind of negative information.

Sen. Sturgulewski. We are talking about a whole lot of things that may happen in the future where we have elected boards that are suppose to be responsive; and many communities have cirriculum studies and groups and there is a process for handling this. You had a rough time. It bothers me to put on a state level that kind of thing and not leave it up to the local community, through their elected officials, and the public to be aware.

Terry Thetford. We went to the school board meeting when this survey was proposed. The City Council said if the school board will go for it we will fund it to the tune of $8,000. People were red faced, fist shaking mad; they said 'you can't do this, you cannot invade our homes'. And yet those elected officials set behind that table and shook their heads. One old lady got up and said 'we need this to evaluate youth services'; and they okayed it; so much for elected officials.

The bill doens't prevent a survey from being taken, all it says is that if a survey is going to be given that prys into family live, the parents have to give consent. It's not saying something can't be done. Let's put the control back in the parents' hands; they are responsible for those children until they reach the age of anjority. Let them be all the way responsible; don't let them just them be responsible where it is convenient. When it comes to the home the state has no business.

Marrouce Hall. I'm chairman of People for Better Education. I am very happy to see this particular problem being addressed by this committee and by the legislature in that we have had some experience with this particular kind of problem coming from a

number of different kinds of directions in the Anchorage school system. We have researched it quite thoroughly and I can at a later day, if you'd care, provide some examples of material much as Mr. Thetford did here. Generally our material has come through the school system or an individual teacher, depending.

I think what we are addressing here is even a borader problem, that being that there has been a move in education that has been toward psychological testing and personal evaluation much like this testing. Psychological testing has caused such a furor on the federal level that, you may or may not be aware that the federal education act was passed this year to include the Hatch amendment which prohibits any school district receiving federal funds for continuing with psychological testing. Psychological testing generally is very closely related to this kind of personal testing and the two seem to go hand in hand. I think its something that needs to be dealt with on this level and something that needs to be picked up by the school district. I think we'll see much more of the problem.

I believe that when there is a questions between the school district and the parents' rights, that they have to be weighed differently than a question of precluding the state taking the powers of the school district away. We are talking here, in my mind, about the right of the parent to control the child and be aware of the child. Anytime the state can reinforce the right of the parent and the responsibility of the parent, I think it's important.

I would hope that you do pass this bill out of committee and that it would be a really positive step forward for a parent to take control again of a child.

Sen. Fahrenkamp. I move the bill with do pass recommendations.

Sen. Sturgulewski. If that is individual recommendations . . .

Sen. Fahrenkamp. That's not what I moved, we'll have to change it if you can't live with it.

Sen. Sturgulewski. I can't live with it.

Sen. Fahrenkamp. Individual then.

CHAIRMAN

S 60 (Rev. 12/78)

State Library (distribution & data access center)

HOUSE BILL NO. 108, by the Rules Committee by request of the Governor. Amends AS 14.56.090, "Article 2. State [PUBLICATIONS] Library Distribution and Data Access Center." Changes wording in sec. 090 accordingly. Also amends AS 14.56.100 by stating that the distribution and data access center chall cooperate with "...federal municipal and private data collection and research efforts, promote the establishment of an orderly depository library and data index distribution and access system."

Repeals and re-enacts AS 14.56.100 (Duties of Center) by providing that each state agency, as well as municipalities that compile data at public expense, shall notify the center of published or compiled data and make available four copies to the center. Also provides that research projects conducted by a person for the U of A be requested to make available the final report.

Also adds new sections dealing with liaisons for state agencies, summaries and indices, computerization and efficiency. Does not provide for effective date.

Introduced January 31 and referred to HESS.

In his message transmitting the bill to the house for consideration, Governor Hammond stated:

"Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the function and organization of the State Library Distribution and Data Access Center. This bill is designed to provide broad access to a large and growing amount of information about the State of Alaska, most of which has been compiled at public expense. Many state agencies, federal agencies and local jurisdictions do research and compile data of Alaska, either internally or by contract. However, unless it is published and thereby made available through the State Publications Distribution Center in the State Library, much of this data remains unknown outside the originating agency and thus is underutilized.

"Under the bill, state and municipal agencies would designate an employee as a liaison with the State Library, notify the State Library of all data published or compiled at public expense and provide for its accessibility through the renamed State Library Distribution and Data Access Center. It is expected that computer information technology will be utilized in the indexing and accessing of the data. Although the State Library would expand

its present services to provide the indexing and listing, it is important to note that the location of the data will not necessarily be centralized. It is the "access" to the data that will be provided by this bill.

"This legislation will accomplish several worthwhile goals:

"1. Minimize duplication of costs in data gathering, retrieval and distribution.

"2. Provide multiple point access in various locations to research data that is produced by state, federal, local and private agencies.

"3. Create a rapid and comprehensive data transfer network in Alaska for both published and non-published materals.

"4. Enhance computer utilization through machine readable publication formats and coordination of reasonable standards of data collection, definition, indexing, sources, and scales.

"5. Coordinate efforts in Alaska with national information network activities."

THE FOLLOWING DOCUMENT(S) MAY NOT FILM LEGIBLY BECAUSE OF POOR QUALITY OF THE ORIGINAL.

HB 108

January 30, 1979

The Honorable Terry Gardiner
Speaker of the House
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. Speaker:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the functions and organization of the State Library Distribution and Data Access Center. This bill is designed to provide broad access to a large and growing amount of information about the State of Alaska, most of which has been compiled at public expense. Many state agencies, federal agencies and local jurisdictions do research and compile data of Alaska, either internally or by contract. However, unless it is published and thereby made available through the State Publications Distribution Center in the State Library, much of this data remains unknown outside the originating agency and thus is underutilized.

Under the bill, state and municipal agencies would designate an employee as a liaison with the State Library, notify the State Library of all data published or compiled at public expense and provide for its accessibility through the renamed State Library Distribution and Data Access Center. It is expected that computer information technology will be utilized in the indexing and accessing of the data. Although the State Libray would expand its present services to provide the indexing and listing, it is important to note that the location of the data will not necessarily be centralized. It is the "access" to the data that will be provided by this bill.

This legislation will accomplish several worthwhile goals:

1. Minimize duplication of costs in data gathering, retrieval and distribution.

2. Provide multiple point access in various locations to research data that is produced by state, federal, local and private agencies.

3. Create a rapid and comprehensive data transfer network in Alaska for both published and non-published materials.

4. Enhance computer utilization through machine readable publication formats and coordination of reasonable standards of data collection, definition, indexing, sources, and scales.

5. Coordinate efforts in Alaska with national information network activities.

Sincerely,

S/JSH

Jay S. Hammond
Governor

GENERAL FUND		0	25	60		
FEDERAL FUNDS		100.0	75	40		
OTHER (Specify)						

POSITIONS

FULL TIME		3*	3	3		
PART TIME						
TEMPORARY						

*Part year total of 26 months.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Personal services includes a Librarian II (range 17) and Clerk IV (range 9) for 10 months and a Librarian I (range 15) for six months. Included under Contractual is $15,000. for a study by an expert team to establish parameters, procedures and guidelines. Also included under Contractual is $9,500. for long line communication charges (probably WATS, Telenet or State Leased/shared line). Equipment estimate includes Terminal, typewriters, desks and chairs. Estimates were based on using the Washington Library Network. Immediate steps will be taken to input the Alaska State Publications cataloging information (now in magnetic tape format) into WLN. If the study or experience indicates another approach is more viable, the WLN input could still be used.

The first year funding is based on obtaining federal money. Future years show a phasing in of State funds as the program primarily serves state needs and will be able to demonstrate cost effectiveness.

Also included under Contractual is $9,500 for long line communiciation charges (probably WATS, Telenet or State Leased/shared line). Equipment estimate includes Terminal, typewriters, desks & chairs. Estimates were based on using the Washington Library Network. Immediate steps will be taken to input the Alaska State Publications cataloging information (now in magnetic tape format) into WIN. If the study or experience indicates another approach is more viable, the WIN input could still be used.

The first year funding is based on obtaining federal money. Future years income assumes a decline in federal funds & the use of Inter-Agency Receipts from state agencies use fees, and Program Receipts from other agencies and individuals.

IV. DATE 3/10/79 PREPARED BY Russ Meekins, Chairman
AGENCY House Finance Committee

UNIVERSITY OF ALASKA
FAIRBANKS, ALASKA 99701

March 23, 1979

The Honorable Glenn Hackney
Chairman, Senate Health, Education,
and Social Services Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

On behalf of the University of Alaska, I would like to suggest several changes to CSHB 108, "An Act relating to the functions and organization of the state library distribution and data access center".

Specifically, I would like to suggest that Sec. 14.56.100 be changed to add, "...in cooperation with the University of Alaska, and with....". A similar type of change in Section 14.56.120(e) would be useful, adding a new sentence, "When a research project or study is conducted for a person by the University of Alaska, the University of Alaska may request that person for permission to make copies of its final report available to the center under AS 14.56.090 - 14.56.180. If permission is granted, the report may be deposited with the center.

An additional change would be desirable in Sec. 14.56.150. The phrase "university or community college libraries" should be changed to read, "the University of Alaska".

A final recommended change would be in Sec. 14.56.180(2) where, "and the University of Alaska and its affiliated research institutes," would best be changed to read, "The University of Alaska".

You may also wish to consider the potential privacy problems with Sec. 14.56.130, and the potential copyright problems with Sec. 14.56.170.

Sincerely,

Foster F. Diebold
President

Page 2, lines 28 & 29

Delete "unless prohibited from doing so by law" and insert in its place "unless the data is protected by the constitutional right to privacy or is of a type stated by law to be confidential or the agency is otherwise prohibited by law from doing so,"

Page 3, line 10:

Delete "unless prohibited from doing so by law" and insert in it place "unless the data is protected by the constitutional right to privacy or is of a type stated by law to be confidential or the municipality or regional educational attendance area is otherwise prohibited by law from doing so,"

Page 4, line 7:

After the period, add: "However, data which is protected by the constitutional right to privacy or is of a type stated by law to be confidential or which the agency is otherwise prohibited by law from distributing may not be furnished to the center."

3/28/79

CSHB 108

Dick Engen. This is very similar to a bill that was considered last year which was HB 742. It establishes a mechanism for statewide access to all the information, the data that is discovered, learned and investigated about the state.

A lot of studies are done, some of which exist only in a file drawer somewhere. Some of which exist as data sitting in a computer waiting to be called out by the person who put it in. But it isn't known to the other individuals who might be studying the same thing in the state.

A case that comes to point was a study of the Lower Kuskokwim. It turned out that an engineering firm from Anchorage happened to call the State Library to ask if we had any information that dealt with site plans, water, resources, population in the Lower Kuskokwim for each one of the individual districts in Lower Kuskowim School District. It happened the person they contacted at that time just had received in a two volume study done by Environmental Conservation on the Lower Kuskowim which addressed out of 7 items, 6 items were addressed. We told them about that publication.

The assumption has to be that a large scale study was aborted. So, what this is is an attempt to expand the functions the responsibilities of the State Library, State Publications Distribution Center which was originally established in 1970 to make available throughout the state publications that are put out by agencies of the State of Alaska so the citizens have the opportunity to find out what the state is actually producing. This also makes available information about a broader range of data as we get more and more into the world of computers and the ability to study more data and to acquire more and more. It doesn't bring it all together in one location. We haven't got the room or the staff to handle it. But we think people in Anchorage, in Fairbanks, in Nome and in Kodiak need to know where the information is, maybe the study has already been done.

Sen. Hackney. I noticed that the orginal funding of this would be entirely with federal funds. Then it progresses to 25/75 and then a 60/40 and then . . .

Dick Engen. There's been a revised fiscal note done in House Finance. It was in the House Journal. It takes out the general fund and puts it on to primarily inter-agency receipts and program receipts. Perhaps before I discuss that part I would like Mr. Holden to be able to present that approach that we had on it.

Dick Holden. I'm here for 2 reasons; as the deputy commissioner for planning and research for the Department of Transportation and Public Facilities and secondly as the interim chairman of the Alaska Council on Science and Technology.

Dick and I along with a few other people around the state have been trying to get something like this going for years.

I'm going to spend about $4.5 million in the next year and one half on transportation planning. Getting up a data base because we don't have one; finding out what exists; developing some econometric models to look at the cost of commodities and people movement. As an example, the Western Arctic Transportation Study we are underway with, we have $100,000 in there for data acquisition. If we had a system in place like this bill describes to where an agency when it did a report had to do the report in computer readable format. All that means is that you change the ball on the typewriter to one the computer can read. That data would be made available through the State Library to a data network so that the library could look up what you want, I'd save half of that going in.

The governor didn't quite believe that, he said 'you're going to need a bit of general fund money.' I said from my own unit in the department alone we'd be supporting more money than that for this operation. It would save us money.

Dave Hickock up at the AIDC in Anchorage was vistied by a consultant contacted by Ernie Mueller to do a soil study of some kind or other and just develop just data search on what was known about soils in the Northwest. So the guy walked in there and he happened to have Hickock first on his list, and he had a $90,000 with DEC. He asked Hickock if he had any of this information and Hickock said no, he had all of it. The consultant said would you give it to me, Hickock said no, he'd give it to Ernie Mueller. So Ernie cancelled the consultant's $90,000 contract.

Sen. Sturgulewski. Does it cover things like maps and so on.

Dick Holden. You can't put them on the computer but you can index them. You can say there is a map with these features . . .

Sen. Sturgulewski. You are talking about a pretty sophisticated software system aren't you?

Dick Engen. A lot of the retrieval technology exists now. Software already exists that we believe can be utilized to provide the system that we can work with it. We made a minimum estimate. It may well be low. Since, in effect, we are using it on the basis that we are going to be able to identify already available funds within agencies in order to fund the project if it does prove that it is low and there is a value to be received by the agency. Somehow it seems like the transfer is going to be possible in order to expand this need. We can only start so fast.

Dick Holden. The Council was asked to review the bill and we had two of the members, Dave Hickock from Anchorage and Neil Davis from Fairbanks reviewed the bill. We gave the comments to the House Finance Committee and Representative Rogers took it upon himself to amalgamate those comments he thought appropriate into the bill which was reviewed by Dick and myself. We think the House Finance Committee cleaned up a lot of bits and pieces.

Dick Engen. Public Safety had contacted me after the bill went through the House and had been concerned about a need for con-

fidentiality of some records. I will hasten to say the State Library System in no way is interested in getting into a sifting process where they have to decide if somebody is eligible to use it or not. That should be the originating agency. It is not the librarians job. I thought it was covered by the expression we used 'unless prohibited from doing so by law'. It's on page 2 beginning on line 26, but prohibition by law is a specific statute reference and there may be confidential materials that are actually printed.

Dick holden. Well I talked to Trig Herrmann and he said that covers it.

Sen. Fahrenkamp. I move this bill be passed out with do pass recommendations.

Sen. Hackney. Objections? So ordered.

OUT.

HB 108 will expand the services of the State Library Publications Distribution Center, which presently makes printed Alaska Documents available through depository libraries in various sections of the state, to include information and data on Alaska that is now gathered by a wide variety of agencies.

It will provide ACCESS to the information. It does not bring together in one location all of the files and data but, instead, will organize, index and make known the availability of the information so that it can be used throughout the State. It will also coordinate efforts in Alaska with national information network activities.

The system should eliminate the duplication of studies that comes about because various agencies or researchers do not know that the topic has already been studied. The funding will initially be primarily federal with interagency receipts providing for future years operation.

Changes made by the legislature were primarily in including the intent as part of the bill (Section 1); allowing municipalities to choose to participate rather than requiring their participation (Section 14.56.120,123 and 125); and providing that the state agency creating the data shall provide the abstract of it, rather than the State Library Distribution and Data Access Center (Section 14.56.125).

FISCAL NOTE

FROM GOVERNOR'S TRANSMITTAL LETTER

HB 108 is designed to provide broad access to a large and growing amount of information about the State of Alaska, most of which has been compiled at public expense. Many state agencies, federal agencies and local jurisdictions do research and compile data of Alaska, either internally or by contract. However, unless it is published and thereby made available through the State Publications Distribution Center in the State Library, much of this data remains unknown outside the originating agency and thus is underutilized.

Under the bill, state agencies would designate an employee as a liaison with the State Library, notify the State Library of all data published or compiled at public expense and provide for its accessibility through the renamed State Library Distribution and Data Access Center. Computer information technology will be utilized in the indexing and accessing of the data. Although the State Library would expand its present services to provide the indexing and listing, it is important to note that the location of the data will not necessarily be centralized. It is the "access" to the data that will be provided by this bill.

This legislation will accomplish several worthwhile goals:

1. Minimize duplication of costs in data gathering, retrieval and distribution.

2. Provide multiple point access in various locations to research data that is produced by state, federal, local and private agencies.

3. Create a rapid and comprehensive data transfer network in Alaska for both published and non-published materials.

4. Enhance computer utilization through machine readable publication formats and coordination of reasonable standards of data collection, definition, indexing, sources, and scales.

5. Coordinate efforts in Alaska with national information network activities.

IN THE HOUSE BY THE FINANCE COMMITTEE

CS FOR HOUSE BILL NO. 108

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the functions and organization of the state library distribution and data access center."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS AND PURPOSE. (a) The legislature finds that

(1) there is a large and growing amount of information about the state, much of which has been compiled at public expense;

(2) many state agencies, federal agencies, and local governments do research and compile data on Alaska, directly or by contract, the results of which, unless published and made available through the state publications library distribution center of the state library, remain unknown outside the originating agency; and

(3) access to this underutilized data can be provided without necessarily centralizing the location of the data.

(b) In enacting legislation extending the duties of the current state publications library distribution center, it is the purpose of the legislature to

(1) minimize costs of data gathering, retrieval and distribution;

(2) provide multiple point access in various locations to research data which has been produced by state, federal and local agencies and private sources;

(3) establish a rapid and comprehensive data transfer network in the state for both published and non-published materials;

(4) enhance computer utilization through machine-readable

publication formats and coordination of reasonable standards of data collection, definition, indexing, sources and scales; and

(5) coordinate state efforts with national information network activities.

* Sec. 2. AS 14.56.090 is amended to read:

ARTICLE 2. STATE [PUBLICATIONS] LIBRARY DISTRIBUTION AND DATA ACCESS CENTER.

Sec. 14.56.090. STATE [PUBLICATIONS] LIBRARY DISTRIBUTION AND DATA ACCESS CENTER ESTABLISHED. There is established in the state library the [A] state [PUBLICATIONS] library distribution and data access center.

* Sec. 3. AS 14.56.100 is amended to read:

Sec. 14.56.100. DUTIES OF CENTER. The state [PUBLICATIONS] library distribution and data access center shall, in cooperation with federal, municipal, and private data collection and research efforts, promote the establishment of an orderly depository library and data index distribution and access system.

* Sec. 4. AS 14.56.120 i repealed and re-enacted to read:

Sec. 14.56.120. DEPOSIT OF PUBLICATIONS AND RESEARCH DATA. (a) Each state agency shall deposit, upon release, at least four copies of each of its state publications in the center. Additional copies of each publication may be requested by the center for deposit in quantities necessary to meet the needs of the depository library system and to provide inter-library service to those libraries not having depository status.

(b) Each state agency shall notify the center of the creation of all data published or compiled by or for it at public expense and provide for its accessibility through the center, unless prohibited from doing so by law.

(c) The center is also a depository for publications of municipalities and regional educational attendance areas, including surveys and studies produced by a municipality or regional educational attendance area or produced for it on contract. Four copies of each publication produced for a municipality or regional educational attendance area may be deposited with the center for record and distribution purposes.

(d) Each municipality or regional educational attendance area may notify the center of the creation of all data published or compiled by or for it at public expense and provide for its accessibility through the center, unless prohibited from doing so by law.

(e) When a research project or study is conducted for a person by a state agency, a municipality, or a regional educational attendance area, even though no state funding is involved, the state agency, municipality or regional educational attendance area shall request that person for permission to make copies of its final report available to the center under AS 14.56.090 - 14.56.180. If permission is granted, the report shall be deposited with the center.

* Sec. 5. AS 14.56 is amended by adding new sections to read:

Sec. 14.56.123. LIAISON WITH CENTER. Each state agency shall and each municipality and regional educational attendance area may designate one of its employees to be responsible for depositing the materials and information specified in AS 14.56.120.

Sec. 14.56.125. SUMMARIES AND INDICES. (a) Upon notification of the creation of data under AS 14.56.120, a state agency shall and a municipality or regional educational attendance area may prepare an abstract or summary of it.

(b) The center shall prepare and keep current an index of all publications and data abstracts or summaries on file and shall publish and distribute that index regularly to contracting depository libraries

and to other Alaska libraries upon request.

* Sec. 6. AS 14.56.130 is amended to read:

Sec. 14.56.130. OTHER DOCUMENTS REQUIRED OF STATE AGENCIES. Upon the request of the center, a state agency shall furnish the center with a complete list of its current state publications, data published or compiled by or for it at public expense, and a copy of its mailing or exchange lists.

* Sec. 7. AS 14.56 is amended by adding a new section to read:

Sec. 14.56.135. EFFICIENCY AND COMPUTERIZATION. The center shall, to the extent practicable, avoid duplication, coordinate its activities with other state agencies charged with record-keeping functions, and employ computerization to compile or organize research data and other materials.

* Sec. 8. AS 14.56.150 is amended to read:

Sec. 14.56.150. DEPOSITORY LIBRARY CONTRACTS. The center may enter into depository contracts with municipal, regional educational attendance area, university or community college libraries, public library associations, state library agencies, [AND] the Library of Congress and other state and federal library systems. The requirements for eligibility to contract as a depository library shall be established by the Department of Education upon the recommendation of the state librarian and shall include and take into consideration the type of library, its ability to preserve publications or data and to make them available for public use, and the geographical location of the library for ease of access to residents in all areas of the state.

* Sec. 9. AS 14.56.170 is amended to read:

Sec. 14.56.170. [LIMITED] DISTRIBUTION OF STATE PUBLICATIONS AND RESEARCH DATA. The center may not engage in general public distribution of either (1) state publications or lists of publications or (2) the

index of publications and research data. However, unless expressly prohibited by law, the center shall make available to any person, upon request, and under procedures established by it, publications, summaries, research data, indices, and other materials in its possession. Reasonable fees for reproduction or printing costs and for mailing and distribution of materials may be charged by the center.

* Sec. 10. AS 14.56.180 is amended to read:

Sec. 14.56.180. DEFINITIONS. In secs. 90 - 180 of this chapter, unless the context otherwise requires,

(1) "center" means the state [PUBLICATIONS] library distribution and data access center;

(2) "state agency" includes state departments, divisions, agencies, boards, associations, commissions, corporations and offices, and the University of Alaska and its affiliated research institutes;

(3) "municipal" and "municipality" includes cities and organized boroughs of every class, including municipalities unified under AS 29.68.240 - 29.68.440;

(4) "state publication" includes any official document, compilation, journal, bill, law, resolution, bluebook, statute, code, register, pamphlet, list, book, report, study, hearing transcript, leaflet, order, regulation, directory, periodical or magazine issued or contracted for by a state agency determined by the state librarian to be appropriate for retention in the center;

(5) "research data" or "data" means a representation of facts, concepts or instructions in a formalized manner suitable for communication, interpretation, or processing by humans or by automatic means which was prepared to serve as a basis for reasoning, calculation, discussion or decision and which is determined appropriate for indexing by the state librarian.

* Sec. 11. AS 14.56.140 is repealed.

* Sec. 12. The provisions of this Act establishing a state library distribution and data access center modify the existing responsibilities of information and data centers established by state law only to the extent specifically provided in this Act. The provisions of this Act do not modify in any manner the provisions of information exchange agreements entered into by state agencies with third parties and in effect on the effective date of this Act, or the responsibility of state agencies to provide data and information to the public.

3/16/79 Called Tom Minick - Info memo & Hospital service Statute

HB 179

Rep. Chatterton. I'm here to propose an amendment to HB 179. These were amendments that in the rush of these times were intended to be accomplished by the body of which I am a member, but carelessly were not.

The amendments are not my own, they are amendments that in concept were offered by the Department of Health and Social Services and also, in concept again, by the South Central Health Planning and Development Corporation from Anchorage.

Page 1, line 21: delete "service" and insert "systems"
Page 1, line 23, delete "may" and insert "shall"
line 23: delete "two" and insert "three"
Page 1, line 27: delete "five" and insert "two"
Page 1, line 29: delete entire line
Page 2, lines 1 & 2: delete entire lines

Sen. Ferguson. Mr. Chatterton, you have on page 1, line 29 "delete entire line" and then you delete the whole paragraph. I was wondering why you were doing that.

Rep. Chatterton. Senator Ferguson that is a recommendation of (1) the Department of Health and Social Services and I will paraphrase from their position paper that was handed to the House: 'While we still support the inclusion of public members we do not feel that a member of the state health planning and development agency which is within the department appropriately meets this classification, this classification being a public member.

Sen. Ferguson. I would move for the adoption of the amendments recommended by Representative Chatterton.

Sen. Hackney. No objections? So ordered.

Janice Gates. I think we are entirely in agreement with those amendments

Sen. Sturgulewski. I believe we had testimony did we not that the South Central Health Planning Agency supports this?

Rep. Chatterton. Yes.

Janice Gates. Actually all three health systems agencies support it.

Sen. Fahrenkamp. I move we pass out HB 179 as amended with individual recommendations.

Sen. Hackney. No objections? So ordered.

February 21, 1979

Honorable Thelma Buchholdt
Chairman
Health, Education & Social Services Committee
Pouch V
Juneau, Alaska 99811

Dear Representative Buchholdt:

We have reviewed H. B. 179, "An Act relating to the Alaska Medical Facility Authority; and providing for an effective date." We have some concerns and feel strongly that several changes should be made as follows:

1. Section . (a) (4) (A) line 23 - the word "may" should be deleted and the word "shall" should be inserted. This keeps the wording consistent with the references to nominees from SHCC (line 27) and SPD (line 2 page 2).

2. The nominees to the Authority from the State Health Planning and Development Agency (SHPDA) Section 1 (a) (4) (C) line 29ff), should be totally deleted from the bill.

   According to Section 1 (a) (4) line 17, the nominees designated are public members. State Health Planning Agency members are not public but are employees of the State of Alaska, under the jurisdiction of the Commissioner of HESS.

   Employees of the State (the SHPDA) should not be included as nominees of the Authority. In a voting situation, should a member of SHPDA and the Commissioner (his or her boss) differ on an application being considered, the employee from SHPDA would be in an untenable position as he/she would be reluctant to vote against his/her superior. Putting it another way, the Commissioner would have an extra vote in his/her pocket.

3. A small correction on line 21: The agency referred to is a health systems agency, not health service agency.

4. Transition (Section 2 page 2, line 3ff): There needs to be a period allocated to allow for transition, to give the SHCC and HSAs time to submit nominations and the Governor time to consider his decision. Therefore, we would suggest that you consider delaying the effective date of the act for 30 to 60 days after it is signed into law; or when the Governor appoints all the members of the Authority; which ever comes first.

Thank you for the opportunity of expressing our concerns on this bill. If you have any questions or wish further comments, please feel free to call on us at any time.

Sincerely,

Al M. Camosso

cc Governor Jay Hammond
All HESS Committee members
Mr. Charles Rigden, Chairman, AHC
Mr. William Dann, President, SCHPD

Alaska Medical Facility Authority

HOUSE BILL NO. 179, by the Rules Committee by Request of the Governor. Amends AS 18.26.030 (Alaska Medical Facility Authority, Board of Directors) to read "(a) The authority shall be managed and controlled by a seven person board of directors, who serve at the pleasure of the governor,...". Also provides that four public members be appointed by the governor, deleting reference to appointment by "a majority of the members of the respective health service agency or council." Changes system of appointment by health service agency and provides that transition will occur upon the effective date of this Act. Provides for an immediate effective date.

Introduced February 12 and referred to HESS.

In his letter transmitting the bill to the House for consideration, Governor Hammond stated:

> Under the authority of art. III, sec. 18 of the Alaska Constitution, I am transmitting a bill which amends the Alaska Medical Facility Authority Act, AS 18.26, to allow it to qualify as a properly constituted authority of the State of Alaska under sec. 103(a) of the Internal Revenue Code. That section excludes interest on a qualified authority's obligations from the gross income of the purchasers of the bonds. I have been advised by the attorney general and by local bond counsel that the present composition of the board of directors of the authority disqualifies the authority from the special tax treatment under sec. 103(a) of the Internal Revenue Code. This feature, of course, is the primary purpose for having established the authority and is necessary to insure the marketability of the authority's offerings. I am attaching a copy of the attorney general's opinion which explains in somewhat greater detail the reasons why we feel these amendments are necessary.

Introduced: 2/12/79
Referred: Health, Education and Social Services

IN THE HOUSE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

HOUSE BILL NO. 179

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the Alaska Medical Facility Authority; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.26.030(a) is amended to read:

(a) The authority shall be managed and controlled by a seven-person board of directors, who serve at the pleasure of the governor, consisting of

(1) the commissioner of revenue, who shall also chair the board;

(2) the commissioner of health and social services;

(3) the commissioner of community and regional affairs;

(4) four public members, appointed by the governor from among the nominees submitted by the following [A MAJORITY OF THE MEMBERS OF THE RESPECTIVE HEALTH SERVICE AGENCY OR COUNCIL]:

(A) [ONE MEMBER SHALL BE APPOINTED BY AND FROM AND AMONG THE MEMBERS OF] each [OF THE THREE] health service agency [AGENCIES] in the state, organized and operated in accordance with sec. 1512 [1521(b)], P.L. 93-641, which may submit two nominees from among the members of that agency;

(B) [ONE MEMBER SHALL BE APPOINTED BY AND FROM AMONG THE MEMBERS OF] the statewide health coordinating council, established by [IN] AS 18.07.011, which shall submit five nominees from among the members;

(C) the state planning and development agency, desig-

nated under sec. 1521(b), P.L. 93-641, and established by AS 18.-07.021, which shall submit two nominees.

* Sec. 2. TRANSITION. The terms of the current public members of the Alaska Medical Facility Authority expire on the effective date of this Act. Any current member is eligible for appointment by the governor if that member is nominated by the appropriate council or agency listed in AS 18.26.-030(a)(4) as amended in sec. 1 of this Act.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

1135 West Eighth Avenue Suite I Anchorage, Alaska 99501
(907) 278-3631

August 8, 1978

Helen D. Beirne, Commissioner
Department of Health and Social Services
Pouch H-01
Juneau, Alaska 99811

Dear Commissioner Beirne:

In response to your letter of July 3, 1978, South Central Health Planning and Development (SCHPD), reviewed the issues surrounding the current bed capacity of Providence Hospital. In its review, the Agency examined the material considered in the April, 1977 SCHPD decision which recommended approval of Providence Hospital's request for a waiver, the May 16, 1978 opinion from the office of the Attorney General, relevant correspondence from your office, Providence Hospital and the Municipal Health Commission, and additional relevant information which has come to our attention since April, 1977.

In approving the requested bed waiver for Providence Hospital in April, 1977, SCHPD considered the significance of the square footage requirement, the need for beds as estimated by the Hill-Burton formula, construction costs, staffing efficiencies, occupancy rates and population boundaries. Background information was sent to the Department of Health and Social Services along with the SCHPD decision for approval of the bed waiver. A summary of that information follows.

The analysis showed that your agency and Region X concurred that the square footage in question was not a significant factor. Also, based on estimates using the Hill-Burton formula, it showed that the licensed bed complement (154 at Alaska Hospital and 250 at Providence Hospital) would be needed by 1981. Additionally, the cost of adding hospital beds was estimated to increase 2½ times by 1986. Research indicated that staffing efficiencies would be achieved if re-modelling were to occur. The occupancy rate at Providence Hospital, approximately 85% for several years, indicated that the hospital was being used to the desired capacity. Finally, the analysis noted that twenty percent of the patients for the two hospitals come from outside of the Anchorage area.

That analysis was reviewed during the past several weeks to determine whether any of the conclusions might be changed with more current information. The new calculations were based on more current utilization rates, proposed new formulae (both National and State), and adjustments for patient origin. The calculations resulted in a range of bed need

ALASKA HOSPITAL HAS ACTUALLY 197 BEDS, NOT 154, & ALL IT WERE OPENED IN 1976. THEN 43 beds closed, but AVAILABLE!
So why give MORE BEDS TO PROVIDENCE! MAKES NO SENSE!

estimates. However, all estimates show that more beds will be needed by 1980 than 154 at Alaska and 219 at Providence*. In addition, the calculations show that 404 beds (154 at Alaska and 250 at Providence) will be needed before 1982 or 1983, depending on the formula and population figures used. (If you would like further information on these calculations, we would be happy to provide it.)

SCHPD reviewed the opinion of the Attorney General and your July 3, 1978 letter which stated that there was an "absence of a determination that the additional beds are needed under Hill-Burton criteria". However, SCHPD did use the Hill-Burton formula to estimate bed need, and found that the 250 beds (with 154 at Alaska) would be needed by 1981. Along with the considerations of staffing efficiency, construction costs, and the other information mentioned above, the bed need estimates were analyzed and forwarded to the Department of Health and Social Services along with the recommendation that the waiver be granted in our April 27, 1977 letter.

Finally, SCHPD considered additional relevant information available since April, 1977. The Agency reviewed literature on economies of scale in hospitals and optimal hospital size. Also, the National Guidelines for Health Planning adopted March 28, 1978 regarding the general hospital bed supply and occupancy rate were considered. This information generally supported the agency's previous position related to existing facilities.

In conclusion, the Board of South Central Health Planning and Development has carefully re-examined its April, 1977 decision to recommend a waiver to allow Providence Hospital to have 250 beds, and finds that its previous position is reaffirmed. This determination is based on a range of bed need estimates, and considerations of staffing efficiency, construction costs and other relevant information. Since Providence Hospital agreed to postpone actual construction until the appropriate health planning bodies were consulted, and then proceeded in good faith, we urge you to uphold the decision made previously by the State.

Thank you for the opportunity to comment on this matter.

Sincerely yours,

Ron Hammett

Al Camosso, Administrator Providence Hospital

* Alaska Hospital has a license for 154, you indicated in your letter that there were 219 beds at Providence "planned at the time....funds were awarded".

Municipality of Anchorage

POUCH 6-650
ANCHORAGE, ALASKA 99502
(907) 274-2525

GEORGE M. SULLIVAN,
MAYOR

MUNICIPAL HEALTH COMMISSION

July 31, 1978

Helen Beirne, Ph.D
Commissioner
Department of Health & Social Services
Pouch H-01
Juneau, Alaska 99811

Dear Commissioner Beirne:

In response to your letter of July 3, 1978, the Municipal Health Commission, once again, reaffirms the position taken in March of 1977 with regard to the 250 bed capacity level at Providence Hospital. In the development of those recommendations to the State, both locally and at the regional Health Systems Agency level, numerous issues were addressed regarding the cost/effectiveness and viability of alternative bed capacity levels. These issues included:

- cost per patient day
- optimum patient flow
- optimum feasible staff ratio
- effectiveness of service provision
- inpatient utilization rates
- cost of existing versus new bed construction
- cost containment
- projecting bed need
- patient origin
- appropriateness of Hill Burton bed need formulas

After due consideration of these issues, it was recommended that the State of Alaska grant the permanent bed waiver, placing bed capacity at 250 at the Providence Hospital facility.

The reaffirmation of this region's earlier position is based upon several factors:

- Hill Burton bed need calculations
- number of beds per 1000 population
- occupancy rate formulas and federal guidelines revising same
- absence of an updated facility plan and statewide needs assessment

- cost containment in economies of scale
- utilization rate calculations
- catchment area definition

Each issue will be addressed briefly.

Hill Burton Five Year Bed Need Calculations

The Alaska State Plan for the Construction of Hospitals and Other Medical Facilities (1976 revision) utilizes a five year projection to identify area bed need. Because the projections utilized in the plan date back to 1974, more recent projections have been used to complete the following calculations:

Midyear Population (Civilian Non-Native in 1000's) Data: Munic. of Anch. Planning Dept.		Current Pt. Days	Use Rate (UR) $\frac{\text{Current Pt. Days}}{\text{Current Population}}$	1983 Projected Average Daily Census (ADC) $\frac{\text{1983 Pop x UR}}{365}$
1978	1983			
171.5	212.9	105,120	613	358

Midyear 1983 Bed Need $\frac{\text{Projected ADC}}{.85}$
421

Data on current bed capacity for Anchorage identifies a licensed capacity of 404 beds, and 45 beds constructed, holding a Certificate of Need, but unlicensed and unopened. At the current level of short term acute bed availability, Anchorage can meet projected bed need through 1983 year end.

2.50
154
404
45
449

Number of Beds per 1000 Population

The National Guidelines for Health Planning (CFR 42 Part 121), adopted March 28, 1978 provide for a reduction in the ratio of short term acute beds to 4 beds per 1000 population. Additionally, a 10% reduction (below the accepted ratio) is recommended by 1983. It should be noted that the present bed ratio in Anchorage is 2.62 beds per 1000 population. In 1983 the ratio will be 2.11 beds per 1000 population (based upon 449 beds). Both figures are well below the national maximum guidelines, and the five year ratio is 20% less than the present level, or twice the national recommended cutback rate.

Occupancy Rate Formulas

The same 1978 Revisions to the National Health Planning Guidelines revise the occupancy rates from 85% overall to 80% overall, and specify an occupancy rate of 70% for obstetrics and 65% for pediatrics. Providence Hospital 11PM Census indicates an 80.3% average occupancy rate for open beds for the first six months of 1978. Although this change in guidelines has a significant impact on bed utilization and patient flow, these changes are not reflected in the Hill Burton Formula provided by the State.

Facility Plan and Statewide Needs Assessment

The health planning process is, at best, a frustrating one. In an attempt to deal with issues of economics and issues of human need, solutions in one area often exacerbate problems in the other.

Of absolute necessity in any planning effort is accurate data, firm goals and objectives and a short and long range implementation strategy. The absence of an up-to-date, adopted, state plan, and a timely statewide facility needs assessment serves to reduce the ability to plan for future facilities and services. In the absence of valid and reliable adopted planning documents, it is imperative that the State rely heavily upon the local and regional planning bodies, who, with access to more recent and accurate data, are in a better position to provide long range projections.

Cost Containment in Economies of Scale

The economies of scale achieved in moderate size hospitals (200-400 beds) are a significant factor in efforts toward cost containment. The services which a hospital can offer show a high positive correlation to hospital size. According to the Department of Health Education and Welfare (Trends);

> "Plant and equipment assets per bed rise sharply for hospitals with less than 200 beds; for larger hospitals differences in the plant and equipment assets per bed are smaller, despite the fact that very large hospitals have significantly more special facilities than do the medium size institutions."

In reviewing cost containment impacts, marginal cost variations based on facility size must be included in any comparison model. Such marginal cost considerations are not addressed by state planning documents.

Utilization Rate Calculations

With the incorporation of the present use rate as part of the calculation of bed need, an assumption of appropriateness of current utilization rates is inherent. The factors which effect average utilization rate are numerous. In a five year retrospective review, an increase or decrease in the average utilization rate in excess of 25 days per 1000 population was noted under the following conditions:

- malpractice insurance crisis
- bed shortage
- transition to new facility
- bed surplus
- opening of outpatient surgicenter

It would appear appropriate, in the interest of validity and reliability, that a documented optimum utilization rate be established, prior to the application of formulas for determination of need. In the absence of documentation, any long range projection is subject to challenge.

Catchment Area

The population statistics utilized for calculating bed need under the Hill Burton formula (see page two) are restricted to residents of Anchorage. Based on a recent patient origin study, Providence hospital reports that approximately 15% of the patient census is comprised of non-Anchorage residents. This is interpolated for a resulting increase of 25,720 residents in the present service or catchment area.

A NEW DEAL FOR THEM - BUT NOT FOR ME.

Conclusion

I sincerely appreciate the opportunity to respond to your request. We urge you to continue to accept the 1977 recommendations of the Municipality and the Regional Health Systems Agency. Our appreciation of the difficulty of such decisions is sincere. It is our hope that you will uphold the importance of the local prerogative in the decision making process.

Sincerely,

Charles H. Rigden
Chairman, Municipal Health Commission

He is ADMINISTRATOR of The ALASKA Hospital AND of course has NO "Conflict of Interest"!

The Honorable M [illegible]. Beirne
Alaska State Legislature
State of Alaska
Pouhh V
Juneau, Alaska 99811

Dear Representative Beirne:

In response to your letter written to me on January 24, 1977 and your letter written to Lois Jund on February 8, 1977, I contacted both Lowell Swartz, Coordinator for Health Facilities Development, Office of Planning and Research, and Anna Wenzel, Chief of Health Facilities Certification and Licensing, Division of Public Health, in order to provide you with the information you requested. As Mr. Swartz informed you in his letter of December 16, 1976, this waiver is to serve as a temporary measure in response to the current patient overflow at Providence Hospital and will extend only until phase two of the construction project has been completed. Mr. Swartz's office has apprised Providence Hospital of this stipulation.

Ms. Wenzel reports that she had granted the temporary waiver for Providence Hospital for the following reasons:

1. The on-site inspection held between September 14, 1976 and November 16, 1976, showed an overflow of patients.

2. Staffing for the beds in use at the time was ddequate.

3. According to the Attorney General's Office, Alabba Administrative Code, 7 AAC 12.010 (1)(1)(A)(vi) implies no regulatory prohibition to the granting of waivers.

I can appreciate your concerns andhhope that we have sufficiently answered your questions. Again, I point out that the waiver grantdd Providence Hospital is indeed temporaty and that the total bed capacity of the facility will not exceed that specified in the state Construction Plan when the remodeling process is completed.

Our Department will make every effort to assist you should you need any further information.

Sincerely,

Francis S.L. Williamson
Commissioner

Dear Dr. Beirne:

This is a much belated reply to your letter of January 5, 1979.

The retained copies of the letters of June 30, 1978 and July 20, 1978 from the Commissioner to Providence Hospital that you asked for in your January 5, 1979 letter have been xeroxed and copies are forwarded herewith.

I greatly regret the delay in our response, which resulted from the changing in the guard and the heavy press of business in the still understaffed office of State Health Planning and Development.

Sincerely,

Catherine M. Lloyd
Deputy Commissioner

June 30, 1978

Mr. Al M. Camosso
Administrator
Providence Hospital
3200 Providence Drive
Anchorage, Alaska 99504

Dear Mr. Camosso:

RE: State Funding Provided
Under Chapter 132, SLA 1974

As you may be aware, the Department of Law recently reviewed the actions of the Department of Health and Social Services with respect to its approval of the current bed capacity of Providence Hospital. The conclusions of the Department of Law are set forth in the enclosed opinion.

The opinion states that the Department of Health and Social Services cannot authorize public funds granted under authority of Chapter 132, SLA 1974, to be used in the provision of more than the 219 beds that were originally funded in the absence of a determination that the additional beds are needed under Hill-Burton criteria. The Department of Health and Social Services, unfortunately, did not resolve this issue when it permitted your institution to operate at its current capacity.

In accordance with the advice of the Department of Law, I will make a decision as to whether there is a need for the additional beds based upon Hill-Burton criteria. Before doing so, however, I will consider the recommendations of the Office of Planning and Research, as well as any recommendations submitted by South Central Health Planning and Development, Inc., the Municipal Health Commission, and, of course, Providence Hospital. All recommendations must be in writing and must be received by my office no later than August 15, 1978. I will promptly advise interested parties of my decision.

I am aware that this issue is of great importance to Providence Hospital. For this reason I believe that it would be appropriate to permit Providence Hospital to take an administrative appeal from my decision should the decision be adverse to it. An appeal would be heard by a hearing officer with no interest in the proceeding. In order to avoid any question of pre-judgment, I would adopt his or her decision as the final decision of the Department of Health and Social Services on this issue.

As is set forth in the enclosed opinion, there is no question as to whether Providence Hospital may currently be licensed to operate 250 beds. The question to be determined is simply whether certain state funds may be used in the provision of more than the 219 beds that were planned at the time those funds were awarded.

I appreciate it if you will confirm my assumption that Providence Hospital wishes to continue operating at its current capacity and will let me know whether the procedures set forth in this letter constitutes an acceptable manner in which to resolve this issue. I will then proceed to solicit recommendations of the various planning agencies.

Your continued cooperation is, of course, very much appreciated.

Very truly yours,

Helen D. Bcirne
Commissioner

Dear Mr. Camosso:

RE: State Funding Provided Under
Chapter 132, SLA 1974

Since you have asked for an immediate response Commissioner Beirne, who is out of town, has asked me to respond to your letter of July 12, 1978, seeking clarification of the matters addressed in her letter of June 30, 1978.

In your letter you inquire as to the status of the operational license of your institution. You also question the necessity of the determination addressed by Commissioner Beirne and express concern over its possible interim effects.

I am told that Providence Hospital has been issued a license to operate 250 beds from July 1, 1978, through June 30, 1979. The number of beds authorized in the license may be adjusted if necessary to accord with the resolution of the matters addressed by Commissioner Beirne.

As I read the Attorney General's opinion of May 16, 1978, the Department of Health and Social Services must determine whether an increase in the bed capacity of your institution is needed under Hill-Burton criteria assuming it desires to use certain public funds in the provision of more beds than orginally planned. It is apparent from Deputy Commissioner Jund's letter of May 6, 1977, that the department did not make this determination when it granted the waiver of licensing standards to which you refer.

The Department of Health and Social Services currently plans to honor progress payment requests. Any payments are subject to the resolution of the matters adressed by Commissioner Beirne.

I might add that even if the department were to find that more than 219 beds are not needed under Hill-Burton criteria then, barring other eventualities, Providence Hospital would still be entitled to the funds if it reduces its bed capacity to that originally planned.

I hope this letter provides the clarification that you desire.

Very truly yours,

Catherine M. Lloyd

Catherine M. Lloyd
Deputy Commissioner
Department of Health & Social Services
Pouch H-01
Juneau, Alaska 99811

Dear Deputy Commissioner Lloyd:

In response to your letter of December 5,1978, I note that the Commissioner has made a determination as to whether Providence Hospital should be entitled to continue to receive funding originally granted to it under the Hill-Burton Program. The determination you indicate was made on December 1,1978.

However, as I read the Commissioner's letter addressed to the Providence Hospital, and the reasoning behind such determination, I do not observe that final approval of their licensure was granted.

Perhaps you could explain this to me in letter form, so that my staff and I will be better advised as to what we may expect in the future, and what courses of action are open to us.

Also, I would appreciate your forwarding to me copies of the letters of June 30 and July 20 from the Commissioner to Providence Hospital. I have never received copies of those letters.

Thanking you kindly, I am

Sincerely ,

Michael F. Beirne, M.D.

POSITION PAPER/Department of Health & Social Services

HOUSE BILL 179

The Department of Health and Social Services supports House Bill 179 amending section 18.26.030(a) of the Alaska Medical Facility Authority Act to bring the language into compliance with section 103 of the Internal Revenue Code. The Alaska Medical Facility Authority establishes a financing mechanism for the construction and equipping of medical facilities for which a community based need has been demonstrated. By providing an economic mechanism to finance such facilities, efforts to contain spiraling health care costs could be enhanced.

The Department agreed with the legislative amendment to the original proposal in the Tenth Legislature which expanded the membership of the Medical Facility Board to include public members. While we still support the inclusion of public members, we do not feel that a member of the State Health Planning and Development Agency, which is within the Department, appropriately meets this classification, as proposed in AS 18.26.030(a)(4)(C). The Department would thus recommend deleting subsection (C) and rewording subsections (A) and (B) to read as follows:

(A) One member shall be appointed from each of the three health services agencies in the state, organized and operated in accordance with sec. 1512 of P.L. 93-641, which may submit three nominees from among the members of that agency;

(B) One member shall be appointed from the statewide health coordinating council, established by AS 18.07.011, which may submit three nominees from among the members.

The Department of Health and Social Services supports House Bill 179 with the amendments recommended above and urges the expeditious enactment of this corrective legislation.

Elevator Safety

HOUSE BILL NO. 189, by the Rules Committee by Request of the Governor. Amends AS 18.60.800 (Elevator Safety Standards) by adopting the 1978 edition of the American National Standards Institute Safety Code for Elevators, etc., as the minimum elevator safety code in Alaska. States that the Department of Labor shall establish fees for inspections and maintain records of fees collected and inspections performed. Section (c) states: "Inspections of elevators by the department shall be performed in accordance with the procedures set out in the American National Standard Institute's Practice (Inspector's Manual--ANSI 17.2), as approved May 29, 1973."

history
- HB 189 +m

Amends AS 18.60.810 (EMERGENCY POWER SOURCE) by stating that emergency power source must conform with ANSI minimum standards. No effective date provided.

Introduced February 13 and referred to Labor & Management, then to Judiciary.

In his message transmitting the bill to the House for consideration, Governor Hammond stated:

> Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to elevator safety. The bill proposes essentially four changes in the statutory provisions dealing with elevator safety (AS 18.60.800 - 18.60.820).
>
> First, the bill would replace the 1971 national elevator standards with the 1978 standards as the minimum elevator safety standards for Alaska. Second, the bill would adopt the uniform inspection procedures for elevators established by the American National Standards Institute as the standard inspection procedures for elevators in Alaska. Third, the bill would authorize the Department of Labor to establish a schedule of fees for inspections performed by it in order to provide a source of program receipts to offset, in part, the department's costs of administering the elevator safety program. These first three changes would all be accomplished by sec. 1 of the bill.

Elevator Safety

HOUSE BILL NO. 189, (this report). Reported back to the house on February 16 by Labor and Management with a majority recommending do pass with a new fiscal note. To Judiciary.

Elevator Safety

HOUSE BILL NO. 189, (see pages 194;230). Reported back to the House on March 14 by Judiciary with a majority recommending do pass. To Rules.

Elevator Safety

HOUSE BILL NO. 189, (AMENDED)(see pages 194;230;392). Amendment No. 1 by Chatterton was adopted, deleting Section 2 of the Bill, an amendment to AS 18.60.810 (Emergency Power Source) which relates to conforming with standards established by the America National Standards Institute. The bill then passed the house 35-2-3. Nays: Carney and Malone. Not Voting: Eliason, Osterback and Schaeffer.

IN THE HOUSE

BY THE RULES COMMITTEE BY
REQUEST OF THE GOVERNOR

HOUSE BILL NO. 189 am

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to elevator safety."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.60.800 is amended to read:

Sec. 18.60.800. ELEVATOR SAFETY STANDARDS. (a) The 1978 [DEPARTMENT OF LABOR SHALL ADOPT THE 1971] edition of the American National Standards Institute [STANDARD] Safety Code for Elevators, Dumbwaiters, Escalators and Moving Walks published by the American Society of Mechanical Engineers is adopted [,] as the minimum elevator safety code in [STANDARDS OF] the state.

(b) The Department of Labor shall

(1) promulgate or change regulations to carry out the provisions of secs. 800 - 820 of this chapter; [AND]

(2) inspect and certify elevators to meet the safety requirements;

(3) establish, by regulation, fees for inspections performed under secs. 800 - 820 of this chapter; and

(4) maintain a record of all inspections performed and of all inspection fees collected.

(c) Inspections of elevators by the department shall be performed in accordance with the procedures set out in the American National Standards Institute's Practice (Inspector's Manual -- ANSI 17.2), as approved May 29, 1973.

(d) In secs. 800 - 820 of this chapter, "elevator" includes elevators, dumbwaiters, escalators and moving walks.

IN THE HOUSE

BY THE RULES COMMITTEE BY
REQUEST OF THE GOVERNOR

HOUSE BILL NO. 189

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to elevator safety."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.60.800 is amended to read:

Sec. 18.60.800. ELEVATOR SAFETY STANDARDS. (a) The 1978 [DEPARTMENT OF LABOR SHALL ADOPT THE 1971] edition of the American National Standards Institute [STANDARD] Safety Code for Elevators, Dumbwaiters, Escalators and Moving Walks published by the American Society of Mechanical Engineers is adopted [,] as the minimum elevator safety code in [STANDARDS OF] the state.

(b) The Department of Labor shall

(1) promulgate or change regulations to carry out the provisions of secs. 800 - 820 of this chapter; [AND]

(2) inspect and certify elevators to meet the safety requirements;

(3) establish, by regulation, fees for inspections performed under secs. 800 - 820 of this chapter; and

(4) maintain a record of all inspections performed and of all inspection fees collected.

(c) Inspections of elevators by the department shall be performed in accordance with the procedures set out in the American National Standards Institute's Practice (Inspector's Manual -- ANSI 17.2), as approved May 29, 1973.

(d) In secs. 800 - 820 of this chapter, "elevator" includes elevators, dumbwaiters, escalators and moving walks.

* Sec. 2. AS 18.60.810 is amended to read:

Sec. 18.60.810. EMERGENCY POWER SOURCE. All elevators which do not have an alternate power source shall be equipped with an emergency power source which <u>conforms with the minimum standards established by the American National Standards Institute, in ANSI 17.1, as approved May 29, 1973</u> [WILL PRODUCE SUFFICIENT POWER TO PROVIDE LIGHTS INSIDE THE ELEVATOR AND A RINGING ALARM WHICH CAN BE HEARD IN THE BUILDING FOR FIVE HOURS].

April 4

HB 189am

Dale Cheek. I'm Director of the Wage and Hour Division of the Department of Labor.

We are asking the committee to allow us to adopt a 1978 American National Standards Institute safety code. We are using the 1971 code presently. There are very few changes; but there are some minor changes. We are also asking for authority to establish fees for inspection by regulation. This is one of the units in our department that is required to generate 50% of the budget by program receipts and this is very necessary for this function to continue.

There are about 540 elevators in the state. About half of them are the lift, escalator, not the regular elevator that you see out here, so most of them do require some inspection and they are the ones that have a history of being most dangerous type.

We inspect them annually.

We now know how many units there are in the state and we now have regulations ready for hearings and we are reasonable certain that we can generate the amount of money as indicated on the revised fiscal note.

Sen. Ferguson. I move that we move out HB 189am with a do pass recommendation.

Sen. Hackney. Objections? No objections, so ordered.

Education (elementary & secondary)

HOUSE BILL NO. 211, By the Rules Committee by Request of the Governor. Amends AS 14.03.030 "School Term" to read: "The school term begins and ends on the dates fixed by the governing body of the school district. However, the term shall include not less than 180 days in session, except that, subject to the approval of the commissioner, a day used for in-service training of teachers may be substituted for a day in session, up to a maximum of 10 days. [THE COMMISSIONER MAY APPROVE A SCHOOL SCHEDULE ADOPTED BY A SCHOOL BOARD FOR A SCHOOL TERM OF LESS THAN 180 DAYS IN SESSION IF THE TOTAL HOURS DEVOTED TO INSTRUCTION OF PUPILS OR TO STUDY PERIODS FOR THE PUPILS UNDER THE SCHEDULE EQUAL OR EXCEED AT LEAST 680 HOURS, EXCLUSIVE OF INTERMISSIONS AND IN-SERVICE TRAINING OF TEACHERS, FOR THE FIRST, SECOND AND THIRD GRADES AND AT LEAST 850 HOURS, EXCLUSIVE OF INTERMISSIONS AND IN-SERVICE TRAINING OF TEACHERS, FOR ALL OTHER GRADES.]" (Note: Bracketed language deleted).

Amends AS 14.07.020(9), making available correspondence study programs from the state if none is offered from the local school district. See governor's letter for explanation of further amendments and repeals.

Provides section 1 and sections 3-7 take effect immediately and sections 2 and 8 take effect July 1, 1979.

Education (elementary & secondary)

HOUSE BILL NO. 211, (see page 209). Reported back to the House on March 15 by HESS with a majority recommending replace with SUBSTITUTE and reporting back with individual recommendations. Buchholdt (Chmn), Munson and Hurlbert recommend do pass. Miles, Chatterton, Barnes and Beirne have no recommendation. To Rules. Adds new section to AS 14.08 (Education in the Unorganized Borough) "046. ADVISORY SCHOOL BOARDS IN REGIONAL EDUCATIONAL ARRENDANCE AREAS" which states "A regional school board may establish advisory school boards, and by regulation shall prescribe their manner of selection, and organization, and their powers and duties." Amends AS 14.14.-140 "Restriction on Employment" by stating that school board members and immediate family may not be employed by the school board "except upon written approval of the commissioner." Deletes proposed amendment to AS 14.14.170(d) and new subsection (g) in original bill. Sec. 6 repeals AS 14.14.170 (Community school committees); 14.14.180 (Qualifications of community school committee members and voters); 14.14.200 (Duties). Sec. 7 repeals AS 14.40.700-14.40.730 "Compact for Education. Provides Sec. 1-6 take effect immediately and Sec. 7 takes effect July 1, 1979.

Education (elem. & sec.)

HOUSE BILL NO. 211, (SUBSTITUTE)(AMENDED)(see pages 209;393). On March 21 the SUBSTITUTE was adopted (see page 393) and Amendment No. 1 by Moss and Buchholdt was adopted. The amendment deletes language relating to school board members or their families being employed on the school board unless with written approval of the commissioner. Replaces with "(a) While serving on the school board, a member may not be employed by that local school board. Members of the immediate family of a school board member may not be employed by the school board without written approval of the commissioner." (Note: underlined language added). CSHB 211am was then returned to Rules in 3rd reading. The bill came up again on March 23 and Passed the House 28-2-10. Nays: Barnes and Martin. Not Voting: Bettisworth, Brown, Buchholdt, Carney, Ellason, Freeman, Moss, O'Connell, Parker and Randolph. The effective date clause was adopted.

VERBATIM TEXT OF HEARING

April 4, 1979

CSHB 211 am

Bill Thompson. CSHB 211am was originally requested by the Governor at the request of the Department of Education and is cleanup legislation that we feel will help us administer education law a little better.

The first section deals with the school term. About 5 years ago there was some language adopted that the commissioner could approve a shorter school term than 180 days if basically the instructional time remained the same. This was in light of the energy crises at the time. None of the school districts in the state have requested a shorter than 180 days for that particular purpose, nor has there been any approvals by the commissioner under that section. Therefore, we consider this superflous and not needed.

Sen. Sturgulewski. I have been in communication with out school district. This does eliminate the commissioner's discretion. There is a potential here for throwing some additional costs on the district such as under the act of God problem with the Mat-Su wind. It would mean those days would have to be made up. You might have some areas where you didn't get the word out to all teachers and they were paid and you had to have additional days, you might be throwing in some additional costs. Also, that is true I think on the question of busses where you have to pay even though you dou don't have school 50% of the contracted costs. I realise the state reimburses there. Is it such a burden for you to have some discretion in some of these matters.

Bill Thompson. No, this would not affect days of closures. Days of closures is in a different section. That is a different section of the law and does require the commissioner's approval.

Section 2 at the current time there is an inconsistency between regional education attendance areas and city and borough school districts. Regional education attendance areas are required to have a community school committee in each community that is served that's advisory to the district board. This amendment would say that the establishment of those committees is at the determination of the regional board; rather than being mandated that those committees be provided. The idea being that SB 35 establishing the REAA boards have been in existence long enough and it is a determination, a local determination, whether or not the advisory boards in each of the communities are needed. It's permissive rather than mandatory.

Section 3 deals with recall. Currently it says the commissioner of education shall be the clerk and the State Board of Education shall act as the assembly or the council. The department believes that this more properly belongs in the Lt. Governor's office and that the director of the Division of Elections who handles all other elections should also handle the recall elections.

There has been in the three year history, there has been 6 recalls.

Sen. Sturgulewski. There will be quite a lot of work done in the interim having to do with elections and certainly in recalls, but this is just a very simply thing. All it does is to move from you (DOE) to Elections.

Sen. Ferguson. The House has introduced HB 245 dealing with elections and I believe that Sen. Kelly with his election reform bill is going to take a look at the whole works in recall and not to necessarily hinder people from having someone recalled, but to stipulate certain items.

Bill Thompson. Section 4 would change who appoints the non-voting member of the military community when the department contracts with the contiguous municipalities for educational services in the on-base schools. That representative would be appointed by the affected school board rather than the State Board of Education.

Section 5, This clarifies restrictions on employment and nepotism and what exactly is the course.

Sen. Hackney. THe repealers are as simply pointed out in Sen. Ferguson's memorandum.

Bill Thompson. Section 6 is repealors dealing with community school committees because it becomes superfluous with the adoption of section 2 of the bill.

Se Section 7 repeals the Alaska participation in the education compact of the states which is the educational commission of the states. Our recommendation for that is that each year the dues are increasing and we can get the same information as far as an informative service from other sources, U. S. Office of Education, Teacher councils, National School Boards Association, and so on. As you know there is a fiscal note attached that becomes effective in 1981. The way the law reads, for Alaska participation, we have to notify them a year ahead that we are no longer going to participate therefore we would have to pay our dues in FY 80. But in FY 81 it would have a negative impact of $18.8 thousand.

Basically the ~~community school advisory committees are~~ education commission is more political than professional. Alaska's membership is made up as legislators, the governor's office, state board of education and the commissioner and what they do is an exchange of information between states. That's as far as what they provide in professional assistance to the department on educational finance, teacher certification, whatever.

Sen. Sturgulewski. I move CSHB 211am move from committee with a do pass recommendation.

NO objections so ordered.

Sec. 1 clean up language Specifies school term shall include not less than 180 days in session

Sec. 2 Allows ~~Regional school~~ boards to establish advisory school boards

Sec. 3 ~~Under direction of Director of elections~~ Date Dir. Bd. of Co. officer in charge of recall elections instead of Comm. of Ed

Sec. 4 Changes the appointing body for nonvoting delegates from Bd. of Ed. from State Bd. of Ed. to the local school bd.

Sec. 5 Local Bd members can't be employed by board and immediate family members only with written approval of Comm.
Members of immediate family of a supt. may be employed only with written approval of Board

Sec. 6 Repealers apply to community school committees and their duties as it becomes superfluous with adoption of Sec 2.

Sec. 7 Would allow state to withdraw from Compact for education

IN THE HOUSE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

CS FOR HOUSE BILL NO. 211 am

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to public elementary and secondary education; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.03.030 is amended to read:

Sec. 14.03.030. SCHOOL TERM. The school term begins and ends on the dates fixed by the governing body of the school district. However, the term shall include not less than 180 days in session, except that, subject to the approval of the commissioner, a day used for in-service training of teachers may be substituted for a day in session, up to a maximum of 10 days. [THE COMMISSIONER MAY APPROVE A SCHOOL SCHEDULE ADOPTED BY A SCHOOL BOARD FOR A SCHOOL TERM OF LESS THAN 180 DAYS IN SESSION IF THE TOTAL HOURS DEVOTED TO INSTRUCTION OF PUPILS OR TO STUDY PERIODS FOR THE PUPILS UNDER THE SCHEDULE EQUAL OR EXCEED AT LEAST 680 HOURS, EXCLUSIVE OF INTERMISSIONS AND IN-SERVICE TRAINING OF TEACHERS, FOR THE FIRST, SECOND AND THIRD GRADES AND AT LEAST 850 HOURS, EXCLUSIVE OF INTERMISSIONS AND IN-SERVICE TRAINING OF TEACHERS, FOR ALL OTHER GRADES.]

* Sec. 2. AS 14.08 is amended by adding a new section to read:

Sec. 14.08.046. ADVISORY SCHOOL BOARDS IN REGIONAL EDUCATIONAL ATTENDANCE AREAS. A regional school board may establish advisory school boards, and by regulation shall prescribe their manner of selection, and organization, and their powers and duties.

* Sec. 3. AS 14.08.081 is amended to read:

Sec. 14.08.081. RECALL. The members of a regional school board

are subject to recall in accordance with AS 29.28.130 - 29.28.250, except that the director of the division of elections [COMMISSIONER OF EDUCATION] shall perform the functions of a municipal clerk, and the lieutenant governor [STATE BOARD OF EDUCATION] shall perform the functions of the assembly or council under those sections.

* Sec. 4. AS 14.12.030(d) is amended to read:

(d) Each city or borough school district that is operating schools on a military reservation under AS 14.12.020(a) has one nonvoting delegate from the military reservation or reservations to the school district board to advise and assist the board in matters relating to the military reservation schools operated by the school district and to act as liaison between the board and the military community. The nonvoting delegate shall be appointed by the school district board [STATE BOARD OF EDUCATION], shall serve at the pleasure of the school district board [STATE BOARD OF EDUCATION], and must [SHALL] be an inhabitant of the area served by the military reservation schools operated by the school district by contract. If an elected community school committee is established on a military reservation, the only inhabitants of that military reservation who are eligible for appointment as the nonvoting delegate are those inhabitants who are members of the elected school committee.

* Sec. 5. AS 14.14.140 is amended to read:

Sec. 14.14.140. RESTRICTION ON EMPLOYMENT. (a) While serving on the school board, a member may not be employed by that local school board. Members of the immediate family of a school board member [SCHOOL BOARD MEMBERS, OR MEMBERS OF THEIR IMMEDIATE FAMILIES,] may not be employed by the school board except upon written approval of the commisioner.

(b) Members of the immediate family of a chief school administra-

tor may not be employed by the chief school administrator except upon written approval of the school board [APPROV. L OF THE COMMISSIONER].

* Sec. 6. AS 14.14.170, 14.14.180, 14.14.190 and 14.14.200 are repealed.

* Sec. 7. AS 14.40.700 - 14.40.730 are repealed.

* Sec. 8. Sections 1 - 6 of this Act take effect immediately in accordance with AS 01.10.070(c).

* Sec. 9. Section 7 of this Act takes effect July 1, 1979.

Alaska State Legislature

Senate

OFFICIAL BUSINESS

POUCH V
CAPITOL BUILDING
JUNEAU, ALASKA 99811

MEMORANDUM

TO: Senator Glen Hackney
Chairman Senate HESS Committee

DATE: April 4, 1979

FR: Senator Frank Ferguson

SUBJ: CSHB 211

Following is an explanation of the amendment I proposed to the House HESS Committee which resulted in some of the changes incorporated in CSHB 211:

Sec. 2 of CSHB 211 allows the REAA's to establish advisory school boards. This new section 14.08.046 reads exactly the same as 14.12.035 (attached) which allows borough school districts to establish advisory school boards.

Sec. 6 of CSHB 211 repeals all sections of the statutes which relate to Community School Committees for the REAA's. (all sections attached). AS 14.14.170 establishes the community school committees. AS 14.14.180 relates to the qualifications of the community school committee members. AS 14.14.190 relates to the terms of office of community school members. AS 14.14.200 relates to the duties of community school committee members.

The amendments I proposed to CSHB 211 repeal all sections of the statutes relating to Community School Committees for the Regional Educational Attendance Areas; and adds a section to the statutes which allows the REAA's to establish advisory school boards. These amendments put the REAA's on the same footing as the Borough School Districts.

cc: Sen. Colletta
Sen. Sturgulewski
Sen. Fahrenkamp

school board shall be determined in the manner prescribed by AS 29.23.020.

(d) Each city or borough school district that is operating schools on a military reservation under § 20(a) of this chapter has one nonvoting delegate from the military reservation or reservations to the school district board to advise and assist the board in matters relating to the military reservation schools operated by the school district and to act as liaison between the board and the military community. The nonvoting delegate shall be appointed by the state Board of Education, shall serve at the pleasure of the state Board of Education, and shall be an inhabitant of the area served by the military reservation schools operated by the school district by contract. If an elected community school committee is established on a military reservation, the only inhabitants of that military reservation who are eligible for appointment as the nonvoting delegate are those inhabitants who are members of the elected school committee. (§ 1 ch 98 SLA 1966; am § 1 ch 71 SLA 1969; am § 1 ch 83 SLA 1974; am § 2 ch 13 SLA 1975; am § 6 ch 124 SLA 1975)

Effect of amendments. — The 1974 amendment added subsection (c).

The first 1975 amendment, effective March 16, 1975, added subsection (d).

The second 1975 amendment, effective July 1, 1975, deleted "from among the membership of the advisory school board if there is an elected advisory board" following "state Board of Education" in the second sentence of subsection (d) and added the third sentence of that subsection.

Sec. 14.12.035. Advisory school boards in borough school districts. A borough school district board may establish advisory school boards, and by regulation shall prescribe their manner of selection, organization, powers and duties. (§ 1 ch 81 SLA 1974)

Sec. 14.12.040. Transition. The transition from a five-man to a seven-man school board shall be made at the regular election following, or being held within 90 days preceding, the completion of the second regular school term during which the district maintains an average daily membership exceeding 5,000 or at the regular election following the effective date of an ordinance increasing board membership as provided in § 30(a) of this chapter. Once the district has a seven-man school board, the number of members shall not be changed. (§ 1 ch 98 SLA 1966; am § 2 ch 71 SLA 1969)

Sec. 14.12.050. School board terms. (a) The term of office of a member of a borough or city school board is three years and until a successor takes office. However, the members of a newly created five-man school board hold office for initial terms as follows: two for a term of three years, two for a term of two years and one for a term of one year, the terms being assigned to the members by lot. The members of a newly created seven-man school board hold office for initial terms as follows: three for a term of three years, two for a term of two years

School Boards is recognized as the organization and representative agency of the members of the school boards of the state. (§ 1 ch 98 SLA 1966)

Sec. 14.14.160. Cooperation and support of certain association functions. (a) The department and local districts may cooperate with the Association of Alaska School Boards in its inservice training program for school board members and in encouraging and fostering cooperation among the school boards affiliated with the Association of Alaska School Boards.

(b) School districts may expend district money to carry out the provisions of (a) of this section. (§ 1 ch 98 SLA 1966)

Sec. 14.14.170. Community school committees. (a) There is established a community school committee in each community or military reservation served by a school operated by a regional educational attendance area. If the regional educational attendance area school has an average daily membership of less than 251 pupils, the community school committee consists of three members. If the average daily membership is more than 250 pupils, the community school committee consists of five members.

(b) [deleted]

(c) In communities qualifying for three-member community school committees under (a) of this section, voters qualified under § 180 of this chapter may increase the committee to five members by referendum conducted at an election coinciding with an election for community school committee members. In communities qualifying for five-member community school committees under (a) of this section, voters qualified under § 180 of this chapter may increase the committee to seven members by referendum conducted at an election coinciding with an election for community school committee members.

(d) The date of election for community school committee members is the same as that for regular municipal elections in the second class city having the largest population in the area served by the committee or, if there is no second class city within the area, on an annual election date for such elections fixed by regulations of the department.

(e) Elections under (c) and (d) of this section shall be conducted upon such notice and otherwise substantially in the same manner as regular municipal elections which are held within the largest second class city in the area served by the committee. If there is no second class city within the area, elections shall be conducted upon at least 10 days published or posted public notice of the election and of the question or nominees to be voted on and under general rules for the elections as may be promulgated by regulation of the department. Elections relating to community school committees shall be supervised by the regional school board but shall be administered within second class cities as part of the regular municipal election.

(f) Elected members of community school committees are subject to recall in accordance with the provisions of AS 29.28.130—29.28.250, except that the chief school administrator of a regional educational attendance area shall perform the functions of the municipal clerk, and the regional school board shall perform the functions of the assembly or council under those sections. (§ 1 ch 98 SLA 1966; am § 10 ch 46 SLA 1970; am § 12 ch 32 SLA 1971; am § 1 ch 101 SLA 1971; am §§ 23, 24 ch 53 SLA 1973; am § 1 ch 37 SLA 1974; am §§ 3, 4 ch 72 SLA 1974; am §§ 4, 5 ch 13 SLA 1975; am § 7 ch 124 SLA 1975)

Effect of amendments. — The first 1971 amendment substituted "membership" for "enrollment" in the second and third sentences of subsection (a).

The second 1971 amendment added subsections (c), (d), and (e).

The 1973 amendment substituted "second" for "fourth" twice in subsection (d) and three times in subsection (e).

The first 1974 amendment added subsection (f).

The second 1974 amendment, effective July 1, 1975, in the first sentence of subsection (a), inserted "or military reservation," deleted "and" following "a school," and added "or by a city or borough school district by contract with the state" to the end. The amendment also added "which shall be advisory to the governing body of the school district that operates the on-base schools" to the end of the first sentence in subsection (b) and added the second sentence of that subsection.

The first 1975 amendment, effective March 16, 1975, deleted "or by a city or borough school district by contract with the state" from the end of the first sentence of subsection (a) and repealed subsection (b).

The second 1975 amendment, effective July 1, 1975, substituted references to community school committees for references to advisory school boards throughout subsections (a) and (c) through (f), substituted "a regional educational attendance area" for "the state or by a city or borough school district by contract with the state" at the end of the first sentence of subsection (a) and "regional educational attendance areas" for "state-operated" in the second sentence of that subsection, and deleted subsection (b). The amendment also substituted "regulations of the department" for "regulation of the board of directors for state-operated schools" at the end of subsection (d), substituted "department" for "board of directors for state-operated schools" at the end of the second sentence in subsection (e) substituted "regional school board" for "director of state-operated schools" in the third sentence of that subsection, and substituted "chief school administrator of a regional educational attendance area" for "director of state-operated schools" and "regional school board" for "board of directors for state-operated schools" in subsection (f).

Editor's note. — Section 9, ch. 72, SLA 1974 provides: "The term of office of a member of the Board of Directors for State-Operated Schools who is a resident of a military reservation whose schools are operated by a city or borough school district in accordance with a contract entered into under AS 14.14.110 by direction of the Department of Education shall be terminated on the effective date of the contract."

Section 10, ch. 72, SLA 1974 provides: "When on-base schools are operated by a city or borough school district by contract, the terms of office of those members of the on-base advisory school board that would expire during the transitional period shall be extended until the next regular municipal election provided for by AS 14.14.170(b), as amended by sec. 4 of this Act."

Section 8, ch. 13, SLA 1975, makes ch. 72, SLA 1974 effective on May 9, 1974, in accordance with AS 01.10.070(c).

Legislative committee reports. — For report on ch. 32, SLA 1971 (HB 111 am), see 1971 House Journal, p. 135. For report on ch. 53, SLA 1973 (CSHB 352), see 1973 House Journal, pp. 793, 855. For report on ch. 72, SLA 1974 (HCS CSSB 122 [Finance] am H), see 1974 House Journal, p. 519.

Sec. 14.14.180. Qualifications of community school committee members and voters. (a) A person may vote at an election for community

school committee members and may be elected to membership on a community school committee who

(1) is a citizen of the United States;

(2) has passed his 18th birthday;

(3) is an inhabitant of the area served by the school for at least 30 days preceding the election.

(b) Election to a community school committee is not an election to a civil office of this state. (§ 1 ch 98 SLA 1966; am § 67 ch 32 SLA 1971; am § 5 ch 72 SLA 1974; am § 8 ch 124 SLA 1975)

Effect of amendments. — The 1971 amendment substituted "18th" for "19th" in subsection (a)(2).

The 1974 amendment repealed paragraph (4) of subsection (a).

The 1975 amendment, effective July 1, 1975, substituted references to community school committees for references to advisory school boards in subsection (a) and (b).

Editor's note. — Section 8, ch. 72, SLA 1975, makes ch. 72, SLA 1974, effective on May 9, 1974, in accordance with AS 01.10.070 (c).

Legislative committee reports. — For report on ch. 32, SLA 1971 (HB 111 am), see 1971 House Journal, pp. 138, 404. For report on ch. 72, SLA 1974 (HCS CSSB 122 [Finance] am H), see 1974 House Journal, p. 519.

Sec. 14.14.190. Terms of office and vacancy. (a) The terms of the initial members of a three-member community school committee are one, two, and three years, respectively, and until a successor takes office. Thereafter, members shall be elected to terms of three years and until a successor takes office.

(b) Of the initial members of a community school committee which consists of five members, one member is elected for a one-year term, two members for a two-year term, and two members for a three-year term, and until a successor takes office. Thereafter, all members are elected to terms of three years and until a successor takes office.

(c) If a three-member community school committee is increased to a five-member committee, the two additional members are elected for terms of two years and three years respectively. Thereafter, all members are elected to three-year terms. If a five-member committee is increased to a seven-member committee, the two additional members are elected for terms of two years and three years respectively. Thereafter, all members are elected to three-year terms and until a successor takes office.

(d) Vacancies on community school committees will be filled by the remaining members until the next regular election. At that time an election will be held for the remaining portion of the term. (§ 1 ch 98 SLA 1966; am § 2 ch 101 SLA 1971; am § 9 ch 124 SLA 1975)

Effect of amendments. — The 1971 amendment, in subsection (c), deleted "because of increased enrollment" following "advisory school board" in the first sentence and added the third and fourth sentences.

The 1975 amendment, effective July 1, 1975, substituted references to community school committees for references to advisory school boards in the first sentence of subsections (a) and (b), throughout subsection (c), and in subsection (d), and deleted "each" preceding "until a successor takes office" in the first sentence of subsections (a) and (b).

Sec. 14.14.200. Duties. A community school committee shall review and make recommendations to the board of the regional educational attendance area concerning the curriculum, program and general operation of the local school and shall exercise additional responsibilities and functions as may be delegated by the regional school board. (§ 1 ch 98 SLA 1966; am § 11 ch 46 SLA 1970; am § 10 ch 124 SLA 1975)

Effect of amendment. — The 1975 amendment, effective July 1, 1975, rewrote this section.

Article 2. Involvement of Young People in School Governance.

Section
250. Establishment of committee
260. Composition and chairman
270. Compensation and per diem
280. Functions of the committee
290. Interns
300. Appointments to district committees or other advisory bodies
310. Definitions

Editor's note. — Section 1, ch. 40, SLA 1972, provides: "**Purpose.** It is the intent of the legislature in enacting this statute to provide an opportunity for the young people of Alaska to become involved in the institutions and processes of local government and school governance comparable to that embodied in AS 44.19.777 — 44.19.787 (enacted in ch. 121, SLA 1971), providing for participation in the executive branch of state government."

Sec. 14.14.250. Establishment of committee. A school board may create a committee or other advisory body on the involvement of young people in school governance. (§ 4 ch 40 SLA 1972)

Sec. 14.14.260. Composition and chairman. The committee may consist of not more than nine members, drawn from the fields of public affairs, education, the sciences, the professions, other fields of private endeavor, from the state or local service, and three additional members from the 17—22 age group, and shall include women and representatives of minority groups. The members shall be appointed by the board in the manner prescribed by the board without regard to political affiliation and shall serve at the pleasure of that body. One member shall be designated by the board as chairman of the committee. (§ 4 ch 40 SLA 1972)

to this state, the governor shall execute the Compact on behalf of the state and perform other acts requisite to its formal ratification and promulgation. (§ 3 ch 164 SLA 1955)

Sec. 14.40.685. Provisions of services. State participation under Articles VIII and XIII of the Western Regional Higher Education Compact shall be limited to the provision of adequate services and facilities in the fields of law, dentistry (to include dental hygiene), medicine, public health, veterinary medicine, pharmacy, physical therapy, occupational therapy, optometry, podiatry, forestry and graduate library studies. (§ 2 ch 70 SLA 1971; am § 1 ch 96 SLA 1972; am § 1 ch 78 SLA 1974)

Effect of amendments. — The 1972 amendment deleted "provided for in the original compact, namely services and facilities" following "facilities" and inserted "law" preceding "dentistry."

The 1974 amendment added the language beginning "pharmacy, physical therapy" to the end of the section.

Editor's note. — Section 3, ch. 78, SLA 1974 provides: "On the effective date of this Act, the administration of the state's participation in the Western Regional Higher Education Compact (AS 14.40.660—14.40.695) shall be transferred from the Office of the Governor to the Alaska Commission on Postsecondary Education."

Sec. 14.40.690. Members of the commission. (a) The governor, with the advice and consent of the legislature, shall appoint the members for this state of the Western Interstate Commission for Higher Education, created under the provisions of Article III of the Western Regional Higher Education Compact.

(b) The qualifications and terms of office of the members of the commission of this state shall conform with the provisions of Article IV of the Compact.

(c) The commissioners shall serve without compensation and shall be reimbursed for actual and necessary expenses by the Western Interstate Commission for Higher Education. (§ 4 ch 164 SLA 1955)

Sec. 14.40.695. Administration. The Alaska Commission on Postsecondary Education shall administer the state's participation in the Western Regional Higher Education Compact. (§ 2 ch 78 SLA 1974)

Editor's note. — Section 3, ch. 78, SLA 1974 provides: "On the effective date of this Act, the administration of the state's participation in the Western Regional Higher Education Compact (AS 14.40.660—14.40.695) shall be transferred from the Office of the Governor to the Alaska Commission on Postsecondary Education."

Article 8. Compact for Education.

Section	Section
700. Entry into Compact	720. Execution of Compact by governor
710. Terms and provisions of Compact	730. Members of the commission

Sec. 14.40.700. Entry into Compact. The Compact for Education is enacted into law and entered into in behalf of the State of Alaska with

all other states and jurisdictions legally joining in it in a form substantially as contained in § 710 of this chapter. (§ 1 ch 108 SLA 1966)

Sec. 14.40.710. Terms and provisons of Compact. The terms and provisions of the Compact referred to in § 700 of this chapter are as follows:

COMPACT FOR EDUCATION.

ARTICLE I. PURPOSE AND POLICY.

Section A. It is the purpose of this compact to:

1. Establish and maintain close cooperation and understanding among executive. legislative, professional educational and lay leadership on a nationwide basis at the state and local levels.

2. Provide a forum for the discussion, development, crystallization and recommendation of public policy alternatives in the field of education.

3. Provide a clearing house of information on matters relating to educational problems and how they are being met in different places throughout the Nation, so that the executive and legislative branches of State Government and of local communities may have ready access to the experience and record of the entire country, and so that both lay and professional groups in the field of education may have additional avenues for the sharing of experience and the interchange of ideas in the formation of public policy in education.

4. Facilitate the improvement of State and local educational systems so that all of them will be able to meet adequate and desirable goals in a society which requires continuous qualitative and quantitative advance in educational opportunities, methods and facilities.

Section B. It is the policy of this Compact to encourage and promote local and State initiative in the development, maintenance, improvement and administration of educational systems and institutions in a manner which will accord with the needs and advantages of diversity among localities and States.

Section C. The party States recognize that each of them has an interest in the quality and quantity of education furnished in each of the other States, as well as in the excellence of its own educational systems and institutions, because of the highly mobile character of individuals within the Nation, and because the products and services contributing to the health, welfare and economic advancement of each State are supplied in significant part by persons educated in other States.

ARTICLE II. THE COMMISSION.

Section A. The Education Commission of the States, hereinafter called "the Commission," is hereby established. The Commission shall consist of seven members representing each party State. In addition to any other principles or requirements which a State may establish for the appointment and service of its members of the Commission, the guiding principle for the composition of the membership on the Commission from each party State shall be that the members representing such State shall, by virtue of their training, experience, knowledge or affiliations be in a position collectively to reflect broadly the interests of the State Government, higher education, the State education system, local education and lay and professional public and nonpublic educational leadership. In addition to the members of the Commission representing the party States, there may be not to exceed ten nonvoting commissioners selected by the steering committee for terms of one year. Such commissioners shall represent leading national organizations of professional educators or persons concerned with educational administration.

Section B. The members of the Commission shall be entitled to one vote each on the Commission. No action of the Commission shall be binding unless taken at a meeting at which a majority of the total number of votes on the Commission are cast in favor thereof. Action of the Commission shall be only at a meeting at which a majority of the Commissioners are present. The Commission shall meet at least once a year. In its bylaws, and subject to such directions and limitations as may be contained therein, the Commission may delegate the exercise of any of its powers to the steering committee or the Executive Director, except for the power to approve budgets or requests for appropriations, the power to make policy recommendations pursuant to Article III and adoption of the annual report pursuant to Article II (j).

Section C. The Commission shall have a seal.

Section D. The Commission shall elect annually, from among its members, a chairman, who shall be a Governor, a vice chairman and a treasurer. The Commission shall provide for the appointment of an executive director. Such executive director shall serve at the pleasure of the Commission, and together with the treasurer and such other personnel as the Commission may deem appropriate shall be bonded in such amount as the Commission shall determine. The executive director shall be secretary.

Section E. Irrespective of the civil service, personnel or other merit system laws of any of the party States, the executive director subject to the approval of the steering committee shall appoint, remove or discharge such personnel as may be necessary for the performance of the functions of the Commission, and shall fix the duties and compensation of such personnel. The Commission in its bylaws shall provide for the personnel policies and programs of the Commission.

Section F. The Commission may borrow, accept or contract for the services of personnel from any party jurisdiction, the United States, or any subdivision or agency of the aforementioned governments, or from any agency of two or more of the party jurisdictions or their subdivisions.

Section G. The Commission may accept for any of its purposes and functions under this Compact any and all donations, and grants of money, equipment, supplies, materials and services, conditional or otherwise, from any State, the United States, or any other governmental agency, or from any person, firm, association, foundation, or corporation, and may receive, utilize and dispose of the same. Any donation or grant accepted by the Commission pursuant to this paragraph or services borrowed pursuant to paragraph (f) of this Article shall be reported in the annual report of the Commission. Such report shall include the nature, amount and conditions, if any, of the donation, grant, or services borrowed, and the identity of the donor or lender.

Section H. The Commission may establish and maintain such facilities as may be necessary for the transacting of its business. The Commission may acquire, hold, and convey real and personal property and any interest therein.

Section I. The Commission shall adopt bylaws for the conduct of its business and shall have the power to amend and rescind these bylaws. The Commission shall publish its bylaws in convenient form and shall file a copy thereof and a copy of any amendment thereto, with the appropriate agency or officer in each of the party States.

Section J. The Commission annually shall make to the Governor and legislature of each party State a report covering the activities of the Commission for the preceding year. The Commission may make such additional reports as it may deem desirable.

ARTICLE III. POWERS.

In addition to authority conferred on the Commission by other provisions of the Compact, the Commission shall have authority to:

1. Collect, correlate, analyze and interpret information and data concerning educational needs and resources.

2. Encourage and foster research in all aspects of education, but with special reference to the desirable scope of instruction, organization, administration, and instructional methods and standards employed or suitable for employment in public educational systems.

3. Develop methods for adequate financing of education as a whole and at each of its many levels.

4. Conduct or participate in research of the types referred to in this Article in any instance where the Commission finds that such research is necessary for the advancement of the purposes and policies of this Compact, utilizing fully the resources of national associations, regional

compact organizations for higher education, and other agencies and institutions, both public and private.

5. Formulate suggested policies and plans for the improvement of public education as a whole, or for any segment thereof, and make recommendations with respect thereto available to the appropriate governmental units, agencies and public officials.

6. Do such other things as may be necessary or incidental to the administration of any of its authority or functions pursuant to this Compact.

ARTICLE IV. COOPERATION WITH FEDERAL GOVERNMENT.

Section A. If the laws of the United States specifically so provide, or if administrative provision is made therefor within the Federal Government, the United States may be represented on the Commission by not to exceed ten representatives. Any such representative or representatives of the United States shall be appointed and serve in such manner as may be provided by or pursuant to Federal law, and may be drawn from any one or more branches of the Federal Government, but no such representative shall have a vote on the Commission.

Section B. The Commission may provide information and make recommendations to any executive or legislative agency or officer of the Federal Government concerning the common educational policies of the States, and may advise with any such agencies or officers concerning any matter of mutual interest.

ARTICLE V. COMMITTEES.

Section A. To assist in the expeditious conduct of its business when the full Commission is not meeting, the Commission shall have a steering committee of thirty-two members which, subject to the provisions of this Compact and consistent with the policies of the Commission, shall be constituted and function as provided in the bylaws of the Commission. One-fourth of the membership of the steering committee shall consist of Governors, one-fourth shall consist of legislators, and the remainder shall consist of other members of the Commission. A Federal representative on the Commission may serve with the steering committee, but without vote. The voting members of the steering committee shall serve for terms of two years, except that members elected to the first steering committee of the Commission shall be elected as follows: sixteen for one year and sixteen for two years. The chairman, vice chairman, and treasurer of the Commission shall be members of the steering committee and, anything in this paragraph to the contrary notwithstanding, shall serve during their continuance in these offices. Vacancies in the steering committee shall not affect its authority to act, but the Commission at its next regularly ensuing

meeting following the occurrence of any vacancy shall fill it for the unexpired term. No person shall serve more than two terms as a member of the steering committee; provided that service for a partial term of one year or less shall not be counted toward the two term limitation.

Section B. The Commission may establish advisory and technical committees composed of State, local, and Federal officials, and private persons to advise it with respect to any one or more of its functions. Any advisory or technical committee may, on request of the States concerned, be established to consider any matter of special concern to two or more of the party States.

Section C. The Commission may establish such additional committees as its bylaws may provide.

ARTICLE VI. FINANCE.

Section A. The Commission shall advise the Governor or designated officer or officers of each party State of its budget and estimated expenditures for such period as may be required by the laws of that party State. Each of the Commission's budgets of estimated expenditures shall contain specific recommendations of the amount or amounts to be appropriated by each of the party States.

Section B. The total amount of appropriation requests under any budget shall be apportioned among the party States as follows: one-third in equal shares; and the remainder in proportion to the population of each party State as shown in the most recent decennial census of population taken by the United States Bureau of the Census, or any agency successor thereto.

Section C. The Commission shall not pledge the credit of any party State. The Commission may meet any of its obligations in whole or in part with funds available to it pursuant to Article II (g) of this Compact, provided that the Commission takes specific action setting aside such funds prior to incurring an obligation to be met in whole or in part in such manner. Except where the Commission makes use of funds available to it pursuant to Article II (g) thereof, the Commission shall not incur any obligation prior to the allotment of funds by the party States adequate to meet the same.

Section D. The Commission shall keep accurate accounts of all receipts and disbursements. The receipts and disbursements of the Commission shall be subject to the audit and accounting procedures established by its bylaws. However, all receipts and disbursements of funds handled by the Commission shall be audited yearly by a qualified public accountant, and the report of the audit shall be included in and become part of the annual reports of the Commission.

Section E. The accounts of the Commission shall be open at any reasonable time for inspection by duly constituted officers of the party States and by any persons authorized by the Commission.

Section F. Nothing contained herein shall be construed to prevent Commission compliance with laws relating to audit or inspection of accounts by or on behalf of any government contributing to the support of the Commission.

ARTICLE VII. ELIGIBLE PARTIES; ENTRY INTO AND WITHDRAWAL.

Section A. This Compact shall have as eligible parties all States, Territories, and Possessions of the United States, the District of Columbia, and the Commonwealth of Puerto Rico. In respect of any such jurisdiction not having a Governor, the term "Governor," as used in this Compact, shall mean the closest equivalent official of such jurisdiction.

Section B. Any State or other eligible jurisdiction may enter into this Compact and it shall become binding thereon when it has adopted the same; provided that in order to enter into initial effect, adoption by at least ten eligible party jurisdictions shall be required.

Section C. Any party State or jurisdiction may withdraw from this Compact by enacting a statute repealing the same, but no such withdrawal shall take effect until one year after the Governor of the withdrawing State or other jurisdiction has given notice in writing of the withdrawal to the Governors of all other party States and jurisdictions. No withdrawal shall affect any liability already incurred by or chargeable to a party State or jurisdiction prior to the time of such withdrawal.

ARTICLE VIII. CONSTRUCTION AND SEVERABILITY.

This Compact shall be liberally construed so as to effectuate the purposes thereof. The provisions of this Compact shall be severable and if any phrase, clause, sentence or provision of this Compact is declared to be contrary to the constitution of any State or of the United States, or the applicability thereof to any Government, agency, person or circumstance is held invalid, the validity of the remainder of this Compact and the applicablity thereof to any Government, agency, person, or circumstance shall not be affected thereby. If this Compact shall be held contrary to the constitution of any State participating therein, the Compact shall remain in full force and effect as to the State affected as to all severable matters.

ARTICLE IX. STATE DEFINED.

As used in this Compact, "State" means a State, territory or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico. (§ 1 ch 108 SLA 1966; am §§ 1 — 4 ch 30 SLA 1967)

Revisor's note. — Chapter 30, SLA 1967, is from the Model Compact for Education.

Sec. 14.40.720. Execution of Compact by governor. Upon ratification and approval of the Compact for Education by 10 or more of the eligible party jurisdictions, including the State of Alaska, the governor shall execute the Compact on behalf of the state and perform other acts requisite to its formal ratification and promulgation. (§ 1 ch 108 SLA 1966)

Sec. 14.40.730. Members of the commission. (a) One of the commission members shall be the governor; one shall be the state commissioner of education; two shall be members of the state legislature selected by its respective houses and serving in such manner as the legislature may determine; one shall be the president of the state Board of Education; and two shall be appointed at large by and serve at the pleasure of the governor.

(b) The terms of office of the at-large members shall be four years; provided, however, that the first members shall be appointed as follows: one for two years, and one for four years. Each member shall hold office until his successor is appointed and qualified.

(c) The legislative and at-large members of the commission shall not receive compensation for their services, but they shall receive the travel expenses and per diem provided by AS 39.20.180 (2). (§ 1 ch 108 SLA 1966)

Article 9. Scholarship Loans and Tuition Grants.

Section	Section
751. Loan and tuition funds created	773. [Repealed]
753. Financial aid committee	776. Tuition grants
755. Applications	781. Limitation on grants
757. Administration of program	786. Conditions of grants
759. Undergraduate loans	791. Eligibility of students
761. Graduate loans	796. Application and certification
763. Conditions of loans	801. Fiscal and business management practices
765. Eligibility of students	806. Definitions
767. Selection criteria	
769. Discrimination prohibited	
771. Enforceability of certain contracts with minors	

Repeal of former article. — Section 2, ch. 98, SLA 1971 repealed former Article 9, entitled "Scholarship Grants and Loans." The former article consisted of §§ 14.40.750 — 14.40.849, and derived from ch. 112, SLA 1968, and ch. 230, SLA 1970. Former AS 14.40.830 had been previously repealed by § 14, ch. 230, SLA 1970.

Pioneers' Home Advisory Board (membership)

HOUSE BILL NO. 249, by Rep. Eliason. Amends AS 44.21.120, Composition of the Board, to include selection of an additional member by the resident council who will be present during the annual inspection by the board and who will have full voting privileges during the annual inspection and review meeting. Term of office is one year. No effective

History HB249

Pioneers' Home Advisory Board (membership)

HOUSE BILL NO. 249, (see page 248). Reported back to the House on March 9 by State Affairs with a majority recommending replace with SUBSTITUTE and that it do pass. Not concurring: Martin and Parker have no recommendation. SUBSTITUTE requires the appointment of one resident to the Advisory Board as a full-fledged member for a one-year term.

page 334

COMMITTEE REPORTS (House)(cont'd)

HB 249, cont'd

Outlines rotation system among the pioneers' homes for appointment of member from each of the resident councils of the different homes in the state. Outlines terms of members of the Advisory Board. Provides an effective date to take effect immediately. To Rules.

Pioneer's Home Advis. Board

HOUSE BILL NO. 249 (SUBSTITUTE)(see pp. 248;334). SUBSTITUTE adopted and bill passed March 13, 37-0-1-2. Excused: Meekins. Absent: Bettiwsorth, Brown. Effective date adopted.

the Feds footing the bill the first year but then the next couple of years the hands will be dipping into the general fund rather then deriving funds from receipts.

NOTE: This bill requires that state and muni agencies designate an employee as a liason with the State Library for the purpose of notifying the State Library of all data published or compiled with their respective agencies. Some of these agencies produce quite a bit of statistical/research material which, perhaps, might consume a great deal of time to the extent that an additional body (½ time maybe) might be needed by a few of the agencies to devote to this task. If so, this would require a few new bodies which doesn't appear in the fiscal note(s). May be this idea should be tossed out for discussion at tomorrow's hearing. Possibly, this is not a problem, but I'm just thinking out loud.

CSHB 249 - This bill revises the composition of the Alaska Pioneers' Home Advisory Board. AS 44.21.120 states "The Alaska Pioneers' Home Advisory Board consists of seven members, appointed by the governor from among citizens of Alaska. The members of the board serve at the pleasure of the governor."

CSHB 249 would change the makeup of the board particularly in that the board members would be limited to the number of years they could serve on the board. CSHB 249 proposes the following changes:

(1) the governor would appoint six residents to serve on the board and this bill would stagger their tenure on the board to three year terms.

(2) in addition to the above mentioned six members, a representative from one of the Pioneers' Home would serve on the board. This member would serve on the board for a one year term and then another representative from one of the other Homes would serve on the board. This position would be rotating so that every year a representative from a different home would serve on the board.

CSHB 249 differs substantially from HB 249 in that CSHB 249 tacked on the provisions dealing with limiting the members' tenure on the board to staggered three year terms. HB 249 did not change the numerical makeup of the board (retained 7 board membership) or their tenure, but simply proposed that the board meet semi-annually and when the board inspected the different Homes a representative from the respective Home be placed on the board and have full voting privileges during the annual inspection and review meeting at that pioneers' home and serve for a term of one year.

B.C. McMurtrey, Manager, Anchorage Pioneer Home, feels that the original bill would be more beneficial to the residents as they would meet in their own surroundings and environment, understand better how the homes operate, would be in a better position to offer suggestions, recommendations, and criticism. (see attached letter).

IN THE HOUSE BY THE STATE AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 249

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the membership of the Alaska Pioneers' Home Advisory Board; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 44.21.120 is repealed and re-enacted to read:

Sec. 44.21.120. MEMBERSHIP OF THE BOARD. (a) The Alaska Pioneers' Home Advisory Board is composed of the following members:

(1) six individuals appointed by the governor who are residents of the state; and

(2) one resident of a pioneers' home appointed by the governor who has been recommended for appointment by the resident council of a pioneers' home.

(b) The term of a member appointed under (a)(1) of this section is three years. The term of the member appointed under (a)(2) of this section is one year.

(c) The governor shall make the appointment required by (a)(2) of this section so that, for each annual term, the member appointed is recommended by the resident council of a different pioneers' home. Beginning July 1, 1979 the order of rotation among the pioneers' homes shall be as follows:

(1) resident council of the Sitka Pioneers' Home;

(2) resident council of the Fairbanks Pioneers' Home;

(3) resident council of the Palmer Pioneers' Home;

(4) resident council of the Anchorage Pioneers' Home.

* Sec. 2. The terms of members of the Alaska Pioneers' Home Advisory Board appointed by the Governor before July 1, 1979 expire on June 30, 1979. Notwithstanding the provisions of AS 44.21.120(b), the initial terms of members of the Pioneers' Advisory Board appointed by the governor under AS 44.21.120(a)(1) are as follows:

(1) two members shall serve terms ending June 30, 1980;

(2) two members shall serve terms ending June 30, 1981;

(3) two members shall serve terms ending June 30, 1982.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Honorable Glenn Hackney
Senator
Pouch V
Juneau, AK 99811

My dear Senator Hackney:

I am writing in regard to C.S. for House Bill 249, an act relating to the membership of the Alaska Pioneers' Home Advisory Board.

I supported the original bill H.B. 249 and thought it would be very beneficial to the residents and the Home as a whole. However, the C.S. for H.B. 249, Section 2C, I cannot support. The rest of the bill I support.

Section 2C would allow the Governor to appoint a member from the Sitka Home with recommendations from the resident council to serve on the Board, rotating with each Home every year. This member would be required to travel to each Home at least twice a year.

I question if this would be in the best interest of the resident due to the stress and strain and the average resident being 80 years of age. This would also eliminate many residents from serving on the Board due to the fact they could not travel. Many residents are in wheel chairs, walkers, have physical handicaps, etc., who otherwise would make a very good member of the Board.

I further question if the residents actually are concerned about the other Homes of which they know nothing. They are concerned about their own Home.

I am forming my opinions and conclusions by the residents in this Home, which I work with every day.

02-B2LH

The original bill would have a resident from each Home chosen by the resident council to serve on the Advisory Board with the same voting rights and privileges as other members when the Board meets at their Home. The original bill 249 would not restrict who could serve.

I feel the original bill would be more beneficial to the residents as they would meet in their own surroundings and environment, understand better how the Homes operate, would be in a better position to offer suggestions, recommendations, and criticism.

I feel this is deserving of your support. If I can assist in any way don't hesitate to call.

Sincerely,

B.L. McMurtrey
Manager
Anchorage Pioneers' Home

" action Passed taken senate Mary @ 8:10 AM

Sec. 08.03.010. Termination, continuation and reestablishment of regulatory boards. (a) Boards listed in this subsection have a termination date of June 30, 1979:

(1) Board of Chiropractic Examiners (AS 08.20.010);
(2) Board of Dental Examiners (AS 08.36.010);
(3) State Medical Board (AS 08.64.010);
(4) Board of Nursing (AS 08.68.010);
(5) Board of Dispensing Opticians (AS 08.71.010);
(6) Board of Examiners in Optometry (AS 08.72.010);
(7) Board of Pharmacy (AS 08.80.010);
(8) Board of Veterinary Examiners (AS 08.98.010);
(9) Board of Psychologist and Psychological Associate Examiners (AS 08.86.010);
(10) Board of Nursing Home Administrators (AS 08.70.010);
(11) Physical Therapy Board (AS 08.84.010).

(b) Boards listed in this subsection have a termination date of June 30, 1980:

(1) Board of Public Accountancy (AS 08.04.010);
(2) Board of Barber Examiners (AS 08.12.010);
(3) Collection Agency Board (AS 08.24.011);
(4) Board of Hairdressing and Beauty Culture Examiners (AS 08.28.010);
(5) Board of Electrical Examiners (AS 08.40.010);
(6) State Board of Registration for Architects, Engineers and Land Surveyors (AS 08.48.011);
(7) Guide Licensing and Control Board (AS 08.54.010);
(8) Board of Marine Pilots (AS 08.62.010);
(9) Real Estate Commission (AS 08.88.011);
(10) Board of Welding Examiners (AS 08.99.010);
(11) Board of Governors of the Alaska Bar Association (AS 08.08.040).

(c) Upon termination, each board listed in (a) and (b) of this section shall continue in existence until June 30 of the next succeeding year for the purpose of concluding its affairs. During this period, termination does not reduce or otherwise limit the powers or authority of each board. One year after the date of termination, a board not continued shall cease all activities.

(d) The termination, dissolution, continuation or reestablishment of a regulatory board shall be governed by the legislative oversight procedures of AS 44.66.050.

(e) A board scheduled for termination under this chapter may be continued or reestablished by the legislature for a period not to exceed four years. (§ 2 ch 149 SLA 1977)

electricity for surgical purposes, including cauterization, are not included within the term "physical therapy";

(4) "physical therapy assistant" means a person who assists in the practice of physical therapy or portions of it as initiated, supervised and terminated by a registered physical therapist; his responsibilities do not include testing or evaluation. (§ 2 ch 74 SLA 1957; am § 11 ch 71 SLA 1974)

Effect of amendment. — The 1974 amendment substituted "State Physical Therapy Board" for "State Medical Board" in paragraph (1), inserted "and physical therapy evaluation, treatment planning, instruction and consultative services" in paragraph (3), and added paragraph (4).

Sec. 08.84.200. Short title. This chapter may be cited as the Physical Therapists Practice Act. (§ 1 ch 74 SLA 1957)

4) ANY PROBLEMS W/ O.L.?

for an examination.

Section 08.36.160 Issuance of license by credentials. If an applicant for licensure currently holds a valid license to practice dentistry in Arizona, Idaho, Oregon, and Utah, the Board may issue the appropriate dental license to the applicant upon evidence that:

(1) The applicant is a graduate from a dental school accredited by the Commission on Dental Accreditation, or its successor agency, if any, and;

(2) The applicant has practiced dentistry in one of the above states full-time at least 5 years out of the five years immediately preceeding application, and;

(3) Licensure requirements in the other states are substantially similar to or higher than those required by this state, and;

(4) The applicant has not failed the clinical examination of this state, and;

(5) No disciplinary proceeding, unresolved complaint or professional association's peer review procedure is pending anywhere at the time a license is to be issued by this state, and;

(6) The applicant has not previously had a license revoked in any state.

Section 08.36.170 Practice outside the state. A dentist licensed to practice in this state and residing and practicing dentistry outside of this state, may maintain his eligibility to practice in this state by biennially registering his name and place of residence with the Division of Occupational Licensing. If the dentist fails to register, the board may reinstate his license without examination upon payment of a penalty of $25, payment of all deliquent registration fees, and presentation of proof of active practice at his place of residence, certified by the dental board having jurisdiction at his place of residence, or, if there is no board, by evidence satisfactory to the board.

Section 08.36.180 Issuance of license; recordation; display. The Division of Central Licensure shall issue a license to each successful applicant who has paid the required fees. The holders of a license shall register it in the office of the clerk of the superior court in the judicial district of his place of residence. The licensee shall display the license in a conspicuous place where he/she practices.

Section 08.36.190 License to practice as specialist required. No licensed dentist may hold himself out to the public as being especially qualified in a branch of dentistry by announcing through the press, sign, card, letterhead or printed matter,

POUCH H-07
JUNEAU, ALASKA 99811

March 31, 1980

The Honorable Glenn Hackney
Chairman, Senate HESS Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Document# 59-80

Dear Senator Hackney:

House Bill 447 proposes terminating the existence of the Board of Nursing Home Administrators on January 1, 1981 reassigns its responsibilities to the Department of Commerce and Economic Development.

At the time various Boards and Commissions were being considered for "sunsetting" by the Legislature in 1979, it was found that the existence of the Board of Nursing Home Administrators or some similar type of "peer review" system was, by federal law, (U.S. Code 42 Sub-Chapter XIX S. 1396 a(29)) necessary if the State of Alaska was to continue to receive federal fund participation for Medicaid nursing home services.

Federal fund participation is an essential part of the Medicaid nursing home services funding. Nursing home services comprise 70% of the total Alaska Medicaid budget (twenty-nine million dollars) and therefore, approximately fourteen million dollars (50% matching) could be lost in federal fund participation if some type of "peer review" licensing function is not provided for in Alaska Statute.

When viewed superficially, it is difficult to justify the need for, and cost of a statewide, regionally represented, five member Board of Nursing Home Administrators when only approximately 35 licenses have been issued since 1976. However, with approximately fourteen million dollars in federal fund participation dependent upon the state having "either a Board of Nursing Home Administrators or an agency of the state responsible for licensing under the Healing Arts Act of the state" the cost and need is easier rationalized.

What seems needed is a method of administrating the issuance of Nursing Home Administrators licensured through the Department of Commerce and Economic Development while at the same time providing a method of inexpensive "peer review." Some alternatives that we have considered are as follows:

1. Establish the Long Term Care Division of the Alaska State Hospital Association as the board the Department of Commerce and Economic Department must consult with regarding:

a. Promulgating of regulations.

b. Revocation of licenses.

c. Establishment of procedures to insure that licenses uphold standards.

d. Adoption of criteria for educational requirements.

The Long Term Care Division of the Alaska State Hospital Association meets at least bi-annually and at no expense to the State could provide the professional support needed to fulfill federal statute requirements. The Long Term Care Division of the Alaska State Hospital Association is composed of all the nursing home administrators in the State of Alaska.

II. Establish a Board, for federal purposes, composed of state employees who's offices are in Juneau. This type of board should meet during regular working hours and therefore, should be no added expense to the State.

a. Director of Occupational Licensing.

b. Director of Public Assistance.

c. Director of Public Health.

d. Director of Nursing Board.

III. The development of a comprehensive healing arts act, which would encompass all healing professions.

IV. Reinstatement of the existing Board of Nursing Home Administrators with appropriate funding and staffing in the Division of Occupational Licensing to accomplish the tasks required.

The Division of Public Assistance opposes House Bill 447 and support the reinstatement of the Board of Nursing Home Administrators. We feel the cost of supporting the operation of such a board are justified when compared to the amount of federal fund participation involved.

Sincerely,

Rod Betit
Director

MARCH 31,1980

SENATE HESS COMMITTEE
ASSEMBLY BULDING, ROOM 106
JUNEAU, ALASKA

REF: ~~HOUSE BILL~~ NO. 447

SENATE HACKNEY AND MEMBERS OF THE HESS COMMITTEE:

WE HAVE NO BASIC DISAGREEMENT WITH THE APPARENT INTENT OF H.B. #447. HOWEVER, THERE ARE SOME RELATIONSHIPS WITH FEDERAL REGULATIONS THAT MUST BE CONSIDERED SO AS TO PROTECT THE ABILITY OF NURSING HOMES TO SERVE THE ELDERLY AND THE ILL. THE FOLLOWING IS A BRIEF STATEMENT SETTING FORTH THE PROBLEMS AND SUGGESTING A CURE THRU MODEST CHANGES TO THE BILL,

FOUR "KEY" PHRASES DOMINATE OUR DISCUSSION RELATIVE TO ALASKA'S ELDERLY AND ILL CITIZENS:

HEALING ARTS ACT
BOARD OF NURSING HOME ADMINISTRATORS

PROGRAM COMPLIANCE CONTINUANCE
PROGRAM SUPPORT CONTINUANCE

UNDER THE TERMS OF THE FEDERAL SOCIAL SECURITY RULE NO NURSING HOME MAY OPERATE UNLESS IT IS LICENSED - A REQUIREMENT OF THE "HOME'S" LICENSE IS THAT IT BE ADMINISTERED BY A PERSON LICENSED AS A NURSING HOME ADMINISTRATOR.

ONLY TWO OPTIONS ARE AVAILABLE FOR THE LICENSING OF NURSING HOME ADMINISTRATORS:

A- LICENSED UNDER TERMS OF A HEALING ARTS ACT.
B- LICENSED BY A BOARD OF NURSING HOME ADMINISTRATORS.

ALASKA DOES NOT HAVE A "HEALING ARTS ACT". ALASKA HAS A "BOARD OF NURSING HOME ADMINISTRATORS" ABOUT TO BE SUNSETTED.

WHAT ARE SOME OF THE CONSEQUENCES OF NOT HAVING A "BOARD"?

FIRST, THE MINUTE THE "BOARD" NO LONGER EXISTS, THE LICENSES OF THE ADMINISTRATORS BECOME INVALID -- THUS THE NURSING HOMES ARE NOT IN COMPLIANCE AND THE PATIENTS MUST BE MOVED ALMOST IMMEDIATELY, RETURNED TO THEIR HOMES OR BE PLACED IN NON-EXISTING FACILITIES.

SECONDLY, MEDICAID HAS THE RIGHT AT THAT POINT TO STOP PAYMENT OF THE FIFTY (50%) PERCENT SUPPORT.

THE OBVIOUS RESULT OF ONE AND TWO IS THE REMOVAL OF MEDICAL CARE FROM APPROXIMATELY 500 ILL AND ELDERLY PATIENTS -- NONE OF WHOM HAVE A PLACE TO GO -- SOME OF WHOM ARE COMATOSE -- ALL OF WHOM ARE UNABLE TO CARE FOR THEMSELVES -- NONE OF WHOM HAVE FAMILIES ABLE TO CARE FOR THEM OR THEY WOULD NOT BE IN NURSING HOMES -- MOST OF WHOM ARE WARM, CARING, LOVING PEOPLE DOING THEIR VERY BEST UNDER VERY TRYING STATES OF HEALTH.

WHAT CAN BE DONE TO STOP THE POTENTIAL SERIOUS DANGER TO THE PRESENT AND PROSPECTIVE RESIDENTS OF NURSING HOMES; THE AGED, AND THE ILL, BOTH YOUNG AND OLD?

RETAIN THE BOARD OF NURSING HOME ADMINISTRATORS. THE LEGISLATURE MAY WELL DESIRE TO CHANGE THE MANNER IN WHICH THE BOARD IS CONSTITUTED, AND WE WOULD APPLAUD ANY CHANGE THAT BROUGHT ABOUT COST SAVING WITHOUT DESTROYING EFFECTIVENESS. THE SIZE OF THE BOARD MAY BE AS SMALL AS THREE MEMBERS; ONE COULD WELL BE FROM THE STAFF OF HEALTH AND SOCIAL SERVICES, ONE FROM THE DEPARTMENT OF COMMERCE AND ECONOMIC DEVELOPMENT AND THE OUTSIDE MEMBER COULD BE THE ADMINISTRATOR OF A JUNEAU-BASED NURSING HOME. THUS, THE ONLY COST INVOLVED WOULD BE CLERICAL AS RELATED TO THE SCHEDULED MEETINGS AND EXAMINATIONS. NO TRAVEL AND NO PER DIEM. AND THIS SYSTEM COMPLIES WITH FEDERAL REQUIREMENTS.

AS AN ASIDE, I WOULD MENTION THAT IN MY MIND THE CONSIDERATION OF DOING AWAY WITH A BOARD MUST INCLUDE DEEP AND CAREFUL THOUGHT UPON THE TOTAL RELATIONSHIPS INVOLVED AND NOT ONLY THE APPARENT COST AND PRODUCTIVITY OF A BOARD. MUCH WORK MUST BE DONE ON A NATIONAL LEVEL TO CHANGE FEDERAL RULES IF ALASKA TRULY WISHES TO LESSEN EXTERNAL CONTROLS. LET'S LET THAT BE A SEPERATE CONCERN.

FOR NOW WE SHOULD ALL WORK TOGETHER TO RETAIN ANACCEPTABLE, TO US AND TO FEDERAL AUTHORITIES, "BOARD OF NURSING HOME ADMINISTRATORS" AND RETAIN OUR ABILITY TO PROVIDE PROPER MEDICAL HELP FOR OUR ELDERLY AND OUR ILL. SECONDARILY, LET US MAINTAIN OUR ABILITY TO SHARE THE COST WITH THE FEDERAL GOVERNMENT.

REMEMBER, NO "BOARD OF NURSING HOME ADMINISTRATORS" COULD MEAN AN ALMOST IMMEDIATE CLOSURE OF THE NURSING HOMES THROUGH NON COMPLIANCE----AND, AN ULTIMATE LOSS OF FEDERAL FUNDING.

THE COMPLIANCE WITH FEDERAL STANDARDS AND THE CURE OF THE PROBLEM ARE SIMPLE MATTERS. COMPOSE THE BOARD FROM THE REPRESENTATIVE OF APPROPRIATE STATE AGENCIES PLUS A REPRESENTATIVE OF THE NURSING HOME INDUSTRY AND CONTINUE TO OPERATE UNDER THE PRESENT RULES

SINCERELY YOURS,

Jim L. Buck

JIM L. BUCK

POSITION PAPER/Department of Health & Social Services

Senate
HB 447

POSITION PAPER

~~SENATE BILL~~ NO. ~~SB~~ 549am

"An act relating to professional licensing and to the regulation of Nursing home administrators, and providing for an effective date."

Senate Bill 549am revises current statutes and adds new sections to clarify and strengthen the administration of nursing home administrators licensing procedures. The bill gives the Board of Nursing Home Administrators the authority to develop regulations for the purpose of requiring disciplinary sanctions and making renewal of licenses dependent upon proof of continued competency.

The bill provides specific administrative procedures for applying disciplinary sanctions, and spells out specific grounds for discipline.

The terms of members of the Board of Nursing and limited to approximately eight years and the nursing home administrators license is to be renewed every four years rather than annually.

The Department of Health and Social Services supports Senate Bill 549am as it is written.

As evidenced by the attached letter from Rod Betit, Director, Division of Public Assistance, the existance of and the smooth operation of a Board of Nursing Home Administrators is important to the operation and funding of the State of Alaska's Medicaid program.

The bill does not fiscally affect the cost of operation of the Department of Health and Social Services other than the federal fund participation for the Medicaid program.

CHAPTER OF AARP

of the AMERICAN ASSOCIATION OF RETIRED PERSONS, Inc.

March 25, 1980

Senate Health, Education & Welfare Committee

Attn: Senator Glen Hackney
Pouch V
Juneau, Alaska 99811

Subject: Sunsetting of Board of Nursing

Honorable Senator Hackney:

As President of the American Association of Retired Persons and as a ~~Home Administrators~~ member of the Board of Nursing Home Administration, I Have been requested to express concern regarding the possible sunsetting of this Board. Although I feel that your Committee will in no way jeopardize the loss of Federal funds which support the care of patients in the nursing homes, I feel obliged to relate the concern of Nursing H omes and Older Alaskans.

March 19, the Mt. Juneau Chapter of the American Association of Retired Persons voted unanimously to support Mr. Buck's request. Please refer to the inclosed copy of his letter.

Thank you for your concern for our elderly Alaskans.

Respectfully,

Dove M. Kull

Dove M. Kull, President

ST. ANN'S NURSING HOME
415 Sixth Street, Juneau, Alaska 99801 (907) 586-3883

March 13, 1980

Dove M. Kull, President
American Association of Retired Persons
Mendenhall Apts.
326 4th Street, Atp. 1010
Juneau, Alaska 99801

Dear Madam President:

St. Ann's Nursing Home would like to invite the membership of your organization to cooperate in an attempt to reverse legislation which will be very injurious to many of the elderly citizens of this state.

The sunsetting of the Board of Nursing Home Administrators, as we understand, will have the affect of putting Alaska in substantial non-compliance with Federal statutory requirements and automatically cancel this state's participation in Medicaid cost sharing. Since the federal matching funds for nursing home care amount to approximately ten million dollars annually, we feel this is a matter of serious budgetary concern for the people.

Our main concern, however, is caring for the nearly 500 patients in the state's long-term care facilities. What is to become of them without the Medicaid program? At a time of life when many of these patients are living on a barely subsistance level income (Social Security Benefit and Longevity Bonus), we strip them of the assurance that they can obtain the medical coverage many of them will need.

We would like to urge your organization, and individual members, to take a formal position against the sunsetting of the Board of Nursing Home Administrators. We further request that you communicate your organization's position to members of the legislature in order to redress this apparent injustice to our elderly citizens.

Time is limited, we have only this legislative session to attain relief for our crippled or ill. Please hurry, they are depending on you.

Sincerely,
ST. ANN'S NURSING HOME

Jack W. Buck
Administrator

...kenness (emer. treatment)

HOUSE BILL NO. 567, by the Judiciary Committee. Adds new section to AS 11.66 relating to committing the crime of public drunkenness, if a person is "intoxicated in a private place, not his own property or his usual place of abode, or in a public place,. . ." and is in danger of loss of life or limb, provokes a violent response, makes unreasonably loud noises, or subject another to offensive physical contact. States that public drunkenness is a class B misdemeanor. Repeals AS 47.--37.170 (Treatment and services for intoxicated persons and persons incapacitated by alcohol)(under the Uniform Alcoholism and Intoxication Treatment Act). Amends the same to read: "DECLARATION OF POLICY. It is the policy of the state that alcoholics and intoxicated persons [SHOULD NOT BE CRIMINALLY PROSECUTED FOR THEIR CONSUMPTION OF ALCOHOLIC BEVERAGES AND THAT THEY] should be afforded a continuum of treatment so they may lead normal lives as productive members of society, however nothing in this chapter is inconsistent with the criminal prosecution of public drunkenness. (Note: underlined material added, bracketed material added). Does not provide for an effective date.

Introduced January 18 and referred to Judiciary.

Public Drunkenness (emergency treatment) (SUBSTITUTE offered)

HOUSE BILL NO. 567, (see page 38). Reported back to the House on April 25 by Judiciary with a majority recommending it be replaced with a SUBSTITUTE and that it do pass and attaches a fiscal note. The substitute deletes all language of original bill and is entitled "An Act relating to intoxicated persons." Amends the Uniform Alcoholism and Treatment Act (AS 47.37) section 170 (Treatment and services for intoxicated persons and persons incapacitated by alcohol) by changing the length of time for which a person may be detained at a detention facility for a maximum of 24 hours (was 12), and adds language indicating that a confidential record may be made of protective custody for the purpose of establishing grounds for involuntary commitment. Amends section 190 (Involuntary commitment of alcoholics) relating to the petition for commitment, stating that the petition shall allege that the person is an alcoholic who habitually lacks self-control in using alcoholic beverages and that he "(3) has been taken into protective custody under AS 47.-37.170(b) three times in the preceding six months and is in need of a more sustained treatment program.", and deletes language which states "A refusal to undergo treatment does not constitute evidence of lack of judgment as to the need for treatment." Adds new definitions of "incapacitated by alcohol" stating: "incapacitated by alcohol" means a person who, as a result of consumption of alcohol, is rendered unconscious or has his judgment or physical mobility so impaired that he cannot recognize or extricate himself from conditions of apparent or imminent danger to his health or safety." (Now reads: "incapacitated by alcohol" means a person who is unconscious or has his judgment otherwise so impaired that he is incapable of realizing and making a rational decision with respect to his need for treatment, as evidenced objectively by extreme physical debilitation, physical harm or threats of harm to others or chronic inability to hold regular employment;"). Changes definition of "intoxicated" or "intoxicated person" to read: " . . .means a person whose physical or mental conduct is substantially impaired as a result of the introduction of an alcoholic beverage into his body and who exhibits those plain and easily observed or discovered outward manifestations or behavior commonly known to be produced by the use of alcoholic beverages." (Now reads: "intoxicated person" means a person whose mental or physical functioning is substantially impaired as a result of the use of alcohol;"). Repeals AS 47.37.170(j), the definition of "incapacitated by alcohol" for a person who appears to be incapacitated in a public place. To Rules.

Public Drunkenness (emer. treatment)

HOUSE BILL NO. 567, by the Judiciary Committee. Adds new section to AS 11.66 relating to committing the crime of public drunkenness, if a person is "intoxicated in a private place, not his own property or his usual place of abode, or in a public place,. . ." and is in danger of loss of life or limb, provokes a violent response, makes unreasonably loud noises, or subject another to offensive physical contact. States that public drunkenness is a class B misdemeanor. Repeals AS 47.--37.170 (Treatment and services for intoxicated persons and persons incapacitated by alcohol)(under the Uniform Alcoholism and Intoxication Treatment Act). Amends the same to read: "DECLARATION OF POLICY. It is the policy of the state that alcoholics and intoxicated persons [SHOULD NOT BE CRIMINALLY PROSECUTED FOR THEIR CONSUMPTION OF ALCOHOLIC BEVERAGES AND THAT THEY] should be afforded a continuum of treatment so they may lead normal lives as productive members of society; however, nothing in this chapter is inconsistent with the criminal prosecution of public drunkenness. (Note: underlined material added, bracketed material added). Does not provide for an effective date.

Introduced January 18 and referred to Judiciary.

Public Drunkenness (emergency treatment) (SUBSTITUTE offered)

HOUSE BILL NO. 567, (see page 38). Reported back to the House on April 25 by Judiciary with a majority recommending it be replaced with a SUBSTITUTE and that it do pass and attaches a fiscal note. The substitute deletes all language of original bill and is entitled "An Act relating to intoxicated persons." Amends the Uniform Alcoholism and Treatment Act (AS 47.37) section 170 (Treatment and services for intoxicated persons and persons incapacitated by alcohol) by changing the length of time for which a person may be detained at a detention facility for a maximum of 24 hours (was 12), and adds language indicating that a confidential record may be made of protective custody for the purpose of establishing grounds for involuntary commitment. Amends section 190 (Involuntary commitment of alcoholics) relating to the petition for commitment, stating that the petition shall allege that the person is an alcoholic who habitually lacks self-control in using alcoholic beverages and that he "(3) has been taken into protective custody under AS 47.-37.170(b) three times in the preceding six months and is in need of a more sustained treatment program.", and deletes language which states "A refusal to undergo treatment does not constitute evidence of lack of judgment as to the need for treatment." IN THE HOUSE BY THE JUDICIARY COMMITTEE

CS FOR HOUSE BILL NO. 572

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to guardians and conservators; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 13.26.005(1) is repealed and re-enacted to read:

(1) "incapacitated person" means a person whose ability to receive and evaluate information or to communicate decisions is impaired for reasons other than minority to the extent that he lacks the ability to provide for himself the essential requirements for his physical health or safety without court-ordered assistance;

* Sec. 2. AS 13.26.005 is amended by adding new paragraphs to read:

(5) "essential requirements for physical health or safety" means the health care, food, shelter, clothing, personal hygiene and protection without which serious physical injury or illness is more likely than not to occur;

(6) "partial guardian" means a guardian who possesses fewer than all of the legal duties and powers of a full guardian, and whose rights, powers, and duties have been specifically enumerated by court order;

(7) "full guardian" means a guardian who possesses the legal duties and powers enumerated in AS 13.26.150(c);

(8) "visitor" means a person trained or experienced in law, medical care, mental health care, pastoral care, education, rehabilitation, or social work, who is an officer, employee, or special appointee of the court with no personal interest in the proceedings;

(9) "guardian" includes full guardian and partial guardian;

(10) "respondent" means a person who, in a guardianship proceeding under this chapter, is alleged to be incapacitated and for whom the appointment of a guardian or alternative assistance is sought; "respondent" includes a person seeking the appointment of a guardian or alternative assistance for himself.

* Sec. 3. AS 13.26 is amended by adding a new section to read:

Sec. 13.26.013. COURT RECORDS OF PROCEEDINGS; ACCESS; SEALING. (a) A notice of the filing of a petition, a summary of all formal proceedings, and a dispositional order or modification or termination of a dispositional order relating to a proceeding under this chapter shall be available for public inspection. All other information contained in the court records relating to a proceeding under this chapter is confidential and available only upon court order for good cause shown or to the following persons:

(1) the person who is the subject of the court record, his attorney or guardian ad litem;

(2) a person designated by the person who is the subject of the court record;

(3) the guardian of the person who is the subject of the court record or the attorney of the guardian;

(4) the conservator of the estate of the person who is the subject of the court record or the attorney of the conservator;

(5) a party to the proceeding and his attorney;

(6) the judge or judges hearing or reviewing the matter; and

(7) a member of the clerical or administrative staff of the court if access is essential for authorized internal administrative purposes.

(b) Upon finding that a petition under this chapter was malicious,

frivolous, or without just cause, the court may order that all information contained in the court records relating to the proceeding be sealed and that the information be disclosed only upon court order for good cause shown.

* Sec. 4. AS 13.26 is amended by adding a new section to article 3 to read:

Sec. 13.26.090. PURPOSE AND BASIS FOR GUARDIANSHIP. Guardianship for an incapacitated person shall be used only as is necessary to promote and protect the well-being of the person, shall be designed to encourage the development of maximum self-reliance and independence of the person, and shall be ordered only to the extent necessitated by the person's actual mental and physical limitations. An incapacitated person for whom a guardian has been appointed is not presumed to be incompetent and retains all legal and civil rights except those which have been expressly limited by court order or have been specifically granted to the guardian by the court.

* Sec. 5. AS 13.26.095 is amended by adding a new subsection to read:

(e) A testamentary appointment of a guardian by the parent of an incapacitated person, or by the spouse of a married incapacitated person, may grant all guardianship powers and duties which the deceased parent or spouse held, subject to modification by the court under AS 13.26.125.

* Sec. 6. AS 13.26.105 is repealed and re-enacted to read:

Sec. 13.26.105. PETITION. (a) Any person may petition the court for a finding of incapacity and the appointment of a guardian for himself or for another person.

(b) The petition for appointment of a guardian shall state

(1) the name, age, and address of the petitioner and his relationship to the respondent;

(2) the name, age, and present address of the respondent;

(3) the name and address of the person or facility presently having care, custody, guardianship, or conservatorship of the respondent, if any, and the existence of any other restrictions on the legal capacity of the respondent to act in his own behalf;

(4) the nature and degree of the alleged incapacity;

(5) the particular type and duration of appointment and the protection and assistance being sought;

(6) the names and addresses, unless they are unknown and cannot reasonably be ascertained, of the individuals most closely related to the respondent by blood or marriage;

(7) the facts supporting the allegations of incapacity and the need for appointment of a guardian;

(8) the names and addresses of persons known to the petitioner who have knowledge that might prove helpful in determining the capacity and needs of the respondent.

(c) The petition may also nominate a guardian and include a request for temporary guardianship as provided in AS 13.26.140 if the petitioner believes there is an imminent danger that the physical health or safety of the respondent will be seriously impaired during the pendency of the guardianship proceeding. A request for temporary guardianship shall specify facts which cause the petitioner to believe that a temporary guardian is necessary.

* Sec. 7. AS 13.26 is amended by adding new sections to read:

Sec. 13.26.106. INITIAL COURT PROCEDURES. (a) Upon the filing of a petition, the court shall schedule a hearing on the issue of incapacity. The hearing shall be conducted within 120 days from the filing of the petition unless the court postpones the hearing for cause.

(b) The respondent is entitled to be represented by an attorney in

the proceedings. If the respondent is financially unable to employ an attorney to assist him, the court shall appoint an attorney to represent the respondent in the proceedings.

(c) The court shall appoint a visitor as defined in AS 13.26.-005(8). The visitor shall arrange for evaluations to be performed and prepare a written report to be filed with the court. The court shall also appoint an expert who has expertise in regard to the alleged or admitted incapacity to investigate the issue of incapacity.

(d) The visitor shall interview the respondent and the person seeking appointment as guardian, if any. The visitor shall conduct the interviews and investigations necessary to prepare his report and shall arrange for the respondent to be examined by the expert appointed under (c) of this section. The expert's written report shall be attached to the visitor's report.

(e) Interviews and examinations shall take place in the respondent's usual residence unless

(1) the respondent consents to being examined or interviewed in a medical or mental health facility; or

(2) the visitor considers it necessary to conduct interviews or examinations in a medical or mental health facility.

Sec. 13.26.107. NOTICE OF RIGHTS. (a) Upon appointment, the visitor shall promptly

(1) explain to the respondent, in a language or communication system he can understand, the purpose of the interview and possible consequences of the proceedings;

(2) serve a copy of the petition on the respondent in accordance with the procedure described in AS 13.06.110;

(3) explain and provide to the respondent a written statement of the following rights:

(A) he may communicate with an attorney or an expert in the alleged incapacity before proceeding with the interview;

(B) if he does not have an attorney, an attorney, whose name, address, and telephone number shall be included in the statement, will be designated to advise and represent him before and at any judicial hearings, and the attorney may arrange for an examination and consultation with an expert; and

(C) he may, instead, employ an attorney or expert of his own choice; and

(4) offer assistance to the respondent in contacting an attorney.

(b) A substantive interview of the respondent or other investigation may not be conducted until (a) of this section has been satisfied.

Sec. 13.26.108. VISITOR'S REPORT. (a) The visitor shall file with the court his evaluation report, proof of service of the petition upon the respondent and proof of service of his report upon the respondent, his attorney, and the petitioner, within 90 days after the date on which the petition was filed.

(b) The visitor shall, as part of the evaluation report, explain alternatives to guardianship and recommend any which will safeguard the respondent's essential requirements for physical health and safety. The evaluation report may recommend personal guardianship only if the visitor determines that the needs of the respondent cannot be met by other alternatives.

(c) The evaluation report shall include

(1) the results and analyses of medical and other tests and examinations performed which describe the respondent's mental, emotional, physical, and educational condition, adaptive behavior and

social skills, and which specify the data on which the description is based;

(2) recommendations regarding the types and extent of assistance, if any, necessary to meet the essential requirements for the physical health and safety of the respondent;

(3) an evaluation of the respondent's need for mental health treatment and whether there is a substantial probability that available treatment will significantly improve his mental condition;

(4) an evaluation of the respondent's need for educational or vocational assistance or personal care and whether these can be made available to the respondent;

(5) an evaluation of the probability that the incapacity may significantly lessen, and the type of services or treatment which will facilitate improvement in the respondent's condition or skills;

(6) a list of the names and addresses of all individuals who examined, interviewed, or investigated the respondent and of the names and addresses of all persons contacted in preparation of the report;

(7) a summary of the information which

(A) was supplied by the persons described in (6) of this subsection; and

(B) supports the conclusions of the report;

(8) a description of the alternatives to guardianship which were considered and not recommended and an explanation of why they are not feasible to meet the respondent's needs;

(9) a description of the present home and living arrangement of the respondent and of any other proposed placement and a recommendation for the respondent's living arrangement that provides the least restrictive setting necessary to protect the respondent from serious illness, injury, or disease; and

(10) a specification of the financial resources of the respondent and his entitlements to insurance benefits and publicly operated or sponsored health, mental health, and welfare assistance which might be employed in the provision of services to him.

(d) If personal guardianship is recommended, the evaluation report required under (c) of this section shall include a guardianship outline which identifies

(1) potential guardians;

(2) the specific services necessary and available to protect the respondent from serious injury, illness or disease, and, to the extent possible, return the respondent to full capacity in handling his own affairs;

(3) the means by which the services described in (2) of this subsection may be financed;

(4) the specific, least restrictive authority needed by the guardian to provide the services described in (2) of this subsection.

(e) The petitioner and the respondent may file responses to the evaluation report within 10 days of receiving it. The court may grant additional time if requested for cause.

Sec. 13.26.109. EVALUATIONS: RIGHT TO REMAIN SILENT; RESPONDENT'S ATTORNEY OR EXPERT. (a) A ward or respondent has the right to refuse to respond to questions in the course of examinations and evaluations. However, he may be required to submit to interviews for the purpose of ascertaining whether he lacks the capacity to make informed decisions about care and treatment services.

(b) Statements of a ward or respondent in the course of evaluations, examinations, and treatment under AS 13.26.090 - 13.26.155 are privileged and confidential and not admissible without the ward's or respondent's consent in any civil or criminal proceeding other than

proceedings under AS 13.26.090 - 13.26.155. A ward or respondent at all times has the right to refuse to answer questions if the answers may tend to incriminate him.

(c) During an interview or testing conducted under AS 13.26.090 - 13.26.155, a ward or respondent has the right to be accompanied by an attorney or expert of his own choosing.

(d) The court, if requested by a ward or respondent in preparation for and in connection with a hearing held under AS 13.26.090 - 13.26.155, shall appoint an expert having expertise in regard to the alleged or admitted incapacity to examine the respondent and testify on his behalf. The request shall be filed in court at least five days before the hearing. An expert appointed under this subsection may be the same expert appointed under AS 13.26.106(c).

Sec. 13.26.111. DUTIES AND POWERS OF RESPONDENT'S ATTORNEY. (a) The principal duty of an attorney representing a ward or respondent is to represent the ward or respondent zealously. Zealous representation includes at least

(1) personal interviews with the ward or respondent; unless good cause exists, the first contact with the ward or respondent shall be at least two weeks before the hearing;

(2) explaining, if possible, to the ward or respondent in terms which the ward or respondent can understand, the nature and possible consequences of the proceeding, the alternatives which are available, and the rights to which he is entitled;

(3) securing and presenting evidence and testimony and offering arguments to protect the ward's or respondent's rights and to further his interests.

(b) To the maximum extent possible, the ward or respondent shall remain responsible for determining his interests. However, his attorney

may seek appointment of a guardian ad litem if the circumstances of AS 13.26.112 apply.

Sec. 13.26.112. APPOINTMENT OF A GUARDIAN AD LITEM. (a) Upon the request of a ward or respondent or his attorney, the court shall appoint a guardian ad litem to protect the rights of the ward or respondent in proceedings under AS 13.26.090 - 13.26.155 if the court is satisfied that because of impaired ability to effectively receive and evaluate information regarding the proceedings or because of impaired ability to communicate decisions regarding the proceedings, the ward or respondent cannot determine his own interests without assistance, and

(1) a guardian has not been appointed;

(2) his interests and those of his guardian conflict; or

(3) the appointment is otherwise in the interests of justice.

(b) The guardian ad litem shall assist the ward or respondent in determining his interests in regard to the legal proceedings in which he is involved. If the ward or respondent is entirely incapable of determining his own interests, the guardian ad litem shall make that determination and advise the court and counsel for all parties accordingly. The guardian ad litem shall

(1) inquire thoroughly into all the circumstances that a prudent individual in the position of the ward or respondent would consider in determining his own interests in the proceedings; and

(2) encourage the ward or respondent to participate, to the maximum extent of his capability, in all decisions and to act on his own behalf on all matters in which he is able.

(c) The attorney may also be the guardian ad litem for the ward or respondent if there is no other party readily available and able to serve as a guardian ad litem and whose interests would not conflict with those of the ward or respondent.

Sec. 13.26.113. HEARING. (a) At the hearing scheduled under AS 13.26.106, the respondent has the right to

(1) present evidence on his own behalf;

(2) cross-examine witnesses who testify against him;

(3) remain silent;

(4) have the hearing open or closed to the public as he elects;

(5) be present unless the court determines that his conduct in the courtroom is so disruptive that the proceedings cannot reasonably continue with him present;

(6) be tried by jury on the issue of incapacity.

(b) The burden of proof by clear and convincing evidence is upon the petitioner, and a determination of incapacity shall be made before consideration of proper disposition.

(c) If the respondent is found to be incapacitated, the court shall determine the extent of the incapacity and the feasibility of alternatives to guardianship to meet the needs of the respondent.

(d) If it is found that alternatives to guardianship are feasible and adequate to meet the needs of the respondent, the court may dismiss the action and order an alternative form of protection.

(e) If it is found that the respondent is able to perform some, but not all, of the functions necessary to care for himself, and alternatives to guardianship are not feasible or adequate to provide for the needs of the respondent, the court may appoint a partial guardian, but may not appoint a full guardian.

(f) If it is found that the respondent is totally without capacity to care for himself and that a combination of alternatives to guardianship and the appointment of a partial guardian is not feasible or adequate to meet the needs of the respondent, the court may appoint a full

guardian.

(g) If it is necessary to appoint a guardian, the court shall consider the ward's preference.

(h) At the time a guardian is appointed, the court shall make a reasonable effort to acquaint the ward with his right to request, at a later time, his guardian's dismissal or a modification of the guardianship order. The court shall provide a written statement to the ward, explaining his rights and specifying the procedures to be followed in petitioning the court.

Sec. 13.26.114. PSYCHOTROPIC MEDICATION INFLUENCING WARDS OR RESPONDENTS AT JUDICIAL HEARINGS. (a) A ward or respondent has a right to participate to the maximum extent possible in all judicial proceedings concerning him and to be free from the influence of psychotropic medication during the proceedings.

(b) It is the responsibility of the attorney for the ward or respondent to determine if the ward or respondent is being treated with psychotropic medication the effects of which would continue during the judicial proceedings and, if so, to inform the court in writing a reasonable time before the hearing.

(c) The court, upon receipt of the information provid d under (b) of this section, shall require a medical examination of the ward or respondent, if the court determines that the medical examination is necessary, and shall determine the advisability of continuation or suspension of the treatment for the duration of the judicial proceedings. The court may make any appropriate order it considers necessary. The court in making its determination shall balance the interest of maximum participation of the ward or respondent in the hearings against the medical and rehabilitative needs of the ward or respondent.

(d) If the ward or respondent is under the influence of psycho-

tropic medication during the judicial proceeding determining capacity, the trier of fact shall take that fact into consideration in making its determination.

Sec. 13.26.116. GUARDIANSHIP ORDER. (a) If the court or jury determines that a person is incapacitated and the services of a guardian are necessary, the court shall enter an order which

(1) names the guardian and establishes a guardian-ward relationship;

(2) includes findings of fact which support each grant of authority to the guardian;

(3) adopts a guardianship plan.

(b) The guardianship plan shall specify the authority which the guardian has with regard to

(1) medical care for the ward's physical condition;

(2) mental health treatment which the guardian considers to be in the ward's best interests;

(3) housing for the ward with consideration of the following:

(A) the wishes of the ward;

(B) the preferability of allowing the ward to retain local community ties; and

(C) the requirement for services to be provided in the least restrictive setting;

(4) personal care, educational and vocational services necessary for the physical and mental welfare of the ward and to return the ward to full capacity;

(5) application for health and accident insurance and any other private or governmental benefits to which the ward may be entitled to meet any part of the costs of medical, mental health, or related services provided to the ward;

(6) physical and mental examinations necessary to determine the ward's medical and mental health treatment needs; and

(7) control of the estate and income of the ward to pay for the cost of services which the guardian is authorized to obtain on behalf of the ward.

(c) The guardianship plan may not be more restrictive of the liberty of the ward than is reasonably necessary to protect the ward from serious physical injury, illness or disease and to provide him with medical care and mental health treatment for his physical and mental health. The guardianship plan shall be designed to encourage a ward to participate in all decisions which affect him and to act on his own behalf to the maximum extent possible. The court may not assign a duty or power to a guardian unless the need for it has been proven to the satisfaction of the court and no less restrictive alternative or combination of alternatives is sufficient to satisfy the need.

(d) The duration of the term of guardianship shall be determined by the court order. Upon receipt of a report or other information that requires further consideration, the court may order a review hearing if it determines that the hearing is in the best interests of the ward.

Sec. 13.26.117. GUARDIANSHIP IMPLEMENTATION REPORT. Within 90 days after appointment as guardian, the guardian shall submit to the court a report. The report shall describe the guardian's program for implementing the guardianship plan. The primary goal of the program described in the report shall be, to the maximum extent possible, to develop or regain the ward's abilities to handle his own affairs. The report shall consider housing, medical care, and educational and vocational needs and resources. In developing the report, the guardian shall consult with his ward to the maximum extent possible. The office of public guardian shall contact the guardian to offer assistance in

preparing the report. The report shall specify the services which are necessary to meet the essential requirements for the ward's physical health or safety and the means for obtaining the services. The report shall specify the manner in which the guardian will exercise and share decision-making authority and other items which will assist in fulfilling the needs of the ward, the terms of the guardianship order, and the duties of the guardian.

Sec. 13.26.118. REPORTING. (a) A guardian shall submit a report to the court or request that a visitor be appointed to prepare and submit a report at least annually. A court-appointed visitor shall prepare the report at least once in each three-year period. The guardian shall submit an additional report to the court when

(1) the court orders it;

(2) there is a significant change in the capacity of the ward to meet the essential requirements for his health and safety or to protect his rights;

(3) the guardian resigns or is removed;

(4) the guardianship is terminated; or

(5) the ward requests it.

(b) The report shall contain, but is not limited to, the following information:

(1) the name and address of the ward and the guardian;

(2) the ward's present mental, physical, and social conditions and present living arrangements and the ward's opinion of these arrangements;

(3) changes in the capacity of the ward to meet essential requirements for his physical health and safety;

(4) the services being provided to the ward;

(5) the significant actions taken by the guardian during the

reporting period in regard to his ward;

(6) a financial accounting of the estate which has been subject to the possession or control of the guardian;

(7) a list of the number and nature of the contacts between the guardian and ward if the ward does not reside with the guardian;

(8) any other information requested by the court or necessary or desirable in the opinion of the guardian or visitor.

Sec. 13.26.131. COSTS IN GUARDIANSHIP PROCEEDINGS. (a) Subject to (d) of this section, the state shall bear the costs of the visitor and expert appointed under AS 13.26.106(c).

(b) Subject to (c) and (d) of this section, the respondent shall bear the costs of the attorney appointed under AS 13.26.106(b), of the expert appointed under AS 13.26.109(d), of the guardian ad litem appointed under AS 13.26.112, and of other court and guardianship costs incurred under this chapter.

(c) The state shall pay all or part of the costs described in (b) of this section if the court finds that the payment is necessary to prevent the respondent from suffering financial hardship or from becoming dependent upon a government agency or a private person or agency.

(d) The court may require the petitioner to pay all or some of the costs described in (a) and (b) of this section if the court finds that the petitioner initiated a proceeding under this chapter that was malicious, frivolous, or without just cause.

* Sec. 8. AS 13.26.120 is amended to read:

Sec. 13.26.120. TERMINATION OF GUARDIANSHIP FOR INCAPACITATED PERSON. The authority and responsibility of a guardian for an incapacitated person terminates upon the death of the guardian or ward, the determination of incapacity of the guardian, <u>the</u> [OR UPON] removal or resignation <u>of the guardian</u> as provided in AS 13.26.125<u>, or upon the</u>

expiration of the period specified by court order as the duration of the guardianship. Testamentary appointment under an informally probated will terminates if the will is later denied probate in a formal proceeding. Termination does not affect a guardian's [HIS] liability for prior acts nor his obligation to account for [FUNDS AND] assets of the [HIS] ward over which he exercised control.

* Sec. 9. AS 13.26.125 is amended to read:

Sec. 13.26.125. REMOVAL OR RESIGNATION OF GUARDIAN; CHANGE IN OR TERMINATION OF GUARDIANSHIP [INCAPACITY]. (a) On petition of the ward, the guardian, or any person interested in the ward's [HIS] welfare, the court may (1) review and amend a decision of a guardian; or (2) if alternatives which are less restrictive than guardianship or less restrictive than the existing guardianship plan would assist the ward in meeting his essential requirements for physical health and safety, modify the provisions of its order to (A) amend the guardianship plan or the responsibilities of the guardian; (B) remove a guardian and appoint a successor; or (C) terminate the guardianship [IF IN THE BEST INTERESTS OF THE WARD]. On petition of the guardian, the court may accept his resignation and make any other order which may be appropriate.

(b) The [AN ORDER ADJUDICATING INCAPACITY MAY SPECIFY A MINIMUM PERIOD, NOT EXCEEDING ONE YEAR, DURING WHICH NO PETITION FOR AN ADJUDICATION THAT THE WARD IS NO LONGER INCAPACITATED MAY BE FILED WITHOUT SPECIAL LEAVE. SUBJECT TO THIS RESTRICTION, THE] ward, the guardian, or any person interested in the ward's [HIS] welfare may petition for an order that the ward [HE] is no longer incapacitated or no longer incapacitated to the same extent as he was when the original guardianship order was made or when the court last amended the guardianship order, and for removal or resignation of the guardian, termination of the guardianship, or a change in the responsibilities of the guardian. A request

for this order may be made by informal letter to the court or judge and any person who knowingly interferes with transmission of this kind of request to the court or judge may be held in [ADJUDGED GUILTY OF] contempt of court.

(c) Before removing a guardian, changing his responsibilities, accepting the resignation of a guardian, or ordering that a ward's guardianship be changed or [INCAPACITY HAS] terminated, the court, following the same procedures to safeguard the rights of the ward as apply to a petition for appointment of a guardian and applying the least restrictive alternative necessary to meet the needs of the ward after consideration of alternatives to guardianship services, may send a visitor to the residence of the present guardian and to the place where the ward resides or is detained, to observe conditions and report in writing to the court.

(d) If at any time the ward requests or indicates to his guardian or to the agency responsible for his care or its employee that he desires a change in guardianship, the guardian or the agency providing care shall inform the court of the request or indication.

(e) If the guardian dies, or if on the basis of a petition filed under this section or a report or other information, there is probable cause to believe a guardian is not performing his responsibilities effectively and there is an imminent danger that the physical health or safety of the ward will be seriously impaired, the court shall take whatever action is necessary to protect the ward, including the dismissal of the guardian and appointment of a temporary guardian without a hearing.

* Sec. 10. AS 13.26.135 is amended to read:

Sec. 13.26.135. NOTICES IN GUARDIANSHIP PROCEEDINGS. (a) In a proceeding for the appointment, change in responsibilities, [OR] removal of a guardian, or termination of guardianship, [OF AN INCAPACITATED

PERSON] other than the appointment of a temporary guardian or temporary suspension of a guardian, notice of hearing shall be given to each of the following:

(1) the ward or respondent by the visitor as provided in AS 13.26.107 [THE PERSON ALLEGED TO BE INCAPACITATED AND HIS SPOUSE, PARENTS AND ADULT CHILDREN];

(2) any person who is serving as his guardian, conservator or who has his care and custody; [AND]

(3) in case no other person is notified under (4) [(1)] of this subsection, at least one of his closest adult relatives, if any can be found;

(4) the spouse, parents, and adult children of the ward or respondent;

(5) any person who performed an evaluation for the visitor's report within the previous two years;

(6) the ward's or respondent's attorney; and

(7) the ward's or respondent's guardian ad litem if one has been appointed.

(b) Notice shall be served personally on the ward's or respondent's [ALLEGED INCAPACITATED PERSON, AND HIS] spouse and parents if they can be found within the state. Except as provided in (a)(1) of this section, notice [NOTICE] to the spouse and parents, if they cannot be found within the state, and to all other persons [EXCEPT THE ALLEGED INCAPACITATED PERSON] shall be given as provided in AS 13.06.110. [WAIVER OF NOTICE BY THE PERSON ALLEGED TO BE INCAPACITATED IS NOT EFFECTIVE UNLESS HE ATTENDS THE HEARING OR HIS WAIVER OF NOTICE IS CONFIRMED IN AN INTERVIEW WITH THE VISITOR. REPRESENTATION OF THE ALLEGED INCAPACITATED PERSON BY A GUARDIAN AD LITEM IS NOT NECESSARY.]

(c) The notice shall set out the date, time, place, purpose and

possible consequences of the hearing and the rights of the ward or respondent and any other parties to the proceedings.

* Sec. 11. AS 13.26.140 is repealed and re-enacted to read:

Sec. 13.26.140. TEMPORARY GUARDIANS. (a) If during the pendency of an initial petition for guardianship it appears that the respondent is in need of immediate services to protect him against serious injury, illness or disease and the respondent is not capable of procuring the necessary services, the petitioner may request the appointment of a temporary guardian to authorize the services. The request shall state the reasons and factual basis for the request. The petitioner shall immediately file the request with the court and serve copies on the respondent and his attorney. The court shall conduct a hearing within 72 hours after the filing.

(b) At the temporary guardianship hearing, the respondent shall have the rights set out in AS 13.26.113(a).

(c) The burden of proof at the hearing shall be by a preponderance of the evidence and shall be upon the petitioner.

(d) If the court determines that a temporary guardian should be appointed, it shall make the appointment and grant to the guardian only the authorities that are least restrictive upon the liberty of the respondent and which enable the temporary guardian to provide the emergency services necessary to protect the respondent from serious injury, illness or disease.

(e) The temporary guardianship shall expire at the time of the appointment of a full or partial guardian or upon the dismissal of the petition for guardianship.

(f) If no guardianship petition is pending but the court is informed of a person who is apparently incapacitated and in need of emergency life-saving services, the court may authorize the services upon

determining that delay until a guardianship hearing can be held would entail a life-threatening risk to the person.

* Sec. 12. AS 13.26 is amended by adding a new section to read:

Sec. 13.26.141. EMERGENCY POWERS. Notwithstanding the limits of a temporary guardianship or guardianship order, a temporary guardian and guardian at all times have the right to authorize the provision of emergency life-saving services. This right includes the power to authorize hospitalization without advance court approval.

* Sec. 13. AS 13.26.145 is repealed and re-enacted to read:

Sec. 13.26.145. WHO MAY BE GUARDIAN; PRIORITIES. (a) The court may appoint a competent person, the public guardian, or a private associatio or nonprofit corporation with a guardianship program for incapacitated persons, as guardian of an incapacitated person.

(b) The court may not appoint a person to be a guardian of an incapacitated person if the person

(1) provides, or is likely to provide during the guardianship period, substantial services to the incapacitated person in a professional or business capacity, other than in his capacity as guardian;

(2) is, or is likely to become during the guardianship period, a creditor o the incapacitated person, other than in his capacity as guardian;

(3) has, or is likely to have during the guardianship period, interests which may conflict with those of the incapacitated person; or

(4) is employed by a person who would be disqualified under (1) - (3) of this subsection.

(c) A person may be appointed as the guardian of an incapacitated person notwithstanding the provisions of (b) of this section if he is the spouse, adult child, parent, or sibling of the incapacitated person and the court determines that the potential conflict of interest is

insubstantial and that the appointment would clearly be in the best interests of the incapacitated person.

(d) Subject to (e) of this section, qualified persons have priority for appointment as guardian in the following order:

(1) a person, association, or private nonprofit corporation nominated by the incapacitated person, if at the time of the nomination the incapacitated person had the capacity to make a reasonably intelligent choice;

(2) the spouse of the incapacitated person;

(3) an adult child or parent of the incapacitated person;

(4) a relative of the incapacitated person with whom the incapacitated person has resided for more than six months during the year before the filing of the petition;

(5) a relative or friend who has demonstrated a sincere, longstanding interest in the welfare of the incapacitated person;

(6) a private association or nonprofit corporation with a guardianship program for incapacitated persons;

(7) the public guardian.

(e) The priorities established in (d) of this section are not binding, and the court shall select the person, association, or nonprofit corporation that is best qualified and willing to serve. The court shall also give consideration to a nomination by a person described in (d) of this section and to a nomination in the will of a deceased parent or spouse of the incapacitated person.

* Sec. 14. AS 13.26.150 is repealed and re-enacted to read:

Sec. 13.26.150. GENERAL POWERS AND DUTIES OF GUARDIAN. (a) A guardian shall diligently and in good faith carry out the specific duties and powers assigned by the court. In carrying out his duties and powers, the guardian shall encourage the ward to participate to the

maximum extent of his capacity in all decisions which affect him, to act on his own behalf in all matters in which he is able, and to develop or regain, to the maximum extent possible, his capacity to meet the essential requirements for his physical health or safety, to protect his rights, and to manage his financial resources.

(b) A partial guardian of an incapacitated person has only the powers and duties respecting his ward enumerated in the court order.

(c) A full guardian of an incapacitated person has the same powers and duties respecting his ward that a parent has respecting his unemancipated minor child except that the guardian is not liable for the care and maintenance of the ward, or to third persons for acts of the ward solely by reason of guardianship. Except as modified by order of the court, a full guardian's powers and duties include, but are not limited to, the following:

(1) he is entitled to custody of the person of his ward and shall assure that the ward has a place of abode in the least restrictive setting consistent with the essential requirements for the ward's physical health and safety;

(2) he shall assure the care, comfort, and maintenance of the ward;

(3) he shall assure that the ward receives the services necessary to meet the essential requirements for the ward's physical health and safety and to develop or regain, to the maximum extent possible, the capacity to meet his needs for physical health and safety;

(4) he shall assure through the initiation of court action and other means that the ward enjoys all personal, civil, and human rights to which the ward is entitled;

(5) he may give consents or approvals necessary to enable the ward to receive medical or other professional care, counsel, treatment

or services except as otherwise limited by (e) of this section;

(6) if a conservator for the estate of the ward has not been appointed, the guardian may receive money and property deliverable to the ward and apply the money and property for support, care, and education of the ward; however, the guardian may not apply the ward's money or property for his services as guardian or for room and board which he, his spouse, parent, or child have furnished the ward unless, before payment, the court finds that the ward is financially able to pay and that the charge is reasonable; notice of a request for payment approval shall be provided to at least one relative of the ward if possible; the guardian shall exercise care to conserve any excess money or property for the ward's needs;

(7) if a conservator of the estate of the ward has been appointed, the guardian shall pay all of the ward's estate received by the guardian in excess of the money expended to meet current expenses for support, care, and education of the ward, to the conservator for management as provided in AS 13.26.165 - 13.26.315, and the guardian shall account to the conservator for money expended.

(d) A guardian of a ward, for whom a conservator has also been appointed, shall have the custody and care of the ward and is entitled to receive reasonable sums for his services and for room and board furnished to the ward as agreed upon between the guardian and the conservator. The guardian may request the conservator to expend the ward's estate for the ward's care and maintenance.

(e) A guardian may not

(1) place the ward in a facility or institution for the mentally ill other than through a formal commitment proceeding under AS 47.30.070 in which the ward has a separate guardian ad litem;

(2) consent on behalf of the ward to an abortion, steriliza-

tion, psychosurgery, or removal of bodily organs except when necessary to preserve the life or prevent serious impairment of the physical health of the ward;

(3) consent on behalf of the ward to the withholding of life-saving medical procedures;

(4) consent on behalf of the ward to the performance of an experimental medical procedure or to participation in a medical experiment not intended to preserve the life or prevent serious impairment of the physical health of the ward;

(5) prohibit the marriage or divorce of the ward;

(6) consent on behalf of the ward to termination of the ward's parental rights;

(7) prohibit the ward from registering to vote or from casting a ballot at public election;

(8) prohibit the ward from applying for and obtaining a driver's license.

* Sec. 15. AS 13.26.195 is amended by adding a new subsection to read:

(d) The court shall investigate alternatives to a conservator and the use of a special conservator as provided in AS 13.26.205(c). A conservator may be appointed only if a less restrictive protective order or the services of a special conservator are not adequate to protect the estate of the protected person. The court shall, to the extent possible, consult with the protected person in determining what action should be taken.

* Sec. 16. AS 13.26.205(c) is amended to read:

(c) Before approving a protective arrangement or other transaction under this section, the court shall consider the interests of creditors and dependents of the protected person and, in view of his disability, whether the protected person needs the continuing protection of a con-

servator. If only certain powers need be given to the conservator or the services of a conservator are needed only for a limited number of transactions, a special conservator may be appointed. The court may appoint a special conservator to assist in the accomplishment of any protective arrangement or other transaction authorized under this section who shall have the authority conferred by the order and serve until discharged by order after report to the court of all matters carried out under [DONE PURSUANT TO] the order of appointment.

* Sec. 17. AS 13.26 is amended by adding a new section to read:

Sec. 13.26.218. PUBLIC BOND. (a) If the public guardian is appointed as a conservator, the court may not require a bond under AS 13.26.215.

(b) If the court requires a conservator to provide a bond under AS 13.26.215 and the conservator is financially unable to provide the bond, the court may order the cost of the bond to be paid from court funds.

* Sec. 18. AS 13.26 is amended by adding new sections to read:

ARTICLE 6. PUBLIC GUARDIANS.

Sec. 13.26.360. PURPOSE. The legislature recognizes that many Alaskans, for reasons of incapacity or minority, are in need of a guardian or conservator. Often these persons cannot find a person able and willing to serve as guardian or conservator. The legislature intends through AS 13.26.360 - 13.26.410 to establish the office of public guardian for the purpose of furnishing guardianship and conservatorship services. It further intends by establishing this office to provide assistance to guardians throughout the state in securing necessary services for their wards and to assist the courts, attorneys, visitors, proposed guardians, and respondents in the orderly and expeditious handling of guardianship proceedings.

Sec. 13.26.370. PUBLIC GUARDIAN. (a) The public administrator (AS 22.15.310) shall also act as the public guardian for the judicial district for which he is appointed.

(b) A court may order the public guardian to act as full guardian, partial guardian, conservator, or special conservator for a person who is determined under this chapter to be in need of guardianship or conservatorship service if no person or private guardianship association is willing and qualified to perform the function.

Sec. 13.26.380. POWERS AND DUTIES OF PUBLIC GUARDIAN. (a) The public guardian has the same powers and duties with respect to his wards and protected persons as a private guardian or conservator.

(b) The public guardian, when appointed as guardian or conservator, shall endeavor, for as long as practical, to find a suitable private guardian or conservator for his ward or protected person. For each ward and protected person, the public guardian shall report to the court having jurisdiction of the ward or protected person, at least once every six months, his efforts to find a private guardian or conservator.

(c) The public guardian shall

(1) establish and maintain relationships with governmental, public, and private agencies, institutions, and organizations to assure the most effective guardianship or conservatorship program for each ward and protected person;

(2) visit each of his wards and protected persons at least once every quarter to monitor their welfare;

(3) keep and maintain financial and statistical records of all cases in which the public guardian provides guardianship or conservatorship services;

(4) provide information and referrals to the public regarding guardianship and conservatorship proceedings, but not information which

would identify a particular case;

(5) assist guardians and court-appointed visitors of wards and respondents in the preparation and revision of guardianship plans and reports;

(6) assist guardians to understand the disabilities of wards and to foster the increased independence of wards;

(7) assist guardians in securing the rights, benefits, and services to which their wards are entitled;

(8) develop and maintain a current listing of public and private medical, mental health, social advocacy, educational, rehabilitative, counseling, therapeutic, homemaking, recreational and financial services and programs available to assist wards and protected persons and their families.

(d) The public guardian may

(1) contract for services necessary to carry out the duties of his office;

(2) accept the services of volunteer workers or consultants and reimburse them for their necessary expenses.

Sec. 13.26.390. INTERVENTION. The public guardian may, on his own motion or at the request of the court, intervene in a guardianship or conservatorship proceeding if he or the court considers the intervention to be justified because

(1) an appointed guardian or conservator is not fulfilling his duties;

(2) the estate is subject to waste as a result of the costs of the guardianship or conservatorship;

(3) a willing and qualified guardian or conservator is not available; or

(4) the best interests of the ward, respondent, protected

person, or person who is the subject of a conservatorship proceeding require the intervention.

Sec. 13.26.400. DELEGATION OF POWERS AND DUTIES. The public guardian may employ staff and delegate to members of his staff or to volunteers his powers and duties as guardian or conservator and other powers and duties under this chapter. However, the public guardian retains responsibility for the proper performance of the delegated powers and duties. All delegations shall be to persons who meet the eligibility requirements of AS 13.26.145.

Sec. 13.26.410. ALLOCATION OF COSTS. (a) If a public guardian is appointed guardian or conservator, the administrative costs of his services and the costs incurred in the appointment procedure may not be charged against the income or the estate of the ward or protected person unless the court determines that the ward or protected person is financially able to pay all or part of the costs.

(b) The court shall determine the ability of the ward or protected person to pay for administrative costs of a public guardian or costs incurred in the appointment procedure by determining the financial ability of the ward or protected person to pay a private guardian or conservator, considering the nature, extent, and liquidity of assets of the ward or protected person, the disposable net income of the ward or protected person, the nature of the guardianship or conservatorship, the type, duration and complexity of the services required, and any other foreseeable expenses.

(c) The public guardian shall investigate the financial status of (1) a person who requests the appointment of the public guardian as his guardian or conservator; and (2) a ward for whom a court has appointed the public guardian.

(d) The public guardian may require a person described in (c) of

this section to execute and deliver written requests or authorizations necessary under law to provide the public guardian with access to records of public or private sources, otherwise confidential, needed to evaluate the person's financial eligibility. The public guardian may, upon request and without payment of fees otherwise required by law, obtain information from any office of the state or of a political subdivision or agency of the state which possesses public records.

(e) The reasonable value of the services rendered without cost to the ward or protected person shall be allowed as a claim against the estate upon the death of the ward or protected person.

* Sec. 19. AS 22.15.310 is amended to read:

Sec. 22.15.310. APPOINTMENT. When authorized by the supreme court, the presiding judge in each judicial district shall appoint a person to act as public administrator of the estates of deceased persons, [AND] as coroner, and as public guardian.

* Sec. 20. AS 22.15.350 is amended to read:

Sec. 22.15.350. DUTIES [AS CORONER]. In addition to his other duties, a public administrator shall perform the duties set out in AS 22.15.110 and shall perform the duties of public guardian as set out in AS 13.26.360 - 13.26.410.

* Sec. 21. AS 13.26.110 and 13.26.130 are repealed.

* Sec. 22. TRANSITION. No later than July 1, 1983, all guardianships for incapacitated persons established before July 1, 1980, and in effect on July 1, 1980 shall be reviewed by the court. Until the review, a guardian appointed before July 1, 1980, whose guardianship is still in effect on July 1, 1980, shall retain the powers assigned to him, unless a petition for modification under AS 13.26.125 amended by sec. 8 of this Act is granted. Before the review, the guardian shall submit one report in the form prescribed in AS 13.26.118 added by sec. 6 of this Act.

* Sec. 22. This Act takes effect July 1, 1980.

S 60 (Rev. 12/78)

Nurse Midwives (SUBSTITUTE offered)

HOUSE BILL NO. 802, (see page 238). Reported back to the House by HESS with a majority recommending replace with a SUBSTITUTE and that it do pass. Not concurring: Chatterton has no recommendation. The substitute deletes provisions added in the original bill relating to disability policies issued or delivered in the state to provide indemnity in reasonable amount for cost of maternity services furnished by certified nurse mudwives. Deletes proposed amendment to Group and Disability Insurance relating to the same. Deletes provisions which called for certificate or other evidence of a contract of health insurance issued or delivered by a society in state to provide indemnity for nurse midwive service. Deletes section which added provisions outlining nurse midwife services that must be furnished by medical service corporations, hospital service corporations, or combined medical and hospital service corporations. The substitute adds "nurse midwife" to the definition of "physician" under AS 21.87 (Insurance. Hospital and Medical Service Corporations.) Adds section 21.42.347 (Coverage for Cost of Services Provided by Nurse Midwives) to AS 21.87.340(15) (Hospital and Medical Service Corporations. Other provisions applicable). To Rules.

Re: HB's 417, 80 and 802

Dear Senator Hackney:

The language of these bills proposes to use the term "physician" to mean providers other than Doctors of Osteopathy and Medicine.

We object to this perversion of the term "physician: since:

1) Use of "physician" in other places in the Alaska and Federal Statutes does not have the proposed meaning.

2) The proposed meaning is highly divergent from the usual understanding of this term in common usage for decades, and despite technical definition must theoretically lead to ambiguity, misunderstanding and difficulties in administering regulations.

Sincerely,

Robert Whaley, M.D.

RE: House Bill - 802
Passed - Nurse Mid-Wife Bill

Dear Senator Hackney:

Thank you for requesting medical society input on this bill. The Fairbanks Medical Association has the following concerns with this legislation.

1) The provision of hospital privileges for nurse mid-wives should not be tied to licensure. We understand that this feature has been removed from the House passed version, and we hope it will remain a "dead issue".

2) Insurance plans and health maintenance organization type plans should not be required to cover these services as a condition of being marketed in Alaska. We understand this also has been removed.

3) There must be provision for adequate physician supervision. This will be adequately covered if State Medical Board approval of a supervisory or collaborative relationship with a physician remains a condition of licensure for nurse practitioners, including nurse mid-wives. That state of affairs is threatened by the nurse practice bill which is also currently in the legislature, and you will be receiving comments from us on that bill separately.

I do not believe we have any problems with the requirement that Medicaid cover nurse mid-wife services, which we understand is the only significant provision remaining in the bill, except for our concern that adequate physician supervision be mandatory, preferably a condition of licensure as mentioned above.

Please contact me if you would like to discuss this further. Thank you for your interest.

Sincerely,

Donald E. Thieman, M.D.

ReP House Bill 802

Dear Senator Hackney:

This letter is written on behalf of the American Council of Life Insurance and its sister trade association, the Health Insurance Association of America.

There are technical problems with the bill, as set out in the enclosed letter from Mr. Kuhnen of the HIAA. His suggested amendments are also enclosed. Any questions about these suggested changes can be answered, through me, by Mr. Kuhnen.

Thank you for your consideration.

Very truly yours,

M. T. Thomas

Re: Alaska HB 802 - Services of Nurse Midwives

Dear Mike:

We need to secure an amendment to this bill. We do not oppose covering these services of nurse midwives in lieu of physicians' services for pregnancy and childbirth, provided: (1) the policy covers physicians' services for pregnancy and childbirth, (2) the nurse midwife is licensed as a registered nurse and certified as a nurse midwife, (3) the services performed by the nurse midwife are within the scope of the nurse midwife's certification and license, and (4) any bill requiring this is drafted properly.

We do object most strongly to the provision of the bill which mandate maternity benefits.

Section 2 of the bill is imporperly drafted in that: (1) it speaks of "health" insurance instead of "disability" insurance; (2) we provide benefits for the maternity coverage that have nothing to do with practitioner's services, as well as benefits that cover practitioner services and this section does not make the distinction; (3) there is no requirement that the services of the nurse midwife be within the scope of the person's certification; (4) the phrase which begins "in accordance with regulations" is not clearly tied to the practice of nurse midwives rather than to the provision of benefits.

Sections 3, 4, and 5 mandate benefits for maternity services furnished by nurse midwives in all policies which provide for hospital, nursing, medical, or surgical services. We object to the mandating of benefits. Also the sections are improperly drafted in tha hospital policies may provide no benefits for the services of any medical practitioner, and in that benefits for nursing services do not cover the services of physicians. The nurse midwife is supposed to be an alternative to the physician for some services in connection with pregnancy and childbirth.

There is no good reason that everyone who takes out an insurance policy which provides hospital, nursing, medical, or surgical benefits should also have to purchase maternity benefits, whether that person wants to pay for maternity benefits or not. Maternity coverage is now available from many insurers for those who wish to pay for the coverage.

Section 6 of the bill mandates maternity benefits for services or nurse midwives in subscribers' contracts. If the Blues want to accept this, that is alright with us. All we want to make sure of in connection with the Blues are not also required to do.

Attached is my redraft of Sections 2 through 8 of the bill. What my redraft says is that if a policy or a subscribers' contract or fraternal benefit society certificate provides benefits for a physician's services in connection with pregnancy or childbirth, benefits shall not be denied when the services are performed by a certified nurse midwife if the services are within the scope of the nurse midwife's certification.

Whenever I have mentioned "certificates" I have done so only in connection with a fraternity benefit society, because we must be careful not to use the word "certificate" in a way in which it can be interpreted to refer to an individual's certificate under a group disability insurance policy.

We need some lead time which I have provided for us. We also should avoid having the state interfere with previously issued policies, but (to be realistic) I have included a provision affecting previously issued group policies under certain circumstances.

The ACLI's position, I believe, is the same as ours on this bill.

Sincerely,

Charles D. Kuhnen
Counsel

State Medical Board
c/o Jeffrey A. Partnow, M.D.

SUBJECT: Lay Midwifery

Dear Jeff,

In recent months the members of the Department of OB/GYN and Pediatrics have become aware of at least one person, calling herself a lay midwife, soliciting deliveries to take place in the patient's home. We have checked into the legality of this situation, that is, lay midwifery, and find that the State Statutes are deficient in this regard, that is, it is currently illegal for a certified nurse midwife or even a physician to practice in any manner, including attendance at home deliveries unless they are appropriately licensed. Since the subject of lay midwifery is not covered at all, it is apparently the opinion of the Attorney General's office that it is not illegal for someone to label themselves a lay midwife and provide care for home deliveries. We feel that this situation is inappropriate and that someone, i.e., the State of Alaska, should spell out the necessary conditions under which a lay midwife may be defined and may practice. To ignore this problem is to condone its existence. We would, therefore, recommend that a bill be drawn up using the outline provided below to rectify the situation. Senator Don Bennett has stated that he would be willing to sponsor such a bill if it was recommended by the Medical Board.

AN ACT RELATING TO LAY MIDWIFERY

PROBLEM: The lack of a statute providing for licensure of lay midwives.

GOAL: The purpose of this bill is to prevent unqualified persons from misleading the public by providing for the licensure of lay midwives.

DEFINITION: In this bill the word "physician" shall mean a person with an M.D. or a D.O. degree.

DEFINITION: A lay midwife is a person who engages in planned attendance and/or assistance at delivery of a baby wherever the delivery may occur and whether for fee or other consideration. This definition applies only to those persons who are not otherwise licensed as a physician or as a nurse midwife under current statute.

PROVISION I: In order to be licensed in the State of Alaska a lay midwife must have a supervisory-consultative relationship with a licensed physician who must ascertain that the lay midwife has appropriate qualifications and training.

PROVISION II: The supervisory physician must have staff privileges in the OB/GYN Department of the hospital or other medical facility to which a patient with complications would be referred.

PROVISION III: The supervisory physician or another physician of his designation must be available for consultation at all times by the lay midwife.

PROVISION IV: The application for licensure must include the following:
1. The name and address of the supervisory physician.
2. The physician shall state that the applicant is qualified to practice lay midwifery.
3. The application shall include a brief description of the method of supervision and the mechanism for consultation.
4. The institution in which the physician has privileges must be listed.

PROVISION V: A fee should be established payable to the Department of Commerce, and the length of the licensure period and the date of its expiration should be spelled out.

PROVISION VI: Practice of lay midwifery as defined, without a current license, is an offense punishable by--(the same provision should be used here as would apply for a nurse practicing without a license.)

The undersigned staff members of Fairbanks Memorial Hospital concur in recommending that such a bill be drawn up as soon as possible.

Midwives

[redacted] 802, by Reps. McKinnon, Rogers and Phillips. Amends AS 18.20 (Hospitals) by addition of new section which prohibits the issuance of a license to a hospital which doesn't per nurse practitioners, certified as nurse midwives in accordance with state regulations, to practice as nurse midwives in the hospital. Amends AS 21.42 (The Insurance Contract) by adding new section which requires all individual and group health insurance policies providing coverage on an expense-incurred basis, and al individual and group service or indemnity contracts issued by a nonprofit corporation, to provide that the health insurance benefits applicable to maternity shall be payable for maternity services furnished by certified nurse midwives. Amends AS 21.51 (Disability Insurance Policies) by adding new section which requires disability policies issued or delivered in state to provide indemnity in reasonable amount for cost of maternity service furnished by certified nurse midwives. Amends AS 21.54 (Group & Blanket Disability Insurance) by adding a new section with above effect. Amends AS 21.8- (Fraternal Benefit Societies) by adding

HB 802

new section which requires certificate or other evidence of a contract of health insurance issued or delivered by a society in state to provide indemnity for nurse midwife services. Amends AS 21 87 (Hospital & Medical Service Corporations) by adding new section outlining nurse midwife services that must be furnished by medical service corporations, hospital service corporations, or combined medical and hospital service corporations. Adds "nurse midwife" to definition of "participant physician" under AS 21.87.330(8) and adds definition of "nurse midwife" (registered professional nurse who is certified as an advanced nurse practitioner under AS 08.68410(9) and authorized to practice as a nurse midwife under regulations adopted in accordance with AS 08.68.410(5)). Does not provide for effective date.

Nurse Midwives (SUBSTITUTE offered)

HOUSE BILL NO. 802, [redacted]. Reported back to the House by HESS with a majority recommending replace with a SUBSTITUTE and that it do pass. Not concurring: Chatterton has no recommendation. The substitute deletes provisions added in the original bill relating to disability policies issued or delivered in the state to provide indemnity in reasonable amount for cost of maternity services furnished by certified nurse mudwives. Deletes proposed amendment to Group and Disability Insurance relating to the same. Deletes provisions which called for certificate or other evidence of a contract of health insurance issued or delivered by a society in state to provide indemnity for nurse midwive service. Deletes section which added provisions outlining nurse midwife services that must be furnished by medical service corporations, hospital service corporations, or combined medical and hospital service corporations. The substitute adds "nurse midwife" to the definition of "physician" under AS 21.87 (Insurance. Hospital and Medical Service Corporations.) Adds section 21.42.347 (Coverage for Cost of Services Provided by Nurse Midwives) to AS 21.87.340(15) (Hospital and Medical Service Corporations. Other provisions applicable). To Rules.

CS HB 802

rse Midwives

COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 802 (Amended), (see pages 238,435, and bills passed in the House, this report). Received in the Senate on April 1 and referred to HESS, then to Judiciary.

(4) the society has a board of directors charged with the responsibility for managing its affairs in the interim between meetings of its supreme legislative or governing body, subject to control by the body and having powers and duties delegated to it in the constitution or laws of the society;

(5) the board of directors is elected by the supreme legislative or governing body, except in case of filling a vacancy in the interim between meetings of the body;

(6) the officers are elected either by the supreme legislative or governing body or by the board of directors; and

(7) the members, officers, representatives or delegates may not vote by proxy. (§ 1 ch 120 SLA 1966)

Sec. 21.84.596. Other provisions applicable. In addition to the provisions contained in this chapter, other chapters and provisions of this title shall apply to fraternal benefit societies, to the extent applicable and not in conflict with the express provisions of this chapter and the reasonable implications thereof, as follows:

Settlements. A settlement made under a motor vehicle policy of a claim against an insured arising from an accident or other event insured against or destruction of property owned by another is not to be construed as an admission of liability by the

assume all duties and ... incurred by the Health Care ... Joint Underwriting Association ... declaration of invalidity; and ... that if the requirement that health ... providers purchase medical ... insurance from the Medical ... Corporation of Alaska is found ... secs. 41, 42, 43, and 44 of this ... void; however, the Medical ... Corporation of Alaska and the ... Care Providers Joint Underwriting ... shall continue to discharge and ... to pay claims incurred before the ... of invalidity."

This chapter on its face limits "covered claims" to those asserted by claimants or insureds. White v. Alaska Ins. Guar. Ass'n, Sup. Ct. Op. No. 1813 (File No. 3796), 592 P.2d 367 (1979).

The word "claimant" refers to the insured or a third party victim who may be entitled to reimbursement for injury or damage which under the terms of the policy triggers the insurer's obligation to pay benefits. White v. Alaska Ins. Guar. Ass'n, Sup. Ct. Op. No. 1813 (File No. 3796), 592 P.2d 367 (1979).

The word "insured" classically refers to a person whose risk of economic loss of a designated type is part of the subject matter of the contract. White v. Alaska Ins. Guar. Ass'n, Sup. Ct. Op. No. 1813 (File No. 3796), 592 P.2d 367 (1979).

The insured is the person who places his name in a blank on the policy form following the words "does insure" or some phrase of similar import. White v. Alaska Ins. Guar. Ass'n, Sup. Ct. Op. No. 1813 (File No. 3796), 592 P.2d 367 (1979).

Noncompensable claims. — Claims by law firms, attorneys, and insurance adjusters for professional services rendered to insolvent insurance companies are not compensable from the coffers of the Alaska Insurance Guaranty Association. White v. Alaska Ins. Guar. Ass'n, Sup. Ct. Op. No. 1813 (File No. 3796), 592 P.2d 367 (1979).

Law firms, attorneys, and insurance claims adjusters who were retained by insolvent insurance companies to adjust, settle, and defend claims and lawsuits against policyholders of automobile liability insurance, did not fit into the category of "insured" or "claimant" and thus could not invoke the protection of the "covered claims" clause of this chapter. White v. Alaska Ins. Guar. Ass'n, Sup. Ct. Op. No. 1813 (File No. 3796), 592 P.2d 367 (1979).

Sec. 21.80.190. Title. This chapter may be known and cited as the Alaska Insurance Guaranty Association Act. (§ 1 ch 121 SLA 1979)

Chapter 87. Hospital and Medical Service Corporations.

(b) Repealed by § 25 ch 245 SLA 1970.

(c) Repealed by § 25 ch 245 SLA 1970.

(d) Repealed by § 25 ch 245 SLA 1970. (§ 1 ch 120 SLA 1966; am § 25 ch 245 SLA 1970)

Effect of amendment. — The 1970 amendment repealed subsections (b), (c) and (d).

Legislative committee report. — Chapter 245, SLA 1970 (HCSSB 399 am H), was identical to CSHB 406 (Jud.). For report on CSHB 406 (Jud.), see 1970 House Journal Supplement No. 6.

Sec. 21.42.120. Filing, approval of forms.

Stated in Stordahl v. Government Employees Ins. Co., Sup. Ct. Op. No. 1422 (File Nos. 2988, 3130), 564 P.2d 63 (1977).

Sec. 21.42.130. Grounds for disapproval.

The supreme court has urged the director of insurance to encourage the use of clearer language in all policies, both to assist the insured in purchasing insurance and to avoid the necessity of litigation in our courts. Stordahl v. Government Employees Ins. Co., Sup. Ct. Op. No. 1422 (File Nos. 2988, 3130), 564 P.2d 63 (1977).

Sec. 21.42.230. Construction of policies.

Insurance policies are to be looked upon as contracts of adhesion for the purpose of determining the rights of the parties thereto. In so construing a policy the supreme court does not require as a condition precedent that ambiguities be found in the policy language. All that is required is that the parties be of such disproportionate bargaining power that the insured could not have negotiated for variations in the terms of the standard policy. Thus, the finding that a policy is a contract of adhesion depends not upon its language, but upon the relationship of the parties. The result of such a finding is that the policy is construed so as to provide that coverage which a layman would reasonably have expected given his lay interpretation of the policy's terms. Continental Ins. Co. v. Bussell, Sup. Ct. Op. No. 810 (File No. 1517), 498 P.2d 706 (1972).

Stated in Stordahl v. Government Employees Ins. Co., Sup. Ct. Op. No. 1422 (File Nos. 2988, 3130), 564 P.2d 63 (1977).

Sec. 21.42.345. Required provision for coverage for newly born children. All individual and group health insurance policies providing coverage on an expense incurred basis and individual and group service or indemnity type contracts issued by a nonprofit corporation which provide coverage for a family member of the insured or subscriber shall, as to the family members' coverage, also provide that the health insurance benefits applicable for children shall be payable with respect to a newly born child of the insured or subscriber from the moment of birth. The coverage for newly born children shall consist of coverage of

payment of a specific premium or subscription fee is required to provide coverage for a child, the policy or contract may require that notification of birth of a newly born child and payment of the required premium or fees must be furnished to the insurer or nonprofit service or indemnity corporation within 31 days after the date of birth in order to have the coverage continue beyond the 31-day period. The requirements of this chapter shall apply to all insurance policies and subscriber contracts delivered or issued for delivery in this state more than 120 days after the effective date of this Act. (§ 1 ch 95 SLA 1975)

Sec. 21.42.360. Definitions.

Repealed by § 11 ch 165 SLA 1976.

Cross reference. — For present provision defining "policy" and "premium," see AS 21.90.110.

Editor's note. — The repealed section derived from § 1, ch. 120, SLA 1966; § 1, ch. 33, SLA 1970.

Sec. 21.42.370. Separate accounts. (a) A domestic life insurance company may, after adoption of a resolution by its board of directors, establish one or more separate accounts, and may allocate to them the amounts paid to the company which are to be applied under the terms of an individual or group contract to provide annuity benefits, which may also provide other incidental benefits payable in fixed or in variable dollar amounts or in both.

(b) Notwithstanding any other provision of law, a domestic life insurance company which establishes one or more separate accounts as provided in (a) of this section may provide to the holders of interests in a separate account voting rights with respect to the management of that separate account and the investment of its assets, may establish for the separate account a committee, board or other body, the members of which (1) may be elected solely by holders having voting rights, and (2) may or may not be otherwise affiliated with the life insurance company, and may provide for compliance with any applicable state and federal law in order that contracts assigned to separate accounts may be lawfully sold or offered for sale. If so provided in the applicable contract, the assets in a separate account may not be chargeable with liabilities arising out of any other business of the company.

(c) When the reserve liability of a life insurance company with regard to (1) benefits guaranteed as to amount and duration, and (2) funds guaranteed as to principal amount or stated rate of interest is maintained in a separate account, a portion of the assets of the separate account at least equal to the reserve liability shall be invested in accordance with the law governing the investments of life insurance companies. All other amounts allocated to and accumulations on each account may be invested and reinvested in any class of investment

Title 24 Supplement

of court. The injunction proceeding is in addition to other penalties and remedies provided in this chapter. (art VIII ch 90 SLA 1957)

Article 5. General Provisions.

Section
100 Exceptions to application of chapter
110 Definitions

Sec. 08.68.100. Exceptions to application of chapter. (a) This chapter does not apply to

(1) a qualified nurse licensed in another state employed by the United States Government or a bureau, or agency, or division of the United States Government while in the discharge of his official duties;

(2) nursing service given temporarily in the case of a public emergency or disaster;

(3) the practice of nursing by a student enrolled in a nursing education program accredited by the board when the practice is in connection with the student's course of study; or

(4) the practice of nursing by a nurse enrolled in an approved refresher course.

(b) For purposes of this section the word "nurses" includes professional and practical nurses, and "nursing" means professional and practical nursing. (art IX ch 90 SLA 1957; am § 10 ch 129 SLA 1974)

Effect of amendment. — The 1974 amendment added paragraph (4) to subsection (a).

Sec. 08.68.110. Definitions. As used in this chapter

(1) "board" means the Board of Nursing;

(2) "licensed professional nurse" is equivalent to the common term registered nurse;

(3) "licensed practical nurse" is equivalent to the title licensed vocational nurse;

(4) "practical nursing" also means vocational nursing;

(5) "practice of professional nursing" means the performance for compensation of observation, care and counsel of the ill, injured, or infirm, or the maintenance of health or prevention of illness of others, the supervision and teaching of personnel; or the administration of medications and treatments prescribed by a licensed physician or dentist that require substantial specialized judgment and skill based on knowledge and application of the principles of biological, physical, and social science, but the foregoing do not include acts of medical diagnosis or the prescription of medical therapeutic or corrective measures unless authorized by regulations promulgated jointly by the State Medical Board and the Board of Nursing and as implemented by the Board

(6) "practice of practical nursing" means the performance for compensation of selected acts in the care or prevention of illness, and in the care of the ill, injured, or infirm under the direction of a licensed professional nurse or a licensed physician or a licensed dentist not requiring the substantial specialized skill, judgment and knowledge required in professional nursing;

(7) an "accredited nursing education program" is a program having curricula and standards which meet the requirements established by the board;

(8) "endorsement" is the licensing or registering of an applicant without examination through the acceptance of a license or registration issued by any state or territory after a comprehensive examination which is equivalent to the examination offered in this state, and providing the applicant meets all other qualifications required by law;

(9) "advanced nurse practitioner" means a registered professional nurse who by virtue of specialized education and experience, has become certified to perform acts of medical diagnosis, and prescription of medical, therapeutic or corrective measures as authorized by regulations promulgated under (5) of this section. (§ 2 ch 90 SLA 1957; am § 5 ch 37 SLA 1970; am § 3 ch 67 SLA 1973; am §§ 11, 12 ch 129 SLA 1974)

Effect of amendments. — The 1973 amendment added the language beginning "when authorized" to the end of paragraph (5).

The 1974 amendment substituted "state or territory" for "state, territory, or foreign country" near the middle of paragraph (8) and added paragraph (9).

Position Paper: CS H.B. 802 a.m. - "An Act relating to nurse midwives"

Dear Senator Hackney:

Recently, the House passed CS H.B. 802 a.m., "An Act relating to health care services and the coverage of the services of nurse midwives under the insurance laws of the state and clarifying the definition of physician under AS 21.87."

On March 5, 1980 we sent you a copy of our position on this bill. The original of the letter had been sent to Representative Buchholdt. Although the House did amend the original bill and delete some sections that we had objections to, we still have some concerns.

1. Section 4 - AS 21.87.330 (9), which defines "physician" also includes nurse midwives. Nurse midwives are not physicians. They do, in fact, have to work under the supervision of a physician, and then, only if the hospital by-laws permit it.

   Section 3 - AS 21.87.330 (8) also refers to nurse midwives as participant physicians. We feel that to include midwives, as well as chiropractors and optometrists, as physicians is very misleading and should be re-defined accordingly.

2. As nurse midwives are currently allowed to practice under the supervision of a physician in many health care service institutions, we don't see the necessity for passage of this bill. Being under the supervision of a physician, a midwive's services in a maternity case should be covered by existing health insurance plans.

We would appreciate your consideration of these comments. If you need further clarification, please feel free to contact us at any time.

Sincerely,

Al M. Camosso
Administrator

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

COMMITTEE SUBSTITUTE FOR HOUSE BILL NO 802 am

"An Act relating to health care services and the coverage of the services of nurse midwives under the insurance laws of the state and clarifying the definition of physician under AS 21.87."

CSHB No. 802 am requires the coverage of nurse midwives' practice under those health and disability insurance policies that pay for maternity care, and adds nurse midwife services to the list of medical services provided to persons eligible for Medicaid. The Bill also amends the definition of "participant physician" to include the nurse midwife and adds a new paragraph defining "nurse midwife" to the Alaska Statutes.

The Department of Health and Social Services will limit its comments to the areas of the practice of the nurse midwife and coverage of these services under the State Medicaid Program. It is our understanding that the Department of Commerce and Economic Development, Division of Insurance, has commented separately on the section dealing with mandatory insurance coverage.

Practice of Nurse Midwives

Nurse midwives have been a part of the American health care system for over fifty years. The practice of nurse midwifery, including the management of labor and delivery, is recognized in the laws of all states except Kansas, Michigan, and Wisconsin. The typical recent graduate of a nurse midwifery educational program has six years of professional nursing experience and a bachelor's degree in addition to nine months to two years of midwifery training. Upon successful completion of the course and a national certification examination, the nurse midwife is prepared to care for women's health needs, including normal childbirth and uncomplicated gynecological and family planning services.

The nurse midwife according to Alaska law collaborates with a physician. Nationally, nurse midwives are employed by hospitals, public health agencies, private physicians, the military, prepaid health plans, and birthing centers. Their practice typically extends beyond pregnancy and birth to include the post-partum care of the well woman and neonatal care of the infant. Health education is a vital component of the nurse midwife's role.

The use of nurse midwives can offer greater availability of quality prenatal care, delivery, and post-natal care in medically underserved areas. As a member of the health care team, the nurse midwife can provide professional care to the normal obstetrical or postpartum patient, freeing her collaborating physician to concentrate on patients with problems requiring medical expertise. An expanded use of nurse midwives also can offer an alternative style of care to families at a special time in their lives. The desire of certain families for such an alternative may partially account for the apparent increase in home deliveries, a practice which involves increased risk to mother and baby.

POSITION PAPER/Department of Health & Social Services

Medicaid Coverage of Nurse Midwives

Federal regulations permit the expansion of covered services under Medicaid to include qualified nurse midwives as defined in the amended Committee Substitute for HB No. 802. The Department of Health and Social Services supports the inclusion of nurse midwives under the list of covered medical services, and expects no resulting additional cost to the State.

Department Position

The Department of Health and Social Services recognizes the valuable contribution that nurse midwives can make to the overall physical and emotional health of the family at time of pregnancy and delivery. We would encourage hospitals to provide staff privileges to well-qualified nurse midwives who meet the requirements of the Advanced Nurse Practitioner Guidelines issued by the Alaska Board of Nursing. We endorse coverage of nurse midwife services under Medicaid.

Senator Glenn Hackney,
Chairman, Senate HSS Committee
Pouch V, M/S 3100
Juneau, AK 99811

Dear Senator Hackney:

You will be addressing HB 802, relating to nurse-midwives. The bill poses a problem for us.

It appears that many women desire delivery by nurse-midwives, and it is highly probable that well-trained midwives are perfectly capable of performing uncomplicated deliveries.

You will be receiving a longer letter from us dealing with the social problems we expect to result from the admission into the practice of medicine of a seemingly limitless supply of non-physicians, specifically dealing with how many medical practioners society can be expected to support.

The nurse-midwife is the leading edge. Such individuals are governed by the Advanced Nurse Practioner regulations which are in many regards nearly identical to the PA regulations. We have no serious doubt that HB 802 will provide a precedent for nurse practioners in general and PA's to demand essentially independent practice, fee for service, access to third party payers, including government sources, and equal access to hospital facilities.

Our perception is that the general public does not know this, would not desire it, cannot afford it and would be ill-served by it. This is a position our detractors will call self-serving. We can therefore only hope that those in the Legislature with vision and concern for the future quality of their own medical care will give careful consideration to the potential problems we can expect with passage of HB 802.

Sincerely,

[illegible]

March 17, 1980

Honorable Glenn Hackney
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

This letter is in reference to House Bill #802. I am writing to you because I would be directly affected by this bill as I am a practicing obstetrician-gynecologist with staff privileges at the Fairbanks Memorial Hospital and in active private practice at the Tanana Valley Medical-Surgical Clinic. I am urging you to defeat this bill because -

1) it would permit the independent practice in the hospital of a nurse without requiring supervision by an appropriate qualified physician. This would be unwise and would also be contrary to current regulations, as applied to supervision of physician extenders.

2) as worded, the bill would unnecessarily require the presence of a nurse mid-wife where there may be no need; for instance, in hospitals which do not have an obstetrical service and perhaps in Outpatient clinics, depending on how one interprets the bill.

3) if strictly interpreted, the bill would place sanctions against those institutions which do not have a nurse mid-wife even if a nurse mid-wife was not needed and if one was not available. This is clearly unwise.

4) this bill is unnecessary because nurse mid-wives are currently permitted to practice in Alaska's hospitals and the regulations governing the setting for their practice, with appropriate physician supervision, is already covered by statute.

An additional subject, which I would like to bring to your attention along these lines, is that the state law is deficient in the areas of non-medically qualified practitioners of health care. I am specifically referring to the independent practice of "lay mid-wives" in Anchorage and Fairbanks and perhaps in other areas of the state as well. The term "lay mid-wife" refers to a person who is not a physician and not a trained nurse and these persons may, in fact, have no training at all. At the present time there is no regulation prohibiting them from practicing medicine and this is an extremely dangerous condition. At the present time in Fairbanks, there is at least one "lay mid-wife" who is soliciting mothers for home deliveries. It is my strong opinion that home deliveries are unwise and can unnecessarily jeopardize the health of the mothers and babies, especially so when the attendant is not trained to handle emergencies which frequently arise. The health of the public is especially jeopardized by the fact that under current statute the State of Alaska has no control over these persons' qualifications or lack of qualifications, whereas a physician or registered nurse or even a completely trained mid-wife is prohibited from this same activity if they are not appropriately licensed in the state. I am sure you will agree that this is an absurdity and an oversight which should be corrected as soon as possible. I urge you to help correct this situation and offer my services, as well as those of the Department of Obstetrics and Gynecology at Fairbanks Memorial Hospital towards the end of drafting appropriate legislation.

Thank you very much for your time and consideration.

Sincerely,

Ralph A. Wells, M.D.
Obstetrics & Gynecology

Suggested Revisions to Alaska HB 802

Strike everything after Section 1 and substitute the following:

Sec. 2. AS 21.42 is amended by adding a new section to read:

Sec. 21.42.347. SERVICES OF NURSE MIDWIVES. Notwithstanding the provisions of an individual or group disability insurance policy, subscriber's contract, or fraternal benefit society certificate, which policy or subscriber's contract or fraternity benefit society certificate provides benefits for physicians' services in connection with pregnancy or childbirth, benefits shall not be denied because any such service is performed instead by an advanced nurse practitioner, certified to practice as a nurse midwife in accordance with regulations adopted under AS 08.68.410(5), provided the service performed is within the lawful scope of practice of the nurse midwife under such certification.

Sec. 3. AS 21.84.590 is amended by adding a new item to read:

(10) AS 21.42.347

Sec. 4. AS 21.87.340 is amended by adding a new item to read:

(17) AS 21.42.347

Sec. 5. Sections 2 through 4 of this act apply to any such individual or group policy, subscriber's contract, or fraternity benefit society certificate which is delivered in this state on or after January 1, 1981; and to any such group policy, subscriber's contract, or fraternity benefit society certificate delivered in this state before that date when, on or after that date, either the benefits are amended or the applicable collective bargaining agreement, if any, expires, whichever occurs later.

The Honorable Patrick Rodey,
Alaska State Senator
Room 427 Capitol Building
Juneau, Alaska

Dear Senators Ferguson and Rodey:

I spoke to you the other day about the Indian Child Welfare Act (P.L. 95-608, 92 Stat. 3069) which became effective May 7 last year. No doubt the intent was great, but the difficulty the bill addresses is a non-problem in this day and age. The Act also has the following citation: 25 U.S.C.A. 1901 et seq.

Ordinarily, in adoption proceedings, the adoptive parents are well motivated and are not dealing in a "hot baby" market. The complications and barricades that the federal Act places in the way tend to discourage, not promote, adoption of Native children.

You can read, if you're so inclined, the names, dates, places etc. on the legal documents; please don't; they have no relevance.

Regards,

Robert H. Ziegler, Sr.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

OFFICE OF THE COMMISSIONER / *POUCH H 01 – JUNEAU 99811*

APR 2 7 1979

The Honorable Robert Ziegler
Alaska State Senate
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Ziegler:

The Indian Child Welfare Act was signed into law in November, 1978. The regulations implementing this law are scheduled for completion sometime in June. Due to the significant impact this law will have on the Department's operations, I wanted to take this opportunity to give each of you a brief summary of the Department's activities regarding its implementation and a review of some of the most significant changes which will result from its passage.

The Department has been quite involved in the developments concerning the implementation of this Act in Alaska. As recently as March 7th, one of my staff and a member of the Attorney General's Office testified at a hearing concerning the proposed federal regulations. In addition, Department representatives have met with the Bureau of Indian Affairs and with various native non-profit organizations to discuss and plan the process of implementation. Further meetings with these organizations are planned and the Department is in the process of developing agreements with some of the organizations.

In relation to specific change, the Indian Child Welfare Act does alter existing procedures for both adoptions and foster child placements of native children. The area of adoptions is addressed in Sec. 103 of the Indian Child Welfare Act. This section requires voluntary relinquishments of the parental rights of parents of native children to be "executed in writing and recorded before a judge's certificate that the terms and

D-F38LH

consequences of the consent were fully explained in detail and were fully understood by the parent or Indian custodian." Presently, the Division of Social Services' procedures is that "if there is no active child in need of aid case before the court, the relinquishment may be taken before a social service worker of the Department." In addition, Sec. 103 mandates that "any consent given prior to, or within ten days after birth of the Indian child shall not be valid." Once again this will result in significant change for the Division of Social Services. The Division's policy, as stated in the manual, is that "a relinquishment may not be taken prior to 48 hours following the birth of a child." Finally, Sec. 103 states that "the consent of the parent may be withdrawn for any reason at any time prior to the entry of a final decree of termination of adoption, as the case may be, and the child shall be returned to the parent." Under present Alaskan statutes, the parents have 10 days to withdraw the relinquishment. After the 10 day period, the parents must show good cause for withdrawing consent.

In regard to foster placement, the Indian Child Welfare Act addresses both custody proceedings (Sec. 102) and placement (Sec. 105). In Sec. 102(d) the Act states that "any party seeking to effect a foster care placement, or termination of parental rights to an Indian child under state law, shall satisfy the court that active efforts have been made to provide remedial services and rehabilitative programs designed to prevent the break-up of the Indian family and that these efforts have proved successful." The Act goes on to state in Sec. 102(e) that "no foster care placement may be ordered in such proceedings in the absence of a determination supported by clear and convincing evidence, including testimony of qualified expert witnesses, that the continued custody of the child by the parent or Indian custodian is likely to result in serious emotional or physical damage to the child." The standard of proof that the Indian Child Welfare Act establishes for foster placements is higher than present state law. Under present law a preponderance of the evidence is required and there is no requirement for testimony from expert witnesses.

Sec. 105(b) of the Act establishes an order of preference for placement of native children: (1) a member of the child's extended family; (2) a foster home licensed or approved by the Indian child's tribe; (3) an Indian foster home licensed or approved by an authorized non-Indian licensing authority; or (4) an institution for children approved by an Indian tribe or operated by an Indian organization which has a program suitable to meet the Indian child's needs. The Division's policy now in effect requires workers to give consideration to placement with relatives before exploring other alternatives. This Act, however, states that "a preference shall be given in the absence of good cause to the contrary" to the order of placement delineated above. To accomplish this the Department and the native organizations in the state must develop ongoing cooperative efforts, particularly in the area of the finding and licensing of foster homes.

These are just a few of the changes which will result from the Indian Child Welfare Act. There are many other anticipated changes in the area of court proceedings. Due to the fact that the federal regulations have not been published, the Department cannot determine the total impact of this Act. The Department is working with the Attorney General's Office to develop an implementation plan. - JOHN

Helen D Beirne

Helen D. Beirne
Commissioner

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF INDIAN AFFAIRS
Juneau Area Office
P. O. Box 3-8000
Juneau, Alaska 99802

JUN 1979
RECEIVED

June 12, 1979

Dear Alaska Bar Member:

RE: Indian Child Welfare Act (25 U.S.C.A. 1901 et seq.)

The Alaska Supreme Court has permitted the United States Bureau of Indian Affairs (BIA) to include this informational letter in this mailing.

We wish to advise you that the Indian Child Welfare Act (P.L. 95-608, 92 Stat. 3069) became effective on May 7, 1979. All child custody proceedings initiated in State courts after that date must be conducted under the procedures set out in the Act. These include specific consent requirements for voluntary foster care, termination of parental rights, preadoptive placement and adoptive placement as well as certain notice requirements and preferences for placement of Indian children in involuntary "child custody proceedings" as defined in the Act. The Act pertains to all State courts proceedings involving Indian children, except custody disputes between biological parents and juvenile delinquency proceedings.

Bureau of Indian Affairs offices throughout the country are beginning to receive inquiries concerning the meaning of the Act, frequently in regard to a specific proceeding or situation. The Act covers any child who is a member of a tribe or who is the son or daughter of a tribal member and who is eligible to be a member. Many inquiries involve efforts to determine whether a particular child meets these requirements. In Alaska, such questions should be referred to the Alaska Area Director for the Bureau of Indian Affairs at the above address.

Other inquiries pertain to the criteria and requirements which the Act imposes on State court proceedings. With the exception of enrollment matters, these questions usually involve legal determinations that are best made by attorneys. Questions of this nature, if addressed

to the BIA Area Office, will generally be referred to our solicitors for a legal opinion and, of course, are always subject to clarification by the courts.

Finally, you should be aware that the Department has published proposed rules for the implementation of the Indian Child Welfare Act and recommended guidelines for State courts in the handling the Indian child custody proceedings. These proposed regulations may be found at 44 Fed. Reg. 23992 (April 23, 1979). Final regulations are expected to be published in the near future in the Federal Register. Because this legislation and these regulations will have a significant impact on Indian child custody proceedings in Alaska, we are sure that those of you representing clients in such proceedings will want to fully acquaint yourselves with the Act and its impact.

Once again, I wish to express my appreciation to the Supreme Court for permitting the Bureau of Indian Affairs to include this letter in the Court's regular mailings.

Sincerely yours,

Clarence Antioquia
Area Director

No. 1KE [redacted]

PETITION FOR LEAVE TO ADOPT

Comes now [redacted] and respectfully represents to the Court:

I

Your petitioner and [redacted] formerly [redacted] were married in Reno, Nevada, on August 18, 1978. Both are over the age of twenty-one (21) years, and both are bona fide residents of [redacted] Alaska.

II

Your petitioner desires to adopt [redacted] who was born in [redacted] California, on November 10, 1969, unto [redacted] and [redacted], his then wife.

III

The said minor child is now in the custody of petitioner herein in [redacted] Alaska, and within the jurisdiction of this Court, and has been in his custody and has resided at the home of petitioner and his wife, the mother of said child, since the marriage of the parties. The father of said child is [redacted]

Phone (907) 225-4145
307 Bawden Street
Ketchikan, Alaska 99901

[redacted] from whom petitioner's wife was divorced in Ketchikan, Alaska, on September 2, 1976.

IV

Your petitioner's name is [redacted]; his age is thirty (30) years. He has lived in [redacted] Alaska, all of his life.

V

The said [redacted] the mother of the said minor child, consents to her adoption by petitioner above named and has executed her written consent to such adoption, which has already been filed with the Court.

VI

Petitioner alleges that [redacted] the mother of said minor child, joins in this petition only for the purpose of giving her consent to this adoption and, by executing a consent herein, does recommend the granting of said adoption, retaining, however, all of her maternal rights as the mother of said minor child.

VII

The minor child to be adopted herein has no assets or any other thing of value in her own name other than a savings account in the [redacted] California; the amount on deposit is approximately Two Thousand One Hundred Fifty ($2,150.00) Dollars; the birth certificate of said minor child has already been filed with this Court.

VIII

[redacted] the biological father of said minor child, has indicated that he will consent to this adoption. It is anticipated that said parental consent will be filed herein by the time this matter comes on for hearing.

IX

The said [redacted] is in all respects a fit and

Hundred Fifty ($2,150.00) Dollars; the birth certificate of said minor child has already been filed with this Court.

VIII

That [redacted] the biological father of said minor child, has consented to her adoption by petitioner above-named and has executed his written consent to such adoption, which is on file with this Court.

IX

That petitioner's wife, [redacted] and said [redacted] have been fully advised as to the provisions of the Indian Child Welfare Act (P.L. 95-603, 29 Stat. 3069); the parental consents on file herein acknowledge that their rights have been fully explained to them, that any and all such rights have been waived and that the right of tribal intervention was likewise waived.

X

That the said [redacted] is in all respects a fit and proper person to adopt said minor child, financially and otherwise, and is able to care for, maintain, and support the said minor child, and that it will be for the best interests of the said minor child that she be adopted by said petitioner, and that her name be changed to [redacted]

And the Court being satisfied with the identities and relations mentioned herein, and that said petitioner is of sufficient ability in all respects, and is a fit, proper and suitable person to bring up said minor child, and to furnish her with suitable nurture and education; that it is fit and proper for said adoption to take place; that all the requirements of law applicable to adoptions having been met and fully complied with, and no objections having been filed or made by anyone to said adoption; and the Court being fully advised in the premises.

ZIEGLER, CLOUDY, SMITH, KING & BROWN
Phone (907) 225-4145
307 Bawden Street
Ketchikan, Alaska 99901

IT IS HEREBY ORDERED, ADJUDGED, AND DECREED:

1. That the petition of [redacted] for leave to adopt [redacted] as his child be granted, and that he is authorized to take said minor child as his own child, and to give her such nurture, care and education as is meet and proper.

2. That from this date henceforth the said minor child shall, to all legal intents and purposes, be the child of the above-named petitioner, and shall be treated by him in all respects as his own lawful child should be treated, including the right of his inheritance, and that said petitioner and said minor child shall bear toward each other the relationship of parent and child.

3. That from this date henceforth, the name of [redacted] shall be, and the same hereby is declared to be, [redacted]

Dated at Ketchikan, Alaska, this 28th day of October, 1979.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

CS FOR HOUSE CONCURRENT RESOLUTION NO. 43

"A resolution endorsing the concept and requesting implementation of the Indian Child Welfare Act of 1978."

Committee Substitute for House Concurrent Resolution No. 43 resolves that: 1) the legislature endorse and support the concept and policy of the Indian Child Welfare Act of 1978 (P.L. 95-608); 2) urgently requests the Governor to direct the Department of Health and Social Services to promptly take the steps necessary for implementation of the Act in Alaska and provide the financing necessary for this implementation; and 3) requests the Chief Justice of the Alaska Supreme Court to direct the court system to promptly take steps necessary to cooperate in the implementation of the Act.

The Department strongly supports the concepts and policies embodied in the Indian Child Welfare Act of 1978 and, therefore, supports the legislature's endorsement and support of the Act. The Department has been actively involved in implementing the Act since its passage in November, 1978. During calendar year 1979, the Department has taken numerous steps towards full implementation of the Act (report attached). The Department plans to increase its efforts during 1980 through close coordination with the various Indian Child Welfare programs established under Title II of P.L. 95-608 and recently funded by the Bureau of Indian Affairs, and through close monitoring and evaluation of its own programs to ensure compliance with the Act.

APPROVED BY: Helen D. Beirne DATE: 3-3-80
Helen D. Beirne, Commissioner
Department of Health and Social Services

REPORT ON IMPLEMENTATION OF THE INDIAN CHILD WELFARE ACT

The Department of Health and Social Services has been quite active since the passage of the Indian Child Welfare Act in working towards full implementation. As early as February 13, 1979 Department representatives met with the Area Director of BIA and representatives from various native non-profit corporations to begin mapping out strategies and procedures necessary for implementation. In early March Department Representatives met with the BIA contractors to further discuss implementation. On March 7, 1979 the Department testified at hearings held in Juneau regarding the first draft of federal regulations (testimony attached). These regulations were finally published as proposed regulations on April 23, 1979 and were not finalized until July of 1979.

During this interim period before finalization of the implementing regulations the Department's Regional Social Services Managers met with representatives of the native non-profit organizations as well as various village and IRA council leaders to discuss the Act and to begin informal working procedures. The Managers also met with court personnel and the attorney general's offices to establish appropriate court procedures. The Social Service's Field Director met with Art Snowden, the Court Administrator, his staff, the BIA Social Services Director, and the BIA Counsel to further work toward state-wide development of court procedures. As a result of this meeting the Court Administrator agreed to include a letter summarizing the Act in the next mailing to the Alaska Bar members.

Since the finalization of regulations the Department has not only attempted to comply with the formal procedures established by the regulations but has developed many cooperative projects for furthering the implementation of the Act. For example, the Division of Social Services has been working with Tanana Chiefs and United Crow Band on locating, studying, and licensing native foster homes. Similar projects have also been operating in Fairbanks (Fairbanks Native Association) and in Southeast Alaska (Tlingit-Ha'da). The Division also held a two day training session in Anchorage on Oct 8 & 9, 1979 on the Indian Child Welfare Act. The trainer was Bert Hirsh, one of the original drafters of the law. All the native non-profit organizations as well as state and private agencies were invited to attend. Finally, the Division's training director by request of the native non-profit in the Bethel area provided a training session in Bethel.

These are just some of the examples of the cooperative efforts that have been initiated state-wide. It should be noted however that the Department has supported the concepts embodied in the Indian Child Welfare Act before its passage in 1978. In fact the Department supported a change in 47.10.230 (Powers and duties of Department over care of child) which made placement with blood relatives mandatory if they requested custody.

The intent of this statute was to provide for placement of children in surroundings which meet their social and cultural needs.

The Department has attempted to implement this statute to the fullest extent possible. It has been very successful in areas such as Nome and Bethel but less successful in larger cities such as Anchorage, Fairbanks, and Juneau. For example, 10 years ago 92% of all native children placed for adoption were placed in non-native homes. This has been completely reversed. Presently 75% of the native children placed for adoption are placed in native homes. The only exceptions being some severely handicapped children who have special medical needs and some native children who have been in long term foster care with a non-native family. In addition, in the Nome Region in 1969 all but two Eskimo children were in non-native foster homes. Today in Nome the figures are: 32 native children in native homes and 7 in non-native homes. In the Bethel Region there are 42 native children placed in foster homes. All are placed in native foster homes. However, the placements of native children in native foster homes are significantly lower in the larger cities with Anchorage having the lowest percentage (20 out of 127 native children are in native foster homes). The Department has been working diligently to improve the situation. As noted earlier Tlingit-Haida and Fairbanks Native Association have had foster home finding projects in Juneau and Fairbanks respectively. The Department has supported and worked closely with the staff of these projects. However, the success has been limited.

In summary the Department has been supporting the concepts of the Indian Child Welfare Act for a number of years. It had implemented certain policies consistent with the Act prior to its passage. In addition the Department, has worked diligently to develop formal procedures to implement the Act as well as numerous cooperative projects. The Department realizes there is stil much to be accomplished and certainly agrees to continue its present efforts of implementation and to increase its efforts wherever necessary.

Re: House Concurrent Resolution No. 43
Indian Child Welfare Act of 1978

Dear Sally:

I am writing to state my opposition to House Concurrent Resolution No. 43, "a resolution endorsing the concept and requesting implementation of the Indian Child Welfare Act of 1978."

As background, I have never represented any parent whose parental rights were being terminated or involuntarily relinquished or otherwise being surrendered by force. I have never represented the State of Alaska in an action to take away parental rights. I have, however, on numerous occasions, represented the children in these proceedings for termination. My official title has always been "guardian ad litem" but my duties have frequently involved reconciliation, peacemaking and negotiation.

Under Alaska law, a guardian ad litem represents the "best interests of the child" in the proceeding; not necessarily what the child wants and not necessarily what the parents or the State of Alaska want. It is a difficult assignment and I confess I am uncomfortable with it in many situations. However, I accept appointments as guardian ad litem because all too frequently the children themselves are not otherwise a concern in a parental rights termination proceeding. It is very easy for the other parties involved to lose sight of the fact that while their lives may be impacted by whatever decision a court may reach, the children will live with the results and be affected by the results for the rest of their lives. The Alaska Supreme Court has begun to recognize that the children are a party in interest, that they have constitutional rights in custody and termination proceedings and that those rights deserve to be represented. The Indian Child Welfare Act, as to the class of children who happen to be of fractional Native blood, removes those rights and removes the right of the children to be represented in a meaningful sense in those kinds of proceedings.

My first dispute is with the underlying premise for the Act, that "a highly disproportionate number of Native American children in Alaska are from families broken up by the removal of children. . .", with the inference that that statistical fact is somehow evidence of wrongdoing by the State of Alaska. The hard truth, however politically unpopular it may be, is that Native American families have the highest rate of alcoholism, the highest rate of broken, unstable homes, and the highest rate of child abuse in Alaska and that that, not any wrongdoing or excess of zeal by the Department of Health and Social Services or the State of Alaska, is the reason why Native American homes are broken up most frequently. I will leave it to sociologists, psychologists and anthropologists to describe why these statistical facts exist, but they do. Those problems may or may not be susceptible of solution, but you are treating a symptom when you remove the right of the children to be removed from abusive homes. If the Alaska Legislature wants to solve the problem of abused Native children and their statistically anomalous frequency, it should create programs to treat the underlying problems, not endorse a statute which forces the children to continue to live in those homes, regardless of consequences.

And it is effectively impossible to terminate the parental rights of a parent whose child is an Alaska Native. To terminate those parental rights, someone must prove beyond a reasonable doubt (1) that there is a clear and present physical danger to the children; (2) that the danger has caused harm or imminently will cause harm to the children; and (3) that that conduct constituting a clear and present danger is likely to continue. Check with your legislative counsel, but in my view it is effectively impossible to prove beyond a reasonable doubt that a pattern of conduct is likely to continue. It is hard enough to establish beyond a reasonable doubt that something has happened; ask any district attorney.

So the parental rights cannot be terminated, the parents will continue to have contact with their children, no matter how abusive they have been in the past and no matter how harmful that conduct may be to the children themselves.

In my view, the Indian Child Welfare Act of 1978 is unconstitutional since it unfairly imbalances the constitutional rights of the children as against the constitutional rights of their parents. I emphasize that is my opinion alone, and has not been endorsed by any court of which I am aware.

Another serious problem with the Act is its application in Alaska. Assuming the Act exists to preserve a Native culture, its avowed purpose, then it operates without regard to that avowed purpose. An Alaska Native family, regardless of its ties to its culture, is entitled to the protections of the Indian Child Welfare Act. If I may, I would like to analyze a specific hypothetical.

Let us assume that two fathers in Barrow, Alaska have sexually abused their five year old daughters. One family is caucasian, the other is one-quarter Eskimo. To terminate the parental rights of the caucasian father, the State of Alaska must establish by clear and convincing evidence that the child has suffered emotional harm and that it is likely that the conduct leading to the emotional harm will continue. That is not an easy matter, and is not likely to be proven by one specific bad act, in the absence of other conduct. Obviously, it is not going to be possible to terminate the parental rights of the Native father for a single act.

Now let us assume that each father again sexually abuses the five year old daughter. Probably, it will now be possible to terminate the parental rights of the caucasian father. In the view of most of the courts of Alaska, two specific, identical instances give rise to an inference that conduct is likely to continue and reach the burden of proof: clear and convincing evidence. While the matter has not been ruled upon, it is reasonably certain that it is not going to be possible to terminate the Native father's rights, even though the conduct takes place in the same community, even though the children are harmed in precisely the same way and to precisely the same degree. In fact, as long as there is even a slight doubt that the Native father will continue to sexually abuse his daughter, his parental rights may not be terminated.

Obviously, I oppose House Concurrent Resolution No. 43. While I cannot pretend to make up your minds for you, I urge you to give the Act, its implications and the points I have raised in this letter serious consideration before proceeding further with this Resolution. The State of Alaska and the Department of Health and Social Services have not attempted to force all of the diverse cultures of Alaska into one white, suburban, middle class mold. Whatever the rationale for the Indian Child Welfare Act in other jurisdictions, Alaska has acted in every way to protect the cultural identities of its peoples. The Act is unnecessary, harmful to the children it is intended to protect and possibly unconstitutional. I urge you to resist adoption and passage of the Resolution.

Thank you for your time and patience in reviewing the points that I have set out. Please feel free to contact me if you have questions regarding my position.

Sincerely yours,

Re: House Concurrent Resolution No. 43
Indian Child Welfare Act of 1978

Dear Representative Buchholdt:

I am writing to state my opposition to House Concurrent Resolution No. 43, "a resolution endorsing the concept and requesting implementation of the Indian Child Welfare Act of 1978."

As background, I have never represented any parent whose parental rights were being terminated or involuntarily relinquished or otherwise being surrendered by force. I have never represented the State of Alaska in an action to take away parental rights. I have, however, on numerous occasions, represented the children in these proceedings for termination. My official title has always been "guardian ad litem" but my duties have frequently involved reconciliation, peacemaking and negotiation.

Under Alaska law, a guardian ad litem represents the "best interests of the child" in the proceeding; not necessarily what the child wants and not necessarily what the parents or the State of Alaska want. It is a difficult assignment and I confess I am uncomfortable with it in many situations. However, I accept appointments as guardian ad litem because all too frequently the children themselves are not otherwise a concern in a parental rights termination proceeding. It is very easy for the other parties involved to lose sight of the fact that while their lives may be impacted by whatever decision a court may reach, the children will live with the results and be affected by the results for the rest of their lives. The Alaska Supreme Court has begun to recognize that the children are a party in interest, that they have constitutional rights in custody and termination proceedings and that those rights deserve to be represented. The Indian Child Welfare Act, as to the class of children who happen to be of fractional Native blood, removes those rights and removes the right of the children to be represented in a meaningful sense in those kinds of proceedings.

My first dispute is with the underlying premise for the Act, that "a highly disproportionate number of Native American children in Alaska are from families broken up by the removal of children. . .", with the inference that that statistical fact is somehow evidence of wrongdoing by the State of Alaska. The hard truth, however politically unpopular it may be, is that Native American families have the highest rate of alcoholism, the highest rate of broken, unstable homes, and the highest rate of child abuse in Alaska and that that, not any wrongdoing or excess of zeal by the Department of Health and Social Services or the State of Alaska, is the reason why Native American homes are broken up most frequently. I will leave it to sociologists, psychologists and anthropologists to describe why these statistical facts exist, but they do. Those problems may or may not be susceptible of solution, but you are treating a symptom when you remove the right of the children to be removed from abusive homes. If the Alaska Legislature wants to solve the problem of abused Native children and their statistically anomalous frequency, it should create programs to treat the underlying problems, not endorse a statute which forces the children to continue to live in those homes, regardless of consequences.

And it is effectively impossible to terminate the parental rights of a parent whose child is an Alaska Native. To terminate those parental rights, someone must prove beyond a reasonable doubt (1) that there is a clear and present physical danger to the children; (2) that the danger has caused harm or imminently will cause harm to the children; and (3) that that conduct constituting a clear and present danger is likely to continue. Check with your legislative counsel, but in my view it is effectively impossible to prove beyond a reasonable doubt that a pattern of conduct is likely to continue. It is hard enough to establish beyond a reasonable doubt that something has happened; ask any district attorney.

So the parental rights cannot be terminated, the parents will continue to have contact with their children, no matter how abusive they have been in the past and no matter how harmful that conduct may be to the children themselves.

In my view, the Indian Child Welfare Act of 1978 is unconstitutional since it unfairly imbalances the constitutional rights of the children as against the constitutional rights of their parents. I emphasize that is my opinion alone, and has not been endorsed by any court of which I am aware.

Another serious problem with the Act is its application in Alaska. Assuming the Act exists to preserve a Native culture, its avowed purpose, then it operates without regard to that avowed purpose. An Alaska Native family, regardless of its ties to its culture, is entitled to the protections of the Indian Child Welfare Act. If I may, I would like to analyze a specific hypothetical.

Let us assume that two fathers in Barrow, Alaska have sexually abused their five year old daughters. One family is caucasian, the other is one-quarter Eskimo. To terminate the parental rights of the caucasian father, the State of Alaska must establish by clear and convincing evidence that the child has suffered emotional harm and that it is likely that the conduct leading to the emotional harm will continue. That is not an easy matter, and is not likely to be proven by one specific bad act, in the absence of other conduct. Obviously, it is not going to be possible to terminate the parental rights of the Native father for a single act.

Now let us assume that each father again sexually abuses the five year old daughter. Probably, it will now be possible to terminate the parental rights of the caucasian father. In the view of most of the courts of Alaska, two specific, identical instances give rise to an inference that conduct is likely to continue and reach the burden of proof: clear and convincing evidence. While the matter has not been ruled upon, it is reasonably certain that it is not going to be possible to terminate the Native father's rights, even though the conduct takes place in the same community, even though the children are harmed in precisely the same way and to precisely the same degree. In fact, as long as there is even a slight doubt that the Native father will continue to sexually abuse his daughter, his parental rights may not be terminated.

Obviously, I oppose House Concurrent Resolution No. 43. While I cannot pretend to make up your minds for you, I urge you to give the Act, its implications and the points I have raised in this letter serious consideration before proceeding further with this Resolution. The State of Alaska and the Department of Health and Social Services have not attempted to force all of the diverse cultures of Alaska into one white, suburban, middle class mold. Mr. Glenn Hackney, Chairperson
Health, Education & Social
Services Committee
State Senate
Pouch V
Juneau, AK 99811

Dear Senator Hackney:

The Central Council of Tlingit and Haida Indian Tribes of Alaska supports the Committee Substitute for House Concurrent Resolution Number 43, "A resolution endorsing the concept and requesting implementation of the Indian Child Welfare Act of 1978." We believe that legislative recognition and support of this act is essential to full implementation. We also believe that a directive to the Department of Health and Social Services and the Alaska Supreme Court regarding prompt implementation will facilitate the establishment of appropriate priorities concerning the act

As a follow up to the resolution, a review of the existing Children's Code is necessary to identify areas of non-compliance with the Indian Child Welfare Act. Then any statutes found to be in non-compliance should be corrected with appropriate legislation.

Thank you for giving your support and attention to this issue of great concern to Alaska Native families.

Sincerely,

CENTRAL COUNCIL OF TLINGIT AND
HAIDA INDIAN TRIBES OF ALASKA

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

ON

HOUSE JOINT RESOLUTION 83

This resolution seeks to eliminate the federal barrier which presently prevents fair compensation of Alaska's physicians participating in the Medicaid Program.

The problem stems from a federal law which sets physician reimbursement at the lowest of three factors;

1. The actual amount charged on the bill,

2. The physician's actual average charge for the preceeding year; and

3. The "adjusted 75th percentile" for all Alaska physicians' charges for the preceeding year.

A true 75th percentile would represent a figure which 75% of Alaska physicians did not exceed. However, under federal law the Alaska 75th percentile is not allowed to increase at the actual Alaska economic growth rate, but rather is limited to the economic growth rate for the United States as a whole. The potential effect of this growth limitation is displayed on the attached graph. This graph shows what would happen to a $15 office charge over the last 10 years assuming, for illustration only, that costs in Alaska have grown an annual percentage of 2% higher than the rest of the nation.

The Department supports HJR 83 for the following reasons:

1. Physician participation in Medicaid is optional and an increasing number of physicians will either drop out of the program or refuse to see new patients if they feel they are unfairly compensated. This is already severely effecting the specialty service of OB-GYN.

2. Although physicians' as a group represent no more than 10% of total costs under our medical programs, they are the hub of our entire medical delivery system. They see patients in their offices at the early stages of disease or injury, they admit people to hospitals and long term care facilities, they perform surgery and provide follow-up care, and they refer patients to other providers of health care services. We need their participation to make our program work.

POSITION PAPER/Department of Health & Social Services

3. Hospitals and long term care facilities receive full reimbursement for all reasonable costs they incur. Clearly, under the present system, physicians do not. Even if an Alaska cost index is substituted for the national index, physicians will still receive only partial reimbursement for the costs they incur.

4. Unless the growing disparity between costs and reimbursement is lessened, physician losses will have to be made up by increasing costs of private pay patients.

5. Although Medicare is also a federal program, it does not force physicians into this box. If a physician elects not to accept Medicare payment as full settlement of his bill, he can bill the patient for the remainder under Medicare rules. In Medicaid it is partial payment or nothing. If the State attempts to make up the portion lost by the physician under Medicaid, the State then becomes responsible for the entire payment.
