GOVERNOR'S EXECUTIVE ORDERS

43, 44 & 46

Alaska State Legislature

Senate

Office of the Secretary

Official Business

Pouch V
State Capitol
Juneau, Alaska 99811

M E M O R A N D U M

TO: Health, Education & Social Services

FROM: Peggy Mulligan, Senate Secretary

SUBJECT: Executive Order Nos. 43, 44 & 46

DATE: January 14, 1980

I am transmitting herewith the committee copies of the Governor's Executive Order Nos. 43, 44 & 46 which were referred to the Health, Education & Social Services Committee by the Senate President.

In accordance with Article III, Section 23 of the Constitution of the State of Alaska, the legislature has 60 days of a regular session to disapprove the executive order. Unless disapproved by resolution concurred in by a majority of the mebers in joint session, these orders become effective at a date thereafter to be designated by the governor. Executive Order Nos. 43, 44 & 46 were received by the Senate Secretary on January 14, 1980.

JAY S. HAMMOND
GOVERNOR

STATE OF ALASKA
OFFICE OF THE GOVERNOR
JUNEAU

January 14, 1980

The Honorable Clem Tillion
President of the Senate
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 23, of the Alaska Constitution, I am transmitting to you Executive Orders No. 41, 42, 43, 44, 45 and 46, dated January 14, 1980. Under that constitutional provision, the legislature has 60 days of a regular session, or a full session if of shorter duration, to disapprove these executive orders.

These orders would transfer, for administrative purposes, the following six agencies from the Office of the Governor (and, in the case of the Alaska Public Offices Commission, the Office of the Lieutenant Governor) to several of the line departments:

Agency	Transferred To
Alaska Public Offices Commission	Department of Administration
Public Defender Agency	Department of Administration
Alaska Historical Commission	Department of Education
Alaska State Council on the Arts	Department of Education
Alaska Police Standards Council	Department of Public Safety
Alaska Council on Science and Technology	Department of Environmental Conservation

You may recall that several years ago a "Management and Efficiency Review" of the Executive Branch of State government was conducted at my request, by a group of top-level Alaska business executives. More than 75 per cent of the recommendations the review team made have either been addressed or implemented. One of the key recommendations was to reduce the excessive involvement of my office in program operations by transferring a number of the commissions, councils and agencies reporting to the Office of the Governor, to departments with related responsibilities. A number of programs and agencies have been

transferred since this recommendation was made in 1976; nine more, including the six covered by these executive orders, are proposed for relocation July 1, 1980. The three entities not included here, (Limited Entry Commission, Criminal Justice Planning Agency and Pipeline Coordinator's Office) are not statutorily located in the Office of the Governor and therefore do not require relocation by executive order.

My goal in completing the reorganization recommended by the "Management and Efficiency Review" team, is to limit, to the maximum extent permissible, the activities of my office to direction of the executive branch and policy development. Program operations should be performed by line agencies. The Lieutenant Governor fully concurs with my philosophy.

Let me stress that these transfers do not reflect a lack of concern for the programs being transferred nor are they intended to grant to the line departments any authority over the activities of these agencies not now provided by law. The line departments will only assume responsibility for providing the administrative support now provided by my office.

The executive orders amend the statutes to specify the new location for each of these entities and recodify the remainder of the existing statutes accordingly. The new provisions are virtually identical to those being repealed with the following exception. Executive Order No. 46, in relocating AS 44.19.181(a), amends the substance of that subsection by deleting the present third sentence which reads: "Appointees to the council shall be confirmed by a majority of the legislature". This provision is invalid under art. III of the Alaska Constitution and Bradner v. Hammond, 553 P. 2d 1 (Alaska 1976).

Sincerely,

Jay S. Hammond
Governor

MEMO

TO: SEN. HACKNEY

FROM: PAUL

RE: SB 12

Just want to provide a little input into this SB 12 that we are taking up at tomorrow's hearing. The thrust of this bill is to establish a program (viz. adult-based education program composed of two phases. Phase 1 is a wilderness experience adventure and Phase 2 designed to reinforce the values acquired during the wilderness experience) whereby potential delinquents can enjoy a wilderness experience, e.g. trip down Yukon River, this being a neutral setting away from the environment that is fostering the symptons that are encouraging the juvenile to become delinquent, and placing the individual in a neutral setting where the individual will be exposed to a new "value" system and hopefully this new value system will leave an indelible impression upon the youth, permitting him to bypass that "threatening cloud" hanging over his head of becoming a delinquent.

Now let's go to Phase 2 of this program which is the critical stage. Once this individual has absorbed his new values, it is necessary for him to retain this value system upon his return to the "old environment." What this phase of the program is geared to do is reinforce those values that the individual attained in the neutral environment, hopefully removing the individual from the delinquent ranks.

It is at this stage, phase two, that the "bureaucratic-ness" of this bill comes into play. In order to sustain this value system, this bill creates six regional corporations, composed of 15 members, boundaries consistent with the regional native corporations, and a higher tier of bureaucracy, an executive policy council, consisting of 12 members, in the Dept of H/SS. The executive council's function is to review/evaluate program established by the regional councils. The regional council's job is to create programs, compatible with that particular community,

that will maintain the values absorbed by the individual rather than reverting back to the old value system that was creating a delinquent out of the individual. The regional councils will have employed a full-time COORDINATOR (for that matter, the executive council will have employed an executive director) that will spearhead the program in his particular region.

The big question that permeates the line of thinking directed at this program is how much is it going to cost? Dept. H/SS figures it going to cost around 407,000 for FY 80 and will require 8 positions. Conversely, Hohman's camp argues that the cost to the state will be appreciably lower than what H/SS is projecting basically for two reasons:

(1) H/SS already has the social workers and probation officers this bill calls for in the field and H/SS doesn't have to create any new positions.

(2) Additionally, this bill will incur a savings to the state because it will divert individuals who would be candidates for McLoughlin; therefore, the state will not have to pick up the tab for those potential custodial costs. NOTE: Hohman's gang is being a little cryptic about what they are estimating the cost will be, dollar amount that is, because they want to have the upper hand of knowing what every body else is saying the program is going to cost but at the same time, keeping everybody guessing as to what their projected costs are.

A personal note(for what it's worth department as Paul Harvey would call it). I'll admit, kids that have an opportunity to experience a wilderness experience as Hohman's troops are promoting in this bill often times temporarily revises one's values when put into a neutral setting (heck sakes, a wilderness experience would do any of us some good) but as these kids filter back into the system, they ease back into their former routine without much difficulty, and I doubt if Hohman's bureaucratic machinery entertained in this bill is going to prepare everyone one in the program for cannonization. It sounds like a very idealistic type program and if it would work it would be great, but..... It's hard to convince that the cost-effectiveness is really there also.

POSITION PAPER/Department of Health and Social Services

SENATE BILL NO. 12

"An act relating to the establishment of social services policy councils in the Department of Health and Social Services and providing for an adventure-based education program."

The Department supports the concept of a social services council inasmuch as it would enhance not only cooperative efforts among the various Divisions in the field, but would facilitate cooperation and understanding between the Department and the public, as well as among the several regions of the state.

As the bill stands, however, there appear to be a number of difficulties which would hinder effective implementation.

Sec. 47.47.010. REGIONS. As outlined, the proposed regions do not correspond to any of the regional boundaries of the Department's divisions in the field. Coordination between council regions and the regional offices of the divisions might prove difficult.

Sec. 47.47.030. COMPOSITION OF REGIONAL COUNCILS. Although Sec. 47.47.120 addresses duties of the executive council, including review of programs and the budget of Public Assistance, no Public Assistance representative is on the Regional Council (and, as it follows, on the executive council).

Sec. 47.47.060. MEETINGS. Four professional staff members of the Department, who provide direct services, would be required to attend meetings monthly, possibly involving extensive travel time. As current caseloads are extremely high, their absences may reduce the level of services being provided.

Sec. 47.47.140. SUPPORT BY THE DEPARTMENT. Paragraph (1) directs the Department to provide for secretarial and clerical services to the regional and executive councils. As the services of these support staff are now fully employed, it is difficult to see how they might meet this additional responsibility.

With regard to the establishment of a state-wide adventure-based education program, the Department cannot make a recommendation as to the effectiveness of such a program in diverting juvenile offenders from institutional placements as there is not sufficient supporting evidence available to the Department. The Department would recommend that prior to full state-wide implementation, further pilot studies be made.

I. Analysis

The following fiscal notes pertain to the Department of Health and Social Services reference individual sections and subsections of SB12:

Sec: 47.47.030 (2) and (4)

The equivalent time of 1.25 permanent full time Probation Officer II (PO II) plus 1.25 permanent full time Social Worker III (SW III) positions per year would be consumed for participation in council meetings.

Regional Council - 2 PO II and 2 SW III members on each of 6 regional councils.
2 PO II x 6 councils x 12 meetings per year x 2 days = 288 days
2 SW III x 6 councils x 12 meetings per year x 2 days = 288 days

Executive Council - Assume 2 PO II and 2 SW III are members.
2 PO II x 1 council x 4 meetings per year x 3 days = 24 days
2 SW III x 1 council x 4 meetings per year x 3 days = 24 days.

State employees work 249 days per year.
PO II - 288 days + 24 days ÷ 249 days = 1.25 PO II
SW III _ 288 days + 24 days ÷ 249 days = 1.25 SW III

Average earnings including benefits of PO II's and SW III's = $36,500 year

Annual unrecoverable cost (not included in Fiscal Note Amounts)
$36,500 x 1.25 x 2 = $91,200

Sec: 47.47.050 Compensation, Per Diem and Expenses

Assume that at least 1/6 of all meetings of regional councils and all executive council meetings require travel and that the average round trip plane fare is $200 per member and any other participants.

Air Fares	
6 Regional Councils x 15 members x (12 meetings ÷ 6) x $200 =	$ 36,000
Per Diem	
6 Regional Councils x 15 members x 12 meetings x $55 x 2 days =	118,800
Air Fares	
1 Executive Council x 12 members x 4 meetings x $200 =	9,600
Per Diem	
1 Executive Council x 12 members x 4 meetings x $55 x 3 days =	7,920
Estimated other expense - child care =	2,000
Total Travel, Per Diem, and other costs	$174,320

Sec: 47.47.075 Employment of Personnel

Each Regional Council will employ one full time employee for administrative work.

6 x Admin. Asst. Range 12A $21,500 including benefits =	$129,000
Other part time employees estimate =	4,000
Total annual Regional Council Personal Services Costs	$133,000

NOTE: All other administrative operating and office equipment costs are excluded.

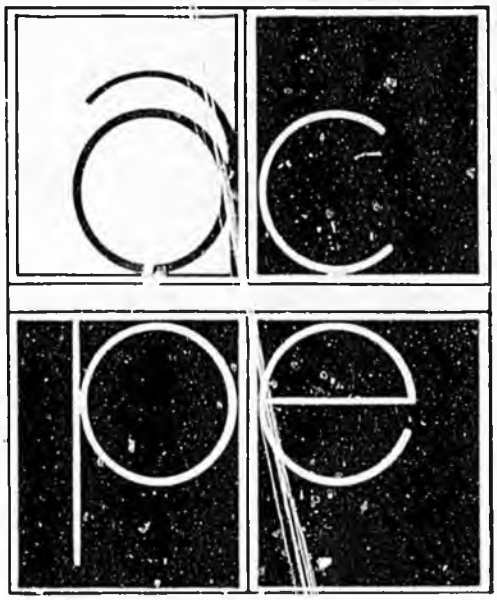
MEMO

1/17/79

RE: SBs 17, 18, 34



TO: Sen. Hackney

FROM: Paul

Senator, I spoke with Kerry Romesburg this morning to alert him of the HESS hearing this afternoon and to notify him that SBs 17 & 18 would be considered. During our conversation, I asked for some input regarding the bills and particularly the "why" behind the request for 2 millionx He provided the following info: Funding for the scholarship revolving loan fund is derived from two sources: general fund and repayments made by students on their loans. Kerry stated that the problem that has surfaced this year is that the repayment money that comes from students is depleted and therefore this source of funding is not availabe. He accounts for the depletion of the student repayment money as follows: In the past, as monthly student repayment money came in this money would be accumulated over a year's time and then would be used toward funding the next year's loan requests. This year, however, because of the surge of loan applications, the Commission has not enjoyed this accumulation of money but has had to disburse this money as it came in to satisfy this year's loan requests. Therefore, to fill the hole in the sock that has come about because of a lack of accumulated funds, the Commission has to submit for a supplemental appropriation.in the amount of two million to have money available for this year's loan requests.
RE: SB 18 - Sen. Kertulla has requested that action on this bill be delayed because he has a Dr.s appointment this afternoon and will not be able to testify on the bill.

OVER

RE: SB 34 - Spoke to Janice Gates notifying her that this bill would be brought up/committee this afternoon. She said that the Dept was preparing a position paper on this bill but would not have it ready until this afternoon at the hearing. I mentioned to her that we would like to have position papers in our office in a timely manner this year and she said she would try to comply with this request but today's short notice made it impossible.

PREFACE

The Annual Report of the Alaska Student Loan Program for 1977-78 is hereby transmitted to the Governor and the Legislature of the State of Alaska. The Student Loan Program is administered by the Alaska Commission on Postsecondary Education with advice and guidance of the Student Financial Aid Advisory Committee. Membership of this advisory committee for 1977-78 included:

Mrs. Mildred Banfield (Chairman, Juneau)
Mr. Ron Castle (Wrangell)
Mr. Walter Furnace (ex officio, Anchorage)
Ms. Ida Greiner (Fairbanks)
Mr. Darrell Moore (Sitka)

The Commission and staff wish to express their gratitude for the work of this advisory committee.

Kerry D. Romesburg
Executive Director

November, 1978
(Date)

Introduction

The 1971 Alaska State Legislature established the Alaska Student Loan Program which provides low cost educational loans to Alaskan students enrolled in undergraduate, graduate, or career degree programs. In the seven years of operation, from 1971-72 through 1977-78, nearly twelve thousand loans have been awarded to Alaskans pursuing education at a postsecondary level. These loans account for a combined total of over $21 million in State financial assistance.

Educational loans of up to $2,500 and up to $5,000 per year for undergraduate and graduate study, respectively, were provided to eligible State residents. This maximum loan limit was changed upward for undergraduate study to a new limit of $3,000 by the 1978 Legislature, however, the effects of this change will not be reflected until the 1978-79 report.

These need-based loans offer the recipient a ten-year repayment period at an annual interest rate of five percent. The student may utilize the State loan to attend any accredited college or university in the Nation or to attend approved vocational-technical education programs. An incentive, in the form of up to a forty percent cancellation, is offered to those individuals who work in Alaska after completion of their programs of study.

Program Summary

1977-78 was the seventh year of operation for the Alaska State Student Loan Program. The year was one of conversion and change. All loan recipients were offered the opportunity to convert from a six-year repayment to the newly-adopted ten-year repayment plan; the loan program was manually operated as one computer-based system was discarded and another developed (at least initially); and payment coupon repayments replaced the somewhat erratic machine-based direct payment requests.

The loan program has now provided 11,856 loans to Alaskans, totaling $21,957,196. Of these, 62.9% have been loans for attendance out-of-state, and 37.1% have been for attendance in Alaska. The number of graduate students remains relatively small with 88.2% of the loans going to undergraduates over the past seven years.

Loan Award Amounts

The average loan award has continued its seven-year rise. The average loan in 1977-78 was $2,033, compared to $1,483 in 1971-72. Additionally, the number of students, particularly undergraduates, receiving maximum annual awards has continued to grow. These increasing costs largely account for the raised undergraduate loan limit from $2,500 to $3,000 beginning in the 1978-79 academic year.

The average loan for a student attending an in-state institution has risen to $1,723, compared to $1,589 in 1976-77; while the average loan for attendance out-of-state has remained almost constant this year compared to last ($2,183 for 1977-78 and $2,186 for 1976-77).

Undergraduate Loans

The number of undergraduate students securing loans under the state loan program has increased greatly over the past six years. In 1971-72, 990 undergraduates received assistance, while in 1977-78 the number had more than doubled, to 1,985. Of these 64.1% used their loans for attendance out-of-state, and 35.9% used their loans with Alaska.

The states most frequently chosen by undergraduates in 1977-78 are presented below in Table 1. The average loan amount for those students going to schools within the states listed is also given. The pattern is clearly for attendance in the West and, more specifically, in the Northwest, with Alaska, Washington and Oregon accounting for 63.2% of all the undergraduate loans. One interesting finding was that the state, of those listed, for which the average loan amount was the lowest, was Hawaii. This may be in part due to the fact that Hawaii and Alaska have a tuition reciprocity agreement under which Alaskans do not have to pay nonresident tuition rates for attendance in Hawaii, and conversely.

TABLE 1

TEN TOP STATES OF ATTENDANCE
FOR ALASKANS WITH
UNDERGRADUATE LOANS

STATE	NO.	Average Loan
Alaska	713	$1,699
Washington	322	1,982
Oregon	220	2,021
California	136	2,000
Colorado	91	2,092
Idaho	55	1,824
Arizona	49	1,859
Utah	42	1,756
Hawaii	42	1,308
Montana	36	1,943

The percent of undergraduates using their loans for attendance in Alaska has been increasing the last two years, as can be seen in Figure 1, however the majority of students are still looking "outside" for their postsecondary educational training.

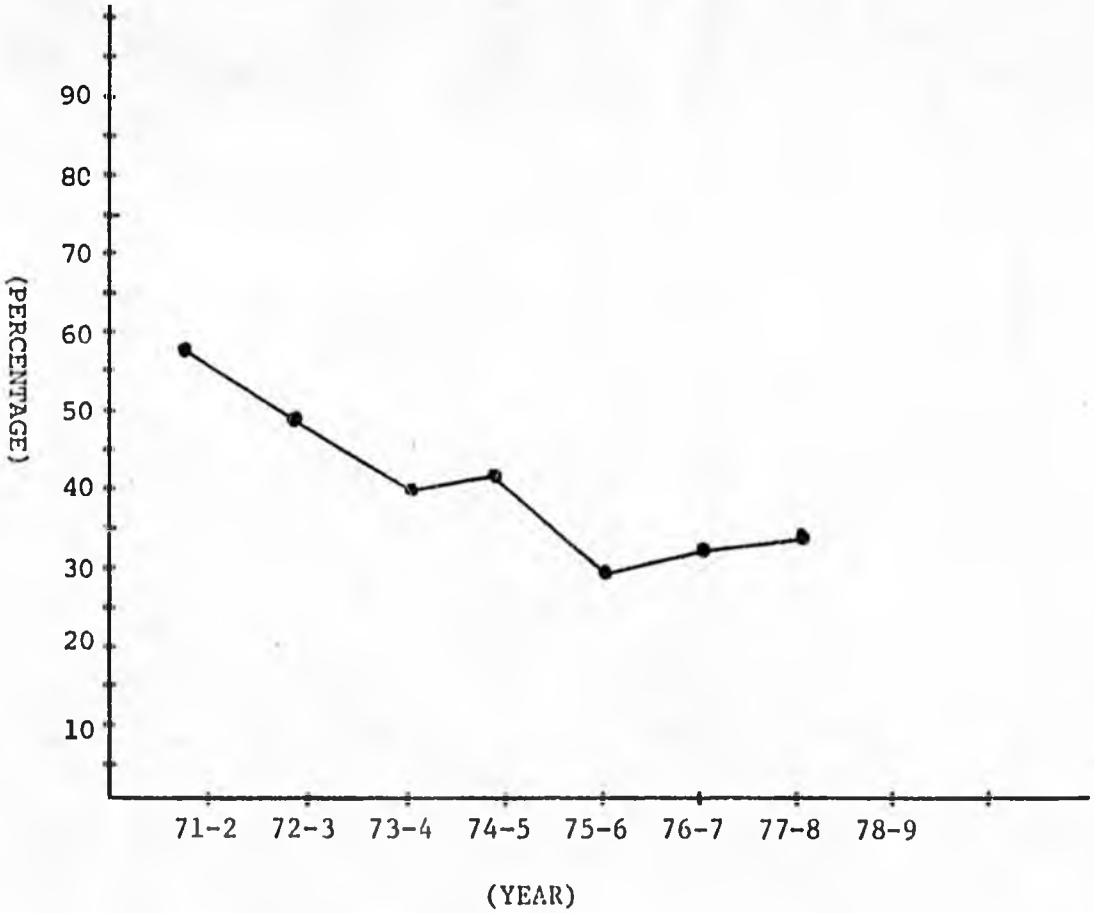

FIGURE 1

PERCENT OF UNDERGRADUATE LOANS
USED IN ALASKA

Graduate Loans

The number of Alaskans receiving loans for graduate study has more than tripled since 1971-72, with 280 Alaskans receiving assistance in 1977-78. Of these 280, 90.4% used their loans for attendance outside of Alaska while 9.6% used them for attendance in-state. This percentage of attendance for graduate study within Alaska has steadily decreased since 1971-72, however, as can be seen in Figure 2, there may be a slight leveling of this trend.

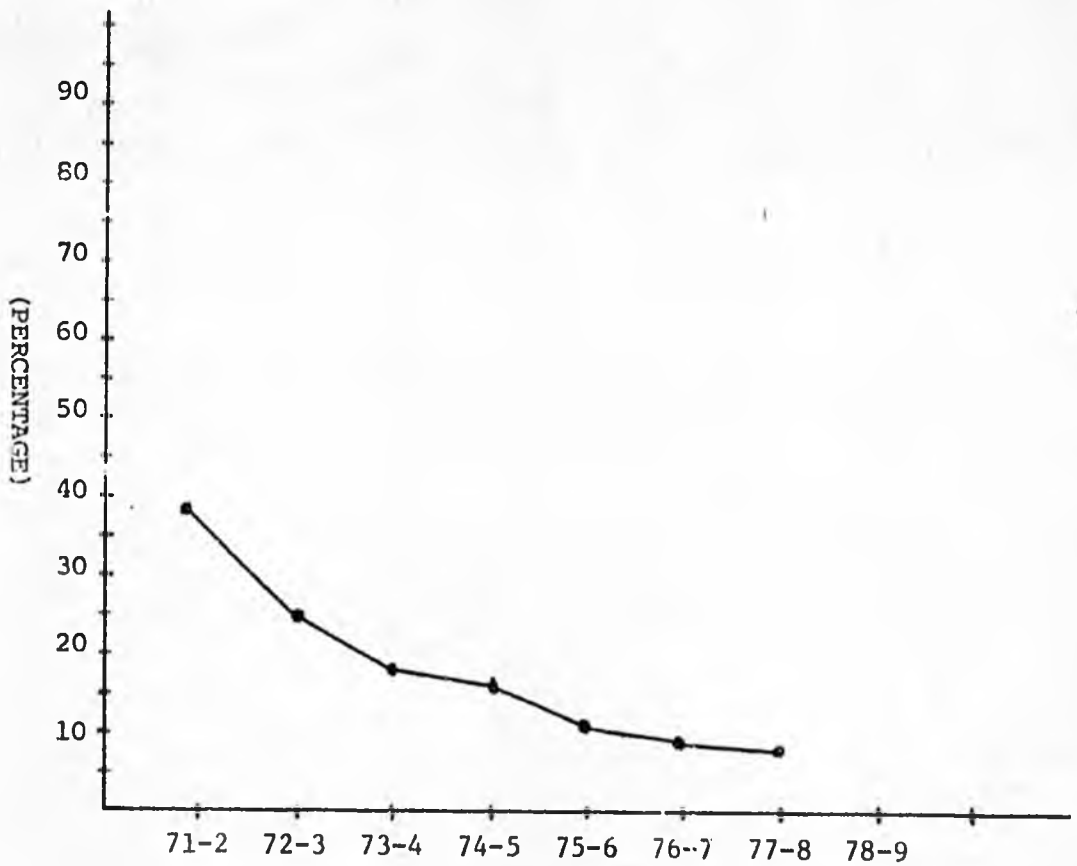

FIGURE 2

PERCENT OF GRADUATE LOANS
USED IN ALASKA

The states most frequently chosen by graduate students from Alaska in 1977-78 are presented in Table 2. As with the undergraduate students, there seems to be a distinct preference for attendance in Western states, with the states of Washington, California, Oregon, and Alaska accounting for 56.8% of the graduate loan recipients. Unlike the undergraduates, however, Alaska ranks only fourth in attendance preference for graduate students.

TABLE 2

TEN TOP STATES OF ATTENDANCE
FOR ALASKANS WITH
GRADUATE LOANS

STATE	NO.	Average Loan
Washington	56	$3,150
California	42	3,743
Oregon	34	3,125
Alaska	27	2,367
Colorado	15	3,830
Massachusetts	11	3,900
Idaho	9	2,733
Illinois	7	3,507
Arizona	7	3,429
Texas	7	3,321

Loan Repayments

The Student loan program is based upon a revolving fund with the loan repayments being re-utilized for future loans. Since 1971-72 (actually 74-75, since that was the year payments were first received),

Alaskans have repaid over $3 million on their educational loans. The rapid increase in repayment, presented below in Figure 3, will be leveling slightly due to the extension of the repayment period from six to ten years, but the volume of funds revolving should continue to represent a significant portion of the loan account.

Also presented in Figure 3 is a representation of the cancellation history of the student loan program. Beginning with the first cancellation in 1974-75, the total amount of loan funds (including interest), which the State of Alaska has cancelled for those students living and working in Alaska after completion of their schooling, has reached over $400 thousand. The amount cancelled has increased quite rapidly the last year and is expected to continue to increase over the next few years due to the large numbers of students completing their educational programs over the same time period.

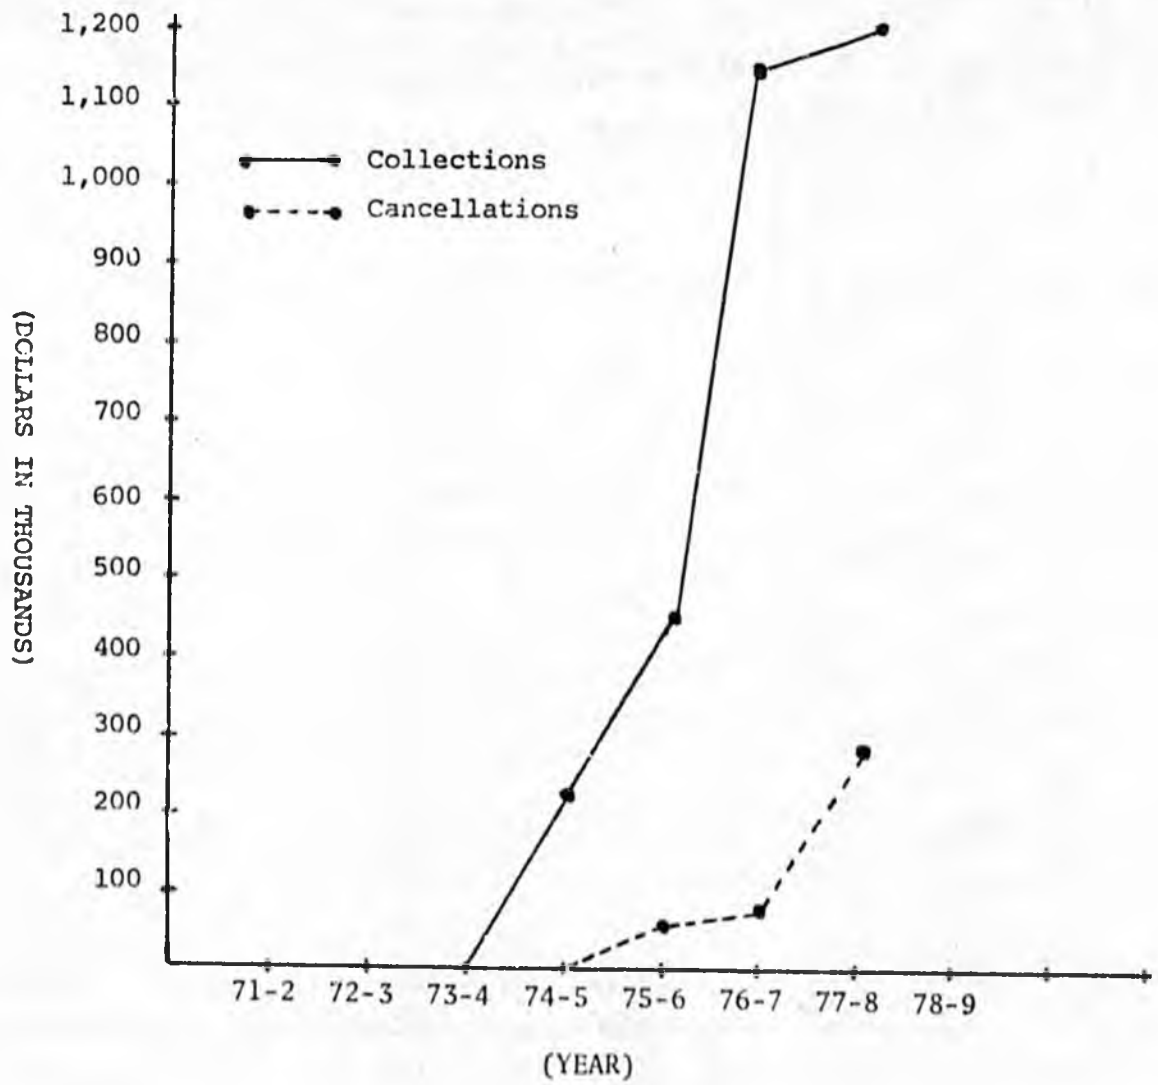

FIGURE 3

STUDENT LOAN COLLECTIONS
and CANCELLATIONS

Statistical Data

Following are Tables 3-7 containing data on the Alaska Student Loan Program from 1971-72 through 1977-78. Information on the number and amount of loans made annually to undergraduate and graduate students attending in-state and out-of-state are presented in Tables 3-6. Table 7 contains summaries of the average size loan awarded each year. It should be remembered that the figures in Table 7 reflect a combination of both undergraduate and graduate loans.

MEMORANDUM

TO: The Honorable John Sackett
Chairman, Senate Finance Committee

FROM: Senator Glenn Hackney
Chairman, Senate Health, Education
and Social Services Committee

SUBJECT: Auditory, Visual, and Dental Insurance

DATE: April 30, 1979

Identical bills to provide the above-referenced insurance for retired individuals were entered in the Senate and in the House. The House Bill number was HB 26, the Senate Bill number was SB 24. Under both bills, the retired employee would have paid one-half the cost of the insurance, the retirement fund would have paid the other half. The Division of Retirement and Benefits submitted a fiscal note indicating the cost to the system would be $1,608,300 for the PERS and $1,199,200 for the TRS.

In the Senate, SB 24 was amended to allow the retiree to pay 90% of the cost and the system to pay the other 10%. The fiscal note on the amended version indicated a cost of $330,100 to the PERS and $248,000 to the TRS.

The House passed HB 26 with an amendment indicating the retiree would pay the full cost of the insurance.

About a week ago we had a number of lobbyists in Juneau representing the NRTA and the AARP. I think that one or the other of these individuals visited every Representative and Senator. The message that was brought to me by these retired individuals was that they did not object to paying the cost of this insurance, they were pleased to even be able to purchase it since the cost would be much higher on the open market.

With that information in hand, I made the motion in Senate Finance Committee to move CSHB 26, the bill that requires retirees to pay the full cost of the insurance.

IN THE SENATE BY RAY

SENATE BILL NO. 24

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to insurance coverage for persons receiving benefits under the public employees' and teachers' retirement systems."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 39.30.090 is amended by adding a new paragraph to read:

(15) A person receiving benefits under AS 14.25 or AS 39.35 may obtain auditory, visual, and dental insurance for himself under this section. The level of coverage for persons over 65 shall be the same as that available before reaching age 65 except that the benefits payable shall be supplemental to those afforded under the federal old age, survivors, and disability insurance program, if any. A person electing to have insurance under this paragraph shall pay 50% of [one-half] the cost of the insurance, and the retirement system from which he is receiving benefits shall pay the other one-half.

Bills on Agenda

SB 24 -- An Act relating to insurance coverage for persons receiving benefits under the public employees' and teachers' retirement systems; RAY

SB 35 -- An Act relating to adult education; RULES/REQ. OF THE GOVERNOR

Chairman Hackney called the meeting to order in the Butrovich Room of the Capitol Building at 2:38 PM.

The first bill on the agenda was SB 24. Present to testify was Paul Arnoldt.

Paul Arnoldt. Mr. Chairman, for the record, I am Paul Arnoldt, Director of the Division of Retirement and Benefits. For the last few days we have been trying to generate cost data on the bill. We have contacted our health insurance consultant through the William M. Mercer Company. He is working with our carrier, Blue Cross, to generate the firm number or a cost per month per employee for providing the audio, dental and visual benefit as indicated on under this bill. Then that data is going to be given to our actuary and from there we will calculate a cost-impact on the system. We have really two consultants and a carrier involved in costing the bill, but we don't have that cost as of yet. We have committments to have the data by

Friday and have the fiscal note done by Friday. At this point in time we don't have a fiscal impact. The administration's position on this is that quite obviously we like to provide as much coverage as possible to everyone including our retirees. The only constraint is the fiscal impact and without that we really can't say what our support is. Looking at the bill in a positive vane, we'd like to do something if we can afford it.

Sen. Sturgulewski. Mr. Arnoldt, I realize that we deal with different departments and divisions but on behalf of the administration has there every been an analysis done of total benefits that are given to senior citizens or people based on an age level, say 55, 60, 65 looking into the property tax exemption? In other words have we taken a look to really see how we handle our senior citizens of which I may soon become?

Mr. Arnoldt. The answer tc that is really no. If I can expand on that a little bit, other states have looked at that same issues, not necessarily regarding senior citizens but persons going on retirement. Other states that found that time they add in your retirement benefit, some of the tax deductions, your social security, etc. that many employees are actually going on retirement with an excess of 100% of their final salary. It's just a gut feel, if you will, of most state administrators at the national conferencesthat I do attend that most states are in that environment. In particular when you recognize that they are actually providing benefits greater the final average salary. Especially when you recognize that studies written by actuarial firms, Winkleboss out of New York is the primary one, that shows that a person on retirement really in order to maintain their same standard of living would need a salary somewhere between 40 and 69% of their final salary in order to maintain that same standard of living. But again, just throwing it back to our particular situation, no, I am not aware of any study that addresses that area.

Sen. Fahrenkamp. Two things, (1) I am concerned about the statement about 100% of the final salary because many times I know that employees will, before retiring, have put in their time in one field and change fields and maybe that is no relation to what their capabilities and salary were or have been at one time or another and that statement is bothering me just a little bit. If they are retiring at 100% of their final salary then I admire their ingenuity. Another thing, I don't object to testimony concerning this bill, but its been my experience so far in this procedure that unless a fiscal note accompanies a bill our hands are rather tied.

Sen. Hackney. I wouldn't intend to pass the bill our today absent a fiscal note.

Sen. Fahrenkamp. In the interest of time I know that I'm a little bit restrained today with these Joint Senate and House Committee Resources meetings and I'll stay as long as you deem it necessary, but in the interest of time, if we are not going

to pass it out, as much testimony as we could get as quickly and if the witness is not prepared . . .

Sen. Hackney. We did not know that we were not going to be able to get a fiscal note until it was too late to do anything. People had been notified. We do have several others who would like to testify, I'm sure, on the bill. So I think what we will do, do you have any further comments Mr. Arnoldt?

Mr. Arnoldt. No. Other than regarding the 100%. I get excited when I want to testify, I've got so much I want to say without developing it. There are a whole gamut of things in the bill so its almost like throwing it out of context when I give you a little something without developing it. I'm sorry for that, I get too excited someties, but I can really develop it at someother time is you would like.

Sen. Hackney. By Friday?

Mr. Arnoldt. I could probably give you material that was done by the Winkleboss Actuarial firm by Friday. It speaks to that whole area. I can get material.

Sen. Hackney. I think we would like to see whatever material you've got. We'd also like to see anything that projects the longterm effects of something like this 20 years down the road. Because there is a cumulative effect there.

Mr. Arnoldt. ~~This~~ THE FISCAL NOTE would show the longterm effect for this particular bill and the study would show what other states are showing as far as benefits.

Sen. Fahrenkamp. As that fiscal note is prepared, I'd like to ask Mr. Arnoldt, what are the possibilities of including in that some comparison relating to 100% rather than 50%. I know this bill speaks to 50% of the cost being borne by the retiree and I'd like to see some figures comparing with 100%. Would that put you in a bind?

Mr. Arnoldt. No, no problem. The 100% I was speaking to . . .

Sen. Fahrenkamp. I'm well aware of the two differences.

Mr. Arnoldt. If the State were to pay the total cost, the fiscal impact would be just doubled what the fact would be now. If the employee paid the full cost, it would be zero.

Sen. Hackney And you won't know what full cost is until you get . . .

Mr. Arnoldt. Right, the data back from the carrier.

Sen. Sturgulewski. There are two things that I would like to have. One you can answer now and one hopefully you can address on Friday or whatever date. Could you or someone give testimony on the availability of medical coverage for people in this class in fact if they do not come through a plan say that was offered by the state, is it really possible that any kind of reasonable rate to

acquire that service independently. Then a question to you on a comment you made when you referred to the 40 to 69% final salary necessary to maintain a standary of living. Were you talking that that is necessary in coordination with those benefits that the state typically gives?

Mr. Arnoldt. No, in order to maintain the same standard of living that you have the day after you go on retirement, dependingon your salary range, it runs from 40 and 69% of your final salary. That same amount of money would be needed to maintain the same standard of living.

Sen. Sturgulewski. OK, in other words, not taking into account the fact you may or may not receive other benefits.

Mr. Arnoldt. It takes into consideration that you are receiving other benefits.

Sen. Sturgulewski. OK, that's what I'm trying to get.

Mr. Arnoldt To go back to the availability of medical. I think we are only speaking to the audio/dental and visual because the retiree to day does get major medical.

Sen. Sturgulewski. I realize that. No, the bill under consideration.

Sen. Hackney. It really is just an expansion of present benefits, isn't that a fair statement?

Mr. Arnoldt. Yes.

Sen. Hackney. No other questions? Thank you Mr. Arnoldt. Cherie Shelly, representing APEA, NARP, and NART.

Cherie Shelly. Mr. Chairman, for the record I am Cherie Shelly. I am general counsel for Alaska Public Employees Association and I am also speaking to day on behalf of the National Association of Retired People and Retired Teachers as their lobbyist fell on the ice and hurt a leg and can't be here today. Basically, I work with that organization in drafting legislation. The impeus was APEA now represents current state employees who will eventually become retired. And the information I received from the Retired Persons Association was that these individuals now only have major medical coverage and they found it difficult to procure and expensive to procure audio, visual and dental coverage at a time in their life when it would be most beneficial. With that in mind we requested Senator Ray to introduce this legislation.

Sen. Fahrenkamp. Was your request as representing APEA, NARP and NART, was your request then for a 50% of the cost being borne by the employee or retiree?

Cherie Shelly. When I was working on drafting the legislation, I called Mr. Arnoldt and asked him what his thoughts were on the legislation and based on my conversation with him I consulted the other people and decided it would at least be beneficial to have them pick up 50% of the cost. They thought that was terrific if they could get anything.

DRAFT

Sen. Fahrenkamp. You felt then that it was a matter of 50% or nothing, is that correct?

Cherie Shelly. Well considering the constraints we hear on financing legislation this session . . . .

Sen. Hackney. They'll be back for the other 50% next year.

Sen. Sturgulewski. Just briefly, I would be interest if there is any documentation or other testimony about the difficulty of insurance and any coverage in those areas. You've made a statement and if you have any further information on that I would appreciate it.

Cherie Shelly. I'll try to get you some backup on that.

Sen. Sturgulewski. Fine. Thank you.

Sen. Hackney. Thank you Cherie. Bob Cooksey?

Bob Cooksey. Thank you Mr. Chairman. I'm Bob Cooksey with NEA and I am here today in Bob Van Houte's absence and since I'm his assistant in this lobby activity, I'll probably be before you from time to time when he is out of town and tied up in some other matter. I'm here in support of the concept of SB 24. It for the retireed folks, these expenses come at a time when their salaries are significantly reduced and if the person is trying to buy the insurance as an individual, as I understand, it is more difficult for them to get. We surely would support the idea of having it provided for them. I feel even without additional cost in order to get the program going we surely support the idea of sharing the costs. This impact upon their income is even more significant, I feel, once they have been in retirement for 3 or 4 years. Especially with the current inflation.

Sen. Hackney. Bob, do you have any comments on the half cost as compared to any other schedule there?

Bob Cooksey. Well, my preference would be that those folks would not have to contribute toward the costs. I don't know the cost figures, but we would surely go along with the idea of sharing that cost in order for them to get the benefits at all. I could see that without some kind of coverage that even what may look like a good retirement income could be wiped out quickly with medical costs, major eye surgery, something of that nature.

Sen. Hackney. Further questions? Thank you.

Bob Cooksey. Thank you. We will be around if you have anymore questions.

Sen. Hackney. Is there anyone else who wanted to testify on SB 24? If not, we will hang onto this until Friday and ask Mr. Arnoldt to come back with the information that he will develop. I think we only have a couple of people who want to testify on SB 35 and I suspect that will go along pretty fast, so let's take up SB 35. An Act relating to adult education and Jim Beima, I guess you are on tap.

Sen. Ray. The idea of this bill is more or less self-explanatory. It allows those people who are retired from the state system and are over 65 to participate in the auditory, visual and dental insurance. The people pay 1/2 of the cost of the insurance and their retirement system from which he's receiving benefits shall pay the other 1/2.

We have a problem with these people who, because of the terrible inflation costs in auditory, visual and dental insurance that the people in that age group need it now more than they have ever needed it and they are less equiped to pay for it. So, by paying for it here rather than through some type of medicaid, general medical it just depends on how we want to pay for it. We are going to pay for it sooner or later. This way the recipient pays 1/2.

Sen. Hackney. According to testimony we had heard previously, the cost of a plan like this would be somewhere in the neighborhood of $300 per year. Would you have an objection to an amendment to the bill that would require the person electing to have this insurance pay the full cost of it? That would make the service available to them at a price that no other way could they ever hope to obtain it, but at the same time it would remove the fiscal burdens from the retirement system.

Sen. Ray. I would have no objection to that Mr. Chairman. A half of loop is better than no loop.

Sen. Hackney. Personally I am very supportive of this but it was the price tag . . .

Sen. Fahrenkamp. I think perhaps you may have in mind CSHB 26, which is coming through with identical wording except that the person electing to have the insurance under these paragraphs pay the cost of insurance. I think the whole thing here is whether or not our retirees, whether or not we feel they should have the help of half way assistance on this after they have reached 65 or whether or not they should pay it off for themselves. I am wondering what this is going to do to some of our low bracketed people, and if we will still touch the problem at all under CSHB 26.

Sen. Sturgulewski. As I remember, we had some superb testimony on this whole thing and the need is there, the impact is very great. But the problem we ran into is that nobody has a plan like this. I think we are probably going to have to come under some type of a group plan in order to make it available for these people. I think just the fact that it's there, we're probably going to take care of a major part of the problem. Were you able Mr. Chairman to check that out and find in fact that that kind of insurance is available. Do we know that this is an appropriate way to go.

You don't have the same kind of thing where you are able to set your rates because you know just a number of people that are going to be involved. It's a little bit different kind of thing. You are offering a service without having the normal number of people plugged into it. Here it's going to be a very optional thing. Are they going to have those programs actuarily sound. Can we check that at all.

Sen. Hackney. I like the approach of making it available. And here again Senator Fahrenkamp I think what we've got to think about is whether or not we can continue to afford to offer all these side benefits to those who retired. This is a _____ that they are actually paying for, but the cost of it is peanuts compared to what they would be if they could buy it on the open market, and they can't.

Sen. Ferguson. I'd like to move that we, on page 1, line 17 delete "one-half" and line 18 put a "." after "insurance" and strike the rest of the sentence.

Sen. Ray. I would object to that. Not for the reason you anticipate. The retirement system is the system we are talking about that would allow these people to go in. If you delete any reference to the retirement system, they don't have a vehicle. So, rather than say under this paragraph shall pay the full cost of the insurance, I would ask for the indulgence of they shall pay "90%" of the cost of the insurance and the retirement system from which they are receiving the benefits shall pay the other 10%. That will give them an umbrella at a considerably reduced cost to the state.

Sen. Ferguson. I'll so move.

Sen. Sturgulewski. Why the 10%/

Sen. Ray. For the simple reason that if you don't have an unbrella or vehicle in order to put these people into an insurance program, that's what we are talking about.

Sen. Sturgulewski. But as a matter of fact, you could have it that any percentage or no percent if you had wording that would bring them in the plan. It's not necessary is it, to make a contribution?

Sen. Ray. You could make it 95/5% if you want, as long as there is some percentage requirement underneath . . .

Sen. Sturgulewski. Let's take a look at the dollars. What are we talking about because we do have the municipalities in and there is an impact there. 10% would be $64,000 there and we are talking about $190,000 or thereabouts. I don't want to debate the issue, but I would like to see it as a minimal thing. I think we are suppose to be in here as a cost-conscience legislature and I realize that is up to Finance, but what we really need is a vehicle for these poor people that can't get hold of any insurance. I think that's concern. Would anyone

go for a 95/5%?

Sen. Hackney. 90/10 is the motion that was made

Sen. Ray. I would promise my colleague that if it is an unreasonable figure certainly I would assist Sen. Hackney in increasing the contribution level of the retiree.

Sen. Ferguson. I move that we move out SB 24 as amendedwith individual recommendations.

Sen. Hackney. No objections? So ordered.

IN THE HOUSE BY THE STATE AFFAIRS COMMITTEE

CS FOR HOUSE BILL NO. 26

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to insurance coverage for persons receiving benefits under the public employees' and teachers' retirement systems."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 39.30.090 is amended by adding a new paragraph to read:

(15) A person receiving benefits under AS 14.25 or AS 39.35 may obtain auditory, visual, and dental insurance for himself under this section. The level of coverage for persons over 65 shall be the same as that available before reaching age 65 except that the benefits payable shall be supplemental to those afforded under the federal old age, survivors, and disability insurance program, if any. A person electing to have insurance under this paragraph shall pay the cost of the insurance. The commissioner of administration shall adopt regulations implementing this paragraph.

SB 32

Amy Webb, Division of Corrections
Walter Jones, Division of Corrections

Amy Webb. We're supporting adoption of the interstate corrections compact. This compact would be a viable means to place prisoners in institutions outside of the state in other state institutions in order that they could receive special treatment (inaudible) If their families were residing in another state it would be a step in the rehabilitative program to keep them near their family so they could continue their family relationship.

It would also offer Alaska citizens the opportunity to return to Alaska to serve time were they to become involved in criminal activity outside the state.

Sen. Fahrenkamp. I'd understood already that prisoners could be taken out of state now.

Amy Webb. The majority of our outside prisoners are in the federal bureau of prisons. That is not included under the state.

Sen. Fahrenkamp. If I am arrested and wind up in a correctional facility and I want to get a certain training that they are offering in Florida, the State of Alaska would pay my way down right?

Amy Webb. If you were classified to that facility.

Sen. Fahrenkamp. If I were qualified and classified, what qualifications would make a person qualified, if they had a traning there that you couldn't get here?

Amy Webb. That would be one consideration. Your custody level, your behavior in the institution, you would probably be given some testing here to see if you were intellectually and physically able to be involved in that type of program.

Sen. Fahrenkamp. Once there and the times comes to get out of the institution, then we ship them back here to let them out?

Amy Webb. Right, unless they don't want to return.

Sen. Fahrenkamp. We would train them while in the institution and ship them wherever they went in the exchange program and when they get out, if they want to come back, we pay their way.

Amy Webb. That's correct.

Sen. Ferguson. Under the federal bureau plan, the feds classify the prisoners and send them to a state that they think that those prisoners should go. Under this state plan, who classifies these people?

Amy Webb. We would classify the people that we had jurisdiction over. An Alaska citizen in another state could request to come back to Alaska to serve time if at that time the classification was done by the sending state. The state that has jurisdication would approach us.

Sen. Fergusn. Do we pay the same rate the other states pay for being custodian of the prisoners?

Amy Webb. No, we would pay the man day cost of care at that state at that time which is usually less than it is compare d to Alaska

Sen. Ferguson. The reason I aska that question, the fiscal note is one of those where we get a zero. Under the federal system I think it goes anywhere from $16 per day for prisoner care up to about $46 per day.

Amy Webb. I have not followed the states; Florida is $25 per day for a woman.

Walter Jones. There are more than one reason for wishing to become a member of this compact. The main reason is that we would be able to expand our program capability and it will probably be fiscally cheaper to go this route than not to go this route. However, the federal bureau of prisons won't be able to continue to take Alaskan prisoners who are management problems that need maximum security in order to safeguard their life forever. They are running 33% over capacity in their own facilities; they have to go before Congress and get their money to build their facilities. They are concerned that someday Congress is going to cut them off and say get rid of those state prisoners that you take care of and you will have more room for federal prisoners. We are trying to look ahead in this matter. We are not saying that we should send our Alaskan prisoners all over the country, but we are saying we should have some options to take care of specialized needs of prisoners wherever the program will help reintegrate the individual back into the community. Especially if this prisoners resources are in another state where he will go eventually anyway. The theory is that it is easier for a person to go from one custody to a lesser custody, finally on work release and then out on parole. We already have the interstate compact for probation and parole which allows us to supervise each other's probations and parolees in any state in the union.

What this compact does is allow us to do the same thing with prisoners. Therefore they have a much more enhanced and flexible program in terms of security or rehabilitative services.

Sen. Ferguson. I don't have a problem with sending some prisoners to other places. What I'm looking at is, all of a sudden we send 5 prisoners out and they send 15 to us.

Walter Jones. To take care of that problem, each state has its own capability to reject to accept. If we are full up and don't have any room or if we can't handle that type of management problem we can say no, and they can say the same to us.

Sen. Sturgulewski. Are you also able to do that if you have financial limitations at that period of time? Does your ability to say no go into that area?

Walter Jones. Yes.

Sen. Fahrenkamp. In transporting these prisoners back and forth, do you not have to have an officer accompany these prisoners?

Amy Webb. A State Trooper would accompany them.

Sen. Fahrenkamp. How do we manage the budgeting?

Walter Jones. That would be the State Troopers expense. Our fiscal note was the expense to our department, we can't speak for another department.

Sen. Fahrenkamp . Then, this will bring about an increase in expenditures in that will bring about more travel from another department.

Walter Jones. Perhaps not, it may bring about more travel. I dougt if it will bring about more money on tha basis that because of the decreased cost of institutionalization in the South '48 as copared to the manday costs of an institution in the Alaska facility.

Sen. Ferguson. Are our jails in Alaska at the maximum?

Walter Jones. Yes.

Sen. Ferguson We passed a bond bill, how long will it take for those projects to be done, about 3 years?

Walter Jones. I would guess if everything goes according to schedule a miminum time of 1981 to 1984.

Sen. Ferguson. The feds are at a maximum. In Alaska I assume we get some federal prisoners from Alaska that we have to send outside to federal prisons.

Walter Jones. I don't know about the federal situation, I know we take care of a few federal prisoners for the feds, but its much less so than in terms of how many we send out. We have

4

167 adult prisoners with the federal system right now. I estimate we have less than 30 federal prisoners in our state now.

Sen. Ferguson. Will the federal prisoners, will they be able to particiate in this program.

Walter Jones. That might be a possibility, it depends on what kind of arrangement we could make with the director of the federal bureau of prisons. I don't know yes or no. We can only speak for Alaska prisoners on this bill that are under state jurisdication.

Sen. Fahrenkamp. Moved the bill out with individual recs

Sen. Ferguson. I object. Is there another referral for this bill? Then I have no objection, I still think that there is a financial implications.

Sen. Ferguson. Could you have your staff write a letter to judicial to see if thye would ask for a fiscal note?

Sen. Hackney. OK

POSITION PAPER/Department of Health and Social Service

POSITION PAPER

SENATE BILL NO. 32

"An Act adopting the Interstate Corrections Compact; and providing for an effective date."

The Department of Health and Social Services and the Division of Corrections are in support of Senate Bill No. 32.

Alaska is presently a party to the Western Interstate Corrections Compact along with 11 other states. There are presently 16 member states to the Interstate Corrections Compact; 5 of those states are also parties to the Western Corrections Compact. In effect, joining the Interstate Corrections Compact would increase Alaska's out-of-state placement resources for prisoners by 50 percent; 11 additional states.

The Interstate Corrections Compact was initiated in order to allow an exchange of prisoners for the purpose of treatment and long-range release planning. Also, the Compact provides a means of placing prisoners out of state for protective purposes.

Alaska has prisoners with special needs. Membership in the Interstate Corrections Compact would expand the Division of Corrections ability to meet these special needs, and provide the most effective rehabilitation programs on an individual basis without increasing the cost of care.

Alaska would maintain jurisdiction over prisoners confined out of state. Alaska would also have the authority to inspect out-of-state facilities and to communicate with Alaska inmates.

President of the Senate
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. President:

Under authority of art. III, sec. 18 of the Alaska Constitution, I am transmitting a bill which would make Alaska a party to the Interstate Corrections Compact.

Under current law, Alaska is a party to the Western Interstate Corrections Compact, along with eleven other states. This measure is similar to that compact; however, it allows the state a broader choice of correctional facilities nationwide in which prisoners may be incarcerated than are presently available. By joining the Interstate Corrections Compact, Alaska will be able to place offenders in an additional eleven states. It is not necessary to withdraw from the Western Interstate Corrections Compact in order to become a party to this compact.

Enactment would enable the Division of Corrections to enter into contracts with party states for incarceration o_ our prisoners. Thus a wider range of rehabilitative programs would be available without the increased costs attendant in establishing such programs within our own correctional facilities.

Jurisdiction over persons confined out-of-state is retained by Alaska although such persons would still be subject to the rules of the institution where confined. The state also retains the power to inspect the facilities utilized and to visit the inmates.

Sincerely,

Jay S. Hammond /kws

ALASKA
MEDICAL RECORD ASSOCIATION

Feb. 19, 1979

Senator Glenn Hackney, Chairman
Health, Education & Soci l Services Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney: Re: S.B. 33 (Hospital Inspection Act)

Members of the Alaska Medical Record Association have recently reviewed a copy of the Senate Bill 33. Our membership has voiced several concerns regarding the bill and its implications.

1) We feel that it would directly affect the medical record departments in terms of cost containment, i.e., time, supplies and storage. Each individual consent wouldn't cost much but the accumulation of costs would not meet the criteria of keeping health care costs down. This cost, whether born by the facility or by the federal government is eventually passed on to the patient either directly or through taxes.

2) The proposed bill is a duplication of already existing federal regulations which authorize the surveyors to examine the Medicare and Medicaid records and which also state specifically what is necessary for an adequate medical record. Since most, if not all, hospitals in Alaska have more than a 10% Medicare/Medicaid admission rate, we feel that it is not serving any useful purpose to examine the records of those patients who are not Medicare and/or Medicaid patients.

3) Many patients may not be signing an 'informed consent' depending on how the consent is worded, on how it is presented and that the fact that in effect the patient would be signing 'under duress" (More paperwork to fill out before being admitted.)

I trust that our views on the subject of this bill will be informative and helpful to you.

Sincerely,

Marlene LaPlante

SERVING IN THE WEST SINCE 1856

February 19, 1979

The Honorable Glenn Hackney, Chairman
Committee on Health, Education & Social Services
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

Thank you for the opportunity to express our thoughts on Senate Bill 33 (An Act relating to the inspection of hospitals and their functions; and providing for an effective date)

Senate Bill 33 includes two sections on which we will comment:

1. Section 18.20.080 (a). Inspections; Submission of Plans for Alterations.

2. Section 3. AS 18.20.085 (b) relating to the inspection of additional medical records and requiring the hospitals to get the appropriate consent for such inspection.

Our primary concern regarding the bill is the intent. As we already are subject to inspections by the State, Medicare and VA, as well as follow-up inspections to determine compliance, it seems as if this bill is promulgating duplicate efforts in information.

In the state of Texas, the legislature passed a law relating to inspections of hospitals which has merit. Those hospitals receiving accreditation under inspections by the Joint Commission on Accreditation of Hospitals are deemed automatically approved for state licensure. Also, a state agency seeking an inspection of a hospital in Texas must first use all data coordinated by other agencies before conducting an inspection. There is much duplicative data available, and the Texas Hospital Association estimates that they will save in excess of $12 million dollars by cutting down inspection time.

MEMBERS OF THE SISTERS OF PROVIDENCE CORPORATION—ALASKA: PROVIDENCE HOSPITAL, ANCHORAGE—WASHINGTON: PROVIDENCE MEDICAL CENTER, SEATTLE—THE DePAUL RETIREMENT RESIDENCE AND MOUNT ST. VINCENT NURSING CENTER, SEATTLE—PROVIDENCE HOSPITAL, EVERETT—ST. PETER HOSPITAL, OLYMPIA—ST. ELIZABETH HOSPITAL, YAKIMA—OREGON: PROVIDENCE HOSPITAL, MEDFORD—PROVIDENCE MEDICAL CENTER, PORTLAND—PROVIDENCE CHILD CENTER, PORTLAND—ST VINCENT HOSPITAL AND MEDICAL CENTER, PORTLAND—CALIFORNIA: PROVIDENCE HOSPITAL, OAKLAND—PROVIDENCE HIGH SCHOOL, BURBANK—SAINT JOSEPH MEDICAL CENTER, BURBANK

Additionally, as the Division of Health and Social Services already has access to Medicaid medical records, we don't see the merit of requesting inspection of additional records. The time and expense of obtaining consent from patients to release their medical records to state inspectors as well as the time and expense of pulling the charts and refiling them is an unnecessary burden to place on hospitals.

Thank you for the opportunity of responding to SB 33, and if there are other bills relating to health care in which our response would be helpful, please feel free to call on us at any time.

February 19, 1979

Glenn Hackney
State Senator
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

I support Senate Bill No. 33. However, with the expertise of employees now in the medical records departments I feel that the percentage of records inspected could/should be minimal. One of the primary responsibilities of medical record department personnel is to check for completeness so a brief review should be adequate.

Consent for reviewing the record from the patient should be no problem if he/she understands the purpose of the review. If this is a routine procedure on admission it would eliminate attempting to locate this person at the time of review. I do have one question. Normally, consents are good only for a specified time - usually 60-90 days - depending upon the policy of the hospital. If we are required to get a current consent from the patient - this could involve a lot of time and expense and possibly very little response.

Thank you for calling attention to SB 33 and requesting comments.

Sincerely,

Valda B. Stasch

Dear Senator Hackney:

Thank you for your letter of February 9, 1979, regarding Senate Bill 33. We appreciate an opportunity to air our views on this very important bill.

1. Section 18.20.080 - Inspection Submission of Plan. Fairbanks Memorial Hospital is very much against this section being changed. We believe that the changes included in this section will accomplish nothing other than to create hard feelings between the hospital and the State of Alaska surveyors. The hospital recognizes the responsibility of the Department of Health and Social Services to make sure that patient safety is maintained in a health care facility, but in the past when unannounced "surprise" inspections were conducted, it was the experience of this hospital that nothing positive came out of these.

   Since most hospitals in this state are much smaller than Fairbanks Memorial Hospital, they do not have the back-up administrative people to put in charge when the administrator is out of town or away from the facility. I personally know of several situations where health surveyors have presented themselves at a facility and demanded the staff bow to their every need. This not only disrupted services but, I believe, provided a very unsafe atmosphere for the patients. In both of these facilities of which I personally speak, several professional people were ready to walk off the job after receiving "orders" from the inspectors.

   I believe that if additional inspections are necessary that: (1) They should be announced. This will give the hospital

time to investigate the matter and to put its resources together so as to save the Department additional time when visiting the facility. (2) The visit should be preceded by a letter stating exactly the nature of the visit and what complaint they have received. This will give the facility a better chance to again look into the nature of the complaint and possibly in some instances could save surveyors travel time and expenses. I believe that no hospital in this state is interested in jeopardizing patient safety, but if you have seen the Department survey a hospital and the disruption and antagonism that exists between the inspectors and the staff, you would easily recognize that in many cases this jeopardizes the patient more than the original complaint might.

2. The second change would be changing the age of a patient from 19 years to 18 years. The hospital has no objection to this change since the hospital is required to keep all patient records for a minimum of nine years past discharge date.

3. The third change involved an inspection process for medical records by the state surveyors. The hospital is very much against this since Fairbanks Memorial Hospital and all hospitals in the United States are undergoing grave criticism for the cost to the patient. This portion of Senate Bill 33 will again increase that cost to each patient since it will be the responsibility of the hospital to see that releases are signed on patients other than Medicaid patients. Fairbanks Memorial Hospital currently runs an occupancy of approximately 10% Medicaid patients. We believe that this sampling of the medical records quality maintained at the hospital should give the licensing team adequate documentation as to whether our records are deficient. My other question to the Department would be if 10% of the records are not adequate to maintain the sampling, how many would be required? If the Department feels that the Medicaid patients are not adequate for a sampling basis, the State of Alaska should be responsible for getting those release forms signed rather than the hospital. This could be performed by hospitals giving those patients that had been admitted over the past year names and addresses to the state and, in turn, the state could write to each of those patients and attempt to get a release form signed.

I am also enclosing comments on the bill sent to you by the Alaska State Hospital Association. Again, we appreciate you letting us comment on this and look forward to your continued support of the hospital.

Sincerely,

Tom Mingen

SENATE BILL NO. 33

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the inspection of hospitals and their functions; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.20.080(a) is amended to read:

Sec. 18.20.080. INSPECTIONS; SUBMISSION OF PLANS [INSPECTION AND CONSULTATION] FOR ALTERATIONS. (a) The department shall make annual inspections and investigations of all hospital facilities and functions it is required by secs. 10 - 130 of this chapter to regulate. Additional inspections may be made when necessary to determine compliance with department standards. The department shall adopt regulations setting out inspection procedures in detail, including a description of the circumstances in which an inspection in addition to the annual one may be considered necessary, and the procedural safeguards which must accompany it.

* Sec. 2. AS 18.20.085(a) is amended to read:

(a) Unless specified otherwise by the department a hospital shall retain and preserve records which relate directly to the care and treatment of a patient for a period of seven years following the discharge of the patient. However, the records of a patient under 18 [19] years of age shall be kept until at least two years afte. the patient has reached the age of 18 [19] years or until seven years following the discharge of the patient, whichever is longer. Records consisting of X-ray film are required to be retained for five years.

Would be defined in regulations

* Sec. 3. AS 18.20.085(b) is amended to read:

(b) The department shall by regulation define the types of records and the information required to be included in the records retained and preserved under (a) of this section and set out a detailed procedure for an inspection process to assure that the records are complete. Medical records from which a patient can be identified may be examined by the department only if the patient has granted written consent as to them. The regulations may require hospitals to offer patients who have not already signed information release forms the opportunity to consent to the inspection of their records by only department surveyors in connection with licensing the facility. The regulations may also set statewide limits on the percentage of the total number of records which surveyors may examine in any hospital. The department may by regulation specify records and information to be retained for longer periods than those set out in (a) of this section.

* Sec. 4. This Act takes effect immediately in accordance with AS 01.-10.070(c).

SENATE BILL NO. 33

"An Act relating to the inspection of hospitals and their functions; and providing for an effective date."

The Department of Health and Social Services supports Senate Bill No. 33. Recent Alaska Court decisions have found warrantless administrative searches to be unconstitutional in some regulated industries and that hospital licensing surveyors may not spot-check patient records without written consent from the patient. These spot-checks were conducted only for the purpose of determining compliance with record keeping regulations.

In light of these recent court decisions it is necessary to amend AS 18.20.080 to provide for a comprehensive structure of statutes and hence Departmental regulations which set out specific inspection procedures. These new regulations will define inspection procedures so that licensees are put on notice as to what is expected of them and what limitations are imposed on the inspectors.

If the proposed amendments are enacted, the Department is prepared to implement them as soon as possible by regulation, so that the inspection of all regulated functions can continue, limited only by the consent requirement for checking patients' records.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

All assumed costs for the travel and contractual lines are based on current information relative to airfare rates, advertising order rates, room rental and anticipated telephone charges.

The proposed regulation amendments will require public hearings before final adoption by the department. Costs associated with these hearings include the advertising of the regulations in state newspapers and legal transcription services at the public hearings. The travel amount requested is for representatives of the Departments of Law and Health and Social Services to travel to Anchorage for the public hearings and to meet with Alaska Hospital Association members concerning the prepared regulations.

These costs are a one time expenditure.

A-33

January 15, 1979

President of the Senate
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill providing explicit authority for the inspection of hospitals and their functions when licenses are granted or renewed.

Alaska and United States Supreme Court decisions (Woods & Rohde v. State, 565 P.2d 138 [Alaska 1977]; Marshall v. Barlow's Inc., 46 U.S.L.W. 4483 [May 23, 1978]) have recently found warrantless administrative searches to be unconstitutional except in certain traditionally regulated industries. In such regulated industries there must be a comprehensive structure of statutes and regulations which set out the inspection procedure in detail so that licensees are put on notice as to what is expected of them and what limitations are imposed on the inspectors. The same system must be present to justify the issuance of a warrant in an unregulated industry.

In addition, in an appeal from an administrative hearing decision, an Alaska superior court judge has ruled that hospital licensing surveyors may not spot-check patients' records to determine compliance with record-keeping regulations unless the patient has granted previous written consent. (Cordova Community Hospital v. State, unpublished oral opinion, 3d Dist. Superior Court, No. 77-19025 [Alaska, Sept. 5, 1978]) That court held that the present term "hospital facilities" in AS 18.20.080 can be interpreted to refer only to the physical plant. Therefore, sec. 1 of the attached bill would extend inspection authority to all functions being regulated.

Sec. 2 of the bill merely changes the records retention age to bring it into conformity to AS 25.20.010 which sets the age of majority at 18, while sec. 3 prohibits the examination of records by Department of Health and Social Services surveyors without the patient's consent.

If the proposed amendments are enacted, the Department of Health and Social Services is prepared to implement them as soon as possible by comprehensive regulations, so that the licensing inspections can continue, limited only by the consent requirement for checking patients' records.

Sincerely,

S/JSH

Jay S. Hammond
Governor

Re: S.B. 33 (Hospital Inspection Act)

Dear Senator Hackney:

The Alaska State Hospital Association recently received a copy of Senate Bill (SB 33) (An Act relating to the inspection of hospitals and their functions; and providing for an effective date.). After reviewing the bill, several concerns surfaced as to the intent and/or necessity of the bill.

1. Hospitals throughout Alaska and the nation are making a concerted effort to comply with the American Hospital Association's (Voluntary Effort) VE for Cost Containment guidelines. Existing regulations already subject hospitals and long term care facilities to many expensive and time consuming inspections annually. In studies in Michigan and South Carolina it has been confirmed that government regulations (state and federal) add $21 to $25 to every patient's bill. Most of the regulations being proposed under this proposed bill (18.20.080, 18.20.085) either duplicate or unnecessarily add to already existing regulations covered in Medicare and Medicaid regulations.

2. If you should go further and implement these regulations we would like to point out that Section 1 18.20.080 does not include a requirement for a pre-notification of intent to survey nor a statement of the purpose for the survey. ASHA recommends that a reasonable advanced notice be required on the part of the surveyor and that the purpose of the visit be clearly stated to allow the institution time to prepare for the visit. Through this communication staff disruptions can be reduced and the surveyors time will be more efficiently utilized.

3. Section 3 18.20.085(a) is similar to existing practices of our membership and in fact is written in the federal guidelines under Medicare (Section 405.1026 page 8044 - sub-section f and g) and clearly indicates what is considered a completed medical record. This appears to be a clear duplication and not necessary.

4. Section 3 18.20.085(b) amended section (a) lines 8 - 11, proposes that written consent be obtained by hospitals for medical record inspection authorizations from patients who have not already signed consent forms for release of information. Should such regulations be initiated, the burden of labor and expense in obtaining those releases should <u>not</u> rest with the hospitals, but <u>should</u> rest with the state. As written, the regulations would necessitate additional staffing and expense in restructuring a new medical records filing system which seems totally inappropriate.

RE: Senate Bill #33
Hospital Inspections

Dear Senator Hackney:

Thank you for the opportunity to express my opinion of Senate Bill #33. I strongly oppose the passage of Senate Bill #33 for the following reasons:

1) The bill is a duplication of existing federal regulations. Current federal regulations provide for the inspection of all Medicare and Medicaid patient medical records as well as health and safety inpsections of all facilities which provide care to Medicare/Medicaid beneficiaries. Why is it necessary for the state to have duplicate regulations?

2) Medicare has been in existence since 1965 and Medicaid in Alaska since about 1971 or 1972. In that time surveyors have surely been able to determine that Medicare and Medicaid patients are treated equally or better than other hospital patients. The method of payment has nothing to do with the quality of care provided in health facilities. Methods of payment may vary the quantity of services provided and in this aspect, the Medicare/Medicaid patients are far ahead of the patient who pays his/her own hospital bill. In 1978 Medicare/Medicaid patients were 21.9% of Valley Hospital's patient census. The Dept. of Health, Education and Social Services, Section of Health Certification and Licensing currently has the authority to review any and all of these patients' medical records. This is an adequate sample of patient records and to require inspection of additional medical records is unnecessary, time consuming, costly to us all, threatens the privacy of medical matters, and does not improve in <u>any way</u> the quality of services provided to Medicare/Medicaid patients.

3) The Dept. of Health, Education and Social Services will impose the burden of acquiring consents for inspection of medical records on the hospital rather than acquire consent themselves. This added administrative burden will result in higher hospital costs for <u>all patients</u> with little if any effect on quality or quantity of care.

Thank you again for requesting my comments. In the future I will be happy to continue to respond to any hospital legislation which comes before you.

Attached is a copy of a very informative and clearly written letter I recently received from the Executive Director of the Alaska State Hospital Association. His comments as you can see, I support wholeheartedly. Thank you again.

Dear Senator Hackney,

RE: S.B. 33 HOSPITAL INSPECTION ACT

I would recommend that some change be made in Section 1 18,20.080 to indicate that advance notice be given to health care institutions before the arrival of Survey Teams from Medicare/Medicaid. In the past when we have not had advance notice it has been a great inconvenience to rearrange schedules and get requested records to the inspectors within a reasonable time after they arrive.

I protest the idea of the hospital being responsible for obtaining patient consent for review of their records by Medicaid/Medicare reviewers. I feel this should be a responsibility of the reviewer.

Sincerely,
Robert L. Groff

Re: S.B. 33 (Hospital Inspection Act)

Dear Senator Hackney:

The Alaska State Hospital Association recently received a copy of Senate Bill (SB 33) (An Act relating to the inspection of hospitals and their functions; and providing for an effective date.). After reviewing the bill, several concerns surfaced as to the intent and/or necessity of the bill.

1. Hospitals throughout Alaska and the nation are making a concerted effort to comply with the American Hospital Association's (Voluntary Effort) VE for Cost Containment guidelines. Existing regulations already subject hospitals and long term care facilities to many expensive and time consuming inspections annually. In studies in Michigan and South Carolina it has been confirmed that government regulations (state and federal) add $21 to $25 to every patient's bill. Most of the regulations being proposed under this proposed bill (18.20.080, 18.20.085) either duplicate or unnecessarily add to already existing regulations covered in Medicare and Medicaid regulations.

2. If you should go further and implement these regulations we would like to point out that Section 1 18.20.080 does not include a requirement for a pre-notification of intent to survey nor a statement of the purpose for the survey. ASHA recommends that a reasonable advanced notice be required on the part of the surveyor and that the purpose of the visit be clearly stated to allow the institution time to prepare for the visit. Through this communication staff disruptions can be reduced and the surveyors time will be more efficiently utilized.

3. Section 3 18.20.085(a) is similar to existing practices of our membership and in fact is written in the federal guidelines under Medicare (Section 405.1026 page 8044 - sub-section f and g) and clearly indicates what is considered a completed medical record. This appears to be a clear duplication and not necessary.

4. Section 3 18.20.085(b) amended section (a) lines 8 - 11, proposes that written consent be obtained by hospitals for medical record inspection authorizations from patients who have not already signed consent forms for release of information. Should such regulations be initiated, the burden of labor and expense in obtaining those releases should <u>not</u> rest with the hospitals, but <u>should</u> rest with the state. As written, the regulations would necessitate additional staffing and expense in restructuring a new medical records filing system which seems totally inappropriate.

Since most hospitals in Alaska have medicare/medicaid admissions in excess of 10% of their total admissions, it would seem that those charts should be an adequate sample of patients' records and that inspection of additional charts is totally unnecessary, time consuming and not in the best interest of cost containment or patient privacy. To my knowledge, there is no evidence to support any allegations that medicare/medicaid records differ in completeness or content from other admissions.

The Alaska State Hospital Association is hoping to have a bill introduced this year similar to the Texas law which requires surveys to exempt hospitals certified by the Joint Commission on Accreditation of Hospitals as deemed hospitals requiring surveyors to utilize the information obtained from the JCAH findings. In addition, the bill would require spacing of surveys to reduce the cost and disruption that is created by frequent surveys and some of the repetition in data gathering.

I trust this information will be helpful to your Committee as you consider this amendment, particularly its necessity and its intent.

Sincerely,

Max F. Kersbergen
Executive Director

Ketchikan General Hospital
3100 TONGASS AVE.
KETCHIKAN, ALASKA 99901
907 – 225-5171

February 13, 1979

The Honorable Bettye Fahrenkamp
Alaska State Senator
Pouch "V"
Juneau, Alaska 99811

Dear Senator Fehrenkamp:

In answer to your request of February 2, 1979, regarding Senate Bill 33, I am enclosing a copy of a letter which the Executive Director of our Hospital Association wrote to Senator Glenn Hackney on January 30, 1979. This will state some of the concerns of the Hospital Association in general. It also highlights our concern for cost containment in as much as it is possible for hospitals to contain costs.

In regard to Ketchikan General Hospital and our specific response to the legislation, I would like to offer the following comments:

1. We undergo continuing surveys from all of the various agencies which is getting close to the point of being actual harrassment. Medicare and Medicaid plus the state licensing in this state are very thorough in their inspections. The last licensing survey was conducted by two people and lasted three days in our facility. I might add that during that time both myself and my staff were totally tied up with these activities. We feel these inspections could be carried on in a much better way which would insure the proper delivery of care to Alaskans.

2. I believe other states have passed legislation in which the inspectors, regardless of which agency they represent, must review documentation from the latest survey to be held in the facility to see if there is any need for a check-up and an abbreviated survey would be more cost effective.

3. I do take exception to Section 3. AS 18.20.085(b). The size of medical records in our facility has doubled and at this point is getting close to having been tripled in the last five years because of the requirements of federal and state agencies. I might add that the labor costs of handling that extra paper and producing that extra paper as well as documenting and monitoring are becoming prohibitive both in cost and in frustration levels. Each health facility fully realizes the importance of a medical record to a patient's continuing care. We must be able to retrieve, as soon as possible, the patient's past history to know whether the pain in the side is actually a possible appendicitis or whether the appendix was removed in earlier surgery. The importance of those records goes on and on from allergic reaction to various drugs and to basic health defects in the person's past. Trying to get one more piece of paper signed by a patient to release his record to be seen by a surveyor is incomprehensible to me. I have been deeply concerned about those records, especially in the way that certain surveyors from various agencies conduct themselves when in the department surveying them.

KGH

Senator Bettye Fahrenkamp
Senate Bill 33

We are also a JCAH accredited hospital at this time and will be surveyed again this summer, which will be an extensive survey of three days in length of three surveyors - an administrator, a physician, and a nurse. We comply with their standards voluntarily and try our best to meet what we feel is cost effective and for the betterment of care of the Alaskans in our community.

I am deeply concerned, in general, with the way the federal government and state levels are continually creating new departments to monitor new things. We are spending so much time complying with the regulations of these monitoring agencies that I fear the patient is the one who is suffering because of the time involved with professional staff working on documentation which often times is confusing and contradictory. We are doing our utmost as a member of the Alaska State Hospital Association and as a responsible health care institution to contain our costs and still provide high quality care for our patients. We are also continuing, as most Alaska hospitals are, to develop needed diagnostic services in our communities which are much more cost effective here in Alaska than they would be by traveling outside.

I would like to add one final note in that I think that inspections by state agencies should be announced inspections and giving at least ten days notice to the facility. In small general hospitals in Alaska, there are not that many levels of management to conduct the surveyors properly through the facility and answer their questions. Staff are also out of town with shared services at other facilities as well as on vacation and days off. It is very costly when they have to be called back in on time and one-half to answer questions of the surveyor.

If I can be of any further help, please feel free to contact me.

Sincerely,

Sister Barbara Haase

Fairbanks Memorial Hospital's Position on Senate Bill No. 33 - An Act Relating to the Inspection of Hospitals and their Function

Section 18.20.080

Fairbanks Memorial Hospital is very much against the Department of Health and Social Services making unannounced visitations to hospitals. As we read this section of the proposed regulations, Department of Health and Social Services would have the ability to make inspections at any time they deemed necessary. The hospital's position is that we have no problem with any inspection and/or visitation if the following area included in the inspection:

1. Advance notice that an inspector will be there so that the administrator might be on the premises. In small hospitals throughout the state this has been a problem with the State Department of Health and Social Services going in to a facility while the administrator is out of town ordering their staff to do certain things. This seems totally unreasonable and does not accomplish any purpose.

2. That a complaint or reason for an investigation be given to the hospital administrator in writing before the survey is conducted. This will give the hospital the ability to look into the problem and have the information available during the survey that would be required by the inspector. It will also give the hospital the ability to respond to the surveyor about certain problems so that in certain instances surveys would not be necessary. The State Department of Health and Social Services for some time has attempted to conduct unannounced surveys throughout the state. This has not only created hard feelings and animosity between the hospitals and the surveyors involved, but has not served any purpose that the hospitals have been aware of. The feeling of the hospital is that if something is endangering the patients' health in a facility, the state should have the opportunity to inspect a facility and to make recommendations for corrections. We still believe that this can be done on an announced basis. It should noted that if this is to occur, I believe the current staff of the Department of Health and Social Services inspecting

teams have to be increased in order to provide these additional inspections. This hospital was relicensed in December of 1978 for a six-month period through June 1979. It should be noted that there was no inspection before the license was granted. If regular inspections cannot be conducted, how would one expect that additional inspections could be carried out?

Section 2 AS 18.20.084

The hospital is very much against this change in this section under Senate Bill 33 due to the reasons listed below:

1. This would put the burden on the hospital in order to get this release form signed by each patient so that the Department of Health and Social Services could review these records.

2. We believe that the Medicaid/Medicare patients that are seen in Fairbanks Memorial Hospital are representative of the total number of patients. Therefore, it seems somewhat inconsistent that additional patients or records be utilized for surveys.

3. This would put additional costs on each hospital in getting the form signed and keeping the forms on file. We feel that this cost is very prohibitive in these days of increasing costs.

4. This hospital runs approximately 10% Medicare patients. If this is not representative of the total number of patients admitted, how many records would be required to be representative?

5. If the Department of Health and Social Services feels that they should look at additional records, it should be up to the Department of Health and Social Services to get the authorization signed rather than having the hospital responsible for such.

6. Each patient that is seen at Fairbanks Memorial Hospital is offered the opportunity of signing an information release form. This is used for each patient's insurance company. An additional form would have to be promulgated for the Department of Health and Social Services on each patient that is not covered by Medicare or Medicaid. Last year Fairbanks Memorial Hospital had approximately 7,000 admissions and 23,000 out-patient visits. This would put an extensive load of work on the hospital for the convenience of the Department of Health and Social Services.

7. The change in AS 18.20.085 reads that "hospitals would offer patients release forms for their consent to the inspection of their records". This would mean that additional steps

would have to be taken by the hospital to keep the records separated between the ones that had consented and the ones that had not consented.

Dear Senator Fahrenkamp:

This is in repsonse to your letter of February 2, 1979 in which you ask for my comments on Senate Bill 33.

I do not feel that the changes and provisions of Senate Bill 33 would serve any useful purpose and would only tend to escalate costs of hospital operation and services. I am attaching a copy of a letter from Mr. Max Kersbergen, Executive Director of the Alaska State Hospital Association, to Senator Glenn Hackney in regard to Senate Bill 33.

I concur fully with Mr. Kersbergen's statements and position.

Sincerely,

Ernest E. Webb

RE: Senate Bill #33
Hospital Inspections

Dear Senator Hackney:

Thank you for the opportunity to express my opinion of Senate Bill #33. I strongly oppose the passage of Senate Bill #33 for the following reasons:

1) The bill is a duplication of existing federal regulations. Current federal regulations provide for the inspection of all Medicare and Medicaid patient medical records as well as health and safety inpsections of all facilities which provide care to Medicare/Medicaid beneficiaries. Why is it necessary for the state to have duplicate regulations?

2) Medicare has been in existence since 1965 and Medicaid in Alaska since about 1971 or 1972. In that time surveyors have surely been able to determine that Medicare and Medicaid patients are treated equally or better than other hospital patients. The method of payment has nothing to do with the quality of care provided in health facilities. Methods of payment may vary the quantity of services provided and in this aspect, the Medicare/Medicaid patients are far ahead of the patient who pays his/her own hospital bill. In 1978 Medicare/Medicaid patients were 21.9% of Valley Hospital's patient census. The Dept. of Health, Education and Social Services, Section of Health Certification and Licensing currently has the authority to review any and all of these patients' medical records. This is an adequate sample of patient records and to require inspection of additional medical records is unnecessary, time consuming, costly to us all, threatens the privacy of medical matters, and does not improve in <u>any way</u> the quality of services provided to Medicare/Medicaid patients.

3) The Dept. of Health, Education and Social Services will impose the burden of acquiring consents for inspection of medical records on the hospital rather than acquire consent themselves. This added administrative burden will result in higher hospital costs for <u>all patients</u> with little if any effect on quality or quantity of care.

Thank you again for requesting my comments. In the future I will be happy to continue to respond to any hospital legislation which comes before you.

Attached is a copy of a very informative and clearly written letter I recently received from the Executive Director of the Alaska State Hospital Association. His comments as you can see, I support wholeheartedly. Thank you again.

Re: S.B. 33 (Hospital Inspection Act)

Dear Senator Hackney:

The Alaska State Hospital Association recently received a copy of Senate Bill (SB 33) (An Act relating to the inspection of hospitals and their functions; and providing for an effective date.). After reviewing the bill, several concerns surfaced as to the intent and/or necessity of the bill.

1. Hospitals throughout Alaska and the nation are making a concerted effort to comply with the American Hospital Association's (Voluntary Effort) VE for Cost Containment guidelines. Existing regulations already subject hospitals and long term care facilities to many expensive and time consuming inspections annually. In studies in Michigan and South Carolina it has been confirmed that government regulations (state and federal) add $21 to $25 to every patient's bill. Most of the regulations being proposed under this proposed bill (18.20.080, 18.20.085) either duplicate or unnecessarily add to already existing regulations covered in Medicare and Medicaid regulations.

2. If you should go further and implement these regulations we would like to point out that Section 1 18.20.080 does not include a requirement for a pre-notification of intent to survey nor a statement of the purpose for the survey. ASHA recommends that a reasonable advanced notice be required on the part of the surveyor and that the purpose of the visit be clearly stated to allow the institution time to prepare for the visit. Through this communication staff disruptions can be reduced and the surveyors time will be more efficiently utilized.

3. Section 3 18.20.085(a) is similar to existing practices of our membership and in fact is written in the federal guidelines under Medicare (Section 405.1026 page 8044 - sub-section f and g) and clearly indicates what is considered a completed medical record. This appears to be a clear duplication and not necessary.

4. Section 3 18.20.085(b) amended section (a) lines 8 - 11, proposes that written consent be obtained by hospitals for medical record inspection authorizations from patients who have not already signed consent forms for release of information. Should such regulations be initiated, the burden of labor and expense in obtaining those releases should not rest with the hospitals, but should rest with the state. As written, the regulations would necessitate additional staffing and expense in restructuring a new medical records filing system which seems totally inappropriate.

Since most hospitals in Alaska have medicare/medicaid admissions in excess of 10% of their total admissions, it would seem that those charts should be an adequate sample of patients' records and that inspection of additional charts is totally unnecessary, time consuming and not in the best interest of cost containment or patient privacy. To my knowledge, there is no evidence to support any allegations that medicare/medicaid records differ in completeness or content from other admissions.

The Alaska State Hospital Association is hoping to have a bill introduced this year similar to the Texas law which requires surveys to exempt hospitals certified by the Joint Commission on Accreditation of Hospitals as deemed hospitals requiring surveyors to utilize the information obtained from the JCAH findings. In addition, the bill would require spacing of surveys to reduce the cost and disruption that is created by frequent surveys and some of the repetition in data gathering.

I trust this information will be helpful to your Committee as you consider this amendment, particularly its necessity and its intent.

Sincerely,

Max F. Kersbergen
Executive Director

Revised 10/78

POSITION PAPER / Department of Health and Social Services

POSITION PAPER

SENATE BILL NO. 33

"An Act relating to the inspection of hospitals and their functions; and providing for an effective date."

The Department of Health and Social Services supports Senate Bill No. 33. Recent Alaska Court decisions have found warrantless administrative searches to be unconstitutional in some regulated industries and that hospital licensing surveyors may not spot-check patient records without written consent from the patient. These spot-checks were conducted only for the purpose of determining compliance with record keeping regulations.

In light of these recent court decisions it is necessary to amend AS 18.20.080 to provide for a comprehensive structure of statutes and hence Departmental regulations which set out specific inspection procedures. These new regulations will define inspection procedures so that licensees are put on notice as to what is expected of them and what limitations are imposed on the inspectors.

If the proposed amendments are enacted, the Department is prepared to implement them as soon as possible by regulation, so that the inspection of all regulated functions can continue, limited only by the consent requirement for checking patients' records.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

All assumed costs for the travel and contractual lines are based on current information relative to airfare rates, advertising order rates, room rental and anticipated telephone charges.

The proposed regulation amendments will require public hearings before final adoption by the department. Costs associated with these hearings include the advertising of the regulations in state newspapers and legal transcription services at the public hearings. The travel amount requested is for representatives of the Departments of Law and Health and Social Services to travel to Anchorage for the public hearings and to meet with Alaska Hospital Association members concerning the prepared regulations.

These costs are a one time expenditure.

President of the Senate
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18 of the Alaska Constitution, I am transmitting a bill relating to the placement of children in state custody.

The bill would exempt delinquent children from a provision which requires that, in the absence of a showing supported by clear and convincing evidence that harm to the child will result, all children in the custody of the Department of Health and Social Services be turned over to blood relatives upon demand. The department believes that this provision overlooks the potential dangers to society presented by delinquent children as well as their frequent need for a program of rehabilitation. In addition, I believe that it was not the legislative intent, in enacting sec. 37, ch. 126 SLA 1977 (which added (e) to AS 47.10.230), to prevent placement of delinquent children in an institution. The bill would thus limit the mandate contained in AS 47.10.230(e) to children who have been placed in state custody after an adjudication that they are children in need of aid.

Sincerely,

S/JSH

Article 2. Juvenile Institutions.

Section
150. General powers of department over juvenile institutions

Sec. 47.10.150. General powers of department over juvenile institutions. The Department of Health and Social Services may

(1) purchase, lease or construct buildings or other facilities for the care, detention, rehabilitation and education of children in need of aid or delinquent minors;

(am § 25 ch 63 SLA 1977)

Effect of amendments. The 1977 amendment substituted "children in need of aid" for "dependent" in paragraph (1). As the rest of the section was not affected by the amendment, it is not set out.

Article 3. Care of Children.

Section
230. Powers and duties of department over care of child

Supplement

Sec. 47.10.230. Powers and duties of department over care of child. (a) Subject to (e) and (f) of this section, the Department of Health and Social Services shall arrange for the care of every child committed to its custody by placing him in a foster home or in the care of an agency or institution providing care for children inside or outside the state. The department may place a child in a suitable family home, with or without compensation, and may place a child released to it, in writing verified by the parent, or guardian or other person having legal custody, for adoptive purposes, in a home for adoption in accordance with existing law.

(d) In addition to funds paid for the maintenance of foster children under (b) of this section, the department shall pay the costs of caring for physically or mentally handicapped foster children, including the additional costs of medical care, habilitative and rehabilitative treatment, services and equipment, special clothing, and the indirect costs of medical care, including child care, transportation expenses, and respite care. In this subsection "respite care" means child care not to exceed 12 hours in any 30-day period; it also means child care for a period not to exceed seven days in a year for the purpose of providing emergency protection for the child when the foster parent is away from the home because of an emergency and no other care is available for the child or when the foster parent is on vacation and the child, because of age or infirmity, cannot be placed in any other type of temporary care facility.

(e) A child may not be placed in a foster home or in the care of an agency or institution providing care for children if a blood relative exists who requests custody of the child. However, the department may retain custody of the child and provide for its placement in the same manner as for other children if it makes a determination, supported by clear and convincing evidence, that the custody of the child by the blood relative will result in physical or emotional damage. In making that determination, poverty, including inadequate or crowded housing, on the part of the blood relative, is not considered prima facie evidence that physical or emotional damage to the child will occur. This determination may be appealed to the superior court to hear the matter de novo.

(f) If a blood relative of the child specified under (e) of this section exists and agrees that the child should be placed elsewhere, before placement elsewhere the department shall fully communicate the nature of the placement proceedings to the relative. Communication under this section shall be made in the relative's native language, if necessary. Nothing in this section or in (e) of this section applies to child placement for adoptive purposes.

(am § 1 ch 76 SLA 1976; am §§ 36, 37 ch 126 SLA 1977)

Effect of amendments.

The 1976 amendment added subsection (d).

The 1977 amendment added "Subject to (e) and (f) of this section" to the beginning of subsection (a) and added subsections (e) and (f).

As the rest of the section was not affected by the amendments, it is not set out.

Editor's note. — Section 1, ch. 126, SLA 1977, effective July 1, 1977, provides: "PURPOSE. Common law and statutory procedures governing the remedies for enforcement of support for financially dependent minor children by responsible parents have not proven sufficiently effective or efficient to cope with the increasing incidence of financial dependency. The increasing workload of courts, district attorneys, and the attorney general has made such remedies uncertain, slow and inadequate, thereby resulting in a growing burden on the financial resources of the state, which is required to provide public assistance grants for basic maintenance requirements when parents fail to meet their primary obligations. The state, therefore, exercising its police and sovereign power, declares that the common law and Alaska statutes pertaining to the establishment and enforcement of child support obligations shall be augmented by additional remedies in order to meet the needs of minor children. It is declared to be the public policy of this state that this Act be construed and administered to the end that children shall be maintained from the resources of responsible parents, thereby relieving, at least in part, the burden presently borne by the general citizenry through welfare and welfare-related programs.

Section 35, ch. 126, SLA 1977, provides: "INTENT. It is the intent of secs. 36 and 37 of this Act to provide for placement of children in surroundings which are socially and culturally desirable and with persons who are able to meet their special needs. Placement of children with blood relatives will work to prevent loss of identity and self-esteem, and provide for increased family and cultural stability, security and solidarity."

regulations which the department considers proper, if it appears to the satisfaction of the department that there is a reasonable probability that the juvenile will remain at liberty without violating the law. (§ 10 art II ch 145 SLA 1957)

Sec. 47.10.210. Youth counsellors. The department may employ youth counsellors. Youth counsellors shall exercise the duties of probation officers and shall prepare preliminary investigations for the information of the court. They shall also carry out other duties in the care and treatment of minors which are consistent with the intent of this chapter. Youth counsellors have the powers of a peace officer with respect to the service of process, the making of arrests of minors who violate state or municipal law, and the execution of orders of the court relating to juveniles. The youth counsellors shall assist and advise the courts in the furtherance of the welfare and control of minors under the court's jurisdiction. (§ 11 art II ch 145 SLA 1957)

Sec. 47.10.220. Grants-in-aid. The Department of Health and Social Services may accept grants-in-aid from the federal government or private foundations and may accept other gifts consistent with the purposes of this chapter. (§ 13 art II ch 145 SLA 1957; am § 6 ch 104 SLA 1971)

Effect of amendment. — The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare."

Article 3. Care of Children.

Section		Section	
230.	Powers and duties of department over care of child	250.	Standards of care
240.	Adequacy of home or institution	260.	Payment of costs

Sec. 47.10.230. Powers and duties of department over care of child. (a) The Department of Health and Social Services shall arrange for the care of every child committed to its custody by placing him in a foster home or in the care of an agency or institution providing care for children inside or outside the state. The department may place a child in a suitable family home, with or without compensation, and may place a child released to it, in writing verified by the parent, or guardian or other person having legal custody, for adoptive purposes, in a home for adoption in accordance with existing law.

(b) The department may pay the costs of maintenance which are necessary to assure adequate care of the child, and may accept funds from the federal government which are granted to assist in carrying out the purposes of this chapter, or which are paid under contract entered into with a federal department or agency. No child under the care of the department may be placed in a family home or institution that does not maintain adequate standards of care.

(c) The department may receive, care for, and make appropriate placement of minors accepted for care for a period of up to six months on the basis of an individual voluntary written agreement between the minor's parent, legal guardian, or other person having legal custody and the department. The agreement may include provisions for payment, in whole or in part, to the department for the minor's care and treatment. The agreement entered into shall not operate to prohibit a minor's parent, legal guardian, or other person who had legal custody from regaining care of the minor at any time. (§ 1 art III ch 145 SLA 1957; am § 5 ch 100 SLA 1971; am § 6 ch 104 SLA 1971)

Effect of amendments. — The first 1971 amendment added subsection (c).

The second 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare" in the first sentence of subsection (a).

Sec. 47.10.240. Adequacy of home or institution. (a) A representative of the department shall visit, as often as is considered necessary, every foster home or institution in which a child is placed, and if not satisfied as to the care given, may remove the child from the foster home or institution and place him elsewhere.

(b) The person or institution receiving a child shall submit the reports the department requires as to the education, health and welfare of the child and the conditions under which he is living. (§ 2 art III ch 145 SLA 1957)

Sec. 47.10.250. Standards of care. The Department of Health and Social Services shall establish standards of care and regulations desirable for the welfare of every child under its care. (§ 3 art III ch 145 SLA 1957; am § 6 ch 104 SLA 1971)

Cross references.—As to the general powers of the department over juvenile institutions, see AS 47.10.150. As to the operation of juvenile detention homes and facilities, see AS 47.10.180.

Effect of amendment. — The 1971 amendment substituted "Department of Health and Social Services" for "Department of Health and Welfare."

Standards and formal conditions for use of adjustment rooms in juvenile detention homes. — See T.M. v. Director of McLaughlin Youth Center, Superior Court, No. 72-449 (1973).

Department ordered to promulgate standards for operation of juvenile detention homes. — See T.M. v. Director of McLaughlin Youth Center, Superior Court, No. 72-449 (1973).

Sec. 47.10.260. Payment of costs. The department shall pay the proper and necessary costs of the court and witnesses and other expenses necessarily incurred in the enforcement of §§ 230 — 260 of this chapter. (§ 4 art III ch 145 SLA 1957)

POSITION PAPER/Department of Health and Social Services

POSITION PAPER

SENATE BILL NO. 34

"An Act relating to the placement of children in state custody."

The Department of Health and Social Services and the Division of Corrections is in support of this legislative amendment.

Under present statute, 47.10.230(e), a delinquent child could be removed from the custody of the Department of Health and Social Services (i.e., foster care, treatment facility or detention facility), upon the request for custody by a blood relative. This is viewed as a potentially dangerous situation in cases where the delinquent youth has committed violent crimes (assault, rape, robbery by use of firearms, etc.) and who continues to have the propensity to commit such acts. Returning a child with this type of behavior to the community may jeopardize the state's responsibility to protect society.

In addition, removing a youth from the milieu of a structured setting or treatment program could be detrimental to the rehabilitation process. To date, no delinquent has been removed from the Department's custody under this statute (enacted two years ago in conjunction with the new Children's Code legislation) because there has been no case in which a blood relative has requested custody. This does not preclude this happening in the future.

Presently, the Division of Corrections has 661 children under probation supervision. Approximately 630 of these childrer are residing in their own homes. Even though these children have been adjudicated delinquent, the majority of the children are under supervision in the community. Only in cases where a youngster has special treatment needs which cannot be met in the community or where the youngster presents a potential danger to himself/herself or to the community is a child placed in an institutional setting.

It should be noted that legislation allows review hearings at any time concerning youth commitments; thus, the youth's rights are adequately protected. Any citizen or relative may file for a review hearing.

adopted. voice vote

Meeting of 1/31/79 SB 35 - relating to adult education

Jim Beima - Alaska Commission on Postsecondary Education

My only concern is with the last line of the bill where it says . . . "but not including degree programs of post-secondary education." At the present time there are 27 schools other than community colleges that come under the regulation of the Postsecondary Commission who offer certificate programs and or other programs that have to be licensed and have their agents registered. This would definitely hit in there. I think it should actually read "but not including degree and certificate programs of post secondary under regulation by Chapter 25." Under Chapter 25 they must be licensed and have their agents registered. That would allow the adult education to operate at the secondary schools and other places that are public facilities but outside of licensed schools. What I think the department of education is after is to do adult training in public schools and things of this type to support community interest

SB 35 is in conflict with chapter 25, I would say which has already designated the responsibility of the Postsecondary Education Commission.

Asked to give an outline of Adult Basic Education . . .

The programs I administer come under the Veterans Administration and we have to appprove all of the schools that offer programs which the veterans enroll. Fundamentally, they are school operations and not secondary schools or community schools. We do not go out and review adult programs in welding for the community, such as body fender welding.

Marylu Maddan - Department of Education

We asked that this bill be introcuded essentially as a clean up piece of legislation which would give a statutory authority for our current activity in the adult education area. Right now we have that authority through the budget process which gives us the authority to receive and disburse grant funds in several basic areas adult basic education and the GED program, fire service training and adult vocational education, including CETA. The bulk of these funds come from the federal government with the Department of Education being the eligible recipient in the state. We then disburse them to public schools, community college systems, whatever institutions actually provide the education. We also operate the Alaska Skill Center which is essentially an adult facility.

The proposed legislation would simply amend Titles 14 and 44 which speak to the duties of the department by giving us authority to administer programs. We added the final sentence in an attempt to avoid confusion with community college and university structure in that we did not want to get into degree or credit programs. If that is confusing, we would certainly look to the type of amendment that Mr. Beima suggested.

Senator Hackney - what portion of your budget funds come from the feds as compared to general fund?

Marylu Maddan - I can't give exact figures. All of the CETA monies, about $212,000 is all federal. Of our ABE budget of $1,173,000, about 50% general fund and 50% federal; fire service training's $91,000 is totally state and in the adult vocational education area half is federal.

It is not mandated by the federal government that we have statutory authority. The problem that we do have in receiving federal money is that our authority comes only through the budgetary process and we would prefer to have it stated as part of the duty of the department. I do not want to give the impression that unless this passes the department won't get federal funds, because that is not true.

I think Mr. Beima's point was the term "administer" could cause confusion with the postsecondary's mandate to administer the certification of nondegree programs.

Ms Maddan and Mr. Beima discussed the amendment and came back to the meeting with a mutually agreeable amendment which the committee adopted. Amendment is attached.

MEMORANDUM

TO: The Honorable Glenn Hackney
Alaska State Senate
Pouch V
Juneau, Alaska 99811

DATE: February 6, 1979

FILE NO:

TELEPHONE NO:

FROM: Marshall L. Lind, Commissioner
Department of Education

SUBJECT: Senate Bill 35

Senate Bill 35 was introduced by the Governor in order to formalize the responsibility of the Department in administering a number of programs for the adult population of the state. These programs are authorized by an appropriation by the legislature each year. It is not the intent of the Department to enter into the direct operation of programs, except for continuation of the Alaska Skill Center.

We anticipate administering the programs as we have in the past, using various educational institutions as direct delivery agencies. We realize there is some concern that the Department might become an operational agent for adult programs across the state. Such direct operations authority is not spoken to in the bill, nor is it considered with overall Department responsibility.

By establishing the responsibility on an ongoing basis, we could develop better long range plans and be able to articulate programs with other Departmental programs. Also, this legislation will provide the legal entity for the receipt of Federal funds.

If additional information is needed, please contact us.

January 15, 1979

President of the Senate
Alaska State Legislature
Juneau, Alaska 99811

Dear Mr. President:

Under the authority of art. III, sec. 18 of the Alaska Constitution, I am transmitting a bill relating to adult education. The bill amends portions of AS 14.07.020 and AS 44.27.020, which set out the authority of the Department of Eduction, to provide clearly that one of the functions of that department is the operation and administration of various adult education programs in the state. Although the department has provided these kinds of programs, and funds have been provided for them by the legislature for years, nothing in the statutes relating to education clearly encompasses these kinds of programs at the present time.

The Department of Education's authority to undertake activities in the adult education area has not yet been challenged; however, the department is concerned about the vagueness of the law in this area and wants it clarified before such a challenge is raised. The bill would make clear that the authority of the department would not extend to degree programs of post-secondary education such as those offered by the University of Alaska.

Sincerely,

J/SH

Jay S. Hammond

Whatever Happened To The PUBLIC SKOOLS

By Solveig Eggerz

Whatever Happened to the Public Schools and Why?

by Solveig Eggerz

CUMULATIVE MEDIOCRITY

It has become glaringly apparent that all is not right with the public schools. Dissatisfaction has been mounting for a number of years among parents' groups. Their major objective: to bring standards back to the schools. However, only recently has the stark evidence of declining test scores awakened the taxpaying public at large to the problem of cumulative mediocrity in the schools. Typical of the new awareness is the headline in a 1977 *Wall Street Journal* (May 14) article, "Test Grades are Low in Six Largest Cities" and the subhead, "More Than Half of 10th Graders Fail English and Math Exams Administered by the State."

All major publications have carried similarly bleak accounts of sinking test scores in basic subjects, reflecting the low standards prevailing in schools nationwide. Because the same philosophies generally have pervaded most of our public school systems for many years, the decline in achievement can in large part be attributed to the successful promulgation of these philosophies.

The educational establishment, presumably in pursuit of the "modernist" notion that nothing (especially learning) should involve hard work, saw some subjects as dull and some textbooks as too dry to capture the imagination. So it went to the other extreme: Everything was to be fun and if it didn't feel good it was not worth doing. Because, in this view, a student who does not select his own curriculum is not a happy student, a plethora of electives was offered. Many concerned subjects which educators of sterner substance would have labelled frivolous.

Then there was the rising star of sociology and the view of some leading sociologists that the schools are the most appropriate instruments for bringing about social change. For students, this meant spending many hours participating in "rap sessions" on the issues of the day such as the Vietnam war, race relations and pollution.

In addition, there is within the educational establishment the school of thought known as humanistic psychology. It tends to view the schools as something akin to a mental health clinic and the teacher's role as that of psychologist. Under this philosophy the teacher's primary function is not to transmit knowledge but to guide children through role-playing, group therapy, or values clarification to an enhanced feeling of self-awareness. The effect of the introduction of these philosophies, if measured in time-consumption alone, has been to displace traditional school subjects.

These trends or philosophies have had widespread impact on the public schools, helped along by extensive "studies," conducted often with

Copyright 1977, by Solveig Eggerz

ABOUT THE AUTHOR

Solveig Eggerz received her B.A. from the University of Kansas and her M.A. from the Catholic University of America where she is presently preparing her dissertation for the Ph.D. in the Department of Comparative Literature. Miss Eggerz has been a member of the faculty at Catholic University and has written widely for such publications as the Washington *Daily News*, *Private Practice*, and the Washington *Star*. Her study of social engineering in the public schools was published by the American Conservative Union Education and Research Institute.

federal funds, by professional educators. As a result, many schools became experimental laboratories for testing all sorts of theories thought up by educators to qualify for available government money.

In retrospect, these so-called innovations such as the "new math," the open classrooms, and absurd reading methods have proven to be, at best, ineffective. Some experimental techniques such as those designed to probe hidden problems in the child's psyche, in many cases have proven to be disastrous, especially in the hands of a lay person.

The subjects that were either displaced or distorted through these philosophies and the curricula that developed around them, are what are now known as traditional subjects. Considered in a previous age the basic concern of the schools — indeed absolutely essential to any sound learning process — they are reading, computation, and composition. The building blocks of future good citizenship, history, and geography were downgraded in favor of the catch-all subject called social studies. Because of its vaguely defined parameters, this social-studies category is particularly susceptible to bombarding students with almost any philosophy, ideology or method, no matter how far out, dreamed up by the "new" educators.

Those shocked by recent test scores must understand that the deterioration of the schools was a slow process. The problem only recently has burst upon the national consciousness because test scores tell a story that thousands of words spoken by watchdogs of the schools failed to bring home to the public at an earlier stage. Just as the consequences of lowered standards took a long time to show up in the current and shocking picture of full-blown mediocrity, so it will not be a fast, effortless process to pull the schools back to their traditional task of turning out educated youngsters who will become future good citizens of a Free Society.

But *it can be done*. There are examples of school districts across the country where community determination to raise standards has borne fruit. This study outlines what is wrong and describes the causes of the malady. Most importantly, its purpose is to furnish parents, officials, and educators with a guide on how to steer clear of the pitfalls to mediocrity, the first step toward quality education. It is written in the hope that energetic people will choose to change a bad situation. The schools are too important an element in the shaping of an individual and a nation's life to be allowed to perish because they were ignored rather than repaired.

TEST SCORES AND PREVAILING PHILOSOPHIES

The trust of parents and taxpayers in the public schools' ability to educate children has been severely shaken by the drastic decline in achievement test scores in all major subjects. Scores on the College Entrance Examination Board's Scholastic Aptitude Test (SAT) dropped for 14 consecutive years. Scores on the tests administered by the American College Testing Program (ACT) fell during the last 11 years for which data are available.

The SAT measures verbal and mathematical reasoning skills. It thus serves as a means for predicting academic performance of students about to enter college. Since 1963 the average national scores on the verbal and mathematical sections of the SAT have dropped 44 and 30 points respectively, on a scale of 200-800 points. In 1975 alone the average score dropped 10 points for the verbal section and eight points for the mathematical.

In the spring of 1975, the National Assessment of Educational Progress (NAEP) reported a 2% decline in science knowledge between 1969 and 1973, the equivalent of a half year's loss of learning. In November, 1975, NAEP released a report on writing mechanics. It showed that students' overall writing skills had declined from 1970 to 1974. The test indicated a sharp decline in vocabulary among 13- and 17-year-olds who were found to write in a more "primer"-like fashion and to show a greater tendency to write incoherent sentences than did their counterparts tested four years earlier. A 1977 test found a continuation of these tendencies.[1*]

According to a study conducted by social scientists Annegret Harnischfeger and David E. Wiley, test scores increased steadily from the 1940's to the mid 1960's. Their conclusion is based on data from nine major tests, including the SAT, American College Testing Program and the Iowa Tests of Educational Development. But, note the authors, scores in English, writing, literature, vocabulary, reading, social studies, mathematics, and natural sciences have been sinking in recent years. The authors state that the declines are "more dramatic in recent years and most evident for higher grades. They are especially pronounced in verbal tests, but hold for nearly all tested areas."[2]

This really awful situation reflected in the test scores is not an overnight transformation of public-school education from high to low quality. Rather, the test scores show the cumulative effect of the downgrading of basic learning skills over a number of years in favor of something which those in charge of the schools consider more important. The fact that educators have not expressed deep shock over the test-score decline indicates that these changes are not accidental. Educators have chosen quite consciously to de-emphasize the teaching of intellectual skills in favor of the inculcation of social awareness and what can loosely be called the psychological enhancement of the individual student. Catherine Barrett, the former president of the National Education Association, stated in 1972 (*Saturday Review*, March):

"We will need to recognize that the so-called 'basic skills,' which currently represent nearly the total effort in elementary schools, will be taught in one-quarter of the school day. The remaining time will be devoted to what is truly fundamental and basic."

What do Mrs. Barrett and other educators consider more basic and fundamental than the teaching of the basic skills? NEA literature makes it clear, as in its publication on "Curriculum for the Whole Student"[3]:

"The curriculum must move away from an emphasis on the retention of facts to an emphasis on the processes of inquiry, comparison, interpretation and synthesis....In addition to purely intellectual growth, the curriculum should regard emotions, attitudes, ideals, ambitions and values as legitimate areas of concern for the educational process." The NEA publication goes on to ask a question. It reveals that the largest and most influential teachers' association in America is only tangentially concerned about the traditional goal of equipping youngsters with the intellectual tools necessary for life:

"Isn't it possible to design a curriculum that has as its central core the exploration, revitalization, and sympathetic consideration of the

---

[1*]In order not to divert the reader with numerous footnotes, all sources are given at the end of the pamphlet.

learner's sense of himself as a self-directed human?"

The change in the substance of this "central core" has led to the displacement in the schools of cognitive learning in favor of psychological or "affective" education. This "educationalese" can be confusing, but "cognitive" learning is simply the imparting of knowledge, while "affective" education draws on the human potential and self-actualization movements of such men as encounter-group expert Carl Rogers, and Abraham Maslow, founder of the Third Force movement in psychology. Adapting these latter for school use, development of emotional skills takes precedence over basic skills. The perceptive capacities of sensing and feeling are often valued over rational thinking.

The idea that a prerequisite for awakening the intellect is the tapping of the emotions was introduced to the schools largely as a new approach to overcoming the learning difficulties of disadvantaged children. As with many other educational philosophies, this one was extended to cover all children. According to one analyst, Marie Fantini[4], "Increasingly, educational theories and practices are being judged on whether they succeed with the urban poor and others who are accounted educational failures. If they do they will probably be effective with other learners as well." And, bemoaning a lingering faith in cognitive learning, Fantini made the following statement:

"Our proposal is to reverse the direction of the prevailing cognitive emphasis. We suggest that knowledge alone does not adequately produce the behavior necessary to such a society. The chances of affecting behavior will be greater if the learner's feelings and concerns are recognized and made to direct the cognition that logically should follow and if cognition is used to help the learner cope with his concerns."

This approach runs counter to the classical view of education, which considers the harnessing of impulses and emotions an important part of the civilizing process. Also, it certainly would seem to put the cart before the horse. First you tell little Johnny to "do his own thing" (including swatting the teacher with a baseball bat across the rump if he feels like it) and then you tell him to sit down and learn the alphabet—or even expect him, in what Fantini thinks "logically should follow," to *ask* to learn it.

In addition, there were those ever-present "social remodelers," especially prevalent in the academic world, who felt that the social changes agitated for in the 1960's could be accelerated by employing the classroom as an instrument for social change. Operating on the premise that in order for genuine change to occur, people's emotions must be appealed to, affective education was implemented toward the realization of stated goals. These included the elimination of prejudice, the propagation of egalitarianism, and attempts at resolving a host of emotions surrounding the American involvement in Vietnam. Other social questions which the schools have come to consider within their purview are drug abuse, sex and death education, and parenthood. Among those who view the schools as instruments for social change are humanistic psychologists like Alfred Altschuler[5] who states:

"At the frontier of psychology and education a new movement is emerging that attempts to promote psychological growth directly through educational courses. Psychologists are shifting their attention away from remedial help for the mentally ill to the goal of enhanced human potential in normal individuals. Educators, on the other hand, are beginning to accept these courses along with the unique content and pedagogy as appropriate for schools."

Frequently these various philosophies permeate school curricula in an indirect manner. But their eventual impact as indicated by test scores is direct and clear. Harnischfeger and Wiley[6] note in their study that the declines in test scores are most evident for higher grades because the effects are cumulative. Basic courses, they note, have been displaced by "special" courses such as Black History, science fiction or media analysis where American history or English used to be. They found a "sizable drop" in enrollment in traditional college preparatory courses, including an 11% decrease in English enrollments. The list of courses offered to secondary school students in a Virginia school system[7] reads like a college catalogue in its scope but resembles a guide for Saturday afternoon projects at a summer day camp in many of its focus areas.

Under social studies, the curriculum guide lists a series of vaguely defined courses which focus on the "world." These include world history, world cultures, world studies, world civilization, and world religions. A closer look at the world history course reveals that the emphasis is not on the facts of world history but on the mastery of the methods of sociology. The course, says the guide, "involves students in the study of key concepts like nationalism, imperialism, industrialization, conflict, and interdependence, and stresses the development of an awareness of the diversity of the historical processes in different civilizations in the world."

Totally lacking among the social studies courses is a history course to provide factual information upon which any of the described sociological studies might be based. Even the most nearly traditional course in the list "United States and Virginia Studies," promises that "Students develop social science skills through an inquiry into selected themes, concepts, events, and personalities in our nation's history from colonial times to the present."

The National Center for Education Statistics of the US Department of Health, Education and Welfare has published a *Summary of Offerings and Enrollments in Public Secondary Schools*,[8] which points out that the number of pupils enrolled in traditional courses has decreased "presumably because there are so many other choices available." Among the courses labelled by NCES as "short course offerings of current interest" are ethnic literature, American Indian problems, the U.S. Constitution, and intergroup relations. Furthermore, the study found that:

"Enrollments in ancient history, grade 9 community civics, problems of democracy, general science, and Latin have declined sharply since 1960-61, but sociology, consumer education, earth-space sciences, environmental courses, and drama courses are increasingly absorbing the attention of high school pupils in the United States."

The Council for Basic Education,[9] one of the most assiduous observers of the public schools, compared the 1972-73 survey with a 1960-61 study and found an increase in the number of course titles from 1,100 to over 2,000. The Council blames the fall-off in enrollment in traditional courses on the "proliferation" of courses offered. Instead of enrolling in English, mathematics, history or geography, students choose criminology, oceanography, first-aid, modern dance, crafts,

photography, welding, child development, nutrition, housing and home furnishings, cosmetology, record-keeping or ornamental horticulture.

"It is the fundamental and massive shift from basic academic requirements to an array of electives that seems to be the most direct contributor to the achievement decline in schools and colleges," write Jack McCurdy and Don Speich [10] in a survey of the state of the public schools which appeared in the Los Angeles *Times*.

INNOVATIONS AND CONSEQUENCES

All this cumulative mediocrity in the schools of course spawns numerous excuses from educators. They claim that what they don't offer in fundamental skills they make up for in the area of "creative" abilities; criticized for not teaching children facts, they explain that children are learning more about "life" through role-playing activities than they could by reading a traditional book on the subject. This kind of thinking leads to such programs (reported in CBE *Bulletin*, January 1976) as 1,400 fifth-graders in Tempe, Arizona, being taught survival skills of 200 years ago. The children spent over two hours a day for three weeks weaving baskets, spinning wool, quilting rugs, rolling flour into tortillas, and making soap. So if little Mary can't read, she learned about "life" — and she can make soap!

Many educators blame television, parental neglect, the children or the tests themselves for declining achievement. But the light is dawning on some at least, who put the blame squarely on the schools and their course content. In a nationwide survey [11] funded by the Kettering Foundation, 266 school administrators listed permissiveness, lower grading standards, and a "general decline in the teaching of fundamentals," as key causes for achievement decline.

In fact, students in the public schools today are bound to perform poorly on tests oriented toward fundamental skills. Robert L. Ebel, professor of educational philosophy at Michigan State University, explains why (in *Phi Delta Kappan*, December 1976):

"The kinds of educational achievement that enable a student to handle easily the tasks making up such tests have not been a high-priority item for public school administrators and teachers in recent decades. The kinds of instructional innovations that have been advocated and adopted widely, emphasizing pupil self-direction in the choice of what to learn and self-pacing in deciding how hard to work to learn it, are not calculated to maximize the achievement of task-oriented goals of learning. The atmosphere of many high school classrooms is not conducive to the pursuit of excellence in learning."

For years the schools have been in a perpetual state of enthusiasm over the latest "innovative learning technique," a situation which has obfuscated the ineffectiveness of most of these frequently flashy methods. A variety of unusual school designs including the open classroom and the school without walls has been tried. Yet many schools had to return to a more traditional seating arrangement, frequently after deciding that the innovation is too disturbing for youngsters. In the most absurd cases, schools have had walls between classrooms torn down only to reconstruct them several years later. Other innovations include multimedia emphasis in the place of books, team teaching, independent study, and a variety of psychological methods such as behavioral modification, role-playing, group therapy, sociograms, and self-awareness games. [12]

The stimulus for the development of innovations often comes through the availability of federal funds. So it was ironical that the U.S. Office of Education in 1976 completed a $1.8 million, seven-year study [13] on the effectiveness of innovative teaching only to find that non-traditional teaching methods do not make children learn better. The study, carried out by the American Institute for Research in Palo Alto, California, involved 1,500 teachers and 30,000 students in schools with innovative education programs.

Then, in the spring of 1977 the U.S. Office of Education completed a $3 million study, conducted by Abt Associates of Cambridge, Massachusetts. It found that highly structured programs which emphasize basic skills have had more success in raising the achievement of low-income children than have open classrooms. The study, designed to evaluate the federally funded Follow-Through program, produced data which refute the notion upon which many federally-financed, innovative programs have been based. It found that attempts to raise a child's self-esteem in the open classroom, as a prerequisite to learning, have generally failed, and that the process is actually the reverse — children gain more self-esteem as a *consequence* of academic achievement.

The federal government has spent about $500 million on Follow-Through, including $59 million in 1977, since the program began in 1968 as a research experiment to test a variety of educational philosophies. For nine years the federal government has been funding the use of both structured and open-classroom programs in schools in about 100 cities in order to determine how low-income children learn best. The most successful program was found to be Distar, a *structured* program developed by the University of Oregon. Among the least successful was the open education model, developed by the Education Development Center of Cambridge, Massachusetts (the developer of the controversial social studies program, MACOS), where students ranked at the 18th percentile in reading scores and at the 14th in mathematics. [14]

Among the most destructive innovations have been those affecting attitudes toward learning. An example is the belief that the child itself is best equipped to determine what is best for him or her. Classrooms structured around this idea are divided into "learning stations," which children visit at their leisure, depending on whether they're interested in studying mathematics or the mating habits of elephants in pictures. One teacher when asked to compare the various learning stations in terms of popularity, said the arts-and-crafts learning station was always a hub of activity, while remarkably few pupils gravitated toward the mathematics station.

The sad thing about innovations is that they are introduced experimentally into the schools and are often not removed until the experiment has run its full course, that is until the experiment has been proven a failure, as evidenced by the seven year Palo Alto study. The use of the schools as testing grounds for social concepts and experimental techniques; the permeation of course content with the philosophy of social relevance; the emphasis on "creative" rather than intellectual activity is not a new state of affairs. A somewhat similar situation in the 1940's had disastrous consequences for student achievement. Frank E. Armbruster, who authored the recent Hudson Institute study [15] of test scores and school procedures which found the decline in scholastic performance to be unrelated to economic background, race or geographic location, summarized his findings as follows:

"There was a similar decline during a period of laxity and innovation in the 1940's, until parents rebelled and forced schools to tighten up their standards. After that, scores rose throughout the 1950's, but they turned around again in the 60's, when educators started dwelling on more social 'relevance' instead of grades and homework, which means fewer papers for teachers to correct as well."

It will take more than a mere change of mood to undo all this. Selectively placed federal aid has stimulated the elaboration of many educational ideas which were of dubious value at their inception. Federally-funded dissemination of such techniques has helped create a nationally uniform curriculum as evidenced by the ubiquitous nature of certain curricula and approaches to teaching. Among these have been attitude-changing activities, characterized by privacy invasions, which would be considered illegal in other federally run areas. Public housing residents, for example, subsidized by the U.S. Department of Housing and Urban Development, would be protected from the privacy-invasive questions put to 1,800 students in 13 New Jersey school districts under a Title III program of the Elementary and Secondary Education Act. The New Jersey Scales, developed by two faculty members at Rutgers, ask students whether they strongly agree, agree, disagree, or strongly disagree with the following statements:

We need each other.
Old people talk about stupid things.
Women should be given greater opportunities.
Some people are racially superior to others. [16]

The results of such questionnaires are frequently stored in a student's dossier as a permanent record of a child's attitudes at a certain age. Some states are equipped to feed such material into state-wide data banks, where it amplifies a student's "profile." In Florida a state-wide computer stores information on all school pupils from the ninth grade up, including social security number, grade, school, address, type of curriculum, extracurricular activities, nationality, sex, race, religion, marital status, health and physical disabilities, languages spoken at home, family background, academic record, and test scores.[17]

Inferior instruction on the elementary and secondary level has of course led to a lowering of standards in higher education in order to accommodate the new breed of high school graduates. Here, too, we find the same correlations between the increased number of electives and a drop in achievement. A study by the Carnegie Council on Policy Studies points to a 22% drop in general education requirements between 1967 and 1974. According to the findings of McCurdy and Speich, student achievement showed a progressive decline in the subject areas where the number of electives increased. College textbooks have been simplified or "adapted" to suit lower reading levels and remedial reading and writing courses are being taught by Ph.D.'s heretofore unable to find employment. A few examples should serve to give a general picture of the effect of poor public school education on college standards:

The percentage of entering freshmen at the University of California at Berkeley who require remedial instruction in composition, has risen from 25% to 48% in the last seven years. The proportion of freshmen failing an English placement exam at Temple University has increased by more than 50% since 1968. The decline in the ability to write English has been so severe among incoming freshmen at Stanford that the university requires three-fourths of the freshmen, who score 700 or above on the College Board's multiple-choice English achievement test, to study composition.

As high school diplomas become less and less a guarantee that graduates are proficient in fundamental skills, many colleges become the final stage in a general degradation of education. With proliferation of remedial reading and writing (mathematics professors are now adding remedial computation to the list) at colleges across the country, they become simply glorified high schools. And this sad and sorry condition permeates our whole society. It helps explain why employers sometimes must demand college degrees for file clerks (in the hope that they know the alphabet) or for gasoline pumpers (in the hope that they know how to make change).

TEXTBOOKS AND TEACHER GUIDES

Raising the shockingly low educational standards in the schools, as we said, is not an easy task. Textbook companies have invested millions of dollars in the promulgation of certain ideas and approaches to learning. Vast sums of money have been spent on the promotion of such materials and a sudden campaign for the removal of present textbooks would have the equivalent effect of the cyclamate ban on the soft drink industry. The schools' reliance on multi-colored, fully illustrated books and their accompanying teacher manuals partially explains the schools' reluctance to change back to phonics and traditional math from look-say reading methods and new math, even after evidence began mounting in favor of the former two methods. The schools were and still are replete with attractive arrays of instructional materials for teaching variations on look-say and new math.

Ironically, textbook companies may yet be able to capitalize on some of the consequences of inferior instruction. A new subdivision of the $392 million college book publishing industry produces books written in simplified language for those students who cannot read English at the same level as their peers of past decades. Responding again to lowered reading levels, textbook publishers are also simplifying the English in their guidebooks on how to read textbooks. The guide published by the Association of American Publishers for college freshmen, previously written on a twelfth-grade reading level, now appears on a ninth-grade level.

Textbook companies, again responding to lowered standards, are flooding the schools with adaptations of classics such as Charles Dickens' *Oliver Twist* or *David Copperfield*. Providing materials for victims of the sunken standard is proving profitable for Scholastic, a commercial publisher of supplementary instructional material, which produces a magazine written on the *second-grade* level for use by *junior high school* students.

Were parents to peruse their children's textbooks carefully they might find more things objectionable than a degraded vocabulary. Many textbooks distort facts. They introduce philosophies which many parents may not only disagree with but which are inimical to accepted American principles and way of life. Among these is the notion that everything is in a state of perpetual flux and that an attitude of cultural relativism is the proper stance to take. Instead of transmitting the facts of an agreed-upon body of knowledge, many books denigrate traditional values. A high school psychology textbook [18] contains the following passage:

"...to truly induce completely creative thinking, we should teach children to question the Ten Commandments, patriotism, the two-party system, monogamy and the laws against incest."

It should come as no surprise that tests indicate students are painfully unaware of basic historical facts. Many textbooks do not teach history but promote attitudinal change regarding American history in particular. A fifth-grade textbook [19] contains the following statement:

"No nation on earth is guilty of practices more shocking and bloody than is the United States at this very hour. Go where you may and search where you will. Roam through all the kingdoms of the Old World. Travel through South America. Search out every wrong. When you have found the last, compare your facts with the everyday practices of this nation. Then you will agree with me that, for revolting barbarity and shameless hypocrisy, America has no rival."

Quite a picture to present to the unformed minds of ten-year-olds — and with the money of American taxpayers to boot!

In an attempt to make English "relevant" to ghetto children, textbooks sometimes adopt street language. They discard the traditional approach, and the primary purpose of teaching: to inform and elevate. Instead, they descend to the level of the child's language. Which raises the question: Why bother with schools and teachers at all? And with the high incidence of violence in the schools, what is the purpose of interjecting terror into the idyllic world of Mother Goose as, for example:

> "Jack be nimble/Jack be quick/Snap the blade/and give it a flick/Grab the purse/it's easily done/Then just for kicks/just for fun/Plunge the knife/and cut/and run." [20]

In the social studies field, an elementary text, *Our World* [21], states that, "Mastery of knowledge is no longer the central feature of the educational program" and that children "should begin to learn the language of uncertainty and tentativeness."

"Uncertainty and tentativeness" — and worse — are certainly theirs if we judge by many of the social-studies texts from which they are taught, especially in our high schools. The extremely valuable, and unique, Textbook Evaluation Project of America's Future, Inc., has turned up numbers of examples of social-studies textbooks which not only provide students with "uncertainty and tentativeness," but actually give them an often distorted or highly inaccurate picture of America and its institutions. Not so incidentally, though, one of the greatest values of this fine project is that it has also turned up other textbooks which are objective, balanced, sound teaching instruments. Any interested parent or citizen can receive without charge a complete list of all texts reviewed by a distinguished panel of evaluators (each an academic expert in his field), a list of 200 recommended texts, and copies of individual reviews. [22]

Just two examples [23] (there are far too many others) should suffice to indicate the seriousness of this textbook problem. One would suppose that a textbook called *The Americans - a History of the United States*, would be just that, particularly when its authors carry so prestigious a designation as "By the Staff of the Social Studies Curriculum Center, Carnegie-Mellon University."

But AF's Textbook Evaluation reviewer, Dr. Robert R. Neff, professor of history at Asbury College, notes that "About all the student learns [on the American Revolution] is that a fictional 1770 businessman was discontented with British taxation, and that John Adams played an important role in the Boston Massacre. The chapter ends with a skit about Valley Forge and a story on the question 'To Help or Not to Help a Stranger?'" Dr. Neff also notes that "The authors have few heroes in this volume but one who towers above most others is Cesar Chavez!"

In the field of economics, a text called *Elements of Economics* by Wallace C. Peterson would lead one to believe the volume explains for young students the elements of the free enterprise system on which American prosperity and well-being is based (and whose taxes, incidentally, support the public schools). But you couldn't be more mistaken, as associate professor of history and business administration at Grove City College, John A. Sparks, points out in his evaluation. On the contrary, when the author speaks of "more equal income distribution," reviewer Sparks asks: "And how is this to be accomplished? By encouraging capital accumulation and thereby making all workers more productive and prosperous? No. Peterson is advocating government redistribution programs of taxing and transferring wealth and income." In other words, the chief so-called "Elements" in this text are those of the socialist, central-planning view of economic policy.

Then there are something called "values clarification kits" developed by Sidney Simon, professor of education at the University of Massachusetts. They are designed to help students discover their own values. While many teachers are deficient in grammar and composition, most recent graduates of schools of education are familiar with Simon's values clarification methods, which use moral dilemmas in the interest of teaching children "how values work." Among the exercises is the venting of feelings by one student toward another before the classroom, followed by a role reversal. Teachers are taught not to instill any particular values in children for there are no "right" values, but to guide them toward their own values regarding moral dilemmas about lying, cheating or stealing. A typical moral dilemma used as a teaching exercise in *Values and Teaching* by Louis E. Raths, Merrill Harmin and Sidney B. Simon might be the following multiple choice question:

"Under what circumstances would *you* try to pass a toll machine without paying the fee? _Only if I were certain that I would not be caught. _If I felt I had a good chance of not getting caught. _Never, under any circumstances. _Only if I needed the money desperately, like for family food supplies." [24]

The level of the philosophy of those whose ideas dominate the schools is shown in an article by Simon which appeared in *Scholastic Teacher* (Oct. 1974). Deploring the neglect of students' "skin hunger needs," Simon suggests developing "skin strategies" for the classrooms including temple massages and back rubs!

Examination of these and other school textbooks and teacher guides is a disquieting exercise in more ways than one, because the proliferation of non-academic material indicates that some academic materials have been replaced. To make time to probe students' values and feelings, a traditional subject must be reduced or squeezed out of the curriculum entirely. The same is true of assigned reading in the schools. The more time spent on assigned fiction about teenage pregnancy, drug addiction and other social problems, the less there is for reading the great books of western civilization. In the short run, youngsters

will suffer from a mediocre education as a result. But, in the long run, a civilization which persists in ignoring its great works by withholding them from its school children cannot hope to survive for long. A number of authorities have noted the linkage between the study of good books with the survival of civilization, among them Russell Kirk.[25] The purpose of literary culture, he says, is "the guarding and advancement of the permanent things, through the power of the word." To reject humane letters "is an act of childish impatience and arrogance. The consequences of that rejection are not restricted to juvenile years, but may endure to the end of life. When the great books are forgotten or burnt — why, as George Orwell reminds us in *1984*, 'Here comes the chopper to chop off your head.'"

When investigating what the schools are teaching it is imperative to ask also: what are the schools not teaching?

DECLINE IN WRITING SKILLS

The radical decline in students' ability to express themselves in writing is causing educators some worry. The fact that students are increasingly incoherent in their writing may be evidence of a decrease in their ability to think logically. The run-on sentences, incoherent paragraphs and general awkwardness in student writing tests administered by the National Assessment of Educational Progress are, however, according to optimists, simply evidence that students have not been taught the mechanics of writing. An NAEP study of the tests states that, "All of these changes point to a movement away from established writing conventions toward those of written discourse....More 17 year olds may be writing as they speak."[26]

In response to revealed student deficiencies some schools have instituted writing programs to make up for years of neglect in such areas as composition and grammar. Unfortunately, many teachers are not equipped to teach to meet upgraded standards. In some cases technological innovation is coupled with an attempt to improve standards and the results are not constructive. An example occurred in a Virginia school district where thousands of dollars were spent on dictaphone machines to assist students in writing. In spoken language they read their thoughts into the machine, which then repeats back to them their words to be copied, complete with errors, as essays.

Wall Street Journal columnist, Vermont Royster (Dec. 4, 1974) disturbed over the number of "adapted" classics he found in his daughter's school, refers to the intelligent students who are unable to express themselves as "the heartbreaking ones." He writes:

"It is truly painful to watch such students struggle with reading and flounder as they try to express their thoughts. The pain is in knowing that an intelligent young person has been cheated of what ought to be his educational birthright, an understanding of his own language."

Those who debunk the teaching of language and point to the ascendancy of electronic communications as a reason for de-emphasizing reading and writing, run the risk not only of creating a generation of functional illiterates but of depriving students of the set of symbols that makes logical thinking possible. As Royster notes, "those to whom written language is a mystery find, like some primitive people, that the world itself is a mystery." Without a firm grasp on language man cannot arrange in his mind the symbols for ideas and things which enable him to think clearly, a prerequisite for coherent writing. Professor Donald R. Tuttle describes the implications of continued deterioration of language skills for western civilization:

"Words have been the channel of man's thoughts, the embodiment of his spirit, the interpreter of his emotions, the basis of his society, the chief of his weapons against the barriers of space and the ravages of time. Without language, man would be but the most miserable of beasts, his power of reflective thought, his greatest resource, as impotent as if it never had been."[27]

Poorly equipped with language skills, the new breed of student is doomed to depend on the imagination of the listener or the reader to fill in the gaps of "you know what I mean" or "it's like...you know." Products of poor schooling struggle to externalize their thoughts through a small number of rather pitiful phrases. The incessant repetition of a slim vocabulary of four letter words among college students grows perhaps less out of the desire to shock than from the fact that students haven't other words with which to express themselves.

Those who teach foreign languages to college students are often faced with students incapable of learning another language because they haven't mastered their own. A glossary at the end of a short story by Thomas Mann is of no benefit to the student who knows neither the meaning of the German word nor of its English equivalent.

Those school systems which purport to teach "communication skills" instead of English but fail to produce literate graduates, are not living up to the promise implicit in the title of the subject. Instead of teaching students a means for communication, the schools are producing individuals incapable of expressing to another person a sensation, an idea, a nuance of a feeling, or anything whatsoever that is not entirely concrete. The denigration of language by the schools severs a man from his thoughts, severs one human being from the next, and is a serious step toward the creation of a handicapped society.

HISTORY AND SOCIAL STUDIES

The New York *Times* (May 2-4, 1976) American History, Knowledge, and Attitude Survey, administered to 1,856 college freshmen on 194 U.S. campuses, showed that one-third of the respondents thought the chief aim of colonial resistance on the eve of the Revolution was representation in Parliament rather than self-taxation.

Columbia professor William Leuchtenberg said of the test results: "The main conclusion one must draw is unmistakable: that this group of students knows remarkably little American history. Their knowledge of the Colonial period is primitive. Two-thirds do not have the foggiest notion of Jacksonian Democracy. Less than half even know that Woodrow Wilson was President during World War I. If this is the state of knowledge of American history, what can one anticipate about knowledge of the history of the rest of the world?"

The traditional role of the good history teacher is to weave dates into a meaningful whole as milestones marking high points in an exciting and true story. Instead, teachers today are increasingly discounting historical facts. Perhaps typical is the New Jersey educator (reported by CBE *Bulletin*, Feb. 1976) who said: "We teach history as a social science with economic, political, social, behavioral, and geographical ramifications. No longer do you get a chronological list you have to memorize — the 100 Great Dates. Who remembers them?"

William V. Shannon of the New York *Times* (Aug. 29, 1975) considers the debunking of history as one more expression of the anti-intellectualism which he finds typical of educators:

"The evisceration of history is part of the persistent debasement of serious education by 'educators' who really believe that the great majority of students are incapable of learning anything more difficult than they themselves cared to learn. What these educators have done to drive history out of the curriculum, they have also done to ancient and modern languages and to English literature."

The National Education Association has played a key role in degrading the level of education in most subjects. NEA biographer Edgar B. Wesley describes in his book *NEA: The First Hundred Years* how the NEA steered young people away from classical subjects toward those that better met society's "needs". The impact of this view upon education is aptly described by former Columbia professor Jacques Barzun[28]:

"Vagueness is bound to prevail when the aim of the school is no longer instruction in subjects, but education in attitudes to meet the needs of life. From the premise that life demands other qualities than learning, which is true and important, we have come to the conclusion that in a school scholastic ability and scholastic subjects are indecent and ought to be disguised....While biology and algebra are made genteel, play-acting goes on with 'living predicaments,' 'panoramas,' 'junior town meetings,' and 'research projects,' all of which can be used in many directions, like a transfer on a busline. The dogma goes far: a year ago or so, a good parochial high school in the Middle West was taken off the accreditation list because it did not offer Home Economics and Industrial Arts. These last-named subjects are no doubt important, and to some, who will shortly become wives and machinists, very important. But to argue that they are a necessary part of the curriculum to a community that does not want them shows the distance traveled since Jefferson's and Franklin's naive belief that public schools were for spreading literacy."

In the pursuit of "relevance" students learn social-studies material in a thematically rather than chronologically ordered pattern. The result is that students may be exposed to black history or the story of women's rights from the Salem witch trials up to the Equal Rights Amendment, while remaining unfamiliar with the facts surrounding the War of Independence or the Civil War. Instead of studying the details of a given period of history, students may be directed to pursue the theme of "Revolution" in all its forms (for example: industrial, Marxist, French), causing them to cover centuries and continents at a fast clip and frequently leaving them with a very blurred idea of what actually happened at a specific time in history.

The social studies approach is often mind-deadening as it whisks students superficially over a wide range of time and geography, loosely connected by an elusive theme. Using the inquiry method the student does not simply learn a body of knowledge but, in the style of a social scientist, questions the data and draws conclusions from them. Federal aid has played a major role in the promotion of the sociological approach to what used to be history, geography and government. Describing the concomitant preoccupation with social needs of the day, a New York *Times* (Apr. 30, 1972) analysis of social studies states:

"Largely as an outgrowth of such developments, a diffuse but massive and nationally based curriculum development effort was undertaken in the early sixties by numerous teachers, academics and curriculum specialists. The federal government poured millions of dollars into literally dozens of such projects. The resulting new materials are only now bursting fully upon the educational scene as virtually every textbook publisher in the country adopts the concept-and-inquiry approach at least in part."

The impact of federal aid on the dissemination of social studies curricula cannot be underestimated. Federal aid to education began in significant doses as recently as the mid-1960's as part of the Great Society program. It has since then more than doubled from $2 billion in 1966 to more than $5 billion as of this writing. Beginning in 1965 regional laboratories for educational research were established to provide federal funds for high level education studies.[29] The fact that more money to pay for such studies was available than there were good ideas to research may be at the root of some of our educational problems today. A number of dubious psychological theories, developed with the help of federal funds, were turned into educational methods for application in the schools.

Since 1967, the taxpayer supported National Science Foundation has been influential in the development of school curricula, under legislation permitting it to dip into "social science" studies. This $800-million-a-year independent federal agency spent millions to launch the "new math" program which, over a decade later, is still in schools nationwide. NSF also spent over $7 million to develop a fifth-and sixth-grade social studies course called *Man: A Course of Study* or MACOS.[30]

With federal funds, MACOS found its way into 1,700 public schools across the country. Through booklets, photographs and films students taking MACOS are introduced to adultery, wife swapping, cannibalism, murder, female infanticide, and senilicide. In the interest of cultural relativism pupils are made to look at grisly animal deaths and are encouraged to consider the ways of one of the most primitive human groups on earth as just another life style. The authors adopt a neutral tone, expressing no empathy for the sufferings of the many victims featured in this social studies course. Instead of learning history and geography, under MACOS school time is devoted to the study of the life cycles of several animal groups, which are then compared to the habits of the Netsilik Eskimo. Peter P. Dow describes the purpose of the course:

"We hope this course will awaken in children an awareness of the fact that what we regard as acceptable behavior is a product of our culture. Children must learn that their judgments of others are shaped by the culture in which we live."

As a result of Congressional opposition, notably from former Arizona Representative John B. Conlan, to MACOS, NSF's curriculum development budget for 1977 was cut from a requested $4 million to $1.4 million. This affected somewhat dissemination programs to promote a high school sequel to MACOS called *Exploring Human Nature* which NSF spent $2.5 million to develop. A 1975 NSF grant to the Educational Development Center, which developed both social studies curricula, went toward a series of promotion conferences to train local-

school administrators and teachers in how to use MACOS and its sequel. *Exploring Human Nature* features a genetic view of human behavior. The teacher's guide suggests "moral dilemmas" for dealing with such issues as population control. The students are faced with a choice between reducing births or increasing deaths. The guide states:

"As the population crunch becomes more severe and as more is learned about the genetic basis of particular human traits, it is likely that there will be increasing advocacy of various sorts of eugenic measures....It will be proposed...that society identify what are thought to be the most beneficial and most harmful existing genes, and that policies then be instituted to promote widespread reproduction of the former, while the latter are systematically culled out."[31]

By attending schools where the factual approach to history is ignored in favor of sociology, students are being deprived of what in the past was considered the fundamental fruit of education — an understanding of their own culture by studying its past. Students ignorant of history are cut off from their past and thus vulnerable to the seductive power of every passing fad, moral, social, economic, and political. Such individuals will suffer from what proponents of basic education call "collective amnesia"[32] as they grope blindly into the future without the benefit of "guideposts of precedent" to help shape their course. For these "historyless" individuals, equipped only with the methods of sociology, current affairs are not connected with the frequently repetitive story of mankind but remain objects of perpetual awe. Unable to anticipate the consequences of political or social or moral or economic actions because of this severance with the past, the products of the "historyless" culture will prove to be unenlightened voters in the deepest sense of the word.

MATHEMATICS

A series of declines in basic math test scores have disillusioned many regarding the variety of innovative methods loosely labelled "new math" which has been predominant in the schools since the early 1960's. Developed by the late Max Bierbaum (before his death he repudiated his own innovation), new math emphasizes the importance of *understanding* math theory. For example, to learn the theory behind computation, students are taught that $2+3 = 3+2$, not because both equal five, but because "the commutative law of addition holds." Students who have learned this verbal discussion of basic arithmetic often cannot multiply two numbers because learning multiplication tables by rote has been de-emphasized in favor of the "mastery" of such theories.

The analytic approach to mathematics may be of some value to the small number of students for whom theoretical mathematics will be a career. But to promote it at the expense of basic arithmetic means to handicap students in their daily lives in a manner analogous to the failure of the schools to transmit reading skills. Morris Kline, author of *Why Johnny Can't Add*,[33] considers new math to be of "unproven worth." He says:

"Even if it were the ideal curriculum for the training of mathematicians one could not be content. The new mathematics is taught to elementary and high school students who will ultimately enter into the full variety of professions, businesses, technical jobs, and trades or become primarily wives and mothers. Of the elementary school children, not one in a thousand will be a mathematician; and of the academic high school students, not one in a hundred will be a mathematician. Clearly then, a curriculum that might be ideal for the training of mathematicians would still not be right for these levels of education."

Criticism of math teaching methods has been mounting in the wake of declining test scores. Educators respond to it in much the same manner they do to criticism of the lack of reading skills. They suggest that solace might be found in the realm of technology. Just as some educators claim that, since we have television and other electronic communications media, students needn't work so hard at learning to read, so do math teachers now suggest the use of calculators *instead* of learning basic computation. A study funded by the National Science Foundation and conducted over an 18-month period as a response to criticism of math teaching methods, was presented at a 1975 (*Wall Street Journal*, Nov. 14) meeting of the Conference Boards of the Mathematical Sciences. The 157 page report recommends that:

"...beginning no later than the end of the eighth grade, a calculator should be available for each mathematics student during each mathematics class. Each student should be permitted to use the calculator during all of his or her mathematical work, including tests."

Professors of higher mathematics, well grounded in math theory, emphasize the importance of a basic ability to compute as a foundation for doing mathematics. This is the reverse of the sequence recommended by "new math" promoters. J. J. Uhl, professor of mathematics at the University of Illinois, says, "Calculators won't replace computational skills. That's like saying now that we have wheel chairs we don't have to walk any more. New math educators are on the frontiers of their knowledge. Because they don't understand the mathematics upon which the theories are based, they emphasize terminology instead of technique."

REACTIONS AND COUNTERMEASURES

Educators, understandably, have played down the seriousness of this whole problem of cumulative mediocrity in the schools. McCurdy and Speich note that "the relatively few school official who concede that there is a decline in student achievement channel the blame for it everywhere but within the walls of the nation's high schools and colleges."[34]

However, in view of growing dissatisfaction with the schools' performance, educators may not be able to ignore the situation much longer. A new kind of lawsuit has attracted attention to the problem. A high school graduate sued the San Francisco school system for its alleged failure to teach him how to read. In New York, high school graduate Edward Donohue, sued the Copiague school district for $5 million for "educational malpractice." Despite his high school diploma, the unemployed carpenter said he cannot even read a menu printed in English.[35] Of the 1977 graduating class in the Northern Virginia suburbs, most of which are wealthy bedroom communities of the nation's capital, two valedictorians said they would have liked to learn more reading and writing skills.

On another front, a 1975 Gallup poll of parents indicated that fewer than ever before would rate their schools A for excellent and that a

majority would send their children to a school strict on discipline and strong on its emphasis of the three "R's".

Those school systems, however, that are ready to upgrade standards are facing the very serious problem of a glut of teachers untrained to teach basic skills. Many are tenured recipients of annual pay increases, solidly backed by teacher unions in their resistance to change. The New York State Education Department's attempt to institute competency-based teacher instruction met with teacher union opposition. Under the plan education students get academic credit according to their mastery of specified skills expressed in teaching situations.

Elizabeth Wooten Cowan, director of English programs for the Modern Language Association, a body of college professors who support quality education, points to poor teacher preparation as a key cause for today's poorly equipped public school products. "Until potential teachers study the intricacies of teaching reading and writing and the mechanisms of learning them as thoroughly as they do the literary history of England, there's not much chance of improvement." [36]

The level of teacher mediocrity which some school systems confront was demonstrated in Montgomery County, Maryland. Tests for teachers in grammar, punctuation and spelling were recently adopted. Half the teachers applying for English teaching positions flunked the test. An investigation conducted in that county to determine the cause for declining test scores on national tests revealed the truism that teachers who are better prepared in English grammar are more likely to teach it. [37]

Some school districts are trying to solve teacher and student deficiencies concurrently. The District of Columbia has instituted a competency-based curriculum to replace "social promotion" and has added recertification requirements for teachers. School Superintendent Vincent E. Reed proposed that applicants for teaching jobs be tested in the fields they want to teach before they are hired. The level of the concern in this school district, which traditionally scores low on national achievement tests, was expressed by Carol L. Schwartz, vice president of the D.C. Board of Education. She stated (Washington *Post*, May 17, 1977):

"We are graduating students without the basic fundamental skills, we are employing some teachers who are academically deficient, we are so busy using our students as guinea pigs in the educational experiments of the day that their education is getting lost in the process."

But there is also good news in many school districts across the nation as low test scores and community pressure motivate school systems to upgrade standards in fundamental skills. This means institution of graduation requirements, abolition of social promotion and a re-examination of teacher staff and hiring policies.

In some cases results have been immediate. The institution of promotion tests requiring the mastery of a body of material before granting advancement to the next grade has caused the Emporia, Virginia, school system to move from near the bottom of national rankings to above average in many subjects.

In Louisiana, State Representative Louis B. Jenkins introduced in the legislature a bill that would require teachers to pass an English language proficiency examination in order to teach in the school system.

As part of its campaign for quality education, the Virginia State Board of Education voted to require minimum competence in four basic areas for high school graduation. The areas are: functional literacy, computational skills, a basic knowledge of the history and culture of the United States, and either a job entry skill or the ability to pursue higher education.

Denver, Colorado, home base of the Education Commission of the States, since 1962 has had a proficiency exam to test high school seniors for a minimal grasp of basic skills and has instituted remedial classes to which the failing ones can be referred. The state legislature decided to give the test as early as ninth grade in order to give students maximum time to correct weaknesses in remedial classes. The Denver test, viewed in other states as a model, tests students in four areas: numerical, spelling, language, and reading skills.

Arizona requires that graduating students be able to read, write and compute on at least a ninth-grade level. The Oregon State Board of Education asked local school districts to develop minimum competency standards for high school graduation to go into effect in 1978.

Among the most interesting cases of the new movement toward standards are those of ghetto school systems where the emphasis on basic education taught in a structured atmosphere has had good results. These are the schools where educators have too often blamed failure on the students and not the schools. The Council for Basic Education describes four such schools in a booklet by George Weber entitled, "Inner-City Children Can Be Taught to Read: Four Successful Schools."

The Argus Community School, located in the South Bronx slums of New York City, teaches young people, over half of whom have crime records, how to read, write and do arithmetic. Through a combination of discipline and an emphasis on the three R's students at Argus average more than 1.5 years of reading progress for each year of attendance. Students have advanced more in reading skills in a year at Argus than in six or seven years of regular school.

In some school districts the exertion of leadership toward achieving quality education by the school superintendent has brought positive results. In Richmond, Virginia, school superintendent Thomas C. Little introduced his own reading program directed especially at high school students whose reading scores are in the 25th percentile or below and at middle school students who are two or more grades below the national norm.

The latest innovation in many school districts is the so-called "alternative" school, which exists parallel to traditional schools but offers more emphasis on basic skills within a structured setting. More accurately, they should be called *fundamental* or *basic* schools, because an alternative school can also be one which is very permissive or "unstructured" — that is, even more permissive than the regular schools in a system. Parents should be aware of this distinction.

The Miami-Dade County school system in Florida has started six such *fundamental* schools. Dress codes, homework and good penmanship are back in style at many fundamental alternative schools. The Basic Alternative School in Prince George's County, Maryland, emphasizes arithmetic, reading taught by the phonics method, and history. The Fitler School in Philadelphia, Pennsylvania, rejects social

promotion and focuses largely on fundamental skills.

The example of the Pasadena Unified School District should serve to demonstrate what concerned members of the community can achieve. Pasadena schools were in a state of crisis in 1972. Massive busing had led to an exodus of students to private schools. Progressive education was predominant and sinking test scores reflected the low level education had reached. When three of five school board seats were up for election a group of citizens concerned with basic education offered candidates and won all three seats. Under the leadership of school board president Dr. Henry S. Meyers, Jr., the new board decided to offer a fundamental alternative school, one that differed from already established unstructured alternative schools.

Therefore, they established several Fundamental Schools where the emphasis is on basic subjects, homework is assigned, social promotion is abolished, periodic testing is conducted, students are grouped according to ability, and discipline is maintained. Test scores in these new schools soon rose, which made them very popular. When the John Marshall Fundamental School was established in 1973 in Pasadena, 450 students left private schools to enroll in the new alternative school.

According to estimates of the Council of Basic Education, there are several dozen fundamental alternative schools in at least twenty-two cities, most of them started in the last couple of years. Edward B. Fiske (N.Y. *Times*, Mar. 20, 1977) writes:

"Underlying them all is a growing sense among parents, school board members and others that the educational process has somehow gotten out of hand and that children simply aren't learning the way they should."

IT'S NOT TOO LATE

Concern over public school systems that don't educate a nation's children goes beyond a justified sense of outrage at institutions that cheat the individual child out of his right to an education. A society that hopes to preserve itself cannot do so by creating a generation of illiterates and, according to U.S. Office of Education statistics, functional illiterates now number 23 million.

People who emerge from a public-school education without the ability to obtain facts by reading, without the facility to put their thoughts into writing, and without having learned to examine a group of facts analytically are vulnerable to the most dangerous of passing fads, political and social. A nation comprised of a large number of public-school products thus handicapped, can hardly hope to remain a Free Society for long.

Equally dangerous for society as the failure to teach students the basic skills, is the manner in which schools are neglecting to convey to students a sense of their history and an understanding of the basic elements of a Free Society. If, given the choice between security and freedom, man naturally favors security, then a love of freedom is not instinctive but must be learned. Given the historic precedents that bear out this theory, the present state of the schools and its predictable consequences must become a matter of grave concern.

Recent attempts on the part of communities and concerned educators to reverse this trend are heartening signs and evidence that it is not yet too late. They are an indication that, even when deterioration is widespread, people in a Free Society can still bring about change, if they are willing to dedicate themselves to the task.

CITY AND BOROUGH OF JUNEAU

YOUTH SURVEY

A. Background:

1. What school (agency) do you go to? _____

2. How old are you? (circle one) 9 10 11 12 13 14 15 16 17 18 19 20

3. What is your sex? (check one) ____(1) Male ____(2) Female

4. To which ethnic group do you belong? (check one)

____(1) Alaska Native ____(2) Black ____(3) Filipino

____(4) Anglo ____(5) Hispanic ____(6) American Indian

____(7) Other

5. What grade are you in now? (check one)

____ Open Classroom ____ 5th ____ 6th ____ 7th ____ 8th

____ 9th ____ 10th ____ 11th ____ 12th ____ Not in School

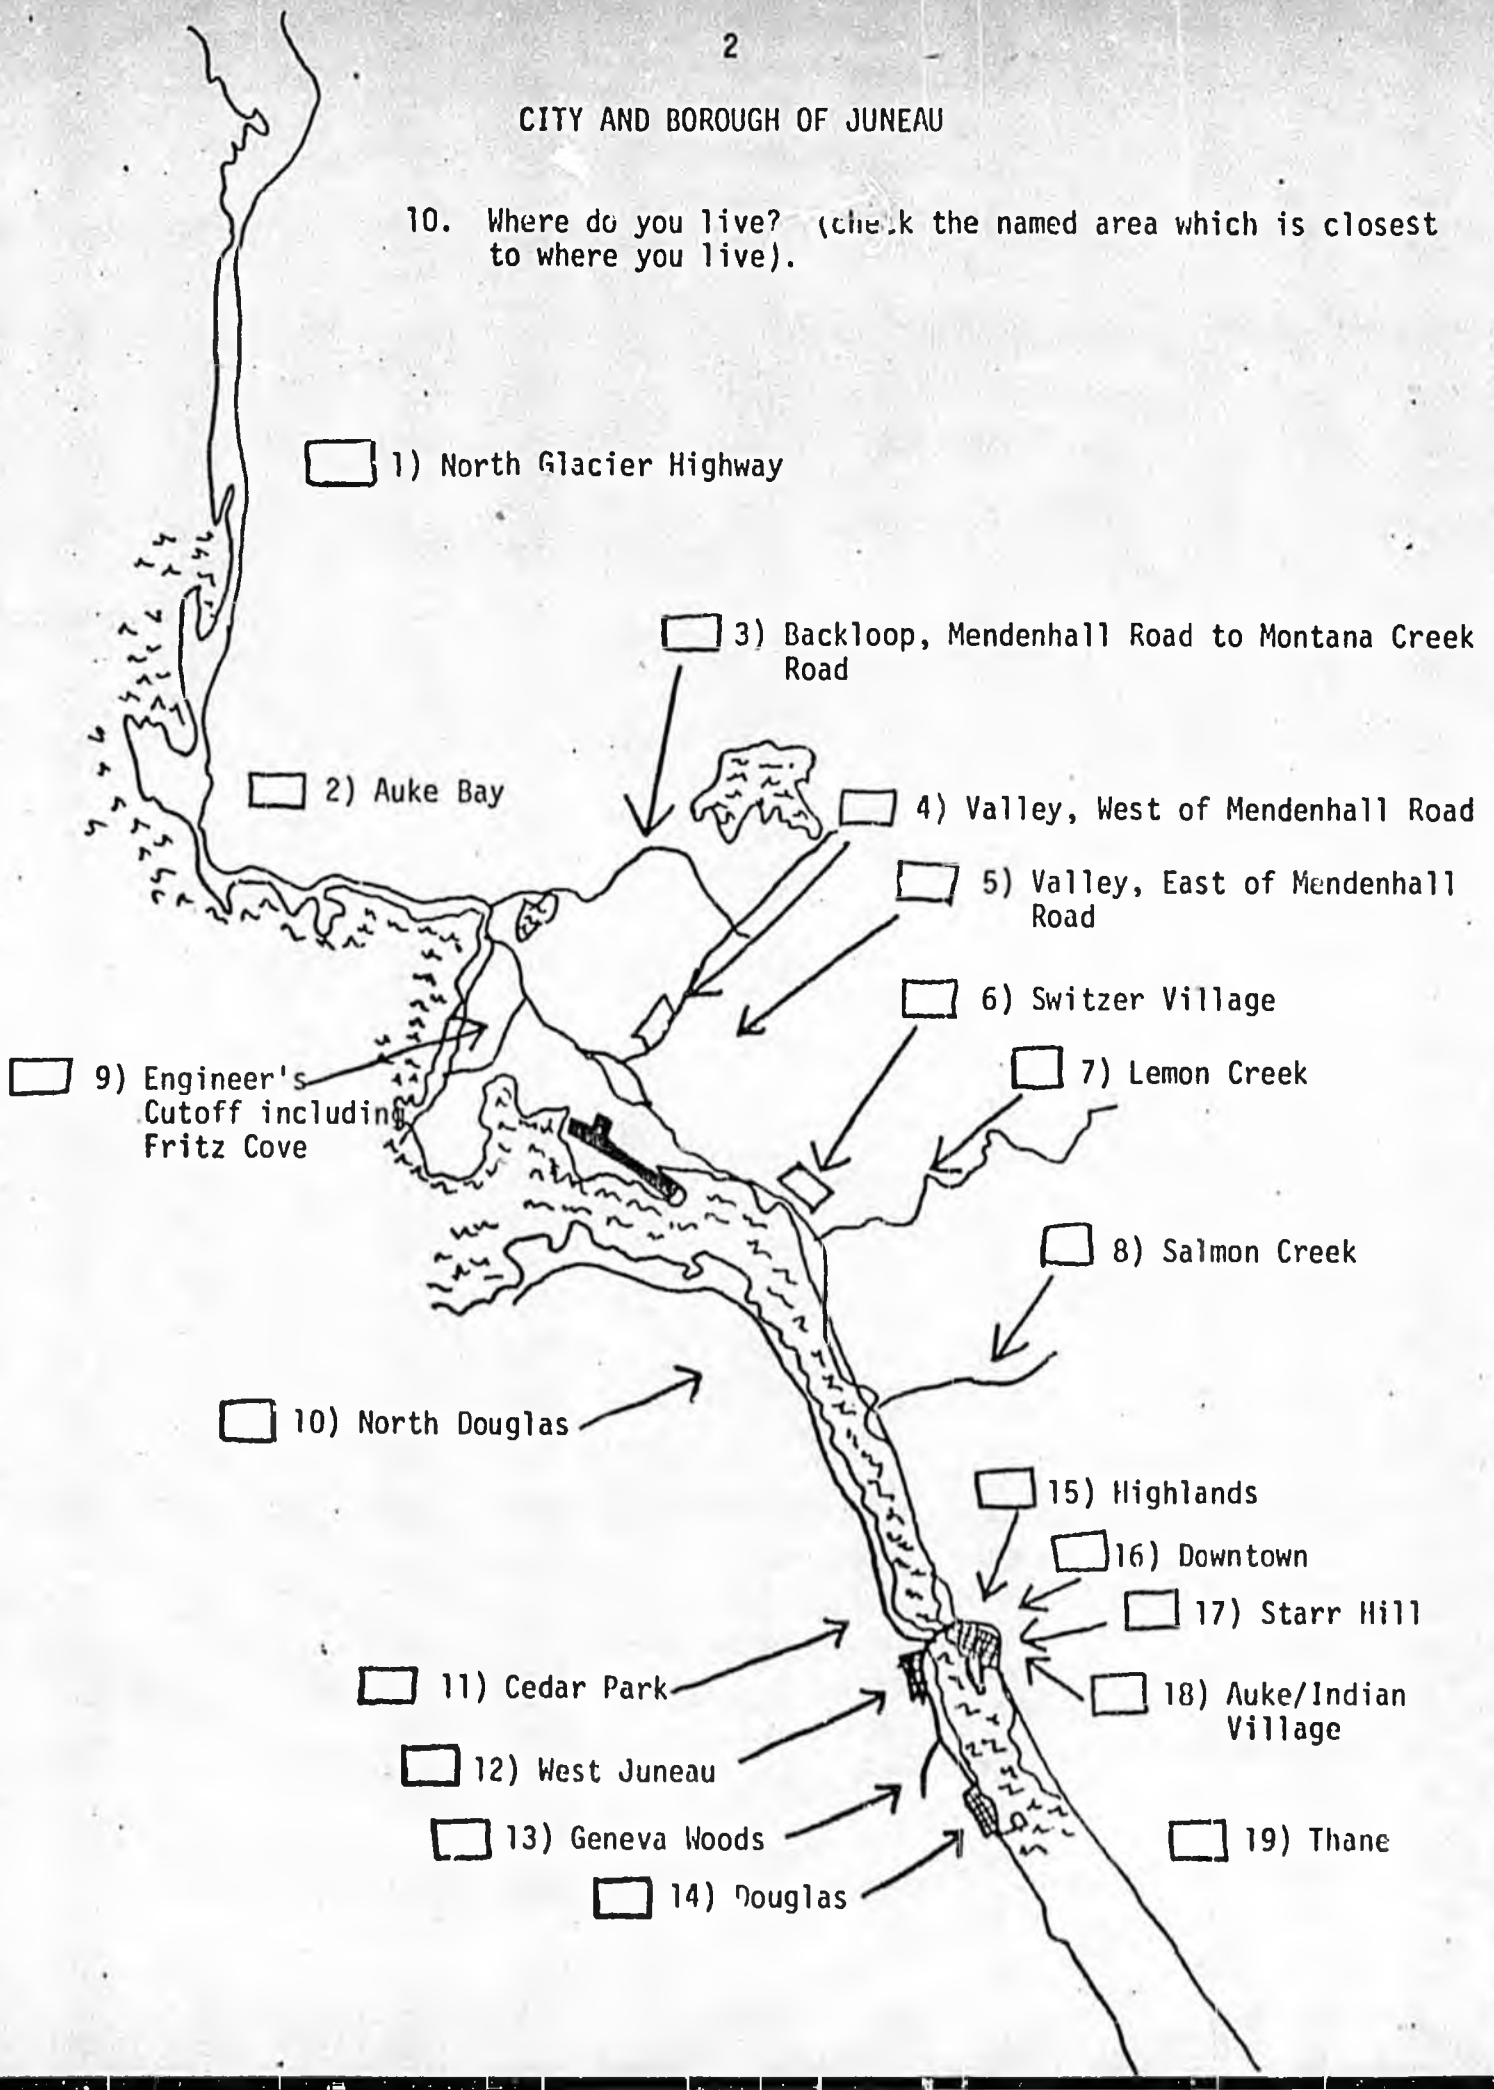
6. How long have you lived in your present home?

____ Less than one year ____ One or two years

____ Three or four years ____ More than four years

7. Which of the following best describes where you live?

____(1) house [one family only]
____(2) house [more than one family]
____(3) apartment
____(4) mobile home or trailer home
____(5) hotel or motel
____(6) boat
____(7) group home or receiving home
____(8) other



8. How many rooms are in your home? (Do not count bathrooms, closets, or other storage space.)

____

9. How many people live in your house? ____

CITY AND BOROUGH OF JUNEAU

10. Where do you live? (check the named area which is closest to where you live).

11. With which of the following adults, 18 years of age or older, are you living? (check as many as apply)

____ Mother ____ Father ____ Stepmother ____ Stepfather

____ Fostermother ____ Fosterfather ____ Grandmother

____ Grandfather ____ Aunt(s) ____ Uncle(s) ____ Sister(s)

____ Brother(s) ____ Cousin(s) ____ Other (please explain)

12. Counting yourself, how many children or youth under the age of 18 live in your home? ____ How many are related to you? ____

13. In the past year, which of the persons listed below moved in or out of your home? (If no one has moved, do not check any items.)

	Moved In	Moved Out
Mother	1)____	2)____
Father	1)____	2)____
Stepmother	1)____	2)____
Stepfather	1)____	2)____
Fostermother	1)____	2)____
Fosterfather	1)____	2)____
Other (please explain)	_____	

14. Are your parents divorced? ____

B. Employment:

1. Do you have a paying job? ____Yes ____No

   a. If yes, are you working full-time ____, part-time ____, or sometimes (babysitting, odd jobs, etc.) ____?

   b. How much do you earn per week? _____

   c. If no, are you looking for work on a full-time basis ____, part-time ____, or sometime (babysitting, odd jobs, etc.) ____?

2. Do you want a job in Juneau this summer? ____Yes ____No

   a. Full-time ____ Part-time ____

   b. What kind of job would you like? _____

Please look at each of the following statements. Check the right response for each Statement. When you find a statement that does not apply to you, just check NO in the first column and go on to the next one. If a statement is true for you, we would like to know HOW OFTEN it was true and HOW SERIOUS or IMPORTANT it was for you.

Statement	Is this statement true for you?		If Yes, How Often?			How Important or Serious?		
	Yes	No	Once or Twice	Some-times	Always	Not	Some-what	Very
3. I have looked for work in the past year, but there were no jobs.	___	___	___	___	___	___	___	___
4. I was unable to find a job last summer.	___	___	___	___	___	___	___	___
5. I was unable to get a job because of my age.	___	___	___	___	___	___	___	___
6. I don't know how or where to find out about jobs.	___	___	___	___	___	___	___	___
7. My reputation makes it difficult for me to get a job.	___	___	___	___	___	___	___	___
8. My police record makes it difficult for me to get a job.	___	___	___	___	___	___	___	___
9. My sex (boy or girl) makes it difficult to get the job I want.	___	___	___	___	___	___	___	___
10. My race or ethnic background makes it hard to get or keep a job.	___	___	___	___	___	___	___	___
11a. I have no training for the jobs that interest me.	___	___	___	___	___	___	___	___

b. The type of jobs that interest me are _____.

C. School:

Statement	Is this statement true for you?		If Yes, How Often?			How Important or Serious?		
	Yes	No	Once or Twice	Some-times	Always	Not	Some-what	Very
1. Most of my teachers understand me.	___	___	___	___	___	___	___	___
2. There are not enough classes which are important or useful.	___	___	___	___	___	___	___	___
3. The school nurse has been a help to me.	___	___	___	___	___	___	___	___
4. In the past year I have been pressured by other students to use or buy alcohol or drugs.	___	___	___	___	___	___	___	___
5. Most of my teachers do not really care about me.	___	___	___	___	___	___	___	___
6. I have been suspended from school.	___	___	___	___	___	___	___	___
7. I have been discriminated against in school because of my race or ethnic background.	___	___	___	___	___	___	___	___
8. I have ~~not~~ intentionally damaged or destroyed school buildings or property.	___	___	___	___	___	___	___	___
9. Students have enough say in how my school is run.	___	___	___	___	___	___	___	___
10. I have been physically hurt by other students.	___	___	___	___	___	___	___	___

Statement	Is this statement true for you?		If Yes, How Often?			How Important or Serious?		
	Yes	No	Once or Twice	Some-times	Always	Not	Some-what	Very
11. I have stayed away or "skipped" school.	___	___	___	___	___	___	___	___

12. What are the three best things about your school?

a. _____

b. _____

c. _____

13. List the three things which your school needs most.

a. _____

b. _____

c. _____

D. Community and Home:

Statement	Is this statement true for you?		If Yes, How Often?			How Important or Serious?		
	Yes	No	Once or Twice	Some-times	Always	Not	Some-what	Very
1a. My mother spends enough time with me.	___	___	___	___	___	___	___	___
b. My father spends enough time with me.	___	___	___	___	___	___	___	___
c. My guardian spends enough time with me.	___	___	___	___	___	___	___	___
2a. My mother does not provide enough guidance or super-vision.	___	___	___	___	___	___	___	___

Statement	Is this statement true for you?		If Yes, How Often?			How Important or Serious?		
	Yes	No	Once or Twice	Some-times	Always	Not	Some-what	Very
2b. My father does not provide enough guidance or supervision.	___	___	___	___	___	___	___	___
c. My guardian does not provide enough guidance or supervision.	___	___	___	___	___	___	___	___
3. The police/troopers are available when I need them.	___	___	___	___	___	___	___	___
4. I visit with some of my neighbors.	___	___	___	___	___	___	___	___

5a. I am often left without an adult at home. ___ Yes ___ No

b. If yes, is it usually overnight ___, over a weekend ___, or for several days ___? (check one) ___ for a few hours?

Statement	Is this statement true for you?		If Yes, How Often?			How Important or Serious?		
	Yes	No	Once or Twice	Some-times	Always	Not	Some-what	Very
6. In the past year I have been stopped by the police.	___	___	___	___	___	___	___	___
7. I have been arrested by the police.	___	___	___	___	___	___	___	___
8a. My mother understands many of my problems.	___	___	___	___	___	___	___	___
b. My father understands many of my problems.	___	___	___	___	___	___	___	___
c. My guardian understands many of my problems.	___	___	___	___	___	___	___	___

Statement	Is this statement true for you?		If Yes, How Often?			How Important or Serious?		
	Yes	No	Once or Twice	Some-times	Always	Not	Some-what	Very
9a. I cannot talk with my mother about my ideas or problems.	___	___	___	___	___	___	___	___
b. I cannot talk with my father about my ideas or problems.	___	___	___	___	___	___	___	___
c. I cannot talk with my guardian about my ideas or problems.	___	___	___	___	___	___	___	___
10. The police/troopers discriminate against me because of my race or ethnic background.	___	___	___	___	___	___	___	___
11. The police have been helpful to me.	___	___	___	___	___	___	___	___
12. My father, mother, or guardian drinks a lot of alcohol.	___	___	___	___	___	___	___	___
13. ~~My parents are at home~~.	___	___	___	___	___	___	___	___
14. My parents or foster parents argue.	___	___	___	___	___	___	___	___
15. My parents or foster parents fight.	___	___	___	___	___	___	___	___

IN THE SENATE BY BRADLEY

SENATE BILL NO. 40

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to parental rights."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.30 is amended by adding new sections to read:

ARTICLE 5. PARENTAL RIGHTS.

Sec. 14.30.450. PURPOSE. The purpose of AS 14.30.450 - 14.30.540 is to protect the rights of parents and guardians in regard to their minor children enrolled in the schools of the state. The educational well-being of the child is best served when there is mutual cooperation and confidence between parents and school personnel.

Sec. 14.30.460. ACCESS TO INSTRUCTIONAL MATERIAL AND PROGRAMS. The district school board or regional educational attendance area school board shall keep on file and make available for inspection to parents or guardians all instructional materials being used in the district. The materials may be inspected during regular office hours.

Sec. 14.30.470. PARENTAL APPROVAL OF CERTAIN PROGRAMS. Before placing a student in a program which is specifically funded as an experimental, innovative, pilot, or research program, the local board shall inform the parent or guardian that the child is being placed in such a program. If the parent or guardian objects, the child shall be placed in a regular program of instruction.

Sec. 14.30.480. TESTING PROCEDURES. A personality or attitude adjustment test shall be administered under the following circumstances:

(1) The tests shall be made available to parents or guardians for inspection at the school where the test is to be administered.

(2) Parents or guardians shall be informed of the nature of the test and written consent shall be obtained from the parent or guardian before the administration of the test to a student.

(3) The students are informed that the tests are voluntary and not a school requirement.

Sec. 14.30.490. CONTENT OF STUDENT'S RECORDS. Student records shall include an annual evaluation of the student's progress in the basic skills of reading, language, and computation, measured in terms of grade level norms set by the local school district board.

Sec. 14.30.500. ACCESS TO STUDENT RECORDS BY PARENTS. A school shall, upon request, make available to the student, parent or guardian of a student the content of the student's records. The parent or guardian may choose to be accompanied by another person or persons during a review of the contents of the student's records.

Sec. 14.30.510. CORRECTION OF STUDENT RECORDS. (a) If a parent or guardian disputes the accuracy of an item in the student's records, he may give notice in writing to the principal specifying in what manner he believes the item in the records is inaccurate. Within 15 days after receiving a notice of the alleged inaccuracy, the principal shall, in writing, either deny the alleged inaccuracy, admit the inaccuracy, or state that there has not been sufficient time to complete an investigation.

(b) If the principal states that there has not been sufficient time to complete the investigation, he shall immediately investigate the matter to determine its accuracy. When the principal completes the investigation and determines whether the item is accurate or inaccurate, he shall inform the parent or guardian. If the principal determines that the item is inaccurate, he shall immediately correct the item in the records and inform anyone who has previously received a report

containing the inaccurate information.

(c) The parent or guardian may attach a written statement to a disputed item that cannot be resolved under this section.

Sec. 14.30.520. PERMISSIBLE USE OF STUDENT RECORDS. (a) Student records are confidential and may be made available only

(1) to the student, parent, or guardian of the student;

(2) to the professional staff working with the student;

(3) to a court ordering their production;

(4) under written instructions of a parent or guardian for their transfer to another school or institution;

(5) under any other written instructions from a parent or guardian; and

(6) for verification of pupil attendance, bus transportation, or similar expenses to state or federal agencies.

(b) A school employee may not use student records for a personal, nonprofessional reason.

Sec. 14.30.530. ENFORCEMENT. (a) A person whose rights under AS 14.30.450- 14.30.520 are violated may apply to the superior court for an order protecting and enforcing the rights.

(b) A school district or regional educational attendance area found under (a) of this section to have violated rights protected under AS 14.30.450 - 14.30.520 is liable for the assessment of costs and attorneys fees under Rule 82 of the Alaska Rules of Civil Procedure; as appropriate, the court may also assess against the school district extraordinary costs of the plaintiff, including but not limited to costs of travel.

Sec. 14.30.540. DEFINITIONS. In AS 14.30.450 - 14.30.540,

(1) "academic test" means an instrument used to assess a student's academic achievement;

? add video tape

(2) "instructional material" means a textbook, teacher manual, film or filmstrip;

(3) "personality or attitude adjustment test" means a written test or questionnaire other than an academic test for the collection of information relative to a student's personality, envirorment, home life, parental or family relationships, economic status, religious beliefs, patriotism, sexual behavior or attitudes, or psychological or sociological problems;

(4) "school" means a public elementary or secondary school of the state maintained by an organized school district or by a regional educational attendance area;

(5) "student" means a person enrolled in a school maintained by an organized school district or by a regional educational attendance area;

(6) "student records" means all information on the student recorded and retained by the school.

Letters To The Editor

Juvenile Crime

Dear Editor:

A recent published article tells of parents forced to pay for vandalism by teenagers. Another lists crimes committed without names of teenagers. We coddle them, tolerate them, pay for their crimes. This permissive society stinks. Condone it because you can't control it, turn your back so as not to see.

Give the parents back the control and discipline of the teenagers. Throw out the tax wasting social agencies and legislators that sponsored the runaway laws, give the police back the authority they need to curb the increase in juvenile crime and put every pothead in jail. This sounds tough, but it comes from experience with a teenager who receives advice that the law doesn't have a thing to say and neither does the parent.

If the parent as a voter took a stand right now and drew the line, decided to change things to eliminate the we-can't-help-you attitudes, if those of us who have suffered because a decaying morals Legislature allowed the current drug laws, would stand up and tell those politicians that next year they will find themselves on the outside looking for a job, the tide would turn.

Enforce the curfew law, Repeal the lenient drug laws. Jail drug pushers and throw away the key. Make anyone who breaks the law, at any age, pay the price. Those are simple rules to follow, the 10 Commandments and the use of common sense.

Religious Broadcasts

Dear Editor:

In regard to the letter on religious broadcasts that appeared in your paper March 22: I am sure that history will record that Madeline Murray O'Hare was a great patriot. Mrs. O'Hare alone successfully carried the fight to prevent the teaching of mysticism and supersition in government-owned schools.

I am in opposition to Mrs. O'Hare in her opinion that churches should be taxed. This is not because I believe churches should have a special category, but because I believe all taxes are immoral.

I totally agree with her objection to religious broadcasts. These programs are either presented as public service broadcasts or they are paid for by tax-exempt funds — for example, the PTL Club aired over Channel 2.

I wish Mrs. O'Hare all success in her new endeavor.

Herbert Mallicoat
Box 6765

Sex Education

Dear Editor:

I am writing this letter as a concerned parent residing in the Anchorage area.

There has been much concern over the issues of sex education and the way it is being taught to our young people in public schools.

My reason for writing is that I would like to see a film study arranged on the concerns and issues of sex education. This would be done so that parents have the opportunity to see what is being taught, that they may better be informed and able to air their feelings and opinions on these issues.

That this is an unpopular opinion among some teachers and members of the school board should be of no concern. What should be taken into consideration is that your child is your responsibility. I sincerely feel that a film study can be arranged for the parents and other concerned citizens. Sex education should be open to public opinion and no longer kept in the closet or whitewashed.

Mary B. Clark
7150 Henderson Loop

The Port

Dear Editor:

I am writing to you as president of the United States Merchant Marine Academy Alumni Association for northeast Ohio.

I examined your Port of Anchorage dock area. It is one of the finest I have ever seen. It is one that any city would be justifiably proud to have and utilize.

I then read your story of the retiring Chamber of Commerce head, Claire Banks, who spearheaded the drive to establish the Port of Anchorage docks. All citizens and businesses of the Anchorage area truly own him a debt. Because of his efforts they can live better for less.

James J. Bambrick
Cleveland Heights, Ohio

Parental Rights Bill In Senate

A bill entitled "An Act relating to parental rights." Sponsored by Senators Bradley, Huber and Orsini, SB 495 includes sections that "protect the rights of parents and guardians in regard to their minor children enrolled in the schools of the state. It finds that the educational well-being of the child is best served when there is mutual cooperation and confidence between parents and school personnel."

The act provides that school boards will keep on file and make available for parental inspection, all instructional materials used.

It also requires that before a student may be placed in an experimental, pilot or research program that the parents shall be informed and then give the parents an option to refuse to have their child in such a program.

Of particular interest to parents is the section on testing procedures which states that no personality or adjustment test may be administered except under certain conditions: (they must be available for parental examination; parents must be informed and written consent given; and the tests must be voluntary.

This type of test includes tests that collect information relative to a student's personality, environment, home life, parental or family relationships, economic status, religious belief, patriotism, sexual behavior or attitudes, or psychological or sociological problems.

The bill also provides that student records shall include a yearly evaluation of the student's progress in the basic skills of reading, language and computation measured in terms of national standard grade level norms.

It further provides that a school shall make records available, upon request, to parents or guardians and that the parents may be accompanied by another person or persons while examining the student's records.

Under the terms of this bill these school records may be challenged by a parent and either corrected or may have a written report placed in these records by the parent. The bill also limits use of the records to a very limited number of people.

Letters in support of SB 495 can be sent to your State Senator or the sponsoring senators, Pouch V, Juneau, AK 99811.

Comments Sought From Churches

State Senator Mike Coletta has provided ***ALERT*** with an advance copy of Senate Bill 504 entitled "An Act Relating to the Regulation of Charitable Organizations and the Solicitation of Contributions for Charitable Purposes." He has indicated that he will address any questions that might be raised about this bill.

Among other things this bill:

- Requires that charitable organizations soliciting contributions within Alaska register with the Attorney General's office. A $10 fee will be charged.
- Certain educational institutions, all organizations who solicit contributions only from their members and fund raising or relief of an individual are exempt from the registration requirement.
- The organizations required to register must also file annual reports listing, among other things, gross income, expenses and net income inuring to the benefit of the charity.
- Professional fund-raisers must register with the Attorney General's office. A registration fee and bond are required.
- I.D. cards must be carried by all persons soliciting contributions and the cards must be produced upon request of any potential contributor.

Senate bill 504 is very lengthy and should be evaluated by both churches and charities to insure that the interpretation of this bill will reflect the intent of the sponsor and serves the best interest of the community.

ALERT suggests that churches or individuals interested in further information should obtain a copy of the bill by calling the Alaska State Legislature Offices — phone 278-3668. Address your comments on SB 504 to Churches Alert, P.O. Box 10-445, Anchorage, AK 99511.

Lawyer Confident Parental Rights Ruling Will Prevail

Washington (NC) — An official of the Catholic League for Religious and Civil Rights has praised a U.S. District Court ruling that parents must be notified before public agencies dispense contraceptives to their minor children, and expressed confidence that the decision will be upheld on appeal.

Stuart D. Hubbell, executive director of the Catholic rights organization, called the recent ruling by District Court Judge Noel P. Fox of the Federal District Court for Western Michigan "a very strong opinion in law."

The Catholic League, which argued the case, "made a good record in court, establishing all the facts we wanted to establish," said Hubbell, a Traverse City, Mich., attorney.

In his most recent decision, Judge Fox reaffirmed his own ruling in the case of *Doe v. Irwin*. He had been ordered by the Sixth Circuit Court of Appeals to review the case in light

It Just Isn't Fair!

Milwaukee (NC) — It just wasn't fair.

At one table students sat down to china, place mats, silverware, fresh fruit, cookies, fruit cocktail, salt and pepper, and soy sauce in a crystal creamer.

Waiters served them piping hot chop suey loaded with big chunks of meat, and the milk seemed to flow from a bottomless pitcher.

But by the time the waiters got around to tables on the far side of the cafeteria, the only thing left was a little bit of rice, and that was cold.

The students at Milwaukee's Divine Savior-Holy Angels High School bore the disparity in the meals with good humor, though, because what seemed a case of bad planning was actually a lesson in world food distribution. All 400 girls taking part had volunteered, so they were prepared for what might—or might not—be served.

The World Hunger lunch, which left most of the girls with

World Refugee Population at 13 Million

Washington (NC) — There are more than 13 million refugees throughout the world, with Africa experiencing the largest growth in refugee population but the Middle East still facing the "most volatile political situation," according to the 1978 World Refugee Survey Report of the U.S. Committee for Refugees.

The report said that in Africa 1.5 million people have been displaced by the civil war in Angola; 800,000 have fled conflicts in Ethiopia; half the population of Equatorial Guinea—145,000 people—have left the country because of "severe human rights violations [by one of] the most brutal regimes in the world"; and about 50,000 have sought to escape guerrilla war in the Western Sahara.

The two million Palestinian refugees throughout the Middle East may be further threatened by "new tensions between Egypt and her Arab neighbors," the report said. In addition, there are 200,000 people internally displaced on the island of Cyprus because of Turkish occupation; 300,000 Kurds who have been forcibly relocated in Iraq; and an estimated 400,000 Lebanese displaced within the country by fighting there.

In Latin America, 80% of all citizens live under military dictatorships and "human rights violations have been widespread," said the report, which noted particular concern for 10,000 refugees living in Argentina. But, it said, "in a positive development, several Latin American nations have announced plans to return to civilian life, and have promised free elections and the release of political prisoners."

Five million refugees remain internally displaced in Indochina, "and the border war there between Cambodia and Vietnam threatens to increase this number dramatically," the report said. It called the plight of the "boat people"—those who leave Vietnam by sea and are often turned away at other Southeast Asian ports—"the most dramatic example of refugee vulnerability."

The report also outlined "one of the least noticed refugee problems"—the presence in Bangladesh of almost 400,000 Biharis, non-Bengali-speaking Moslems who fled India in 1947 and are living in makeshift refugee camps awaiting repatriation to Pakistan.

"The enormity of the world refugee problem bears tragic witness to the need for international safeguards ensuring the right of every individual to seek and be granted asylum," said Gerald E. Connolly, executive director of the committee. He added that less than half of the member nations of the United Nations have ratified existing refugee protection treaties and that no Asian nation has entered into such an international agreement.

"The shame of it all," Connolly added, "is that the international community seems to have become inured to the sight of millions and millions of persons who feel the need to flee war, civil strife, racial injustice and political oppression."

Archbishop Calls for Alternate Solution to Teen Pregnancies

New York (NC) — The solution to the problem of teenage pregnancies and abortions lies not in "massive contraceptive indoctrination" but in education that will help them "grow up as sexually mature adults," said Archbishop Joseph L. Bernardin of Cincinnati in the Jan. 22 issue of the *New York Times*.

Writing in the newspaper's op-ed pages on the fifth anniversary of the U.S. Supreme Court decisions lifting most state restrictions on abortion, the archbishop said that there is a consensus in this country that abortion "is not desirable in and of itself."

Opinions differ, however, on solutions to the problem of teenage pregnancies, said Archbishop Bernardin, immediate past president of the National Conference of Catholic Bishops. Many promote the wider dissemination of contraceptives and contraceptive information among teenagers, but past experience shows that such a policy "will motivate them to precocious sexual activity but by no means to the practice of contraception," he said.

Archbishop Bernardin called that approach "a cheap solution that will not work and that, if it did work would not meet the real developmental needs of teenagers searching for sexual identity."

In addition, he said, the current availability of contraceptives and contraceptive information indicates that "if sexually active teenagers do not practice contraception, it is not because they lack opportunity."

The alternative solution, although not an easy one, lies in "turning things around, and instead of telling teenagers that they can have sex without consequences, telling them the truth: There is no such thing as sex without consequences, whe-

Equatorial Guinea: Torture Capital of the World

London (NC) — Two political prisoners who escaped from Equatorial Guinea said its ruler ordered a reenactment of the Way of the Cross, a crucifixion and a mock Mass as a way of torturing and killing dissidents.

The report of the two men, who asked not to be named, was publsihed by Amnesty International, the London-based organization concerned with human rights.

The two escapees said that President Francisco Macias Nguema, who after a nine-year rule proclaimed himself president for life, has made Guinea "a huge torture center in which the only way out is to the cemetery."

Previous reports said the ruler has driven religion underground by a relentless persecution. The bishops were expelled, as well as the Spanish missionaries, churdhes were turned into army barracks or warehouses, schools and seminaries closed and religious services banned.

Some refugee sources in neighboring Gabon said a priest can be executed for offering Mass, and those attending it can be harshly punished. There have also been reports that Ma-

Continued on page 6

The Schools Are Changing

By Jenkin Lloyd Jones

TWO TINY straws in the wind:

The bulletin of our neighborhood junior high school reports that the Parent-Teacher Association lacks only 10 of having 100 percent membership among parents. And an item speaks of a successful new tutoring program being conducted by parents and calls for volunteers skilled in English grammar.

The first straw is tiny, indeed. PTA membership costs only a buck a year, and this is small conscience money for fathers and mothers who let their kids run loose and never help with the homework. Still, near-unanimous membership in what is supposed to be a school uplift program is a little something.

But the drive for volunteer tutors may mean more. The great, grim fact, long hidden beneath thick blankets of educationese and tortured theory, that most American schools are failing is now emerging.

The effort to eliminate nationwide standard testing on the grounds that tests are "irrelevant" and "culturally biased" has weakened. The diminishing competency scores are bare and bleak. The anger is growing.

So we have the lashing-out and the scapegoat-hunting. Some taxpayers, unable to control the gobbling Moloch in Washington, have vented their wrath on local school levies. In places like Toledo, Cleveland and Youngstown, schools simply ran out of money.

MUCH OF THIS is only rational, a tax revolt where revolt is possible. But the fact that public expenditures for primary and secondary education have risen 400 percent since 1960 is generating a demand for cost accounting. This is not the most propitious time for militant teachers' picket lines.

Oddly, screams about the erosion of learning first began arising from those citadels of "liberalism," our universities.

Professors were finding that many students could no longer read their texts. All good professors want to teach, and the prospect of watering down instruction to the "Me, Tarzan — You, Jane" level, and inflating grades to the point of fantasy, appalled them.

There were many alibis, some based on truths. TV was blamed — the orientation of children to spoken words of limited vocabulary, instead of written literature. There's not much in Charlie's Angels or Police Woman to prepare for college.

Blame was placed on the fact that children of the bottom socioeconomic group (read that chiefly blacks) were staying in school longer and participating in tests. Many wanted to go to college. Such young people didn't figure in the test scores of 25 years ago. All true.

But here the greatest error was made. Instead of trying to teach where teaching was difficult, the theorists began arguing that teaching was not all that important. What was important was "life adjustment" and developing the "whole child."

IT WAS ASSERTED that the ghetto resident was raised in another language, and that any dialect, however ungrammatical, had equal validity. Everybody had to pass. Otherwise, schools were being cruel.

This, of course, was the worst of cruelty. Neither the world, in general, nor employers, in particular, will be impressed by the patois of the slums. And, language aside, there is no way that the world will accept the guess that the square root of 64 is, maybe 7, or that airplanes are held up by pressure instead of vacuum.

Toleration of wrong answers led us into the chaos of open admission to a few colleges and now has the Supreme Court wandering around in the thicket of affirmative action. Down this road lie increased racial tensions and endless frustration.

In the old days, when schools insisted on right answers, many miracles occurred. As Frank Arbruster of the Hudson Institute has pointed out in his book, "our Children's Crippled Future," the old slum schools took immigrant youngsters who were fresh off the boat, and in a short time the majority coped and many went on to eminence.

TODAY WE HEAR the cry that we must set up bilingual school systems because Puerto Rican and Mexican schoolchildren find English difficult. Thus their handicaps are to be coddled and prolonged.

Well, a lot of fancy wallpaper that was pasted up with water is coming off the wall. Many of the pedagogical theorists of the past three decades are backing up. Increasingly, legislatures under public pressure are demanding minimum competency standards for high school aduation.

The heat is on for fewer baloney courses and more theme-writing. The Rev. Jesse Jackson thunders at black parents who haven't cared. And, as our little junior high school bulletin says, well-educated fathers and mothers are being sought who will be willing to hypo the grammar.

The effort by America's educational establishment to substitute compassion for integrity may be drawing to a close.

The good news is that the bad news is out.

Jenkin Lloyd Jones is editor of the Tulsa Tribune and a long-time nationally syndicated columnist. He is a past president of the U.S. Chamber of Commerce.

Dear Editor:

Knowing The Daily News is concerned with in - depth coverage of controversial issues, we ABC Committee members feel that further information regarding your recent editorial comments on the ABC fundamental school would be appreciated.

In plotting a map of the results of the pu[illegible] interest survey of last May, our committee found a strong response from many sections of Anchorage. To minimize transportation requirements and save energy, we believed any projected ABC schools should be located in areas where high interest prevailed. Northern Lights School indicated high interest. Such was not the case at Denali School.

As plans were developed, the ABC Committee was led to believe that no more than one school should be considered on a pilot program for the first year. Consequently, our committee, after considerable study, recommended Northern Lights School as the first fundamental school in Anchorage. Criteria was based on the following considerations:

1. Northern Lights is in an area of diminishing enrollment.

2. The location is a quiet neighborhood but close to major arterials.

3. Other elementary schools are in proximity for those not wishing this program.

4. Widespread neighborhood acceptance was indicated by a PTA survey.

5. The size conformed with the desired 400 student enrollment.

6. The school is not heavily encumbered with federal programs.

7. The school reflects a good cross - section of the community ethnically, culturally, racially, and socio - economically.

The School District recommendations for two schools at the Jan. 23 School Board meeting came as a surprise to many persons. The parents of Denali School children had not yet had a opportunity to express their preferences, and our committee had had no time to assess the location and parental attitudes so essential to this program. Arbitrary decisions in the sensitive area of neighborhood schools can be divisive. Of course we were concerned.

In addition, the Monday Daily News reported that Breakthrough, the citizens' planning group, has endorsed a plan to create "a new headquarters library on the site of the Denali School," not to mention the new federal building a block away, other high - rise developments in the area, and the projected A-C Street couplet. What is the inevitable fate of Denali School is a question that must be answered.

ber to evaluate public response to all elementary school programs has not yet been released by the District to the School Board or the ABC Committee. With all due respect for the fine staff and people of the Denali area, our committee believes that recommendations of the Denali site by the District were premature. The problems surrounding the Denali School future must be evaluated on a long - range basis. The School Board should be commended for their vision in delaying a final decision in order to evaluate the proposed ABC program in Denali School in terms of the total community benefit.

Shirley English
ABC Committee chairman

Capital sense

Dear Editor:

It seems to me that we have been hearing far too much propaganda about the cost of moving the capital, and little information that would inform the people so that they could vote intelligently.

Everyone who survives in Alaska knows how to do "comparison shopping." The decision to move the capital is a decision not to leave it in Juneau. In order to make an intelligent decision the voters must know the cost over the same time period to allow the capital to remain in Juneau.

Our legislators will be doing us all, the people of Juneau, included a disservice if we do not have these facts before us when election day arrives.

Let's have some sense about the capital move issue.

Bob Hesseltine

Crucial information

Dear Editor:

At the monthly meeting of the Alaska Geological Society, Greg Furness of W.G.M. and Leo Mark Anthony of the University of Alaska discussed some important information concerning metallic mineral discoveries and potential on Admiralty Island in Southeastern Alaska.

Within the last few years, an ore deposit on the northern part of the island has been delineated by core drilling. Its estimated value is one-quarter billion dollars. Work elsewhere on the island has identified other mineralized areas with excellent potential. Moreover, it is the opinion of Furness, Anthony and other knowledgeable observers that there are many other significant mineralized areas on the island which have not as yet been identified by current exploration activities.

Why is this information so crucial? The reason is that Congress is considering proposals to classify essentially all of Admiralty Island as wilderness. If the island is so classified, mineral development and further exploration will be effectively terminated, and the United States will be unable to use the mineral resources of the island. I feel that this would be a short sighted decision, and a restrictive wilderness status should not be given to the island until the full extent of its potential has been determined. If at that time, with full knowledge of the resources being precluded from development, the judgment is made that the best use of the island is as wilderness, that would be a decision based on reason and not emotion. Unfortunately, I don't think that the reasoned approach will win out.

It would be bad enough if the rush to wilderness at Admiralty Island were an isolated case. It is regrettable that it is not. Vast regions of Alaska are being considered for wilderness classification as part of the d-2 legislation currently before Congress. In many instances, the mineral and other economic resources of the areas have not been adequately evaluated. I think that it would be inappropriate and potentially disastrous to prevent development in large areas of Alaska before the country knows what it is giving up.

SB 40, "PARENTAL RIGHTS"

1. This bill was introduced as a result of complaints by many parents of school children and the insistence of members of the following Anchorage organizations:

   a. The People for Better Education

   b. The Alaska Federation of Women, and

   c. The Parent Teachers Association.

2. The purpose of the bill is to protect the rights of parents and guardians of children enrolled in the State's elementary and secondary public schools. This, of course, will also result in protecting the children from being subjected to certain instructional material and personality or attitude adjustment tests, which also includes certain personal-information questionnaires, considered inappropriate by most parents and guardians.

3. The purpose of the bill is also to give some rights to parents and guardians of school children which are not now considered by all School Principals or Local School Boards as rights of these parents. Some of these are as follows:

   a. The availability for inspection by parents and guardians of all instructional materials to which their children are subjected.

Another right of Parent

b. The notification of parents of any experimental program of instruction before placing their child in such programs and the right to object to and select a regular program of instruction for their child. This procedure also applies to personality or attitude adjustment tests before administering them to a student. (The parent must first be notified).

Another right of Parent

c. The availability to a parent or guardian their child's student records to include an annual evaluation of the student's progress in the basic skills.

another right

d. The proper maintenance and correction of students records. Parents have in the past received considerable harassment in this regard and have even had to go to court to get justice. This should be unnecessary if our statutes properly cover the right of all parties concerned and

another right

e. The confidentiality of student's records. There have been instances in some schools where the principal did not permit parents to

scrutinize the child's student records because he stated if all parents requested to do so, it would be too much trouble. Conversely, some people other than a student, teacher, parent or guardian have requested to see a student's record that should not have been permitted to see the records. Some have had ulterior motives in mind, such as comparing their child's record with another child's and publicized it.

4. Section 530 on page 3 deals with the provision for court action if any portion of the aforementioned rights are violated.

Any questions?

Flo Ellers
RR4, Box 4621

Senator Joseph L. Orsini
Pouch V
Juneau, Alaska 99811

Dear Senator Orsini,

I support SB495, "An Act relating to parental rights."

It has been my experience in the past as a mother to have no say or foreknowledge of the contents of a sex education class material being offered to my daughters. It is the right of the parents and also the responsibility to teach their children. If it is the wishes of the parents to have such a class taught to their children, then they should be notified and be given that option.

I want to share briefly with you how I handled such a situation. My two daughters, ages twelve and thirteen came home one afternoon and proceeded to tell me how a health instructor was teaching them the pronunciation, spelling and defition of four-letter words of the common street vernacular. I called my pastor and he in turn notified a school board member. I then set up an appointment with the principal and the teacher involved to find out the reasoning behind such teaching practices. As I recall, she gave me a very weak explanation with the support of the principal, I might add and announced to me that tomorrow's class would be on all of the known contraceptives and how to use them! I asked her if I could monitor the class and she replied very hesitantly that I could. I wish I had now and taped her class so that all the mothers would have the opportunity to know exactly what was being taught their children but I suspect that we would have had a fiasco of the same manitude as Watergate. On another occasion, one of my daughters told me that she was required by her "Math" teacher to submit an essay on "Witchcraft"! Somehow that just does'nt add up. I pulled my youngest daughter (four years ago) out of an astrology class that does not bear up under scientific scrutiny and is in fact a cult.

I am hoping that the parents will also have the option to choose whether they want their children to be subjected to the 'evolution theory' which is what it says it is, a theory; but somehow the teachers present it in such a way as to appear as the truth. The whole truth needs to be presented here. If we are going to teach a theory then why not present the other side of the coin which is to present the view according to the Word of God, the Bible and allow each child to make up his own mind without propagating a half-truth or rather only one version. If they are only going to present one view and not the other, then let's throw it all out!

My personal belief is to present both views which is equality for all. It's about time to give God equal time in the classrooms.

As a mother of four daughters, I appreciate what you are attempting to do.

Sincerely,

Flo Ellers

Senator W. E. "Brad" Bradley
P.O. Drawer 8670
Anchorage, Alaska 99508

Dear Senator Bradley,

We appreciated your taking the time from your busy schedule to view the films, "The Lottery", and "The Discussion of The Lottery".

The school board will make a decision on these materials at the board meeting, Monday, October 10th. The educators have taken a strong position that these films are a vital, and necessary teaching tool. Virtually all parents were appalled at the use of this material.

As you, and Senator Sumner, are members of the HESS Committee, your testimony is vital to the parent's position.

Chat Chatterton indicated, if this issue were not settled before the Legislature met, he would help to set up a showing in Juneau. I hope we can win this issue without these measures.

If your schedule does not permit you to appear, we would appreciate a letter that could be read with our presentation. Thank you again.

Sincerely,

Marroyce Hall

Parents Oppose Program For Wendler Junior High

By BARBARA WOLD
Times Staff Writer

Public testimony that a proposed school-within-a-school at Wendler Junior High School would not be in the best interests of the students was heard last night during a meeting of the Anchorage School Board.

Parents living in the Wendler attendance area testified against the optional program, saying that the junior high school is currently overcrowded, has large classes and uses portable classrooms.

The parents also requested that parents in the Wendler attendance area be polled on the proposed alternative program.

The proposal for the alternative program was recommended by a committee of parents also living in the Wendler attendance area.

The board approved a feasiblity study by the administration on establishing the alternative program at Wendler. The study will include the issues expressed by the parents.

Designation of Denali Elementary School as Denali Fundamental Curriculum School for the 1978-1979 school year was approved.

Also approved were administrative procedures for staff selection for the Denali fundamental school and the Anchorage Basic Curriculum School to be located at Northern Lights School next year.

The board also scheduled a workshop with the college preparatory task force on preparing college-bound students in the district. The workshop will be Wednesday at the administration building.

Students, Parents Have Right To See Scholastic Records

By LOUISE COOK
Associated Press Writer

You want to look at your child's scholastic record and the principal turns you down. Do you have the right to demand the information?

A school dress code requires that boys' hair be kept above the collar. Your son wants to wear his longer. Can he?

In both case, the answer is "yes."

Supreme Court decisions and federal laws enacted since the start of the 1960s have given public school students new legal rights and the government is trying to help youngsters and their parents learn what they are — and are not — entitled to.

A guide, published by the Youth Development Bureau of the Office of Health, Education and Welfare, details student rights in areas like religion, free speech, discrimination and records and outlines steps to take in case of possible violations.

"Your Legal Rights and Responsibilities" is available, at no charge, from the Consumer Information Center, Dept. 652F, Pueblo, Colo., 81009.

Here are some key issues for students:

STUDENT RECORDS

The 1974 Family Educational Rights and Privacy Act gives certain rights to eligible students or their parents or guardians. (An eligible student is one who is 18 or over or is attending any school after graduation from high school.) Under the law, an eligible student or his or her parent or guardian has the right to review and inspect the student's records, except for records made and kept by one person such as a psychologist or social worker. The parent or student also is entitled to challenge the records in a hearing to make sure they are not misleading or inaccurate. With a few exceptions, officials must get written permission from a student or parent before revealing the records to anyone else.

The law covers all schools receiving federal funds. Further information is available from: The Family Educational Rights and Privacy Act Office, Department of Health, Education and Welfare, 330 Independence Ave. S.W., Washington, D.C. 20201.

SEX DISCRIMINATION

Title IX of the Education Amendments of 1972 prohibits schools from treating boys and girls differently because of sex. Schools cannot provide separate classes or activities for male and female students, deny students the right to take a particular course because of sex, apply different rules about physical appearance to boys and girls, make different disciplinary rules or enforce them differently on the basis of sex or refuse to let a female student to take part in a class or activity because she is pregnant. (The school may, in some cases, require a pregnant student to get a doctor's approval for participation in a particular class.)

Because of these rules, a school cannot force boys to cut their hair shorter than girls, and it cannot prevent a girl from taking shop or a boy from taking home economics.

There are some exceptions to the requirement for joint classes. Schools may, for example, provide separate classes for sex education; they also may separate students by sex within physical education classes for participation in contact sports.

Violations of the law should be reported to the Director of the Office of Civil Rights at the HEW address listed above.

SUSPENSION

Under a 1975 Supreme Court ruling, school officials suspending a student for 10 days or less must tell the student what rule has been broken, write it down and give the student a copy. If the student denies the offense, the officials must explain why they believe the rule has been broken. The student must have a chance to give his or her version of what has happened.

The court ruling involved brief suspensions only; the court mentioned that longer suspensions or expulsions might require more formal procedures, but it did not spell them out.

Nothing in the Supreme Court action or the law protects students from properly imposed suspensions. In addition, a student whose conduct is dangerous to other persons or who continually threatens to disrupt school, may be suspended immediately; a hearing according to the rules set down by the court should be held as soon as possible.

Survivor Gives Credit To God

SEATTLE (AP) — Hal Corbett survived 17 hours in the ocean without a lifejacket, and credits his survival to God.

His wife, a passenger and Corbett's dog all died in the airplane crash off the island of Hawaii Dec. 31.

"It was only through prayer that I survived," he said during a stop here.

Corbett's single-engined Piper Cherokee was inbound for a landing at the town of Kona when it threw a propellor blade and went into the ocean, sinking quickly.

The passenger was trapped inside. Corbett's wife Diane and their dog escaped, but drifted away and died a few minutes later. Diane could not swim.

But Corbett, 49, stayed afloat through the night and the following day until he was rescued by a pleasure boat. He lacked any floatation gear.

Corbett was born in Tacoma and lived in Seattle, graduating from Queen Anne High School in 1945. He attended Seattle Business College, and was managing a hotel in Bend, Ore., in 1947 when he took a flying lesson.

Since then, his life has been one of adventure, including searching for Spanish treasure and operating flight schools.

Corbett says he was never very pious, and his attitudes have not changed. "I haven't changed as far as going to church every Sunday. No, I don't do that," he said.

Dear Mr. Hackney

I object in the negative to the information introduced with Senate Bill No. 495.

On one hand the intent as expressed in the Purpose (Sec. 14.30.450 is justifiable. However in reality the inclusion of Acess to Instructional Material and Programs (Sec. 14.30.460) would be feasible if the State of Alaska through an appropriate appropriation of the budget would purchase for every school district at cost, all the educational materials published in the United States, since we draw literally from every reasonable source to teach. It would be hopeful that the appropriation would include the many file cabinets to accomodate the vast numbers of educational publishings.

Secondly, please clarify what is stated as "personality or adjustment," line 27.

Aside from the mentioned glaring inconsistencies- I feel that Senate Bill No. 495 is almost adequate.

I therefore object to the passage of this bill.

Sincerely,

Sasha I. Sobleff

MEMO

TO: SEN HACKNEY

FROM: PAUL Paul

I spoke with Gary Jenkins, Director, Audit Division, Dept. of Rev, this morning re: SB 41 - exempting $10,000 income from AK income tax for those 65 years and over, if they meet the residency requirement.

The language in the bill that threw me a little was the verbage "who has continuously maintained a domicile". It doesn't say the individual has to reside in the state but it says instead "continuously maintained a domicile". I was curious as to whether a person moving outside but still maintained a residence in the state would be eligible. Jenkins said that if the guy moved out and is living down south 12 months out of the year, they would consider him as moving his domicile and would not be eligibe for exemption. This would particulary apply if the guy is residing outside renting property in the state. In this case, Jenkins said the guy would not be residing (domiciling) in the state and would be taxed accordingly. He said, however, where an individual was just going outside three or four months of the year, then they would have no problem with a person like that being eligible under this bill. However, it might be a good idea that they define "continuously maintained a domicile" as it applies to this bill.

Also, I ask him to give me a ball park figure on the number of people this bill would affect and he said he doesn't have the "foggiest." Usually, he said, he doesn't mind tossing out a ball park figure, but in this case he just doesn't know.

Introduced: 1/16/79
Referred: Health, Education & Social Services and Judiciary

IN THE SENATE BY BRADLEY

SENATE BILL NO. 41

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to exemption from the income tax for senior citizens; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.20.031(b) is amended by adding a new paragraph to read:

(4) $10,000 of the gross income as defined in sec. 61 of the Internal Revenue Code of a person who is 65 years of age or older who has continuously maintained a domicile in the territory or state for 25 years, or who has intermittently maintained a domicile in the territory or state for a cumulative total of 35 years with no period of absence longer than two years.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.-070(c) and is retroactive to January 1, 1979.

STATE of ALASKA

MEMORANDUM

TO: R. D. Stevenson
Special Assistant
Department of Revenue

DATE: February 8, 1979

FILE NO:

TELEPHONE NO:

FROM: Gary L. Jenkins
Director
Audit Division

SUBJECT: Senate Bill No. 41

The proposed bill would exempt $10,000 of gross income from Alaska income tax of an individual 65 years of age or older who meets the domicile test stated in the bill. There are several points which I think the Legislature should consider in dealing with this proposal. First, the way it is currently structured, if a husband and wife were age 65 and over and both meet the domociliary requirements, it would appear that they could exempt up to $20,000 of income from the individual income tax.

In its deliberations, I think the Legislature should also consider the tax benefits which are already provided to the elderly either through the Internal Revenue Code or by Alaska Statutes. These benefits include such things as, (1) the elderly tax credit, which for Alaska purposes has an effective rate of 2.4% of applicable income; (2) the recently enacted $100,000 capital gain exemption from the sale of a residence for those age 55 and over; (3) the elderly currently receive the Alaska longevity bonus which is tax free for Alaska purposes; (4) any qualified pensions and annuities currently received by the elderly are exempt from Alaska taxation; (5) the recently enacted $100 individual tax credit would operate to exempt up to $12,500, of gross income which would normally be taxable, from being taxed.

Obviously, this is a question of public policy on which the Legislature must decide. There would appear, however, to be a question whether this additional exemption from tax is really necessary.

The proposed bill would exempt $10,000 of gross income from Alaska income tax of an individual 65 years of age or older who meets the domicile test stated in the bill. There are several points which I think the Legislature should consider in dealing with this proposal. First, the way it is currently structured, if a husband and wife were age 65 and over and both meet the domociliary requirements, it would appear that they could exempt up to $20,000 of income from the individual income tax.

In its deliberations, I think the Legislature should also consider the tax benefits which are already provided to the elderly either through the Internal Revenue Code or by Alaska Statutes. These benefits include such things as, (1) the elderly tax credit, which for Alaska purposes has an effective rate of 2.4% of applicable income; (2) the recently enacted $100,000 capital gain exemption from the sale of a residence for those age 55 and over; (3) the elderly currently receive the Alaska longevity bonus which is tax free for Alaska purposes; (4) any qualified pensions and annuities currently received by the elderly are exempt from Alaska taxation; (5) the recently enacted $100 individual tax credit would operate to exempt up to $12,500, of gross income which would normally be taxable, from being taxed.

Obviously, this is a question of public policy on which the Legislature must decide. There would appear, however, to be a question whether this additional exemption from tax is really necessary.

"(a) *Husband and wife.*

"In the case of a husband or wife who files a separate return for the taxable year, the $30,000 amount specified in section 56 shall be $15,000."

—P.L. 94-455, Sec. 1901(b)(4), deleted ", notwithstanding the provisions of section 1371(b)(1)," after "such corporation shall" in para. (d)(2), for tax. yrs. begin. after '76.

—P.L. 94-455, Sec. 1906(b)(13)(A), substituted "Secretary" for "Secretary or his delegate" in subsec. (b), for tax. yrs. begin. after '76.

In '71, P.L. 92-178, Sec. 308, added a sentence to the end of para. (g)(2), for tax. yrs. begin. after 12/31/69.

In '69, P.L. 91-172, Sec. 301(a), added Code Sec. 58, for tax. yrs. end. after 12/31/69.

Subchapter B.—Computation of Taxable Income

Part

I. Definition of gross income, adjusted gross income, taxable income, etc.
II. Items specifically included in gross income.
III. Items specifically excluded from gross income.
IV. Determination of marital status.
V. Deductions for personal exemptions.
VI. Itemized deductions for individuals and corporations.
VII. Additional itemized deductions for individuals.
VIII. Special deductions for corporations.
IX. Items not deductible.
X. Terminal railroad corporations and their shareholders.

In '77, P.L. 95-30, Sec. 101(e)(3), amended the item for Part IV. Prior to amendment, that item read as follows:

"IV. Standard deduction for individuals."

In '76, P.L. 94-455, Sec. 1901(b)(4)(C), substituted "taxable income, etc." for "and taxable income" in the item for Part I.

In '62, P.L. 87-870 added part X.

PART I.—DEFINITION OF GROSS INCOME, ADJUSTED GROSS INCOME, TAXABLE INCOME, ETC.

In '76, P.L. 94-455, Sec. 1901(b)(4)(i), substituted TAXABLE INCOME, ETC." for "AND TAXABLE INCOME" in the heading for Part I.

Sec.

61. Gross income defined.
62. Adjusted gross income defined.
63. Taxable income defined.
64. Ordinary income defined.
65. Ordinary loss defined.

In '76, P.L. 94-455, Sec. 1901(b)(4)(A), added the items for Code Secs. 64 and 65.

Sec. 61. Gross income defined.

(a) General definition.

Except as otherwise provided in this subtitle, gross income means all income from whatever source derived, including (but not limited to) the following items:

(1) Compensation for services, including fees, commissions, and similar items;
(2) Gross income derived from business;
(3) Gains derived from dealings in property;
(4) Interest;
(5) Rents;
(6) Royalties;
(7) Dividends;
(8) Alimony and separate maintenance payments;
(9) Annuities;
(10) Income from life insurance and endowment contracts;
(11) Pensions;
(12) Income from discharge of indebtedness;
(13) Distributive share of partnership gross income;
(14) Income in respect of a decedent; and
(15) Income from an interest in an estate or trust.

(b) Cross references.

For items specifically included in gross income, see part II (sec. 71 and following). For items specifically excluded from gross income, see part III (sec. 101 and following).

In '76, P.L. 94-455, Sec. 2117, provided the following with respect to cancellation of certain student loans, effective for discharges of indebtedness made before 1/1/79:

"SEC. 2117. CANCELLATION OF CERTAIN STUDENT LOANS.

"(a) *In General.*

"In the case of an individual, no amount shall be included in gross income for purposes of section 61 of the Internal Revenue Code of 1954 by reason of the discharge of all or part of the indebtedness of the individual under a student loan if such discharge was pursuant to a provision of such loan under which all or part of the indebtedness of the individual would be discharged if the individual worked for a certain period of time in certain geographical areas or for certain classes of employers.

"(b) *Student Loan.*

"For purposes of this section the term "student loan" means any loan to an individual to assist the individual in attending an educational organization described in section 170(b)(1)(A)(ii) of such Code—

"(1) by the United States, or an instrumentality or agency thereof, or a State, territory, or possession of the United States, or any political subdivision thereof, or the District of Columbia, or

"(2) by any such educational organization pursuant to an agreement with the United States, or an instrumentality or agency thereof, or a State, territory, or possession of the United States, or any political subdivision thereof, or the District of Columbia under which the funds from which the loan was made were provided to such educational organization."

—P.L. 94-455, Sec. 2119 covers the application of Code Sec. 61 (as it relates to costs of goods sold) to publisher's prepublication expenditures. See note to Code Sec. 174.

In '60, P.L. 86-780, Sec. 3, provided with respect to employee moving expenses that:

"Any amount received after December 31, 1949, and before October 1, 1955, from a corporation which—

"(1) was formed exclusively for the purpose of, and was engaged exclusively in, operating without profit a scientific laboratory for the Atomic Energy Commission, and

"(2) operated solely on funds appropriated to the Atomic Energy Commission,

by an individual as reimbursement for moving himself and his immediate family, household goods, and personal effects to a new place of residence in order to accept employment with such corporation shall, for Federal income tax purposes, be treated as an amount which was not includible in the gross income of the individual, to the extent that such amount did not exceed the actual expenses paid or incurred by the individual for such purposes, if the individual was advised, at the time of his employment, by an authorized officer, employee, or agent of such corporation that the amount of such reimbursement would not be includible in gross income. If refund or credit of any overpayment resulting from the application of this section is prevented on the date of enactment of this Act [9/14/60], or within six months after such date, by the operation of any law or rule of law (other than chapter 74 of the Internal Revenue Code of 1954, relating to closing agreements and compromises, and the corresponding provisions of prior law), refund or credit of such overpayment may, nevertheless, be made or allowed if claim therefore is filed within six months after such date. No interest shall be paid or allowed on any

overpayment resulting from t
sentence."

Sec. 62. Adjusted gross income defined.

For purposes of this subtitle, the term "adjusted gross income" means, in the case of an individual, gross income minus the following deductions:

(1) Trade and business deductions. The deductions allowed by this chapter (other than by part VII of this subchapter) which are attributable to a trade or business carried on by the taxpayer, if such trade or business does not consist of the performance of services by the taxpayer as an employee.

(2) Trade and business deductions of employees.

(A) Reimbursed expenses. The deductions allowed by part VI (sec. 161 and following) which consist of expenses paid or incurred by the taxpayer, in connection with the performance by him of services as an employee, under a reimbursement or other expense allowance arrangement with his employer.

(B) Expenses for travel away from home. The deductions allowed by part VI (sec. 161 and following) which consist of expenses of travel, meals, and lodging while away from home, paid or incurred by the taxpayer in connection with the performance by him of services as an employee.

(C) Transportation expenses. The deductions allowed by part VI (sec. 161 and following) which consist of expenses of transportation paid or incurred by the taxpayer in connection with the performance by him of services as an employee.

(D) Outside salesmen. The deductions allowed by part VI (sec. 161 and following) which are attributable to a trade or business carried on by the taxpayer, if such trade or business consists of the performance of services by the taxpayer as an employee and if such trade or business is to solicit, away from the employer's place of business, business for the employer.

(3) Long-term capital gains. The deduction allowed by section 1202.

(4) Losses from sale or exchange of property. The deductions allowed by part VI (sec. 161 and following) as losses from the sale or exchange of property.

(5) Deductions attributable to rents and royalties. The deductions allowed by part VI (sec. 161 and following), by section 212 (relating to expenses for production of income), and by section 611 (relating to depletion) which are attributable to property held for the production of rents or royalties.

(6) Certain deductions of life tenants and income beneficiaries of property. In case of a life tenant of property, or an income beneficiary of property held in trust, or an heir, legatee, or devisee of an estate, the deduction for depreciation allowed by section 167 and the deduction allowed by section 611.

(7) Pension, profit-sharing, annuity, and bond purchase plans of self-employed individuals. In the case of an individual who is an employee within the meaning of section 401(c)(1), the deductions allowed by section 404 and section 405(c) to the extent attributable to contributions made on behalf of such individual.

(8) Moving expense deduction. The deduction allowed by section 217.

(9) Pension, etc., plans of electing small business corporations. The deduction allowed by section 1379(b)(3).

(10) Retirement savings. The deduction allowed by section 219 (relating to deduction of certain retirement savings) and the deduction allowed by section 220 (relating to retirement savings for certain married individuals).

(11) Certain portion of lump-sum distributions from pension plans taxed under section 402(e).—The deduction allowed by section 402(e)(3).

(12) Penalties forfeited because of premature withdrawal of funds from time savings accounts or deposits.—The deductions allowed by section 165 for losses incurred in any transaction entered into for profit, though not connected with a trade or business, to the extent that such losses include amounts forfeited to a bank, mutual savings bank, savings and loan association, building and loan association, cooperative bank or homestead association as a penalty for premature withdrawal of funds from a time savings account, certificate of deposit, or similar class of deposit.

(13) Alimony. The deduction allowed by section 215.

In '76, P.L. 94-455, Sec. 502(a), added para. (a)(13), for tax. yrs. begin. after '76.

—P.L. 94-455, Sec. 1531(b)(1), added "and the deduction allowed by section 220 (relating to retirement savings for certain married individuals)" after "(relating to deduction of certain retirement savings)" in para. (a)(10), for tax. yrs. begin. after '76.

—P.L. 94-455, Sec. 1901(a)(8), redesignated para. (a)(11) as added by Sec. 6(a) of P.L. 93-483, as para. (a)(12), for tax. yrs. begin. after '76.

—P.L. 94-455, Sec. 1901(a)(9), substituted "trade or business, to the extent" for "trade or business to the extent" in para. (a)(12), as redesignated by Sec. 1901(a)(8) of this Act, for tax. yrs. begin. after '76.

In '74, P.L. 93-483, Sec. 6(a) added para. (11), titled "Penalties forfeited because of premature withdrawal of funds from time savings accounts or deposits.", effective with respect to tax. yrs. begin. after 12/31/72.

In '74, P.L. 93-406, Sec. 2002(a)(2) added subsec. (10), effective for tax. yrs. begin. after 12/31/74.

—P.L. 93-406, Sec. 2005(c)(9) added subsec. (11), effective with respect to distributions or payments made after '73, in tax. yrs. begin. after '73.

In '69, P.L. 91-172, Sec. 531(b), added para. (9), for tax. yrs. of electing small business corporations begin. after 12/31/70.

In '64, P.L. 88-272 added par. (8) for expenses incurred after '63, in tax. yrs. end. after '63.

In '62, P.L. 87-792 added par. (7), for tax. yrs. begin. after '62.

Sec. 63. Taxable income defined.

(a) Corporations.

For purposes of this subtitle, in the case of a corporation, the term "taxable income" means gross income minus the deductions allowed by this chapter.

(b) Individuals.

For purposes of this subtitle, in the case of an individual, the term "taxable income" means adjusted gross income—

(1) reduced by the sum of—

(A) the excess itemized deductions, and

(B) the deductions for personal exemptions provided by section 151, and

(2) increased (in the case of an individual for whom an unused zero bracket amount computation is provided by subsection (c)) by the unused zero bracket amount (if any).

(c) Excess itemized deductions.

For purposes of this subtitle, the term "excess itemized deductions" means the excess (if any) of—

(1) the itemized deductions, over

(2) the zero bracket amount.

his federal income tax return and of a recomputation of tax or determination of deficiency (whether with or without assessment). A full statement of the facts shall accompany this notice. The notice shall be filed within 60 days after the final determination of the modification, recomputation or deficiency, and the taxpayer shall pay the additional tax or penalty under this chapter. For purposes of this section, a final determination shall mean the time that an amended federal return is filed or a notice of deficiency or an assessment is mailed to the taxpayer by the Internal Revenue Service, except that in no event will there be a final determination for purposes of this section until the taxpayer has exhausted his rights of appeal under federal law.

(e) The department may credit or refund overpayments of taxes, taxes erroneously or illegally assessed or collected, penalties collected without authority, and taxes that are found unjustly assessed or excessive in amount, or otherwise wrongfully collected. The department shall set limitations, specify the manner in which claims for credits or refunds are made, and give notice of allowance or disallowance. When a refund is allowed to a taxpayer, it shall be paid out of the general fund on a warrant issued under a voucher approved by the department. (§ 7 ch 115 SLA 1949; am § 2 ch 132 SLA 1951; am § 4 ch 5 SLA 1953; am § 2 ch 169 SLA 1972; am § 3 ch 70 SLA 1975)

Effect of amendment. — The 1975 amendment so changed this section as to make a detailed comparison impracticable.

Delegation of legislative authority valid. — The legislative authority conferred by this section appears to be within the test laid down in Bowles v. Willingham, 321 U. S. 503, 64 S. Ct. 641, 88 L. Ed. 892 (1944), in which the administrator of the Office of Price Administration was empowered to fix maximum rents which, in his judgment, would be generally fair and equitable in any defense rental area whenever in his judgment that action was necessary or proper in order to effectuate the purposes of the act, and further empowered to make adjustments for such relevant factors as he may determine and deem to be of general applicability, and to provide for such adjustments and reasonable exceptions as in his judgment are necessary and proper in order to effectuate the purposes of the act. Alaska S.S. Co. v. Mullaney, 12 Alaska 433, 84 F. Supp. 561 (D. Alas. 1949), aff'd, 12 Alaska 594, 180 F.2d 805 (9th Cir. 1950).

Quoted in Hickel v. Stevenson, Sup. Ct. Op. No. 351 (File No. 624), 416 P.2d 236 (1966).

Am. Jur. 2d reference. — 71 Am. Jur. 2d, State and Local Taxation, § 589.

Sec. 43.20.031. Taxable income of residents; deductions; exemptions. (a) The taxable income of a resident of the state is his entire taxable income as defined in § 63 of the Internal Revenue Code with the following modifications:

(1) a taxpayer whose income includes a cost-of-living allowance which is exempt from federal income tax shall determine and include that amount as part of his income as if the cost-of-living allowance were not exempt;

(2) the benefits allowed to taxpayers under Internal Revenue Code §§ 1301 — 1307, as amended, are allowed only to taxpayers who have been residents of the state for the full base period as well as for the

computation year as defined in these sections; the commissioner shall adopt regulations governing benefits under these sections of federal law allowable to spouses eligible to file a joint Alaska return for the computation year when one spouse has not been a resident of Alaska for the full base period;

(3) the benefits of nonrecognition of gain on the sale or exchange of certain property under §§ 1031, 1033 and 1034 of the Internal Revenue Code (26 U.S.C. §§ 1031, 1033 and 1034) are allowed only to taxpayers who purchase or exchange the property within the state, except that the benefits of § 1034 shall be allowed regardless of the location of the property for taxpayers who have attained the age of 65 on or before the time of the purchase or exchange.

(b) The following exemptions are allowed in computing taxable income under this section:

AS43.20.031(b)

(1) service pay received by members of the armed forces of the United States or auxiliary branches of the armed forces;

(2) pensions and annuities received from qualified plans approved under §§ 401 — 415 of the Internal Revenue Code (26 U.S.C. §§ 401 — 415) as amended;

(3) income of a person derived from the sale of halibut taken from waters outside the territorial limits of the state and regulated by an international body or treaty organization if the person selling halibut in the state which is taken from outside the territorial limits of the state executes and submits to the department within 30 days after each sale a separate exemption certificate on a form approved by the department and the attorney general.

(c) In computing the tax under this chapter, the taxpayer is not entitled to deduct any taxes based on or measured by net income.

(d) Banks and savings and loan associations chartered by the federal government or the state are exempt from income tax under this chapter.

(e) An affiliated group of corporations may make or the commissioner may require them to make a consolidated or combined return for the taxable year in place of separate returns. For purposes of calculating the amount of tax payable by the group under a consolidated filing, Internal Revenue Code §§ 1501 — 1552, as amended, apply.

(f) A natural person is entitled to a tax credit not to exceed $50 for the amount of political campaign contributions made within the tax year, including but not limited to a contribution or gift to a person or organization for use exclusively (1) for political campaigns for candidates for President or Vice President of the United States, whether or not they will be voted on in a primary election in Alaska; United States senator from Alaska; United States representative from Alaska; governor or lieutenant governor of Alaska; the Alaska legislature; delegate to an Alaska constitutional convention; electoral confirmation as a judge or justice of a court in Alaska; and municipal office in Alaska; (2) for groups seeking to influence the outcome of a ballot proposition

or question; or dues to a nonprofit organization organized primarily for the purpose of influencing elections. The credit allowed by this subsection is in place of the credit allowed by § 41 of the Internal Revenue Code and the deduction allowed by § 218 of the Internal Revenue Code for contribution to candidates for public office.

(g) A person who wilfully makes and subscribes to a certificate referred to in (b) (3) of this section which is not true and correct as to every material fact is punishable by a fine of not more than $10,000, or by imprisonment for not more than five years, or by both.

(h) A taxpayer who purchases an entry permit under AS 16.43 in carrying on a trade or business is entitled to a deduction of the amount of the price paid during the tax year as if it were allowable under § 162 of the Internal Revenue Code (26 U.S.C. § 162). (§ 5 ch 70 SLA 1975; am §§ 3 — 5 ch 125 SLA 1976; am § 8 ch 73 SLA 1977; am § 6 ch 133 SLA 1977)

Cross reference. — As to disclosure of contributions, see AS 24.45.121.

Effect of amendments. — The 1976 amendment added paragraph (3) to subsection (a), rewrote paragraph (2) of subsection (b), and substituted "any taxes based on or measured by net income" for "from the adjusted gross income state income taxes" at the end of subsection (c).

The first 1977 amendment added subsection (h).

The second 1977 amendment, in the first sentence of subsection (f), inserted the item designations, inserted the language beginning "for candidates for President or Vice-President" and ending "municipal office in Alaska" in present item (1), and inserted "for groups seeking to influence the outcome of a ballot proposition or question" in present item (2).

Editor's note. — Section 1, ch. 115, SLA 1977, provides: "For purposes of AS 43.20.031 for tax years before January 1, 1976, an individual is taxable on his entire income as defined in that section except that income does not include wages earned outside the United States."

Am. Jur. 2d reference. — 71 Am. Jur. 2d, State and Local Taxation, § 518 et seq.

Sec. 43.20.035. Taxable income of nonresidents and part-year residents. (a) The taxable income of nonresidents or part-year residents of this state is taxable income as determined under § 31 of this chapter when attributable to sources in the state as provided in § 40 of this chapter with the following adjustments:

(1) a nonresident or part-year resident who claims the standard deduction as defined in Internal Revenue Code § 141 is allowed the deduction in the proportion provided in (b) of this section;

(2) a nonresident or part-year resident is entitled to claim the personal exemptions as defined in § 151 of the Internal Revenue Code in the proportion provided in (b) of this section;

(3) a nonresident or part-year resident who itemizes deductions is allowed a deduction for those items deductible under the Internal Revenue Code which arise from sources in the state.

(b) The ratio for prorating allowed by this section is the taxpayer's adjusted gross income from Alaska sources divided by the taxpayer's adjusted gross income from all sources. The ratio may not exceed 100 per cent. The adjusted gross income for purposes of this subsection

Re: Senate Bill No. 41

Dear Senator Hackney:

Senate Bill No. 41, an Act relating to exemption from the income tax for senior citizens. was introduced in the Senate on January 16, 1979 and was referred to the Senate Health, Education and Social Services and Judiciary Committees. The bill was given a further referral to the Senate Finance Committee on January 18, 1979.

For the consideration of the Senate Health, Education and Social Services Committee, I am enclosing a copy of a Fiscal Note prepared by Mr. Gary Jenkins, Director, Audit Division, Department of Revenue concerning the proposed legislation.

Sincerely,

Services Committee
Alaska State Legislature
Juneau, Alaska

Re: Senate Bill No. 48

Dear Senator Hackney:

Senate Bill No. 48, an Act establishing a tuition credit under the Alaska net income tax, was introduced in the Senate on January 16, 1979 and was referred to the Senate Health, Education & Social Services and Finance Committees.

For the consideration of the Senate Health, Education & Social Services Committee, I am enclosing a copy of a Fiscal Note prepared by Mr. Gary Jenkins, Director, Audit Division, Department of Revenue concerning the proposed legislation.

Sincerely,

R. D. Stevenson
Special Assistant

cc: The Honorable John C. Sackett

2-001B (Rev. 10/76)

STATE
of ALASKA

MEMORANDUM

TO: R. D. Stevenson
Special Assistant
Department of Revenue

DATE: February 1, 1979

FILE NO:

TELEPHONE NO:

FROM: Gary L. Jenkins
Director
Audit Division

SUBJECT: Senate Bill No. 48

It is extremely difficult to estimate the actual dollar effect of the tuition credit proposed by SB 48 because of the almost total lack of information available regarding the number of students attending vocational schools and schools of higher education. In discussions with various personnel in the Department of Education, I was advised that last year's enrollment in private elementary and secondary schools in the state was 3,130 and that there is a possible 800 to 900 in other private schools on which they did not have information. The staff working with the higher education loan funds advised me there were approximately 3,000 students going to school on loans and they estimated that number could be as high as 50 percent of the total number of students going to schools of higher education. Last, I have assumed there are at least 1,000 students going to approved vocational schools.

Assuming there are 4,000 students in private elementary, and secondary schools, 1,000 in vocational schools, and 6,000 in schools of higher education, the total potential cost of this tuition credit would be $5,500,000.

One serious problem I see with the bill is in the definition of "eligible educational institution". This definition states that it is a school which "meets accreditation or approval criteria established by the department by regulation". To allow us to effectively administer this law, if enacted, it is recommended that the requisite accreditation or approval criteria be specifically defined in the Statute or that they be established by the Department of Education rather than Revenue.

Dept. by regulation/accreditation could screen out every private school they wished.

Senator Hackney, Chairman
Health, Education, and Social
Services Committee
Alaska State Legislature
Juneau, Alaska

Dear Senator Hackney:

The Petersburg School Board strongly opposes SB 48 and the $500.00 tax break for people enrolling their children in private and religious schools. We feel that this bill would erode financial support for the public schools and reduce the effectiveness of the programs now offered to the children of Alaska.

Thank you for your attention on this matter.

Sincerely,

Mike Dean, Pres.

Re: SB48 Educational Tuition Credit

Dear Senator Hackney:

I oppose SB48 for both financial and philosophical reasons:

(1) According to the information I have received, the fiscal impact of these tax credits would be $5,000,000 in State revenue in a year when we can least afford it; and

(2) This would support a dual-system of schools in the State. We are assuming our obligations to provide an education to all Alaskan students through one system, the public schools, and I do not feel that it would be appropriate for the State to support two systems.

Within the one State-supported school system we can and do provide a number of alternatives for students, and I feel we should continue these efforts and to rely on the local school boards to reflect community needs in their decision-making.

Sincerely,

John E. Anttonen
Superintendent

Dear Senator Hackney:

I am writing to express concern regarding Senate Bill 48, which would provide tuition tax credits. The loss of revenue to the State resulting from passage of SB 48 would be substantial and would come at a time when revenue is in short supply. However, the most serious objection to the bill is that it would violate the basic constitutional principle of separation of church and state by indirectly supporting religious education.

Your efforts to insure the defeat of SB 48 will be appreciated.

Sincerely,

Robert Van Slyke

Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

I would like to voice my protest against Senate Bill 48 on tuition credit as written.

Other than a loss in state revenue is in the offering. As written the bill also allows state funds to be expended to parents who send their children to private and religious schools. It seems to be that, other than maybe being illegal, this would also reduce the probable income to state financial educational institutions. I would very much like to see a tuition credit for income tax since I have children in college. However, I would not like to have it if it also means the state is trying to help support private schools, which should be the sole responsibility of the people who wish their services. Anything that distracts from public education is concern of mine.

Sincerely,

Robert W. McConnell
Superintendent

Juneau, AK 99811

Dear Senator:

I am writing in regard to Senate Bill 48 which would provide for a $500 tuition tax break for people enrolling their children in private and religious schools.

I am concerned about two things: 1) the impact of the bill on State revenue, and 2) the impact of the bill on public school funding.

I strongly oppose the passage of S. B. 48 on the grounds that it would be indirect support of parochial schools by the State, and that it would have a direct impact on the taxpayers, plus the public schools of this State.

I urge you not to pass this legislation.

Sincerely,

Glen Chowning

Dear Sir:

The Matanuska-Susitna Borough School District strongly opposes SB 48 for an act establishing a tuition credit under the Alaska net income tax.

When tax dollars are at a premium, we cannot support a tax break that would be a loss of some five million dollars in State revenue. This same tax break has been judged unconstitutional in a federal court under New Jersey law.

Sincerely,

MATANUSKA-SUSITNA BOROUGH SCHOOL DISTRICT

Dear Senator Hackney:

With this letter I would like to express my strongest opposition to the passage of SB 48 which would provide a tuition tax break for people enrolling their children in private or religious schools in Alaska.

The projected $5 million loss of State revenue comes at a very poor time for Alaska education. I encourage you to work to defeat this bill.

Thank you for your time and consideration of this request.

Sincerely,

William Mailer

A STATEMENT TO THE SENATE HEALTH AND SOCIAL SERVICES COMMITTEE

As a representative of Alaska Pacific University, I would like to voice our support for Senate Bill 48 and Senate Joint Resolution 14, currently under consideration by the Senate Health and Social Services Committee.

The escalating costs of education, both public and private, have had a profound effect on the numbers of students in Alaska who are going on to a post-secondary education after graduation from high school. Although there is an apparent surplus of college-trained professionals in some areas, there continue to be serious shortages in others. Alaskan colleges and universities are faced with the responsibility of--in fact are charged by the public with--the development of accessible professional programs, the staffing and administration of those programs, and with informing the public of the availability of those programs in an efficient and economical manner. Increasing costs are adversely restricting these responsibilities. Ultimately the burden for maintaining well-educated leadership in Alaska rests with the taxpayer, with respect to public institutions, and the individual student or the parents of students enrolling in private institutions. Often that burden is too great. The alternative is increased reliance upon state or federal financial assistance programs. Invariably, these include educational loans, the availability of which is becoming more and more limited. Most of us are aware of the tremendous default rates for government loans; these defaulted loans not only escalate the costs of program administration, they also encumber the graduating student with considerable liabilities at the beginning of a career, liabilities in the form of debts that are more often than not uncollectable.

A reasonable tuition credit against taxes is an alternative that encourages participation in higher education and provides relief directly to those who need

it most--the career-bound students or students who seek a change in careers.

For these reasons, Alaska Pacific University supports Senate Bill 48 and Senate Joint Resolution 14, and we encourage their passage.

Thank you.

James E. Stevens

With respect to SJR No. 14, I want to commend Senator Bradley for his keen understanding of the attempt of the IRS to force the closing of many of the Christian schools that have come into existence in the last two decades. His insight into the value of a "free marketplace of ideas" in order to keep our nation great clearly indicates that he is a man who has valuable ideas to promote in State and National governmental circles in behalf of the people he represents.

If the clear violation of the First Amendment as proposed by the IRS were to go unchallenged by our elected officials, we would lose hope of our survival as a church because both compliance or noncompliance with that proposal would dictate the demise of our Christian schools. We are praying for the passage of SJR14.

On the subject of Senate Bill No. 48 Senator Bradley's intent is welcomed with great enthusiasm by citizens who, whether by religious conviction or because they seek an educational and disciplinary philosophy differing from that offered by most public schools, have been paying double for the education of their children. Such discrimination against certain taxpayers is borne by them to demonstrate their sincere concern for the education and welfare of their children.

Relief from the double cost burden, or even a 50% credit as proposed strikes me as a right approach to the present inequity. But I see in SB48 that the "eligible educational institutions" are required to "meet accreditation or approval criteria established by the department by regulation."

Inasmuch as past attempts by the department to regulate private schools have included such regulations as would abridge our rights and could conceivably force us to compromise our religious convictions, I would respectfully ask that part (d) of SB48 and any reference to "eligible educational institutions" be excluded from the bill. This becomes a necessity to us because of the First Ammendment Rights, and would be in accord with the thinking of Senator Bradley as expressed in SJR #14.

Date: 2/28/79 Subject: SB 48, SB 214, SJR 14 Location: Anchorage

The following teachers and students from the Anchorage Christian School were prepared to testify on SB 48 and SJR 14 during the teleconference 2/28/79, but because of the large number of witnesses scheduled agreed to have four spokesmen express their views. (The spokesmen were Mr. O'Brien, Mr. Hovey, Mr. Moreland and Miss Hanson).

Dear Sir:

I am very much interested in SB 48 regarding educational tuition credit. I believe it is a fair bill, and one that is overdue. Some fear that it will hurt the public school system, but I believe to the contrary, that it will strengthen the public schools. It will finally convince the public school administrators and people that they must do something to improve the educational programs for our children today.

I believe part D under section 1 should be amended to read that an "eligible educational institution is one which meets accreditation or approval by criteria established by the Alaska State Legislature." This could be done by adding the words at the end "or Section 4 of AS 14.40.010 (b)1." This is the Alaska Compulsory Education Statute that states that a child must attend a public school or one of the three other kinds of schools. Since those schools have been approved by the Legislature, they should automatically be approved as eligible educational institutions. We believe this needs to be spelled out clearly by the Legislature in order to prevent the Department of Education from coming up with regulations beyond those which the Legislature has already prescribed.

Of course, this will not give any relief to parents who send their children to a church-sponsored school unless House Joint Resolution 11 is passed, which will allow indirect aide to religious sponsored schools.

Also, we are very much interested in SJR 14, protesting Internal Revenue Service regulations removing tax exempt status of certain private schools. Your support of this resolution will be very much appreciated. Action on this bill is very important, since IRS is steadily moving forward to invoke these unconstitutional regulations.

Thanks in advance for your help.

Sincerely,

Jerry Prevo

February 28, 1979

Testimony before the House H.E.S.S. Committee
Legislative Information Office, Anchorage

SJR14

Good afternoon Senator Hackney and Committee members.

I am Burton Carney, Principal of Harvester Christian Academy in Anchorage which is the teaching ministry of Harvester Christian Church, Paul Glover, Pastor. Harvester Christian Academy is an active member of the Alaska Association of Christian Schools and affiliated with the American Association of Christian Schools.

I am strongly in favor of SJR14 and seek to enlist your support for its passage. The bill is well written and directly addresses the problem that church schools face in this state.

The U.S. government, acting through the IRS, presently requires each private religious school to register with the IRS, using their standard form 5578, which provides the IRS with certain information regarding the control of the school, and what exemption covers the school, and requires a statement of non discrimination. The schools are also presently required to include a policy statement of racial nondiscrimination in all of its brochures and catalogues dealing with student admissions, programs and scholarships. It must also presently make known its racially nondiscriminatory policy through publication in a newspaper, or communication through use of the broadcast media, of such nondiscriminatory policy.

The newly proposed guidelines go even further in extending the control of the IRS over private Christian schools. This includes a determination by the government as to the number of minority students actually enrolled, as well as an inquiry into the various activities of the school, covering such things as student admissions, the hiring of teachers and other staff personnel, the use of the building, which, in many cases is a church facility, and an examination of the curriculum to determine whether there is any special minority oriented curriculum or orientation programs.

With the new guidelines, the government proposes to control the school's ability to admit or deny admittance to any student applying to the school, as well as the school's ability to hire or fire the teachers. As many Christian schools only hire teachers who have the same religious belief, and admit only those students who either belong to the church or are willing to subscribe to the same religious beliefs, this decision to include private schools under the

proposed guidelines infringes upon the right of our churches and parents to have their children taught by someone who holds the same values as they do, and to have the necessary religious atmosphere, generated by a unanimity of faith among the students. This not only infringes upon the religious liberties of the parents, the students, and the teachers, it does so in a way that is completely contrary to the reasons why exemptions were originally given to churches and church schools.

We object to the new IRS proposal because it puts the financially expensive burden of proof as to whether churches are operated in a nondiscriminatory manner on the churches themselves. It really uses the GUILTY UNTIL PROVEN INNOCENT APPROACH which is contrary to the basic American way for doing things.

For these reasons I ask that you please support SJR14 and pass it quickly so that it may be sent on to Washington.

SB48

I also wish to speak today concerning SB48 Tuition Credits.

I appreciate the fact that SB48 recognizes the fact that parents exercising their freedom of choice by sending their children to private schools bear an undue financial burden. They must not only pay taxes for public education, but also tuition that averages $1,000 per child in this state. Tax relief is needed.

However, our church, its staff, and the church families are OPPOSED to the passage of SB48 unless an additional phrase is added to line 26 that includes the words, "OR school operated as a ministry of a church."

Without the additional wording being added, the State of Alaska would have to approve my church's educational ministry before our parents could receive the tax benefit. Not only does this violate the Constitutional separation of church and state, but sets a dangerous precedent for state intervention into church programs.

To be state approved implies that our school would have to conform to the same regulations as the public schools in this state. Our church schools purposefully operate in a manner different than the public schools. There is always the chance that an over-zealous official will attempt to interfere with our church school program, as has occurred in some other states, if we were to be state accredited or state approved.

I would seek to remind members of the Committee that SB323 was passed into law last year. Alaskan statutes NOW recognize as private schools not only those that are state accredited or state approved, but ALSO those private schools which have their own teacher training and academic programs as long as they can demonstrate that the children are learning equally well as their public school counterpart.

Since an Alaskan statute NOW recognizes as a school one that is NOT state approved or state accredited, please add wording to SB48 that would likewise recognize this change in our laws.

I do want to say that if this Committee does not add this wording to protect the integrity of our church, we will find it necessary to do everything in our means to oppose its final passage into Alaskan law.

In summary, SB48 attempts to alleviate a definite problem that our parents face, but needs additional wording to PROTECT our church according to the principle of separation of church and state.

Thank you.

EXECUTIVE ORDER CUTS?

Governor Milliken indicated at a press conference last week that he should know by March 1st, whether executive order reductions in the current year appropriations (1978-79) will be necessary. A statement made to the House Taxation Committee by Dr. Gerald Miller, Director of the Department of Management and Budget, pegged the chances of such a cut at 50-50. The Governor is currently working to reduce expenditures within his state departments in order to achieve sufficient savings to avoid an executive order reduction. If executive order cuts are necessary, school aid appropriations could be included. By our Michigan Constitution of 1963, such executive order reductions must receive the concurrence of the appropriations committees of the House and Senate.

MICHIGAN SCHOOLS HAD RECORD NUMBER OF "SNOW DAYS" LAST YEAR

Michigan schools lost a record 3,858 days of school last year because of inclement weather and other reasons, the State Board of Education reported last week. It represented an increase of 441 days compared to the previous school year (1976-77) when schools reported 3,417 "snow days." State Superintendent of Public Instruction John W. Porter said a late January snow storm that hit Michigan last year was responsible for the record number of "snow days" reported by Michigan schools.

NEW JERSEY TUITION TAX BREAK LOSES AGAIN ON APPEAL

A federal appeals court has affirmed a lower court ruling that a New Jersey law allowing parents a tax break for each child in nonpublic school violates the First Amendment to the U.S. Constitution by advancing religion. Under the law, parents were permitted to deduct $1,000 for each child in nonpublic school when computing gross personal income for state tax purposes. Last February, the U.S. District Court for New Jersey said the law did not pass constitutional muster.

That decision was affirmed Jan. 12 by the U.S. Court of Appeals for the 3rd Circuit. Accepting the trial court's finding that 714 of 753 nonpublic schools in the state are religiously affiliated and that the vast majority of private school children attend such schools, the appeals court concluded that the tax break was a charge made on the state for the purpose of religious education.

MORE ON CREDIT UNIONS AND SAVINGS AND LOANS

In the January 4, 1979 Board-O-Gram, we indicated that Proposal "C" which allows the state to invest in credit unions and loan associations would need implementing legislation to permit such investments by school districts. This information applies to the investment of school district surplus funds and does not apply to depositing funds accumulated under a deferred compensation program when so authorized by an employee of a school district.

COMMITTEE TO HOLD HEARINGS ON SCHOOL AID AND DEPARTMENT OF EDUCATION

Senator Kerry Kammer, Chairman of the Appropriations Subcommittee on State Aid and the Department of Education, has advised us that public hearings will be held throughout the State concerning the Department of Education. The following issues are of particular interest to the committee: (continued on back page)

SYNOPSIS OF IRS DEMANDS

1) Grant scholarships and provide other significant financial assistance to minority students.

2) Actively and vigorously recruit minorities.

3) Increase our percentage of minority students.

4) Employ minority teachers or professional staff.

5) Provide evidence of "good faith" by the following:

   a. ...continued and meaningful advertising programs or contact with minority leaders inviting applications from minorities...

   b. ...significant efforts to recruit minority teachers...

   c. ...participation with integrated schools in sports and other activities.

   d. ...making schools facilities available to outside, integrated civic or charitable groups, etc.

   e. ...special minority-oriented curriculum or orientation...

   f. ...minority participation in founding the school or using minority board members...

SB48 HAS JUST COME TO OUR ATTENTION, WE ARE PLEASED TO BE ABLE TO LEND OUR SUPPORT TO THIS PROPOSED LEGISLATION. SINCE 1956 COVENANT HIGH SCHOOL HAS PROVIDED SECONDARY EDUCATION TO WESTERN ALASKANS, FINANCED LARGELY BY DONATIONS. MANY OF OUR GRADUATES, A LARGE MAJORITY OF WHOM ARE NATIVES, ARE IN PLACES OF LEADERSHIP IN ALASKA. INCREASINGLY WE ARE NOW HAVING TO DEPEND ON TUITIONS TO COVER RAPIDLY RISING COSTS. THIS PLACES AN UNFAIR BURDEN ON TAXPAYING PARENTS, WHO FINANCE BOTH PUBLIC AND PRIVATE SCHOOLS SUCH AS CHS. SB48 WOULD PROVIDE MUCH NEEDED RELIEF TO SOME OF THESSE PARENTS AND WOULD BE A WELCOME ASSIST TO CHS AND SIMILAR SCHOOLS WHICH ARE MAKING A VALUABLE CONTRIBUTION TO THE STATE, BUT ARE NOW FIGHTING FOR THEIR FINANCIAL SURVIVAL. WE AS A STAFF AND STUDENT BODY, THEREFORE, STRONGLY URGE PASSAGE OF THIS LEGISLATION.

IN THE SENATE BY BRADLEY

SENATE BILL NO. 48

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act establishing a tuition credit under the Alaska net income tax; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 43.20 is amended by adding a new section to read:

Sec. 43.20.037. EDUCATIONAL TUITION CREDIT. (a) An individual is allowed as a credit against the tax due under this chapter 50 per cent of the money paid by him during the year to eligible educational institutions as tuition for the individual, the individual's spouse, or of any dependents the individual is entitled to claim as personal exemptions under Internal Revenue Code sec. 151(e).

(b) The credit allowed under this section may not exceed $500 for each individual whose tution is paid by the taxpayer.

(c) No credit is allowable under this section for amounts paid during the year for the education of the spouse of a taxpayer unless the taxpayer is entitled to a personal exemption for the spouse under Internal Revenue Code sec. 151(b) or the taxpayer files a joint return with the spouse.

(d) In this section "eligible educational institution" means an institution of higher education, a vocational school, a secondary school or an elementary school which meets accreditation or approval criteria established by the department by regulation. OR A CHURCH SCHOOL

* Sec. 2. This Act is retroactive to January 1, 1978. 1979

* Sec. 3. This Act takes effect immediately in accordance with AS 01.10.-070(c).

SB 48

MEMO

TO: SEN. HACKNEY

FROM: PAUL

FEB 28

RE: Today's Committee Bills
SB 48
SJR 14
SB 214

SB 48

What Sen. Bradley wants to do with this bill is provide some relief for taxpayers who are paying the astronomical costs of tuition to send either themself, spouse, or kids to school. His means of obtaining this objective is by allowing for a tax credit (sec 1 (a)) to the individual on his income tax of 50% of the amount of tuition paid during that year not to exceed $500 for each individual (sec 1 (b)) (i.e. if he's going to school, his wife is going to school and his son is going to school, he could possibly get a tax credit of up to $1500, dependent on the amount of the tuition paid out for that year -- remember, according to this bill the tax credit is for 50% of the tuition paid not exceeding $500 for each individual).

A safeguard is provided in section 1(c) making sure that the credit is not granted twice when it can only be used once.. i.e. its saying that the only time that an individual can claim the spouse's tuition costs is when the taxpayer (individual) is entitled to a personal exemption for the spouse or they file jointly. This is to prevent a couple who has separated and who are filing separately from both using this tax credit when filing.

Section 1(d) defines "eligible education institutions" that this bill would deal with. It should be noted that Sen. Bradley includes elementary & secondary schools, as well as, institutions of higher education in this bill. So he is seeking relief for those parents who pay to have their kids go to private grade school and high school, and not just coming to the aid of those burdened with the high costs of college tuition.

Section 2 of the bill makes the bill retro to Jan '78.

Section 3 of the bill stipulates that the Act will take effect immediately.

Regarding this bill, I spoke with Paul Taylor, an acquaintance of mine, who is an auditor with the Audit Division, Dept of Revenue, in reference to the mechanics of this bill and he had these comments:

Section 1(a) - he said the only change he would make here would be to delete the word "personal" on line 14 and have it read simply "and dependents the individual is entitled to claim as exemptions under Internal Revenue Code (IRC) 151 (e)." The reason for this is

because the individual claims himself as a "personal" exemption (in which he can exempt $750 for himself personally) and his spouse and kids are his "additional" (not personal) exemptions (see IRC 151 (b) & (e) attached). He said this is just a technical change and not that big of a deal. He said "I guess you could read the language in such a way that his spouse and kids could be classified as personal exemptions without much difficulty.

Section 1(b) - He said he would insert the words on line 17, between individual and whose, the language "specified in section 1(a)", to clarify that this credit is for himself, spouse and dependents as stated in section 1(a). Credit would not apply if the individual is paying the neighbor kid's tuition or something like that. It has to apply to the individual or his spouse or kids.

Section 1(c) - He says as far as he is concerned this language is redundant. According to him, the only time an individual is entitled to claim his spouse as a personal exemption is when they file jointly (so there is no need to make the distinction). He said you might have a situation where a married man is the only one working and the wife is taking care of the kids and the husband files separately, claiming his wife as a dependent (which he doesn't think he can do), but, if he could, it would be to his disadvantage to file this way because he would be losing money, so he doesn't see why anyone would do it. So he says that you could just have it read "unless the taxpayer files a joint return with the spouse", instead of the language on line 20 stating "taxpayer is entitled to a personal exemption for the spouse under IRC sec. 151(b) or the taxpayer files a joint return with the spouse.

SJR 14

This resolution urges the IRS to delay promulgation of its regulations which would remove the tax-exempt status of private schools which do not meet stringent and capricious affirmative action requirements and quotas. Also, it urges Congress to weigh the effects of such regulations and take appropriate action.

SB 214

Your bill, providing financial assistance to elderly people who need emergency dental service or denture services and are not eligible to receive financial assistance under current federal programs such as medicaid or medicare.

NOTE: REMEMBER, WE ARE TELECONFERENCING TODAY.

Sec. 151. Allowance of deductions for personal exemptions.

(a) Allowance of deductions.

In the case of an individual, the exemptions provided by this section shall be allowed as deductions in computing taxable income.

(b) Taxpayer and spouse.

An exemption of $750 for the taxpayer; and an additional exemption of $750 for the spouse of the taxpayer if a joint return is not made by the taxpayer and his spouse, and if the spouse, for the calendar year in which the taxable year of the taxpayer begins, has no gross income and is not the dependent of another taxpayer.

(c) Additional exemption for taxpayer or spouse aged 65 or more.

(1) For taxpayer. An additional exemption of $750 for the taxpayer if he has attained the age of 65 before the close of his taxable year.

(2) For spouse. An additional exemption of $750 for the spouse of the taxpayer if a joint return is not made by the taxpayer and his spouse, and if the spouse has attained the age of 65 before the close of such taxable year, and, for the calendar year in which the taxable year of the taxpayer begins, has no gross income and is not the dependent of another taxpayer.

(d) Additional exemption for blindness of taxpayer or spouse.

(1) For taxpayer. An additional exemption of $750 for the taxpayer if he is blind at the close of his taxable year.

(2) For spouse. An additional exemption of $750 for the spouse of the taxpayer if a separate return is made by the taxpayer, and if the spouse is blind and, for the calendar year in which the taxable year of the taxpayer begins, has no gross income and is not the dependent of another taxpayer. For purposes of this paragraph, the determination of whether the spouse is blind shall be made as of the close of the taxable year of the taxpayer; except that if the spouse dies during such taxable year such determination shall be made as of the time of such death.

(3) Blindness defined. For purposes of this subsection, an individual is blind only if his central visual acuity does not exceed 20/200 in the better eye with correcting lenses, or if his visual acuity is greater than 20/200 but is accompanied by a limitation in the fields of vision such that the widest diameter of the visual field subtends an angle no greater than 20 degrees.

(e) Additional exemption for dependents.

(1) In general. An exemption of $750 for each dependent (as defined in section 152)—

(A) whose gross income for the calendar year in which the taxable year of the taxpayer begins is less than $750, or

(B) who is a child of the taxpayer and who (i) has not attained the age of 19 at the close of the calendar year in which the taxable year of the taxpayer begins, or (ii) is a student.

(2) Exemption denied in case of certain married dependents. No exemption shall be allowed under this subsection for any dependent who has made a joint return with his spouse under section 6013 for the taxable year beginning in the calendar year in which the taxable year of the taxpayer begins.

(3) Child defined. For purposes of paragraph (1)(B), the term "child" means an individual who (within the meaning of section 152) is a son, stepson, daughter, or stepdaughter of the taxpayer.

(4) Student defined. For purposes of paragraph (1)(B)(ii), the term "student" means an individual who during each of 5 calendar months during the calendar year in which the taxable year of the taxpayer begins—

(A) is a full-time student at an educational organization described in section 170(b)(1)(A)(ii); or

(B) is pursuing a full-time course of institutional on-farm training under the supervision of an accredited agent of an educational organization described in section 170(b)(1)(A)(ii) or of a State or political subdivision of a State.

In '76, P. L. 94-455, Sec. 1901(a)(23), amended para. (e)(4), for tax. yrs. begin. after '76. "rior to amendment para. (e)(4) read as follows:

"(4) Student and educational institution defined. For purposes of paragraph (1)(B)(ii), the term 'student' means an individual who during each of 5 calendar months during the calendar year in which the taxable year of the taxpayer begins—

"(A) is a full-time student at an educational institution, or

"(B) is pursuing a full-time course of institutional on-farm training under the supervision of an accredited agent of an educational institution or of a State or political subdivision of a State.

For purposes of this paragraph, the term 'educational institution' means only an educational institution which normally maintains a regular faculty and curriculum and normally has a regularly organized body of students in attendance at the place where its educational activities are carried on."

In '71, P. L. 92-178, Secs. 201(a)(1) and (b)(1) changed the personal exemption, additional exemptions, exemptions for dependents, and allowable gross income for dependents in subsecs. (b), (c), (d), and (e) as listed in the caution, above. The amendment provided that wherever it appeared in Code Sec. 151, $650 was to be changed to $675 for tax. yrs. begin. after 12/31/70 and before 1/1/72, and $750 for tax. yrs. begin. after 12/31/71.

In '69, P. L. 91-172, Secs. 801(a)(1), (b)(1), (c)(1) and (d)(1) changed the personal exemption, additional exemptions, exemption for dependents, and allowable gross income for dependents in subsecs. (b), (c), (d), and (e) as listed in the caution, above. The amendment provided that wherever it appeared in Code Sec. 151 $600 was to be changed to $625 for tax. yrs. begin. in '70, $650, for tax. yrs. begin. in '71, $700 for '72, and $750 for '73 and thereafter. Prior to amendment the figure for tax. yrs. begin. before '70 was $600.

— P. L. 91-172, Sec. 941(b), substituted "if a joint return is made by the taxpayer and his spouse" for "if a separate return is made by the taxpayer" in subsecs. (b) and (c)(2), for tax. yrs. begin. after 12/31/69.

Sec. 152. Dependent defined.

(a) General definition.

For purposes of this subtitle, the term "dependent" means any of the following individuals over half of whose support, for the calendar year in which the taxable year of the taxpayer begins, was received from the taxpayer (or is treated under subsection (c) or (e) as received from the taxpayer):

(1) A son or daughter of the taxpayer, or a descendant of either,

(2) A stepson or stepdaughter of the taxpayer,

(3) A brother, sister, stepbrother, or stepsister of the taxpayer,

(4) The father or mother of the taxpayer, or an ancestor of either,

(5) A stepfather or stepmother of the taxpayer,

(6) A son or daughter of a brother or sister of the taxpayer,

(7) A brother or sister of the father or mother of the taxpayer,

(8) A son-in-law, daughter-in-law, father-in-law,

Dear George:

During the week of December 5th the IRS held hearings on these proposed regulations which would change the tax-exempt status of private schools. The opposition has been so overwhelming that the IRS is expected to revise these regulations after the House Ways and Means Committee holds hearings in January.

Last year I advised the Commissioner of the Internal Revenue Service of my strong objections to these proposed regulations and urged that they not be implemented.

With best wishes,

Cordially,

Ted

SUBJECT: State Aid to Private Education
(Work Order No. 6089)

TO: Representative Terry Martin

FROM: Kenneth E. Vassar
Legislative Counsel

Here are the documents I believe you were referring to this morning, with an extra. I have numbered them (1) - (3). Number 1 is the constitutional provision as it exists today. The last sentence of Article VIII, sec. 1, is the prohibition against state aid to private schools. Number 2 is the amendment that was before the voters in 1976. This section of the constitution has been subject to many attempted amendments in the past. To the best of my knowledge, the amendment proposed by Number 2 (HJR 73 -1976) is the only one to actually pass the legislature and be placed on the ballot. Number 3 is another attempted amendment which did not pass the legislature. It was also introduced in 1976. I have included it just to give you an idea of some of the alternatives that are available. The resolution I drafted for you would simply eliminate the last sentence of Article VIII, sec. 1. This, in my opinion, would remove any state constitutional obstacles and place us directly under the controlling language of the United States Constitution. If there is anything else I can do for you, let me know.

Incidentally, your tax credit bill has been prepared and should be delivered to you within the next day or two with a memo explaining the constitutional problems I see with the bill.

Enclosures

Enforcement

SECTION 11. Any qualified voter may apply to the superior court to compel the governor, by mandamus or otherwise, to perform his reapportionment duties or to correct any error in redistricting or reapportionment. Application to compel the governor to perform his reapportionment duties must be filed within thirty days of the expiration of either of the two ninety-day periods specified in this article. Application to compel correction of any error in redistricting or reapportionment must be filed within thirty days following the proclamation. Original jurisdiction in these matters is hereby vested in the superior court. On appeal, the cause shall be reviewed by the supreme court upon the law and the facts.

ARTICLE VII

HEALTH, EDUCATION, AND WELFARE

Public Education

SECTION 1. The legislature shall by general law establish and maintain a system of public schools open to all children of the State, and may provide for other public educational institutions. Schools and institutions so established shall be free from sectarian control. No money shall be paid from public funds for the direct benefit of any religious or other private educational institution.

State University

SECTION 2. The University of Alaska is hereby established as the state university and constituted a body corporate. It shall have title to all real and personal property now or hereafter set aside for or conveyed to it. Its property shall be administered and disposed of according to law.

Board of Regents

SECTION 3. The University of Alaska shall be governed by a board of regents. The regents shall be appointed by the governor, subject to confirmation by a majority of the members of the legislature in joint session. The board shall, in accordance

IN THE LEGISLATURE OF THE STATE OF ALASKA

NINTH LEGISLATURE - SECOND SESSION

Proposing an amendment to the Constitution of the State of Alaska relating to state aid to private educational institutions.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. Article VII, sec. 1, Constitution of the State of Alaska, is amended to read:

SECTION 1. PUBLIC EDUCATION. The legislature shall by general law establish and maintain a system of public schools open to all children of the State, and may provide for other public educational institutions. Schools and institutions so established shall be free from sectarian control. No money shall be paid from public funds for the direct benefit of any religious or other private educational institution, however nothing in this section shall prevent direct aid to students in accordance with the law.

* Sec. 2 The amendment proposed by this resolution shall be placed before the voters of the state at the next general election in conformity with art. XIII, sec. 1, Constitution of the State of Alaska, and the election laws of the State.

This was voted down by the public in the 1976 election.

[illegible] 5/7/76
[illegible] Judiciary

IN THE HOUSE BY THE SELECT COMMITTEE ON EDUCATION

HOUSE JOINT RESOLUTION NO. [illegible] 5

IN THE LEGISLATURE OF THE STATE OF ALASKA

NINTH LEGISLATURE - [illegible] SESSION

Proposing an amendment to the Constitution of the State of Alaska relative to state aid to private educational institutions.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. Article VII, sec. 1, Constitution of the State of Alaska, is amended to read:

SECTION 1. PUBLIC EDUCATION. The legislature shall by general law establish and maintain a system of public schools open to all citizens of the State, and may provide for other public educational institutions which it and libraries as it deems desirable. No money shall be paid from public funds for the direct benefit of any religious or other private educational institution.

* Sec. 2. The amendment proposed by this Act shall be submitted to the voters of the State at the [illegible] election in which [illegible] appears on the ballot, and shall become effective [illegible] days after approval by the voters.

This was defeated by the voters in 1976 election.

ALASKA'S CONSTITUTIONAL CONVENTION

GOVERNMENTAL FUNCTIONS AND RESPONSIBILITIES

Health, Education, and Welfare

Article VII, on health, education, and welfare, is the briefest in the constitution. One section covers public education, two sections establish the University of Alaska as a single unified system of higher education, and two one-sentence sections provide for public health and welfare. Except for the proposed prohibition of public funds being used for direct benefit of private educational institutions, the article was not controversial. Lack of disagreement was due to the fact that the functions covered by the article were already being carried out under the territorial government.

Responsibility for Article VII was given to the Committee on Preamble and Bill Rights, primarily because the social services covered by the article were extensions of the rights and privileges of the people. The final draft was a series of concise statements requiring the legislature to provide for public education, health, and welfare.

In drafting the section on education, the committee included language that covered a standard feature of past and present statehood enabling bills, namely that "provision shall be made for the establishment and maintenance of a system of public schools which shall be open to all children of said state and free from sectarian control."

The only significant point raised in plenary consideration of the committee proposal was a suggested amendment to insert the words "and indirect" after "direct" in the draft provision "No money shall be paid from public funds for the direct benefit of any religious or other private educational institution." Proponents of the proposed amendment stressed the importance of protecting the integrity of public education, while its opponents argued for the provision of services to the individual student if otherwise in keeping with the constitution. The proponents of the amendment to prohibit "direct and indirect" aid to parochial and other private schools held that sectarian segregation in education is bad for school children and that inadequate restriction could lead to diversion of funds and weakening of public education. A majority (thirty-four to nineteen) opposed the amendment, agreeing with those who argued that more important than these considerations was the need to help each child attain the fullest level of individual development through programs such as free lunches, bus transportation, and even payment by the state welfare agency of room and board to parentless children, so long as the basic principle of separation of church and state was maintained.

A floor amendment to provide for a unified state library service was rejected by the delegates as falling into the area of legislation and therefore not being proper constitutional material.

A proposal to altogether strike the health and public welfare provisions was made by Seaborn Buckalew of Anchorage on the grounds that they were already covered by the general welfare clause and were also unnecessary in the constitution. However, Rolland Armstrong of Sitka and others argued for their inclusion as a matter of philosophy, and on a voice vote the amendment was defeated.

Before final adoption of the constitution, the convention added the two sections providing for the state university and its board of regents. Provisions for the university had been part of the executive article dealing with boards and commissions of that article. It was suggested during consideration of the executive branch proposal that the requirement for approval by the governor of the appointment of executive officers of principal departments headed by boards and commissions would not be appropriate to the university and the board of regents. As a result, a separate proposal on the unversity was offered by the Committee on the Executive Branch for inclusion in the article on general provisions. It was later transferred by the Style and Drafting Committee to the article dealing with education.

The provisions for a single state university system, established as a separate corporate body, and for a board of regents appointed by the government and confirmed by the legislature was modeled on the Hawaii constitution. As approved, the university was given constitutional status and removed from direct supervision of the governor.

Constitutional Validity of State Aid to Pupils in Church-Related Schools—Internal Tension Between the Establishment and Free Exercise Clauses

DAVID J. YOUNG

Constitutional Validity of State Aid to Pupils in Church-Related Schools—Internal Tension Between the Establishment and Free Exercise Clauses

DAVID J. YOUNG*

I. INTRODUCTION

The Supreme Court's recent decision in *Wolman v. Walter*[1] raises again the question whether the "final page" has been written with respect to a troublesome period in the constitutional development of religion clause[2] principles. The United States Supreme Court has now addressed itself to a complete array of state aid programs designed to assist pupils attending church-sponsored educational institutions. After thirty years of intensive litigation the slate looks something like this:

Year	*Programs in Conformity with First Amendment*	*Programs Violative of First Amendment*
1947	School bus transportation[3]	
1968	Textbook loans[4]	
1970	Real property tax exemption for religious organizations[5]	
1971	Federal construction grants for church-related colleges[6]	Salary supplements for lay teachers[7] Secular education service contracts calling for state to pay nonpublic school for providing secular education[8]

---

*Member, Ohio Bar. Mr. Young is a member of the firm of Dunbar, Kienzle & Murphey, Columbus, Ohio. The author argued *Wolman v. Walter* before the United States Supreme Court for appellees.

1. 97 S. Ct. 2593 (1977).

2. "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof." U.S. CONST. amend. I. The religion clause comprises two parts: the establishment clause prohibits the government from promoting religion and the free exercise clause prohibits the government from inhibiting religion.

3. Everson v. Board of Educ., 330 U.S. 1 (1947).

4. Board of Educ. v. Allen, 392 U.S. 236 (1968).

5. Walz v. Tax Comm'n, 397 U.S. 664 (1970).

6. Tilton v. Richardson, 403 U.S. 672 (1971).

7. Lemon v. Kurtzman [Early v. DiCenso], 403 U.S. 602 (1971) (*Early* was a case arising out of Rhode Island that was consolidated with the Pennsylvania case, *Lemon v. Kurtzman*, for purposes of appeal).

8. Lemon v. Kurtzman, 403 U.S. 602 (1971) (Pennsylvania statute declared unconstitutional).

1973	Tax-exempt bond assistance for construction at church-related colleges[9]	Grants to schools for cost of general testing and record-keeping[10]
		Tuition reimbursement for low income parents[11]
		Parental tax credits[11]
		Grants to schools for maintenance and repair[11]
		Parental reimbursement grants[12]
1975		Instructional equipment and material loaned to schools[13]
		On-premises health and remedial services[13]
1976	Direct, per-student grants to church-related colleges[14]	
1977	Standardized tests and scoring services[15]	Instructional equipment and material loaned to pupil[15]
	Speech and hearing diagnostic services[15]	Field trip transportation[15]
	Physician, dental, and optometric services[15]	
	Neutral-site therapeutic services[15]	
	Neutral-site remedial education services[15]	
	Programs for handicapped[15]	
	Neutral-site guidance and counseling[15]	
	Assistance grants for students attending church-related colleges[16]	

In its 1976 decision in *Roemer v. Board of Public Works*[17] the Supreme Court intimated that the end of the line was near:

> [T]he slate we write on is anything but clean. Instead, there is little room

17. 426 U.S. 736 (1976).

> for further refinement of the principles governing public aid to church-affiliated private schools. Our purpose is not to unsettle those principles . . . or to expand upon them substantially, but merely to insure that they are faithfully applied in this case.[18]

Similarly in *Wolman*, Justice Blackmun observed: "Nonetheless, the Court's numerous precedents 'have become firmly rooted, . . .' and now provide substantial guidance."[19] Justice Stewart, the author of the majority opinion in *Meek v. Pittenger*,[20] saw himself as applying tests which constituted a distillation of the past decades of effort:

> These tests constitute a convenient, accurate distillation of this Court's efforts over the past decades to evaluate a wide range of governmental action challenged as violative of the constitutional prohibition against laws "respecting an establishment of religion," and thus provide the proper framework of analysis for the issues presented in the case before us.[21]

Notwithstanding these assurances by the Court that this area of the law is settled, the question still remains: has the thoughtful scholarship of the Supreme Court's most respected Justices provided a framework that will avoid continued controversy? This article will show that they have not. Despite the strong assertions in recent decisions by the Court that religion clause principles are well defined, the fact is that there have been periodic major shifts in the factors the Court considers in judging the constitutionality of a state aid program. These shifts have had a divisive impact on the Court. In recent years this division has resolved itself into a three-way split. This article attempts to identify the current trend of the Court in state aid cases by analyzing this split and the recent movement of the swing group of Justices.

II. Charting a Neutral Course Between the Free Exercise and Establishment Clauses—The Tripartite Split in the Court

Two issues must be addressed any time a state aid program is presented to the Court. The first, which may be called the establishment issue, is raised by opponents of state aid to sectarian schools. The argument is that such aid constitutes a prohibited "establishment of religion," or at least the first step toward such an establishment. The second issue, which may be called the free exercise issue, is advanced by proponents of the state assistance program. The proponents feel that since they pay education taxes a portion of the tax

18 *Id.* at 754.

19 Wolman v. Walter, 97 S. Ct. 2593, 2599 (1977).

20 421 U.S. 349 (1975).

21 *Id.* at 358.

proceeds should be used to help finance their children's education. Without an allocation of tax funds toward the education of their children, they are forced either to bear the financial burden of paying twice for their children's education—once through taxes and once through tuition—or to send their children to the public school. This, proponents assert, restricts their freedom of choice and inhibits their "free exercise" of religion.

In an attempt to reconcile the constitutional conflict between the establishment and free exercise clauses the Court developed a three-part test for judging the various state programs. "First, the statute must have a secular legislative purpose; second, its principal or primary effect must be one that neither advances nor inhibits religion . . . ; finally, the statute must not foster 'an excessive government entanglement with religion.' "[22]

Careful analysis reveals that the relative significance of the establishment clause and the free exercise clause in first amendment cases is sometimes ignored. Justice Brennan, who now maintains that almost all forms of assistance to pupils at church-related schools is violative of the establishment clause, recognized a place for the free exercise doctrine in his concurring opinion in *Abington School District v. Schempp*.[23]

> Attendance at the public schools has never been compulsory; parents remain morally and constitutionally free to choose the academic environment in which they rear their children to be educated. The relationship of the Establishment Clause of the First Amendment to the public school system is preeminently that of reserving such a choice to the individual parent, rather than vesting it in the majority of voters of each State or school district. The choice which is thus preserved is between a public secular education with its uniquely democratic values, and some form of private or sectarian education, which offers values of its own. In my judgment the First Amendment forbids the State to inhibit that freedom of choice by diminishing the attractiveness of either alternative—either by restricting the liberty of the private schools to inculcate whatever values they wish, or by jeopardizing the freedom of the public schools from private or sectarian pressures. The choice between these very different forms of education is one—very much like the choice of whether or not to worship—which our Constitution leaves to the individual parent. It is no proper function of the state or local government to influence or restrict that election.[24]

In spite of his recognition of free exercise values, Justice Brennan has been unwilling to concede that placing a condition—attendance at the *public* schools—upon a gratuitous state benefit can discourage the free exercise of religion by "diminishing the attractiveness" of the

---

22. Lemon v. Kurtzman, 403 U.S. 602, 612-13 (1971) (citation omitted).
23. 374 U.S. 203 (1963).
24. *Id.* at 242 (Brennan, J., concurring).

church-related school. Such an attitude toward free exercise objectives led to Chief Justice Burger's plea:

> One can only hope that, at some future date, the Court will come to a more enlightened and tolerant view of the First Amendment's guarantee of free exercise of religion, thus eliminating the denial of equal protection to children in church-sponsored schools, and take a more realistic view that carefully limited aid to children is not a step toward establishing a state religion—at least while this Court sits.[25]

The Court's difficulty with this perplexing question has been aggravated by its necessity of fashioning majority votes on a patchwork, case-by-case basis. The opinion of the Court in *Walz v. Tax Commission*[26] reflects the difficulty encountered in attempts to fashion sweeping religion clause principles:

> The Establishment and Free Exercise Clauses of the First Amendment are not the most precisely drawn portions of the Constitution. The sweep of the absolute prohibitions in the Religion Clauses may have been calculated; but the purpose was to state an objective, not to write a statute. In attempting to articulate the scope of the two Religion Clauses, the Court's opinions reflect the limitations inherent in formulating general principles on a case-by-case basis. The considerable internal inconsistency in the opinions of the Court derives from what, in retrospect, may have been too sweeping utterances on aspects of these clauses that seemed clear in relation to the particular cases but have limited meaning as general principles.
>
> The Court has struggled to find a neutral course between the two Religion Clauses, both of which are cast in absolute terms, and either of which, if expanded to a logical extreme, would tend to clash with the other.[27]

In an amicus brief, Leo Pfeffer, who has argued a great number of the religion clause cases before the Supreme Court of the United States, described the past decades of constitutional history in this area as a "historic game of chess." Although cases were won or lost and governing principles seemed well defined, the fact is that the pieces of the jigsaw puzzle were being "forced together."[28] The compromise, case-by-case approach utilized by the Court has misled both proponents and opponents of state assistance to nonpublic pupils and has fostered continued litigation. Legislation was drafted in reliance on sweeping utterances that in retrospect proved to be illusory.

In practice the tripartite test articulated by the Court does little to balance the competing interests embodied in the two religion clauses. The Court itself now speaks of the test only as a guide with

which to identify instances in which the objectives of the establishment clause have been impaired. This tripartite test, however, serves more as a framework for structuring opinions than as a guidepost for determining the outcome. The objectives of the establishment clause, likewise, are too vague to be outcome-determinative. An analysis and understanding of the three-way split among the Supreme Court Justices,[29] however, may be more productive in predicting whether a given aid program will withstand religion clause challenge. Chief Justice Burger and Justices Rehnquist and White seem prepared to approve a broad range of meaningful child benefit programs in the form of grants, credits, scholarships, loans, and vouchers.[30] On the other hand, it is with a great deal of reluctance that Justices Brennan, Marshall, and Stevens approve even health-related services.[31] The middle is comprised of Justices Blackmun, Powell, and Stewart, and the outcome of future constitutional challenges will depend on the direction in which they lean.[32]

---

29. The tension among the members of the Court is perhaps not fully revealed by the opinions themselves. The depth and intensity of these tensions may very well stand currently as a barrier to the formation of a predictable and stable five-Justice coalition. This internal tension is explainable in part by the frustration that must flow from the Court's apparent inability to formulate a comprehensive analysis in this troublesome area, and also by the compromises required to obtain five votes. The internal tension is also a natural by-product of a case-by-case legislative approach that has backfired because of a failure to consider fully the implications of pronouncements in a given case upon future challenges.

The tension and frustration within the Court is undoubtedly aggravated by the fact that the Court has had to make decisions that vitally affect the inculcation of religious belief, the extension of knowledge, and the education of children on the basis of abbreviated stipulations of fact, facial challenges, or evidentiary transcripts that barely pierce the surface of relevant educational and religious developments. The difficulties arising from inadequate factual development are further compounded by the lack of historical record or legislative history with respect to the religion clause. There were no public schools when the first amendment was adopted, and the structure of American education has changed markedly since then. The religion clause preceded general acknowledgment of the need for universal formal education. *See* Wisconsin v. Yoder, 406 U.S. 205, 214 (1972). Thus, the Court for decades has been forced into a situation of attempting to apply vaguely defined principles to an ever-shifting set of circumstances and considerations from which it has not yet been able to extricate itself.

30. *See, e.g.*, Wolman v. Walter, 97 S. Ct. 2593 (1977) (Burger, C.J., and White and Rehnquist, JJ., voted to uphold all six categories of aid presented to the Court); Roemer v. Board of Pub. Works, 426 U.S. 736 (1976) (Burger, C.J., and White and Rehnquist, JJ., voted to uphold direct, per-student grants to church-related colleges); Meek v. Pittenger, 421 U.S. 349 (1975) (Burger, C.J., and White and Rehnquist, JJ., voted to uphold all three types of aid presented to the Court).

31. *See, e.g.*, Wolman v. Walter, 97 S. Ct. 2593 (1977) (Brennan and Marshall, JJ., voted to strike down all six categories of aid presented to the Court; Stevens, J., voted to strike down four categories of aid and to uphold diagnostic and therapeutic services, the latter two with "misgivings"); Roemer v. Board of Pub. Works, 426 U.S. 736 (1976) (Brennan, Marshall, and Stevens, JJ., voted to strike down direct, per-student grants to church-related colleges); Meek v. Pittenger, 421 U.S. 349 (1975) (Brennan and Marshall, JJ., voted to strike down all three types of aid presented to the Court).

32. *See, e.g.*, Wolman v. Walter, 97 S. Ct. 2593 (1977) (Blackmun and Stewart, JJ., voted to uphold four of the six categories of aid presented to the Court and to strike down loans of instructional material and field trip transportation; Powell, J., voted to uphold five categories and to strike down loans of instructional material); Roemer v. Board of Pub. Works, 426 U.S. 736 (1976) (Blackmun and Powell, JJ., voted to uphold and Stewart, J., voted to strike down direct, per-student grants to church-related colleges); Meek v. Pittenger, 421 U.S. 349 (1975) (Stewart, Powell, and Blackmun, JJ., voted to uphold textbook loans and to strike down loans

In order to appreciate the current alignment of the Justices and the state of the law after *Wolman* it is necessary to consider the historical positions of the Court. It is important to note that prior to 1971 the Court generally affirmed state aid to church-related schools. In that year the Court abruptly shifted its position regarding aid to elementary and secondary schools. Now, after *Wolman*, it appears that the Court is swinging back toward approval of some programs.[33] This article focuses on these swings and pays particular attention to the pivotal cases *Walz v. Tax Commission*[34] and *Wolman v. Walter*.[35] As will be seen, *Walz* marked the end of Supreme Court approval of state aid to church-sponsored schools and began a period in which every state program, with the exception of aid to sectarian colleges, was struck down. *Wolman* is now the first case to turn away from the strict position the Court has held since *Walz*.

III. Pre-*Walz* Criteria: Secular Purpose and Effect

The first case to consider the relationship between state aid to church-sponsored education and the religion clause was *Everson v. Board of Education*.[36] New Jersey had enacted a law that would reimburse parents for the expense of busing their children to public and parochial schools. The *Everson* Court said that "the clause against establishment of religion by law was intended to erect 'a wall of separation between church and State.'"[37] The Court held that the New Jersey program had not made the slightest breach in the wall of separation. The Court further held that to prohibit the state from extending general welfare benefits to *all* of its children would be to violate the neutral position required by the first amendment.[38]

Between 1947 and 1968 *Everson* stood as the leading case in the religion clause field. The principles first set forth in *Everson* were further refined during the two decades following its decision[39] and were applied again to a nonpublic school aid case in the form of a two-part purpose-and-effect test[40] in *Board of Education v. Allen*.[41]

---

of instructional material and on-premises health and remedial services). Note that the positions taken by these Justices have determined the holding of the Court.

33. For a graphic representation of the swings in the Court, see the chart in section I of this article.

36. 330 U.S. 1 (1947).

37. *Id.* at 16.

38. *Id.* at 18.

39. *See, e.g.*, McGowan v. Maryland, 366 U.S. 420 (1961), which upheld the constitutionality of Sunday sales prohibition laws; Zorach v. Clauson, 343 U.S. 306 (1952), which upheld the constitutional validity of programs permitting public schools to release students during the school day who desire to attend off-premises religion courses.

40. The two-part test was first laid down in the context of a school prayer case, Abington School Dist. v. Schempp, 374 U.S. 203 (1963).

41. 392 U.S. 236 (1968).

> The test may be stated as follows: what are the purpose and the primary effect of the enactment? If either is the advancement or inhibition of religion then the enactment exceeds the scope of legislative power as circumscribed by the Constitution. That is to say that to withstand the strictures of the Establishment Clause there must be a secular legislative purpose and a primary effect that neither advances nor inhibits religion.[42]

In *Allen* the Court upheld a New York program whereby local school boards loaned approved textbooks to all children, including sectarian school students, in grades seven through twelve. Before the Court was able to find "a secular legislative purpose and a primary effect that neither advances nor inhibits religion,"[43] it was necessary for the Court to declare that the "processes of secular and religious training [in church-sponsored schools] are [not] so intertwined that secular textbooks furnished to students by the public are in fact instrumental in the teaching of religion."[44]

The *Allen* Court's recognition of the valuable role played by nonpublic education was obviously a key factor in the decision. Justice White, writing for the majority, utilized language that greatly increased the hope and expectations of proponents of aid to nonpublic school pupils:

> Underlying these cases, and underlying also the legislative judgments that have preceded the court decisions, has been a recognition that private education has played and is playing a significant and valuable role in raising national levels of knowledge, competence, and experience. Americans care about the quality of the secular education available to their children. They have considered high quality education to be an indispensable ingredient for achieving the kind of nation, and the kind of citizenry, that they have desired to create. Considering this attitude, the continued willingness to rely on private school systems, including parochial systems, strongly suggests that a wide segment of informed opinion, legislative and otherwise, has found that those schools do an acceptable job of providing secular education to their students. This judgment is further evidence that parochial schools are performing, in addition to their sectarian function, the task of secular education.[45]

Many nonpublic school parents, educators, and administrators read *Allen* as saying that carefully drafted aid programs that have the primary effect of aiding the secular educational functions in their schools would satisfy establishment clause restraints. It is difficult to quarrel or find fault with this interpretation. This is obviously why opponents of nonpublic school aid have sought repeatedly during the past nine years to convince the Supreme Court that *Allen* should be reversed. In recent years, however, the Court has given little

42 *Id.* at 243 (quoting Abington School Dist. v. Schempp, 374 U.S. 203, 222 (1963)).

43 *Id.*

more than lip service to the *Allen* principles[46] and has in fact emasculated its underpinnings. The two-part test has been accompanied by a third ingredient that has proved dominant in recent cases.

IV. Introduction of the Entanglement Test—The Impact of *Walz v. Tax Commission*

In 1970, the Supreme Court handed down a decision that has had perhaps a greater impact upon the education cases than any case since *Everson*. *Walz v. Tax Commission*[47] questioned the constitutional validity of real property tax exemptions for property used exclusively for religious purposes. The plaintiff, a real property owner, sought an injunction to prevent the granting of property tax exemptions to religious properties, arguing that such exemptions forced him to make a contribution to religious bodies contrary to the establishment clause. In determining the constitutional validity of such exemptions, the Court looked to whether taxation or exemption occasioned a greater degree of involvement between government and religion, thus evidencing its concern with the amount of entanglement between secular and sectarian interests. The Court commented in dictum: "Obviously a direct money subsidy would be pregnant with involvement and, as with most governmental grant programs, could encompass sustained and detailed administrative relationships for enforcement of statutory or administrative standards."[48] Although the Supreme Court had in prior decisions showed a concern about the degree of involvement between government and religion, this dictum gave birth to a third and separate constitutional test for judging religion clause cases. Now, in addition to determining that the legislative purpose and effect of a state program did not promote or inhibit religion, it became necessary for a court to inquire whether the administration of the program fosters "excessive government entanglement with religion."[49]

The first state aid to nonpublic school statutes to be tested subsequent to *Walz* were the Pennsylvania statute considered in *Lemon v. Kurtzman*,[50] and the Rhode Island statute considered in the companion case, *Earley v. DiCenso*.[51] The Rhode Island statute called for a salary supplement to lay instructors teaching secular subjects in the Rhode Island parochial schools. The Pennsylvania statute called for a contractual relationship between the nonpublic school and the state under which the state reimbursed the nonpublic schools for providing

46 *See, e.g.*, Lemon v. Kurtzman, 403 U.S. 602 (1971).

51 *Id.*

teacher salaries, textbooks, and instructional materials in specified secular subjects. Both statutes were declared violative of the first amendment. Chief Justice Burger, who had authored the *Walz* opinion, delivered the opinion of the Court in which the purpose and effect test in *Allen* became a tripartite inquiry:

> Every analysis in this area must begin with consideration of the cumulative criteria developed by the Court over many years. Three such tests may be gleaned from our cases. First, the statute must have a secular legislative purpose; second, its principal or primary effect must be one that neither advances nor inhibits religion . . . ; finally, the statute must not foster "an excessive government entanglement with religion."[52]

Both statutes passed the first prong of the tripartite inquiry; in neither the Pennsylvania nor the Rhode Island statutes did the Court find a nonsecular legislative purpose. The second inquiry, whether the principal or primary effect of the statutes was one that did not promote or inhibit religion, was a more difficult one for the Court to answer. Chief Justice Burger reasoned that it was possible for the legislatures of the respective states to identify secular aspects of a church-sponsored education and to design restrictions to insure that the state aid would benefit only the secular. The Court did not decide, however, whether the specific safeguards in the Pennsylvania and Rhode Island programs were sufficient to meet the primary effect test. Instead the Court condemned the programs because of the intrusiveness of the safeguards into the church-sponsored school: "This kind of state inspection and evaluation of the religious content of a religious organization is fraught with the sort of entanglement that the Constitution forbids. It is a relationship pregnant with dangers of excessive government direction of church schools and hence of churches."[53]

If meaningful assistance to the nonpublic educational sector appeared dead as a result of the *Lemon* decision, *Committee for Public Education v. Nyquist*[54] seemed to complete the process and seal the coffin. The Supreme Court in *Nyquist* declared unconstitutional, as violative of the establishment clause, direct grants to nonpublic schools for maintenance and repair of school facilities and equipment, tuition reimbursement to low income parents of children attending nonpublic schools, and income tax relief to all such parents. On the same day as *Nyquist*, the Court also announced *Sloan v. Lemon*,[55] which declared Pennsylvania's parental reimbursement

grants unconstitutional, and *Levitt v. Committee for Public Education*,[56] which declared unconstitutional the New York statute providing state reimbursement to nonpublic schools for testing and record-keeping. The cumulative impact of these decisions and that in *Lemon v. Kurtzman* was to place those who would seek to draft legislation providing nonpublic school assistance on the horns of a dilemma. If they included safeguards and procedures to insure that the assistance was limited to the secular aspects of nonpublic education, the restrictions would be classified as prophylactic contacts involving excessive government entanglement with religion. If the restrictions were removed, the program would fail because of the absence of assurance against advancement of religion.

Program safeguards and regulations were not the only kinds of church-state "entanglements" envisioned by the Court. In addition it saw a danger of "political divisiveness"[57] arising from the natural inclination of nonpublic schools to lobby in the legislatures for additional funds. Although he recognized that political debate and differences are normal and healthy manifestations of the democratic system of government, Chief Justice Burger declared that political division along religious lines was "one of the principal evils against which the First Amendment was intended to protect."[58] This test seemed based upon the assumption that as more assistance became available to nonpublic education, a greater demand would arise, and this demand would inevitably lead to political division along religious lines.

The negative attitude of the Supreme Court towards the "self-perpetuating and self-expanding propensities"[59] of state assistance to pupils at church-related educational institutions is reflected in Chief Justice Burger's belief that "[a] certain momentum develops in constitutional theory, and it can be a 'downhill thrust' easily set in motion but difficult to retard or stop."[60] The Court was obviously alarmed at the rapid step from *Allen* to *Lemon* and *DiCenso*. It was willing to allow bus rides and textbooks, but saw the prospect of much broader scale assistance when it looked at the teacher salary supplement program in *DiCenso* and the educational contract program in *Lemon*. The momentum was too much; the Court refused to adopt the philosophy of Justice Harlan that "[i]t is always possible to shrink from a first step lest the momentum will plunge the law into pitfalls

56 413 U.S. 472 (1973)

60 *Id.*

that lie in the trail ahead. I, for one, however, do not believe that a 'slippery slope' is necessarily without a constitutional toehold."[61]

The repressive constitutional doctrine that was based on a fear of political divisiveness was spawned by the Court during its "momentum blocking" stage of development. Chief Justice Burger's enunciation of this doctrine in *Lemon* was surprising, if not shocking, in view of fact that just one year earlier in *Walz*, he had espoused the right of religious organizations and churches to take strong positions on public issues without the slightest suggestion that this would disqualify their adherents from participating in public benefits. The Chief Justice had written:

> Adherents of particular faiths and individual churches frequently take strong positions on public issues including, as this case reveals in the several briefs *amici*, vigorous advocacy of legal or constitutional positions. Of course, churches as much as secular bodies and private citizens have that right. No perfect or absolute separation is really possible; the very existence of the Religion Clauses is an involvement of sorts—one that seeks to mark boundaries to avoid excessive entanglement.[62]

It is perhaps understandable that the Court was concerned by the momentum that had gathered between *Allen* and *Lemon*; it is unfortunate, however, that the response between 1971 and 1975 was a series of case-by-case compromises rather than the development of constitutional principles of more lasting guidance. Beginning in 1971, the Court began a cut and paste process in deciding how far the program could proceed without reaching the verge of forbidden territory under the religion clauses. It refused to accept the invitation of opponents of such educational programs to declare them all violative of the establishment clause. On the other hand, there seemed to be no logical basis for distinguishing one program from the other. Sweeping utterances, seemingly clear in one case, had to be altered to meet the Court's attitudes concerning the verge of forbidden territory in another. This seemed the result of judicial legislation. It was in recognition of these problems that Justice Rehnquist in his dissent in *Committee for Public Education v. Nyquist* noted that "[w]ithin the limits permitted by the Constitution, these decisions are quite rightly hammered out on the legislative anvil."[63]

Additional doctrines were developed by the Court that had the effect of further emasculating the theoretical underpinnings of *Allen*. The acceptance of dual and separable secular and religious roles in nonpublic education was replaced with a presumption that these are

"religious-pervasive institutions,"[64] and that aid to the secular functions of the schools cannot be separated from the religious functions. Justice Stewart, writing for the majority in a later case, concluded:

> [I]t would simply ignore reality to attempt to separate secular educational functions from the predominantly religious role performed by many of Pennsylvania's church-related elementary and secondary schools and to then characterize Act 195 as channeling aid to the secular without providing direct aid to the sectarian. Even though earmarked for secular purposes, "when it flows to an institution in which religion is so pervasive that a substantial portion of its functions are subsumed in the religious mission," state aid has the impermissible primary effect of advancing religion.[65]

V. Dissenters' Reaction to the Harsh Impact of *Lemon* and *Nyquist*

The dissenting opinion of Chief Justice Burger in *Nyquist* reveals that the entanglement test, which he set forth in *Walz* and expanded in *Lemon*, had in *Nyquist* gone much further than he had anticipated. It was being utilized to bar forms of assistance that he felt provided benefits to children rather than churches and thus met constitutional standards. The tolerant attitude expressed by Chief Justice Burger in his *Nyquist* dissent may very well be attributable to a reconsideration of the potential tensions between the establishment and free exercise clauses. While commenting upon the application of the two clauses the Chief Justice stressed free exercise principles: "[T]he balance between the policies of free exercise and establishment of religion tips in favor of the former when the legislation moves away from direct aid to religious institutions and takes on the character of general aid to individual families."[66] Chief Justice Burger also reflected a different reaction to "momentum blocking" when he noted that "[i]t is no more than simple equity to support partial relief to parents who support the public schools they do not use."[67]

Justice White's dissent in *Nyquist* stated the free exercise argument even more forcibly:

> Under state law these children have a right to a free public education and it would not appear unreasonable if the State, relieved of the expense of educating a child in the public school, contributed to the expense of his education elsewhere. The parents of such children pay taxes, including school taxes. They could receive in return a free education in the public schools. They prefer to send their children, as they have the right

> to do, to nonpublic schools that furnish the satisfactory equivalent of a public school education but also offer subjects or other assumed advantages not available in public schools. Constitutional considerations aside, it would be understandable if a State gave such parents a call on the public treasury up to the amount it would have cost the State to educate the child in public school, or, to put it another way, up to the amount the parents save the State by not sending their children to public school.
>
> In light of the Free Exercise Clause of the First Amendment, this would seem particularly the case where the parent desires his child to attend a school that offers not only secular subjects but religious training as well. A State should put no unnecessary obstacles in the way of religious training for the young. "When the state encourages religious instruction . . . it follows the best of our traditions."[68]

Justice Rehnquist's dissent in *Nyquist* reveals that he likewise would have upheld the tuition reimbursement and tax relief provisions of the New York statute in recognition of the "benevolent neutrality"[69] required in order to reconcile the tension between the free exercise and establishment clauses. His dissent recognized that financial restraints to free exercise exist when nonpublic school parents are compelled to pay for their own children's education as well as support public school services unused by them.

Notwithstanding the Chief Justice's shift in attitude and the strength of the Rehnquist and White dissents, an even more extreme and restrictive application of the tripartite test was made in the 1975 case *Meek v. Pittenger*.[70] *Meek* struck down a program that involved loaning equipment and providing health services to nonpublic schools. It was the culmination of the era of persistent Supreme Court disapproval of state aid to church-sponsored schools. Strangely, though, this disapproval did not extend to state aid to church-sponsored colleges. These cases, by their contrast, illuminate the hostility the Court's majority held toward religious education.

VI. Approval of State Aid in Higher Education Cases: A Religion-Effectiveness Test?

If a lawyer in 1971, after reviewing the *Lemon* opinion, were called upon to opine as to the constitutionality of federal legislation providing grants for the construction of buildings at church-related colleges, the thrust of his opinion would be quite predictable. After reciting the tripartite test, the lawyer would advise that it would be necessary to establish comprehensive restrictions in order to insure that the legislation did not result in advancement of religion. Absent restrictions, the legislation would fail the primary effect test because of the danger that the

68 *Id.* at 814 (White, J., dissenting) (quoting Zorach v. Clauson, 343 U.S. 306, 313-14 (1952))

70 421 U.S. 349 (1975). See notes 77-86 *infra* and accompanying text.

mandated aid could be applied to a sectarian purpose. On the other hand, if the legislation contained adequate restrictions it would fail because of excessive government entanglement with religion. At least this would be the likely content of the opinion if that lawyer had not read *Tilton v. Richardson*,[71] which was announced the same day as *Lemon*. The tests and guiding principles read the same in *Tilton* as in *Lemon*, but the same tests apparently have different meanings when applied at different levels of education.

In sustaining the constitutionality of construction grants to church-related colleges, the Court was impressed by the fact that churches are less successful in the accomplishment of their religious missions in colleges than in elementary or secondary schools: "There is substance to the contention that college students are less impressionable and less susceptible to religious indoctrination."[72] Although many of the church-state cases relating to elementary and secondary education are decided on the basis of an assumed composite profile of church-related schools, the court in *Tilton* rejected that approach: "We cannot . . . strike down an Act of Congress on the basis of a hypothetical 'profile.' "[73] A comparison of *Tilton* and *Lemon* simply confirms the ad hoc approach that has been used by the Court in this area of the law. The Court seems more skeptical of the possibility of religious inculcation in church-related colleges and thus more tolerant of aid programs to them.

After approving federally funded construction grants to church-related colleges in *Tilton*, the Supreme Court next approved a state program for construction of church-related colleges with state-issued, tax-exempt bonds in the case *Hunt v. McNair*.[74] In *Hunt* the state-created authority that issued the bonds would take title to the facility and lease it back to the college, with reconveyance to the college upon full repayment of the bonds. The *Hunt* decision was announced the same day as *Nyquist*. The same words were used in describing the tests but these words again were applied differently. The Court refused to adopt a composite profile of the religious nature of post-secondary institutions and differentiated the colleges from the church-related elementary schools on the basis of the differing religious character of the institutions.

Perhaps the most surprising of all of the recent higher education cases was *Roemer v. Board of Public Works*.[75] The Court upheld a Maryland statute that provided direct annual subsidies to church-re-

71. 403 U.S. 672 (1971).
72. *Id.* at 686.

lated colleges in an amount equal to fifteen percent of the state's expenditure for students in state colleges. The Court again stressed the secular functions of the religious colleges and the religious function of church-related elementary and secondary schools.

Although colleges undoubtedly seek to accomplish their religious goals differently from elementary and secondary schools, it is indeed doubtful that a religious organization would sponsor and administer a church-related college if it did not consider it to be part of its religious mission. It seems obvious that the extent to which a religious organization is able to inculcate religious values or religious doctrine in students attending its colleges varies from college to college. In a recent case a district court in Tennessee observed:

> It should be noted here that the evidence adduced established that some, but not all, of the private schools [colleges] whose students benefitted from this program are operated for religious purposes, with religious requirements for students and faculty and are admittedly permeated with the dogma of the sponsoring religious organization.[76]

The Supreme Court has purportedly refused to use composite profiles in higher education cases, but the truth is that it has used standard profiles in evaluating the nonsectarian nature of colleges, just as it did in cases concerning aid to elementary and secondary schools. It assumes as a general proposition that church-related colleges are not as effective in their religious goals as elementary and secondary schools. Coupled with the Court's assumption that elementary and secondary sectarian schools are "religious-pervasive institutions," this presents a question whether the Court is establishing a preferred religion based on the effectiveness of its mission to inculcate religious values during the education process.

The difficulty with such an analysis is that it acts as a restraint upon the free exercise of religion. Simply put, the test seems to be that an educational institution may receive a share of education tax dollars only if it is ineffective in its religious mission. The trouble with this approach is that it places the Court in the position of making value judgments as to the desirability and effectiveness of religious beliefs and religious missions. The Court found a rationale to justify its compromise, but it may again find that it has entered an extremely uncomfortable thicket. This sort of evaluation of the "religion-effectiveness" of the institutions involved does not represent the neutrality that the free exercise clause requires. When the Court approves direct state aid to a Catholic college but denies a cultural field trip bus ride to a child attending a Jewish grade school it is advancing one form of religious activity and impeding another. Does this approach not establish a

---

76. Americans United for Separation of Church and State v. Blanton, 433 F. Supp. 97, 100 (M.D. Tenn. 1977), *aff'd mem.*, 98 S. Ct. 39 (1977).

Court-preferred method of teaching religion, and place financial obstacles in the way of religious training that does not comply with the Court's preference?

VII. Strangling Entanglement—The Court's Shift from Strict Disapproval to Balancing

It must be recalled that for some time before *Wolman* no state aid to church-related elementary or secondary schools had been approved by the Court. The religion-effectiveness approach that apparently emerged in the higher education cases indicated a hostility of the Court towards effective religious education. The culmination of this period of strict disapproval of elementary and secondary aid came in the case *Meek v. Pittenger*.[77]

In *Meek* the Court was presented with a state program that loaned textbooks and instructional equipment and materials to the schools and provided on-premises health and remedial service to the students. Justice Stewart authored an opinion in *Meek* that brought himself and his fellow swing Justices, Blackmun and Powell, together in a coalition with the three Justices who were then most opposed to state aid to parochial schools—Justices Douglas, Brennan, and Marshall. His effort to state principles that would be guiding or controlling in future litigation, however, proved to be disastrous, as it brought internal tensions within the Court to a high point. Chief Justice Burger's dissent contained a bitter and stinging rebuke, reflecting his conviction that the Court was ignoring the free exercise clause and discriminating against children because of the exercise of religious choice by their parents. He charged that the consequence of the Court's holding was to "penalize *institutions* with a religious affiliation," to "affirmatively stifle . . . religious activity," and to "penalize *children* . . . who have the misfortune to have to cope with the learning process under extraordinarily heavy physical and psychological burdens." According to the Chief Justice, the *Meek* ruling "literally turns the Religion Clauses on their heads."[78]

Insofar as the legislative program in *Meek* provided auxiliary health and remedial services to nonpublic school children on the same basis as public school children, the free exercise implications of excluding the nonpublic school children were apparent. Should a child be denied an inherently secular diagnostic or remedial service simply because his parents had selected a church-related school? The Supreme Court had already held that "no State may 'exclude individual Catholics, Lutherans, Mohammedans, Baptists, Jews, Methodists, Non-believers, Presbyterians, or the members of any other faith, *because of*

77 421 U.S. 349 (1975).

78 *Id.* at 386-87 (Burger, C. J., dissenting).

their faith, or lack of it, from receiving the benefits of public welfare legislation.' "[79] Nevertheless, Justice Stewart stressed the establishment rather than the free exercise clause when he concluded that the services would be provided "in schools in which education is an integral part of the dominant sectarian mission and in which an atmosphere dedicated to the advancement of religious belief is constantly maintained."[80] He found that the state would be required to engage in unconstitutional surveillance to insure that a speech and hearing therapist, hired and controlled by the local public school district, would not sneak religion into speech therapy. It was obviously in response to Chief Justice Burger's stinging rebuke that a footnote to Justice Stewart's opinion[81] indicated that the Court did not challenge the right of the state to make free auxiliary services available to all students in the Commonwealth, including those who attended church-related schools. The footnote, however, failed to specify the constitutionally acceptable mechanism for providing such services to all children.

Meek reaffirmed *Allen* by upholding the constitutional validity of the textbook aid, but declared the supply of instructional material and equipment to be unconstitutional. The Court again justified this result on the basis of the "predominantly religious character of the schools benefiting from the Act."[82] A question arises, however, with respect to this rationale because the Court recognized that the materials and equipment were "self-polic[ing], in that starting as secular, nonideological and neutral, they will not change in use."[83] The Court did not explain how a secular piece of equipment that could not be used for religious purposes would have the primary effect of advancing religion in a church-related school. Neither did it explain how the lending of a secular package of math cards advanced religion when a math textbook containing the same information did not. Justice Rehnquist in his dissent pointed out that "[o]nce it is conceded that no danger of diversion exists, it is difficult to articulate any principled basis upon which to distinguish the two Act 195 programs."[84] The extent to which the entanglement test as enunciated in *Walz* had been expanded in *Meek* led Justice Rehnquist to observe: "[A]ppellees are left to wonder, with good reason, whether the possibility of meeting the entanglement test is now anything more than 'a promise to the ear to be broken to the hope, a teasing illusion like a munificent bequest in a pauper's will.' "[85]

83. *Id.* at 365.

84. *Id.* at 391 (Rehnquist, J., dissenting).

85. *Id.* at 374 (quoting Edwards v. California, 314 U.S. 160, 186 (1941)(Jackson, J., concurring)).

Justice Rehnquist also took the majority to task for "throwing its weight" on the side of those who believe that society as a whole should be secular rather than religious.

> We are a religious people whose institutions presuppose a Supreme Being. We guarantee the freedom to worship as one chooses. We make room for as wide a variety of beliefs and creeds as the spiritual needs of man deem necessary. We sponsor an attitude on the part of government that shows no partiality to any one group and that lets each flourish according to the zeal of its adherents and the appeal of its dogma. When the state encourages religious instruction or cooperates with religious authorities by adjusting the schedule of public events to sectarian needs, it follows the best of our traditions. For it then respects the religious nature of our people and accommodates the public service to their spiritual needs. To hold that it may not would be to find in the Constitution a requirement that the government show a callous indifference to religious groups. That would be preferring those who believe in no religion over those who do believe. Government may not finance religious groups nor undertake religious instruction nor blend secular and sectarian education nor use secular institutions to force one or some religion on any person. But we find no constitutional requirement which makes it necessary for government to be hostile to religion and to throw its weight against efforts to widen the effective scope of religious influence.[86]

Since *Meek* had stretched the entanglement test beyond the breaking point and aggravated the inherent tension between the free exercise and establishment clauses, it was inevitable that a case like *Wolman v. Walter*[87] would follow on its heels. The Ohio legislation before the Court in *Wolman* was drafted for the specific purpose of testing the limits of *Meek*. It was suggested in *Meek* that some of the services may have been constitutional but the Court refused to treat the legislation as being severable.[88] The Ohio legislature sought to avoid having the Court strike down its entire program by enacting twelve separate categories of aid, in separately labeled paragraphs,[89] specifically designated as independent and wholly severable.[90] The Supreme Court acceded to the wishes of the legislature and treated the various aid provisions as severable, sustaining nine sections while rejecting the constitutionality of three.

The *Wolman* Court dealt with the various types of aid in separately numbered portions of its opinion, and not all portions mustered the same majority of the Justices. State aid categories approved by the Court are (1) textbook loans to pupils,[91] (2) standardized testing and

91. Wolman v. Walter, 97 S. Ct. 2593, 2599-2600 (1977) (upheld by six Justices).

scoring,[92] (3) diagnostic services—speech, hearing, and psychological testing—provided on premises by professional employees of the local boards of education,[93] and (4) therapeutic services—speech, hearing, and psychological therapy, and programs for emotionally disturbed and handicapped children—provided off-premises by professional employees of the board of education.[94]

Programs whose constitutionality were rejected are (1) loans to pupils of instructional materials and equipment incapable of diversion to religious use[95] and (2) transportation for field trips that are the same as those provided in public schools.[96]

The Ohio statute sought to test the abuse of free exercise concepts in *Meek* by calling for the remedial educational services, provided to public school pupils, to be provided to nonpublic school pupils either at a public school, a public center, mobile home or a similar neutral site. Services less susceptible to the inculcation of religious beliefs such as health and diagnostic services were to be provided in the nonpublic school. It was difficult for the Court to ignore the free exercise implications of a denial of these services under such circumstances. Would the Court label a nonpublic school pupil as a sectarian citizen even when he was led off the school premises? Would the sectarian badge stand as a barrier to the receipt of secular, neutral, and nonideological services even in public facilities?

The plaintiffs in *Wolman* argued that even when nonpublic school children were off school premises, they were "an identifiable sectarian group," and that aid could not be provided to such a sectarian class. Did such an argument mean that these children were identifiable sectarian children when they went to the movies, when they went to a grocery store, when they participated in dances with other children, or when they went to a public library? The Supreme Court had already rejected programs that provided identical services to church-related school children at their school. The free exercise clause of the first amendment would have become meaningless if the Court had held that children must be denied therapeutic and remedial services by public employees, under control of the local public school district, at public facilities simply because they are registered pupils at church-related schools. Although the Court again passed up the opportunity to speak directly to the tension between the establishment and free exercise clauses, it upheld the constitutional validity of providing educational and therapeutic services at neutral sites and the constitutional

validity of providing health and diagnostic services at the church-related school.

The Court in *Wolman* did not base its decision on free exercise principles, but seemed to adopt Chief Justice Burger's child benefit approach in noting that "[t]he dangers perceived in *Meek* arose from the nature of the institution, not from the nature of the pupils."[97]

VIII. Realignment of the Justices: A More Permissive Approach to Nonpublic School Aid

The *Wolman* decision was the first case since *Allen* in which the Court upheld meaningful assistance to children attending church-related elementary and secondary schools. Since the *Wolman* decision allowed $88,800,000 per biennium to continue to flow under the Ohio plan, it dispelled the notion created by *Meek* that any attempt to provide substantial aid to nonpublic school children would be blocked.[98] Although the $88,800,000 per biennium assistance is of extreme importance to children attending Ohio's nonpublic schools, the long-range implications of *Wolman* in the continuing development of first amendment principles relating to nonpublic school aid are of much greater import. For one thing, the *Wolman* decision suggests that Justice Powell is ready to join the Burger-Rehnquist-White voting block. Justice Powell's concurring opinion in *Wolman* reflects one of the most enlightened views expressed in this troublesome constitutional area.

Justice Powell noted that we have reached a point in the twentieth century far removed from the dangers that prompted the framers to include the establishment clause in the Bill of Rights. He argued that the risk of religious control over democratic processes or deep political divisiveness along religious lines was quite small when viewed against the contributions of the sectarian schools. The following extract from Justice Powell's concurring opinion indicates that *Wolman* does not present the final word, and that properly drafted legislation providing secular assistance to pupils rather than institutions may yet find a receptive court:

> Our decisions in this troubling area draw lines that often must seem arbitrary. No doubt we could achieve greater analytical tidiness if we were to accept the broadest implications of the observation in *Meek* v. *Pittenger* . . . that "[s]ubstantial aid to the educational function of [sectarian] schools . . . necessarily results in aid to the sectarian enterprise as a whole." If we took that course, it would become impossible to sustain state aid of any kind—even if the aid is wholly secular in character and is supplied to the pupils rather than the institutions. *Meek*

97 *Id.* at 2605.

98 *Id.* at 2610 (Brennan, J., dissenting).

> itself would have to be overruled, along with *Board of Education v. Allen*, . . . and even perhaps *Everson v. Board of Education* . . . . The persistent desire of a number of States to find proper means of helping sectarian education to survive would be doomed. This Court has not yet thought that such a harsh result is required by the Establishment Clause. Certainly few would consider it in the public interest.[99]

Justice Powell would have approved field trip transportation under the Ohio program and also a more restricted program of lending instructional materials and equipment to the pupils. This places him very close conceptually to the position advanced by Chief Justice Burger since 1973. Justice Blackmun's opinion for the Court[100] in *Wolman* may also be interpreted as setting the stage for a new approach in the area. It approves programs calling for substantial assistance to elementary and secondary school children, differentiates between children and the religious school they attend, and places greatly reduced stress upon the political divisiveness doctrine.

Those who saw *Wolman* as opening the door to a new and more permissive approach to aid to nonpublic school programs found their view supported by the October 3, 1977 Supreme Court affirmance of *Americans United for the Separation of Church and State v. Blanton*.[101] The legislation challenged in *Blanton* was a Tennessee program of assistance grants for pupils at public and church-related colleges. The three-judge district court sustained the Tennessee legislation on the basis of the child benefit theory promulgated in *Everson* and *Allen*, and on the basis of the "broad class of recipients" theory suggested in *Nyquist*.[102] Thus, precedent was found in the elementary and secondary school cases. Although the three-judge district court in *Blanton* did not specifically address the internal tension between the establishment and free exercise clauses, it noted that the purpose of the Tennessee program was to "provide needy students with the opportunity to attend the higher education institution of their choice, be it public, private, sectarian, or nonsectarian."[103] It also relied to a substantial degree upon the Supreme Court's dismissal of an appeal from a South Carolina decision for want of a substantial federal question. The South Carolina Supreme Court had approved a loan program to students at public and nonpublic colleges.[104] It sustained the legislation on the grounds that it was "scrupulously neutral as between religion and non-religion and as between various religions."[105]

105. *Id.* at 413.

Does the Court's affirmance of *Blanton* mean that legislative programs providing loans, grants, scholarships, vouchers or tax credits to pupils at nonpublic educational institutions will be sustained if (1) such benefits are provided to a broad base of recipients, (2) the grants are to the pupils or their parents and not to the institutions, and (3) the legislative program is scrupulously neutral with respect to religion? Does the fact that Justices Marshall, Brennan, and Stevens would have noted probable jurisdiction in *Blanton* lend support to the theory that Justices Powell, Stewart, and Blackmun are leaning more in the direction of the Burger-Rehnquist-White bloc than in the direction of the Brennan-Marshall-Stevens bloc? The answer to these questions is not yet clear.

IX. Conclusion

Although the United States Supreme Court has now considered constitutional challenges to almost every conceivable form of legislation providing assistance to nonpublic school pupils, it does not appear that the final page has been written. The inherent tension between the free exercise and establishment clauses remains. The slate is "anything but clean" with respect to the criteria to be applied in future cases, but the criteria leave substantial room for "play in the joints" and new developments can be anticipated.

Public school financing is in a state of upheaval. Federal court remedies ordered in racial desegregation cases have caused short-range chaos. Some local school districts are uncertain whether to look to the local property tax, state funding, or the federal courts for resolution of their financial problems. School districts throughout the country are embroiled in litigation challenging the constitutionality of their formulae for public school financing. Public schools and nonpublic schools in some states have joined hands to search for common solutions.

Such joint efforts will undoubtedly look to decisions like *Wolman* for guidance. Public schools may want to move in the direction of per-pupil funding. Nonpublic schools would be well advised to concentrate upon child benefit assistance and upon legislation directed toward a broad class of beneficiaries. Thus, joint solutions for financial problems confronting public and nonpublic schools may lie ahead. Although these educational, financial, and constitutional problems are indeed perplexing, thoughtful scholarship directed toward the internal tensions in the first amendment between the establishment and free exercise clauses may bring a firmly rooted solution.

STATE OF ALASKA
THE LEGISLATURE

POUCH Y STATE CAPITOL
JUNEAU ALASKA 99811

LEGISLATIVE AFFAIRS AGENCY

MEMORANDUM January 24, 1979

SUBJECT: Tuition Tax Credit
(Work Order #5843)

TO: Representative Terry Martin

FROM: Kenneth E. Vassar, Legislative Counsel KEV

Enclosed is the bill you requested allowing taxpayers to take a credit against their state income tax for amounts paid for tuition costs at private schools. As I discussed with you earlier, I believe this is in violation of Article VII, sec. 1, Constitution of the State of Alaska. That section provides in part:

> No money shall be paid from public funds for the direct benefit of any religious or other private educational institution.

It may be questioned whether the allowance of a tax credit is the same as a payment from public funds. Most courts which have faced the issue have found that tax exemptions do constitute such a payment. In considering Article IV, sec. 31, of the California state constitution, which prohibits the appropriation of public money except for a public purpose, the California Supreme Court has held that their constitution prohibits any plan by which the credit of the state is given or loaned, regardless of the form which the transaction takes. Veterans Welfare Board v. Jordan, 208 P. 284 (1922). Another california case found the cancellation of taxes to be a "thing of value" which came within Article IV, sec. 31; so far as procedure was concerned, the act of cancellation was the making of a gift. Ojai v. Chaffee, 140 P.2d 116 (1943). Finally, in Committee for Public Education v. Nyquist, 413 U.S. 756 (1973), the United States Supreme Court discussed New York's programs of tuition grants and tax relief for parents of children attending elementary and secondary nonpublic schools. At 413 U.S. 756, 791, the court stated:

> We see no answer to Judge Hays' dissenting statement below that '[i]n both instances [tuition grants and tax relief] the money involved represents a charge made upon the state for the purpose of religious education.'

In view of these cases, it seems certain that a tax credit is a payment of public funds. The next question under Article VII, sec. 1, is whether the credit would constitute a "direct" benefit to the private schools.

The delegates to Alaska's constitutional convention debated whether to use the phrase "direct or indirect benefit" rather than "direct benefit." The report of the Health, Education and Welfare committee to the convention would indicate that "indirect" benefits were meant to be limited to basic health and welfare benefits, provided to children attending the private schools. In its report, the committee stated:

> We feel that the words 'or indirect' would reach out into infinity practically.....We did feel it would shut out certain things that should not be prohibited. For instance, the welfare department was giving free care to the children of the community and it might be administered through the schools. We feared that 'indirect' would make it impossible to give any of these welfare benefits, for instance to children who were in private schools, and we do not feel that any prohibition should go that far. Alaska Constitutional Convention Proceedings, p.1517.

The decision of the Alaska Supreme Court in Matthews v. Quinton, 362 P.2d 932 (1961), reflects the broad interpretation of "direct" and narrow interpretation of "indirect" implied by the passage above from the constitutional convention. In Matthews, the court found that the expenditure of public funds to provide transportation for students at private elementary and secondary schools constituted a direct benefit to the schools. An interpretation of "direct benefit" consistent with Matthews and the report of the Health, Education and Welfare committee of the convention, would seem to require classifying a tax credit plan which is tied to tuition payments at private schools as a direct benefit to the schools.

Beyond any problem with Alaska's constitution, this bill also suffers from severe federal constitutional problems. The First Amendment to the United States Constitution prohibits laws "respecting an establishment of religion." In Nyquist, supra, the United States Supreme Court stated:

> A proper respect for both the Free Exercise and the Establishment Clauses compels the State to pursue a course of "neutrality" toward religion.....Special tax benefits, however, cannot be squared with the principle of neutrality established by the decisions of this Court. To the contrary, insofar as such benefits render assistance to parents who send their children to sectarian schools, their purpose and inevitable effect are to aid and advance those religious institutions. 413 U.S. at 793.

In summary, it is quite likely that this bill would be found unconstitutional, whether decided under the state or federal constitution.

Dear Sir;

In support of your legislation to again control Marijuana I am sending you a note I found and removed from my fourteen year old daughter. She is a high school student here in Fairbanks. The letter should speak for itself.

I checked into the matter and it seems that [illegible] is a problem at [illegible] schools.

At a few drinks in my accident prone days I was the [illegible] but when it starts affecting my family or [illegible] the decision for [illegible] I am of a persuasion should be ignored. Common sense would indicate that the substance [illegible] has been for the private use of [illegible] but [illegible] problem in our schools.

[illegible] the matter and recommend actions [illegible] that should be [illegible]

the lives that drugs have ruined. Have spent fifteen years in various prisons. My knowledge is first hand, not something I've read.

I appeal to you and the legislators of Alaska. Give our children a chance and let police officials deal with this problem before it gets completly out of hand.

Respectfully

Allan J. Hoth
Beulah M Hoth

Hey Whats up Charbee!

Hey I was buzzing but that was it I wasn't really really stoned cause I've been smoking it and alot of it lately.

I am gonna take a couple ~~[illegible]~~ tranquilizers that will fuck me up alot. I am feeling 2 for a bud.

Shit so many people are following me now cause I finally get web and they don't get home. Shit when I don't have home they don't get me flight or give my speed so I am just getting people high that are cool like you and Sonny, Kelly, Michelle you guys are cool!

Well I'll write you back after you write me back Charbee?

I'll probably get you high again soon

Your friend always Beth

Hit me up when you want to.

Ordered. md.

The Anchorage Times, Thursday, December 14, 1978

Drug Confiscations Low

This is another in a series of stories on the local drug scene.

By PATTI DePRIEST
Times Staff Writer

Drug enforcement officials here last year seized a variety of drugs, worth about $1.8 million dollars on the street.

But that's only about 5 percent of the total drug sales in Alaska, they say, estimating about $35 million worth of drugs were sold to Alaskan buyers.

Marijuana and cocaine were the most prevalent in investigations and seizures. Marijuana seizures totaled $836,704 in street value with cocaine coming to $816,600, said Alaska State Trooper Joe Turner. A 12-year veteran of narcotics investigations, Turner coordinates statewide operations.

Drug enforcement officials arrived at those figures by estimating marijuana at $20 per ounce and cocaine at $100 per gram, Turner said. Some 2,614 pounds of marijuana were seized and 8,166 grams — about 300 ounces — of cocaine.

Although drug buyers and dealers agree cocaine sells for about $100 an ounce on the Anchorage market, they disagree with the $20 per ounce figure for marijuana, placing an average per ounce price at about $45. At $45, the street value of marijuana seized would more than double.

Amphetamines, known as speed on the street market, resulted in the seizure of 18,550 tablets, Turner said.

Other drugs seized included LSD, hashish and heroin, he said.

Most of the marijuana sold in Alaska comes from Mexico and South America, with some coming in from Hawaii, Turner and Donald Trudeau, head of the Anchorage Metropolitan Drug Enforcement Unit, said.

And another narcotics investigator said Seattle, California and Ore-

(See Page 4, Col. 1)

Police Cite Variety Of Drugs

(Continued from Page 1)

gon are major shipping points for Alaska-bound drugs.

The largest shipment of marijuana seized in Alaska was 1,100 pounds with an additional 600 pounds found at the residence of the suspect, Trudeau said.

In Anchorage, drugs find their way into the city through a number of entry points including the airport, persons driving up the Alaska Highway, trucking companies, air freight companies, the Anchorage port and the U.S. mail, the investigators said.

In Southeastern Alaska, investigators must contend with the ferry system and fishing boats as well, while in Fairbanks most drugs are flown or driven in, they said.

Customs officials seize drugs at the Alaska border, although they, too, estimate only about 5 percent of the drugs brought in are confiscated. There are no customs checks for air travelers.

The heroin problem has been dropping steadily in the last few years because of a crackdown by federal officials. It is "extremely hard to come by" and is limited to certain groups in Anchorage, Turner said, while the quality and percentage of heroin has dropped.

One state-funded study of heroin in Alaska estimated Anchorage to have about 700 heroin addicts in 1977.

But since addicts cannot find heroin of a high enough quality to keep their habit going, they have recently turned to the use of pharmaceutical drugs such as Percodan or morphine-based drugs, drug treatment counselors and police officials said.

For marijuana users, pot is easier to come by since it is legal to grow pot for personal use in Alaska. However, the majority of marijuana sold in Alaska is not homegrown but a brand known as Colombian which is exported from that South American country, investigators said.

One reason, Trudeau said, is that stronger marijuana is grown in other countries. Seeds from those plants may be grown in Alaska but after two or three seasons, the marijuana adopts the genes of the Alaska variety which is not as potent, he said.

The investigators said they think there is a definite drug problem in the schools and among young people. "They normally run to the lower end of the money scale or some medium price range," Trudeau said, because youths generally do not have as much money to spend on drugs.

Where do young people get their drug money? "Some have legitimate jobs, of course," Trudeau said, "But some get it by shoplifting and burglaries then selling the merchandise or by dealing other drugs. Some kids get an allowance."

The investigators said they have found dealers who sell only to juveniles and have found some young adults — "drop outs" — who hang around the schools and deal to the students. "But there is no tight, organized group working the schools that I've been able to find," Trudeau said.

Law enforcement officials uniformly cite what they think are lax drug laws as being one cause for their enforcement problems. In fact, they said, they have stopped prosecuting "small-time" marijuana possessors and try to get to the larger dealers.

Additionally, a recent Alaska Supreme Court decision that prohibts electronic "bugging" of suspects without a search warrant has hindered drug investigations, Turner and Trudeau said.

That decision, said Turner, "will hurt law enforcement in Alaska more than any other decision we've ever been hit with."

Elected pope in 752, Stephen died three days later.

Drug Hearing Is Postponed

VICTORIA, B.C. (AP) — A preliminary hearing for 17 persons charged with conspiracy to import 13 tons of marijuana into Canada has been adjourned to Jan. 4.

The hearing, which began Nov. 20 in Provincial Court, was expected to last six weeks.

On Wednesday, Judge Reg Moir refused to deal with an application by one of the defendants, Robert Sherman Miller, 34, of North Vancouver, for the return of the vessels Sunfish and Weatherly.

The vessels were seized by Royal Canadian Mounted Police in connection with a July 15 raid off the west coast of Vancouver Island near Tofino.

Marijuana: No Small-Time Operation

Gone are the counterculture days of the 1960s when marijuana dealers had long-hair, wore dirty bluejeans and drove dented vans.

And gone are the days when 100 pounds of marijuana was considered a "big deal."

Enter the new look and the bigger deal.

According to an investigative article in the November issue of Penthouse magazine, organized syndicates assisted by attorneys and accountants use trailer trucks, large multi-engine aircaft and ocean freighters to deliver at least 45,000 pounds of marijuana each day to the United States.

The business netted $12 billion retail last year, compared to a $15.8 billion cigarette market and a $7 billion beer business, writer Ed Rasen reported in Penthouse.

And Peter Bensinger, administrator of the Drug Enforcement Administration, puts the figure even higher. In a September speech to the International Association of Chiefs of Police in New York City, Bensinger said, "The money to be made is awesome, we estimate in excess of $15 billion.

"So far this year, in marijuana alone, we have seized over 2,000 tons, more than the total amount seized in the last three years combined."

Rasen, in the Penthouse article, said the "hippy dope dealers" of the 1960's have been replaced by "hip businessmen who sport short-hair, three-piece suits and college degrees."

"The new breed of traffickers are young, intelligent and upper middle class. They operate outside traditional crime families and ghetto areas, though, by any standard, large scale marijuana suggling can be considered organized crime."

"The typical new dope businessman is an attorney," Rasen said. He quotes a Miami drug enforcment official as saying large suggling operations have lawyers who provide them "with all the advice they need to operate."

"As marijuana dealing becomes a white-collar crime, the point of entry and country of origin are also changing," Rasen said. "Most grass used to come from Mexico by light plane, truck or car across the 2,000-mile Southwestern border. Now it's coming increasingly from Colombia and it's new point of entry is South Florida."

Rasen said one "marijuana broker" told him large deals are no longer cash transctions and there are no "hand-to-hand transfers."

"Now offshore corporations are formed and accounts are opened at banks in tax havens," Rasen said. "The funds are placed in escrow with release powers placed in the hands of bankers or trustees; they are governed by contracts written by attorneys. Then the monies are drawn back through holding companies which filter them through other banks to offshore corporations."

COACH QUITS—Citing drug prevalence, West Anchorage High School football coach Don Larson resigned Thursday. Larson says 60 to 75 per cent of his team uses drugs on a regular basis. *(AP wirephoto)*

Drug issue forces West coach to quit

ANCHORAGE, Alaska (AP)—A high school football coach has quit, saying he cannot coach a team infected by drugs and alcohol.

"Drug use has infected our schools and society. Its use extends from our elementary schools to a former school board member. I can't accept the fact that it has crept into our football program," said West Anchorage High School Coach Don Larson in a letter of resignation.

Larson said he discovered that players smoked marijuana at lunch, before practice and after games. "I just can't handle this sort of thing," he said.

School district officials denied drug use was a problem, but Larson, who led his teams to 11 winning seasons, said 60 to 75 percent of the varsity team used drugs "on a weekly basis during the season."

After accepting Larson's resignaton Friday "with regret," the district said it would investigate the coach's charges.

"I am resigning, not because of something as trivial as a won-lost record, but because my attitude toward our next year's team would be one of mistrust and suspicion," said Larson.

"The number one thing I want to develop in a football player is a positive attitude, and I can't coach when I have lost mine."

Alcohol and marijuana were most commonly used, he said, but "I've been told cocaine, PCP (Angel Dust) and Quaaludes" are used.

"After discussions with 11 players, ranging from 10th through 12th grade, I have drawn the conclusion that the use of drugs is too prevalent for my continuation as a football coach," Larson said in his letter to Principal Larry Graham.

"I cannot compromise my personal beliefs and principles on what I feel an athlete should be," the coach added.

Larson's teams have compiled the best overall record in the local Cook Inlet Conference over the past nine years, and his 34-member 1978 team finished second in the conference with a 5-2 record.

Graham said school officials initially did not accept the coach's resignation, hoping he would change his mind.

"There is no widespread use of drugs in the Anchorage School District," said school Superintendent John Peper.

"Sure, kids may smoke out in the woods, but there aren't any drugs on the school grounds," said district information officer Bill Blessington.

Anchorage police disagree, however. "If they don't think drugs are in the school, they're blind," said an Anchorage Metropolitan Drug Enforcement Unit official. "Kids have told me any drugs you want are in the schools."

ALASKA PEACE OFFICERS ASSOCIATION

February 6, 1979

Senator Glenn Hackney
Pouch "V"
Juneau, Alaska 99811

Dear Senator Hackney:

In response to your message informing me of the Hess Meeting on SB 49, I sincerely appreciate your keeping me informed of this Hearing. Unfortunately, I will not be able to attend; however, I am attempting to locate an APOA member that can make the meeting and testify on behalf of the Alaska Peace Officers Association.

Aside from being the President of the Alaska Peace Officers Association, I am a Detective with the Fairbanks Police Department and Supervisor of the Areawide Narcotics Team.

Just today, officers under my supervision were successful in obtaining a Grand Jury indictment for an individual that has been a Marijuana dealer in the Fairbanks area for a large number of years. During the Grand Jury proceedings, a young man, eighteen years old, testified to having assisted the Areawide Narcotics Team in purchasing Marijuana from this dealer and obtaining needed information for a search warrant. During his testimony, a Grand Jury member asked the young man why he was motivated to help the police. The young man stated that he could see that the use of Marijuana was ruining his life and that since he had been using Marijuana, he found himself to be lazy and run-down.

Approximately three weeks ago, a Mr. Joe Hergenreter, of 515 7th Avenue, Fairbanks, Alaska 99701, came to my office and reported that his seven and nine year old sons were using Marijuana. He reported that they were getting the Marijuana from a nine year old neighbor boy whose parents permitted the use of Marijuana. I explained the difficulty in prosecuting any violations under these circumstances to Mr. Hergenreter. As you can see, there would be no effective way to handle this case without the involvement of Mr. Hergenreter and his two sons. Mr. Hergenreter may, himself, be willing to assist by testifying; however, he was not willing to subject his children to court proceedings. As you can see, an attempt to investigate and prosecute either the nine year old neighbor boy or his parents would become a "bucket of worms" and I am not sure that we could ever reach a court proceeding at all.

About a week prior to Mr. Hergenreter's report, I had conversation with a person whose name I have forgotten; however, he is the owner of the Giant Grinder restaurants here in Fairbanks. He reported to me that his thirteen year old daughter was getting Marijuana at school and from a young man in the neighborhood. I explained the necessity for a statement from his daughter in an effort to obtain information that would allow us to prosecute or obtain a search warrant for this individual's residence. After a lengthy explanation of the requirements of the police, this individual was ready to take care of matters himself.

These types of complaints are very common and there is little that the police can do to assist in these frustrating situations. It is disheartening to have to inform parents that there is very little that can be done without statements from juveniles and a lengthy court process.

Our statistics on the use of Marijuana in the schools is limited because we have no means of monitoring the activities in the schools. Our officers are too old to fit in or around schools. Most surveillance efforts are useless as officers in the areas are soon detected. As a practical matter, very few cases that involve juveniles are prosecuted through the District Attorney's Office. It is required that most juvenile offenses are handled through the Juvenile Intake Office and in many cases, there is no actual criminal prosecution. In the event that there can be some sort of criminal prosecution on the part of the juvenile, there is a low priority with reference to Marijuana cases where juveniles are involved in the District Attorney's Office. There may be some prosecution, should we be involved, with an adult selling to juveniles however.

I understand the District Attorney's position in these matters as it is my experience that my office can provide felony cases involving the sale of Cocaine and Heroin involving adults with very little difficulty. It has been my experience that the Areawide Narcotics Team has effectively clogged the court calendar on numerous occasions in the last four years.

The decriminalization of Marijuana in 1975 has finally had an effect on the populace. It can be observed that there is a definite problem within the school systems because of this decriminalization. It is evident by the problem in the Anchorage area where the football coach quit because of the students involved in drugs in that school. I have recently heard, while in Juneau, legislators making the comment that this situation had been blown out of proportion and that they are taking an adverse reaction to the publicity that has been raised. It is my opinion that these particular individuals are irresponsible and it is a shame that they are representing people of Alaska in their positions as legislators.

Prior to the decriminalization of Marijuana, a different set of circumstances existed concerning the involvement of juveniles with alcohol. During school hours, if a juvenile was involved with alcohol, it could be more easily detected than the use of Marijuana today. The individual who was intoxicated by alcohol could be identified by his particular actions and the strong odor of alcohol itself. It was also difficult to consume alcohol in the lavatories or other areas on the school grounds as the alcohol was not quite as easily concealed. Today, however, a "joint" of Marijuana or Marijuana cigarette can be easily concealed and quickly digested during a brief class break.

I feel that it is reasonable to assume that if Cocaine was decriminalized, it would be as prevalent in the schools as Marijuana is today. We already have a problem with Cocaine in our schools. I feel that the public is finally concerned that an action like this might happen. You should be aware that in the Supreme Court Decision in the Erickson Case, the Supreme Court suggested that the legislature take a closer look at the classification of Cocaine as there were some types of new scientific information that might lead one to believe that Cocaine was not as harmful as originally thought. I would submit that this was an irresponsible opinion by the Supreme Court in this matter. Once reading the Opinion, it is evident that the Supreme Court went beyond its duties of interpreting the law, but rather it suggested some liberal change in the law. It is also evident that the Supreme Court selected the scientists that would come up with findings that would satisfy the position they would like to take.

I believe that as time goes on, we will see that the Supreme Court will continue to circumvent the legislature and, therefore, continue the liberal decay in our criminal justice system.

Needless to say, I support SB 49 and any other legislation that would strictly prohibit possession of Marijuana. It would be appreciated if you would disseminate this letter amongst your colleagues. If I can be of any further assistance concerning this matter, please contact me and I will attempt to provide you with the necessary information.

Sincerely,

Craig A. Forster

Craig A. Forster, President
Alaska Peace Officers Association

Fairbanks, Alaska 99701

Board members ponder pot law

A resolution proposing that Alaska's marijuana possession law be tightened did not pass, but Alaskan school board members have expressed their concern about growing drug and alcohol abuse among youngsters.

The Association of Alaska School Board members voted on a variety of resolutions during their conference Sunday in Fairbanks.

Originally a proposed resolution urged the Legislature to make illegal all sale, use or possession of marijuana. State law provides a civil penalty for possessing up to one ounce in public.

While members supported resolutions expressing AASB concern over drug and alcohol abuse, the change in marijuana laws was controversial.

Opponents said supporters were "moralizing" on that stand, and after a lengthy discussion the resolution was amended to drop the phrasing. Members from villages expressed concern about growing marijuana use in their areas.

In final form, the AASB "urges the Legislature to consider all possible means to reduce and eliminate drug and alcohol abuse particularly as it relates to schools."

Other resolutions include:

• Urging the Legislature to state that borough assemblies have no powers with respect to education except those granted by statute.

• Supporting school board elections at-large rather than by district.

• Continued opposition to binding arbitration with teachers.

• Asking that workman's compensation laws exclude as cumulative injury claims ulcers, hypertension and heart-related diseases and nervous conditions.

• Asking the Legislature to more clearly define the process for recalling school board members, to include misconduct, incompetence and failure to perform as reasons for recall and to outline a procedure for the accused to respond.

• Supporting full state funding for busing and pupil transportation.

• Supporting a change in the state's formula for giving money to school districts and increasing those funds.

• Continued opposition to giving unemployment compensation benefits to professional and non-professional employees during the summer.

• Urging that teacher tenure in Alaska be increased from two years to three years.

• Asking the Department of Education to investigate self-insurance on a district-sharing basis or other alternatives to the increasing costs of insurance.

• Asking the department to train teachers of gifted students.

• Supporting a 30-day grace period for students to show proof or receive immunizations.

• Urging that general equivalency degree applicants be at least 18 years old and out of school at least six months. Applicants now must be at least 17.

Daily News-Miner, Fairbanks, Alaska, Friday, Dec. 15, 1978—23

Coacl. respected

2577 Riverview Drive
Fairbanks, Alaska
Dec. 12, 1978

Dear Editor,

I recently read that the football coach of West Anchorage High School presented his letter of resignation to the district school board.

I, for one, am very proud of this man who is a very successful coach and who led his team to 11 winning seasons, yet is willing to give up a successful coaching job to point out to his school district and to the public that they have a serious drug problem in their school system.

He will not compromise his personal beliefs and principles regarding his athletes and is willing to resign. The only reply from the school superintendent, John Peper, is that there is no widespread use of drugs. Perhaps this would be an appropriate answer to protect his position and to take the heat from the district that might be generated from the parents, who just might wake up long enough to say "What's going on?" or "Why didn't someone tell us?"

Well, you have been told by a man who is willing to sacrifice his job for you!

No, either tell Superintendent John Peper, District Information Officer Bill Blessington and Principal Larry Graham to wake up and do their job along with the Anchorage School District or make some job changes. At first glance, I would send them packing because if you deny without considering the possibilities of a drug problem, then you are no use to anyone.

Parents, you are the ones to suffer along with your children. Don't let Coach Larson's sacrifice go for naught. It might be wise for our own school district to consider the possibilities of a drug problem. We might not have a person willing to sacrifice his job to tell the parents and public this fact.

Paul J. Wagner

Letters To The Editor

Coach Larson

Dear Editor:

Concerned ' parents here in Anchorage owe congratulations and thanks to Don Larson of West High. Because of his admirable dedication to atheletic purity, a vicious, and heretofore latent cancer has been exposed. It is high time somebody stood up against those, young and adult, who in their sordid quest for a dollar, willingly savage the lives of our young people.

I played football under Coach Larson for three years at West and I am well aware of his outstanding contribution to the positive growth of so many young men. However, if he is convinced that drug use is pervasive among his atheletes, then I support his decision to resign 100 percent. I'm convinced Larson's suspicious are accurate, having seen and heard much to support them.

Just as I am proud of Don Larson, I am disappointed with Superintendent Peper. The single fact that Dr. Peper has the utter audacity to imply that, by some stretch of the imagination, Larson has acted improperly, outrages my sense of ethics and fair play. In no way did Larson solicit the publicity his letter of resignation received. I know for a fact that it not been fo .he sensitive ear of a Times reporter, the reasons behind Larson's resignation might have gone unpublished.

Our school administration should thank Don Larson and do some serious soul searching in this matter. We need no-nonsense action, not defensive recrimination. Finally, we need coaches like Don Larson to help guide our young people.

John B. Thorsness

The Anchorage Times welcomes letters from its readers on issues of the day. Letters must be exclusively addressed to the Anchorage Times and should be kept as brief as possible. All letters are subject to condensation. They must include signature and valid mailing address.

Cocaine may remain an issue

AP News Analysis

JUNEAU—When Gov. Jay Hammond bowed to growing political pressure and withdrew his proposal for revising Alaska's drug laws, many members of the Legislature breathed a sigh of relief.

Most had concluded that the bill, which would have lowered the penalty for first-time possession of small amounts of cocaine from a felony to a misdemeanor, was too sensitive of an issue to tackle during the current election-year session.

However, Friday's state Supreme Court decision upholding the constitutionality of Alaska's cocaine laws raised the prospect of renewed debate on the whole drug question, including a fresh attack on a 1975 law legalizing the possession of marijuana in the home.

While holding that the Legislature was within its constitutional rights to outlaw possession of cocaine, the high court took an unusual step in urging state lawmakers to take a fresh new look at the issue.

In a caveat at the end of a 65-page opinion written by Chief Justice Robert Boochever, the justices said that despite their unanimous decision "we do recommend that the Legislature review its treatment of cocaine in light of modern scientific evidence."

"In our analysis," the court said, "we have emphasized the harmful effects of the drug, as we endeavored to ascertain whether the legislation could be sustained.

"Our overall impression is that cocaine as presently used is less harmful to the health and welfare of society than opiates (such as heroin) and also may be less harmful than barbitrates and amphetamines, alcohol and, as to the physical harm, tobacco."

Daniel Hickey, the Department of Law's chief prosecutor, called the Supreme Court recommendation a "fairly strong statement for an appeals court" and "somewhat unusual in a criminal case."

"Every now and then you see a court express dissatisfaction on some state of affairs, but note that, as a matter of law, what they are concerned about is not something they cannot get involved in," Hickey said.

"That was our position throughout the entire matter," Hickey said. "The issue was not a judicial question but a matter of social policy."

Some House and Senate leaders reacted quickly to the decision, doubting the Supreme Court recommendation would prompt the Legislature to action. Others were reluctant to even discuss the issue.

"I think we'll follow the governor's lead and drop the whole thing," said Rep. Terry Gardiner, D-Ketchikan and chairman of the House Judiciary Committee. "I think most legislators agree."

In the Senate, Judiciary Chairman George Hohman, D-Bethel, dismissed questions about the likelihood of legislative action on the high court recommendation with the observation that: "I'm not in a position to say one way or another."

Some legislators, however, said they were anxious to raise the drug issue again, but not along the lines suggested by the Supreme Court.

Rep. Ed Dankworth, R-Anchorage, said he was preparing legislation in cooperation with the Alaska Police Officers Association for a wholesale revision of the state's drug laws.

"It's designed to put us back in the drug enforcement business," said Dankworth, a former head of the Alaska State Troopers.

Seldovia Considers Toughening Drug Laws

By DON HUNTER
Times Staff Writer

Seldovia city officials, concerned about reports of increased marijuana use among school-aged children, are looking into ways to strengthen local laws.

Acting on suggestions from police chief Gary Gunkel, the Seldovia City Council Wednesday appropriated $400 for a legal opinion on the chances for enacting local laws to better control the substance.

Gunkel argues that Seldovia's problem is rooted in state laws which make possession of up to one ounce of marijuana a misdemeanor punishable by a civil fine. And the state Supreme Cou . has ruled that possession of marijuana for personal use in the home is legal.

Some Seldovia residents grow marijuana plants in their greenhouses, which are burglarized by youngsters, Gunkel says.

The police chief believes that as many as "90 percent" of the school-age children "from the sixth grade on up" have at least experimented with the drug.

Gunkel feels that stricter local laws may be the answer.

At least one member of the city council disagrees, however. City Councilwoman Cheryl Reynolds says better education on drugs and drug use may be a better route.

Mrs. Reynolds cast the dissenting vote in the council's 4-1 decision to make the appropriation.

"Really, I feel quite mixed" about the police chief's argument, Mrs. Reynolds said. "I feel we're getting very emotional about an issue we should stay objective about.

"I don't think it is as serious as some people think," she said. "I haven't seen a major dr. g problem since I've been here." Gunkel's statistics are in her opinion "far out of line."

"Approaching it in a manner of making it illegal" may end up making criminals of people who really aren't criminals, Mrs. Reynolds said.

Council member Billy Kaho said Gunkel's report "was a bit of a shock to me."

The police chief "has come to the council three consecutive weeks" with reports of drug problems including "not only marijuana but also cocaine and other hard drugs," she said.

Mrs. Kaho compares the question of harsher local drug laws to the hours bars are allowed to stay open. State laws allow bars to stay open until 5 a.m., she said, but Seldovia's local laws require them to close at midnight.

She said the drug issue is a community concern, at least among her friends.

"I took a poll of my particular friends and they're scared to dea th for their kids," she said.

Hammond Changes On 'Grass' Stance

The Anchorage Times

This is another in a series of interviews with Alaska gubernatorial candidates and their stances on the state issues.

By RAY TYSON
Times Staff Writer

If he could do it over again, Gov. Jay Hammond says he would veto the liberal marijuana bill he let pass into law three years ago.

And, the incumbent Republican candidate for governor agrees with the Anchorage Parent-Teacher Association that proposed drug bills — one of which would make stiffer penalties for pushers — lack political support among lawmakers.

"Let me say that I have been disturbed over that same lack of action to date," Hammond said.

The parents' group was among eight organizations which submitted questions to the Anchorage Times for gubernatorial candidates.

The other organizations with specific concerns are the Alaska Bar Association, Older Persons Action Group, Anchorage Chamber of Commerce, Alaska Peace Officers Association and the Alaska Black Caucus.

"In regard to whatever drug abuse you're talking about, be it alcohol or other types of narcotics, I think there should be swift justice," Hammond said. "I don't care whether it is the bootlegger in the village or the guy who's hawking cocaine or smack on the street corner."

Hammond came under public criticism in 1975 when he declined to veto a legislative bill "decriminalizing" possession of marijuana. The law reduced the penalty for possession from a felony to a civil offense.

The Alaska Supreme Court later ruled the constitution guaranteed a person's right to smoke pot in the privacy of his home. Hammond suggested the public mistook that to mean the Legislature and governor "legalized" marijuana.

"They (public) feel the current status quo is the result of legislative action," Hammond said. "Not so. The Legislature still had the use of marijuana (being) illegal.

"In other circumstances it prescribed civil penalties in those instances of private use and possession of a small quantity — but (it was) still illegal.

"Had I vetoed that bill you would have removed any question as to whether the state law accommodated private use of marijuana...because we would have had nothing in the statutes even suggesting it was a civil penalty. The veto would have further liberalized it."

Hammond also has said he felt obligated to support the pot bill because the Legislature made every amendment to the legislation he suggested.

(See Page 3, Col. 1)

community organizations.

Do you support Sen. John Huber's amendment to have judges and attorneys general elected? — Alaska Bar Association.

"At one time I thought this might have some merit," Hammond said. "But I do not favor it. It seems you would further politicize (the situation).

"In many states which have had election (of attorneys general). . . . there has been a conflicting posture," where the attorney general competes with the governor for high office.

But Hammond suggested he would support placing an initiative on the ballot asking voters whether they support election of judges and attorneys general.

"I am a great supporter of the initiative process," Hammond said. "An initiative advisory would be helpful. I would welcome one."

Hammond said he personally supports the current system of selecting judges based on the lawyers' poll.

The poll provides the Judicial Council with possible candidates for judgeships. The nominees are submitted to the governor who makes

"Extreme demands would be immediately rejected by the electorate. How can someone from New York tell whether or not...the administration or school teacher or electorate will be impacted?"

Representatives of the collective bargaining unit, administration and the general public could serve on an arbitration panel, the governor said. The panel would take the last, best offer of each side and then draft a final package to be submitted to the voters.

But Hammond said public employees should be guaranteed certain basics, such as cost of living adjustments, before the issue goes on the ballot.

"I'm not saying this (arbitration) should be done," Hammond said. "But the question should be conveyed to the public."

The teachers' group also asked whether gubernatorial candidates favored 100 percent state funding of school operations and 80 percent funding of school construction.

"I introduced the bill for 80 percent funding," Hammond said. "As far as 100 percent funding, you bet I support it. It's constitutionally man-

Group.

Hammond said he supports such state financed aid programs for Alaska's elderly "because most older persons groups I've spoken to agree such is the case."

Hammond said he has built five times more residential housing for the elderly than any administration since statehood and has bolstered nutrition programs.

And since he took office nearly four years ago, the governor said six multi-purpose senior centers have been built. He said he hopes to keep the pace up.

"My concern is that we have appropriate funds to provide for whatever programs," Hammond said. "I'm certainly willing to provide the services as long as we have the funds."

What is your position on repeal of the state business license gross receipts tax? — Anchorage Chamber of Commerce.

"It is certainly an unfair tax," Hammond said. "It is a hidden sales tax and doesn't necessarily relate to profits or earnings."

The state Senate repealed the tax after the Times interviewed Hammond. The House and governor are expected to uphold Senate action.

Hammond's only concern was to find a source of revenue to replace the gross receipts tax, which goes mostly to local municipalities through state revenue sharing programs.

"Otherwise, we would be throwing a real curve ball at municipal entities," Hammond said.

Incumbent Governor Changes Drug Law Stanc

(Continued From Page One)

But because of his personal opposition to drugs and because of the "imagery involved," Hammond said he would veto the same marijuana bill today.

"Frankly, if I had to do it over again, to demonstrate clearly that, hey, if you guys want to liberalize marijuana put it on the ballot or something of that nature, but don't ask me to support something that I happen to be morally opposed to...I would have vetoed the bill."

On another issue of concern to the parents' group, Hammond agreed federally-mandated programs often do not include enough money for the state and local communities to administer them.

The governor said he has taken steps to get more federal support "through personal lobbying and correspondence and . . . resolutions emerging from the (Western) governors' conference."

Hammond also responded to questions drafted by seven other community organizations.

Do you support Sen. John Huber's amendment to have judges and attorneys general elected? — Alaska Bar Association.

"At one time I thought this might have some merit," Hammond said. "But I do not favor it. It seems you would further politicize (the situation).

"In many states which have had election (of attorneys general). . . there has been a conflicting posture," where the attorney general competes with the governor for high office.

But Hammond suggested he would support placing an initiative on the ballot asking voters whether they support election of judges and attorneys general.

"I am a great supporter of the initiative process," Hammond said. "An initiative advisory would be helpful. I would welcome one."

Hammond said he personally supports the current system of selecting judges based on the lawyers' poll.

The poll provides the Judicial Council with possible candidates for judgeships. The nominees are submitted to the governor who makes the final appointments.

"This is one means of determining qualifications," Hammond said.

Do you support legislation which would allow voters to choose either binding arbitration or a teacher's clear right to strike as a means of resolving impasse situations? — National Education Association of Alaska.

Hammond said he would support putting the labor questions to the public. And he said the public itself could serve as the arbitrator, or third party which settles contract disputes when labor and management cannot reach agreement.

"I think if you had the binding arbitration procedure you would very seldom have irrational demands," Hammond said. "I don't think you would ever be confronted with strike circumstances."

Extreme demands could be avoided if the public voted on the final wage package, Hammond said.

"They would assess what the true monetary impact would be," he said. "Extreme demands would be immediately rejected by the electorate. How can someone from New York tell whether or not...the administration or school teacher or electorate will be impacted?"

Representatives of the collective bargaining unit, administration and the general public could serve on an arbitration panel, the governor said. The panel would take the last, best offer of each side and then draft a final package to be submitted to the voters.

But Hammond said public employees should be guaranteed certain basics, such as cost of living adjustments, before the issue goes on the ballot.

"I'm not saying this (arbitration) should be done," Hammond said. "But the question should be conveyed to the public."

The teachers' group also asked whether gubernatorial candidates favored 100 percent state funding of school operations and 80 percent funding of school construction.

"I introduced the bill for 90 percent funding," Hammond said. "As far as 100 percent funding, you bet I support it. It's constitutionally mandated."

The governor said the state constitution "says you have to give fair and equitable education to everyone..."

"The best way you can determine that is to ask what is the average cost of providing education of the citizen of the state," he said. "And what ever that translates into is the basic need."

But Hammond said those "extra enrichments" beyond basic education, such as swimming pools, for example, should be paid for by local school districts.

"The obligation in the state constitution for basic education is 100 percent...(but that) doesn't mean everything the district might want..."

Do you believe money spent on home health-home support services would not only be better for Alaska's elderly but also would tend to reduce institutionalization and medical costs? What would you do to reduce such costs? — Older Persons Action Group.

Hammond said he supports such state financed aid programs for Alaska's elderly "because most older persons groups I've spoken to agree such is the case."

Hammond said he has built five times more residential housing for the elderly than any administration since statehood and has bolstered nutrition programs.

And since he took office nearly four years ago, the governor said six multi-purpose senior centers have been built. He said he hopes to keep the pace up.

"My concern is that we have appropriate funds to provide for whatever programs," Hammond said. "I'm certainly willing to provide the services as long as we have the funds."

What is your position on repeal of the state business license gross receipts tax? — Anchorage Chamber of Commerce.

"It is certainly an unfair tax," Hammond said. "It is a hidden sales tax and doesn't necessarily relate to profits or earnings."

The state Senate repealed the tax after the Times interviewed Hammond. The House and governor are expected to uphold Senate action.

Hammond's only concern was to find a source of revenue to replace the gross receipts tax, which goes mostly to local municipalities through state revenue sharing programs.

"Otherwise, we would be throwing a real curve ball at municipal entities," Hammond said.

"This is one means of determining qualifications," Hammond said.

Do you support legislation which would allow voters to choose either binding arbitration or a teacher's clear right to strike as a means of resolving impasse situations? — National Education Association of Alaska.

Hammond said he would support putting the labor questions to the public. And he said the public itself could serve as the arbitrator, or third party which settles contract disputes when labor and management cannot reach agreement.

"I think if you had the binding arbitration procedure you would very seldom have irrational demands," Hammond said. "I don't think you would ever be confronted with strike circumstances."

Extreme demands could be avoided if the public voted on the final wage package, Hammond said.

"They would assess what the true monetary impact would be," he said. "Extreme demands would be immediately rejected by the electorate. How can someone from New York tell whether or not...the administration or school teacher or electorate will be impacted?"

Representatives of the collective bargaining unit, administration and the general public could serve on an arbitration panel, the governor said. The panel would take the last, best offer of each side and then draft a final package to be submitted to the voters.

But Hammond said public employees should be guaranteed certain basics, such as cost of living adjustments, before the issue goes on the ballot.

"I'm not saying this (arbitration) should be done," Hammond said. "But the question should be conveyed to the public."

The teachers' group also asked whether gubernatorial candidates favored 100 percent state funding of school operations and 80 percent funding of school construction.

"I introduced the bill for 90 percent funding," Hammond said. "As far as 100 percent funding, you bet I support it. It's constitutionally man-

The governor said the state constitution "says you have to give fair and equitable education to everyone."

"The best way you can determine that is to ask what is the average cost of providing education of the citizen of the state," he said. "And what ever that translates into is the basic need."

But Hammond said those "extra enrichments" beyond basic education, such as swimming pools, for example, should be paid for by local school districts.

"The obligation in the state constitution for basic education is 100 percent...(but that) doesn't mean everything the district might want..."

Do you believe money spent on home health-home support services would not only be better for Alaska's elderly but also would tend to reduce institutionalization and medical costs? What would you do to reduce such costs? — Older Persons Action Group.

Hammond said he supports such state financed aid programs for Alaska's elderly "because most older persons groups I've spoken to agree such is the case."

Hammond said he has built five times more residential housing for the elderly than any administration since statehood and has bolstered nutrition programs.

And since he took office nearly four years ago, the governor said six multi-purpose senior centers have been built. He said he hopes to keep the pace up.

"My concern is that we have appropriate funds to provide for whatever programs," Hammond said. "I'm certainly willing to provide the services as long as we have the funds."

What is your position on repeal of the state business license gross receipts tax? — Anchorage Chamber of Commerce.

"It is certainly an unfair tax," Hammond said. "It is a hidden sales tax and doesn't necessarily relate to profits or earnings."

The state Senate repealed the tax after the Times interviewed Hammond. The House and governor are expected to uphold Senate action.

Hammond's only concern was to find a source of revenue to replace the gross receipts tax, which goes mostly to local municipalities through state revenue sharing programs.

"Otherwise, we would be throwing a real curve ball at municipal entities," Hammond said.

The gross receipts tax will be replaced by an increased corporate tax on the oil industry, the Legislature decided this week.

Should the first priority for fish and wildlife resources be for subsistence purposes? As governor, what would you do to assure that subsistence maintains a high priority? — Alaska Federation of Natives.

Hammond said subsistence users should have first pick of Alaska's fish and game when there is a conflict and there are inadequate stocks.

"That doesn't mean exclusive use," Hammond said. "It means there is a priority when there is a conflict."

The governor defined subsistence as "that which sustains body and soul."

"It's a matter of degree," he said. "Who is most dependent on sustaining body and soul? When there are conflicts the least dependent should be screened out.

"But I can't tell you whether a guy who lives here in Anchorage who would rather blow out his brains than hang up his fly rod should be denied a chance to go down and catch a rainbow trout somewhere."

Hammond did not suggest any specific program to assure subsistence users get first choice of fish and game.

"The state policy has been for a number of years — as structured by the fish and game board — to place subsistence as the priority use when such conflicts occur," he said.

How would you make your administration more responsive to express concerns of Alaska's minority population...as meaningful participants in the state decision-making process? — Alaska Black Caucus.

The Alaska Black Caucus repeatedly has accused Hammond of failing to appoint minorities to decision-making positions in state government.

And Hammond repeatedly has insisted his record on minority hire is better than previous administrations.

"We have had a 90 percent increase in black hire since the advent of this administration, and a 97 percent increase in female hire," the governor said. "And while that may not be particularly good, mind you it's a vast improvement over previous actions."

Hammond said he offered seven minorities deputy commissioner positions and two minorities commissioner slots.

"They all refused them," Hammond said. "Now I can't drag them in, kicking and screaming. One of the problems is that many of them do not want to go to Juneau because there is not a significant black community there."

The governor said he has pleaded with minority groups to submit names to him for possible appointment to decision-making posts.

"I did this early on when I was appointing my cabinet," Hammond said. "I got one black name proposed and it was opposed by more Blacks than it was supported by."

STATE OF ALASKA

JAY S. HAMMOND, Governor

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL / POUCH K — STATE CAPITOL
JUNEAU 99801

July 22, 1975

Mr. Charles G. Anderson
Chief of Police
Anchorage Police Department
P.O. Box 400
Anchorage, Alaska 99510

Re: Enforcement and Prosecution of Marijuana Offenses

Dear Chief Anderson:

During the Crime Conference in Fairbanks last month, it was suggested that the Attorney General prepare and circulate a letter which outlines the department's interpretation of the recent Supreme Court decision in Ravin v. State, ____ P.2d _____, Opinion No. 1156 (Alaska 1975), as well as the recent amendments to AS 17.12.110, which now appear as ch 110 SLA 1975 and which will become effective on September 2, 1975. We have attempted to do so in this rather extensive letter. Please feel free to distribute the letter to whichever departments or individual officers you feel would benefit from it. I will, however, provide the Commissioner of Public Safety, as well as the District Attorneys throughout the State with a copy and will request that the District Attorneys forward copies to police agencies within their jurisdiction.

I realize that all of the law enforcement questions which might arise regarding possession of marijuana cannot be touched upon in this letter, but I will try to address those questions which arose in your discussion with the Attorney General as well as additional points that might not have been covered but which have come to our attention in recent weeks. The Department of Law through individual District Attorneys will, of course, be available to assist any police officer in a determination in a particular case.

I. Ch. 110 SLA 1975 (FCCS HCS SSSB 350)

The amendments to AS 17.12.110 can be broken into three basic areas each of which will be dealt with separately:

(1) Sale or Distribution: The above-referenced legislation does not affect statutes prohibiting the sale or distribution of marijuana. Sale of any amount of marijuana is still a felony and no modification of present enforcement

procedures should occur as a result of the amendments to AS 17.12.110.

(2) Possession for Purpose of Sale: Prior to enactment of the referenced amendments, possession for purpose of sale was a felony. In most respects, enforcement procedures should not be modified under the amendments. However, where marijuana is held for sale within a home, evidence of intent to sell must be strong in order to support an entry into a home solely to make an arrest or conduct a search for marijuana.

Courts in the past have decided on a case-by-case basis what amount of marijuana was sufficient to raise an inference that marijuana was possessed for purpose of sale. Any amount that a court decided was possessed for personal use constituted a misdemeanor. Any amount that a court decided was possessed for purpose of sale was a felony. That is still the law in spite of the recent amendments to AS 17.12.110, except that possession for personal use is no longer a misdemeanor offense under circumstances discussed below.

Confusion has apparently arisen over the provision in the act which states that possession or control of any amount in a private place for personal use is a civil offense. Commissioner Burton has inquired, for example, whether this gives an individual license to possess large quantities of marijuana in his own home. The answer is generally no. If a police officer has evidence which establishes that probable cause exists to believe that any amount of marijuana is being held anywhere for the purpose of sale, he should act just as he has in the past. Whether a given amount is possessed for purpose of sale will be determined by the same standards that have always been applied at trial, e.g., the actual amount possessed; the circumstances surrounding possession, such as possession of paraphernalia associated with the packaging, sale and distribution of marijuana (scales, baggies, etc.); whether the marijuana is already individually packaged for sale; and evidence of other sales contemporaneous with the charge under consideration.

(3) Possession for Personal Use: The major change made by ch. 110 SLA 1975 relates to possession or control of marijuana for personal use. It should be emphasized that public use of marijuana remains a misdemeanor offense. Consequently, when a police officer observes an individual smoking marijuana in public, an arrest may be made and a search of the arrestee and the area within his immediate control may lawfully be conducted as an incident to the arrest. Additionally, possession of any amount of marijuana by an individual while operating a motor vehicle or airplane continues to be a misdemeanor. A question has arisen with respect to the omission of the word "control" from the language of the act which continues to make it a misdemeanor to possess marijuana while operating a motor vehicle or airplane. That provision which is embodied in the statute as AS 17.12.110(d)(3) reads as follows:

> (d) A person who: . . . (3) possesses any amount of marijuana while operating a motor vehicle or airplane . . . is, upon conviction, guilty of a misdemeanor. . . .

Different language is used in AS 17.12.110(d)(2) which provides that:

> (d) A person who: . . . (2) possesses or controls more than an ounce of marijuana on a public street or sidewalk or on the premises of a public carrier or business establishment or any other public place . . . is, upon conviction, guilty of a misdemeanor. . . .

(emphasis added). The reference in AS 17.12.110(e), which is the subsection setting out those situations which give rise to a civil fine, is also to "possession or control". Furthermore, AS 17.12.010 continues to provide that:

> Except as otherwise provided in this chapter, it is unlawful for a person to . . . possess, have under his control. . . a depressant, hallucinogenic or stimulant drug.

The only portion of the act that does not contain the dual reference to "possession or control" is that portion which preserves a misdemeanor offense for possession of marijuana while operating a motor vehicle or airplane. In that respect, it is instructive that the second to the last or fifth version of the bill out of a total of six, which appears as HCS SSSB 350 am H and which is the version that originally passed the Alaska House of Representatives, contained the following language.

> (d) A person who: . . . (3) possesses any amount of marijuana on his person while operating a motor vehicle or airplane. . . .

(emphasis added). The underlined portion of the 5th proposed version of AS 17.12.110(d)(3) was specifically deleted from FCCS HCS SSSB 350, which now appears as ch. 110 SLA 1975, but the words "or control" were not inserted. The letter of legislative intent accompanying FCCS HCS SSSB 350 specifically addresses an aspect of this problem. In discussing the removal of the language "on his person" from the bill, the letter of intent stated that:

> . . . The conferees feel that the the language "on his person" . . . should be omitted. Otherwise a person in violation of this section could be openly smoking marijuana while driving, and then could quickly place the marijuana cigarette in the ash tray of the automobile or on the seat or floor, when approached by a police officer. He would then argue that he was not in violation of this section.

Senate Journal, Alaska State Senate, May 15, 1975, at 1121. Thus, in terms of the operator, himself, it is clear that the act is designed to preserve the misdemeanor label for possession of marijuana beyond possession "on his

person" and is intended to extend to possession within the immediate reach of the operator. The question remains, however, whether the omission of the word "control" also restricts those situations under which a person can be charged with a misdemeanor as either the operator or a passenger in a motor vehicle or an airplane. I am of the view that it does and further, that its omission indicates a specific legislative intent to restrict the applicability of AS 17.12.110(d)(3) to factual situations where a person while actually operating a motor vehicle or an airplane either physically possesses marijuana on his person or possesses it within his immediate reach while operating the vehicle.

The term "possession" as used in the criminal law has traditionally been regarded as narrower than the term "control". Possession requires having a thing with you or within your immediate reach. "Control", on the other hand, is broader in scope and includes those situations where a person simply has "constructive possession" or the right and ability to exercise control or management over a thing not in his actual physical possession.

Consequently, under AS 17.12.110(d)(3), the following general principles are applicable: first, if marijuana is lawfully discovered in the actual physical possession of an individual while he is operating a motor vehicle or an airplane either on his person or within his immediate reach while operating, then he may be charged and prosecuted for the misdemeanor offense; second, if marijuana is lawfully discovered in his control while operating a vehicle, but outside of his person or the area within his immediate reach while operating the vehicle, then he is subject to a civil fine under AS 17.12.110(e); and third, if marijuana is lawfully discovered in the possession or control of a passenger in a motor vehicle or airplane, then he is also subject to a civil fine under AS 17.12.110(e).

Prior Alaska Supreme Court decisions have interpreted existing statutes prohibiting the possession of a substance to require proof beyond a reasonable doubt that an individual charged with a "possesaion" offense knew what the substance was and had the ability to exercise control over it. Within that context, I should emphasize that the rule set forth in Egner v. State, 495 P.2d 1271 (Alaska 1971), will continue to apply to the prosecution of marijuana offenses whether criminal or civil. Egner is, of course, on its facts, particularly applicable to the "possession in a motor vehicle" situation and holds that "mere presence at the scene" is insufficient to prove knowing possession or control of a prohibited substance. For example, if a quantity of marijuana has lawfully been discovered in the trunk of a motor vehicle, the State must still be able to prove beyond a reasonable doubt that the person charged knew or had reason to know (e.g., where the defendant is the owner and only he has access to the trunk) that the trunk contained marijuana and that he either exercised or had the right to exercise control over it.

Another question which has arisen under the language of the act applicable to motor vehicles and airplanes is what, if any, significance can be attached to the omission of vessels. Consistent with the discussion of Ravin v. State,

supra, in Part II of this letter, I am of the view that the Supreme Court would have upheld the preservation of a misdemeanor offense for possession of marijuana while operating a vessel if vessels had been included within AS 17.12.110(d)(3) because it represents that type of activity which potentially "interferes in a serious manner with the health, safety, rights and privileges of others or with the public welfare." An argument could have been made that there is a close and substantial relationship between the public interest in the safe operation of a vessel and the prohibition against possession of marijuana while operating a vessel when used as a vehicle for transportation. This argument is still applicable, however, because the omission of vessels under AS 17.12.110(d)(3) simply means that possession of marijuana in a vessel while it is operated as a vessel is subject to a civil fine under AS 17.12.110(e). Again, however, the limitations imposed through Egner will apply equally to possession or control of marijuana while operating a vessel.

The major change effectuated by the act addresses the private possession of marijuana for personal use in a purely non-commercial context. Under the act, possession or control of any amount of marijuana for personal use in a non-public place by a person eighteen years of age or older is subject to a civil fine of not more than $100. The decision in Ravin, however, alters the thrust of this provision to a substantial extent. Consequently, I will reserve discussion of the question of private possession of marijuana until Part II of this letter.

The most difficult questions under the act and under Ravin concern possession in public. Under the act, possession or control of more than an ounce of marijuana "on a public street or sidewalk or on the premises of a public carrier or business establishment or any other public place" remains a misdemeanor offense. Possession of an ounce or less in a "public place" by a person 18 years of age or older is subject to a civil fine of not more than $100. Under the legislative amendments to AS 17.12.110 a police officer who sees someone use marijuana in a "public place" may arrest the person for the misdemeanor offense of possession. If, on the other hand, he simply observes an individual in possession of an ounce or less, he may seize it and issue a civil citation, assuming that we are able to initiate a civil citation system in conjunction with the court system which will require some amendment to the Rules of Civil Procedure. Conversely, where a police officer observes an individual in possession of more than an ounce, he may arrest the person, seize the marijuana and conduct a search as an incident to the arrest as he would under present law. Thus, under both the recent amendments to AS 17.12.110 and Ravin v. State, supra, public use remains a misdemeanor, public possession of an ounce or less is subject to a civil penalty and public possession of more than an ounce remains a misdemeanor.

The above analysis, however, omits at least four commonly occurring factual variations. Under ch 110 SLA 1975, if a police officer discovers an ounce or less of marijuana in the possession of a person who has been arrested in a

public place for another offense or otherwise lawfully taken into custody, then that person would be subject to the civil penalty under AS 17.12.110(e). Conversely, where a police officer lawfully discovers more than an ounce of marijuana in the possession of a person in a public place who has been arrested for another offense or otherwise lawfully taken into custody, then under the act that person would remain the subject of a misdemeanor prosecution for possession. However, if a police officer has not actually observed marijuana in an individual's possession, but has probable cause to believe that an individual possesses an ounce or less of marijuana on his person in a public place or that marijuana is possessed in an automobile either by a passenger or beyond the immediate reach of the operator, then a problem exists in terms of potential action that may be taken by an officer inasmuch as possession under these circumstances no longer constitutes a criminal offense. Consequently, a police officer may not arrest [which he presently cannot do for a misdemeanor not committed in his presence] and may not conduct a search unless he has independent justification to search. Furthermore, it will not be possible to obtain a search warrant, the subject of which is an ounce or less of marijuana possessed or controlled in other than a public place which gives rise to a civil penalty because AS 12.35.020 restricts the issuance of search warrants to essentially the recovery of evidence of a crime. On the other hand, when a police officer has not actually observed marijuana in an individual's possession, but has probable cause to believe that an individual possesses more than an ounce of marijuana on his person in a public place, then under the act the officer would proceed as he always has under existing law. The same, of course, holds true with respect to possession of marijuana for purpose of sale under any circumstances, as has been previously noted.

One final point should be noted with respect to ch. 110 SLA 1975. The letter of legislative intent accompanying FCCS HCS SSSB 350 specifically defines an "ounce" for purposes of the amendments to AS 17.12.110 as follows:

> To avoid possible confusion, the conferees believe that one ounce should be considered 30 grams for the purpose of prosecutions under this Act.

II. Ravin v. State, ___P.2d___, Opinion No. 1156 (Alaska 1975)

On its face, the case of Ravin v. State, supra, applies to a very limited set of circumstances. Construed as narrowly as possible in its potential application, Ravin stands for the proposition that:

> . . . [c]itizens of the State of Alaska have a basic right to privacy in their homes under Alaska's constitution. This right to privacy would encompass the possession and ingestion of substances such as marijuana in a purely personal, non-commercial context in the home unless the state can meet its substantial burden and show that proscription of possession of marijuana in the home is supportable by achievement of a legitimate state interest.

Ravin v. State, supra at 21. The court was careful to explain that its analysis focused not on any right to possess or use marijuana per se but rather, on the right to privacy found within Article I, Section 22 of the Alaska Constitution, particularly within the context of the home. The standard which the court has adopted in conducting this analysis is twofold.

> . . . [W]hether the State has demonstrated sufficient justification for the prohibition of possession of marijuana in general in the interest of public welfare; and further whether the State has met the greater burden of showing a close and substantial relationship between the public welfare and control of ingestion or possession of marijuana in the home for personal use.

Id. at 22.

After a lengthy analysis of the effects of marijuana use and the arguments advanced by the State in support of a total prohibition, the court held as follows:

> . . .Thus we conclude that no adequate justification for the states' intrusion into the citizen's right to privacy by its prohibition of possession of marijuana by an adult for personal consumption in the home has been shown. The privacy of the individual's home cannot be breached absent a persuasive showing of a close and substantial relationship of the intrusion to a legitimate governmental interest. Here, mere scientific doubts will not suffice. The state must demonstrate a need based on proof that the public health or welfare will in fact suffer if the controls are not applied.

Id. at 40. This grant of a right to privacy even in the home is not absolute, however. The majority opinion in Ravin carefully places two "important" restrictions upon it: first, the right to privacy remains absolute so long as it is a purely private, non-commercial expression of an Alaska citizen's individuality; second, the right to privacy "must yield when it interferes in a serious manner with the health, safety, rights and privileges of others or with the public welfare." Id. at 21. The following language in this regard is, I think, instructive:

> No one has an absolute right to do things in the privacy of his own home which will affect himself or others adversely. Indeed, one aspect of a private matter is that it is private, that is, that it does not adversely affect persons beyond the actor, and hence is none of their business.

Id. (emphasis added).

Throughout its analysis, the court went to great length to explain the limited nature of its holding which does not afford "protection for the buying or selling of marijuana" [Id. at 40]; nor protection for possession at home or anywhere else "of amounts of marijuana indicative of [an] intent to sell" [Id. at 41]; nor protection for possession or use while operating a motor vehicle [Id. at 33, 37-39]; nor protection for possession or use by adolescents [Id. at 40]; nor "absolute protection for its use or possession in public." Id. at 40-41. (emphasis added).

Thus, the court specifically recognized that the right to privacy contained within the Alaska Constitution is not absolute; that there are specific limitations upon the purely private, non-commercial possession or use of marijuana; and that an individual's right to privacy will sometimes yield to a legitimate exercise of the State's police power where the State can show a close relationship between the prohibition in question and the health, safety, rights and privileges of others or the public welfare. The court emphasized that by its holding it did not intend to condone the use of marijuana but rather, of freedom from state intrusion into an individual's strictly private affairs where no legitimate public purpose is being served. In this regard, the court recognized that:

> The State has a legitimate concern with avoiding the spread of marijuana use to adolescents who may not be equipped with the maturity to handle the experience prudently, as well as a legitimate concern with the problems of driving while under the influence of marijuana.

Id. at 40.

A number of very difficult legal and practical enforcement questions arise under Ravin, particularly when it is viewed with the recently enacted amendments to AS 17.12.110. First, under the statutory amendments, private possession of any amount possessed for personal use gives rise to a civil penalty. Under Ravin, however, possession of marijuana by adults in a home for personal use is protected from any state interference under the Alaska Constitution. Consequently, as an initial matter, Ravin invalidates that portion of the new statute which makes private possession under these circumstances a civil offense.

A second problem involves the use of the word "home" within the context of the decision. I have advised prosecutors in the Department of Law to interpret the word "home" to mean any place that would be so defined within the meaning of the provisions of the Fourth Amendment to the United States Constitution and Article I, Section 14, of the Constitution of the State of Alaska relating to the law

of search and seizure. Essentially, if officers are in doubt, they should ask themselves whether they would regard a particular place as a residence where, for example, they were attempting to obtain evidence of a crime. If they concluded, for instance, that they would have to obtain a search warrant because it was a "home", then they should treat it as a "home" within the context of Ravin. At the least, Ravin will apply to any private place which is used as a dwelling, even if it happens to be a tent or a hotel room.

This question gets quite difficult in situations involving campers and vessels. However, the law of search and seizure provides, I think, a useful and workable frame of reference. One of the specifically recognized exceptions to the general rule that a warrant must first be secured before a search may be conducted into an area where an individual holds an expectation of privacy is that a search of a motor vehicle may be conducted without a warrant if a police officer has probable cause to believe that the vehicle contains contraband or evidence of a crime and further, if the vehicle is mobile when the officer first comes into contact with it. In other words, the facts of each particular situation will define whether a camper or a vessel is a "home" within the context of Ravin. If it is being used as a dwelling when encountered, then it should be treated as a "home" under Ravin. If, on the other hand, it is being used as transportation and would be a proper subject of a search without a warrant given the existence of probable cause, then it should not be regarded as a "home". This analysis, however, must be read together with the discussion in Part I of this letter pertaining to the private possession of marijuana for personal use in a motor vehicle, airplane or vessel under ch. 110 SLA 1975. In some instances, marijuana found in a camper, even if used as transportation, may only give rise to a civil penalty.

It is obvious that both Ravin and ch. 110 SLA 1975 have a rather substantial effect on the laws of arrest, search and seizure in regard to the enforcement of marijuana laws. As noted in Part I of this letter, under Ravin probable cause that marijuana is to be found in a particular place will no longer support an entry into a "home" to either effectuate an arrest or conduct a search unless probable cause exists to believe that marijuana is possessed for purpose of sale. Furthermore, in situations where possession of marijuana for personal use gives rise only to a civil penalty, an officer will not be able to arrest an individual and will not be able to specifically search for marijuana with or without a warrant.

A third and very specific question that arises under Ravin is whether marijuana should continue to be treated as contraband when it is found in a "home" during the course of a lawful intrusion for a valid independent reason and under circumstances that do not establish possession for purpose of sale. The more I reflect on this question, the more I am convinced that marijuana possessed within the home for personal use should probably not be treated as contraband, unless

officers want to embroil themselves in the federal process which will, I think, be unduly complicated. In this respect, Ravin creates a unique situation. Under federal law marijuana possessed in any amount under any circumstances remains unlawful and thus contraband. Under state law, however, the private possession of marijuana in a "home" for personal use is constitutuionally protected and thus cannot be regarded as contraband. If officers under authority of federal law seize marijuana in a "home" discovered during the course of a lawful intrusion then they are inevitably going to become involved in federal cases. There also arises the distinct possibility of civil rights actions brought by individuals who feel that their state constitutional rights have been invaded. This will particularly be the case in situations which suggest that the entry into a "home" was a result of a predesigned pretext to seize marijuana possessed for personal use. I am confident that such suits against officers will not be successful, but there remains the question whether the time and effort expended can be justified when small amounts of marijuana are involved. In basic terms it seems to me we will have enough trouble keeping up with the enforcement of State laws without looking specifically to get involved in federal activity.

A remaining question that has arisen under both Ravin and ch 110 SLA 1975 is whether the word "marijuna" as used in both the act and the decision includes all derivatives of the plant Cannabis sativa L. Ch 110 SLA 1975 does not address this issue and a definition of "marijuana" is not contained in AS 17.12. However, the court in Ravin makes it clear that the decision is restricted to "marijuana" which it defines as:

> . . .[T]he common term for dried leaves or stalk of the plant Cannabis sativa L. The primary psychoactive ingredient in the plant is delta-9-tetrahydrocannabinol (THC). Most marijuana available in the United States has a THC content of less than one percent. Other cannabis derivatives with a higher THC content, such as hashish are available in the United States although much less common than is marijuana.

Id. at 23-24 (emphasis in original). Thus, I think it is clear that the applicability of both Ravin and ch 110 SLA 1975 is restricted to "marijuana" in the form of leaves, stalk and seeds from the plant Cannabis sativa L., along with the plant itself, and does not include derivatives such as hashish or hash oil with a higher THC content.

To summarize, the court decision together with the recent statutory amendments give rise to the following conclusions:

(1) Under both Ravin and ch 110 SLA 1975 sale or distribution of marijuana and the possession of any amount for purpose of sale remain felonies. No modification of present enforcement procedures should occur except that in order to obtain a search warrant to search a "home" for marijuana, probable cause must exist to believe that marijuana is being possessed for purpose of sale.

(2) Public use of marijuana remains a misdemeanor offense.

(3) Possession of any amount of marijuana by an individual while operating a motor vehicle or airplane or possession within the area of his immediate reach while operating remains a misdemeanor offense.

(4) Possession of any amount of marijuana by a passenger in a motor vehicle or airplane or possession by an operator beyond the area of his immediate reach while operating is subject to a civil penalty.

(5) Possession of any amount in a vessel or any other non-public place except a "home" is subject to a civil penalty.

(6) Public possession of an ounce or less of marijuana is subject to a civil penalty.

(7) Public possession of more than one ounce of marijuana remains a misdemeanor offense.

(8) Possession in a public place of an ounce or less of marijuana is subject to a civil penalty.

(9) Possession in a public place of more than an ounce of marijuana remains a misdemeanor offense.

(10) Possession or use of marijuana for personal use in a "home" is constitutionally protected and may not be made the subject of either a criminal or civil offense under the laws of the State of Alaska.

Again, I realize that it is undoubtedly not possible to touch upon all of the potential law enforcement questions that will arise as a result of the aforementioned changes in the law regarding possession or control of marijuana. I trust, however, that this analysis will be of some value in an effort to develop a rational and common sense enforcement pattern, particularly until future Supreme Court decisions clarify both the court's initial holding in Ravin and ch 110 SLA 1975. As soon as these decisions occur, we will, of course, transmit our comments on them. In the meantime, however, if you or any individual officer has a particular question, forward them to us and we will do our best to respond.

Very truly yours,

AVRUM M. GROSS
ATTORNEY GENERAL

By: Daniel W. Hickey

Deputy Attorney General
Criminal Division

doubts as to the safety of marijuana demonstrate a sufficient justification for the prohibition found in this section as an exercise of the state's police power for the public welfare. Ravin v. State, Sup. Ct. Op. No. 1156 (File No. 2135), 537 P.2d 494 (1975).

Possession of marijuana by adults at home for personal use is constitutionally protected. Ravin v. State, Sup. Ct. Op. No. 1156 (File No. 2135), 537 P.2d 494 (1975).

Citizens of the State of Alaska have a basic right to privacy in their homes under Alaska's constitution. This right to privacy would encompass the possession and ingestion of substances such as marijuana in a purely personal, noncommercial context in the home unless the state can meet its substantial burden and show that proscription of possession of marijuana in the home is supportable by achievement of a legitimate state interest. Ravin v. State, Sup. Ct. Op. No. 1156 (File No. 2135), 537 P.2d 494 (1975).

No adequate justification for the state's intrusion into the citizen's right to privacy by its prohibition of possession of marijuana by an adult for personal consumption in the home has been shown. Ravin v. State, Sup. Ct. Op. No. 1156 (File No. 2135), 537 P.2d 494 (1975).

For discussion of marijuana, its incidence and effects, see Ravin v. State, Sup. Ct. Op. No. 1156 (File No. 2135), 537 P.2d 494 (1975).

Delay between offense and formal charge. — Some delay between offense and formal charge is clearly justified in cases involving drug undercover agents. McKay v. State, Sup. Ct. Op. No. 729 (File No. 1284), 489 P.2d 145 (1971).

Where the circumstances surrounding the drug transaction render the identification of the defendant unreliable, the disabilities inherent in a long delay between the date of the offense and the formal charge become manifestly prejudicial to the defendant. McKay v. State, Sup. Ct. Op. No. 729 (File No. 1284), 489 P.2d 145 (1971).

The time between the acts charged (July 8 and 16, 1969) and the indictment (Sept. 25, 1969) was not unreasonable and did not constitute a denial of due process in that the delay was purposeful, unjustifiable, and prejudiced his ability to prepare a defense. McKay v. State, Sup. Ct. Op. No. 729 (File No. 1284), 489 P.2d 145 (1971).

A seven month interval from the alleged drug sale until arrest was an unreasonable delay denying accused due process. McKay v. State, Sup. Ct. Op. No. 729 (File No. 1284), 489 P.2d 145 (1971).

Dismissal of the criminal proceedings under this section was constitutionally mandated where eight months had elapsed between the occurrence of the alleged sale and the filing of the indictment. Marks v. State, Sup. Ct. Op. No. 787 (File No. 1414), 496 P.2d 66 (1972).

Sufficiency of indictment. — Indictment held insufficient to charge accused with the sale of depressant, stimulant or hallucinogenic drugs in violation of this section. Burkholder v. State, Sup. Ct. Op. No. 753 (File No. 1346), 491 P.2d 754 (1971).

The state must demonstrate knowing possession. Bell v. State, Sup. Ct. Op. No. 1005 (File No. 1717), 519 P.2d 804 (1974).

Evidence sufficient to prove knowing possession. — Evidence was sufficient to establish that defendant was aware that he possessed an illicit drug. Bell v. State, Sup. Ct. Op. No. 1005 (File No. 1717), 519 P.2d 804 (1974).

Mere presence at the scene, alone, is insufficient to prove knowing control of the prohibited substance. Egner v. State, Sup. Ct. Op. No. 784 (File No. 1443), 495 P.2d 1272 (1972).

Cross-examination is permissible to show that a witness was under the influence of a drug at the time of the events to which he is testifying at trial. John Doe v. State, Sup. Ct. Op. No. 707 (File No. 1240), 487 P.2d 47 (1971).

A child who sells LSD is a "delinquent minor" under AS 47.10.290(2), because the sale of LSD is a crime under this section. RLR v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

And may be incarcerated until age 19. — A child adjudicated delinquent for selling LSD may be incarcerated until age 19, which may be many years, possibly even in a city jail. RLR v. State, Sup. Ct. Op. No. 706 (File No. 1156), 487 P.2d 27 (1971).

In order to constitute a valid arrest under AS 12.25.030 (1), the misdemeanor of possessing hashish be committed in the presence of the arresting officers. Howes v. State, Sup. Ct. Op. No. 846 (File No. 1443), 503 P.2d 1055 (1972).

Applied in Meyers v. State, Sup. Ct. Op. No. 720 (File No. 1491), 488 P.2d 713 (1971); Gravel v. State, Sup. Ct. Op. No. 819 (File No. 1502), 499 P.2d 1022 (1972); Wright v. State, Sup. Ct. Op. No. 833 (File No. 1288), 501 P.2d 1360 (1972); Howes v State, Sup. Ct. Op. No. 846 (File No. 1443), 503 P.2d 1055 (1972); Erickson v. State, Sup. Ct. Op. No. 868 (File Nos. 1521, 1542), 507 P.2d 508 (1973); Coger v. State, Sup. Ct. Op. No. 988 (File No. 1766), 517 P.2d

The Honorable Glenn Hackney
Pouch V
Juneau, Alaska 99811

Sir:

In response to your telephone call of January 30th anent Senate Bill 49, I wish to thank you for keeping me posted on this pending legislation. Unfortunately, pressing duties here in Seward preclude my attendance.

As you may be aware, my thinking is that possession of Marijuana in any amount should, at the least, be classified as a misdemeanor, and any cultivation or marketing of this substance on a large scale should be classified as a felony.

I realize this may be a bit much to wish for, given the present weight of the pro-marijuana forces.

I trust you are aware of research results now surfacing indicating that marijuana contains most or all of the carcinogenic agents found in tabacco plus many other suspected carcinogenic agents. It follows that while the office of H.E.W. is spending millions to persuade Americans not to smoke, it would be the sheerest lunacy to encourage marijuana smoking by legislating it.

Many traffic accidents not involving the drinking driver are attributed to driver-inattention or falling asleep, when in reality the driver was high on marijuana. These are extremely difficult cases to prosecute, because marijuana cannot be detected by a breathalyzer, nor can police do a car search, or a blood test without permission of the individual (who is incompetent to give informed consent, if he indeed under the influence of marijuana). Obtaining a court warrant under these circumstances is another can of worms entirely, to be opened as a last resort.

Legalize marijuana and you guarantee it's use will become as common amoung children as cigarette smoking is at present.

I know that you and most of the legislature will give this question the closest scrutiny. I know you will not leave Law Enforcement beleaguered by this aberrant statute.

I want to be on record as being categorically opposed to the legalization of marijuana. If this sounds regressive or reactionary, so be it. I can live with that. It will be a lot better than living in a society of apathetic, spaced-out paranoids.

Thank you for soliciting the views of those of us in Law Enforcement.

Sincerely,

Louis A. Bencardino
President
Chiefs of Police Association

Sec. 17.12.080. Persons exempted. The provisions of this chapter restricting the possessing and control of depressant, hallucinogenic and stimulant drugs do not apply to

(1) a common carrier or to a warehouseman, while engaged in lawfully transporting or storing these drugs;

(2) an employee of a common carrier or warehouseman while acting within the scope of his employment in lawfully transporting or storing these drugs;

(3) a public officer or his employee in the performance of his official duties requiring possession or control of these drugs;

(4) temporary, incidental possession by an employee or agent of a person lawfully entitled to possession; or

(5) temporary, incidental possession by a person whose possession is for the purpose of aiding a public officer in performing his official duties. (§ 2 ch 225 SLA 1968)

Sec. 17.12.090. Exempted drugs. Depressant, hallucinogenic or stimulant drugs exempted under federal law or under regulations promulgated by the commissioner are exempted from the application of this chapter. (§ 2 ch 225 SLA 1968)

Sec. 17.12.100. Exemptions and exceptions not required to be negatived. In a complaint, information, or indictment, and in an action or proceeding brought for the enforcement of any provision of this chapter, it is not necessary to negative any exception, excuse, proviso, or exemption, contained in this chapter, and the burden of proof of an exception, excuse, proviso, or exemption is upon the defendant. (§ 2 ch 225 SLA 1968)

Sec. 17.12.110. Penalties. (a) A person who violates a provision of this chapter relating to the possession or control of depressant, hallucinogenic and stimulant drugs, other than marijuana, when his possession or control is for his own use, is guilty of a misdemeanor and upon conviction is punishable by imprisonment for not more than one year, or by a fine of not more than $1,000, or by both.

(b) A person who violates a provision of this chapter other than one mentioned in (a) of this section, or a person who violates a provision of this chapter relating to the possession or control of depressant, hallucinogenic and stimulant drugs, when his possession or control is for the purpose of sale or other disposal to another person, is guilty of a felony and upon conviction is punishable as follows:

(1) for the first offense, by imprisonment for not more than 25 years, or by a fine of not more than $20,000, or by both;

(2) for the second and subsequent offenses, by imprisonment for any term of years or life, or by a fine of not more than $25,000, or by both.

(c) A person who violates a provision of this chapter by selling or otherwise disposing of a depressant, hallucinogenic or stimulant drug to a person less than 19 years of age is guilty of a felony and upon

conviction is punishable by imprisonment for any term of years or life, or by a fine of not more than $25,000, or by both.

(d) A person who: (1) uses marijuana on a public street or sidewalk or on the premises of a public carrier or business establishment or any other public place, or (2) possesses or controls more than an ounce of marijuana on a public street or sidewalk or on the premises of a public carrier or business establishment or any other public place, or (3) possesses any amount of marijuana while operating a motor vehicle or airplane, or (4) while under the age of 18, possesses, controls or uses any amount of marijuana is, upon conviction, guilty of a misdemeanor punishable by a fine of not more than $1,000.

(e) A person 18 years of age or older who violates this chapter by possession or control of any amount of marijuana in other than a public place, when his possession or control is for his own use, or by possession of one ounce or less of marijuana in a public place, is punishable by a civil fine of not more than $100. Punishment under this subsection shall be initiated only by civil complaint or citation. The court may establish procedures for payment of fines by mail.

(f) In this section, "public place" means a place which is either in public ownership or a place available to public access. (§ 2 ch 225 SLA 1968; am § 1 ch 110 SLA 1975)

Effect of amendment. — The 1975 amendment inserted "other than marijuana" in subsection (a) and added subsections (d), (e) and (f).

Legislative committee report. — For report on ch. 110, SLA 1975 (FCCS HCS SSSB 350), see 1975 Senate Journal, p. 695; 1975 House Journal, p. 1263.

Inference that offenses under section are extremely serious. — The supreme court has inferred from the severity of the maximum punishment under this section that the legislature considers such offenses to be extremely serious. Wright v. State, Sup. Ct. Op. No. 833 (File No. 1288), 501 P.2d 1360 (1972).

Standards for imposition of sentence. — In the case of Waters v. State, Sup. Ct. Op. No. 681, 483 P.2d 199 (1971), the supreme court set forth standards for the imposition of sentence in drug offense cases. Meyers v. State, Sup. Ct. Op. No. 720 (File No. 1491), 488 P.2d 713 (1971).

The judge should take account of four groups of drug offenders whose crimes are in descending order of seriousness: (1) smuggling or sale of large quantities of narcotics or possession of large quantities for sale; (2) smuggling or sale of small quantities of narcotics, or possession of small quantities for sale; (3) possession of narcotics without intent to sell; (4) marijuana offenses. Meyers v. State, Sup. Ct. Op. No. 720 (File No. 1491), 488 P.2d 713 (1971).

Courts intended to have broad discretion in imposing sentence. — The declaration of intent preceding this chapter when enacted clearly indicates the legislature's intent to vest, and recognition that it has in fact vested, broad discretion in the courts in imposing sentence for violations of the drug laws set forth in this chapter. Speas v. State, Sup. Ct. Op. No. 889 (File No. 1555), 511 P.2d 130 (1973).

This reading is strengthened by the omission from this chapter of mandatory minimum sentences. Speas v. State, Sup. Ct. Op. No. 889 (File No. 1555), 511 P.2d 130 (1973).

Furthermore, AS 17.12.120 makes specific provision for rehabilitative treatment in lieu of imprisonment in certain cases. Speas v. State, Sup. Ct. Op. No. 889 (File No. 1555), 511 P.2d 130 (1973).

An eight-year sentence with two years suspended was not outside the zone of reasonableness. Meyers v. State, Sup. Ct. Op. No. 720 (File No. 1491), 488 P.2d 713 (1971).

Principles in undertaking sentencing review. — In the case of State v. Chaney, Sup. Ct. Op. No. 653, 477 P.2d 441 (1970), the supreme court set forth the various principles in undertaking sentencing

ALASKA PEACE OFFICERS ASSOCIATION

February 6, 1979

Senator Glenn Hackney
Pouch "V"
Juneau, Alaska 99811

Dear Senator Hackney:

In response to your message informing me of the Hess Meeting on SB 49, I sincerely appreciate your keeping me informed of this Hearing. Unfortunately, I will not be able to attend; however, I am attempting to locate an APOA member that can make the meeting and testify on behalf of the Alaska Peace Officers Association.

Aside from being the President of the Alaska Peace Officers Association, I am a Detective with the Fairbanks Police Department and Supervisor of the Areawide Narcotics Team.

Just today, officers under my supervision were successful in obtaining a Grand Jury indictment for an individual that has been a Marijuana dealer in the Fairbanks area for a large number of years. During the Grand Jury proceedings, a young man, eighteen years old, testified to having assisted the Areawide Narcotics Team in purchasing Marijuana from this dealer and obtaining needed information for a search warrant. During his testimony, a Grand Jury member asked the young man why he was motivated to help the police. The young man stated that he could see that the use of Marijuana was ruining his life and that since he had been using Marijuana, he found himself to be lazy and run-down.

Approximately three weeks ago, a Mr. Joe Hergenreter, of 515 7th Avenue, Fairbanks, Alaska 99701, came to my office and reported that his seven and nine year old sons were using Marijuana. He reported that they were getting the Marijuana from a nine year old neighbor boy whose parents permitted the use of Marijuana. I explained the difficulty in prosecuting any violations under these circumstances to Mr. Hergenreter. As you can see, there would be no effective way to handle this case without the involvement of Mr. Hergenreter and his two sons. Mr. Hergenreter may, himself, be willing to assist by testifying; however, he was not willing to subject his children to court proceedings. As you can see, an attempt to investigate and prosecute either the nine year old neighbor boy or his parents would become a "bucket of worms" and I am not sure that we could ever reach a court proceeding at all.

About a week prior to Mr. Hergenreter's report, I had conversation with a person whose name I have forgotten; however, he is the owner of the Giant Grinder restaurants here in Fairbanks. He reported to me that his thirteen year old daughter was getting Marijuana at school and from a young man in the neighborhood. I explained the necessity for a statement from his daughter in an effort to obtain information that would allow us to prosecute or obtain a search warrant for this individual's residence. After a lengthy explanation of the requirements of the police, this individual was ready to take care of matters himself.

These types of complaints are very common and there is little that the police can do to assist in these frustrating situations. It is disheartening to have to inform parents that there is very little that can be done without statements from juveniles and a lengthy court process.

Our statistics on the use of Marijuana in the schools is limited because we have no means of monitoring the activities in the schools. Our officers are too old to fit in or around schools. Most surveillance efforts are useless as officers in the areas are soon detected. As a practical matter, very few cases that involve juveniles are prosecuted through the District Attorney's Office. It is required that most juvenile offenses are handled through the Juvenile Intake Office and in many cases, there is no actual criminal prosecution. In the event that there can be some sort of criminal prosecution on the part of the juvenile, there is a low priority with reference to Marijuana cases where juveniles are involved in the District Attorney's Office. There may be some prosecution, should we be involved, with an adult selling to juveniles however.

I understand the District Attorney's position in these matters as it is my experience that my office can provide felony cases involving the sale of Cocaine and Heroin involving adults with very little difficulty. It has been my experience that the Areawide Narcotics Team has effectively clogged the court calendar on numerous occasions in the last four years.

The decriminalization of Marijuana in 1975 has finally had an effect on the populace. It can be observed that there is a definite problem within the school systems because of this decriminalization. It is evident by the problem in the Anchorage area where the football coach quit because of the students involved in drugs in that school. I have recently heard, while in Juneau, legislators making the comment that this situation had been blown out of proportion and that they are taking an adverse reaction to the publicity that has been raised. It is my opinion that these particular individuals are irresponsible and it is a shame that they are representing people of Alaska in their positions as legislators.

Prior to the decriminalization of Marijuana, a different set of circumstances existed concerning the involvement of juveniles with alcohol. During school hours, if a juvenile was involved with alcohol, it could be more easily detected than the use of Marijuana today. The individual who was intoxicated by alcohol could be identified by his particular actions and the strong odor of alcohol itself. It was also difficult to consume alcohol in the lavatories or other areas on the school grounds as the alcohol was not quite as easily concealed. Today, however, a "joint" of Marijuana or Marijuana cigarette can be easily concealed and quickly digested during a brief class break.

I feel that it is reasonable to assume that if Cocaine was decriminalized, it would be as prevalent in the schools as Marijuana is today. We already have a problem with Cocaine in our schools. I feel that the public is finally concerned that an action like this might happen. You should be aware that in the Supreme Court Decision in the Erickson Case, the Supreme Court suggested that the legislature take a closer look at the classification of Cocaine as there were some types of new scientific information that might lead one to believe that Cocaine was not as harmful as originally thought. I would submit that this was an irresponsible opinion by the Supreme Court in this matter. Once reading the Opinion, it is evident that the Supreme Court went beyond its duties of interpreting the law, but rather it suggested some liberal change in the law. It is also evident that the Supreme Court selected the scientists that would come up with findings that would satisfy the position they would like to take.

I believe that as time goes on, we will see that the Supreme Court will continue to circumvent the legislature and, therefore, continue the liberal decay in our criminal justice system.

Needless to say, I support SB 49 and any other legislation that would strictly prohibit possession of Marijuana. It would be appreciated if you would disseminate this letter amongst your colleagues. If I can be of any further assistance concerning this matter, please contact me and I will attempt to provide you with the necessary information.

Sincerely,

Craig A. Forster

IN THE SENATE

SENATE BILL NO. 65

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act consolidating and strengthening the state's drug laws; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. PURPOSE. (a) It is the purpose of this Act to consolidate the state's various drug laws into one comprehensive chapter and, through enactment of new provisions, to strengthen law enforcement's ability to more effectively combat those who are finding it attractive to engage in the illicit trafficking of controlled substances.

(b) The legislature reaffirms its former intent to provide identical punishment discretion for criminal offenses involving unlawful trafficking and use of both heroin and cocaine and other substances similarly classified as previously set out in AS 17.10, which provisions are repealed and re-enacted through this Act, even though the legislature recognizes that some of the substances such as heroin and cocaine do not have the same or similar pharmacological characteristics. The detrimental effect on the health and general welfare of our society created through the illicit trafficking and use of these substances is such as to warrant the same condemnation and punishment. Since many of the substances included within this Act have a useful and legitimate medical purpose, provisions have been included to allow for that use while maintaining the ability to monitor that use.

* Sec. 2. AS 17.12.010 is amended to read:

Sec. 17.12.010. [ACTS PROHIBITED] (a) Except as otherwise provided in this chapter, it is unlawful for a person to manufacture, distribute [COMPOUND, COUNTERFEIT], possess, [HAVE UNDER HIS CONTROL,

SELL, PRESCRIBE, ADMINISTER,] dispense, or possess with intent to manufacture, distribute, or dispense a controlled substance [GIVE, BARTER, SUPPLY OR DISTRIBUTE IN ANY MANNER, A DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUG].

* Sec. 3. AS 17.12.010 is amended by adding new subsections to read:

(b) No person may obtain, attempt to obtain, procure, or attempt to procure, a controlled substance by

(1) fraud, deceit, misrepresentation, or subterfuge;

(2) forgery or alteration of a prescription or written order;

(3) concealment of a material fact; or

(4) use of a false name or giving of a false address.

(c) No person may wilfully make a false statement in a prescription, order, report, or record required by this chapter.

(d) No person may, for the purpose of obtaining a controlled substance, falsely assume the title of, or represent himself to be, a manufacturer, wholesaler, pharmacist, physician, dentist, veterinarian, or other authorized person.

(e) No person may make or utter a false or forged prescription or false or forged written order.

(f) No person may affix a false or forged label to a package or receptacle containing a controlled substance.

* Sec. 4. AS 17.12 is amended by adding a new section to read:

Sec. 17.12.015. CONTINUING CRIMINAL ENTERPRISE. (a) No person may engage in a continuing criminal enterprise. Upon conviction, a person who engages in a continuing criminal enterprise shall be sentenced

(1) for the first offense, to all of the following:

(A) a term of imprisonment of no less than 10 years and no more than life;

(B) a fine of no more than $100,000; and

(C) the forfeiture prescribed in (b) of this section;

(2) for the second and subsequent offenses, to all of the following:

(A) a term of imprisonment of no less than 20 years and no more than life;

(B) a fine of no more than $200,000; and

(C) the forfeiture prescribed in (b) of this section.

(b) A person who is convicted of engaging in a continuing criminal enterprise shall forfeit to the state

(1) the profits obtained by him in that enterprise; and

(2) any of his interest in, claim against, or property or contractual rights of any kind affording a source of influence over that enterprise.

(c) The imposition or execution of a sentence required to be imposed under this section may not be suspended and probation or parole may not be granted until the minimum term of imprisonment specified in this section has been served. AS 12.55.080 and 12.55.085 are inapplicable to the extent that they are inconsistent with this subsection.

(d) For purposes of this section, a person is engaged in a continuing criminal enterprise if

(1) he commits a violation of this chapter which is punishable as a felony; and

(2) that violation is a part of a continuing series of violations of this chapter

(A) which he undertakes in concert with five or more other persons with respect to whom he occupies a position of organizer, a supervisory position, or any other position of management; and

(B) from which he obtains substantial income or re-

sources.

* Sec. 5. AS 17.12.020 is amended to read:

Sec. 17.12.020. AUTHORIZED POSSESSION. A person may lawfully possess a controlled substance [DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUG] that has been lawfully prescribed, sold, or dispensed by a practitioner if the controlled substance is [DRUGS ARE]

(1) for use by the person in possession or a member of his household; or

(2) for administration to an animal owned by him or a member of his household [; OR

(3) DESIGNATED BY THE COMMISSIONER FOR USE IN LABORATORIES OR INSTITUTIONS FOR EDUCATIONAL OR TEACHING RESEARCH, OR FOR CHEMICAL ANALYSIS; SUCH A LABORATORY OR INSTITUTION MUST FIRST OBTAIN A PERMIT FROM THE COMMISSIONER WHICH SHALL SPECIFY THE DRUGS, THE POSSESSION OF WHICH IS ALLOWED, DELINEATE AND RESTRICT THEIR USE OR DISPOSAL, IDENTIFY THE PERMITTEE AND PROMULGATE THE RULES AND REGULATIONS CONSIDERED NECESSARY TO FULFILL THE REQUIREMENTS OF THIS CHAPTER].

* Sec. 6. AS 17.12.030 is repealed and re-enacted to read:

Sec. 17.12.030. LEGITIMATE INDUSTRY. A controlled substance may be manufactured, distributed, possessed, or dispensed by a practitioner acting in the ordinary and authorized course of his business under federal registration if evidence of that federal registration is filed with the department.

* Sec. 7. AS 17.12.050 is amended to read:

Sec. 17.12.050. RECORDS. A practitioner [PERSON] engaged in manufacturing, distributing, or dispensing a controlled substance [COMPOUNDING, PROCESSING, SELLING, DELIVERING OR OTHERWISE DISPOSING OF A DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUG] shall, upon the effective date of this chapter, prepare a complete and accurate record of all

stocks of each drug on hand and shall keep the record for three years. If this record has already been prepared in accordance with federal law, no additional record is required if all of these records have been retained and are made available to the department upon request. A practitioner [ON AND AFTER AUGUST 4, 1968, A PERSON] manufacturing, distributing, dispensing, or possessing a controlled substance [COMPOUNDING, OR PROCESSING A DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUG] shall prepare and keep, for not less than three years, a complete and accurate record of the kind and quantity of each controlled substance [DRUG] manufactured, distributed, dispensed, or possessed, [COMPOUNDED, OR PROCESSED AND] the date of the manufacture, distribution, dispensing, or receipt, the name and address of the person from whom the controlled substance was received, and the name and address of the person to whom the controlled substance was distributed or dispensed [COMPOUNDING, OR PROCESSING. A PERSON SELLING, DELIVERING, OR OTHERWISE DISPOSING OF A DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUG SHALL PREPARE OR OBTAIN, AND KEEP FOR NOT LESS THAN THREE YEARS, A COMPLETE AND ACCURATE RECORD OF THE KIND AND QUANTITY OF EACH DRUG RECEIVED, SOLD, DELIVERED, OR OTHERWISE DISPOSED OF, THE NAME AND ADDRESS FROM WHOM IT WAS RECEIVED AND TO WHOM IT WAS SOLD, DELIVERED, OR OTHERWISE DISPOSED OF, AND THE DATE OF THE TRANSACTION].

* Sec. 8. AS 17.12.060(a) and (b) are amended to read:

(a) A person required by AS 17.12.050 to prepare or obtain and keep records, [AND] a carrier maintaining records with respect to a shipment containing a controlled substance [DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUG], and a person in charge or having custody of the records [,] shall, upon request of an officer or employee designated by the commissioner, permit the officer or employee at reasonable times to have access to and copy the records. For the purposes

of verification of the records and of the enforcement of this chapter, officers or employees designated by the commissioner are authorized to enter, at reasonable times, a factory, warehouse, establishment, or vehicle in which a controlled substance [DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUG] is manufactured, compounded, processed, stored, sold, delivered, dispensed, or otherwise disposed of and to inspect, within reasonable limits and in a reasonable manner, the factory, warehouse, establishment, or vehicle, and all pertinent equipment, finished and unfinished material, containers and labeling and to inventory the stock of these controlled substances [DRUGS] and obtain samples of each controlled substance [THESE DRUGS].

(b) No inspection authorized by (a) of this section extends to (1) financial data, (2) sales data other than shipment data, (3) pricing data, (4) personnel data, or (5) research data unless those data are not kept in separate books and records.

* Sec. 9. AS 17.12 is amended by adding a new section to read:

Sec. 17.12.065. SEARCH WARRANTS. (a) A search warrant relating to an offense involving a controlled substance may be served at any time of the day or night if the judge issuing the warrant is satisfied that there is probable cause to believe that grounds exist for the warrant and for its service at that time.

(b) An officer authorized to execute a search warrant relating to an offense involving a controlled substance for which a penalty of imprisonment for more than one year is authorized may, without notice of his authority and purpose, break open an outer or inner door or window of a building, any part of a building, or anything in a building if the judge issuing the warrant

(1) is satisfied that there is probable cause to believe that

(A) the property sought may, and if notice is given

will, be easily and quickly destroyed or disposed of; or

(B) the giving of notice will immediately endanger the life or safety of the executing officer or another person; and

(2) has included in the warrant a direction that the officer executing it is not required to give notice of his authority and purpose before entering the premises.

(c) An officer acting under a warrant issued under (b) of this section shall, as soon as practicable after entering the premises, identify himself and give the reasons and authority for his entrance upon the premises.

(d) AS 12.35.040 as limited by AS 12.25.100 is inapplicable to the extent that it is inconsistent with this section.

* Sec. 10. AS 17.12.070 is amended to read:

Sec. 17.12.070. PRESCRIPTION REFILL. (a) The substances described as class A in AS 17.12.105(b) may not be dispensed on oral prescription, and written prescriptions for these substances may not be refilled.

(b) In regard to controlled substances other than those referred to in (a) of this section, no [NO] prescription for a controlled substance [DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUG] may be filled or refilled more than six months after the date on which the prescription was issued and no prescription which is authorized to be refilled may be refilled more than five times. Except where specifically prohibited, [NOTHING IN THIS CHAPTER PREVENTS] a practitioner may issue [FROM ISSUING] a new prescription for the same controlled substance [DRUG] either in writing or orally. An oral prescription for the controlled substance [DRUG] shall be promptly reduced to writing on a new prescription blank and filed by the pharmacist filling it and retained for the period prescribed in AS 17.12.050. An oral prescription may not be refilled

unless authorized by the prescriber.

* Sec. 11. AS 17.12.070 is amended by adding new subsections to read:

(c) A pharmacist may, in good faith, sell and dispense a controlled substance to any person upon a written prescription of a physician, dentist, or veterinarian if the prescriber is licensed to practice in this state and the prescription is dated and signed by the prescriber on the day when issued, bears the name and address of the patient for whom, or the owner of the animal for which, the controlled substance is dispensed, and bears the full name, address and federal registry number of the person prescribing the controlled substance. If the prescription is for an animal, it shall state the species of animal for which the controlled substance is prescribed.

(d) The person filling the prescription shall write the date of filling and his own signature on the face of the prescription. The prescription shall be retained on file by the proprietor of the pharmacy in which it is filled for a period of three years so as to be readily accessible for inspection by any public officer or employee engaged in the enforcement of this chapter.

(e) The legal owner of stock of controlled substances in a pharmacy, upon discontinuance of dealing or dispensing those substances, may sell the stock to a manufacturer, wholesaler, or other pharmacy, but only on an official written order.

* Sec. 12. AS 17.12.080 is amended to read:

Sec. 17.12.080. PERSONS EXEMPTED. The provisions of this chapter restricting the possession [POSSESSING AND CONTROL] of a controlled substance [DEPRESSANT, HALLUCINOGENIC AND STIMULANT DRUGS] do not apply to

(1) a common carrier or to a warehouseman, while engaged in lawfully transporting or storing a controlled substance for a practi-

tioner or public officer or agent in performance of his official duties or other person authorized by federal registration to manufacture, distribute, dispense, or possess controlled substances [THESE DRUGS];

(2) an employee of a common carrier or warehouseman while acting within the scope of his employment in lawfully transporting or storing a controlled substance for a practitioner or public officer or agent in performance of his official duties or other person authorized by federal registration to manufacture, distribute, dispense, or possess controlled substances [THESE DRUGS];

(3) a public officer or his employee in the performance of his official duties requiring possession or control of a controlled substance [THESE DRUGS];

(4) temporary, incidental possession by an employee or agent of a person lawfully entitled to possession; or

(5) temporary, incidental possession by a person whose possession is for the purpose of aiding a public officer in performing his official duties.

* Sec. 13. AS 17.12.090 is amended to read:

Sec. 17.12.090. EXEMPTED DRUGS. A controlled substance the manufacture, distribution, dispensing, or possession of which is [DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUGS] exempted from criminal penalty under federal law is [OR UNDER REGULATIONS PROMULGATED BY THE COMMISSIONER ARE] exempted from the application of this chapter. This exemption includes any substances which may, under the federal Food, Drug, and Cosmetic Act (21 U.S.C. sec. 301 et seq.) be lawfully sold over the counter without a prescription.

* Sec. 14. AS 17.12.100 is repealed and re-enacted to read:

Sec. 17.12.100. BURDEN OF PROOF AND LIABILITIES. (a) It is not necessary for the state to negate an exemption or exception in this

chapter in a complaint, information, indictment, or other pleading or in a trial, hearing, or other proceeding under this chapter. The burden of proof of an exemption is upon the person claiming it.

(b) In the absence of proof that a person is an authorized holder of an appropriate federal registration or order form filed with the department, it is presumed that that person is not the holder of the registration or form, and the burden of proof is upon that person to rebut the presumption.

(c) All authorized peace officers, while investigating violations under this chapter in the performance of their official duties, and any person working under their immediate direction, supervision, and instruction are immune from prosecution under this chapter.

(d) Information communicated to a physician in an effort to unlawfully procure a controlled substance is not a privileged communication.

* Sec. 15. AS 17.12 is amended by adding a new section to read:

Sec. 17.12.105. CLASSIFICATION OF CONTROLLED SUBSTANCES. (a) Except as otherwise provided, controlled substances are divided into the following five classes for penalty purposes: class A, class B, class C, class D, and class E.

(b) Unless specifically excepted or unless listed in another classification within this section, class A controlled substances include any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers, (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis:

(1) opium and opiate, and any salt, compound, derivative, or preparation of opium or opiate, excluding apomorphine, dextrorphan, nalbuphine, naloxone, and naltrexone, and their respective salts, but including the following:

(A) raw opium;

(B) opium extracts;

(C) opium fluid extracts;

(D) powdered opium;

(E) granulated opium;

(F) tincture of opium;

(G) codeine;

(H) ethylmorphine;

(I) hydrocodone;

(J) hydromorphone;

(K) metopon;

(L) morphine;

(M) oxycodone;

(N) oxymorphone;

(O) thebaine;

(2) any salt, compound, derivative, or preparation of these which is chemically equivalent or identical with any of the substances referred to in (1) of this subsection, except that these substances do not include the isoquinoline alkaloids of opium;

(3) opium poppy and poppy straw;

(4) coca leaves and any salt, compound, derivative, or preparation of coca leaves, and any salt, compound, derivative, or preparation of these which is chemically equivalent or identical with any of these substances, except that the substances do not include decocainized coca leaves or extractions of coca leaves, which extractions do not con-

tain cocaine or ecgonine;

(5) acetylmethadol;

(6) allylprodine;

(7) alphacetylmethadol;

(8) alphameprodine;

(9) alphamethadol;

(10) benzethidine;

(11) betacetylmethadol;

(12) betameprodine;

(13) betamethadol;

(14) betaprodine;

(15) clonitazene;

(16) dextromoramide;

(17) diampromide;

(18) diethylthiambutene;

(19) difenoxin;

(20) dimenoxadol;

(21) dimepheptanol;

(22) dimethylthiambutene;

(23) dioxaphetyl butyrate;

(24) dipipanone;

(25) ethylmethylthiambutene;

(26) etonitazene;

(27) etoxeridine;

(28) furethidine;

(29) hydroxpethidine;

(30) ketobemidone;

(31) levomoramide;

(32) levophenacylmorphan;

(33) morpheridine;

(34) noracymethadol;

(35) norlevorphanol;

(36) normethadone;

(37) norpipanone;

(38) phenadoxone;

(39) phenampromide;

(40) phenomorphan;

(41) phenoperidine;

(42) piritramide;

(43) proheptazine;

(44) properidine;

(45) propiram;

(46) racemoramide;

(47) trimeperidine;

(48) acetorphine;

(49) acetyldihydrocodeine;

(50) benzylmorphine;

(51) codeine methylbromide;

(52) codeine-N-oxide;

(53) cyprenorphine;

(54) desomorphine;

(55) dihydromorphine;

(56) drotebanol;

(57) etorphine;

(58) heroin;

(59) hydromorphinol;

(60) methyldesorphine;

(61) methyldihydromorphine;

(62) morphine methylbromide;

(63) morphine methylsulfonate;

(64) morphine-N-oxide;

(65) myrophine;

(66) nicocodeine;

(67) nicomorphine;

(68) normorphine;

(69) pholcodeine;

(70) thebacon;

(71) alphaprodine;

(72) anileridine;

(73) bezitramide;

(74) dihydrocodeine;

(75) diphenoxylate;

(76) fentanyl;

(77) isomethadone;

(78) levomethorphan;

(79) levorphanol;

(80) metazocine;

(81) methadone;

(82) methadone-intermediate, 4-cyano-2-dimethylamino-4, 4-diphenyl butane;

(83) moramide-intermediate, 2-methyl-3-morpholino-1, 1-diphenylpropane-carboxylic acid;

(84) pethidine (meperidine);

(85) pethidine-intermediate-A, 4-cyano-1-methyl-4-phenylpiperidine;

(86) pethidine-intermediate-B, ethyl-4-phenylpiperidine-4-carboxylate;

(87) pethidine-intermediate-C, 1-methyl-4-phenylpiperidine-4-carboxylic acid;

(88) phenazocine;

(89) piminodine;

(90) racemethorphan;

(91) racemorphan.

(c) Unless specifically excepted or unless listed in another classification within this section, class B controlled substances include any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis:

(1) 4-bromo-2,5-dimethoxy-amphetamine, also known as bromo-2,5-dimethoxy-a-methylphenethylamine and 4-bromo-2,5-DMA;

(2) 2,5-dimethoxyamphetamine, also known as 2,5-dimethoxy-a-methylphenethylamine and 2,5-DMA;

(3) 4-methoxyamphetamine, also known as 4-methoxy-a-methylphenethylamine and paramethoxyamphetamine, PMA;

(4) 5-methoxy-3,4-methylenedioxy-amphetamine;

(5) 4-methyl-2,5-dimethoxy-amphetamine, also known as 4-methyl-2,5-dimethoxy-a-methylphenethylamine and "DOM" and "STP";

(6) 3,4-methylenedioxy amphetamine;

(7) 3,4,5-trimethoxy amphetamine;

(8) bufotenine, also known as 3-(b-dimethylaminoethyl)-5-hydroxyindole and 3-(2-dimethylaminoethyl)-5-indolol and N,N-

dimethylserotonin and 5-hydroxy-N,N-dimethyltryptamine and mappine;

(9) diethyltryptamine, also known as N,N-diethyltryptamine and DET;

(10) dimethyltryptamine, also known as DMT;

(11) ibogaine, also known as 7-ethyl-6,6,B,7,8,9,10,12,13-octahydro-2-methoxy-6,9-methano-5H-pyrido [1', 2':1,2] azepino [5,4-b] indole and Tabernanthe iboga;

(12) lysergic acid diethylamide;

(13) mescaline;

(14) peyote, meaning all parts of the plant presently classified botanically as Lophophora williamsii Lemaire, whether growing or not, the seeds of the plant, any extract from any part of the plant, and every compound, manufacture, salts, derivative, mixture, or preparation of the plant, its seeds, or extracts;

(15) N-ethyl-3-piperidyl benzilate;

(16) N-methyl-3-piperidyl benzilate;

(17) psilocybin;

(18) psilocyn;

(19) thiophene analog of phencyclidine, also known as: 1-[1-(2-thienyl) cyclohexyl] piperidine and 2-thienyl analog of phencyclidine and TPCP;

(20) phencyclidine, also known as PCP;

(21) mecloqualone;

(22) amphetamine, its salts, optical isomers, and salts of its optical isomers;

(23) methamphetamine, its salts, isomers, and salts of its isomers;

(24) phenmetrazine and its salts;

(25) methylphenidate;

(26) methaqualone;

(27) amobarbital;

(28) secobarbital;

(29) pentobarbital.

(d) Unless specifically excepted or unless listed in another classification within this section, class C controlled substances include any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis:

(1) benzphetamine;

(2) chlorphentermine;

(3) clortermine;

(4) mazindol;

(5) phendimetrazine;

(6) any compound, mixture, or preparation containing amobarbital, secobarbital, or pentobarbital or any salt of any of these substances combined with one or more other active medicinal ingredients which are not listed in any classification in this section;

(7) any suppository dosage form containing amobarbital, secobarbital, or pentobarbital or any salt of any of these substances which are approved by the federal Food and Drug Administration for marketing only as a suppository;

(8) any substance, having a depressant effect on the central nervous system, which contains any quantity or derivative of barbituric

acid or any salt of these;

(9) chlorhexadol;

(10) glutethimide;

(11) lysergic acid;

(12) lysergic acid amide;

(13) methyprylon;

(14) sulfondiethylmethane;

(15) sulfonethylmethane;

(16) sulfonmethane;

(17) nalorphine;

(18) any material, compound, mixture, or preparation containing limited quantities of any of the following substances or any of their salts:

(A) not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with an equal or greater quantity of an isoquinoline alkaloid of opium;

(B) not more than 1.8 grams of codeine per 100 milliliters or not more than 90 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(C) not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with a fourfold or greater quantity of an isoquinoline alkaloid of opium;

(D) not more than 300 milligrams of dihydrocodeinone per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts;

(E) not more than 1.8 grams of dihydrocodeine per 100

milliliters or not more than 90 milligrams per dosage unit, with one or more active nonnarcotic ingredients in recognized therapeutic amounts;

(F) not more than 300 milligrams of ethylmorphine per 100 milliliters or not more than 15 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(G) not more than 500 milligrams of opium per 100 grams or not more than 25 milligrams per dosage unit, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts;

(H) not more than 50 milligrams of morphine per 100 milliliters or per 100 grams, with one or more active, nonnarcotic ingredients in recognized therapeutic amounts.

(e) Unless specifically excepted or unless listed in another classification within this section, class D controlled substances include any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis:

(1) barbital;

(2) chloral betaine;

(3) chloral hydrate;

(4) chlordiazepoxide;

(5) clonazepam;

(6) clorazepate;

(7) diazepam;

(8) ethchlorvynol;

(9) ethinamate;

(10) flurazepam;

(11) lorazepam;

(12) mebutamate;

(13) meprobamate;

(14) methohexital;

(15) methylphenobarbital (mephobarbital);

(16) oxazepam;

(17) paraldehyde;

(18) petrichloral;

(19) phenobarbital;

(20) prazepam;

(21) fenfluramine;

(22) diethlpropion;

(23) phentermine;

(24) pemoline, including organometallic complexes and chelates thereof;

(25) dextropropoxyphene (alpha-(+)-4-dimethylamino-1,2-diphenyl-3-methyl-2-propionoxybutane).

(f) Unless specifically excepted or unless listed in another classification within this section, class E controlled substances include loperamide and any material compound which contains any quantity of a substance listed in this subsection, including its salts, its isomers (whether optical, position, or geometric), and the salts of its isomers whenever the existence of those salts, isomers, or salts of isomers is possible within the specific chemical designation, regardless of whether the listed substance is produced directly or indirectly by

extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis. Class E controlled substances include the following controlled substances, otherwise listed in (b) of this section, when they are combined in the following portions with one or more nonnarcotic active medicinal ingredients in sufficient portion to confer upon the compound mixture preparation valuable medicinal qualities other than those possessed by the class A substance:

(1) not more than 200 milligrams of codeine per 100 milliliters or per 100 grams;

(2) not more than 100 milligrams of dihydrocodeine per 100 milliliters or per 100 grams;

(3) not more than 100 milligrams of ethylmorphine per 100 milliliters or per 100 grams;

(4) not more than 2.5 milligrams of diphenoxylate and not less than 25 micrograms of atropine sulfate per dosage unit;

(5) not more than 100 milligrams of opium per 100 milliliters or per 100 grams.

* Sec. 16. AS 17.12.110(a), (b), and (c) are amended to read:

(a) A person who violates a provision of this chapter relating to the possession [OR CONTROL] of a controlled substance [DEPRESSANT, HALLUCINOGENIC AND STIMULANT DRUGS,] other than a class A controlled substance or marijuana, when his possession [OR CONTROL] is for his own use, is guilty of a misdemeanor and upon conviction is punishable by imprisonment for not more than one year, or by a fine of not more than $1,000, or by both.

(b) A person who violates a provision of this chapter [OTHER THAN ONE MENTIONED IN (a) OF THIS SECTION, OR A PERSON WHO VIOLATES A PROVISION OF THIS CHAPTER] relating to the manufacture, distribution, dis-

pensing, or possession with intent to manufacture, distribute, or dispense, of a class A controlled substance [OR CONTROL OF DEPRESSANT, HALLUCINOGENIC AND STIMULANT DRUGS, WHEN HIS POSSESSION OR CONTROL IS FOR THE PURPOSE OF SALE OR OTHER DISPOSAL TO ANOTHER PERSON,] is guilty of a felony and upon conviction is punishable as follows:

(1) for the first offense, he shall be sentenced to a term of [BY] imprisonment of [FOR] not less than two years nor more than 25 years and may, in addition, be ordered to pay [, OR BY] a fine of not more than $20,000 [, OR BY BOTH];

(2) for the second and subsequent offenses, he shall be sentenced to a term of [BY] imprisonment of [FOR] not less than four years nor more than [ANY TERM OF YEARS OR] life and may, in addition, be ordered to pay [, OR BY] a fine of not more than $25,000 [, OR BY BOTH].

(c) A person 19 years of age or older who violates a provision of this chapter by distributing or dispensing a controlled substance [SELLING OR OTHERWISE DISPOSING OF A DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUG] to a person less than 19 years of age is guilty of a felony and upon conviction is punishable by imprisonment for any term of years or life, or by a fine of not more than $25,000, or by both.

* Sec. 17. AS 17.12.110 is amended by adding new subsections to read:

(g) A person who violates a provision of this chapter by possession of a class A controlled substance when his possession is for his own use is guilty of a felony and upon conviction is punishable by imprisonment for not more than five years, or by a fine of not more than $5,000, or by both.

(h) A person who violates a provision of this chapter relating to the manufacture, distribution, dispensing, or possession with intent to manufacture, distribute, or dispense, of a class B controlled substance is guilty of a felony and upon conviction is punishable as follows:

(1) for the first offense, by imprisonment for not more than 15 years, or by a fine of not more than $15,000, or by both;

(2) for the second and subsequent offenses, by imprisonment for not more than 30 years, or by a fine of not more than $30,000, or by both.

(i) A person who violates a provision of this chapter relating to the manufacture, distribution, dispensing, or possession with intent to manufacture, distribute, or dispense, of a class C controlled substance is guilty of a felony and, upon conviction, is punishable as follows:

(1) for the first offense, by imprisonment for not more than 10 years, or by a fine of not more than $10,000, or by both;

(2) for the second and subsequent offenses, by imprisonment for not more than 20 years, or by a fine of not more than $20,000, or by both.

(j) A person who violates a provision of this chapter relating to the manufacture, distribution, dispensing, or possession with intent to manufacture, distribute, or dispense, of a class D controlled substance or marijuana is guilty of a felony and, upon conviction, is punishable as follows:

(1) for the first offense, by imprisonment for not more than five years, or by a fine of not more than $5,000, or by both;

(2) for the second and subsequent offenses, by imprisonment for not more than 10 years, or by a fine of not more than $10,000, or by both.

(k) A person who violates a provision of this chapter relating to the manufacture, distribution, dispensing, or possession with intent to manufacture, distribute, or dispense, of a class E controlled substance is guilty of a felony and, upon conviction, is punishable as follows:

(1) for the first offense, by imprisonment for not more than

two years, or by a fine of not more than $2,000, or by both;

(2) for the second and subsequent offenses, by imprisonment for not more than four years, or by a fine of not more than $4,000, or by both.

(l) A person who violates (b), (c), (d), (e), or (f) of sec. 10 of this chapter is guilty of a felony and upon conviction is punishable by imprisonment for not more than five years, or by a fine of not more than $10,000, or by both.

(m) A person who violates any provision of this chapter, the penalty for which is not provided in (a) - (l) of this section or in AS 17.12.015 is subject to a civil penalty of not more than $25,000 unless the violation was committed intentionally, in which case the person is guilty of a misdemeanor and upon conviction is punishable by imprisonment for not more than one year, or by a fine of not more than $25,000, or by both.

(n) The imposition or execution of a sentence required to be imposed under this section may not be suspended and probation or parole may not be granted until the minimum term of imprisonment specified in this section has been served. AS 12.55.080 and 12.55.085 are inapplicable to the extent that they are inconsistent with this subsection.

* Sec. 18. AS 17.12 is amended by adding a new section to read:

Sec. 17.12.125. INFORMATION ON SENTENCING. No limitation may be placed on the information concerning the background, character, or conduct of a person convicted of an offense which a court may receive and consider for the purpose of imposing an appropriate sentence under this chapter.

* Sec. 19. AS 17.12.130 is repealed and re-enacted to read:

Sec. 17.12.130. FORFEITURE. (a) The following are subject to forfeiture to the state and no property rights exist in them:

(1) any controlled substance which has been manufactured, distributed, dispensed, or acquired other than as provided in AS 17.12.-020, 17.12.030, and 17.12.080;

(2) any raw material, product, or equipment of any kind which is used, has been used, or is intended for use in manufacturing, compounding, processing, or delivering a controlled substance by someone other than one authorized under this chapter;

(3) any property which is used, has been used, or is intended for use as a container for property and described in (1) or (2) of this subsection;

(4) any conveyance, including but not limited to aircraft, vehicle, or vessel, which has been used, is used, or is intended for use to transport or in any manner facilitate transportation of property described in (1) or (2) of this subsection; however,

(A) no conveyance is subject to forfeiture under this section if the owner of the conveyance shows that its use and violation of this chapter was committed by another person while that person was in unlawful possession of the conveyance without the owner's permission or acquiescence;

(B) forfeiture of a conveyance encumbered by a bona fide security interest at the time of seizure is subject to the interest of the secured party if the secured party shows that the conveyance used in violation of this chapter was committed by another person and that the secured party neither consented nor was privy to the violation;

(5) any book, record, or research product and material, including formulas, microfilm, tapes, and data which are used, have been used, or are intended for use in violation of this chapter;

(6) any money or negotiable instrument derived from any

activity prohibited by this chapter;

(7) any firearm used during or in furtherance of a violation of this chapter.

(b) Property listed in (a) of this section may be forfeited to the state upon conviction of a violation of this chapter of a person who possessed or owned the property at the time of the violation or upon judgment of a court of competent jurisdiction in a civil proceeding in rem that an item meets the criteria of (a) of this section.

(c) Property subject to forfeiture under this section may be seized by a peace officer upon filing of a verified civil complaint in rem against the property upon receipt of which the clerk of the court shall immediately issue a warrant for the arrest of the specified property. Seizure without such a warrant may be made if

(1) the seizure is incident to an arrest or a search under an administrative inspection warrant;

(2) the property subject to seizure has been the subject of a prior judgment in favor of the state in a criminal proceeding or a civil proceeding in rem based upon this chapter;

(3) there is probable cause to believe the property is either directly or indirectly dangerous to health or safety; or

(4) there is probable cause to believe that the property has been or is intended to be used in violation of this chapter.

(d) Upon service or publication of notice of commencement of an action under this section, a person claiming interest in the property shall file within 20 days from the publication or service, or such additional time as granted by the court, a notice of claim setting out the nature of his interest, the date it was acquired, the consideration paid, and an answer to the state' allegations. If no claim and answer is filed within the time specified, the property described in the state'

allegation shall be ordered forfeited to the state without further proceedings or showings.

(e) Questions of fact or law raised by a notice of claim and answer of any claimant in an action commenced under this section shall be determined by the court sitting without a jury. Such a proceeding may, in the court's discretion, be held in abeyance until conclusion of any pending criminal charges under this chapter against the claimant.

(f) Property taken or obtained under this section is not replevi-able, and shall remain in the custody of the state subject only to the orders and decrees of the court or other official having jurisdiction over the property. If property is seized under this chapter, the Department of Public Safety may

(1) place the property under seal; or

(2) remove the property to a place considered by the Department of Public Safety to be more convenient or safe for its storage.

(g) When property is forfeited under this section, the Department of Public Safety may

(1) retain it for official use;

(2) sell that which is not required to be destroyed by law and which is not harmful to the public and use the proceeds to pay all proper expenses of the forfeiture and sale proceedings, including expenses of seizure, maintenance of custody, advertising and court costs and transmit the remainder to the general fund of the state;

(3) destroy property harmful to the public;

(4) take custody of the property and remove it for disposition in accordance with law; or

(5) forward it to the federal Drug Enforcement Administration for disposition.

(h) Any controlled substance manufactured, distributed, or pos-

sessed other than as provided in AS 17.12.020, 17.12.030, and 17.12.080 is contraband and shall be seized and summarily forfeited to the state.

(i) Any plant from which a controlled substance may be derived and which is wild growth or not sanctioned by a federal registration on file with the department may be seized and summarily forfeited to the state.

(j) For purposes of this section, any money or negotiable security in excess of $200 found on a defendant at the time of an arrest for a violation of this chapter and any money or negotiable instrument in excess of $200 found during the course of a search incident to an arrest or under a warrant in regard to provisions of this chapter is presumed to have been derived from an activity prohibited by this chapter. The burden of proof is upon the claimant of the money or negotiable instrument to rebut this presumption.

(k) In a proceeding brought for the forfeiture of a conveyance under this section where the property is claimed by any person, the burden of proof shall shift to the claimant upon the establishment by the state to the satisfaction of the court that probable cause exists for the institution of the forfeiture proceedings.

(l) Any firearm found on a defendant at the time of an arrest for a violation of this chapter or any firearm found during the course of a search incident to an arrest or under a warrant in regard to the provisions of this chapter is presumed to have been used during or in furtherance of a violation of this section. The burden of proof is upon the claimant of the firearm to rebut this presumption.

* Sec. 20. AS 17.12 is amended by adding a new section to read:

Sec. 17.12.135. ENFORCEMENT COOPERATION. It is the duty of the commissioner of public safety, officers of the division of state troopers, officers appointed to enforce criminal law in this state or another state, local government law enforcement officers, the attorney

general, and all prosecuting attorneys to enforce all provisions of this chapter and to cooperate with agencies charged with enforcement of the laws of the United States, of this state, and of all other states, relating to controlled substances.

* Sec. 21. AS 17.12.150 is repealed and re-enacted to read:

Sec. 17.12.150. DEFINITIONS. In this chapter, unless the context requires otherwise,

(1) "commissioner" means the commissioner of health and social services;

(2) "controlled substance" means a drug, substance, or immediate precursor included within any of the classifications of sec. 105 of this chapter, and marijuana;

(3) "conveyance" means a vessel, vehicle, trailer, aircraft, or other mode of transportation used to transport an illegally possessed controlled substance;

(4) "counterfeit substance" means a controlled substance which, or the container or labeling of which, without authorization, bears the trademark, trade name, or other identifying mark, imprint, number, or device, or any likeness to it, of a manufacturer, distributor, or dispenser other than the person who in fact manufactured, distributed, or dispensed the substance;

(5) "deliver" or "delivery" means the actual, constructive, or attempted transfer from one person to another of a controlled substance, whether or not there is an agency relationship;

(6) "dentist" means a person authorized by law to practice dentistry in this state;

(7) "dispense" means to deliver a controlled substance to an ultimate user or research subject by a practitioner, including the prescribing, administering, packaging, labeling, or compounding neces-

sary to prepare the substance for that delivery;

(8) "distribute" means to deliver, other than by administering or dispensing, a controlled substance;

(9) "drug"

(A) means

(i) substances recognized as drugs in the official United States Pharmacopoeia, official Homeopathic Pharmacopoeia of the United States, or official National Formulary, or any supplement to any of them;

(ii) substances intended for use in the diagnosis, cure, mitigation, treatment, or prevention of disease in humans or animals;

(iii) substances, other than food, intended to affect the structure or any function of the body of humans or animals; and

(iv) substances intended for use as a component of any article specified in (i), (ii), or (iii) of this subparagraph;

(B) does not include devices or their components, parts, or accessories;

(10) "hospital" means an institution for the care and treatment of the sick and injured, approved by the Board of Pharmacy as proper to be entrusted with the custody of controlled substances, under the direction of a physician, dentist, or veterinarian;

(11) "immediate precursor" means the principal compound commonly used or produced primarily for use, and which is an immediate chemical intermediary used or likely to be used in the manufacture of a controlled substance, the control of which is necessary to prevent, curtail, or limit manufacture of that controlled substance;

(12) "laboratory" means a laboratory approved by the Board of Pharmacy as proper to be entrusted with the custody of controlled substances and the use of controlled substances for scientific and medical purposes and for purposes of instruction;

(13) "manufacture"

(A) means the production, preparation, propagation, compounding, or processing of a drug or other substance, either directly or indirectly by extraction from substances of vegetable origin or independently by means of chemical synthesis or by a combination of extraction and chemical synthesis;

(B) includes any packaging or repackaging of a drug or other substance or labeling or relabeling of its container; but

(C) does not include the preparation, compounding, packaging, or labeling of a drug or other substance in conformity with applicable state or local law by a practitioner as an incident to his administration or dispensing of the drug or substance in the course of his professional practice;

(14) "manufacturer" means a person who manufactures a drug or other substance;

(15) "marijuana" means all parts of the plant Cannabis, whether growing or not, the seeds of that plant, the resin extracted from any part of that plant, and every compound, manufacture, salt, derivative, mixture, or preparation of that plant, its seeds, or its resin; "marijuana" does not include the mature stalks of that plant, fiber produced from mature stalks, oil or cake made from the seeds of that plant, any other compound, manufacture, salt, derivative, mixture, or preparation of mature stalks (except the resin extracted from them), fiber, oil, or cake, or the sterilized seed of that plant which is incapable of germination;

(16) "nonnarcotic substance" means a substance not listed as a class A controlled substance under sec. 105 of this chapter;

(17) "official written order" means an order written on a form provided for that purpose by the appropriate federal official under any laws of the United States making provisions for such a form; if such order forms are required by federal law and no order form is provided by a federal officer, then on an official form provided for that purpose by the Alaska Board of Pharmacy;

(18) "opiate" means a substance having an addiction forming or addiction-sustaining liability similar to morphine or being capable of conversion into a drug having an addiction-forming or addiction-sustaining liability;

(19) "opium poppy" means the plant of any species of Papaver containing the phenanthrine alkaloids of opium;

(20) "owner of conveyance" means the person having lawful de facto control over a conveyance irrespective of who may be listed on its official registration;

(21) "poppy straw" means all parts, except the seeds, of the opium poppy, after mowing;

(22) "practitioner" means

(A) a physician, dentist, veterinarian, scientific investigator, or other person licensed, registered, or otherwise permitted to distribute, dispense, conduct research with respect to, or administer a controlled substance in the course of professional practice or research in this state;

(B) a pharmacy, hospital, or other institution licensed, registered, or otherwise permitted to distribute, dispense, conduct research with respect to, or administer a controlled substance in the course of professional practice or research in this state;

(23) "physician" means a person licensed to practice medicine in this state;

(24) "production" means the manufacture, planting, cultivation, growing, or harvesting of a controlled substance;

(25) "ultimate user" means a person who lawfully possesses a controlled substance for his own use or for the use of a member of his household or for administering to an animal owned by him or by a member of his household;

(26) "veterinarian" means a person authorized by law to practice veterinary medicine in this state;

(27) "wholesaler" means a person who supplies controlled substances that he himself has not produced or prepared, on official written orders, but not on prescriptions.

* Sec. 22. AS 17.12 is amended by adding a new section to read:

Sec. 17.12.160. SHORT TITLE. This chapter may be cited as the Controlled Substances Act.

* Sec. 23. AS 08.64.380(3)(B) is amended to read:

(B) habitual overuse of alcoholic beverages or <u>controlled substances</u> [DEPRESSANT, HALLUCINOGENIC OR STIMULANT DRUGS,] as defined in <u>AS 17.12</u> [AS 17.12.150(3), OR ADDICTION TO THE USE OF NARCOTIC DRUGS AS DEFINED IN AS 17.10.230(13)];

* Sec. 24. AS 08.80.260(2) is amended to read:

(2) selling, bartering, or making available <u>a controlled substance as defined in AS 17.12</u> [, MORPHINE, COCAINE OR OTHER NARCOTIC] to a person addicted to the use of <u>a controlled substance</u> [DRUGS] except upon prescription issued by a licensed physician;

* Sec. 25. AS 08.80.260(9) is amended to read:

(9) violation of regulations pertaining to the provision of adequate security for <u>controlled substances</u> [DANGEROUS DRUGS].

* Sec. 26. AS 08.80.470 is amended to read:

Sec. 08.80.470. CONSTRUCTION. Nothing in this chapter amends, modifies, repeals or otherwise changes any provision of the Controlled Substances Act (AS 17.12) [UNIFORM NARCOTIC DRUG ACT (AS 17.10)] or the Alaska Food, Drug and Cosmetic Act (AS 17.20).

* Sec. 27. (a) Prosecution for a violation of law occurring before the effective date of this Act is not affected or abated by this Act. Violation of any law repealed by this Act may still be prosecuted and brought to a final determination in accordance with the laws and regulations in effect at the time of the violation.

(b) Civil seizures or forfeitures and injunctive proceedings commenced before the effective date of this Act are not affected by this Act.

(c) All administrative proceedings pending under prior laws which are superseded by this Act shall be continued and brought to a final determination in accordance with the laws and regulations in effect before the effective date of this Act.

(d) This Act applies to violations of law, seizures and forfeitures, injunctive proceedings, administrative proceedings, and investigations which occur on or after the effective date of this Act.

* Sec. 28. Orders issued and regulations adopted under a law affected by this Act and in effect on the effective date of this Act and not in conflict with this Act continue in effect until modified, superseded, or repealed.

* Sec. 29. The following laws are repealed: AS 11.60.100 - 11.60.130; AS 17.10; AS 17.12.040(b) and (c), 17.12.060(c), 17.12.120; and AS 17.15.

* Sec. 30. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Glenn Hackney, Chairman
Frank Ferguson, Vice Chairman
Mike Colletta
Bettye Fahrenkamp
Arliss Sturgulewski

April 9, 1979

Robert Ziegler, Chairman
Senate Judiciary Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Chairman Ziegler,

The Senate Health, Education and Social Services Committee, in its review of SB 65, has red flagged the following sections of SB 65 for close examination by the Senate Judiciary Committee: sections 14 - 18.

Section 14 would require that an individual claiming exemption from the provisions of this bill would bear the burden of proof in proving his exemption. This Committee requests that Judiciary address the constitutionality of placing the burden of proof on the claimant as opposed to placing the burden of proof on the state to prove that the individual is not exempt.

Section 15 divides controlled substances into five categories similar to categories established under federal law. However, the classification format that the state intends to adopt through this bill, i.e. Class A, Class B, etc., varies from the federal government's in that the federal government's format is based on a numerical system of classification, i.e. Schedule I, Schedule II, etc. In order to avoid problems that

might surface as a result of using dissimilar classification formats, this Committee requests that Judiciary consider the merits of adopting a system of classification that will coincide with the classification format used by the federal government.

Sections 16, 17, and 18. This Committee requests that Judiciary take a look at the conformity between the penalty sections of this bill and the penalities prescribed for similar offenses in the Alaska Criminal Code.

Sincerely,

Glenn Hackney
Chairman

People for Better Education

Governor on Drug Bill?

A full page color advertisement in High Times, quote:

"Imagine planting a victory garden and reaping harvest legally. Home-grown marijuana fresh from mother earth. A new idea? Not at all, in Alaska the State Supreme Court says privately growing your own marijuana is OK . . . and no hassles.

The High Times magazine claims four million readers nationally. How many drug sellers and users are attracted to Alaska as a result of our marijuana law, outdated hard drug laws and lenient court system?

Last April Governor Hammond declared he would not support Drug Bill S.B. 518 the Controlled Substances Act. He said, "I feel strongly that this is not an appropriate year to deal with as controversial and devisive a subject as this one". (Was it not "the appropriate year" because it was an election year?)

Governor Hammond stated further that . . . "in the light of substantially increased sentences, the flaws (in our drug law) do not seem sufficient to call for emergency action . . . therefore my administration will not support a major revision in drug laws."

Governor Hammond and the legislators have had ample evidence of the problems of drug abuse and an ever-growng force of drug pushers.

People for Better Education contacted Governor Hammond and every legislator twice last year asking if they would support the Controlled Substance Act, S.B. 65, now.

The Governor promised to write PFBE on his decision in December. We have not received an answer. Perhaps the fact that the school drug abuse problem was on the front pages of the Times most of December has made it difficult for the Governor to respond.

The Governor owes each citizen of Alaska an answer on his position on the current drug laws. If you think you deserve an answer from the Governor, please circle this article in your newsletter and fill in the blanks.

Name _____

Address _____

City _____ Zip _____

Governor Hammond, I want to know if you consider drug abuse a priority issue? Will you support Controlled Substances Act, S.B. 65 and the companion House Bill?

Send to: The Honorable Jay Hammond, Governor, State of Alaska
Pouch A, Juneau, Alaska 99811

DRUG PROBLEM IGNORED BY LEGISLATURE

Concern among law enforcement officials that Alaska is rapidly becoming a haven for drug dealers and abusers.

Legislation that will consolidate and strengthen Alaska drug laws was drafted by former U.S. Attorney, G. Kent Edwards, on behalf of and in conjunction with the Associations of the Alaska Peace Officers and the Chiefs of Police which have combined memberships of more than 650. This marks the first time that these associations have undertaken efforts of this kind, which underscores the seriousness of the problem.

Although there was great concern for the problem of drug abuse and obvious support for S.B. 518, last year both the problem and a solution were virtually ignored by the legislature.

The original Senate Bill 518 was reintroduced as S.B. 65 early this year. Strong citizen support and endorsement of this bill includes:

The Alaska Peace Officers Association
The Alaska Chiefs of Police
The Pharmaceutical Association
People for Better Education
The Executive Board of the Anchorage P.T.A.
The Executive Board of the Alaska Association of Secondary Principals
The Anchorage School Board
The Anchorage Chamber of Commerce
Anchorage Christian Schools
Major Church Denominations
Calista Corporation
Anchorage Women's Club

We urge our membership and others concerned about drug abuse and related problems of theft and violent crimes to contact their legislators and request a written commitment of support for the passage of S.B. 65 and the companion House Bill.

What Every Parent Should Know

About Drug Availability

According to Sargent Donald Trudeau, head of the Metropolitan Drug Enforcement Unit, the numbers of children age 15 years and under arrested on drug charges has doubled in one year. Seventy-five percent of these arrests were made in the Anchorage area.

Over one and three-quarter million dollars worth of illegal drugs were seized last year. Metro estimates that these seizures represent less than ten percent of the illicit drugs sold in Alaska. By this estimate, over $17,000,000 worth of drugs were used by a drug culture consisting largely of young adults and teenagers.

Drug Availability Information

Drug magazines such as "High Times" are devoted to the promotion of drug use and drug products.

High Times includes national drug market quotes. Teenagers can purchase High Times at many locations in Anchorage including:

Pay 'N Save
All Book Caches
Qwik Stop Stores

The Metro Drug Unit also warns parents that drug pushers hang out **wherever kids gather**, e.g., skating rinks, skateboard rinks, movie houses, pool and recreation areas, parking lots, disco's, etc.

"High Times" magazine includes advertisements for "Baby Toker Shirts", showing a year old baby sitting on a pile of marijuana leaves, wearing a t-shirt with a marijuana leaf design, with a marijuana cigarette in his mouth. We are currently gathering material for an article on the correlation of drug abuse and child abuse.

High Times advertised "Thai Power Filtration Kit" purported to change marijuana to a dangerous highly concentrated hash oil. The Metro Drug Unit reports that these machines are highly unstable and have blown up in the hands of users.

High Times provides drug users with international drug market quotations.

Drug Paraphernalia

A term used to describe various objects used in the ingestion of drugs into the body. These objects are widely available and sold in stores where teenagers and young people shop. No law exists to prevent their sale.

We strongly advise that parents complain to managers and boycott stores and businesses that sell drug paraphernalia and drug magazines, and that they take whatever measures necessary to keep their children out of these stores.

KIDS AND DRUGS

The initial hearings on the Board proposal were very encouraging. Solutions for this problem must be shared by the court system, the Municipality, the State Administration and the Legislature. Kids don't make drugs on the school campus. Somewhere along the line an adult pusher is involved. This individual will just move his distribution point to reach the kids in another way if he is not stopped.

Been There . . .

I served as a student drug informant in an Anchorage high school several years ago. I was 15 years old at the time.

School administrations gave me money to purchase drugs from another student. This student was a well-known pusher.

As a result of this contact, the pusher was arrested with an assortment of drugs in his possession. Although he was already on probation, the court sent him back to school before the week was out. He went right back to selling drugs and was regarded as a hero by a lot of the kids because he had beaten the establishment.

I wonder if the courts are aware that these kids brag about being trained by adult suppliers on how to get sympathy if they get caught?

If more adults could see these pushers in action and how kids hang around and follow them because they have plenty of money and a good supply of drugs, maybe they would deal with pushers more realistically.

The drug culture is so prevalent that the majority of kids in the Anchorage school system will be affected in some way.

By the time kids get to junior high school the peer-group influence is so strong that many kids who don't use drugs pretend that they do. This pretense helps to create and sustain the drug culture and is only a short step into actual drug involvement for many.

Bad trips resulting from drug abuses are fairly common. Like the night I received a phone call from a friend who grew up in my neighborhood. He was in the middle of a bad trip and said he was going to kill himself before a giant spider could eat him alive. It took two hours to talk him down from a trip that he had created for himself by combining hash oil and pills.

Straight kids also have their own problems dealing with the drug orientated culture. The smart ones soon learn that high school is no place to show that you are actively against drugs.

My involvement as a narc resulted in two years of harrassment, threats against myself and my girl, a beating and an ulcer that only gets better when I leave the state.

My experience is important only as an indicator of the depth of the problem. I have watched good people who have tried to stop the drug flow boxed into corners by bureaucracy and ignorance.

It is reassuring that people like Coach Larson and the Times Staff cared enough about kids to tell it like it is. Now the problem and the solution rightfully belong to everybody.

HOW IT HAPPENS

Ever wonder how People for Better Education or the Alert Newsletter get information printed months before these stories turn up on the front pages of the local papers?

Take, for instance, the piece we published last issue on school district procedures that cause "inflated" Iowa testing scores. This story originally came to us from a group of teachers. We researched the story for six months, interviewing other teachers.

We then contacted a few select members of administration to verify these facts. We were told that central administration so regulates these testing procedures that in order to insure that principals assure that teachers carry out the "pre-testing procedures" in each classroom, a portion of the new principals merit pay system is based on their performance.

This research indicated the solidity of our story but we wanted further substantiation. At this point, we contacted the first group of teachers who gave us the story originally. They provided People for Better Education with sample tests and teachers' orientation test material. We requested that they write a step-by-step procedure and the effects on the testing scores, which they did, and we published almost verbatim in the body of the story.

Each item printed is given this rigorous investigation and resarch.

AS A MAN THINKETH . . .

The choice of poetry and reading matter by individuals or groups of people provides understanding and insight into their thought processes and beliefs.

The Alaska Women's Resource is widely advertised as a woman's counseling service. If this poem reflects the philosophy of this organization, should your tax dollars be spent to support this activity? Alaska Women's Resource has received taxpayer funds through CETA and grants.

COMING OUT

by Jacqueline Lapidus

The first person I loved was a woman
my passion for her lasted thirty years
and was not returned
she never let me suck her nipples
she kept secrets between her legs
she told me men would love me
for myself
she couldn't tell me ways to love myself
she didn't know

Mother, I would like to help you swim
back against the foaming river
to the source of our incestuous fears
but you're so tired out beyond
the breakers
and I am upstream among my
sisters spawning.
The Lesbian Reader

This "Poem" is reprinted from the Alaska Women's Resource paper "The Sourceline."

CARTER AND THE FEMINISTS

President Carter has been burned twice in the past year by the hot fires of radical feminism.

Both Midge Constansa and Bella Abzug reacted true to the fanaticism of the feminist cause when they chose to use their positions of presidential appointment to shaft the president.

Carter's first reaction to the "unladylike" behavior of Ms. Constansa and Ms. Abzug was probably surprise, the second reaction was obviously fury.

Those of us who have watched the growing threat of the radical feminist movement are not in the least surprised by these actions. The president is learning a lesson those of us who consider ourselves foes of the movement learned in the first round of battle.

By their actions and by their own definition, feminists consider themselves to be "in revolution." Their intent has been to wage a "no-holds barred" battle using federal and state tax dollars, people, laws and even the constitution against those they consider to be the "enemy."

Radical feminists will continue to use and abuse people at every opportunity until the state and national leaders realize that embracing the feminist cause is like snuggling up to a rattlesnake — the slightest movement in any direction could be both dangerous and embarrassing. If you don't believe it, just ask the president.

MACOS DROPPED FROM ANCHORAGE SCHOOLS

Man: A Course of Study, raised the ire of parents and congressmen nationally and in Anchorage when it was discovered that the federal government paid seven million dollars to a former expert in psychological warfare for the creation of a course in anthropology, sensitivity training and behavior modification designed for ten year olds.

After four years in Anchorage classrooms, MACOS was phased out of the school district.

We hope it will be helpful to parents nationally who are still plagued with MACOS to find that the Anchorage schools have disposed of this material. It should be remembered that the Anchorage School District boasts the largest Eskimo population in the nation. Even under these circumstances, justification for MACOS could not hold up.

National parent groups wishing to obtain MACOS materials please mail $5.00 for printing and mailing to:

People for Better Education

Action Committed Teens — A.C.T.

Surveys conducted in high schools nationwide consistently determine that peer pressure is the main reason students begin smoking, drinking, or initially become involved using drugs. How to effectively cope with this problem and counteract the pressure exerted by older students has long plagued parents and school administrators. For example:

A recent newspaper article reported on research conducted in Houston, Texas. Findings there indicated it is a waste of time to tell a ten-year old that smoking may cause lung cancer in 30 years. Students do not concern themselves in the least with the harmful effect of 20-30 years of smoking cigarettes. Fear is not an effective teaching tool!

Because of these findings, it was apparent that a different delivery system was necessary. A unique and rather refreshing approach was tried on the elementary school level in Anchorage. A teen panel was chosen from a nearby high school. The panel presented a powerful message to 5th and 6th graders.

The interests of the teenagers on the panel represented a variety of activities ranging from student government to swing choir, from sky-diving to karate, from outstanding academic achievement to volleyball and basketball. The message was loud and clear — ***get involved!*** The panel told the elementary kids that with so many neat things to do there is a place and an interesting activity for each and every student. The younger kids paid rapt attention and asked searching and enthusiastic questions — the teenager panel responded with concern and interest.

One of the students knelt and, looking at the kids seated there on the gym floor, said "You're special. Each one of you is unique and different. Don't let anybody con you into hanging out with losers."

The initial programs sponsored by American Cancer Society were intended to encourage students to avoid the smoking habit by never starting. It became evident that smoking is but one symptom of the complex condition caused by peer pressure and a basic need for acceptance.

Recognizing the potential for high school students to deliver this message so often unheard when voiced by parents, People for Better Education will work to expand this program and organize teen panels from each high school so that elementary students throughout Anchorage can benefit from this unique experience.

Any parents who would like to participate in helping to organize this project in their schools, please call Alyce Hanley at 243-2538.

Drug Laws (consolidation & strengthening of)

SENATE BILL NO. 65, by Senators Dankworth, Fahrenkamp, Bradley, Kerttula, Sumner, Hackney, Bennett, & Kelly. Purpose is to "consolidate the state's various drug laws into one comprehensive chapter," and "strengthen law enforcement's ability to more effectively combat those who are finding it attractive to engage in the illicit trafficking of controlled substances." (Identical to HB 794 and SB 518 both introduced last session.)

Introduced January 23 and referred to HESS and then to Judiciary.

OUTLINE OF SB 65 (REVISED)

I. Six degrees of the crime of Promoting a Controlled Substance - placed in criminal code

A. First degree - 5-99 years

1. delivery of schedule I (including heroin and opiates) to minor

2. continuing criminal enterprise

B. Second degree - A felony - 0-20, 10 year presumptive for second, 15 year presumptive for third

1. manufacture or delivery with intent to deliver I

2. delivery of II or III (including cocaine, hashish and LSD) to minor

C. Third degree - B felony - 0-10, 4 year presumptive for second, 6 year presumptive for third

1. delivery, manufacture, or possession with intent to deliver II or III (including hashish)

2. delivery of IV, V or marijuana to minor

3. possession by adult while on grounds of school of I or II.

D. Fourth degree - C felony - 0-5, 2 year presumptive for second, 3 year presumptive for third

1. delivery, manufacture, or possession with intent to deliver IV, V, or marijuana, except less than one ounce for no renumeration

2. possession of more than one gram of cocaine

3. possession by adult while on grounds of school of III, IV, V or marijuana

4. felony bootlegging (to minors, more than one person, prior misdemeanor bootlegging conviction)

E. Fifth degree - A misdemeanor - 0-1

1. possession of II, III, IV or V or one gram or less of cocaine

2. distribution of less than one ounce of marijuana for no renumeration

3. bootlegging

4. distribution of alcohol to minor

F. Sixth degree - B misdemeanor - 0-90 days

1. display or use of marijuana in public

2. possession of marijuana in immediate control while operating motor vehicle

3. minor in possession of marijuana or liquor

II. Controlled Substances Act - placed in 17.30

A. Standards for control are similar to federal act but include "relationship of use of substance to other criminal activity," i.e., addiction relates to crimes to support habit and fact that other crimes are committed by persons who traffic in substance.

B. Uniform Controlled Substances Committee together with commissioner of health and social services have responsibility for adding, rescheduling and deleting controlled substances

1. nine members, including pharmacist, director of public safety, attorney general, director of office of drug abuse

2. regulations have delayed effective date - can be modified or repealed by law

C. Schedules - test is danger or probable danger of substance

1. I - heroin, opiates

2. II - hallucinogens, cocaine, some depressants and stimulants

3. III - hashish, hashish oil, depressants and some stimulants

4. IV - depressants

5. V - small amounts of codeine and opium in formulas having medicinal qualities

6. VI - marijuana, intoxicating liquor and tobacco

D. Registration requirements

1. compliance with federal law entitles registration under act

2. prescriptions and order forms must coincide with federal law

E. Administrative and enforcement provisions

PENALTIES UNDER PROPOSED SUBSTITUTE FOR SB 65

Crime	I	II	III	IV	V	Marijuana	Intoxicating Liquor
Delivery to minors	Unclassified 5-99/$75,000	A felony	A felony	B felony	B felony	B felony	A misdemeanor
Delivery, manufacture or possession with intent to manufacture or deliver	A felony	B felony	B felony	C felony	C felony	C felony - unless delivery for no renumeration which is an A misdemeanor	C felony for bootlegging to minors, more than one person, or prior misdemeanor conviction for bootlegging, otherwise, a misdemeanor.
Possession	C felony unless possession on school premises which is a B felony	A misdemeanor unless possession of more than one gram of cocaine which is a C felony or possession on school premises which is a B felony	A misdemeanor unless possession on school premises which is a C felony	A misdemeanor unless possession on school premises which is a C felony	A misdemeanor unless possession on school premises which is a C felony	C felony if possession on school premises B misdemeanor if used or displayed in public, possession while operating propelled vehicle, or possession by minor	B misdemeanor if minor in possession

SENTENCES

A felony - 0-20/$50,000
10 year presumptive for second
15 year presumptive for third

B felony - 0-10/$50,000
4 year presumptive for second
6 year presumptive for third

C felony - 0-5/$50,000
2 year presumptive for second
3 year presumptive for third

A misdemeanor - 0-1/$5,000

B misdemeanor - 0-90 days/$1,000

SCHEDULING EXAMPLES

Schedule I - Opium, opiates, heroin, methadone
Schedule II - LSD, mescaline, cocaine, PCP, amphetamines, methaqualone
Schedule III - barbiturates, hashish
Schedule IV - valium
Schedule V - small amounts of codeine and opium in mixtures having medicinal qualities
Schedule VI - marijuana, intoxicating liquor, tobacco

TO: SENATE RESS COMMITTEE Hackney

FROM: PETER CAVE, P. O. BOX 80573, FAIRBANKS 99707
PHONE: 479-2914

I URGE YOU NOT TO SUPPORT ANY PORTION OF SB65. I FIND IT OPPRESSIVE TO PASS ANY LEGISLATION WHICH IS GOING TO CREATE MORE CRIMINALS FOR THE STATE GOVERNMENT TO "GO AFTER". THE MOOD OF THE ALASKAN PEOPLE IS FOR MORE LIBERALIZED DRUG LAWS, NOT FOR MORE OBSESSIVE ONES. STOP WASTING THE TAXPAYERS' MONEY!

MR. CAVE CAN BE REACHED EARLY MORNINGS.

Dear Mr. Hackney

I would like you to support Senate Bill 75. I believe this bill promote better "eye" care by granting optometrist the use of diagnostic eye drops.

Thank You.

Robert Bowen

VILLAGE DRUG REFERENCE

TABLE OF CONTENTS

SECTION 1: Disinfectants & Antiseptics
- Amphyl Disinfectant Solution
- Hydrogen Peroxide (Solution)
- Povidone Iodine Solution (Betadine)
- Isopropyl Alcohol

SECTION 2: Oral & Injectable Antibiotics
- Ampicillin
- Benzathine Penicillin (Bicillin LA)
- Penicillin VK
- Procaine Penicillin G
- Erythromycin
- Nystatin (Nilstat, Mycostation)
- Tetracycline
- Sulfisoxazole (Gantrisin) and Trisulfapyrimidines (triple sulfa)

SECTION 3: Antibiotics used in the Ears and Eyes
- Hydrocortisone, Neomycin, Polymixin B, (Cortisporin) Ear Drops
- Polymixin B, Bacitracin, Neomycin (Neosporin) Eye Ointment and Drops
- Prednisolone, Sulfacetamide (Betimyd) Eye Ointment and Drops
- Sulfacetamide Eye Drops/Ointment
- Silver Nitrate Eye Drops

SECTION 4: Topical Anti Infectives and Other Drugs for the Skin
- Bacitracin Ointment: Bacitracin, Neomycin and Polymixin B Topical Ointment
- Mafenide (Sulfamylon) Cream
- Tricofuran Vaginal Suppositories
- Surgical Detergent (Betadine)
- White Petrolatum, Aquaphor, Vitamin A and D Ointment
- Hydrocortisone and Triamcinolone

SECTION 5: Medicines for the Relief of Pain and Fever
- Acetaminophen (Tylenol)
- Aspirin
- Propoxyphene (Darvon)
- Sodium Salicylate
- Pentazocine (Talwin)
- Meperidine (Demerol) and Morphine
- Lidocaine (Xylocaine)
- Clove Oil (Eugenol)

SECTION 6: Medicines for the Gastro-Intestinal Tract
- Aluminum Hydroxide, Magnesium Hydroxide Combinations (Gelusil, Mylanta, Maalox)
- Kaolin with Pectin (Kaopectate)
- Milk of Magnesia
- Phenobarbital and Belladonna
- Trimethobenzamide (Tigan)

SECTION 7: Medicines for Maternal and Child Health
- Ergonovine & Methylergonovine (Methergine)
- Ferrous Sulfate
- Pediatric Vitamins with Fluoride
- Pediatric Vitamins with Iron
- Prenatal Vitamins (Natabec Rx)
- Sodium Fluoride

SECTION 8: Antihistamines, Decongestants and Cough Syrups
- Diphenhydramine (Benadryl)
- Diphenhydramine Expectorant (Benylin)
- Guaifenesin (2G, Robitussin)
- Phenylephrine (Neo-Synephrine)
- Pseudoephedrine (Sudafed) and Pseudoephedrine with Triprolidine (Actifed)
- Triaminic
- Saline Nose Drops

SECTION 9: Sedatives and Tranquilizers
- Chlorpromazine (Thorazine) and Prochlorperazine (Compazine)
- Diazepam (Valium)
- Phenobarbital (Luminal)

SECTION 10: Emergency Drugs
- Epinephrine Injection
- Lasix
- Pilocarpine Eye Drops

SECTION 11: Miscellaneous
- Colchicine
- Hydrochlorothiazide (Hydro-Diuril)
- Probenecid (Benemid)

ISOPROPYL ALCOHOL RUBBING COMPOUND N.F. — ISOPROPANOL 70%

DESCRIPTION AND USES

* Isopropyl alcohol is used to clean the skin prior to giving an injection or obtaining a blood sample.

* Isopropyl alcohol is used to disinfect instruments and thermometers. Leave them in contact with the solution for at least 20 minutes.

* Isopropyl alcohol can be used as a soothing rub or to toughen the skin.

WARNINGS

* Isopropyl alcohol is not the same as drinking alcohol. It will make a person sick if it is taken by mouth. It may even be fatal.

* Isopropyl alcohol will sting if it comes in contact with cuts and abrasions. Avoid using it near injuries.

* Isopropyl alcohol will burn.

STORAGE DIRECTIONS

* Store it at room temperature with the other external liquids. It will not be damaged by accidental freezing.
* Leave the lid on tight to prevent evaporation.
* Isopropyl alcohol is a non-prescription drug.

AMPHYL DISINFECTANT SOLUTION:

* Amphyl is a cleaning and disinfecting solution for instruments and equipment. It is not used on the skin.

* Store this chemical at room temperature with other external liquids. It will not be ruined by accidental freezing.

POVIDONE IODINE SOLUTION: BETADINE

DESCRIPTION AND USES

* Betadine is used as an antiseptic on abrasions, cuts, burns and other injuries. It can also be used to disinfect instruments. It is as effective as iodine tincture, but it is less irritating.

WARNINGS

* Some patients are allergic to iodine. Do not use Betadine if the patient has an iodine allergy.

STORAGE DIRECTIONS

* Store Betadine at room temperature with the other external liquids.
* Betadine may be damaged by freezing.
* Betadine does not have an expiration date.
* Betadine is a non-prescription drug.

HYDROGEN PEROXIDE SOLUTION U.S.P. H_2O_2

DESCRIPTION AND USES

* Hydrogen peroxide solution releases oxygen when it comes in contact with skin or pus. The oxygen bubbles help clean out pus, dirt and other material from wounds or infected areas. The oxygen is also weakly antiseptic. If it is used to clean the ears, it should be sucked out or removed with a piece of twisted tissue.

* Hydrogen peroxide is occasionally used as a mouth wash or gargle. It should be mixed with an equal amount of water before being used in this manner.

STORAGE DIRECTION

* Store hydrogen peroxide at room temperature with the other external liquids.
* Do not use it if it has been frozen. Freezing may cause it to lose its oxygen bubbles.
* Protect the drug from excessive heat and direct sunlight.
* Hydrogen peroxide is a non-prescription drug.

AMPICILLIN:
250MG CAPSULES
250MG/5ML OR 125MG/5ML SUSPENSION

PRINICIPEN[R] POLYCILLIN[R]
OMNIPEN[R] PENBRITEN[R]
AMCILL[R] TOTOCILLIN[R]

DESCRIPTION AND USES

* Ampicillin is a form of penicillin. It kills some types of bacteria that are not killed by other types of penicillin. It is often used for urinary tract infections and for ear infections that do not respond to penicillin VK.

Usual Dose	Urinary Tract Infection	Gonorrhea
Children under 3 take 125mg 4 times daily for 7-10 days. Adults and older children take 250mg 4 times daily for 7-10 days.	Adults take 500mg (2 capsules) 4 times daily for 7-14 days.	Adults take 3500mg (14 capsules) with 2 tablets of probenecid all at one time as a single dose.

WARNINGS

* Ask the patient if he is allergic to penicillin before you give him ampicillin. Penicillin allergies are common and may be serious. If the patient is allergic to ampicillin he may have one of the following types of reactions if he takes the drug:

  * Hives, skin rash, itching.
  * Edema, swelling of the eyelids.
  * Fever, generalized aching.
  * Shock, difficulty breathing.

* Patients often have minor gastrointestinal problems when they take the drug. Tell them to continue taking the drug if they can tolerate the symptoms. If the symptoms are bad, contact the physician or switch to another antibiotic. Common complaints are:

  * Nausea.
  * Vomiting.
  * Diarrhea.
  * Stomach gas.
  * Stomach distress.
  * Inflammation of the tongue.
  * Black hairy tongue.
  * Mild rash in children.

* Do not use ampicillin if the patient is allergic to penicillin. Use erythromycin.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the oral tablets. It will not be harmed by accidental freezing.
* Check the expiration date before giving it to the patient.
* This drug is a prescription drug.
* Tell the patient to take the medicine a half hour before meals and at bedtime until it is all gone.
* Special instructions for the pediatric liquid:

  * Mix the powder with the correct amount of clean water just before dispensing.
  * Tell the mother to keep the medicine cool but to protect it from freezing.
  * Tell the mother to shake it well before using.
  * Tell her to throw it away after 2 weeks if there is any left.

BENZATHINE PENICILLIN INJECTION 1,200,000 UNITS

BICILLIN LA

DESCRIPTION AND USES

* Bicillin LA is a type of penicillin. Its main advantage is its length of action. After it is injected into the muscle, it dissolves very slowly. The effect lasts for several weeks, but it is fairly weak. It will only work against bacteria, such as streptococci, which are very sensitive to penicillin.

* Its major use is to treat sore throats caused by streptococci. The medicine is given <u>once</u> as a single dose.

    * Children under 4 receive 300,000 units IM.
    * Children between 4 and 12 receive 600,000 units IM.
    * Adults and older children receive 1,200,000 units IM.

* It can be used to treat impetigo using the above dosage.

* It can be used to prevent streptococcal infection in patients with a history of rheumatic fever. The patient is given 1,200,000 units every 30 days.

* Bicillin LA is also used to treat syphilis.

WARNINGS

* Ask the patient if he is allergic to penicillin before you give him a Bicillin LA injection. Penicillin reactions are common and may be serious. If the patient is allergic to penicillin, he may have one of the following types of reactions. The reaction may occur 8 to 15 days <u>after</u> the injection was given.

    * Skin rash, hives or itching.
    * Edema, swelling or eyelids.
    * Fever, generalized aching.
    * Shock, difficulty breathing (rarely).

STORAGE AND ADMINISTRATION

* Store Bicillin LA in the refrigerator. Do not use it if it has been frozen, even if it looks good.
* Check the expiration date before you use it.
* Bicillin LA is a prescription drug.
* Warm the tubex in your hands and shake it well before injecting. Inject it at a slow steady rate so that you do not block the needle. Use good I.M. technique.

POTASSIUM PHENOXYMETHYL PENICILLIN
250MG TABLETS
250MG/5ML SUSPENSION

PENICILLIN VK
LEDERCILLIN^R
PENTIDS^R

V-CILLIN K^R
PENVEE^R
COMP CILLIN^R

DESCRIPTION AND USES

* Penicillin VK is a form of penicillin that works well when taken by mouth. It is not quite as effective as procaine penicillin however. The medicine leaves the body rapidly in the urine, so the dose must be repeated every 6 to 8 hours.

* Penicillin VK can be used for many infections including strep throat, otitis media, and skin infections. Penicillin VK is effective against "strep throat", but Bicillin LA injection is preferred. Patients often forget to take Penicillin VK.

* Give the patient the following dose 4 times daily for 10 days.

    * Children under 3 125mg (1/2 teaspoonful).
    * Patients 3 and older: 250mg (1 tablet).

    * Larger doses may be required for some infections.

WARNINGS

* Ask the patient if he is allergic to penicillin before you give him any. Penicillin allergies are common and may be serious. If the patient is allergic to penicillin he may have one of the following types of reactions if he takes the drug.

    * Hives, skin rashes, itching.
    * Edema, swelling of the eyelids.
    * Fever generalized aching.
    * Shock, difficulty breathing.

* Do not use penicillin VK if:

    * The patient is allergic to penicillin. Use erythromycin.
    * The patient is unreliable or likely to forget to use the drug. Use procaine penicillin or Bicillin LA.
    * The patient has a serious infection like pneumonia. Use procaine penicillin.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the other oral tablets. It will not be harmed by accidental freezing.
* Check the expiration date before giving it to the patient.
* This drug is a prescription drug.
* Tell the patient to take the drug a half hour before meals and at bedtime until it is all gone.
* Special instructions for the pediatric liquid:

    * Mix the powder with the correct amount of clean water just before dispensing.
    * Tell the mother to keep the medicine cool but to protect it from freezing.
    * Tell the mother to shake it well before using.
    * Tell her to throw it away after 2 weeks if there is any left.

PROCAINE PENICILLIN G INJECTION
300,000 UNITS, 600,000 UNITS
2.4 MILLION UNITS

WYCILLIN®

DESCRIPTION AND USES

* Procaine penicillin G injection is the most effective penicillin in the village. It is used for many infections such as:

  * Pneumonia.
  * Strep Throat.
  * Otitis media.
  * Skin infections.
  * Gonorrhea.

* It is useful for serious infections that require high doses. It is also useful if the patient is unable to take medicine by mouth or likely to forget to take the medicine.

* For most infections give the patient the following dose once or twice a day for 7 to 10 days:

Children under 2	Children between 2 and 12	Older patients
300,000 units IM	300,000-600,000 units IM	600,000-1,200,000 units IM

* For gonorrhea, follow these directions:

  * Give the patient 2 tablets of Probenecid (Benemid) by mouth. The Probenecid makes the penicillin act longer.

  * Wait a half hour, then give the patient 4.8 million units of Procaine penicillin IM. Use 2.4 million units in each buttocks.

WARNINGS

* Ask the patient if he is allergic to penicillin before you give him any. Penicillin allergies are common and may be serious. Do not give the patient penicillin if he thinks he may be allergic to it. Check with your physician if you are in doubt.
* If the patient is allergic to penicillin, he may have one of the following types of reactions when he receives the drug.

  * Hives, skin rashes, itching.
  * Edema, swelling of the eyelids.
  * Fever, generalized aching.
  * Shock, difficulty breathing.

STORAGE DIRECTIONS

* Store this drug in the refrigerator.
* Freezing will ruin this drug. Do not use it after it has been frozen, even if it looks good.
* Check the expiration date before using it.
* This drug is a prescription drug.
* The 2.4 million unit injection does not fit into the metal tubex syringe. Remove the ribbed plastic cylinder from the needle hub. Screw it into the blue stopper and use it as the plunger.

ERYTHROMYCIN
250MG TABLETS
200MG CHEWABLE TABLETS
125MG/5ML SUSPENSION

ILOSONE[R]
ERYTHROCIN[R]
ILOTYCN[R]

DESCRIPTION AND USES

* Erythromycin is an antibiotic. It kills many of the same bacteria as penicillin. If the patient is allergic to penicillin, erythromycin is often used in its place.

* The dosage is much the same as for penicillin VK. The following dosage is recommended for streptococcal throat infections, ear infections, and impetigo. infections.

  * Adults and older children: 250mg (1 tablet) 4 times daily for 10 days.
  * Children betwen 1 and 6: 125mg (1 teaspoonful) 4 times daily for 10 days.
  * Children under 1 year of age: 62.5mg (1/2 teaspoonful) 4 times daily.

WARNINGS

* Allergic reactions such as skin rashes occur in a very few patients.
* Jaundicemay appear following the use of some types of erythromycin. If it does, stop the drug and contact your referral physician.
* A few patients may have nausea, vomiting, diarrhea or similar gastrointestinal complaints. Tell the patient to continue to take the drug if he can tolerate the effects. Contact your referral physician if the effects are bad.
* Do not use erythromycin if:

  * Penicillin is effective and the person does not have a penicillin allergy.
  * The patient is allergic to erythromycin.
  * The patient has jaundice or liver disease.

STORAGE AND DISPENSING DIRECTIONS

* Store erythromycin at room temperature with the other oral tablets and liquids. It will not be harmed by accidental freezing.
* Check the expiration date before givin the drug to the patient.
* This drug is a prescription drug.
* Tell the patient to take the medicine a half hour before meals and at bedtime until it is all gone.
* Special instructions for the pediatric liquid:

  * Mix the powder with the correct amount of clean water just be dispensing.
  * Tell the mother that she can keep the erythromycin at room temperature or in the refrigerator. Do not let it freeze.
  * Shake the medicine well before giving a dose.
  * Throw away any medicine that is left after it has been mixed for 2 weeks.

* The chewable tablets are for children who are too small to swallow adult type tablets. They should be chewed up well.

NYSTATIN ORAL SUSPENSION
100,000 UNITS/CC

MYCOSTATIN®
NILSTAT®

DESCRIPTION AND USES

* Nystatin is an antibiotic that is effective against the fungus monilia (candida albicans). Since it is not absorbed from the g.i. tract, it will treat infections in the mouth and g.i. tract only. It has few side effects for the same reason.

* It is used to treat thrush in infants.

    * Place 2cc in the mouth 4 times daily for 10 days. The medicine should be held in the mouth for a few minutes before swallowing.

WARNINGS

* There are few side effects since the drug is not absorbed into the body. A few patients may have nausea, vomiting, g.i. distress or diarrhea.

* Do not give nystatin to a patient who is allergic to it. Allergies are rare.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the other oral tablets or liquids. Do not use the drug if it has been frozen, even if the bottle is not broken. Freezing may ruin it.
* Check the expiration date before giving the drug to the patient.
* Nystatin is a prescription drug.
* Shake the bottle before filling the dropper.
* Tell the mother to give the medicine to the child every 6 hours until all is gone (about 6 days).
* Explain to her that the drug acts in the mouth.
* Place 1cc in each side of the mouth (2cc total). Have the child hold the medicine in his mouth before swallowing. It helps to rub the medicine directly on the sores in the mouth.

TETRACYCLINE U.S.P.
250MG CAPSULES OR TABLETS

ACHROMYCIN V[R] TETRACYN[R]
PANMYCIN[R] TETRACHEL[R]

DESCRIPTION AND USES

* Tetracycline will stop the growth of many types of bacteria that are not affected by penicillin. Unlike penicillin, tetracycline will not kill the bacteria, only slow their growth. Tetracycline is useful if the patient is allergic to penicillin or if penicillin is not effective.

* Tetracycline is used to treat urinary tract infections, bronchitis, and other infections in adults. The usual dose is 250-500mg (1-2 capsules) 4 times daily for 10-14 days.

* It is also used to treat gonorrhea if the patient is allergic to penicillin. The dose is 1500mg (6 capsules) as a single dose, followed by 500mg (2 capsules) 4 times daily for 4 days.

WARNINGS

* Tetracycline may cause many minor irritating side effects such as:
  - Loss of appetite.
  - Stomach discomfort.
  - Nausea and vomiting.
  - Bulky loose stools.
  - Diarrhea.
  - Inflammations of the mouth, skin, rectum, etc.

* It may occasionally cause more serious rections such as:
  - Skin rashes, hives, itching, shock and other allergic reactions.
  - Severe yeast or fungi infections of the gastrointestinal tract.
  - Rashes on skin areas exposed to sunlight (photosensitivity).

* Do not give tetracycline to:
  - Patients who are allergic to it.
  - Pregnant women or children under the age of 12. Tetracycline may cause discoloration of the teeth or slow bone growth in the fetus or child.
  - Patients who have kidney or liver problems.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the other oral tablets. It will not be damaged by accidental freezing.
* Check the expiration date before giving the drug to the patient.
* This is a prescription drug.
* Tell the patient to take tetracycline a half hour before meals and at bed time. If it upsets his stomach, tell him to take it with a light snack or with meals.
* Calcium, aluminum, magnesium and iron salts interfere with the absorption of tetracycline. Tell the patient not to take antacids or milk within one hour of the time he takes the tetracycline. Tell him not to take iron (ferrous sulfate, vitamins with iron, geritol etc) for the entire 10 days that he is taking tetracycline.

SULFISOXAZOLE (GANTRISIN)R

TRISULFAPYRIMIDINES (TRIPLE SULFA)
500MG TABLETS
500MG/5ML SUSPENSION

DESCRIPTION AND USES

* Sulfisoxazole and trisulfaprimidines are not identical. Their actions are so similar that they will be discussed together. Both are "sulfa" drugs that are effective against many types of bacteria. They were once used for many infections, but are now used mainly for urinary tract infections. Occasionally they are used for ear infections in combination with penicillin.
* The medicine is taken 4 times daily for 10-14 days.
  * Children between 2 and 6 take 1 teaspoonful.
  * Adults and older children take 2 tablets.
    * The physician may often ask the patient to take a large dose (8 tablets) for the first dose only.
  * The patient should take a large glass of water with each dose.

WARNINGS

* Sulfa drugs may cause a number of serious allergic reactions including:

  * Hives, rashes, itching.
  * Inflammation of the mouth, eyelids, nose, urethra, penis.
  * High fever, severe headache.
  * Fever and joint pain.
  * Shock or difficulty breathing.

* Sore throat, fever, pallor, jaundice, weakness, and bruising may be signs of a serious blood disorder. Stop the drug and contact your referral physician.
* Some patients may develop a skin rash on areas exposed to the sun (photosensitivity). Nausea or vomiting occur frequently, they do not indicate a serious problem.
* Do not give sulfa drugs to:
  * Patients who are allergic to sulfa or chemically similar drugs (hydrochlorothiazide, acetazolamide, tolbutamide).
  * Patients who are not producing urine adequately. The drug will come out of the urine and form crystals in the kidneys if the urine is too concentrated.
  * Infants under 2 months of age, women who are breast feeding infants, or women near term (ready to deliver). Infants develop jaundice if they receive sulfa.

STORAGE AND DISPENSING DIRECTIONS

* Store the tablets and liquid at room temperature with the other oral tablets and liquids. The tablets will not be harmed by accidental freezing but the suspension will be ruined. Do not use it even if the bottle is not broken.
* The suspension should be shaken well before using.
* This is a prescription drug.
* Tell the patient to take the medicine every 6 hours (before meals and at bedtime) with a large glass of water. The patient should drink lots of fluids so he will make lots of dilute urine.

HYDROCORTISONE - NEOMYCIN - POLYMIXIN B EARDROPS

CORTISPORIN[R]

DESCRIPTION AND USES

* Cortisporin is a combination of two antibiotics and a drug to reduce inflammation. Polymixin B and Neomycin are effective against many bacteria that cause ear infections. Hydrocortisone helps reduce the inflammation and itching that may result from these infections.

* The infected ear should be cleaned and dried first. Any pus or drainage should be removed.

    * The patient should tilt his head to one side.
    * Place 3 or 4 drops into the ear. Repeat the process 3 or 4 times daily. Use the drops 5 to 7 days or as needed.

WARNINGS

* The patient may become allergic or sensitive to the drug.

* Do not use the drug if:

    * The patient is allergic to neomycin, polymixin B or hydrocortisone.
    * The patient's ear appears to be irritated by the drug.
    * The patient has a viral infection such as chicken pox, small pox vaccination or herpes simplex.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with other ear drops. Cortisporin will probably be ruined if it is accidentally frozen. Do not use it if it has been frozen.
* Check the expiration date before giving the drug to the patient. Cortisporin has a very short expiration date.
* Cortisporin is a prescription drug.
* Special instructions:

    * Tell the patient to warm the bottle in his hands before using the drops.
    * Shake the bottle well before using it.
    * Demonstrate the correct way to use the ear drops to the patient.
    * Tell the patient to avoid touching the dropper to the ear or with his fingers.

POLYMIXIN B, BACITRACIN, NEOMYCIN OPHTHALMIC OINTMENT — NEOSPORIN®
POLYMIXIN B, GRAMICIDIN, NEOMYCIN OPHTHALMIC SOLUTION — NEOSPORIN®

DESCRIPTION AND USES

* Neosporin is a brand name used by the Burroughs Wellcome Company for several different combinations of antibiotics. These two products meet high standards of purity and sterility and are intended to treat minor bacterial infections of the eye.

* Do not confuse the small 3.5Gm tube of ophthalmic ointment with the large 15Gm tube of polymixin B, bacitracin and neomycin topical ointment. The large tube is not sterile and should be used on the skin only.

* Neosporin is used to treat a variety of minor bacterial infections of the eye. Place a small amount of the ointment or 1 or 2 drops inside the lower eyelid every 3 or 4 hours. Neosporin may also be used to prevent infection if an eye has been injured.

WARNINGS

* Patients may become allergic to one of the 3 antibiotics, usually neomycin. Stop using the drug if the patient's eye becomes red or irritated.

* Do not use neosporin if the patient is allergic to neomycin, polymixin B, or bacitracin.

* Do not use the ointment form if the patient has a deep laceration of the cornea or the sclera. The ointment might enter the inside of the eyeball and be difficult to remove.

STORAGE AND DISPENSING DIRECTIONS

* Store Neosporin at room temperature with the other eye drops.
* Neosporin drops may be damaged by freezing. Check carefully to see if the dropper or the bottle is broken. If it is not broken and the drops look normal, it is probably safe to use them.
* Check the expiration date before giving the medicine to the patient.
* This is a prescription drug.

* Special instructions.:
  * Teach the patient the correct way to use eye ointments or drops.
  * Tell the patient to place the ointment or drops in the space between the lower eyelid and the eyeball.
  * Tell the patient to avoid touching the tip of the tube or the dropper with the fingers or to the eye.

Rev 6/77

PREDNISOLONE - SULFACETAMIDE OPHTHALMIC OINTMENT AND SOLUTION METIMYD®

DESCRIPTION AND USES

* Metimyd contains two drugs, prednisolone and sulfacetamide. Prednisolone is a drug that reduces inflammation and redness from infection, irritation or allergy. Sulfacetamide is a sulfonamide ("Sulfa") that stops the growth of bacteria.

* Metimyd is effective in treating a variety of problems including:

  * Allergies of the eyelids.
  * Conjunctivits due to hay fever.
  * Chemical irritations.
  * Heat burns.
  * Iritis.
  * PKC.

* The ointment or drops are applied to the inside of the lower eyelid every 4 to 8 hours. The ointment lasts longer so it is preferred for bedtime use.

WARNINGS

* Inflammation is a normal defense used by the body to prevent the spread of infection. If prednisone stops the inflammation, and sulfacetamide does not kill the germ, the infection may spread.

* Prednisolone may increase the pressure within the eyeball.

* Some people are allergic to sulfa drugs. Stop the drug if the eye becomes more red or swollen.

* Do not use metimyd if:

  * The patient is allergic to "sulfa" drugs like sulfisoxozole (Gantrisin) or trisulfapyrimidines (triple sulfa).
  * The patient has an eye infection due to a virus such as small pox vaccination, chicken pox or herpes simplex. Metimyd will cause the infection to spread.
  * The patient has an eye infection caused by fungi.
  * The patient has an eye infection caused by tuberculosis.
  * The patient has an eye infection that is producing a lot of pus.

STORAGE AND DISPENSING DIRECTIONS.

* Store metimyd at room temperature with the other eye drops. The eye drops will be ruined by accidental freezing. Do not use them even if they look normal. The ointment will probably not be harmed by accidental freezing.
* Check the expiration date before using.
* This is a prescription drug.
* Special instructions:

  * Teach the patient the correct way to use eye ointments or drops.
  * Tell the patient to place the ointment or drops in the space between the lower eyelid and the eyeball.
  * Tell the patient to avoid touching the tip of the tube or the dropper with the fingers or to the eye.
  * Shake the drops well before using them.

SULFACETAMIDE SODIUM OPHTHALMIC OINTMENT/DROPS — SODIUM SULAMYD[R]

DESCRIPTION AND USES

* Sulfacetamide is an antibacterial drug of the sulfonamide or "sulfa" type. It is used in the treatment of minor bacterial infections of the eye and eyelid. It is the best drug to use for infants with eye infections.

* Place a small amount of the ointment or a few drops of the solution inside the lower eyelid 3 or 4 times a day. The ointment lasts longer so it is the preferred form at bedtime.

WARNINGS:

* Sulfacetamide, like other "sulfas", may cause allergic reactions. Stop using the drug if the patient's eye becomes red, swollen or irritated because of the drug.

* Do not use sulfacetamide if the patient is allergic to sulfacetamide, sulfisoxazole (Gantrisin[R]), Trisulfapyrimidines (Triple Sulfa) or other sulfa drugs.

* Do not use the ointment foam if the patient has a deep laceration of the cornea or the sclera. The ointment might enter the inside of the eye ball and be difficult to remove.

STORAGE AND DISPENSING DIRECTIONS

* Storage sulfacetamide at room temperature with the other eye drops and ointments. It will probably not be harmed by accidental freezing, unless the container is broken by the freezing.
* Check the expiration date before using the drug.
* This is a prescription drug.
* Special instructions:

  * Teach the patient the correct way to use eye ointments or drops.
  * Tell the patient to place the ointment or drops in the space between the lower eyelid and the eyeball.
  * Tell the patient to avoid touching the tip of the tube or the dropper with the fingers or the eye.

SILVER NITRATE 1% OPHTHALMIC SOLUTION IN WAX AMPULS

DESCRIPTION AND USES

* Silver nitrate is an antibacterial. The drops are used to prevent ophthalmia neonatorum, an eye infection of newborn infants that causes blindness. Ophthalmia neonatorum is caused by the same bacteria that causes gonorrhea.

* The state law requires that all infants be treated with silver nitrate eye drops immediately after birth.

    * Stick a pin into the tip of the wax ampul.
    * Squeeze the other end to force out a drop.
    * Place one drop in each eye. Do not touch the eye with the wax ampul.
    * It is best to leave the drop in the eye and let the tears wash it out. Do not rinse it out.
    * Throw away the opened wax ampul.

WARNINGS

* Silver nitrate is an irritating drug. Only the silver nitrate that comes in the wax ampuls should be used in the eye. The drug will cause the baby's eyes to be red and irritated.

* Do not use the drops if they appear to be dark or discolored.

STORAGE DIRECTIONS

* Store this drug at room temperature with the eye drops or your OB supplies. Freezing will probably not ruin the drug, but high temperatures may melt the wax ampul.
* Silver nitrate is light sensitive. Store it in a dark place.
* Silver nitrate is a prescription drug.
* Special instructions:

    * Do not use the silver nitrate if it is discolored, or black.
    * The wax will make the liquid inside seem slightly colored. If there is any questions, return the drug to the pharmacy for a fresh supply.
    * At the time of use, examine the drop as it comes from the wax ampul. The solution should be clear and colorless.

BACITRACIN OINTMENT

BACITRACIN, NEOMYCIN AND POLYMIXIN B TOPICAL OINTMENT

"3 ANTIBIOTIC OINTMENT"
"TRIPLE ANTIBIOTIC",
NEOSPORIN^{R}, MYCITRACIN^{R}

DESCRIPTION AND USES

* Bacitracin is an antibiotic that inhibits the growth of streptococci, staphylococci and other common bacteria. It is often used in ointments by itself or combined with neomycin and polymixin B. Neomycin and Polymixin B are antibiotics that are effective against additional bacteria.

* Bacitracin and 3 antibiotic ointment are used on minor infections such as impetigo or infected rashes. It is usually applied to the area 3 or 4 times daily after washing. The ointment will be of little value in serious infections.

WARNINGS

* Bacitracin has few harmful effects but neomycin may cause local allergic reactions such as inflammation or redness.

* Do not use these ointments on:

    * Patients who are allergic to them.
    * Large wounds that will require suturing.
    * Eye infections (use the ophthalmic ointment form).

STORAGE AND DISPENSING DIRECTIONS

* Store these drugs at room temperature with the external liquids or ointments. The ointments will probably not be damaged by accidental freezing.
* Check the expiration date before dispensing.
* This drug does not require a prescription.
* If the ointment is being used for impetigo, tell the patient to wash the sores to remove the crusts before applying additional ointment.

MAFENIDE CREAM SULFAMYLON[R]

DESCRIPTION AND USES

* Mafenide (sulfamylon) retards the growth of bacteria on the skin. Its main use is to prevent severe bacterial infection following 2nd or 3rd degree burns. It has no soothing or pain relieving effects.

* After the patient has been treated for shock and pain, clean the burn area and remove dead tissue. Apply sulfamylon cream to the burn using a sterile gloved hand. Apply the cream to a thickness of 1/16".

* Remove the cream daily by bathing. Replace the cream when needed to keep the burned area covered with cream at all times.

WARNINGS

* Sulfamylon often causes pain or a burning sensation when it is applied. This is normal but unpleasant.

* Some patients may develop an allergic reaction (rash, hives, itching, swelling, redness, etc.) after they have been using the drug for 10-14 days. Do not confuse the allergy symptoms with the normal side effects.

* The medicine upsets the normal acid-base balance of the body. Most patients adjust to this easily. Patients with lung disease may develop acidosis.

* Do not use sulfamylon on minor burns. It is of no value and may cause discomfort.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the other ointments. It will probably be ruined by freezing. Do not use it if it has been frozen.
* This is a prescription drug.
* Do not give the drug to the patient as a general rule. Apply it yourself using the correct sterile technique. Apply it about 1/16" thick.

FURAZOLIDONE AND NIFUROXIME VAGINAL SUPPOSITORIES — TRICOFURANR

DESCRIPTION AND USES

* Furazolidone and Nifuroxime will kill the bacteria trichomonis and the yeast candida albicans. These two organisms are responsible for many vaginal infections. Tricofuran is <u>not</u> effective against gonorrhea.

* Tricofuran is used to treat trichomonas vaginitis or vaginal moniliases as follows:

    * One suppository is placed in the vagina (birth canal) in the morning and at bedtime for 1 week.
    * After one week, the medicine is used at bedtime only.
    * If the woman has her menstrual period, she should continue to use the medicine.
    * The treatment will need to last at least 2 weeks and perhaps an entire menstrual cycle.

WARNINGS

* The patient may become allergic to the drug. She should stop using it if irritation, burning, itching, or redness occur. Douching may help to remove the irritating drug.

* The medicine will leak out of the birth canal. This can be kept to a minimum by inserting the suppository properly.

STORAGE AND DISPENSING DIRECTIONS

* Store the suppositories at room temperature with the external liquids and ointments. They will not be damaged by accidental freezing.
* If the suppositories become soft, store them in the refrigerator or hold the suppository under cool water for 2 minutes.
* This is a prescription drug.
* Special instructions:

    * This medicine is a little inconvenient to use. Go over the directions carefully encourage the patient to follow them.
    * Review the directions that come with the package. Tell the patient to lie down for a full 10-15 minutes after inserting the suppository.
    * A man can catch the infection from the woman. He may have no symptoms, but he may reinfect the women.
    * The patient's husband should not have sex with her or he should wear a condom (rubber) to prevent him from becoming infected.

SURGICAL DETERGENT — PHISOHEX®

DESCRIPTION AND USES

* Phisohex is a detergent solution containing 3% hexachlorophene. After each use, a small amount of hexachlorophene is left on the skin. The hexachlorophere will slow the growth of common skin bacteria. It is effective only when used repeatedly. It has no advantage over other soaps for cleaning wounds or other occasional use.

* Phisohex is used by medical personnel to clean their hands. It is also used to clean the skin of a patient who has impetigo. Ordinary soap and water is probably as effective for the latter use.

* Phisohex is used much like ordinary soap. Wet the area to be washed. Add a small amount of phisohex. Rub to produce suds. Add more water to produce more suds. Rinse the area thoroughly, then dry it.

WARNINGS

* Hexachlorophene can be absorbed through the skin and mucous membrane (mouth, vagina, etc). It is absorbed more readily through the skin of babies or if the skin is burned or irritated. Phisohex should always be rinsed off well to prevent absorption.

* If it is absorbed, hexachlorophene can damage the brain or nervous system. The effects include irritability, stimulation, and possibly convulsions. The harmful effects can be fatal.

* Do not use phisohex:

    * If the patient is a small baby.
    * If the skin is red, inflammed, burned or irritated.
    * As a dressing or like a lotion.
    * On a mucous membrane or in the vagina.

STORAGE AND DISPENSING DIRECTIONS

* Store phisohex at room temperature with the external liquids. It may be ruined by freezing. If it becomes frozen, unthaw it and shake it well. If it looks normal, go ahead and use it.
* Phisohex is a prescription drug.
* Explain to the patient that it must be used like soap. Tell him to rinse it off well. Warn him that it is dangerous if swallowed and must be kept out of the reach of children.

WHITE PETROLATUM — PETROLEUM JELLY, VASELINE[R]

AQUAPHOR

VITAMIN A AND D OINTMENT

DESCRIPTION AND USES

* The above 3 products are somewhat similar and have similar uses. White petrolatum is a semi-solid product obtained from oil. It will not absorb water. Aquaphor contains white petrolatum plus other ingredients that help it absorb water. Vitamins A & D ointment contains petrolatum, ingredients that help it absorb water, and vitamins A & D. The two vitamins are supposed to help skin rashes like diaper rash heal more quickly.

* These products help treat or prevent diaper rash. They form a water proof barrier between the urine in the diaper and the baby's skin. The ointment is applied to the skin as often as needed to keep up the water proof covering.

* These ointments can also be applied to dry skin. They will prevent evaporation of water from the skin and keep it moist and soft.

* These ointments can also be used for other lubricating or protective uses.

WARNINGS

* These products do not contain antibiotics. If the diaper rash is badly infected, the patient may need antibiotics.

STORAGE AND DISPENSING DIRECTIONS

* Store these ointments at room temperature with other external ointments and liquids. They will not be damaged by accidental freezing.
* These drugs do not require a prescription. White petroleum and vitamin A & D may be available in the village store.

HYDROCORTISONE 1% OINTMENT — CORT-DOME® — CORTEF®

TRIAMCINALONE 0.1% CREAM — KENALOG® — ARISTOCORT®

DESCRIPTION AND USES

* Hydrocortisone reduces inflammation, itching, and other discomforts when applied to rashes caused by eczema, allergies, or irritants. The hydrocortisone treats the symptoms but does not remove the underlying cause. Triamcinolone is a similar medication with similar uses and warnings.

* A small amount of the ointment is applied to the rash and rubbed in well. It may need to be applied 2 to 4 times daily.

WARNINGS

* These drugs reduce inflammation and may allow any infection present to spread.

* A few patients may develop an allergy to the drug. Other patients may develop itching, burning, or acne-like skin eruptions. If the patient has problems with the drug, tell him to stop using it.

* Do not use hydrocortisone or triamcinalone on:

    * An infected rash.
    * A skin rash caused by TB, small pox vaccination, chicken pox, or a virus such as herpes simplex.
    * An eyelid or eye inflammation or rash.

STORAGE AND DISPENSING DIRECTIONS

* Store these drugs at room temperature with the external ointments and liquids. Accidental freezing may ruin them. Do not use them if they have been frozen.
* Check the expiration date before using.
* These drugs are prescription drugs.

ACETAMINOPHEN
325 MG TABLETS
60 MG/0.6CC DROPS

TYLENOL R
TEMPRA R
DATRIL R

* Acetaminophen reduces pain and fever much like aspirin. Unlike aspirin, acetaminophen does not reduce inflamation. Acetaminophen has fewer side effects than aspirin and is available in a liquid dosage form for children.

* Acetaminophen is used to treat mild to moderate pain from headacehs, toothaches, headcolds, menstural cramps, muscle aches, etc. The usual adult dose is 2 tablets (650mg) every 4 hours if needed for pain. Larger doses will not relieve severe pain. It can be used to reduce fever in the same dosage.

* Acetaminophen is the best drug to use to reduce fever in children. Give the child the following dose every 4 hours if needed:

    * Children under 6 months of age = 0.3cc
    * Children 6 months to 1 year = 0.6cc
    * Children 1 to 3 years old = 0.6cc to 1.2cc
    * Children 3 to 6 years old = 1.2cc to 2.4cc
    * Children from 6 to 12 years old = 1/2 to 1 adult 325mg tablet.

WARNINGS

* Acetaminophen has few harmful effects if taken correctly. A few patients may have a skin rash or other signs of allergy.

* Acetaminophen is considered to be a relatively safe drug, but an overdose of it can cause illness and even death. A single dose of 20 tablets or more in an adult may lead to serious injury to the liver. Children appear to be less likley to have liver injury than adults, but a full bottle or more of acetaminophen drops may lead to serious livery injury in a 20 lb. child. If a patient takes an overdose of this drug, cause vomiting and follow the other steps normally taken for a medication overdose and contact your referral physician for advice.

* Large doses of acetaminophen taken for several years may also be harmful.

* Do not use acetaminophen if:

    * . The patient is allergic to acetaminophen or phenacetin (rare)
    * . The patient has arthritis like pain. Use apsirin instead since it will reduce inflamation.

STORAGE AND DISPENSING DIRECTIONS

* Store acetaminophen at room temperature. Acetaminophen will not be damaged by accidental freezing unless the bottle breaks.
* Acetaminophen is a non-prescription drug.
* Show the mother how to measure the dose. Tell her that 1.2cc is 2 dropperfuls, 2.4cc is 4 droppersful, etc.

ASPIRIN
325MG (5 GR.) TABLETS "ADULT ASPIRIN"
75MG (1 1/4 GR.) TABLETS "BABY ASPIRIN

A.S.A.
ACETYLSALICYLIC ACID

DESCRIPTION AND USES

* Aspirin has 3 separate actions on the body. It is an:

  * Analgesic (reduces pain).
  * Antipyretic (reduces fever).
  * Anti-Inflammatory (reduces inflammation and swelling).

* The adult dosage is 2 tablets of the 325mg size every 4 hours if needed for pain or fever. Aspirin will relieve mild to moderate pain from headaches, toothaches, menstrual cramps, muscle aches etc. Larger doses will not give relief of severe pain. Larger doses (3 or 4 tablets every 4 hours) may help reduce inflammation in swollen joints due to rheumatic fever or arthritis.

* The pediatrician's prefer that you use acetaminophen drops for small children, rather than aspirin. If you must use aspirin for fever, follow these dosage recommendations:

  * Children under 3 months - Do not give aspirin.
  * Children 3 to 6 months of age - 1/4 of a 75mg baby aspirin.
  * Children 6 to 12 months - 1/2 of a 75mg baby aspirin.
  * Children 1 year old - 1 baby aspirin.
  * Children 2 years old - 2 baby aspirin.
  * Children 3 years old - 3 baby aspirin.
  * Children 4 years old - 4 baby aspirin.
  * Children 5 to 12 years old - 4 baby aspirin or one adult aspirin.
  * The above dose may be given every 4 hours if needed. Do not give it more often. Do not continue the aspirin for more than 48 hours at the above dose.

WARNINGS

* Aspirin has many side effects, some of which can be serious. Overdosage can be fatal, especially in small children. The harmful effects are more common in children who are feverish and dehydrated. Be certain that children taking aspirin are given plenty of liquids.
* Aspirin in the usual doses can cause:

  * Nausea.
  * Vomiting.
  * Abdominal pain.
  * Small amount of blood loss from the intestines.
  * Worsened gastric bleeding and ulcers.
  * Sweating.

* About 1 in every 500 persons is allergic to aspirin. Patients who have asthma or nasal allergies are more likely to have aspirin allergies. Aspirin allergy symptoms can include:

  * Rashes and hives.
  * Inflammed nose, asthma, nasal polyps.
  * Fainting.
  * Edema of the face, eyelids, lips.
  * Difficulty breathing, asphyxia, and death.

* Aspirin can block or increase the effects of some other drugs.

* If the patient receives a slight over dose, he may have symptoms of salicylism. If this occurs, stop the drug until the symptoms go away. If the drug is still needed, restart the drug at a small dose. Symptoms of salicylism include:

* Ringing ears.	* Dizziness.	* Rapid breathing.
* Headache.	* Dimness of vision.	* Rapid pulse.
* Confusion.	* Sweating.	* Vomiting.
* Drowsiness.	* Fever.	* Diarrhea.

* Do not use aspirin if:
  * The patient is allergic to it.
  * The patient is a child and you have acetaminophen available. Use acetaminophen instead.
  * The patient is taking probenecid (benemid) for gout, or anti-coagulents (warfarin, counmadin).
  * The patient has ulcers or gastrointestinal bleeding.

STORAGE AND DISPENSING DIRECTIONS

* Store aspirin at room temperature with the other tablets. It will not be harmed by accidental freezing.
* Aspirin does not require a prescription.
* Aspirin should be taken with food, milk, at meals or with a large amount of water to prevent stomach irritation. Baby aspirin tablets should be smashed and mixed with a small amount of water.
* Warn the patient that aspirin is the most common cause of death in accidental poisoning of small children. Keep aspirin out of the reach of children, especially flavored baby aspirin!

PROPOXYPHENE
65MG CAPSULES

DARVON[R]

DIRECTIONS AND USES

* Propoxyphene is an analgesic. It will relieve mild to moderate pain, much like aspirin. Unlike aspirin, it will not reduce fever or inflammation. Recent studies have shown propoxyphene to be no more effective than aspirin for the relief of pain.

* Propoxyphene is used to relieve mild to moderate pain caused by headache, toothache, menstrual cramps, muscle aches and injuries. The usual adult dose is one 65mg capsule every 4 hours.

WARNINGS

* Propoxyphene has a number of harmful side effects including:

  * Drowsiness or dizziness.
  * Sedation.
  * Headache.
  * Insomnia.
  * Excitement.
  * Euphoria (feeling of well being).
  * Skin rashes.
  * Nausea and vomiting.
  * Constipation.

* Many people who have taken propoxyphene want to continue to take it because it makes them feel good. They develop a psychological dependance on the drug. Propoxyphene is not as often abused as codeine or morphine, but it must be considered a habit forming drug.
* Patient should not do hazardous work, such as drive a snow machine, while taking propoxyphene because the drug will make them drowsy or dizzy. Alcohol and other sedative drugs will increase the drowsiness.
* Overdose with the drug will cause coma, depressed breathing, shock, edema of the lungs and death. Convulsions may occur.
* Do not give the patient propoxyphene if:

  * The patient is a child.
  * The patient has arthritis. Aspirin is better.
  * The patient is using a lot of this drug or may be abusing it.
  * The patient has not tried aspirin or acetaminophen.
  * The patient drinks a lot of alcohol, operates dangerous equipment or might be harmed by the sedative effects.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the other oral tablets. Propoxyphene capsules will not be damaged by accidental freezing.
* Check the expiration date before dispensing.
* This is a prescription drug. It is subject to drug abuse by some patients. Use it only with your referral physician's order.
* Warn the patient about the dizziness or drowsiness. Tell him not to drink alcohol, drive a snow machine, or operate dangerous equipment.

SODIUM SALICYLATE
300MG ENTERIC COATED TABLETS

NASAL
SOD. SAL.

DESCRIPTION AND USES

* Sodium salicylate is very similar to aspirin. It has most of the same actions and harmful effects. The enteric coating prevents the tablet from dissolving until it reaches the intestine. This means that the drug causes less stomach irritation, but it also acts more slowly.

* Sodium salicylate is used to reduce the pain and swelling of the joints caused by arthritis. The usual dose is 600 to 900mg (2 or 3 tablets) 4 times daily.

WARNINGS

* Sodium salicylate has the same harmful effects as aspirin including:

  * Salicylism from over dose.
  * Interferring with effects of other drugs.
  * Causing gastrointestinal bleeding.
  * Serious poisoning from accidental over dose.

* Sodium salicylate is less likely to cause stomach upset or allergic reactions than is aspirin.

* Do not use sodium salicylate if the patient:

  * Has a fever or headache. Use aspirin or acetaminophen since sodium salicylate acts to slowly.
  * Is a child. The tablets are too strong for pediatric use.
  * Has an allergy to aspirin or sodium salicylate.
  * Is taking anticoagulants (coumadin, warfarin) or probenecid (Benemid).

STORAGE AND DISPENSING DIRECTIONS

* Store sodium salicylate at room temperature with the other tablets. It will not be damaged by accidental freezing.
* Sodium salicylate does not require a prescription.
* Tell the patient to take the drug with lots of water. Warn him that the drug is dangerous if taken in too large a dose. It can be fatal to small children. The red tablets look like candy. Keep it out of the reach of children!

PENTAZOCINE
50MG TABLETS
30MG/CC AMPUL

TALWIN

DESCRIPTION AND USES

* Pentazocine is a analgesic. Injectable pentazocine is about as effective as morphine or meperidine for severe pain. Oral pentazocine is about as effective as oral codeine. Pentazocine is considered to be less habit forming than narcotics like morphine and codeine. It has less of an abuse problem as well.

* Pentazocine is taken by mouth for mild to moderate pain such as toothaches, severe headaches, injury, etc. The usual adult dose is 50 to 100mg (1 to 2 tablets) by mouth every 4 hours.

* Injectable pentazocine is used to treat severe pain. The usual adult dose is 30 to 60mg IM or subcutaneously.

WARNINGS

* Pentazocine has many side effects. The most common are sedation, nausea and vomiting. Alcohol and other sedative drugs will increase the drowsiness.
* Some of the other main side effects include:

    * Loss of appetite, cramps, diarrhea and consripation.
    * Dry mouth, dizziness, sweating, nasal congestion, tachycardia, flushing and urinary retention.
    * Change in blood pressure, shock.
    * Vision disturbances, weakness, drunken feeling, grogginess, headache, depression, excitement, nightmares.
    * Itching and allergic reactions.

* Pentazocine is not as addicting as morphine or meperidine, but some people may abuse the drug.
* Do not give pentazocine if:

    * Aspirin or acetaminophen will be effective.
    * The patient has low blood pressure or other symptoms of shock.
    * The patient has a head injury or brain damage.
    * The patient is a child.
    * The patient has a breathing difficulty such as asthma, cyanosis, COPD. Pentazocine will further depress his breathing.
    * The cause of the pain is unknown and the patient will be seen by a physician soon. If the pain is relieved, the physician may have trouble finding the cause.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the tablets or injections. If it is frozen, the ampul will probably break. It it does not, the medicine is probably safe to use.
* Check the expiration date before using.
* This is a prescription drug. It has some abuse potential. Use it only with a physician's order or, in an emergency, as outlined in your manual.
* Warn the patient that the drug will cause dizziness or drowsiness. Tell him to stay in bed.

MEPERIDINE INJECTION 50MG DEMEROL[R]

MORPHINE INJECTION 10MG

DESCRIPTION AND USES

* Morphine and meperidine are analgesics. They are highly effective for severe pain due to injuries, heart attacks, heart failure and other problems. They have been abused by drug addicts and are subject to special legal controls. The actions of morphine, meperidine and pentazocine are similar.

* The usual adult dose of meperidine is 50 to 75mg I.M. This dose is repeated every 3 to 4 hours.

* The usual adult dose of morphine is 10mg subcutaneously every 4 hours. It may also be given I.M.

WARNINGS

* Like all narcotics, morphine and meperidine have many side effects. The ones you should be most concerned with are:

  * Sedation.
  * Nausea and vomiting.
  * Respiratory depression.
  * Circulatory depression.

* The patient may have hallucinations, nightmares, and many other side effects. The drugs affect the mind, respiration, circulation, and the operation of the gastrointestinal tract. The patient should go to bed and stay there. Assist him if he must be transported.
* Morphine and meperidine are addicting to some people. Addiction is not a problem if the patient receives only a few injections to control acute pain.
* Do not use morphine or meperidine if:

  * The patient has minor pain that can be relieved by aspirin or acetaminophen.
  * The patient has low blood pressure or other symptoms of shock.
  * The patient has a head injury or brain damage.
  * The patient has a breathing difficulty due to asthma, COPD, or similar disease. Narcotics will further depress his breathing.
  * The cause of the pain is unknown and the patient will be seen by a physician soon. If the pain is relieved the physician may have trouble finding the cause.
  * The patient must perform dangerous work requiring alertness (such as flying a plane). Narcotics are for patients in bed or on a stretcher.

STORAGE AND DISPENSING DIRECTIONS

* Store morphine at room temperature in a locked cabinet. Only the health aide should have access to the cabinet.
* Accidental freezing may break the glass tubex. If it does not appear to be damaged, the drug is probably all right.
* Check the expiration date before using the drug.
* Morphine and meperidine are controlled drugs as well as prescription drugs. Use it only with a physician's order or, in an emergency, according to your manual. You must keep a record of each dose of the drug you receive and use.
* Do not let the patient stand up or walk about after he has received either of these drugs.

LIDOCAINE INJECTION — XYLOCAINE®

DESCRIPTION AND USES

* Lidocaine is a local anesthetic. It will block the nerves near the area into which it is injected. Lidocaine is used to block the pain in an area that must be sutured, debrided, or otherwise treated painfully.

* Inject a small amount of the solution every 1/4" to 1/2" in the desired area. 3cc to 5cc is enough total solution for a small laceration. Use the smallest amount possible. Aspirate frequently to be certain that you not injecting into a vein.

WARNINGS

* Allergic reactions are rare, but may occur. Reactions have included skin rashes, edema, asthma, shock-like reactions, and death.

* If a large amount of lidocaine is injected into a vein or rapidly absorbed, the patient may have:

    * Anxiety, tremors or other signs of nervous system stimulation.
    * Slow heart beat, low blood pressure, or other signs of cardiovascular depression.

* Do not use liodcaine if:

    * The patient is allergic to it.
    * The area is infected or inflammed.
    * The patient is in shock.

STORAGE AND DISPENSING DIRECTIONS

* Store lidocaine at room temperature with the other injections. If lidocaine is frozen, the vial may break. If it does not break, it is safe to use the drug.
* Check the expiration date before using the bottle. When you first use the vial, write the date on the bottle. Discard the vial 30 days after opening.
* Lidocaine is a prescription drug.

CLOVE OIL

EUGENOL
OIL OF CLOVES

DESCRIPTION AND USES

* Clove oil is a local anethetic. It is used to stop a toothache on a temporary basis. The tooth is still decayed and must be restored or pulled by a dentist.

* The clove oil may be placed on a small piece of cotton. The cotton is then inserted into the cavity of the tooth. The clove oil will have to be replaced periodically as the effect wears off.

* Clove oil is also used as an ingredient in a temporary filling.

WARNINGS

* Clove oil is a temporary measure only. The tooth is still decayed. The patient must see a dentist as soon as possible

STORAGE

* Store clove oil at room temperature with the internal liquids.
* Clove oil will not be damaged if it is accidentally frozen.
* Clove oil is a non-prescription drug. Follow the guidelines in the health-aide manual.
* It is best to apply this drug yourself. Do not give the bottle to the patient.

ALUMINUM HYDROXIDE GEL WITH MAGNESIUM TRISILICATE TABLETS	GELUSIL[R]
ALUMINUM HYDROXIDE - MAGNESIUM HYDROXIDE SUSPENSION	MAALOX[R]
ALUMINUM HYDROXIDE - MAGNESIUM HYDROXIDE WITH SIMETHICONE SUSPENSION	MYLANTA[R]

DESCRIPTION AND USES

* All 3 of these products are antacids containing an aluminum and a magnesium salt. Aluminum salt antacids tend to cause constipation, while magnesium salts cause diarrhea. The combination of the two is less likely to cause either. The simethicone in mylanta reduces "gas" in the stomach.

* Antacids are also used to treat peptic ulcer, acute alcohol gastritis gastritis due to disease or drugs, and other stomach problems caused by too much acid in the stomach. The usual dose is 1 to 2 tablespoonfuls or 1 or 2 tablets every 1-2 hours. The tablets should be chewed well and taken with water.

* A smaller dose (1-2 teaspoonfuls) may relieve indigestion, heartburn, "sour stomach" and similar minor complaints.

WARNINGS

* A few patients may have constipation or diarrhea as a side effect. Serious side effects are rare.

STORAGE AND DISPENSING DIRECTIONS

* Store antacids at room temperature with the other oral tablets or liquids. Accidental freezing will ruin Mylanta or Maalox Suspension. Even if the bottle is not broken, the medicine may be damaged so that it will not shake up properly. Freezing will not hurt the tablets.
* All 3 of the antacids are non-prescription drugs.
* Tell the patient to shake the liquids well before using. Tell him to chew the tablets and swallow them with water.

KAOLIN WITH PECTIN N.F.

KAOPECTATE[R]
KALPEC

DESCRIPTION AND USES

* Kaolin is a type of clay. Pectin is a carbohydrate obtained from apples and citrus fruit. Irritating chemicals and bacteria are adsorbed onto the surface of these two drugs. Pectin is also a demulcent that soothes the lining of the g.i. tract.

* Kaolin with pectin is used to treat simple diarrhea. Give the patient Kaolin with Pectin 3 or 4 times daily if needed:

    * Adults may have 30ml (2 tablespoonfuls).
    * Children between 6 and 12 may have 15ml (1 tablespoonful).
    * Children between 3 and 6 may have 1-2 teaspoonfuls.
    * Children under the age of 3 may have 1/2 to 1 teaspoonfuls.

WARNINGS

* Do not use Kaolin with Pectin for more than a few days. If the diarrhea lasts longer than this, contact your referral physician.

* Kaolin with Pectin is not very effective alone. It is important that the patient follow the directions regarding fluids and diet.

STORAGE AND DISPENSING DIRECTIONS

* Store Kaolin with Pectin at room temperature with the other oral liquids. Accidental freezing may ruin it. Do not use it if it has been frozen.
* Kaolin with Pectin is a non-prescription drug.
* Shake it well before using.

MILK OF MAGNESIA U.S.P. MAGNESIA MAGMA

DESCRIPTION AND USES

* Milk of Magnesia is a suspension of magnesium hydroxide in water. It acts as an antacid or a laxative depending on the dose. When used as a laxative, it works by retaining water in the intestine. This produces a loose watery stool.

* One or two teaspoonfuls (5-10ml) will act as an antacid. One to two Tablespoonfuls (15-30ml) will act as a laxative and relieve constipation.

WARNINGS

* The use of laxatives can become a habit. Encourage people to excercise, drink plenty of fluids, and eat lots of fruits and vegetables to prevent constipation. It is not necessary to have a "daily" bowel movement to be normal.

* Constipation may be a symptom of appendicitis, bowel obstruction or some other serious problem. The use of milk of magnesia in these situations may be harmful.

* Do not use milk of magnesia if:

    * The patient has poor kidneys. The magnesium will not be excreted and may depress the patient's breathing.
    * The patient has fever, pain in the right lower quadrant, nausea, or other symptoms of appendicitis.
    * The patient is a child under the age of 12, unless you are instructed to do so by a physician.

STORAGE AND DISPENSING DIRECTIONS

* Store milk of magnesia at room temperature. Do not use it if it has been frozen. Even if the bottle is not broken, the suspension may be ruined.
* It is a non-prescription drug.
* Encourage the patient to take plenty of water while taking this drug. Water provides the bulk that stimulates the bowels.

PHENOBARBITAL AND BELLADONNA

PB AND BELLADONNA

DESCRIPTION AND USES

* Phenobarbital is a sedative that relieves nervous tension and anxiety. Belladonna is an antispasmotic that relieves cramps and spasms of the smooth muscle of the intestines and other digestive organs.

* This product is used to treat spasms and cramps of the gastrointestinal tract. It will help relieve the belching, cramps, constipation, and diarrhea that may accompany some gastrointestinal upsets. The usual adult dose is one tablet 3 or 4 times daily.

WARNINGS

* Phenobarbital causes drowsiness. Alcohol and other sedatives drugs will increase the drowsiness.

* Belladonna may cause many minor irritating side effects. Do not stop the drug unless the effects bother the patient a lot. Common effects include dry mouth, blurred vision, difficulty urinating, headache, fast heart beat, dizziness, and nervous system stimulation.

* This drug will cause harmful effects if the patient takes too much. The harmful effects are particularly severe in children.

* Do not give Pb and belladonna to children. Check with a physician before you give it to someone with glaucoma or an obstruction of the stomach, intestine or bladder.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the other oral tablets. It will not be harmed by accidental freezing.
* This is a prescription drug.
* Warn the patient that he should expect some drowsiness, dry mouth, and possibly blurred vision. Tell him to avoid driving a vehicle, doing dangerous work and drinking alcohol.

TRIMETHOBENZAMIDE HCL 200MG RECTAL SUPPOSITORIES

TIGAN®

DESCRIPTION AND USES

* Trimethobenzamide is an antinauseant. It is effective for nausea caused by infections. It is not generally used for other causes of nausea such as irritating drugs, motion sickness or pregnancy.

* Tigan is used to treat nausea due to acute febrile illnesses or gastroenteritis. It should not be given to children under the age of 1. Adults and older children may have the following dose by the rectum every 8 hours if needed:

    * Children between 1 and 2: 1/4 suppository.
    * Children between 2 and 8: 1/2 suppository.
    * Children over the age of 8 and adults: 1 suppository.

WARNINGS

* Trimethobenzamide causes few side effects. A few patients may have:

    * Skin rashes or other allergic reactions.
    * Shaking or rigidity of the muscles.
    * Dizziness or drowsiness.
    * Other side effects.

* Tigan suppositories also contain the local anesthetic benzocaine. Some patients may be allergic to this drug.

* Do not use trimethobenzamide if:

    * The patient is allergic to trimethobenzamide or benzocaine.
    * The patient is a child under the age of 1 (unless directed to do so by a physician).
    * The nausea is due to pregnancy, motion sickness, or irritating effects of drugs (unless told to do so by a physician).
    * The vomiting will respond to simple measures like bed rest, stopping all solid foods, etc.

STORAGE AND DISPENSING DIRECTIONS

* Tigan may be stored at room temperature or in the refrigerator. It will not be damaged by accidental freezing.
* Check the expiration date before using it.
* This is a prescription drug.
* Show the patient how to cut the suppositories in halves or fourths. Cut them before you remove the foil. Remind the patient to remove the foil before inserting the suppository.

ERGONOVINE MALEATE U.S.P. 0.2MG INJECTION

METHYLERGONOVINE MALEATE U.S.P. 0.2MG TABLETS

METHERGINE®

DESCRIPTION AND USES

* Ergonovine and methylergonovine stimulate the muscles of the uterus and makes them contract. This helps reduce or prevent bleeding from the uterus following childbirth.

* Ergonovine is given as a single I.M. injection following the delivery of the placenta. The usual dose is 0.2mg.

* Methylergonovine tablets are started following the delivery of the placenta as well. The mother takes one tablet every 4 hours for a total of 6 tablets.

WARNINGS

* Headaches, dizziness and abdominal cramps may occur. Either drug may cause increased blood pressure or a slow heart rate in some patients.

* Do not give the mother either drug if:

    * She has high blood pressure.
    * The child and placenta have not been delivered.
    * The uterus is infected
    * The mother has a liver or kidney disease.

STORAGE AND DISPENSING DIRECTIONS

* Store methylergonovine tablets at room temperature with the other oral tablets. The tablets will not be harmed by accidental freezing.
* Store ergonovine injection in the refrigerator. Accidental freezing may break the tubex. Replace the drug if it has been frozen and you have any question about its quality.
* Check the expiration date before using either drug.
* They are both prescription drugs.

FERROUS SULFATE
325MG TABLETS
125MG/CC DROPS

FESO4
FEOSOL®
FER-IN-SOL®
IRON DROPS

DESCRIPTION AND USES

* Ferrous sulfate is a source of iron. Iron is an important part of the hemoglobin found in the red blood cell. Hemoglobin enables the red blood cells to carry oxygen from the lungs to the body tissues.
* Iron is usually obtained from foods. Milk is a poor source of iron. For this reason, babies require an iron supplement. Pregnant women also require extra iron because of the rapid increase in their blood supply and that of the fetus. Patients with a blood loss from injuries, ulcers, excessive menstrual flow, or other causes may also require additional iron to help rebuild their blood.
* Children from birth to age 1 may receive 0.6cc of the drops once each day to prevent low hemoglobin. This is not needed if the child is receiving a vitamin that contains iron or is receiving a product like similac with iron.
* The usual dose of iron to treat low hemoglobin is:
    * Children from age 6 months to 1 year = 0.6cc 3 times daily
    * Children from 1 years to 2 years = 1.2cc 2 times daily
    * Children from 2 years to 5 years = 1.2cc 3 times daily
    * Children 5 to 10 years = 1 tablet 2times daily
    * Adults and children over 10 years = 1 tablet 3 times daily
    * The medicine must be taken for 4 months while the body slowly builds new red blood cells.

WARNINGS

* Iron is poisonous if too much is taken. It is hazardous because it looks like candy.
* Iron may cause constipation, stomach irritation, and possible cramps and diarrhea. This is more of a problem with adults than children. If the patient has gastrointestinal complaints, have them take the drug just after a meal. Iron usually causes the patient to have dark colored stools.
* Iron drops may stain the teeth of older children. Place the drops in the back of the mouth or dilute them with liquids. Do not mix the drops with milk or formula.
* Do not give iron tablets or drops to:
    * Patients who are taking tetracycline. Iron will reduce the effectiveness of the antibiotic.
    * Patients with ulcers, regional enteritis or ulcerative colitis. Check with a physician first since iron may irritate the g.i.tract.

STORAGE AND DISPENSING DIRECTIONS

* Store iron tablets and drops at room temperature with the other tablets and oral liquids. Accidental freezing will not harm the tablets or drops, but it may break the bottle holding the drops.
* Ferrous sulfate is a non-prescription drug. Provide it to pregnant women, infants, and patients with low hemoglobin as directed in your manual.
* Tell the patient to take the drug with food if it irritates his stomach. It is more effective if the stomach is empty.

PEDIATRIC VITAMINS [illegible]

BABY-VI-FLOR®
ADDED WITH FLUORIDE®

PRESCRIPTION AND USE

* This product supplies [illegible]. It does not supply iron. A shortage of vitamin [illegible] can cause permanent damage. Fluoride helps to prevent [illegible].

* Children from birth to age [illegible] receive one dropperful daily by mouth. The drops may be placed directly on the tongue or mixed with the baby's food.

WARN

* There are no harmful effects [illegible] receive the correct dose. Warn the parents [illegible] out of the reach of children to prevent accidental overdose.

* Do not use this product in the [illegible]:

    * Drinking water from a fluoride [illegible] source.
    * Receiving vitamins from a commercial formula like Similac or Enfamil. [illegible] fluoride tablets instead.
    * Receiving vitamin [illegible] iron drops.

STORAGE [illegible] DIRECTIONS FOR USE

* Store this drug at room temperature. Like other oral liquids. It may be ruined by [illegible] freezing.
* Check the expiration date. If the [illegible] has one.
* This is a prescription drug. Give [illegible] to all babies under the age of one according to your referral physician's directions or according to the manual.

THE PRECEDING DOCUMENT(S) MAY NOT FILM

ORIGINAL.

PEDIATRIC VITAMINS WITH IRON — TRI-VI-SOL WITH IRON®

DESCRIPTION AND USES

* This product contains vitamins A, D, and C and a small amount of iron. It does not contain fluoride. A shortage of vitamins can slow a child's growth or cause permanent damage. A shortage of iron can cause low hemoglobin.

* Children from birth to age 1 should receive 1 dropperful daily by mouth to prevent a vitamin or iron shortage. The drops may be placed directly in the mouth or mixed with water, juice, or formula.

WARNINGS

* There are no harmful effects if the child receives the correct dose. Warn the parents to keep the medicine out of the reach of children to prevent accidental overdose.

* Do not use this product if the child is receiving a commercially prepared formula that contains both vitamins and iron (such as similac with iron).

* If you are giving the child Tri-Vi-Sol with iron, he does not need to take iron drops to prevent low hemoglobin.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the other oral liquids. This drug may be ruined by freezing.
* Tri-Vi-Sol with iron is a non-prescription drug. Give it to babies under the age of 1 as directed in the manual or by your referral physician.

PRENATAL VITAMINS

NATABEC Rx

DESCRIPTION AND USES

* This product contains vitamins, mineral, and iron. Pregnant women have a greater need for folic acid, iron and certain other vitamins and minerals This formula is designed to meet the need of the woman during pregnancy. She should take one capsule daily while she is pregnant. Some physicians recommend that she continue the medication as long as she is breast feeding as well.

WARNINGS

* This product contains 150mg of ferrous sulfate (iron). The iron may cause constipation or stomach irritation in some patients.

* Vitamins with iron can be poisonous if a child takes a lot of them. Warn the mothers to keep them out of the reach of children.

STORAGE AND DISPENSING CONDITIONS

* Store this drug at room temperature with the other oral tablets. It will not be damaged by accidental freezing.
* Check the expiration date before dispensing.
* This is a prescription drug.

SODIUM FLUORIDE 2.2MG TABLETS

DESCRIPTION AND USES

* Fluoride helps prevent tooth decay. It is most effective if it is taken daily in the water. If your village does not have fluoridated water, all the children should receive fluoride daily from tablets or drops. Fluoride is most effective if it is taken while the child is young, while the teeth are still forming.

* Children under the age of 1 should have 1/2 tablet daily. Children over the age of 1 should have a whole tablet daily. The tablet should be chewed and swallowed.

WARNINGS

* Sodium fluoride is a safe drug. It has no harmful effects if it is taken in the correct dosage. Large amounts of fluoride for a long period of time may cause discolored teeth. A single large dose of fluoride can also be harmful to a child. Give the parents only one bottle at a time. Warn them to keep the medicine out of the reach of children.

* Do not use fluoride tablets if:

    * The child receives fluoride from the water.
    * The child is taking vitamins that contain fluoride (Poly-Vi-Flor, ABDEC with fluoride).

STORAGE AND DISPENSING

* Store this drug at room temperature with the other oral tablets. It will not be harmed by accidental freezing.
* Sodium flouride is a prescription drug. Use it according to the manual or your referral physician's directions.

DIPHENHYDRAMINE HCL
25MG CAPSULES
12.5MG/5ML ELIXIR

BENADRYL®

DESCRIPTION AND USES

* Diphenhydramine is an antihistamine. It will relieve itching, skin rashes, hives, and a variety of allergy symptoms.

    * Children from 1 to 5 years of age may receive 1 teaspoonful of the elixir (12.5mg).
    * Children from 6 to 12 may have one 25mg capsule.
    * Adults and other children may have one or two 25mg capsules.
    * The above dose can be given 4 times daily if needed.

* Diphenhydramine is also used as a sedative and to prevent motion sickness. When used as to prevent motion sickness, the adult patient should taken 25 to 50 mg a half hour before the trip starts.

WARNINGS

* Diphenhydramine, and most other antihistamines, causes drowsiness. Alcohol will make the effect worse. The patient should be told not to drink alcohol or operate dangerous equipment. Children may be stimulated rather than depressed. They may act restless or nervous, or be unable to sleep.

* Some patients may be troubled by minor irritating effects such as:

    * Dry mouth.
    * Difficult urination.
    * Dizziness.
    * Blurring vision.
    * Ringing in the ears.
    * Stomach upset.
    * Nausea.
    * Diarrhea.
    * Constipation.

* Any overdose can depress the patient's breathing.

* Do not give diphenhydramine to:

    * Breast feeding mothers since it may appear in the milk or reduce the mother's ability to make milk.
    * Patients who must perform dangerous work requiring mental alertness.
    * Patients with epilepsy or a seizure problem. Check with a physician. The drug may cause some patient's with epilepsy to have a seizure.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the other oral tablets and liquids. It will not be damaged by accidental freezing.
* This is a prescription drug.
* Remember to tell the patient about the sedative effect of the drug. Warn them not to drink or operate dangerous equipment. Tell them to stop the drug as soon as they feel better.

DIPHENHYDRAMINE EXPECTORANT

BENYLIN[R]
DIPHENHYDRAMINE COMPOUND (
EXPECTORANT
"BENALYN"

DESCRIPTION AND USES

* Benylin[R] contains the antihistamine diphenhydramine and several expectorants that loosen mucous so that it can be coughed up. It is easy to confuse the expectorant with the elixir. Both products contain 12.5mg of diphenhydramine per teaspoonful. The expectorant also contains sodium citrate and ammonium chloride.

* Benylin is used to loosen the mucous in the lungs that causes the coughing. It will also suppress a cough caused by a head cold or allergy.

    * The adult dose is 1-2 teaspoonfuls 4 times daily.
    * Children from 6 to 12 may have 1 teaspoonful.
    * Children from 1 to 6 may have 1/2 teaspoonful.

WARNINGS

* Diphenhydramine causes drowsiness. Alcohol, other antihistamines, and other sedative drugs will make this effect worse. Warn the patient not to drink alcohol or operate dangerous equipment. Children may be stimulated rather than depressed. They may act restless or nervous.

* Some patients may complain of minor irritating effects like:

    * Dry mouth.
    * Difficult urination.
    * Dizziness.
    * Blurry Vision.
    * Ringing in the ears.
    * Stomach upset.
    * Nausea.
    * Darrhea.
    * Constipation.

* The drug has a drying effect. This may make it diffcult to remove bronchial secretions.
* An overdose of the drug will depress breathing.
* Do not give benylin to:

    * Breast feeding mothers since the drug may reduce their ability to make milk.
    * Patients who must perform dangerous work requiring mental alertness.
    * Patients who are taking other sedative drugs such as actifed, Librium[R], Valium[R], or alcohol.
    * A patient with pneumonia.

STORAGE AND DISPENSING CONDITIONS

* Store this drug at room temperature with the oral tablets and liquids. Benylin will not be damaged by accidental freezing unless it breaks the bottle.
* This is a prescription drug.
* Warn the patient that the drug causes drowsiness. Tell him not to operate dangerous equipment or drink alcohol.

GUIAFENESIN	GLYCERYL GUAIACOLATE	2-G®	ROBITUSSIN®
GUIAFENESIN WITH DEXTROMETHORPHAN	GLYCERYL GUAIACOLATE WITH DM	2-G/DM®	ROBITUSSIN DM®

DESCRIPTION AND USES

* Guiafenesin, formerly known as glyceryl guaiacolate, is an expectorant. It helps make the mucous in the lungs more liquid, less sticky and easier to cough up. Dextromethorphin is a cough suppressant. It helps stop a cough which is not serving a useful purpose.
* Guiafenesin is used to treat coughs due to colds, influenza and similar conditions.
    * The usual adult dose is 1-2 teaspoonfuls every 4-6 hours.
    * Children from 4 to 10 may have 1 teaspoonful.
    * Children under 4 years of age may have 1/2 teaspoonful.

* Guiafenesin with dextromethorphen is used if the patient has a cough caused by something other than sputum in the lungs (such as throat irritation). The usual adult doses is 1-2 teaspoonfuls. Children over the age of 6 may have 1/2 teaspoonful. Do not give it to younger children.

WARNINGS

* Guiafenesin may cause stomach upset, particularly if the dose is too large. Dextromethorphan may cause nausea or dizziness.

* Do not use dextromethorphan if:

    * The patient has a productive cough. Coughing is a normal action necessary to clean the lungs.
    * The patient is a child under the age of 6.

STORAGE AND DISPENSING DIRECTIONS

* Store these cough syrups at room temperature with the other oral liquids. These drugs will not be damaged by accidental freezing unless the bottle is broken.
* These drugs do not require a prescription.

Rev 6/77

PHENYLEPHRINE
0.25% NOSE DROPS

NEO-SYNEPHRINE®

DESCRIPTION AND USES

* Phenylephrine is a decongestant. It is applied directly to the lining of the nose in the form of drops. It constricts the swollen blood vessels and opens the nasal passages so the patient can breathe. The effect is immediate and gives considerable relief. Unfortunately the effect lasts only a short time.

* Place 1 or 2 drops into each side of the nose every 4 hours if needed to relieve congestion and "stuffy nose". The drops must not be used more frequently.

WARNINGS

* The patient may notice a mild stinging sensation when the drops are applied. After several days of use, the drug may irritate the nasal mucosa.

* Phenylephrine interferes with the normal action of the nasal cilia.

* If the drops are used for more than 2 days or more frequently than every 4 hours, the nose may become dependent on them. The patient will then find that he must use the nose drops constantly in order to keep his nasal passages open.

* Do not use phenylephrine:

    * In infants.
    * For more than 2 days.
    * At the same time the patient is using actifed, sudafed, or other oral decongestants.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the eye and ear drops. It will probably not be damaged by accidental freezing.
* If the drug is exposed to air, metals or strong light, it will discolor and become useless. Discard the solution if it turns black or contains particles.
* This a non-prescription drug. It is recommended that you not use it routinely, however. Use it only when ordered by a physician or as directed in the manual.

PSEUDOEPHEDRINE
60MG TABLETS
30MG/5ML SYRUP

SUDAFED[R]

PSEUDOEPHEDRINE - TRIPOLIDINE
TABLETS AND SYRUP

ACTIFED[R]

DESCRIPTION AND USES

* Sudafed contains the decongestant psuedoephedrine. Actifed contains the antihistamine triprolidine as well as pseudophedrine.

* The decongestant constricts the blood vessels in the mucous membranes lining the nasal passages and the eustachian tube. This relieves the nasal congestant and plugged up ear sensation that often accompanies allergies, otitis media, serous otities, influenza, and the common cold.

    * The usual adult dose is one tablet 3 or 4 times daily.
    * Children from age 6 to 12 may have 1 teaspoonful or 1/2 tablet 4 times daily.
    * Children from 3 to 5 may have 1 teaspoonful 3 times daily.
    * Children from 1 to 3 may have 1/2 teaspoonful 3 times daily.
    * Do not give actifed or sudafed to children under 1 year of age.

WARNINGS

* Pseudoephedrine (Sudafed) has few side effects.

* The antihistamine triprolidine causes drowsiness. Alcohol and sedative drugs will increase the drowsiness caused by actifed.

* Do not give <u>Actifed</u> to:

    * Breast feeding mothers since the antihistamine may decrease their ability to make milk.
    * Patients who are taking other sedative drugs such as alcohol, Benylin, Librium, or Valium.
    * Patients who must do work requiring mental alertness such as operating dangerous equipment.

STORAGE AND DISPENSING DIRECTIONS

* Store actifed and sudafed at room temperature with the other oral tablets and liquids. The drugs will not be damaged by freezing unless the bottle is broken.
* Check the expiration date before dispensing.
* Sudafed syrup is a non-prescription drug. Sudafed tablets and actifed tablets and liquid are prescription drugs.

TRIAMINIC

DESCRIPTION AND USES

* Triaminic is a combination of two antihistamines and one decongestant. It is similar in its uses and actions to actifed. The decongestant constricts the blood vessels in the mucous membranes lining the nasal passage and the eustachian tube. This relieves the nasal congestion and plugged up ear sensation that accompanies otitis media, serous otitis and the common cold.

    * The usual adult dose is 2 teaspoonfuls 3 or 4 times daily.
    * Children from age 6 to age 12 may have 1 teaspoonful 3 times daily.
    * Children from age 1 to age 6 may have 1/2 teaspoonful 3 times daily.

WARNINGS

* Triaminic has the same side effects that other antihistamine do. It causes drowsiness in the usual dose. Alcohol and other sedative drugs will make the drowsiness worse.

* An overdose of the drug can depress breathing. Be certain to give the correct dose.

* Do not give Triaminic to:

    * Breast feeding mothers since the antihistamine may decrease their ability to make milk.
    * Patients who are taking other sedative drugs such as alcohol, Benylin, Librium, or Valium.
    * Patients who must do work requiring mental alertness such as operating dangerous equipment.

STORAGE AND DISPENSING DIRECTIONS

* Store Triaminic at room temperature with the oral liquids. Accidental freezing will not harm the triaminic unless it breaks the bottle.
* Triaminic is a non-prescription drug.
* Warn the patient to expect some drowsiness. Tell him to avoid alcohol and activities requiring alertness.

SALINE NOSE DROPS

NACL NOSE DROPS
NORMAL SALINE NOSE DROPS
ISOTONIC SODIUM CHLORIDE
SALT WATER NOSE DROPS

DESCRIPTION AND USES

* This produce is a very dilute solution of sodium chloride in water. If the drugs are not stocked in your village, the mother can make her own by placing 1/4 teaspoonful of table salt in a cup of clean water.

* The drops are used to help clean mucous from the baby's nose when he has a cold. Place 3 or 4 drops into each nostril. Let the drops run back into the nose. Use a nasal aspirator syringe to suck out the solution. The saline drops will make the mucous easier to remove.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the other eye, ear and nose drops. The drug will not be harmed by accidental freezing.
* This a non-prescription drug.

CHLORPROMAZINE — THORAZINE®
50MG TABLETS
50MG/2CC INJECTION

PROCHLORPERAZINE — COMPAZINE®
5MG TABLETS
10MG/2CC INJECTION

DESCRIPTION AND USES

* These drugs are phenothiazine tranquilizers. Like other drugs of the phenothiazine group, they have a wide number of uses and side effects. Only a few of the uses and harmful effects are mentioned here.

* Thorazine and compazine can be used to treat agitation, anxiety, and psychotic states. They are most commonly used to treat mental disorders such as schizophrenia where the patient has lost contact with reality. The drugs may control hallucinations, thought disorders and aggressive behavior .

    * The usual dose of thorazine is 25mg - 50mg by mouth 3 or 4 times daily.
    * The usual injectable dose is 25mg IM. This dose may be repeated in 1/2 hour if needed.
    * The usual dose of compazine for this use is 5 to 10mg by mouth or 5 to 10 I.M.

* Chlorpromazine maybe used as sedative in patients experiencing alcohol withdrawal. Do not use it if the patient is having a seizure. The usual dose is 25 to 50mg IM orally or by IM injection.

* Chlorpromazine may be used as a sedative if a patient has hallucinations and fear due to delerium tremons (d.t.'s). The usual adult dose is 100 to 150mg by mouth or 50mg I.M.

* These drugs may also be used to treat nausea and vomiting if requested by a physician. Do not use them in children.

WARNINGS

* Phenothiazine-type drugs cause <u>many</u> side effects. Some of the more common ones are:

    * Sedation and drowsiness.
    * Low blood pressure.
    * Dry mouth, blurred vision.
    * Constipation.
    * Restlessness.
    * Muscle shaking, tremors, rigidity.
    * Jaundice, photosensitivity, blood disorders or other allergic reactions.
    * Inability to control body temperature.

* Alcohol, antihistamines, and other sedatives will increase the sedative effect.

* Avoid using the drug in the following patients:

    * Elderly patient's with liver, kidney or heart disease.
    * Patients who are drunk or who are using other sedatives.
    * Children.
    * Pregnant women.
    * Patients with asthma, emphe sema or other lung disorders.
    * Patients who must be transported through extreme cold.
    * Patients who are having seizures or who have a history of epilepsy or seizures.

STORAGE AND DISPENSING DIRECTIONS

* Store these drugs at room temperature. The medicines will not be damaged by accidental freezing unless the ampuls are broken.
* Keep these medicines out of direct sunlight or they will discolor. Do not use discolored medication.
* Check the expiration date before using.
* Keep the patient lying down for a half hour after the injection to prevent fainting due to low blood pressure.
* Warn the patient about the sedative effect.
* This is a prescription drug. Use it only with a physician's order or in an emergency according to your standing orders.

DIAZEPAM
5MG TABLETS
10MG INJECTION

VALIUM®

DESCRIPTION AND USES

* Diazepam is a sedative drug with a wide variety of uses. Small doses cause sedation. Larger doses cause sleep. A very large overdose may cause coma and death.
* Valium is used as a sedative to relieve anxiety, nervousness or actue alcohol withdrawal. It is also used to relax skeletal muscles that are in a spasm due to strain or injury. The adult dose is 1 tablet 3 or 4 times daily. Give the patient only a small supply of the medicine. Check with a physician before you give him more.
* Valium injection is used to stop seizures that do not stop on their own in a short period of time.

Adult dose	5 to 10mg IM	3 years old	3mg IM
5 years old	5mg. IM	2 year old	2mg IM
4 years old	4mg IM	1 year old	1mg IM
Phenobarbital Injection is preferred for children			

* Valium can be used to treat hallucinations caused by delerium tremons (d.t.'s). The adult dose is 20mg (4 tablets) by mouth or 10mg IM.

WARNINGS

* Sedation and drowsiness are common. Alcohol and other sedative drugs will increase the drowsiness. Warn the patient not to drink, operate dangerous equipment, or take other drugs. Some patients may become excited, anxious and stimulated by the drug.
* The injectable form of Valium may cause a drop in blood pressure. Keep the patient lying down.
* Valium may be a habit forming drug. Do not allow alcoholics to become addicted to valium instead of alcohol. Avoid overusing this drug, especially for long periods of time.
* These drugs have many side effects. The most common are: fatigue, drowsiness, lack of muscle coordination, dizziness, headache, nausea, vomiting, and constipation. Skin rashes and itching may be due to a drug allergy.
* Do not use Valium if:
    * The patient is drunk. It may be used to treat d.t.'s and alcohol withdrawal as outlined in the standing orders.
    * The patient is depressed or suicidal.
    * The patient is a drug or alcohol abuser and likely to abuse Valium.
    * The patient has a history of jaundice, urinary retention, liver or kidney disease.

STORAGE AND DISPENSING DIRECTIONS

* Store Valium at room temperature. It will not be damaged by accidental freezing unless the syringe is broken.
* Check the expiration date before using.
* This is a controlled drug.
* Give the tablets to patients in small amounts and only with a physician's order, or in an emergency, according to your standing orders. Warn the patient to expect some drowsiness and to avoid the use of alcohol and other sedatives.

PHENOBARBITAL
30MG TABLETS
20MG/5 ML ELIXIR
130MG TUBEX

LUMINAL®

DESCRIPTION AND USES

* Phenobarbital has a sedative effect on the brain and the central nervous system. Small doses cause sedation. Large doses cause sleep. Very large doses cause coma and even death.

* The adult sedative dose is 15 to 30mg (1/2 to 1 tablet) by mouth every 6 to 8 hours.

* Phenobarbital may be used to prevent seizures caused by fever in some small children.

    * Children from 6 months to 1 year may have 1-2 teaspoonfuls daily by mouth.
    * Children from age 1 to age 3 years may have 2-3 teaspoonfuls or 1-2 tablets daily by mouth.

* Phenobarbital may be used to stop seizures that do not stop on their own in a short period of time.

    * 1 year old children = 65mg IM (1/2 tubex).
    * 2 year old children = 130mg IM (1 tubex).
    * 3 and 4 year old children 180mg IM (1 1/2 tubex).
    * 5 year old children and adults = 240mg IM (2 tubexes).

    * Give the above dose. Wait a half hour. If the patient is still seizing, give a second dose half as big as the first.

WARNINGS

* Sedation and drowsiness are common. Alcohol and other sedative drugs will increase the drowsiness. Children may become restless or excited rather than drowsy, particular with small doses. An overdose with phenobarbital may cause difficulty walking, depressed breathing, coma and death.
* Phenobarbital may cause dizziness, headache, nausea, diarrhea, skin rash and a number of other uncommon side effects.
* Phenobarbital maybe habit forming in adults.
* Avoid giving phenobarbital to patients who have lung disease, low blood pressure, central nervous system depression, or shock. Avoid giving it to people who are allergic to it or who are stimulated by it.

STORAGE AND DISPENSING DIRECTIONS

* Store these drugs at room temperature. Protect them from theft.
* Freezing may break the glass container of the injection and elixir but will not harm the tablets. If the glass container is not broken, the drugs are safe to use.
* Phenobarbital is a controlled drug as well as a prescription drug. Keep accurate records of when you received the drug, when you used it, and to whom you gave it. Use it only with a physician's order or according to your standing orders in an emergency. This drug is in the village for emergency use.
* Remember to warn the patient about the sedative effect.

EPINEPHRINE INJECTION U.S.P. 1/1000 — ADRENALIN

DESCRIPTION AND USES

* Epinephrine increases the heart rate and blood pressure, dilates the bronchi, and constricts the blood vessels going to the skin and mucous membranes.

* Epinephrine is used to treat acute asthmatic attacks. The drug relaxes the smooth muscles of the bronchi, enlarges the air passages and allows the patient to breathe. It is also used to treat severe drug allergies, such as anaphylactic shock.

* Inject the drug subcutaneously. Brisk massage of the injection site will make the drug act faster. If necessary, repeat the dose in 15 to 20 minutes. if treating asthma. The injection may need to be given every 5 minutes for severe, life-threatening allergic reactions.

Dose for Adults	Dose for 8-16 year olds	Dose for 4-8 year olds
0.5ml s.c.	0.3 ml to 0.4 ml s.c.	0.2 ml s.c.

WARNINGS

* Epinephrine will increase the blood pressure and heart rate. Other common effects include a feeling of restlessness or fear, throbbing headache, weakness, and pale appearance. A very few patients may have heart arrhythmias which may be fatal.

* Do not use epinephrine if:

  * The patient has only a minor asthmatic attack or allergic reaction.
  * The patient has arteriosclerosis of the brain.
  * The patient is in shock from blood loss.

STORAGE AND DISPENSING DIRECTIONS

* Store epinephrine injection in the refrigerator at room temperature. Do not allow it to get hot. It will not be damaged by accidental freezing unless the tubex is broken.
* Keep it out of sunlight. Do not use it if it is discolored.
* Check the expiration date before using.
* The tubex is designed for a single injection. Squirt out the excess until the syringe contains the correct dose. Inject this amount.
* Epinephrine is a prescription drug. In an emergency, use it as directed in your guidelines and standing orders, then contact the physician.

Rev 6/77

IPECAC SYRUP U.S.P.

DIRECTIONS AND USES

* Ipecac causes vomiting. It is given to patients who have taken poisons or an overdose of drugs by mouth.

* The recommended dose is 15ml for adults and children. 15ml is one tablespoonful or approximately one-half of the 30ml bottle supplied to the village. The medicine should be taken with a full glass of water to assist the vomiting action. If the patient has not vomited after 15 to 20 minutes, give him another tablespoonful of ipecac.

WARNINGS

* Do not use ipecac if:

  * The patient is unconscious or semiconscious. He may choke on the vomitus.
  * The patient has swallowed lye, acid, or some other caustic material. The material will damage the esophogus more than the stomach.
  * The patient has swallowed strychnine poison. Strychnine may cause convulsions, especially if the patient is vomiting.
  * The patient has swallowed kerosene, gasoline, or a similar product. If he vomits, it may get in his lungs.

STORAGE AND DISPENSING DIRECTIONS

* Store ipecac at room temperature with the other oral liquids or tablets. Accidental freezing may break the bottle. If the bottle is not broken, the drug should be safe to use.
* Ipecac is a prescription drug. Use it as directed in the manual in an emergency, or as directed by a physician.

Rev 6/77

PILOCARPINE OPHTHALMIC SOLUTION

ISOPTO-CARPINE[R]
PILOCAR[R]

DESCRIPTION AND USES

* Pilocarpine reduces the size of the pupil and decreases the excessive pressure in the eye of a patient with glaucoma.

* If the patient has an attack of acute glaucoma, pilocarpine will reduce the pressure, relieve the pain, and prevent the damage to the retina.

    * The usual dose is 1 or 2 drops in the affected eye every 5 minutes for 30 minutes. The dose is then reduced to 2 drops every 4 hours.

    * The unaffected eye is usually treated with 1-2 drops every 4 hours.

WARNINGS

* Side effects are uncommon. If the large doses of the drops must be used, some of the medicine may be absorbed into the blood stream. The patient may have excessive saliva, sweating, nausea, vomiting, diarrhea, low blood pressure, constriction of the bronchials. If the patient has a history of asthma or urinary obstruction, watch the patient closely.

STORAGE AND DISPENSING DIRECTIONS

* Store this drug at room temperature with the other eye drops. Accidental freezing will not damage it, unless the bottle is broken.
* Pilocarpine is a prescription drug.

COMBISTIX

DESCRIPTION AND USES

* Combistix is a diagnostic tool. It can test the pH (acidity) of the urine, and the amount of glucose and protein in it. There are similar products (clinistix, uristix, etc) that can test for other items in the urine.

* Obtain a fresh urine sample. Dip a plastic combistix strip into the urine. Remove it immediately. Compare the tests squares with the squares on the bottle label. The glucose square must be compared exactly 10 seconds after the strip has been dipped into the urine.

STORAGE AND DISPENSING DIRECTIONS

* Store combistix at room temperature with your other diagnostic equipment. Keep the lid tightly closed.
* Combistix is not dated, but should be reasonably fresh. Do not use a bottle for more than 2 years. Keep the strip in the bottle until just before use.

HYDROCHLOROTHIAZIDE
50MG TABLETS

HYDRO-DIURIL® ORETIC®
ESIDREX® HCTZ

DESCRIPTION AND USES

* Hydrochlorothiazide is a diuretic. It helps the body rid itself of excess sodium and water through the urine. It also reduces the blood pressure. It is used to treat hypertension (high blood pressure) and edema caused by pregnancy, premenstrual fluid retention, and congestive heart failure. The usual dose is 25 to 50mg (1/2 to 1 tablet) once or twice a day.

WARNINGS

* Hydrochlorothiazide causes few side effects. A few patients may have nausea, vomiting, diarrhea, dizziness, numbness or tingling, or allergic reactions.

* If the drug is taken for a long period of time, the body may become low on potassium. If the potassium level falls to low, the heart may develop an abnormal rhythm. If the patient is on hydrochlorothiazide for a long period, he should eat foods rich in potassium such as fruit juices, bananas and apricots.

* Do not give this drug to someone with kidney failure or the inability to make or pass urine

STORAGE AND DISPENSING DIRECTIONS

* Store hydrochlorothiazide at room temperature with the other oral tablets. It will not be damaged by accidental freezing.
* Check the expiration date before using.
* Tell the patient that he may pass more urine than normal when he first starts the drug.
* This is a prescription drug.

PROBENECID
500MG TABLETS

BENEMID[R]

DESCRIPTION AND USES

* Probenecid acts on the kidney to prevent the kidney from excreting penicillin or ampicillin into the urine. It is used with penicillin to extend the action of the penicillin in the treatment of gonorrhea. The probenecid has no antibiotic action of its own.

* The usual adult dose is 1.0 Gm (2 tablets) taken a half hour before the injection of 4.8 million units of procaine penicillin G. If the probenecid is used with oral ampicillin, the probenecid is taken at the same time as the ampicillin.

WARNINGS

* If the patient is allergic to penicillin, he may have a prolonged allergic reactions since he cannot rid himself of the penicillin readily.

STORAGE AND DISPENSING DIRECTIONS

* Store probenecid at room temperature with the other oral tablets. It will not be harmed by accidental freezing.
* Check the expiration date before using.
* Probenecid is a prescription drug.

Fairbanks, Alaska 99701

Dear Mr. Hackney,

House Bill 79 and Senate Bill 75 will soon be submitted to the floor during the upcoming session.

These bills authorize qualified optometrists to use certain diagnostic drugs in the course of their examinations to help them detect eye diseases. Since optometrists are held legally responsible for detecting eye diseases, they should certainly be allowed to use all of the diagnostic tools available to them, tools which they have already recieved the training to use in their schooling.

The majority of the states have already passed bills authorizing optometrists to utilize diagnostic pharmaceuticals. It would be to the advantage of all Alaskans for our legislators to follow suit and approve these bills. In out-lying areas, such as Kodiak, the optometrists are relied upon to recognize and handle problems that would normally be taken to an opthalmologist in the larger cities. Giving them the authority to use this valuable diagnostic aid will enable them to give better eye care to everyone in their community. House Bill 79 and Senate Bill 75 has our wholehearted support.

Sincerely yours,

Loren D. Halter D.O.

Dear Glenn:

Just a note to let you know that I am definitely in favor of House Bill 79 and Senate Bill 75.

Optometrists need to be freed of this unnecessary restriction of eye drops for diagnosis. These Bills would only increase their efficiency.

Thanks and a big hello to Esther!

Sincerely,

Esther

(Mrs.) Esther T. De Witt

HB 375

March 14-1981

Dear Glenn Vankney

I would like you to vote for Bill #75, letting Alaskan Doctors of Optometry use eye drops whenever they need to for diagnosing eye problems. This seems only right since they are allowed to in the military and in other States

Mrs Shirley Lewis

Dear Senator Hackney:

This letter is to inform you of my support of House Bill 79 and Senate Bill 75.

Doctors of Optometry are well qualified to use diagnostic pharmaceutical agents and need them to provide better eye care for the Alaskan consumer.

I hope you will provide the support necessary to pass this much needed legislation.

Yours truly,

John J. Eufemio

Dear Senator Hackney,

Regarding Senate Bill no 75:

I am in favor of amending Alaska law so that Doctors of Optometry in Alaska can legally use eye drops for diagnosis. Optometrists in the armed forces, of which I am a member, and optometrists in other states have been using eye drops for some time.

I urge passage of Bill 75.

Richard L. Wilson

Senator Glenn Hackney
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Sen. Hackney:

We urge your support in seeing that Senate Bill #75 is passed.

We find it very difficult to believe that the Ophthalmologists are opposing the bill. What is their reasoning for such opposition?

32 states, including Georgia, who passed their drug bill Feb., 1980, are either authorized by statue or permitted to legally use diagnostic drugs for detection of eye diseases. Are these 32 states all wrong and the opposition in Alaska correct? Early detection of eye disease is a very important "preventive medicine" issue, not a pokitical issue.

As concerned tax paying citizens we again urge your support.

file SB 75

Mr. and Mrs. S.H. Carter, Jr.
SR Box 20039
Fairbanks, Alaska 99701

March 7, 1980

The Honorable Glenn Hackney
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

We request your support for Senate Bill #75, which is in your committee. It allows optometrists to use certain drugs that relate to their work in detecting eye diseases.

We understand that village health aides, with 20 weeks of training can use these and many other drugs, while the optometrist with 6 to 8 years of training, cannot. This certainly is not in the interest of Alaskans who go to optometrists for their eye examinations.

Very truly yours,

Mr. & Mrs. S.H. Carter, Jr.

The Honorable Robert H. Ziegler, Sr.
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Ziegler:

I am taking the liberty of responding to your letter of February 11 to Dr. Craig, a copy of which he has sent to me. Am sending a copy of this letter to Senators Hackney and Colletta since their committees are also involved in SB 75.

First, your exchange of letters between the two professions is an interesting and potentially useful means of furthering communication.

I can understand your reluctance to adjudicate, as a layman, a dispute involving technical considerations, though this occurs frequently in the legislature. However we are not asking you to decide the matter or even take sides; we are simply asking that you and your committee allow the bill to be considered by the full Senate. You can avoid taking sides by passing the bill out without recommendation.

As to the question of compromise you mentioned, you are probably aware of the meeting that took place in Sen. Colletta's office on February 11, perhaps after you wrote your letter. The ophthalmologists would accept nothing less than total withdrawal of the bill. Nevertheless we still developed an amendment (relating to a drug selection body) that would satisfy some concerns raised by Sen. Colletta.

The ophthalmologists do not have a case. And since Alaska is one of only 18 states that still prohibit the use of diagnostic pharmaceuticals by optometrists, I am sure you can understand that there is no way we are going to give up on this issue. You three gentlemen have the power to prevent this from becoming a long and bitter battle, one that the ophthalmologists are ultimately going to lose.

Very truly yours,

Phillip W. Bach

Phillip W. Bach, O.D., Ph.D.

Dr. Ed Craig
Optometrist
348 Main Street
Ketchikan, Alaska 99901

Dear Ed:

I am sending a copy of this letter, as you will note, together with a copy of your letter to me of January 8, to Dr. Page.

I am enclosing a copy of Dr. Page's letter to me of January 31.

It is quite clear that the opthamologists and the optometrists are never going to see eye to eye (no pun intended). When feuding factions of any given profession can not agree between themselves as to what should or should not be done, and if those feuding factions want a layman to adjudicate their disputes, I personally resent it. If the warring cliques can't resolve their differences, what makes them think that I can?

I don't at this time intend to take any affirmative action on either HB 79 or SB 75. However, in the unlikely event a compromise is struck, I'll move right along.

Please, please, no more literature! I've seen enough from both sides in the last three years to last me a life time.

Regards,

Robert H. Ziegler, Sr.

THE ALASKA STATE MEDICAL ASSOCIATION LEGISLATIVE COMMITTEE HAS REVIEWED SB75, AN ACT RELATING TOTHE PRACTICE OF OPTOMETRY. CORRESPONDENCE RELATING TO THE ISSUE DURING THE 1978 LEGISLATIVE SESSION WILL BE FORWARDED. THE POSITION OF ASSOCIATION REMAINS ESSENTIALLY THE SAME, NAMELY

1. WE ARE UNABLE TO DETERMINE HOW THIS LEGISLATION WILL IMPROVE EYE CARE OR SPECIFICALLY BENEFIT THE PUBLIC.

2. SPECIFICALLY WE KNOW OF NO DIAGNOSTIC USE FOT THE DRUG CLASS MIOTICS, REQUESTED; IN CONVERSE, THEIR USE WOULD BE APPROPRIATE FOR TREATMENT OF NARROW ANGLE GLAUCOMA, PRECIPITATED BY A MYDRIATIC/ CYCLOPEGIC USE. THIS CONDITION WE UNDERSTAND IS MORE PREVALENT AMONG THE ALASKA NATIVE THAN THE GENERAL POPULATION, SUCH THAT BUSH USE OF THESE DRUGS COULD CARRY INCREASED RISKS.

3. WE APPROVE THE EDUCATIONAL REQUIREMENTS ADDED IN THE 1979 LEGISLATURE. IT FOLLOWS THAT SHOULD THE LEGISLATURE BELIEVE THE PROPOSED LEGISLATION IS IN THE BROAD PUBLIC RATHER THAN FOR SPECIAL INTERESTS NO GRANDFATHER TYPE CLAUSE SHOULD BE ALLOWED.

A POTENTIAL THREAT TO THE PUBLIC EXISTS BY THE PASSAGE OF SB75 WHICH ALLOWS NON-PHYSICIAN EYE CARE PRACTITIONERS (OPTOMETRISTS) TO ADMINISTER DANGEROUS EYE MEDICATIONS FOR DIAGNOSTIC PURPOSES WITHOUT PHYSICIAN SUPERVISION. THE DESIRE DRUGS ARE LISTED IN THE PROPOSED BILLS IN THE BROAD GENERAL CATEGORIES OF TOPICAL ANESTHESICS, MYDRIATICS, CYCLOPEGICS AND MIOTICS RATHER THAN BY SPECIFIC DRUGS NAMES WITH DOSAGES. EXAMPLES OF THE DRUGS FOUND IN THESE CATEGORIES INCLUDE SUCH POTENT MEDICATIONS AS COCAINE, ATROPHINE, SCOPOLAMINE, PHENYLEPHRINE, AND PHOSPHOLINE IODINE. ALL OF THESE MEDICATIONS HAVE POTENTIALLY DANGEROUS SYSTEMATIC SIDE EFFECTS. THE SPECIFIC CLASS BIOTICS CONTAIN NO DIAGNOSTIC DRUGS WHATSOEVER AS THEY ARE ALL THERAPUTIC MEDICATIONS USED FOR TREATMENT OF GLAUCOMA OR CERTAIN CASES OF CROSSED EYES. THE ANCHORAGE MEDICAL SOCIETY VOTED OVERWHELMINGLY TO OPPOSE THISE LEGISLATION AS PASSAGE WOULD PERMIT NON-MEDICAL PRACTITIONERS TO PRESCRIBE OR APPLY DRUGS. THIS IS CONTRARY TO THE HEALTH AND WELFARE OF PEOPLE OF ALASKA.

ANCHORAGE MEDICAL SOCIETY PRESIDENT, JERRY LITTLE, MD.

ALASKA STATE MEDICAL ASSOCIATION
1135 W. Eighth Avenue • Suite 6 • Anchorage, Alaska 99501 • (907) 277-6891

February 26, 1979

Senator Glenn Hackney, Chairman
Alaska State Senate
Health, Education, and Social Services Committee
Pouch V, Mail Stop #3100
Juneau, Alaska 99811

Dear Mr. Hackney:

The Alaska State Medical Association Legislative Committee has reviewed Senate Bill 75, an act relating to the practice of optometry.

Enclosed is a copy of correspondence relating to the issue during the 1978 Legislative Session. The position of the Association remains essentially the same, namely:

(1) We are unable to determine how this legislation will improve eye care or specifically benefit the public.

(2) Specifically, we know of no diagnostic use for the drug class, miotics, requested; in converse, their use would be appropriate for treatment of narrow angle glacoma, precipitated by a mydriatic/cycloplegic use. This condition, we understand, is more prevalent amongst the Alaska natives than the general population, such that bush use of these drugs could carry increase risk.

(3) We approve the educational requirements added in the 1979 legislation. It follows that should the Legislature believe the proposed legislation is in the broad public rather than for special interest, no grandfather type clause should be allowed.

Sincerely,

Winthrop Fish, M.D.
Chairman, Legislative Committee
Alaska State Medical Association

WF:mlm

Enclosure

February 14, 1978

Representative Charlie Parr
Chairman, House HESS Committee
Alaska State Legislature
Juneau, Alaska 99801

Dear Representative Parr:

The Alaska State Medical Association Council has reviewed HB 664, An Act Relating To The Practice Of Optometry. We see no purpose identified or expressed within the substance of the Bill. We further see no areas where the public interest will be served by its passage and several areas where compromised eye care, duplication and cost increases are possible if not likely.

At the outset, please understand that the ASMA properly has no interest or intent to interfere with the practice of optometry in Alaska. However, if an enlargement of the scope of optometry into the sphere of medical practice is contemplated, it reasonably becomes our concern for the welfare of the public, not a simple jurisdictional dispute.

Optometry by derivation, definition, tradition, training and current practice means measurement of the eye for refractive error and a prescription of corrective lenses. Current practices also allows dispensing and sale of lenses and spectacles by the prescribing optometrist.

The current statute defining optometry is unfortunate in that it suggests diagnosis of visual impairment, apart from refractive error, lies within the responsibility of optometry.

Non-refractive visual impairment may be a most difficult and subtle medical diagnostic problem, at times challenging the combined expertise of ophthalmologist, neurologist, radiologist, and internists, and requiring sophisticated diagnostic equipment. Causes range from simple cataracts to subtle brain tumor, from transient vascular insufficiency to obscure metabolic disorders. The visual problem may be the first and only lead to a serious medical disease. Almost all non-refractive visual impairments will come to confirmatory diagnosis and treatment by a physician. It goes without saying that missed or delayed diagnosis can have serious potential consequences.

Before extending the scope of optometry, well beyond refraction and the sale of contact lenses and spectacles, into the intricate area of complex ophthalmological diagnosis, we ask that you assure yourself of the following:

(1) That there is a clearly demonstrated and defined unmet public health problem, that this legislation will solve it, and it is the most appropriate solution.

(2) That the general level of training of the practicing optometrist in Alaska at present is at a standard which will preclude frequent mis-diagnosis, delay, duplication of expense and inappropriate trials of corrective lenses for non-refractive disorders of the eye.

(3) That the use of ophthalmologic drugs in the practice of optometry is free of risk.

(4) That the expanded drug use is necessary and essential to increased accuracy in refractive error diagnosis.

We feel the answers to the above are not obvious, we see no urgency to enact the legislation without the most careful study of the implications and therefore urge that you allow ample time for its consideration.

Sincerely,

WFish

Winthrop Fish, M.D.

ANCHORAGE, ALASKA 99501
907-277-6891

February 26, 1979

Medical Society Position Paper

A potential threat to the public exists by the passage of HB 79 and SB 75 which allows non-physician eye care practitioners (optometrists) to administer dangerous eye medications, for diagnostic purposes, without physician supervision.

The desired drugs are listed in the proposed bills in the broad general categories of topical anesthesics, mydriatics, cycloplegics and miotics rather than by specific drug names with dosages. Examples of the drugs found in these categories include such potent medications as Cocaine, Atropine, Scopolamine, Phenylephrine and Phospholine Iodide. All of these medications have potentially dangerous systemic side effects. The specific class miotics contain no diagnostic drugs what-so-ever as they are all therapeutic medications used for treatment of glaucoma or certain cases of crossed eyes.

The Anchorage Medical Society voted overwhelmingly to oppose this legislation as passage would permit non-medical practitioners to prescribe or apply drugs. This is contrary to the public interest and a detriment to the health and welfare of the people of Alaska.

Anchorage Medical Society

Telephone 907: 274-2252

February 26, 1979

Chairman Glenn Hackney
Senate HESS Committee
Pouch V
Mail Stop Number 3100
Juneau, Alaska 99811

Dear Chairman Hackney:

As a physician and surgeon I am most concerned about SB 75 and HB 79 which propose to give nonmedical eyecare practicioners (optometrists) the privilege of applying potent medications to the eye for diagnostic purposes.

The proposed bill lists only broad general categories of the desired eye medications, not specific drug names and concentrations. The classes of drugs include such potent substances as Cocaine, Atropine, Scopolamine, Phenylephrine and Phospholine Iodide. All these drugs when applied to the eye are readily absorbed into the bloodstream and are capable of producing a wide range of total body effects.

Cocaine, a topical anesthetic and mydriatic (dilater of the pupil) is a controlled substance which is subject to wide spread abuse by addicts and requires a controlled substance registration certificate to dispense. Atropine and Scopolamine are cycloplegic agents which paralyze the eyes focusing power and in sufficient doses produce irritability, hallucinations and even coma. Phenylephrin (a mydriatric) has the ability to raise the blood pressure markedly and to alter the rhythm of the heart and has been implicated in deaths in older people through strokes and in children through cardiac arrhythmias. Phospholine Iodide, a miotic which constricts the pupil, is used in the treatment of glaucoma (elevated pressure in the eye) and in certain cases of crossed eyes, the active ingredients are related to the active substance in certain insecticides and nerve gas. This medication has been shown to produce retinal detachments and cataracts. Miotics are a therapeutic class of drugs and are listed incorrectly in the proposed bills as diagnostic drugs.

The above are only a few examples demonstrating what potential dangers exist in the various classes of the drugs listed in the proposed bills. By -allowing wide spread use of these drugs by nonmedical persons the overall risk to the general public of potentially serious side effects or untoward reactions are markedly increased.

This type of legislation is not unique to Alaska. The initial nationwide optometric movement, in attempting to enter the practice of medicine, was successful and approximately 20 states have some type of optometric drug legislation. In the past 2-3 years as the full implications of such legislation became known optometric drug bills have been going down to defeat by about a 3 to 1 margin.

I would appreciate your support in helping prevent these bills from becoming law. I not only can but will readily answer any questions or document any items that I have commented on in this letter.

Sincerely yours,

James H. Patterson M.D.

JHP:plz

3311 EUREKA St.#3
Anchorage, Ak.99503
March 3,1979

Dear Mr. Hackney,

It is my understanding that Senate Bill 75 is under view by your committee in the eleventh legislature-first session. If at all possible I would appreciate being informed as to the status of this "act relating to the practice of optometry".

My interest in this matter takes on a fervent stance due to the fact that I have been directly involved in the delivery of eye care services to to those recipients in the Bering Straits Region. In light of this Ifeel obligated as well as deeply concerned with this notion of introducing Sec.08.72.305 to the enactment of the legislature.

I need not inform you that we both share a vested interest in this matter since we are potential candidates of optometric services: iet alone the populus that this bill will effect if passed.

This missive serves you in a genuine tone of concern since Alaska now is beseiged by the "drug bill", SEC. 08.72.305. Pursuant to this is the idea that health care, specifically, the medical health eye care aspect should be viewed under a microscope for what is to be understood as a redefinition of the scope of the optometrist. Or, if you would , a broadening of the defined scope of the optometrist. To wit... allowing the utilization of pharmaceutical agents (drugs). I beseechingly ask that you read the following paragraphs for the sole purpose of another outlook from a concern citizen, not to mention for the sake of the public whom you represent in this permissive matter of eye care.

The decision that confronts the legislative body is a precarious one. Due to the fact that a question mustbe brought forth & posed , what consitutes the optometrists in this state to utilize drugs in their non-medical profession.

An apparent exigency is prevalent to bring to attention the delination between the non-medical profession (optometrists-O.D.) & the medical profession, (ophthalmologists-M.D.). Both are distinguished in their own right & certainly are awarded the recognition & respect from our society. However the oohthalmologist has gone through an intense array of medical education & training for his endavour of the total encompassing diagnosis, treatment, & care of the eye. The optometrist need only attend a few years of schooling for gainful knowledge of a cognizance of an optical deficiency correctable as he sees it by administering & prescribing lenses &/or prisms. Hencefore, the medical profession is more adequately & better prepared for the entire entity of tending to the eye than the optometrist, merely by training & education. Be it stated here that the above mentionned was not meant in a derogatory fashion nor a demeaning one towards the optometric profession.

In conjunction with this is the question posed , why would a non-medical profession such as optometry effaciously invade the medical profession in medicine. Both are sciences,but, both are concerned with different concentrations intrinsically related to their science. Optometry was established with the initial purpose as a profession to aid in "vision improvement" acting as a liason for the ophthalmologists.

At this propitious time of concern with rising health care at an annual rate of 12% & an approaching make-up of 10% of the GNP the non-medical profession of optometry has sought an entrance into & engagement in being a medical provider of health care delivery by the pursuit of practicing ophthalmology .I can only surmise this from reflecting observations of the events & recent developments between these two professions & what is taking place in the state house / senate in Alaska.

This issue becomes sensitive not only for the reason that the eye as an organ is one of mans' most cherished & most relied upon senses but primarily how Alaska will handle, cope, & decide upon what constitutes the profession of optometry to utilize drugs in their profession. Advertently, how health care will be delivered to its constituents. All legislative powers are in throes of controlling this predicament. However, I fail to see how amending this bill will alleviate & eliminate the cost of medical care, let alone upgrade & enhance the quality of medical health eye care.

As with any service rendered in our society one seeks the quality of service for the least amount of cost to them. The same holds true in medicine. I believe as you might concur that a patient seeks a physician eye doctor for his knowledge, skill, ability,talent in his area of medicine with a degree of trust for all intents & purposes of effaciously being relieved of whatever objective &/or subjective sign &/or sympton that the individual had to seek the M.D. in the first place. For you to fully understand the topic in deliberation, this missive necessiates that you be privy to the condition of glaucoma. The example to be cited is stated in order to stress the full impact & seriousness of Sec. 08.72.305

Pertinent to this is the prevailing factor that Alaska is different than the other states that have considered the "drug bill" in regards to its recipients of eye care health services. For the Alaskan Natives are predisposed to the condition of glaucoma, particularly of the four types, narrow angle glaucoma This is due to their anatomical trait of a shallow anterior chamber.

I ask that you bear with me in a basic description of the eye & vocabulary related to it.

Affecting 1 out of every 100 people over 40 & being the second leading cause of blindness in the U.S.:glaucoma is an afflicting disorder. There exists within the eye an intricate drainage system, so established that the aqueous humor (fluid which aids in maintaining the shape of the eye & its nourishment for it) continuously leaves the eye through the drainage network. In the case of an individual afflicted with glaucoma the exit route is complicated.Basically, a squelching effect of that which is a composite of the angle of drainage in the anterior chamber of the eye becomes narrow,or more fluid is produced than what is considered the normal. Hence, the subsequent build-up of pressure within the eye. IT IS THIS intraocular pressure that jeopardizes the sight of an individual. For glaucoma is that injurious increase of pressure within the eye pressing on the optic nerve. The optic nerve being the running umbilical cord to the brain for the interpretation of vision. If you will, it is the M.D.'s insight & his ability to detect this disorder that is quite significant , whether or not the individual will maintain good vision. For this is an eye condition that is not curable, solely controllable with medication &/or surgery.

Narrow angle glaucoma may be precipitated when the pupil (black portion of the eye) dilates (enlarges) as it encounters darkness or after the administration of mydriatics (dilating drugs).

The latter precipitory factor arises when a doctor utilizes one of many mydriatic drugs during the course of an eye exam , fundus exam (viewing the posterior portion within the eye) & for evaluating refractive errors. (Sec. 08.72.305 2,c) Mydriatics facilitate examinations of that already mentionned.

A patient with an underlying condition of narrow angle glaucoma may be subjected to medication by the attending physician whether it be for any one of the mentionned eye examinations. In view of this, induced is the incidence of an attack of acute narrow angle glaucoma.. WHY? The iris, (colored portion of the eye) had been induced to dilate by the administered drug. Consequently, this inhibits the muscle to constrict therefore closing off the escape route for the aqueous fluid. What now ocurrs is excruciating & intense pain due to the escalating intraocular pressure upon the optic nerve. If not quickly tended to with the attention of rectifying the precarious situation by a counter effect of medication whether this be administered orally, or intraveniously irreversible damage will ensue.

Obviously, at this point & time the reflexive resposes of the attending eye examiner is weighted with responsibilities of anothers vision AS you & your committee are weighted with the responsibility of answering what constitutes the optometrists in this state to utilize drugs in their non-medical profession. My faith lies herein with your time & consideration of Sec. 08.72.305.

Sincerely,

Maureen Rock

MEMORANDUM

Margaret Branson, Representative
Pouch V
Juneau, Alaska 99811

Dear Margaret;

Thank you for notifying me of SB 75! This is the second year for this bill as it was "killed" in the Senate last session. Ophthalmologists have very strong feelings toward this legislation because it is obvious that optometrists have no medical training what-ever (despite their claims) and it is not fair to the public to turn them loose dispensing eye drops. Optometrists are very well trained to fit eye-glasses, but the last few years have desired to expand their endeavours to include the use of eye drops.

Reasons for this desire are purely economic! Therefore - - see the arrival of a national health bill and want a guarantee that they will be included in this legislation as a "primary care providors".

Eye drops are absorbed into the blood stream and become systemic medications. Although rare they can produce serious side reactions such as high blood pressure and indeed shock! It is not fair to the public to relegate such serious matters to a non-medical practionor.

Medicine contends that if non-medical practionors wish to expand their endeavors to include medical functions they should re-cycle themselves thru the medical curriculum rather than going to the legislators and side-passing the educational pre-requisites.

Sincerely,

Peter E. Cannava, M.D.

Peter E. Cannava, M.D.

P.S. Enclosed please find a speech I gave to the local legislators before they departed to Juneau.

P.S. In addition you should be aware that a young Alaskan lost an eye because of an optometrist, in using eye drops, felt secure in making a diagnosis which turned out to be erroneous. The story is enclosed.

PEC/bc

American medicine has estabilished a tradition which dates back well over 200 years! Despite the ups and downs of certain aspects of American medicine the very basic integrity of the system has never and will never be challanged. This is fact because the system rests upon a foundation of sound scientific principle. American people may not like what type of treatment is offered them but they at least can rest assured that any prescription promulagated by our traditional medical system is based upon a scientific method, and those practitioner licensed with-in the system have completed a satisfactory curriculum approved by both private and governmental bodies who attest to the fact that medical practitioners are qualified to practice with the use of drugs and other modalities. In addition to the traditional modality of medical care there are two other broad categories of health care which our people choose to utilize. One is not based upon scientific methodology, cannot be supported by established objective data. Examples of these would be naturopathic healing and chiropractic. The second category of non-medical health care sought by Americans is based upon scientific principles but is not traditionally associated with medical education. Examples of those are psychology and optometry. In past years no major conflict has arisen between traditional medicine and other forms of health care. However, of late there is a movement on by non medical people to seek enactment of legislation which would grant them privileges which traditionally have been the provence of medical practitioners. Examples would include attempts by chiropractors to utilize medical facilities for laboratory testing and more germane to our state the attempt by optometry to seek legislation approved for their use of drugs within their practice.

Legislators must be aware of the short and long term implications of such legislation! Granting non-medical practitioners medical priveleges obscures the traditionally clear cut lines between the dicipline of medicine and the non-medical practices. Such obscuration of lines of deliniation serves to thoroughly confuse the public as to what type of health care is to be expected from each type of practitioner! In such confusion the public will have no clear concept of what type of "product" to expect of each health care practitioner. I wish now to focus upon a problem which confronted last years legislators and may surface again! Optometrists as you may be aware are non-medical practitioners by virture of their ancestory, training, current definition and as of several months ago defined by U.S. District judge for Alaska. They are requesting the legislature to grant them privilege of using drugs in their practice! Such a priviliege would have two fold effect and firstly it would set a precident with-in our state and open the door to all non-medical health personell to seek similar privilege. Secondly it would further endanger the people of Alaska to the risk of loss of sight because of the injudicious use of drugs and false sense of security the use of drugs imparts upon the recipients of such treatment. Indeed as time goes on I will supply you with case histories of Alaska residents who have lost eyes because they were lured into feeling they had been examined by eye physicians or ophthalmologists. I will also supply you with a legal suit prompted by such a loss of eye and additional pertinent information. I urge you not to grant non-medical health practitioners by legislation what they should rightfully earn by education that is the right to join the ranks of traditional medicine thru time honored institutions, estabilished testing procedures and time tested licensing procedures.

SPECIAL TIMOTHY STEELE ISSUE

THE PEN...

PRO BONO PUBLICO

Published in the Public Interest by Ophthalmology

VOL. 3, No. 1 DEC. 15, 1978 - JAN. 1, 1979

FEDERAL JUDGE RULES AGAINST U.S.

Optometric "Primary Care" Results In Loss of Eye For Four-Year-Old Boy

In a landmark decision that could cause the army to re-examine its policy permitting optometrists to provide initial eye care treatment, Judge James M. Fitzgerald, United States District Judge for the District of Alaska, ruled that Timothy Steele, now an eight-year-old dependent of a soldier in the U. S. Army, was entitled to recover for the loss of his right eye.

> **"I conclude that the plaintiff is entitled to recover in this action from the United States for the loss of Timothy's right eye."**
>
> *JAMES M. FITZGERALD*
> *U.S. District Court*

Judge Fitzgerald's decision was rendered on October 20, 1978 in the case of Timothy R. Steele

festation of disease visible in the eye. Upon detecting disease in the eye, it is then his obligation and duty to the patient to make known what the optometrist has observed. In such cases, he may not undertake to diagnose the disease, but should inform his patient that the matter is beyond his competence and advise the patient to seek a qualified medical doctor."

The litigation stemmed from a claim brought on Timothy Steele's behalf by his father against the United States for the loss of Timothy's right eye. Timothy Steele, as a four-year-old boy, was treated by John Shank, O.D., an optometrist in charge of the Eye Clinic at Bassett Army Hospital, Fort Wainwright, Alaska.

According to testimony in the case, it was in October and November of 1973 that Timothy's mother first noticed that his eyes were crossing.

to Letterman Army Medical Center where he was examined on July 12, 1974.

At Letterman, it was determined that, because the danger of retinoblastoma, a fast-spreading, life-threatening malignancy, Timothy's eye should be removed. With parental consent, the surgery was performed by Major Bradley C. Black, M.D.

When the pathological report ruled out retinoblastoma, Timothy was returned to surgery and an implant was placed in the socket. Although recovery appeared to be good, Timothy continued to suffer from periodic socket inflammation.

In September of 1974, Timothy returned to Letterman Medical Center where a prosthesis was inserted in the socket. Testimony revealed that since the prosthesis could not be inserted immediately following the operation, it is unlikely that it will ever appear similar to a natural eye. ●

tates of America, defendant. In his opinion, Judge Fitzgerald stated, "An optometrist's responsibility is to observe during his eye examinations any mani-

WHY "THE PEN?"

The files of state and national medical associations, all learned societies concerned with the public health, overflow with a preponderance of evidence that the quality of health care is threatened by the precedent of Government encouraging the lowering of professional standards by allowing medical functions to practitioners with no medical education. Medicine accepts the responsibility to respond to epidemics. Death and trauma are resulting, and Doctors of Medicine can do no less than warn potential victims through the continuous presentation of this evidence. The public press of America, given the facts, is supporting this cause, and concerned physicians throughout the nation are pooling their knowledge and resources to package and present the truth through the PHYSICIANS EDUCATION NETWORK.

During his examination, Dr. Shank measured Timothy's vision and found it to be normal. He then used drops to dilate the pupil and looked inside the eye. He diagnosed Timothy's eye condition as accommodative esotropia, which is correctable by eyeglasses. He wrote a prescription for eyeglasses and made an appointment for Timothy to return to the clinic on January 29, 1974, for a checkup.

On January 29, 1974, Timothy reported to Dr. Shank as requested. The optometrist wrote a different prescription for eyeglasses and instructed Mrs. Steele to make another appointment for Timothy four months after he would begin wearing the new glasses.

The testimony further reveals that in early May, Mrs. Steele noticed that Timothy frequently removed his glasses, saying sometimes he could not see well with them.

On June 10, 1974, Timothy was again examined by Dr. Shank and it was then that he discovered that the vision in Timothy's right eye was limited to light perception. At this point, Dr. Shank made an appointment for Timothy with ophthalmologist Bruce Wolf, M.D., of Fairbanks.

When Dr. Wolf, a medical doctor, examined Timothy on June 17, 1974, he found Timothy's visual acuity in the right eye limited to hand motions and capable of perceiving light. Essentially, his right eye was blind.

Recognizing the seriousness of the case, Dr. Wolf called in William Kinn, M.D., as a consultant. On July 9, 1974, Dr. Wolf and Dr. Kinn observed a retinal detachment of the right eye with a subretinal mass. Their diagnosis was possible retinoblastoma, but toxocara canis was also to be considered. Concluding that specific tests were necessary to identify the disease, Timothy was flown

A SAD SUMMARY:

- **When Timothy was four, his mother noticed his eyes crossing.**
- **A military dependent, he was taken to an army hospital where he was seen by an optometrist, instead of an M.D. (Current standard U.S. military procedure).**
- **The optometrist disregarded disease, infection or malignancy as causes and prescribed eyeglasses. Despite three visits, two pairs of eyeglasses and advancing blindness, Timothy was not referred to an M.D. ophthalmologist for six months, until after his right eye was blind.**
- **Ophthalmologists immediately recognized the probability of either retinoblastoma (malignancy) or toxocara canis (a parasitic worm infection), either of which is treatable in the early stages.**
- **The doctors recommended to Timothy's parents that the right eye be removed, because of the danger of an advanced life-threatening malignancy, as well as a hopelessly blind eye.**

THIS CHRISTMAS:

- **Timothy, 8, has an artificial eye which will never appear similar to a natural eye.**
- **YOU — The U.S. taxpayers have been found liable for the loss of Timothy's right eye. Who should provide primary care?**
- **Tell your legislators.**

Explorations in Living offers a stimulating learning opportunity for young people and for those who present and guide the program. Hopefully, this new kind of preventive mental health program will help students develop into more informed and responsible citizens.

Explorations in Living can be obtained from Paul B. Amidon and Associates, Inc., 1966 Benson Avenue, St. Paul, Minnesota 55116 (cost is $18.50 per unit).

A GUIDE TO FEDERAL HOUSING PROGRAMS FOR THE MENTALLY DISABLED

This guide is designed to provide specific information about Federal housing programs and their potential for helping develop residential options for people disabled by mental health problems. It is intended primarily for State and local mental health program development staffs and others involved in community care.

The guide begins with an explanation of the Federal housing programs which may be applicable to the mentally disabled. It also discusses funding alternatives for specific residential options. Finally, the guide summarizes various strategies which State and local agencies can use in both securing funds and developing residential programs. Appendices include a list of key people in HUD area and regional offices, names and addresses of relevent projects, and several other important supplemental materials and references.

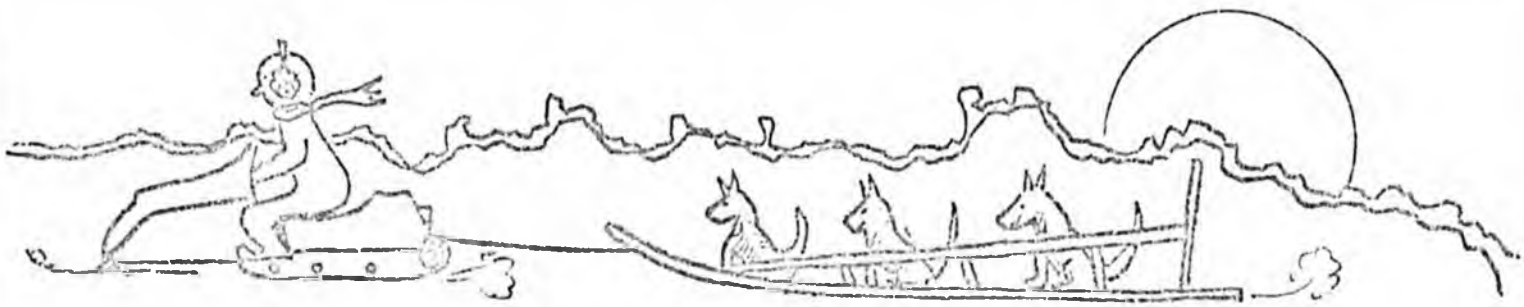
Published by the National Institute of Mental Health, it is available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, Stock No. 017-024-00727-7, at a cost of $3.00 each.

THE SWITCH PROCESS IN MANIC-DEPRESSIVE ILLNESS

In manic-depressive illness, the process of change from a severely depressed to a manic phase can occur anywhere between a few minutes and a few days. Analysis of the "switch process" has given psychobiologists important insights into the chemical processes associated with changes in brain neurons in affective illnesses.

Dr. William E. Bunney, Jr., Chief of the Biological Psychiatry Branch of the National Institute of Mental Health's Intramural Research Program has studied manic-depressive patients, focusing on the neurotransmitter mechanisms that carry impulses from one neuron to another at the synapse. He theorizes that elevated or reduced levels of the neurotransmitters, norepinephrine and dopamine, may be responsible for the sudden shift from one state to the other. In the 14-page monograph, Bunney discusses the switch process and his study of what happens in the brain during the switch.

This publication, published by the National Institute of Mental Health, Division of Scientific and Public Information, is available from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, Stock No. 017-024-00733-1, 90 cents each.



FAMILY VIOLENCE GRANT

The Department of Health and Social Services applied for and received a grant from the Law Enforcement Assistance Administration in the amount of $260,866 to operate a program called the Alaska Family Violence Program. A brief descriptive summary of this program that was taken from the grant award says, "The purpose of Alaska's Family Violence Program is to initiate and monitor a project directed at reducing the incidence of intra-family violance. The program will be implemented by agencies or citizen groups at eight (8) locations throughout Alaska...Nome, Bethel, Anchorage, Kenai, Fairbanks, Barrow, Kodiak and Ketchikan as well as many small communities within their respective locales.

"Various community-wide approaches will be tested. These approaches include: regional shelters and transportation shelters, "safe homes", crisis lines, volunteer advocacy, media and public education, training for criminal justice, medical and mental health personnel, alternatives to prosecution for offenders and innovative procedures for law enforcement personnel responding to family disturbance calls.

"The anticipated impact of this program will not only be an actual reduction in intra-family violence, but will also provide more effective and efficient mechanisms for agency coordination, a reduction in the number of repeat calls, an increase in the number of prosecutions and constructive alternatives to prosecution, decreased public tolerance for intra-family violance, and more information and understanding of the level and nature of intra-family violence in Alaska."

We hope to hear more about this new program as it gets underway. Meanwhile, if you want more information, please contact Sema Lederman, Project Coordinator, 400 Gamble, 3rd Floor, Anchorage, Alaska 99510 (276-1024).

March 7, 1979

Honorable Glenn Hackney
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

It has been brought to my attention that information in opposition to HB 79 has been distributed to all legislators. Some of this information contained in an ophthalmological tabloid newspaper entitled The Pen, although a sensational distortion of fact, demonstrates the responsibility of optometrists to detect and refer pathological eye conditions. The use of drugs (DPA's) requested by optometrists in HB 79 is simply a tool to help better serve the public, so that unfortunate incidents such as those described in The Pen will be more easily detected.

I urge you to consider the following facts prior to making a committment for or against this bill. These facts are excerpted directly from a report to the United States Congress by the U.S. Department of Health, Education and Welfare which I am enclosing.

1. It is the responsibility of optometrists to detect and refer pathological eye conditions.

2. Optometrists currently receive training in detection of ocular disease as well as in the use of pharmaceutical agents including management of side effects.

3. H.E.W. consultants on this report unanimously recommended that state licensure laws be revised to allow the use of diagnostic pharmaceutical agents by optometrists. (24 states now allow this practice)

If you have any questions regarding this bill or statements made in opposition to it, I would like to have the opportunity to respond with documented facts from objective sources. I appreciate the time you have taken to consider this very important legislation.

Thank you.

Sincerely,

Boyd L. Walker, O.D.

Boyd L. Walker, O.D.

REPORT TO THE CONGRESS: REIMBURSEMENT UNDER PART B OF MEDICARE FOR CERTAIN SERVICES PROVIDED BY OPTOMETRISTS

• U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE • Public Health Service • Health Resources Administration •

The Bureau of Health Manpower projects the overall number of active ophthalmologists in the United States to rise to 13,300 in 1980 and to 18,400 by 1990; this compares with projected levels of 22,000 and 28,200 for optometrists in the same time intervals. The proportion of ophthalmologists as a percent of total professional vision care manpower is projected to grow from 35 percent in 1973 to 38 percent in 1980 and 39 percent in 1990. These estimates should be interpreted cautiously, and should be undertaken in the context of written documentation available from the Bureau of Health Manpower. Available data preclude such projections on a detailed geographic basis.

More specific data indicates that in recent years many areas of the country, particularly non-metropolitan areas, are served only by optometrists. Approximately 40 percent of counties have an optometrist but no ophthalmologist. Another 27 percent have neither.

Optometric Practice

The Institute of Medicine of the National Academy of Sciences, in describing primary health professions who are direct providers of patient care, defined optometry as follows: "The Doctor of Optometry (O.D.) is a health professional who performs eye examinations to determine the presence of visual, muscular, or neurological abnormalities, and prescribes lenses, other optical aids, or therapy, such as eye exercises to enable maximum vision. Optometrists are trained to recognize disease conditions of the eye and ocular manifestations of other diseases, and to refer patients with these conditions to the appropriate health professional."

This definition, as well as available documentation on the utilization of optometric services, points to the optometrist's role as a provider of primary health care services. In this role, the optometrist functions as a principal point of contact within the health care system for persons having visual complaints, including certain numbers who have symptoms or conditions that require referral to other health practitioners.

The scope of practice for optometry, similar to that for other health care providers, is difficult to define precisely. However, information is available from a number of sources to develop valid concepts of a profession's role and function. Such sources include State laws, judgments of courts concerning the responsibilities of practitioners, the usual and customary practices of the profession, and the objectives, content, and standards of education and training for the profession.

An examination of a variety of such sources suggests that optometry is a profession qualified to provide a broad range of services which are effective in patient management, including the management of aphakic and cataract patients. (See discussion in Part II of this report for detail on sources cited and information examined.) It is reasonable to infer that such services correspond to many specific

ATTACHMENT B

BASIC ELEMENTS OF THE CURRICULUM OF SCHOOLS OF OPTOMETRY

1. Biological science knowledge base.

   a. Gross human anatomy and microscopic anatomy, with emphasis on head, neck, and thorax.

   b. Embryology, gross and microscopic anatomy of the human nervous system - concentrating on the central nervous system.

   c. General human physiology, including the study of the fundamental organ systems and the mechanisms which regulate body function. Emphasis is on the sensory, motor and cardiovascular systems.

   d. Basic concepts of general and cellular biochemistry, with study of nomenclature, structure, and reactions of organic molecules. Emphasis is on the visual system - tears, intraocular fluids, lens, retinal photochemistry, and actions of drugs upon these.

   e. Concepts of human genetics and genetic disorders, including the frequency and distribution of genetic disease, inheritance patterns, polygenic inheritance, chromosomal abberration syndromes, multifactorial genetics, and principles of genetic counseling.

   f. Gross and microscopic anatomy of the lids, orbit, orbital content, globe, muscles, nerves, and vessels, and embryology of the eye.

   g. Vegetative physiology of the eye, extraocular and intraocular fluids, corneal and lens metabolism, ocular circulation, retina and optic nerve metabolism.

   h. General pharmacological principles, methods of administration, various systemic drugs and their pharmacological action and side effects with emphasis on those that affect the visual system, such as cataractogenic and glaucoma-producing drugs.

   i. Pharmacology; uses, doses, contraindications, and adverse effect of drugs producing miosis, mydriasis, cycloplegia, accommodation, and ocular anesthesia. The pharmacology, use contraindications, and adverse effect of drugs commonly used in treating visual and ocular problems.

As is evident from the discussion above, the Department endorses the first recommendation. For reasons cited, however, Department endorsement of the second recommendation is viewed as inappropriate and premature at this time.

During the course of the study effort, a number of additional issues and concerns were identified by the expert consultants which, although important considerations, represent matters not directly responsive to the specific legislative charge as interpreted by the Department. These recommendations and comments, made unanimously by the consultants, are presented here to provide an opportunity to bring these matters to the attention of Department Agencies and the Congress. Because the following items go beyond the requirement of this report, the Department has not fully examined them and makes no recommendation at this time.

1. Refractive services for aphakic patients

Aphakic patients, specifically, should be considered as having special needs given their disabled condition. Refractive services for such patients represent non-routine and necessary services in the provision of prosthetic devices, i.e., lenses.

Study advisors recommend that consideration be given to extending coverage under Part B of Medicare to include refractive services for aphakic patients when provided by either ophthalmologists or optometrists.

2. Low vision services and aids

For those patients who have inoperable cataracts or have less than optimal results from cataract surgery, that is, those who have reduced visual acuity, low vision services and aids represent essential components of reasonable and necessary health care services for these patients.

Study advisors recommend that coverage under Part B of Medicare be extended to include the provision of appropriate low vision services and optical aids for the above-referenced patients, when provided by either ophthalmologists or optometrists.

3. Prevention, health maintenance, and health education

In the interests of health care cost advantages, effects on productivity, and the overall improvement of benefits that can be afforded our population, the expert consultants recommend that a more effective effort be made to improve preventive, health maintenance, and health education measures. While this is needed in all areas of health services, the vision/eye care field offers a particularly promising area for such approaches.

4. Other service provided by optometrists

Vision/eye care services currently covered by Part B of Medicare, when provided by ophthalmologists or other physicians, include eye conditions other than cataract and aphakia. Optometrists can provide appropriate services for some of these conditions. It is recommended that extension of reimbursement to include the services of optometrists for such appropriate conditions is a desirable subject for further consideration.

5. Administrative considerations

Also during the course of the study effort, expert advisors raised several concerns pertinent to the administration of the Medicare program. These issues, also applicable to other Medicare services, include the following: (a) inconsistent application of coverage and reimbursement policies by individual carriers, (b) the problem of payment duplication for services and reimbursement for similar diagnostic procedures when performed for specific individuals by more than one provider, and (c) need of improvement in coding and billing procedures for vision/eye care services.

6. Cooperative working relationships between vision/eye care professionals

It became clear during the course of this study that more effective working relationships between optometry and ophthalmology and other providers in the vision/eye care field would enhance patient care and result in improved services to individual patients. While improved interdisciplinary coordination applies to all the health disciplines and specialties, it is a problem of particular concern in the vision/eye care field. Such working relationships could be significantly strengthened by

a. Development of joint educational programs at the undergraduate and graduate levels, including rounds, clinics, conference, and meetings and publications.

b. Establishment of interdisciplinary clinics with optometrists and ophthalmologists working together.

c. Facilitation of referral of patients between the optometrist and the ophthalmologist when in the best interest of the patient.

d. Joint development of quality standards for service and materials by peer review mechanisms. By materials, particular reference should be assigned to varying quality of lenses and frames and the need for furnishing laboratory invoices of material costs for reimbursement.

e. Joint development of appropriate revision to State licensure laws to permit use of diagnostic drugs (mydriatics and local anesthetics) by optometrists.

While such joint endeavors are evident in various areas of the country, they need to be broadened and rectified.

JUNEAU MEDICAL CENTER
R.R. 3, BOX 3051
JUNEAU, ALASKA 99801

PRACTICE LIMITED TO THE EYE

February 27, 1979

Honorable Glenn Hackney
Senator
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

Pending legislation in the form of House Bill No. 79 and Senate Bill No. 75 represents an attempt on the part of optometrists to gain, through legislation, the right to use drugs. This is a right heretofore granted only on the basis of educational qualifications for very sound reasons. Optometry is a measuring science and has no medical background. An optometrist is not clinically trained. They are not qualified by education to diagnose or treat disease.

However, should this legislation pass, the public will be deceived into believing that they are receiving medical evaluation by optometrists, a definite hazard to public safety. Numerous cases substantiate this. The latest case occurred in Alaska (Steele v. United States of America) and is explained by an enclosure.

I hope that you will oppose this legislation which would downgrade the quality of medical care for the people of Alaska by allowing intrusion into the field of medicine by those without medical training or expertise. It is a dangerous precedent. Absolutely no shortage of medical profession talent exists anywhere in Alaska to justify such a compromise of professional standards of care and treatment. The cost of eye examination by optometrists in many cases is higher than that of a physician (ophthalmologist).

I would be happy to discuss with you the particular risks inherent in the use of the various drugs which are indicated in this legislation, since I will be responsible for treating the various drug complications, should they occur in this area.

Also find enclosed the reports of vetoes of similar bills by the governors of Virginia and Ohio. These are well thought out conclusions by men who are only partial to public well-being. Your serious consideration and concern is appreciated.

Sincerely,

Robert N. Page, Jr., M.D.

VOL. 3, No. 1 DEC. 15, 1978 - JAN. 1, 1979

FEDERAL JUDGE RULES AGAINST U.S.

Optometric "Primary Care" Results In Loss of Eye For Four-Year-Old Boy

In a landmark decision that could cause the army to re-examine its policy permitting optometrists to provide initial eye care treatment, Judge James M. Fitzgerald, United States District Judge for the District of Alaska, ruled that Timothy Steele, now an eight-year-old dependent of a soldier in the U. S. Army, was entitled to recover for the loss of his right eye.

> **"I conclude that the plaintiff is entitled to recover in this action from the United States for the loss of Timothy's right eye."** *JAMES M. FITZGERALD U.S. District Court*

Judge Fitzgerald's decision was rendered on October 20, 1978, in the case of Timothy R. Steele and Robert K. Steele, plaintiffs, vs. The United States of America, defendant. In his opinion, Judge Fitzgerald stated, "An optometrist's responsibility is to observe during his eye examinations any manifestation of disease visible in the eye. Upon detecting disease in the eye, it is then his obligation and duty to the patient to make known what the optometrist has observed. In such cases, he may not undertake to diagnose the disease, but should inform his patient that the matter is beyond his competence and advise the patient to seek a qualified medical doctor."

The litigation stemmed from a claim brought on Timothy Steele's behalf by his father against the United States for the loss of Timothy's right eye. Timothy Steele, as a four-year-old boy, was treated by John Shank, O.D., an optometrist in charge of the Eye Clinic at Bassett Army Hospital, Fort Wainwright, Alaska.

According to testimony in the case, it was in October and November of 1973 that Timothy's mother first noticed that his eyes were crossing. On December 19, 1973, she took him to Bassett Eye Clinic where he was seen by Dr. Shank.

During his examination, Dr. Shank measured Timothy's vision and found it to be normal. He then used drops to dilate the pupil and looked inside the eye. He diagnosed Timothy's eye condition as accommodative esotropia, which is correctable by eyeglasses. He wrote a prescription for eyeglasses and made an appointment for Timothy to return to the clinic on January 29, 1974, for a checkup.

On January 29, 1974, Timothy reported to Dr. Shank as requested. The optometrist wrote a different prescription for eyeglasses and instructed Mrs. Steele to make another appointment for Timothy four months after he would begin wearing the new glasses.

The testimony further reveals that in early May, Mrs. Steele noticed that Timothy frequently removed his glasses, saying sometimes he could not see well with them.

On June 10, 1974, Timothy was again examined by Dr. Shank and it was then that he discovered that the vision in Timothy's right eye was limited to light perception. At this point, Dr. Shank made an appointment for Timothy with ophthalmologist Bruce Wolf, M.D., of Fairbanks.

When Dr. Wolf, a medical doctor, examined Timothy on June 17, 1974, he found Timothy's visual acuity in the right eye limited to hand motions and capable of perceiving light. Essentially, his right eye was blind.

Recognizing the seriousness of the case, Dr. Wolf called in William Kinn, M.D., as a consultant. On July 9, 1974, Dr. Wolf and Dr. Kinn observed a retinal detachment of the right eye with a subretinal mass. Their diagnosis was possible retinoblastoma, but toxocara canis was also to be considered. Concluding that specific tests were necessary to identify the disease, Timothy was flown to Letterman Army Medical Center where he was examined on July 12, 1974.

At Letterman, it was determined that, because the danger of retinoblastoma, a fast-spreading, life-threatening malignancy, Timothy's eye should be removed. With parental consent, the surgery was performed by Major Bradley C. Black, M.D.

When the pathological report ruled out retinoblastoma, Timothy was returned to surgery and an implant was placed in the socket. Although recovery appeared to be good, Timothy continued to suffer from periodic socket inflammation.

In September of 1974, Timothy returned to Letterman Medical Center where a prosthesis was inserted in the socket. Testimony revealed that since the prosthesis could not be inserted immediately following the operation, it is unlikely that it will ever appear similar to a natural eye. ●

WHY "THE PEN?"

The files of state and national medical associations, all learned societies concerned with the public health, overflow with a preponderance of evidence that the quality of health care is threatened by the precedent of Government encouraging the lowering of professional standards by allowing medical functions to practitioners with no medical education. Medicine accepts the responsibility to respond to epidemics. Death and trauma are resulting, and Doctors of Medicine can do no less than warn potential victims through the continuous presentation of this evidence. The public press of America, given the facts, is supporting this cause, and concerned physicians throughout the nation are pooling their knowledge and resources to package and present the truth through the PHYSICIANS EDUCATION NETWORK.

A SAD SUMMARY:

- **When Timothy was four, his mother noticed his eyes crossing.**
- **A military dependent, he was taken to an army hospital where he was seen by an optometrist, instead of an M.D. (Current standard U.S. military procedure).**
- **The optometrist disregarded disease, infection or malignancy as causes and prescribed eyeglasses. Despite three visits, two pairs of eyeglasses and advancing blindness, Timothy was not referred to an M.D. ophthalmologist for six months, until after his right eye was blind.**
- **Ophthalmologists immediately recognized the probability of either retinoblastoma (malignancy) or toxocara canis (a parasitic worm infection), either of which is treatable in the early stages.**
- **The doctors recommended to Timothy's parents that the right eye be removed, because of the danger of an advanced life-threatening malignancy, as well as a hopelessly blind eye.**

THIS CHRISTMAS:

DR. ALLEN'S

DIAGNOSES

James H. Allen, M.D.: founding president, New Orleans Academy of Ophthalmology; professor of ophthalmology, Univ. of Iowa and Tulane Univ. for 30 years; Senior Surgeon, Tulane Univ.; awarded the prized Gold Medal of the Ophthalmology Section of AMA, 1976.

TIMOTHY — WE'RE SORRY — WE'RE TRYING

In spite of the loss of his right eye, and the attendant loss of visual field and depth perception, perhaps the young Alaskan victim will grow up to have more "vision" than many U.S. officials. Nearsighted policy supported by these leaders guarantees that disasters like that which befell young Timothy Steele will continue to happen to our servicemen and women, their dependents, as well as our veterans.

The Timothy Steele case, while tragic, had a relatively happy outcome. The alternative probability — retinoblastoma — might well have resulted in death for the youngster, because of the delay resulting from what optometry has designated "primary care."

The optometrist should not be judged harshly. It is provable that his education did not equip him to attempt to cope with the problem Timothy presented.

The dean of the Pacific University College of Optometry, a government witness, displayed an identical ignorance of the medical facts and identified Timothy's treatment as proper medical care. It is ignorance and over-confidence at a supper level of optometric education that produces large numbers of sincere optometrists, convinced that they know much more about eye disease than they in fact do.

It would be wrong to blame the Eye Clinic, Bassett Army Hospital, or even the Medical Army leadership at Fort Wainwright. The fact that Timothy was seen first by a person with the right to use dangerous drugs to open his eye to look for what he had no training to see is the fault of the defendant — *THE UNITED STATES OF AMERICA.*

And that, dear reader, means that a Federal Court has ruled that Timothy's right eye was wasted by you . . . and me.

We have thus far failed to communicate simple logic, i.e., that a non-medical measuring scientist cannot be substituted for an M.D., no matter how critical the M.D. military manpower shortage may be.

If it takes a "Doctor Draft," so be it. The current policy of both the Military establishment and the Veteran's Administration in allowing optometrists to experiment with their own invention called "primary care" makes a travesty of Abraham Lincoln's determination "to care for him who shall have borne the battle, and for his widow, and his orphan."

Judge Fitzgerald handed down his landmark decision on October 24, 1978. During the same week, the Chairman of the U.S. House of Representatives Committee on Armed Services, Congressman Melvin Price of Illinois, was responding to concerned M.D.s across the land, as follows: *"We are also told that all military optometrists are bound by principles of acceptable and safe medical practice."*

Respectfully, Congressman Price, in the light of Judge Fitzgerald's opinion, and the disaster which has befallen Timothy, who is telling you such nonsense?

Again respectfully, Mr. Chairman, would you really expect Robert K. Steele, as the "Natural father and next friend of Timothy R. Steele" to accept and/or reject the credibility of your informants?

Judge Fitzgerald has placed the responsibility on the American people, who look to you for leadership in this matter. We acknowledge that medicine has failed in the past to get the message to your military affairs committee, but perhaps the sad fate of Timothy Steele will at least serve the purpose of opening the eyes of your committee members to the grave danger which exists.

At this writing, a dollar value has not been placed on the loss of Timothy's right eye, but that monetary assessment, plus inevitable subsequent judgments resulting from the present policy of allowing optometrists to render medical services for which they are untrained, would serve to fund proper ophthalmologic care in the military, and provide some safeguards for the Timothys of tomorrow.

Author Provides Basic Information On Crossed Eyes

JOHN EDEN, M.D.
"The Eye Book"

A medical examination would have revealed the cause of Timothy's crossed eyes. No ophthalmologist would have depended on eyeglasses alone without further "medical detective work" in a case which presented crossed eyes starting at four years of age.

In **The Eye Book** *(Viking Penguin, Inc.) author John Eden, M.D. has provided basic information on crossed eyes as follows:*

Strabismus, or crossed eyes, is the second of the common childhood onset eye problems. Like amblyopia, it can seriously impair the visual learning process if uncorrected before age six. Strabismus describes two eyes that are not perfectly parallel when viewing an object. This does not mean that the eyes have to be straight ahead; they simply must be parallel to each other whichever way they are turned. But like lazy eye, "crossed eyes" is a misnomer. Although it is possible in one type of strabismus for the lines of sight (visual axes) to cross, they are not always crossed and certainly at no time do the eyes themselves cross. Some other common names for strabismus are "a cast to the eye" and "wall eyes," but these terms are even less correct than "crossed eyes."

Although strabismus is often very obvious, it is frequently impossible to spot with the naked eye. All the same, it is no more possible to be a little bit cross-eyed than it is to be a little bit pregnant. Any degree of strabismus will have the same visual effect; whether it is a slight or major deviation, the damage done to vision is the same. A particularly unfortunate bit of misinformation that contributes to the number of children who are seriously and permanently handicapped by strabismus is the notion that they will grow out of a tendency to cross their eyes. Although it is true that a certain amount of random divergence or convergence is common in infants, children past the age of one or one and a half should be able to hold both eyes in alignment. Crossed eyes after that age is not normal and cannot be left to improve on their own.

By the same token, you cannot give yourself strabismus. The often-heard warning that rolling your eyes or crossing them in play might make you permanently cross-eyed is completely fanciful. Your external eye muscles are meant to be used, and they are designed to move your eyes in all directions, as well as to hold them parallel to one another. You cannot misuse or overuse these muscles.

Like amblyopia, strabismus is damaging because the brain is constantly given an unacceptable visual message and that interferes with the development of visual skills. Use of the two eyes together is impossible since they are viewing different things. Never having had the chance to receive two similar messages, the brain is unable to learn to assemble a three-dimensional image. Without this learned skill, the individual will never have normal depth perception. And, of course, the deviant eye can become amblyopic.

There are several possible causes of strabismus, some better understood than others. And in some instances we cannot identify the cause at all. The most obvious one — that the eye muscles themselves are too weak to hold the eye in alignment — happens to be relatively uncommon. There is no question that there is a hereditary influence; children whose families have a history of strabismus will have a greater tendency to develop it. Another possible cause is a malfunction of the nerve connection to the external eye muscles. A

Full Text of Federal Judge Fitzgerald's Decision

LONG BUT IMPORTANT

Judge Fitzgerald's opinion is lengthy, but you will find it interesting reading. State legislators will find it incontrovertible evidence that optometrists, who have no medical education, should *not* be allowed to experiment with eye drops and attempt to diagnose disease. U.S. SENATE AND HOUSE Military Affairs Committee members will find it MUST READING in terms of evaluating the use of optometrists in the military to provide "PRIMARY EYE CARE."

IN THE UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF ALASKA

ROBERT K. STEELE, as the Natural father and next friend of TIMOTHY R. STEELE, and ROBERT K. STEELE, individually, Plaintiffs,

v.

UNITED STATES OF AMERICA, Defendant.

NO. F 75-27 Civil

OPINION

Timothy Steele is an eight year old boy whose father is a soldier in the United States Army. Timothy received medical care as a medical dependent at the Eye Clinic, Bassett Army Hospital, Fort Wainwright, Alaska, in 1973 and 1974. This litigation stems from a claim brought on Timothy's behalf by his father against the United States for loss of Timothy's right eye. The Federal Tort Claims Act furnishes the required jurisdiction.

In October and November of 1973, Timothy's mother noticed Timothy's eyes crossing. On December 19, 1973, she took Timothy to the Eye Clinic, Bassett Army Hospital. There Timothy saw Dr. John Shank, an optometrist in charge of the clinic.

Dr. Shank made an extended examination and diagnosed Timothy's eye condition as an accommodative esotropia correctable by eyeglasses. Following his examination of Timothy, Dr. Shank wrote Mrs. Steele a prescription for eyeglasses and made an appointment for her to return Timothy to the clinic January 29, 1974, for a checkup.

During the January visit to the clinic Timothy's mother reported to Dr. Shank that she thought the eyeglasses were helping since Timothy's right eye was not crossing as frequently. However, Dr. Shank's clinical record noted "no good reflex" in Timothy's right eye. The optometrist wrote a different prescription for eyeglasses and instructed Mrs. Steele to make a follow-up appointment for Timothy four months after Timothy would begin wearing the new eyeglasses.

By early May, Mrs. Steele noticed that Timothy frequently removed his eyeglasses. When questioned, Timothy told her that sometimes he wasn't able to see well. An appointment at the eye clinic was scheduled for Timothy on June 10. When Dr. Shank examined Timothy on that date he found vision in Timothy's right eye limited to light perception. At this point Dr. Shank made an appointment for Timothy with ophthalmologist Dr. Bruce Wolf, close by in Fairbanks.

When Dr. Wolf examined Timothy on June 17th he found Timothy's visual acuity in the right eye limited to hand motion although capable of perceiving light. Essentially, Timothy's right eye was blind. The doctor diagnosed leucocoria, right eye, with right esotropia. In his medical opinion the inflammatory cause was a vitreous hemorrhage with possible involvement of toxocara canis or retinoblastoma. Since either disease was extremely serious, Dr. Wolf ordered a complete workup by a pediatrician hoping to rule out one or both. The pediatric workup proved negative and Dr. Wolf then arranged for ophthalmologist Dr. William Kinn, as consultant. Dr. Kinn, a highly qualified ophthalmologist, before opening a practice in ophthalmology at Fairbanks, spent ten years as a military medical officer. His last three years of military service were spent at Fort Wainwright where he was chief of ophthalmology and supervised the optometrists assigned to Bassett Army Hospital.

On examination of Timothy July 9th, Dr. Wolf and Dr. Kinn observed a retinal detachment of the right eye with a subretinal tumor. "Tumor" in this context was defined as a mass rather than a malignancy. Their diagnosis was possible retinoblastoma, but toxocara canis was also to be considered. The doctors concluded specific tests were necessary so that the precise identity of the disease might be known.

Arrangements were made to airevac Timothy from Fairbanks to Letterman Army Medical Center at the Presidio in San Francisco. At Letterman, Timothy was examined July 12 by a team of medical doctors, including Dr. Michael Hogan who was internationally recognized in the field of ophthalmologic pathology.

(Life-threatening Malignancy)

On examination, the medical team observed a retinal detachment involving a grayish yellow tumor. The doctors diagnosed the cause of the tumor as possibly retinoblastoma or toxocara canis. Eye condition at that point in time made it impossible to differentiate between either disease. Because of the danger of retinoblastoma, a particularly fast-spreading and life-threatening malignancy, the doctors recommended to Timothy's parents that his right eye be removed. Timothy's parents immediately consented to the operation and Major Bradley C. Black, a resident assigned to the ophthalmology unit at Letterman, performed the surgery.

After the eye was enucleated it was sent to the ophthalmologic pathology laboratory at the University of California, Berkeley, California, for examination. The laboratory report revealed total retinal detachment of the eye with giant reaction and massive disorganization of the retina. The pathological examination ruled out a retinoblastoma but concluded the cause of the disease to be granulomatous retinitis,[2] etiology unknown. Unlike as in most eye removals, an implant was not inserted into the socket of Timothy's right eye immediately following surgery as there was a substantial possibility that the pathology report might confirm retinoblastoma. The malignancy would necessarily require radiation treatment and a follow-up examination not possible with an implant. When the pathological report ruled out retinoblastoma Timothy was returned to surgery and an implant was placed in the socket.

Dr. Black continued to treat Timothy following the second operation until Timothy returned to Fairbanks. After Timothy returned to Fairbanks he was treated by Dr. Wolf who noted that Timothy's recovery was excellent with the exception of periodic socket inflammation.

Timothy returned in September to Letterman where a prosthesis was inserted into the eye socket with good cosmetic result. Probably the prosthesis will never appear similar to a natural eye since it could not be inserted immediately following the operation.

("Failed to provide adequate care")

It is claimed in this litigation that the optometrist, Dr. Shank, failed to provide adequate care required of an optometrist when he treated Tim-

. . . during infancy

Steeles Warn Other Parents

In an exclusive telephone interview with Timothy's parents who now live in Hawaii, where Army Sergeant Robert Steele is stationed at Schofield Barracks, PEN learned more of an unfolding tragedy.

Saying the subject was "extremely painful" to them, Sgt. and Mrs. Steele agreed to discuss the case because they wanted to warn other parents against relying on optometrists for "primary care."

Sergeant Steele told PEN that, confronted with a life-threatening alternate possibility, the family welcomed the diagnosis of toxocara canis, but he added, "We were pretty well under for about a week after they took out our boy's eye." The tragedy, Steele said, caused Timothy's mother great emotional stress that required medical treatment.

Confirming the words of attorney Nelson Parrish, Steele advised PEN that up until the time of this incident, Timothy had been a bright, well-adjusted youngster who could look forward to a promising future. Today, at nine years of age, Steele said Timothy is working hard to overcome his handicap and engage in normal activities, but despite his determination, he is encountering difficulties.

Timothy is ashamed of his condition, Steele said, and still suffers physically and psychologically. Mrs. Steele told PEN, "Timothy gets very upset if he finds out that other kids know he has an artificial eye — kids can be unkind."

While after five years, monetary damages have yet to be assessed, Mrs. Steele told PEN, "But nothing can replace Tim's eye." ●

From: Transactions of the American Ophthalmological Society — Vol. 67, 1969.

"It is well to consider that any child with strabismus (crossed eyes), and especially any child with strabismus and a poorly fixating eye, has retinoblastoma until proven otherwise."

JUDGE'S DECISION

Continued from page 3

othy in December of 1973 and January of 1974.

OPTOMETRIC RESPONSIBILITY

Dr. Shank graduated with a degree in optometry from Pacific University at Forest Grove, Oregon, in 1971. He was commissioned in the United States Army as a Captain in the medical services and during the summer of 1973 was assigned to Fort Wainwright, Alaska. In November of 1974 he left the Army and now is in the practice of optometry at Kodiak, Alaska.

When Dr. Shank made his first examination of Timothy's eyes on December 17, 1973, he recorded a brief history:

Past six weeks mother thinks patient is cross-eyed. Father amblyopic. Age 4. Negative medical history. Rubs eyes after playing up close. Notices no real problem with depth. No allergies.

In addition he also tested Timothy's unaided vision using a standard AO chart (pictures) for children. The best possible visual acuity when measured with an AO chart is 20/30. Dr. Shank recorded Timothy's visual acuity 20/30 OD and OS (both eyes). After dilating Timothy's eyes he made an internal examination and noted:

Preliminary scoping shows opacity in right eye. Dilated with 10 percent Neo at 1430. Vitreous lesion in right eye caused from hemorrhage.

Upon completing the examination, Dr. Shank concluded that Timothy's eye problem was caused by an accomodative esotropia[3] correctable by a prescription for eyeglasses. He did not think it necessary to refer Timothy to an ophthalmologist.

Dr. Willard Bleything, Dean of the College of Optometry, Pacific University, Forest Grove, Oregon, who was called as a government witness at trial, agrees with Dr. Shank. According to Dr. Bleything, the findings of Dr. Shank's December examination are entirely consistent with an accomodative esotropia, hence, there was no need to send Timothy to a medical doctor.

In his testimony Dr. Bleything touched on the scope of training provided in a school of optometry. A significant part of optometric training is given over to recognition of diseases in the eye. In this case no one questions the principle requiring optometrists to refer their patients to medical doctors once disease is detected in the eye.

(Vitreous Hemorrhage)

In Timothy's case, however, Dr. Bleything would distinguish between an active vitreous hemorrhage and an inactive vitreous hemorrhage. He classifies an inactive vitreous hemorrhage as a scar and suggests referral to a medical doctor is indicated only in the event that an active vitreous hemorrhage were detected. It is implicit by this reasoning that to Dr. Bleything a scar is not an indication of existing disease. Scar tissue, according to Dr. Bleything's opinion, when old or inactive, is typically black. This is consistent with Dr. Shank's testimony that the vitreous hemorrhage detected in his December examination was old because it appeared black or dark.

Actually a black or dark color in a vitreous hemorrhage has nothing at all to do with its age, but rather is a result of its magnitude or extent. The black or dark color indicates a lack of reflected light from the retina behind the hemorrhage. Blood in a vitreous hemorrhage is not black; it is only the shadow that appears black. Indeed, as Dr. Black states in his deposition, an old vitreous hemorrhage would appear as white strands in the vitreous and settle to the lower part of the vitreous. And Dr. Kinn testified that he had personally observed hemorrhages in the vitreous more than a year old which were red in color. He explained that a hemorrhage would appear to be black because it was sufficiently thick with blood to absorb all the light reflecting off the retina during an examination, not because of an innate darkness of color.

The interrelationship between optometric and medical responsibility is discussed in considerable depth in the scientific text referred to at trial, "The Optometric Profession," by Hirsch & Wick. The text notes that responsibility for recognizing eye disease has not always been a part of optometry, nor indeed is it now a part of optometric services in parts of the world outside of the United States and English speaking countries. In some European countries an optometrist is expressly forbidden to examine the eye to determine whether it is healthy or not.[4]

Some of the diseases which may be discovered by examination of the eye are brain tumors, diabetes, kidney disorders, hypertension, as well as some diseases caused by microorganisms such as tuberculosis. Optometrists study about these and other diseases in order to recognize eye manifestations of diseases. An optometrist should not attempt to complete a definitive diagnosis but recognize this responsibility is part of the practice of medicine. This principle is clearly stated in "The Optometric Profession."

JUDGE JAMES M. FITZGERALD
U.S. District Judge - Alaska

"The difference between optometric and medical responsibility to the patient may be clarified by example. If an optometrist observes a hemorrhage in the fundus, he recognizes that it may be due to any of the diseases already enumerated. It also may have resulted from a vascular accident or from undue capillary fragility. The important consideration for the optometrist, however, is that he see and identify the hemorrhage. It is his responsibility to refer the patient to the appropriate medical practitioner for diagnosis and treatment of the disorder. The optometrist's understanding about disease is sufficient to recognize the various diseases that can cause hemorrhage. He does not attempt to differentiate between them. Medical technology has advanced so greatly in the past few decades that there are now many laboratory tests the physician can use in making the correct diagnosis. Disease is diagnosed by many procedures. The appearance of the eyeground is only one of them." *The Optometric Profession.*

I am not persuaded with Dr. Bleything's reasoning that referral to a medical doctor ought to depend on whether the optometrist has diagnosed a vitreous hemorrhage as active or inactive. The authors, Hirsch & Wick, suggest in their text that the important consideration is that the optometrist be able to see and identify the hemorrhage. It then becomes his responsibility to refer the patient to a medical doctor for diagnosis and treatment. Since Dr. Shank detected the vitreous hemorrhage of the right eye during his December examination, it was his immediate responsibility to promptly refer Timothy to a medical doctor. In point of fact, ophthalmological services were then readily available to military personnel at Fort Wainwright and to their dependents under a federal contract with Dr. Wolf.

Dr. Shank was aware of symptoms other than vitreous hemorrhage which are of significance to an optometrist. Esotropia in a child of four, Timothy's age in 1973, is a serious matter. Dr. Black states that esotropia in a four year old child is very rare. Most cases of congenital esotropia caused by muscle imbalance develop before age two. This condition is correctable by an operation on the muscles of the eye. Accomodative esotropia, such as diagnosed by Dr. Shank in December, 1973, develops in most cases at age two to two and a half, although it occasionally develops as late as age four or five. This condition is correctable by eyeglasses and the esotropia usually corrects itself after eyeglasses are worn. But esotropia may also indicate some type of retinal or vitreous pathology in the visual axis. This will often involve a disease in the macula, the central part of the retina. This condition reduces visual acuity in the eye and as a result the eye turns inward. In Dr. Black's opinion the most important thing to rule out when a child does present an esotropia is retinal or vitreous pathology. But even more, when a vitreous hemorrhage is observed in a child, it is very important that retinoblastoma be immediately considered until that disease can be completely ruled out.

Dr. Wolf, who treated Timothy at Fairbanks before and after his hospitalization at Letterman, agrees with Dr. Black that Dr. Shank should have referred Timothy to an ophthalmologist in December. Dr. Wolf believes that referral to a medical doctor ought to have been made immediately when Dr. Shank learned of the esotropia from Timothy's mother. Dr. Kinn, who consulted with Dr. Wolf, also agrees that referral was indicated in December. Indeed, Dr. Zimmerman, an eminent ophthalmic pathologist, who testified for the government at trial, concurs that further investigation should have been undertaken at the time the lesion was observed in Timothy's right eye.

(Credible Opinion Cited)

I am persuaded from credible, convincing medical opinion, as well as the scientific publication referred to, that Dr. Shank failed to meet the standards required of his profession when he examined Timothy in December of 1973. He knew that Timothy presented an esotropia and in the course of his examination he observed a vitreous hemorrhage in the right eye. An optometrist's responsibility is to observe during his eye examinations any manifestation of disease visible in the eye. Upon detecting disease in the eye, it is then his obligation and duty to the patient to make known what the optometrist has observed. In such cases he may not undertake to diagnose the disease, but should inform his patient that the matter is beyond his competence and advise the patient to seek a qualified medical doctor. Certainly in January when Dr. Shank detected the poor reflex in Timothy's right eye, he should have sent Timothy to a medical doctor. Instead, he delayed making a referral to an ophthalmologist until after his last examination in June, 1974. By that time Timothy was essentially blind in his right eye, and by then the retina had pulled away from the rear of Timothy's right eye. As it was to turn out, nothing thereafter could be done to save the vision or to save the eye. Time had run out.

Several questions arise at this juncture. Was the disease which ultimately caused the eye to be removed present when Dr. Shank made his examination in December, 1973? What was the nature of the malady and could it have been diagnosed? Could the disease have been treated had it been timely discovered?

There is general agreement in the testimony of the physicians that the disease which brought about the removal of Timothy's right eye was present when Dr. Shank made his initial examination.

When Dr. Wolf examined Timothy in June, 1974, he diagnosed a vitreous hemorrhage with the possibility of either retinoblastoma or toxocara canis. The team of medical doctors who examined Timothy at Letterman Hospital in July considered four possibilities. The first was persistent hyper-

Continued on page 5

JUDGE'S DECISION

Continued from page 4

plastic primary vitreous, a congenital defect of the eye present at birth and generally noticed shortly after birth. With such a condition as persistent hyperplastic primary vitreous, the eye is usually a bit smaller. The front part of the eye is ordinarily not normal so there are distinguishing factors for that disease. The medical doctors at Letterman were able to rule out this possibility. They were also able to rule out a vitreous hemorrhage as a cause since the vitreous of the eye was fairly clear when the doctors made their examination. The two remaining considerations related to some type of inflammatory response, most probably either toxocara canis or retinoblastoma.

(A Dangerous Malignancy)

Retinoblastoma is an extremely dangerous malignancy sometimes found in the eyes of young children. When diagnosed, retinoblastoma requires removal of the diseased eye to prevent the malignancy from escaping outside the eye, possibly through the optic nerve into the brain.

Retinoblastoma was ruled out in the University of California pathological report following examination of the eye after the operation. A negative finding of retinoblastoma eliminated any need for radiation treatment. In Dr. Black's medical opinion the cause of the inflammation of Timothy's eye was probably toxocara canis. Dr. Black observed that although the larva was never found in the few sectionings of the eye, it is known that the larva may disintegrate or completely disappear in the eye.

Toxocara canis is a parasitic round worm frequently found in dogs. The eggs of the parasite may be ingested by children playing in dirt and the eggs hatch in the intestines of the child into a larva. The larva bores through the intestinal wall and enters the blood stream and is disseminated to different parts of the body. In every instance, with possible rare exception, the parasite is not able to complete its life cycle in a human host and the larva dies without developing into an adult worm. The most common locations where it has been found are in the liver or the lungs. Inflammation of the eye by toxocara is fairly rare. But when it does appear it tends to result in a massive inflammation which usually involves the retina and sometimes may intrude into other structures inside the eye. The presence of toxocara in the body often leads to visceral larva migrans syndrome. The child can have a fever and may have some type of lung disorder, his liver may be enlarged and tender and there may be some abnormalies in certain blood tests. However, an ocular toxocara inflammation frequently occurs without a visceral larva migrans syndrome occurring and some studies suggest that in only three or four percent of ocular toxocara inflammation is the syndrome present. With ocular toxocara, so long as the larva remains alive, there is usually not much effect on the eye. There may be a local inflammation in the retina or a small whitish elevated lesion in the retina at the site of the larva or where it penetrated the retina, but the stage at which the parasite usually becomes very damaging is when the larva dies and decomposes. This leads to an extensive lesion in the eye eventually resulting in a massive scar. If the larva is able to work itself into the vitreous cavity of the eye, it brings about an even more severe inflammatory process.

(Dr. Krupp's Testimony)

Dr. Iris Krupp of Tulane University in New Orleans, Louisiana, is a widely renowned expert in the field of parasitology. She began her work on toxocara as a graduate student in 1954. Since then, she, in association with several ophthalmologists, has done extensive work in the detection and treatment of toxocara. She developed a reliable serologic test for the detection of toxocara which was announced in an article[5] published in the "American Journal of Tropical Medicine" in May, 1974.[6] After examining the medical records, including the pathology report, in Dr. Krupp's opinion the probability was 90 percent that the disease in Timothy's right eye was toxocara. Dr. Krupp, a principal government witness at trial, agreed that the University of California pathological report required that retinoblastoma be ruled out as a cause. However, he noted Dr. Helenor Foerster, a widely known ophthalmic pathologist, also performed a pathological examination on Timothy's eye. Dr. Foerster has published a number of important scientific papers, one of which presented the initial description of toxocara infection of the eye. Dr. Foerster prepared a pathological report in connection with a paper which she presented to the Western Ophthalmic Club. In her report, Dr. Foerster observed many pigment-laden macrophages and giant cells in the retina. Dr. Zimmerman believed this was significant since it implied substantial bleeding into the eye, or alternatively, that a foreign body containing iron might have been introduced into the eye. He postulated that bleeding may have been brought about by several causes, including persistent hyperplastic primary vitreous. In addition, Dr. Zimmerman suggested another possibility of the cause of the inflammation might be a low grade bacterial infection. He did not, however, conclusively rule out toxocara as a possible cause but noted that the larva was not found in either pathological examination. Also, in Dr. Zimmerman's opinion the iron pigment described by Dr. Foerster in her pathological report would not be characteristic of toxocara infection. For these reasons he discounted toxocara as the cause.

Dr. Zimmerman concluded that in this instance it is unlikely that the cause of Timothy's eye inflammation can ever be reliably known, hence the doctor's final diagnosis was chronic sclerosing endophthalmitis, cause undetermined.

It is true that the larva was not found during pathological examination. But as Dr. Black explained, the larva may decompose and disintegrate. The University of California pathological report following examination of the eye was prepared by Dr. Joseph Eliason, an ophthalmologist. In his deposition testimony, Dr. Eliason stated the pathological diagnosis was granulomatous retinitis, etiology unknown. As stated above, this is a general inflammation involving the retina. Toxocara canis characteristically causes this type of inflammation although other causes are possible.

In the course of the pathological examination, a technician prepared 30 to 40 sections from the eye. A section is less than a tenth of a millimeter and unless the entire eye is sectioned it is possible to miss the larva. In Dr. Krupp's opinion, insufficient sections of the eye were examined to exclude the possibility that the larva was in the eye. Other possibilities suggested by Dr. Zimmerman that bleeding into the vitreous was caused by persistent hyperplastic primary vitreous were ruled out during the medical examination in July at Letterman, nor is there anything to suggest the possibility of a foreign metallic object as the cause of the inflammation.

I find on the basis of the testimony of the treating physicians, including Dr. Wolf, Dr. Kinn and Dr. Black, that toxocara canis was the probable cause of the inflammation in Timothy's right eye. The opinions of the treating doctors are substantially similar to the opinion of Dr. Krupp whose qualifications in this field are outstanding. I find in all probability the larva entered the eye through the retina prior to the time Dr. Shank made his examination in December of 1973. Probably the vitreous hemorrhage observed by Dr. Shank was caused by underlying lesion in the retina of the eye.

(Ophthalmic Procedure)

While it cannot be known with absolute certainty what an ophthalmologist would have done or been able to do if Timothy had been seen in December, 1973, Dr. Kinn testified that the ophthalmologist would have been immediately concerned with making a diagnosis. At that time the physician might have had some indication of a retinal lesion which would cause him to suspect either a granulomatous reaction or a retinoblas-

Continued on page 6

IRIS KRUPP, M.D.
Tulane University Professor

M.D. Expert Witness Comments...

Iris Krupp, M.D., of New Orleans, an authority on parasitology who testified as an expert witness in the Steele case, has issued a warning to PEN readers to seek an early medical eye examination if symptoms similar to Timothy's are noticed. Delay, as in Timothy's case, can result in blindness.

In a letter to the editor of PEN, Dr. Krupp, a Tulane University professor, indicates that early treatment with steroids and thiabendazole (an anti-parasitic drug) and/or the laser could save the eye of a patient with visceral larval migrans, the disease caused by toxocara canis, which afflicted Timothy Steele.

Dr. Krupp also said that man is not a natural host for the roundworm of the dog (toxocara canis), but may affect children who have eaten dirt or food contaminated by fecal material of a dog containing the eggs of the parasite.

Once ingested, the eggs hatch and the larvae pass from the intestines into the blood stream and may settle in any organ of the child's body. Symptoms may include coughing and wheezing, excessive weariness, loss of appetite, seizures and changes in the ability to see.

Diagnosis can be made by studies of the blood and examination of the sites at which the larvae may be deposited.

Finally, Dr. Krupp emphasized that "It is extremely important that persons with ocular lesions be seen early by a physician experienced in the diagnosis and treatment of this infection, as delay may result in blindness." ●

A medical educator comments:

"In every patient with a misdirected eye and/or an abnormality in the eye, the possibility of a malignant tumor must be excluded."

Department of Ophthalmology
School of Medicine
Tulane University

Conclusion: Judge Fitzgerald's Ruling

Continued from page 5

toma. The ophthalmologist would have been able to examine the microscopic details with specific instruments and, if inflammatory cells were observed, the doctor could have concluded that an inflammatory reaction was present. In such circumstances a diagnosis of toxocara would be likely. Dr. Kinn explained that since the eye was functioning in December it would not have been prudent to remove the eye even if retinoblastoma was suspected. Rather, Dr. Kinn would recommend a therapeutic trial of steroids be undertaken and if the response would be favorable, then the eye not be removed. But if the mass continued to grow despite the treatment and if retinoblastoma could not be ruled out, it would be necessary to enucleate the eye.

Although in Dr. Zimmerman's opinion there is no recognized treatment for toxocara canis, in fact according to Dr. Krupp, the use of steroids in treating toxocara appeared in the medical literature as long ago as 1961.[7] And since that time, Dr. Krupp maintains there have been numerous reports in the literature on the use of steroids. In her own right, Dr. Krupp has participated in treating approximately 20 cases involving ophthalmic toxocara. Her treatment for toxocara includes thiobendazole and steroids, generally used in combination. Thiabendozle is an antihelmintic medicine which kills the larva. The steroid is an anti-inflammatory agent which reduces the mass of inflammation generally associated with toxocara. In each of the cases in which Dr. Krupp participated, treatment was able to arrest the loss of vision at the stage it was when the patient was first seen. Results of treatment can usually be observed within three to four weeks. In the event a patient does not respond to treatment, retinoblastoma may be indicated.

Dr. Black was also aware of several cases where inflammation of the eye was treated with steroids, and in isolated cases steroid treatment has decreased the inflammation, resulting in minimal scarring. But in Dr. Black's opinion, in most instances toxocara is not seen by the ophthalmologist until it has been quite destructive. However, assuming that visual acuity in Timothy's right eye was 20/30 in December of 1973 and treatment with steroids was instituted, some vision might have been salvaged.

In Dr. Wolf's opinion, if Timothy had been seen by an ophthalmologist in 1973, very possibly the eye could have been saved. Since a granulomatous inflammation is a cellular reaction to a foreign object, treatment would be taken to block the reaction. Steroids are a recognized form of treatment for granulomatous inflammation.

I find it probable that an ophthalmologist examining Timothy's right eye in December, 1973, would have diagnosed possible granulomatous reaction, toxocara canis or retinoblastoma. Although there was a lesion in the eye that to some extent impaired Timothy's vision, his visual acuity in the eye was 20/30, the best that could be measured on Dr. Shank's eye chart. The ophthalmologist under such circumstances would almost certainly institute a course of treatment involving steroids in order to reduce the inflammation. The treatment would have prevented further loss of vision and toxocara inflammation would have caused minimal scarring. The eye would have been saved.

Since the jurisdiction of the court is found under the Torts Claims Act, Alaska tort law controls. *Richards v. U.S.*, 369 U.S. 1; *U.S. v. English*, 521 F.2d 63 (9th Cir. 1975). The concept of liability arising out of negligence has been recently stated by the Alaska Supreme Court to be:[8]

> It is elemental that in order for liability to be imposed in a negligence action, the plaintiff must establish a duty of due care owed him by the would-be defendant, a breach of that duty, and finally, that the injury was proximately caused by the breach of duty. Generally speaking, the duty of due care or ordinary care is the duty to act with that amount of care which a reasonably prudent person would use under the same or similar circumstances.
>
> *Leigh v. Lindquist*, 540 P.2d 492, 494 (1975).

Dr. Shrank's failure to promptly inform Mr. and Mrs. Steele of the vitreous hemorrhage in their child's eye and his accompanying failure to refer Timothy to an ophthalmologist was a breach of the standard of care owed to Timothy Steele and his parents. I find Dr. Kinn's testimony as the duty owed to be especially persuasive. Not only is he a board certified ophthalmologist who continually deals with optometric referrals, but Dr. Kinn was previously chief of the eye clinic at Bassett Army Hospital for three years. During those years, he was in charge of the optometrists at the eye clinic and had overall responsibility for all medical and optometric care at the clinic. Additional evidence of the breach of the standard of care is found in the established text "The Optometric Profession." That authoritative work explicitly states that an optometrist is bound not to try to differentiate between pathologies such as hemorrhages. Instead, an optometrist must refer the patient to a medical practitioner for prompt examination.

(Judge's Conclusion)

I conclude that competent optometric practice required that Timothy's parents be notified and that the child be referred. The failure to inform and refer was not a "judgment call" but a violation of the governing principles of professional standards.

Optometrists are trained to recognize symptoms of many diseases which may be discovered by eye examination. They are not permitted under recognized optometric standards to undertake a definite diagnosis but recognize this as the responsibility of a medical doctor.[9] Obviously, it is foreseeable that failure to refer to a qualified medical practitioner, when required to do so, will result in delay of diagnosis and the institution of treatment; so it proved to be in Timothy's case. At the time the referral was finally made to an ophthalmologist, it was too late. Time had run out, and the only thing that could be done was to remove the eye.

I conclude that the plaintiff is entitled to recover in this action from the United States for the loss of Timothy's right eye.

DATED at Anchorage, Alaska, this 20th day of October, 1978.

/s/ James M. Fitzgerald
United States District Judge

---

1 28 U.S.C. 1346(b). Plaintiff's original complaint founded jurisdiction on the Federal Torts Claims Act but mistakenly cited the section as 1366(b).

2 Retinitis is an inflammation which chiefly involves the retina. "Granulomatous" is a type of inflammation. Thus, the pathology conclusion was that of a general retinal inflammation of unknown origin.

3 Esotropia, meaning pointing inward.

4 **The Optometric Profession** by Monroe J. Hirsch and Ralph E. Wick, (1968 edition) Chilton Book Co. at page 17.

5 Hemoglutination Test for the Detection of Antibodies Specific for Ascaris and Toxocara Antigens in Patients with Suspected Visceral Larva Migrans.

6 Since the article did not appear until May, 1974, the physicians who treated or examined Timothy were probably not aware of Dr. Krupp's serological test.

7 By Schneider at the Oxnard Clinic.

8 The standard of care required of medical doctors, osteopaths, and dentists is found at AS 09.55.540. Optometrists were not included. In 1976 the statute was broadened to include all health care providers. 34 Ch. 102 SLA 1976. The amendment was limited, however, to actions filed after the effective date, May 29, 1976. Since Steele v. U.S. was filed August 20, 1976, the amendment is not applicable.

9 The Optometric Profession, pp 6, 17.

EDEN: CROSSED EYES

Continued from page 2

common, more readily explainable cause is an uncorrected high degree of farsightedness. Remember that young people can correct farsightedness by using their near-focusing ability. This involuntary action plays a part in strabismus because when near-focusing muscles are used the eyes automatically converge to take in the near object. Notice that when you shift from looking at a far object

Strabismus.

to looking at a near one your eyes turn in a bit. This is a natural and normal reflex, but when a farsighted child uses the near-focusing muscles to view far objects clearly, his or her eyes may converge. The reflex is stronger in some than in others, so it does not mean that all children with uncorrected farsightedness will develop strabismus, but it is a possibility.

A disease that causes poor vision in one eye is another possible cause. If one eye sees quite badly, there is not much visual benefit to be gained from using it. The brain will not tell the nerves to tell the external muscles to hold the eyes parallel, and the defective eye may simply turn in or out because there is little reason for it to hold itself parallel to the other eye.

What difference does all this make? Is strabismus more than just a cosmetic problem, a matter of looking a bit odd because the eyes are crossed? Indeed it is. Binocular use is not a skill mechanically achieved; it must be learned in that ever-important period before age six. If strabismus is uncorrected during that time, the child will never be able to learn to use both eyes together. Correction after age six will improve appearance, but it cannot provide a second chance to learn binocularity. Likewise, if the strabismus has caused the deviant eye to become amblyopic, correction of the deviance after age six will not cure the amblyopia.

Epicanthus.

Extremely misaligned eyes can be spotted by a parent or anyone looking at the child, but strabismus is often not that pronounced. An eye doctor, however, can readily discover strabismus during the routine eye examination and can determine how it should be treated.

A condition called *epicanthus* often causes parents of young children to suspect strabismus. At birth, a wide nose bridge normal to all babies is combined with an unusual eyelid fold that often makes it seem that one eye is turned in too far when the baby looks slightly to one side. In fact a large portion of the sclera is hidden by the *epicanthal fold*, but the eye is not turned in more than normal. This is an anatomical feature that is not at all related to strabismus, and it does not interfere with learning to see. The child may look abnormal, but he or she does not see abnormally. And in most cases, the epicanthus recedes as the child's nose narrows. ●

FOUNDER SALUTED BY AMA NEWS — PART II

Ochsner: "Treat The Whole Patient"

The accomplishments of Alton Ochsner, M.D., PEN's International Advisory Board Chairman, are legend in the annals of American medicine. Terming PEN, "The most potent communications effort I have ever observed in medicine," Dr. Ochsner has said, "Ophthalmology — medicine's protectors of one of God's greatest gifts — eyesight — finds itself in the trenches, doing grim battle against a potential epidemic of ineptitude foisted on the American public by some legislators who have heard only the exaggerations and half truths of the optometric side of a non-argument."

Free-lance author Nancy Yanes Hoffman, in an article titled "Alton Ochsner: 82 and Still Going Strong," which appeared in the AMA Journal on August 25, 1978, Vol. 240, No. 8, has captured the essence of this man's greatness. PEN wishes to express its appreciation to Ms. Hoffman and to the JAMA for permission granted to present this material in a series of articles.

ALTON OCHSNER, M.D.
PEN'S International Advisory Board Chairman

"Alton Ochsner: 82 and Still Going Strong," Part II:

The trend in American medicine, as in American life, toward trying to get by with mere competence while not striving for excellence, worries Ochsner. "The other thing that worries me is that physicians rely too heavily on laboratory findings. I fear we are developing a group of competent technicians, treating disease but not treating the whole patient. I stress to our young people that they must sit down with a patient, take a complete history, do a careful examination, then evaluate the findings and arrive at a working diagnosis. After that, they should order laboratory tests. If the laboratory work confirms the clinical diagnosis, accept it. If it doesn't, disregard the laboratory findings and keep on looking. Sounds like heresy, I know, but it's true."

Ochsner remembers a South American woman (the Ochsner Medical Institutions draw many Latin American patients) who had been diagnosed as a hypochondriac with severe psychiatric problems. Although Ochsner protested, "I don't know anything about psychiatry," he saw the patient, became convinced that she had no more psychiatric difficulties than the rest of us, examined her, and diagnosed her case as amebiasis. The laboratory test disagreed — as did the gastroenterologists. Ochsner insisted on instituting anti-amebiasis therapy. "Three days later she walked into my office and said, 'Doctor, I'm well for the first time in years.' What convinced me? Such things as tenderness over the appendix and the liver and listening carefully to the chronology of her symptoms: 'I wake up in the morning and I could whip my weight in anything. By ten o'clock, I can't drag one foot after the other.' This complete asthenia is characteristic of amebiasis. Doctors must listen to the patient, discard their hidebound preconceptions, track down every clue, have the courage of their convictions even when their peers oppose them. I can't emphasize this enough to students."

As Ochsner looks back at his diverse medical career, he believes that his most valuable contribution to medicine has been his teaching. "I'd like to be remembered as a teacher. As Tulane's professor of surgery, I've gotten my greatest satisfactions from teaching more than 3,600 medical students and from teaching our resident fellows here at the Ochsner Foundation Hospital." No student will ever forget those harrowing sessions in the "bull pen" with Alton Ochsner. At one of these "Why Clinics," as Ochsner dubs them, he was barraging a student with questions. "Why? Why? Why?" demanded Ochsner, forcing the student to analyze and defend every assumption that was not thought through. In a classic fight-or-flight response, the student fainted. When he was revived, Ochsner interrogated him just as vehemently — with one additional question: "Why did you faint?"

Who was his best student? "Mike DeBakey. Remarkable, brilliant." Ochsner considers DeBakey "indefatigable." As for himself: "I don't know if I have such prodigious energy. My friends say I work too hard. That's ridiculous. I love what I do. I have fun from the time I get up in the morning until I go to bed at night. I don't work hard; I put in long hours. I think that I'm basically lazy, but I'd be miserable if I didn't work." Ochsner insists that his fabled vigor comes from not wasting energy on disappointment or regret for the road not taken. "Then, too, I've never smoked. Tobacco is the most malevolent aging factor present today. Everybody gets older, but nobody has to get old. Chronological age is irrelevant to physical and mental age. Start with a good machine, take care of it, and it will last a long time.

How to age as well as Ochsner — or, at least, to try? "Three factors accelerate aging: tobacco, our modern sedentary life (people must exercise strenuously daily, until they're out of breath, huffing and puffing), and obesity." Ochsner himself eats sparingly, usually skips lunch, and never has permitted his trim body to lose the battle of the bulge. "If I ate what I wanted," he says, "I'd weigh 300 pounds."

What was Ochsner's most interesting case? An impossible question. Separating Siamese twins; the first successful resection of a saccular aneurysm of the aorta; a thyroidectomy on Tomas Gabriel Duque, then former President of Panama, in 1942, at Cordell Hull's request; surgery on the late jazz trumpeter Muggsy Spanier, who thanked him by writing the song, "Oh, Dr. Ochsner"; or treating Ben Hogan after an automobile accident. Six weeks after the accident, ready to be discharged from an El Paso Hospital, Hogan had suffered a pulmonary embolus, had received anticoagulation therapy, then had had a massive embolus five days later.

It was Mardi Gras time. After attending the Queen's supper, Ochsner had gotten to bed at 4 A.M., arisen at 5 A.M. and had worked all day until ten in the evening. He had finally fallen into bed, "dog-tired," when the phone rang. Could he fly to El Paso? Hogan was cyanotic and comatose. As soon as Ochsner saw Hogan he said, "He's got to have his cava tied — immediately" Ochsner remembers: "Hogan was bleeding profusely. His blood was absolutely incoagulable. His prothrombin time was 0. At noon, I began giving him protamine sulfate and vitamin K and blood transfusions. By midnight, his pro-time was 30%, but we couldn't wait any longer because he was sinking fast. I operated."

Ochsner flew home, got in at 8 A.M., went directly to the foundation hospital, and started work. Hogan got well and won touraments after that.

Ochsner postscripts: "People are reluctant to tie off the vena cava, because it seems like such a horrible procedure, but it's not. It can be a life-saving act." Why? "Most patients don't develop a fatal infarction after a nonfatal pulmonary infarct, so surgeons and internists both gamble that every patient won't have a fatal embolus. But every patient who's had a pulmonary embolus is a candidate for another one. He may be lucky and not have one, but it's dicey." Again, Ochsner repeats George Dock's dictum: the importance of being careful. "Many doctors will say wait until a patient has had two or three emboli, then ligate. In my opinion, that's playing Russian roulette. **All medicine is judgment. I can bring anybody in off the street and teach him how to cut and sew in three months. It's knowing when to operate and when not to operate."**

After teaching, Ochsner considers his most important contribution to medicine his work toward the establishment of a causal link between smoking and lung cancer and, subsequently, between smoking and its deleterious effects on the vascular system. "When I was a medical student in 1919, we admitted a patient with lung cancer to Barnes. As usual, the patient died, because the mortality was almost 100%. Dr. Dock had us witness the autopsy because he said that the condition was so rare that we'd never see another case as long as we lived. I didn't see another case for 17 years — until 1936. Then there were nine cases in six months. An epidemic. There had to be a cause. They were all men, all smoked cigarettes heavily, all began smoking in the first world war. When I researched the history of smoking, I found that very few cigarettes had been consumed prior to World War I.

"In 1936, I had the temerity to state — not suggest — that cigarettes caused this new plague." He sighs. "Not that anybody believed me or listened to me. Even in 1950, when I was president of the American Cancer Society, I used to have knock-down-drag-out fights with E. Cuyler Hammond [ScD], their chief biostatistician. [Dr. Hammond, vice-president for epidemiology and statistics, now agrees with Ochsner.] It took the American Heart Association even longer to take up the cudgels against cigarettes, though they are just as noxious to the vascular system as to the respiratory system."

Part III of "Alton Ochsner: 82 and Still Going Strong" will appear in the next edition of THE PEN. ●

N.C. REPEAL RESOLUTION

The resolution of the Section on Ophthalmology of the North Carolina Medical Society, was inadvertently omitted in the December 1 issue of THE PEN. The complete text follows:

RESOLUTION:

WHEREAS, the medical doctors who are members of the North Carolina Ophthalmology Section of the North Carolina Medical Society are increasingly concerned about the jeopardy to the public health inherent in the 1977 law which allows the use of drugs with their inherent dangers by medically untrained optometrists; and,

WHEREAS, such drugs are unnecessary to the practice of optometry; and,

WHEREAS, AMA medical ethics Principle 10 mandates that physicians provide their efforts, resources and expertise to the benefit of the public welfare,

NOW THEREFORE BE IT RESOLVED, that the North Carolina Society of Ophthalmology in cooperation with the North Carolina Medical Society will have legislation introduced in the North Carolina Legislature for the purpose of repealing the 1977 optometric drug use law, and will publicly campaign for repeal, maintaining this action until such time as the mission is accomplished and the protection of the people of North Carolina is assured.

Passed May 5, 1978
Pinehurst, North Carolina

H. Maxwell Morrison, M.D.
President, Section Ophthalmology, NCMS
David B. Sloan, Jr., Secretary
Section Ophthalmology, NCMS

Steele's Attorney Comments On Case

O. Nelson Parrish of Fairbanks, Alaska, attorney for the plaintiffs Robert K. Steele and Timothy R. Steele, provided PEN with his reaction to the decision as rendered by Judge James M. Fitzgerald.

"I think," Nelson Parrish said, "that the essence of the court's decision is that optometrists, and schools of optometry (compared to ophthalmology) will not be allowed to set their own standards as to what they can and cannot do. The court's decision recognized that optometrists are not sufficiently trained to make the same kinds of decisions that ophthalmologist M.D.s can, and should make, in situations similar to that presented in Timothy's case."

Continuing, Parrish stated, "The U.S. Government was, in fact, contending throughout this trial that since we (the plaintiffs) did not present an optometrist to say that what the optometrist treating Timothy did was wrong, our case ought to be dismissed. The Government, in fact, moved for a 'directed verdict' (to throw our case out of court) on the grounds that only an optometrist can say what is or is not wrong about what another optometrist does."

When questioned by PEN as to the judge's reaction to this line of reasoning, attorney Parrish replied, "The judge rejected it by saying, in effect that since an optometrist is not fully trained to recognize dangerous situations, such as presented in this case, he could not then say what he did or did not do is right or wrong. Having arrived at that point, the court then in effect said it was going to accept the position of all the medical doctors who testified, including the government's doctor, that the boy should have been referred."

In concluding his comments, Nelson Parrish told PEN that this case had convinced him that, "optometrists, with no medical education, are attempting to pull themselves up by their own bootstraps, into an invulnerable position of unaccountability." ●

THE PEN FORUM

Public Service by Alabama M.D.s Draws National Praise

As reported in the December 1 issue of THE PEN, the Medical Advisory Board to the University of Alabama has passed a resolution which declares that University Optometry School graduates are not trained to attempt to practice medicine. This action, to protect the public, is being saluted by M.D.s throughout the nation.

Dear Dr. Hale:

I want to thank you for the public service rendered by the Medical Advisory Board to the University of Alabama for publicly defining the limited role of optometrists. Their efforts over the past several years have been to mislead the public into the scope of services that they provide. It is important to make every effort to protect the medical well-being of the public.

Please be assured of my best wishes.

Robert A. Wiznia, M.D.
New Haven, Connecticut

Dear Dr. Moore:

Let me express my appreciation to you and the other physician members of the Medical Advisory Board of the University of Alabama. Your courage in opposing the attempts by non-practitioners (optometrists) to get into the practice of medicine is commendable. Defining the role of optometry is a public service and the actions taken by the Medical Advisory Board will be of great help in our fight to protect the high quality of medical care in this country.

Joe H. Woody, M.D.
Charlotte, North Carolina

Dear Dr. Henderson:

I found it most gratifying to see that wisdom has prevailed in the resolution to define the limited role of optometry in medicine through your efforts and convictions. The valuable limited services of optometrists has been recognized by medicine and by ophthalmology alike. False claims and false advertising, as well as impersonating physicians by optometrists is totally alien to the medical arts. Your clear perception of the problem, and your action deserves many thank-yous from all physicians, patients, and the public at large.

Georges Birenbaum, M.D.
Lexington, Kentucky

Dear Dr. Pittman:

I congratulate you, as a member of the University of Alabama Medical Advisory Board, for speaking out forthrightly regarding optometric education at your University. The public and legislators around the country need to know that optometrists are not trained to assume a medical role. Your resolution is a godsend.

The American people owes you a debt of gratitude.

Charles B. Bobo, M.D.
Greenwood, South Carolina

Dear Dr. Henderson:

As a practicing ophthalmologist and a citizen I wish to congratulate you for the role you have played and the service you have rendered to the public in defining the limited role of optometry. We all know at times it takes courage to stand up on your hind legs for what is right. But remember there is only one truth and all the local political and social pressures cannot alter that.

You have helped to open the eyes of the public as to the only proper role of optometry in vision care.

Walter G. Bullington, M.D.
Charlotte, North Carolina

Dear Dr. Moore:

Today I received a copy of the resolution of the University of Alabama School of Medicine Physician Advisory Board concerning the education of optometrists at that institution.

It gives me a feeling of relief and appreciation that there are fellow medical doctors in this country who have the insight and understanding that is necessary to protect our lay population from the zealous political ambitions of those people who place ego and economics above personal ability in matters of the health care of this nation.

Please accept my thanks and appreciation for your efforts in this matter.

Jerome L. Byers, M.D., P.A.
Dallas, Texas

Dear Doctor Moore:

Congratulations to you for your great effort in defining the status of optometric education with regard to the practice of medicine in the resolution passed by the Medical Advisory Committee, at the University of Alabama School of Medicine.

It was a great public service to all of the people of our country.

James W. Clower, M.D.
Daytona Beach, Florida

Aloha, Doctor Pittman!

By publicly defining the limited role of optometrists, you and your colleagues on the University of Alabama Medical Advisory Board have done your patients a real service.

Thanks . . . or as we say in Hawaii,
Mahalo!

John M. Corboy, M.D.
Wahiawa, Hawaii

Dear Dr. Pittman:

Thanks for a job well done. Your recommendation in that we issue a public statement concerning the education of Optometrists is welcomed by all of us who understand the problems related to the eye. The resolution itself is a work of art, and describes optometric education exactly as it should be described.

Please know that your efforts are greatly appreciated.

R. H. Monahan, M.D.
St. Paul, Minnesota

THE PEN is a public newspaper, international in scope. Its readers include people from every walk of life. THE PEN is freestanding and independent of any national or state association, with the exception of its sponsor, Physicians Education Network, Inc. PEN, Inc. is a Florida non-profit corporation. Submissions to this newspaper are welcome and are published at the discretion of the editors. THE PEN does not accept paid advertising or paid subscriptions.

UNITED STATES PHYSICIANS EDUCATION NETWORK

Statement of Purpose

PEN exists solely to utilize its resources and combined influence to present, promote, and promulgate, through communication outward, and communication inward, these simple truths:

- The American people must be protected by placing and keeping health care in the hands of experts, whose abilities are established by having reached a standard level of medical education.
- The logical minimum level of education necessary for leadership to protect the public in shaping the optimum health care delivery quality standards in the United States is the degree of Doctor of Medicine or Osteopathy, earned at a school of medicine or osteopathy — at an accredited institution of higher learning.
- Government at every level should cooperate with medicine in establishing these health safety standards.

Membership in PEN is available to any law-abiding citizen who subscribes to these truths, and desires to be informed, as well as to participate in informing the public at large.

RHODES OF OHIO: "WE CAN TAKE NO RISKS"

Ohio Governor Vetoes Optometric Drug Law

COLUMBUS, OHIO — On December 15, 1978, Governor James A. Rhodes of Ohio vetoed amended substitute S.B. 163, which would have permitted optometrists in Ohio to use diagnostic drugs. This marks the second time this year that a state governor has rejected optometric drug legislation in order to protect the citizens of his state.

The first veto came in Virginia when Governor John N. Dalton vetoed similar legislation, noting that, "There is reason for grave concern for patients' welfare where optometrists practice in isolation from medical backup."

Governor Rhodes echoed Governor Dalton's concern when he said in his veto message, "Health care is an area in which we can take no risks because any mistakes could bring tragic and irreversible results. We must be committed to our citizens to provide practitioners that are highly skilled individuals and who will at the same time provide the best health care at the lowest cost.

"Optometrists have been doing an excellent job in working with the medical profession to bring quality eye care to Ohio citizens. The tools that the optometrists are presently using are not dangerous and are effective in screening for eye disease."

He went on to point out that S.B. 163 "would allow optometrists to use drugs in order to make a full diagnosis of the medical condition of the eye. If the individuals involved were properly trained," the Governor said, "this procedure would be in the best interest of Ohio's citizens. However, without proper training, the bill would allow unwarranted risks without corresponding benefits. The drugs involved are dangerous and have the potential of causing a great deal of pain including blindness. The adverse reactions associated with these drugs are not common, but they do occur and emergency treatment must be administered in those instances."

Noting that he vetoed the bill despite the fact that it included a provision that would require optometrists to take 180 hours of mandatory training, Gov. Rhodes said, "This amounts to little more than a month of isolated training in a clinical use of the drugs involved."

Concluding his commentary, the Governor pointed out that the issue of using drugs was one that should not be decided by the legislature.

The veto in Ohio brings to 15 the number of states that have rejected optometric drug laws this year. In only two states, Kentucky and Wisconsin, were such laws passed in 1978.

WHY "THE PEN?"

The files of state and national medical associations, all learned societies concerned with the public health, overflow with a preponderance of evidence that the quality of health care is threatened by the precedent of Government encouraging the lowering of professional standards by allowing medical functions to practitioners with no medical education. Medicine accepts the responsibility to respond to epidemics. Death and trauma are resulting, and Doctors of Medicine can do no less than warn potential victims through the continuous presentation of this evidence. The public press of America, given the facts, is supporting this cause, and concerned physicians throughout the nation are pooling their knowledge and resources to package and present the truth through the PHYSICIANS EDUCATION NETWORK.

Medicine accepts the responsibility to respond to epidemics. Death and trauma are resulting, and Doctors of Medicine can do no less than warn potential victims through the continuous presentation of this evidence. The public press of America, given the facts, is supporting this cause, and concerned physicians throughout the nation are pooling their knowledge and resources to package and present the truth through the PHYSICIANS EDUCATION NETWORK.

THE PEN is a public newspaper, international in scope. Its readers include people from every walk of life. THE PEN is freestanding and independent of any national or state association, with the exception of its sponsor, Physicians Education Network, Inc. PEN, Inc. is a Florida non-profit corporation. Submissions to this newspaper are welcome and are published at the discretion of the editors. THE PEN does not accept paid advertising or paid subscriptions.

DR. ALLEN'S

DIAGNOSES

James H. Allen, M.D.: founding president, New Orleans Academy of Ophthalmology; professor of ophthalmology, Univ. of Iowa and Tulane Univ. for 30 years; Senior Surgeon, Tulane Univ.; awarded the prized Gold Medal of the Ophthalmology Section of AMA, 1976.

1979 — All Eyes On West Virginia

Prohibition — often referred to as "the noble experiment" — was repealed by government because it failed.

In the eyes of those West Virginia lawmakers who, in 1976, truly believed that to permit the use of drugs to optometrists would bring eye health care to more West Virginians, the optometric drug use law was a "noble experiment."

In the single remaining eye of Mrs. Dent, whose tragic deposition appears on page 3, the "noble experiment" of 1976 has failed. She is one of many human guinea pigs who have suffered and is among a vanguard of victims who will suffer as optometrists convince themselves that they are capable of diagnosing disease and providing treatment despite the total absence of medical education.

In the eyes of medical experts throughout the nation, the 1976 West Virginia optometric drug use law is a disaster. It is inconceivable that such a law can remain on the books when available evidence in 1978 has prompted lawmakers in 13 states, last year alone, to fail to pass similar, less dangerous optometric diagnostic drug use proposals.

In two more states, these proposals were lobbied through, only to be vetoed by conscientious governors. In the eyes of Governor James A. Rhodes of Ohio (see page 1), to allow Ohio optometrists the use of diagnostic agents "would allow unwarranted risk without corresponding benefits."

In the eyes of Governor John N. Dalton of Virginia, the eye health of Old Dominion residents was threatened by H.B. 205, a diagnostic drug use proposal less ominous than the extant West Virginia law. In his veto message of April 11, 1978, Governor Dalton said: "There is concern of legislative appointment of 'medical' responsibility and authority to non-medical personnel."

In the eyes of optometric leader Dean Henry B. Peters, O.D., of the School of Optometry at the University of Alabama in Birmingham, the reckless 1976 West Virginia law was the result of a "display of legislative machismo" on the part of overambitious optometrists. "The practice of medicine is an inappropriate goal for optometry" the Dean wrote, commenting on passage of the West Virginia law.

Dean Peters further stated, "Not one of our schools is prepared by either faculty resources or availability of clinical experiences to accept this challenge (treatment of eye disease at this time . . .); no such resources exist for 1,000 graduating optometrists this year nor are they in prospect."

In 1976, West Virginia lawmakers were told that modern optometric education made restrictions obsolete. In 1978, the six non-ophthalmic physicians who serve as the medical Advisory Board to the ultra-modern University of Alabama at Birmingham, where optometric education has high standards, took a close look at their curriculum. In their eyes, their own graduates, receiving the O.D. degree, are not qualified to treat disease or use drugs. Its October 18, 1978 resolution (confirming Dean Peters' conclusion about the inadequacy of optometric education) states in part:

"This education in no way prepares these graduates with the knowledge to prescribe or use drugs to treat eye disease. This training should not be viewed as a medical credential."

In 1976, optometrists argued that the new law would make eye care more available to rural residents. Rural residents know better than to take a horse to a blacksmith for colic, but unfortunately are unaware of the total absence of medical education in optometry.

In 1976, optometry promoted the conceptual myth of "primary care." We doubt that any thinking lawmaker would want his eye examined for disease by the least qualified. To place the optometrist in a position where he may overlook a fatal tumor is unfair to him as well as his patient, and to allow him to experiment with dangerous drugs will inevitably produce more unfortunate cases.

Mrs. Dent seeks repeal of the 1976 law. A growing Citizen's Committee seeks repeal. Medicine acknowledges its failure to present a coherent case in 1976, when confusion obfuscated the inherent danger to the public.

This is 1979. Since 1976, the motives of optometry to expand into medicine at the expense of the public health, by exploiting state legislatures have become apparent. Scores of legislative sessions have rejected these efforts, and West Virginia has the most dangerous law of all.

A mass of new incontrovertible evidence attesting to the danger of the 1976 law is ready for presentation. In the eyes of the presentors there is confidence that the 1979 West Virginia lawmakers will open their eyes and ears while taking a fresh look at eye health care.

M.D.s make mistakes. So do elected officials. To acknowledge them is statesmanlike.

The eyes of the nation are on West Virginia.

Misinformation Provided Magazine Readers

American housewives are warned that there is a dangerous paragraph of misinformation which appeared recently in national magazines. The advertisement promoted ignorance regarding the possibility of fatal malignancy in the eyes of children.

The advertisement, sponsored by the American Optometric Association, stated:

"On the other hand, if a child who is 18 months or younger momentarily turns one eye in or out, there is probably no cause for worry. At this stage of growth your child lacks what is referred to as internal organization. He just can't seem to make anything . . . hands, feet, legs . . . work together.

"In any of these cases, your family optometrist can diagnose problems or reassure you that your child is normal."

No cause to worry?

James H. Allen, M.D., former senior surgeon at Tulane University, worries about the complacency which may result from this advertisement reassurance.

"This ad is irresponsible," he said.

Dr. Allen advises, "A child begins to coordinate eye movements in the first six months of life but may occasionally turn one eye in or out up to 12 months of age. However, if there is a constant turning in or out of one eye even before one year of age or if there is intermittent turning in or out of one eye after 6 months to one year of age, the child should have a medical eye examination.

"There are several things that can interfere with the development of coordinated eye movements, the most dangerous thing being a malignant tumor of the retina of the eye — which must be diagnosed early if the child's life is to be saved.

"Other causes, although not likely to be fatal, could destroy much or all vision in one eye if not diagnosed and treated properly as early as possible.

"An optometrist is not trained adequately to diagnose diseases of the eye or disease affecting the body as a whole. Therefore, he cannot reassure parents that their child is normal. There are numerous recorded examples in which an optometrist failed to recognize or diagnose diseases or tumors of the eye with the result that vision was lost or the life of the patient lost." ●

OHIO GOVERNOR VETOES

Continued from page 1

Commenting on Governor Rhodes' veto message, Lawrence L. Young, M.D., President, Ohio Ophthalmological Society said, "All of medicine in Ohio is impressed with the thoroughness of the Governor's investigation which led to the veto of S.B. 163. He has correctly assessed the danger to the public and his message reflects his deep concern for the eye health of the citizens of our state."

To date, four state governors have carefully reviewed the pros and cons of optometric drug legislation and concluded that passage of such a law would endanger the health of their citizens. In each instance these chief executives have exercised the power of their veto to protect their constituents. ●

An Ophthalmologist is an

M.D.

an optometrist is not.

AN OPEN LETTER SEEKS REPEAL

W. Va. Eye Victim Deplores Optometric Care

A West Virginia supermarket cashier, who is blind in her left eye and who has a serious problem with her right eye, has made a public appeal through an open letter for repeal of West Virginia's optometric drug law.

In a signed deposition, Mrs. Laura Dent of South Charleston, WV, states, "If my optometrist had been qualified to diagnose and treat diseases of the eye, maybe this disease would have been caught in time and I could read with my left eye. The people who passed this law (West Virginia law permits optometrists to use drugs for diagnosis and treatment), should stop and think what they have done; apparently some of them have never had serious eye problems or they would have known better than to do such a thing."

Saying, "I am firmly against this law allowing optometrists to prescribe medications and treat diseases of the eye, because they are not qualified," Mrs. Dent emphasized she was not offering an opinion, but was speaking from experience. Mrs. Dent related that in May of 1975 she went to see an optometrist for a general eye examination. At that time, she points out, the optometrist prescribed new glasses and advised that there were no signs of glaucoma or any other diseases of the eye. Within two weeks, Mrs. Dent said, "I was seeing distorted. I phoned my optometrist and asked what could be the problem. I was told to come in and be checked. I went in and was told it was only astigmatism, to wear my glasses all the time, and the problem would be corrected.

"It did not improve, I continued to get worse. I phoned my optometrist back in three weeks and asked just how long it would take to improve, and also asked if my family doctor could help. I was told maybe so. I will phone him; go ahead and see him.

"I went straight to my family doctor; the optometrist did not phone him. My family doctor took one look at my eye and panicked. He said there was this tremendous deterioration in both eyes, he did not know what it was, but there definitely was a problem. He sent me straight to Dr. Rashid's office. Doctors Rashid and Toma (both ophthalmologists) checked my eyes and told me I had histoplasmosis (a disease caused by a parasitic fungus) and said it was presently active in my left eye. Since I had had numerous attacks in both eyes in the past, it was likely I had the disease all my life."

Mrs. Dent further relates that after six months of treatment, the condition did not improve and in September the laser was used to arrest the disease. She says, "It stopped the disease, but it did not save my vision. *Medical editor's footnote: irregular toxis is a chronic disease characterized by the inactive phases the lesions are easily seen. In the inactive phases, treatment is neither effective nor necessary. In the active phases, treatment is available and frequently helpful to retard or eliminate visual loss. Thus, the patient should be observed by a physician with an understanding of the disease process in order to minimize loss of visual function.* I have no central vision in my left eye; I have peripheral vision but I cannot read; I cannot watch TV or do any close work at all with my left eye." In June of 1978 Mrs. Dent suffered a repeat attack in her right eye. This time the laser was used and Mrs. Dent advises she "is in pretty good shape except for the fact that I have a small blind spot."

Noting that the diagnosis made by Doctors Rashid and Toma was confirmed by Dr. Finklestein at the Wilmer Eye Institute in Baltimore, Mrs. for my left eye and it could happen again at any time in the right eye."

Calling on the legislature to take action now, Mrs. Dent writes, "I wish you would reconsider and repeal this law because a lot of innocent people are going to suffer unknowingly and maybe even go blind because they are trusting an unqualified optometrist." ●

FOUNDER SALUTED BY AMA NEWS — PART III

Ochsner: "The Harder I Work, The Luckier I Get!"

The accomplishments of Alton Ochsner, M.D., PEN's International Advisory Board Chairman, are legend in the annals of American medicine. Terming PEN, "The most potent communications effort I have ever observed in medicine," Dr. Ochsner has said, "Ophthalmology — medicine's protectors of one of God's greatest gifts — eyesight — finds itself in the trenches, doing grim battle against a potential epidemic of ineptitude foisted on the American public by some legislators who have heard only the exaggerations and half truths of the optometric side of a non-argument."

Free-lance author Nancy Yanes Hoffman, in an article titled "Alton Ochsner: 82 and Still Going Strong," which appeared in the AMA Journal on August 25, 1978, Vol. 240, No. 8, has captured the essence of this man's greatness. PEN wishes to express its appreciation to Ms. Hoffman and to the JAMA for permission granted to present this material in a series of articles.

"Alton Ochsner: 82 and Still Going Strong," Conclusion:

Genial, optimistic, Alton Ochsner says that if he had his life to live over again, he would do nothing differently. Nevertheless, what was his greatest disappointment? Huey Long's dictatorship over Charity Hospital, Tulane's only teaching hospital, in Ochsner's early days in New Orleans. A boy wonder, at 31 appointed as Tulane's professor of surgery, Ochsner came south from Wisconsin, where he had been associate professor. "My family didn't arrive for six months, and I literally lived in the hospital. I slaved — and I loved it. I gave it

ALTON OCHSNER, M.D.
PEN'S International Advisory Board Chairman

everything I had, developed a good teaching program as I had promised Dean Bass I would. Everything was going along fine." He pauses, shaking his head, "But this was in Huey Long's heyday, and I didn't include Huey in my reckoning — nor a doctor's desire for revenge on me for refusing to appoint him (the doctor) to the hospital staff. He was incompetent." He shrugs. "And later, while I made rounds, a letter was stolen from the pocket of my coat while it was hanging in the doctor's room of the hospital."

The letter was from the Medical College of Virginia inviting Ochsner to be professor of surgery there. As chairman ex officio of Charity Hospital's board and harboring no love for Ochsner's probity, Huey Long presented the purloined letter as evidence of Ochsner's "disloyalty" to the hospital. "Then and there, that Saturday morning, I was kicked out of the hospital. For two years, I couldn't go near our only teaching hospital. I decided that I couldn't stay in Louisiana under those circumstances, that I would take a job at the University of Illinois. But C. Jeff Miller, Tulane's professor of gynecology and my mentor, dissuaded me."

How? "Dr. Miller said, 'You can't leave under fire. You've *got* to stick it out.' 'But, Dr. Jeff,' I protested, 'Look what's happened to me. I've given this place everything I have and see how they've responded.' Dr. Jeff was adamant. He wouldn't let me quit. Because of him, I stayed." The big Ochsner smile creases his remarkably unlined face: "Sticking it out was one of the best things that ever happened to me."

Despite a life he describes as blessed by "Presbyterian luck" (defined by Ochsner as, "If you do the right thing, no matter what happens, it will turn out for the best"), personal tragedy has been no stranger to Alton Ochsner. His first wife's long terminal illness and death was a devastating blow. In the early 1950s, he obtained some of the first Cutter polio vaccine, which he

Continued on page 4

OCHSNER *Continued from page 3*

administered to his grandchildren, as well as to many Ochsner pediatric patients. His daughter's eldest son contracted polio — possibly from the vaccine — and died. The intern who cared for the boy also got polio and both his legs remain paralyzed.

In those days, medicine had a few sharp peaks and lots of deep valleys. There were a few well-trained people, while the rest had almost no training at all. Today, medicine has progressed so that almost everyone is well-trained. By the late 1930s, New Orleans had lost its reputation as a major medical center.

"I saw that the city must do better medicine. And the only way to do this was through group practice. I had two ambitions: to build a medical referral center in the deep South that would give quality care reasonably, and to develop an institution that showed care and consideration — not only to the patient, but to the family." The Ochsner hospital maintains a Family Room, adjacent to the operating rooms and intensive care units, where families receive progress reports every half hour while a patient is in surgery and where coffee and doughnuts are dispensed.

"I went to five Tulane professors," Ochsner remembers. "Professors of otolaryngology, gynecology, orthopedics, and medicine. The surgeons were interested, but the medical man was not. This was in 1939, the end of the Depression. We had no money, only an idea. The banks wanted equity, not an idea. It looked as though we were going to have to give up." Alton Ochsner, however, doesn't give up easily; he persuaded Rudolph Hecht and the Hibernia Bank to finance that first Ochsner Clinic in an old building on Prytania Street.

Not every doctor was convinced that Ochsner's idea was a good one. On Good Friday in 1941, small leather pouches filled with thirty dimes were delivered to the five Ochsner Clinic founders' homes. Inside each pouch was an anonymous typewritten note: "To the Judases of the Orleans Medical Central. Ochsner argues: "We have helped the local physicians, raised the level of New Orleans medicine so that it is much higher than when we founded this place." ●

THE PEN FORUM

Editors' Note: Optometry's burning desire to invade the field of medicine was blatantly displayed when the Board of Regents of New York State, a non-medical, politically-appointed body responsible for directing the policy of higher education in New York, was persuaded to endorse optometric drug legislation.

It is unthinkable that political appointees, whose duties and responsibilities are not directly related to the issue, and who have never been informed by medicine as to the ramifications of the issue, should take such a position.

It would appear that the 15-member Board of Regents has been manipulated by optometry into taking a public political stance which will not only endanger the eye health of every New Yorker, but one which could cause that august body considerable, unnecessary embarrassment. Alden Haffner, O.D., an optometrist, is the State University of New York Vice Chancellor for Health Sciences.

Recognizing that legislators across the nation might well view this interference as an optometric credential, unless challenged, PEN has asked ophthalmologists nation-wide to express their views to all involved. Following are but a few excerpts from the flood of letters sent to the New York State Regents, the Chancellor and the State Commissioner of Education:

"The recent decision by the Board of Regents to support the use of drugs by optometrists ill-serves the public welfare as it reflects a lack of objectivity concerning this very important issue. The Board of Regents should be in the forefront of the battle to prevent non-medical measuring practitioners such as optometrists from becoming quasi-physicians by legislative fiat. Our educational system has numerous checks and balances to insure first that only the most highly qualified applicants are admitted to medical school; thereafter, rigorously scheduled curriculum and periodic exams further insures scholastic fitness. The proper application of textbook knowledge to actual clinical pathology continues for the ophthalmologist throughout one year of internship and three years of specialized residency training in the diseases and surgery of the eye. The back door approach to medical school — via legislative fiat — should be a concept flatly rejected by the Board of Regents. The medical education as I outlined above should remain as the prerequisite to the use of pharmacological agents in the eye — the taking of pharmacology courses in or out of optometry school is in no way a substitute. Any optometrist who desires to assume medical functions should apply to medical school and obtain the proper training."

Seymour R. Rosen, M.D.
Sunrise, Florida

"The most important objection to optometric use of drugs is that authorization to use drugs implies the ability to judge the information obtained from such use and use it to make a medical diagnosis. Just as the possession of a stethoscope does not make one a cardiologist, the use of drugs to dilate the pupil or numb the eye will not make the optometrist equivalent to a physician. Patients will, however, be misled into believing that the optometrist is in fact qualified to make medical judgments and serious errors in diagnosis with accompanying missed opportunities to save eyes and even lives will occur.

"One has only to observe the level of optometric care throughout the State to realize the crass commercialism of many of their establishments. A little over a year ago the New York Daily News published a series of articles highly critical of the quality of eye examinations and glasses provided by many optometrists. How can the Board of Regents approve a group, which is not as yet meeting the standards for which they are licensed, to take on responsibilities for which they are not qualified?"

J. S. Nauheim, M.D.
Merrick, New York

"The recent decision by the Board of Regents of the State of New York to support optometric drug use legislation is ill-advised and myopic. In taking this decision, the Regents are permitting a group (the optometrists) to legislate medical privileges rather than obtain the medical privileges by education as the physician has."

John B. Franklin, M.D.
Hartford, Connecticut

"It seems obvious that we cannot, at this time, compromise these standards. Your decision to support optometric drug laws is just such a compromise. It is the same as suggesting that chiropractors are as well qualified to practice medicine as are physicians. Even a school such as the University of Alabama in Birmingham, has recently defined the practice of optometry as a non-medical discipline. A resolution by the Physicians Advisory Board at the University of Alabama, states, 'This education in no way prepares these graduates with the knowledge to prescribe or use drugs to treat eye diseases'. I urge you, therefore, to reverse this decision and to serve the citizens of New York State by so doing."

William C. Frayer, M.D.
Philadelphia, Pennsylvania

"I am writing to protest the action of the Board of Regents of New York State endorsing optometric drug use. It is unthinkable that highly educated people could advocate the use of medications by untrained practitioners. Furthermore, the training of optometrists in diagnosing medical eye diseases is terribly inadequate so that misdiagnosis and delayed recognition of disease is a greater danger than the complications of the pharmaceutical agents. . . . Please reconsider this issue."

Thomas S. Harbin, Jr., M.D.
Atlanta, Georgia

The support given to the optometric drug bill must have been made without due consideration for the possible effects the legislation would have.

"Last year this legislation was voted down in fourteen other states whose legislators were given factual information concerning this issue. Most of the states which had passed the bill previously are now considering recall of the bill after documenting the serious harm done by optometrists using medication during their eye exams. It is unfortunate that in the states that passed the law the public had to suffer because of the inappropriate action of the legislators."

Daniel W. Pieroni, M.D.
Sheffield, Alabama

UNITED STATES PHYSICIANS EDUCATION NETWORK

Statement of Purpose

PEN exists solely to utilize its resources and combined influence to present, promote, and promulgate, through communication outward, and communication inward, these simple truths:

- The American people must be protected by placing and keeping health care in the hands of experts, whose abilities are established by having reached a standard level of medical education.
- The logical minimum level of education necessary for leadership to protect the public in shaping the optimum health care delivery quality standards in the United States is the degree of Doctor of Medicine or Osteopathy, earned at a school of medicine or osteopathy — at an accredited institution of higher learning.
- Government at every level should cooperate with medicine in establishing these health safety standards.

Membership in PEN is available to any law-abiding citizen who subscribes to these truths, and desires to be informed, as well as to participate in informing the public at large.

VIRGINIA VETO MESSAGE

Governor John N. Dalton: "There Is Concern"

Virginia Gov. John N. Dalton's courageous action in failing to sign House Bill 205 into law deserves high praise from both medicine and the citizens of the Commonwealth. Gov. Dalton has reaffirmed to his constituents and to the people of this nation that only through "education, not legislation," can a person become competent enough to use drugs on the human body.

The following is Gov. Dalton's comment after vetoing the bill:

"The bill defines what constitutes the practice of optometry; and defines requirements of persons who desire to be certified in the use of diagnostic pharmaceutical agents that they be examined in general and ocular pharmacology and in the use of approved topically applied diagnostic pharmaceutical agents. Although paramedics, physician assistants, and nurse practitioners may administer drugs in specific instances, this is done (a) under the supervision of a physician, and/or (b) under specifically developed protocols regulating such procedures. Given the rare, but devastating effects of adverse reaction following administration of diagnostic agents, there is reason for grave concern for patients' welfare where optometrists practice in isolation from medical backup. There is concern over public misunderstanding that complete medical care has been effected after having an optometric examination. Finally, *there is concern of legislative appointment of 'medical' responsibility and authority to non-medical personnel* prior to this matter being carefully studied as to its impact in the Commonwealth."

Honorable John N. Dalton . . .

63rd Governor of Virginia

Gov. John N. Dalton, the 63rd governor of Virginia, took office on Jan. 14, 1978. A graduate of the College of William and Mary, he received his J. D. degree from the Law School of the University of Virginia in 1957.

Following graduation from law school, Gov. Dalton practiced law in Radford, Va. and began his political career in 1965 when he was elected to the Va. House of Delegates. After being re-elected to this post three times, he ran successfully for the State Senate in 1972. In 1973, he was elected lieutenent governor.

A 33rd degree Mason and an Eagle Scout, Gov. Dalton is a past-president of the Moneton District of Boy Scouts and a member of the Blue Ridge Council of Boy Scouts.

Eight States Reject Optometric Drug Law Petitions In 1978

Gov. Dalton's veto marks the seventh 1978 rejection of optometry's attempts to utilize legislative "clout" to invade medicine at the expense of the public health. Other states refusing optometrists the right to use drugs this year are Georgia, Mississippi, Missouri, South Dakota, Maryland and Oklahoma. At presstime, an optometric drug bill in Nebraska was reported to have "died on the calendar," bringing the total to eight.

So far this year, only Wisconsin and Kentucky patients face eye damage as a consequence of new optometric drug laws. In Kentucky, the law was passed and signed despite charges of impropriety, plus a call for a veto by the *Louisville Times*.

Unfortunately, the public health remains imperiled in several states: Massachusetts, New York, Ohio, South Carolina, Alaska, Hawaii, Iowa, and Arizona, where "the jury is still out."

WHY "THE PEN?"

The files of state and national medical associations, all learned societies concerned with the public health, overflow with a preponderance of evidence that the quality of health care is threatened by the precedent of Government encouraging the lowering of professional standards by allowing medical functions to practitioners with no medical education. Medicine accepts the responsibility to respond to epidemics. Death and trauma are resulting, and Doctors of Medicine can do no less than warn potential victims through the continuous presentation of this evidence. The public press of America, given the facts, is supporting this cause, and concerned physicians throughout the nation are pooling their knowledge and resources to package and present the truth through the PHYSICIANS EDUCATION NETWORK.

DR. ALLEN'S

DIAGNOSES

James H. Allen, M.D.; founding president, New Orleans Academy of Ophthalmology; professor of ophthalmology, Univ. of Iowa and Tulane Univ. for 30 years; Senior Surgeon, Tulane Univ.; awarded the prized Gold Medal of the Ophthalmology Section of AMA, 1976.

Governor Dalton — We Know That Any Veto Takes Both Courage And Conviction!

Being the captain of a ship is a lonely job — and in Virginia, like all states, the ultimate decision rests with the Governor.

During the past few weeks, Gov. John N. Dalton has faced the challenge of difficult decision-making as to whether all bills passed by the 1978 Virginia Legislature should be signed into law.

The intensity of the public outcry in Virginia against non-medical optometrists being allowed to use dangerous drugs and eye drops in the practice of their profession must have made the decision as to whether to sign House Bill 205 most difficult.

In protecting the public of Virginia, Gov. Dalton did far more than simply refuse to sign the bill. He presented his own conclusions (see page one) utilizing new phraseology which convinces us that the Governor is dedicated to the welfare of all Virginians. Speaking out in support of his veto, Gov. Dalton revealed that he reached the same conclusion as 46 major metropolitan newspaper editors who studied what is actually a simple issue. He came to the conclusion that, "There is concern of legislative appointment of 'medical' responsibility and authority to non-medical personnel prior to this matter being carefully studied as to its impact on the Commonwealth."

The Governor's conclusion is simple logic. Medicine in Virginia, in the early days of the 1978 legislature, did fail to meet the challenge and provide adequate information for careful study. When it was apparent, however, that many legislators actually believed that the petition of optometry to use drugs and eye drops would in some way be of benefit, medicine rallied to the challenge.

Prior to medicine's challenge, optometry found conscientious, but uninformed (on this issue) legislators easy prey for half truths, exaggerations, and even prevarications.

When medicine rallied its forces, however, an interested delegate commented that "ophthalmologists suddenly came out of the woodwork." Indeed they did, and medicine is so proud of them.

Ordinarily, ophthalmologists stay behind the woodwork in order to concentrate on providing medical care to a steady stream of people with serious eye problems who need and deserve full attention, treatment and cure.

The political scene is unfamiliar to medical people, and it took M.D.s some time to realize that the woodwork must give way when the public health is threatened by the body politic and that they must respond as they would to an epidemic.

By the time the issue reached the Senate floor, it was obvious that medical truths had changed the minds of many of the legislators.

The Governor is right — the measure deserves more study. Make no mistake. Medicine in Virginia welcomes further study, and so does PEN. The Virginia assembly was generous in allotting time to advocates of "both sides" and so was the Governor.

While it is difficult for us in medicine to acknowledge that there are "two sides" to this issue, we know that a preponderance of evidence is on our side and we intend and welcome the opportunity to present it on behalf of the people anywhere in the United States.

Finally, if Gov. Dalton had rendered an opposite verdict, we would have concluded that he, too, ignored the facts so obvious to the press of America, and REPEAL bumper strips would have been on the way to Virginia. The people of the Old Dominion deserve no less than insistence on high quality health care, and both medicine and the Governor have demonstrated high resolve to preserve just that!

Massachusetts Wins Committee Victory

On Tuesday, March 28, 1978, the Massachusetts Senate by voice vote, accepted the recommendation of the Joint Health Committee that the optometric drug bill (Senate S 402) "ought not to pass."

Medicine throughout Massachusetts is saluting the Senators for their caution and awareness of the necessity of protecting the public health.

A Health Care Committee report is on the House calendar for debate. The bill, having been filed in both houses, requires that each act independently on the Health Care Committee report.

No action in the House has been reported.

BULLETIN AT PRESSTIME

An optometric drug bill in Nebraska "died on the calendar," according to PEN Advisory Board member John Ramsell, M.D. of Omaha. Nebraska becomes the eighth state to protect patients from this threat this year.

UNITED STATES PHYSICIANS EDUCATION NETWORK

Statement of Purpose

PEN exists solely to utilize its resources and combined influence to present, promote, and promulgate, through communication outward, and communication inward, these simple truths:

- The American people must be protected by placing and keeping health care in the hands of experts, whose abilities are established by having reached a standard level of medical education.
- The logical minimum level of education necessary for leadership to protect the public in shaping the optimum health care delivery quality standards in the United States is the degree of Doctor of Medicine or Osteopathy, earned at a school of medicine or osteopathy — at an accredited institution of higher learning.
- Government at every level should cooperate with medicine in establishing these health safety standards.

Membership in PEN is available to any law-abiding citizen who subscribes to these truths, and desires to be informed, as well as to participate in informing the public at large.

THE PEN is a public newspaper, international in scope. Its readers include people from every walk of life. THE PEN is freestanding and independent of any national or state association, with the exception of its sponsor, Physicians Education Network, Inc. PEN, Inc. is a Florida non-profit corporation. Submissions to this newspaper are welcome and are published at the discretion of the editors. THE PEN does not accept paid advertising or paid subscriptions.

WOULD YOU LIKE TO RECEIVE THE PEN?

THE PEN, to be published 24 times annually, is an international publication — unique in that subscriptions cannot be purchased. Non-medical persons may petition THE PEN for a complimentary subscription. Just tell us who you are and why you are interested. Medical doctors can become subscribers by joining PEN as a dues-paying member (see application elsewhere in this issue). Elected officials — state or national — and executives of health care agencies can become subscribers upon request.

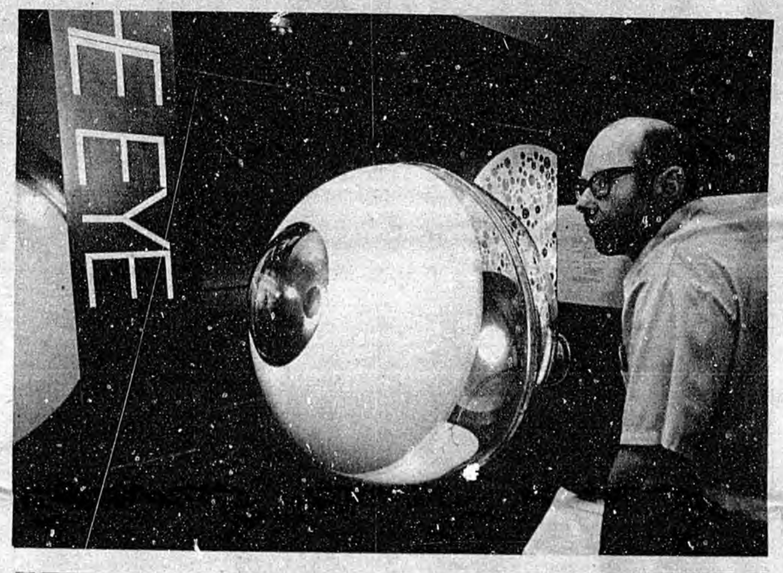
Industry Co-sponsors Portland Eye Exhibit

While medicine and ophthalmology concentrate on resisting the invasion of medicine at the expense of the public health, there are many painstaking efforts to provide education to encourage patients to protect themselves.

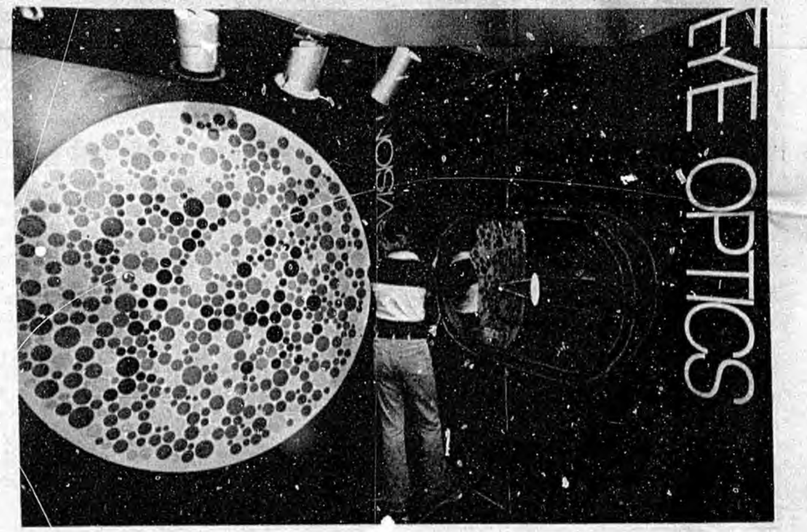
One such effort is a major new exhibit, the Sealy Ophthalmology exhibit, which opened Saturday, March 18, at the Oregon Museum of Science and Industry (OMSI), and promises to be a major tourist attraction this summer.

Funded by the Sealy Mattress Co., and enthusiastically supported by its president, Lloyd Rosenthal, the $30,000 display was co-sponsored by the Oregon Academy of Ophthalmology, which will be responsible for its annual maintenance costs. Under the leadership of OMSI's Exhibits Director Shabtay Levy more than a year of planning and construction has gone into the exciting display.

The focal point of the exhibit is a 3 ft. in diameter, stylized anatomical model of the human eye. The model demonstrates the anatomy and functions of the human eye, and also demonstrates some pathological disorders, such as cataract, glaucoma, retinal detachment and diabetes. The viewer can actually see how these diseases affect human vision.



By pushing buttons, the viewer is able to activate functional parts of the exhibit to show how the iris changes its size related to changing levels of light. Supporting exhibits include visual acuity, peripheral vision, color vision, depth perception and even one which shows the viewer the pupil of his own eye dilating and contracting as light values change.



Under Mr. Levy's direction, and in cooperation with expert ophthalmologists, the entire concept, design and construction of the exhibit was completed by the OMSI Exhibits staff.

The Oregon Academy has prepared educational pamphlets complementary to the exhibit which cover various phases of eye care, including the "major difference" between ophthalmologists and optometrists, and advice on seeking out an ophthalmologist.

Members of the Oregon Academy of Ophthalmology working closely with the Exhibits staff include Merritt Linn, M.D., Donald Plumb, M.D., Robert Burns, M.D. and John Wobig, M.D., all of Portland.

The Sealy Ophthalmology exhibit opening is expected to be of great interest to the casual visitor to OMSI, and will be of special value for school tours and other interested groups for whom more detailed lectures and demonstrations will be offered.

The current *"Book of Lists,"* a best seller, identifies PEANUTS, created by Charles Schulz, as the most popular cartoon strip in the world. At least creator Schulz, Lucy, Charlie Brown, Snoopy et al obviously know "The Major Difference," and hopefully, so do many of their readers. PEN is grateful to United Feature Syndicate, Inc. for permission to reprint this significant, educational, and as always, humorous, cartoon which has appeared in newspapers throughout the world.

MARYLAND DAILY NEWSPAPER ADVISES READERS

THE SUN

A 14 BALTIMORE, THURSDAY, MARCH 23, 1978

Optometrists and Drugs

Optometrists are trained in four-year schools to fit glasses, using various optical methods to determine the kinds of lenses patients need for correction of vision problems. *Opthalmologists* have had more sophisticated training. Like optometrists, they fit glasses. But because they are physicians who have specialized in opthalmology after completing medical school, they are prepared to do a great deal more. For instance, they can use and prescribe drugs, treat eye diseases and do eye surgery.

Under current Maryland law, optometrists are not allowed to use drugs in their practice. But a bill now in the Maryland Senate would give them that right in certain cases. Optometrists make superficially plausible arguments in favor of the bill, pointing out that, with amendments they support, it would allow them to use only four types of drugs, all ad[illegible] purposes, and that they would be required to take a minimum of 70 hours of training in pharmacology before they could use the drugs. They add that adverse side effects of the drugs are so rare as to be almost non-existent.

Unfortunately, say opthalmologists, the side effects are not all that rare. Allergies to the drugs might, in severe cases, result in death. Certain of the drugs can cause hallucinations, and others can result in detached retinas or acute glaucoma. Coping with these side effects requires the skills and equipment of a physician. A severe allergic shock reaction, for instance, might require adrenaline and cortisone injections which only a physician is qualified to administer. As the opthalmologists point out, 70 hours of training in pharmacology—as opposed to the 2,400 hours or more physicians receive—might not even qualify optometrists to recognize the side effects. The bill should be defeated them.

THE PEN FORUM

PEN has received more than 200 pieces of mail to Veterans Administration officials and congressmen from medical doctors concerning passage of Public Law 94-581, which gives measuring scientists with no medical training a primary health care role at VA hospitals throughout the country.

About 50 United States Senators and Representatives have responded to M.D.s' claims that raising optometrists to a primary health care level will jeopardize the public health.

The following letter to James H. Parker, Jr., M.D. of Wyomissing, Pa. from Rep. Gus Yatron is typical of letters from concerned congressmen received since the circular was signed Nov. 4, 1977:

Dear Dr. Parker:

Thank you for your recent letter expressing your continued interest and concern over the possibility of optometrists being allowed to take over part of the medical care of eye patients in the Veterans Administration.

Please be assured that I feel you have raised some valuable and serious points regarding such an action. Before such a proposal is approved, I feel that all possible questions pertaining to the adequacy of optometric education must be resolved. You can be certain that I will continue to scrutinize all of the implications and possible ramifications of this change, and that I will not endorse any action that could endanger the health of our nation's veterans. Additionally, I will not support any move to downgrade the quality of care offered in veterans' hospitals.

Sincerely,
Gus Yatron

Mail to: James H. Allen, M.D., 9104 Quince St.
New Orleans, LA 70118

PEN CHARTER MEMBER APPLICATION

This is my statement of intent to be an active member of the United States Physicians Education Network — I endorse and support the statement of purpose.

In providing my resources to guarantee the continuation of a strong and viable international entity I acknowledge and understand the following:

— That my membership in PEN will bring me a minimum of 48 mailings annually including 24 issues of a national publication as described, in keeping with the statement of purpose.

— That, as a Charter Member, I accept the responsibility of attempting to recruit members. I further understand that my state society will automatically be qualified for WATS line telephone consulting services and direct public relations advice and counseling, tailored to my state, as soon as either ten percent (10%) of the membership of my state society, or 20 members, (whichever is the least) are recruited.

I desire to inform and to be informed and to join this movement, and hereby pledge my support through dues, not to exceed $300 annually.*

— I understand that as a Charter Member, I will be issued a silver lapel emblem signifying my Charter status as soon as available after formation.

Date_____ 1978

Name_____

Address_____

City_____ State_____ Zip_____

Telephone: (Area)_____ Number_____

Ophthalmologist?_____ Other specialty_____

Profession, other than M.D.?_____

Check enclosed ($300)_____ Please bill me_____

* Charter Members (enrolled before July 1, 1978) will be awarded a dues decrease as of the second full year.

Visual and Medical

The Visual Part can be performed by an optometrist or an ophthalmologist.

The Medical Part can *only* be performed by a qualified medical doctor (an ophthalmologist).

When having your eyes examined you should know whether you are receiving a *complete* eye examination or only a part. When an optometrist (O.D.) examines a person's eyes he is qualified and licensed only to perform the visual part. He is not educated nor trained to perform the medical part.

When an ophthalmologist (M.D.) examines a patient's eyes, he performs both parts on an inter-related basis. He not only evaluates visual functions and performance, but also analyzes and diagnoses diseases and physiological disorders.

Ask the individual examining your eyes whether he is an O.D. (optometrist) or an M.D. (ophthalmologist). Only an ophthalmologist M.D. can perform a *complete* eye examination — both visual *and* medical.

While the Massachusetts Society of Eye Physicians and Surgeons (MSEPS) energetically resists attempts to endanger the eye health of Bay State citizens, the MSEPS also endeavors to educate the public to protect themselves. The centerfold of a small but potent folder being circulated by medicine in Massachusetts is reproduced above with permission of the Society.

DR. CURTIS M. JOHNSON
DR. D. R. SCHMIDT
OPTOMETRISTS

Dear Senator Hackney,

The attached bills, House Bill 79 and Senate Bill 75, are in committee and we expect them to be reported to the floor during the upcoming session. They provide for the use of certain diagnostic drugs by optometrists to aid them in detecting eye diseases. The drugs are instilled as eye drops. Optometrists are legally responsible for detecting eye diseases in the course of their examination.

The types of pharmaceutical agents and their uses are described briefly on the second attachment. These are not used routinely with every patient. They are used when needed to adequately examine the eye for pathology.

Doctors of optometry are well qualified to use drugs. The optometric curriculum includes courses in general and ocular pharmacology. These are circled in the attached curriculum of a typical optometry school. Pharmacology is the study of the mechanism of action of a drug, side effects, disposal by the body, etc. Any practitioner who graduated before pharmacology became a part of his school curriculum would be required to complete an appropriate course before being authorized by the licensing authority to use the drugs.

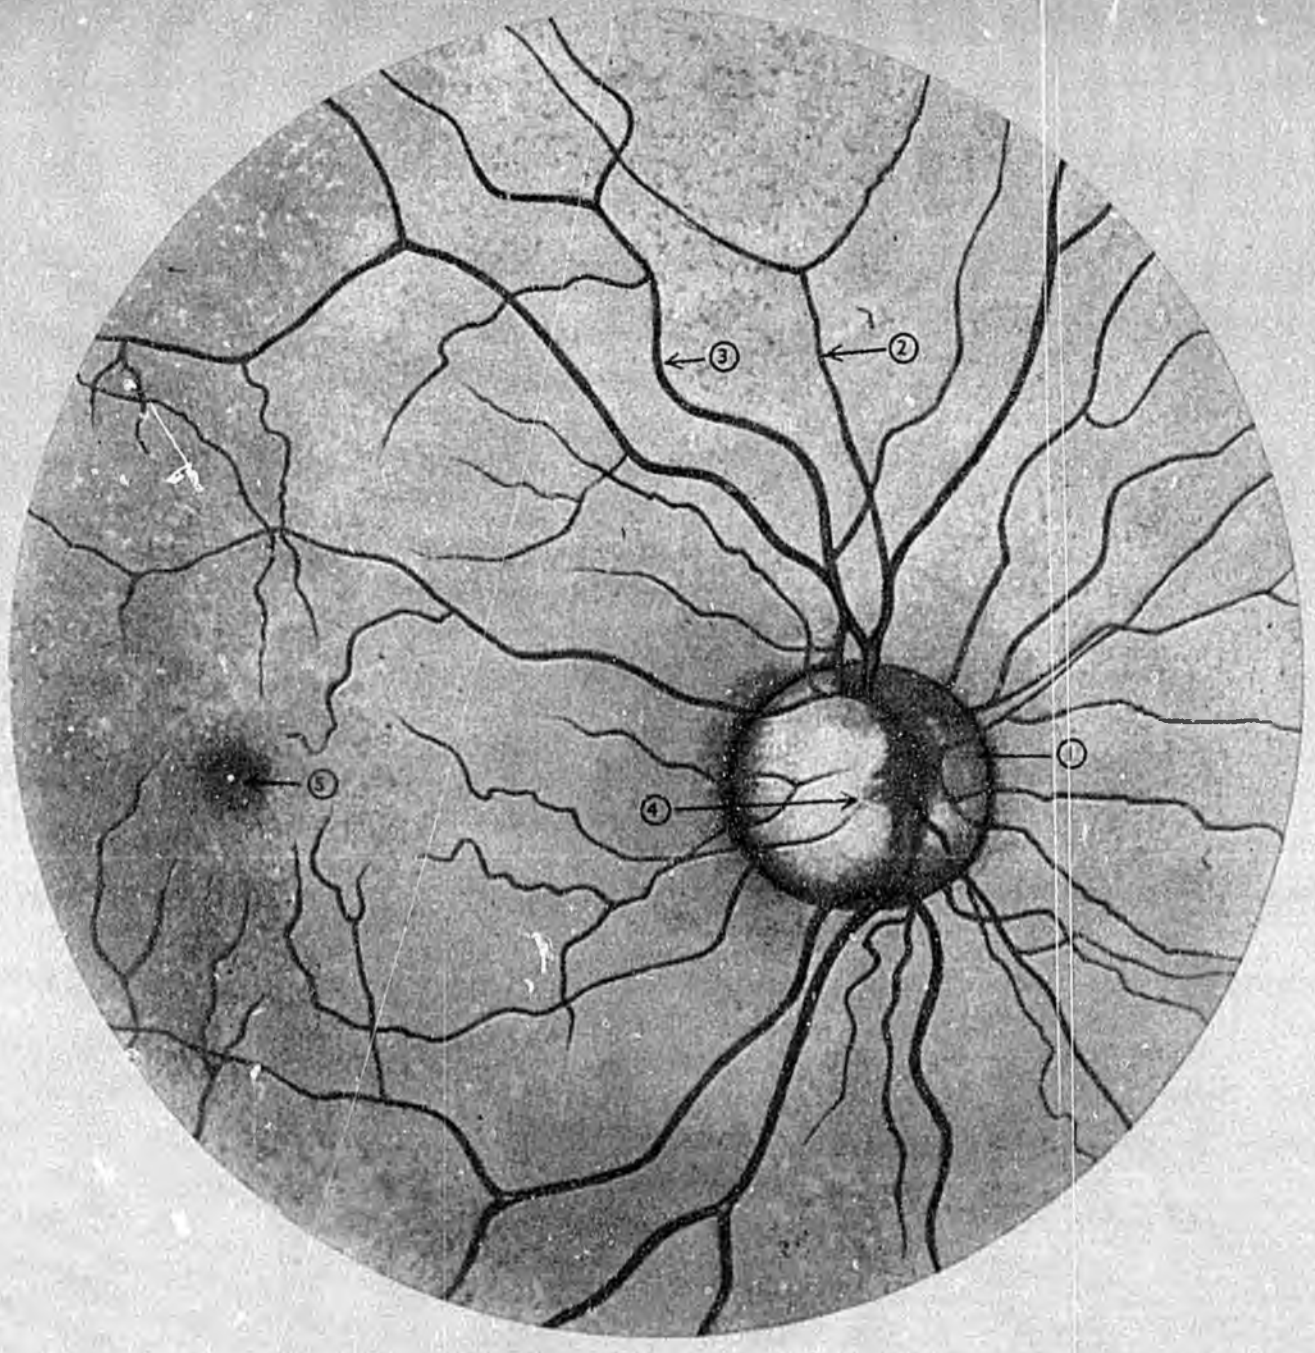
The fourth attachment shows the history of legislation pertaining to pharmaceuticals used by the profession. This is followed by a map showing those states that presently authorize the use of diagnostic pharmaceutical agents (DPAs) by optometrists. States show white, including Alaska, are those in which their use is not yet permitted.

It is in the interest of every member of the public to support this legislation. The professional man should be given all the appropriate tools of his trade. Therefore the Alaska Optometric Association endorses this bill, and we urge that you give it your support as well.

Very truly yours,

Curtis M. Johnson, O.D.

FUNDUS of the Human Eye



1 OPTIC DISC (NERVE HEAD)
2 ARTERY
3 VEIN
4 PHYSIOLOGICAL CUP
5 MACULA

Examination of the fundus with an ophthalmoscope allows us to see living blood vessels in their natural state.

The disc is examined for clarity of outline, color, shape, elevation above or below surrounding tissues.

Blood vessels are observed for condition, size ratio, tortuosity, regularity of caliber, exudates and hemorrhages.

Study of the fundus may reveal evidence of many systemic diseases as well as eye disease and abnormality.

DEFINITIONS

Mydriatics - this type of pharmaceutical agent dilates the pupil to provide an improved view of the retina. This is particularly useful in patients with small pupils or those who have central cataracts (opacifications in the lens of the eye).

Corneal anesthetics - these temporarily remove corneal sensitivity to allow special viewing instruments to be placed in contact with the cornea.

Cycloplegics - used to inactivate the nearpoint focusing mechanism of the eye. This provides a better estimate of the required correcting lens power in certain cases, such as some farsighted individuals.

Miotics - these constrict the pupil and lower the fluid pressure in the eye in the rare cases where the pressure is raised abnormally by the mydriatic.

COURSE DESCRIPTIONS

ANATOMY (ANAT.)
BIOCHEMISTRY (BYC.)
MICROBIOLOGY (MIC.)
OPTOMETRY (OPT.)
PATHOLOGY (PAT.)
PHARMACOLOGY (PHR.)
PHYSIOLOGICAL OPTICS (P.O.)
PHYSIOLOGY AND BIOPHYSICS (PHY.)

PROFESSIONAL CURRICULUM

First Professional Year

FALL QUARTER

P.O. Visual Optics I.—Principles of geometrical optics as it applies to thin and thick lens systems, mirrors and prisms. Introduction to lens aberrations and methods of minimizing their effects. 3 hours lecture, 2 hours laboratory. (Rosenblum)

ANAT. Gross Human Anatomy.—Structure of the human body with special emphasis on anatomy of the head and neck. Anatomy of the orbit and adjacent structures; the cranial nerves associated with vision and their cortical connections. Blood supply to the eye and orbit; embryology of the eye. 4 hours lecture, 12 hours laboratory. (Lin)

OPT. Optometry and Health Care.—Introduction to concepts in health care, and health care professions, the profession of optometry, its history, education and health service. 2 hours lecture. (Eskridge)

P.O. Comparative Neurobiology of Vision.—Considerations of the physiological and anatomical mechanisms underlying behavioral responses to light and an introduction to visual science. 2 hours lecture. (Christensen)

OPT. Epidemiology and Public Health.—Introduction to principles and methods of epidemiology as they relate to visual and systemic health problems.

WINTER QUARTER

P.O. Visual Optics II.—Optics of the eye including refractive errors and retinal image size. Measurement and specification of visual stimuli including radiometry, photometry, and colorimetry. 3 hours lecture, 2 hours laboratory. (Christensen)

ANAT. Neuroanatomy.—Gross and microscopic anatomy of the human central nervous system. 3 hours lecture, 4 hours laboratory. (Lin)

OPT. Clinical Orientation.—Preview of some of the problems encountered in the clinical practice of optometry. Discussion of some of the elementary techniques used in examination of the human visual system along with clinic observation. 2 hours lecture and demonstration. (Eskridge)

HIST. Histology.—Microscopic structure of body tissues and organs as a basis for understanding function and as a background for studying abnormal structure.

Laboratory exercises to develop the student's ability in independent observation of microscopic detail. 3 hours lecture, 6 hours laboratory. (Mayne)

ANAT. Anatomy of the Eye.—Detailed macroscopic, and light and electron microscopic study of the eyeball, optic nerve, and visual pathways. Embryology of the eye. 3 hours lecture, 3 hours laboratory. (Hickey)

SPRING QUARTER

P.O. Visual Optics III.—Principles of physical optics including diffraction, interference, polarization, reflections, scatter, birefringence and holography. 4 hours lecture, 2 hours laboratory. (Rosenblum)

BYC. Introductory Biochemistry.—Introduction to biochemistry with emphasis on visual pigments and other ocular substances. 3 hours lecture. (McKibbin)

PHY. Mammalian Physiology.—Function of the body's major organ systems. Physiology of central, peripheral, and autonomic nervous systems, cardiovascular, respiratory, endocrine, digestive, and reproductive systems. 3 hours lecture, 3 hours laboratory. (Shoemaker and staff)

P.O. Visual Psychophysics and Physiology I.—Psychophysical methods. Absolute sensitivity of the visual system, light and dark adaptation. Visual photochemistry and retinal current generation. Color vision. Spatial and temporal factors in vision. Motion perception. Acuity. 5 hours lecture, 2 hours laboratory. (Greenspon, Christensen)

OPT. Introduction to Clinical Practice.—Continuation of Clinical Orientation I. 1 hour. (Eskridge)

Second Professional Year

FALL QUARTER

OPT. Clinical Examination of the Visual System I.—Procedures used for examination of the human visual system. Detailed use of direct and indirect ophthalmoscope, tonometer, biomicroscope and perimeter. 4 hours lecture, 6 hours laboratory. (Amos and Setzer)

P.O. Eye Movement Mechanisms.—Descriptive aspects of eye movement and their control mechanisms. Physiological and anatomical characteristics of the extraocular muscles and eye movements, accommodation and pupillary responses. 4 hours lecture, 2 hours laboratory. (Christenson and Wilson)

OPT. Ophthalmic Materials I.—History of ophthalmic materials, physical characteristics, lens power, ophthalmic prisms, multifocal lenses, lens specification, inspection, verification. 2 hours lecture, 3 hours laboratory. (Wild, Peters and A. Pierce)

P.O. Visual Psychophysics and Physiology II.—Features detection in the visual nervous system. Visual development and deprivation studies. Electrophysiological measures of vision function. 3 hours lecture and demonstration. (Greenspon and staff)

MIC. Microbiology.—Introduction to bacteriology, virology, and immunology and their application to the ocular system. 5 hours lecture, 2 hours laboratory. (Cassell and staff)

WINTER QUARTER

OPT. Clinical Examination of the Visual System II.—Optical and biological variables determining the refractive state of the eye. Subjective and objective methods of measurement and methods of correcting refractive anomalies; skiametry, keratometry, visual acuity, subjective refraction, amplitude of accomodation. 4 hours lecture, 6 hours laboratory. (Amos and Setzer)

P.O. Normal Binocular Vision.—Characteristics of normal vision with two eyes. Binocular correspondence, disparity detection, stereopsis, and integration of binocular stimulation. 4 hours lecture, 2 hours laboratory. (Staff)

OPT. Ophthalmic Materials II.—Lens aberrations, performance controlled lenses, transmission, reflection, special lenses, physical characteristics of frames, fitting and adjusting. 2 hours lecture, 3 hours laboratory. (Wild, Peters and A. Pierce)

P.O. Vegetative Physiology of the Eye.—Physiology of tears, cornea, intraocular fluids and lens. Intraocular pressure and mechanisms for its control. 4 hours lecture, 5 four hour laboratories. (Wilson)

SPRING QUARTER

OPT. Clinical Examination of the Visual System III.—Clinical examination and evaluation of oculomotor systems, binocular functions, and color vision. 4 hours lecture, 6 hours laboratory. (Amos and Setzer)

OPT. Diagnosis and Treatment of Anomalies of Binocular Vision I.—Diagnosis and treatment of amblyopia, strabismus, suppression, anomalous correspondence. 4 hours lecture, 2 hours laboratory. (Staff)

OPT. Ophthalmic Materials III.—Optics of eikonic lenses, low vision aids, contact lenses. Design, fabrication, verification, and modification of contact lenses. 2 hours lecture, 3 hours laboratory. (Norden and A. Pierce)

P.O. Visual Perception.—Perception as a constructive act. Attention. Role of vision in perception. Perceptual plasticity and adaptation. 4 hours lecture, 2 hours laboratory. (Greenspon)

OPT. Applied Behavioral Science.—Interpersonal relationships and communication, patient, professional and community. 2 hours lecture. (Wechsler)

Third Professional Year

SUMMER QUARTER

OPT. Clinical Practice of Optometry I.—Examination, diagnosis, treatment, and follow-up care for selected clinic patients. 16 hours clinic. (Optometry faculty)

OPT. Clinical Colloquia.—Consideration of special testing and diagnostic techniques used in optometric practice case reports. 2 hours seminar. (Eskridge)

FALL QUARTER

OPT. Clinical Practice of Optometry II.—Theory and practice of optometric clinical care of patients: prescribing of optical aids and ophthalmic dispensing. 8 hours clinic. (Optometry faculty)

OPT. Clinical Ocular Disease I.—Consideration of the symptomology and signs of ocular disease and ocular manifestations of systemic disease. 2 hours lecture. (Keller)

OPT. Diagnosis and Treatment of Anomalies of Binocular Vision II.—Diagnosis and treatment of oculomotor problems. 3 hours lecture, 2 hours laboratory. (Mohindra and Sawyer)

OPT. Advanced Clinical Topics I.—2 hours lecture, 2 hours laboratory. (Alexander and Norden)

PAT. Systemic Pathology.—General pathologic processes and diseases of the major organ systems. 4 hours lecture, 4 hours laboratory. (Hartley)

OPT. Pediatric Optometry.—Pediatric epidemiology. Considerations of examination, diagnosis, and treatment of vision problems of children. 2 hours lecture. (Mohindra)

WINTER QUARTER

OPT. Clinical Practice of Optometry III.—Continuation of Clinical Practice of Optometry II. 8 hours clinic. (Optometry faculty)

OPT. Clinical Ocular Disease II.—Continuation of Clinical Ocular Disease I with emphasis on the systematic study and classification of ocular diseases, and their ophthalmological management. 2 hours lecture. (Keller)

OPT. Clinical Medicine for Optometrists.—Signs and symptoms of systemic diseases especially related to the eye and vision. 4 hours lecture and hospital rounds. (Schnaper and staff)

OPT. Advanced Clinical Topics II.—2 hours lecture, 2 hours laboratory. (Alexander and Norden)

OPT. Contact Lenses I.—Historical development, physical and optical properties of contact lenses and their adaptation to the human eye, with emphasis on anatomical and physiological implications. 3 hours lecture, 4 hours laboratory. (Leach and Wechsler)

OPT. Developmental Aspects of Visual Performance.—Evaluation and care of patients with visual performance problems. Role of developmental and learning disorders in such problems. 2 hours lecture and 5 two hour laboratories. (J. Pierce and Schuller)

OPT. Aniseikonia.—Theory, diagnostic techniques and treatment of aniseikonic patients. Emphasis on use of eikonic lenses. 1 hour lecture, 3 two hour laboratories. (Eskridge)

SPRING QUARTER

OPT. Clinical Practice of Optometry IV.—Continuation of Clinical Practice of Optometry III. 8 hours clinic. (Optometry faculty)

OPT. Clinical Ocular Disease III.—Continuation of Ocular Disease II.—2 hours lecture. (Keller)

OPT. Low Vision.—Examination and care of partially sighted patients. 2 hours lecture, 2 hours laboratory. (Nowakowski)

OPT. Advanced Clinical Topics III.—2 hours lecture, 2 hours laboratory. (Alexander and Norden)

PHR. Systemic Pharmacology.—Drugs and drug actions. Role of systemic drugs in diagnosis and therapy. Side effects of drug use. 3 hours lecture. (Teague and staff)

OPT. Contact Lenses II.—Continuation of Contact Lenses I. 4 hours lecture, 4 hours laboratory. (Leach and Wechsler)

OPT. Geriatric Optometry.—Geriatric epidemiology. Consideration of examination, diagnosis, and treatment of visual problems of geriatric patients. Special emphasis on management of pre- and post-aphakic, convalescent, and senile patients. 2 hours lecture. (Potter)

Fourth Professional Year

SUMMER QUARTER

OPT. Advanced Clinical Practice of Optometry I.—Optometric examination, diagnosis and treatment of patients in outpatient clinics of the Medical Center on a rotating internship basis. Service performed independently by student clinicians under supervision of the clinic staff. 16 hours clinic. (Optometry faculty)

OPT. Special Clinical Practice I.—Clinical practice in contact lenses, aniseikonia, special optical aids for partially sighted, strabismus diagnosis, vision training and orthoptics, developmental vision. Services performed independently by student clinicians under supervision of the clinic staff. 2 hours lecture, 12 hours clinic. (Optometry faculty)

OPT. Clinical Colloquia I.—2 hours seminar. (Keller)

FALL QUARTER

OPT. Advanced Clinical Practice of Optometry II.—Continuation of rotating internship program in general optometry clinic service. 16 hours clinic. (Optometry faculty)

OPT. Special Clinical Practice II.—Continuation of Special Clinical Practice I. 12 hours. (Optometry faculty)

OPT. Clinical Colloquia II.—Continuation of Clinical Colloquia I. 1 hour seminar. (Eskridge)

OPT. Community Aspects of Optometry I.—Legal development; governmental relationships; licensing procedures; reciprocity; malpractice; state boards, detailed study of the optometric laws of at least one state; representative organizations in optometry; professional ethics and codes of ethics. 1 hour lecture. (Wechsler)

OPT. Ocular Pharmacology I.—Characteristics of drugs producing miosis, mydriasis, cycloplegia, accommodative spasm and anaesthesia of ocular surfaces. Use and side effects of commonly used ophthalmic drugs. 2 hours lecture. (Chang)

OPT. Contact Lenses III.—Continuation of Contact Lenses II. 2 hours lecture. (Leach and Wechsler)

WINTER QUARTER

OPT. Advanced Clinical Practice of Optometry III.—Continuation of rotating internship program in general optometry clinic service. 16 hours clinic. (Optometry faculty)

OPT. Special Clinical Practice III.—Continuation of Special Clinical Practice II. 12 hours clinic. (Optometry faculty)

OPT. Clinical Colloquia III.—Continuation of Clinical Colloquia II. 1 hour seminar. (Eskridge)

OPT. Community Aspects of Optometry II.—Establishment and management of an optometric practice; economics, taxes, insurance, accounting methods, office design, mode of practice, practice administration, and patient relations, professional organizations and societies. 2 hours lecture. (Wechsler)

OPT. Ocular Pharmacology II.—Continuation of Ocular Pharmacology I. 2 hours lecture. (Chang)

SPRING QUARTER

OPT. Advanced Clinical Practice of Optometry IV.—Continuation of rotating internship program in general optometry clinic service. 16 hours clinic. (Optometry faculty)

OPT. Special Clinical Practice IV.—Continuation of Special Clinical Practice III. 12 hours. (Optometry faculty)

OPT. Clinical Colloquia IV.—Continuation of Clinical Colloquia III. 1 hour seminar. (Eskridge)

OPT. Special Topics in Optometry and Visual Science.—Independent or joint study in selected topics of clinical optometry or visual science. 2 hours lecture. (Staff)

OPT. Community Health.—Role of the optometrist in community health care. Local, state, and federal organizations involved in health care. Study of comprehensive health planning and new trends in health care delivery. Hospital organization. 2 hour lecture. (Newcomb)

Senator Glenn Hackney:

As a taxpayer and voter in the state of Alaska, and as an ophthalmologist, I feel I should express an opinion concerning House Bill No. 79 (Senate Bill No. 75). I wish to point out that I am not in a private practice, and I will derive no financial benefit from the outcome of this bill.

First, both in its derivation as a word and its meaning from any dictionary, optometry has always referred to the measurement of the visual function of the eye so as to prescribe corrective lenses. The diagnosis and treatment of eye disease has always been in the realm of ophthalmology. In this framework, I know of no eye medications that are necessary for the practice of optometry. Certainly "diagnostic drugs" has nothing to do with optometry, and would serve as a seemingly clever (but dishonest) disguise to further confuse an already confused public concerning who's who in eye care. If the optometrists argue that certain drugs are necessary to their practice, then one might wonder how they have been able to practice their specialty all these years without them.

I am a bit chagrined to see such petty bickering at a professional level over one's image and income take up legislative time. I hope you realize that at the core of this dispute is what constitutes the practice of medicine, and this is not just a quarrel among eye care professionals. Improvement of vision through corrective lenses is a satisfying accomplishment for so many patients. I do not understand why optometrists are unhappy with their present situation. For those who want to involve themselves with eye disease, a medical school education and ophthalmology training is always available as proper prerequisites. I have met two optometrist-ophthalmologists and know of several others, so this educational path is in fact available. Please give careful thought to the average Alaskan who you represent and the need for such a bill. I think you will agree that when special interests are set aside, you all should be spending your time on more important legislation.

Sincerely,

James E Cox

James E. Cox, M.D.

February 14, 1979

Senator Hackney,
Thanks for your help last year.
Bill

Senator Glenn Hackney
Chairman, Senate HESS Committee

Juneau, Alaska 99811

Dear Senator Hackney:

House Bill 79 (Senate Bill 75) relating to optometrists (nonphysicians) using medications has recently been introduced this session. I hope you can take a few moments from your busy schedule to read a brief summary of what I feel are important points as regards this legislation.

1. Optometrists are not physicians. No optometrist in Alaska has had any instruction in pharmacology or drug side effects from anyone with a Ph.D. or masters degree in pharmacology, no optometrist in Alaska has ever had any instruction in anything from a full-time M.D. on any optometric school staff, and no optometrist in Alaska has ever had any formal classroom or clinical training by an ophthalmologist (a physician with specialty training in eye disease and management).

2. Legislation, as presented, would let the Optometric Board evaluate the qualifications for drug use by optometrists. The Legislative Audit Performance Review of 11-1-78, noted:

   a. The state licensing examiner was asked not to attend the last examination given by the Optometric Board.

   b. The Audit Committee also found evidence of examination results being changed, regrading of examinations, and deletion of examination questions.

   c. The Audit Review was unable to find recent oral, written, or practical exam questions and answers.

   How can this Board, who has apparently compromised its integrity and responsibility given them by state statute but has also never had any experience in pharmacology, be expected to fairly pass on the qualifications of one of its own practitioners to use medicines in the eye.

3. The trend across the country is to defeat this sort of legislation. In 1977, this type of legislation was defeated in 17 states and passed in four; in 1978, it was defeated in 15 states and passed in two; and already in 1979, it has been defeated in one state and passed in none. This legislation is not beneficial to the public welfare, further confuses the consumer as to who he is entrusting the care of his eyes, and endangers the public at the hands of nonphysicians.

4. "Diagnostic drops" is a misnomer. The drugs don't diagnose - people diagnose. Dilating the eye is not a prerequisite to making a diagnosis of eye disease, dilating the eye is not a prerequisite to supplying children with the proper correction for glasses, and anesthetic drops are not a prerequisite for the diagnosis of glaucoma.

5. Optometrists (non-M.D.s) have no training in the management of side effects of these medications; e.g., myocardial infarction (there were seven cases of documented heart attacks due to these drugs in the United States in the past 12 months) or narrow angle glaucoma caused from dilating the eyes (there's an extremely high incidence of this condition in Alaskan natives).

6. Optometrists are not trained in the detection of pathology. An optometrist, currently a member of the Alaska Optometric Board, caused an eye to be lost in a four year old child because of his inability to recognize disease and refer the child in a timely fashion. Please find enclosed an issue of PEN newsletter which, in detail, describes Judge James Fitzgerald's findings in the Fourth Judicial District, U.S. District Court in the State of Alaska in October of 1978.

7. Let me suggest some appropriate amendments to this legislation if you feel it is in the public's best interest:

   a. There should be mandatory referral if the vision cannot be corrected to 20/20 in each eye in an adult or 20/30 in a child under eight years of age (this is a current law in England).

   b. There should be no "miotic drop" inclusions. No one considers miotic drops as a diagnostic drug.

   c. It would be appropriate to ensure the availability of malpractice insurance to optometrists to protect the public.

   d. There should be no grandfather clause.

   e. Any pharmacology or pathology testing should be done by the American Board of Ophthalmology. They are the most experienced group and the logical group to design such an examination.

   f. There should be mandatory referral, as per Dr. Alfred Lemoine who is often cited by optometry as an ophthalmologist in favor of diagnostic drug use by non-M.D. optometrists (see enclosure - 10 points in the history, 33 points in the clinical evaluation).

The regulation of the practice of the various professional and paraprofessional groups is not for the benefit of the licensee but for the benefit of the state and its people. No where does case law suggest that public protection will be qualified; i.e., that the risk may be increased a little bit but not a lot. The intent is protection and the language is explicit.

A disregard for excellence, as would result with passage of House Bill 79 (SB 75), as it is presented to you, will adversely affect the superior level of eye care currently offered to the citizens of Alaska. A little bit of this Bill is like a little bit of syphilis.

Thank you for the time you have taken.

Sincerely,

Sam A. McConkey, M.D.

SAM:ls

SUMMARY

Albert N. Lemoine, M. D., F.A.C.S.

There are ocular complaints obtained in the history and findings during an ocular examination that almost without exception are an indication for referral to an ophthalmologist for definitive diagnosis and therapy.

HISTORY

1. Rapid visual loss - over a period of minutes or hours.
2. Episodes of intermittent periods of reduced vision.
3. Sudden onset of "floating spots" in the field of vision.
4. Flashes of light in the visual field.
5. Defects in the field of vision, scotomas.
6. Distortion of objects or lines.
7. Rapid onset of visual haze with no specific complaint of decreased visual acuity.
8. Severe pain around the orbit or in the eye.
9. Prolonged severe pain in the occipital area.
10. Diplopia or visual confusion.

CLINICAL FINDINGS

1. Best corrected visual acuity 20/40 or less, unless they have had a prior diagnosis by an ophthalmologist.
2. Any patient whose refractive error changes one half a diopter or more, especially on the hyperopic side, within ninety days except for children with myopia.
3. Masses of the lids or adnexa either with or without inflammatory signs.
4. Defects in the lid margin.
5. Redness that is most marked in the 2 mm. zone adjacent to the cornea.
6. Any type of corneal clouding or infiltration either with or without congestion of the conjunctiva.
7. Cloudy anterior chamber.
8. Blood in the anterior chamber.
9. Small, poorly or nonreactive pupil.
10. Dilated, poorly or nonreactive pupil.
11. White pupil reflex.
12. Cataracts or lens opacities before the visual acuity is reduced to 20/40 or less.
13. Vitreous "floaters".
14. Blood in the vitreous.
15. Papilledema.

16. Optic atrophy, primary or secondary.
17. Larger or smaller than normal disc.
18. Abnormal disc cupping.
19. Dilated veins with or without retinal hemorrhage.
20. Narrowed arteries with or without retinal hemorrhage.
21. Any masses seen in the fundus, pigmented or nonpigmented.
22. Retinal hemorrhages, one or both eyes.
23. Pigment disturbance, either increase in pigment or decrease other than the dark fundus of the black race or lack of pigment in blond or albino patients.
24. Any areas of retinal elevation.
25. Retinal tears.
26. Presence of diplopia.
27. Nystagmus.
28. Scotoma.
29. Distortion of lines Amsler Grid or objects.
30. Any visual field defect other than blind spot.
31. Ptosis.
32. Intraocular tension of 22 or more on two or more occasions.
33. Exophthalmos, unilateral or bilateral.

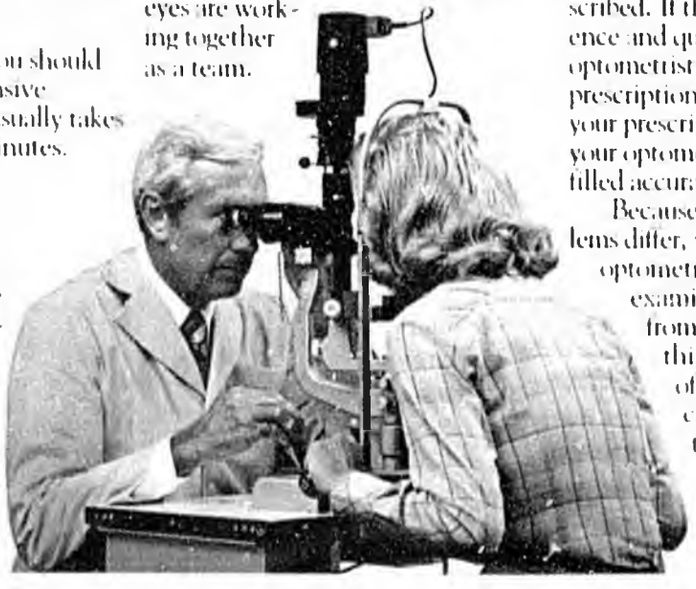
The logo of the American Optometric Association signifies, in simplest terms, a commitment to all the elements of a good vision examination and care. Doctors of optometry who are members of the American Optometric Association are concerned with far more than your eyes or fashionable glasses and frames.

In fact, an examination by an optometrist is also a good place to begin guarding your family's total health. Besides diagnosing vision problems and prescribing the lenses to correct them, an optometrist is qualified to detect eye diseases and abnormalities as well as health problems such as diabetes or high blood pressure. To become licensed to practice, today's optometrist must have a minimum of 2 to 3 years undergraduate education plus at least 4 years at a specialized college of optometry.

The doctors of optometry who are members of the American Optometric Association are totally committed to the ideal that every member of your family should receive the best vision care possible. And, for that reason, they want you to know what to look for in a thorough vision examination:

1 On your first visit, you should receive a comprehensive examination. This usually takes anywhere from 30 to 60 minutes.



2 Your health history should most likely be taken before the examination begins. Allergies, diseases such as diabetes and ailments such as high blood pressure can affect the results of vision tests. So can certain prescription and non-prescription drugs you may be taking.

3 The exterior of your eyes and the surrounding area should be inspected for eye disease.

4 Then the interior of your eyes should be examined for any signs of systemic or eye diseases. It is here that your optometrist can see blood vessels in their natural state and can therefore detect certain signs or symptoms of diabetes or hypertension. When signs or symptoms are discovered, you'll be referred to your family physician or a specialist if necessary.

5 Your vision should be tested to evaluate how well you see at near and far distances. At the same time, the refractive state of your eyes should be measured to determine nearsightedness, farsightedness, astigmatism or other visual problems.

6 Your eye coordination and eye muscle control should be examined to be certain your eyes are working together as a team.

7 Finally, the ability of your eyes to change focus easily from far to near and near to far should be measured.

Those are the basics. However, if you are over 35 or if a need is indicated, it's likely that you'll be given other special tests such as one for glaucoma. You may also be tested for color perception, depth perception, field of vision, visual/perceptual abilities and other vision skills.

When your optometrist has completed your examination and evaluated all the results, corrective lenses or vision therapy may be prescribed. If that's the case, for convenience and quality assurance, your optometrist can properly fill your prescription. Or, if you decide to take your prescription elsewhere, have your optometrist verify that it was filled accurately.

Because people's needs and problems differ, you may find that your optometrist approaches your examination with variations from this list. However, one thing that you may be sure of: members of the American Optometric Association are dedicated to the principle that you and your family should have the highest quality total vision care possible.

Your Family Doctor of Optometry. The person to see. And keep seeing.

VI. OPTOMETRY

Optometrists represent only a small proportion of all health practitioners, but they play a significant role in providing health services, mainly as the point of entry to the health care system for the provision of vision care services. Optometrists examine eyes for vision defects and other abnormal conditions, test depth and color perception, and when necessary prescribe lenses and treatment. As providers of primary health care, optometrists may refer patients for treatment of ocular and systemic diseases to ophthalmologists. Conversely, some of the vision services usually provided by optometrists may also be rendered by ophthalmologists.

From all indications, there appears to be a shortage of optometrists and other vision care practitioners in the United States. The number of optometrists has grown only slightly in recent years, and less growth is anticipated than in other health professions. Since a large number of optometrists graduated through the G.I. Bill and will likely be retiring in the next 10 to 15 years, the expected net addition of new practitioners in the field will have a somewhat smaller impact on total supply than in other health disciplines. However, by 1990 supply and requirements should be more or less in balance.

A number of issues and trends relate directly to the optometrist's role in the health care system and the provision of vision care services. A factor likely to affect the practice of optometry and provision of services is the increase in continuing education requirements as a pre-requisite to licensure renewal. Optometrists are increasingly being included in various health care programs, which should affect the overall provision of vision care and the requirements for their services. In organized health delivery settings more attention is being paid to quality assessment of vision care. Judgments about quality of care and practitioner proficiency are normally difficult, but optometry normally deals with readily visualized or measurable conditions and is more amenable to the comparision of practice to standards than are most health professions. Peer review may be used to measure and assure the quality of medical and optometric practice, but the role of optometrists in the review responsibilities of Professional Standards Review Organization has yet to be determined. Among other changes that will affect the profession is the increasingly widespread use of auxiliaries which will have an impact on provision of services and on the requirements for practitioners. New technological developments may also change the scope of practice.

A major issue that has surrounded optometry for many years, of course, is the relationship between optometry and ophthalmology. While some overlap in services, specifically refractive services, exists at present, there are specific unique roles in the provision of vision

care for both professions. Future interactions between the professions will impact on the provision of vision care services, on requirements for these services, and on training and education for both professions. These and other issues are important and developments must be monitored in order to evaluate the role of optometrists in the provision of vision care services.

Number and Characteristics of Optometrists

The number of active optometrists has increased only slightly in recent years, despite the impetus provided by recent Federal legislation. The number of new optometrists has only slightly exceeded the number of optometrists leaving the profession. In 1975, it is estimated that there were 19,900 active optometrists (civilian and military). Of these, approximately 19,200 were providing some form of patient care.

On the basis of limited historical data, the number of active civilian optometrists has increased only moderately in recent years, and has not kept up with population growth. Such increases in supply as have occurred are due to the rise in graduates from schools supported under the Health Professions Educational Assistance Act of 1963.

In view of the overall increase in the number of active civilian optometrists, the ratio of active optometrists to population has declined slightly, from 9.3 active civilian optometrists per 100,000 population in 1968 to 9.2 per 100,000 in 1973.

The effects of the G.I. Bill of the 1950's and the sudden increase in numbers of optometrists completing their education can still be seen today. One half of all optometrists are between 45 and 60 years of age. (Table A-VI-I) On the other hand, recent increases in supply are becoming increasingly evident, as nearly 20 percent of active optometrists are under age 35, and optometry is expected to become an increasingly younger group.

Relatively few women are in optometry, with the proportion of active female optometrists only slightly more than 2 percent. However, the population of females in schools of optometry now exceeds 10 percent, and the proportion of women is expected to rise somewhat in the coming years.

Overall numbers of minorities in optometry are also quite small, although the field appears to be unusually attractive for those of Japanese/Chinese descent (Table A-VI-2). Although only 480 active optometrists (2.5 percent of the total) in 1973 were members of racial/ethnic minority groups, fully three-fifths of this total were Japanese/Chinese. Intensive recruiting efforts have served recently to increase the number and proportion of minorities in the field.

Few optometrists work exclusively in activities other than patient care, and relatively few optometrists work part-time. If full-time is defined as working 30 or more hours a week, more than nine out of ten active optometrists worked on a full-time basis. Among the active optometrists, only a small proportion (3.5 percent) were engaged exclusively in non-patient care activities, generally consisting of teaching, research or administration.

Optometrists are usually self-employed. In 1973, the number and percent who were self-employed (Table A-VI-3), mostly in solo practice, was nearly 14,900 or 77 percent of all active optometrists. As with podiatrists and other health professionals, however, there is movement in optometry away from solo practice and toward partnerships or groups. (Table A-VI-4) In 1973, employed optometrists accounted for 3,600 or nearly 20 percent of active optometrists. Because of the costs of setting up a solo practice and the rapidly expanding nature of optometric practice, optometry graduates appear to be increasingly favoring associateship or partnership arrangements from among the available career alternatives.

Newly graduated optometrists also exhibit a far greater tendency than other optometrists to be employed rather than self-employed (Table VI-2). Although nearly 20 percent of all active optometrists were employed, this proportion varied from 50 percent of those under 30 years of age, to only 13 percent of those 50-59 years of age. Also, while less than 3 of 5 self-employed optometrists under 30 years of age were in solo practice, more than 4 of 5 self-employed optometrists over 40 were in this form of practice. A comparison of 1968 and 1973 data for principal form of employment shows a decline in the proportion who were self-employed and a corresponding increase in the proportion employed. While military service accounts for a large percent of those employed, a large number were employed by optometrists and other employers. This trend toward multiple practitioner arrangements and salaried employment may have implications for the characteristics of optometric clinical practice such as productivity, number and types of services offered by the practitioner, and even the geographic distribution of optometrists.

Developments in Licensure of Optometrists

The regulation of the practice of optometry has undergone a number of significant changes since 1973. The most pervasive has been the increase in continuing education requirements. Optometry appears to have one of the most major and significant continuing education programs of all the health professions. Beginning with Iowa in 1938, forty-two States have adopted some form of continuing education as a requirement to license renewal, although the nature of the requirements imposed by States vary considerably. Most States specify that credit may be given for optometric or other scientific education, lectures, symposiums, courses approved by the board for post-graduate study at a school of optometry, and courses given by the American

Optometric Association. Such programs are offered by over 100 organizations, making it easier for optometrists to update their credentials.

Geographic Distribution of Optometrists

On the basis of most measures of determining geographic unevenness of distribution of health manpower, it is generally recognized that optometrists are more evenly distributed than most other health professions. However, there continues to be disparity in the provision of optometric services to various areas of the country. This reflects the fact that the distribution of optometrists on a geographic basis needs to be linked directly to consideration of the distribution of ophthalmologists, many of whom provide some similar services. Although the distribution of optometrists is somewhat uneven, the distribution of ophthalmologists does little to alleviate the situation. A substantial proportion of the population in the United States has little or no access to the services of ophthalmologists.

Among the four geographic regions, the ratio of active optometrists to resident population varied from 6.9 per 100,000 in the South to 10.9 per 100,000 in the West, a difference of nearly 60 percent, (Table A-VI-5). Among the States, Illinois had the highest ratio, 14 per 100,000, while the lowest State, Alabama, had a ratio (5 per 100,000) only about one-third that of Illinois.

Although the same two States, California and New York, have the largest numbers of both ophthalmologists and optometrists in the Nation, there is no apparent correlation between the relative numbers of ophthalmologists and optometrists at least as related to population. On a regional basis, for both ophthalmologists and optometrists the Pacific States have the highest ratios of practitioners to population, while the lowest ratios for both disciplines occur in the East South Central States.

Nationally, there are 2 optometrists to 1 ophthalmologist and this ratio is approximated or exceeded in most States. However, notable exceptions exist. Only in Maryland and the District of Columbia, which also rank very high in relative numbers of all physicians, does the number of active ophthalmologists exceed the number of active optometrists. Although seven States--Maine, Rhode Island, Indiana, Illinois, North Dakota, South Dakota, and Nebraska--had more than three times as many optometrists as ophthalmologists, a number of other States had less than three optometrists for each two ophthalmologists. Thus, while some states are able to provide added vision services through ophthalmologists, others cannot. In addition the services of ophthalmologists are rendered primarily in large metropolitan areas, while the ratio of optometrists to population is about the same (9 per 100,000) in metropolitan as in non-metropolitan counties. Nevertheless, optometrists provide a greater proportion of total vision care in non-metropolitan and rural areas.

Although the ratio of optometrists to population is somewhat greater in counties in SMSA's over 1 million population than in counties in SMSA's of smaller size, their distribution still remains better than that of most health professionals. It is only in non-metropolitan counties that substantially lower than average ratios of optometrists to population exist. The percent of optometrists practicing in metropolitan areas is somewhat higher than the percent of the resident population, whereas the percent of ophthalmologists practicing in these areas substantially exceeds the percent of the resident population. In non-metropolitan areas this pattern is reversed, with the percent of persons residing in those areas being more than 2 1/2 times the percent of opthalmologists, and somewhat larger than the percent of optometrists.

An examination of persons-per-optometrist ratios for counties, often used to show geographic distribution, indicates large variation exists between the ratios. As a matter of fact, there are 840 counties (more than one fourth of all counties) that have no optometrists at all, and 552 counties (18 percent) that have a ratio of 15,000 or more residents per optometrist, far above the ratio recommended by the American Optometric Association of approximately 7,000 residents per optometrist, or 14.5 optometrists per 100,000 population.

Optometric Education

In the recent past, enrollments and subsequent graduates in schools of optometry peaked in the early 1950's, reaching their highest level until the early 1970's. (Table VI-1) In academic year 1951-2, the 10 schools of optometry enrolled 2,435 students and graduated 961 students. At that time, only 3 years of optometric school curriculum were required. During the decade of the 1950's, enrollments declined sharply, reaching the level of 1,101 students and 316 graduates in academic year 1960-61. Coincidental with the enactment and implementation of the Health Professional Educational Assistance Act of 1963, enrollment and graduates began to rise sharply. Total enrollment increased from 1,547 students in academic year 1964-65 to 3,909 students in academic year 1975-76, an increase of more than 150 percent. First-year enrollments during the same period rose more than 80 percent, from 593 to 1,078, (the larger increase in total enrollment was due to the increase in the number of years of professional education). The number of graduates rose by 140 percent, from 377 to 905 during the same period. Part of the increase in the number of graduates reflects the increase from 10 to 13 in the number of schools of optometry during this time.

In academic year 1976-77, the Nation's optometrists were being trained in 13 accredited schools and colleges of optometry. Regionally, the schools of optometry are relatively evenly distributed, although the Northeast, South, and West had three schools each, while the North Central States had four.

All of the 13 optometry schools have a 6-year curriculum which includes a minimum of 2 years of pre-optometry education at an accredited college plus 4 years of professional training at a school of optometry leading to a Doctor of Optometry degree (O.D.). In 1976, the 12 schools with 4 years of classes enrolled 1,078 first-year students and graduated 905 students. Nearly one-half of these students graduated from three schools: the Illinois, Pennsylvania and Southern Colleges of Optometry. The Pennsylvania College of Optometry produced the most graduates, 144; of the established schools, the Ohio State University College of Optometry graduated the fewest students, 52.

First-year enrollment in the 13 schools of Optometry totalled 1,078 students in academic year 1975-76 (Table VI-2). The Southern and Illinois Colleges of Optometry had the largest first-year enrollments, 152 and 151 students respectively.

In 1976, 72 or nearly 9 percent of the graduates were women. This number is expected to rise substantially in the upcoming years as more than 14 percent of the entering class in 1975-76 were female.

The location of the school of optometry is a prime factor in determining where the optometrist actually practices after graduation. More than four out of five optometrists under age 45 practice in States with schools of optometry, and are graduates from the school(s) within the State. The proportion of all active optometrists who graduated from schools within their State of practice is more than 92 percent in Illinois, 86 percent in Pennsylvania, 81 percent in California and 77 percent in Massachusetts (Tables A-VI-5 and A-VI-7).

Data from the 1973 inventory of optometrists show that schools of optometry make a varied contribution of optometrists to non-metropolitan areas. More than 2 of 5 graduates of two schools, the Southern College of Optometry and the Pacific University College of Optometry, practice in non-metropolitan areas. Three other schools have contributed nearly one-third of their graduates to these areas--Illinois, Houston, and Indiana. Together, these schools account for three out of four optometrists practicing in non-metropolitan areas. One school, the Illinois College of Optometry and its predecessors in Illinois, graduated approximately one-third of all active optometrists in the United States (Table A-VI-8).

Trends in Optometry Education

Optometry is one of several health professions that serves the public as a means of entry into the health care system. As such, the forces for change in the optometric curriculum are similar to those confronting the other health disciplines. Most notable among these forces is the rapid expansion of knowledge of the eyes, the expanding

scope of optometric practice, increased social awareness of the importance of proper eye care, student demands for improved curricular relevance, and the priorities of external funding sources. Since many disease entities have observable manifestations in the eye, the optometry curriculum is being broadened to improve the continuity of vision care for the patient, serving as a bridge between the medical and optometric professions. This is resulting in a trend toward primary vision health care in optometric practice.

The changes that are occurring in optometric education fall into two basic categories: content of curricula and location of training. Curricula content is being changed in many ways, including revisions to accommodate the addition of new knowledge and new areas of emphasis. Courses in human nutrition and in the behavioral and sociological aspects of health and disease are new areas of content and areas of increased emphasis, and added emphasis is being placed on the areas of low vision training, rehabilitative procedures, pediatric and geriatric optometry, as well as on training in community, environmental and public health. The most common areas of change are in training of students to detect pathological departure from the health of the eye, as well as the use of diagnostic drugs. The latter has necessitated increased curricular emphasis on general and ocular pharmacology. Congress recognized the need for change by a provision in PL 94-484 for grants and contracts for curriculum development in schools of optometry.

Other curricular trends are: earlier student contact with patients to improve the student's perception of the relevance of the basic sciences to clinical practice; elimination or modification of the "lock-step" curriculum to permit the student to progress more at his own pace; the greater use of modern educational technology such as the use of television and computer-assisted instruction; and the increased offering of electives to permit the student to pursue knowledge in areas of special interest. Remedial programs are also being offered with the objective of retaining students in academic difficulty in schools and reducing attrition rates in schools. As indicated earlier, continuing education has become a major activity of many schools, since a large majority of the States now require a demonstration of competency in order to obtain re-licensure for optometric practice.

Major changes have been made recently in the specific setting or location of training. Numerous instances exist where the student is receiving part of his instruction in external clinical settings such as preceptor offices, health maintenance organizations, community clinics and special optometric clinics established in underserved areas. These off-campus training sites have greatly facilitated the teaching of the utilization of optometric auxiliaries, demonstrated new services, provided health services, exposed students to rural and inner city practice possibilities and developed interdisciplinary learning opportunities.

Optometrists and Delivery of Care

The role of the optometrist as a provider of primary care has increased steadily in importance in recent years. The optometrist also has assumed a larger role in military settings, as well as in institutional care as typified by the presence of optometrists in Health Maintenance Organizations. In this setting, the optometrist may evaluate all patients who report any visual problems. In a number of States, optometry State laws have been redefined to reflect the recognition of optometrists as primary vision care providers. In these states, optometrists may ascertain the presence of disease or pathological conditions and refer the patient to the appropriate medical practitioner for further diagnosis and treatment.

In terms of the need for vision care services, both met and unmet, about half of the population who require some form of vision care services actually receive them. About nine out of ten of the patients who need vision care services require services which are within the present scope of optometry. Only about 10 percent of the population with vision care problems require medical treatment or surgery which must be provided by ophthalmologists, as shown by the 1960 NCHS Survey of Ophthalmologists.

In terms of actual services currently being provided, about two-thirds of the population, or 33 million people receiving vision or eye care receive such care from optometrists. About one-third or 17 million of the population seek and receive vision or eye care from ophthalmologists. As reports show, a substantial area of overlap of services exists in the provision of refractive services, and at least some proportion of the population that receives ophthalmological care could go to optometrists for this care.

The number of optometrists is increasing, and so is the number of patients each can see, (i.e. productivity). A major factor in this increased productivity on the part of optometrists is their rising use of auxiliaries. While only about one-third of active optometrists in 1973 utilized full-time auxiliaries, there appears to be a far greater tendency on the part of younger, newly graduated optometrists to utilize auxiliaries than optometrists in practice for a number of years. In part, this may reflect the training in optometry schools that emphasize utilization of auxiliary services in optometric practice. While data on specific services provided by chairside optometric auxiliaries does not exist, data from a 1973 survey suggest considerably greater productivity on the part of optometrists utilizing auxiliaries than optometrists without such services.

On the average, optometrists working in patient care activities on a full-time basis perform approximately 1,350 vision analyses (basic measure of productivity) a year, or about one vision analysis per hour for an optometrist working approximately 30 hours per week. Those optometrists utilizing full-time auxiliaries perform approximately

1,600 vision analyses annually, or nearly 20 percent more than the average of all active optometrists.

Optometrists in smaller metropolitan areas also appear to have far greater productivity (in terms of number of vision analyses) than do optometrists in larger metropolitan areas. This may be related to the availability of ophthalmological services in the larger metropolitan areas, in that some patients may utilize the services of an ophthalmologist instead of an optometrist. In non-metropolitan areas, on the other hand, the reverse pattern in productivity seems to be true. Optometrists in larger counties perform more vision analyses, on the average, than do their counterparts in smaller counties.

The Future Supply of Optometrists

The supply of optometrists is expected to rise sharply in the coming years. Several projections of the supply of active optometrists to 1990 are presented here under different assumptions as to graduate input over the projection period. 1/ The projection findings under each set of these different assumptions are described below and are summarized in Tables VI-3 and VI-4.

The basic determinant of the future supply of optometrists is very clearly the current and anticipated enrollment in optometry schools. As indicated earlier, optometry enrollments have grown rapidly since the early 1960's, with new Federal legislation providing much of the impetus for the recent increases. In terms of the projected supply of optometrists, the most realistic assumption is that schools will meet the capitation requirements set down by P.L. 94-484, that of increasing full-time first-year enrollments in the 1978-79 academic year in each school by 5 percent or 5 students over the 1976-77 enrollment, depending on the size of the 1976-77 first year class. No additional growth or enrollment per existing school or college is anticipated, although the basic projection series also assumes that one new school of optometry will open during the projection period--most likely a Southern regional school. The basic projection of the graduating classes of 1973-74 through 1989-90 then results in a total gross graduate input of 16,757 for that period. On this basis, the supply of active optometrists is expected to increase from 19,900 in 1975 to 22,000 in 1980 and to 26,700 in 1990. Thus, the number of active optometrists is expected to increase by about one-third between 1975 and 1990, or about 2 percent a year, slightly faster than the growth between 1970 and 1975. The ratio of active optometrists to population is projected to increase somewhat by 1990, reaching 10.9 per 100,000 population, as compared with 9.3 per 100,000 population in 1975. For the purposes of this report, the basic assumption is believed to provide the most realistic supply estimates.

1/ See Appendix (A-VI-8) for description of Methodology.

By way of contrast, if full-time first year enrollments should rise substantially beyond those mandated by the legislation and assumed in the basic projection series, the increases in active optometrists would be even larger. For this "high" projection series, an annual increase of 1 percent per year in enrollment per existing school above and beyond increases described in the basic series was used, and again it was assumed that only one new school would open in academic year 1981-82. In this estimate, the number of optometrists would be slightly higher than the basic estimate, or 27,100 by 1990, a ratio of 11.1 optometrists per 100,000 population.

On the other hand, if schools meet the requirements of P.L. 94-484 by providing for the specified proportion of full-time students to be comprised of residents of States in which there are no accredited schools of optometry and if no new schools of optometry open, then first-year enrollments would then be maintained at about the 1976-77 levels. Under this "low" estimate, the supply of optometrists would reach 26,100 by 1990, for a population ratio of 10.6 optometrists per 100,000 population.

Although the distribution of future graduates can not be projected with any degree of precision, current estimates are based upon the assumption that there will be little improvement in the geographic distribution of optometrists. The proportion of recent graduates from schools of optometry practicing in non-metropolitan areas is about the same or slightly lower for nine out of ten established optometry schools as compared to the proportion of total graduates practicing in these areas.

Requirements for Optometrists

Although it is difficult to determine the exact level of requirements for optometrists, it is likely that the projected supply of optometrists will be roughly in balance with the number of optometrists required.

There are several ways to measure requirements. One measure is the optimum ratio of 14.3 optometrists per 100,000 population utilized by the American Optometric Association. Such a ratio if applied to projected 1990 population would indicate a requirement for about 35,000 optometrists in that year, well above the anticipated supply. Another measure of requirements for optometrists might be to apply the best State ratio in 1975 as a standard to be met by all States. Such a standard would show a requirement for about 34,000 optometrists in 1990, again well above the anticipated supply of 26,700 active optometrists.
Thus, if these "need" related standards are applied, there would appear to be shortage of 7,000-8,000 optometrists projected for 1990.

On the other hand, the Supply Output and Requirements Model (SOAR) generates an increase in requirements for optometrists of nearly one-third in 1990 over current levels. These requirements for optometrists take into account recent trends in per capita utilization of optometric services, and are based on increased utilization of optometric services by the population during 1975 to 1990. Such levels of projected requirements for optometrists are about equal to the projected supply of optometrists in 1990. All things considered, the best judgement is that supply and requirements will be in balance by 1990.

Data and Analytical Needs

As indicated previously, 1973 data from the Optometric Manpower Resources Project supported by the Bureau of Health Manpower are the latest available data on optometrists.

However, more current data on optometrists are currently being collected in States participating in the Cooperative Health Statistics System, and also by means of the Bureau of Health Manpower Inventory. But data and standards are needed in the designation of health manpower shortage areas, and for health manpower analysis of data from small geographic areas. It would also be desirable to have another data point for trend analysis of optometric data. The only reliable data on optometrists are from the NCHS 1968 and 1973 surveys.

Optometrist Projection Methodology

Estimates of the number of active optometrists for 1975-90 were calculated utilizing the data from the 1973 Bureau of Health Manpower/American Optometric Association survey of optometrists as a base. It was assumed that the base reflected a point in time of December 31, 1973. Data on graduates of optometry for 1974 through 1976 were obtained from school reports on FY 76 Capitation Grant applications; the American Optometric Association provided estimates of first-year enrollments through 1975-76. Graduate projections to 1990 were computed from the number of first-year students reported 4 years earlier utilizing an attrition rate of 12 percent in both the basic methodology and the alternative supply projections in line with the most recent experience. Thus, 88 percent of entering optometry students are projected to graduate 4 years later. If a different attrition rate were used, of course, the graduate component would change somewhat, but the overall impact on the total supply estimates would be minor. Under the basic methodology, for example, if a 10

percent attrition rate were used, only about 300 additional graduates would be expected over the projection period. If a 15 percent attrition rate were used, about 500 fewer graduates of optometry schools would be expected over the projection period.

Separation rates used in the basic methodology and in the alternative approaches were derived from age specific death and retirement rates for white males developed by the National Center for Health Statistics, 1/ and the Bureau of Labor Statistics. 2/

There was no evidence to suggest that optometrists, on the average, tend to live longer than males in the general working population. For this reason age specific mortality rates developed by the Department of Labor were applied to the optometrist population.

In contrast to the mortality experience, however, information does exist that suggests variation in retirement patterns between optometrists and all working males. For example, in comparing total male labor force participation rates with age-specific proportions of optometrists that are active (1973 Survey data), it was found that, in general, a higher proportion of optometrists were "active" for each age group. Based on these findings, published age-specific retirement rates for all male workers were adjusted to better reflect the apparent experience indicated for optometrists. Over the projection period, use of the adjusted series reduced estimated requirements of optometrists 25 percent below that obtained by not undertaking such a modification.

1/ Death rates from abridged life tables--U.S., 1969-71, white male and white female rates (unpublished 5-year age groups).

2/ Retirement rates are for the general male and female labor force, 1970, as published in Bureau of Labor Statistics. Length of Working Life for Men and Women--1970, Monthly Labor Review, pp. 31-35, February 1976.

2/ Includes also Northern Illinois, Chicago (Monroe), and Needles.

CONCLUSIONS OF THE HRA STUDY

The following set of conclusions responds directly to the Congressional charge concerning whether it is appropriate overall to alter Part B reimbursement under Medicare for services provided by optometrists related to aphakic and cataract conditions. These conclusions have been derived by the Health Resources Administration from factual information, analytic findings, and professional judgments assembled during the Study.

1. Qualifications of optometrists. Optometry is a profession qualified to provide a broad range of services beyond refraction and the provision of eyeglasses. Furthermore, the services provided appear to be effective in patient management, including the management of aphakic and cataract patients. They are reasonable, non-experimental, safe, and generally acceptable to the vision/eye care community and the public.

2. Services related to aphakic and cataract conditions. Many of these services are the same as the specific diagnostic, therapeutic, and consultative services currently covered under Part B of Medicare when provided to pre- and post-surgery cataract patients by ophthalmologists or other doctors of medicine and osteopathy. (See Table 1, Part I Section I-B).

3. Detection and diagnosis of disease. Evidence presented during this study supports the conclusion that optometrists, in general, are qualified to provide services for the detection and preliminary diagnosis of ocular disease and ocular manifestation of systemic disease. Referral, where indicated, is made to ophthalmologists and other health care practitioners for definitive diagnosis and medical or surgical treatment.

4. Standards of Procedure. Clinical standards committees of professional associations have identified effective instrumentation and procedures that are available to and utilized by optometrists which are effective in the diagnosis/detection of disease, notwithstanding limitation by certain State jurisdictions regarding the use of topical drugs.

5. Quality Assurance. Quality assurance is attainable in the provision by optometrists of reasonable, safe, nonexperimental, and acceptable services to all patients including the Medicare eligible population. The development of criteria of care for diagnostic, therapeutic, and consultative services provided by optometrists, and similar to those existing for certain other health professional groups, does appear feasible in both organized and independent health care settings. Such criteria currently exist in a number of individual situations or are in various stages of development.

6. Access to services. Vision/eye care services for aphakic and cataract patients, as well as for patients more generally, can be made more accessible to the Medicare eligible population by providing reimbursement for services when provided by optometrists. In general, optometrists are more widely distributed geographically and practice in many smaller communities where other vision/eye care practitioners are not available.

7. Equity. Financial equity can be extended to those Medicare beneficiaries who currently obtain necessary and reasonable health services from optometrists but who do not currently receive the reimbursement to which they should be entitled.

8. Delivery patterns. It is reasonable to infer that inclusion of services under Medicare for aphakic patients when provided by optometrists would not significantly alter existing provider delivery patterns within the vision/eye care community. However, the impact upon such delivery patterns of the inclusion of services by optometrists for cataract patients, while likely to be small, is less clear.

9. Costs. It is reasonable to infer that the inclusion of services related to aphakic and cataract conditions when provided by optometrists would result in some added costs to the Medicare program. These added costs would be partly associated with Medicare enrollees currently served by optometrists without reimbursement, as well as those patients not now receiving care, who would do so as a result of the inclusion of such services under Medicare. Estimates suggest, however, that such added costs would not be significant in the context of overall Medicare costs for vision/eye care services and service benefits. (See the Study Summary, Part I, p. 28). This is viewed particularly so in the instance of extended reimbursement for services provided by optometrists to aphakic patients.

RECOMMENDATIONS AND ADDITIONAL CONSIDERATIONS OFFERED BY STUDY CONSULTANTS

In reviewing study materials, expert consultants to the study concluded that steps should be taken immediately to extend reimbursement under Part B for services provided by optometrists to both aphakic and cataract patients. It was their collective judgement that referral delivery patterns, costs, and administrative features of the program, would not be significantly affected if reimbursement of optometrists were extended to cataract, as well as aphakic, patients. Thus, study consultants recommended the following:

1. Based primarily on considerations of patient needs, qualifications of optometry to provide services effective in patient management, and increased access of Medicare beneficiaries to vision/eye care services, it is recommended that covered services related to aphakia when provided by optometrists be reimbursable under Part B of Title XVIII. This recommendation is presented in direct response to the requirements of Section 109 of the Social Security Amendments of 1975 (P.L. 94-182).

2. Based on the same considerations as indicated above, it is recommended that covered services related to cataract conditions, when provided by optometrists, be reimbursable under Part B of Title XVIII.

As is evident from the discussion above, the Department endorses the first recommendation. For reasons cited, however, Department endorsement of the second recommendation is viewed as inappropriate and premature at this time.

During the course of the study effort, a number of additional issues and concerns were identified by the expert consultants which, although important considerations, represent matters not directly responsive to the specific legislative charge as interpreted by the Department. These recommendations and comments, made unanimously by the consultants, are presented here to provide an opportunity to bring these matters to the attention of Department Agencies and the Congress. Because the following items go beyond the requirement of this report, the Department has not fully examined them and makes no recommendation at this time.

1. Refractive services for aphakic patients

Aphakic patients, specifically, should be considered as having special needs given their disabled condition. Refractive services for such patients represent non-routine and necessary services in the provision of prosthetic devices, i.e., lenses.

Study advisors recommend that consideration be given to extending coverage under Part B of Medicare to include refractive services for aphakic patients when provided by either ophthalmologists or optometrists.

2. Low vision services and aids

For those patients who have inoperable cataracts or have less than optimal results from cataract surgery, that is, those who have reduced visual acuity, low vision services and aids represent essential components of reasonable and necessary health care services for these patients.

Study advisors recommend that coverage under Part B of Medicare be extended to include the provision of appropriate low vision services and optical aids for the above-referenced patients, when provided by either ophthalmologists or optometrists.

3. Prevention, health maintenance, and health education

In the interests of health care cost advantages, effects on productivity, and the overall improvement of benefits that can be afforded our population, the expert consultants recommend that a more effective effort be made to improve preventive, health maintenance, and health education measures. While this is needed in all areas of health services, the vision/eye care field offers a particularly promising area for such approaches.

4. Other service provided by optometrists

Vision/eye care services currently covered by Part B of Medicare, when provided by ophthalmologists or other physicians, include eye conditions other than cataract and aphakia. Optometrists can provide appropriate services for some of these conditions. It is recommended that extension of reimbursement to include the services of optometrists for such appropriate conditions is a desirable subject for further consideration.

5. Administrative considerations

Also during the course of the study effort, expert advisors raised several concerns pertinent to the administration of the Medicare program. These issues, also applicable to other Medicare services, include the following: (a) inconsistent application of coverage and reimbursement policies by individual carriers, (b) the problem of payment duplication for services and reimbursement for similar diagnostic procedures when performed for specific individuals by more than one provider, and (c) need of improvement in coding and billing procedures for vision/eye care services.

6. Cooperative working relationships between vision/eye care professionals

It became clear during the course of this study that more effective working relationships between optometry and ophthalmology and other providers in the vision/eye care field would enhance patient care and result in improved services to individual patients. While improved interdisciplinary coordination applies to all the health disciplines and specialties, it is a problem of particular concern in the vision/eye care field. Such working relationships could be significantly strengthened by

a. Development of joint educational programs at the undergraduate and graduate levels, including rounds, clinics, conference, and meetings and publications.

b. Establishment of interdisciplinary clinics with optometrists and ophthalmologists working together.

c. Facilitation of referral of patients between the optometrist and the ophthalmologist when in the best interest of the patient.

d. Joint development of quality standards for service and materials by peer review mechanisms. By materials, particular reference should be assigned to varying quality of lenses and frames and the need for furnishing laboratory invoices of material costs for reimbursement.

e. Joint development of appropriate revision to State licensure laws to permit use of diagnostic drugs (mydriatics and local anesthetics) by optometrists.

While such joint endeavors are evident in various areas of the country, they need to be broadened and routinized.

Adopted by the American Optometric Association House of Delegates

A primary care optometrist is defined as the eyecare professional of first contact for the patient, makes the initial assessment and attempts to solve as many of the patient's problems as possible, coordinates the remainder of the health care team, includ ng ancillary personnel as well as c nsultants, that are necessary in dealing with the patient's problems; provides continued contact with the patient and often his/her family regarding eyecare needs; and is responsible for his/her eyecare.

PRACTICE LIMITED TO THE EYE

ROBERT N. PAGE, JR., M.D.

file SB 75

January 31, 1980

Senator Glenn Hackney
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

You will be considering HB 79 and Senate Bill 75. If passed, these bills would permit Optometry, a non-medical measuring science, the use of potentially dangerous prescription drugs. These drugs would be used for the diagnosis of disease, for the determination of the absence of disease and, in certain cases, in the treatment of disease.

Most of your constituents and Americans in general are unaware of the fact that Optometry is in no way a medical science. Optometry's national advertising ("Your Family Doctor of Optometry"), as well as their lobbying before this and other state legislatures, has been deceptive.

If this legislature grants the privilege of practicing medicine to this non-medical group by legislative fiat rather than by educational achievement, it will further compound this public deception.

There is amassed ample irrefutable evidence that this policy has caused great harm, unnecessary suffering, loss of vision and economic loss in the form of recovered damages. I enclose examples of such evidence.

I know you are burdened by many more important issues; few, however, have the potential of impacting as heavily and adversely on Alaskans' public safety from a health point of view.

Please consider these points and call on me at any time if I can help.

Sincerely,

Robert N. Page, M.D.

HOW DOES OPHTHALMOLOGY (M.D.) TRAINING COMPARE WITH OPTOMETRY (O.D.) TRAINING?

OPTOMETRIC EDUCATION DEFICIENCY DOCUMENTED

As prepared by John W. Gamel, M.D., University of Louisville School of Medicine

EDUCATIONAL BACKGROUND REQUIRED FOR DELIVERY OF EYE CARE:

Comparison between Optometry and Ophthalmology*

REQUIREMENT	OPTOMETRY	OPHTHALMOLOGY
Admission	2 years of college	4 years of college plus 4 years of medical school
Total Training after High School	6 years	12 years
Class and Laboratory time	1,650 hours	3,249 hours
Supervised Practice of General Medicine (Internal Medicine, General Surgery, Obstetrics-Gynecology, Psychiatry, Primary Care)	0 hours	3,240 hours
Supervised Practice of Medicine and Surgery of the Eye	0 hours	5,250 hours
TOTAL TRAINING HOURS	1,650 hours	11,739 hours
Number of years during which training occurred	4 years	7 years
Hours per year	412½ hours	1,677 hours

* Information abstracted from:

1. Course Handbook of Indiana University, Division of Optometry, 1975-76.
2. American Association of Medical Colleges Curriculum Directory, p. 86 87 (re: University of Louisville School of Medicine).
3. Residency Training Schedule, Department of Ophthalmology, University of Louisville.

(over)

Conclusion: An Ophthalmologist (M.D.) receives more hours of training each year of his rigorous program, than an optometrist (O.D.) receives in his entire four-year curriculum.

OPHTHALMOLOGY
11,739 HOURS

OPTOMETRY
1,650 HOURS

THE OPHTHALMOLOGIST (M.D.) HAS OVER 700% MORE HOURS!

John W. Gamel, M.D., Assistant Professor and Director, Pathology Laboratory and Medical Retinal Service, University of Louisville (Kentucky) School of Medicine has provided new, conclusive evidence that optometric education is "woefully inadequate" for these technicians to attempt to provide any medical eye services. The Gamel study reveals that the graduate ophthalmologist (M.D.) has received more hours in each year of his rigorous program than an optometrist receives in his entire four-year curriculum. Excluding any differences in content, the data shows the ophthalmologist (M.D.) has over twice as many hours of class and laboratory study as the optometrist. Furthermore, the ophthalmologist (M.D.) has infinitely more medical and surgical supervised experience in patient care than the optometrist. In total, the ophthalmologist (M.D.) has over 700% more hours of training than the graduate optometrist.

RESIDENCY TRAINING SCHEDULE, DEPARTMENT OF OPHTHALMOLOGY UNIVERSITY OF LOUISVILLE SCHOOL OF MEDICINE

Summary of Hours of Didactic Learning Offered During Residency:

Ongoing Lectures:

Monday, a.m.	1 hour
Tuesday, a.m.	1 hour
Thursday, a.m.	2 hours
Friday, a.m.	1 hour

U.S. Naval Medical Officers Expose Policy Which Threatens Quality Eye Care Throughout Military

Naval Regional Medical Center at Camp LeJeune, North Carolina

The military ophthalmologists at Camp LeJeune, N.C., have pinpointed "fear of retaliation" as the reason medical officers have not exposed the extent of unnecessary damage which has occurred in the armed forces as the result of allowing medical functions to non-medical optometrists.

Reporting that "primary eye care" performed by optometrists has caused irreversible eye damage and untold suffering for military personnel and their dependents around the world, Lieutenant Commander (LCDR) U.S. Naval Reserve (USNR) Gregory W. Cobb, M.D., Chief of Ophthalmology, Naval Regional Medical Center at Camp LeJeune, and Frederic D. Young, M.D., LCDR, USNR, an ophthalmologist at the same facility, have risked the wrath of the establishment and expressed their concerns directly to Representative Melvin Price, Chairman of the House Armed Services Committee, to Representative Butler Derrick of South Carolina, and to Vice Admiral W. P. Arentzen, Surgeon General of the Navy.

Upon hearing that Representative Price's committee had not received any complaints from active duty ophthalmologists on the matter of "extending

Continued on page 2

WHY "THE PEN?"

The files of state and national medical associations, all learned societies concerned with the public health, overflow with a preponderance of evidence that the quality of health care is threatened by the precedent of Government encouraging the lowering of professional standards by allowing medical functions to practitioners with no medical education. Medicine accepts the responsibility to respond to epidemics. Death and trauma are resulting, and Doctors of Medicine can do no less than warn potential victims through the continuous presentation of this evidence. The public press of America, given the facts, is supporting this cause, and concerned physicians throughout the nation are pooling their knowledge and resources to package and present the truth through the PHYSICIANS EDUCATION NETWORK.

Kentucky O.D. Overlooks Eye Cancer; M.D. Diagnosis Is Malignant Melanoma

Dr. Millett's History of the Case of Elvis R. Johnson — Summarized for Readers

- **April 16, 1979**

Mr. Elvis R. Johnson, formerly a Lexington, Kentucky house painter, was taken to the emergency room of the VA Medical Center, complaining of a dark spot on his left eye and decreased vision in the eye. Medical doctors immediately suspected a malignant melanoma which had spread beyond the eye itself — highly dangerous and potentially fatal.

- **April 23, 1979**

A complete metastatic work-up confirmed the suspicion of the malignancy and that it had spread beyond the eye but not throughout the body. The decision was made to perform an "orbital exenteration" — complete removal of the eye and all structures surrounding it. This operation leaves a deep, permanent disfiguring scar.

- **May 4, 1979**

The surgery was performed on May 4, 1979. Mr. Johnson is recovering nicely, and the malignancy has been removed. He is permanently disfigured. Microscopic examination of the specimen confirmed the pre-operative diagnosis and the need for drastic surgery.

Transcript of Tape-Recorded Interview

This is Adrienne J. Millett, M.D., staff ophthalmologist at the Veteran's Administration Medical Center in Lexington, Kentucky, and here with me today are Mr. Elvis R. Johnson, a patient of mine at the VA Hospital, and his son, Mr. Elvis L.

Continued on page 3

Misplaced Confidence — Tragic Hindsight

As the adjacent interview of patient Elvis R. Johnson and his son, Elvis L. Johnson, reveals, an impressive array of office equipment convinced the Johnsons, of Lexington, Kentucky, to place medical confidence in an optometrist.

A black spot in the eye (which was ultimately diagnosed by an M.D. as potentially fatal Malignant Melanoma) was dismissed as "nothing to worry about" over a year ago. The optometrist attempted to correct the situation with glasses and recommended frame adjustments — while the malignant tumor grew and spread.

Elvis R. Johnson is blind and disfigured — but happy to be alive. His son, who helped him to choose the well-equipped limited practitioner, is sadder but wiser — and knows the "major difference." The surgeon, Adrienne J. Millett, M.D., Assistant Professor, Department of Ophthalmology at the University of Kentucky's Albert B. Chandler Medical Center, performed the surgery, and conducted the interview for PEN. The Johnsons are anxious to share their story to protect others.

DR. ALLEN'S DIAGNOSES

James H. Allen, M.D.: founding president, New Orleans Academy of Ophthalmology; professor of ophthalmology, Univ. of Iowa and Tulane Univ. for 30 years; Senior Surgeon, Tulane Univ.; awarded the prized Gold Medal of the Ophthalmology Section of AMA, 1976.

On Selecting Adjectives for the Eye Care Crisis

Scandalous. Absurd. Courageous. Determined. Tragic.

These are powerful adjectives. The truth of the public danger from the invasion of medicine by non-medical practitioners, and reports of medical resistance to this threat, cannot be written without resorting to these strong words. The message we bring you in these pages each month contains strong words, for what is occurring throughout our nation, in both civilian and military eye health care, has been labeled a crisis by independent journalist V. H. Krulak — and to confront a crisis, weak words are impotent.

Consider the plight of Kentuckians Elvis R. Johnson and Elvis L. Johnson as detailed on page 1 of this issue, and decide if tragic is too strong a word. The father is blinded, the son is guilt-ridden, having been misled into believing that fancy equipment used by an optometrist could substitute for a medically trained mind. Kentucky legislators were similarly misled last year when optometrists were given the right to legally use dangerous drugs and eye drops.

Consider the reaction of Kentucky medical leaders in launching an uphill optometric drug law repeal campaign and decide if determined and even courageous are overstatements. It may take years, but the quality of eye health care in Kentucky is at stake, and courage is involved because the leaders of this effort will be vilified and boycotted from optometric referrals. The hole in Mr. Johnson's head, which could have been averted by appropriate referral, concerns them more than the financial benefits of optometric goodwill.

Speaking of courage, consider the action of Lieutenant Commanders Cobb and Young (see page 1) in lifting the lid on a scandalous military eye health care dilemma which threatens the precious gift of eyesight for military families everywhere. Following the lead of Colonel Appleton, they have put their military careers on the line by speaking out to preserve "the magic sense" for their patients. Is courageous an exaggeration in peacetime?

Ponder the absurdity of the petition of optometrist Maynard to the Arizona legislature (see page 3). In presenting a bill which would allow the practice of surgery to optometrists — the use of any device to treat the "abnormal conditions of the human eye or its adnexa" (adjacent parts) — he has proposed the exact equivalent of legalizing brain surgery by barbers. Is absurd too flamboyant? Determined also applies in this case — opportunist Maynard has mobilized Medicine under the leadership of the Arizona Ophthalmological Society legislative chairman, Thomas F. Moore, M.D., who is determinedly alerting all to the danger in the Grand Canyon state.

Eyesight to many is as precious as life itself. Thus, it is not possible to comment on action which recklessly risks blindness without resorting to superlatives.

If you feel that scandalous, absurd, courageous, determined, and tragic do not apply to the concerns raised in this issue, then try shocking, ridiculous, brave, dedicated, and oh, so sad — and tell a friend that entrusting eye health care to a limited practitioner is a very risky business.

JHA

MILITARY EYE CARE THREAT

Continued from page 1

the privileges of optometrists", the naval officers registered their protests loud and clear in letters dated August 17 and 24, 1979.

The letters, signed by both officers, pointed out that they served at Camp LeJeune as the "referral center" for five military optometrists (four Navy, one Air Force).

They told the Congressmen, "Hardly a week passes without our becoming aware of another example of the optometric mismanagement of ocular disease. We are continually astounded by the lack of understanding of basic ocular disease, its diagnosis and treatment revealed in the chart entries and consultation summaries from these young, supposedly well-trained optometrists."

Cases Provided

To illustrate their point, physicians Cobb and Young cited two sample cases of optometric mismanagement.

In the first instance, they reported that a dependent child was seen by an optometrist at the Naval Hospital at Cherry Point, N.C., in 1976 and 1977 at ages six and seven. On both occasions, it was noted that the child suffered from a high degree of farsightedness in both eyes, a turning inward (esotropia) of the left eye, and amblyopia (lazy eye) of the left eye.

At the later visit in 1977, the vision in the child's left eye was 20/80, poor compared to a normal vision of 20/20. Without determining the cause of the poor vision, the optometrist prescribed "circle exercises" with the right eye covered. The M.D.s noted that this was totally inadequate therapy for amblyopia. The parents had stated to the M.D.s that "no follow-up care" was provided and they were not advised of the urgency of aggressive treatment of amblyopia before the age of nine or ten, when visual maturity is reached and the condition becomes irreversible.

At age nine the same patient was seen by an optometrist at Cherry Point complaining of pain in the left eye. At this time vision had dropped to 20/100 and the esotropia was still present. This optometrist told the parents no facilities for treatment of the child's condition were available in the Navy; this, despite the fact that two ophthalmologists, to whom referrals were routinely made, were stationed at Camp LeJeune just 40 miles away.

COL. BUDD APPLETON, M.D.

Navy Eye Care Exposé Saluted By Former U.S. Army Eye Care Chief

Colonel Budd Appleton, M.D., the first senior military officer to speak out publicly against drug use by civilian opportunists, and a staunch advocate of medical supervision of optometrists in the military, resigned from the service in 1978 under heavy political pressure. The career military officer, who served as ophthalmology consultant to the Surgeon General, was given the choice of stepping down as consultant or remaining silent in public.

The Colonel, who had served the Army with distinction for 24 years, and who held the highest leadership position in ophthalmology in the army, had testified as a civilian at state legislative hearings in opposition to proposed optometric drug bills. Col. Appleton's testimony was widely sought to provide factual rebuttals to optometry's claims about the safety of military policy which permitted optometrists the use of drugs.

When asked to comment on the actions taken by Lieutenant Commanders Cobb and Young, Col. Appleton told PEN, "I admire the courage of these fine officers, and fervently hope that their efforts will serve to bring this matter into the public spotlight. I believe young military ophthalmologists should not be reluctant to cite instances of malpractice when they occur. It is my observation that most senior military medical officers, including hospital commanders, understand the issues, and the necessity for placing optometric care under medical supervision. In my opinion the only time the proper relationship is interrupted is when optometry interrupts it — through political pressure. It was my opposition to this kind of intervention that brought about my retirement."

Lt. Cdrs. Cobb and Young, in alleging that fear of retaliation was the reason military M.D.s had not exposed existing problems within the military, pointed to the experience of Col. Appleton. In their letter to Congressman Melvin Price, they stated, "In our opinion you have received no complaints from active duty ophthalmologists because the chain of command tends to suppress problems, keeping them at the local level, and there is real fear of retaliation for making waves such as that experienced by Col. Budd Appleton." ●

THE PEN is a public newspaper, international in scope. Its readers include people from every walk of life. THE PEN is freestanding and independent of any national or state association, with the exception of its sponsor, Physicians Education Network, Inc. PEN, Inc. is a Florida non-profit corporation. Happier days . . . Elvis R. Johnson, Kentucky victim of tragic optometric oversight

MALIGNANT MELANOMA

Continued from page 1

Johnson, both from Lexington. Mr. Johnson has been employed most recently as a painter.

Dr. Millett: Mr. Johnson, can you tell us when you were last employed?

Patient Johnson: Well, I went to work and lasted until what was the Friday before the 16th. I don't remember the month. But I was laid off because I couldn't see well enough to do the job. Then I came into the VA Hospital the 16th and . . .

Dr. Millett: That was the 16th of April.

Patient: . . . yes, and on a later day the 23rd, I was admitted.

Dr. Millett: To the VA Hospital?

Patient: Yes, and my eye was removed. I don't remember the exact date. My son brought me.

Dr. Millett: How long had you been having trouble with your eye?

Patient: Well, the real bad trouble about a year.

Dr. Millett: And Mr. Elvis L. Johnson, can you tell us the history of your father's eye complaints as you know them to be?

E. L. Johnson (son): Well, about a year and a half ago a small black place had come up in his eye.

Dr. Millett: Which eye?

Son: His left eye. At first we thought it might be a bruise or something like that, but it didn't go away. I had been going to an optometrist to get contact lenses fitted for myself, and he had all this fancy equipment. The way he carried on his procedures, I thought he was really good and knew his business. So I decided to take my dad in to see him.

Dr. Millett: For what reason?

Son: Because of this black place in his eye. On my last visit to him before I took my father in, I had asked him about this spot in my dad's eye and he said, well, without seeing him he couldn't tell me what it was, but if I brought him in, he'd be glad to examine him.

So I made an appointment for him the next day. I worked right across the street from there at the time, so I dropped my dad off and went on to work. Dad came over about an hour and a half or two hours later and said that he was ready to go home. I asked Dad what the optometrist had said about the place in his eye and Dad told me he said, "It's nothing to worry about, I think I caught it in time." From there he just proceeded to make him a pair of glasses and that was it.

Dr. Millett: Is that what you recollect, Mr. Johnson?

Arizona Citizens Threatened By Bill That Gives Optometrists Surgery/M.D. Functions

Offering what he termed a definition of optometry that will be recognized nationwide in a few years, Robert Maynard, O.D., past President of the Arizona Optometric Association, has presented to the Joint Health Committee of the Arizona legislature a proposed bill that would expand the practice of optometry medically and surgically to be the equivalent to the practice of ophthalmology.

Senator Robert B. Usdane, Chairman of the Allied Health Committee, who opposed the optometric proposal, told PEN in a telephone interview that the non-restrictive proposal, in his opinion, would expand optometric services beyond the use of drugs or the prescribing of medications.

When questioned as to whether the optometrists had explained how the permissive bill would benefit Arizona's citizens, Senator Usdane answered no, but noted that discussion of the issue had been limited.

The proposal submitted by optometrist Maynard would amend the Arizona Revised Statute, Section 32-1701, to read, "Practice of optometry" means any one or a combination of the following practices:

(a) The examination of the human eye by any method to diagnose or to treat any abnormal condition of the human eye or its adnexa (adjacent parts);

(b) The employment of instruments, devices, pharmaceutical agents and procedures intended for the purposes of investigation, examining, treating, diagnosing, or correcting visual defects or abnormal conditions of the human eye or its adnexa; or

(c) The prescribing and application of lenses, devices containing lenses, prisms, contact lenses, orthoptics, vision training, pharmaceutical agents, and prosthetic devices to correct, relieve, or treat defects or abnormal conditions of the human eye or its adnexa.

Although the broadly permissive bill was rejected by the Allied Health Committee, optometrist Maynard, who then presented a bill limited to diagnostic drug use by optometrists, left no doubt that his constituents considered a drug use bill only an interim measure.

The Joint Allied Health Committee, acting to protect the public health, voted not to recommend either proposal. This action means that the Committee will not introduce or sponsor the optometric drug bill. Senator Usdane pointed out, however, that this action would not preclude the possibility of a bill being introduced by one or more legislators during the legislative session.

ARIZONA STATE SEN. ROBERT B. USDANE

. . . voted against dangerous proposal

According to James W. McMahon, attorney for the Arizona Ophthalmological Society (AOS), there is little doubt that an optometric bill will be introduced in some form [illegible]

Truman D. Plainer, M.D., of Tempe, Vice-Chairman of the Physicians Education Network, Inc. (PEN), has reported that medical leaders view the current effort as evidence that optometry's desire to obtain diagnostic drugs was, and is, the first step in the eventual assumption of all ocular care by optometrists, even though they are not trained or qualified for this function.

Dr. Plainer further commented that ophthalmologists feel that the optometric initiative documents what most have known all along, that the purpose of optometrists in Arizona in introducing optometric drug bills is not to "do a better job" as they have claimed, but to become licensed as ophthalmologists via legislative fiat to the detriment of the public interest. ●

Suit Prepared To Stop Use Of Eye Drugs At University Of Alabama Optometry School

The Alabama State Licensing Board for the Healing Arts is preparing to file suit against the University of Alabama at Birmingham (UAB) School of Optometry to stop optometrists at the school from administering prescription drugs, according to the *Mobile Press*.

The newspaper reports that although no suit has been filed yet, George Hardesty, Jr., executive officer for the Licensing Board, has confirmed it was being prepared.

Hardesty told the *Mobile Press* the suit would be an effort "to get a judicial determination" on whether Alabama law allows optometrists to use prescription drugs in the eyes of patients or to write prescriptions for those drugs.

In a letter to Charles N. Robbins, M.D., president of the Alabama Academy of Ophthalmology, dated March 19, 1979, Dr. Charles A. McCallum, vice-president for Health Affairs at UAB, said that state law permits optometrists "to use drugs for diagnostic purposes, but not for therapeutic purposes, and this is the policy followed by our School of Optometry."

The *Mobile Press* reports that when interviewed, Dr. Robbins said Alabama has not passed a law allowing optometrists — who are non-medical practitioners — the use of drugs for diagnostic purposes. He noted that optometrists are trained in the testing of eyesight, the prescription of glasses, and the manufacture of glasses. They are not, he said, trained in the diagnosis, medical or surgical treatment of eye diseases or malfunctions. He emphasized that ophthalmologists — medical doctors who specialize in eye care — have, in addition to their general medical training, special post-graduate training in eye diseases, diagnosis, and treatment, including the use of drugs and surgery.

According to the newspaper the Alabama law regulating optometrists states: "Provided, however, nothing in this section shall be construed so as to permit the administering of drugs in any form or prescribing of drugs for the medical treatment of eye diseases or the performance of surgery of any nature for any purpose."

The paper reports that in 1976 the then State Attorney General, Bill Baxley, issued an opinion on the law that "the practice of optometry does not permit the administration of topical drugs in any form to the human eye for the purpose of diagnosis." The Attorney General's opinion, however, does not carry the weight of law, and must be tested in court. ●

MILITARY EYE CARE THREAT *from page 2*

The child was subsequently seen by a civilian ophthalmologist. He diagnosed her condition properly, and informed the child's parents that the help she needed *was* available in the Navy at nearby Camp LeJeune.

The patient, now nine years of age and nearing maturity, will require a much longer course of therapy for her amblyopia. More importantly, the delay in treatment may well have produced irreversible damage.

"Gross Malpractice"

Terming the optometric mismanagement of this case "gross malpractice", the naval officers report that litigation against the government is likely to be instituted, since they have already been contacted by attorneys.

In further support of their allegations, the two officers made reference to a serious case reported in September 1978.

According to the M.D.s, an enlisted man aboard ship in the Mediterranean explained to the general medical officer (M.D.) in early August of 1978 that he was suffering from double vision (diplopia) and headaches. The physician was concerned about swelling of the patient's optic nerve head — a serious sign — and promptly referred the patient to the "eye doctor", specifically stating ophthalmology, at the Naval Hospital in Rota, Spain.

Since there was no ophthalmologist at this hospital, the patient was seen by an optometrist. According to the patient, the optometrist noted he had crossed eyes, which he said was no problem, but that surgery to reposition the eye muscle would be necessary in the future. The ship's physician, apparently content that his patient had been seen by an eye specialist, failed to pursue the matter further.

About a month after the optometric examination Drs. Cobb and Young saw the patient. Their examination revealed decreased vision in both eyes, obvious swelling of both optic nerve heads, paralysis of both sixth cranial nerves, which paralyze the muscles which rotate the eyes, consistent with increased pressure inside the skull, affecting the brain. The patient was transferred immediately to the National Naval Medical Center in Bethesda, Md., where sophisticated skull X-rays revealed a chronic subdural hematoma (blood clot in the brain). In less than 36 hours after seeing the ophthalmologist, the patient underwent brain surgery to remove the clot.

This patient suffered needlessly, and could have lost all vision or his life as a result of optometric misdiagnosis. More significant is the fact, they note, that the optometrist failed to recognize that sudden, unexplained double vision in a young adult is an ominous sign requiring immediate, thorough medical evaluation.

Another ophthalmologist, John D. Walker, M.D., Lieutenant Colonel in the United States Army, residing in Berea, Kentucky, presented his personal views on military optometry. He said, "I am opposed to their prescription of eye medications, because of the possibility that this may delude either the optometrist and/or the patient into thinking that appropriate treatment has been given, and therefore delay referral to appropriate medical care facilities."

He states that while the ophthalmologist is the local medical eye authority, he still is within the military chain of command. He notes that the ophthalmologist is responsible to the Chief, Department of Surgery; Chief, Professional Services; and the Medical Treatment Facility Commander, in that order. He reports that these individuals, by regulation, may treat ophthalmologists, optometrists, and physician's assistants as equals in rank, ignoring the difference in their educational qualifications and medical knowledge. ●

MALIGNANT MELANOMA *Continued from page 3*

Patient: Yes. I remember him saying, "You came to me in time," and that he could help me.

Dr. Millett: And how was it that he offered to help you?

Patient: He ran tests on his machine, fitted me with glasses, and told me it would be a few days, then I would get my glasses. Then I went to Indiana and this eye started giving me trouble so I came back to Lexington in March of '79. I couldn't see when I went to work so I came to the VA Hospital and that's when I had to have my eye removed.

Dr. Millett: At the time you went to see the optometrist, were you having trouble with your vision?

Patient: Yes. I thought it was both eyes, but I guess it was just the left one because it kept getting worse all the time. When I came to the VA Hospital I found out what really happened. I had a tumor that had to be removed.

Dr. Millett: Did the optometrist offer you a return appointment or offer you a referral to a physician?

Patient: No, he did not.

Son: The only thing he wanted was for Dad to come back in for refitting of his frames because they didn't fit him properly. And as Dad was in the VA Hospital at the time, I told him that wouldn't be possible. The one thing is that from the time he got his glasses on, we were around him all the time.

We really couldn't tell that much of a change in the black spot so we continued thinking it was a bruise. In January he left for Indianapolis and after not having seen him for a couple of months, we noticed the big change . . . it was staring you right in the face.

Dr. Millett: How many times would you estimate the black spot had enlarged, if you had to just guess?

Son: From the first time I saw it, at least ten times, if not more.

Dr. Millett: Was it obvious at that time, or were you looking for it?

Son: It was very obvious. You couldn't miss it.

Dr. Millett: Did it continue to enlarge from January until April, when your father came to the VA Hospital?

Son: He came back in March and yes, it did continue to enlarge, but I couldn't tell that much of a change from the time he got back to the time he was admitted to the hospital. I feel that if the optometrist had done his job properly, and actually examined my dad like he should have, he should have at least noticed something wrong and recommended us to a specialist.

Dr. Millett: Mr. Johnson, can you describe for us the series of events that happened to you when you came to the VA Hospital in April of 1979?

Patient: I was taken to the Eye Clinic where a doctor examined me. He had four or five others look at my eye, and they decided it was a tumor. Then he took me in and talked to me and told me what it was.

Dr. Millett: And what did he tell you?

Patient: He said it was a malignant tumor, and it would have to be taken care of. They arranged to bring me in on April 23, and I lost the eye some days later.

Dr. Millett: What did the doctors do with you while you were in the hospital?

Patient: They ran scans of my brain, liver, and bone for some days before they operated.

Dr. Millett: Did the doctors find any evidence of spread of this tumor?

Patient: Yes ma'am, I think they had.

Dr. Millett: Where was that spread?

Patient: It was in my left eye and the left corner of my eye.

Dr. Millett: Was it spread anywhere else throughout your body that the doctors were able to detect?

Patient: As far as they could tell with the scans they ran it was stable in that one place.

Dr. Millett: You went to the operating table on May 4, 1979. What sort of procedure did you have?

Patient: A fellow told me what they would be doing, and what they would give me. Before I went into surgery a doctor took some pictures of me; then I went into surgery. When I woke up my eye was gone and the operation was complete.

Dr. Millett: Mr. Johnson, do you have any comments that might summarize your feelings about what happened to you?

Patient: My story might be of use to other people; if they came up with a problem like mine, they should go to people who can help them. I made a mistake in going to an optometrist in the first place. I guess the man wasn't equipped to find anything, or else he didn't want to find anything. I don't know, but I'd advise them to go where they could get themselves taken care of properly before it gets too late, like it was for me.

Dr. Millett: Do you have any last comments that you would like to make to the people who will read this publication?

Son: His modern equipment made me feel that the optometrist was properly trained to detect what was there, but he failed to do his job. If a man can't do that then you know he really doesn't have any business in the job to begin with. Optometrists, I believe, should be left to making glasses and contact lenses, but not diagnosing illness. If anything like this comes up again, you can be sure I'm not going to take my dad to an optometrist again. ●

UNITED STATES PHYSICIANS EDUCATION NETWORK
Statement of Purpose

PEN exists solely to utilize its resources and combined influence to present, promote, and promulgate, through communication outward, and communication inward, these simple truths:

- The American people must be protected by placing and keeping health care in the hands of experts, whose abilities are established by having reached a standard level of medical education.
- The logical minimum level of education necessary for leadership to protect the public in shaping the optimum health care delivery quality standards in the United States is the degree of Doctor of Medicine or Osteopathy, earned at a school of medicine or osteopathy — at an accredited institution of higher learning.
- Government at every level should cooperate with medicine in establishing these health safety standards.

Membership in PEN is available to any law-abiding citizen who subscribes to these truths, and desires to be informed, as well as to participate in informing the public at large.

ORGANIZED OPTOMETRY CO-DEFENDANT

Glaucoma Victim Blames Optometric Ads, 3 O.D.s in Indiana Lawsuit

John Collins, a glaucoma victim, has filed suit against three Indiana optometrists and the 20,600-member American Optometric Association (AOA) for alleged negligence that has caused his condition of glaucoma to progress from a non-impairing, controllable problem to that of disabling, irreversible near-blindness.

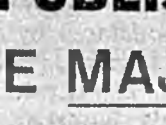
The former Indiana resident, now residing in Charleston, West Virginia, has filed suit in the U.S. District Court of Southern Indiana, and the amount in controversy exceeds $10,000 exclusive of interest and costs.

According to the complaint filed by Howard S. Young, Jr., attorney for the plaintiff, sometime prior to 1977, Collins began to develop glaucoma in his eyes of which he was unaware and in the first part of 1977 noticed impairment in his vision.

The complaint states that on or about May 21, 1977, John Collins went to the defendant, Dr. Kenneth Van Arsdall, an optometrist practicing in Columbus, Indiana. It is alleged that this optometrist, who prescribed glasses, negligently failed to detect, diagnose, or treat the plaintiff's condition of glaucoma.

The complaint further alleges that Collins went to two other optometrists, also practicing in Columbus, Indiana, one in September, 1977, and the other in October, 1977, and that they too failed to detect, diagnose, or treat glaucoma in the plaintiff's eyes.

It is claimed that as a result of this negligence, John Collins' glaucoma was not diagnosed or treated until late December of 1977, at which time Collins' vision was substantially and permanently damaged so that he is nearly blind.



The complaint also states that in order to induce members of the public to seek the services of optometrists, including the named defendants, the American Optometric Association negligently advertised, informed, and represented to the public, including the plaintiff, that optometrists were educated and qualified to detect and diagnose glaucoma and to give the best vision care possible. AOA also represented that optometrists were capable of giving preventive care, when in fact some members of its association were not so qualified.

Claiming damages in excess of $10,000, the plaintiff alleges that he has incurred large medical expenses, lost earnings, and suffered pain and agony, all of which may continue. He states that his earning capacity has been permanently impaired, and that he is also permanently impaired in his ability to perform the ordinary activities of daily life.

The allegation of AOA negligence in advertising was a concern of Virginia Governor John N. Dalton when he vetoed for the second straight year an optometric drug bill.

In his veto message Governor Dalton made specific reference to the on-going optometric advertising. In this regard the Governor said, "There is further concern over public misunderstanding that complete medical care has been effected after having an optometric examination. Recent advertising in national magazines and on television by the American Optometric Association has reaffirmed my concern in this regard."

Continued on page 3

WHY "THE PEN?"

The files of state and national medical associations, all learned societies concerned with the public health, overflow with a preponderance of evidence that the quality of health care is threatened by the precedent of Government encouraging the lowering of professional standards by allowing medical functions to practitioners with no medical education. Medicine accepts the responsibility to respond to epidemics. Death and trauma are resulting, and Doctors of Medicine can do no less than warn potential victims through the continuous presentation of this evidence. The public press of America, given the facts, is supporting this cause, and concerned physicians throughout the nation are pooling their knowledge and resources to package and present the truth through the PHYSICIANS EDUCATION NETWORK.

Blind Victim of O.D. Oversight Sues; Settles For $53,500

WINONA T. BROWN
"No amount of money can pay for loss of my eye"

Optometric mismanagement and failure to refer promptly to a medical doctor have cost a Seattle, Washington, woman the sight of her right eye, and provides further evidence for the growing file of PEN cases that non-medical practitioners are not qualified to diagnose or treat disorders of the eye.

The victim, Winona T. Brown, experienced continued difficulty for a 12-month period adjusting to contact lenses prescribed by her optometrist. Finally, her right eye developed an infected ulcer, causing excruciating pain. Ms. Brown was eventually referred to an ophthalmologist. Despite immediate hospitalization, with intensive medical and surgical treatment, Ms. Brown has permanently lost vision in her right eye.

Ms. Brown received damages in the amount of $53,500 in an out-of-court settlement with the op-

Continued on page 3

OPTOMETRIC MISMANAGEMENT

Total Settlement to New Jersey Glaucoma Victim May Exceed Half Million Dollars

A New Jersey optometrist's failure to detect glaucoma and to refer the patient for appropriate medical treatment has resulted in near total blindness for the patient, and an out-of-court settlement that will cost the optometrist $25,000 in a lump sum plus $20,000 a year for the patient's lifetime plus attorney's fees. The patient has a life expectancy of 25 years.

According to Alfred Dimiero, attorney for Eleanor Steward, age 49, a resident of Newark, his client noted a loss of peripheral vision and first saw the optometrist in November, 1975. On examination, the optometrist determined that the patient was able to perceive light in her left eye, but could not see images. The optometrist, however, failed to determine why this was the case. He never examined the interior of the patient's left eye, never inquired as to the history relating to that eye, and took an incorrect pressure reading with a Schiotz tonometer.

The plaintiff's attorney relates that, on examining the patient's right eye, the optometrist detected no disease and declared the vision to be good. The optometrist prescribed bifocals with a balance lens for the left eye which, being blind, could not be helped by eyeglasses.

After some 15 months the optometrist's patient, Eleanor Steward, was examined by an Ophthalmologist, a medical eye specialist, who found that the patient was suffering from advanced glaucoma in both eyes with permanent loss of vision. Because of the delay in diagnosis and treatment, she is now blind in the left eye and can see only hand movements with the right eye.●

DR. ALLEN'S

DIAGNOSES

James H. Allen, M.D.; founding president, New Orleans Academy of Ophthalmology; professor of ophthalmology, Univ. of Iowa and Tulane Univ. for 30 years; Senior Surgeon, Tulane Univ.; awarded the prized Gold Medal of the Ophthalmology Section of AMA, 1976.

Who Should Pay The Price of Incompetence?

Justice may be blind, and retribution may be slow, but documented evidence appearing in this issue of THE PEN attests to the fact that if blindness results from negligence on the part of those professing to accept the responsibility for sight, the cost can be astronomically high.

In a letter to the editors of the *American Optometric Association News* which appeared in the July 15, 1979 issue, optometrist Harold L. Castleman of Chambersburg, Pennsylvania, wrote:

"Dear Sir:

I grieve everytime I read the *AOA News* in which articles and advertisements proclaim the drop in malpractice insurance rates through the Aetna Life & Casualty Co. My insurance is costing me $250.00 this year, far above the figures you quote. Aetna requires us to have $1 million in personal liability which runs the premium up and is a whole different ballgame."

To O.D. Castleman we say, "You ain't seen nothin' yet."

Medical doctors, who are by no means without blame in some instances, have had to accept the high cost of insurance protection, as a part of the cost they must pay for the privilege of attempting to heal the sick.

If optometrists, who are not trained or qualified to perform medical functions, persist in their efforts to achieve medical status through legislative channels, the "new ballgame" that optometrist Castleman refers to hasn't even been developed yet. And there can be no doubt that in comparison to the present, it will make Russian roulette look like a game of Parcheesi.

High as the present cost may be in terms of malpractice insurance, if damages due to mismanagement continue to mount, the cost to the optometric profession will soar. More importantly, the cost in suffering and loss of vision to those who have entrusted their eyesight to them will climb.

Optometry has for many years been an honorable and necessary profession. Today, however, the validity and credibility of the profession and all who practice it are being undermined and seriously damaged by those few misguided zealots who for reasons of social status or economic gain seek to function beyond their training and their capabilities without regard for patient well-being or patient safety.

The ultimate cost is one that defies calculation. It is the cost of being blind. No amount of money, however astronomical the sum, can replace the God-given gift of sight, as Ms. Brown states in her deposition on page 1.

Acceptance of such a fate is hard enough if the victim is confident that all that could have been done was done, but to be doomed to darkness knowing that such a fate need not have been, is not acceptable.

The ultimate cost, blindness, can be drastically cut, if not eliminated, by demanding that every man, woman, and child in this nation be assured only medical care by M.D.s, not pseudo-medical care by non-medical practitioners.

Optometric contentions that would substitute quantity for quality and convenience for competency must be challenged by rational persons and must be constantly refuted.

We recognize that there are many practitioners in the field of optometry who believe as we do, that medicine is a function for only those trained and qualified to perform in that field: medical doctors.

However, if it takes the naked truth and horror stories told in gruesome detail to awaken the American people, then that is but another cost that all of optometry must pay for the actions of a few. Yes, the cost is high, but if, indeed, as optometrist Castleman says, there is to be a "whole new ballgame", medicine is committed to making it one that makes the patient, not the non-medical practitioner, the league champion. Batter up! JHA

Michigan Ophthalmologists Launch Aggressive Campaign With Positive Ads in Regional Editions of National Magazines

Michigan has taken a bold new approach to the invasion of medicine by optometrists — non-medical practitioners.

Although Michigan was the first state to defeat optometric drug legislation in 1966 and has successfully resisted since that time, the state in the past two years has been confronted with serious new challenges.

According to Justin L. Moran, Director of Public Information and Communications for the Michigan Ophthalmological Society (MOS), the first challenge came from the development of prepaid "eye care" programs that discriminated against Ophthalmologists.

The second challenge was, according to Moran, the national advertising campaign undertaken by the American Optometric Association. As one of the top five markets in the United States, Moran said, Detroit was particularly affected by the misleading campaign.

To meet the first challenge, that of providing complete high quality eye care through pre-paid eye care programs, Michigan Ophthalmologists formed Medical Eye Services of Michigan, Inc. (MESOM). This organization provides panels of Ophthalmologists for third party payment programs such as Blue Cross/Blue Shield and offers employers a self-insured eye care program administered by Mutual Eye Claim Audits, Inc. of Indianapolis, Indiana. This program is particularly significant in Michigan, one of the most highly industrialized states in the union, where much of the eye care provided is handled through insured plans.

To counter the challenges of the current national advertising campaign sponsored by the American Optometric Association, Michigan decided to take the offensive and launch a full-scale hard-hitting marketing effort designed to educate and inform the public. That program, now underway, includes a series of strong, positive, paid advertisements, which have been placed in the Michigan editions of leading national magazines.

The first advertisement, which is carried on the back page of this issue of THE PEN, was placed in the Michigan editions of *Time*, *Newsweek* and *U.S. News & World Report*. The first advertisement appeared in full color. Others will be black and white.

In addition, Moran reports, a third advertisement is being produced which will be placed in the television program guides of metropolitan area Sunday newspapers.

Weekly News Magazines Chosen

According to Moran, weekly news magazines were chosen for the primary media effort because of their excellent penetration among influential leaders in the state, and among individuals likely to become involved in providing or negotiating for pre-paid eye care programs. To make certain union leaders at all levels receive Ophthalmology's message, reprints of the ads are being mailed to all 2800 elected union officials in the state shortly after they appear in the various publications.

The third ad, which has a headline reading, "When an M.D. prescribes your glasses, you get the finest eye care possible", is being placed in television program guides to reach the mass market, and patients most likely to respond to hearing television advertising sponsored by optometry.

Although it is too early to evaluate the full impact of the advertising effort, Moran believes it has already had one good effect. In his view, the first ad brought home to Michigan optometrists the realization that such a campaign could have deadly impact, and prompted a resolution from the Michigan Optometric Association, which called for the immediate cancellation of AOA's $6 million dollar national ad campaign.

Moran states that the Michigan initiative originated with the MOS Executive Council and Society president, Philip C. Hessburg, M.D. The MOS Secretary Jerome D. Davis, M.D., who serves as chairman of the Society's Public Information and Communication Council, was assigned to implement the council's decision.

In addition to retaining marketing professional Justin Moran to act as Director of Public Information and Communications, the MOS and MESOM commissioned a prominent Detroit marketing and research organization, Lincorp Research, Inc., to identify attitudes and opinions which had to be corrected in order to motivate the public to seek eye care from Ophthalmologists.

In addition to determining that the public did not know the difference between optometrists and Ophthalmologists, the firm turned up two other significant findings, Moran said.

The research firm discovered that the public views optometrists as being in the same relationship to Ophthalmologists as osteopathic physicians are to physicians, and believe they have the same training and perform substantially the same services.

They also found that the public generally viewed eye care in a mechanical rather than a medical context. The reasoning: to correct poor vision, one needs eyeglasses. To get these appliances one must see the "mechanic" who fits and sells them (e.g. the "eye doctor"). Findings showed little comprehension of the eye as an organ of the body, subject to disease or injury, which might require the services of a physician or surgeon.

Three Advertising Objectives

After selecting Buckheim and Rowland, Inc., of Ann Arbor, to produce and place its advertising, MESOM studied the research data and on the basis of the findings formulated three objectives for its advertising. They were:

1) To create awareness of the fact that there is a significant difference between an Ophthalmologist and an optometrist;

2) To create awareness of the fact that an Ophthalmologist is better qualified to care for the eye, including routine examinations for corrective lenses, because of his medical education; and

3) To create awareness that prepaid eye care programs that do not provide an opportunity to choose eye care by Ophthalmologists are inferior fringe benefits.

According to Justin Moran, the Michigan program has been so well received by the medical profession, businessmen, union leaders, and others that Dr. Hessburg has contacted the presidents of all state Ophthalmological societies offering to share with them the Michigan experience.

Moran says, "Clearly, in order to protect the public health, our ultimate objective must be to preserve the position of the Ophthalmologist as the provider of primary eye care. Time may very well prove that the best way to do this is to use marketing techniques to motivate and modify patient behavior. While the use of such an approach is new for a medical specialty, Michigan's Ophthalmologists appear to be demonstrating that it can be done successfully in an ethical, tasteful, easily understood, and extremely effective manner." ●

VICTIM BLAMES ADS *Continued from page 1*

Although recent advertising efforts have been greatly expanded, optometry made the same claims long before initiating its media blitz. In a pamphlet titled "Answers to Your Questions About Glaucoma" which was disseminated long before '77, the AOA had this to say about the detection of glaucoma:

"Glaucoma is most frequently detected during a professional vision examination. Optometrists check carefully for glaucoma in the 'eye health' part of an optometric examination by inspecting the interior of the eye, giving field-of-vision tests and taking eye pressure measurements . . . (with) a tonometer. Used routinely by optometrists, it records quite accurately subtle and gradual changes in pressure as well as dramatic changes the patient may be aware of because of discomfort or impaired vision."

The Collins case, which is scheduled for hearing in November, 1979, will undoubtedly attract national attention, and may well spark a rash of similar suits, since many cases of glaucoma overlooked by optometrists have been reported by medical doctors and patients across the nation. ●

PEN MEMBER APPLICATION

"PEN MUST SURVIVE AND GROW . . . IT IS ALREADY THE MOST VIABLE, POTENT, AND ACTIVE COMMUNICATIONS FORCE IN MEDICINE — IT'S A MUST DO - CAN DO - AND WILL DO ORGANIZATION."
Alton Ochsner, M.D.

STATEMENT OF INTENT

I intend to be an active member of PEN and I endorse and support the STATEMENT OF PURPOSE.

In providing my resources I am assuring that PEN will continue to block efforts to invade medicine at the expense of the public health. I am subsidizing the ever-expanding promulgation of truth, the circulation of THE PEN and other publications to an ever-expanding audience. I am assuring the availability of resource materials, mass communications, legislative, and other expertise relating to this issue to all who support medicine in this cause.

I DESIRE TO INFORM AND BE INFORMED AND HEREBY PLEDGE DUES IN THE AMOUNT OF $250 ANNUALLY. (Subject to reduction as PEN grows)

tometrist and his insurance carrier. But, as she sadly notes, "No amount of money can pay for the loss of my eye and the agony I went through."

Motivated by a sincere desire to protect other innocent people from a similar fate, Ms. Brown has provided the following testimony of her tragic experience:

While waiting in an optometrist's office where I had taken my mother to have her hearing aid fixed, I read information about contact lenses. I only wore glasses for close work in my office job and had always hated to wear glasses so I became interested in wearing contacts.

The optometrist informed me there would be a charge for the examination, but if I decided to purchase contacts, it would be included in the purchase price. The cost was $400.00 for one kind and $450.00 for another kind. He advised bifocal lenses, which he said were semi-soft, or if I cared to have the soft lens, he could make one eye for distance and one eye for close. He suggested the bifocal. These, he said, were new and somewhat difficult to fit but as he put it, very interesting. I trusted his advice.

On January 15, 1977, I signed a contract.

The contacts were changed many times over the period of nearly one year. They would be mailed to me about one week before an appointment.

I received my last pair in December 1977. One night around midnight, I woke in terrible pain. Both eyes were swollen closed and my face was puffed. I had some Tylenol No. 3 on hand so I took some for the pain. That was not strong enough.

The next morning, I was still in horrible pain. I called the optometrist's office as soon as it was open and was advised to alternate between hot and cold packs.

The next day there was no improvement. I called again and told them (both husband and wife are optometrists) it felt like I had glass in my eye and that I thought I must have an infection. The woman "doctor" informed me they knew I did not have glass in my eye and I did not have an infection. She said I could go to hospital first aid but she wanted to warn me, it had cost one of their patients eighty five dollars to do that.

Finally, a friend was worried because I had not been to work, and she called me. She had her husband take me to the optometrist's office. By that time there was a white film covering my right eye, and it looked horrible, and my pain was excruciating. The man optometrist took one look and ran for the telephone. He called an Ophthalmologist and then took me to his office. The Ophthalmologist had me admitted to the hospital where I finally had expert help.

The doctor was in to see me as many as three times a day, as well as bringing his colleagues for conferences. The Ophthalmologist was able to save my eye, but not my sight in my right eye. The antibiotics which were necessary to fight the germ affected my intestines, therefore, all through the year of 1978, I was ill, because I still had to be on medicine for the eye. For months my face was swollen and there was no shape to my eye. I had to go to work in that condition.

After I was well enough to think straight, I decided to get advice from an attorney. I felt if I could take the optometrist to court, and get it on record, I may be able to keep this from happening to some one else. I would shudder every time I saw a television advertisement where optometrists were fitting contact lenses.

As it turned out, I wasn't the first to bring suit against the optometrists' insurance company. My own attorney had brought suit against them for another party. The insurance company offered us an out-of-court settlement which we accepted in the amount of $53,500 in my case.

I hope and pray that laws will be passed to prevent this sort of thing from happening. No amount of money can pay for the loss of my eye and the agony I went through.

On February 18, 1979, one of Seattle's best Ophthalmologists did surgery on my right eye. He first had to remove the cataract that had been caused, he then had to graft the white part of my eye which was so thin and then over all of that, he transplanted a cornea. Some of the stitches are covered up and will remain. Some have dissolved and a week ago he removed half from the cornea. In all there were nearly forty stitches in the eye. I was in surgery for two hours. My eye now looks pretty much like the other one. I still can not see and I know I will never regain the vision I had but I am so thankful for all my doctors of Ophthalmology. ●

Optometry Kills National Television Commercials

Facing a decline in membership attributed to a $200 special assessment for this year's portion of a multimillion dollar national advertising campaign, the American Optometric Association (AOA) has decided to eliminate television ads and restrict expenditures to $500,000 this year, down from $1.3 million in 1978.

The possible effects of exaggeration in optometric advertising is reflected in the suit, in which AOA is a co-defendant, brought by John Collins (See page 1).

According to the July 1 *American Optometric Association News*, after several days of debate at the AOA annual meeting held in Anaheim, California, June 17-23, the AOA House of Delegates compromised on a resolution by the Michigan Optometric Association to terminate the 2.5-year National Consumer Communications Program (NCCP) and instead resolved to more diligently concentrate efforts on collecting the special assessments.

The AOA *News* reported that, "Indications are that the association could witness a potential 15% to 20% decline in membership a year from now if 1979 and 1980 NCCP assessments are not paid. Many state optometric associations, primarily those serving industrial states, indicated severe membership losses based upon current collections received."

The AOA *News* also stated that AOA Trustee John D. Tumblin, O.D., former chairman of the AOA Advisory Committee on the NCCP, said no monies have been allocated for the final years of the NCCP. "Nevertheless," Tumblin said, "a loss of even one member is too much for this association to accept." ●

UNITED STATES PHYSICIANS EDUCATION NETWORK
Statement of Purpose

PEN exists solely to utilize its resources and combined influence to present, promote, and promulgate, through communication outward, and communication inward, these simple truths:

- The American people must be protected by placing and keeping health care in the hands of experts, whose abilities are established by having reached a standard level of medical education.
- The logical minimum level of education necessary for leadership to protect the public in shaping the optimum health care delivery quality standards in the United States is the degree of Doctor of Medicine or Osteopathy, earned at a school of medicine or osteopathy — at an accredited institution of higher learning.
- Government at every level should cooperate with medicine in establishing these health safety standards.

Membership in PEN is available to any law-abiding citizen who subscribes to these truths, and desires to be informed, as well as to participate in informing the public at large.

Only an Ophthalmologist can diagnose and treat these four common eye diseases.

Melanoma

You'll probably never have the four diseases pictured here. But how can you make sure?

You should know that all four of them can lead to permanent blindness. And one, melanoma, is a cancer.

Nobody likes to think about eye diseases. But as long as you have a choice, isn't it better to think about them before... rather than after? That's why there's no better time than now to see an ophthalmologist.

Cataract

Fungal Corneal Ulcer

Why an ophthalmologist? Because he's a physician. Fully trained and qualified to examine the eye; not only to prescribe glasses but also to diagnose all abnormalities; and—above all—to prescribe corrective treatment, including drugs, therapy, and, when necessary, surgery.

And, being a physician, an ophthalmologist can also check your eyes for symptoms of other diseases like high blood pressure and diabetes.

Glaucoma

Some group benefit programs only permit you to see an optometrist. Make sure yours permits you to choose an ophthalmologist. Then see him. It could mean the difference between vision... and blindness.

MARVIN J. GRENDAHL, M.D.
OPHTHALMOLOGY
3500 LATOUCHE
ANCHORAGE, ALASKA 99504
277-2661

ALLOW ME TO INTRODUCE MYSELF -- MY NAME IS MARVIN GRANDAHL.

I AM GRADUATED FROM THE UNIVERSITY OF MINNESOTA WITH A BACHELOR OF ARTS DEGREE.

I AM A GRADUATE OF THE UNIVERSITY OF MINNESOTA MEDICAL SCHOOL.

I HAVE COMPLETED MY PH.D. THESIS WORK IN PHYSIOLOGY AT THE UNIVERISTY OF MINNESOTA. AT THAT TIME, I WAS A TEACHING ASSOCIATE IN THE DEPARTMENT OF PHYSIOLOGY AND A CARDIOVASCULAR RESEARCH FELLOW. I WAS ALSO A NIH RESEARCH FELLOW DURING THAT TIME.

I WAS AN OPHTHALMOLOGY FELLOW AT THE MAYO CLINIC IN ROCHESTER, MINNESOTA.

I AM NOW AN OPHTHALMOLOGIST IN PRIVATE PRACTICE IN ANCHORAGE, AND WICH TO URGE YOU TO HELP DEFEAT HOUSE BILL #75 AND SENATE BILL #79.

In reviewing House Bill #75 and Senate Bill #79, Section 2, Subsection 08.72.305 - Use of Drugs for Diagnosis, included in the list of drugs proposed to be used is a class of drugs called miotics. This group of drugs is only therapeutic and has no diagnostic use. They are used for treating chronic glaucoma and acute angle closure glaucoma. What is a therapeutic drug doing in a "diagnostic" bill? Mr. George Hall's and Mr. Sternberg's (both Anchorage optometrists) responses to this question at the March 1, 1978 meeting of the Legislative Coalition of Health Care Professionals in Anchorage and at the 1978 hearings on a similar bill introduced and defeated last year respectively was: "To take care of angle closure." "To use this as a first aid measure." This is treatment.

The proposed bill lists only broad general categories of the desired eye medications, not specific drug names and concentrations. The classes of drugs include such potent substances as Cocaine, Atropine, Scopolamine, Phenylephrine and Phospholine Iodide. All these drugs when applied to the eye are readily absorbed into the bloodstream and are capable of producing a wide range of total effects.

Cocaine, a topical anesthetic and mydriatic (dilater of the pupil) is a Class II narcotic controlled substance which is subject to wide spread abuse by addicts and requires a controlled substance registration certificate to dispense. Atropine and Scopolamine are cycloplegic agents which paralyze the eye's focusing power and in sufficient doses produce irritability, hallucinations and even coma. Phenylephrin (a mydriatic) has the ability to raise the blood pressure markedly and to alter the rhythm of the heart and has been implicated in deaths in older people through strokes and in children through cardiac arrhythmias. Phospholine Iodine, a miotic which constricts the pupil is used in the treatment of glaucoma (elevated pressure in the eye) and in certain cases of crossed eyes. The active ingredients are related to the active substance in certain insecticides and nerve gas. This medication has been shown to produce retinal detachments and cataracts. Miotics are a therapeutic class of drugs and are listed incorrectly in the proposed bills as diagnostic drugs.

The above are only a few examples demonstrating what potential dangers exist in the various classes of drugs listed in the proposed bills. By allowing wide spread use of these drugs by nonmedical persons, the overall risk to the general public of potentially serious side effects or untoward reactions are markedly increased.

I. EYE HEALTH CARE PROVIDERS OF THE CONSUMING PUBLIC

The American Optometric Association defines an optometrist as:

"...a health care professional who is specifically educated, highly trained and state licensed to examine, diagnose, and treat conditions of the vision system. Optometrists are highly skilled individuals who examine the eyes and related structures to determine the presence of vision problems, eye diseases and other abnormalities. They gather information on the vision system during the optometric examinations, diagnose any conditions discovered and prescribe optometric treatment such as contact lenses or vision therapy that may be required to provide the patient with clear efficient vision."[1]

A. Although this definition is broad the Alaska legislators have specifically narrowed the definition down considerably. According to the Alaska State Statutes, Title 8, Business and Professions Section 08.72.300, the Statutes define optometry as:

1. "optometry" is the employment of means or methods, other than the use of drugs, for the diagnosis of an optical deficiency or deformity, visual or muscular anomaly of the human eye, or the prescription or application of lenses, prisms or ocular exercises for the correction or relief of the human eye;

2. "practicing optometry" means the diagnosis, by means or methods other than the use of drugs, of an optical deficiency or deformity, visual or muscular anomaly of the human eye, or the prescription of lenses. prisms or ocular exercises for the correction or relief of the human eye, or the holding of oneself out as being able to do so.

Although the optometrist will or have suggested to you that they are legally bound to diagnose eye disease and that they are in a dilemma,i.e., they cannot diagnose eye diseases without the use of drugs. They are in a dilemma if the broader sense of the definition is used as set forth by the American Optometric Association. The Alaska State Legislators have ingeniously removed that dilemma for the optometrist by limiting diagnosis of visual anomalies muscular anomalies, optical deficiency or deformities and not eye diseases.

The ophthalmologist is a medical doctor who has completed a 3-5 year residency program after one year internship[2] preceeded by 4 years of college and 4 years of medical school. He is trained in the diagnosis and treatment of ocular dysfunction and disease and in the use of all techniques or treatment including drugs, surgery, laser photocoagulation, radiation, etc. Because he has

been trained as a general physician first, his perspective of the eye is broader than the optometrist. He views the eye and its diseases within the context of the whole body physiology and pathology.[3] Further, refraction to the ophthalmologist is viewed as only one necessary step in a differential diagnosis of the patient's complaint, Table 1 demonstrated the overall education and numbers of optometrists and ophthalmologists. From Table 1 it is evident that ophthalmologists have much more training in pharmacology and pathology than the optometrists. Still the optometrists continue to compare their curriculum hours to dental school curriculum hours. This is like comparing apples to oranges. They are not asking to use the drugs dentists use or to diagnose oral pathology. They are asking to do what the ophthalmologist does. Therefore, it is more accurate to compare ophthalmologists curriculum hours to optometric curriculum hours. (Please read Ref.#43, which explains this point in detail for the State of Alaska)

Table 2[4] gives a comparison of consumer services offered by ophthalmologists and optometrists. It is quite apparent that there is considerable overlap. This is most apparent with respect to refractions. The optometrist obviously can do some of the things the ophthalmologist can do; the ophthalmologist can do all of the things the optometrist can do, has the education to better interpret the data acquired, and provide medical/surgical treatment. The ophthalmologist is trained to provide complete eye care and to evaluate ocular dysfunction in the context of total body physiology and pathology. Although the overlap of professional services is greatest for refractions, this is a source of considerable consumer spending in both professions.

II. ECONOMICS (AND PRACTICE)?

Table 3[5] shows the substantial number of public dollars which are expended for eye care. A total of approximately $4,135 million dollars were spent in 1975 for vision care services.[6] The national consumer spending for ophthalmic surgery is not listed. This would make the total ophthalmologic dollar spent on eye care far greater than the optometric dollar. If optometrists are allowed to expand the scope of their practice through the use of diagnostic drugs, the price of the basic eye examination would undoubtedly rise. Proposed national health care legislation

can be expected to impact heavily upon these figures. For example, if the Kennedy-Mills proposal were to include coverage of sight correction services, total spending for these services would rise by 21% or $866 million dollars per year. It is obvious that there will be considerable effort by vision care providers to ensure their fullest possible participating in this program. The economic stakes are very high.[7] This makes it very clear why optometry has put on an aggressive nationally organized push to legislate themselves into a better position to compete for this consumer dollar. Even though the optometrists in the State of Alaska suggest that this is not a "money bill" -- it is. It is merely the first step toward the national optometric goal to attempt to become the primary eye care provider. We should expect that in the future the Alaska optometrists to follow the attempt of other states optometric associations to next try for the priviledge to use these same diagnostic drugs as theraputic agents. An attempt was made in West Virginia to legislate the privilage of eye surgery but this was defeated.

The optometrists have claimed at their bill hearings in the lower 48 that they see 70% of the eye consumer and therefore are the point of first entry into the eye care system. Looking first at the source of this claim and national statistics, the fallacy of this claim is demonstrated. They have erroneously assumed that the average number of eye consumers seen by each practitioner is the same. Thus the source of the fallacy: that since they compose 70% of the national work force they see 70% of the eye consummers.

Table 1, indicates the total number of practitioners in each group.[8] The median number of patients seen per week by optometrists was 43.2; the median seen by ophthalmologist was 102.[9] The ophthalmologist sees more than twice as many patients as the optometrist while he comprises only 30% of the work force. It is, therefore, clear that the ophthalmologists care for half the patients, while the optometrists, comprising 70% of the nationnl work force, care for the other half. The statistics in Alaska show that there is a total of 40 optometrists[10] and 25 ophthalmologists.[10] Thus the

ophthalmologists make up 39% of the state work force and the optometrists 61%. Applying the same national ratio of eye consumers seen by optometrists and ophthalmologists, it is evident that the ophthalmologists see 56% of the eye care consumer, but makes up 39% of the state work force. The accuracy of the ratio of two to one was checked in the city of Anchorage by comparing the number of eye consumers seen by the most active ophthalmologist in town-40-50 eye consumers-as compared to the most active optometrist in town-20-25 eye consumers-seen in one day. These figures would seem to indicate that although ophthalmologists are a smaller group than optometrists, the public will work out their services given a free market choice.[11] On this point, the eye consumer in the State of Alaska has ready access to the ophthalmologic eye care providers. Some of the states in the lower 48 are mainly rural and ophthalmologists are congregated in the metropolitan areas and the optometrists are distributed over the rural areas. However, much of Alaska is "bush country", so that the ophthalmologists and optometrists are both congregated in Anchorage, Fairbanks, Kenai Peninsula and the southeast. There are only two areas (Kodiak and Bethel) that have a full time optometrist and no full time ophthalmologist, Table-Map 5,6. However, there are other medical doctors in these communities with "medical know how" and there are airports for evacuation in the case of eye emergencies. Furthermore, Kodiak and Bethel are visited on a regular basis by itinerant ophthalmologists. In fact, most areas in Alaska are served by itinerant ophthalmologists both by the Alaska Native Service and by private practicing ophthalmologists, Table-Map 6. In the 14 other states where a similar bill was passed, these states were mainly rural with a maldistribution of ophthalmologists. In these states this was the main reason for passing this legislation. Therefore, this argument for passing house bill 74 or senate bill 75 does not apply to the State of Alaska, because the distribution of ophthalmologists is essentially identical to that of the optometrists. Thus, the health services of ophthalmologists are readily available to

people in all sections of the state and in many small communities through the itinerant program.

In the states where optometric drug laws are in effect, optometrists who which to use drugs much take short slide and lecture courses on pharmacology. This has or will create two classes of optometrists, which can only lead to additional consumer confusion about a profession already shrouded in confusion. In addition, the use of drugs by optometrists could falsely lead patients to believe diagnostic expertise is available from optometrists.

It is misleading to the consumer and legislature to imply that any drug is purely diagnostic. Each of the classes of drugs asked for by optometry have therapeutic uses. Will the optometrists resist the temptation to use these drugs to treat conditions beyond their knowledge and skill?

It has been said by the optometrists that they would like to use dilating eye drops also in the their bush clinics when they see Alaska natives. A unique situation exists within the native population of Alaska. The incidence of angle closure glaucoma is 1 in 1,800, not 1 in 20,000 as in caucasions. To allow the optometrist to use these dilating eye drops would result in many more cases of acute angle closure glaucoma, for which they are not trained to treat, and which requires quick and effective treatment to prevent blindness. Sometimes angle closure glaucoma requires administration of intravenous Diamox, Manitol or urea. This would result in further expenditure of health care dollars.

III. LEGISLATIVE DUTY FOR THE EYE CARE CONSUMER:

As practitioners of an occupation which deals with the integrity of eyesight, optometrists have been recognized by the Washington Legislators as members of a "learned profession".[12] Professionals who deliver health care may be regulated by the state via its

police powers to oversee those activities which are involved with health, education and welfare.[13] The healing arts particularly have been the subject of regulatory legislation which specifies strict requirements for the practive of such professions.[14] The intent of such restrictive legislation is avowadly the protection of the public against injuries it may suffer from the conduct of such business or calling.[15] The state may reasonably impose any condition precedent to the grant of its consent to practive a healing art, which has a real and rational relation to that objective.[16]

The usual means taken by the state in applying these conditions as quality standards has been by imposing licensing requirements and by carefully defining the particular professions involved.[17] Constitutional challenges to this power of the state have been universally defeated when that power has been reasonably exercised.[18]

Licensing requirements usually specify minimum standards of professional competence for the profession covered and frequently the definition of the profession gives broad areas of practice which will be considered appropriate for the practitioner seeking licensure. Additional restrictions upon the practice can be found in state statutes which define unprofessional or unethical conduct.[19]

The above state powers are broad and greatly influence the scope and freedom of practice by the health care provider. Although the right to follow a profession is recognized as a valuable property right which is constitutionally protected,[20] such a right is not absolute; there is no natural or vested right to practive within the healing professions. Any such right is a conditional use.[21]

The justification for such regulations lies in a perceived right and duty of the legislature to protect the citizens of the state from incompetants and fraudulent health practitioners.[22] The Washington Constitution specifically vests exclusive authority in the legislature to:

"...regulate the practice of medicine and surgery and the sale of drugs and medicines."[23]

From this, courts have construed legislative authority to regulate, by means of separate statutory licensing requirements, all of the various professions and occupations engaged in health care delivery. This includes many professions which are not obviously included in "...the practive of medicine..."[24] Further, the state has the power to define what constitutes the practive of any profession and may then confine practitioners of various health disciplines to the particular system of practive in which they have been educated.[25]

This is a logical stance for the legislature to take. If the legislature has an avowed interest in protecting the public,[26] it must make some attempt at defining the scope of appropriate practice which each class may safely employ and to license those within each class to practice upon the public only those skills for which they have demonstrated competent training. That includes courses, testing and most important of all, clinical experience under supervision. This is the legislative intent in enacting licensing statutes.[27] This reasoning is followed with consistency in cases involving almost every viewpoint and aspect of health care.[28]

Great latitutde is given by the courts to the legislature in defining its public health goals. However, the goal is universally stated to be the protection of public health. Health legislation is not passed to promote the personal ends of individuals or to enhance the status or prestige of any given class of practitioners.[29] Although the legislature may enact such regulatory legislation as it may consider necessary, there must be a rational basis upon which the legislative determination rests.[30] This cannot be interpreted as meaning anything less than that such legislation must appear to be rationally directed toward the achievement of the stated legislative goal and to be reasonably rational in the means which it seeks to achieve that goal.

a) Goal - As noted above, the frequently given objective for regulation of health care providers is the protection of the public from incompetent practitioners.[31]

This goal is stated to exist even if it deprives a citizen of a right he otherwise might enjoy in the pursuit of his profession.[32]

This reasoning leads to the conclusion that the legislature has the duty to ensure that its acts and statutes do not tend to increase public exposure to health risk.[33] The stated legislative goal is increased public protection, not increased public risk. Nowhere does case law state that public protection will be qualified - i.e., that the legislature may increase the risk "a little bit", but not "a lot". No such slippery subjective terms appear. The intent is protection. The language is explicit.

b) Means - The means by which the legislature attempts to arrive at its stated goal must be reasonable and rational.[34] The means which have been used by all states to regulate the professions have been noted above. The states have attempted to ensure the competency of each practitioner and then limit each to the area of practice embraced within the training which that practitioner has received.[35] If this means anything, it must mean that before the provider is allowed to administer to an uninformed public, (45% of the public does not know the difference between an ophthalmologist and an optometrist)[48] he must provide evidence of training sufficient to ensure the public from health care which is inadequate. Such inadequacy can range from innocuously improper diagnoses which are nonetheless economically costly, to disabling or fatal mistakes in clinical judgement - either diagnostic or the end result of therapeutics.

Insofar as it can ever be sure of the quality of professional performance, the state has two related ways to oversee clinical performance.

The state may require evidence of formal professional training which has as its foundation and primary goal, a strong commitment to an understanding and clinical application of those methods, techniques and material to which the public will be exposed and which will place it at risk. Such training must satisfactorily convince the legislature that which it certifies the practitioner, the legislative duty to prevent risk of public harm has been met.

Using the data presented in the first portion of this testimony, it is apparent that optometric training as it now exists in the State of Alaska is not directed toward a broad understanding of human pathology/physiology/pharmacology with supervized clinical experience.[43] Training is limited to a superficial, most theoretical, presentation of data concerning ocular dysfunction with inadequate clinical supervised experience. Not only do the data show that the instruction given the optometric student is very limited, but little or no integration of visual disease/function

is made with 'whole body' disease/function. The eye is studied in isolation as an optical instrument. To use an analogy, an operating room nurse could teach an optometrist about eye surgery, just as a pharmacologist Ph.D. can teach an optometrist about pharmacology. However, no one would want an optometrist to perform surgery with an education based only on lectures and theoretical familiarity with the subject. The prescribing and using of drugs, just like the performance of surgery, must be founded on a broad-based curriculum involving many hours of supervised clinical experience using drugs. To allow any health care provider to practice with only limited classroom experience and testing violates the legislative duty to protect the public from risk of incompetency from lack of clinical experience.[43]

As a second step. the legislature can require continuing education for those practitioners who have already completedbroad formal training upon which additional, up-dated information may be rationally correlated. This type of post-graduate instruction always preseumes in-depth background knowledge. It is used to present newly altered clinical concepts or additional practical experience (e.g., using operating microscopes, intraocular lens implants, vitrectomies, etc) for those practitioners with clinical experience sufficient to allow them to understand the usefulness or pitfalls, to see the advantages or clear disadvantages, to comprehend the clinical reliability or dangers of the material which the course is presenting. Crash courses which involve totally new material, presented to practitioners without that clinical judgement or experience necessary to actually grasp the real impact of the data presented, lat alone the nuances, can be expected to create clinicians who will test their newly acquired knowlege in the public sphere. The hazards of such an appraoch are obvious. Again, such an approach does not satisfy the legislative duty to reduce public risk.

I must conclude that for the state to allow graduates of optometric schools, who are unarguably well-trained in the limited sphere of practice which optometry has exercised to date, to extend their

clincial practice to include the application of drugs to the eye would be an irrational approach toward the protection of public health.[43] If the curricula of optometric schools demonstrated sufficiently integrated instruction in human anatomy/pharmacology/physiology/pathology to provide the optometric graduate with an adequate basis for making appropriate clinical decisions of diagnosis, then such a legislative extension of clinical opportunity, and responsibility would be reasonable. Crash courses are not an adequate substitue[38] for many hours of supervised clinical experience.[43]

It should be repeated that the strong interest of the state in protecting the public, has traditionally and appropriately placed rigid conditions and restrictions upon the right to affect public health.[39] It should also be repeated that this power to restrict health care practice is recognized as proper regardless of its effect upon the economic interests of those regulated.[40]

It is doubtfull that an informed public would voluntarily accept a role as an on-the-job training clinical practice model so that the optometrists can gain the clinical experience needed to use drugs. The consumer public currently has expectations which include a higher standard of knowledge by the medical service provider than ever before. These expectations directly flow from the public's increased understanding that they each, as individual complex biologic units, are biochemically affected in manifold ways via the environment, foods and drugs. Any legislative change which would franchise greater administration of drugs and which simultaneously does not require firm, convincing evidence of a profound understanding of the disease to be detected, its effect on the human body, the biochemistry of the drug to be used, ignores the public right to be protected from incompetency and the public right to make decisions concerning its health care. The public has a right to understand that any practitioner, presuming to diagnosis ocular disease that usually have total body manifestations, is making diagnostic decisions based upon training which comprehends all of the above principles.

IV. AGENCY ACTION FOR ASSURRANCE OF THE HIGHEST QUALITY EYE CARE FOR THE CONSUMER.

The public should be able to rely upon state certification of competency. Legislation which does not demand evidence of such competency before certification fails in its duty to provide public protection in matters of health.

Currently, states have little control over the calibre of training which optometrists acquire prior to licensure. An optometrist may have trained in an optometric school unaffiliated with any medical center, he may have obtained the minimal training necessary to qualify for graduation, but once having graduated, he can apply for and obtain a license with ease.[41]

The State Board of Optometry certifies the competency to use drugs of those optometrists which it approves for licensing.[42] Two problems are immediately apparent:

1) The members of the Board of Optometry have little personal experience in ocular pharmacology, ocular pathology, and diagnosis. They are themselves graduate of optometry schools which have offered limited training because the board members took their training when little time was devoted to course work in pharmacology, and now have little experience with drugs. It is difficult to see how such a Board can adequately evaluate such clinical ability in optometric applicants for licensure, nor is it clear how such a Board can construct any 'refresher' course that would adequately prepare the optometrist for his broadened responsibilities. What is usually used is a 'canned' course, prepared elsewhere.

2) The ability of the Board to carry out its mandate to protect the public from those few individuals that would use these diagnostic drugs also as theraputic drugs would find themselves in a frustrated position. The Board can do nothing to prevent this and the fine for practicing medicine without a medical license is only $100.00.

The regulation of the profession by the Optometric Board will be considered appropriate so long as it is reasonable and necessary in the interest of health, safety of the people.[44] Licensing of optometrists by a Board itself lacking in the necessary qualifications to evaluate clinical performance and knowledge, is manifestly unreasonable. To grant the right to optometrists to use diagnostic drugs who are poorly qualified to do so, is not a reasonable, or an appropriate, or a necessary means of 'protecting'the public health.

The regulation of the practice of optometry is not for the benefit of the licensee, but for the state and its people.[45] Certainly, if the practice of medicine and surgery is a proper subject for careful and precise legislation, so also should be legislation which concerns eye care and those who provide it to the public.[46]

V. CONCLUSION

Having looked critically at the past trend toward the expansion of optometric sercies into medical care, and with the present trend of more and more states defeating this kind of bill, it is proper that some statement be made regarding an appropriate role for this vision care professional.

If the optometrist will be expected to diagnose eye disease, then one of two events must occur:

1) optometric training must be upgraded substantially enough to provide him with clinical expertise sufficient to satisfy appropriate public expectations of high competencey; or

2) optometrists must work in an association with ophthalmologists close enough to provide for the day-to-day transmission of diagnotic information from the M.D. to the O.D., and allow the latter to obtain practical involvement in treatment rationals and administration. This would be similar to the military, Veterans Administration and Alaska Native Service, where the optometrist use these drugs under the direct supervision of the ophthalmologists.[47]

Having once recoginzed the above solutions two problems immediately present themselves. The first solution would require the relocation of optometric schools to permit integration with medical training and include a complete restructuring of optometric training. So much change would be needed that any difference between the ophthalmologist and optometrist would evaporate. However, if any group of practitioners presumes to medically minister to the public it must accept the rigorous training which must preceed such responsibility. There is no quick and easy path to competent understanding of a subject becoming increasingly complex year-by-year. The optometrists seem to want to become doctors, but do not want to go through the extensive number of years training it requires. This is particularly true when the results of error or incompetency can be blindness.

The second solution, close day-to-day association of optometrist/ ophthalmologist, creates a psychological hurdle - perhaps an economic one as well. Optometrists would be required to visualize themselves in a supportive role. This is difficult for any professional to do, especially if he has historically been conditioned to see himself as a member of a separate group, practicing independently. So long as he can offer only limited eye care, he is in a supportive role to those who offer complete eye care. This cooperative association is currently working well in the Veteran's Administration System, the military and the Alaska Native Service It could work well in private care.

Finally, if state legislatures believe that it is proper to expand the medical opportunities of this health-care group of practitioners via redefinition and short-course catch-up lectures without restructuring fundamental educational requirements and experience, there can be little rationale for not doing the same for all paramedical groups, e.g. naturopaths, acupuncturists, and faith healers.

Rationally, the legislature must either strictly require very high state-of-the-art medical training standards to protect its citizens or it should minimize that responsibility and lower its standards to permit each group to economically advance at the public expense. The latter practice would also reduce the educational time and

experience required to produce specialist M.D.'s- but, of course, such physicians would be recognized as marginally or totally incompetent. Should the standard be any different for optometrists who wish to medically diagnose eye disease that is so closely linked with the body as a hole functioning unit?

Thank you for your time and the opportunity to present this view indorsed by the State Ophthalmologic Association.

FOOTNOTES:

1 - Worthen: The Ophthalmologic-Optometric Interface. Transactions of American Academy of Ophthalmology and Otolaryngology *3:OP-155, 1977

2 - Representativ of most ophthalmology residency programs, it is that of the University of Minnesota, Mayo Clinic Graduate School of Medicine. Following graduation from Medical school and a general or specialty internship, the resident enters a program which requires 65 hours a week of ophthalmologic instruction; of this, approximately 8 hours a week is devoted to formal, diadactic lecture, the remainder is clinical or laboratory activity. This weekly schedule continues over a twelve month academic year, for three years. Some of a nine month written home study course administered by the Academy of Ophthalmology. Some programs require an additional one year of ophthalmology. Department of Ophthalmology, University of Minnesota, Mayo Clinic Resident 1974-1977.

3 - Curriculum,University of Minnesota College of Medicine. The basic curriculum required of any candidate for an M.D. degree includes 128 credit hours of 'medical' subjects; this does not includ clinical studies which are specifically directed toward a specialty interest. Although optometrists may agrue that these requirements are not appropriate for them, such an analysis ignores the fact that in expanding their role into the practice of medicine optometrists should be subjected to the same educational requirements. Unfortunately, there is no short-cut to professional competence. This is part'cularly ture in the rapidly expanding and complex field of medicine. The public has a right to demand strict legislative requirements before practitioners are certified as competent.

4 - Worthen, note 1, OP-158, supra.

5 - Trapnell, The Impact of National Health Insurance on the Use and Spending for Sight Correction Service, 1976. (This study was underwritten by the American Optometric Association, and the Optical Manufactures Association.) It reveals that optical device sales represent 66% of the funds expended for optometric services and 19% of funds expended for ophthalmologist services, at Tabel 1 of the Trapwell Study.

6 - This figure includes $920 million spent for optician and $220 spent by institutions. Those categories of service providers are not included in this discussion since they are not involved in patient care.

7 - This economic impact will be divided not only by optometrist and ophthalmologists, but also by opticians and lens/fram/contact lens manufacturers.

8 - Worthen, note , Op-157, supra.

9 - On Blue Shield Survey: In 1975, actuaries for Blue Shield in Connecticut requested of optometrists data necessary to project the cost of insurance covering optometric examinations. One hundred sixty six out of 266 active optometrists responed listing their age, number of years in practice, and number of eye examinations performed each year, and the cost of an eye examination, exclusive of the cost of glasses, so called service charges or visual training. Similar data was gleaned from ophthalmologists, It was concluded that the average optometrist see 23.3 patients per week. Exclusive of patients seen for medical surgical problems or for follow-up care, the average ophthalmologist, of whom there are 160 in Connecticut, sees 56 patients per week for complete eye examinations. Also, if this patients per examiner data is carried over to fit national figures for the number of practicing O.D.'s and ophthalmologists it indicates that about 60% of the primary eye care is rendered by ophthalmologists in the United States right now.

A report prepared for the Optical Manufacturers Association by a consulting actuarial firm (Trapnell Report-1975) presented data based upon national surveys conducted in 1975. The reporters estimated that approximately one-half of 50 million professional eye examinations were done by ophthalmologists and one-half by optometrists. This report dealt only with persons seeking entry into the eye services field for so-called "sight correction" services and did not count all of the services provided by ophthalmologists otherwise for persons who seek out an ophthalmologists otherwise for persons who seek out an ophthalmologist for treatment of medical and surgical problems. (Ophthalmologists obviously do 100% of significant eye surgery and treatment of major eye disease) It is remarkable to note that even though there were approximately 10,000 practicing ophthalmologists, as compared to 20,000 optometrists in the United States, that half of the 50 million so-called "routine eye exams" were performed by ophthalmologists during the year 1976.

10- Department of Commerce and Occupational Licensing

11- Obviously, where ophthalmologists are rare, optometrists see the bulk of patients. However, public education, assistance with payment of medical bills via Medicare and Medicaid, the high mobility of todays population, and the trend toward urban population clustering near ophthalmologists and other specialists certainly influence this bias toward ophthalmologists.

12- R.C.W. 18.53.005 Legislative Declaration: "The legislature finds and declares that the practice of optometry is a learned profession and affects the health, welfare and safety of the people of the this state, and should be regulated in the public interest and limited to qualified persons..." (Amendment 1975)

35 - State v. Houck, note 27, 700, supra.

36 - Worthen, note , Op-160, supra.

37 - "...the legislature was careful to require definite knowledge

38 - West Virginia Statute 30-8-5 requires those optometrists who wish to use drugs to complete those requirements which the board of optometry may see fit to extablish. The board of optometry requires attendance at a pharmacology course similar to that described in note 43, infra.

39 - Ellstad v. Swayze, note 13, supra.

40 - Campbell v. State, note 15, supra.

41 - R.C.W. 18.54070

42 - R.C.W. 18.54.030 - In fact, the statute excludes from board membership any optometrist "...who has any connection with any school...of optometry..." It could be presumed that optometrists teaching at optometric schools would be best qualified to judge the qualifications of optometric candidates and possess the most crrency in clinical information.

43 - A letter from Leon Candenb, O.D., Director Pennsylvania College of Optometry describes the lecture outling in pharmacology used by Kentucky, Florida, Pennsylvania and New Mexico. This course involves participation by the optometrist in six weekend sessions (Saturday and Sunday) and ends with a three hour examination covering the presented material. A letter from Sam A. McConkey,M.D. to the Honorable Charles Parr:

ON OPTOMETRISTS PRACTICING IN THE STATE OF ALASKA

According to figures obtained in February of 1978 from the Department of Commerce, Division of Licensing, there are 40 licensed optometrists in Alaska. Their educational background is as follows:

24 attended Pacific University College of Optometry(1951-1976)
5 attended Illinois College of Optometry (ICO)
4 from 1948 to 1960 and 1 graduated in 1977
3 attended Southern College of Optometry
2 attended the University of Houston College of Optometry
1 attended Southern California College of Optometry
1 attended Los Angles College of Optometry (No longer listed as an optometric school)
1 attended Northern Illinois College of Optometry (No longer listed as an optometric school)
In one case, it is unkown to the Department of Commerce where he went to school.

The following is a summary of pharmacology training at these various institutions.

Pacific College of optometry has NO M.D., PhD., or anyone with a masters or bachelors degree in pharmacology teaching at that institution.

Illinois College of Optometry, prior to 1960, had NO M.D., PhD., or anyone with a masters or bachelors degree in pharmacology teaching. The one graduate of 1977 may have been taught by one professor in the category of PhD. or masters or bachelors degree.

Southern College of Optometry has NO M.D., PhD., or anyone with a masters or bachelors degree in pharmacology teaching at that institution.

University of Houston College of Optometry has NO M.D., PhD., or anyone with a masters or bachelors degree in pharmacology teaching at that institution.

Southern California College of Optometry has NO M.D. teaching in pharmacology; has two instructors listed as either a PhD. or masters or bachelors degree.

It follows that at least from all the available evidence, the maximum number of optometrist in the state that had any pharmacology training from any qualified instructor at all, is two; one from the Illinois College of Optometry who graduated in 1977 and the one graduate of Southern Calidfornia College of Optometry. It appears that the maximum number of optometrists in the state that had any pharmacology training from any M.D. or M.D./PhD. in pharmacology is zero.

The maximum number of optometrist in the state that had any instruction at all from any full-time M.D. on the staff of the school is zero.

The maximum number of M.D.'s in even a part-time capacity on the staff of any school attended by 37 of the 40 optometrists in Alaska, is two. From a survey of the Blue Book of Optometry which was last issured in 1976, it appears that the maximum number of members of the State Board of Optometry that even have a bachelors degree from any school is two of the six board members that are listed. It would seem reasonable that there would be an ophthalmologist either in the teaching or in the clinical aspect of optometric education, but it appears from the available evidence, that the maximum number of optometrists currently practicing in Alaska that had any full or part-time instruction, either by lecture or in the clinical setting by an ophthalmologist is zero.

44 - State v. Spino, 61 Wash 2d 246, 377 p2d 868, 870 (1963)

45 - Pennington v. Benelli, 15 Cal App 2d 316, 59 P2d 448

46 - Campbell v. State, note 15, 466, supra.

47 - The AAO Nove-Dec. 1977. "AGREEMENT REACHED ON DEFINITION OF MILITARY OPTOMETRIST- The army, Navy and Air Force have agreed on a common definition limiting the services optometrist may render to military personnel. Prior to the new definition, the three military branches had differing definitions which the AAO mailed to all state ophthalmological societies earlier in the year. On June 15th James W. Foristel, AAO Congressional Liason, met with Robert Smith, M.D., Assistant Defense Secretary for Medicine, who was attempting to have all three of the service's Surgeons General agree on a common definition. In September, they reached agreement on the following single definition.

'The optometric clinic provides optometric patient services under medical supervision. Optometrist examine the eyes and

adnexa to include refraction and other procedures, prescribe lenses to correct refractive errors and imporve vision. They refer patients to physicians for diagnosis and treatment of suspected disease. Optometrists use appropriate drugs to perform optometric procedures. When using these drugs, immediate medical care is available in the event of adverse reaction.'"

Associated Press wirephoto

on can be seen eclipsing the sun in this series of Manitoba, west of Winnipeg.

watch in awe eclipses sun

At Olympia, the Washington state capitol, the clouds broke 10 minutes before total eclipse.

The curious broke out homemade pinhole projectors and makeshift viewers as scientists set up more sophisticated telescopes or conducted experiments in chartered aircraft above the clouds.

But a mattress of clouds several thousand feet thick covered most of the Pacific coast and many had to settle for a televised version.

At Goldendale, Wash., near the Columbia River, more than 1,000 persons had gathered, some from as far away as New England and California.

A cloud bank moved in at the crucil moment of totality, but a muffled cry of awe and joy rippled over the hillside at the small public observatory as the last tiny sliver of sun fell behind the passing moon.

One of those traveling more than 3,000 miles to the snowcovered prairie of northwestern North Dakota was Jim Manning, assistant director of the Morehead Planetarium at Chapel Hill, N.C. He came with a party of eight which drove three days in a van and compact car to get there.

"You feel the awesome power of the laws of nature, how they affect things, and all you can do is sit there and watch," Manning said. "It's a gut feeling of helplessness and you say, 'My God, look what's going on.' It's a mystical experience."

The shadow crossed the earth at speeds over 3,000 miles an hour, beginning on the West Coast near Portland, Ore., and dissolving over Greenland.

Commerce panel urges

'Eliminate 7 health boards'

By ROSEMARY SHINOHARA
Our Juneau Bureau Chief

JUNEAU — A drastic housecleaning that would eliminate 7 of 11 state boards regulating the health professions was proposed Monday by majority members of the House Commerce Committee.

The commerce committee Democrats also propose that two of four health boards dealing with "life and death" professions be required to improve their work within two years, or face death by legislative action.

FRED BROWN, D-Fairbanks, chairman of the committee, presented the plan Monday, but no votes have been taken on it yet. The committee expects to finish considering the fate of the 11 boards audited under the 1977 Sunset Law by Thursday.

Brown said the proposal calls for the state Medical Board, which licenses and polices doctors, to be placed on "one-year probationary status." The committee is expected to recommend that the board hire an executive director to help straighten out its affairs, and return for another "sunset" review in 1980.

A legislative audit of the Medical Board said it had failed to "effectively police" the profession, and neglected to look into consumer complaints. The state Commerce Department's division of occupational licensing, responsible for investigating cases brought to light by the boards, shares the blame, the auditors said.

THE STATE DENTAL Board, meanwhile, should be given two years to shape up, the majority members of the committee suggest.

Unlike the Medical Board, the Dental Board is overly - restrictive in permitting outsiders to set up practice in Alaska, the representatives said.

The committee will recommend that the state boards of nursing and pharmacy, the two other "life and death" boards, be continued for four years, the normal period before another "sunset" review is required. However, significant changes were recommended for the pharmacy board.

Of the other seven health boards, those regulating psychologists, dispensing opticians and nursing home administrators should be phased out over the next year, and four others regulating veterinarians, chiropractors, optometrists and physical therapists should terminate within 1½ years, Brown said.

THE LICENSING functions of boards which terminate would generally be taken over the division of occupational licensing.

The legislative audit division, which prepared reports on all 11 of the health boards, was highly critical of many of them, but recommended that only two, those for nursing home administrators and dispensing opticians, be disbanded. The nursing home administrators agreed with the recommendation, as there are few of them in the state.

Asked to comment on the committee's proposal Monday, legislative audit chief Gerald Wilkerson said, "It would certainly put the fear of God into the rest of the boards."

AAO Program Attracts Residents

Over 150 ophthalmology residents attended a program sponsored by the American Association of Ophthalmology entitled "Tips on Starting Yourself in Practice." The program, as a special service to ophthalmology residents, was held during the Annual Meeting of the AAO in Kansas City, Missouri, and was conducted by George S. Conomikes, President, Conomikes Associates, Inc. Robert J. Crossen, M.D., Chairman, AAO Council on Ways, Means and Finance, opened the program by extending a welcome to the residents.

Conomikes Associates, Inc., a professional medical management consulting firm based in Marina del Rey, California, has worked with all types of medical practices throughout the United States and through the sponsorship of the AAO has conducted an annual series of workshops for ophthalmology residents and ophthalmologists in practice. For a complete schedule of practice management workshops for 1979 see page 14.

The AAO was happy to have served the residents by sponsoring the program in Dallas and hopes that all residents who attended benefited from Mr. Conomikes' expertise in the area of practice management.

U.S. Liable for Failure of Military Optometrist to Refer a Patient

The United States District Court for the District of Alaska (in *Robert K. Steele, etc. v. United States of America,* No. F75-27 Civil) on October 20, 1978, concluded that the failure of a military optometrist to refer a child patient, a medical military dependent, to a medical practitioner "was not a 'judgment call' but a violation of the governing principles of professional standards."

This ruling under the Federal Tort Claims Act [28 U.S.C. 1346 (b)] held that an eight-year-old boy, son of a soldier, who received medical care at the Eye Clinic, Bassett Army Hospital, Ft. Wainwright, Alaska, could recover for the loss of his right eye. The military optometrist examined the child in December, 1973, and in January, 1974, and found "no good reflex" and limited light perception. Eyeglasses were prescribed and the child was instructed to return for follow-up in four months. When seen on June 10, 1974, his right eye had limited eye perception. On June 17, 1974, an ophthalmologist found the child's right eye essentially blind and inflamatory. It was involved with a tumor and a retinal detachment. The eye was later removed as life threatening.

In an 18-page opinion, District Judge James M. Fitzgerald held, "Optometrists are trained to recognize symptoms of many diseases which may be discovered by eye examination. They are not permitted under recognized optometric standards to undertake a definite diagnosis but recognize this as the responsibility of a medical doctor. Obviously, it is foreseeable that failure to refer to a qualified medical practitioner, when required to do so, will result in delay of diagnosis and the institution of treatment; so it proved to be in Timothy's case. At the time the referral was finally made to an ophthalmologist, it was too late. Time had run out, and the only thing that could be done was to remove the eye.

"I conclude that the plaintiff is entitled to recover in this action from the United States for the loss of Timothy's right eye."

Capt. Blais To Head Navy Eye Care Unit

Navy Captain Bernard R. Blais is the first ophthalmologist assigned to the Navy's Bureau of Medicine and Surgery in the capacity of an ophthalmologist.

Dr. Blais' responsibilities will include coordination of medical and visual eye care for Navy and Marine Corps personnel, plus the design and development of a sight conservation program within the Navy to fulfill the requirements of the Occupational Safety and Health Act (OSHA).

Assigned to the Occupational and Preventive Medicine Division of BUMED, Dr. Blais will serve as project manager of the Sight Conservation Program for active duty Navy and Marine Corps personnel specifically and Civil Service employees generally.

A Professor of Surgery (Ophthalmology) at the Uniformed Services University of Health Sciences, Capt. Blais has been actively involved for many years in the educational and socio-economic aspects of medical eye care.

He earned his M.D. from the College of Medicine of the University of Vermont in 1958 and served his internship at the Naval Hospital, Portsmouth, Va. His residency was in Ophthalmology at the Naval Hospital, Philadelphia, and he also spent a year at the Armed Forces Institute of Pathology in Washington, D.C., under a Fellowship in Ophthalmic Pathology.

Dr. Blais has been certified by the American Board of Ophthalmology since 1966 and is a long-term member of the American Association of Ophthalmology.

MACHINE SIMPLIFIES EYE TESTS

With this space-age computerized device, technicians can have a patient's glasses prescription in hand in about a minute and a half. However, traditional procedures are still followed for much of the examination. At left, Dr. Bill Faulkner adjusts controls for a seated patient. At the other end of the machine optometric technician Carolyn Hazel prepares to take the reading, printed out on a small slip of paper.

Computer Gadget Comes To Town To Help Determine Eyeglass Needs

An automatic vision refractor, born of space-age technology, now is in service in Anchorage.

The computerized machine takes just 90 seconds to establish the correct prescription for eyeglasses. The patient needs no eye drops nor does he need to make decisions as to which correction helps him to see better.

Even if the patient can't speak, the machine will read his eyes and pick out the proper correction, at least to a point.

Installed at the Anchorage Eye Clinic, 1345 E. Ninth Ave., the machine is the only one in Alaska.

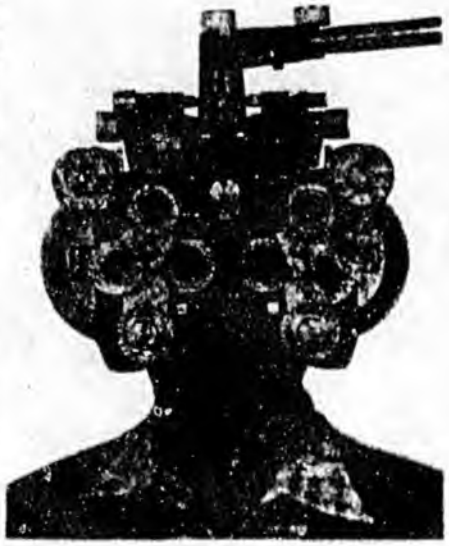
Dr. Bill Faulkner, one of the physicians at the center, says that while the instrument "will not replace the traditional refraction techniques, it will prove invaluable in detecting the proper visual prescription. It will also be utilized in contact lens fitting

It can pick up early clues to glaucoma and cataracts by pointing out that not enough light is getting into the patient's eyes.

The computer-based machine was originally developed by the National Aeronautics and Space Administration to test the vision of astronauts.

Another space-age spinoff adapted to ophthalmologists' offices is the tonometer, which screens for glaucoma. Instead of actually touching the eyeball to test inner pressure, the new machine measures and records pressure by blowing a whiff of air into each eye. This device has been in use in local offices for a year or so.

The refraction examination is simple. The patient looks directly into the computer screen, a technician at the opposite end presses a button, and he sees a pale green light, one eye at a time.



The readout tells the degree of nearsightedness or farsightedness, how much astigmatism is in each eye and where it's located on the eye's axis.

The machine, manufactured by Acuity Systems Inc. of Reston, Va., costs about $28,000. Company technicians are here training clinic staff in use of the machine.

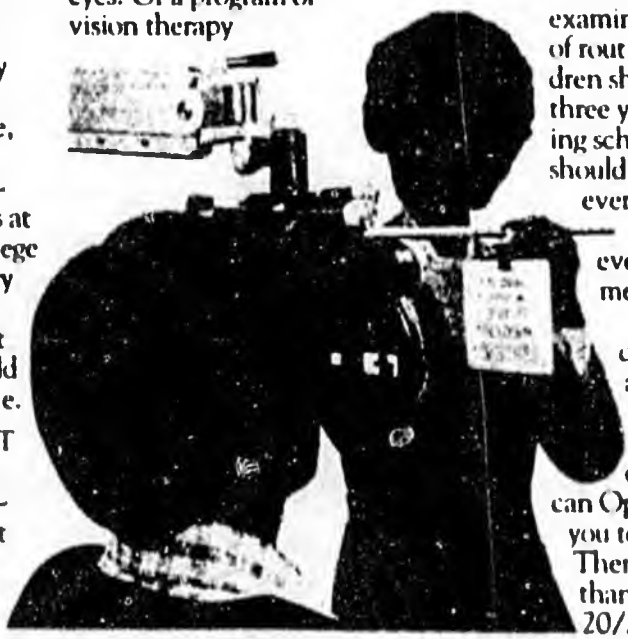
Municipality of Anchorage

Ladies Home Journal

# of 20/20 vision.

This amazing instrument is called a phoropter. It contains almost every possible lens combination. It can help determine which prescription is best for you.

HOW CAN I FIND OUT WHETHER MY EYES ARE WORKING RIGHT OR NOT?



It is important that you receive a thorough examination to determine how well your eyes are doing their job. A member of the American Optometric Association is a highly skilled doctor of optometry.

To become licensed to practice, today's optometrist must have a minimum of two to three years undergraduate college education plus at least four years at a specialized college of optometry. Doctors of optometry who are members of the AOA are totally committed to the ideal that every member of your family should receive the best vision care possible.

WHAT CAN AN OPTOMETRIST DO FOR ME?

Hopefully, the results of your optometric examination will show that you have no need for corrective lenses. If this is the case, suggestions may be made as to how you can practice good visual habits to prevent problems in the future, or keep a minimal vision problem from progressing.

If a vision problem is detected and you are already wearing glasses, your optometrist can update your prescription to make up for the changes that may have taken place in your eyes. If contact lenses are necessary or preferred to glasses, your family optometrist is highly qualified and skilled, through years of education and clinical experience, to provide you with the care and follow-up to ensure a proper fit and healthy eyes. Or a program of vision therapy may be needed or recommended to improve inadequate vision skills.

You should know that besides being able to detect conditions such as glaucoma or cataracts, a doctor of optometry may detect signs of diseases that are not directly related to vision but that show up in the eye. By looking into your eye with a special instrument, an optometrist can see blood vessels and the optic nerve, the only visible part of the nervous system. Among conditions which may be detected by internal eye examination are hypertension and diabetes. When signs or symptoms are discovered you will be referred to your family physician or other health care practitioner if necessary.

WHEN SHOULD I SEE AN OPTOMETRIST?

The American Optometric Association recommends that regular eye examinations be considered a matter of routine preventive care. All children should have examinations by three years of age and regularly during school years. After age 20, you should see an optometrist at least every two years. After age 35 you should have an examination every year, or as often as recommended by your optometrist.

But basically the answer to the question of "when should I see an optometrist?" is "NOW." Your eyes are always changing, and if you haven't had them examined recently, the American Optometric Association urges you to do so as soon as possible. There is a lot more to good vision than just passing an eye chart test. 20/20 vision isn't enough.

Your Family Doctor of Optometry. The person to see. And keep seeing.

The optometrists would have the legislature believe that they simply desire the use of a "little dose of eye drops" in order to serve the public better!

The enclosed page from one of their leading journals clearly portrays their real motives for legislating themselves into the world of eye drops. These people ultimately will be requesting that you create eye surgeons out of them.

The Optometrists have attached their drug bill to their Licensing Board renewal which will be renewed as part of the "sunset legislation" Thus renewal of their board will create drug pushers out of them. This is quite a sly maneuver! I hope the Free Conference Committee sees this and deletes it from their Board renewal bill.

Sincerely,

Peter E. Cannava, M.D.

OPINION

READERS COMMENTS

More on third parties

To the Editor:

May I clarify a statement in the article, "Third Party Care Comes to Steel Country," which appeared in your December issue?

The article states, "One schedule permits charging the patient the difference between lens and fee benefits and the O.D.'s charge."

It is important that doctors of optometry understand that the difference which they may charge is between the amount of the benefit and a reasonable and customary charge *established by the carrier.*

Although there are a few minor exceptions, the vast majority of the steel programs do *not* permit participating providers to charge the difference between the program benefit and the individual doctor's usual and customary charge. The ceiling is established by the carrier.

Terry O'H. Stark
Harrisburg, Pennsylvania

No time to look back

To the Editor:

Articles in various professional journals vehemently oppose the use of drugs, sphygmomanometry, nutritional counselling and other procedures which are essential to the practice of primary eye care.

The latest of these is a letter by Dr. Harold Friedenberg (Review of Optometry, October 15) who states, "Never has optometry been a profession capable of or trained for the therapeutic aspects of eye care."

I think that Dr. Friedenberg underestimates the capabilities and training of contemporary optometrists. And I am sure that he overestimates the capabilities and training of other doctors who use therapeutic drugs without restriction.

Other disciplines are evidently not as squeamish about expanding their professional scope. Opticians fit soft and hard contact lenses without benefit of formal undergraduate or graduate training. Nurses are expanding their scope of practice considerably with fewer professional prerequisites than are required of optometrists. Dental hygienists and denturists are seeking licensure to practice independently of dentists. Podiatrists and osteopaths practice on a level which is significantly higher than their original concept of practice.

The field of health care is changing and optometry must change with it. The rapid growth of retail optical concerns is a threat to private optometric practice. If our profession is to survive, it must upgrade its scope of services commensurate with that provided by other health care professions.

This is no time to look back at what has been. What will be is our immediate concern.

Vincent P. Lupica, O.D.
Bronx, New York

Coming sooner or later?

To the Editor:

It's time for Dr. Friedenberg to stop practicing 19th century optometry. If he feels he isn't capable of using therapeutic drugs, then he shouldn't.

But, please, let others practice a full scope optometry. We are prepared to treat. And, sooner or later, we will.

Martin A. Malz, O.D.
Philadelphia, Pennsylvania

Courage to stand up

To the Editor:

Congratulations to Harold L. Friedenberg, O.D., who had the courage to stand up and take an "Unpopular Stand" (Opinion, October).

Organized optometry is running scared, and it should be. One year ago I warned our state association president and executive director that our members didn't fully understand or appreciate the reasons for the adoption of the tremendous assessment to fund the National Consumer Communication Program. I predicted that we would lose many members, especially in and around big cities like Chicago.

My warnings were completely ignored and now, one year later, we have the results: Our local society, which had 58 members one year ago, is now down to 39, with the number dropping rapidly.

We can criticize the politicians. We can blame the FTC, Sears and Pearle Vision. But those of us who have a practice large enough to take in a young graduate, and who don't are the real reasons why our profession is going down the drain.

Our future lies with our new graduates. Please make a spot for them in your practice.

Herbert E. Smith, O.D.
Des Plaines, Illinois

O.D.'s: Ready for more

To the Editor:

I hope all the Jimmie Newells and Harold Friedenbergs have said their piece (Opinion, October), because you boys are bringing me and the profession right down.

The legal limitations imposed upon this poor profession frustrate me. And I'm sure they frustrate most other recent and future graduates.

We are intelligent and we are aggressive. We are ready to treat pathological conditions of the eye. And given the opportunity for postgraduate training, we are ready to perform surgery.

I'm sick and tired of referring a routine conjunctivitis or glaucoma patient. I'm sick and tired of giving in to the fancies of the FTC and the propaganda of commercialists.

Let's put ourselves above all this, let's shoot for the top. To do so, we must work to pass more laws that increase the scope of our practice. And we must think seriously of the reality of post-optometric training in the field of ophthalmic surgery and pathology.

To all the Jimmie Newell's of this profession, go cut a few lenses and adjust a few frames. But for God's sake keep quiet and allow this profession to go forward.

Alan Frank, O.D.
Berwick, Pennsylvania

The Honorable Glenn Hackney
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

Enclosed is information relating to Georgia's passage of diagnostic pharmaceutical legislation for optometry on Feb. 14, 1980.

There are now 32 states which allow the use of diagnostic drugs in optometry (24 by changes in optometry laws, 8 by existing laws). There is simply no excuse to allow the ophthalmologists to stall passage of the Alaska DPA bill (HB79 and SB75). Is there some compelling reason why this should not be passed, that has not been brought to the attention of the hundreds of legislators in these 32 states?

Respectfully,

Dennis Albert, O.D.

BULLETIN
From
OFFICE OF COUNSEL

VOL. XXXVIII, BULLETIN NO. 28 February 19, 1980

TO: O, T, DEC-C, Statutory Definition Advisory Committee, EMS, E, NE, State Association Presidents, Executives, Legislative Chairmen, Attorneys, Legislative Counsel, Statutory Definition Chairmen, Optometric Legislators, IAB-EC, State Board Presidents, Secretaries, Attorneys, Administrative Heads of Schools and Colleges, Mrs. Martin, AC, FRC, GC

SUBJECT: Georgia Legislation

FROM: Thomas E. Eichhorst, Counsel

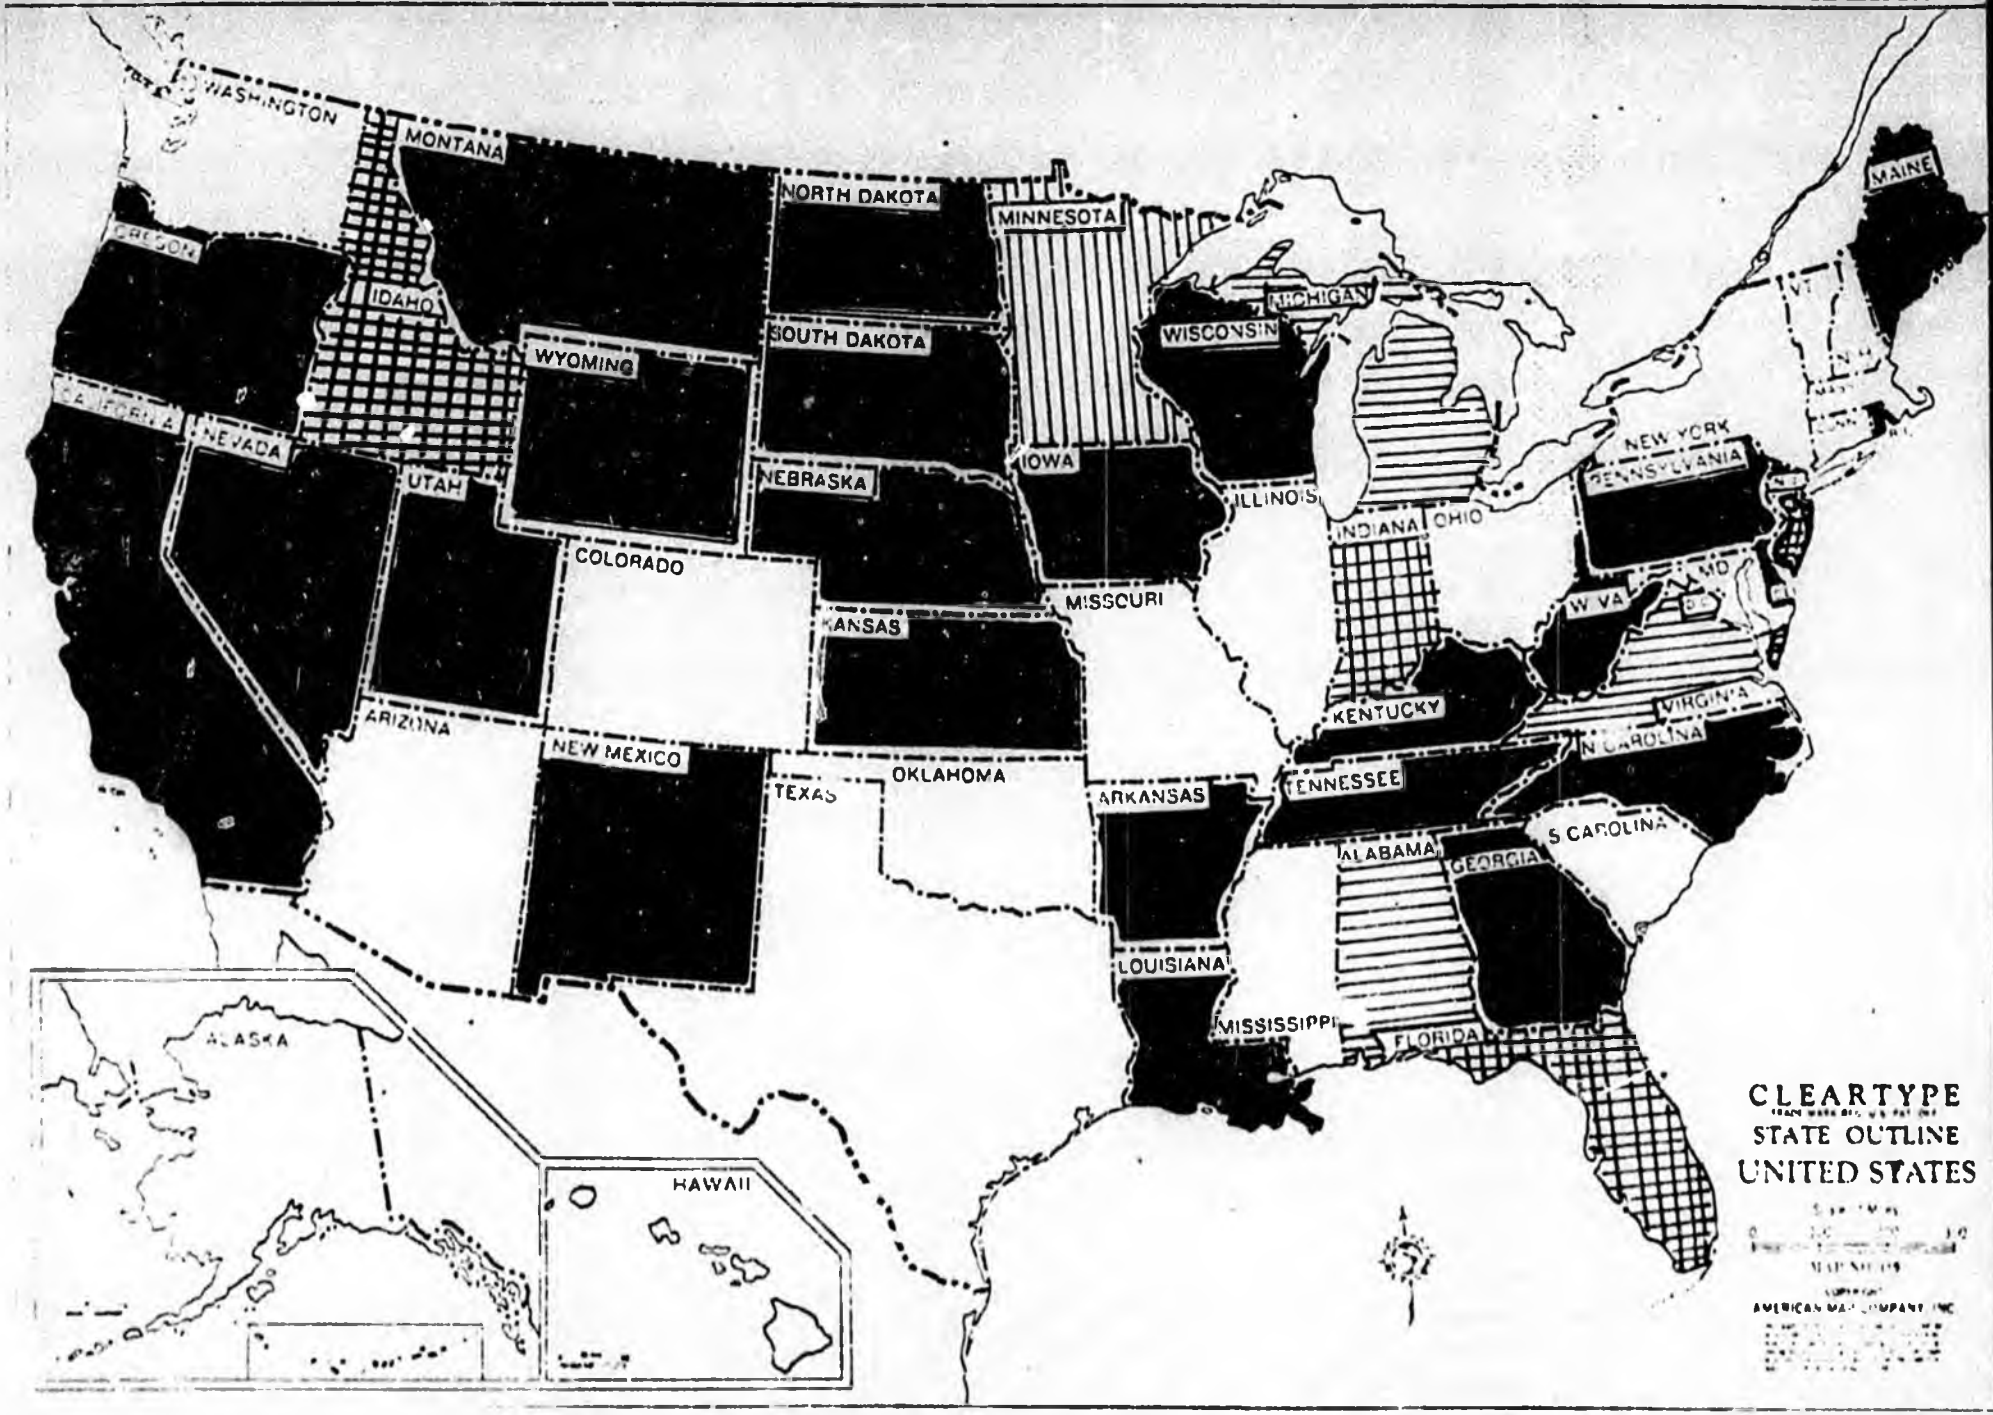
On February 14, 1980, Georgia Governor George D. Busbee, a Democrat, signed into law Senate Bill 31. This law, entitled, "AN ACT To amend Code Chapter 84-11, relating to optometrists, so as to permit the use of pharmaceutical agents for diagnostic purposes by optometrists; to provide for the appointment of an additional member to the Georgia State Board of Examiners in Optometry; to change certain of the provisions relative to the appointment of members; to provide for the confirmation by the Senate of persons appointed as members of the Board; to repeal conflicting laws; and for other purposes", is enclosed.

The bill passed the House on February 4, 1980 by a vote of 121-42. It passed the Senate, as amended, on February 5, 1980, by a vote of 33 to 22.

Georgia is the twenty-fourth (24th) state to enact legislation specifically authorizing optometrists to utilize pharmaceutical agents. Twenty-two (22) states authorize optometrists to utilize diagnostic pharmaceutical agents; two states authorize optometrists to utilize pharmaceutical agents for diagnostic and therapeutic purposes. The list (and dates of enactment) of these states is as follows:

UTILIZATION OF PHARMACEUTICAL AGENTS BY OPTOMETRISTS

NAME	DATE OF ENACTMENT
Rhode Island	July 16, 1971
Pennsylvania	March 1, 1974
Tennessee	May 8, 1975
Oregon	May 20, 1975
Maine	June 24, 1975
Louisiana	July 6, 1975
Delaware	July 10, 1975
*West Virginia	March 4, 1976
California	July 9, 1976
Wyoming	February 17, 1977
New Mexico	March 4, 1977
Montana	April 12, 1977 (at 10:10 a.m.)
Kansas	April 12, 1977 (at 2:00 p.m.)
*North Carolina	June 3, 1977
Kentucky	March 29, 1978
Wisconsin	April 29, 1978
Nebraska	February 13, 1979
South Dakota	March 15, 1979
Utah	March 21, 1979
North Dakota	March 22, 1979
Arkansas	April 2, 1979
Nevada	May 25, 1979
Iowa	June 8, 1979
Georgia	February 14, 1980



*both diagnostic and therapeutic

[In addition, there are eight (8) other states that do not statutorily prohibit the use of DPAs by optometrists; several of these states have attorney general opinions (+favorable) (-unfavorable) on this point: Alabama (AG-), Florida (AG+), Idaho (State Board Statement +), Indiana (AG+), Michigan (AG-), Minnesota, New Jersey (AG+), Virginia (AG-).]

For your information we are including an updated map showing geographically the utilization of pharmaceutical agents by optometrists.

Dear Mr. Hackney,

I would like to ask your support for Bill No. 35. I see no reason why properly trained doctors of optometry should not be permitted to use diagnostic drugs in their field. In other states and in the armed forces optometrists do use diagnostic drugs. Why not in Alaska? I again urge your support for Bill No. 35.

Thank you.

SENATE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE
LETTER OF INTENT FOR SB 80

The Senate Health, Education and Social Services Committee feels the University of Alaska has made good faith efforts to comply with legislative requests to get its financial affairs in order. It is the intent of the Health, Education and Social Services Committee in passing out SB 80 that the University should be allowed a fund for flexibility of operations. However, the Committee feels that the Finance Committee should look carefully at the appropriateness of the figure called for in SB 80.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making supplemental appropriations to the University of Alaska, working capital fund and grievance procedures; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $4,829,000 or the amount lapsed by the university at the close of FY 1978, whichever is less, is appropriated from the general fund to the University of Alaska for the purpose of removing the deficit stated in the university's annual report and establishing a working capital fund.

* Sec. 2. The sum of $38,500 is appropriated from the general fund to the University of Alaska for the purpose of providing funds for grievance procedures with the Alaska Community Colleges' Federation of Teachers.

* Sec. 3. The unexpended and unobligated portion of the appropriations made in this Act lapses June 30, 1979.

* Sec. 4. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Chapter No.

79

AN ACT

Authorizing the Department of Administration to make advances to the University of Alaska; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 37.10.088(a) and (b) are amended to read:

(a) During any fiscal year the Department of Administration may make advances to the University of Alaska against verified receivables from appropriations for grants and contracts from federal or private sources of the university and upon condition that the university reimburse the fund for these advances from funds received by the university from federal or private sources. The advances may not exceed 80 per cent of the verified receivables from grants and contracts appropriated from federal or private sources.

(b) Until June 30, 1980, the total of advances in any fiscal year may not exceed 20 per cent of the total of grants and contracts from federal and private sources appropriated to the university for that fiscal year. After June 30, 1980, the total of advances in any fiscal year may not exceed 10 per cent of the total of grants and contracts from federal and private sources appropriated to the university for that fiscal year. The amounts advanced in any fiscal year shall be repaid in full to the department within 120 days following the close of that fiscal year. If the repayment is not made on a timely basis, the department may withhold amounts due from state fund appropriations for the university.

* Sec. 2. This Act takes effect immediately in accordance with AS 01.10.070(c).

Approved by the Governor: June 28, 1978
Actual Effective Date: June 29, 1978

Gentlemen:

At its meeting on February 1, 1979, the University Assembly passed the following resolutions in support of the University of Alaska administration.

1. The University Assembly supports the University of Alaska administration in requesting that the $4.87 million lapsed by the University of Alaska during FY78 be reappropriated to the University in addition to the regular FY79 appropriation.

2. The University Assembly supports the University of Alaska administration in requesting that the state government appropriate only the General Fund monies and not university generated income and grant monies.

As you are aware, the University Assembly is "the all University body including both four-year and community college units made up of students, classified staff, faculty and administration charged by the Board of Regents with the task of recommending policy".

SB 88

Sen. Meland. This bill has been before this committee before. It saw action a year ago, but after going through both this committee and the Judiciary Committee it somehow got lost before the 162 days was up.

SB 88 is a bill put in by request from a principal from the Sitka Junior High by the name of Duke Duncing. I think possibly it might be just as well to give the committee a little background from a letter that I did receive which caused me to go ahead and have the bill written up. Mr. Duncing sees the problem this way. He says, 'I've tried to solve the truancy problem by following the procedures outlined under the compulsory attendance law (AS 14.30.030). At that time, 1970, it took most of the year to bring the problem to the attention of the courts and by then the school year was nearly over. Meanwhile students were truant from school for two or three weeks at a time and I could find no way to get them back to school. Currently both the school attorney, Mr. Weddle of Juneau and Assistant District Attorney, Mr. Jim Hanley advised that it is virtually impossible to use the compulsory attendance law as you do have to prove wilful intent on the part of the parent. He goes further in saying while looking for a more expedient solution to the problem after my experience with the compulsory attendance law, I talked to the Honorable Judge Carlson and his solution to the problem was filing a petition under the juvenile statutes, which stated a minor came under the perview of the court when he is habitually truant from school or home or habitually so conducts himself as to injure or endanger the morals or health of himself or others. Mr. Dunsing said this worked very well as long as Judge Carlson sat on the bench in Sitka, but there was some reluctance on the part of subsequent Superior Court judges to follow through, but it still always was effective when they did. The new statutes took out the explicit wording in regard to truance and so consequently it is much more vague. The result it where that we are back to where we were several years ago with still no effective way to get truants back in school.

It has been my experience the last two or three years that when students are habitually truant from school they end up getting in more trouble than they would have been if they were in school.'

That is briefly what he has in mind. Last year when this bill came out of both this committee and the Judiciary committee there was no fiscal note on it. I am very suprised to hear that this little four line change now, comes out of Health and Social Services and says that to be effective the fiscal note is going to be $1,946,000 up to $2,334,000 by 1984. H&SS asking for 51 social workers to put this into effect. I'll be most anxious to listen to testimony.

Elisabeth Murktarian. At the present time the statute does not cover habitual truancy and the statute primarily addresses child protection. The department doesn't feel that truancy alone is reason enough to intervene in a family and iniatiate court action with regard to child protection.

Sen. Hackney. Is that why the fiscal note came out so high?

Elisabeth Murktarian. In terms of the fiscal note, it was felt it would be necessary to have additional staff to perform these functions and would require having a social worker in each of the 5 highschools in Anchorage and one for each school district.

It would be a social worker III. I'm not sure what the salary is, I think it is a range 16.

Sen. Ferguson. What you are attempting to do here is have a social worker in every school.

Elisabeth Murktarian. Every school district, except in Anchorage where we'd have one associated with the five high schools in order to address the specific problems of truancy.

Sen. Fahrenkamp. I wonder if there is why there is one needed for each high school in Anchorage, why there isn't one needed for each of the high schools in Fairbanks?

E. Murktarian. I'm not sure why that was done.

Sen. Fahrenkamp. Mr. Chairman, do you know the salary of a range 16?

John Pugh. It's around $2,000 a month approximately.

Sen. Sturgulewski. Mr. Chairman, if we had this kind of thing on the books previously, I have a good idea that it was there for not a question of somebody playing the truant officer daily as in olden days, but that it was an additional protection to be utilized in those cases when it was particularly needed. Is that true? How did we handle it before? Isn't there a way of having something like this on the books that gives the kind of a tool in those particular cases when it is needed. I find it a little bit offensive to think that there is only one way to apply a law. We just don't enforce laws that we. You just don't go out and create a whole world because you've got maybe 10, 15, 20 or 30 or whatever the number of kids are across the state. Why do we have to, in order to get to what must be a problem, have to do this great big glorious that is going to cost us a couple of million dollars? Isn't there an inbetween way to get it on the books and to add that tool to whoever has other charges and do something with it?

E. Murktarian. I think that if truancy is associated with other problems in the home such as neglect or abuse or some of the other things which are covered in AS 47.10.010 that the department can intervene under the present statute.

Sen. Sturgulewski. We have testimony that's not true, then what's happening in the delivery system somewhere that says that it has to be listed because we do have areas where we are habitually absent as a condition, refusing to accept available care as a condition, and I can't see what the big deal is just adding one more thing that would give evidence.

Sen. Hackney. That escapes me too. We don't put a social worker in every school in the state to deal with the other areas that come under putting kids under the jurisdiction of Health and Social Services.

E. Murktarian. The other areas which are covered in the statute have to do with problems in the home and in some instances petititions are filed and children may be placed in foster care and is working with the family. In terms of school attendance alone, the role I think of the social worker would be somewhat different in terms of what a social worker could do to insure school attendance.

Sen. Fahrenkamp. What's wrong with truant officers?

Sen. Sturgulewski. Could we take a look at the statute that is being proposed. Are those things mutually exclusive or are those things added together to say, there is a problem, we are going to go to court and we are going to have things done.

Sen. Hackney. This is the section of law that deals specifically with kids who get . . .

Sen. Sturgulewski. It just seems to me that what we are doing is adding another category of decision making, we are not creating a whole new field, I mean these things work together.

E. Murktarian. The way the statute had been changed in 1977 primarily the categories under which proceedings can be made for a child in need of aid have to do primarily with child protection situations, where a child needs somekind of protection.

Sen. Sturgulewski. Is there another area in this statute where it might more appropriately be located. When we are talking about . . . The thing to do is to get a child somehow cared for to where they can get help. Would you find that the fact that they're habitually truant from school, they've got aproblem. Is that a different than the child who is habitually absent from his home? Might not your solution be the same thing? You've got a kid in trouble. He needs to be identified. I'm just having some real problems seeing why we need a different system for this child who has obviously got a problem if he is not getting to school.

E. Murktarian. Under the exiting statute if there are other problems in his nonattendance from school, the child can be served.

Sen. Hackney. Why couldn't the child be served in the normal social worker situation instead of putting a social worker in every school? Are you saying caseloads are to the point where . . .

E. Murktarian. Caseloads are high, yes. And this would be an additional responsibility related specifically to schools and ensuring school attendance.

Sen. Fahrenkamp. If you took 51 social workers and you paid them $2,000 a month for a nine month period, and added to it the $25,500 that they need for equipment, I don't know what equipment they need, and the $15,500 for commodities, whatever that is, and the $6,100 for contractual services, and the $4,600 for travel, I can't come anywhere near, I am just about a million dolla s short of their figures.

Sen. Meland. I am just wondering whether the young lady can say, I'm most anxious to know when those words were stricken, did the state all of a sudden start saving $2 million?

Sen. Sturgulewski. Could we have Sen. Meland once again, why do we need this?

Sen. Meland. Well, I've tried to answer. . . The problems are listed in Mr. Duncing's letter. And he goes on to say 'the most outstanding example this year is a girl, age 14, who had not been in school since the 3rd or 4th day of school' . . .

Sen. Sturgulewski. Who is having the problem? Would it be the one that would normally be enforced through H&SS, would that be a logical place to handle this kind of thing?

Sen. Meland. What he is trying to do, I think, is to atleast have the court enter into it. He says 'we've tried to get something done in both cases but cannot find anyone willing to pursue udner either the new law or the compulsory attendance law, we've had 2 or 3 other cases in the district this year that would there have been an avenue, we would have done something. These are not situations where we wish to see anyone punished, and I've never seen anyone punished unless other things were brought into the case besides truance. I think this is quite important too.

I think you kind of have a handle on it. We're not trying to put kids in jail or any such. It seems to be sufficient to have a couple of three cases a year brought before a judge and have him lay out the alternatives to discourage further truancy, this also acts as a deterrant to others who might be considering it and in some cases the judge determines it is not the fault of the child but tht of the parents. In either case it brings the attention of someone who had the power to do something about it instead of having it drift in limbo.

Sen. Hackney. I don't think we are talking about that many kids and so I suppose the logical question that comes is, if we go ahead and pass this bill and the department gets an extra 20 kids around the state dumped on them as the result of it, it it going to cause the department to flounder if we don't allow you any more bodies to . . .

E. Murktarian. I'm not sure. I don't have the figures available of the number of children we are talking about but again, it has to do with whether or not something which has to do with the school system and primarily should fall under the responsibility of the child action agency.

Sen. Fahrenkamp. It seems to me that truancy is a school district function or school function, this to me is conflict and I'm wondering if we don't have it under the wrong section.

Steve Hole. The department supports the bill without respect to the fiscal implication. Essentially there are two problems with the compulsory attendance law. The first is the issue of remedy and the second is the issue of jurisdiction. In the compulsory attendance statute, the remedy is with the parent, if the parent doesn't care enough to insure that the kid attends school, throwing the parent in jail or fining the parent isn't going to make any difference. The second problem, that of jurisdiction, is that in order to initiation action under the compulsory the school district has to act as a quasi-enforcement role. That is not a role easily assumed by most school districts. The reason the proposed statutory change appears to have some merit is that in those rare instances where the issue is that of jurisdiction, the kid is running lose, there is obviously no parental control, the issues go far beyond compulsory attendance or truancy, but that is one of the issues. It provides a very immediate means for a case to be presented to a court, the court to impose its jurisdiction upon the child if necessary, put him into a foster home. If necessary, take a variety of steps but have immedicate reaction with respect to the kid.

In other words, the remedy is with the child. The problem.

Sen. Hackney. I would suggest that we might entertain a motion to pass the bill out with whatever recommendation you feel comfortable with, and attach to it a letter of intent that would say it is not the intent that masses of social workers be hired to take care of the problem.

Sen. Sturgulewski. It says enactment of the bill would essentialy remove the responsibility for truance investigation from the various school districts throughout the state. That bothers me. If that's true, that certainly isn't our intent either. There is a flat statement there so if we pass this, will we make the situation worse because we are not getting the schools to do anything.

Sen. Hackney. That is an excellent point. I would not see it that way, I would see it as being an addition of a little more strength for the schools to be able to deal with those occasional situations where habitual truancy is . . .

E. Murktarian. In response. The schools district, I think he mentioned, were having difficulty with assuming the enforcing role in regard to truancy, that role would end up being transferred

to the Division of Social Services and they would end up with the role of trying to enforce student attendance. Petititioning the court, bringing it under court jurisdiction is not necessarily going to ensure that a child is going to go to school even if you place him in a foster home.

Steve Hole. We don't see this bill as having any impact upon present truancy monitoring procedures that districts might have interms of home-school coordinators, counsellors, those kinds of things. Again, its a mechanism that would be imposed in very rare instances, but where it is very truly needed. It only goes one step beyond what the districts presently do in that it provides a mechanism to bring that which is a real problem for very few children to the attention of someone who can make a difference. Presently, there is no jurisdictional control in terms of a district doing anything with a problem child who really needs some help, but who does not attend school or whose parents do not care.

Sen. Sturgulewski. Any statute that we might have that deals with the responsibility of the school district to handle truancy would still be in effect. I would move that we pass out SB 88 with individual recs with the letter of intend covering two areas, one regarding social workers and the other the fact that it is not our intent this bill would remove this responsibility for truancy investigation from the various school districts.

No obs, so ordered.

LETTER OF INTENT FOR SB 88

It is the intent of the Senate Health, Education and Social Services Committee that those rare cases of need with which the School District cannot cope would be addressed by SB 88. It is not the intent that this would remove from the School Districts their present role in enforcing attendance.

Glenn Hackney
Chairman

Date: March 14, 1979

INTRODUCTION OF BILLS (Senate) (Cont'd)

Truant Children

SENATE BILL NO. 88, by Senator Meland. Amends AS 47.10.010(a)(2)(A), under Art. I "Jurisdiction of the Juvenile Courts," to add "habitually truant from school" to conditions which bring a minor under the jurisdiction of the Juvenile Courts. (1977 amendment re-wrote (a) and omitted this condition.) Does not provide for effective date.

Introduced January 31 and referred to HESS, then to Judiciary.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SENATE BILL NO. 88

"An Act relating to truant children."

This Bill would amend AS 47.10.010(a)(2)(A) to include habitual truancy from school as a reason for adjudication of a child as a "child in need of aid."

The Governor's Children's Code Task Force, after considerable study and deliberation, recommended that truancy be eliminated as a reason justifying adjudication of a child as a child in need of aid The Department supported this recommendation which was accepted by the Legislature and became law in 1977.

The Department does not consider truancy alone as sufficient justification for it to intervene in a family and to initiate court action. If the Department is required to assume this additional responsibility it would be very costly, requiring the hiring of staff to deal with this problem area.

In addition, if a child protection situation such as abuse, neglect, or abandonment exists in addition to habitual truancy, the Department can intervene and initiate court action under AS 47.10.010(a) as it presently reads. Under AS 47.17.020, schools are required to report child abuse and neglect situations to the Department of Health and Social Services.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Enactment of this bill would essentially remove the responsibility for truancy investigation from the various school districts throughout the state. It is difficult, at this time, to determine exactly how many social workers would be required to meet this obligation. In all, districts would require part of one social worker's time, larger districts more than one worker. We have taken, therefore, an average of one per district, with the exception of Anchorage, where we have established six. The salary costs are based on current salary schedules, plus the additional FY 79 4% increase and an estimated 5% salary increase for FY 80. Reimbursement of mileage at $.25 a mile x an average of 30 miles a month x 51 workers would minimally be required. Telephone rental would be necessary at an average of $10 a month for each worker; general office supplies at an average of $300 a year each; and a desk and chair, at an average of $500 each.

Pouch V
Juneau, AK 99811

Dear Senator Hackney,

I am writing in support of Senate Bill number 88 relating to truant children.

The juvenile statutes which were adopted a couple of years ago took out any specific wording regarding truancy. Thus no one wants to touch the problem. What we have in effect is a compulsory attendance law with no effective way to enforce it. I have been advised by both our school attorney, Mr. Randy Weddle of Juneau, and the Assistant District Attorney, Mr. Jim Hanley, that it is virtually impossible to use the compulsory attendance law as one must prove "willful intent" on the part of the parent.

These are not situations where we wish to see anyone punished and I never saw anyone punished under the old statute unless other things were brought into the case besides truancy. It seems to be sufficient to have a couple or three cases a year brought before a judge and have him lay out the alternatives to discourage further truancy. This also acts as a deterrent to others who might be tempted to be truant from school. In some of my past cases the judge determined that it was not the fault of the child but that of the parents. In either case it brings the situation to the attention of someone who has the power to do something about it.

It has been my experience that when students are habitually truant from school they end up getting into other trouble with the law when they should have been in school.

I urge passage of Senate Bill 88 so that schools again have an effective tool to see that children are in school attendance as they should be to become productive citizens.

Sincerely,

Daniel D. Dunsing

Senator Hackney:

I would like to express my concern over the too frequent situation of children under the age of 16 years who attend school only sporadically and whose education is then severely limited. Many of these children begin having serious attendance problems in fifth or sixth grade - sometimes earlier. At this time the Court has been unwilling to give attention to this problem, even after unsuccessful efforts to work with the family.

I hope that Senate Bill #88, presently in committee, will help by providing one more alternative in working with these students and their parents. Please support this bill.

Thank you

Juneau, Alaska 99811

Dear Senator Hackney:

Ever since the "child in need of supervision" category was wiped off the books several years ago, there have been no teeth in the compulsory school attendance laws of this state. As an elementary school principal in Sitka, I have observed numerous occurrences of habitual absence from school on the part of young school-age children. In all of these cases there was neglect on the part of the parents of these children, in my opinion, and the state is doing nothing to correct this bad situation.

I go to a lot of effort to document cases, then turn the information over to Division of Family Services or to the State Division of Corrections. They try, in many cases, to help, by contacting the parents and talking to them. But there seems to be little they can do based on poor attendance at school, alone.

It is not my wish that the schools take over the affairs of parents. But when those parents violate the laws of the state by not seeing to it that their children get to school regularly, or when a parent cannot handle a child and the child will not go to school or do anything else his or her parents tell him to do, that child needs some kind of supervision.

I therefore support Senate Bill 88 and urge that your committee recommend it to the full Senate.

Very truly yours,

Ronald A. Rhodes

Dear Pete,

Time is rolling by and I wanted to make contact with you on the truancy matter one more time before the 1979 Legislature gets under way.

I asked Robert Schell, Baranof Elementary Principal, to bring the truancy subject up at the Alaska Elementary Principals' meeting this year. He reported back to me that he didn't have to as others had the same concern and brought up the subject. He assures me that there will be a letter coming from the Elementary Principals' Association supporting our proposed legislation. Perhaps you can advise us as to where such a letter should be directed and what other kinds of support would be helpful.

Also, enclosed is a letter from the school attorney outlining an interesting problem due to the new statutes.

Have a pleasant Holiday.

Sincerely,

Daniel D. Dunsing, Principal
Blatchley Junior High School

Neil Haavig, Superintendent
Greater Sitka Borough School District
P. O. Box 179
Sitka, Alaska 99835

Dear Neil:

The California Supreme Court has recently handed down a decision of some importance to school districts. Since there is no Alaska case law directly on this point and since the Alaska Supreme Court often looks to the California Supreme Court as new law develops, this decision could have an impact on the potential liability of school districts in this state.

In Hoyem v. Manhattan Beach City School District, the ten year old plaintiff had left the school grounds, apparently without the knowledge of the administration, while classes were still in session. He was thereafter struck by a motorcycle at a public intersection and was seriously injured.

He sued the school district on the grounds that the accident was a proximate result of the school district's negligent supervision of him in failure to keep him on the school premises. The school district moved to dismiss the Complaint on the grounds that they could not be liable for his leaving the school premises contrary to regulations and a resulting accident which occurred off the school grounds.

The California Supreme Court ruled that the Complaint did state a claim against the district and that it was a jury question as to whether the district had been negligent in failing to properly supervise the plaintiff and whether the accident was a proximate result of that failure. The case has now been sent back for a jury trial on these issues.

Although this was a decision by a narrowly divided Court (4-3), it poses a potential expansion of district liability if it is to be followed in this state. It is particularly troubling since, given the recent amendments to the Children's Code which make truancy prosecutions exceedingly difficult if not impossible, districts will have their truancy procedures strictly scrutinized if they ever find themselves in a case such as this one. Although there may well be cause for frustration as to the effectiveness of procedures to restrict truancy problems, it would appear that just from the potential liability standpoint it is important that district personnel continue to advise parents of truancy problems and follow the other procedures which the district may specify in this regard.

Yours very truly,

Lawrence T. Feeney

CHAMBERS OF
THOMAS B. STEWART, JUDGE

May 9, 1978

The Honorable H. D. "Pete" Meland
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Pete:

This is in response to your letter of May 3, 1978, asking my comments on Senate Bill 490, concerning truant children. At the outset I should note that whatever is said in this letter constitutes only my own views and does not in any way reflect the views of any other judges or of the court system at large. I cannot speak officially on behalf of the court system concerning any legislation.

Among the materials you forwarded was a memorandum from Joseph A. Guthrie of the Legislative Affairs Agency which purports to state that I have refused to exercise any jurisdiction at all over truants. This is not a correct statement, and I do not know where Mr. Guthrie may have obtained it. In fact, no one has sought to charge a minor before me as a delinquent because of truancy, and accordingly I have never had any occasion to rule on the question judicially. It is possible his comment came at second or third hand because of some discussions in which I and other judges informally raised questions about the meaning of various provisions of the children's code as substantially amended in 1977.

It seems apparent from those revisions of last year that the major effort at revision of the juvenile code, which was largely sponsored by an active group in Anchorage, included an intent to take truant children, and others who were not delinquent in the sense

of violating criminal laws, completely out of treatment by the juvenile justice system. In other words the intent appeared to be to have problems such as truancy, alcoholism and other matters handled by agencies not connected with the police, district attorneys, or courts. This is a view that has affected the juvenile laws in many states throughout the nation in recent years. Without commenting on the overall merits of this view, I would at least express concern that this removal of so-called "status offenders" from the justice system leaves a void, unless some other societal agencies are prepared to address the problems and needs of these minors in some meaningful way. Many hold the view, for example, that truancy is a matter that should be handled within the confines of the school system and their relationships with parents, and this view seemed to be reflected in the amendments to the juvenile code that were adopted last year. You may be able to confirm this in more detail, if you wish, by contacting Andrew Brown, the attorney who prepared the language at the behest of the group which sponsored the amendments. Another person knowledgeable in this area would be Betsy McGuire, who was executive director of the office of child advocacy (since abolished) that coordinated the efforts.

Senate Bill 490 as drafted would of course make clear that truancy is a matter that should be handled through the courts, and the language proposed would seem to be fully sufficient for that purpose.

With respect to the amendment that suggests some changes in AS 14.30.045 and .030, it appears that this language would broaden the utility of the compulsory school attendance law to enable prosecution, or the threat of prosecution, of parents who are not responding when their children are truant. I am in general inclined to view that this statute is addressed to parents and is not a suitable vehicle for finding a child delinquent. Again, however, this is a view not determined from any case brought against a child to find him or her delinquent as a result of truancy. Accordingly, I would not want any statements made here to suggest the position I might take in a case where that issue is appropriately argued and submitted for judicial treatment. I am generally in accord with the views expressed to you by others that intent to violate the statute must be found before a conviction could occur, and this complicates the enforcement of these provisions of the law. The language offered would appear to be suitable to accomplish the purpose apparently intended.

Please let me know if I can be of any further assistance on this subject, which I would be glad to discuss with you informally if you wish to call.

With personal regards,

Very truly yours,

Thomas B. Stewart
Presiding Judge

MEMORANDUM February 3, 1978

SUBJECT: Court Jurisdiction over Truant Children (W.O. 4818)

TO: Senator H.D. Meland

FROM: Joseph A. Guthrie, Legislative Counsel

Mr. Dunsing's problem arises from a legal dispute over the coverage of AS 47.10.010(a), following its amendment last year by sec. 32, ch. 63, SLA 1977. AS 47.10.010(a) lists those acts committed by children, or situations in which children may find themselves, which if established by proof, give the court "jurisdiction" over a minor child. In this context, jurisdiction refers to a legal relationship between the court and the child whereby the court has the power to impose any of the number of dispositions (e.g. institutionalization, probation, termination of parental rights) on a child found to be under the court's jurisdiction.

Prior to last year's amendment, AS 47.10.010 provided that a court could exercise jurisdiction where a child was proven to be "habitually truant." That phrase was removed by sec. 32, ch. 63, SLA 1977.

The legal dispute is over whether a court can still exercise jurisdiction over a truant. The district attorneys and Judge Craske say that jurisdiction can still be exercised by finding a child to have violated AS 14.30.010 and AS 14.30.020 (the compulsory school law) and thus by virtue of those violations of laws, a delinquent under AS 47.10.010(a)(1). Judge Stewart, on the other hand, argues that the intent of the legislature in enacting sec. 32, ch. 63, SLA 1977 would be violated in finding a truant delinquent and therefore refuses to exercise any jurisdiction at all over truants.

This ambiguity could be solved by adding the words "habitually truant from school" to AS 47.10.010(a)(2)(A), thereby making it read:

> Sec. 47.10.010. JURISDICTION. (a) Proceedings relating to a minor under 18 years of age residing or found in the state are governed by this chapter, except as otherwise provided in this chapter, when the court finds the minor
>
> (2) to be a child in need of aid as a result of
>
> (A) the child being habitually absent from his home, habitually truant from his school, or refusing to accept available care, or having no parent, guardian, custodian, or relative caring or willing to care for him, including physical abandonment by...

Please let me know what you want to do.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF LAW

CRIMINAL DIVISION

POUCH KC – STATE CAPITOL
JUNEAU, ALASKA 99811

June 5, 1978

The Honorable H. D. "Pete" Meland
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Re: Senate Bill 490

Dear Senator Meland:

Your letter of May 3, 1978, to Juneau District Attorney Larry Weeks concerning the problem of children truant from school has been referred to my office for response. Please accept my apologies for the delay but we have been tied up until just the other day in work with Senate Judiciary on the proposed revision to the criminal code.

As I understand it, what you wish to accomplish through the referenced legislation is to permit the superior court to become involved in serious truancy matters without the necessity of proving that a crime under AS 14.30.090-.040 (the compulsory education provisions) has been committed.

Your question is whether the bill as originally introduced or the proposed amendment attached to your letter would adequately address the issue. It is our opinion that the better approach is embodied in the original version of SB 490.

The original version of the bill directly and concisely clarifies the jurisdictional question concerning habitual truants and would clearly permit court intervention without resorting to criminal proceedings and attaching the stigma of delinquency to the child. An habitually truant child would be deemed as a "child in need of aid" under AS 47.10.010(1)(2) and would be treated in a similar manner as the other statutory categories of runaway and abandoned children.

03-C7LH

The proposed amendment attached to your letter would accomplish two things unrelated to the goal of the original version of the bill. First, section 1 of the amendment would permit an habitually truant child to be suspended from school. It is our imprsssion from the supporting materials attached to your letter that the desired result is to require children to attend school and not to prohibit them from doing so. Second, section 2 of the amendment merely makes specific what has always been apparent from the face of the statute, that parents and guardians may be criminally charged with a violation of the compulsory education law.

I trust that we have been responsive to your inquiry. If you have any further questions, please do not hesitate to let us know.

Very truly yours,

AVRUM M. GROSS
ATTORNEY GENERAL

Sec. 37.05.220. Purchasing agent. The Department of Administration is the purchasing agent for the state. The department shall

(1) purchase, rent, or otherwise provide for the furnishing of supplies, materials, equipment, or contractual services for all state agencies;

(2) have power to authorize an agency to purchase directly certain specified supplies, materials, equipment, or contractual services under conditions and procedures prescribed in § 230 of this chapter;

(3) prescribe the manner in which supplies, materials, and equipment shall be purchased, delivered, stored, and distributed;

(4) prescribe the time, manner, authentication, and form of making requisitions for supplies, materials, equipment, and contractual services;

(5) fix standards of quality and quantity and develop standard specifications after consultation with the several state agencies, and approve or determine final specifications;

(6) have power to transfer to or between agencies or to sell or trade in supplies, materials, and equipment of agencies which are surplus, obsolete, or unused; and the department shall make proper adjustments in the accounts of the agencies concerned;

(7) prescribe the manner of inspecting deliveries of supplies, materials, and equipment and of making tests of samples submitted with bids and samples of deliveries to determine compliance with specifications;

(8) prescribe standard forms for bids and contracts for construction, purchases of supplies, and other purposes, which bids and contracts may contain provisions which the department considers necessary; but all contracts for construction shall require the filing of an acceptable performance bond and a penalty provision for failure to perform the contract according to its terms;

(9) provide for other matters which may be necessary to carry out the provisions of this chapter and the rules and regulations adopted under it. (§ 1 art IV ch 82 SLA 1955; am §§ 6, 7 ch 186 SLA 1957; am § 1 ch 55 SLA 1960)

Am. Jur. and C.J.S. references. — 42 Am. Jur., Public Funds, § 1 et seq.
81 C.J.S. States §§ 168 to 176.

Sec. 37.05.230. Competitive bids. In the manner provided in this chapter and rules and regulations established under it

(1) a contract for construction and repairs, or a purchase of and contract for supplies, materials, equipment, and contractual services must be based on competitive bids; an award shall be made to the lowest responsible bidder after advertising for bids, except that (A) Repealed by § 2 ch 92 SLA 1967; (B) a bid shall be awarded to an Alaska bidder if his bid is not more than five per cent higher than the lowest nonresident bidder's; and (C) competitive bids need not be required (i)

for contractual services where no competition exists; (ii) for sales involving fair trade items; (iii) when, in the judgment of the purchasing agent, food, clothing, or medical supplies, or materials for use in laboratory and experimental studies may be purchased otherwise to the best advantage of the state; (iv) where rates are fixed by law or ordinance; (v) for items traded in on like items; or (vi) for professional services;

(2) if the amount of the contractual services, purchase, or sale is estimated to exceed $2,500 sealed bids shall be solicited, when practicable, by publication in a newspaper calculated to reach prospective bidders and by posting notices in public places within the area where the work is to be performed or material furnished and in addition the department may also designate a trade journal for publication; the department shall also solicit bids by sending notices by mail to all active prospective bidders known to it and all bids shall be sealed when received, and shall be opened in public at the hour stated in the notice; the department may negotiate directly if it finds that it is in the best interests of the state;

(3) a contractual service, purchase, or sale where the known requirements are estimated to be less than $2,500 may be made either upon competitive bids in accordance with (2) of this section or in the open market, in the discretion of the department; but, so far as practicable, shall be based on at least three competitive bids and recorded as provided in § 240 of this chapter; small purchases of less than $300 in the discretion of the department may be made on the open market, and may be by cash payment from petty cash accounts set aside for that purpose; the department shall determine the amount of the petty cash accounts needed by each state agency, and inspect the petty cash accounts at least once each year to determine that the total plus amounts of receipts for unreplenished disbursements is equal to the fixed sum of cash set aside; shortages in petty cash accounts are a personal liability of the responsible head of the agency to whom the account is set aside; the department shall make all necessary rules and regulations governing use and replenishment of petty cash funds;

(4) the provisions of this section relative to competitive bids do not apply to contracts for the operation of transportation systems for students to and from the schools within the state, as are authorized under AS 14.10.070; and these contracts may be awarded by bid or negotiation and, at the discretion of the Board of Education, may be awarded for periods of three years or less;

(5) an "Alaska bidder," for the purpose of bid awards under (1) (3) of this section, is a person who

(A) holds a current Alaska business license,

(B) submits a bid for goods or services under the name as appearing on his current Alaska business license,

MEMORANDUM

TO: Senator Hackney

FROM: Garrey Peska

DATE: February 27, 1979

RE: SUPPORT FOR S.B. 90

	Total Appropriated	Amount Vetoed	Amount Left
Fairbanks Campus	$ 300,000	$ 200,000	$100,000
Anchorage Campus	$1,500,000	$1,000,000	$500,000
Juneau Campus	$ 38,400	$ 38,400	-0-
Total	$1,838,400	$1,238,400	$600,000

SB 90

Sen. Hackney. SB 90 proposes to equalize somewhat the library appropriation for the University of Alaska. The library appropriation as it went through last year was an interesting animal. There was a decision made in the wisdom of the legislative bodies that the funding for the U of A for books would be put in under a capital budget instead of under operations. The governor saw that figure coming by the desk of there when squeeze time came and he squeezed it to the tune of near a million dollars.

It hurt the campus in Fairbanks so badly that they literally were unable to renew their magazine subscription. They did manage to do that much of it out of the governor's contingency fund of $30,000. You'll notice there are three figures in here: $150,000 for Fairbanks, $40,000 for Juneau and $10,000 for Kenai. Anchorage is not included in here and there is a very good reason for that. Their funding did get cut but they came out smelling like a rose compared to the rest of the campuses. They came out with a half million dollars last year due to the manner in which the governor vetoed that bill. He divied it up in an entirely different manner so that Anchorage came out of it with about half a million out of a total appropriation of a million and a half. The million and a half was the amount that went in under the capital budget last year.

The million and a half was the total appropriation. When the governor whacked that . . .

Books were a $1,500,000, the governor vetoed a million of that, 500,000 went to Anchorage and nothing went to the other campuses.

Sen. Fahrenkamp. The only thing Fairbanks got was the appropriation of $30,000 from the governor's contingency fund to continue subscriptions.

Sen. Hackney. There were some students who were down here and talked to me specifically about the Juneau campus and Kenai campus. The community college in Kenai were actually sharing books in some of the courses that were presented at that community college this year. It was that bad down there. The Juneau campus was in really tough shape because they got nothing last year either for books. The students who were in here from Juneau said that $40,000 would at least give them a start. That's the reason this bill was structured in that manner. If there isn't objection to the numbers, I would like to move this on to the Finance Committee.

Sen. Fahrenkamp. We are doing everything we can do, we are allowing credits, we're trying in every way we can to get students to attend school within the University, especially in courses that are offered. But if you don't have the necessary

library facilities, no matter what course you are taking you are handicapped. I for one would like to see this moved through.

Sen. Sturgulewski. The only concern I would have on this is that there are probably other schools where this has hit and perhaps we haven't heard of them.

Sen. Hackney. The governor really got some bad advise from his staff last year. That's the only thing that we can figure out. He apparently thought there was money in the regular budget in addition to the million and a half. He felt that by whacking a million and a half down to $500,000 in addition to what was in there he was doing a good thing.

Sen. Ferguson. There are some other community colleges that didn't get any bucks either. Northwest, the one in Nome has a problem, there are a number of them.

I'll try and get the figures and let you (Sen. Hackney) have them in Finance.

Sen. Sturgulewski moved the bill out with individual recs.

UNIVERSITY OF ALASKA

LIBRARY AND MEDIA SERVICES

FOUR-YEAR CAMPUSES

FY 1978

Library statistics used in this study reflect the programs of all library and media services facilities on each campus. They are the statistics reported by each director for inclusion in the Annual Statistical Report, University of Alaska Libraries, published by the Rasmuson Library of the Fairbanks Campus. Statistics are for FY 1978, the most recently completed year. Enrollment count is as of the Spring Semester 1978 and the volume count is as of June 30, 1978.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPT. OF HEALTH AND SOCIAL SERVICES

DIVISION OF PUBLIC ASSISTANCE

POUCH H-07 – JUNEAU 99811

March 14, 1979

The Honorable Glenn Hackney
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

During departmental testimony of Senate Bill 124 you requested that the Division of Public Assistance develop a public service employment (PSE) program which could be inserted into the state's General Relief Program.

Attached please find an addendum to our initial position paper of Senate Bill 124 describing such a PSE program and related costs.

We have considered this proposal very carefully and feel it reflects a reasonable approach to the work issue. Admittedly we have very little experience in the administration of a work placement program, but this proposal and our cost estimates reflect our understanding of what the PSE program would entail as well as what it would cost.

I hope this is of some value to your committee's efforts to resolve the work issues raised in Senate Bill 124.

Please let me know if I may be of any further assistance.

Sincerely,

Rod Betit

Rod Betit
Director

Attachment

POSITION PAPER/Department of Health & Social Services

ADDENDUM TO

POSITION PAPER

ON

SENATE BILL 124

The Division of Public Assistance, Department of Health & Social Services shall have the responsibility for the administration of the Public Service Employment program. General provisions of this program shall include:

(1) DESIGNATION OF PSE PARTICIPANTS:

All able-bodied recipients shall be required to meet the requirements of the PSE program unless exempted under one of the following provisions:

(a) persons physically or mentally disabled

(b) minor children living in the home of the recipient

(c) persons age 60 years of age or older

(d) persons who have the primary responsibility or the care of a minor child or other disabled person.

(2) WORK REQUIREMENTS:

(a) If unemployed for reasons other than voluntary separation without good cause or separation for misconduct within the prior 90 days, the individual shall register for work both in the PSE project and through the Department of Labor ES registration process.

(b) Each individual in (a) above must actively seek gainful employment and or not refuse to accept employment when offered.

(c) If entitled to UI benefits must apply for and exhaust all of those benefits. If the amount of those UI benefits are less than the specific need for which the applicant is applying, supplemental assistance may be granted to meet that need providing that the amount of assistance does not exceed the maximum amount of $80 per person per month and providing UI income is within GR standards.

(3) DISQUALIFICATION PERIODS:

(a) Applicants or recipients who refuse or fail to comply with any of the requirements or conditions of the GR program shall be disqualified or denied assistance. The disqualification or denial of one member of the household shall exclude the entire assistance unit from the program.

(b) Disqualification Periods - Non-compliance of the GR work requirements will result in disqualification and exclusion from the program for a period of 6 months. These six month disqualification periods shall include:

1. Quitting a job without good cause

2. Being fired from a job for misconduct

3. Refusing or failing to exhaust UI benefits or any other prior resource available to the individual.

4. Refusing an offer of bonafide employment.

5. Refusing to participate in the PSE program.

At the end of the disqualification period the individual must reapply and satisfy all requirements in order to receive GR benefits.

(4) AVAILABILITY OF WORK PROJECTS:

During period of time when the PSE bank does not have enough projects to assign all recipients to a project, the recipient shall be required to report to the PSE Coordinator and be available for assignment for a thirty day period. At the end of the thirty day period, if the recipient has not been assigned to a project, he will have met his work assignment requirement.

(5) JOB OFFER WHILE PARTICIPATING IN PSE:

If an individual is engaged in a PSE project and is notified that he has a bonafied offer of employment the offer of employment will have presedence over the work project and no penalty for noncompletion of the PSE project will be enforced.

(6) ABSENCE FROM PSE ASSIGNEMENT:

If an individual fails to complete or appear for the PSE project, the individual shall be given an opportunity to complete the project, without penalty, providing that the days missed are completed within seven days from the first infraction. Days missed shall include all excused or unexcused absentees. Failure to make up the day(s) missed for unexcused absences shall result in disqualification from future eligibility to the program for a period of six months.

(7) WORK PROJECTS:

The following criteria shall be considered in establishing PSE projects:

1. Provide jobs which, to the extent possible, utilizes, nurtures and sustains the productive capacities of the individual.

2. Accomplishes work which, otherwise may not be undertaken due to the absence of regular positions and or funds.

3. Is of a nature which entails little or no expense to the State.

POSITION PAPER/Department of Health and Social Services

(8) PUBLIC SERVICE EMPLOYMENT ADMINISTRATION RESPONSIBILITY:

In order to implement the PSE program the division shall establish in each of its five regions a PSE coordinator, with one PSE assistant in the Anchorage region. The position of PSE Coordinator will be required to have an in-depth knowledge of the GR program eligibility factors, experience in personnel management, and extensive knowledge of employment availability and job development. Based on current position description and experience requirements, this new classification would be comparable to the Eligibility Worker III position.

The PSE in each region would screen, interview and provide the GR applicant with a work project after establishing that the applicant has met the eligibility criteria for the GR assistance program. The PSE would have a work bank which would be in the result of requests from public service employment agencies. The participant in the PSE program would be required to participate in PSE for approximately three days per month to satisfy the grant amount of $80 maximum per month (minimum wage times 8 hours per day result in approximately three to three and a half work days). Non-participation in the required three work days each month would result in disqualification from the GR program.

(9) GRANT AMOUNTS

Grant amounts will be paid up to a maximum of $80 per person per month. For households containing more than one person the participating household member(s) shall be required to participate in the PSE program until that individual(s) has equaled in work hours the grant assistance amount.

FISCAL IMPACT

The fiscal impact of establishing this classification for the PSE program will be approximately $134,977. (five PSE coordinators times $22,827 = $114,135 plus $20,852 for the Anchorage assistant)

STATE OF ALASKA
THE LEGISLATURE

POUCH Y - STATE CAPITOL
JUNEAU, ALASKA 99811
907-465-3800

LEGISLATIVE AFFAIRS AGENCY

February 7, 1979

MEMORANDUM

SUBJECT: Workfare in Hawaii and Alaska (W.O. #6173)

TO: The Honorable Clem Tillion

FROM: Sharman Haley
Policy Analyst

In conjunction with your request for draft legislation modeled after Hawaii's General Assistance and work program, we have done some preliminary analysis as to the impact this sort of program modification might have in Alaska.

Eligibility

The State of Hawaii chose to restrict eligibility for its General Assistance program to eliminate aid to able-bodied childless people between the ages of 18 and 55. There is no data readily available regarding what percentage of Alaska's General Relief (GR) recipients fall into precisely this category; however a year ago it was estimated that approximately 25% of Alaska's GR recipients are employable singles without children. We therefore might anticipate approximately a one-fourth reduction in the General Relief rolls if such a restriction was adopted in Alaska.

Last year's GR appropriation included legislative intent that the department adopt regulations excluding childless employable singles and childless couples of which one member is employable from GR eligibility. These regulations have been drafted and circulated for public comment. Alaska legal services has challenged the department's authority to restrict eligibility without statutory authorization, and so the department is waiting for an attorney general's opinion prior to adopting and implementing these regulations. The program is still aiding all needy persons.

The portion of the Hawaii law requiring evidence from a physician that a person is disabled or unable to work may be problematic in Alaska. A physical exam in this state often costs more than the $80 maximum GRA grant. Furthermore, in many areas of the state there is a shortage of physicians. It is precisely in these areas that temporary and permanent disabilities are frequent.

TO: SENATE HESS COMMITTEE - SENATOR HACKNEY
FROM: CHRIS BEARDSLEY, 1412 ANNAPOLIS, ANCHORAGE, AK
279-7151

PLEASE PASS SB124. THIS BILL IS LONG OVER-DUE. A FAIR DAY'S WORK FOR A FAIR DAY'S PAY. EOM

Job Search

Hawaii's General Assistance program requires that every able-bodied recipient engage in active job search. They must visit at least three employers each week, and as verification the employer must sign a card stating that he or she was contacted and no job was available. In small communities with few employers, the employers become very irritated with the weekly requests for signatures when there is little likelihood that there will be a job opening in the near future. This would be a problem in rural areas of Alaska as well. The Alaska Unemployment Insurance Benefits Program has long dealt with these problems and has essentially exempted people in remote areas from job search requirements which would be unreasonable in their situation.

Temporary Work Assignments

The Hawaii General Assistance program provides eligible single people a maximum grant of $122 per month, plus a maximum housing allowance of $175 per month. Family units receive more aid. This monthly assistance continues as long as the person remains eligible. Able-bodied recipients must register for and accept a temporary work assignment in which they work off the value of their grant. The number of hours of work required is determined by dividing the total grant by the minimum wage. Clients with a work requirement of less than one day (a grant less than $21) are exempted from work. A single able-bodied recipient receiving a maximum grant of $297 would be required to work more than 100 hours each month.

Alaska's General Relief program as it is currently administered is an emergency aid program in which the client must apply and demonstrate a specific need. Aid may be granted up to a maximum amount of $80 per person for one month, usually in the form of a vendor payment for rent or another essential item. General Relief assistance is not normally on-going from month to month, though the client may reapply each month. Using Hawaii's temporary work assignment formula, an able-bodied Alaska recipient receiving a maximum grant would be required to work about 25 hours each month, or one-quarter of the hours of work under Hawaii's program.

Public Work Projects

The temporary work assignments under Hawaii's General Assistance program are coordinated at the county level. Each client is personally interviewed in order to match the client's skills and ability with an available work project. Projects are established in schools, offices, parks, and highway crews. Each recipient works under the supervision of a regular public employee. Most clients can be placed without difficulty,

but the few who cannot be placed immediately are placed in a pending file, and not penalized. Clients are encouraged to seek their own work projects. In many rural areas of Alaska, it may be prohibitively expensive to arrange face to face interviews with clients or unfeasible to arrange supervision public work projects as is done in Hawaii.

Job Barriers

Hawaii does not provide day care assistance or transportation to clients on temporary work assignments. These are the responsibility of the clients. Clients are provided up to $33 per month in addition to their welfare assistance to cover work related expenses. Since the large majority of Hawaii's clients are single and over 55, and most others are two parent families in which only one parent is required to work, child care is not a particular problem. The same would presumably be true for Alaska if similar eligibility restrictions were imposed. However, transportation may be a major problem in many areas of Alaska which are either remote, or not adequately served by public transportation.

Conclusions

It is likely that some clients in remote areas of Alaska would have to be exempted from work requirements if this legislation were enacted. The work program might be feasible in urban areas of the state, but even there the overhead of administering the program may not be worth the relatively few hours of work required of the average recipient. Restricting eligibility however appears to be a relatively simple mechanism for reducing General Relief expenditures.

It should also be noted that any modification of eligibility requirements or imposition of work requirements in General Relief Assistance would also apply to the General Relief-Medical (GRM) program, as the statute is currently constructed. Thus, the attached bill would eliminate able-bodied childless people between the ages of 18 and 54 from eligibility for General Relief-Medical assistance, and would impose work requirements on able-bodied recipients of medical assistance. Medical bills can be very high and the number of hours of work required of a GRM recipient could amount to months, or even years.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

ON

SENATE BILL NO. 124

For an Act entitled: "An Act relating to general relief assistance; and providing for an effective date."

I. Historical Perspective

The issue of whether single employables and childless couples should receive General Relief assistance was first explored during the 1978 Legislative Session. This was precipitated by an increasing expenditure level in GR and expectation that it would continue into FY79 and FY80. While this issue was being considered by the Legislature, DHSS was moving to finalize new state regulations redefining "need" under the GR Program.

In March 1978 DHSS' new regulations became final. These new regulations did not delete single employables and childless couples. Rather, the regulations continued the GR Program's broad coverage but required that the applicant's need be immediate and desperate. If rent assistance was sought, an eviction notice had to be produced. If utilities were at issue, a shutoff notice was necessary before aid could be granted. The financial effect of this change in the GR Program was not clear at the time the 1978 session ended. Consequently, the FY79 GR appropriation was reduced from the Governor's amended request of $1,016.3 to $823.3 and Legislative intent was inserted to delete ~~single~~ employables and childless couples. The FY79 GR Program reduction was based on an estimate of potential savings given by DHSS.

In September 1978 DHSS published proposed regulations to delete single employables and childless couples to comply with Legislative intent. Alaska Legal Services comments were received and reviewed by the Attorney General's office. Alaska Legal Services made it clear that court action would be initiated if DHSS proceeded to adopt these regulations. An Attorney General's opinion lead DHSS to conclude that it did not have authority to remove these two groups.

At the present time, these two groups are still being served under the GR Program. In spite of this, DHSS expects to lapse approximately $200.0 of its FY79 appropriation for GR. This, when added to the $193.0 initially deleted by the Legislature from the Governor's amended FY79 request, results in an expected savings of $393.0 for FY79. This savings resulted not by deleting single employables and childless couples, but by redefining how "needy" or "desperate" an applicant had to be in order to receive assistance.

II. Analysis of SB 124

It appears clear that the legislative intent of SB 124 is to limit general relief assistance payments by restricting individuals from

participating in the General Relief program. However, there are several critical technical areas which were not addressed in the bill. The following brief summary will address of few of those major areas which would create administrative as well as financial burdens upon the State.

The bill was patterned after Hawaii's General Assistance program. As their program is relatively new, there is no data readily available regarding the success of Hawaii's program as a means of reducing costs or providing meaningful employment.

(1) The word "assistance" in AS 47.25.120 - AS 47.25.300 is defined in section 300 to include medical assistance. The bill appears to have been drafted without specific regard to this fact. If it is the intent to eliminate emergency medical coverage for persons who do not meet the requirements of this bill, that specific intent should be stated.

(2) Job Search

The requirements for Public Service Employment in Hawaii requires an individual to contact three perspective employees each week and have the prospective employer verify in writing that those contracts were made. In small communities with few employers, this would create a burden upon employers when there is little liklihood that there would be a job opening. The Alaska Unemployment Benefits program has long dealt with these problems and has essentially exempted people in remote areas from job search requirements.

(3) The bill establishes eligiblity for individuals who are disabled and the determination of disability is to be made by a physician. The cost of this medical exam would in most cases exceed the amount of the assistance granted unless specifically covered under GR Medical.

III. Analysis of Current Fairbanks Situation

How many new ones

At the present time thre are the following kinds of needy citizens applying for GRA in the Fairbanks area/DPA:

(1) Persons who have dependent children in their homes, single individuals, and who have lived in Alaska several years, quit their job(s) to take a pipeline job and now cannot find employment.

(2) Persons who have dependent children in their homes, single individuals and couples who came to Alaska to work on the pipeline and at the completion of the pipeline construction have not been able to find employment.

(3) In addition to the above people applying for GR, we have noted an increase in the number of applicants who have lived in Alaska from a few to many years but who have never worked on the pipeline. These same people have had jobs but are not now working because of a slow down in the Fairbanks economy and resultant lay off.

Information gathered by the North Star Borough Information Office supports the fact that there are many unemployed people in Fairbanks actively seeking jobs. This office also predicts few new jobs (seasonal) during the summer months (1979). This office also predicts that most of the unemployed people who wished to leave Alaska have already left and that there will be few people leaving in the future. The present economy, coupled with the construction of the gas pipeline not having any appreciable effect with regards to jobs until 1981-82, indicates that unemployed persons will have to continue depending heavily on GR if no other help can be obtained. It is of interest to note too that the number of people on unemployment compensation is decreasing while the number of people who have exhausted unemployment compensation benefits is increasing.

IV. Departmental Position on SB 124

DHSS beleives it has significantly impacted GP expenditures through redefinition of the degree of need which must be present before assistance is rendered. This is an approach which is not present in Hawaii's GR program as a cost-containment factor. DHSS feels its current approach to reducing GR expenditures is more equitable than that offered by SB 124 which is patterned after the Hawaii program. It is clear to DHSS that only person' in desperate situations are currently receiving aid under the GR Program, and that many of them are long-time Alaskans who are simply unwillingly displaced from the job market with no hope of employment. DHSS feels this need is real and should be met so long as costs remain within that amount considered affordable by the Legislature, as is presently the case in GR for FY79.

However, if the desire of the Legislature is to delete these two groups, the Department has a number of technical problems with SB 124 which we would like to discuss with the bills draftors. The Department will make every effort to comply with the Legislature's desires in this matter in time to effect the necessary changes by July 1, 1979.

SB 124 - SECTIONAL BREAKDOWN

SECTION 1(1) - Because of excessive welfare costs & burden on taxpayer, general relief assistance (GRA) must be provided only to:
(1) needy citizens who are unable to work & those with dependent children; and
(2) a WORK REQUIREMENT must accompany state GRA for able-bodied recipients.

SECTION 1(2) - Purpose of Act: Limit GRA payments to persons:
(1) 55 years old
(2) disabled
(3) have dependent children in homes
(4) unable to provide sufficient support for themselves or dependents.

SECTION 2(a) - To receive GRA under this program: must conform with those conditions listed in section 1(2) plus not be receiving other assistance under this chapter and must be resident of state.

SECTION 2(b) - Criteria outlined for determining residency.

Section 2(c) - Spells out controlling conditions for those 55 & over to be eligible for program, e.g. unemployed, actively seeking employment, not refusing employment, etc.

SECTION 2(d) - Spells out controlling conditions for those disabled to be eligible, e.g. determined to be needy, unable to meet requirements established by FEDS SSI program, unable to engage in substantial gainful employment.

SECTION 2(e) - Says individuals with children are eligible for GRA if they meet above criteria.

SECTION 2(f) - Additional condition for receiving GRA: if individual is physically fit, able to work, and employable, SHALL, accept an assignment to work on PUBLIC WORK PROJECTS as directed by the Dept of H/SS.

Section 2(g)- Individuals disqualified for failure to comply, shall be excluded from GRA for a period not longer than 12 months.

SECTION 2(h) - Designates H/SS to adopt regs to enforce this section & establish criteria/standards for conditions and requirements of GRA.

SECTION 3(a) - Assigns H/SS the responsibility for providing public service employment of public works projects to individuals receiving GRA and UI compensation benefits.

SECTION 3(b) - Designates H/SS to adopt regs to carry out purpose of this section, e.g.
(1) GRA recipient may not displace state/muni/individual working on contractual basis employee
(2) period of work cannot exceed the # of hours which, when multiplied by the prevailing rate of compensation for the work, equals the amount of GRA provided.
(3) no discrimination
(4) a person refusing without justification is ineligible for GRA.

SECTION 4 - DEFINITIONS SECTION

SECTION 5 - GRANDFATHER CLAUSE - individual receiving GRA on effec date who would otherwise be excluded shall continue to receive assistance as long as he meets the requirements of this ACT.

SECTION 6 - This ACT takes effect July 1, 1979.

* those between the ages of 18 & 55, not having children. i.e. and employable, would be restricted from GRA.

Another Approach to Welfare Problem

Gov. Ariyoshi has encountered constitutional objections to his proposal to impose residency requirements for welfare benefits in order to discourage indigent Mainlanders from coming to the Islands.

But he got the Legislature to approve a different approach — denying general assistance welfare payments to persons who are able-bodied, less than 55 years old, and with no dependent children.

And to the governor's satisfaction, the law is serving the purpose of removing newcomers from the welfare rolls.

In the first six months since the law was enacted, 875 cases have been dropped from the rolls, for a saving of $963,000. The number of general assistance payments being approved has dropped by 66 percent; applications received have dropped 46 percent.

The greatest impact has been on persons from the Mainland who have been in Hawaii six months or less. These dropped from 42 percent of the total of general assistance recipients last May to 31 percent in October.

The governor hails these results and says Island taxpayers "should not be further burdened with welfare payments to those who come to Hawaii without either a prospect of employment or even a desire for employment."

The new law seems to have skirted the constitutional objection to a residency requirement while achieving much the same effect. It shows that many strategies can be explored to achieve the goal of controlling population growth.

Eventually the courts may uphold residency requirements for welfare benefits and government employment as necessary to cope with excessive population growth. But that will take time.

In the meantime, another approach is working.

SECTION 4. This Act shall take effect upon its approval.
(Approved May 23, 1978.)

ACT 103 S.B. NO. 1782-78

A Bill for an Act Relating to Public Assistance.

Be It Enacted by the Legislature of the State of Hawaii:

SECTION 1. **Findings and Purpose.** (a) The legislature finds that welfare costs have been rising precipitously in recent years, at a rate more than twice that for general fund tax revenues. As a result, providing funds for welfare has often meant a curtailment of other much-needed State programs and services. The legislature further finds that the limited financial resources of the State necessitates some curtailment of public assistance benefits.

(b) The purpose of this Act is to limit general assistance payments to persons who are disabled, or are at least 55 years of age, or have dependent children in their homes, and who are unable to provide sufficient support for themselves or their dependents.

SECTION 2. Section 346-71, Hawaii Revised Statutes, is amended to read:

"**Sec. 346-71 General assistance.** (a) The department of social services and housing shall administer and provide public assistance to eligible persons who are disabled, or are at least 55 years of age, or have dependent children in the home not otherwise provided for under this chapter, and who are unable to provide sufficient support for themselves or those dependent upon them, provided that such persons are bona fide residents of this State.

For purposes of determining whether persons seeking assistance are bona fide residents of this State, the department of social services and housing shall consider, but is not limited to considering, the following factors: enrollment and receipt of welfare benefits from another jurisdiction; physical presence in the State; maintenance of a place of residence in the State; the availability of furnishings and household and personal effects sufficient to lead a reasonable person to conclude that the place of residence is more than a public accommodation; qualification as to residence for purposes of voting in the State; change in vehicle operation license; vehicle registration; enrollment of children in local schools; bank accounts in this State or any other jurisdiction.

(b) A disabled person between eighteen and sixty-five years of age shall be eligible for general assistance, if he:

(1) Is determined to be needy in accordance with standards established by this chapter and the rules and regulations of the department;
(2) Is unable to meet the requirements established by the Federal Supplemental Security Income Program or its successor agency; and
(3) Is unable to engage in any substantial gainful employment because of a physical or mental impairment determined and certified by a licensed physician. "Substantial" as the term is used herein shall mean at least 30 hours of work per week.

Any person determined to be eligible under this subsection may be referred to any appropriate State agency for vocational rehabilitation services and shall be required to accept said services as a further condition of eligibility for the receipt of general assistance under this section. In addition to the foregoing, any person determined to be eligible under this subsection may be required to seek employment, and participate in public work projects as described in section 346-31, and in public employment projects as described in section 346-102.

(c) A person with children shall be eligible for general assistance if:

(1) He is unemployed for reasons other than voluntary separation without good cause or for misconduct; and

(2) He is actively and diligently seeking gainful employment; and

(3) He has not refused to accept employment when offered; and

(4) He has registered and is available for work as required by section 383-29; and

(5) He has exhausted all of his benefits under chapter 383; provided, however, should the benefits of any person under chapter 383 be less than those for which he would otherwise be eligible hereunder, he shall be eligible for supplementary general assistance; and provided further, that this provision of exhaustion shall not apply to those persons not entitled by law to such benefits.

"Children" as used in this section shall mean a person who:

(1) Is ineligible for and is unable to obtain aid under a federal assistance program; and

(2) Is in need, and has not sufficient income or other resources to provide health care and support to maintain a standard consistent with this chapter; and

(3) Has not attained the age of eighteen years; provided, however, that a child between the ages of eighteen and twenty-one years shall be eligible for assistance under this section, if he or she.

(A) Is regularly attending high school to complete requirements leading to a high school diploma or its equivalent; or

(B) Is employed part-time and is enrolled at least half-time in an organized program of vocational or technical training designed to fit the child for gainful employment; or

(C) Is employed part-time and is enrolled at least half-time in a local college or university; and

(4) Is living in a home with his father, mother, grandfather, grandmother, brother, sister, stepfather, stepmother, uncle, aunt, first cousin, nephew, niece, or hanai parents in a place of residence maintained by such relative as his own home; or is living in a family home or institution conforming to the standards fixed by the department.

A child for the purposes of this section does not include an unborn child or fetus.

(d) A person who is at least 55 years of age shall be eligible for general assistance if:

(1) He is unemployed for reasons other than voluntary separation without good cause or for misconduct; and

(2) He is actively and diligently seeking gainful employment; and
(3) He has not refused to accept employment when offered; and
(4) He has registered and is available for work as required by section 383-29; and
(5) He has exhausted all of his benefits under chapter 383; provided, however, should the benefits of any person under chapter 383 be less than those for which he would otherwise be eligible hereunder, he shall be eligible for supplementary general assistance; and provided further, that this provision of exhaustion shall not apply to those persons not entitled by law to such benefits.

(e) The department shall further require in addition to the conditions and requirements stated in subsections (c) and (d), that persons who are physically fit, able to work, and employable shall as a condition to receiving general assistance, register for work on public work projects and accept an assignment to work under section 346-31 or accept such employment as may be offered to them by the department under section 346-102 or by an employer. The term "public work projects" includes any kind of labor under the department of accounting and general services of the State or the department of public works of any county, or under any other department, board, commission, or agency of the State or any county. All such agencies may employ persons registering under this section. Payment for the work shall not be made from the funds of the agency employing such persons but shall be made from the funds of the department. The department shall promulgate such rules and regulations as it deems necessary to enforce and carry out this section.

(f) Applicants and recipients shall be required to satisfy all applicable provisions of this section. Recipients disqualified for failure to comply with any of the requirements under the provisions of this section shall be excluded from general assistance for a period not to exceed twelve months.

(g) The department shall by rules adopted pursuant to chapter 91, establish criteria and standards for the foregoing conditions and requirements."

SECTION 3. A person receiving general assistance on the effective date of this Act who would otherwise be excluded by the provisions of this Act shall continue to receive general assistance provided he satisfies the requirements under section 346-71(e) and the department finds that:

(1) He isunemployed for reasons other than voluntary separation without good cause or for misconduct; and
(2) He is actively and diligently seeking gainful employment; and
(3) He has not refused to accept employment when offered; and
(4) He has registered and is available for work as required by section 383-29, and
(5) He has exhausted all of his benefits under chapter 383; provided, however, should the benefits of any person under chapter 383 be less than those for which he would otherwise be eligible hereunder, he shall be eligible for supplementary general assistance; and provided further, that this provision of exhaustion shall not apply to those persons not entitled by law to such benefits.

Such person shall also be subject to provisions of subsection 346-71(f).

SECTION 4. Severability. If any provision of this Act or the application thereof to any person or circumstance is held invalid, the invalidity does not affect other provisions or applications of the Act which can be given effect without the invalid provision or application, and to this end the provisions of this Act are severable.

SECTION 5. Statutory material to be repealed is bracketed. New material is underscored. In printing this Act, the revisor of statutes need not include the brackets, the bracketed material, or the underscoring.*

SECTION 6. This Act shall take effect upon its approval.

(Approved May 23, 1978.)

ACT 104 S.B. NO. 1469

A Bill for an Act Relating to Public Assistance.

Be It Enacted by the Legislature of the State of Hawaii:

SECTION 1. Section 346-53, Hawaii Revised Statutes, is amended by amending subsection (b) to read:

"(b) The maximum basic needs allowance which the department shall initially pay a recipient considering income and resources in accordance with this chapter shall be $100 plus an additional $44 for each additional person whose needs have been taken into account by the department. Beginning January 1, 1978 and on or before January 1 of each odd-numbered year thereafter, the director shall submit a report to the legislature indicating the amount of additional moneys required to implement a cost of living increase for the adjusted basic needs allowance equal to the annual percentage increase, rounded to the nearest dollar:

(1) In the average weekly wage in covered employment as computed by the director of labor and industrial relations pursuant to section 383-22, or

(2) In the consumer price index for Hawaii as computed by the United States Department of Labor, whichever is lowest.

The director shall request that such amount be reflected in that portion of the executive budget relating to the department. If additional funds are appropriated for a cost of living adjustment, then the adjusted basic needs allowance shall be adjusted to reflect the appropriation.

The department shall pay a recipient the maximum basic needs allowance if the department determines that his needs are not reduced by his income or resources."

SECTION 2. Section 346-54, Hawaii Revised Statutes, is amended to read as follows:

"Sec. 346-54 Report to the legislature. On or before January 1 of odd-

3/12/79
SB 130 (Sen. Ferguson, chairing meeting)

Sen. Rodey. Mr. Romesburg has some proposed amendments for this bill. The bill is very simple, it basically allows those students who go to school in Alaska to receive a quicker forgivenss, as members of the committee are aware, under the student scholarship loan program there is a foregivness for 4 years and this allows those people who go to school in Alaska to receive 3 years of that forgivness while they are going to school.

There are several benefits of this. First of all, the direct benefit to Alaskans who go to school in Alaska. Secondly, because the average loan for undergraduate students attending school in Alaska is lower than the average, there would be a benefit to them in that additional way and would hopefully provide for more loans in the future. Third, the benefit to the economy, particularly Anchorage and Fairbanks where we have most of our students centered.

I am very familiar with the Alaska Student Loan program and would be happy to answer any questions. This bill would, very simply, give an additional advantage to students in Alaska, Alaskan's going to school in Alaska without penalizing in any way those people who go outside to school. I realize it is necessary to go outside.

Sen. Sturgulewski. We are subsidizing by a great deal of dollars per student to keep our young people who go through education here is a very costly process. What do you feel again, if you could give me some of your benefits, what is the major thing that you see accruing to having those students stay? From what I understand an awful lot of kids go outside as my son and many others do simply because they want that experience, they come back and will be perhaps even better Alaskans after an education outside. Why encourage the keeping of the students here. Why not let them go where they can get excellence in whatever program they want?

Sen. Rodey. There are several reasons. First off, many students go outside, when I was in school, because it was ceaper in many ways. This would hopefully give us parity, whether you are a businessman or a working person in Alaska, we all know tht it cost more to live here. This is a very indirect way of acknowledging that problem.

Sen. Fahrenkamp. In many areas of the University we are subsidizing and working in every way we can to try and improve the education that is available for the students within the state. This type of encouragment will help us to reach further along toward our goals of excellence within the courses offered here. More students we have available, the better our changes are of securing and having more excellent programs.

Sen. Rodey. In responde to Sen. Sturgulewski's earlier concern, education is subsidized regardless of what level and how we might have it, but society has determined, particularly in Alaska, that ability to have college level courses in a state university are absolutely essential to the wellbeing of the state. We are paying that subsidy as every other state is and I think it is a worthwhile one and a decision that was made by the public many years ago.

Sen. Sturgulewski. The more successful we are, the more expensive it is. I happen to believe in education and will be interested in Dr. Romesburg's comments.

Kerry Romesburg. I was asked to give a fiscal note on it and we haven't given one on the bill as it stands because we really don't know what kind of fiscal impact it would have. To determine fiscal impact we would have to determine how many students would be graduating from Alaskan insitutions that would be not remaining here because if they stayed here there is no fiscal impact at all. They would get the same cancellation benefits from working and living in Alaska, it would just take them longer to get it, 5 years as opposed to having it upon graduation. So, assuming there stay here there is no impact. Some, undoubtedly go out after they graduate and do not return and I have no idea of the numbers so we really can't tell what kind of impact it would have fiscally.

This merely is to provide the incentive for them to attend in-state and it really is a compromise that's come out of a few years of this. Discussed past bills.

We have available the ability to get in on a program. There are a couple of things in your packet, "Guaranteed Student Loan Program".. This program has been around for some time, in fact it was part of the 1965 higher education act. It provides funds for students to go to college under a federal subsidy. It is really an insurance program. What it is, the federal government insures a loan and says that if a bank or non-profit state or other agency makes a loan to a student for educational purposes, the federal government will underwrite it, will guarantee that that loan will be paid back. We have not participated in the program as far as the state goes. We have participatedin the private sector for some years and our agency handles that.

In November of this year Congress made a change in this program which enables us to get into it now. What they did is in the past they had a parental income restruction, now they've removed it. Before they would pay interest only for a person who had a salary of less than $25,000. That's gone now. There are no income restrictions. So now we can participate in the program. Went over figures on the sheet.

This requires a number of amendments and in your packet is a 3-page sheet of amendments to SB 130. I would like to appologive for the fact that we have to do it by this mechanism. I understand that the Senate has taken a position that they will take not new bills and so now we are going the amendment route

instead of trying a separate bill.

Sen. Rodey. I am in agreement with these amendments and I think that Mr. Romesburg is to be congratulated for finding a way to save the state money and provide additional educational opportunities for Alaskan students and I will be more than happy to help carry this on the floor. I think it is a very desirable part of the bill.

Kerry Romesburg. A number of the amendments are really just housekeeping kinds of things. The principal change is the one labeled section 4 which makes loans interest bearing while a student is enrolled. The reason for that is not even the federal government will pay us interest if our law says we are not charging any. So we are going to charge them interest. The truth is the student won't pay any. If the federal government doesn't pay it, the state will waive it and pay it for them anyway.

Everybody who applies will be eligible, yes. But they may not be able to get 100% of their loan insured by the federal government. The remainder, for instance if we were to award a studnet $3,000, $2,500 would be insured by the federal government, $500 by us. While they are in school, interest would accrue on all of that. The federal government would pay us, the State of Alaska, the interest on the $2,500. We, the State of Alaska, would pay on behalf of the student the $500, we would waive it. So, for the student there is no change. But for us it amounts fo a lot of money.

Right now we say that payments begin within a year after they graduate and the federal language says 'shall begin no earlier than 9 nor later than 1 year. So we are changing that to get the no earlier than the nine months in and the fact that it has to be paid in not less than 5 nor more than 10 years. However, if they can accelerage their payments and receive benefits of that kind.

Then we have the deferments. The military deferment that we currently have for 3 years the in the Peace Corps, which we do not currently have. We have it only if it is required alternate service. The 3 years in the domestic volunteer service which is the VISTA program and the real new one which we haven't ever had before is the unemployment one. If a person simply cannot find a job and they are seeking unemployment and are registered as seeking unemployment we can waive payments for up to 12 months. The interest is paid by the federal governemnt at that time. It is a one-time only during the life of the loan.

The remainder is mostly housekeeping.

One the fiscal note, these are our estimates. The first year that we would receive benefit would be not 80 but 81 when we actually receive payment. We would receive 300,000 from the federal government in the way of interest payments that would

come into the program. No only with this program pay interest, but they will also pay an administrative cost allowance for the agency handling these loans -- 1% of the amount. So, we will get $50,000 and 10,000 under contractual. So the first year we can get $360,000 in income from the federal government and will reduce the general fund by that amount.

The way this looks to me, over the next 4 years we will have about $1.6 for the State of Alaska without any appreciable change in the program whatsoever.

What happens if the federal program dries up? The State of Alaska reverts to the program we've always had.

Sen. Ferguson. I am ready for a motion, I would thing it would be better to create a CS by this committee.

Sen. Fahrenkamp. I would move that this committee enter a CS for SB 130 to include amendments proposed to SB 130.

Sen. Ferguson. No objections? So ordered? The title should be changed.

Sen. Sturgulewski. I move that we pass out of committee CSSB 130 with individual recommendations. No obs so ordered.

Dear Senator Hackney:

Pleased be advised that Sheldon Jackson College endorses the intent and the substance of Senate Bill 130 that establishes an additional incentive in the Student Scholarship Loan Program for students to attend colleges and universities in Alaska.

Thank you for your consideration and best wishes at this busy legislative season.

Sincerely,

Hugh H. Holloway

March 8, 1979

The Honorable Glenn Hackney
Chairperson, Senate Health, Education
and Social Services Committee
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

I want you and other members of your committee to know that the University of Alaska strongly endorses both the intent and substance of Senate Bill 130, establishing an additional incentive in the Student Scholarship Loan Program for students to attend colleges and universities in Alaska.

This legislation--also favored by the Alaska Student Lobby--has particular merit because it is not coercive, would not force students to attend institutions of higher learning within the state, and yet it would very substantially benefit those students who want to study and make their homes in Alaska. Current law provides an incentive to students to live and work in Alaska following completion of their education by converting to a grant up to 40 percent of their loans, based upon length of residence and employment in the state. To also allow time spent at an Alaskan college or university to be taken into account for this incentive would seem to be a move to strengthen the basic objective of the loan act.

As you are well aware, a majority of those students receiving state scholarship loans are attending colleges and universities outside Alaska. While many of these students undoubtedly desired to attend particular institutions beyond Alaska, for one reason or another, there could very well be among them a number who might have chosen to pursue their education in Alaska were an incentive such as that proposed in SB 130 available to them.

I have heard no adverse comments on SB 130 and would, again, commend it highly as a means of increasing that body of trained and educated persons who are contributing so substantially to Alaska's general well-being and progress. The legislation will also, I believe, materially strengthen Alaskan colleges and universities, public and private, and thereby provide yet another incentive for students to remain in the state.

Sincerely,

Foster F. Diebold
President

M E M O R A N D U M

TO: The Honorable Glenn Hackney
Alaska State Senate

FROM: Kerry D. Romesburg, Executive Director
Alaska Commission on Postsecondary Education

SUBJECT: SB 130

DATE: March 16, 1979

An example: If a student wishes a loan to attend Alaska Bible College, they would still receive a loan under the state loan program. The difference being that their loan would not be federally guaranteed. Rather, it would be state "guaranteed"; that is, it would be handled the same as it is currently.

There would be no attendance restrictions which do not currently exist.

AMENDMENTS TO

SB 130

PURPOSE OF AMENDMENTS.

The State of Alaska, through the state scholarship loan program, is eligible to become a lender under the Guaranteed Student Loan Program as provided for under Title IV, Part B of the Higher Education Act of 1965, as amended. This program would provide certain benefits to the State and to the State loan program which otherwise would be unavailable. To enable this participation, the following amendments must be made to the scholarship loan program.

Section 3. AS 14.40.763(b) is amended to read:

(b) The loans may only be used to attend a career education program [APPROVED BY THE COMMISSION] or a college or university [ACCREDITED BY THE ACCREDITATION ASSOCIATION FOR THE REGION IN WHICH THE COLLEGE OR UNIVERSITY IS LOCATED] approved by the commission, and if the loans are federally insured, by the U.S. Commissioner of Education.

Section 4. AS 14.40.763(e) is amended to read:

(e) Loans are [NON-INTEREST] interest bearing while a student is enrolled under (c) of this section or is receiving a deferment of payments under (k) of this section however, a student shall be entitled to have paid on his behalf and for his account a portion of the interest in accordance with (m) of this section.

Section 5. AS 14.40.763(g) is replaced by:

(g) Loan repayment of the principal amount together with interest thereon, in periodic installments, shall begin no earlier than nine months nor later than one year after the student terminates his studies and shall provide for repayment of the total amount owed in not less than five nor more than ten years from the commencement of repayment and not more than fifteen years from the date of execution of the original promissory note evidencing the disbursement of the loan, except as provided for in (k) and (e) of this section.

Section 6. AS 14.40.763(k) is replaced by:

(k) Periodic installments of principal shall be deferred, but interest shall accrue and be paid unless the borrower is eligible for interest payment benefits under (m) of this section, during any of the following:

1. return to student status as provided in (c) of this section;

2. serving on active duty as a member of the Armed Forces of the United States;

3. serving, for up to three years, as a volunteer under the Peace Corps Act;

4. serving, for up to three years, as a full-time volunteer under the Domestic Volunteer Service Act of 1973;

5. for a one-time, up to twelve months, period in which the borrower is seeking and unable to find employment in the United States; or

6. if borrower becomes disabled, 50 percent or greater, as certified by competent medical authority.

Section 7. AS 14.40.763 is amended by adding a new section which reads:

(e) In case of hardship, the committee may, in up to six month increments, extend repayment of a loan for an additional period of up to five years, within the fifteen year requirement of (g) of this section.

Section 8. AS 14.40.763 is amended by adding a new section which reads:

(m) a borrower is eligible for payment on his behalf by the U.S. Commissioner of Education, a portion of the interest on that portion of his loan which is federally insured, and by the State of Alaska, a portion of the interest on that portion of his loan which is not federally insured during

1. that period prior to the beginning of the repayment period of that loan

2. deferments as provided for under (k) of this section except

(i) when military service under (k)(2) exceeds three years, and,

(ii) when disability under (k)(6) is 50 percent or greater, but less than total

in which case, the State of Alaska will pay on behalf of the borrower the interest on all loan amounts.

Section 9. AS 14.40.763(j) is amended to read:

(j) A portion of a loan shall be [CONSIDERED A GRANT] paid on behalf of the borrower by the State of Alaska, if, upon completion of the course of study for which the loan was granted, the [GRANTEE] borrower spends at least two years employed in the state. The portion of the loan which shall be [REGARDED AS A GRANT] paid by the State shall be the following percentages of the total loan received plus [ACCRUED] interest:

1.	two-three years residency		10 per cent
2.	three-four years residency	[20]	10 per cent
3.	four-five years residency	[30]	10 per cent
4.	over five years residency	[40]	10 per cent

for c to a total of 40 per cent.

Section 10. AS 14.40.806 is amended by adding a new definition, and renumbering as required, that reads:

(2) "federally insured" means a loan covered by the provisions of the Guaranteed Student Loan Program of Title IV, Part B, of the Higher Education Act of 1965 (P.L. 89-329), as amended.

gives those students a quicker forgiveness for those who attend ak school

Introduced: 2/12/79
Referred: Health, Education & Social Services and Finance

IN THE SENATE BY RODEY, HACKNEY AND SACKE.

SENATE BILL NO. 130

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act establishing incentives for students to attend colleges and universities in Alaska; and providing for an effective date." enable ak student loan to become a guaranteed loan program

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The legislature determines that

(1) there are no incentives in the student loan program for residents of Alaska to attend colleges and universities in Alaska as compared with colleges and universities outside Alaska;

(2) the result of this lack of incentives is that 64.9 per cent of all undergraduate student loans and 92.9 per cent of graduate student loans go to students attending colleges and universities outside Alaska;

(3) the amount of the average loan to undergraduate students attending colleges and universities in Alaska is lower than the average of similar loans in all but one of the 10 western states and the amount of the average loan for graduate students is the lowest in the West;

(4) the funds spent on education in Alaskan colleges and universities go further than when the funds are spent out of state; and

(5) it would be an aid to the Alaskan economy if the funds in the student loan program were spent for education in Alaskan colleges and universities.

* Sec. 2. AS 14.40.763 is amended by adding a new subsection to read:

(1) Each year spent attending a college or university in Alaska qualifies as a year of employment and residency under (j) of this section.

AMENDMENTS TO

SB 130

PURPOSE OF AMENDMENTS.

The State of Alaska, through the state scholarship loan program, is eligible to become a lender under the Guaranteed Student Loan Program as provided for under Title IV, Part B of the Higher Education Act of 1965, as amended. This program would provide certain benefits to the State and to the State loan program which otherwise would be unavailable. To enable this participation, the following amendments must be made to the scholarship loan program.

Section 3. AS 14.40.763(b) is amended to read:

(b) The loans may only be used to attend a career education program [APPROVED BY THE COMMISSION] or a college or university [ACCREDITED BY THE ACCREDITATION ASSOCIATION FOR THE REGION IN WHICH THE COLLEGE OR UNIVERSITY IS LOCATED] approved by the commission, and if the loans are federally insured, by the U.S. Commissioner of Education.

Section 4. AS 14.40.763(e) is amended to read:

(e) Loans are [NON-INTEREST] interest bearing while a student is enrolled under (c) of this section or is receiving a deferment of payments under (k) of this section, however, a student shall be entitled to have paid on his behalf and for his account a portion of the interest in accordance with (m) of this section.

Section 5. AS 14.40.763(g) is replaced by:

(g) Loan repayment of the principal amount together with interest thereon, in periodic installments, shall begin no earlier than nine months nor later than one year after the student terminates his studies and shall provide for repayment of the total amount owed in not less than five nor more than ten years from the commencement of repayment and not more than fifteen years from the date of execution of the original promissory note evidencing the disbursement of the loan, except as provided for in (k) and (e) of this section.

Section 6. AS 14.40.763(k) is replaced by:

(k) Periodic installments of principal shall be deferred, but interest shall accrue and be paid unless the borrower is eligible for interest payment benefits under (m) of this section, during any of the following:

1. return to student status as provided in (c) of this section;

2. serving on active duty as a member of the Armed Forces of the United States;

3. serving, for up to three years, as a volunteer under the Peace Corps Act;

4. serving, for up to three years, as a full-time volunteer under the Domestic Volunteer Service Act of 1973;

5. for a one-time, up to twelve months, period in which the borrower is seeking and unable to find employment in the United States; or

6. if borrower becomes disabled, 50 percent or greater, as certified by competent medical authority.

Section 7. AS 14.40.763 is amended by adding a new section which reads:

(e) In case of hardship, the committee may, in up to six month increments, extend repayment of a loan for an additional period of up to five years, within the fifteen year requirement of (g) of this section.

Section 8. AS 14.40.763 is amended by adding a new section which reads:

~~(m)~~ a borrower is eligible for payment on his behalf by the U.S. Commissioner of Education, a portion of the interest on that portion of his loan which is federally insured, and by the State of Alaska, a portion of the interest on that portion of his loan which is not federally insured during

1. that period prior to the beginning of the repayment period of that loan

2. deferments as provided for under (k) of this section except

(i) when military service under (k)(2) exceeds three years, and,

(ii) when disability under (k)(6) is 50 percent or greater, but less than total

in which case, the State of Alaska will pay on behalf of the borrower the interest on all loan amounts.

Section 9. AS 14.40.763(j) is amended to read:

(j) A portion of a loan shall be [CONSIDERED A GRANT] paid on behalf of the borrower by the State of Alaska, if, upon completion of the course of study for which the loan was granted, the [GRANTEE] borrower spends at least two years employed in the state. The portion of the loan which shall be [REGARDED AS A GRANT] paid by the State shall be the following percentages of the total loan received plus [ACCRUED] interest:

1.	two-three years residency		10 per cent
2.	three-four years residency	[20]	10 per cent
3.	four-five years residency	[30]	10 per cent
4.	over five years residency	[40]	10 per cent

for up to a total of 40 per cent.

Section 10. AS 14.40.806 is amended by adding a new definition, and renumbering as required, that reads:

(2) "federally insured" means a loan covered by the provisions of the Guaranteed Student Loan Program of Title IV, Part B, of the Higher Education Act of 1965 (P.L. 89-329), as amended.

ALASKA STUDENT LOAN PROGRAM

1978-79

A. Financial Status:

Actual Balance of Revolving Fund 6-30-78	$ 2,690.2
79 Appropriation	3,600.0
Total Available	$ 6,290.2
78-79 Loans Awarded as Per Authorization	(5,000.0)
Balance	$ 1,290.2
78-79 Loans Awarded - Additional	(900.0)
Balance	$ 390.2
Anticipated Collections thru 6-30-79	1,440.0
Projected Balance FY 80	$ 1,830.2

B. FY 80 Budget (Original Request):

	Cont.	Add.	Total
General Fund	$4,420.0	$1,227.0	$5,647.0
Revolving Fund	1,400.0	453.0	1,853.0
Total	$5,820.0	$1,680.0	$7,500.0

C. Loan Awards:

	Undergrad.	Graduate	Total
77-78 Actual	1,985	280	2,265
78-79 Present (8-27-78)	2,328	345	2,673
78-79 Pending (11-17-78)	N.A.	N.A.	513

D. Descriptive Information:

1. Average award 77-78 $2,033
   78-79 2,207

2. Undergrad./Grad. Ratio

	Undergrad.	Graduate
77-78	87.6%	12.4%
78-79 (8-27-78)	87.1	12.9

3. Attendance In-State/Out-of-State:

	Undergraduate		Graduate		Total	
	In-State	Out	In-State	Out	In-State	Out
77-78	35.9%	64.1%	9.6%	90.4%	32.7%	67.3%
78-79	31.9	69.1	16.5	83.5	29.0	71.0

E. Observations:

1. The huge increase in applications this year is an across-the-board increase occurring at both the undergraduate and graduate levels.

2. The increasing cost of attending a postsecondary educational institution, as well as the increased undergraduate loan maximum (from $2,500 to $3,000) is reflected in an 8.6% increase in the average loan award.

3. The number of persons remaining in school is increasing, as is the number of new applicants. This is probably in part, a reflection of the post-pipeline economy of the State.

4. The FY 80 budget request is most likely underestimated. Funding for the current year could require as much as $7.3 million, if all applicants were to receive funds. If $7.3 million is used for 1977-78, 78-79 could require about $8.2 million. This is based upon 3,400 applicants at an average loan award of $2,400.

F. Alternate Actions:

AS 14.40.751. "There is created a scholarship revolving loan fund. . . . All repayments of principal and interest on scholarship loans shall be paid into the scholarship revolving loan fund and shall be used to make new scholarship loans. If estimated funds available from scholarship loan repayments are inadequate to fully fund estimated scholarship loans for any fiscal year, additional funding from the General Fund may be requested and appropriated for that year."

1.(a) We have mailed letters to all pending applicants informing them of the difficulty. We told them we will fund them if funds become available, and then maybe only for the second half of the academic year. We could continue in this manner, seek a supplemental budget appropriation when the Legislature convenes, and act accordingly.

(b) If we do this, it means that 515 applicants get nothing for first semester. It means some of these, plus new additional applicants attending a school on a quarter-term would get nothing for the first and possibly second quarter. If the supplemental passes, and if it survives veto possibilities, some students would receive funds. Based upon a 50% estimate, this would require about $700 thousand and mean an 78-79 outlay of $6.6 million. It also means we would have the projected $1.8 million in the revolving fund for our FY 80 match.

2.(a) We could fund all applications out of the revolving fund. We could then ask the Legislature for a supplemental to reimburse the revolving account and thereby produce the FY 80 match. Or, we could go into FY 80 with little or no match (an estimated $400 thousand would be left).

(b) The initial budget recommendations for FY 80 call for us to deplete the revolving fund next year in exactly the manner suggested here. The reason for this is to minimize the General Fund requirement. If we deplete the revolving fund this year and rely on total General Fund support for next year, we could face a difficult time -- if not in the Legislature, then surviving veto provisions. If funds are not forthcoming in FY 80, we would confront denying continued funding to as many as 1,500 students.

3. With either of the above alternatives, or any others, a number of changes could be suggested to reduce the loan volume. These include:

a. increasing the interest rate
b. removing the cancellation provisions
c. increasing the residency requirements, or giving preference to those with longer residency
d. making the loan program more "need" based in the Federal loan sense, i.e., restrictions on parental income, personal income, etc.
e. restricting the loans to certain programs, states, levels.

IN THE SENATE BY RODEY, HACKNEY AND SACKETT

SENATE BILL NO. 130

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act establishing incentives for students to attend colleges and universities in Alaska; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The legislature determines that

(1) there are no incentives in the student loan program for residents of Alaska to attend colleges and universities in Alaska as compared with colleges and universities outside Alaska;

(2) the result of this lack of incentives is that 64.9 per cent of all undergraduate student loans and 92.9 per cent of graduate student loans go to students attending colleges and universities outside Alaska;

(3) the amount of the average loan to undergraduate students attending colleges and universities in Alaska is lower than the average of similar loans in all but one of the 10 western states and the amount of the average loan for graduate students is the lowest in the West;

(4) the funds spent on education in Alaskan colleges and universities go further than when the funds are spent out of state; and

(5) it would be an aid to the Alaskan economy if the funds in the student loan program were spent for education in Alaskan colleges and universities.

* Sec. 2. AS 14.40.763 is amended by adding a new subsection to read:

(l) Each year spent attending a college or university in Alaska qualifies as a year of employment and residency under (j) of this section.

GUARANTEED STUDENT LOAN PROGRAM

The Guaranteed Student Loan Program (GSL) was originally enacted under Title IV, Part B of the Higher Education Act of 1965. The purpose is to: encourage State and private non-profit agencies to establish adequate loan insurance programs for students in eligible institutions; provide a Federal program of student loan insurance for students not having reasonable access to a state or private non-profit student loan program (FISL); and pay Federal interest subsidy on loans made under these programs as well as on loans made under direct state loan programs.

Under this program students may borrow up to $2,500 as an undergraduate and up to $5,000 as a graduate student per year. Repayment is to include a maximum of 7% interest on the loans.

While a student is enrolled in school or under the following deferments:

1. return to full-time student status,
2. active duty in Armed Forces (up to 3 years),
3. service in the Peace Corps or VISTA (up to 3 years),
4. seeking and unable to secure employment (up to 12 months), and
5. totally disabled

the federal program will pay, on behalf of the student borrower, the interest on the loan(s).

If a borrower defaults, files bankruptcy, or dies, the holder of the note is reimbursed the entire amount due, interest and principal. That is, the federal program "guarantees" the payment of the loan.

The program also provides for additional payments if defaulted loans are pursued and collected and annual administrative cost allowances. The administrative cost allowances are based upon loan volume for the preceding year.

STATEMENT

TO: SEN. HACKNEY

FROM: FOSTER F. DIEBOLD, PRESIDENT, UNIVERSITY OF ALASKA, FBKS., AK 99701

I WANT YOU AND OTHER MEMBERS OF YOUR COMMITTEE TO KNOW THAT THE UNIVERSITY OF ALASKA STRONGLY ENDORSES BOTH THE INTENT AND SUBSTANCE OF SB 130, ESTABLISHING AN ADDITIONAL INCENTIVE IN THE STUDENT SCHOLARSHIP LOAN PROGRAM FOR STUDENTS TO ATTEND COLLEGES AND UNIVERSITIES IN ALASKA.

THIS LEGISLATION--ALSO FAVORED BY THE ALASKA STUDENT LOBBY--HAS PARTICULAR MERIT BECAUSE IT IS NOT COERCIVE, WOULD NOT FORCE STUDENTS TO ATTEND INSTITUTIONS OF HIGHER LEARNING WITHIN THE STATE, AND YET IT WOULD VERY SUBSTANTIALLY BENEFIT THOSE STUDENTS WHO WANT TO STUDY AND MAKE THEIR HOMES IN ALASKA. CURRENT LAW PROVIDES AN INCENTIVE TO STUDENTS TO LIVE AND WORK IN ALASKA FOLLOWING COMPLETION OF THEIR EDUCATION BY CONVERTING TO A GRANT UP TO 40 PERCENT OF THEIR LOANS, BASED UPON LENGTH OF RESIDENCE AND EMPLOYMENT IN THE STATE. TO ALSO ALLOW TIME SPENT AT AN ALASKAN COLLEGE OR UNIVERSITY TO BE TAKEN INTO ACCOUNT FOR THIS INCENTIVE WOULD SEEM TO BE A MOVE TO STRENGTHEN THE BASIC OBJECTIVE OF THE LOAN ACT.

*****THIS MESSAGE TO BE CONTINUED***** EOM

LA21 2395 15.55 JA01 0071 15.55 03/09/79

CONTINUATION OF MESSAGE TO SEN. HACKNEY FROM FOSTER DIEBOLD

AS YOU ARE WELL AWARE, A MAJORITY OF THOSE STUDENTS RECEIVING STATE SCHOLARSHIP LOANS ARE ATTENDING COLLEGES AND UNIVERSITIES OUTSIDE ALASKA. WHILE MANY OF THESE STUDENTS UNDOUBTEDLY DESIRED TO ATTEND PARTICULAR INSTITUTIONS BEYOND ALASKA, FOR ONE REASON OR ANOTHER, THERE COULD VERY WELL BE AMONG THEM A NUMBER WHO MIGHT HAVE CHOSEN TO PURSUE THEIR EDUCATION IN ALASKA WERE AN INCENTIVE SUCH AS THAT PROPOSED IN SB 130 AVAILABLE TO THEM.

I HAVE HEARD NO ADVERSE COMMENTS ON SB 130 AND WOULD, AGAIN, COMMEND IT HIGHLY AS A MEANS OF INCREASING THAT BODY OF TRAINED AND EDUCATED PERSONS WHO ARE CONTRIBUTING SO SUBSTANTIALLY TO ALASKA'S GENERAL WELL-BEING AND PROGRESS. THE LEGISLATION WILL ALSO, I BELIEVE, MATERIALLY STRENGTHEN ALASKAN COLLEGES AND UNIVERSITIES, PUBLIC AND PRIVATE, AND THEREBY PROVIDE YET ANOTHER INCENTIVE FOR STUDENTS TO REMAIN IN THE STATE.

FBKS LIO/AW/EOM

Feb. 22, 1979

FACT SHEET ON SB 130: "An act establishing incentives for students to attend colleges and universities in Alaska; and providing for an effective date."

Purpose: This bill would amend AS 14.40.763, changing the Alaska Student Loan Program by establishing financial incentives for Alaskan students to pursue their postsecondary education in-state. It does not punish, in any way, those students who nonetheless choose to go "outside" for their college education. For those persons, the loan program remains exactly the same.

Introduction: Established by the 1971 Legislature, the Alaska Student Loan Program provides low-cost educational loans to Alaskan students enrolled in undergraduate, graduate or career degree programs. In the seven years of operation, from 1971-72 through 1977-78, nearly 12,000 loans have been awarded to Alaskans pursuing education at the postsecondary level. These loans account for a combined total of over $21 million in state financial assistance.

Loan amount ceilings have been $2,500 and $5,000 respectively for undergraduate and graduate students, though the maximum loan limit for undergraduate study was raised to $3,000 by the 1978 Legislature. These need-based loans offer the recipient a ten-year repayment period at an annual interest rate of five percent. The student may use the state loan to attend any accredited college or university in the nation, or to attend approved vocational-technical education programs. An incentive, in the form of up to 40 percent cancellation, is offered to those individuals who work in Alaska after completion of their programs of studies.

Objectives: This bill, without changing the existant provision relating to the 40 percent cancellation, would also tie that provision to attendence at a college, university or voc-tech program in Alaska so that the student would enjoy a 10 percent cancellation after two years of attendence in-state, 20 percent after three years, 30 percent after four years, and the maximum cancellation of 40 percent after either five years of attendence or residence.

The benefits of this bill are primarily threefold:

1) Alaskans going to school in Alaska would receive direct financial benefit - without causing any reduction in benefits to those who still choose to go outside for their education;

2) because the amount of the average loan to undergraduate students attending colleges and universities in Alaska is lower than the average of similar loans in all but one of the 10 western states and the amount of the average loan for graduate students is the lowest in the West, the funds spent on educational loans would go further if a greater percentage of those funds were spent in-state (at present, 64.9 percent of all undergraduate student loans and 92.9 percent of graduate student loans go to students attending colleges and universities outside Alaska);

3) in addition to the point made above, that more students could receive loans without an increase in allocation of funds if more loans were made to students in-state, the Alaskan economy would also benefit from a greater expenditure of funds in-state.

Other Considerations:

Loan awards for FY 1979 have increased by approximately $2.2 million over the total of $4.6 million spent in FY 1978. That huge increase was due to three factors:

* increase in applications;

* increase in cost of education;

* increase in maximum undergraduate loan ceiling from $2,500 to $3,000.

There is another bill being considered by the Legislature this year, SB 10 by Sumner and Ferguson, which would make a special appropriation for FY 1980 of $7.5 million ($5.6 million General Fund), and for FY 1981 of $8 million ($5.9 million General Fund) to the student scholarship loan program. That bill has already passed out of Senate HESS and is presently before Senate Finance. Its significance rests in the fact that it would mandate a two-year appropriation so that loans could still be awarded in the spring of '80 for the '81 school year.

In addition, Kerry Romesburg, executive director of the Postsecondary Education Commission, has indicated that he will attempt to add several amendments to SB 130 when it comes before Senate HESS Committee. The effect of those amendments will be to enable the State Scholarship Loan Program to participate in the Federal Guaranteed Student Loan Progam. The purpose of that is to take advantage of several of the provisions of the federal program which will, without increasing the costs to either the student or the state, make available a significant amount of federal money (possibly $300,000) to add to the state funds for the program.

SUBJECT: FY 1979 Supplemental Appropriation Request - Office of Internal Review

A supplemental appropriation request for $12,200 of State general funds for the Office of Internal Review, Administration Component is forwarded for your review and action.

A. REASON FOR THE SUPPLEMENTAL: Children in Foster Care and Institutional Care for the most part, are no longer considered AFDC eligible by the Federal criteria. Reimbursement for activities related to children in care of the Department can no longer be claimed. The change in eligibility criteria by the Federal Agency was not known until after after the FY 1979 budget was passed by the Legislature. General funds to replace the appropriation Title IVA Funds are requested.

B. CONSEQUENCES OF NOT FUNDING THE SUPPLEMENTAL: Support services for the other components of this BRU would be cut off. This component is comprised of one Administrator and two Clerical support positions. Without funding, employees would have to be laid off to stay within the appropriation level of State General Funds.

C. OTHER INFORMATION: No lapse in another BRU is anticipated, therefore, no funds can be identified which could be transferred to reduce this supplemental need.

SUBJECT: FY 1979 Supplemental Appropriation Request - Office of Internal Review

A supplemental appropriation request for $75,800 of State general funds for the Office of Internal Review, Audit Component is forwarded for your review and action.

A. REASON FOR THE SUPPLEMENTAL: Children in Foster Care and Institutional Care, for the most part, are no longer considered AFDC eligible by the Federal criteria. Reimbursement for activities related to children in care of the Department can no longer be claimed. The change in eligibility criteria by the Federal Agency was not known until after the FY 1979 budget was passed by the Legislature. General funds to replace the appropriated Title IVA Funds are requested.

B. CONSEQUENCES OF NOT FUNDING THE SUPPLEMENTAL: The required audits will not get completed. The backlog of audits to be completed will increase sharply. Two current employees would have to be laid off immediately.

C. OTHER INFORMATION: Expenditures for this component have been less than one-twelfth of authorized per month. Vacant positions which have been filled during this fiscal year have been considered in this request. The total of Title IVA funding authorized for this component is $96,200, but vacancies resulting in approximately $40,000 has resulted in the lower Supplemental Request. No lapse in another BRU is anticipated, therefore, no funds can be identified which could be transferred to reduce this supplemental need.

POSITION PAPER/Department of Health & Social Services

POSITION PAPER

SENATE BILL NO. 142

"An Act making a supplemental appropriation to the Department of Health and Social Services; and providing for an effective date."

Office of Internal Review

Senate Bill No. 142, in regard to the Office of Internal Review, provides for replacing a shortfall of federal funds with state general funds. The AFDC eligibility for children in foster care and institutional care changed drastically since the preparation of the FY 1979 budget. Activities by the Administration and Audit Components of the Office of Internal Review relating to children in foster care and institutional care are no longer eligible for Title IV-A federal reimbursement. A signficant amount of effort by this unit is made in auditing and rate setting of AS 47.40 related services.

If state general funds are not made available to replace the lost federal receipts, all Administrative and Audit staff will be subject to layoff by mid-April.

Division of Social Services

Senate Bill No. 142 provides for supplemental funding of $1,353,800 to replace unclaimable federal Title IV-A funds and to meet the increased costs of the foster care and institutional care programs. Recent projections based upon actual expenditures, the first six months of the fiscal year, indicate it may be possible to reduce the supplemental request to $1,332,000.

Under AS 47.10.230 and 47.40.040, the Division is required to provide 24-hour care and supportive costs for children in need of aid. Children placed in foster and institutional care are committed to the Division's custody, and the Division has no control over the number of children for who care must be provided or the rates paid (see attached audited rates).

Supportive costs, such as travel to and from placements, witnesses at court hearings, initial placement clothing purchases, medical care and psychiatric and psychological evaluations and treatment (the majority of which are court ordered for the child and parent(s)) must also be provided. The majority of the costs for evaluation, testing, examinations and other medically related care were borne by the Division of Public Assistance's Medicaid program in the past; however, such costs must now be assumed by the program. This policy change was enforced in FY 79 and therefore, the increases were not anticipated at the time the original budget request was prepared.

POSITION PAPER/Department of Health & Social Services

Replacement of $880,900 federal Title IV-A funds with general funds is required. Federal representatives conducted a review of the cases for which Title IV-A funds were being claimed, resulting in a drastic reduction in revenues for FY 78. The number of children meeting the federal criteria for AFDC-FC eligibility (45 CFR 233.110(a)(1) and (a)(2), has decreased drastically. Therefore, Title IV-A funds appropriated for FY 79 will far exceed actual revenues. Total replacement of these funds with general funds is requested, however, both the Divisions of Social Services and Public Assistance will continue determining eligiblity and claiming all possible federal reimbursement.

If general funds are not appropriated to cover the above, we will be unable to meet foster care costs beyond mid-May, and institutional care costs beyond mid-April.

Supplemental need for travel are based upon a one-month payment lag; professional costs upon actual contract limitations; clothing, provider payments and medical upon a two-month lag in Foster Care and a one-month lag, plus recent encumbrances, in Institutional Care. The total request is as follows:

	200	300	400	700	Fed Shortfall	GF Total
Foster Care	$51.8	$58.1	$26.4	-0-	$314.6	$450.9
Institutional Care	30.3	-	9.9	274.6	566.3	881.1
	82.1	58.1	36.3	274.6	880.9	1,332.0

Enactment of Senate Bill No. 142 is recommended.

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

SENATE BILL NO. 142

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making a supplemental appropriation to the Department of Health and Social Services; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $1,441,800 is appropriated from the general fund to the Department of Health and Social Services, to be allocated as follows:

Office of Internal Review - Replacing shortfall of federal funds for FY 79	$ 88,000
Division of Social Services - Replacing shortfall of federal funds for FY 79 and cover excess expenditures of FY 79 appropriation	1,353,800

47.3
35.1
12.2

1,310,800
43.3

* Sec. 2. The unexpended and unobligated portion of the appropriation made in sec. 1 of this Act lapses June 30, 1979.

* Sec. 3. This Act takes effect immediately in accordance with AS 01.-10.070(c).

FINANCE DIVISION
POUCH WF — STATE CAPITOL

JUNEAU 99801

February 23, 1979

TO: Senator Hackney

FROM: John Lucas

SUBJECT: SB 142

The following changes should be considered for SB 142:

1. Section 1. The FY 79 supplemental request for for the Division of Social Services should be reduced from $1,353,800 to $1,310,500. A Revised Program is in process which would transfer $43.3 from Day Care to Foster Care.

2. Section 1. The FY 79 supplemental request for the Office of Internal Review should be reduced by $40.7 to a total of $47.3. In submitting their request, they did not take into account the fact that they expect to lapse $40.7 in the audit component.

In addition this bill only takes into account the amounts required by the Division of Social Services for FY 79. I have attached the additional funds which the Division will require for FY 78. This amounts to $704,600 to replace the shortfall in federal and program dollars. It is basically comprised of the following:

	Foster Care	Institutional Care	Total
FY 78 Expenditures	.2	(.2)	-0-
Fed. Receipts shortfall	194.8	441.3	636.1
Pgm. Receipts shortfall	59.6	8.9	68.5
Totals	254.6	450.0	704.6

MEMORANDUM

TO: Art Peterson
Assistant Attorney General
Department of Law

DATE: February 2, 1979

FILE NO:

TELEPHONE NO:

SUBJECT: Supplemental Appropriation Department of Health & Social Services

FROM: Ron Lind, Director
Division of Budget & Management
Office of the Governor

RPL

Please prepare a bill for the Governor's introduction making a Supplemental appropriation in the amount of $704,600 to the Department of Health & Social Services for the purpose of replacing a shortfall in federal dollars during FY 78 in the program services BRU in the Division of Social Services.

This $704,600 should be appropriated from the general fund.

This act should take effect immediately and include a lapse date of June 30, 1979.

SB 143

Sen. Sumner. I've had a background in the care and feeding of human beings for 14 or 15 years in terms of board and care facilities; people who have emotional or social adjustment problems, mental illness, and I've been able to see through firsthand involvement hardships in terms of individuals' lives. But I was introduced to a family and then I found out there are several families that have as one member of their family an autistic child. What we are dealing with in autistic children is a personality behaviour that almost forbids the option or forecloses the option of being able to get any sort of relief in terms of sitters or in terms of someone to stay with or care for that child. Their erratic behaviour is such that they can burst into uncontrollable behaviour, then can tend to attack the person trying to care for them, they tend to do things that are so shocking; its out of the line of emotionally disturbed children or mentally ill children.

These youngsters are really difficult to control and difficult to predict their behavious. What happens then in that family is that after days and weeks and months of consistent high intensity observation of this child it just comes apart. There is a torment in a whole family, not just in terms of having someone which they wish could participate in normal activities, in sports and functions; but youngsters that absolutely require full attention on almost a day and night basis to care for. They tell me that from time to time they pray for sombody who has some training or some facility that can sit with this youngster or keep the youngster for 24 hours. They said sometimes 24 hours away is like a month's vacation and they need that sort of family support to help provide for these children.

The group of parents that I met with invited many of the legislators from the Anchorage area to come and they gave us an overview. One of the things they said that was typical among autistic children is that it is very difficult to be able by physical observance to tell that a child is autistic -- very beautiful children. They radiate no behaviour patterns that would cause you to exercise caution when dealing with them or working with them. Yet, you can be riding along and stop at a stop sign, they are liable to get out of the car and run and you can't get them back. If they are playing in the yard they are liable to run into the stree. It's this sort of unpredictable behavious that doens't let a mother or a father for one minute have a bit of peace. In many instances it ultimately drives the family to divorce and separation because there is no program no facilities capable of handling or dealing with these children.

In Alaska there is no funding program or project, as I understand it, to provide these types of services. I understand it is even difficult to get and I hate to use the term lable, but diagnosis to get it diagnosed in that category. As

a result most of them are precluded from many of the other programs.

To establish a program that would do two things: (1) a home care, in other words, a full 24 hours, 7 day a week service. I understand there are 2 to 4 children in API at the moment but that is the only type facility that is available for them to provide for that program, the autistic program, would take about $165,000. They budget they have submitted to me is $165,542. A separate respite program which involves more the capacity ot keep one of these youngsters either on a babysitting evening or 24 hour short term basis or maybe for a short vacation for the family at $163,492.

When it comes to which is the more important of these two programs, it's one of those things which is difficult to say. However, the respite program would serve more people. The autistic program would serve at a higher level of care, but it would serve fewer people. I would urge the committee to at least consider the total program, but I know and I know what the budget is this year. But, I would urge that at least one of the programs, the respite program be approved and if later in the budget if we can find the dollars or we can exercise some priority we could find room for the other month. At least for the time being, I believe one of the greatest callings that we can do this year is to be able to provide the families not only the children some short term peace of mind to know that their children are being cared for to give the family a little relief.

Sen. Sturgulewski. I think you've outlined what obviously is a real concern. As I understand, it is an extraordinary difficult to diagnosis. There is one 'diagnosis' case in API, two possibles in Valdez and others that at least the parents are absolutely convinced this is true. To go into a residential program I think it is better to move slowly into new areas to determine the need, but I notice some hesitation on the part of the Department of H&SS as to really some of the components of the respite program. Have you worked closely with them, or do they have people here that can speak in detail to that?

Sen. Sumner. My knowledge is basically that of having seen the families, having seen the behavious of the children and having listened to the family say that there is no way in the world we would get somebody to sit with one of these children for a short period of time. You'd never get them back. Soon you run out of people.

Sen. Fahrenkamp. Would this program be on a statewide basis or were you planning on starting a pilot project in one area?

Sen. Sumner. A majority of the families with children that would be cared for in this program live in Anchorage. To the best of my knowlege, it does not include facilities outside of the Anchorage area. The one thing that it does include that would be statewide is that it provides for some funding in terms of psychiatric consultant at $5,400. So we are talking roughly maybe

$17,000 or $18,000 at which they were hoping to be able to identify other children throughout the state and it would servie anyone if they brought their children in for a week or two if they wanted just a bit of relief or rest, they could bring their children in and it would service people from all over the state except it would not provide for transportation to get them into Anchorage.

Sen. Fahrenkmap. I know of cases that though not formally identified are definitely . . . So I was concerned that persons in other areas could not have this relief. If however, it is planned in this that people who are taking a short vacation or are getting away for the weekend could have someone in the Anchorage area and drop tneir children there knowing they would be perfectly safe until they returned that that would be helpful.

Sen. Hackney. I think that would be understood because I noticed the one individual that had been identified was a Barrow younster.

Sen. Sumner. I think so. This would provide for a facility and for the cost of care except it may occur for not only short periods of time but it could occur for significant periods of time.

Sen. Fahrenkmap. It bothers me very much that we put children with this identification in API. I think it is an injustice to both the family and the child. However, it is better than nothing.

Sen. Sumner. I can tell you I often said that every elected official ought to have to do through Sonoma State Hospital at least twice a year to keep in touch with reality because there are some priorities out there that exist when I look at the millions that drop through the cracks.

Sen. Hackney. Is it your understanding then that the individual is already on board down there are Hope Cottage?

Sen. Sumner. I don't know. I corresponded with a Mrs. Hohman I think it is for almost 3 years now and was invited into the home just before to see physically what is at work and to listen to them and to relate to you that their needs and cries for some respite.

If the autistic program, if that was under consideration, is a . . . I'm reasonably sure what they wanted to do there was to hire someone with specific training and specific capacity to diagnos and that would be a statewide effort and once identified hopefully we can begin to generate some sources other than general funds. I'm advised that what they are in hopes to do, Hope Cottage will be seeking alternate sources of funding in the future and will be reworking the proposal in order to be eligible for foundation monies. There are some foundation monies.

It says $329,035 is being requested for a pilot program for respite and residential care of autistic children. The funds will go to the Hope Cottage who has developed the program. Each committee member has a copy, etc. The program will be for at least 13 children, 3 of which are residential and between the

4y

ages of 4 and 18. At the present time there are 11 children identified as needing the respite with 4 in the residential care. These children are presently institutionalized at API and Harborview.

Sen. Hackney. A thought just occurred to me. The rate hearings are coming up next week, Tuesday or so, The man from Hope Cottage will be down here for the rate hearings. Would you have any objection if we do two things. The cost projections that you indicate here break this down to recurring costs, 8 month costs and 2nd year costs. It is my feeling that 2nd year costs very definitely should be included in the budget if we want to get serious about that. But, that start-up costs would legitimately be a concern as an addition to this bill if that is what we want to do. I think I would like very much to hear from the guy at ope Cottage first. I think John . . .

Sen. Sumner. I've advised the families as well that there are some loan programs available. I didn't know the final status. Once we pass it we think it is law but then it gets killed someplace else. But, there were some loan programs available at one time in terms of this respite care program or the residential program at which they might be able, collectively, to borrow money and buy one of the existing home facilities for this purpose. The one thing I will state now for the record that I do not want to see is anything - this program graduate to anything more in terms of regulations, requirements or law other than a babysitting program. I don't want it to get into all that criteria that sometimes accompanies institutional care. This is specifically for certain minimal programs and I really hope that the committee .. .

Sen. Sturgulewski. I appreciate your information. I personally would want to have more knowledge of how that would work but I've got to say that I've never seen 10 or 12 women that were as effective in making a presentation.

Sen. Hackney. It would not be your understanding that if we were to fund the respite program section of this that that would only be for autistic children.

Sen. Sumner. I don't follow. I know it would accommodate at least that care, if we've got the people and the facility it would be appropriate that it be fully utilized. I am in hopes that what we see here is only part of the overall imput to this because I know that if there is a facility available for this pecific purpose that the mothers will alternate share or time share some of the sitting costs. The problem they have is when they bring another child into their home, the exploratory attitudes sometime causes them to tear up a home, so there is some hesitance to do that. But if there was a place they could go I'm sure that they will time share and participate.

Sen. Hackney. I think also that these programs require some specialized equipment too, such as toys and that type of thing that isn't available to the ordinary home owner.

Sen. Sumner. I would have no objection because my initial plea to you is to getting the program ongoing and I will share in the most articulate terms the responsibility that the group has to continue its search for additional monies.

Cathy Lloyd. 143 is the corrections supplemental. If you'll take section 1, we have reduced that by $18,000. These are all the unpaid bills after we submitted the supplemental we were able to release some encumbrances and bring down the unpaid invoices $18,000. So we ask you to amend section 1 to read $234,992.

On page 2 of the position paper you will see that we had all the funding in the original appropriation but last year things were allocated by line item and we couldn't move the components around. So in effect we are just asking you to reappropriate in the lines where they are needed.

Sen. Fahrenkamp. As I understand it then, this appropriation is well within the budget, it is just a matter of transferring those parts that have to go back to the general fund if they are not expended.

Cathy Lloyd. That's right.

Section 2, we have asked from the original bill, please add $50,000. As you see in the position papers this was due to perhaps 2 things; the extra OMVIs we had and the fact that we did not have enough space here in the state.

Section 3, we ask this amount for the underfunding in line item 100 which is the personal services. Corrections runs institutions and security is a major problem. All the posts must be fully funded and fully secured. The budget last year, as you will see, was underfunded in line item 100. The state works on a 7 1/2 hour day which automatically builds in 2 1/2 hours overtime for these posts also which dries up that line.

Sen. Sturgulewski. The budget was underfunded, why was that? Are we talking about vacancy factors here?

Cathy Lloyd. Vacancy and turnover factor does more or less a double whammie . . .

Sen. Sturgulewski. Is that built in to as a budgetary figure at a 2% or 5% or something and that is what we are looking at?

Cathy Lloyd. Basically yes.

Sen. Sturgulewski. What is the figure that is used? Why did you get here?'

Cathy Lloyd. In the budgeting process they usually, they have been taking every year a larger and larger vacancy and turnover. In most programs of a fair size you can manage the vacancy and turnover. You can try to stagger hours. At down times you can have less people on duty. However, in institutions, especially in in insitution where security is a factor, you cannot turn down

your security at any particular time. We have to keep our security posts fully funded. I have here with me Mr. Sothan who is the acting director of Corrections who can speak to that if you'd like him to.

Mr. Sothan. The security posts basically are those posts that are most necessary as needed for the care and confinement of . . . we are talking security, not talking about treatment for the 24 hour security, the dormitories, the intake section, the single cell portions of it, those that have people there on a 24 hour basis even though some of them may be in transit. These are stationary posts that must be maintained 24 hours a day. There are other posts inside the institutions that don't necessarily have to be maintained 24 hours a day, the kitchen for instance. so you can pull off of that.

When we are talking about strickly security confinement or security posts, they are ones that must be maintained whether someone is sick, whether they have been injured on the job, whatever the reason may be, there must be a corrections officer there without fail to maintain security.

Sen. Fahrenkamp. In this shortfall of appropriations, is included the positions that the court fuled that under staute must be there at the 6th Avenue jail in Anchorage, is that in this appropriation?

Mr. Sothan. Yes.

Sen. Sturgulewski. What is the percentage vacancy factor you run and what are you budgeted for? Is there a nice science to that when the Finance Department gets through with your budget?

Cathy Lloyd. No.

Mr. Dalby. I'm the administrative officer. We run 24 hours and we have a 37 1/2 hour work week which really calls for 5.2 people per post in order to get your 24 hour coverage. The vacancy factor historically has been 5% plus, but it does vary between institutions. This is based upon an appropriated personnel record which shows vacancy. The problem is that when you have a PCN which is vacant we have to fill that with either a temporary or with overtime. On that basis we do not get credit against that vacancy factor for a temporary fill or a overtime fill. Therefore, it is historically we get assesse a vacany factor. We come up with this problem every year.

Sen. Sturgulewski It seems to me that if it is a chronic program, a justified one that ends up here every year that there should be some consideration of adjusting your budget process.

Cathy Lloyd. Yes, we agree and we have tried to do that every every year but they still seem to put consistently the same vacancy and turnover even though we are running 24 hour institutions.

Mr. Dolby. You'd asked whether there was that money included the appropriation for those extra officers at the Annex. I wasn't clear as what the meaning of that question was.

Sen. Fahrenkamp. The meaning of that question is that I have a copy of the court's order which says that according to state law you would have to have that many people there and I understood that even though we might want to take it out of the judicial budget, I'd just like to know if we are going to have to have another appropriation or if it were included in this #3.

Mr. Dolby. We are budgeted for those positions and they are there, 40 people are at the Annex.

Mr. Sothan. I think what you may be referring to Senator is that the court order says that you will increase 9 positions. Let me answer that. What he is talking about 9 positions over and above when the court case was originally filed almost 3 years ago. Since that point in time there are 40.5 positions. We already have those 9. We are under the statutes as far as Judge Singleton's order.

Sen. Fahrenkamp. How long have you been up to the statutes according to this.

Mr. Sothan. We came under when the Judge first came down on his order. We came under the full scale and we were finally able to locate, identify, train, advise and so forth last fall. This court case has been on so long that we've even had a change of defendant.

Sen. Fahrenkamp. Might we enlist your aid in getting a rush order on the Juvenile Facility we are trying to get built in Fairbanks so we can relieve that overcrowded situation before 1980.

Mr. Sothan. We find ourselves caught up quite often in a bureaucratic system which, based upon some of the laws in trying so many people together. And DOTPF, of course, it would be nice that if the bond money that has been awarded to the Division of Corrections was given over and they said 'OK, get to it boys, talk to your people and get it going.' Unfortunately it doesn't work that way, you can't spend the money before you have it, the bonds haven't been issued, so to get the money you've got a long process of paperwork, shuffling back and forth to do the designs before you are even ready to form your committees. It would be presumptious for the DOC or the Dept. of H&SS to go to these various locations to build these facilities without input from the citizenry there because we basically feel that they know the needs, so then we have to form committees to say we are ready to go for our design. It sounds like a lot of bureaucratic nonsense but it the system really does work, it just doesnt go as quickly as we'd like.

Sen. Fahrenkmap. I know the system orks, but it works too slowly to suit me, If you let me know how many committees you are going to appoint, Ill see tht they get down here tomorrow so we can

get this thing going. We need jobs in Fairbanks. I would appreciate cutting every bit of the red tape you can cut.

Sen. Hackney. You're tall us now that these positions were filled, the nine positions that Judge Singleton came out with this order, but the only way that you are going to pay for them is by passing this supplemental? Am I correct there?

Mr. Sothan. No. We are not just isolating just down to those 9 positions. The supplemental appropriation covers the full gamut of all the DOC and all security aspects. The nine positions that were brought in on the Judge Singleton orders were awarded to us especially last year on a supplemental. It was awarded, they were staffed and brought in. The request for supplemental appropriation to cover the amount of payroll we have for security positions now. That's doesn't actually enter into it as a total picture.

Sen. Fahrenkamp. I think the thing that is bothering you and bothering me is the type of publicity on this type of thing just now hits the fan and that upsets you.

In line of the questioning that I was after in regards to Juvenile Facilities, I would like to extend the invitation to you to join with the Interior Delegation on Tuesday night at 8:00 with Commissioner Beirne to help us try to solve this problem.

Sen. Hackney. Are there other questions? If not, we've had an amendment suggested.

Sen. Sturgulewski. I would move to amend section 1 by a decrease of $18,000 and to increase section 2 by $50,000.

Sen. Hackney. Any objection. so ordered

Sen. Sturgulewski. I move that we pass out of committee with individual recommendations SB 143 as amended.

Sen. Hackney. No objections? So ordered.

FEASIBILITY STUDY

DEVELOPMENTAL GROUP HOME/AUTISTIC

HOPE COTTAGES, INC.

1. The Need: Background and Rationale

Leo Kanner first identified autism as a developmental disability in 1943. Despite the passage of over three decades, the behavior of autistic children remains bewildering to clinicians as well as to parents and has proven to be a most difficult syndrome for which to obtain an adequate developmental history. Unless a physician or mental health specialist suspects autism and knows what signs are characteristic, the process of diagnosis is frequently thwarted from the beginning. The existence of wide differences in severity, a lack of specific physical signs and confusing terminology make diagnoses difficult at best. Research, however, has been ongoing and the diagnostic procedure continues to be refined with some recent signs of real progress occurring.

At present, there is no specific treatment for autism. Clinicians and educators involved in particular treatment approaches have made strong claims of success, but no treatment has as yet been demonstrated to dramatically alter the natural history of the disease. Many individual approaches have been attempted including psychotherapy, family therapy, speech therapy and special education. Other approaches include day treatment, residential treatment, psychiatric hospitalization, medication, megavitamins, sensory stimulation and sensory isolation. More recent research advances have indicated the strong possibility that an enzyme malfunction may be a major factor in the occurrence of this syndrome in a majority of the cases. Despite all of this, it appears that for the foreseeable future the major factor in the treatment of this disability will be patience, as one must recognize that improvements and regression are likely to occur within this population despite the influence of the most optimistically presented treatment plan.

Programs for the autistic in the Alaska area have been most noticeable by their absence. With the single exception of the program developed through the auspices of the Center for Staff Development and implemented within the Anchorage School District, there is no well-known structured educational or residential program for children exhibiting this syndrome now extant within our state. There is, however, a well functioning and devoted group of parents operating under the title of Parents of Autistic Children who have supported existing efforts in the treatment of their children and have moved to initiate improvements on those programs through group action and expressed individual interest. They are presently speaking to the needs of approximately 11 children exhibiting autistic or autistic-like syndrome who are living at home as well as the needs of at least four other students who are presently known to be institutionalized at the Alaska Psychiatric Institute in Anchorage and at Harborview Developmental Center in Valdez. Recently, there has been a new surge of energy in the parents' attempts to develop a more adequate residential program for those children who must remain away from their natural home as well as development of a respite activity that will continue the training programs for autistic children within a formalized structure after school hours. These are occasions when parents desperately need

to re-energize their depleted resources or, as frequently occurs, need that type of respite support to allow them to continue their training, to recreate and, in other ways, to remove themselves temporarily from the exhausting process of maintaining an autistic child.

This parent group, generally, appears to be well trained from frequent involvements within the school district program. They also continue their own individual efforts to update their knowledge in the area of autism and to move strongly to implement that knowledge within their child's learning structure as well as to demonstrate the ability to experimentally introduce new approaches to the treatment of autism within their living structure. This group is highly supportive of this proposal to develop and implement a residential/respite program for autistic children within the Hope Cottages complex. (See appendix for case descriptions of presently known autistic children within the Anchorage area.)

2. Numbers of Autistic Children in Alaska

The number of autistic children in Alaska is not accurately known. As previously stated, the process of diagnosing an autistic child is at best a loose one and these children frequently find themselves diagnosed within various psychiatric syndrome areas or within the mentally retarded categories. Further, since the State of Alaska is in a developmental stage in the sense of treating these youngsters and has not as yet developed a formal program for the treatment of autistic children, there is no state listing of children that we can utilize to estimate the existent need for services within this state. However, through the efforts of the Parents of Autistic Children group, we know that in Anchorage alone there are 13 children between the ages of five and 13 years who exhibit behaviors and developmental disabilities sufficiently to nominally classify them as autistic. It is difficult to come to a final estimation of the numbers of these children within this area until such time as more formal and effective procedures for diagnosis are utilized as common procedures within our treatment and educational areas. In addition to the children presently diagnosed in Anchorage, there are at least two other children in the Harborview Developmental Center in Valdez who appear to fall within this classification. Of the population presently known, at least three are in need of continued residential placement while the remaining seem to be able to be maintained within their natural home environment providing respite care becomes available to the parents as required.

In further examining the situation in Alaska, we should fall back on the results of surveys and inquiries to identify autistic children carried out in England, Wales, U.S.A. and Denmark. There have been at least three studies where a total population of children or a wide range of handicapped children were screened using case note inspection and interviews. All of these studies estimated the problems of the autistic syndrome to be between four and five children per 10,000 aged under 15 years.

Utilizing these results we might estimate the existence of approximately 40 autistic children within the Alaska area in need of specific programming developed for their diagnosed needs, when, and if, these needs are properly diagnosed. (1)

3. Definition - The Syndrome of Autism

The syndrome of autism is a developmental disability which is defined and diagnosed behaviorally. Signs and symptoms appear before 30 months of age and indicate disturbances in each of the following areas:

a. Developmental rates and sequences - Normal coordination of the three developmental pathways (i.e., motor, social-adaptive, language-cognitive) is disrupted by delays, arrests, and/or regressions among or within one or more of the pathways.

b. Responsiveness to sensory stimuli - There may be generalized over or under reactivity or alternations in these areas. One or more sensory systems are involved, e.g., sight, hearing, touch, balance, position, smell and taste.

c. Development of Speech, Language/Cognition and Nonverbal Communication - Speech may be absent (mutism) or delayed in onset with persistent immature inflections, syntax and articulation. Language/cognitive deficits include absence or limited ability to use symbols, only specific capacities may be present, failure to develop the use of abstract terms, concepts and reasoning, echolalia and/or the nonlogical use of concepts. Disturbances of nonviewable communication, include absence or delayed development of the appropriate use of gestures, disassociation of gestures and language, and/or failure to assign conventional symbolic meaning to gestures.

d. Relationships to people and objects - These are manifested by the failure to develop normal responsivity to people and to use objects appropriately (to assign proper symbolic or thematic meaning to objects.) There is a preference for self stimulation which refers to stereotyped repetitive behavior which appears only to provide the child with proprioceptive feedback (e.g., rocking, spinning objects, etc.).

The syndrome is caused by an underlying physical dysfunction within the brain, the exact nature of which is as yet unknown. It occurs alone or in association with mental retardation and other disorders known to affect the brain. This syndrome occurs approximately four or five times per 10,000 births and is four to five times more common in males. It afflicts persons in all parts of the world, of all racial and ethnic backgrounds, and all social classes. Studies of families with autistic persons have failed to identify any unique features including personality characteristics and I.Q.

Although autistic persons live a normal life span, the syndrome is severely incapacitating. Symptoms change over the course of time and periodic medical evaluations and special educational programs are required. Facilities with behaviorally structured developmentally appropriate programs have been demonstrated to be most helpful.

4. Program Goals

We propose the implementation of a pilot project residential/respite program for autistic children within the Hope Cottages program by November, 1978, or as soon thereafter as possible. We are looking at the development of one group living facility for autistic children and youth which will promote planned developmental growth toward self-dependence for a highly structured program in the context of a small, family oriented environment. This program will be developed in close coordination with the existing Judevine program at Whaley Center on a daily living routine basis and will, by the nature of these children's needs, develop a program tailored to suit each individual resident. This unit will function as a facility within the Hope Cottages structure and will be managed and developed by the organization's administrative staff.

It is recognized that this autistic program will not be successful until we can clearly define the problems that we are dealing with. In the past, efforts to educate autistic kids have been separated by professional issues. In this instance, we will approach the problem with a generalistic viewpoint that will give primary attention to the needs of the children and their families. Such orientation to the child will create a functional, instead of hypothetical, rehabilitative program. We cut across any categorical attempts to label and "pidgeon hole" those children since recent research has demonstrated that the label "autism" covers a wide variety of syndromes and results from the clustering of individuals who share similar ways of functioning.

This approach to primary attention to the needs of the child and his family and a sympathetic recognition of their plight does much to eliminate the scapegoating tendency identifiable in professional practice. A rehabilitative intervention lends itself to the direct involvement of parents, family and community in solving the child's problem. To accomplish this our program will carry a heavy component of ongoing inservice education for our staff as well as for the parents of these children. Where the parents have already developed a high level of expertise through their involvement in other existing programs, their inservice education will occur only as new methods and approaches evolve and require their further training.

Utilizing a rehabilitative process for the training of parents helps them to experience developing effectiveness with their child as well as the development of broader understanding of their child's needs. This serves to destigmatize parents, encourage effective action and decrease the degree of professionalization. For too long the parents of autistic children have been seen as a basic cause in their children's disability. We now know there is no proven research that gives strong support to this supposition. Our program, recognizing this fact, will involve the parents as equal partners in this rehabilitative effort (3).

This pilot program will be evaluated at the conclusion of one year of operation for effectiveness as a base model for a continuing program within the Hope structure as well as a model for other programs in the Southcentral region and thence throughout the State of Alaska.

The above stated goals will be met in the following ways:

By extending and expanding the structured, normalizing developmental program already employed in the Whaley Center of the Anchorage School District into a group home situation.

By extending and expanding a structured normalizing environment into the leisure time and the life style of the group home family through systematically exposing each resident to not less than four leisure time activities that can be done independently and four different recreational activities that are usually done in teams or groups for a minimum of 400 hours during the proposed project period.

By providing high quality residential training in basic skills for three autistic children and youth in residence and approximately 11 within the structure of our respite program functioning within the residential project to prepare them for an existence as close as possible to that of the mainstreams of society. To attain this goal, each resident will systematically sample not less than six different activities with vocational potential for a minimum of 240 hours during the proposed period.

Our object is to prevent institutionalization now and to facilitate deinstitutionalization in the future.

By developing a continued training model for the parents of these children that will enhance their present level of knowledge concerning their child's developmental disability and encourage acceleration of their ability to understand the nature of their child's needs and to respond to those needs in a highly structured and productive manner directly in line with the program's operation within the school district and within the residential unit.

Following a successful initial one year pilot period, a permanent program structure within the Anchorage community will be developed to serve as a model for other such programs throughout the State of Alaska and in other sections of the 50 states where bush situations and program needs situations similar to Alaska exist.

This pilot program will function across initial age spread of four to 18 years and will serve a population of at least 13 children, at least three of whom will be residents within the program and the remainder will be clients who will be involved at various times with the respite portion of this pilot effort.

Clients will be provided with maximum therapy and training through highly structured behavioral programming directed to moving them to as adequate and independent a self management posture as is feasible for their particular situation. Major emphasis will be given to developing communication skills, self management skills, self security concepts and others, not only as they relate to the individual's emotional need but also as they can be directed to the client's vocational planning and development. In addition to the group residents' training program for an initial nucleus of two or three resident clients, a respite care program will be provided for the pool of children now residing in the general Anchorage area numbering approximately 11. This respite care will be offered as required on the cyclical basis for parents. Exact programming of this offering will be determined by parent need and a schedule developed from that need as well as the program's operational realities. In addition, a training program for the parents of children in residence or respite will be offered in conjunction with the Judevine program within the Anchorage School District and attendance will be required on a schedule to be determined by the parent's present level of expertise. Parents will be required to maintain a demonstrated level of measured competency in caring for their children through the behavioral management program structure.

A base rate for the amount of respite care provided to a given family by the facility is established at 15 hours respite per month. To receive this service, the parents are required to actively participate in the Judevine Training Program which is conducted by the Anchorage School District. This training program includes ongoing training sessions and seminars and the parents involvement in this is a prerequisite to participation in the residential/respite program under the auspices of Hope Cottages, Inc.

Parents will be able to earn credit for time given to the training program, as well as for time volunteered to serve as management aides within the respite and residential porotions of the program. These credits can be utilized by parents for additional respite time for their children within the center. If additional respite is wanted by the parents, then it will be necessary for them to earn that time through direct service to the actual facility.

A program will be developed to certify the parents based on demonstrated proficiency in the application of various techniques involved in the training programs. A certified parent will get four hours respite for each one hour of involvement in the program. A non-certified parent will get two hours respite for every hour of active service. The certification will be reviewed at least annually to ensure an adequate level of proficiency on the part of the parents.

This proposed group resident/respite program is envisioned as a pilot effort for the possible future establishment of additional group residences for clients with similar developmental need throughout the State of Alaska. We envision this program as having the potential, both to prevent institutionalization of these clients as well as to bring autistic persons out of institutions and into the life of the community. We also

see the respite and training portions of our programs as ways of enhancing the child's natural parents' ability to work effectively with their children. In addition, we also look to the respite portion of our program to assist in developing the situation which will prevent the burning out of parental energies and allow them to maintain custody of their children instead of placing them in custodial institutions. For the vast majority of these children, being placed in our program will be seen as a means of enhancing the client's interaction with his natural family and every effort will be made to maintain that relationship and to build more effective management skills within the family structure to carry through the behavioral management programs proposed. It will only be a small minority of these children that will find long term residence within the Hope Cottages program.

This will be a full time facility operating on a seven day per week basis, 52 weeks per year. The client served within this program will either be diagnosed as autistic or will demonstrate autistic like syndrome to the extent that they are seen as feasible clients for our program.

5. Program Objectives

As previously noted, this pilot residential/respite program will serve as a learning center for that part of each child's day that is not involved within the public schools or in his natural home environment. In collaborating with the already existing program at the Whaley Center, it will concentrate on three objectives to meet the above stated goals.

a. Providing an environment for learning a basic communication system consisting of speech, gesturing, writing and so forth. In many instances, these learnings will be an extension of the programs underway for that child within the public school program.

b. Provide a learning environment that will serve for the continuation of the child's replacement of bizarre and inappropriate behaviors with adaptive social and interpersonal coping behaviors. This will provide an environment to promote basic skills including reading simple instructions, writing, telling time and money handling. The program will include emphasis on the maintenance of good personal hygiene, self dressing, preparing meals, cleaning rooms, washing and drying clothes and learning self meditating behavior control techniques where these objectives are in line with the existing learning stage of the child.

c. In addition and in coordination with the above objectives, the basic objective of the Hope Cottages, Inc. treatment program is to achieve spontaneous goal directed, age appropriate behavior from the children under treatment. The aim of treatment is, therefore, to bring about those behavioral changes or to continue the development of those behavioral changes necessary to ensure the child's placement in the community rather than having him or her spend their life in a chronic institutional setting. Treatment at this stage will be highly structured and individualized, designed to eliminate inappropriate behavior and to substitute normal responses.

Cognitive development, socialization skill development, prevocational skill development and a body awareness program will also serve as fundamental objectives for program organization within this residential/respite structure.

There will be strong emphasis in our program to the integration of programs within the treatment center with the parents and with community agencies, thus providing a continuum of care for children so that they are ready to move from one program to another and eventually out into the normal environment as soon as it is feasibly possible.

Further, and in coordination with the above objectives, this program will serve a training function for the parents of these children who are in need of such services. For those parents who have already acquired a high level of expertise in the behavioral maintenance of these children, this program will continue to prepare them in conjunction with activities now existing at the Whaley Center and to participate fully and in a coordinated fashion with our program goals within the child's home base situation. A facilitating program component reaching towards this objective will involve a voluntary or employed participation of certain of these parents within the respite and/or residential components of this program in such a manner that a continued level of their competency to assist in the managing of their children's programs will be displayed. It should be noted again that parents who are evaluated as possessing a high level of competency in managing and maintaining the behavioral management approach within their home structure will not be required to be involved in further training except only as new approaches to new habilitations are developed.

Each resident will be assessed in the area of communication skills, behavioral skills, including interpersonal coping behaviors and basic life skills, within four weeks of entering the group program. Assessment of a similar nature will already have been accomplished within the Whaley structure. This assessment period will be specific and directed to an organized diagnostic procedure operating in conjunction with and enhancing the child study team approach of the school district. That organization structure, which will include the child's parents, will serve to assist our assessment staff in evaluating areas in need of further specific evaluation. These evaluations will be conducted through the auspices of our psychological consultant program and our existing assessment staff. Specific skills and specific deficits of the residents will be identified and further development encouraged through the resident individualized programming. In addition, special attention will be directed to those activities which have vocational potential to assist in developing vocational training activities that can be realistically included in the residential and/or respite program developed for this child. An Individual Developmental Educational Plan will be developed for each resident and will be implemented by the resident staff. Progress towards educational plan goals will be reviewed each month and adjustments will be made as needed. A complete evaluation of the progress of each individual resident will be conducted on a monthly basis by the residential/respite

program staff in coordination with the consultant teams, parent representatives, school district representatives and Hope administrative staff. Any recommended changes in the individual's program will be implemented immediately.

6. Treatment Approach

The treatment approach will be a unique combination of humanistic psychology and behavior modification. Most of the children who enter our residential/respite program have limited ability or desire to relate to people as human beings. People are frequently treated as objects and mostly objects to be avoided. In order to break through this barrier we will try to have a primary therapist, or aide, assigned to each child. They will become the child's main source of training, discipline and satisfaction with the aim of forming a close, affectionate relationship which is based on reality. In this manner, the therapist or aide becomes a socialization trainer of the child.

With most children who are autistic, behavior modification is used extensively at the beginning of treatment. Specific autistic behaviors are eliminated through the principles of reward, extinction and punishment. Through the principles of positive reinforcement, toilet training, self care and other essential living skills are taught step by step, the child's responsibility gradually being increased as each subtask is mastered. As each child emerges into awareness, appropriate spontaneous behavior such as eye contact and in tiation of physical contact are encouraged in a more permissive atmosphere. In our approach, rigidly controlled behavior modification programs will be discontinued as soon as practical. A more normal interaction between therapist and child is necessary in order for the child to respond independently and appropriately in different situations. Once the child begins to verbalize, the expression of feelings and needs is encouraged using the reflection and interpretation approaches developed in humanistic psychology. Our eventual aim will be to produce spontaneous age appropriate behavior in the children. This can only be accomplished by encouraging and allowing it to develop in the context of a warm and caring relationship. Socialization only develops when it becomes important to a child to have emotional and physical contact with people he cares for. As soon as a child seems ready to make the transition, other therapists will be assigned to him at various times during the day. He will maintain contact with the primary therapist but the behaviors which have been learned with one therapist generalize to other important people in the child's environment.

Spontaneous interaction with other children will be encouraged throughout the program. Once the child has learned to relate to more than one therapist, structured situations will be set up on a two to one basis (one therapist and two children) to develop peer socialization skills. Once he has reached this level of performance, the training will be group oriented. The only time a child receives formal one to one therapy will be for specific skill development, then the child will go back to the group, where peer pressure and desire are motivating factors. The ultimate goal of our treatment is to keep the child in the community and where he is not now presently in the community to have him rejoin that setting if possible. As he develops, transfer can take place to family or other residential settings in the community. Wherever possible, children in the residential programs will spend weekends and vacations with their family or with a foster family.

7. Residents

There will be a projected population of 3 persons in residence at all times. Three other beds will be available for guests and will be expected to be in continuous use for purposes of respite care. These beds will be used only for children or youths participating within our overall program structure and whose parents attend the training programs within the Whaley Center structure and/or within our own program. In addition, students will receive respite care hours in direct relation to the number of volunteer hours given by their parents to the residential program.

The age range of the clients will be 4 to 18. The three residential clients will be drawn from the populations at API and Harborview Developmental Center. The Hope Cottages, Inc. facilities are designed to provide normalization experiences through the demands of daily living within the school, home and community. It will, therefore, be simply a matter of expansion of this concept to this unit to allow it to operate effectively within the Hope Cottages' structure.

It is difficult to assess the average length of residence for residential clients since it will vary with the individual. In those instances where it is possible for a client to return to his natural home, the length of stay may be a year or under. In most instances, it is expected that the length of stay will average approximately 2 years, terminating at some degree of independent living experience with support services from various sources. The sources could include other group homes operating at a lower level of individualization, their own home structure or in similar activities. The permanent residents are seen as moving into the facility by the 1st of November, 1978. This will allow for preparation of staff and facilities, structuring of program and other activities necessary to ensure optimum operation of the facility. The respite program will begin at approximately the same time.

8. Faci' ty

We propose, for this program, a duplex facility. A residential program will be housed on one side of the facility, staffed by a Living Unit Manager, Living Unit Manager Assistant and others. The other portion of the residence will house the respite program and will be staffed by a respite Child Development Technician. (Further information concerning this will be outlined in the staffing section of this paper.)

9. Delineation of Personnel Request

The autistic child has severely disordered behavior accompanying his communication deficit which serves to isolate him and deny him access to normal learning opportunities. He usually shuns human contact, apparently by choice, and his only spontaneous action is to produce the absolute minimum his environment will tolerate. Consequently, working effectively with such children requires a high concentration of individual attention so the barriers to communication must first be broken down and then means of reaching the child must be painstakingly built. Initially, the staff to resident ratio must be 1:1. Then, as the child develops and communication skills grow, he can share his aide with another resident and eventually with several others. Working effectively with autistic

children may seem very expensive, especially during the initial stages; however, providing effective developmental training is certainly cheaper in the long run. The cost of maintaining these children presently in institutions in Alaska runs to approximately $50,000 per year. The respite portion of our program must also be adequately staffed, hopefully, on at least a 1:3 basis. Our respite program will not serve as a care taking facility. Instead, it will specifically continue the activities developed within the Judevine program in the school district and within our own structure and the respite client will be seen as a member of this program in active participation while he is in respite care. In addition, the parent and other part time aide involvement with these children during respite will be held to as high a professional level as is possible and will, by its nature, continue their training for effective operation with children demonstrating this syndrome. Staff coverage for regular weekdays when the residents attend the Whaley Center program (8:00 a.m. to 3:30 p.m.) will be limited to Living Unit Manager. Emergency respite care may be required during these periods and, hopefully, this could be covered by the pre-arranged presence of program aides. Weekend days and holiday coverage will be handled by resident staff supplemented by aides on a pre-arranged basis. There must also be supplementary staff available in addition to the Living Unit Manager and the Living Unit Relief person, even during the residents' sleeping hours.

10. Staff

10.1 Programming Staff

This program will be developed and managed through the services of a Behavioral Management Team that will be assigned for approximately 25 hours per week to the project. In addition, there will be working full-time within the residential and respite duplex unit, a Living Unit Manager, Living Unit Manager Assistant, a Residential Child Development Technician and a Respite Child Development Technician.

The proposed staff for the duplex facility will consist of a Living Unit Manager, Living Unit Manager Assistant (possibly spouse) who will manage and maintain the residential portion of this autistic living unit. In addition, a Child Developemnt Technician will manage and maintain the respite section of this unit. This staff will be supplemented by a Child Development Technician who will function within both sections of the unit as required but will be attached to the residential section. In addition, as outlined within this paper, parents of autistic children will be available, on varying schedules, to supply relief assistance within the program. During periods of extreme need within periods of extreme need within the respite aspects of the program, there will be further supplementation of this staff through the use of on call staff. (See attached Job Descriptions.)

The Behavioral Management Team and all other staff, plus parent aides, will be required to participate in the initial planning and development of the individual child's programming and any adjustments to that programming. Representative staff from Hope Cottages and from the Whaley Center will be invited to participate in planning/review activities for this pilot project as the needs arise. If feasible, the paid/volunteer parent aides will share one full time position among four or more individuals and will possibly fil' the living unit relief staff position.

10.2 Psychiatric Consultant

The Psychiatric consultant will be familiar with developmental disability clients. In addition, the consultant will, with the rest of the consultant staff and program/parent staff, undergo training in Judevine techniques to the extent necessary.

11. Evaluation

This pilot program will be evaluated on a monthly basis by the coordinating team consisting of a representative from Hope administration, the Behavioral Management Team, the Living Unit Manager and staff and representatives from the Parents of Autistic Children group. The areas to be assessed will, of course, include a regular staffing report developed by the Living Unit Manager on each client's progress. Respite clients will also be evaluated in a similar fashion. In addition, the thrust of the program to meet the following areas of concern will also be evaluated and considered.

1. Responsiveness - Will be closely examining the manner in which developmental group home and respite services respond to the individual developmental needs of our clients.

2. Availability - Will be consistently evaluating the services offered by our programs to be certain that they are not duplicating similar services offered in the community and that they fill gaps in the local area comprehensive service delivery system.

3. Accessibility - Although our potential for servicing clients in either the residential or respite facility during our pilot program will be limited in scope, we will, throughout that first pilot year, be developing information concerning existing unserved client needs within the Southcentral area and throughout the State of Alaska. Following the pilot year we will recommend programming to meet the needs of these individuals.

4. Records - Our record keeping procedure will coordinate with that presently employed by the Hope Cottages system, including habilitation planning and staffing and all the human service facilities presently employed.

5. Quality of Services - Our team will be asked, from time to time, to invite outside agency representatives, including those from the university and the School District, to assist in measuring the quality of our services and recommending possible improvement of those services.

Job Description
Living Unit Manager

Definition: The Living Unit Manager will be responsible to the Behavioral Management Team for the promotion of the individual growth and development of the residents in the developmental group home/autistic within a normalizing atmosphere. He/she will carry out all aspects of both the residential and respite programs, as developed by that team and will further be responsible for managing premises while on duty and may not hold any other employment.

Typical Assignments:

Develops and maintains a warm home-like environment that is conducive to the achievement of optimal development by the residents.

Responsible for the maintenance of all records in accordance with the Habilitation Plans and accreditation procedures.

Participates in all related staffings.

Responsible for the implementation and assessment of all behavioral modification programs developed for residents, including self-medication, household chores, appearance, meal preparation and related activities.

Supervises the Living Unit Manager Assistant, Residential Child Development Technician, the Respite Child Development Technician, Emergency Relief Staff and parent aides.

Ensures that the staff and the facility conform to Policies and Procedures, as established by the Board of Directors.

Cooperates in the development of innovative approaches to training and activity programs for all residents consistent with their needs.

Maintains active liaison with community agencies, including the School District, as required, to facilitate a unified effort to the residents' development.

Coordinates continuing inservice training for staff.

Cooperates in the development of research projects with the Behavioral Management Team, both in conjunction with the universities and independently, and assures that any recommended projects are in the best interest of the residents of the Autistic program.

Participates as a member of the Behavioral Management Team in all instances where that participation is desireable.

Other duties as periodically assigned by the Behavioral Management Team.

This facility is in compliance with Title VI of the Civil Rights Act of 1964.

Selection Standards:

Knowledge of:

Behavioral modification techniques

Crisis intervention techniques

Inservice approaches for staff development

Normal child developmental schedules

Residential/respite approaches to the training of children with autistic tendencies

Special education procedures, particularly in the area of behavioral modification

Management principles and existing treatment programs using the normalization and least restrictive environment concepts.

Ability to:

Relate to and instruct behaviorally disturbed children.

Maintain consistent and responsible direction for residents and staff.

Follow accreditation standards.

Maintain records in accordance with Hope Cottages' Policies and Procedures.

Manage and assist in the development of short and long term behavioral modification programs, including those directed to the areas of living skills, social skills, and community interaction skills.

Demonstrate the ability to interface effectively with other professional agencies and systems, particularly School District programs, psychiatric facilities, psychological programs and other community support agencies.

Effectively communicate, by verbal and written methods, to maintain good supervisor/supervisee and parent aide relationships.

Plan for long range goals.

Prepare appropriate budgets, as required.

Recommended Degrees:

A Master's level program with major emphasis on behavior modification techniques is strongly suggested.

Experience:

At least three years experience in a residential program, hopefully involving respite care, and directed to the facilitation of behavioral modification within groups of autistic or other behaviorally disturbed children.

Licenses: Alaska Driver's License

Salary Range: (Exempt)

JOB DESCRIPTION

Living Unit Manager Assistant
(Living Unit Manager Spouse)

Definition: The Living Unit Manager Assistant is responsible to the Living Unit Manager for the promotion of the individual growth and development of residents and respite clients within the Autistic program. The Living Unit Manager Assistant will live on the premises while on duty and may hold other employment only when specifically approved by the Behavioral Management Team.

Typical Assignments:
Responsible for the supervision and/or provision of housekeeping services, meal preparation and general living environment control.

Assist the Living Unit Manager in all instances where program implementation, living unit conditions or emergency resident situations require that assistance.

Assist the Living Unit Manager in the transportation of residents or respite clients between programs within and without the Hope system.

Responsible for the supervision of personal cleanliness and other living skill habits in residents and respite clients, as well as all living time schedules (meals, sleep, as programmed).

Other duties as periodically assigned by the Living Unit Manager.

Selection Standards:

Knowledge of:

Crisis intervention techniques, child development schedules, developmental needs of autistic/behaviorally disturbed children.

Supervision techniques

Ability to communicate repair and ground maintenance needs, as required, to the appropriate individuals.

Degrees: A Bachelor level, or above, experience in behavior modification techniques would be desireable.

Licenses: Alaska Driver's License.

This facility is in compliance with Title VI of the Civil Rights Act of 1964.

JOB DESCRIPTION

Residential Child Development Technician

Definition: The Residential Child Development Technician is responsible to the Living Unit Manager and the Living Unit Manager Assistant for the care and treatment of residents within the Autistic program.

Typical Assignments:
The Residential Child Development Technician will:

Cooperate and act as a team member in the complete care and treatment of residents.

Assist in the implementation of behavorial modification programs, as developed.

Assist in the supervision of residential client activities in all living situations.

Assist in maintaining the living environment in a clean, orderly state.

Accompany residents on outings, as required.

Follow through with all recommendations directed to the welfare of the clients as recommended by the Living Unit Manager or Living Unit Manager Assistant.

Contribute to and implement individual Habilitation Plans, as required.

Take necessary care of resident's personal effects and clothing.

Interface with resident parents and parent aides, as required, on a cooperative and faciliatory basis.

Employment Standards:
The Residential Child Development Technician will:

Have at least 2 years experience in a similar residential/respite program or be able to demonstrate, to the satisfaction of the Behavior Management Team, that his/her life experience and/or training is the equivalent of such experience.

Demonstrate a level of academic training sufficient to allow him/her to carry through the occasionally complex and specific behavioral modification program that will be a major aspect of the employment needs in the situation.

This facility is in compliance with Title VI of the Civil Rights Act of 1964.

Express a willingness and demonstrate ability to:

Carry through all program recommendations recommended or given to him/her by the Living Unit Manager or the Living Unit Manager Assistant.

Show a cooperative, logical and facile approach to the structuring and the implementation of all assignments given to him/her to so carry out.

Job Description
Respite Child Development Technician

Definition: The Respite Child Development Technician will be responsible to the Living Unit Manager and the Living Unit Manager Assistant for the operation and maintenance of the respite section of the Autistic unit. He/she will receive and implement programs and procedures for the management and maintenance of that respite program in a cooperative and facile manner and will, in addition, be responsible for managing the involvement of emergency relief people and parent aides within that program.

Typical Assignments:

Carry out proposed admissions and departure scheduling for all respite clients.

Communicate with the parents of respite clients as to entrance and departure schedules, program needs, clothing needs and other maintenance situations.

Assisting with the transport of clients to and from their home or institutional settings, as required.

Simple maintenance activities, as required within the structure.

Responsible for the supervision and, where required, the preparation of meals, sleeping and other living situations as normally occur within a respite facility.

Responsible for other duties as periodically assigned by the Living Unit Manager or the Living Unit Manager Assistant.

Selection Standards:

The Respite Child Development Technician will:

Have at least 2 years experience in a similar residential/respite program or be able to demonstrate to the satisfaction of the Behavior Management Team that his/her life experience and/or training is the equivalent of such experience.

Hope Cottage, Inc.
2805 Bering Street
Anchorage, Alaska 99503

Dear Loyad,

As promised on our recent phone contract I have checked with Harborview and A.P.I. regarding children who might be appropriate for Hope Cottage's proposed program for Autistic Children. Harborview reports that they have only one. He is Johnny Kenton from Barrow. A.P.I. reports that they have two such individuals. They are Brad Hemme and Bobby Kakline. I am not sure of the spelling of Bobby's last name.

As regarding the request for the number of people from South Central who we know need I.C.F.M.R. care, I have requested this information from our information center and they have promised me that I will have it this week. I will forward it to you as soon as I receive it.

Sincerely,

Hope Cottages
2805 Bering Street
Anchorage, Ak. 99503

Dear Loyd:

Thank you for the opportunity to review Hope Cottages' Developmental Group Home proposal for autistic children. Your proposal was of particular interest in that it addresses a critical need in Alaska.

I was particularly impressed with a number of factors:

1) The proposed coordination with the Whaley Center and implementation of services based upon the Judevine program would seem to provide optimum service delivery consistency.

2) The involvement of families at several levels is indeed refreshing. Perhaps more than any other single factor, family involvement in habilitation programs for the more severely handicapped leads to the greatest behavioral changes.

3) The emphasis on leisure time activities creates a life style of learning rather than a "school-only" learning environment.

4) The structure of residential training and the provision of highly trained staff is indeed important to realize advancement.

5) The goal of prevention of institutionalization is a concept long needed by programs for handicapped children.

6) The inclusion of structured respite services strengthens the entire program.

7) The evaluation plan prior to full program

implementation offers a firm, objective basis for future planning.

You and your staff are certainly to be congratulated for preparing a proposed project which I feel has an excellent basis for providing quality services to autistic children. Please keep me informed as to future developments and know that the Alaska Vision/Hearing Impaired Program is available to assist in any manner possible.

Sincerely yours,

Clyde

Anchorage, Ak 99503

Dear Mr. Gathman:

Thank you for the copy of Hope Cottages proposal for developing residential and respite care for Autistic Children and your request that I comment on this.

First I want to say that I believe that respite care for all D.D. individuals is the number one need in Alaska and the Anchorage Area. I believe that respite care for this group of Autistic Children is the number one need in Anchorage at the present time. The only reservation I have regarding the proposal as presented to me is in the concept of parents earning hours of respite care through their participation in the program. I realize that the program is built on family involvement and some means maybe needed to insure this. My concern is that this method maybe the most difficult on those families who need the service most. Such as single parents who work and those with a number of other children. I am sure that you are aware of these potential problems and will be looking at different approaches as the project develops.

I am not sure about the need for the residential part of the proposal. It seems that the only confirmed need in Anchorage area is one child. The two from Harborview are both from the Northern part of the State. Since the program is in part based on family participation and it would be very difficult if not impossible to involve these families directly in the program, I have some questions regarding the value of the program to them. Also there is some question in the mind of Staff people at Harborview as to whether either of these individuals are in fact autistic. I have asked the psychologist at Harborview to check into this and give me a report on these two boys.

Since there was no budget information provided it is impossible to comment on the cost effectiveness of this program as compared to other programs.

I hope these comments will be helpful to you. If you wish to discuss this with me further please contact me.

Sincerely,

Lee A. Killgore

Dear Mr. Gathman:

Please be advised of my support of the formation of a residential/respite program for autistic children in the Anchorage area. By the formation of such a program, the parents of an autistic child can be assured of a continuing program with the necessary structured program in the parents' absence whether that absence be for brief respite time or for the residential care of their child. Such a program would also allow both parents to be engaged in employment with the knowledge that their child is being provided with the same care and instruction received at home and at school.

This letter may be used as supporting evidence of the necessity of such a program and to support the public's general interest in such a program.

Sincerely yours,

Edward J. Reasor

Dear Mr. Gathman:

We, the undersigned, hereby lend our support for the formation of a residential/respite program for autistic children in the Anchorage area. This is a necessary program to enable the parents of an autistic child to obtain respite or residential care for their child in their absence whether such absence be for brief respite time, for both parents to be employed, or for the residential care of their child on a permanent or temporary basis.

This letter may be used as supporting evidence of the necessity of such a program and to support the public's general interest in such a program.

TO WHOM IT MAY CONCERN:

As Director of Special Education for the Anchorage School District I wish to lend my endorsement to the proposal for the provision of a group home and respite center for autistic children. As the providers of educational program for these youngsters, we are extremely concerned with their resident placement and their home situation. We are pleased to be able to be a part of a provision of a behavior management system which will be used in the respite center setting and carry over into our school setting.

We are extremely aware of the stress that can be experienced by parents of autistic children when they are in need of emergency shelter for the child or they are in need of some relief. The way in which the proposal elicits commitments from the parents and provides for their active involvement with the center is outstanding.

Again, may I say that I heartily endorse this proposal and look forward to this facility becoming a reality in the very near future.

Sincerely,

James L. Rich
Director of Special Education

TO WHOM IT MAY CONCERN

As Supervisor of the Behavior Adjustment Program, the program primarily designed to serve autistic children who are certified for Special Education services in the Anchorage School District, I heartily endorse the proposal for a group home for autistic youngsters developed by Hope Cottages, Inc. As a consultant during the planning stages of this project, I feel that I was able to give some input and become aware of the reality of the development of this project.

We are enthusiastic about the planning to use the same behavior management systems with the students in this proposed home setting that have proven to be successful in our school system. We feel that we are well staffed and equipped to assist with training personnel for this project.

It is my hope that this project will be funded in order to fill a sure gap in available community services to handicapped individuals and their families.

Please contact me if I can be of further assistance.

OCT 23 1978

HOPE COTTAGE, INC.

October 19, 1978

Roger Weed, Executive Director
Hope Cottages, Inc.
2805 Bering Street
Anchorage, Alaska 99507

Dear Mr. Weed:

Please accept my apology for not responding sooner to your request for feedback on Hope Cottage's proposed program for autistic persons.

The proposal reads well, and I am certain that a great deal of thought went into its development. We do have data from parents of autistic children that indicates the need for out-of-home, overnight respite care services. However, we do not presently have data indicating that the residential service that you propose will be utilized by autistic persons, nor do we have data indicating that those individuals who display autistic behavior and who are at API or Harborview would benefit significantly by the proposed residential service.

Accordingly, I suggest that your efforts be concentrated on a respite care program and that it not be limited to autistic persons. Second, in order to show that residential services are needed, I suggest that evidence be gathered on the basis of actual individuals in need of a common type of specialized service.

I cannot comment on the cost of the proposed service, because a budget was not included with the proposal sent me. I would be interested in reviewing the proposed budget if available.

Sincerely,

Robert P. Gregovich

POSITION PAPER
Senate Bill No. 143

"An Act making supplemental appropriations to the Department of Health and Social Services, Administration of Justice; and providing for an effective date".

The Department of Health and Social Services supports the intent of Senate Bill No. 143.

Section 1 The Department of Health and Social Services Division of Corrections has updated the supplemental request in detail to February 21, 1979, and hereby submits appropriate changes and supporting schedules totalling $234,932 to cover the payment of goods and services provided the Division during FY78. Invoices could not be paid because there were insufficient authorization balances in applicable budget components. An exhaustive effort was made to effect reallocations of available funds within the Division of Corrections budget, however, a legal determination was made that unpaid amounts were to await legislative approval of a supplemental in 1979. The Division lapsed funds in excess of the unpaid invoices.

Detail schedules of the unpaid invoices are available on request.

POSITION PAPER/Department of Health and Social Services

PUBLIC PARTY/Department of Health and Social Services

The invoices are summarized by BRU and relative lapsed funds are shown as follows:

TOTAL DIVISION	$234992	$169505	$202436	$371941

Section 2: The FY 79 Out-of-State Contractual budget of $1109.0 allowed for approximately 122 prisoners. The out-of-state prisoner count rose to 157 by January 3, 1979 due to the reduction of available in-state bedspace. Judge Singleton's order to reduce the population level at the Annex Correctional Center and the impact of the 3 day sentence provision for OMVI convictions triggered an increase of out-of-state placements. Twenty prisoners with seven or more years sentences were transferred to federal facilities during November and December 1978. This represented 10 more placements than originally projected within the $182.4 supplemental request.

By maintaining the 157 level until June 30, 1979 a maximum of 28574 additional mandays will be consumed (182 days x 157 prisoners) at a cost of $762,000 (28574 x $26.68). The federal billings from July 1, 1978 to December 31, 1978 totalled $578,139 for 21, 662 mandays of confinement or an average of $26.68 per manday.

Total costs for FY 79 is estimated to be $1,340.1 ($578.1 + $762.0). The supplemental request of $182.4 will be approximately $50.0 short of the current projection of total costs ($1340.1 less budget $1,109.0 plus $182.4 request = $48.7). Prisoner relocations to lower cost facilities and the non-charge for days prisoners are in transit between federal facilities may reduce costs. There are no prisoners housed in federal facilities eligible for parole before June 30, 1979.

Section 3: The FY 79 personal services underfunding budgeted for Adult Confinement is $335,800. Although the appropriate personnel budget report of 12/28/78 shows year to date vacancy savings of $255,222, a shortfall is projected for the year because of the expenditures for temporaries which do not offset the vacancy savings figure in the report. In addition, projections from the same appropriated personnel budget report show that overtime expenditures may run $50,000 over budgeted amounts.

Institutional staffing consists of a number of posts for supervisory and guard duty, most of which must be manned on a 24 hour a day basis to maintain order among the inmates. A post that is not staffed for long periods of time could signal the inmates that they are not under close observation due to staff shortages. This could lead to prisoners fights, sexual assaults, strong arming, property destruction, and escape attempts. The continuous presence of a Correctional Officer in an area reduces the risk of these incidents occurring. Temporary employees also fill posts vacated during correctional officer training at the Sitka Academy. The near 20% correctional officer turnover rate and high usage of sick leave also impacted personal services costs.

The projected shortfall is now $382,000. Overtime is being restricted as much as possible, and a correctional officer training class has been cancelled which will save overtime and

POSITION PAPER/Department of Health and Social Services

temporary employee funds that would have been spent on fillins during trainee absences. The agency also has an excess of $100,000 in the local facilities allocation which can be transferred to correction center allocations, thus reducing the supplemental request to $282,000.

Ten of the 14 new positions authorized in FY 79 for Adult Confinement were put in the Anchorage Annex Correction Center. Some of these positions could have been transferred to other correction centers to help alleviate the shortfall, except that the State has filed a proposed plan to comply with Judge Singleton's recent orders on Annex which prevents this. This agreement between the State and Judge Singleton specifies that there will be 40 positions staffing the Annex, even with the reduced population.

Institutional program and administrative type positions in other correctional centers could be laid off, but this was considered unwise in light of expanding prison populations and understaffing that already exists in most institutions. (see attached detail)

Other alternatives to limit correctional officer overtime were considered unworkable because of probably successful labor union grievances.

The alternatives of closing the Ridgeview Women's Facility would be a step backward and cause pressures on other institutions.

The FY 78 delete and add supplemental which transferred $400,000 out of the Juvenile Confinement BRU to offset Adult Confinement personal services shortfalls is probably not feasible this year because the FY 79 budget for Juvenile Confinement was adjusted to eliminate the prior year amounts overbudgeted

The problem is further compounded this year because of the Governor's 1% personal services veto which took $83,700 out of Adult Confinement.

	6		$ 70.7	Administrative and supervisory expertise reduced by approximately 50%. Parole Preparation, counseling classification reduced by 50%.
Ketchikan	Ø		$ Ø	Present staff levels are below minimum considering split locations and/or physical plans of facilities. Ridgeview programs are by citizen volunteer groups with equivalent of one correctional officer's time for security.
Nome	Ø		Ø	
Ridgeview	1	Correctional Officer	10.6	
			$ 10.6	

Correctional Center	No. of Positions	Job Class	Personal Services Savings March 1 to June 30, 1979	Impact
Anchorage Annex	1	Assistant Supt.	$ 10.6	Administrative and supervisory expertise reduced by approximately 50%.
	1	Inst. Counselor	10.6	
	7	Correctional Officers	74.5	
	9		$ 95.7	Counseling reduced by 50%.
				Reduction of staff is possibly in contempt of part of the Mosely vs. Beirne case, Judge Singleton's tentative ruling, and the State's proposed plan submitted to the Court for consideration.
Eagle River	1	Assistant Supt.	$ 11.4	All programs reduced 50%
	2	Inst. Counselor	20.4	Counseling Reduced 50%
	1	Vocational Instructor	9.8	Administrative and supervisory expertise reduced by approximately 50%.
	5	Correctional Officers	52.0	
	9		$ 93.6	
TOTAL	39		$357.6	The Differential $357.6 - $282.0 = $75.6 is scheduled to account for any unforseen delay beyond March 1, 1979 in the lay off plan.

PLAN B

Substitutes Labor, Trades & Crafts positions in place of Correctional Officer Staff reductions at respective Correctional Centers.

Anchorage State	1	Maintenance Mechanic	$ 12.1
Juneau	1	Maintenance Mechanic	10.4
Fairbanks	1	Maintenance Mechanic	10.9
Anchorage Annex	1	Maintenance Mechanic	13.3
Ridgeview	1	Maintenance Mechanic	12.0
			$ 58.7

Reductions of maintenance staff wholly restricts preventative maintenance programs. Mechanical equipment failures, down time, and make-shift repairs eventually prove more costly through major repair and replacement expenses and disrupted operations. All institutions are experiencing more frequent repairs as equipment ages.

Alternative Plan to effect additional savings:

It is not economically feasible to continue leasing the Ridgeview Facility under proposed terms of the new owners. It has been estimated that necessary major repairs would cost the State an estimated $250,000 to bring the building up to acceptable standards. The lease costs for the next 2 to 2½ years would amount to $506,200 excluding escalation clauses for increased taxes and insurance. Alternative housing at significantly lower life cycle costs are being explored.

The sentenced females now housed at Ridgeview could possibly be moved to contract facilities outside of the State, with as many as deemed judicious to be moved to other State operated correctional centers. The unsentenced female offenders should be held within reasonable distance of the Anchorage courts and legal resources to avoid further legal actions. Returning the unsentenced females to a separate wing of the Annex is one immediate solution - barring successful court injunctions by the Human Rights Commission or other adverse legal actions. The other possibility would be to house the unsentenced females in the maximum security unit at Eagle River. The Annex location would require 5.2 staff added back to the proposed Plan A. At Eagle River it would require 9.0 staff - 5.2 security and 3.8 booking and administration since this facility does not have a booking office.

Closing Ridgeview by March 1, 1979 would generate approximately $60,000 in lease cost savings, and $200,000 in personal services if the entire staff was terminated on that date.

The projected $260,000 savings would be offset by the following:

Out of State Contractual Services	
10 Female prisoners at $25.00/day x 120 days =	$ 30,000
Estimated care costs, medical and personal care items not covered in the daily rate	4,000
Transportation costs includes escorts (cost to State)	8,000
	$ 42,000
Removal of electronic equipment, fencing and restoration of Ridgeview premises	50,000
Add back one half of Ridgeview staff costs to accommodate just the unsentenced prisoners	100,000
	$192,000

The net savings projected of $68,000 is predicated on all elements of this drastic change in operations to mesh exactly on time. This savings could rapidly dissipate through hidden costs due to slippage and disruptions in operations and program efforts.

Other Alternatives Explored:

Personal Services Cost Reduction Concepts	Reasons for Rejection
1. Establish a policy of assigning staggered shifts to avoid the mandatory 2½ hours of overtime per week per correctional officer.	1. Prior arbitration (Sheffield case) in another Department addressed this issue - Ruling - "You cannot withhold that which was told they would receive at the time of their employment", i.e., normal and advertised 2½ hours of overtime per week. Any attempt to institute such a procedure would be sorely and successfully challenged by APEA.
2. Contract for all maintenance and repairs.	2. Funds not available in either operating budget or capital budget.
3. Reduce classification committee sessions by 50%. Estimated one time savings (expense deferred) $30,000.	3. This would cause serious classification backlogs. Prisoners must be moved through the system in an orderly and efficient manner. Timely classifications avoid problems in program, security, and bedspace. Also Human Rights Commission, Ombudsman complaints, and lawsuits are minimized. Postponement and/or delays result in much higher future costs.
4. Limit amount of sick leave and annual leave that can be taken for the balance of this fiscal year.	4. This procedure would result in successful grievances being filed, especially on sick leave. This also may trigger increased abuses of leave.
5. Postpone Anchorage Annex Correctional Center renovations involving correctional staff doing trades and craft work.	5. The bedspace crunch, and the Moseley vs. Beirne case calls for timely renovations of this facility. Legislative inquiries have already been received concerning renovations starting dates and progress.
6. "Add - Delete" supplementals	6. It is premature at this early date to develop any "add - delete" supplemental.

Should the Division of Corrections be forced to a layoff of Adult Confinement personnel, no guarantee can be given that basic security can be provided. The reduction of security levels in order to offset the projected deficit will return the operation of the State facilities to the same level or less than existed in the 1974-75 period. The present prisoner population is not only significantly higher but also prisoner profiles are now predominantly with felony convictions.

It was a clear mandate then with the high number of escapes - 65, internal incidents, the murder of a policeman, and the rape of a guard's wife, and we assume the mandate still exists that security levels cannot be reduced.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making supplemental appropriations to the Department of Health and Social Services, Administration of Justice; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of ~~$253,300~~ $ 234,992 is appropriated from the general fund to the Department of Health and Social Services, Division of Corrections, for payment of goods and services provided to correctional centers during FY 78.

* Sec. 2. The sum of $182,400 232,400 is appropriated from the general fund to the Department of Health and Social Services, Division of Corrections, for increased prisoner placements + 50,000 in federal institutions during FY 79.

* Sec. 3. The sum of $282,000 is appropriated from the general fund to the Department of Health and Social Services, Division of Corrections, for the FY 79 shortfall in personal services costs for adult correctional institutions, to be allocated as follows:

Juneau	$ 34,000
Fairbanks	80,000
Ketchikan	17,000
Eagle River	71,000
Ridgeview	80,000

ST - do pers Juneau camp, Lagoon

* Sec. 4. The unexpended and unobligated portions of the appropriations made in secs. 1, 2, and 3 of this Act lapse June 30, 1979.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.-10.070(c).

Sec 1 - -18,000
Sec 2 - +50,000

POSITION PAPER/Department of Health and Social Services

POSITION PAPER
Senate Bill No. 143

"An Act making supplemental appropriations to the Department of Health and Social Services, Administration of Justice; and providing for an effective date".

The Department of Health and Social Services supports the intent of Senate Bill No. 143.

Section 1 The Department of Health and Social Services Division of Corrections has updated the supplemental request in detail to February 21, 1979, and hereby ~~submits~~ appropriate changes and supporting schedules totalling $234,932 to cover the payment of goods and services provided the Division during FY78. Invoices could not be paid because there were insufficient authorization balances in applicable budget components. An exhaustive effort was made to effect reallocations of available funds within the Division of Corrections budget, however, a legal determination was made that unpaid amounts were to await legislative approval of a supplemental in 1979. The Division lapsed funds in excess of the unpaid invoices.

Detail schedules of the unpaid invoices are available on request.

POSITION PAPER/Department of Health and Social Services

Section 2: The FY 79 Out-of-State Contractual budget of $1109.0 allowed for approximately 122 prisoners. The out-of-state prisoner count rose to 157 by January 3, 1979 due to the reduction of available in-state bedspace. Judge Singleton's order to reduce the population level at the Annex Correctional Center and the impact of the 3 day sentence provision for OMVI convictions triggered an increase of out-of-state placements. Twenty prisoners with seven or more years sentences were transferred to federal facilities during November and December 1978. This represented 10 more placements than originally projected within the $182.4 supplemental request.

By maintaining the 157 level until June 30, 1979 a maximum of 28574 additional mandays will be consumed (182 days x 157 prisoners) at a cost of $762,000 (28574 x $26.68). The federal billings from July 1, 1978 to December 31, 1978 totalled $578,139 for 21, 662 mandays of confinement or an average of $26.68 per manday.

Total costs for FY 79 is estimated to be $1,340.1 ($578.1 + $762.0). The supplemental request of $182.4 will be approximately $50.0 short of the current projection of total costs ($1340.1 less budget $1,109.0 plus $182.4 request = $48.7). Prisoner relocations to lower cost facilities and the non-charge for days prisoners are in transit between federal facilities may reduce costs. There are no prisoners housed in federal facilities eligible for parole before June 30, 1979.

Section 3: The FY 79 personal services underfunding budgeted for Adult Confinement is $335,800. Although the appropriate personnel budget report of 12/28/78 shows year to date vacancy savings of $255, .22, a shortfall is projected for the year because of the expenditures for temporaries which do not offset the vacancy savings figure in the report. In addition, projections from the same appropriated personnel budget report show that overtime expenditures may run $50,000 over budgeted amounts.

Institutional staffing consists of a number of posts for supervisory and guard duty, most of which must be manned on a 24 hour a day basis to maintain order among the inmates. A post that is not staffed for long periods of time could signal the inmates that they are not under close observation due to staff shortages. This could lead to prisoners fights, sexual assaults, strong arming, property destruction, and escape attempts. The continuous presence of a Correctional Officer in an area reduces the risk of these incidents occurring. Temporary employees also fill posts vacated during correctional officer training at the Sitka Academy. The near 20% correctional officer turnover rate and high usage of sick leave also impacted personal services costs.

The projected shortfall is now $382,000. Overtime is being restricted as much as possible, and a correctional officer training class has been cancelled which will save overtime and

POSITION PAPER/Department of Health and Social Services

temporary employee funds that would have been spent on fillins during trainee absences. The agency also has an excess of $100,000 in the local facilities allocation which can be transferred to correction center allocations, thus reducing the supplemental request to $282,000.

Ten of the 14 new positions authorized in FY 79 for Adult Confinement were put in the Anchorage Annex Correction Center. Some of these positions could have been transferred to other correction centers to help alleviate the shortfall, except that the State has filed a proposed plan to comply with Judge Singleton's recent orders on Annex which prevents this. This agreement between the State and Judge Singleton specifies that there will be 40 positions staffing the Annex, even with the reduced population.

Institutional program and administrative type positions in other correctional centers could be laid off, but this was considered unwise in light of expanding prison populations and understaffing that already exists in most institutions. (see attached detail)

Other alternatives to limit correctional officer overtime were considered unworkable because of probably successful labor union grievances.

The alternatives of closing the Ridgeview Women's Facility would be a step backward and cause pressures on other institutions.

The FY 78 delete and add supplemental which transferred $400,000 out of the Juvenile Confinement BRU to offset Adult Confinement personal services shortfalls is probably not feasible this year because the FY 79 budget for Juvenile Confinement was adjusted to eliminate the prior year amounts overbudgeted.

The problem is further compounded this year because of the Governor's 1% personal services veto which took $83,700 out of Adult Confinement.

Eagle River	1	Assistant Supt.	$ 11.4	All programs reduced 50%
	2	Inst. Counselor	20.4	Counseling Reduced 50%
	1	Vocational Instructor	9.8	Administrative and supervisory expertise
	5	Correctional Officers	52.0	reduced by approximately 50%.
	9		$ 93.6	
TOTAL	39		$357.6	The Differential $357.6 - $282.0 = $75.6 is scheduled to account for any unforseen delay beyond March 1, 1979 in the lay off plan.

PLAN B

Substitutes Labor, Trades & Crafts positions in place of Correctional Officer Staff reductions at respective Correctional Centers.

Anchorage State	1	Maintenance Mechanic	$ 12.1
Juneau	1	Maintenance Mechanic	10.4
Fairbanks	1	Maintenance Mechanic	10.9
Anchorage Annex	1	Maintenance Mechanic	13.3
Ridgeview	1	Maintenance Mechanic	12.0
			$ 58.7

Reductions of maintenance staff wholly restricts preventative maintenance programs. Mechanical equipment failures, down time, and make-shift repairs eventually prove more costly through major repair and replacement expenses and disrupted operations. All institutions are experiencing more frequent repairs as equipment ages.

Alternative Plan to effect additional savings:

It is not economically feasible to continue leasing the Ridgeview Facility under proposed terms of the new owners. It has been estimated that necessary major repairs would cost the State an estimated $250,000 to bring the building up to acceptable standards. The lease costs for the next 2 to 2½ years would amount to $506,200 excluding escalation clauses for increased taxes and insurance. Alternative housing at significantly lower life cycle costs are being explored.

The sentenced females now housed at Ridgeview could possibly be moved to contract facilities outside of the State, with as many as deemed judicious to be moved to other State operated correctional centers. The unsentenced female offenders should be held within reasonable distance of the Anchorage courts and legal resources to avoid further legal actions. Returning the unsentenced females to a separate wing of the Annex is one immediate solution - barring successful court injunctions by the Human Rights Commission or other adverse legal actions. The other possibility would be to house the unsentenced females in the maximum security unit at Eagle River. The Annex location would require 5.2 staff added back to the proposed Plan A. At Eagle River it would require 9.0 staff - 5.2 security and 3.8 booking and administration since this facility does not have a booking office.

Closing Ridgeview by March 1, 1979 would generate approximately $60,000 in lease cost savings, and $200,000 in personal services if the entire staff was terminated on that date.

The projected $260,000 savings would be offset by the following:

Out of State Contractual Services	
10 Female prisoners at $25.00/day x 120 days =	$ 30,000
Estimated care costs, medical and personal care items not covered in the daily rate	4,000
Transportation costs includes escorts (cost to State)	8,000
	$ 42,000
Removal of electronic equipment, fencing and restoration of Ridgeview premises	50,000
Add back one half of Ridgeview staff costs to accommodate just the unsentenced prisoners	100,000
	$192,000

The net savings projected of $68,000 is predicated on all elements of this drastic change in operations to mesh exactly on time. This savings could rapidly dissipate through hidden costs due to slippage and disruptions in operations and program efforts.

Other Alternatives Explored:

Personal Services Cost Reduction Concepts	Reasons for Rejection
1. Establish a policy of assigning staggered shifts to avoid the mandatory 2½ hours of overtime per week per correctional officer.	1. Prior arbitration (Sheffield case) in another Department addressed this issue - Ruling - "You cannot withhold that which was told they would receive at the time of their employment", i.e., normal and advertised 2½ hours of overtime per week. Any attempt to institute such a procedure would be sorely and successfully challenged by APEA.
2. Contract for all maintenance and repairs.	2. Funds not available in either operating budget or capital budget.
3. Reduce classification committee sessions by 50%. Estimated one time savings (expense deferred) $30,000.	3. This would cause serious classification backlogs. Prisoners must be moved through the system in an orderly and efficient manner. Timely classifications avoid problems in program, security, and bedspace. Also Human Rights Commission, Ombudsman complaints, and lawsuits are minimized. Postponement and/or delays result in much higher future costs.
4. Limit amount of sick leave and annual leave that can be taken for the balance of this fiscal year.	4. This procedure would result in successful grievances being filed, especially on sick leave. This also may trigger increased abuses of leave.
5. Postpone Anchorage Annex Correctional Center renovations involving correctional staff doing trades and craft work.	5. The bedspace crunch, and the Moseley vs. Beirne case calls for timely renovations of this facility. Legislative inquiries have already been received concerning renovations starting dates and progress.
6. "Add - Delete" supplementals	6. It is premature at this early date to develop any "add - delete" supplemental.

Should the Division of Corrections be forced to a layoff of Adult Confinement personnel, no guarantee can be given that basic security can be provided. The reduction of security levels in order to offset the projected deficit will return the operation of the State facilities to the same level or less than existed in the 1974-75 period. The present prisoner population is not only significantly higher but also prisoner profiles are now predominantly with felony convictions.

It was a clear mandate then with the high number of escapes - 65, internal incidents, the murder of a policeman, and the rape of a guard's wife, and we assume the mandate still exists that security levels cannot be reduced.

2/23/79

MEMO:

TO: SEN HACKNEY Paul

FROM: PAUL

Just to alert you to what the opposition is saying re: SB 33, here is the general theme that is permeating the correspondence replying to your request for info on this bill.

"Existing regulations already subject hospitals and long term care facilities to many expensive and time consuming inspections annually. In studies in Michigan and South Carolina it has been confirmed that government regulations (state and federal) add $21 to $25 to every patient's bill. Most of the regulations being proposed under this proposed bill (18.20.080, 18.20.085) either duplicate or unnecessarily add to already existing regulations covered in Medicare and Medicaid regulations." (See Ak State Hospital Assoc. letter, para. 1).

"If you should go further and implement these regulations we would like to point out that Section 1 18.20.080 does not include a requirement for a pre-notification of intent to survey nor a statement of the purpose for the survey. ASHA recommends that a reasonable advanced notice be required on the part of the surveyor and that the purpose of the visit be clearly stated to allow the institution time to prepare for the visit." (See AK State Hospital Assoc. letter, para. 2).

SB 142

Main thrust of 142 is that the Feds drastically changed AFDC eligibility for children in foster care and institutional care, resulting in the Dept of H&SS coming up with a shortfall of anticipated funds. Also the supplemental is needed, apparently, to meet the increased costs of the foster care and institutional care programs.

The change in AFDC eligibility, resulting in no anticipated funds from the Feds, and the increased costs for caring for these kids, requires a supplemental to the tune of $1,441,800.

Comm. action Passed out with amendment (1) do pass - (3) no rec. Sturgulewski voted no, Ferguson Hoabery

SB148

SECTION 1 - ADDS SUBSECTION (c) TO AS 04.10.040 -

This section says that if an individual has a liquor establishment & holds both a beverage dispensary license & retail license & the only entrance to the place is through the beverage dispensary license side, the ABC Board wants authority to determine that additional entrances are needed for health, fire & convenience purposes.

SECTION 2 - AMENDING AS 04.10.145(a) -

Currently an individual that holds a recreational-site license may only sell beer at a recreational event. Passage of this bill would allow him to sell WINE also.

SECTION 3 - ADDS A NEW SECTION - SECTION 265 to AS 04.10.

The thrust of tis section is that if a municipality adopts by ordinance the standards and criteria spelled out in section 3(c) of this section for reviewing liquor licenses, then the municipality will have the review authority to disapprove liquor licenses. THAT'S ONLY IF MUNI's ADOPT STANDARDS IN COMPLIANCE WITH 3(c). If muni denies application for a license, then applicant can appeal to superior court.

SECTION 4 - AMENDS section 270 to accomodate new language presented in section 3 above -

What this section is saying, is that if the municipalities do not adopt the standards as spelled out in 3(c), then the application will be transmitted to the ABC Board for action and not the municipality.

SECTION 5 - AMENDS section 350(a) to accomodate new language presented in section 3 above -

In a nut shell what this section is saying is that if a muni has adopted an ordinance in compliance with 3(c), and the muni disapproves the reissuance of a license, then the license will not be renewed.

SECTION 6 - ADDS A NEW SECTION - SECTION 445 to AS 04.10 - TITLED LIMITATION OF SALES -

This section allows a municipality that is authorized to sale alcoholic beverages, to limit the the sale of beverages to *nondistilled beverages, by ordinance. However, an ordinance to limit the sale of beverages is not effective unless first approved by voters. CONVERSELY, those muni's that are limited to nondistilled beverages by ordinance, can repeal that ordinance if approved by voters.

* beer & wine

Dear Mrs. Buchholdt:

As you know, I have been in contact with Shannon Garrett, your Administrative Assistant, concerning Senate Bill 163 am. We appreciate your cooperation in not calendaring this bill as it has given us the opportunity to work with the educational agencies who have an interest in this legislation.

We are interested in keeping this bill in Committee until we can meet this next month with the State School Boards Association and members of the State Board of Education. It is hoped that we can work out language that is mutually satisfactory and come back to your Committee with a unified position.

If you have any questions concerning this request, please do not hesitate to call me.

Sincerely yours,

Leslie D. Wells

Alaska State Senate
Juneau, Alaska 99811

Dear Senator Hackney:

I apologize for not communicating with you sooner, but I have been working with the School Boards Association and the State Board of Education to come up with a plan to regain their support for Senate Bill 163. By this time, I trust that Bob Greene and Marshall Lind have talked with you concerning the problems and the plan to have a meeting of all groups concerned (except NEA Alaska) to work out the problems.

I feel confident that this can be done without doing any damage to the bill. It would appear that we need to place language in the bill that spells out local control by local districts and their boards of education. This, of course, is the intent of the measure, but there is apparently a need for such wording. Also, we hope that the three new members of the State Board of Education will attend the work session and become aware that the local control is where the action and control should be centered.

I will keep you informed concerning the progress of this action and will confer with you before any move is made.

Sincerely yours,

Les Wells

Thelma Langdon
2373 Captain Cook Drive
Anchorage, Alaska 99503

Dear Thelma,

On the issue of the composition of the AASA Board of Control and its relationship to the Department of Education, NEA-Alaska has several concerns.

First, we are not in favor (by action of Delegate Assembly) of the proposed separation of AASA from the Department. The Executive Board on March 3 passed a motion in opposition to the concept in SB 163. The basic reason for this position is that the public has a strong interest in the activities which AASA governs; their past performance in terms of a balanced emphasis between athletics and other extra-curricular activities, and the highly unrepresentative nature of their governing board makes it necessary in our view for the State School Board, whose responsibilities encompass the total education of all Alaskan youth, to retain a forum for public appeal, and thus, final control.

The composition of the Board of Control is another concern. At this time, each region selects its representatives to the state board; the regional boards are determined by the local school board and/or superintendent. In theory, anyone could represent a district, but in fact and intra-dition, AASA's whole governance structure is an old boy's club of principals and superintendents. NEA-Alaska has long been on record favoring the inclusion of coaches and/or sponsors on the Board, either as the representative from their school district or on a state-wide basis through the Association, as is proposed with the school board representative through AASB, and is currently the practice with the non-voting student representative. The Executive Board moved to attempt to achieve amendments to the AASA constitution to include a teacher as a voting member.

The second, and more pernicious aspect of the representation, is the complete absence of women from any AASA regional board or the State Board of Control. Despite the fact that a large proportion of athletes, activity participants, coaches and sponsors are female, they are effectively eliminated from any participation by the fact that the governance boards are made up exclusively of principals and administrators, a level of school employment that is notoriously male Caucasian. We feel strongly that this lack of representation must be addressed along with the lack of sponsor and coach representation, and in fact, could probably be addressed together.

For all these reasons, we support the continued overview of AASA by the Department of Education and the State Board, and would urge you to develop some plans for the remedying of these inequities and the consequent improvement of the extra-curricular environment for all Alaskan students.

Sincerely,

Susan Stitham

MEMORANDUM

TO: Senator Glenn Hackney
Dr. Marshall Lind
Board of Control
Joe Montgomery

FROM: Leslie D. Wells
Executive Secretary

SUBJECT: Status Report of Senate Bill 163 am

1. Our bill is waiting in House HESS for hearing. It has been held up due to the many bills that have to clear the HESS Committee and the House going to the Senate. At this juncture, we hope to get hearings on this bill the last week of March or the first week in April. We will keep everyone concerned informed.

2. At this juncture, we have picked up opposition from Ketchikan, as you know. Opposition has also developed from NEA Alaska. We understand it is due to the fact that there are no women or coaches elected to the Board of Control. This is a hard problem to deal with. Information is that they may try to amend the bill to assure equal representation for women. As we all know, it is awfully hard to mandate election results. The Constitution and By-Laws call for the superintendent or his representative to represent a member school in the regional and state organization. We will need to work to see that the HESS Committee members understand the problems with this issue. I understand a second idea that Van Houte mentioned is to have a Board of Control of 12 members (2 per region) where one would be a woman and one would be a man.

3. I will keep in contact with Shannon Garrett, Administrative Assistant to Mrs. Buchholdt and will discuss some of these items with you and Mrs. Buchholdt before the hearing. I have sent a packet of information to each member of the House HESS Committee.

4. This bill will also go to the Judicial Committee. Mr. Charles Parr from Fairbanks is Chairman. We will take direction from Senator Hackney as to what we need to do to prepare for this meeting.

5. Since Senator Ray had some problems with the bill I have written him and the two Juneau representatives. I trust that we have answered his concerns and trust that with the information we have sent to Mr. Miller and Mr. Duncan that they will be informed as to the need and value. Mr. Ed James will call them to discuss the need.

6. I am working with Bob Greene and Ron Hohman and the Commissioner's Office to keep on top of this bill.

Dear Senator Hackney:

The members of the Board of Control have asked me to express their deep appreciation for your cooperation and backing in introducing and sponsoring the Association's proposed legislation.

Before I left Juneau I spoke with Nat Cole and he reiterated that the Department will support the bill and that he would be happy to so testify. Please contact Mr. Cole if there are any areas where he can be of help.

May I express my personal gratitude for your assistance. I am available at any time to assist as needed. I can fly to Juneau with just a few hours notice. I currently plan to return to Juneau on the afternoon of February 19, Monday, and plan to remain there through Friday, February 23rd. Hopefully, President Frandsen will also be in Juneau for part of the week as we will be meeting with the State Board of Education on Thursday morning the 22nd. Thus, we can be available to work on this most important legislative need as may be timely. Again, I am available at anytime.

Our many thanks for taking time to assist with this need. It is evident that you are very busy this year with added leadership duties.

Sincerely,

Les

Juneau, Alaska 99811

Dear Senator Hackney:

President Ed Frandsen and the Board of Control requests that you be asked to introduce and sponsor the proposed revision to the Activities Association legislation which was passed in 1976. You will recall this need from our work with you last spring. Basically it is a clean up bill and contains no request for funds.

The proposal has been drafted by Mr. Ron Lorenson of the Attorney General's office and has the support of the Commissioner of Education. Resolutions of support have been passed by the membership of the State School Boards Association, the Superintendent's Association, and the Secondary School Principals Association and are enclosed. The attached materials give the rationale and need for the change, the proposal, and the current statute.

The Association earnestly requests your leadership and assistance in this effort and assures you that it is in the best interest of girl's and boy's school activities and the total educational community. This office stands ready to give full attention to this effort and supply you with any information that may be required.

I will call you on Thursday to discuss this proposal. Also plan to be in Juneau next Tuesday and Wednesday concerning this bill and other Association business.

Sincerely,

Leslie D. Wells
Executive Secretary

RATIONALE FOR ALASKA SCHOOL ACTIVITIES ASSOCIATION

LEGISLATIVE AMENDMENTS

The Board of Control and the membership of the Alaska School Activities Association believe that school interscholastic activities programs, including athletics, music, and speech and drama, can best be accomplished by member schools through self organization and control, with a minimum of state supervision and involvement. It is recognized that the Association requires a legal basis and assistance in funding its efforts because of the relatively small number of schools and high costs associated with the coordination and operation of activities in such a large state.

The Association has done an outstanding job of sponsoring activities for Alaskan youth over the past twenty-two years and now believes that the current legislation should be amended in order that the Association may better function to serve the needs of its membership. Current problems are:

1. There is duplication of effort and unnecessary administrative structure. It is agreed by the Commissioner of Education and the Association that it is unnecessary to operate the Association within the Department of Education.

2. The current statute is restrictive and does not allow each regional association to freely elect their Board of Control member.

3. The operation of the budget and the accounting system should be accomplished at the Association level to facilitate the needs of the organization, i.e., collection of officials' fees, purchase and sale of rule books, funding of officials' workshops, and the operation of state meets, tournaments and events.

The control of the Association lies with school districts and Boards of Education in the approval of organizational structure. The Association is operated by the superintendents of schools, either directly or through their appointed representatives. The revised legislation would foster this local control and would give the Association greater ability to react to the needs of its members.

Adequate funding from the state is essential in order to support the basic operation of the Association office. While other states have adequate income from state tournament receipts to support their total operation and to pay for participants' travel expenses, the small number of Alaskan schools and long distances between communities severely limits tournament gate receipts for such needs.

(over)

The Association has applied for funding of $65,000 for Fiscal Year 1979 through the Department of Education. At this writing the Department has included in their budget request to the legislature the amount of $57,200 for the Alaska School Activities Association. This provides funding only for the Association office operation and salaries.

Further information concerning the Association is given in the attached "11 Questions About Your Alaska School Activities Association."

AS 14.07.054
"11 Questions About Your Alaska School Activities Association"
ASAA Constitution and Bylaws
ASAA Member School Directory
ASAA 1977/78 Annual Report

For an Act entitled: "An Act relating to interschool activities and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.07.053 is repealed.

* Sec. 2. AS 14.07.054 is repealed.

* Sec. 3. AS 14.12 is amended by adding new sections to read:

ARTICLE 4. INTERSCHOOL ACTIVITIES

Sec. 14.12.200. PURPOSE. (a) The legislature finds that the establishment, promotion and governance of interscholastic athletic activities and other interschool contests and programs can best be accomplished by the schools in the state through self-organization and control and with a minimum of state supervision and involvement and that accomplishment of these goals is a valid public purpose.

(b) The legislature further finds that, because of the relatively small number of schools in the state and the high costs associated with coordinating, on a state-wide basis, various interschool activities, the establishment, promotion and governance of interscholastic activities can not be carried out in an efficient and adequate manner without the provision of some financial assistance from the state..

Sec. 14.12.210. VOLUNTARY INTERSCHOOL ACTIVITIES ASSOCIATION. (a) School districts, on behalf of one or more of their schools, and private schools in the state may join together to establish a

voluntary association to provide for the efficient governing, promotion and control of interscholastic athletic activities and other interschool contests or programs recognized by the association.

(b) School districts joining the voluntary association established under (a) of this section may expend school funds for the support of the association.

(c) The association established under (a) of this section is not a state agency, nor is it a school district or other political subdivision of the state. However, employees of the association may participate in the public employees retirement system (AS 39.35) or, if the employee possesses or is eligible to possess a teacher certificate under AS 14.23.020, the teacher's retirement system (AS 14.25).

Sec. 14.12.220. INTERSCHOOL ACTIVITIES GRANTS. The commissioner of Education may make grants to an association established under sec. 210 of this chapter from funds appropriated for that purpose if the association:

(1) has adopted a constitution and bylaws for the governance, operation, regulation and supervision of interschool activities which treat the regions of the state and students in member schools on an equitable basis and in the best interests of the entire state;

(2) has a governing body whose membership is elected and is respresentative of the member schools in the various regions of the state;

(3) has adopted a reasonable operating budget for the period covered by the grant; and

(4) agrees to such other conditions in performing its

functions and expending the grant as the commissioner of Education considers appropriate, including the provision of an audit of the association's use of the grant funds within four months of the close of the grant period.

* Sec. 4. This bill takes effect on July 1, 1978.

LAWS OF ALASKA

1976

Source: SCS SSHB 399(Finance)

Chapter No. 128

AN ACT

Creating the School Activities Association within the Department of Education; and providing for an effective date.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 14.07 is amended by adding new sections to read:

Sec. 14.07.053. ALASKA SCHOOL ACTIVITIES ASSOCIATION. (a) There is created within the Department of Education the Alaska School Activities Association.

(b) The purposes of the association are to provide for the efficient governing of interscholastic activities through the promotion of those activities and other inter-school contests or programs sanctioned by the associ tion and to assist in the promotion of those other activities and interests as it may from time to time elect.

(c) A public or private school or school district in the state may become a member of the association if it applies for membership. The Department of Education shall make applications available to all public or private schools or school districts in the state.

(d) The governing body of the association shall be the board of control with at least one member from each judicial district on the board of control. A member of the board shall be elected from each regional activities association by the members of that region. The term of office for each member is two years, except that one-half of the members elected to the first elected board shall be elected for one-year terms under regulations prescribed by the commissionwr of education.

(e) The board in consultation with the Department of Education shall appoint an executive secretary, prescribe his duties and fix his compensation. He shall serve at the pleasure of the board.

(f) The board of control of the existing Alaska High School Activities Association in office on the effective date of this Act shall serve as the initial board of control for no longer than six months.

(g) The Department of Education shall approve the association's constitution and bylaws to ensure that all regions of the state are treated on an equitable basis and in the best interests of the state.

Sec. 14.07.054. ALASKA SCHOOL ACTIVITIES FUND. (a) The Alaska school activities fund is established within the Department of Education.

(b) The commissioner of education shall review the budget request of the Alaska School Activities Association and request a sum he approves that is equitable to all regions of the state.

(c) School districts and member schools of the Alaska School Activities Association may appropriate money to the fund.

* Sec. 2. This Act takes effect July 1, 1976.

Permitted to become law without signature
Actual effective date: July 1, 1976

11 QUESTIONS

ABOUT YOUR

ALASKA SCHOOL ACTIVITIES ASSOCIATION

1. WHAT IS ASAA?

The Alaska School Activities Association is a voluntary, non-profit state legislature-approved organization of member schools operating under the auspices of the State Department of Education. Organized by and for the schools, the purpose of the Association is to promote, improve, and regulate interschool competition and activities in music, speech and drama, athletics and other areas of activities as the membership may so desire.

2. WHY ARE REGULATIONS NEEDED?

In early high school days, problems in interschool competition began to appear. Among the problems were that coaches played on school teams, playing rules and conditions could not be agreed upon, trained officials were lacking, etc. Fair, equal and safe competition was by chance. Chaos often prevailed. Today, girls and boys are assured of the opportunity to participate in sound and healthy educational activities.

3. HOW WAS ASAA STARTED?

In the early 1950's school administrators showed a deep concern about the abuses in interscholastic athletics. They saw the need for rules on age, amateurism, and attendance, and formed the organization known as the Alaska High School Activities Association in 1956. Meetings were held in conjunction with the annual Fur Rendezvous. A five-man Board of Control administered the affairs of the Association. This was a time for groping, yet much of the basic philosophy for our Activities Association was established during these early years. Basketball in twenty-four high schools was the only area of concern in early years.

Today, some twenty-two years later, eighty schools are involved in one or more of nine non-athletic areas and eleven athletic areas of interschool activities. On July 1, 1976, legislation became law which placed the Activities Association under the general direction and support of the State Department of Education. It is operated by member schools who vote for their representatives, approves changes in the constitution and bylaws, and participates in activities that fit the needs of their school and community.

Member schools vote for six regional members of the State Board of Control who set policies and practices and employs an Executive Secretary and other staff to administer and operate the Association business.

(Over)

4. WHO MAKES THE RULES?

Being aware that rules and regulations are necessary for any well-run activity organization, the member schools, through ASAA, have set forth necessary rules to assure equal opportunity and competition.

The constitution outlines the scope and purposes of the Association, while the bylaws deal with age, health, transfer, residence, scholarship, officials, awards, insurance, amateurism, etc., of pupils; the qualification of coaches; the sponsorship, supervision and number of games; practice and playing seasons; and special rules for various sports.

By adoption of the constitution and bylaws through application for membership, member schools, by their own initiative, have acted to discipline and control their own interscholastic activities. It, therefore, is the schools themselves with the approval of their school boards and superintendents that provide the authority under which the Association functions as approved by the State Board of Education.

5. HOW DOES ASAA WORK?

New rules and modifications of existing regulations are made by the member schools through the six regional associations. For purposes of administration and representation, the State of Alaska is divided into six representative regions. Membership in a region is based upon considerations including geography, school size and transportation considerations.

The Board of Control is the executive and administrative body that carries out the work of the Association through their Executive Secretary. This body enforces the rules voted by the member schools. The members of the Board are elected for terms of two years and represent the six regional associations. The Board, which meets four to six times per year, is in charge of the funds of the Association, rules on the eligibility of contestants in all activities, hears and decides protests, recommends changes in regional school placement, and sets dates and sites for various activities and tournaments.

6. WHAT DOES ASAA DO?

Approves, develops and directs interscholastic activities such as:

Basketball	Hockey
Cross-Country Running	Music Festivals
Cross-Country Skiing	Office Education Assoc.
Future Homemakers of America	ASCA (Student Council Assoc.)
Future Farmers of America	Swimming
Football	Tennis
Forensics & Drama	Track & Field
Distributive Ed. Club	Volleyball
Gymnastics	Wrestling
Honor Band and Choir	Vocational & Ind. Club

Protects students from exploitation by special interest groups;

Publishes a monthly newsletter, the official handbook, numerous guidelines and other materials;

Works constantly for the safety of participants;

Strives to promote good sportsmanship and cooperative spirit among schools;

Encourages a high quality of scholarship in order to compete in interscholastic activities;

Requires physical examinations and insurance standards be met before participation;

Seeks to keep awards for achievement on a sound, sensible basis;

Requires a coach to be a certified teacher and regularly employed by the school he represents, or controlled exceptions;

Aids officials, coaches and players in acquiring a thorough knowledge of the playing rules;

Distributes game rule books and films to schools and officials;

Promotes ethical codes among officials, coaches, players and fans;

Conducts clinics and rule interpretations meetings;

Tests and registers officials;

Provides numerous free publications and materials to schools;

Sanctions interstate events and meets;

Organizes and directs state championships.

7. HOW IS ASAA FINANCED?

ASAA, with a budget of less than $50,000 in 1976/77, derives its income from the State Legislature through the Department of Education (40%), membership dues (25%), officials dues (2%), sale of publications (2%), tournaments (largely basketball)(31%).

NOTE: This amount will not operate the Association.

A budget of $108,000 has been proposed for 1977/78 to finance the needs of the Association to include a full-time Executive Secretary and a ten-month office secretary.

All monies over and above operating expenses from tournaments and meets are used to make up losses in other activity areas.

8. WHAT IS ASAA'S ROLE IN EDUCATION?

School people have long recognized the values of a reasonable and sound school activities program. The purpose of the Alaska School Activities Association is to approve, develop and direct interscholastic programs so that these values are enhanced. ASAA exercises control to reduce overemphasis and assure that activities will remain in proper perspective, an integral part of the total educational program of the schools. It stresses the cultural values involved in all activities so that the students who participate will grow educationally. The goal is a well-rounded, educational experience for all students.

9. WHAT IS ASAA'S RELATIONSHIP TO OTHER ORGANIZATIONS AND OTHER STATES?

ASAA cooperates and works with all agencies that are concerned with the

(Over)

health and educational welfare of high school and junior high school students. Alaska, through ASAA, belongs to the National Federation of State High School Associations. It is an organization of all fifty states and some Canadian provinces. It helps to formulate uniform policies, standards and game rules so that the states, schools and students are playing the same games under the safest conditions.

10. WHO MAY BELONG?

Membership in the Association is open to all public and non-public schools eligible for participation in interscholastic activities. Over eighty schools are members.

11. WHERE IS THE ASAA OFFICE?

The Association office is located at 650 International Airport Road, Anchorage, Alaska 99502.

DALE L. LUNSFORD
SUPERINTENDENT

February 27, 1979

Senator Glenn Hackney
105 Assembly
Juneau, Alaska 99811

Dear Senator Hackney:

I want to thank you for your time and effort in sponsoring and supporting SB 163.

This bill will help establish a workable and effective Alaska School Activities Association if passed as you submitted it.

Thank you.

Sincerely,

Dale Lunsford

Committee
105 Assembly Bldg
Pouch V
Juneau, Alaska 99811

Dear Sir;

I have just finished reading SB-163 and wish to voice my approval. I firmly agree that this would be an excellent move by the House and Senate to approve and pass this bill.

The schools and/or associations must be able to control and direct the activities within the state and/or district. Without local control many areas would be "lost in the shuffle." Too often regulations are passed for only a few without full consideration for all who have to abide by them. Many times small schools are "shut out" by rules and regulations passed by and/or for large schools.

I have been a voting representative to the Region V of the ASAA and know that controls are a necessity but those people involved should have a voice in the control, if you follow me.

Sincerely,
Jim Apley
Prin/Teacher El Capitan School

The Alaska [High] School Activities Association, an organization created by the Superintendents' Advisory Commission in 1956 and recreated under state law, Chapter 128-SLA 1976, has been placed within the Department of Education. The Activities Association is authorized to prescribe the regulations and rules for conducting interscholastic activities involving teams, groups, or contestants when a second high school or organization is participating in athletics, music, dramatics, speech and debates, and any other interscholastic activity that may be desired. The Constitution and By-laws of the Association must be approved by the State Board of Education.

STATEMENT OF PHILOSOPHY

The purpose of the Alaska School Activities Association is to coordinate the efforts of its member schools toward the ultimate objectives of interscholastic activities. The Association shall provide a means for schools to cooperate in order to enhance and protect their interscholastic programs. In order to accomplish this, the A.S.A.A. is guided by a philosophy consistent with the purposes of secondary education in Alaska.

Member school's programs must be administered in accordance with the following basic beliefs:

Interscholastic activities shall be an integral part of the total secondary school educational program, with emphasis on teaching "through" activities, in addition to teaching the "skills" of activities. They shall have as their purpose:

a. to provide educational experiences not otherwise provided in the curriculum;

b. to develop better citizens; and

c. to encourage high standards of citizenship.

Interscholastic activities shall be tailored to the physical, mental and emotional maturity levels of the youths participating in them and shall be primarily for the benefit of those youths.

Any district, regional or state contest or event held to determine what is a champion shall provide fair opportunities for schools to demonstrate and to evaluate what is best taught in their programs with the best taught from other schools and from other areas of the state.

Participation in interscholastic activities is to be granted to those students who meet the minimum standards of eligibility adopted cooperatively by this association and those additional standards established by each school or region for its own students.

The A.S.A.A. is concerned with the development of those regulations, standards, and policies essential to assist school districts, their boards of education, and administration of member schools in the implementation of their philosophy of interscholastic activities. Interschool activities shall be kept in proper perspective and must complement the academic program of the schools.

Nonschool activities sponsored primarily for the benefit of the participants in accordance with the philosophy compatible with the school district and school philosophy of interscholastics may have values for youth. When they do not interfere with the academic and interscholastic programs, and do not result in exploitation of youth, they shall be considered as a worthwhile supplement to interschool activities.

BRIEF HISTORY

In the early 1950's, interested school men in western Alaska, led by Mr. William Zahradnicek of Palmer, Mr. W. W. Lahnum, Acting Superintendent of Anchorage, and Mr. Gordon Guffey, Anchorage High School, saw the need for separating high school basketball tournaments from local business promotion as part of the Fur Rendezvous. Thus, the Western Alaska High School Activities Association was organized to assure the needed educational leadership. During these same years, Mr. Sterling Sears of Juneau, Mr. Les Wingard, and Mr. J. E. Danielson of Ketchikan, were moving ahead to fill the same need in Southeastern Alaska.

In 1956 the desire to have a state organization led to the establishment of the Alaska High School Activities Association by the State Department of Education Superintendents' Advisory Commission. The Constitution and By-Laws were approved in the fall of 1957. The officers of the two divisions elected Mr. J. E. Danielson, Superintendent of Ketchikan, as Secretary-Treasurer; Mr. William Zahradnicek of Palmer was elected Chairman; and Mr. George McMillan of Juneau, Mr. Joe Montgomery of Anchorage, and Mr. Sterling Sears of Juneau, were members of this first State Board of Control.

In April of 1973 regions were established for basketball tournament purposes by a vote of the schools involved in those regions. Consideration was given to both school population and/or geographical location. From these basketball regions evolved the regional concept for all activities using the same criteria: size and location.

Early years saw 20-25 schools (4,000 to 8,000 students) as members of the Association. Today, over 70 schools hold membership serving the needs of over 32,000 students.

The state operates under one Constitution and set of By-laws regarding membership, student eligibility, contest organization, sport seasons, and other areas of general concern.

A.S.A.A. EXECUTIVE SECRETARIES

1957-1960	J. E. Danielson, Ketchikan
1960-1965	Joe Montgomery, Anchorage
1965-1971	Les Wells, Anchorage
1971-1975	Rick Arndt, Anchorage
1976-1976	Ed Frandsen, Wasilla
1977-	Les Wells, full time

ALASKA SCHOOL ACTIVITIES ASSOCIATION

CONSTITUTION

ARTICLE I NAME

This organization shall be known as the Alaska School Activities Association.

ARTICLE II OBJECT

The object of this Association is to promote and control interscholastic activities and other interschool contests or programs sanctioned by the Association and to assist in the promotion of those other activities and interests as it may from time to time elect.

ARTICLE III MEMBERSHIP

INTRODUCTION:

Secondary schools of Alaska are defined as schools, public or private, with grades 7 through 12 or any combination of those grades.

SECTION 1. Eligible Schools

A. Any state public school district, or if not a part of a state public school district, any accredited or state approved secondary school may become a member of the Association by paying the applicable annual dues. Being a member constitutes recognition by the member of the Association's authority over the membership and agreement to comply fully with the Association's by-laws and policies.

B. A high school is defined as a school which offers grades 9 through 12 or any combination thereof.

C. A junior high school is defined as a school which offers grades 7 through 9 or any combination thereof.

D. On or before May 1 of each year participating schools of member school districts and other member schools must declare whether they will participate with grades 9, 10, 11, and 12 or 10, 11, and 12 and whether they will participate with grades 7 and 8 or 7, 8, and 9, if at all.

E. The Board of Control will hear any request for an organizational structure other than those mentioned above should a school district organize its secondary school or schools on a different basis.

SECTION 2. Membership Definition

A school district's membership status applies to all school units for which the district has made application and paid the applicable annual dues. Each of these school units is considered a "member school" for the purposes of this Constitution.

ARTICLE IV DUES

The annual dues and dates of payments shall be as set forth in the By-laws.

ARTICLE V OFFICERS AND DUTIES

SECTION 1. Board of Control

The Board of Control consists of the elected representative from each regional association.

SECTION 2. Terms of Board Members

A. The term of office for each member of the Board of Control is two years, except that one-half of the members elected to the first elected Board are elected for one-year terms based upon a drawing of lots.

B. Subject to the approval of the Commissioner of Education, the Board of Control shall appoint an executive secretary, prescribe duties and fix the compensation. This person shall serve at the pleasure of the Board. The Board may appoint other officers, agents and employees and prescribe their duties and compensation.

SECTION 3. Department of Education Consultant

The Commissioner of Education, or his designee, shall serve as a consultant to the Board of Control for the purpose of coordinating the activities of the Association within the Department of Education.

SECTION 4. Powers and Duties of the Board

A. The Board of Control is the executive and administrative body of the organization, subject to the restraint of the Constitution and By-laws of the Association.

B. The Board of Control may determine the time and place of its meetings. A majority shall constitute a quorum.

C. The Board of Control has supervision of all sanctioned interscholastic activities of participating schools of member school districts and member schools and interprets the rules of the Association.

D. With respect to funds, not subject to state fiscal procedures, the Board of Control has the charge of Association funds, shall audit and approve all expenditures, and shall conform to the financial policies and audit as set forth by the membership of the Association and the regulations of the State Department of Education.

E. The Board of Control may delegate to the Executive Secretary the authority to rule on all protests and rule violations and determine the penalties, not otherwise specified, for violations of the provisions of the Constitution and By-laws.

F. The Board of Control may make investigations relative to the violation of the Constitution and By-laws and policies of the Association.

G. The Board of Control may appoint special committees to assist in the arrangement and supervision of various activities and contests.

H. The Board of Control may sanction out-of-state meets, contests or activities.

I. The Board of Control may determine suitable awards for winners of contests sponsored by the Association.

J. The Board of Control may approve and register contest officials for use in those activities sanctioned by the Association.

K. The Board of Control may sanction and operate state championship plans, sites and finances.

L. Regional placement: The regional placement of schools is determined and reviewed annually by the Board of Control at its summer meeting. Changes in regional placement take effect on July 1st of the following summer. The change may take effect earlier if all schools involved and affected as well as the state Board of Control concur. New member school placement becomes effective immediately.

M. The Board of Control shall report annually to the Commissioner of Education, the State Board of Education, and the Alaska Association of School Administrators for the purpose of receiving advice and comments. The report will show programs carried out and a financial statement.

N. The Board of Control shall submit an annual financial audit and budget to the Commissioner of Education.

O. The Board of Control may grant eligibility to a student in certain hardship and emergency cases when granting eligibility does not violate the intent and the purpose of any of the standards of eligibility. The purpose of this provision is to provide for certain cases that are beyond the control of the students or their parents. (Refer to Article XIII in By-laws for procedures.)

ARTICLE VI REGIONAL ASSOCIATIONS

SECTION 1. Powers

The Alaska School Activities Association encourages and supports the creation of regional associations. Each regional association administers its own activities in accordance with the provisions of this Constitution and the Association's By-laws and policies. Regions may adopt their own By-laws not in conflict with those of the Association.

SECTION 2. By-Laws

A current copy of the By-laws of each regional association must be on file with the Executive Secretary of the Association.

ARTICLE VII LOCAL CONTROL

The chief administrative officer of a member, or his designee, shall be the member school's official representative and shall be responsible for each member school's actions.

ARTICLE VIII AMENDMENTS

SECTION 1. Amendments

A. Proposed amendments to this Constitution must be introduced at a regular meeting of the Board of Control. Amendments which are proposed by the Board of Control must be endorsed by the authorized representative of ten different member schools.

B. Adoption of a proposed amendment requires a majority vote of all member schools by mail ballot and approval by the State Board of Education. The Board of Control may make recommendations on proposed amendments.

SECTION 2. Effective Date

Amendments take effect July 1 following their adoption unless otherwise provided by the amendment.

ARTICLE IX EFFECTIVE DATE OF CONSTITUTIONAL AMENDMENTS

This revised Constitution takes effect immediately upon the majority vote of the membership and approval of the State Board of Education.

ALASKA SCHOOL ACTIVITIES ASSOCIATION

BY-LAWS

ARTICLE I BOARD OF CONTROL ORGANIZATION AND OPERATION

SECTION 1. Organization and Terms of Members

A. The administration of the Association is vested in the Board of Control composed of a representative elected by the member schools of each regional association and selected in such a manner as to assure that a representative is elected from each judicial district. Each elected member of the Board of Control has one vote.

B. The term of office expires on December 31st.

SECTION 2. Dates of Election and Replacements

Board of Control members shall be elected by December 1 of the year in which the term for the regional representative expires. A person may not serve more than three consecutive terms. The Board of Control will certify new board members in order to assure representation of all judicial districts.

If an encumbent ceases to be a voting member of the Board of Control because of death, resignation, incapacity, change of assignments from administration in a school district, or because of moving out of the region in which elected, the member schools of the regional association shall elect a replacement to serve on the Board of Control for the remainder of the term.

SECTION 3. Alternate Regional Representative

A regional association may elect an alternate member to sit on the Board of Control in place of the regular member for only the following instances: weather and transportation problems, medical illness, or other excusable and acceptable reasons as approved by the majority of the other members of the Board of Control.

SECTION 4. Meetings

The Board of Control shall meet not less than four times annually. They may otherwise convene upon the call of the president or upon the request of a majority of the Board of Control, the call to be issued by the executive secretary. The membership will be informed of the meetings in a timely manner.

SECTION 5. Officers of the Association

The officers of the Association are a president, vice president, and a secretary-treasurer. The president and vice president shall be elected from among the members of the Board of Control, each to be elected annually for a term of one year. No one individual may serve as president for a period longer than a total of five years. If the offices of either the president or the vice president become vacant because of death, resignation, or other emergency, it shall be filled for the remainder of the term by election by the Board of Control at its next meeting.

SECTION 6. Secretary-Treasurer

The secretary-treasurer is the executive secretary and serves at the pleasure of the Board of Control. The duties and functions of the secretary-treasurer are the responsibilities of the executive secretary.

SECTION 7. Association Funds

To the extent applicable, the secretary-treasurer shall comply with state fiscal procedures. With respect to funds not subject to state fiscal procedures, the secretary-treasurer shall, under the supervision of the Board of Control, have charge of funds of the Association. He shall make complete financial statements to the Association members at the time of the fall meeting. The accounts shall be audited at least annually and the cost of the audit will be paid by the Association. The financial year for the Association shall be July 1 to June 30. An annual report and an audit will be furnished the State Department of Education by October first of each year.

ARTICLE II MEMBERSHIP DUES

SECTION 1. Member Schools

Each participating school for which a member school district has paid dues is a "member school" as that term is used in these By-laws.

SECTION 2. Scale of Dues

Annual Association membership dues for school districts and non-school district schools shall be determined as the sum of the dues for each participating member school, based on the actual enrollment as shown on the third quarter attendance report for the prior school year for each school, as shown in the following table:

Enrollment	High School Dues for Next School Year	Jr. High School Dues for Next School Year
1-100	$100.00	$ 50.00
101-500	$200.00	$100.00
501-1000	$400.00	$200.00
1001-	$600.00	$300.00

SECTION 3. Date of Payment

Dues must be submitted to the ASAA executive secretary, payable to the Department of Education, by September 1 for that school year and are delinquent October 1. Delinquent members will be charged a 10% per month penalty on the balance owing but unpaid.

SECTION 4. New Member Schools

New members will not be assessed the penalty for the first year of membership.

ARTICLE III VIOLATIONS OF BY-LAWS AND CONTEST RULES

SECTION 1. Conduct of Activities

All school sponsored interscholastic sports, events, and activities of member schools must be conducted in accordance with the Association's By-laws, rules and policies.

SECTION 2. Conforming to Rules

A. By-laws, including eligibility rules, contest rules, and Board of Control policies may not be waived by consent between or among member schools.

B. As used in these By-laws, "rule" includes these By-laws.

SECTION 3. Violations and Disputes

A. All rule violations must be reported to the Executive Secretary in writing. Assessment and a decision will be rendered in a timely manner.

B. All questions in dispute must be submitted to the Executive Secretary. The Executive Secretary's decision is final unless it is appealed to the Board of Control. All questions in dispute and their disposition will be reported to all member schools.

SECTION 4. Protests Against Member Schools

A. A member school entering a protest against another school shall submit to the Executive Secretary, in writing, a full statement of the facts relating to the alleged violations committed by the offending school (use the form as exhibited in Appendix A). The Executive Secretary will submit copies of the complaint to the superintendent or principal of the accused school. The accused school may present its case in writing to the Executive Secretary within 14 days after receipt of the complaint. After reviewing the submitted materials, the Executive Secretary will render a decision.

B. All protests must be accompanied by a filing fee of $100. If the final decision is in favor of the presenting school, the fee will be refunded. If the protest is denied, the fee shall be forfeited. No decision on a protest will be made unless the filing fee has been paid.

ARTICLE IV APPEAL PROCEDURE

SECTION 1. Appeal by Member Schools and Individuals

A. A member school may appeal decisions of the Executive Secretary by requesting of the Board President, within 14 days of receipt of the decision, and in writing, that the case be presented to the Board of Control for review.

B. An individual who is adversely affected by a decision of the Executive Secretary may appeal that decision by requesting, within 14 days of receipt of the decision, that his or her member school's officially designated administrator request of the Board President, in writing, that the case be presented to the Board of Control for review.

C. All appeals, including all relevant factual matter and legal arguments, must be presented to the Board of Control in writing. Oral hearings are not a matter of right, but will be granted for good cause shown.

D. All appeals will be considered and a decision rendered in a timely manner.

E. In appeals involving rule violations, the Board of Control may assess the costs of the appeal against the member who is found at fault.

SECTION 2. Appeals Review Commission

A. An Appeals Review Commission will review decisions or interpretations of the Board of Control when requested by an affected individual, a member school, or a member school district by formal written appeal within 14 days of receipt of the decision.

B. The Appeals Review Commission is the State Board of Education or a committee of the State Board of Education.

C. All appeals, including all relevant factual matter and legal arguments, must be presented to the Appeals Review Commission in writing. Oral hearings are not a matter of right, but will be granted for good cause shown.

D. All appeals will be considered and a decision rendered in a timely manner.

ARTICLE V PENALTIES

Penalties assessed by the Executive Secretary or by the Board of Control upon member schools for violation of the By-laws will vary depending upon the nature and character of the violation. Penalties assessed may include one or more of the following:

1. Warning
2. Forfeiture
3. Probation
4. Fine - not to exceed five hundred dollars
5. Suspension from the Association - not to exceed 365 calendar days

ARTICLE VI CONTEST RULES

SECTION 1. Contracts for Contests and Events

Final agreements relating to contests or events between or among member schools must be incorporated into contracts on forms provided by the Association. These contracts must be executed by mutual consent of the representatives of the respective schools and exchanged not less than 10 days prior to the contests. The contract may not be cancelled or altered except by mutual consent of the schools involved.

Breach of contract will be considered a rule violation.

SECTION 2. Non-Member School and Out-of-State Rule

A. As a condition of membership, members expressly agree that they and their member schools will not take part in any interscholastic activities or contests with schools eligible for membership but who are not member schools of the Association. A waiver may be requested to participate with a non-member school.

B. A member school may not participate in any contest or event with an out-of-state school unless a sanction has been granted by the Board of Control.

C. Participation without a waiver under A or a sanction under B of this section will result in disciplinary action for the member school and may include suspension from Association membership and participation for a period of up to 365 days.

SECTION 3. Ineligible Students

A member school may not permit students who are ineligible under these By-laws to participate in or otherwise appear on the field or floor in uniform during any contest between itself and other member schools.

SECTION 4. Contest and Event Supervision

Each contesting school must have present at the contest or event a certificated faculty representative who is responsible for the conduct of its participants and students throughout the contest. The home school must have an administrator or his designee in attendance.

SECTION 5. Personal Conduct

A. High standards of courtesy, fair-dealing and sportsmanship must feature all Association contests or events.

B. In matters pertaining to personal conduct, such as gross violations of sportsmanship, attacks on officials and other acts of gross misconduct by any student, school staff member or school community members where the school has failed to act reasonably in controlling the community member, the Association will determine, after providing an opportunity to submit written statements or an oral hearing, or both, appropriate penalties and whether or not the student or school will be suspended or barred from future contests or events.

SECTION 6. Records

Each school shall keep accurate records of contests and events for a period of four years. These records, or copies, must be forwarded to the Executive Secretary upon request.

SECTION 7. Sunday Contest or Event Rule

Interscholastic events or contests may not be held on Sunday. If inclement weather forces the cancellation of one contest of a scheduled series, and the series cannot be rescheduled at a later date, the host school may request of the State Executive Secretary and its Region's Executive Officer that they sanction a Sunday contest.

ARTICLE VII SANCTIONED ACTIVITIES

SECTION 1. Compliance with Title IX

The Associat n will comply with the provisions of Title IX of the Education Amen ments of 1972. No person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, be treated differently from another person or otherwise be discriminated against in any activities regulated by the A.S.A.A.

Separate teams for members of each sex may be allowed where selection for such teams is based upon competitive skill or the activity involved is a contact sport. Contact sports include boxing, wrestling, rugby, ice hockey, football, basketball and other sports the purpose or major activity of which involves bodily contact.

The Association will insure that, when separate teams are allowed, equal opportunities in athletics are provided members of each sex, in keeping with Title IX regulations.

SECTION 2. Sports Recognized by the Association

Badminton	Diving and Swimming
Football	Basketball
Soccer	Wrestling
Cross Country Running	Ice Hockey
Bowling	Cross Country Skiing
Volleyball	Track and Field
Gymnastics	Tennis

SECTION 3. Activities with No Season Restriction

Activities with no season restriction include but not limited to:

Bowling	Honor Band, Choir, Orchestra
Cheerleade..	Music Festivals
Drill Teams	Forensics - Speech - Debate - Drama
Rifle Teams	Office Education Association - OEA
Chess	Future Homemakers of America - FHA
Eskimo Games	Future Farmers of America - FFA
Student Governments Conferences	Vocational & Industrial Clubs of Am. - VICA
Journalism Workshops	Distributive Education Clubs of Am. - DECA

SECTION 4. Activities Confined to a Season: Sports and Sport Season Dates, Pre-season Practice, Number of Contests, Number of Game Periods per Day*

*Next page

SECTION . Activities Confined to a Season: Sports and Sport Season Dates, Pre-season Practice, Number of Contests, Number of Game Periods per Day

A. All sports competition will be governed by National Federation of Interscholastic Athletics rules and guidelines where available, or by rules adopted by the Board of Control.

B. The following table sets out the seasons, the permissible pre-season practice periods, the permissible number of game periods per day exclusive of regional and state tournaments, and the permissible maximum games prior to regional tournaments for various interscholastic sport contests:

Sport	*Practice Prior to Participation	Date of First Game	No. of Game Periods/Day	Maximum Games Prior Reg. Tourn.	Season End Date
Football	Begin August 15 10 Separate Days	Last Weekend in August	Four	One Per Week	Third Weekend in October
Cross Country Running	Begin August 15 10 Separate Days				W/completion of Reg. or State meet
Volleyball	Begin August 15 10 Separate Days				W/completion of Reg. or State meet
Gymnastics	Begin August 15 10 Separate Days				W/completion of Reg. or State meet
Diving and Swimming	Begin August 15 10 Separate Days				W/completion of Reg. or State meet
Girls' Basketball	Begin October 15[1] 10 Separate Days	November 15[1]	6**	25[1] (30-1977-78)	W/completion of Reg. or State meet
Boys' Basketball	Begin October 21 10 Separate Days	November 15	6**	25[1] (30-1977-78)	W/completion of Reg. or State meet
Wrestling	Begin January 2 10 Separate Days			25[2] MATCHES (excl. forfeits) 20 day limit	W/completion of Reg. or State meet
Ice Hockey	Begin November 1 10 Separate Days	Last Weekend in November	3**	20	W/completion of Reg. or State meet
Cross Country Skiing	Begin November 1 10 Separate Days				W/completion of Reg. or State meet
Track and Field	Begin March 15 10 Separate Days				W/completion of Reg. or State meet
Tennis	Begin March 15 10 Separate Days				W/completion of Reg. or State meet

*excluding Sundays

**Overtimes not counted

[1]Effective 78-79 School Year

[2]Effective 77-78 School Year

ARTICLE VIII AMATEURISM

SECTION 1. Only Amateurs Are Eligible to Participate

A. Pupils representing member schools of the Association must be amateurs.

B. A pupil is a professional, not an amateur, and is ineligible if he or she receives or is promised money or other valuable consideration for competing in a sport recognized by the Association. This rule applies throughout the twelve months of the year. A professional in one of these sports is considered a professional in all. A pupil may play with or against those who are professional without losing amateur standing.

C. Acceptance of money or other valuable consideration as wages or expenses or of merchandise prizes for athletic competition renders a pupil ineligible for further athletic competition. No money is to be given to a contestant. However, it is permissible for a contestant to accept necessary meals, lodging and transportation while competing. Medals or trophies may be accepted. College scholarships may be accepted but the amount of the scholarship must be paid directly to the college of choice by the donors.

D. A pupil is ineligible if he or she competes under an assumed name for the purpose of concealing his or her status as a professional.

E. A high school student who has violated his or her amateur standing as set forth by these By-laws may apply to the Board of Control for reinstatement as an amateur, if 365 days have elapsed since the date he or she was declared ineligible, and if he or she has been in regular school attendance and not competed as a professional during the intervening period.

An application under this paragraph must be in writing and must be signed by the student and by the superintendent or principal, certifying that one calendar year has elapsed since the student was declared ineligible, that he or she has been in regular school attendance, and that he or she has not violated amateur rules during the intervening period.

SECTION 2. Signing of Contracts

The signing of any contract by a pupil whereby he or she agrees to compete in any athletic competition for profit immediately makes that pupil ineligible for further interscholastic athletic competition.

SECTION 3. Professional and College Try-Outs

Professional and college try-outs which interfere with a high school student's work or which involve a game in violation of Association rules may result immediately in that student's ineligibility for further interscholastic athletic competition.

ARTICLE IX AWARDS

The Board of Control designates, gives, and controls ribbons, medals, and trophies to be awarded to schools and individuals.

SECTION 1. Principal Approval

Awards must have symbolic value only. Awards may be accepted by a student only if granted through the school with prior approval of the school principal or school district superintendent.

SECTION 2. Value Limit

Awards, such as unattached letters, trophies, metal charms or pins, or similar articles, having symbolic value only, may be given to students by the school if the cost of the award does not exceed $10. In the case of state championships, the cost may be increased to an amount which does not exceed $15. This section does not apply to trophies awarded to teams by the state or regional associations.

SECTION 3. Invitational Tournaments

Leagues or schools conducting invitational tournaments or meets under Association rules may make awards to the winning schools or contestants if the awards are within the limits set forth in Sections 1 and 2 of this Article and in Article XV.

SECTION 4. Other Awards

Suitable awards, of symbolic value only, may be accepted by team members from service clubs, patriotic organizations, civic groups, Dads' and Mothers' Clubs, and similar organizations, provided they are given in compliance with the provisions of Sections 1 and 2 of this Article. However, jackets or sweaters may be accepted by state championship team members even if the cost exceeds $15. Gifts may not in any way advertise any firm or individual insofar as commercial or business interests are concerned.

SECTION 5. College Recruiting

Awards of transportation and entertainment by colleges and universities for recruiting purposes may be accepted by students, when carried on within the limitations of N.C.A.A., N.A.I.A., and college conference rules, if there is prior approval of the high school principal.

ARTICLE X QUALIFICATION OF COACHES

Coaches must be certificated teachers and must be regularly employed as teachers in the school district in which they coach. The Executive Secretary may waive temporarily these certification requirements upon satisfactory proof that a properly certificated coach could not be secured. A certificated staff member of the school district must accompany and be in charge of a traveling team.

ARTICLE XI PHYSICAL EXAMINATION, PARENTS' CONSENT

SECTION 1. General

A pupil may not be permitted to participate in a practice session or to represent his or her school in athletics, cheerleading, or other strenuous activities until there is on file with the superintendent or school principal a statement, signed by a practicing physician, nurse practitioner, physician's assistant, or a military medical examiner, and the pupil's parents or legal guardian, certifying that he or she has submitted to a physical examination within the prior

calendar year. The statement must certify that, in the opinion of the examiner, the student is physically fit to participate in strenuous physical activities. A waiver of this requirement may be temporarily made by the Executive Secretary in villages where no examiner is available.

Physical exam forms are available from the Association Executive Secretary.

SECTION 2. Wrestling Physicals

With respect to pupils participating in wrestling, the National Federation Rule Book for high schools governs all situations.

Prior to the pupil's first match, the examiner, as defined in Section 1 of this Article, must determine the lowest weight class the individual may wrestle during the season. This determination must be in writing, signed by the examiner and by the student's parents, before the student may be allowed to wrestle in a match. ~~Changes in weight class determination will be allowed during the season if the above procedure is followed.~~ Each school is responsible for the administration of the weight permit slips and the weight permit slips must be made an integral part of the eligibility roster.

DELETE
Rule change approved June 1977; effective date July 1, 1977.

Individuals must have their weight permission slip on file with their school before their name may be placed on the eligibility list. There must be a place for the examiner's signature and the parent's signature on the weight permission slip.

ARTICLE XII RULES OF ELIGIBILITY

Unless expressly limited, the following rules are intended to be minimum requirements for student eligibility to participate in all interscholastic activities and do not preclude a school, a school district, or a regional association from imposing additional rules that are reasonable and prudent.

SECTION 1. Enrollment Rules

To be eligible during a school semester for participation in interscholastic activities, a student must:

A. be properly registered;

B. be carrying a minimum of four classes that lead to granting of credit toward graduation; and

C. be in regular attendance at school and classes in which enrolled.

SECTION 2. Eight Semester Rule

A student may only participate in interscholastic activities during the first eight semesters of school after enrollment in the ninth grade.

SECTION 3. School Grade Rule

Students in grade eight and below are ineligible for participation as members of high school athletic teams in interscholastic competition including cheerleading.

SECTION 4. Similar Sports Participation Rule

A student may not participate as a member of other than a high school athletic team in similar contests during the same school season.

SECTION 5. Undue Influence Rule

A student is not eligible to participate in interscholastic activities if he or she has been unduly influenced or offered any remuneration, directly or indirectly for the purpose of causing the student or the student's family to reside in a given school district or school attendance area in order to establish his or her eligibility for activities participation.

SECTION 6. Age Rule

A student is not eligible to participate in interscholastic activities when he or she is no longer of school age as defined in AS 14.03.070. However if the student started a sport season while still of school age, the student will be allowed to complete that sport season.

SECTION 7. Semester Credit Rule

In order to be eligible to participate in interscholastic athletics and cheerleading during any semester after completion of the first semester of ninth grade, a student must have passed, for the immediately preceding semester, at least four courses which grant a semester of credit toward graduation. A student who has been ineligible for a complete semester under this section may become eligible after having attended the first day of the succeeding semester.

A. For purposes of this section, academic deficiencies may be made up through correspondence courses or summer school.

B. A grade of incomplete is considered as not passing until the incomplete is changed on the official school records.

SECTION 8. School Transfer Rule

A. A student who transfers school enrollment corresponding with an actual change in the place or residence (home, abode) of his or her parents or legal guardian is immediately eligible to participate in the interscholastic activities of the school to which he or she has transferred, providing he or she satisfies all other applicable rules of eligibility.

B. A student who transfers school enrollment without a corresponding change in the place of residence (home, abode) of parents or legal guardian is not eligible for participation in the interscholastic athletic activities of the school to which he or she has transferred for a period of 18 weeks following the transfer of enrollment.

C. The 18 week ineligibility rule stated in B of this section does not apply when:

1. the transfer in school enrollment is ordered by the governing body or the chief school administrator of the school district which is responsible for the student's education, whether the transfer is to another school of the same district or not, so long as the transfer was not made for interscholastic activities reasons;

2. the transfer was made to permit the student to take courses or study at a grade level not offered at the school from which he or she transferred; or

3. the transfer was made as the result of an order of a court or of a state or local agency empowered to take custody of children.

D. A school district may establish its own policy regarding intra-district transfer, so long as it is at least as stringent as this transfer rule. The district's policy must be submitted to the Executive Secretary for his approval. Upon approval, the district policy will prevail.

SECTION 9. Eligibility Lists for Sports and Cheerleading

A. A master eligibility list listing all participants in each sport and cheerleading must be prepared on the form provided by the Association for that purpose.

B. A copy of the master eligibility list must be received by the state Executive Secretary and the appropriate regional executive officer before the sixteenth school day of the new semester. The list for sport seasons starting during a semester must be mailed ten days before the first contest of that season.

C. Any additions or deletions to the master eligibility list must be filed as an addendum to the master eligibility list before an individual is allowed to participate.

ARTICLE XIII WAIVERS OF ELIGIBILITY RULES

SECTION 1. Student Request

A student who has been determined to be ineligible to participate in interscholastic activities under one or more of the eligibility rules of Article XII may request a waiver of that rule or rules by the Executive Secretary.

SECTION 2. Request Procedures

A request for a waiver must be directed by the student to the involved member school's officially designated administrator who shall then file a written request stating the full particulars of the case and the reasons felt by the student or the administrator, or both, to warrant the granting of the requested waiver.

SECTION 3. Review by Executive Secretary

Upon receipt of the waiver request, the Executive Secretary shall review it to determine whether any additional information is necessary. If additional information is necessary, the Executive Secretary shall request the administrator to supply it. The Executive Secretary shall render his decision as expeditiously as possible after receiving the waiver request and any additional requested information.

SECTION 4. Guidelines for Consideration

To assist students and member schools to decide whether to request a waiver in specific circumstances, the following apply:

1. If the student is a transfer student, a transfer of eligibility form must be supplied the A.S.A.A. office.

2. Except in unusual circumstances and for good cause shown, the Executive Secretary will not hear a request involving waiving of the standards of eligibility regarding semesters of participation, age standards, semesters of enrollment, or a school administrator's ruling regarding the school citizenship (conduct) of a student.

3. The Executive Secretary will not grant eligibility in any case in which the asserted hardship is the sole result of knowing conduct by the student or his or her parents or guardian which had the effect of causing the hardship.

4. Ignorance of any standard is not sufficient reason for waiving a standard.

ARTICLE XIV A.S.A.A. REGIONS

SECTION 1. Member Schools by Regional Placement

The following shows the placement of schools in the regional associations, effective July 1, 1977:

I	II	III
Aniak	Anchorage Christian School	Barrow
Bethel	Anderson Village	Bob Reeve (Adak)
Bristol Bay	Christian School of Alaska	Cordova
Covenant	Fort Yukon	Delta Junction
Dillingham	Galena	Homer
Kiana	Glennallen	Kodiak
King Cove	Kenny Lake	Palmer
Kivalina	McGrath	Seward
Kongiganak	Nenana	Valdez
Kotzebue	Ninilchik	Wasilla
Nelson Island	Nulato	
Noatak	Susan B. English (Seldovia)	
Nome	Susitna Valley	
Noorvik	Tanana	
Nunapitchuk	Tok	
Selawik	Tri-Valley	
Shishmaref	Tyonek (Bartlett)	
Togiak		
Unalaska		

IV	V	VI
Bartlett	Angoon	Eielson
Chugiak	Haines	Lathrop
Dimond	Hoonah	Monroe
East Anchorage	Hydaburg	North Pole
Kenai	Juneau-Douglas	West Valley
Service	Kake	
West Anchorage	Ketchikan	
	Metlakatla	
	Mt. Edgecumbe	
	Petersburg	
	Prince of Wales (Craig)	
	Sitka	
	Skagway	
	Thorne Bay	
	Wrangell	
	Yakutat (Mt. St. Elias)	

SECTION 2. Changes in Regional Placement

A. Changes in regional placement take effect on July 1 of the following summer, unless all affected schools and the Board of Control agree to an earlier effective date.

B. Changes in regional placement may be initiated by the Board of Control or by request of any member school.

C. Initial regional placement for new member schools will be made by the Board of Control. The Board will give full consideration to a recommendation or request from the new member school. Placement of new member schools becomes effective immediately.

ARTICLE XV TOURNAMENTS

SECTION 1. Handbooks

The Board of Control will cause athletic and activity handbooks of policies and procedures to be developed for their approval. These handbooks will be implemented for the operation of state interscholastic activities.

SECTION 2. Trophy Size

The following sizes are adopted by the Board of Control to give order and meaning for trophies:

State	20-25 inches
Regional	15-20 inches
Invitational	12-18 inches
Individual	10-15 inches

NOTE: Size number 3 figures must be used for individual trophies.

ARTICLE XVI BY-LAW AMENDMENT

SECTION 1. Method

These By-laws may be amended by a simple majority vote of the Board of Control sitting in regular session provided that at least 30 days advance notice has been mailed to the general membership. Additionally, amendments must be approved and adopted by the State Board of Education under AS 14.07.053 (c) and the Administrative Procedures Act (AS 44.62).

SECTION 2. Effective Date

Unless otherwise specified, amendments to these By-laws take effect 30 days after their filing with the lieutenant governor.

ALASKA SCHOOL ACTIVITIES ASSOCIATION

650 INTERNATIONAL AIRPORT ROAD ANCHORAGE, ALASKA 99502

LESLIE D. WELLS
EXECUTIVE SECRETARY

907-272-9045

April 21, 1978

RATIONALE FOR ALASKA SCHOOL ACTIVITIES ASSOCIATION LEGISLATIVE AMENDMENTS

The Board of Control and the membership of the Alaska School Activities Association believe that school interscholastic activities programs, including athletics, music, and speech and drama, can best be accomplished by member schools through self organization and control, with a minimum of state supervision and involvement. It is recognized that the Association requires a legal basis and assistance in funding its efforts because of the relatively small number of schools and high costs associated with the coordination and operation of activities in such a large state.

The Association has done an outstanding job of sponsoring activities for Alaskan youth over the past twenty-two years and now believes that the current legislation should be amended in order that the Association may better function to serve the needs of its membership. Current problems are:

1. There is duplication of effort and unnecessary administrative structure. It is agreed by the Commissioner of Education and the Association that it is unnecessary to operate the Association within the Department of Education.

2. The current statute is restrictive and does not allow each regional association to freely elect their Board of Control member.

3. The operation of the budget and the accounting system should be accomplished at the Association level to facilitate the needs of the organization, i.e., collection of officials' fees, purchase and sale of rule books, funding of officials' workshops, and the operation of state meets, tournaments and events.

The control of the Association lies with school districts and Boards of Education in the approval of organizational structure. The Association is operated by the superintendents of schools, either directly or through their appointed representatives. The revised legislation would foster this local control and would give the Association greater ability to react to the needs of its members.

Adequate funding from the state is essential in order to support the basic operation of the Association office. While other states have adequate income from state tournament receipts to support their total operation and to pay for participants' travel expenses, the small number of Alaskan schools and long distances between communities severely limits tournament gate receipts for such needs.

(over)

The Association has applied for funding of $65,000 for Fiscal Year 1979 through the Department of Education. At this writing the Department has included in their budget request to the legislature the amount of $57,200 for the Alaska School Activities Association. This provides funding only for the Association office operation and salaries.

Further information concerning the Association is given in the attached "11 Questions About Your Alaska School Activities Association."

ASAA Constitution and Bylaws
ASAA Member School Directory
ASAA 1977/78 Annual Report

ALASKA SCHOOL ACTIVITIES ASSOCIATION

ANNUAL REPORT FOR 1977-78

This report reflects the paper shortage and the desire to set forth in outline form the accomplishments, conditions and needs of the Association as we continue to strive to serve the needs of the membership and their students. First, let us recognize that this is an Association of schools who elect to become members and are partners in setting the bylaws for all activities and eligibility rules. It is organized to promote and control good, sound interscholastic activities for all high school youths.

MEMBERSHIP AND PARTICIPATION

Let's look at the growth of membership. Ten schools joined in 1977-78. Eighteen new schools joined this year for a total of 94. Most of these are small schools in Region I ranging in size from 8 to 40. In the fall of 1976 there were 66 members.

Participation has increased in girls interscholastic sport activities by 76% over the past two years for a total of 3,290 in sports. Another 2,500 are in vocal and instrumental music, forensics-drama, student government and career club activities. Boys sports activities have increased by 15% during the same period for a total of 5,600 in sports and 2,200 in the other activities.

Thus, as David Hartman of NBC states on television for the National Federation of High School Associations during NCAA events "Support High School Activities - the Other Half of Education". Over half of Alaska's high school students gain educational and career value and leadership training from these important activities.

The state tournaments and meets report (Exhibit A) shows that approximately 1,900 students participated in state level championship activities. The current picture (1978-79) is not as bright due to financial restraints that were projected to your Board of Control by several school districts. Only 600 to 700 students will have the opportunity to participate in state level competition this year. Your Board of Control and this office are working to find means of improving this picture for the future. Many feel that a good program at state level should include 1200-1400 participants.

FINANCIAL REPORT

This report (Exhibit B) gives the financial status of the Association at the end of FY 1978. We are happy to report that the loss of FY 1977 has been turned around with reserves increasing by over $5,000 in FY 1978. The budget for the current FY 1979 is shown with the proposed budget FY 1980 (Exhibit C). The one big need that is not included is funds to offset costs of team travel to state tournaments and meets.

The total interscholastic activities growth picture is only slowed because of the lack of finances, lack of coaches and sponsors and the limitation of facilities. In the years ahead these limitations should be eliminated to give more students the best possible option to the drug and drop out society. Certainly this program must continue to be built upon a strong school academic program and a co-committment for intramurals and other local school activities to serve the needs and desires of all young people.

PRIORITIES AND NEEDS

First, the Association is seeking legislation to clean up and revise the legal foundation by which it operates. The plan calls for an uncomplicated law that allows flow-through state funding through the State Department of Education and authorizes

the Association to operate its own affairs under the auspices of member schools, their school boards and administrators. Removal from the State Department of Education would both save money and shorten administrative lines. It is noteworthy to report that the Alaska School Board Association, the Superintendents' Association and the Secondary Principals Association all have passed resolutions supporting the proposed revision to the Association legislation.

The second priority is funds to support interscholastic activity travel by Alaska high school groups. This is needed both to establish a support foundation for state tournaments and meets travel and for the many schools that have to travel by airline or air taxi service to achieve interscholastic competition during the regular activity season.

If these first two needs are met, it will follow that the need for stability in programming and participation at the state level will follow. This would then assure Alaska students the same opportunity that is found in other states where travel costs are not so expensive.

SUMMARY

1977-78 was a year of growth and improvement for the Association. Thanks to the hundreds of coaches, sponsors and administrators, Alaska students had many fine opportunities for growth, competition and just good participation.

We would like to recognize the leadership of President Ed Frandsen, Region III representative and Principal of Wasilla High School, and Vice-President Ed Nash of Region IV and Principal of Chugiak High School. These gentlemen have been reappointed by their regions for another two-year term and were re-elected to their respective office for 1979.

We would also like to express the Association's appreciation to past board member Ivan Gillespie, Region VI, who moved from Eielson High School to the central administration in the North Star School District as Director of Vocational Education. Let us also recognize the other board members who have given freely of their time to work for Alaska's youth: Dale Lunsford, Region I, Superintendent Bristol Bay School District; Wayne Taylor, Region II, Principal Nenana High School; Ed James, Region V, Assistant Principal Juneau-Douglas High School; Bill Brannian, Region VI, Principal Lathrop High School; and Vern William, Director, Department of Education, Juneau.

It is also noted that the Board of Control voted in March, 1977, to accept the recommendation of Alaska Association of Student Government to name a student to the Board of Control. Miss Sheryl Hall, senior at Dimond High, was selected to serve in this role as a non-voting member from A.S.G.A. for the 1978-79 school term.

ALASKA SCHOOL ACTIVITIES ASSOCIATION

ANNUAL REPORT

July 1, 1976 - June 30, 1977

Leslie D. Wells
Executive Secretary
650 International Airport Road
Anchorage, Alaska 99502
Phone 272-9045

ANNUAL REPORT

July 1, 1976 - June 30, 1977

This report is submitted to the Commissioner of Education, the State Board of Education, the Alaska Association of School Administrators, and the Association membership. It is also available to others who may have an interest in the Association's work.

The purpose of this report is to summarize the activities carried out in 1976-77, to give the financial statement, and to receive advice and comments.

The report contains a letter from the Associations' President and a report from the Executive Secretary concerning five areas. These areas are:

Part I - Financial Report;

Part II - Legislative Revision Proposal;

Part III - Rules and Regulations;

Part IV - Junior High Study Report;

Part V - State Level Activities Study; and,

Part VI - 1977-78 Dates of Seasons, State Meets, Tournaments and Other Activities

STATE BOARD OF CONTROL

Region I - Alternate

Mr. Dale Lunsford, Superintendent
Bristol Bay Borough School District
Post Office Box 169
Naknek, Alaska 99633

Region II

Mr. Wayne Taylor, Principal
Nenana High School
Post Office Box 127
Nenana, Alaska 99760

Region III

Mr. Ed Frandsen, Principal
Wasilla High School
Post Office Box 158
Wasilla, Alaska 99687

Region IV

Mr. Ed Nash, Principal
Chugiak High School
Post Office Box 218

State Executive Secretary

Dr. Leslie D. Wells
650 International Airport Road
Anchorage, Alaska 99502

The Alaska (High) School Activities Association, an organization created by the Superintendents' Advisory Commission in 1956 and recreated under state law, Chapter 128, SLA 1976, has been placed within the Department of Education. The Activities Association is authorized to prescribe the regulations and rules for conducting interscholastic activities involving teams, groups, or contestants when a second high school or organization is participating in athletics, music, dramatics, speech, and debates, and any other interscholastic activity that may be desired.

The Constitution and By-Laws of the Association were approved by the State Board of Education on January 29, 1977, and adopted as state regulations effective March 24, 1977.

ALASKA SCHOOL ACTIVITIES ASSOCIATION
1976-77 Annual Report
President's Report

In 1956 the Alaska High School Activities Association was born out of the need to bring order and equal competion to the interscholastic program for high school students of the Territory of Alaska. In 1976 the Association was recreated under state law, Chapter 128-SLA 1976, to give the Association a firmer base and funding to employ staff so that the organization could carry on the vastly increased and important work of providing program management for the expanded interscholastic program among member schools of the state. The object of this Association has been and still is, "to promote and control interscholastic activities and other interschool contests and programs". Thus the Association strives to assure every student a fair and equal opportunity to participate and each school equal competition that is in the best interest of their students.

Certainly 1976 was a landmark year for the Association. Richard Arndt, Principal of Service High School, had resigned as Executive Secretary because of the work load (voluntary, non-paid position) and the realization that it was unfair to all concerned to continue in face of the ever increasing service needs that could not be adequately provided unless a way was found to provide for a full time executive officer and an association office. The Association is indebted to Mr. Arndt for the hundreds of hours of service from July 1971 to the end of 1975 that saw the Association grow by 50% in membership and almost 100% in new activities and student participants.

This writer agreed to fill the Executive Secretary's position on an interm basis of six months providing positive action was started to firm up the legal basis, and funding to provide for the needs of the Association. Thanks to the Commissioner of Education, Dr. Marshall Lind and Bill Butler, Principal of Palmer High School, who served as consultant to the Department of Education and the Association, legislation was created and passed.

In the spring of 1976 a reorganization committee was impanelled to rewrite the Constitution and By-Laws. This work was accomplished in good time by a broad based committee and the results were accepted by the membership of the Association in May of 1976. On July 1, 1976 the Alaska School Activities Association was created within the Department of Education by law (AS 14.07.053) and the Administrative Procedures Act (AS 44.62) was then implemented to effect the revised constitution and By Laws of the Association.

On October 1st the Board of Control approved the appointment of Dr. Leslie D. Wells as acting Executive Secretary and this writer returned to the Board of Control as the representative of Region III, and was subsequently elected president of the Board.

The Association is indebted to many, too numerous to name, for the assistance given in this Association land mark accomplishment.

While a great deal has been accomplished this past eighteen months there are still many needs to be met in serving the interests of the girls and boys of Alaska in the important field of interscholastic activities.

With anticipated growth in our state's population, we must expand our base and continue to provide expanded services. Hopefully, with the continued support of all professional educators, we will meet this challenge successfully.

Respectfully submitted,

E. M. Frandsen

E. M. Frandsen, President
Alaska School Activities Association

ALASKA SCHOOL ACTIVITIES ASSOCIATION

Executive Secretary's Report

October 1, 1976-July 1, 1977

It is good to be back as your Executive Secretary after five years. Membership has increased 50 percent, the number of state level activities by 400 percent, and the number of student participants by over 100 percent. This rapid growth is unparalleled by any state in the National Federation of High School Associations which Alaska joined in 1956.

With music, sports, and the spinoff of forensics, debate and drama becoming the second international language, it can be said that member high school activities programs are assisting to prepare youth for the future.

Your president has spoken of the many who have worked so hard to build a firm basis for your Association. I would just add the appreciation and thanks to the many school administrators, sponsors, directors, and coaches for their untiring efforts and the great deal of time that has been spent on behalf of the many thousands of girls and boys who have benefited greatly from the interscholastic programs these past years. Programs in forensics, debate/drama, music groups, student government, career clubs, and the several athletic competitive sports programs have helped produce many of our local and state leaders over the past twenty years. We believe all youth are better off because of these experiences and wholesome competition.

Your Association staff will continue to give assistance to improve program and administer programs in the best interest of the majority. We will not promote new programs until the member schools and the policy board, the Board of Control, so indicates the need and desire. This is in keeping with the fact that funding and staffing is a heavy burden at the local level.

The following sections report on both what has happened and the needs for improving student opportunities in the future. Your reactions are desired; let us hear from you.

Leslie D. Wells
Executive Secretary

I. Financial Statement

The three statements included in this report are the 1976-77 State Events Income and Expenses Report, the Report of Income and Expenditures for the year of July 1, 1976 to June 30, 1977, and the Financial Statement giving assets and liabilities as of June 30, 1977.

An audit of the funds is being accomplished and will be forth coming by November 1, 1977.

These reports reflect the increased activities and expenses that have taken place during the past school year. Funding is very limited thus, the services are likewise limited.

It is noted that the income combined from state-level activities did cover the operating expenses of the fifteen state events. This did not reflect the cost for participating individuals or teams from member schools for travel, food, or lodging.

Budget - 1977-78 and 1978-79 Proposed Budget

The budget for 1977-78, as shown in this report, has been approved. The proposed budget, as submitted to the Board of Control, has been tentatively approved. It is noted that it contains a proposed dues increase of $50 for schools of 100 students and under; $100 for schools of 101 to 500; $150 for schools of 501 to 1,000; and $200 for schools over 1,001 students.

19) Tournaments & Awards	21.0	23.0
TOTAL EXPENSES	94.0	115.0
Estimated Deficit (Budget Request to State)	54.0	65.0

1978-79 budget would call for increased dues (July 1978) of $50 to $200 according to size of school and increased state funding of $11,000.

II. Legislative Revision Proposal

It is planned to develop a proposal to give the Association the same legal basis as the Regional Resource Centers. This will allow the Association additional flexibility in the operation of their own internal affairs and to better service the needs of member schools.

The Board of Control has approved this in concept as has the Commissioner of Education. When the proposal is completed and the Board of Control had reviewed it, it will be sent out to member schools for their reaction and hopefully their backing with their local legislator. We also will seek support from the Alaska School Administrators Associations and other interested groups.

III. Rules and Regulations

Work was started in February of 1976 to evaluate, rewrite the constitution and by-laws of the Association. This was accomplished, and the membership approved the document the spring of 1976.

This was done in keeping with legialstion that was passed that same spring, and the work was subsequently approved by the State Board of Education and filed as state rules and regulations by reference.

Since that time, changes have been approved to reduce the number of basketball games from 30 to 25 and a change to start the girls basketball season on October 15 and end with the state tournament. These changes will be effective beginning with the 1978-79 school year.

Other changes allow for 25 wrestling matches within 20 match days. This allows for two matches on the same day if two or more schools desire. The wrestling weight clause "changes in weight class determination will be allowed during the season" was deleted. These changes are effective with the 1977-78 school year.

IV. Junior High School Survey

Thirty-eight districts responded to the questionnaire concerning interschool activities at the junior high level. A breakdown of these indicate 25 school districts have participation at this level, and that 27 districts favor the development and implementation of standards and guidelines.

Number of Districts	Currently Participating in Interscholastic Sports	Endorse Development of Standards and Guidelines
19	Yes	Yes
8	No	Yes
6	Yes	No
5	No	No
14 (no response)		

Suggested standards and guidelines are being developed for consideration by the Board of Control. Should the Board recommend action, their recommendations will be sent out to school districts for their reaction and response. Such guidelines are being developed from the materials collected from the several school districts who responded to the questionnaire. It is believed that such guidelines will be helpful in the administration of programs at the junior high level.

ALASKA SCHOOL ACTIVITIES ASSOCIATION

State Level Activities Study - 1976-77

1. Activities and Participation:

State level activities with information concerning the number of students involved is provided on page 10 to give assistance in evaluating the value of such programs.

Twenty state level contests and activities are currently approved by your State Association. These include five career (vocational) clubs activities and contests with a total of 600 student participants; speech and drama meet, total of 200 students; student government conference, 250 students; music honor groups, 235 students, and festivals, 3,000 students; and ten sports with a total of 690 girls and 650 boys. Sports include cross-country running, volleyball, girls gymnastics, swimming and diving, basketball, cross-country skiing, boys hockey and wrestling, and track and field. This is seven sports for both girls and boys.

This report shows that over 5,000 students (units not separate students) from as many as 74 high schools were involved in these state level activities. It is estimated that this would be 3,000 different students or 12 percent of the total state high school enrollment participated in these gifted and talented programs.

A study made by the Association office last year showed the total number students units involved in interscholastic activities state-wide is between 16,000 - 18,000. Schools of one hundred students report 65-70 percent involvement in one or more activities by students; in the very large schools it drops to 30-35 percent. It is estimated that at least 8,000 different high school students are involved which represents about one out of each three students in Alaska high schools.

In a study being prepared by Dr. Judith Kleinfeld of the Institute of Social and Economic Research, University of Alaska, in which your Association office has cooperated, the following observations have been made concerning extracurricular activities from the report issued last year to our membership:

"In addition, certain important educational goals appear actually to be subverted by the large size of these high schools. If the educational priority is to develop students' self-confidence, sense of responsibility, and leadership skills, it is small schools that appear to have the unquestionable advantage.

In an analysis of the quality of students' school experience in schools ranging from a low of 35 students in grades nine through twelve to a high of 2,287 students, Barker and Gump[1] found that it was in the smaller schools that students:

1) participated more frequently and in more kinds of extracurricular activities;
2) participated more often in classes;
3) developed a greater sense of personal responsibility for school affairs; and,
4) reported more satisfactions in the areas of developing competence, being challenged, and engaging in important activities.

Students in large high schools, in contrast, took courses in more academic specialties but reported that their satisfactions lay more in spectator roles.

Interestingly, a survey[2] of Alaskan high schools provides some parallel findings. It is in small Alaska high schools that a greater proportion of students participate in extracurricular activities.

Barker and Gump found that the optimal school size in providing students with these kinds of important developmental experiences was not the very smallest high schools. Rather, it was high schools with an enrollment of 61 to 150 students. It is noteworthy that this same optimal school size for high student participation also appears in the survey of Alaska schools."

Track and Field	220	30	40

NOTE: In a study made by the State Association last year, it showed that between 16,000 - 18,000 student units (not necessarily separate students) were involved in interscholastic activities. Alaska has between 30,000 and 34,000 high school students.

2. Funding of State Level Activities:

In the financial section of this annual report are the operational expenses and incomes for all programs operated directly from the state office. The student government and career club activities reports are not available as they are only approved by the Association and are not directly operated by the Association. 1976-77 is the first year that the ten state-level activities have been operated by the reorganized association. They are set up on a rotating schedule of sites among Southeast (Region V), South Central (Regions III and IV), and Northern Alaska (Region VI). Thus, there is very little to compare as the state-level operation has changed quite completely. It is noted that each Region decides how to qualify their representatives to sport activities and forensics and drama. The standards for qualifications to state events are set by the State Board of Control. Music festival activities are held within regional limits in Region IV and V.

Generally, regional meets and tournaments are held. First and foremost - these events serve to culminate a season and determine the regional championship for the season. This provides incentive and participatory activities for all member schools. Second - these activities serve to qualify individuals or teams for state meets and tournaments.

It is noted that if a school team or individual qualifies for a state event that it becomes the local member school's decision whether they proceed to the state event. Generally, it is the responsibility of the school community to pay for the transportation and room/board for their students, teams, and sponsor/coaches. There is a growing attitude and in fact some actual assistance from the Regions in funding their representative to state-level championship events.

The Association conducted a study in February of 1977 with over 80 percent returns. This study indicated that most school districts budget less than .02 percent of their secondary school budget for interscholastic activities. With over 80 percent returns, the study gave a good picture of income and expenses.

Costs, due both to inflation and doubling of the number of activities and

participants over the past seven years, has gone from less than one million dollars to over 2.5 million dollars. This includes seven new sports activities for girls for a total of over 3,500 additional participants, and 1,700 additional boy participants for a total increase of 5,200.

The survey totals indicate that close to two million dollars is budgeted each year by districts with another one-half million coming from gate receipts and other fund raising activities. Report of expenditures:

1) Added duty pay for personnel - approximately 1.0 million;
2) Travel, food and housing - approximately 1.0 million; and,
3) Officials, equipment, administration and other costs - .5 million.

The report of this study is available from the Association office.

It is again noted that these programs serve to develop the musical and speech/drama arts, leadership skills, career training, and physical development. All of these activities add greatly to the eduational, emotional, physical, social, and psychological development of youth.

These activities form a broad basis for gifted student education and development. Thus, it is believed that funding for these activities can be well justified as well as the necessary time away from the regular classroom activity, provided each student is maintaining an average or above average record in their ongoing school studies.

3. Loss of School Time:

There has been expressed by at least ten percent of the membership that the loss of regular school time by students is considered a problem.

Along these lines the Association has taken action to reduce the number of basketball games per season from 30 to 25 (effective 1978-79) and to allow wrestling squads to participate in more than one meet per day, thus allowing schools to cut down on travel time and loss of school time.

It should also be noted that the Association is giving leadership for the creation of a "Central Area Music Festival" to serve the needs of the Mat-Su,

Kenai, and Kodiak Boroughs, as well as schools in the southern sections of Regions I and II. This will cut down on loss of school time and travel cost. They now attend the northern Region music festival in Fairbanks.

It is also noted that no school or region is required to send participants to state activities, meets, or tournaments. Regions or school districts may limit this participation beyond what is set by the State Association.

While it is recognized that in individual cases the loss of school time by selected students becomes quite heavy, it is generally true that these students maintain above average grades and are school leaders. Many students need what might be termed as gifted education through these activities that go beyond what is available on the local level.

However, it is important to restate that it is within each school and school district's authority and responsibility to limit their participation in interscholastic activities according to their local policies, guidelines, and needs. Your State Association sponsors and administers activities according to the stated needs and desires of the majority of the membership.

4. Summary - Values and Problems:

Interscholastic activities on the state-level gives youth many educational and social opportunities that cannot be provided otherwise. Just as Alaska is a collection of social, political, economic, and geographical units, it is also a unit for healthy school participation and interaction. Youth learn to lead, excell, and appreciate their heritage from these state-wide, educationally based activities. The state leaders of tomorrow are born and fostered in these activities and will go on to give leadership that will take over from those who now travel extensively to plan, develop, and lead our state today.

In every organization from church to civic, recreational to political, business to government - state leaders at the adult level travel to combine forces for the planning and development of a better state and local communities. Also, it is with the youth of our great state through school

interscholastic activities programs that provides the experience and social understandings that our state so badly needs.

It is submitted that these experiences are not only justification for the small expenditures now made but also a just basis for vastly increased funding to provide for gifted and talented student education to expand experiences and opportunities that are not provided for in the normal school study program.

What if - the schools did not control activities and tournaments through their association? It is submitted by some observers on the sports and activity scene that the situation would revert back to the early 1950's when competition was not in the best inerest of students and that the non-school forces cause students to be out of school for "championship competition" backed by private concerns exploiting students and schools.

Many feel that if a well controlled state-level program is dropped, the new media and downtown quarter back clubs will move in and cause "state championships" to take place without the best interest of the students or schools in mind.

11 QUESTIONS

ABOUT YOUR

ALASKA SCHOOL ACTIVITIES ASSOCIATION

1. WHAT IS ASAA?

The Alaska School Activities Association is a voluntary, non-profit state legislature-approved organization of member schools operating under the auspices of the State Department of Education. Organized by and for the schools, the purpose of the Association is to promote, improve, and regulate interschool competition and activities in music, speech and drama, athletics and other areas of activities as the membership may so desire.

2. WHY ARE REGULATIONS NEEDED?

In early high school days, problems in interschool competition began to appear. Among the problems were that coaches played on school teams, playing rules and conditions could not be agreed upon, trained officials were lacking, etc. Fair, equal and safe competition was by chance. Chaos often prevailed. Today, girls and boys are assured of the opportunity to participate in sound and healthy educational activities.

3. HOW WAS ASAA STARTED?

In the early 1950's school administrators showed a deep concern about the abuses in interscholastic athletics. They saw the need for rules on age, amateurism, and attendance, and formed the organization known as the Alaska High School Activities Association in 1956. Meetings were held in conjunction with the annual Fur Rendezvous. A five-man Board of Control administered the affairs of the Association. This was a time for groping, yet much of the basic philosophy for our Activities Association was established during these early years. Basketball in twenty-four high schools was the only area of concern in early years.

Today, some twenty-two years later, eighty schools are involved in one or more of nine non-athletic areas and eleven athletic areas of interschool activities. On July 1, 1976, legislation became law which placed the Activities Association under the general direction and support of the State Department of Education. It is operated by member schools who vote for their representatives, approves changes in the constitution and bylaws, and participates in activities that fit the needs of their school and community.

Member schools vote for six regional members of the State Board of Control who set policies and practices and employs an Executive Secretary and other staff to administer and operate the Association business.

(Over)

4. WHO MAKES THE RULES?

Being aware that rules and regulations are necessary for any well-run activity organization, the member schools, through ASAA, have set forth necessary rules to assure equal opportunity and competition.

The constitution outlines the scope and purposes of the Association, while the bylaws deal with age, health, transfer, residence, scholarship, officials, awards, insurance, amateurism, etc., of pupils; the qualification of coaches; the sponsorship, supervision and number of games; practice and playing seasons; and special rules for various sports.

By adoption of the constitution and bylaws through application for membership, member schools, by their own initiative, have acted to discipline and control their own interscholastic activities. It, therefore, is the schools themselves with the approval of their school boards and superintendents that provide the authority under which the Association functions as approved by the State Board of Education.

5. HOW DOES ASAA WORK?

New rules and modifications of existing regulations are made by the member schools through the six regional associations. For purposes of administration and representation, the State of Alaska is divided into six representative regions. Membership in a region is based upon considerations including geography, school size and transportation considerations.

The Board of Control is the executive and administrative body that carries out the work of the Association through their Executive Secretary. This body enforces the rules voted by the member schools. The members of the Board are elected for terms of two years and represent the six regional associations. The Board, which meets four to six times per year, is in charge of the funds of the Association, rules on the eligibility of contestants in all activities, hears and decides protests, recommends changes in regional school placement, and sets dates and sites for various activities and tournaments.

6. WHAT DOES ASAA DO?

Approves, develops and directs interscholastic activities such as:

Basketball	Hockey
Cross-Country Running	Music Festivals
Cross-Country Skiing	Office Education Assoc.
Future Homemakers of America	ASCA (Student Council Assoc.)
Future Farmers of America	Swimming
Football	Tennis
Forensics & Drama	Track & Field
Distributive Ed. Club	Volleyball
Gymnastics	Wrestling
Honor Band and Choir	Vocational & Ind. Club

Protects students from exploitation by special interest groups;

Publishes a monthly newsletter, the official handbook, numerous guidelines and other materials;

Works constantly for the safety of participants;

Strives to promote good sportsmanship and cooperative spirit among schools;

Encourages a high quality of scholarship in order to compete in interscholastic activities;

Requires physical examinations and insurance standards be met before participation;

Seeks to keep awards for achievement on a sound, sensible basis;

Requires a coach to be a certified teacher and regularly employed by the school he represents, or controlled exceptions;

Aids officials, coaches and players in acquiring a thorough knowledge of the playing rules;

Distributes game rule books and films to schools and officials;

Promotes ethical codes among officials, coaches, players and fans;

Conducts clinics and rule interpretations meetings;

Tests and registers officials;

Provides numerous free publications and materials to schools;

Sanctions interstate events and meets;

Organizes and directs state championships.

7. HOW IS ASAA FINANCED?

ASAA, with a budget of less than $50,000 in 1976/77, derives its income from the State Legislature through the Department of Education (40%), membership dues (25%), officials dues (2%), sale o publications (2%), tournaments (largely basketball)(31%).

NOTE: This amount will not operate the Association.

A budget of $108,000 has been proposed for 1977/78 to finance the needs of the Association to include a full-time Executive Secretary and a ten-month office secretary.

All monies over and above operating expenses from tournaments and meets are used to make up losses in other activity areas.

8. WHAT IS ASAA'S ROLE IN EDUCATION?

School people have long recognized the values of a reasonable and sound school activities program. The purpose of the Alaska School Activities Association is to approve, develop and direct interscholastic programs so that these values are enhanced. ASAA exercises control to reduce overemphasis and assure that activities will remain in proper perspective, an integral part of the total educational program of the schools. It stresses the cultural values involved in all activities so that the students who participate will grow educationally. The goal is a well-rounded, educational experience for all students.

9. WHAT IS ASAA'S RELATIONSHIP TO OTHER ORGANIZATIONS AND OTHER STATES?

ASAA cooperates and works with all agencies that are concerned with the

(Over)

health and educational welfare of high school and junior high school students. Alaska, through ASAA, belongs to the National Federation of State High School Associations. It is an organization of all fifty states and some Canadian provinces. It helps to formulate uniform policies, standards and game rules so that the states, schools and students are playing the same games under the safest conditions.

10. WHO MAY BELONG?

Membership in the Association is open to all public and non-public schools eligible for participation in interscholastic activities. Over eighty schools are members.

11. WHERE IS THE ASAA OFFICE?

The Association office is located at 650 International Airport Road, Anchorage, Alaska 99502.

ALASKA SCHOOL ACTIVITIES ASSOCIATION
650 INTERNATIONAL AIRPORT ROAD ANCHORAGE, ALASKA 99502
LESLIE D. WELLS, ED.D. 907-272-9045
EXECUTIVE SECRETARY

January 30, 1979

Senator Glenn Hackney
Chairman, Senate HESS Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

President Ed Frandsen and the Board of Control requests that you be asked to introduce and sponsor the proposed revision to the Activities Association legislation which was passed in 1976. You will recall this need from our work with you last spring. Basically it is a clean up bill and contains no request for funds.

The proposal has been drafted by Mr. Ron Lorenson of the Attorney General's office and has the support of the Commissioner of Education. Resolutions of support have been passed by the membership of the State School Boards Association, the Superintendent's Association, and the Secondary School Principals Association and are enclosed. The attached materials give the rationale and need for the change, the proposal, and the current statute.

The Association earnestly requests your leadership and assistance in this effort and assures you that it is in the best interest of girl's and boy's school activities and the total educational community. This office stands ready to give full attention to this effort and supply you with any information that may be required.

I will call you on Thursday to discuss this proposal. Also plan to be in Juneau next Tuesday and Wednesday concerning this bill and other Association business.

Sincerely,

Leslie D. Wells
Executive Secretary
Alaska School Activities
Association

INSERT - CONSTITUTITION & BYLAWS (See both sides of 11 and 11a)

Proposed March 1978
Effective August 1978

AIASKA SCHOOL ACTIVITIES ASSOCIATION

CONSTITUTION & BYLAWS

Article VII. Sanctioned Activities. Section 4 - add C & D (pp 11-a).

C. Four-Season Plan - Regions I and II

1. Any student transferring from one school to another who has completed a given sport season*in the current school year shall not be eligible for the same sport in the same school year at the receiving school within the state association.
(* Regional Tournament)
2. Region I and II teams and/or individual participants may compete and/or participate in state level meets, events or tournaments when Regions I and II do not jointly sponsor a similar activity, except in basketball, as a small-schools tournament plan has been previously approved by the Board of Control on June 4, 1977.

D. Four-Season Plan for Regions I and II

Fall Season:
X-Country-boys and girls:
Begins-Two weeks prior to opening of school(no earlier than Aug. 15).
Ends-2nd weekend in October or no later than the end of state x-country meet.

Early Winter:
Basketball-boys and girls:
Begins-October 1; first game, 3rd week-end (Friday of October)
Ends-First weekend of February or with the end of the state small-schools basketball tournaments.

Late Winter:
Girls Volleyball; Wrestling-boys; X-Country Skiing-boys & girls:
Begins-January 15 or third Monday in January, whichever is earlier. First meet-after ten separate days of practice.
Ends-First weekend in April or with the end of the state wrestling tournament and/or volleyball tournament, whichever is latest.

Spring:
Track:
Begins-4th Monday in March. First meet-after ten separate week days of practice.
Ends-With close of school or with completion of small-schools state tournament or meet.

Minor adjustments of dates for activity may be made as needed by the Board of Control.

Section 7. Activities confined to a season. Sports and sport season dates, pre-season practice, number of contests, Number of Game Periods per Day

A. All sports competition will be governed by National Federation of Interscholastic Athletics rules and guidelines where available, or by rules adopted by the Board of Control.

B. The following table sets out the seasons, the permissible pre-season practice periods, the permissible number of game periods per day exclusive of regional and state tournaments, and the permissible maximum games prior to regional tournaments for various interscholastic sport contests:

ADD NOTE: See page 11-a for Four-Season Plan for sport seasons (Regions I and II).

Sport	*Practice Prior to Participation	Date of First Game	No. of Game Periods/Day	Maximum Games Prior Reg. Tourn.	Season End Date
Football	Begin August 15 10 Separate Days	Last Weekend in August	Four	One Per Week	Third Weekend in October
Cross Country Running	Begin August 15 10 Separate Days				W/completion of Reg. or State meet
Volleyball	Begin August 15 10 Separate Days (Except Reg. I & II)				W/completion of Reg. or State meet
Gymnastics	Begin August 15 10 Separate Days				W/completion of Reg. or State meet
Diving and Swimming	Begin August 15 10 Separate Days				W/completion of Reg. or State meet
Girls' Basketball	Begin October 15[1] 10 Separate Days (Except Reg. I & II)	November 15[1]	6**	25[1] (30-77/78)	W/completion of Reg. or State meet
Boys' Basketball	Begin October 21 10 Separate Days (Except Reg. I & II)	November 15	6**	25[1] (30-77/78)	W/completion of Reg. or State meet
Wrestling	Begin January 2 10 Separate Days (Except Reg. I & II)			25[2] Matches (excl. forfeits) 20 day limit	W/completion of Reg. or State meet
Ice Hockey	Begin November 1 10 Separate Days	Last Weekend in November	3**	20	W/completion of Reg. or State meet
Cross Country Skiing	Begin November 1 10 Separate Days (Except Reg. I & II)				W/completion of Reg. or State meet
Track and Field	Begin March 15 10 Separate Days (Except Reg. I & II)				W/completion of Reg. or State meet
Tennis	Begin March 15 10 Separate Days				W/completion of Reg. or State meet

*excluding Sundays

**Overtimes not counted

[1]Effective 78-79 School Year

[2]Effective 77-78 School Year

Article II. Section 2. Scale of Dues (pp 6)

(Changed only in dollar amount of dues)

Annual Association membership dues for school districts and non-school district schools shall be determined as the sum of the dues for each participating member school, based on the actual enrollment as shown on the third quarter attendance report for the prior school year for each school, as shown in the following table:

Enrollment	High School Dues for Next School Year		Jr. High School Dues for Next School Year
1-100	~~$100.00~~	$150.00	$ 50.00
101-500	~~$200.00~~	$300.00	$100.00
501-1000	~~$400.00~~	$550.00	$200.00
1001-Above	~~$600.00~~	$800.00	$300.00

Article VI. Section 2-A (pp 9)

(Add paragraph concerning non-member school participation with member schools)

A member school may participate in interscholastic activities with a non-member school of less than 25 students on an intermural basis as long as the schools are in the same school district and as long as they are in compliance with all other Association athletic eligibility regulations.

LDW:el

1/

SB 163

Sen. Hackney. This is the bill that would propose to take the intershool activities out from under the Department of Education and make them a self-sustaining entity. We have Mr. Les Wells, would you like to come up and give us the benefit of your vast store of knowledge?

Les Wells. I trust you all received the packet of materials that we provided you concerning this bill. This bill is to basically and simply take the double layer of authority lines away and put it under the local school boards and their superintendent. Where now we have a double line of authority, we are under the school boards, the superintendent and we are also under the State Department of Education.

The bill that was passed in 1976 had some problems with it and this bill is simplified and gives legislative intent to allow us to operate the Activities Association as we have since the mid 50's, and to give us some funds to help us provide for the operation of the Association since we are a very sparce state and we do not raise the kind of money they do in other states in big tournaments and so forth. So, we do feel that we need to be under legislation. The school boards and the State School Board Association, the Superintendents Association, the Principal's Association are all, as you see the resolutions they've passed, agree that it should be a self organization and control organization that the members that joing this voluntary organization control the activities.

There are three basic principles here. I would mention to you that . . .

Sen. Sturgulewski. Mr. Wells we are going save ourselves some time here if you will help me a little bit. You are going to have to walk back just a little bit, tell me what you are doing now and what you plan to do and then go on with where you want to go. What is the process now and how is this going to change it.

Les Wells. The process now is that we (the Alaska Activities Association) are under the Department of Education as of 1976. Before that time, it was purely a private voluntary organization. We came under the Department because of a need for some funds to make a full time executive position and some secretarial help. We just didn't have that kind of money.

Sen. Sturgulewski. And your role in life? The role of the Association?

Les Wells. Is to organize, promote and control interscholastic activities between two or mor schools. Where schools have their

own activities, but when you get out in all the athletics, speech and drama, music activities, you do have to have bylaws and regulations like everything else, rules of operation. So, that main purpose is to promote and control good healthy, safe and sound activities.

Sen. Sturgulewski. And right now you have regional groups plus . . .

Les Wells. We have 6 regional groups. The Association voted those before we came under the last bill. We are operating under those, they seem to be satisfactory. Each region has their own officers and run their own business of activities with the State setting the rules, the eligibility, the State tournaments, the dates of seasons and the health and welfare kinds of things.

Sen. Sturgulewski. And so what is your bill going to do to change that structure and where are the rubs?

Les Wells. Number 1. We come under 6 regions, the old bill says that there shall be a representative from each judicial region. But judicial regions don't measure up.

Number 2. The second problem is being under the State, all monies could be called in and all monies run through the State government which would take the savings of the Association had built up, which is used only to take care of bad years. We have tournaments every year, about 10 or 12 of them, if you go in the hole you've got to make up that money somewhere for officials, running the tournaments, trophies and this and that. So, we need some money there that we've always used to make up on bad years and we've built that up. If we were to come under strictly a State funding, then we have to go in for a supplental funding. It makes a lot of extra governmental . . . We sell $1.00 rule books, should we turn in $1 for every rule book we sell? And then we get the money back. It's a double bookeeping and that kind of thing.

Number 3. We do operate right now under the authority of local school boards and the superindent or their designee. Now the superintendent can designate somebody else.

Sen. Sturgulewski. And that's OK?

Les Wells. That's OK. But at this present time under the present bill we also operate under the State Department of Education and the State Board of Education. That is duplication. More government is needed, it takes a lot of my time to live up to the responsibilities on both ends. We can both save money and put it to better use for training officials, for paying transportation costs and some of these other things with the money we would save if we were out from under the double set of authority. This bill was made up with Commissioner Lind's help,

Nat Cole and Ron Lorensen. I'm not going to say any more unless you need more.

Sen. Hackney. I think we will want to hear from Mr. Cole.

Sen. Sturgulewski. Mr. Chairman, by taking out this one level, is there a problem that may have led to the legislation being passed in 1976 of coordination in keeping standards and policies the same within the various regions. Do you foresee a problem there?

Les Wells. No. Because we came to the legislation because we just had to have a full time worker and the only way we could get it through the Department of Education . . .

Sen. Sturgulewski. What will happen with your funding now?

Les Wells. The bill provides for flow through funding. Flow through funding like you do so many other things.

Sen. Sturgulewski. You don't see that as a severe problem?

Les Wells. No. We see that we get more on our dollar because we get every dollar. Every agency has to hold back to be sure you don't have any old bills.

Sen. Hackney. This would be similar to Council on the Arts.

Sen. Fahrenkamp. It has been my experience in working with this, that more times than not the districts themselves have higher standards than imposed by the State. I think they are quite capable of handling their own affairs.

Sen. Hackney. Yes. What this does is take them out from under the state and put them on their own.

Nat Cole. This legislation is what I consider an improvement on what was begun in 1976 when indeed we did establish a State interest in the Activities Association and in the activies governments over the state. I think that was excellent first step.

I should tell the committee that the earlier draft of that legislation is what you have in front of you now. For whatever reason in those days it was deemed to be more appropriate to place it under a State agency at least in its infantcy. I can't speak for the State Board of Education on this particular piece of legislation. They will be looking at legislation and making recommendations in the next two days. They have simply not looked at this piece of legislation. We discussed it with them last year interms of the theory and velocity and so forth when we were discussing writing a change. They were in favor and I would predict the situation would be the same again. But since they haven't acted, it will discussed I believe at 1:00 tomorrow afternoon along with other pieces of

legislation. I would assume they will act in the manner that they would presumably have acted last year.

There is a great deal of duplication in terms of ultimate authority here. We've found several cases where the Board of Control under this bill would be an ultimate authority as the cause of the law and regulations and their relationship to the State Board of Education had appeals brough to the State Board of Education. I'm not sure that those double appeals do accomplish a great deal. This would, I think, place the authority and responsibility with the local school district in the sense that local school districts do establish the Board of Control, they appoint the Board of Control and therefore they control the Board of Control. By in large they fund the cost of the Activities Association. I say there is State money in there and I gather that in terms of the exact costs you can associate with Dr. Wells and his office, it might be about a 50/50 split. But when you look at the tremendous local effort coming from all the school districts in terms of the costs that accrue to the school district to provide travel, cost of living for their teams, for their competitors, for their music/bank all of that that. When you look at that the bulk of the money is really coming from the local school districts and the control really should be there. I think with that, if there are questions I'd be happy to answer them.

Sen Sturgulewski. What is the mechanism of dispute resolution between regions, is that set forth in the . . .

Nat Cole. It is set forth. I'd prefer to defer to Dr. Wells who works with that.

Sen. Sturgulewski. Is that in the bylaws of your organization?

Les Wells. Yes. My level, then the board level and then the appeals commission level.

Sen. Fahrenkamp. I move that this bill be passed out with individual recommendations.

Sen. Hackney. No objections? So ordered.

Sen. Sturgulewski. Mr. Chairman, I saw Mrs. Flynn there and I wonder was she planning to testify on this?

Sen. Hackney. Did you want to speak on this, Heather?

Heather Flynn. I am Heather Flynn from the Anchorage School Board. You'll notice that Bob Greene's name is on there and he wished to speak on this too, but had a command performance across the street so he won't be here.

I appreciate the commentary I've heard here today regarding

the duplication of services and the duplication of control. I think it is a very valid arguement, but I do have a question to raise that I think perhaps should be raised from a local school board's point of view; and that is the whole issue of where the government lays and what kind of representation that you have on that government. Generally speaking, local school boards are fairly representative of their communities and likewise the State school board should have a fairly broad level of representation from all kinds of backgrounds. While I realize we've come a very long way and we do infact call this the Alaska School Activities Association in very large part the vast majority of the time and energy is an athletic association not an activities association. I have a little difficulty with essentially turning over the governments function to a group of individuals, who are, for the most part, coaches.

I don't wish to put down that function, but I do wish to note to the committee that that isn't necessarily a terribly broad function. I think that the current type of government and the appeal level through the State Board of Education probably is a more representative body.

The other problem I have as a local school board member is there is a good many things done by this Board of Control which significantly impacts local school districts. Its sort of like my argument on binding arbitration. I have the final authority on that budget and I am unwilling as a local school board member to really allow any usurptation of that by another board of control.

It's interesting that this happens to be the weekend the State School Board does infact have an appeal before it and it is an appeal based upon a wrestling situation. My reaction to my previous commentary is that I think probably it is more fair that the broad spectrum of the State Board of Education be the appeal body for that rather than the control board.

Sen. Hackney. Why do you feel they would be anymore objective than would a board made up of local representatives?

Heather Flynn. Because traditionally the board made up of local represenatives is almost exclusively coaches, or principals who have been coaches. That's just the way it is.

Les Wells. Two out of six are excoaches now. We've even got a music person now.

Sen. Sturgulewski. Under the new provisions that we have, who would approve the future changes in the school activities assoc. revisions to their rules?

Nat Cole. That would be the board of control.

Les Wells. Through the vote of each school. Each school can have their input, every superintent and school board. We do notify them.

Heather Flynn. One of the issues that have been brought up this appeal. And I am not party to the appeal, the attorney simply carbon copied those of us on the school board. It does emanate from Anchorage but one of the issues on appeal is the numbers, the amount of representation for each one of the regions. I'm certainly no authority on whether or not there is adequate representation on a region by region basis, but again I have to look at a very selfish idea. Here we sit in Anchorage with practically half the students in the state and yet we have a policy making body that is always going to outvote us by 2 to 1 and the policy making body really does not in any way have to be responsive to me as a governor of a local school district and my superintendent.

You understand my point that I really have no control over it as a local school member and I get a little uncomfortable with that.

Sen. Sturgulewski. Mrs. Flynn, of course you do through budgetary process. You can refuse to participate.

Heather Flynn. That's why there's an appeal right now, because we did reduce that budgetary portion last year. That's the unfortunate part about it, we can sort of go and do as we wish in Anchorage but it impacts the entire rest of the state. And if we choose not to fund something, its a very difficult problem and I am glad to hear Les saying that it coming along and it is becoming more activities oriented instead of strictly athletics.

Sen. Hackney. This unfairness though, really is something that goes throughout the state and its due merely to the fact of Alaskan life that Anchorage Alaska has got darn near half the people in the state and we sure notice it down here. They are not all as fine and fair minded individuals as Sen. Sturgulewski.

Thank you very much Heather.

Sen. Sturgulewski. May I direct one question to Mr. Wells? I think Heather has raised an interesting point about the relationship with the local board. Do you have any comments on the testimony she's given? I don't want to get into a rebuttal thing . . .

Les Wells. We do not communicate directly. We do communicate with the State School Boards Association yearly and monthly, we do with every superintendent. We are encouraging always the superintendent at least once a year to have some kind of item on the agenda so they discuss the activities association. We are under the local board's control and their superintendent. I understand what Heather is saying and we know its a dollar gain and financial gain. And that is why the State Board has taken the stand not to take everybody to state tournaments.

Sen. Ferguson. Mr. Chairman, are we still talking about the Activities Association?

Sen. Hackney. We are, we've actually passed the bill out.

Sen. Ferguson. I would like to ask if Anchorage is included in the Activities Association. I asked that two years ago when we passed a bill on this, if Anchorage is involved in this or they can be if they want to put some money into it.

The problem that I have is Anchorage having 10 schools, they have a lot of gate money not allowing some other communities to come in and share in that gate money is a problem. Two years ago I felt that Anchorage really didn't have any business in the Activities Association with that type of an attitude.

Sen. Hackney. I think that can happen. We were talking about that earlier. The degree to which all of us are affected by what Anchorage does.

Sen. Sturgulewski. Mr. Chairman, I absolutely cannot respond because I don't have any idea what the make up is or how the gates are run or anything else.

Heather Flynn. I think I can understand a little bit of what he is saying. We have been round and round and round about this and infact the first time that we made some reductions or attempted to restrict travel budget it was done on the recommendation of the smaller Southeast school board because they were just getting their student body and their staff ripped asunder by being gone for 10 days at a whack stuck in Hydaburg or someplace. One of the things that we always didn't pass and this was 10 years ago, was that it was cheaper for you folks from Fairbanks, for example, to bring your team to Anchorage. We'll house you, we'll feed you and we'll give you the entire gate if you come to Anchorage. We can't ship 6 full teams all over the state. Fairbanks, Juneau and Ketchikan, in a perfectly honest reaction said, Nuts to you, we want some of the action too. Our school board again, not two months ago, said 'let's say that we'll demand that all state tournaments be held in Anchorage'. Well, that's ridiculous, nobody wants every state tournament to be held in Anchorage, but we can't afford to send all of our teams somewhere else. Consequesntly, we have been putting only X amount of money in the budget. We can't send 6 teams all over the state in every sport we've got. We spend $23,000 for a swim meet in Ketchikan last year.

Les Wells. That was one out of line thing that happened. And everybody admitted that that was an out of line thing.

Heather Flynn. $23,000 to charter an airplane to Ketchikan no, we can't afford to do that.

Sen. Hackney. Yes, it really gets to be a problem. Primarily because we are so spread out.

SENATE BILL NO. 177

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act making a special appropriation to the Legislative Affairs Agency for a State Committee on Services to the Elderly; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $50,000 is appropriated from the general fund to the Legislative Affairs Agency to fund the State Committee on Services to the Elderly.

* Sec. 2. The unexpended and unobligated portion of this appropriation lapses into the general fund June 30, 1980.

* Sec. 3. This Act takes effect on the effective date of a version of an Act entitled "An Act establishing a State Committee on Services to the Elderly".

Appropriation (special) (Legislative Affairs) (Services to the elderly)

SENATE BILL NO. 177, by Senators Rodey and Stimson. Appropriates $50,000 to Legislative Affairs Agency to fund the State Committee on Services to the Elderly. Effective on effective date of a version of Act entitled "An Act establishing a State Committee on Services to the Elderly". (SB 179)

Introduced February 13 and referred to HESS, then to Finance.

Dear Chairman Hackney:

Re: Support of SB 177
and SB 179

At the request of the Governor's Advisory Committee on Aging, I have been directed to contact you and inform you of its unanimous support and endorsement of SB 177 and SB 179 by Senator Rodey and Stimson.

At its official organizational meeting held in Juneau on March 7, 8, and 9, 1979, it was moved by committee member Betty Warren, Kenai, seconded by committee member Al Widmark, Juneau, and carried without objection, that the committee support and endorse the concept contained in proposed legislation. (SB 177 and SB 179)

While under discussion there was real concern expressed by the members present that although SB 177 has a $50,000 fiscal note, the funding of this measure should in no way curtail the funding of the Office on Aging.

Enclosed is a copy of the current members of the committee. All persons were in attendance except Mrs. Southall and Mrs. Arlin.

Sincerely,

Danny Plotnick

HUMAN SUPPORT SERVICES
Senior Citizens Programs

March 13, 1979

Senator Pat Rodey
Pouch V
Juneau, Alaska 99811

Dear Senator Rodey:

As Chairman of the Municipal Senior Citizens Advisory Commission I commend you upon introduction of Senate Bills 177 and 179.

The Commisssion at it Regular Monthly meeting on February 21, 1979 was advised of the two Bills and expressed gratituded that headway was being made toward our goal of improved services and opportunities for older citizens.

It is our opinion that a good look at the whole scene confronting Alaska's Aging is long overdue. There have been a number of studies, mainly from a single issue point of view. These studies have contributed to piecemeal legislation and administration.

We elderly, never-the-less have fared very well with the Alaska Legisltature with such programs as property tax exemption, pension income tax exemption, the Longevity Bonus and more.

The elderly need to be much more involved in the execution of the legislation, like we now are with the legislators.

Senate Bills 177 and 179 will not impact in any negative fashion on our desires for a Medicaid-General Relief Medical $5,000,000 Budget transfer in FY 1980 for a combined Home Health-Home Support program. As you will recall, we are advocating a program to be locally administered with guidance from the Department of Health and Social Services.

Although this in-home care could be handled in the budget review process, we have been advised by members of the Senate and House that a Bill would have a number of advantages over the budget review route.

Our Commission and other organizations made up of older citizens is hopefull that such a bill will be introduced.

We thank you again for your knowledge of the problems of Alaska's aging population and the concern you have shown toward providing solutions.

Sincerely,

Rose Palmquist

PREPARED BY Sen Rodeys' OFFICE

FACT SHEET ON SB 177: "An act making a special appropriation to the Legislative Affairs Agency for a State Committee on Services to the Elderly; and providing for an effective date."

SB 179: "An act establishing a State Committee on Services to the Elderly."

Bill Summary

The purpose of this legislation is to create and fund an interim committee to examine comprehensively all the services presently being provided to the elderly in Alaska, and make recommendations for changes. The assumption is that there are gaps and overlaps in the delivery of those services which need to be addressed, and ought to be addressed jointly by all the parties involved: i.e. the legislature, the administration and, of course, the elderly themselves.

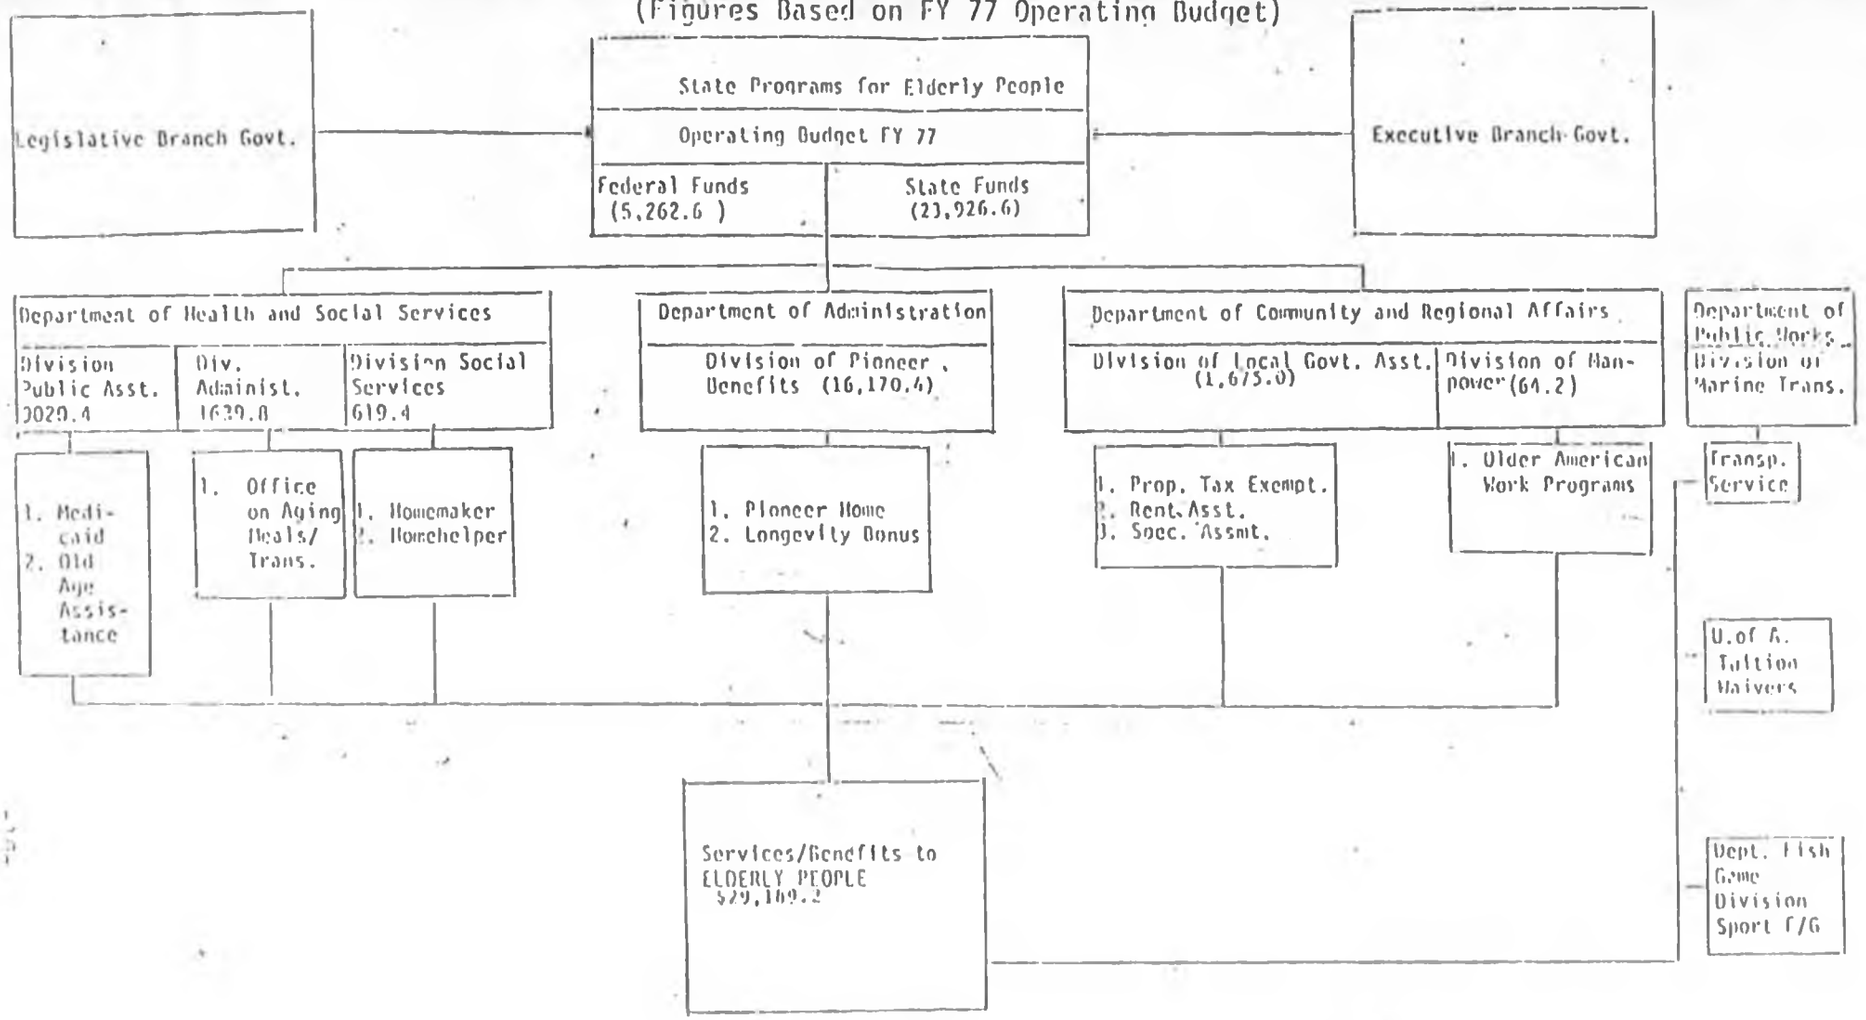
As it is envisioned now, the 11-member committee would hold four meetings during the course of the summer and fall in communities like Sitka, Fairbanks, Anchorage and Kotzebue or Nome. Additionally, efforts would be made to gather input from people in all other places of the state. Topics to be addressed would be, as stated in SB 179, "possible alternative means to improve the efficiency, economy, and effectiveness in the delivery of state services and bendfits to the elderly, including such alternatives as administrative consolidation, local administration and control, substituting cash benefits for direct services, and alternatives to institutionalization."

The desired accomplishment would be a state policy on aging in which all appropriate parties had a share, and to which all would have a commitment.

The Problem

The last time the state inventoried all the aging programs in Alaska was in November of 1976 when Jim Stey, budget analyst for the governor, put it together. His conclusion was "At the present time, the state does not appear to have a definitive aging policy." Two and a half years later, it still doesn't.

Stey's report included some interesting figures which very clearly illustrate the negative effects of our present "non-policy." In 1976, the state alone had 14



different programs for the elderly being administered by five different departments through nine different divisions. Those programs were providing approximately $29 million worth of services and benefits to over 16,000 senior Alaskans. In addition, the federal government was providing approximately $26 million worth of services and benefits to the same 16,000 Alaskans through more than thirty differnt programs administered by at least five different department through another half dozen divisions. That's alot of administration, an expenditure of alot of money, and all of it happening without a comprehensive plan, much of it happening without the people who ought to even knowing about it.

At a time when citizens are telling their elected officials that government is growing too big, is inefficient and unresponsive, and at a time when the managers of our state money are telling us we have to cut back on our expenditure, it seems undisputeably appropriate to back off from the establishment of even more new programs, and consider what we've already got. It might be possible that the state can do a better job delivering services to its citizens by mandating maintenance or less budgets, but it's not going to happen accidentally. What is required is a cooperative effort of all those people who would benefit from a fine tuning of the system. It is not appropriate for the legislature to attempt such an undertaking unilaterally, because the legislature neither knows exactly what is needed, nor does it have the opportunity at any rate to implement its programs. That's the function of the administration. But, neither can they act independently, for they do not appropriate the money nor always recognize the intent of the legislature. As for the consumers of the services, though they are the ones who truly know what they want and need, they neither pass the laws nor run the programs. All are partners of necessity - or at least should be if the state is to do the best possible job of providing for its senior citizens.

*Prepared by the staff of Division of Budget and Management, November, 1976.

MEMO

3/21/79

TO: SEN. HACKNEY

FROM: PAUL

RE: SB 177 & SB 179

Spoke with Jim Kelly, Rodey's A.A., to get some answers regarding a couple of questions I have re: SB 179. First, is the intent of SB 179 designed to ascertain what benefit/services are available at the state level or are they implying that it would encompass all levels, federal and local as well. He said the bill is designed to treat all levels of government, federal, state & local. Second, I was curious as to what the language in the bill "substituting cash benefits for direct services," (p.2, line 10) meant. He said what they are getting at here is a recommendation along the following lines. Instead of pumping all kinds of money into the pioneer homes, maybe a pioneer fund could be set up designed to let pioneers dip into the fund for the purpose of allowing them to use the funds to stay in their own homes rather than being institutionalized.

Questions you can consider for today's hearing:

1) Since there currently exists an Advisory Committee on Aging (Dept H/SS) and a Pioneer Home Advisory Board (Dept Admin) why is it necessary to create another committee dealing with the elderly. Couldn't these committees attain the results desired in this bill?

2) Don't federal regulations somewhat reduce the amount of coordinating flexibility that can take place between agencies serving the elderly (i.e. just to compose a joint-application form would be difficult because federal regs require different information for each of the agencies to process the application in order to provide the benefit or service)?

3) Don't facilities like Senior Citizens Centers assist elderly in procuring bevefits & services?

4) Do you feel that the time you have allotted the committee (committee will terminate at the end of the second session of the 11th Legislature) is sufficient time to examine the issues dealing with the elderly as this bill suggest?

5) To expand this issue a little further - the different levels of government offer benefits/services to an abundance of people of all ages, and all these various agencies providing these different services aren't centralized/coordinated as we would like - maybe in a bureaucratic type system this is something we have to live with --.

ATTACHED is a bill summary and some funding information provided by Rodey's office.

Municipality of Anchorage

POUCH 6-650
ANCHORAGE, ALASKA 99502
(907) 274-2525

GEORGE M. SULLIVAN, MAYOR

February 13, 1979

OFFICE OF HUMAN DEVELOPMENT
Senior Citizens Advisory Commission

The Anchorage Municipal Senior Citizens Advisory Commission has placed the highest priority to assuring that preventative health and social services are provided to the Elderly and that to the maximum degree possible those services to be provided in the Home Environment. Further, the members of this Commission are convinced that the most reasonable, effective and financially sound provision of services would be by means of an umbrella (u fied) service agency.

The Position Paper on Home Care adopted by the Commission at the December 1978 meeting and affirmed at the January 1979 meeting is enclosed. The paper reflects the observations of this Commission and recommendation which had evolved over a two year period.

During this time, the Commission as a whole, and in subcommittees of the Commission, has met with providers of services in this field. The input provided by the staff of provider agencies has had a substantial impact on the Commission. As dedicated as we are to the development of a single organizational structure at the local level for the delivery of these services, we are not approaching the legislature with the request that new funding be provided.

Our First request is that where feasible, State Division of Social Services contracts for Homemaker Services be made to local or regional organizations providing at least one other Home Care Service. This request does not require the expenditure of any additional funds, it is rather a reallocation of funds.

Our second recommendation is that the Legislature establish a special committee to make a thorough evaluation of home services in the State. While this would require the expenditure of funds, we are convinced that the savings which could be realized by the State in its medical care program payments for hospital care, by individuals and by insurance companies for hospital and institutional care would make an impartial legislative evaluation cost effective to the citizenry.

As Chairman of the Commission I have spent two days in Juneau offering more specifice input. We advocate for the transfer of Five Million Dollars from the Medicaid and General Relief Medical Programs to provide in Home Care. The Bill to realize this goal should provide for local administration with the Department of Health and Social Services allocating and Monitoring funds. We strongly encourage a service were relatives can be reimbursed for inhome care. The Commissioner of Health and Social Services has indicated interest in our proposals.

Our medical care subcommittee would be eager to meet with you at any time that you are in Anchorage. Our staff person, Cari John, can be reached at 276-3700 to make arrangements with respect to Home Services. A membership list of the Commission is enclosed.

I would also anticipate that you will hear from the membership of such senior organizations as: AARP NART, Gray Panthers, Older Persons Action Group, and The National Council on Senior Citizens.

On behalf of the Commission, I look forward to a close working relationship with you.

Sincerely,

Rose Palmqusit, Chairman

Senior Citizens Advisory Commission

POSITION PAPER
IN HOME CARE SERVICES
JANUARY 1979

Introduction

The Anchorage Municipal Senior Citizens Advisory Commission is charged by Municipal Ordinance Number 49-76 with responsibility to "Advise the Mayor, the Assembly and appropriate Department Heads with respect to aspects of aging which bear on the welfare of Senior Citizens."

It is in accord with this responsibility that the Municipal Senior Citizens Advisory Commission at the Regular Monthly Meeting on December 20, 1978, adopted by unanimous vote the following position and recommendation with respect to Home Support Services:

The Commission is convinced that the need for a unified Home Support Services is essential to Senior Citizens in Anchorage. Futher, that such unification would benefit incapacitated individuals of all ages. This Commission has, as its primary concern, the well-being of the approximately six thousand (6,000) elderly individuals residing in Anchorage. These recommendations are applicable to Anchorage, though other Alaskan Communities might also benefit from unification of services provided within their communities.

Definition

Home Support Services are defined within this position paper as follows:

"Services provided in the home of the temporarily or permanently incapacitated individuals and are designed to improve, maintain or restore physical or mental well-being and enhance the individual's ability to remain in or return to the home environment."

Specific services encompassed by this definition include, but are not, limited to: In-home skilled health services (nursing services, physical and occupational therapy, speech therapy, education on care); chore and homemaker services; in-home respite care;in-home nutrition services; and counseling and referral services.

The goal of Home Support Services is to reduce the inappropriate or premature institutionalization of individuals and the appropriate care of individuals in their own homes would relieve the economic and emotional devastation of inappropriate placement of individuals in institutional care facilities.

Provision of in-home services has been shown to be an effective means reducing expenditure of public/private funds for institutional care.

Problem Statements

-Existing services to incapacitated individuals are not available in quantities sufficient to meet the needs.

-Fragmented services delivery prohibits the assurance that care is provided in a coordinated manner responsive to the individuals's changing needs; resulting in cost inefficiency and waste of resources.

-Individuals are subject to "Agency Bounce" because the requests for services are frequently referred to the wrong provider or the request for services was made in an "inappropriate" manner.

-There is no multi-disciplinary appraisal of the individual's needs which frequently results in the delivery of inappropriate services.

-Two specific Home Support Services, cannot be unified because the policy of the Department of Health and Social Services, Division of Social Services is to contract for Homemakers services on a state-wide basis.

Recommendations

- That expansion and unification of in-home support services be acknowledged as the very highest goal of State, Federal and Local Government.

- That within the State of Alaska, the development of local and regionally based organizations be encouraged to consolidate services to the maximum extent feasible.

- That the 11th Session of the Alaska State Legislature direct the Division of Social Services to contract with local organizations, local units of government and/or regional health corporations for the delivery of Homemaker services, in instances where consolidation of services would result.

- The 11th Session of the Alaska State Legislature establish and provide funding and staff for a Special Interim Committee to examine the issues, possible solutions and funding mechanisms for regionally and/or locally based unified home support services. And that Committee be charged with the responsibility of preparing recommendations for action to the Second Session of the 11th Session.

Senior Citizens Advisory Commission

RESOLUTION

79-1

WHEREAS Care provided in the home environment of incapacitated individuals is both economically and therapeutically preferable to institutional care,

AND WHEREAS In-home care permits incapacitated individuals, particularly Senior Citizens, an opportunity to continue leading an independent and productive life

AND WHEREAS Within the State of Alaska, In-Home Care is not available in sufficient quantity to meet the needs of incapacitated individuals of all ages,

AND WHEREAS Existing In-Home Care services are fragmented and provided by a variety of administrative units, and have not been planned for or implemented in an integrated and coordinated manner

NOW THEREFORE DOES THE MUNICIPAL SENIOR CITIZENS, ON DECEMBER 20, 1978, RESOLVE TO REQUEST THE ELEVENTH SESSION OF THE ALASKA STATE LEGISLATURE TO ESTABLISH AND PROVIDE FUNDING AND STAFF FOR A SPECIAL INTERIM COMMITTEE TO EXAMINE THE ISSUES, POSSIBLE SOLUTIONS AND FUNDING MECHANISMS FOR REGIONALLY AND/OR LOCALLY BASED UNIFIED HOME SUPPORT SERVICES. AND THAT THE COMMITTEE BE CHARGED WITH THE RESPONSIBILITY OF PREPARING RECOMMENDATIONS FOR ACTION TO THE SECOND SESSION OF THE ELEVENTH SESSION.

GEORGE M. SULLIVAN,
MAYOR

OFFICE OF HUMAN DEVELOPMENT
Senior Citizens Advisory Commission

RESOLUTION

79-2

WHEREAS The Municipal Senior Citizens Advisory Commission recognizes the need for the unified and coordinated Home Support Services delivery to incapacitated individuals.

AND WHEREAS Existing Home Support Services are fragmented,

AND WHEREAS The Divisions of Social Services of the State Department of Health and Social Services contracts for the administration and delivery of Homemaker services on a statewide basis only.

AND WHEREAS The Division's requirement that contract for Homemaker Service be made on a statewide basis effectively prohibits the unification of Homemaker Services with other Home Support Services.

NOW THEREFORE DOES THE MUNICIPAL SENIOR CITIZENS ADVISORY COMMISSION ON DECEMBER 20, 1978, RESOLVE TO REQUEST THE ELEVENTH SESSION OF THE ALASKA STATE LEGISLATURE TO DIRECT THE DIVISION OF SOCIAL SERVICES TO CONTRACT FOR THE ADMINISTRATION AND DELIVERY OF HOMEMAKER SERVICES ON A REGIONAL OR LOCAL BASIS IN INSTANCES WHERE SUCH CONTRACTING WOULD RESULT IN THE UNIFICATION OF THE ADMINISTRATION AND DELIVERY OF HOME SUPPORT SERVICES

T E S T I M O N Y

TO: The Honorable Glenn Hackney, Chairman, Senate Health, Education and Social Services Committee

FROM: Dove M. Kull, Legislative Chairperson, American Association of Retired Persons, Juneau Chapter

RE: Senate Bills 177 and 179

In view of the facts that:

a) more senior Alaskans are remaining in Alaska because of the benefits (including housing) provided by the State to enable them financially to do so;

b) more senior citizens are moving up from the South 48 to join their children and grandchildren who are already here; and

c) more senior citizens, as doctors and dentists, are coming to Alaska to retire with limited practice because of their love of nature and sports such as hunting and fishing, it behooves us to make a concentrated effort to study the services established for the aging to determine whether they meet the needs, are efficiently and economically administered, and are of a quality which reflects modern technology and expertise.

As legislative chairperson for the 160 members of the Juneau Chapter of the AARP, I respectfully request Senate HESS Committee to establish a State Committee as set forth in Senate Bills 177 and 179 to pull together the major programs for the aging into a single agency.

This request is made in consideration of the facts that:

a) we, the aging, are a very small minority group of Alaskans scattered over a geographic area of a half million square miles;

b) a number of us cannot communicate satisfactorily in the dominant language of the State;

c) another portion of us are not ambulatory because of our frailty;

d) current statistics are not readily accessible on which to build an effec-

tive program for the aging, due partly to fragmentation of services and due partly to the Department of Health, Education and Social Services including us in the category of all adults of 18 years and over; and

e) last, but most significant, is the fact that "growing old is a worldwide phenomenom."

* at the time of the Roman Empire, life expectancy was 18 years;
* in 17th Century Europe, it was 25;
* in 1900, in the United States, only one person in 25 lived to be 65;
* today, in the United States, one person in nine lives to be 65;
* today, life expectancy for a baby boy is 69 years and for a girl, 77.

There are 23 million Americans 65 and over, and as a phenomenon we are being studied. The presses all over the world are rolling off tons of research findings. This is a period of learning about who the aging are and what is their potential, etc. We are not the old people of the past who were placed in the poor house along with the paupers, insane and children who were sold by the borough assemblymen and county commissioners to the lowest bidders.

Society considers itself modern, but is it really? There remain vestigial remnants of the Elizabethan Poor Law. Even our federal government, in outlining eligibility requirements for residence in HUD housing states "for persons over 62 and the physically and mentally handicapped." When do we discard the old concepts and the old images of the aging? How?

Let's do it <u>now</u> by passing these bills and allowing the aging to have a voice in their own destiny. Many of us will die the old way in institutions while we are waiting for the mills of the bureaucracy to grind out a plan and set priorities. Thank you for passing these bills.

Two articles are attached for your information.

Relates to SB 179

My Turn

Aging In Alaska

By DOVE M. KULL

It is my turn to speak; and so I will speak on the aging in Alaska.

Why doesn't the State of Alaska establish a single agency to develop and handle a comprehensive, coordinated network of services for the agency? And why not include on the staff of this single agency knowledgeable persons who are Senior Alaskans? These Seniors are to be salaried (part or full time) monitors with clout, not token members of committees that merely recommend. Why not focus on quality care and economical administration? The two can go together.

In FY'77, Alaska's plan for the aging was to spend $60,000,000 (local, state and federal funds) for benefits and services for 16,618 older Alaskans. Of this number, 9,308 were 65 and over.

How was this money administered? By approximately 12 different agencies and departments that provided approximately 22 programs.

Many of the aging have lived independent lives. Many have never been on welfare. How, in Alaska, which has a sparse population scattered over one-half million square miles, can isolated older persons find their way around? It would be a kindness to them for the state to become more efficient.

Why not let us plan for ourselves the kind of housing we need, the kind of care we need?

We seniors have learned to cope, to make do. Why? Because we have survived—even during a drastic national economic breakdown in the 1930s.

While we are at it, why not place one or more seniors (depending on the size of the department) in each branch of State government? Alaskans who are 65 and over make up an enormous pool of varying skills and expertise. Why not start with the media and encourage all forms to see us as we are, and what we are capable of doing to help our state.

Look at the entire population of the U.S. Approximately 23,000,000 now are over 65. By 2020, approximately 40,000,000 will be 65 and over. All of these persons are living now. Scientific research and discoveries are increasing longevity. It is predicted that life may be prolonged to 150 years. The oldest man in the world whose age is documented is 137 years old. He lives in Florida. The fastest growing segment of the population is the group 75 and over. The aged population has increased in size by 15 % in 8 years, compared with 6% for the nation's population as a whole.

Should the decreasing number of younger persons carry the responsibility for the aging? The answer is no. Let the aging continue to share the work and carry themselves as much as possible. Besides, their amassed pool of experience is needed in our government.

SENIOR ALASKANS IN RE SERVICES AND BENEFITS ADMINISTERED BY A SINGLE AGENCY

The State of Alaska is unique in its care of the aging, especially the Pioneers who have lived here 25 or more years beginning before statehood. The State funds 100% of a Longevity Bonus which is granted in addition to any state retirement benefits. In FY '77, the State paid $125.00 a month to 5,625 persons, a number which is increasing. The State also funds the cost of the Pioneer Homes program for those nearing the end of the trail; and provides full property tax exemptions on homes. A rent equivalency plan has been initiated and is scheduled for expansion. Benefits include free travel on state ferries from November through April, hunting and fishing licenses. Retirees are eligible for Blue Cross health insurance to supplement medicare.

In FY'77, Alaska planned to spend $60,000,000 (local, state, and Federal funds) for benefits and services for 16,618 Senior Alaskans. Of this number 9,308 were 65 and over. How was this money administered? By approximately 12 different agencies and departments which have approximately 22 programs.

Alaska could take a step forward in the interest of economy and kindness to the aging who are frustrated by the duplication, fragmentation, and multiplicity of services and benefits. Finding one's way around is exhausting.

Why not a single agency to develop a coordinated comprehensive plan to handle all programs? And why not include on the staff of this single agency knowledgeable persons some of whom are Senior Alaskans? These Seniors should be monitors, not committee members who merely recommend. Why not focus on quality care and economical administration?

Why not use the study of James Stey, Budget Analyst? His study pointed to

Age Versus Financial Resources[1]

Characteristics	60-69 years (8,441 people)	70-79 years (2,500 people)	80 years & older (1,256 people)
Mean Income	$ 7,079	$ 3,843	$ 2,800
Mean Net Wealth	$34,600	$25,750	$11,390
Median Net Wealth	$15,900	$10,840	$ 2,320
Employment (% employed)	37.6%	15.5%	7%
Home Ownership (% owning their own home	73%	65%	43%

Elderly men had average and median money incomes of $6,960 and $4,540; women $4,750 and $2,440.

The preceding chart shows that the old grow poor and descend into poverty. One catastrophic illness can wipe out a life's savings which were accumulated under a different economic system. Poverty means loss of independence and self determination, being at the mercy of eligibility rules often set by a rigid bureaucracy which deals with statistics and dollars.

1. Nov. 3, 1976

The 1972 distribution of the aging 60 and over was:
Northern Region, mostly Alaskan Native, 24,6%
South Central, mostly Caucasian, 48.4%
Southeastern Region, 27%

In many of the Alaskan homes of the aging, there is a woman living alone. The life of the older woman was centered in her home; her cabin, her apartment. The house itself is important to her. Roughly, one of seven households of Senior Alaskans does not have running water, flush toilets, bathing facilities, or heat in every room.

In structuring a single agency, health, mental health and safe housing are necessities. Why not structure this single agency to develop and implement a comprehensive plan of living, not to duplicate, but to coordinate their services to the aging; to develop a community-based, home-centered network of services and benefits; as housing.

In developing a housing plan, avoid the old poorhouse concept of providing one facility with one level of care. HUD provides housing for the elderly and physically and mentally handicapped. Many institutionalized persons isolate themselves in their rooms to avoid the emotional impact of sitting around in the recreation rooms or the nursing station along with patients extremely mentally retarded or mentally ill. What is the impact of thoughtless planning on the mentally alert older person?

Develop a compassionate, suitable plan of housing.

Housing - plan to include levels according to the needs of the individual and adapted to the terrain, climate, geography and architectural safety of older persons.

Level 1. Independent living - let them stay at home as long as possible.
- a. Own home- taxes forgiven, government help with repairs.
- b. Rent home - rent equivalency.
- c. Extended family - addition of a "Grandma room" for privacy.
- d. Congregate housing - constructed and administered preferably by private, non-profit organizations that can offer more flexibility of regulations.

Level 2. Semi-independent living
- a. Intermediate housing under watchful care because of extreme frailty, falling or inability to perform all personal care tasks.

Level 3. Extended Care facility
- a. Nursing home which provides 24 hour care - Medicaid, Medicare
- b. Hospital intermittently, or finally, with Medicaid & Medicare

Levels 1 and 2 should include home care as needed.

Supportive Services
Trained, professionally supervised homemaker-home health aides should serve the residents of the homes on the four levels of independent living and the level of semi-independent living, as part of a team to coordinate and extend the services of health, mental health, nutrition and the level of living. They can be an

extension of the social worker, nurse, dietitian, physical and speech therapists, and physicians in helping to carry out pertinent instructions in accordance with the degree of need. They can encourage self-help. Other supportive services include meals on wheels, transportation and outreach, as Senior Centers and educational programs. The National Council for Homemaker-Home Health Aide Services, N.Y., N.Y. has made studies which show this plan to be less costly and less traumatic than institutionalization.

This coordinated, comprehensive plan of living should be designed to provide: as many choices as possible; a chance to allow the individual to work as long as desired and competent; to earn freedom from an abundance of "Senior Citizen discounts" and "Entitlement cards"; and to share in the dignity of self maintenance as a contributing member of the community, the state and our United States of America.

Dove M. Kull, an Older Alaskan, M.S.W., A.C.S.W.

Services to the Elderly (establishment of committee)

SENATE BILL NO. 179, by Senators Rodey and Stimson. Establishes a state committee on services to the elderly to consider problems and make recommendations regarding improved delivery of benefits and services to elderly Alaskans. Act terminates at end of second session of eleventh legislature. Provides Act effective immediately.

Introduced February 13 and referred to HESS.

HUMAN SUPPORT SERVICES
Senior Citizens Programs

March 13, 1979

Senator Pat Rodey
Pouch V
Juneau, Alaska 99811

Dear Senator Rodey:

As Chairman of the Municipal Senior Citizens Advisory Commission I commend you upon introduction of Senate Bills 177 and 179.

The Commisssion at it Regular Monthly meeting on February 21, 1979 was advised of the two Bills and expressed gratituded that headway was being made toward our goal of improved services and opportunities for older citizens.

It is our opinion that a good look at the whole scene confronting Alaska's Aging is long overdue. There have been a number of studies, mainly from a single issue point of view. These studies have contributed to piecemeal legislation and administration.

We elderly, never-the-less have fared very well with the Alaska Legisltature with such programs as property tax exemption, pension income tax exemption, the Longevity Bonus and more.

The elderly need to be much more involved in the execution of the legislation, like we now are with the legislators.

Senate Bills 177 and 179 will not impact in any negative fashion on our desires for a Medicaid-General Relief Medical $5,000,000 Budget transfer in FY 1980 for a combined Home Health-Home Support program. As you will recall, we are advocating a program to be locally administered with guidance from the Department of Health and Social Services.

Although this in-home care could be handled in the budget review process, we have been advised by members of the Senate and House that a Bill would have a number of advantages over the budget review route.

Our Commission and other organizations made up of older citizens is hopefull that such a bill will be introduced.

We thank you again for your knowledge of the problems of Alaska's aging population and the concern you have shown toward providing solutions.

Sincerely,

Rose Palmquist

January 10, 1980

FILE

The Honorable Glenn Hackney
Pouch V
Juneau 99811

Dear Senator Hackney:

During the last legislative session, Senators Ferguson and Rodey introduced Senate Bill No. 190, "an act relating to extension of public school education and providing for an effective date." The bill was introduced in February 1979, and referred to the Senate Hess Committee where no action was taken. I understand that Senator Ferguson intends to re-introduce the bill during the current session. As the chairman of the Hess Committee for the Senate, I am sure you are thoroughly familiar with the bill.

Although the bill calls for only a pilot program, it does open the door to secondary schools offering grades for two years beyond the 12th grade. My concern as a community college administrator is that in establishing a duplicate program throughout the state, it would prove extremely costly to tax-payers. There is already a vehicle in existence to offer post-secondary vocational education through the community colleges. Any lack of offerings has been due to insufficient funding to develop some of the vocational programs which we have identified. Articulation is a further difficulty which could arise if adult vocational education were offered through the secondary schools. One of the advantages that adult vocational education has through community colleges is that the colleges are accredited and courses can be transferred easily from one degree program to another. I think you are aware of the very cooperative spirit which exists between the Fairbanks North Star School District and TVCC. We have come a long way in the last five years, and I am optimistic that we will be able to offer more and better vocational technical education for our community of Fairbanks, as well as for students around the state. I would urge you to take an extremely close look at the long-term difficulties which Senate Bill No. 190 could impose upon our state system of higher education.

Thank you for taking time to read my letter. I will be happy to discuss this bill with you at any time at your convenience.

Sincerely,

Glenn F. Massay, Campus President

Senator Gene Hackney
Alaska State Legislature
Pouch 11
Juneau, Alaska 99811

Dear Senator Hackney:

Senate Bill No. 190 has recently come to my attention, and I would like to point out to you the duplication of services this bill would entail.

There is a network of community colleges now extending into the bush that could easily provide vocational education this bill is seeking. The community colleges are responsive to both the needs of the community and to the job market. They have the facilities to offer college credit that can be transferrred to other colleges as well as A.A. degrees in vocational areas.

I cannot understand why the state should duplicate those services that it already furnishes through the college. This duplication can only escalate the cost of education in the bush.

Sincerely,

Marie Lium

SB 199/SB 233

Sen. Ferguson. I introduced SB 233 but the problem I had is at the time it got drafted it didn't meet the 30 day deadline. I am requesting that SB233 be attached to SB 199. I've talked to the sponsor of SB 199 and he is ameniable to that provision. I think it would be best to have the commissioner and anyone else testify on the bills.

Commissioner Lind. The comments I will be making with reference to various portions of SB 233 will be based on the areas that we have discussed with the State Board of Education. We do have positions on certain parts of it, but not a position on the entire bill. We are meeting next week and will be spending quite a bit of our work session dealing with this bill and some others at that time.

The author of the bill attempted to address some of the problems (SB 233) that we recognized should be addressed. First of all, the change for the correspondence study students, the proposed changes would place correspondence study students on a different formula. One that would result in less money to the local school districts. It is our feeling that that change is necessary and we support the proposal that is offered. It does pick up the schedule over on page 3, the new subsection for the units. We are in agreement with that portion of it.

Sec. 2, part B, talks to the computation of the instructional units for each elementary and secondary school, as it now reads it is strictly on a secondary basis; however, in the remote areas of the state it is possible to cimpute the attendance of the instructional units on a separate building by building count. We feel that this change for the elementary schools is appropriate. It is expensive, but we feel there are some additional costs involved with operating separate schools, therefore this does address that. The fiscal note does provide for you a detailed analysis section by section.

Sec. 3, is a section that we recommend and support. It does clean up some things that we feel are necessary. There is no fiscal impact attached to that section.

Sec. 4, is very important to us. There is no fiscal impact. The recommendation that we would have is that that become effective immediately. Somewhere along the line that was left out about two years ago, inadvertently from the best of our research, as we made some other changes in the foundation formula. We would highly recommend that that be included and become effective immediately.

Sec. 5, we have also recommended this change reagrding some adjustments in the voc education schedule. The cost of that is approximately $578,000 and there is an accompanying

memo attached to your fiscal note that clarifies where that money would go. One of the problems that we are running into is the adequacy of the funding for very small vocational education programs. We've got quite a good formula basically for vocational education but it is not doing what we think it should be doing. It's a very small school. These are expensive programs. We also feel that one of our responsibilities is to make sure that the vcational education programs that are in existence are truly vocational education in nature and are doing what they purport to do as far as vocational education training. We have recognied of the past couple of years that for small schools to have a very meaningful voc/ed program, the present form is just not adequate This does have that $578,000 impact.

Sec. 6. I addressed earlier regarding correspondence study. This is the portion that outlines the formula for correspondence study. That is a reduction.

The State correspondence study is out of a separate fund so this does not effect that. What it might mean that some school district if they are not getting as much through the foundation program for correspondence study may choose to no longer offer a local program and those youngsters then would be picked up at the state program. How much that might be is hard to say.

SEc. 7. Has fiscal impact of $1.8. I cannot say very much about the area differentials that are included here, we have not taken a firm position on all of these at the State board level. At the department level our recommendation would be to change only two , Annette and Skagway. And the placement of the newest district in the State, Sandpoint, . .

Sec. 8. This one has a bit of an impact of $21 million. We don't have a position supporting that much of an increase. We supported a 10% increase for FY 80, but I am not prepared to say that this is an appropriate increase for FY 81.

Sen. Fahrenkamp. What would happen if we maintained same level.

Sen. Hackney. It's like the old story, the truth probely lies somewhere inbetween.

Sen. Ferguson. I don't have a problem going down to whatever the giture should be, but I included 10% because things are costly and I can understand you having a problem with 10% and I recognize that.

I would move that we reduce that to 7%. So ordered.

Com. Lind. Sec. 9. We are hopeful that correspondence study can be more clearly defined then what we have now. We suggest that the word "approprate" in line 21 be stricken.

It is our feeling that any youngster that is presently in a centralized program should be able to stay in the centralized program to complete their particular courses

Sec. 11. Speaks to clean up to remove some redunancy and some other parts of law. We like it the way it is.

Sec. 12. Does have fiscal impact. The establishment of an assessment fund which would assist school districts in the diagnosis for exceptional youngsters. Most of the school districts are letting us know through he school boards and superintendents regarding the problems they are running into in the funding for the initial assessment, particularly of exceptional youngsters. We feel there is a need for this, especially in the next couple of years in trying to deal iwth all of the implicatons of the federal requirements of the handicapped plus our own state requirements, they need some hope in doing the adequacy of assessment. e are running into teachers probably not fully prepared or assisted to do the assessment, they have other classroom kinds of things they should be doing, youngsters are not being assessed properly, there is an additional paperwork burdeen on the classroom teachers, Their time should be spend doing other things. The fact that a number of the disticts to go through the assessment proces ther if the youngsters are eligible for special ed ser s, they have spend the money going through the process an y not be able to afford the additional dollars. This bill as presented as fiscal implications for 79 and 80 It is our feeling this should be put off until FY 81 at shich time you deal with the total increases unless there were some way to see how an additional 1.9 million could be paying for FY 80.

Heather Flynn. Marshall expressed it very well.

Sen. Fahrenkamp. I move to substitute the body of 233 for the body of SB 199 with the amendments that were discussed here today

No obs so ordered.

of ALASKA

MEMORANDUM

TO: Honorable Glenn Hackney, Chairman
Senate HESS Committee
Alaska State Senate

DATE: March 15, 1979

FILE NO:

TELEPHONE NO:

FROM: Marshall L. Lind, Commissioner
Department of Education

SUBJECT: CSSB-199

It is the feeling of the Department that the following amendment to the above bill, properly introduced in the Senate Finance Committee, is needed to permit parents who see correspondence programs as an alternative to public schools, and who reside in districts that do not offer correspondence study programs, to continue to have access to centralized correspondence study. Section 9 of SB-233 is changed as follows:

Section 9. AS 14.17.250 is amended by adding a new paragraph to read:

(20) "correspondence study [PROGRAM]," as that term is used in AS 14.17.041(h), means a district educational program serving elementary or secondary students who do not have daily access to a [AN APPROPRIATE] public school program.

PROPOSED AMENDMENTS SB 213

Page 2 Section 2---Delete entirely. Renumber the following sections accordingly.

Page 3 Section 5 (formerly 6) amend to Section 5 (a) Notwithstanding sec.4, ch. 113,SLA 1972, and subject to (b) of this section, A school board, including a regional educational attendance area school board, may not reject having the provisions of the Public Employment Relations Act apply to its relations with its noncertificated employees unless the qualified voters within the school district vote in favor of rejection at a special or general election conducted within ninety (90) days of the effective date of this Act.

(b) A regional educational attendance area school board may reject having the provisions of the Public Employment Relations Act apply to its relations with its noncertificated employees until July 1, 1983 without a vote of the qualified voters within the school district if the school board adopts a resolution providing for such rejection within ninety (90) days of the effective date of this act. A regional educational attendance area school board may extend the period of its rejection of the Public Employment Relations Act under this subsection for an additional period of two (2) years if the school board adopts a resolution providing for such an extension between April 1, 1983 and June 30, 1983.

4-28-80

Dear Senator Hackney,

Recently you received a letter from Iola Harris, President of the C.P.O. in Fairbanks concerning S.B 213.

In that letter, she spoke to possible amendments to S B 213. We agree w/ Mrs Harris & lend our support to her suggestions.

We are also concerned about the "opt-in, opt-out" possibility. If S B 213 is amended to reflect that, it would offer nothing to the classified employees - especially to those employees who have been denied the right of collective bargaining. There are groups on this category such as the NUGGET Assoc of Mat-Su as we heard in testimony on April 16 from Linda Meyers, Pres. of that group.

We hope that SB 213 could be passed in a form that all parties can accept. Thank you for the opportunity to speak to this bill.

Alicia Held, President, TOTEM Assoc.
Anchorage

Duane Johnson, Representative of NUGGET

Re: SB 213, Labor Relations Between
School Boards and Their Employees

Dear Senator Hackney:

This is a follow-up to my oral presentation before your committee or Wednesday, April 16, 1980 on the above-referenced bill. As I indicated at the hearing, our law firm represents a number of school districts around the state.

My concerns regarding SB 213 are twofold. First, assuming that it is determined that classified employees of school districts should be included within the scope of the Public Employment Relations Act (PERA), I question the necessity or advisability of moving that group of employees out of the category of public employees which is authorized to engage in strikes only for limited periods of time (i.e., so long as the strike action does not affect the health, safety or welfare of the public) and placing them into the broader classification of public employees who are authorized to strike for unlimited periods of time, regardless of the effect the strike may have on the general public.

The primary function of school boards is, of course, to educate children and that would become an extraordinarily difficult task to achieve if a district's classified employees (e.g., teacher aides, cafeteria employees, and janitorial and maintenance employees) chose to stay off the job during the school year. Consequently, if the committee does decide that classified employees of school districts should be included within PERA, I would at least urge the committee to delete the present Section 2 of SB 213 so that this group of employees would remain classed as a part of category two employees for the purpose of striking. Even more appropriate, however, would seem to be placing school district classified employees into that class of employees which may not strike for any period of time (class one), since, at least as the bill is currently drafted, PERA will be mandatorily imposed upon school districts.

My second concern regarding proposed SB 213 relates to Section 6 of the bill. Section 6 has the clear effect of requiring every school board in the state, including the Regional Educational Attendance Areas, to bargain with their classified employees under PERA. As presently worded, Section 6 would not permit any district in the state to opt-out of coverage under PERA, even though when PERA was first adopted a provision was specifically incorporated in it to permit any municipality in the state to reject having the provisions of PERA apply. A number of municipalities exercised that opt-out provision.

As a result, the employment relationship between certain municipalities in the state and their public employees is not governed by PERA. Instead, that employment relationship is governed either by a local bargaining ordinance (for example, both Juneau and Anchorage have such local ordinances) or by no local bargaining provisions whatsoever. If SB 213 were adopted with Section 6 as it now reads, classified employees of school boards in those municipalities which had rejected PERA would end up being treated differently than other public employees in the same municipality. Further, newly created political subdivisions of the state, such as the REAAs, which were not in existence when PERA was first adopted, would, under Section 6 of SB 213, be denied the same opportunity to reject application to them of PERA which the Legislature initially extended to those local government entities in existence at the time PERA was adopted.

The following are proposed alternate versions of language which might be adopted by the committee to deal with the opt-out question discussed above:

A. To deal with the problem of school districts in cities and boroughs which have already opted out of PERA:

> * Sec. 6. (a) The provisions of this Act do not apply to city or borough school boards in any city or borough which has rejected having the provisions of ch. 113, SLA 1972 apply to it pursuant to the authority granted in Section 4, ch. 113, SLA 1972.
>
> or
>
> * Sec. 6. (a) The provisions of this Act do not apply to city or borough school boards in any city or borough which has rejected having the provisions of ch. 113, SLA 1972 apply to it pursuant to the authority granted in Section 4, ch. 113, SLA 1972, if that city or borough has adopted local provisions for collective bargaining with its public employees and those local provisions are made applicable to the school board within 120 days following the effective date of this Act.
>
> and

B. To deal with the problem of newly created political subdivisions which did not have the opportunity to opt-out of PERA in 1972:

(b) The provisions of this Act apply to regional educational attendance areas and other political subdivisions created after the effective date of ch. 113, SLA 1972, unless, within 120 days following the effective date of this Act, the governing body of a regional educational attendance area or other political subdivision created after the effective date of ch. 113, SLA 1972 rejects by ordinance or resolution, as appropriate, having the provisions of this Act and the provisions of ch. 113, SLA 1972 apply to it.

or

(b) The provisions of this Act apply to regional educational attendance areas and other political subdivisions created after the effective date of ch. 113, SLA 1972, unless, within 120 days following the effective date of this Act, the governing body of a regional educational attendance area or other political subdivision created after the effective date of ch. 113, SLA 1972 rejects by ordinance or resolution, as appropriate, having the provisions of this Act and the provisions of ch. 113, SLA 1972 apply to it and also adopts local provisions establishing rights and procedures for bargaining collectively with its classified employees.

On behalf of our school district clients, I thank you for this opportunity to present our comments on SB 213.

Sincerely yours,

JOSEPHSON, TRICKEY & LORENSEN, INC.

RE: Senate Bill 213.

Dear Honorable Sir:

Public Employees' Local 71 AFL-CIO, wishes to express to you and the Committee our position on the above referenced Bill.

The Bill does three (3) basic things, in changing the present law.

1. It adds the "No representation" on the initial election, which we do not oppose.

2. It exempts, non-certificated (classified employees) employees, from class 2 status. We do not oppose.

3. It includes non-certificated employees (classified employees) to the definition clause of employees as well as adding to the definition clause of employers school district. We do not oppose.

With respect to item #3 we strongly support the inclusion of such a school employee in the act. We strongly believe that the U. S. Constitution allows for people to gather together in some form of an organization, for the betterment and mutual protection of themselves. It is not fair to allow these public employees to remain on the back burner of Labor Relations any longer.

We request that your Committee give this Bill a full hearing, which I will desire to testify at, as soon as possible.

Please inform the undersigned of your intentions.

Sincerely,

Ken Spray

958 Cowles—Room 261
Fairbanks, Alaska 99701 (907) 452-2023

14 November 1979

Senator Glen Hackney
1136 Sunset Drive
Fairbanks, Alaska 99701

Dear Senator Hackney:

During the first session of the Eleventh Legislature, SB 213 was introduced and assigned to the Senate HESS Committee. This bill is extremely important to all noncertificated employees of school districts in the State of Alaska. SB 213, if passed, would amend the Public Employment Relations Act to include a group of employees not now covered by the Act.

The intent of PERA was to create an orderly process by which public employees could collectively resolve problems. The law provides for a problem-solving mechanism which results in acceptable agreements. The law also defines unfair labor practices and provides the mechanism for resolving such charges. Under PERA, finality to the bargaining process is provided either through binding arbitration or the right to strike.

Noncertificated school district employees do not have the above provisions of the law available to them and therefore are placed in a "collective begging" position as opposed to collective bargaining.

We respectfully request that during the second session of the Elevent Legislature you, as chairperson of the Senate HESS Committee, schedule SB 213 for committee hearings and ultimately out of committee for Senate floor action. It does not seem equitable to us that this small group of public employees remain outside the statutory provisions of PERA for purposes of collective bargaining.

Although we may not share similar philosophies as they relate to public sector bargaining, I am sure you can understand the frustration, anger and low morale we experience as a result of not being recognized statutorily as are most other public employees.

Hopefully we can cooperate for the purpose of getting SB 213 on the floor of the Senate for the consideration of all Senators.

We are eager to receive your reply. I am available should you wish to consult with me at any time.

Sincerely,

H. Frank Belts

CITY AND BOROUGH OF JUNEAU SCHOOL DISTRICT
P.O. BOX 808 • DOUGLAS, ALASKA 99824

April 16, 1980

The Honorable Glenn Hackney, Chairman
Senate Health, Education and Social Services Committee
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney and Committee:

The Juneau School District wishes to submit this letter as part of the testimony to House Bill 213. We would like to go on record as being opposed to the Bill as being unnecessary legislation. At the present time our District does negotiate with our non-certificated employees. If this does become legislation we feel that there should be language in the Bill that would allow us the option of coming under the Labor Relations Ordinance of the Juneau Borough. It is our position that if all public employees must come under a labor relations act, we should be under the Borough Act (Ordinance) as they are the legislative body that we must submit our budgets to for fiscal approval. They believe that our salaries and fringe benefits, etc. should more closely parallel theirs instead of being modeled after the State.

We thank you for your consideration in this matter.

Sincerely,

Donald L. MacKinnon

Donald L. MacKinnon

March 26, 1980

Senator Glenn Hackney
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Senator Hackney:

Public employees for the State of Alaska all have the right to negotiate for wages and benefits except one group. That group is the classified employees of the school districts. Our organization feels that this is extremely unfair and requests your support for Senate Bill Number 213. This bill would correct that injustice.

This bill is presently in the HESS Committee awaiting action. Since you are the Chairman of that committee we respectfully request your support in getting the bill cleared from committee and passed on the Senate floor. These employees deserve that same right that other employees have and hope you will help.

Thank you for your time and consideration and if we can be of any assistance to you please don't hesitate to ask.

Sincerely,

Gene Kubina

Eugene G. Kubina

Bill No. Senate Bill 213 Date April 16, 1980

Title "An Act relating to labor relations between school boards and other public employers and their employees."

Contact: Judy DuBois
465-2700
Dale Cheek
465-4870

This legislation would make it mandatory for all school boards to permit their non-certificated employees to enter into collective bargaining and they would be covered by the Public Employment Relations Act (PERA). This bill would cover persons that have been barred from entering into collective bargaining under present law. The Department of Labor acts as the Labor Relations Agency for all public employees except State employees and would have to take on the added duties for these employees to conduct elections, hold hearings and settle grievances throughout the state.

Section 1. AS 23.40.100(b) makes it mandatory that "no representation" be placed on the initial election ballots, for election ballots, for elections conducted under the Public Employment Relation Act.

Section 2. AS 23.40.200(c) permits non-certificated employees of school boards to engage in a strike. They will be covered in Class 3.

Section 3. AS 23.40.250(5) takes away the exemption for non-certificated school board employees.

Section 4. AS 23.40.250(6) makes a school board a public employer under PERA.

Section 5. AS 23.40.250 defines school board for PERA.

Section 6. Makes it mandatory for school board to permit their non-certificated employees to enter into collective bargaining covered by the Public Employment Relations Act.

Section 7. Any collective bargaining agreement already entered into are not covered by these laws.

Collective bargaining in the public sector is complicated and unique field of labor law. Our experience as the Labor Relations Agency for all public employees, except State of Alaska employees, over the past fiscal year shows that the Wage and Hour Division devoted one half of a position to that function. This involved nine separate community of interests groups in the City of Fairbanks, the North Star Borough, and the City of Kodiak for a total of approximately 400 employees.

We have ascertained that there are 52 school districts within the State of Alaska (including REAA's). We are only able to identify four of those districts who are presently organized or who have a collective bargaining agreement with a union or an association. Those are Fairbanks, Kenai, Juneau, and Anchorage with a total of approximately 1,100 non-certificated employees.

POSITION PAPER/Department of Labor

POSITION PAPER CONTINUED:

So the Department of Labor can expect to be acting as the Labor Relations Agency for 48 separate school districts involving 2,400 employees. In the upcoming fiscal year the Wage and Hour Division could be monitoring elections in 48 separate school districts, or holding hearings to settle grievances on unfair labor practice charges throughout the State.

A Fiscal Note has been submitted.

PROPOSED AMENDMENTS SB 213

Page 2 Section 2---Delete entirely. Renumber the following sections accordingly.

Page 3 Section 5 (formerly 6) amend to Section 5 (a) Notwithstanding sec.4, ch. 113, SLA 1972, and subject to (b) of this section. A school board, including a regional educational attendance area school board, may not reject having the provisions of the Public Employment Relations Act apply to its relations with its noncertificated employees unless the qualified voters within the school district vote in favor of rejection at a special or general election conducted within ninety (90) days of the effective date of this Act.

(b) A regional educational attendance area school board may reject having the provisions of the Public Employment Relations Act apply to its relations with its noncertificated employees until July 1, 1983 without a vote of the qualified voters within the school district if the school board adopts a resolution providing for such rejection within ninety (90) days of the effective date of this act. A regional educational attendance area school board may extend the period of its rejection of the Public Employment Relations Act under this subsection for an additional period of two (2) years if the school board adopts a resolution providing for such an extension between April 1, 1983 and June 30, 1983.

MEMO

SEN. HACKNEY
RE: SB 213 -- PROPOSED AMENDMENTS

RON LORENSON, VAN HOUTE, IOLA SMITH ALL FAVOR DELETING SECTION 2:

THE OTHER PROBLEM AREA IS SECTION 6. THE PROBLEM WITH THIS SECTION IS THAT IT WOULD REQUIRE EVERY SCHOOL BOARD (INCLUDING REAAs) TO BARGAIN WITH THEIR "NON-CERTIFIED" PEOPLE UNDER PERA, EVEN IF THE MUNI HAD opted-out FROM UNDER PERA. LORENSON'S language suggest exempting Muni's from the provision of SECTION 6 if the MUNI has opted-out FROM UNDER PERA. VAN HOUTE doesn't RECOMMEND CHANGING THIS.

REGARDING REAAs, RON'S LANGUAGE suggest giving THE REAAs 120 days to decide WHETHER TO COME UNDER SECTION 6. VAN HOUTE/IOLA SMITH'S AMENDMENT would give THE REAAs 90 days to decide WHETHER THEY WANTED to opt-out from UNDER PERA for three YEARS, but after the three YEARS they would be put BACK UNDER PERA.

SEE ATTACHMENTS

ADDED 2 YR. OPT OUT BY VOTE OF REAA

Paul

5-8-80 [illegible]

and subject to ~~subsection~~ (b) of this section,

* Sec. ~~5~~ (c). Notwithstanding sec. 4, ch. 113, SLA 1972, a school board, including a regional educational attendance area school board, may not reject having the provisions of the Public Employment Relations Act apply to its relations with its noncertificated employees unless the qualified voters within the school district vote in favor of rejection at a special or general election conducted within 120 days of the effective date of this Act.

(b) A regional educational attendance area school board ~~may~~ may reject having the provisions of the Public Employment Relations Act apply to its relations with its noncertificated employees ~~for a period of three school years~~ until July 1, 1983 without a vote of the qualified voters within the school district if the school board adopts a resolution providing for such rejection within 90 days of the effective date of this Act. A regional educational attendance area school board may extend the period of its rejection of the Public Employment Relations Act under this subsection for an additional period of two years if the school board adopts a resolution providing for ~~such extension of such rejection~~ such an extension ~~within 90 days~~ of between April 15, 1983 and June 30, 1983 ~~preceding the expiration~~.

AMENDMENT TO S. B. 213

April 29, 1980

VAN HOUTE'S

Sec. 5 P. 3 Line 9: ???? if Sec 2 eliminated.

Add after employees a new sentence to read:

Except that an R. E. A. A. board may, by a vote taken within ninety (90) days of the effective date of this act, exempt the regional school district from the provisions of this act for a period of ~~time not to exceed three (3) years~~. 2 years maybe granted by a vote of the REAA Board.

Re: SB 213, Labor Relations Between
School Boards and Their Employees

Dear Senator Hackney:

This is a follow-up to my oral presentation before your committee on Wednesday, April 16, 1980 on the above-referenced bill. As I indicated at the hearing, our law firm represents a number of school districts around the state.

My concerns regarding SB 213 are twofold. First, assuming that it is determined that classified employees of school districts should be included within the scope of the Public Employment Relations Act (PERA), I question the necessity or advisability of moving that group of employees out of the category of public employees which is authorized to engage in strikes only for limited periods of time (i.e., so long as the strike action does not affect the health, safety or welfare of the public) and placing them into the broader classification of public employees who are authorized to strike for unlimited periods of time, regardless of the effect the strike may have on the general public.

The primary function of school boards is, of course, to educate children and that would become an extraordinarily difficult task to achieve if a district's classified employees (e.g., teacher aides, cafeteria employees, and janitorial and maintenance employees) chose to stay off the job during the school year. Consequently, if the committee does decide that classified employees of school districts should be included within PERA, I would at least urge the committee to delete the present Section 2 of SB 213 so that this group of employees would remain classed as a part of category two employees for the purpose of striking. Even more appropriate, however, would seem to be placing school district classified employees into that class of employees which may not strike for any period of time (class one), since, at least as the bill is currently drafted, PERA will be mandatorily imposed upon school districts.

My second concern regarding proposed SB 213 relates to Section 6 of the bill. Section 6 has the clear effect of requiring every school board in the state, including the Regional Educational Attendance Areas, to bargain with their classified employees under PERA. As presently worded, Section 6 would not permit any district in the state to opt-out of coverage under PERA, even though when PERA was first adopted a provision was specifically incorporated in it to permit any municipality in the state to reject having the provisions of PERA apply. A number of municipalities exercised that opt-out provision.

As a result, the employment relationship between certain municipalities in the state and their public employees is not governed by PERA. Instead, that employment relationship is governed either by a local bargaining ordinance (for example, both Juneau and Anchorage have such local ordinances) or by no local bargaining provisions whatsoever. If SB 213 were adopted with Section 6 as it now reads, classified employees of school boards in those municipalities which had rejected PERA would end up being treated differently than other public employees in the same municipality. Further, newly created political subdivisions of the state, such as the REAAs, which were not in existence when PERA was first adopted, would, under Section 6 of SB 213, be denied the same opportunity to reject application to them of PERA which the Legislature initially extended to those local government entities in existence at the time PERA was adopted.

The following are proposed alternate versions of language which might be adopted by the committee to deal with the opt-out question discussed above:

A. To deal with the problem of school districts in cities and boroughs which have already opted out of PERA:

> * Sec. 6. (a) The provisions of this Act do not apply to city or borough school boards in any city or borough which has rejected having the provisions of ch. 113, SLA 1972 apply to it pursuant to the authority granted in Section 4, ch. 113, SLA 1972.
>
> or
>
> * Sec. 6. (a) The provisions of this Act do not apply to city or borough school boards in any city or borough which has rejected having the provisions of ch. 113, SLA 1972 apply to it pursuant to the authority granted in Section 4, ch. 113, SLA 1972, if that city or borough has adopted local provisions for collective bargaining with its public employees and those local provisions are made applicable to the school board within 120 days following the effective date of this Act.
>
> and

B. To deal with the problem of newly created political subdivisions which did not have the opportunity to opt-out of PERA in 1972:

(b) The provisions of this Act apply to regional educational attendance areas and other political subdivisions created after the effective date of ch. 113, SLA 1972, unless, within 120 days following the effective date of this Act, the governing body of a regional educational attendance area or other political subdivision created after the effective date of ch. 113, SLA 1972 rejects by ordinance or resolution, as appropriate, having the provisions of this Act and the provisions of ch. 113, SLA 1972 apply to it.

or

(b) The provisions of this Act apply to regional educational attendance areas and other political subdivisions created after the effective date of ch. 113, SLA 1972, unless, within 120 days following the effective date of this Act, the governing body of a regional educational attendance area or other political subdivision created after the effective date of ch. 113, SLA 1972 rejects by ordinance or resolution, as appropriate, having the provisions of this Act and the provisions of ch. 113, SLA 1972 apply to it and also adopts local provisions establishing rights and procedures for bargaining collectively with its classified employees.

On behalf of our school district clients, I thank you for this opportunity to present our comments on SB 213.

Sincerely yours,

JOSEPHSON, TRICKEY & LORENSEN, INC.

By: Ronald W. Lorensen

Introduced: 2/13/79
Referred: Health, Education & Social Services and Finance

IN THE SENATE BY BENNETT BY REQUEST

SENATE BILL NO. 213

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to labor relations between school boards and other public employers and their employees."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 23.40.100(b) is amended to read:

(b) If the labor relations agency has reasonable cause to believe that a question of representation exists, it shall provide for an appropriate hearing upon due notice. If the labor relations agency finds that there is a question of representation, it shall direct an election by secret ballot to determine whether or by which organization the employees desire to be represented and shall certify the results of the election. Nothing in this section prohibits the waiving of hearings by stipulation for the purpose of a consent election in conformity with the regulations of the labor relations agency or an election in a bargaining unit agreed upon by the parties. The labor relations agency shall determine who is eligible to vote in an election and shall establish rules governing the election. <u>In an initial election for representation held under this section, one of the choices on the ballot shall be "no representation".</u> In an election in which none of the choices on the ballot receives a majority of the votes cast, a runoff election shall be conducted, the ballot providing for selection between the two choices receiving the largest and the second largest number of valid votes cast in the election. If an organization receives the majority of the votes cast in the election it shall be certified by the labor relations agency as exclusive representative of all the employees in the bargaining unit.

* Sec. 2. AS 23.40.200(c) is amended to read:

(c) The class in (a)(2) of this section is composed of public utility, snow removal, sanitation, and [PUBLIC SCHOOL AND OTHER] educational institution employees, except noncertificated employees of school boards. Employees in this class may engage in a strike after mediation, subject to the voting requirement of (d) of this section, for a limited time. The limit is determined by the interests of the health, safety or welfare of the public. The public employer or the labor relations agency may apply to the superior court in the judicial district in which the strike is occurring for an order enjoining the strike. A strike may not be enjoined unless it can be shown that it has begun to threaten the health, safety or welfare of the public. A court, in deciding whether or not to enjoin the strike, shall consider the total equities in the particular class. "Total equities" includes not only the impact of a strike on the public but also the extent to which employee organizations and public employers have met their statutory obligations. If an impasse or deadlock still exists after the issuance of an injunction, the parties shall submit to arbitration to be carried out under AS 09.43.-030.

* Sec. 3. AS 23.40.250(5) is amended to read:

(5) "public employee" means any employee of a public employer, whether or not in the classified service of the public employer, except elected or appointed officials or certificated [TEACHERS OR NONCERTIFICATED] employees of school boards [DISTRICTS];

* Sec. 4. AS 23.40.250(6) is amended to read:

(6) "public employer" means the state or a political subdivision of the state, including without limitation, a town, city, borough, district, school board, board of regents, public and quasi-public corporation, housing authority or other authority established by

law, and a person designated by the public employer to act in its interest in dealing with public employees;

* Sec. 5. AS 23.40.250 is amended by adding a new paragraph to read:

(8) "school board" includes a regional educational attendance area school board.

* Sec. 6. Notwithstanding sec. 4, ch. 113, SLA 1972, a school board, including a regional educational attendance area school board, may not reject having the provisions of the Public Employment Relations Act apply to its relations with its noncertificated employees.

* Sec. 7. Nothing in this Act terminates or modifies a collective bargaining unit, recognition of exclusive bargaining representative, or collective bargaining agreement if the unit, recognition, or agreement is in effect on the effective date of this Act.

UNLESS A VOTE OF THE PEOPLE EXPRESSED THROUGH A SPECIAL ELECTION (OR GENERAL ELECTION?) INDICATES A DESIRE NOT TO DO SO.

Re: SB 213, Labor Relations Between
School Boards and Their Employees

Dear Senator Hackney:

In response to a request by your office, I would propose the following language be used in SB 213 to deal with the question of a school board's ability to opt-out of PERA coverage for its non-certificated employees:

> * Sec. 5. Notwithstanding sec. 4, ch. 113, SLA 1972, a school board, including a regional educational attendance area school board, may not reject having the provisions of the Public Employment Relations Act apply to its relations with its noncertificated employees unless the qualified voters within the school district vote in favor of rejection at a special or general election conducted within 120 days of the effective date of this Act.

On behalf of our school district clients, I thank you for this opportunity to present our comments on SB 213.

Sincerely yours,

JOSEPHSON, TRICKEY & LORENSEN, INC.

By: Ronald W. Lorensen

RWL:jf

VETERINARIAN BOARD

Sec. 1 -- 08.01.100(a) Provides "exception" to current statute which renews licenses bienally and allows our "health boards" to renew licenses every four years.

Sec. 2 -- 08.98.010 Changes board's composition - Increases number of members from three to five consisting of four veterinarians and one public member.

Sec. 3 -- 08.98.020 Provides for members to serve "staggered" terms of four years and limits board membership to two successive four year terms.

Sec. 4 -- 08.98.025 Allows for "removal of board members".

Sec. 5 -- 08.98.040 Increases number of annual meetings from one to three and adds language defining a "quorum" as a "majority of board members" and provides for "a majority vote of those present" to represent the decision of the board.

Sec. 6 -- Board's "powers and duties" section is reenacted deleting reference to grounds for revocation/suspension of license (so that it will appear in our "grounds for imposition of disciplinary sanctions" section similar to our other health board bills) and provides for the board to:

- -- adopt regulations to safisfy our "continued competency" requirement
- -- prepare an annual report discussing board's activities
- -- collect data and monitor standards/availability of veterinary services
- -- establish education/training/examination for veterinary technicians

Sec. 7 -- Allows those with "temporary permits" to practice veterinary medicine and provides for veterinary technicians to perform certain functions as prescribed in regulation.

Sec. 8 -- Under "content of examination" the various subject categories are deleted and provides for the following to be incorporated into the exam administered by the board:

1. National Exam;
2. practical skills exam;
3. demonstration of practical skills.

Sec. 9 -- Establishes criteria to be qualified for licensure--specifically adds language requiring the applicant to have no disciplinary santions pending against him and exempting the applicant from taking the National Exam if he passed it within the past five years or has been in active practice within five of the past seven years.

Sec. 10 -- Provides for a "temporary license" to be issued to applicant until results of examination are published.

Sec. 11 -- "Licensure by credential" section. Also provides for issuance of temporary permit.

Sec. 12 -- FEES

Sec. 13 -- "Grounds for imposition of disciplinary sanction" section

Sec. 14 -- Definitions: "accredited veterinary school", "animal", "practice of veterinary medicine", "veterinary technician".

Sec. 15 -- Brings board under "administrative adjudication" section of the Administrative Procedures Act.

Sec. 16 -- Repealers

Sec. 17 -- Effective date

WO#8519
Cook

IN THE SENATE

BY THE HEALTH, EDUCATION AND SOCIAL SERVICES COMMITTEE

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to professional licensing and to the regulation of veterinarians; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.100(a) is amended to read:

(a) Except as otherwise provided by statute, [ALL] licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

* Sec. 2. AS 08.98.010 is repealed and re-enacted to read:

Sec. 08.98.010. CREATION AND MEMBERSHIP OF THE BOARD. There is created the Board of Veterinary Examiners composed of five members appointed by the governor and approved by the legislature. Four members shall be licensed veterinarians who have been in active practice in the state for at least five years preceding appointment and one shall be a public member. No person may serve on the board who is, or was during the two years immediately preceding appointment, a member of a faculty, board of trustees, or advisory board of a veterinary school.

* Sec. 3. AS 08.98.020 is repealed and re-enacted to read:

Sec. 08.98.020. TERM OF OFFICE. Members of the board shall serve staggered terms of four years or until their successors are appointed and confirmed. Appointments for vacancies shall be for the unexpired term. A person who has served two successive complete terms may not be reappointed until four years from the expiration of the last term.

* Sec. 4. AS 08.98 is amended by adding a new section to read:

Sec. 08.98.025. REMOVAL OF BOARD MEMBERS. The governor may remove a member of the board for cause. The board may provide by regulation that unexcused absences from meetings constitute cause for removal.

* Sec. 5. AS 08.98.040 is amended to read:

Sec. 08.98.040. BOARD MEETINGS. The board shall hold <u>at least three annual meetings</u> [A REGULAR ANNUAL MEETING]. The board may hold special meetings at the call of the chairman <u>or of a majority of the members</u> [WITH PRIOR APPROVAL OF THE GOVERNOR]. <u>A majority of board members constitutes a quorum and a majority vote of those present is the decision of the board.</u>

* Sec. 6. AS 08.98.050 is repealed and re-enacted to read:

Sec. 08.98.050. POWERS AND DUTIES OF THE BOARD. (a) The board shall

(1) establish examination requirements for eligible applicants for licensure to practice veterinary medicine;

(2) approve the issuance of licenses to qualified applicants;

(3) establish standards for the practice of veterinary medicine by regulation;

(4) adopt regulations requiring proof of continued competency before a license is renewed;

(5) prepare and submit an annual report to the department containing information concerning board activities, the number of examinations held, the number of applicants for examination, the number of persons who pass and the number who fail each examination, financial data, including receipts and expenditures, and other information which the department may require;

(6) monitor the standards and availability of veterinary services provided in the state and report its findings to the department;

(7) collect data and submit records to the department concern-

ing the practice of veterinary medicine by veterinary technicians in the state;

(8) establish, by regulation, educational and training requirements for the delegation of duties by veterinarians licensed under this chapter to veterinary technicians.

(b) The board may

(1) establish examination and registration requirements for veterinary technicians;

(2) adopt regulations or do any act necessary to carry out its duties under this chapter.

* Sec. 7. AS 08.98.120 is amended to read:

Sec. 08.98.120. LICENSE REQUIRED. No person may practice veterinary medicine, surgery, or dentistry unless he is licensed under this chapter or has a temporary permit, except that a veterinary technician may perform functions authorized by regulation of the board.

* Sec. 8. 08.98.140 is amended to read:

Sec. 08.98.140. CONTENT OF EXAMINATION. (a) The examination shall be in [VETERINARY ANATOMY, SURGERY, MEDICINE, OBSTETRICS, PATHOLOGY, CHEMISTRY, DIAGNOSIS, MATERIA MEDICA, THERAPEUTICS, PHYSIOLOGY, SANITARY MEDICINE, DENTISTRY, AND OTHER SCIENTIFIC] subjects related to the practice of veterinary medicine, surgery, and dentistry and shall include

(1) the examination prepared by the National Board of Veterinary Medical Examiners or other national veterinary examination determined to be acceptable by the board; and

(2) a standardized written examination covering practical skills.

(b) The board may demand a practical demonstration of skills.

* Sec. 9. AS 08.98 is amended by adding a new section to read:

Sec. 08.98.165. QUALIFICATION FOR LICENSE. (a) An applicant is qualified to receive a license as a veterinarian who

(1) is a graduate of an accredited veterinary school or who has passed the examination of the American Veterinary Association's Education Commission for Foreign Veterinary Graduates;

(2) has passed an examination prepared by the National Board of Veterinary Medical Examiners or an equivalent examination as determined by the board, or qualifies for an exemption under (b) of this section;

(3) has passed the written examination of the state;

(4) has passed a practical examination of skills, if required by the board; and

(5) has no disciplinary proceeding, unresolved complaint, or professional association review proceeding pending at the time a license is to be issued, and has not had a veterinarian license revoked for cause in another jurisdiction.

(b) An applicant is exempted from taking the examination required under (a)(2) of this section if he furnishes proof acceptable to the board that he has passed the examination prepared by the National Board of Veterinary Medical Examiners or an equivalent examination within the five years before application, or has been in active practice of veterinary medicine for five of the seven years before application in another state, territory, or country with licensing requirements substantially similar to or higher than those of this state which were in effect at the time the applicant obtained his license in the other jurisdiction.

Sec. 10. AS 08.98.180 is amended to read:

Sec. 08.98.180. TEMPORARY LICENSE. A person who meets the requirements of AS 08.98.165(a)(1) and (5) [AS 08.98.170] is entitled to be temporarily licensed after completing the examinations prior to [illegible]

98.165(a)(3) and (4) and after completing the examination required under AS 08.98.165(a)(2) or qualifying for an exemption to it. A license issued under this section is valid until the results of the examinations [EXAMINATION FOLLOWING THE ISSUANCE OF THE LICENSE] are published. No person may receive more than one temporary license [UNDER THIS SECTION].

* Sec. 11. AS 08.98 is amended by adding new sections to read:

Sec. 08.98.184. LICENSURE BY CREDENTIALS. The board shall approve the issuance of a license to an applicant who holds a valid license to practice veterinary medicine in another state, territory, or country with licensing requirements substantially similary to or higher than those of this state which were in effect at the time the applicant obtained his license in the other jurisdiction if the applicant

(1) has graduated from an accredited school of veterinary medicine or has successfully passed the examination of the American Veterinary Association's Education Commission for Foreign Veterinary Graduates;

(2) has been engaged in the active practice of veterinary medicine in the previous licensing jurisdiction for at least five of the seven years before filing the application;

(3) has not failed the state written or practical examination;

(4) has no disciplinary proceeding, unresolved complaints, or professional association review proceedings pending at the time a license is to be issued, and has not had a veterinarian license revoked for cause in another jurisdiction; and

(5) has paid required fees.

Sec. 08.98.186. TEMPORARY PERMIT. A person licensed to practice veterinary medicine in another state who meets the requirements of AS 08.98.165(a)(2) and (5) may be granted a temporary permit by the board

the practice of a person licensed in the state who is absent from his practice. An application shall be signed by the person who is or will be absent from his practice and by the applicant. A temporary permit is valid for no longer than 60 days after issuance but may be renewed.

* Sec. 12. AS 08.98.190 is repealed and re-enacted to read:

Sec. 08.98.190. FEES. The following fees are imposed as applicable:

(1)	application fee	$ 25
(2)	examination fee	$ 50
(3)	fee for investigation of credentials	$ 50
(4)	license fee	$200
(5)	renewal of license fee due every four years	$200
(6)	temporary license fee	$ 50
(7)	temporary permit fee	$ 50

* Sec. 13. AS 08.98 is amended by adding new sections to article 3 to read:

Sec. 08.98.235. GROUNDS FOR IMPOSITION OF DISCIPLINARY SANCTIONS. After a hearing, the board may impose a disciplinary sanction on a person licensed under this chapter when the board finds that he

(1) secured a license through deceit, fraud, or intentional misrepresentation;

(2) engaged in deceit, fraud, or intentional misrepresentation in the course of providing professional services or engaging in professional activities;

(3) advertised professional services in a false or misleading manner;

(4) has been convicted of a felony or other crime which affects his ability to continue to practice competently and safely;

(5) intentionally or negligently engaged in or permitted the

performance of animal care by persons under his supervision which does not conform to minimum professional standards regardless of whether actual injury to the animal occurred;

(6) failed to comply with this chapter, with a regulation adopted under this chapter, or with an order of the board;

(7) continued to practice after becoming unfit due to

(A) professional incompetence;

(B) failure to keep informed of or use current professional theories or practices;

(C) addiction or severe dependency on alcohol or other drugs which impairs his ability to practice safely;

(D) physical or mental disability;

(8) engaged in lewd or immoral conduct in connection with the delivery of professional service.

Sec. 08.98.240. DISCIPLINARY SANCTIONS. (a) When it finds that a licensee is guilty of an offense under AS 08.98.235, the board may impose the following sanctions singly or in combination:

(1) permanently revoke a license to practice;

(2) suspend a license for a determinate period of time;

(3) censure a licensee;

(4) issue a letter of reprimand;

(5) place a licensee on probationary status and require him to

(A) report regularly to the board upon matters involving the basis of probation;

(B) limit practice to those areas prescribed;

(C) continue professional education until a satisfactory degree of skill has been attained in those areas determined by the board to need improvement;

(6) impose limitations or conditions on the practice of a

licensee.

(b) The board may withdraw probation status if it finds that the deficiencies which required the sanction have been remedied.

(c) The board may summarily suspend a license before final hearing or during the appeals process if the board finds that the licensee poses a clear and immediate danger to the public health and safety if he continues to practice. A person whose license is suspended under this section shall be entitled to a hearing by the board no later than seven days after the effective date of the order. The person may appeal the suspension after a hearing to a court of competent jurisdiction.

(d) The board may reinstate a license which has been suspended or revoked if the board finds after a hearing that the applicant is able to practice with skill and safety.

(e) The board shall seek consistency in the application of disciplinary sanctions, and significant departure from prior decisions involving similar situations shall be explained in findings of fact or orders.

* Sec. 14. AS 08.98.250 is amended by adding new paragraphs to read:

(4) "accredited veterinary school" means a veterinary college or division of a university or college that offers the degree of Doctor of Veterinary Medicine, or its equivalent as determined by the board, and conforms to the standards required for accreditation by the American Veterinary Medical Association;

(5) "animal" means any animal other than a human being including mammals, birds, fish, and reptiles, wild or domestic, living or dead;

(6) "practice of veterinary medicine"

(A) means for compensation

(i) to diagnose, treat, correct, change, relieve,

or prevent animal disease, deformity, defect, injury, or other physical or mental condition, including the prescription or administration of a drug, biologic apparatus, anesthetic, or other therapeutic or diagnostic substance;

(ii) to use a manual or mechanical procedure for testing for pregnancy or correcting sterility or infertility; or

(iii) to render advice or recommendation with regard to any matter listed in (i) or (ii) of this subparagraph;

(B) to represent, directly or indirectly, publicly or privately, an ability or willingness to do any act in (A) of this paragraph for compensation;

(C) to use a title, abbreviation, or letters in a manner or under circumstances which induce the belief that the person using them is qualified to do any act in (A) of this paragraph whether or not for compensation;

(D) does not include, whether or not for compensation, artificial insemination, the representation of an ability or willingness to perform artificial insemination, the rendering of advice or recommendation with regard to artificial insemination, the use of a title, abbreviation, or letters in a manner or under circumstances which induces the belief that the person using them is qualified to perform artificial insemination;

(7) "veterinary technician" means a person who performs functions delegated by a veterinarian licensed under this chapter in accordance with regulations adopted by the board.

* Sec. 15. AS 44.62.330(a) is amended by adding a new paragraph to read:

(47) Board of Veterinary Examiners (AS 08.98.010).

* Sec. 16. AS 08.98.030, 08.98.060, 08.98.130, 08.98.170, 08.98.210, [illegible], and 08.98.250(1) are repealed.

* Sec. 17. This Act takes effect immediately in accordance with AS 01.10.-070(c).

Dear Senator Hackney
for your file
Postal cost of these copies

1-8 pages
1-2 pages

Dear Senator Hackney,

Recently you received a letter from Iola Harris, President of the C.P.O. in Fairbanks concerning SB 213.

In that letter, she spoke to possible amendments to SB 213. We agree w/ Mrs. Harris & lend our support to her suggestions.

We are also concerned about the "opt-in, opt-out" possibility. If SB 213 is amended to inflict that, it would offer nothing to the classified employees - especially to those employees who have been denied the right of collective bargaining. There are groups in this category such as the NUGGET Assoc of Mat-Su as we heard in testimony on April 16 from Linda Meyers, Pres of that group.

We hope that SB 213 will be passed in a form that all parties can accept. Thank you for the opportunity to speak to this bill.

Alicia Gold, President, TOTEM Assoc.
Anchorage

The Honorable Glenn Hackney
State Senator
Chairman, Senate Health, Education
and Social Services Committee
Pouch V
Juneau, Alaska 99811

Re: SB 213, Labor Relations Between School Boards and Their Employees

Dear Senator Hackney:

This is a follow-up to my oral presentation before your committee on Wednesday, April 16, 1980 on the above-referenced bill. As I indicated at the hearing, our law firm represents a number of school districts around the state.

My concerns regarding SB 213 are twofold. First, assuming that it is determined that classified employees of school districts should be included within the scope of the Public Employment Relations Act (PERA), I question the necessity or advisability of moving that group of employees out of the category of public employees which is authorized to engage in strikes only for limited periods of time (i.e., so long as the strike action does not affect the health, safety or welfare of the public) and placing them into the broader classification of public employees who are authorized to strike for unlimited periods of time, regardless of the effect the strike may have on the general public.

The primary function of school boards is, of course, to educate children and that would become an extraordinarily difficult task to achieve if a district's classified employees (e.g., teacher aides, cafeteria employees, and janitorial and maintenance employees) chose to stay off the job during the school year. Consequently, if the committee does decide that classified employees of school districts should be included within PERA, I would at least urge the committee to delete the present Section 2 of SB 213 so that this group of employees would remain classed as a part of category two employees for the purpose of striking. Even more appropriate, however, would seem to be placing school district classified employees into that class of employees which may not strike for any period of time (class one), since, at least as the bill is currently drafted, PERA will be mandatorily imposed upon school districts.

My second concern regarding proposed SB 213 relates to Section 6 of the bill. Section 6 has the clear effect of requiring every school board in the state, including the Regional Educational Attendance Areas, to bargain with their classified employees under PERA. As presently worded, Section 6 would not permit any district in the state to opt-out of coverage under PERA, even though when PERA was first adopted a provision was specifically incorporated in it to permit any municipality in the state to reject having the provisions of PERA apply. A number of municipalities exercised that opt-out provision.

As a result, the employment relationship between certain municipalities in the state and their public employees is not governed by PERA. Instead, that employment relationship is governed either by a local bargaining ordinance (for example, both Juneau and Anchorage have such local ordinances) or by no local bargaining provisions whatsoever. If SB 213 were adopted with Section 6 as it now reads, classified employees of school boards in those municipalities which had rejected PERA would end up being treated differently than other public employees in the same municipality. Further, newly created political subdivisions of the state, such as the REAAs, which were not in existence when PERA was first adopted, would, under Section 6 of SB 213, be denied the same opportunity to reject application to them of PERA which the Legislature initially extended to those local government entities in existence at the time PERA was adopted.

The following are proposed alternate versions of language which might be adopted by the committee to deal with the opt-out question discussed above:

A. To deal with the problem of school districts in cities and boroughs which have already opted out of PERA:

> * Sec. 6. (a) The provisions of this Act do not apply to city or borough school boards in any city or borough which has rejected having the provisions of ch. 113, SLA 1972 apply to it pursuant to the authority granted in Section 4, ch. 113, SLA 1972.
>
> or
>
> * Sec. 6. (a) The provisions of this Act do not apply to city or borough school boards in any city or borough which has rejected having the provisions of ch. 113, SLA 1972 apply to it pursuant to the authority granted in Section 4, ch. 113, SLA 1972, if that city or borough has adopted local provisions for collective bargaining with its public employees and those local provisions are made applicable to the school board within 120 days following the effective date of this Act.
>
> and

B. To deal with the problem of newly created political subdivisions which did not have the opportunity to opt-out of PERA in 1972:

(b) The provisions of this Act apply to regional educational attendance areas and other political subdivisions created after the effective date of ch. 113, SLA 1972, unless, within 120 days following the effective date of this Act, the governing body of a regional educational attendance area or other political subdivision created after the effective date of ch. 113, SLA 1972 rejects by ordinance or resolution, as appropriate, having the provisions of this Act and the provisions of ch. 113, SLA 1972 apply to it.

or

(b) The provisions of this Act apply to regional educational attendance areas and other political subdivisions created after the effective date of ch. 113, SLA 1972, unless, within 120 days following the effective date of this Act, the governing body of a regional educational attendance area or other political subdivision created after the effective date of ch. 113, SLA 1972 rejects by ordinance or resolution, as appropriate, having the provisions of this Act and the provisions of ch. 113, SLA 1972 apply to it and also adopts local provisions establishing rights and procedures for bargaining collectively with its classified employees.

On behalf of our school district clients, I thank you for this opportunity to present our comments on SB 213.

Sincerely yours,

JOSEPHSON, TRICKEY & LORENSEN, INC.

I came to testify on Senate Bill 213 on Wednesday unaware that the hearing had been postponed until Monday. I therefore respectfully submit this testimony.

Eugene G. Kubina
President
Alaska Federation of Teachers
P.O. Box 1665
Valdez, Alaska 99686

Ref: SB 213

Senate Bill 213 would grant bargaining rights to the classified employees of the school districts. I understand that some school districts appose the bill as it stands. Their solution is to allow the districts who choose to opt out of the law. This would in effect kill any effectiveness the bill may have. If districts are given the opportunity to opt out of the law then it leaves these classified employees in the same status they are in now. Nothing is solved.

May I propose instead that the bill be binding on all districts but classify the employees catagory I. This would then prohibit these employees from striking but would require the school boards to discuss with them their working conditions. We are not looking for a bill that would give any advantage to these employees. The problem lies in the fact that several school districts refuse to discuss at all classified employees conditions of employment.

Thank you for your time and consideration.

Eugene G. Kubina
President, AFT

PROPOSED AMENDMENTS SB 213

Page 2 Section 2---Delete entirely. Renumber the following sections accordingly.

Page 3 Section 5 (formerly 6) amend to Section 5 (a) Notwithstanding sec.4, ch. 113,SLA 1972, and subject to (b) of this section. A school board, including a regional educational attendance area school board, may not reject having the provisions of the Public Employment Relations Act apply to its relations with its noncertificated employees unless the qualified voters within the school district vote in favor of rejection at a special or general election conducted within ninety (90) days of the effective date of this Act.
(b) A regional educational attendance area school board may reject having the provisions of the Public Employment Relations Act apply to its relations with its noncertificated employees until July 1, 1983 without a vote of the qualified voters within the school district if the school board adopts a resolution providing for such rejection within ninety (90) days of the effective date of this act. A regional educational attendance area school board may extend the period of its rejection of the Public Employment Relations Act under this subsection for an additional period of two (2) years if the school board adopts a resolution providing for such an extension between April 1, 1983 and June 30, 1983.

Alaska State Legislature

Senate

Rec'd 3-27-80 @ 3:4 P.M.

JUNEAU, ALASKA

March 27, 1980

TO: Senator Hackney, Chairman
Senate Health, Education &
Social Services Committee

FROM: Senator Ferguson

SUBJ: Dental Care

This is to state my support for the attached Approach #2 for dental care for the State of Alaska. I feel that both your concerns and my concerns would be met by this approach. Although the fiscal note for this approach is slightly larger than Approach #1, I feel this is compensated for by increased services.

$500,000 of the total costs of Approach #2 should be requested in the Supplemental Budget to ensure that this program will proceed on schedule. The rest of the money could be taken care of in any appropriate manner. The $500,000 in the supplemental will make sure that start-up care and the needs of the senior citizens will be met.

I have not requested this amount, and I leave it for your consideration.

4-2-80 - Sen. Ferguson - chairman will have a suggested CS in line with above for here in Comm. Hearing the week of 7-11.

SENATE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act making a special appropriation for a dental program for low-income adults, and a special appropriation for an evaluation of the dental program; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. The sum of $2,637,000 is appropriated from the general fund to the Department of Health and Social Services for payment as a grant to Delta Dental, Inc., for a statewide dental program for low-income adults.

* Sec. 2. The sum of $100,000 is appropriated from the general fund to the Legislative Budget and Audit Committee for an evaluation of the statewide dental program financed with the appropriation made in sec. 1 of this Act.

* Sec. 3. The unexpended and unobligated portions of the appropriations made in this Act lapse into the general fund on June 30, 1982.

* Sec. 4. This Act takes effect immediately in accordance with AS 01.10.070(c).

This takes the place of SB 214.

SB 214 – with all State funds

Sen. Ferguson

Young & Old (Bush)

Josh –

Bettie

Summary of Your Program

1.	Adults basic care	$1,479,000
2.	Childrens basic care	655,000
3.	Dentures (adults)	566,000
4.	General Relief Medical dental budget	185,000
	TOTAL	$2,885,000
5.	Administration by Delta (10%)	288,500
	TOTAL FOR BASIC PROGRAM	$3,173,500
6.	Preventive program	600,000
7.	Evaluation team (Budget and Audti)	100,000 ✔
	GROUND TOTAL	$3,873,500

Please note that I have reduced the $1,015,000 estimation for children on the Cost of Dental Care computation by $360,000, the estimated saving in billings to the program through the efforts of the dental preventive aides. $1,015,000 minus $360,000 = $655,000 budgeted for childrens basic care.

RECOMMENDATION #1

A dental preventive program should be designed to serve every community that does not have a resident dentist. The title for this proposed position could be --- dental preventive aide. Her duties would involve weekly visits to individual classes to encourage daily brushing, monthly fluoride rinses and two prophylaxis (polishing and flossing) and fluoride treatments per school year.

Such a program would involve about 160 communities. The initial salary for this part time position would be between $200 - $300 per month with an annual budget of $350,000 for a school session of nine months. The start up cost would be about $75,000. Each aide would need a small portable dental engine for polishing the children's teeth before the application of fluoride paste, a couple of polishing handpieces, supplies such as fluoride paste and rinses, dental floss, toothbrushes and home care instruction materials.

An integral part of an effective preventive program would necessitate employing at least two licensed dental hygienists. They would be in charge of the training and supervision of the preventive aides.

Budget For The Preventive Program

1.	Salaries for the preventive dental aides	$350,000
2.	Travel and per diem for first year of the program*	$100,000
3.	Salary and benefits for two hygienists	$ 75,000
4.	Equipment and supplies	$ 75,000
	TOTAL	$600,000

*An example of why the first year travel and per diem budget is estimated at $100,000 -- A hygienist would travel from Anchorage to Kotzebue, while the dental aides from communities served by the Northwest School District would be brought to Kotzebue for initial training. This effort would be repeated in Nome, Galena, Barrow, and so forth.

RECOMMENDATION #2

Appropriation of $100,000 to Budget and Audit Committee to evaluate the effectiveness of the statewide dental demonstration project combining the resources of federal and state programs. A well controlled delivery system that is complimented with

pre-authorization and quality will prove less expensive than a poorly run Medicaid program.

Post-operative review of between 3-5 percent of all patients served by the program would minimuze abuses and insure quality. The dental evaluation team, which would consist of a dentist and his assistant will be able to provide emergency care (extractions when indicated to relieve pain, treat sensitive teeth, adjust high or rough fillings, adjust and repair dentures, and etc, etc --). This service will be at no cost to the program in as much as the dentist and his assistant will be on monthly salaries.

Evaluation Team Budget

1.	Dentist salary for 12 months	$39,000*
2.	Transportation and per diem	25,000
3.	Portable equipment and supplies	20,000
4.	Dental assistant salary for 12 months	12,000*
5.	Contingency	4,000
	TOTAL	$100,000

* Salaries for dentist and his assistant is based on working in the program between 65 - 70 hours per month.

RECOMMENDATION #3

You should incorporate the General Relief Medical dental program into the demonstration project to avoid fragmentation. [redacted]. I would further suggest that you use the identical criteria now used by HESS to determine eligibility

Summary Of HESS Design

1.	Enclosure B of the position paper	$2,759,981
2.	Existing HESS program plus administration	1,060,000
	TOTAL	$3,819,981

COST OF DENTAL CARE COMPUTATION

COMMUNITY GROUP	TOTAL POPULATION	UTILIZATION FACTOR (1)	ESTIMATED ANNUAL UTILIZATION	ESTIMATED COST PER PERSON (2)	ESTIMATED GROUP COST
CHILDREN (3-20)	9,662	0.60	5,800	$175.00	$1,015,000
ADULTS (Basil)	9,164	0.60	5,500	269.00	1,479,000
ADULTS (Dentures(3)	9,164	0.10	916	618.00	566,000
TOTAL					$3,060,000
ADMINISTRATIVE COST (estimated)					306,000

(1) The estimated number of persons that would receive dental care in one year.
(2) $175.00 is based on title 19 cost for FY 79 plus 20% inflation, $269.00 (Delta).
(3) Removable dentures - full and partial.

DIAGNOSTIC
Oral examination is a benefit, but not more than once in a 12 - month period.
Bite Wing radiographs - 2 only, except where prevented by missing teeth.
Periapical radiographs - only a benefit for teeth to be extracted, suspected anterior lesions and where bitewings are not feasible.

PREVENTIVE
Prophylaxis, not more than once in any 12 - month period. Prophylaxis for children must include fluoride application.

EXODONTICS
Pre-operative periapicals required for payment of fee.

RESTORATIVE
Amalgams and composite resin restorations for the treatment of caries. Payment is based on one restoration per surface regardless of the # or combination of restorations placed. Composite resin restorations are a benefit only in permanent anterior teeth and on buccal surfaces of maxillary premolars. The fee for a restorative procedure includes bases and local anesthesia.

PROSTHETICS
Partial and full dentures are a benefit, not more than once in a 5 - year period. Repairs, relines and tissue conditioning are a benefit once in a 12 - month period.

February 29, 1980

The Honorable Frank Ferguson
Alaska State Senate
Pouch V
Juneau, Alaska 99811

Document # 11-80

Dear Senator Ferguson:

We are pleased to respond to your recent letter requesting information regarding the Department of Health and Social Services' position concerning a Medicaid dental program.

Overview

The Department of Health and Social Services is aware that the unmet needs for dental care for Alaska's low income population are great. Poor dental health and tooth decay have been identified as priority problems by each of the Health System Agencies in the state. Reliable statewide statistics on the extent of the problem are lacking. The lack of naturally or artificially fluoridated water supplies in many parts of the state means that many citizens do not have access to this form of protection against tooth decay. Twenty-seven percent (27%) of children screened in the EPSDT program were identified as having dental problems. In older age groups, about 30% of the population is thought to have periodontal disease and the population of adults needing full or partial dentures is significant.

Pilot Dental Projects by the Department

Recently, the Department has conducted a number of pilot projects that are useful in evaluating the need for dental care coverage and designing a dental care program in the state.

In FY 1980, the Legislature made available to our Division of Public Health, the sum of $100,300 for a Delta Dental Plan demonstration dental care project in Allakaket and Kiana. Of the total population of about 503 individuals in the two villages, approximately 49% accepted treatment. Participation by adults (50%) was slightly higher than by children (42%). The project provided a dental survey, dental health education as well as treatment. The screening portion of the project

documented a prevalence of dental decay, gum disease, and the need for full or partial dentures in the population. The services provided included examinations, x-rays, cleaning and fluoride applications, fillings, extractions, root canal, periodontal surgery, and dentures. Denture services accounted for $24,221 or 31% of the total cost of basic care.

Also, in FY 80 the Southcentral Dental Society received a $25,000 grant through the Office on Aging to work with senior citizens organizations in Anchorage to arrange a low-cost denture program for seniors residing in Anchorage. An eight (8) member policymaking Board of Directors was formed and designated the initial target group to be served as those low-income senior citizens having no additional funds for dental care. The services provided included new dentures, repair of old dentures, relining of old dentures, and pre-prosthetic surgery (if needed to properly fit dentures). The average cost per patient was $345.89. Over 50 seniors received treatment under the project.

In conformity with regulations governing federal Maternal and Child Health grant funds, a dental project for children grades K-4 has been in operation in Wrangell for approximately 15 months. The project includes dental health education in the school, topical fluoride applications, dental examinations and, when indicated, treatment. Approximately 175 children are involved in the project. Costs for treatment services have been paid by the following parties: family (13%), AANHS (34%), insurance (17%), and MCH project funds (36%).

The Department is currently reviewing ways to utilize the mobile dental unit purchased by the state a few years ago to provide dental care by bringing dentists to the Aleutian Chain and Pribilof Islands. The Department is investigating possibilities of working with private organizations or Native corporations to use the mobile dental unit on the highway network in Interior Alaska and Southcentral Alaska. This would improve access to dentists in the more remote areas of the state that touch the highway system.

Small grants for topical fluoride applications and dental health education have been made by the Department to the Yuko -Kuskokwim Health Corporation and the Tanana Chief's Health Conference.

Design of Medicaid Dental Project

As mentioned previously in this letter, coverage of dental and denture services for low-income adults is virtually non-existent by any public or private source in Alaska. The Department has conducted a number of pilot programs, which indicated that low-income adults have significant dental needs that are presently not being routinely met and that low-income persons utilize the services if they are available to them.

Delta Dental Plan of Alaska, which currently administers the Medicaid children's dental program and General Relief Medical emergency dental program, has assisted the Department in outlining one possible way to design a Medicaid dental and denture program for Medicaid-eligible adults. The program includes: (1) diagnostic and preventive services, (2) restorative services, (3) emergency dental services, and (4) dentures and related services. The specifics of the program are outlined in Enclosure A to this letter. The cost estimate for this design is about $2.6 million for direct services plus slightly over $180 thousand for contract administration costs. Fifty percent (50%) of the total of approximately $2.8 million cost would be covered by federal Medicaid funds; the remainder by state funds. A detailed cost breakdown is listed on Enclosure B to this letter. We believe that these cost figures are reliable, as Delta Dental has had significant experience in this field.

Department's Position

The Department of Health and Social Services recognizes the need for coverage of routine dental services for certain low-income persons, as they are presently not routinely covered from any public and private source. We endorse the inclusion of preventive dental services which in the long run have been shown to show significant costs savings. Federal Medicaid funds would be available to cover 50% of the costs of the program.

The design included is only one way to structure a Medicaid dental program and would welcome the opportunity to discuss other options with you at your convenience.

The Department of Health and Social Services appreciates the opportunity to comment on this matter. Please do not hesitate to contact myself or Rod Betit, Director of the Division of Public Assistance, if you need further information on this matter.

Sincerely,

Helen D. Beirne
Commissioner

ONE DESIGN OF MEDICAID DENTAL PROGRAM

Adults 21 and over are presently eligible for emergency dental services only.

A. Proposed Dental Treatment

1. Diagnostic and Preventive

   a. Examination limited to one in any 12-month period for adults and to two in any 12-month period for children covered under the EPSDT program.

   b. Necessary radiographs (full-mouth series limited to once every three years).

   c. Prophylaxis and fluoride, limited to one in any 12-month period for adults and to two in any 12-month period for children covered under the EPSDT program.

2. Restorative

   a. Amalgam or composite restorations.

   b. Root canal therapy, pulpotomy, apicoectomy necessary to treat an abscessed tooth.

   c. Stainless steel or preformed acrylic crowns, necessary when tooth cannot be restored with amalgam or composite material.

   d. Extractions.

3. Emergency Services

   a. Control bleeding.

   b. Relieve pain.

   c. Eliminate acute infection.

   d. Operative procedures required to prevent pulpal death and imminent tooth loss.

   e. Treatment of injuries to teeth and/or supporting structures.

4. Prosthetic Appliances

a. Partial dentures, where indicated for proper mastication.

b. New complete dentures, only if a reline or repair will not satisfactorily restore the existing denture.

c. Replacement dentures, if not previously paid under this program within the last five years.

d. Reline or repair of existing partial or denture.

Prepared in Consultation With:
Delta Dental Plan of Alaska

Date: February 28, 1980

Enclosure B

Costs of One Design of Medicaid Dental Program

FY 81 Medicaid Eligible Adults [1]

	Number of Eligibles [2]	Estimated % of Users	Number of Users	Treatment Covered	FY 80 Coverage Cost Per Person	Estimated Total Cost	TOTALS
Medicaid Eligibles	9,080	55%	4,994	All care except dentures	$269	$1,343,386	
Medicaid Eligibles	9,080	20%	1,816	Dentures	$618	$1,122,288	
					Sub-Total		$2,465,674
					Inflation (10%)		246,567
					Administrative Costs (Paid to private contractor)		230,540
					GRAND TOTAL		$2,942,781
					General Relief-Medicaid Offset		(182,800)
							$2,759,981

1 - We are assuming that General Relief-Medical emergency only dental coverage will continue for persons not eligible for dental care under Medicaid (i.e., intact families, elderly not eligible for Medicaid). Children eligible for Medicaid already receive coverage of dental care under the EPSDT program. Forty percent (40%) of the current General Relief-Medical dental budget is used to cover Medicaid clients and thus could offset some of the cost of the program.

2 - 12/79 Public Assistance figures.

Dear Rose:

Enclosed are the following documents relating to the recently completed Low Cost Denture Demonstration Project.

Fiscal Reports #2 & #3 which were sent to the Office on Aging, State of Alaska. (Report 1 contained tentative figures.) These reports do contain final figures for ALL months the program was operational - August, 1979 - February, 1980.

Quarterly Progress Report - sent to the Office on Aging, State of Alaska, to augment the above two reports.

Statistical/Narrative Analysis - prepared by the South Central District Dental Society office with statistics provided by Donna Lindsay, Project Coordinator.

Patient Record of Treatment - Who was seen, by whom, when and the date of claim adjudication.

Please accept our sincere thanks for unselfishly participating in this program. It was my personal pleasure to get to know and work with you in this effort. Please feel free to contact me if I can answer any questions.

Best Regards,

Martha Dearborn

February 15, 1980

LOW COST DENTURE DEMONSTRATION PROGRAM STATISTICAL/NARRATIVE ANALYSIS

Background: The South Central District Dental Society received a $25,000.00 grant from the Alaska State Legislature (1979) to combine forces with senior citizens organizations in Anchorage to arrange a low-cost denture program for seniors residing in the Anchorage area.

Implementation: An 8-member policy making Board of Directors was formed consisting of representatives from the senior citizens community, one dentist, one dental society representative and the project coordinator (selected by a participating orgaization). Representatives included:

Lois Pillifant - Older Persons Action Group
Norma Lundy - Senior Citizens/Municipality
Rose Palmquist - Senior Citizens Advisory Commission
Arne Beltz - Anchorage Municipal Health Department
Alice Guest - Alaska State Dept. of Health & Social Services
Geraldine T. Morrow, D.M.D. - Dentist
Martha Dearborn - South Central District Dental Society
Donna Lindsay - Project Coordinator/Referral Worker

The target group selected for this initial program was those senior citizens having no additional funds for dental care. Eligibility was based on Old Age Assistance criteria. The Grant was to subsidize the dentistry performed, the claims processed, and the administrative effort required to locate eligible seniors, refer them to the dental offices and to gather statistics for future use by the legislature when considering additional funds for similar projects.

Services Provided: New dentures — Repair of old dentures
Relining of old dentures — Pre-prosthetic surgery (if needed to properly fit dentures)

Duration: The first patient was seen on August 29, 1979, the last patients were seen on February 4, 1980. (Average cost per patient - $345.89.)

Termination of treatment was based on anticipated encumbrance of funds.

Statistics: Total number of senior citizens receiving treatment.....55 ✓
Total number of senior citizen inquiries about the program.....134 ✓

*Services provided:

Full mouth dentures (upper and lower)	25
Partial dentures (upper or lower)	10
Reline of old dentures	25
Repair of old dentures	1
Pre-prosthetic surgery	4

*Some individuals received more than one service.

Anticipated Costs: $20,000.00 for dental treatment
$ 2,500.00 for claims processing
$ 2,500.00 for administrative effort

Actual Costs: $19,024.00 for dental treatment
$ 2,500.00 for claims processing
$ 2,774.29 for administrative effort

Patient to this equals about 460 ea

Remaining funds: $701.71

OFFICE ON AGING

SOUTH CENTRAL DISTRICT DENTAL SOCIETY

QUARTERLY PROGRESS REPORT

Report for quarter ending February, 1980 .

Briefly summarize progress this month:

Enclosed are the descriptive, statistical and financial reports for the South Central District Dental Society Low Cost Denture Demonstration Project.

Following is a further explanation of what was included with each Budget Category.

"DENTAL SERVICES".....Dental treatment provided for those Senior Citizens qualifying for the program. Treatment was provided by dentists volunteering for this program - in private dental offices.

"TRAVEL".....Automobile expenses (gas) incurred by Project Coordinator Ms. Donna Lindsay.

"SUPPLIES O.P.A.G".....Copying and postage used by Project Coordinator Donna Lindsay and paid for by OPAG. OPAG (Older Persons Action Group), was the Senior Citizen's organization most directly involved with this project. They donated space, desk and telephone for Donna to conduct business.

"ADMINISTRATION".....All screening work done by Project Coordinator Donna Lindsay. including: interviews, contact with dentists, arranging appointments, statistical gathering and analysis.

"CLAIMS PROCESSING".....All dental claims were adjudicated by Delta Dental Plan of Alaska through contract arrangements with the South Central District Dental Society.

South Central District Dental Society
Martha Dearborn

Senior Citizens/Municipality
Norma Lundy

Dentist Representative
Dr. Phillip L. Locker

Project Coordinator/Referral Worker
Donna Lindsay

Public Relations Coordinator/Alaska Dental Society
Betzi Woodman

Not Present: Senior Citizens Advisory Com
Rose Palmquist

Municipal Health Dept.
Arne Beltz

State Dept.of H. & S.S.
Alice Guest

Purpose of the meeting:

1. To consider extending this program to those eligible individuals residing in nursing homes.
2. To establish the exact time an individual can be considered eligible for the program.
3. To provide an updated report of the project's progress to the members of the Board of Directors.

Decisions:

1. Pioneer Home and Nakoyia have inquired as to the possibility of obtaining care for eligible residents.
   For Nakoyia, following a preliminary visit by Donna Lindsay, Dr. Lee McKinley will be contacted to see if he would be interested in going to the home and evaluating the actual care that will be needed - and then, possibly, providing that treatment.

2. RESOLUTION: Motion by Norma Lundy, seconded and carried, to establish that an applicant be considered eligible for this program from the date of service - not the date of application.

3. To date, 36 applicants have been served, 7 are waiting and statistics have been gathered on approximately 75 inquiries. $10,634.00 has been committed for treatment and administrative expenses.

Next Meeting: No date was set. Donna Lindsay will call a meeting when she feels one is needed.

October 29, 1979

DENTURE PROJECT UPDATE

Statistics on 117 persons, including eligible applicants.

1) Most frequent age group 65-69 range from 52 to 80. 38% in 65-69 range.
2) Most are females - 64%.
3) Most frequent marital status widow or widower 35%.
4) 62% live alone.
5) 76% support only themselves.
6) Last full mouth x-rays range from 1 week to 50 yrs. 16% do not remember--7% have never had x-rays.
7) The most common dental need was initial or replacement of full mouth dentures. 33%
8) There are 27 different sources of referrals. Most common sources as follows.
   a) Old Age Assistance checks 31%
   b) Senior Voice 22%
   c) Chugach View 12%
   d) Salvation Army 5%
   e) State Disability Check 5%
9) 91% of all persons talked to are not eligible for ANS.
10) 90% of all persons talked to have no earned income.
11) 49% of all persons talked to receive Old Age Assistance.
12) 38% of all persons talked to were eligible for this program.

Above statistics do not include 18 persons residing at Nakoyia who are in need of relines or full dentures.

41 persons have had or will have dentures services provided
1 person waiting due to poor health - funds available.
2 eligible persons in addition to the 18 Nakoyia residents are waiting to see if funds are available.

Funds definitely committed are 12,374 out of 20,000. Expenditures for 7 persons are unknown - could be up to 1,000 each.

Average expenditure per person is $343.

Senate H.E.S.S. Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Dear Glenn,

Enclosed find the report on the use of the $25,000 legislative appropriation of 1979 for a dental pilot project for limited dental services for elderly of limited financial means. In addition the statistics on the total number of elderly interviewed is included.

It looks like the pilot project tapped a very small part of the most urgent dental needs of older persons. I hope this information is of value to you.

Sincerely,

Rose Palmquist

1- 60 yrs do not get Federal money---65 years of age do. The title of your bill mentions a "State Program" You can cover all mentioned by Delta Dental Plan if all (100%) state money.

If the above mentioned passed it would be better than State employees now have.

III. ANALYSIS (See Fiscal Note Preparation Instructions, Section III)

Estimate of $160,000 is based on figures received from Division of Public Assistance on 2/20/79 indicating 8,756 adults are eligible under the Medicaid program. Additionally, 1,497 cases (all presumbly adults) received emergency treatment under State GRM program. These two figures total 10,243 eligibles. Approximately 2% of these individuals may need upper dentures and 1.5% lower dentures. Approximately 2% of those receiving dentures might require a reline within three years. This charge has been included in the estimate. Charges based on maximum allowance under present Medicaid program.

March 9, 1979

Senate HESS Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Attention Committee Members: Senators Hackney, Ferguson, Colletta, Sturgulewski and Fahrenkamp

The South Central District Dental Society, a voluntary professional organization with 108 members, wishes to comment on Senate Bill #214.

It is our understanding the Medicaid eligible recipients over age 21 who are presently eligible for the benefits of the state GRM (General Relief Medical) program, along with those who qualify directly as beneficiaries of the GRM program will be affected by the requirements as set forth in this bill.

Currently the GRM program covers the following under its emergency benefits:

control bleeding
relieve pain
eliminate acute infection
operative procedures required to prevent pulpal death and imminent loss of teeth
treatment of injuries to teeth and/or treatment of injuries to supporting structures
denture repair
root canal therapy at discretion of contractor
extraction
removal of decay and use of temporary filling material (Ex. IRM) or maximum of a two surface alloy
restore fractured off tooth structure only in instances where protection of pulp tissue is necessary by use of filling material, stainless steel crown, or temporary acrylic crown
provide full dentures and replacement of teeth with full dentures in teeth extracted while a beneficiary of the GRM program

The proposed legislation eliminates: (as crossed out)

~~control bleeding~~
~~relieve pain~~
~~eliminate acute infection~~
~~operative procedures required to prevent pulpal death and imminent loss of teeth~~

~~treatment-of-injuries-to-teeth-and/or~~ treatment of injuries to supporting structures (2 visits per year)
~~denture-repair~~
~~root-canal-therapy-at-discretion-of-contractor~~
extraction (2 visits per year. maximum 3 extractions per visit)
~~removal-of-decay-and-use-of-temporary-filling material-or-maximum-of-a-two-surface-alloy~~
~~restore-fractured-off-tooth-structure-only-in instances-where-protection-of-pulp-tissue-is necessary-by-use-of-filling-material,-stainless steel-crown-or-temporary-acrylic-crown~~
provide full dentures ~~and-replacement-of-teeth with-full-dentures-if-teeth-extracted-while-a beneficiary-of-the-CRM-program~~

... and of those benefits still covered is restricting them as noted to the right of each item and adding only the construction of full dentures for those who have never had a full denture or want their old dentures replaced.

It is our belief that SB #214:

1. Discriminates against the adult who must decide between pain or loosing his teeth. He is given no choices to save his teeth.
2. Is fostering the need for dentures.
3. Is increasing the cost of dentistry to the state and/or the beneficiary since the teeth lost must eventually be replaced. The cost of replacement almost always exceeds that of repair.
4. A tooth can be saved with a temporary (IRM) with equal or less cost than an extraction.
5. Temporary restorations for the purpose of relieving pain without sacrificing the tooth is more valid emergency procedure than the desire to replace an old denture of fabricate a new one.
6. Many dentists will refuse to pull a tooth that in his professional judgement can and should be saved.
7. From the information provided at the hearings and the bill itself, it is easy to surmise that the changes in this program are motivated by a desire other than to maintain or improve the level of care or services provided to beneficiaries of this program, possibly releasing the state from some real or imagined financial responsibility.

The members of the South Central District Dental Society do not view this bill as an improvement or as even maintenance of an existing level of care to the citizens of Alaska. It fundamentally inhibits the practitioner from utilizing his skills and techniques to benefit the patient and by dictate reverts the

practice of dentistry to a level in vogue at the turn of the century. It creates a double standard of care at a time when legislation in health care delivery strives to establish the right to equal treatment for all regardless of social status.

Sincerely,

M E M O R A N D U M

TO: Denise L. Knapp, Executive Director
Delta Dental Plan

FROM: Senator Glenn Hackney, Chairman
Senate HESS Committee

SUBJECT: SB 214

DATE: February 8, 1980

I'm sorry I missed you when you were in Juneau. If you are planning to be in Juneau in the very near future I'd appreciate knowing. I would like to talk to you at some length about SB 214. I want to push this bill, but I want to do it in a responsible way that will be satisfactory both to the dental community and the to those for whom the bill is designed.

Would appreciate hearing from you.

Introduced: 2/13/79
Referred: Health, Education & Social Services and Finance

IN THE SENATE BY HACKNEY AND STIMSON

SENATE BILL NO. 214

IN THE LEGISLATURE OF THE STATE OF ALASKA

ELEVENTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act establishing a state program providing dental assistance for needy persons; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 47.07 is amended by adding a new section to read:

Sec. 47.07.035. DENTAL SERVICES TO BE PROVIDED. (a) Dental services to be offered to eligible persons include only emergency dental services and denture services.

(b) Payments for emergency dental services do not require prior authorization by the department. Except when required by unusual physiological circumstances, emergency dental services for which payment is allowed under this section include only

(1) two emergencies within a fiscal year;

(2) one visit per emergency;

(3) three extractions per visit; and

(4) single film x-rays of areas to be treated.

(c) Payments for denture services require the prior approval of the department. Denture services for which payment is allowed under this section includes payment for only

(1) complete dentures, exclusive of partial dentures, immediate dentures, or appliances that are not complete upper or lower dentures;

(2) unless required by unusual physiological circumstances,

(A) one set of dentures within five years;

(B) relinement or rebasing of existing denture sets not more often than once each three years;

(C) relinement of dentures only if the relinement occurs more than 12 months after receipt of the dentures;

(3) new dentures only if a relinement or duplication will not satisfactorily resolve problems with existing dentures;

(4) replacement dentures only if the dentures to be issued are not issued as replacement for lost or stolen dentures previously paid for under this section; and

(5) dentures of standard materials, excluding payment of dentures composed of nonstandard materials, acrylic bodies, case clamps, and chrome alloy devices.

(d) Payment may not be made under this section for

(1) cosmetic procedures;

(2) gold or porcelain restoration;

(3) sedative filling or palliative treatment in place of permanent repair;

(4) extractions on asymptomatic teeth;

(5) broken dental appointments;

(6) nonemergency dental care performed in a hospital, nursing home, or at patient's residence; or

(7) dental specialty services, including but not limited to, orthodontics, periodontics, prosthodontics (including fixed and partial bridgework), endodontics, and crowns.

* Sec. 2. AS 47.07.080 is amended by adding new paragraphs to read:

(5) "complete dentures" means artificial structures made by or under the direction of a dentist to substitute missing upper or lower full sets of teeth;

(6) "department" means the Department of Health and Social

Services;

(7) "emergency dental services" means those services provided by or under the direction of a dentist in the practice of his profession including emergency treatment of

(A) pain or acute infection,

(B) bleeding,

(C) injuries of the oral cavity or related structures, including reduction of fractures of maxilla or mandible and dislocation of the mandible, and

(D) conditions requiring emergency surgery to the jaw or related structures requiring services of a qualified oral surgeon;

* Sec. 3. This Act takes effect July 1, 1979.

COST OF DENTAL CARE COMPUTATION

COMMUNITY GROUP	TOTAL POPULATION	UTILIZATION FACTOR (1)	ESTIMATED ANNUAL UTILIZATION	ESTIMATED COST PER PERSON (2)	ESTIMATED GROUP COST
CHILDREN (3-20)	9,662	0.60	5,800	$175.00	$1,015,000
ADULTS (Basil)	9,164	0.60	5,500	269.00	1,479,000
ADULTS (Dentures(3)	9,164	0.10	916	618.00	566,000
TOTAL					$3,060,000
ADMINISTRATIVE COST (estimated)					306,000

(1) The estimated number of persons that would receive dental care in one year.
(2) $175.00 is based on title 19 cost for FY 79 plus 20% inflation, $269.00 (Delta).
(3) Removable dentures - full and partial.

DIAGNOSTIC
Oral examination is a benefit, but not more than once in a 12 - month period.
Bite Wing radiographs - 2 only, except where prevented by missing teeth.
Periapical radiographs - only a benefit for teeth to be extracted, suspected anterior lesions and where bitewings are not feasible.

PREVENTIVE
Prophylaxis, not more than once in any 12 - month period. Prophylaxis for children must include fluoride application.

EXODONTICS
Pre-operative periapicals required for payment of fee.

RESTORATIVE
Amalgams and composite resin restorations for the treatment of caries. Payment is based on one restoration per surface regardless of the # or combination of restorations placed. Composite resin restorations are a benefit only in permanent anterior teeth and on buccal surfaces of maxillary premolars. The fee for a restorative procedure includes bases and local anesthesia.

PROSTHETICS
Partial and full dentures are a benefit, not more than once in a 5 - year period. Repairs, relines and tissue conditioning are a benefit once in a 12 - month period.

RECOMMENDATION #1

A dental preventive program should be designed to serve every community that does not have a resident dentist. The title for this proposed position could be --- dental preventive aide. Her duties would involve weekly visits to individual classes to encourage daily brushing, monthly fluoride rinses and two prophylaxis (polishing and flossing) and fluoride treatments per school year.

Such a program would involve about 160 communities. The initial salary for this part time position would be between $200 - $300 per month with an annual budget of $350,000 for a school session of nine months. The start up cost would be about $75,000. Each aide would need a small portable dental engine for polishing the children's teeth before the application of fluoride paste, a couple of polishing handpieces, supplies such as fluoride paste and rinses, dental floss, toothbrushes and home care instruction materials.

An integral part of an effective preventive program would necessitate employing at least two licensed dental hygienists. They would be in charge of the training and supervision of the preventive aides.

Budget For The Preventive Program

1.	Salaries for the preventive dental aides	$350,000
2.	Travel and per diem for first year of the program*	$100,000
3.	Salary and benefits for two hygienists	$ 75,000
4.	Equipment and supplies	$ 75,000
	TOTAL	$600,000

*An example of why the first year travel and per diem budget is estimated at $100,000 -- A hygienist would travel from Anchorage to Kotzebue, while the dental aides from communities served by the Northwest School District would be brought to Kotzebue for initial training. This effort would be repeated in Nome, Galena, Barrow, and so forth.

RECOMMENDATION #2

Appropriation of $100,000 to Budget and Audit Committee to evaluate the effectiveness of the statewide dental demonstration project combining the resources of federal and state programs. A well controlled delivery system that is complimented with

pre-authorization and quality will prove less expensive than a poorly run Medicaid program.

Post-operative review of between 3-5 percent of all patients served by the program would minimuze abuses and insure quality. The dental evaluation team, which would consist of a dentist and his assistant will be able to provide emergency care (extractions when indicated to relieve pain, treat sensitive teeth, adjust high or rough fillings, adjust and repair dentures, and etc, etc --). This service will be at no cost to the program in as much as the dentist and his assistant will be on monthly salaries.

Evaluation Team Budget

1.	Dentist salary for 12 months	$39,000*
2.	Transportation and per diem	25,000
3.	Portable equipment and supplies	20,000
4.	Dental assistant salary for 12 months	12,000*
5.	Contingency	4,000
	TOTAL	$100,000

* Salaries for dentist and his assistant is based on working in the program between 65 - 70 hours per month.

RECOMMENDATION #3

You should incorporate the General Relief Medical dental program into the demonstration project to avoid fragmentation. [redacted]. I would further suggest that you use the identical criteria now used by HESS to determine eligibility

Summary Of HESS Design

1.	Enclosure B of the position paper	$2,759,981
2.	Existing HESS program plus administration	1,060,000
	TOTAL	$3,819,981

Summary of Your Program

1.	Adults basic care	$1,479,000
2.	Childrens basic care	655,000
3.	Dentures (adults)	566,000
4.	General Relief Medical dental budget	185,000
	TOTAL	$2,885,000
5.	Administration by Delta (10%)	288,500
	TOTAL FOR BASIC PROGRAM	$3,173,500
6.	Preventive program	600,000
7.	Evaluation team (Budget and Audti)	100,000 ✔
	GROUND TOTAL	$3,873,500

Please note that I have reduced the $1,015,000 estimation for children on the Cost of Dental Care computation by $360,000, the estimated saving in billings to the program through the efforts of the dental preventive aides. $1,015,000 minus $360,000 = $655,000 budgeted for childrens basic care.

Proposed revision of SB 214 "An Act establishing a state program providing dental assistance for needy persons; and providing for an effective date."

Beginning with line 10

Section 1 AS 47.07 is amended by adding a new section to read:

Sec. 47.07.035 DENTAL SERVICES TO BE PROVIDED.

a. Persons who are 60 years of age or older and eligible under Medicaid or General Relief Medical requirements are eligible for the services listed.

b. Payments for emergency dental services do not require prior authorization by the department. Emergency services for treatment of trauma or to eliminate pain or infection include:

1. Placement of medicated fillings,
2. Single film x-rays of areas to be treated,
3. Root canal treatment if pain and infection exists,
4. Control of bleeding,
5. Treatment of traumatic injuries,
6. Extraction of non-restorable teeth,
7. Incision and drainage for control of infection.

c. Treatment which require submission of a treatment plan for authorization of the department include:

1. Complete examination including necessary radiographs,
2. Preventive and interceptive periodontal treatment as necessary, i.e. periodontal scaling and oral hygiene instructions as well as routine prophylaxis,
3. Routine restorative dentistry,
4. Root canal treatment (endodontic therapy)
   a. Subsequent restoration of root canal tooth including post and amalgam buildups prior to crowning the tooth if necessary, and subsequent crown,
5. Fixed prosthetics are eligible benefits once every five years if needed. Fixed prosthetics include
   a. Crowns on teeth that cannot be restored in an

optimum manner with routine restorative materials,
b. Bridges for restoration of occlusion and functio
c. Crowns are not to be placed for esthetic reasons only but for restoration of function.

6. Removable prosthetics are eligible benefits once every five years if needed. Such prosthetics include
   a. Partial dentures including crowns necessary to facilitate path of insertion and retention of partial dentures,
   b. Full dentures to include immediate dentures, replacement dentures, and initial set of dentures,
   c. New dentures only if a relinement or duplication will not satisfactorily resolve problems with existi dentures,
   d. Replacement dentures only if the dentures to be issued are not issued as replacement for lost or stolen dentures previously paid for under this section,
   e. Relinement or rebasing of existing dentures not more often than once every three years,
7. Surgery
   a. Routine extractions as needed,
   b. Preprosthetic surgery,
   c. Periodontal surgery
      1. Any splinting of teeth with fixed prosthetic as indicated following periodontal surgery,
      2. Occlusal equilibration.

Section 2 AS 47.07___is amended by adding new paragraphs as follows:

( ) Dental Services are to be administered in such a mann that would require
1. a treatment plan authorization except as excluded und AS 47.07.035 (b),
2. fees paid consistent with Medicaid and General Relie Medical authorized limits,
3. peer review to insure quality control and prevent fraud.

Anchorage, Alaska 99504

Dear Rose:

Enclosed are the following documents relating to the recently completed Low Cost Denture Demonstration Project.

Fiscal Reports #2 & #3 which were sent to the Office on Aging, State of Alaska. (Report 1 contained tentative figures.) These reports do contain final figures for ALL months the program was operational - August, 1979 - February, 1980.

Quarterly Progress Report - sent to the Office on Aging, State of Alaska, to augment the above two reports.

Statistical/Narrative Analysis - prepared by the South Central District Dental Society office with statistics provided by Donna Lindsay, Project Coordinator.

Patient Record of Treatment - Who was seen, by whom, when and the date of claim adjudication.

Please accept our sincere thanks for unselfishly participating in this program. It was my personal pleasure to get to know and work with you in this effort. Please feel free to contact me if I can answer any questions.

Best Regards,

Martha Dearborn

LOW COST DENTURE DEMONSTRATION PROGRAM STATISTICAL/NARRATIVE ANALYSIS

Background: The South Central District Dental Society received a $25,000.00 grant from the Alaska State Legislature (1979) to combine forces with senior citizens organizations in Anchorage to arrange a low-cost denture program for seniors residing in the Anchorage area.

Implementation: An 8-member policy making Board of Directors was formed consisting of representatives from the senior citizens community, one dentist, one dental society representative and the project coordinator (selected by a participating orgaization). Representatives included:

Lois Pillifant - Older Persons Action Group
Norma Lundy - Senior Citizens/Municipality
Rose Palmquist - Senior Citizens Advisory Commission
Arne Beltz - Anchorage Municipal Health Department
Alice Guest - Alaska State Dept. of Health & Social Services
Geraldine T. Morrow, D.M.D. - Dentist
Martha Dearborn - South Central District Dental Society
Donna Lindsay - Project Coordinator/Referral Worker

The target group selected for this initial program was those senior citizens having no additional funds for dental care. Eligibility was based on Old Age Assistance cr ria. The Grant was to subsidize the dentistry performed, the claims processed, and the administrative effort required to locate eligible seniors, refer them to the dental offices and to gather statistics for future use by the legislature when considering additional funds for similar projects.

Services Provided: New dentures
Repair of old dentures
Relining of old dentures
Pre-prosthetic surgery (if needed to properly fit dentures)

Duration: The first patient was seen on August 29, 1979, the last patients were seen on February 4, 1980. (Average cost per patient - $345.89.)

Termination of treatment was based on anticipated encumbrance of funds.

Statistics: Total number of senior citizens receiving treatment.....55
Total number of senior citizen inquiries about the program.....134
*Services provided:

Full mouth dentures (upper and lower)	25
Partial dentures (upper or lower)	10
Reline of old dentures	25
Repair of old dentures	1
Pre-prosthetic surgery	4

*Some individuals received more than one service.

Anticipated Costs: $20,000.00 for dental treatment
$ 2,500.00 for claims processing
$ 2,500.00 for administrative effort

Actual Costs: $19,024.00 for dental treatment
$ 2,500.00 for claims processing
$ 2,774.29 for administrative effort Remaining funds: $701.71

OFFICE ON AGING

SOUTH CENTRAL DISTRICT DENTAL SOCIETY

QUARTERLY PROGRESS REPORT

Report for quarter ending February, 1980 .

Briefly summarize progress this month:

Enclosed are the descriptive, statistical and financial reports for the South Central District Dental Society Low Cost Denture Demonstration Project.

Following is a further explanation of what was included with each Budget Category.

"DENTAL SERVICES".....Dental treatment provided for those Senior Citizens qualifying for the program. Treatment was provided by dentists volunteering for this program - in private dental offices.

"TRAVEL".....Automobile expenses (gas) incurred by Project Coordinator Ms. Donna Lindsay.

"SUPPLIES O.P.A.G".....Copying and postage used by Project Coordinator Donna Lindsay and paid for by OPAG. OPAG (Older Persons Action Group), was the Senior Citizen's organization most directly involved with this project. They donated space, desk and telephone for Donna to conduct business.

"ADMINISTRATION".....All screening work done by Project Coordinator Donna Lindsay. including: interviews, contact with dentists, arranging appointments, statistical gathering and analysis.

"CLAIMS PROCESSING".....All dental claims were adjudicated by Delta Dental Plan of Alaska through contract arrangements with the South Central District Dental Society.

Lois Pillifant

South Central District Dental Society
Martha Dearborn

Senior Citizens/Municipality
Norma Lundy

Dentist Representative
Dr. Phillip L. Locker

Project Coordinator/Referral Worker
Donna Lindsay

Public Relations Coordinator/Alaska Dental Society
Betzi Woodman

Not Present:

Senior Citizens Advisory Co
Rose Palmquist

Municipal Health Dept.
Arne Beltz

State Dept.of H. & S.S.
Alice Guest

Purpose of the meeting:

1. To consider extending this program to those eligible individuals residing in nursing homes.
2. To establish the exact time an individual can be considered eligible for the program.
3. To provide an updated report of the project's progress to the members of the Board of Directors.

Decisions:

1. Pioneer Home and Nakoyia have inquired as to the possibility of obtaining care for eligible residents.
   For Nakoyia, following a preliminary visit by Donna Lindsay, Dr. Lee McKinley will be contacted to see if he would be interested in going to the home and evaluating the actual care that will be needed - and then, possibly, providing that treatment.

2. RESOLUTION: Motion by Norma Lundy, seconded and carried, to establish that an applicant be considered eligible for this program from the date of service - not the date of application.

3. To date, 36 applicants have been served, 7 are waiting and statistics have been gathered on approximately 75 inquiries. $10,634.00 has been committed for treatment and administrative expenses.

Next Meeting: No date was set. Donna Lindsay will call a meeting when she feels one is needed.

October 29, 1979

DENTURE PROJECT UPDATE

Statistics on 117 persons, including eligible applicants.

1) Most frequent age group 65-69 range from 52 to 80. 38% in 65-69 range.
2) Most are females - 64%.
3) Most frequent marital status widow or widower 35%.
4) 62% live alone.
5) 76% support only themselves.
6) Last full mouth x-rays range from 1 week to 50 yrs. 16% do not remember--7% have never had x-rays.
7) The most common dental need was initial or replacement of full mouth dentures. 33%
8) There are 27 different sources of referrals. Most common sources as follows.
   a) Old Age Assistance checks 31%
   b) Senior Voice 22%
   c) Chugach View 12%
   d) Salvation Army 5%
   e) State Disability Check 5%
9) 91% of all persons talked to are not eligible for ANS.
10) 90% of all persons talked to have no earned income.
11) 49% of all persons talked to receive Old Age Assistance.
12) 38% of all persons talked to were eligible for this program.

Above statistics do not include 18 persons residing at Nakoyia who are in need of relines or full dentures.

41 persons have had or will have dentures services provided
1 person waiting due to poor health - funds available.
2 eligible persons in addition to the 18 Nakoyia residents are waiting to see if funds are available.

Funds definitely committed are 12,374 out of 20,000. Expenditures for 7 persons are unknown - could be up to 1,000 each.

Average expenditure per person is $343.

STATEMENT OF

DELTA DENTAL PLAN OF ALASKA

ON SENATE BILL 214

PRESENTED AT TELECONFERENCE HEARINGS

February 28, 1979 1:30 p.m.

Legislative Information Office

Anchorage

My name is Denise Knapp. I am here today as the Executive Director of Delta Dental Plan of Alaska, the organization acting as fiscal intermediary for the State of Alaska to administer the dental portion of the State Early Periodic Screening, Diagnosis and Treatment program (more commonly known as EPSDT), the General Relief Medical (GRM) programs.
