RULES COMMITTEE

January 11, 1982
Juneau, Alaska

To: Sen. Bob Mulcahy, Chair
Senate Labor and Commerce Committee

From: Sen. Tim Kelly, Chair
Senate Rules Committee TK

Re: Committee Records

Attached is a copy of the Committee Minutes form adopted by the Joint House and Senate Rules Committees. In addition, I have attached a copy of the Committee Records Office Manual. The manual sets out the responsibilities of committee chairpersons and procedures for record keeping.

In order to facilitate the effects of the new Uniform Rules it is imperative that the procedures be followed from the first days of the session.

If you have any questions concerning records procedures please contact the Committee Records staff.

TABLE OF CONTENTS

A. Statement of Committee responsibilities under the law and Uniform Rules procedure.

B. Committee Records Staff.

1. Purpose

2. Procedures

C. Alaska Statutes and Uniform Rules references.

D. Committee Records forms:.

1. Overview;

2. Staff Identification form;

3. Committee Minutes form;

4. Committee Minutes Request form;

5. Public Hearing and Committee Meeting Announcement form.

STATEMENT OF COMMITTEE RESPONSIBILITIES

Each chairperson of a standing, special and joint committee of the Alaska State Legislature is responsible for preparation of the following pursuant to Rule 23 of the Uniform Rules:

A. an electronic recording of committee meetings with a log of the recording adequate to locate specific testimony;

B. minutes of each meeting of the committee on a standard form prescribed jointly by the Rules Committees of the house and senate;

C. announcements of public hearings and committee meetings pursuant to Rule 23, section (a) of the Uniform Rules;

D. a chronological file of minutes, copies of which shall be made available upon request to committee members and the public; committee minutes, tapes and other materials of research value shall be delivered by the committee at the end of each session or each legislature to the legislative library for appropriate disposition;

E. In addition may make available to the Legislative Affairs Agency a copy of all minutes of committee meetings during the session for entry of the minutes as a data base on the legislative computer system.

Committee Records Staff

Purpose: The purpose of Committee Records Staff is to facilitate and insure committee compliance with the Uniform Rules by maintaining computer files for all standing, special and joint committees of the Alaska State Legislature.

The office staff will gather, collate and disseminate information required to be made upon request by committee members and the public pursuant to Rule 23 of Uniform Rules.

Procedures

1. Prepare and disseminate to person responsible the following forms;
   A. Staff Identification form;
   B. Committee Minutes form;
   C. Committee Minutes Request form;
   D. Public Hearing and Committee Meeting Announcement form;
2. Gather and collate completed forms.
3. Enter data on computer.
4. Assist in data retrieval as requested.
5. Present a bi-weekly compliance report to the Rules Committee.

COMMITTEE MINUTES FORM

This form is to be prepared and submitted to the Committee Records Staff within the next legislative day following the public hearing or committee meeting. Please submit this form completed with the following information pursuant to Rule 23 of the Uniform Rules.

ALASKA STATUTORY REFERENCE

A.S. 24.05.135(b) The Legislature shall provide by uniform joint rule for the recording or reporting of committee session proceedings.

UNIFORM RULES REFERENCES

Rule 23. COMMITTEE MEETINGS. (a) Written notice of the time, place and subject matter of all meetings of standing, special, and joint committees during a week shall be provided by the person who chairs the committee to the chief clerk or secretary by 4:00 p.m. on the preceding Thursday. The person who chairs the committee to which a bill or resolution is first referred shall provide to the chief clerk or secretary written notice of the time and place of the first public hearing on the bill or resolution at least five days before the hearing. However, this requirement may be waived by motion of the person who chairs the committee to which a bill or resolution is first referred if concurred in by majority vote of the full membership of the house. The chief clerk of secretary shall publish and distribute copies of the weekly schedule of committee meetings and of the five-day notice of hearing.

(b) The person who chairs a standing, special or joint committee shall provide the chief clerk or secretary written notice of the change in time, place, or subject matter of a meeting. At the next daily legislative session, notice of the schedule change shall be announced by the chief clerk or secretary and published as a notice in the journal of the house.

(c) A scheduled meeting of a standing, special, or joint committee may be cancelled at any time. If possible, notice of the cancellation shall be given in the same manner as provided for notice of change in (b) of this rule.

(d) The provisions of (a) and (b) of this rule do not apply to a standing, special, or joint committee meeting scheduled after the date a conference committee has been chosen to consider amendments to or differences between versions of the general appropriation act. However, a person who chairs a standing, special, or joint committee shall post written notice of the time, place, and subject matter of a meeting at least 24 hours before the meeting.

(e) The provisions of (a) - (d) of this rule do not apply to meetings of

(1) the Rules Committee when it meets for the purpose of preparing the daily calendar;

(2) the Committee on Committees referred to in Rule 1(e); or

(3) standing, special, and joint committees when the committee meets during the interim between sessions.

(f) Each standing, special, and joint committee

(1) shall record its meetings electronically and prepare a log of the recording adequate to locate specific testimony;

(2) shall prepare minutes of each meeting of the committee on a standard form prescribed jointly by the Rules Committees of the house and senate; the minutes shall include

(A) a list of the names of each member present during the meeting;

(B) a list of the name and affiliation of each witness testifying before the committee;

(C) a brief statement of the position of the witness on the subject testified upon; and

(D) each amendment formally considered by the committee, the name of the member moving adoption of the amendment, the action taken on the amendment, and the yeas and nays if a committee member has requested a roll call vote on adoption of an amendment;

(3) shall maintain a chronological file of minutes, copies of which shall be made available upon request to committee members and the public; committee minutes, tapes and other materials of research value shall be delivered by the committee at the end of each session or each legislature to the legislative reference library for appropriate disposition;

(4) may make available to the Legislative Affairs Agency a copy of all minutes as a data base on the legislative computer system.

COMMITTEE RECORDS FORMS

Overview

The Committee Records Staff will gather, collate and disseminate information based on the return of the following completed forms to the Committee Records Office within the schedule provided.

Please submit to the Committee Records Staff the following completed forms:

1. a Committee Staff Identification form to be prepared and submitted to the C.R.O. the first (2) days upon the convening of the Alaska State Legislative session. This form will identify committee staff responsible for preparation and submission of committee minutes pursuant to Rule 23 of the Uniform Rules;

2. a Committee Minutes form to be completed and submitted to the C.R.O. within the next legislative day following the public hearing or committee meeting. A person who chairs a standing, special or joint committee is responsible for an electronic recording of committee proceedings pursuant to Rule 23 of the Uniform Rules;

3. a Committee Minutes Request form to be filled out in duplicate to the person who chairs the committee of which the meeting minutes are requested. One copy is to be retained by the chairperson with the duplicate copy to be sent to the C.R.O. the day in which the request was made.

4. a Public Hearing and Committee Meeting form to be used by committees of first referral for announcement of public hearings within the (5) days prior requirement and for announcement of committee meetings by 4:00 p.m. on the Thursday preceding the week in which the meeting is to be held pursuant to Rule 23, section (a) of the Rules.

February 4, 1982

Dear Constituents:

At the last minute, I had to cancel my trip to Anchorage. I am most sorry to not be with you today. Because of conditions beyond my control, I suddenly find myself chairman of two major standing committees--House Labor & Commerce, and House Health, Education and Social Services. Both committees have many bills to consider in this (hopefully) short session; thus weekends are fully used for research and scheduling.

By way of this letter, I introduce Mr. Jeff Barry, who is my administrative assistant. He has, on short notice, flown up at my expense to represent me. You can be most assured that Mr. Barry will forward your concerns to me, and proper follow-up action will be taken. I look forward to talking with you at our District 8 teleconference on Tuesday, February 16, at 8 PM.

Yours very truly,

Representative Terry Martin

jfm

November 30 through December 3 - Agenda to be announced later, depending on prior meetings for proposed legislation and current bills drafted or to be redrafted. Also, other subjects the committee feels should be addressed prior to the second session of the 12th Legislature.

Anchorage meetings will be held at the Legislative Affairs Office, 2nd floor, 1024 West 6th Avenue.
Fairbanks meetings will be held at the Legislative Info Office, 315 Barnette Street.

LEGISLATOR WARNS OF POLITICAL HUCKSTERS

State Representative Terry Martin today warned Anchorage residents to be on guard against political contribution solicitors out to make a fast buck off the State of Alaska.

The state contribution rebate program -- recently increased from $50 to $100 per individual -- is a lucrative target for hucksters masquerading as candidates, or for solicitors seeking cash for "worthwhile" political action committees, Martin said.

The state doled out nearly $1 million in cash and tax credits to 22,284 claimants in 1979 and 1980. Although no statistics are available for the current year, the state Department of Revenue expects to pass out $5 million in cash rebates to 50,000 claimants for the 1982 political season.

"Although this sounds like a large figure, it represents something less than a quarter of registered voters in Alaska," Martin said.

Next year will be an especially hot political season, Martin said. In addition to the statewide races of governor, lieutenant governor, and U.S. representative, most state House and Senate seats will be up for election under the new reapportionment plan.

"Not only do we now have the state bank-rolling campaigns, but the entire rebate program lends itself to widespread fraud and abuse," Martin said.

LEGISLATOR WARNS OF POLITICAL HUCKSTERS

State Representative Terry Martin is warning Alaska residents to be on guard against political contribution solicitors out to make a fast buck off the State of Alaska.

The state contribution rebate program -- recently increased from $50 to $100 per individual -- is a lucrative target for hucksters masquerading as candidates, or for solicitors seeking cash for "worthwhile" political action committees, Martin said.

The state doled out nearly $1 million in cash and tax credits to 22,284 claimants in 1979 and 1980. Although no statistics are available for the current year, the state Department of Revenue expects to pass out $5 million in cash rebates to 50,000 claimants for the 1982 political season.

"Although this sounds like a large figure, it represents something less than a quarter of registered voters in Alaska," Martin said.

Next year will be an especially hot political season, Martin said. In addition to the statewide races of governor, lieutenant governor and U.S. representative, most state House and Senate seats will be up for election under the new reapportionment plan.

"Not only do we now have the state bank-rolling campaigns, but the entire rebate program lends itself to widespread fraud and abuse," Martin said.

-- More --

"For example, some supporters of various candidates and groups are misleading potential contributors into believing they can be refunded for more than $100 in any given calendar year."

Not only can a person receive a refund from the state of up to $100 contributed, he also can receive an additional maximum $25 tax credit from the federal government for the same contribution. In other words, an individual can actually make a $25 profit for a $100 contribution.

However, Martin warned, a contributor can only claim a state refund if the candidate or political action group he is giving to is registered with the Alaska Public Offices Commission (APOC).

Before contributing, Martin said the individual should:

1) Make sure the person you give to has officially filed for elective office, and that the political action committee you want to contribute to is certified by APOC.

2) Be sure the person you give to is a serious candidate. APOC records show that declared candidates have used political contributions for non-campaign related expenses.

3) Don't let anyone deceive you into believing you can be refunded for more than $100 from the state.

4) Never give cash without a receipt if you expect a refund.

5) Be wary of professionals.

6) Don't give if you are opposed to state money being used to finance political campaigns.

Martin, a District 8 Republican, pointed out that Anchorage residents should be alerted to several House and Senate bills to be considered by the Legislature next session that would repeal the refund program.

-- More --

"There is strong support among members of the majority House Coalition and conservatives in the Senate to repeal this law," he said.

At a time when the public is critical of the high cost of political campaigns, Martin said, the state rebate program only encourages prospective candidates to get into the race early for the sole purpose of "double-dipping" into the state treasury.

Double-dipping is a term used to describe candidates who file before January 1 in order to collect $100 from an individual in each of two calendar years -- 1981 and 1982 -- even though the election may be more than a year away.

"This obviously ups the ante and encourages everyone to file early," Martin said.

Martin said he personally became concerned about double-dipping after several prospective House candidates encouraged him to file early in order to take advantage of the rebate program.

"I feel this is an issue in which all voters should have a say," Martin said. "This is why I feel the question should be placed on the ballot in 1982. Voters should decide whether they want state money used to finance political campaigns."

December 23, 1981

The Honorable Jay S. Hammond
Governor of Alaska
Pouch A
Juneau, Alaska 99811

Dear Governor Hammond:

During a hearing conducted by the House Health, Education and Social Services Committee on December 9 at the University of Alaska, Anchorage, students aired deep concern about the lack of housing on campus.

The Committee feels that the student housing problem has grown to such magnitude that it should be brought to your attention, as well as the Legislature's.

More than 500 students at the Anchorage campus have signed petitions urgently requesting that student housing in Anchorage be a major priority in the state's fiscal 1983 budget. Copies of the petitions are attached for your review.

Student housing in Anchorage, I believe, would prove to be a good investment for the state.

Not only would it help the over-all housing crunch, which has reached a crisis, but it would assist in keeping students from going Outside for their education.

Not only have local high school students indicated in surveys that a lack of housing is one reason why they attend college Outside, but some 300 students who dropped out of the University in the Fall cited a lack of housing and programs as primary reasons for leaving.

It also is estimated that from $20 million to $28 million in state student loans go with these students when they leave the state. Using a conservative economic multiplying factor of six, which represents the amount of money students would normally spend in the community, this means the Anchorage business community is losing about $150 million in revenue each year.

There are two proposed Committee bills you may be interested in. Both will be introduced early next session.

The first piece of legislation---a special appropriation to the University of Alaska---would help solve the immediate housing shortage at the University. It sets aside $2.2 million for the purchase, renovation and maintenance of the Carriage House.

The second proposal--also a special appropriation to the University--would earmark $15 million for construction of 300 units on the Anchorage campus. However, this bill would be a capital improvement project only, and would not present a constant strain on the university's operating budget.

The University would merely contract for construction. The on-campus units would then be leased, operated and maintained by the private sector, eliminating the need to put more employees on the University payroll. The student dining area also would be leased.

Let me also point out that Anchorage, the state's largest community, currently has absolutely no student housing. Fairbanks not only has student housing, but there is $10 million in the 1983 fiscal budget for additional housing and some $3 million for renovation of existing housing units. President Barton has requested $12 million for housing for the Juneau campus in the 1983 budget. The Board of Regents has approved the request.

Students who attend the Fairbanks campus pay $325 per semester, (four months) while students in Anchorage pay $400 to $450 per month for an apartment off-campus. And because students cannot afford to sign long-term lease agreements, they are easily bumped from these off-campus units.

It also costs a student nearly $6,000 a year to attend the University's Anchorage campus, while at the Fairbanks campus, it costs about $3,600 a year.

Student housing in Anchorage would have additional benefits. It would cut down on automobile traffic in the campus area which also would save on fuel. Reduced rental costs would result in smaller student loans and free up loan money for students who desperately need to borrow.

Again, the Committee feels that student housing at the Anchorage campus is long overdue.

The Committee is not only seeking your support in this matter, but any assistance the state administration can provide would be deeply appreciated.

Sincerely,

Representative Mike Beirne

Martin plans bill limiting regent terms

TIMES 12/10/81

Associated Press

State Rep. Terry Martin says he will propose during the 1982 legislative session that the terms of members of the University of Alaska Board of Regents be cut from eight years to five years.

The Anchorage Republican also said he might submit legislation requiring that regents be selected on the basis of population, rather than region.

Martin made the comments at a public public hearing on the UA budget. Students from the University of Alaska, Anchorage, and Anchorage Community College complained of inadequate facilities and overcrowded classrooms.

Larry Smith, the student body president at UAA, said funds for the 1982 summer session at the Anchorage campus had to be used to meet the demands of enrollment for the 1981 fall semester.

He asked legislators attending the meeting to back a $150,000 supplemental appropriation to meet the shortfall.

Rep. Sally Smith, D-Fairbanks, suggested the request be directed to the Board of Regents.

Martin said, "The students are frustrated and I'm frustrated with the Board of Regents and the administration. We shouldn't cop out. We have every right to tell the Board of Regents they're doing it wrong."

Highway hearing scheduled

A community hearing to review proposed highway and road projects in the Mountain View and Russian Jack Springs areas will be held tonight at Clark Junior High School, Room 108. State Rep. Terry Martin, who represents the area, said community councils with an interest in the projects have been invited in an effort to reach a consensus on projects to be considered in the legislative session. Uprgrading of Glenn Highway, Bragaw Street and Mountain View Drive and the proposed Boniface interchange will be discussed along with other projects proposed in the Anchorage Metropolitan Area Transportation Study. Representatives of the state Department of Transportation and Public Facilities will be on hand to give a presentation and answer questions. The hearing begins at 7:30 p.m.

12/8/81

From Daily News staff and wire reports

Rebate law pulls candidates out early

by Steve Rinehart
for The Times

Homer — A unique Alaska election law rather than tough competition or statewide reapportionment appears to be the reason for the sudden abundance of candidates filing for the 1982 elections, according to candidates and a state revenue official.

Gubernatorial candidate Tom Fink put it bluntly when campaigning in Homer last month: It's the money.

If not the major reason for filing early, one of the big ones is the state's campaign contribution rebate program, under which the state will now refund political contributions of up to $100 (last year it was $50). By stretching their campaigns over two calendar years, candidates or political action committees which have registered with the Alaska Public Offices Commission before the end of the year grant their supporters eligibility for two contribution rebates for one election.

And if filing early is a good investment for candidates, it can carry a reasonable return for contributors as well. Besides claiming up to $100 in rebates from the state, a person can claim the maximum $25 credit from the federal government, too.

This opportunity to fill campaign chests has not been lost on candidates or PACs. According to the state Department of Revenue, politicians and PACs are clamoring for rebate forms to send to potential supporters. For example, the Alaska branch of the National Education Association requested 5,000 rebate forms, according to the department's "forms manager," Colleen Brown.

Despite the demands, the department won't issue the rebate forms until the end of the year, she said.

Reapportionment puts almost all 60 seats in the Legislature up for election in 1982. The governorship and the capital move will also be included on next fall's ballot, guaranteeing a high-interest election.

"We're expecting a big year (for rebate claims)," Brown said, predicting nearly $5 million in contributions or some 50,000 claims.

Fink made no bones about it. Running for governor is expensive, he said. It's smart to file early to take maximum advantage of the refund program. Other candidates have been less specific. They need the extra couple of months this year to put their organizations together, they have said, or to overcome voter confusion about reapportionment. Of course, as a recently announced candidate agreed reluctantly, "It would be foolish not to build as large a treasury as possible."

But that's being greedy, said an Anchorage representative who opposes state-financed elections. Republican Terry Martin has circulated a news release accusing candidates, among them his competition, of taking undue advantage of the refund program, getting into the race early "for the sole purpose of double-dipping into the state treasury."

One of Martin's aides said the representative would not be filing for office until next year.

Revenue department figures show the rebate program is becoming ever more popular. In 1979, Brown said, 6,886 people filed for about $306,000 in rebates. In 1980, 15,457 filed for about $690,000 in rebates. Those years, the maximum refund was $50 and the average rebate was about $45. The department's estimate for the coming year is based on an expected average rebate of $90-95, Brown said.

There is no age limit on the refunds, Brown said. However, applicants must be able to demonstrate that they acted of their own free will. Parents cannot contribute on behalf of their children and secure rebates, for example, unless the child makes a conscious decision to back a candidate or an issue, she said.

The rebates were handled on income tax forms back when there was a state income tax. Since the tax has been repealed there are special forms, said Brown, the forms manager. All who filed for rebates in 1979 and 1980 will get this year's form in the mail. Others will be available at revenue department field offices, legislative information offices, the governor's office and other state offices.

The federal government will grant tax credits up to a maximum of $25 for the same contribution. So Alaskans can invest $100 in the candidate or PAC of their choice and get $125 back, for a 25 percent payoff on a "political investment" of a few months' duration.

MEMORANDUM

December 14, 1981

TO: Billy Barrier, director
Division of Legal Services

FROM: Representative Terry Martin, chairman T.H.M.
House Labor and Commerce Committee

Subj: Telecommunications

I am requesting that your office draft a House Concurrent Resolution spelling out our policy on statewide telecommunications. The sponsor is the House Labor and Commerce Committee.

Please incorporate the following in the Resolution:

-- Whereas a significant and increasing amount of public funds is being invested in telecommunications systems; and

-- Whereas it should be the role of state government to encourage and not compete with the private sector; and

-- Whereas the private sector which deals in Alaska telecommunications faces a crowding out by government in the wake of increasing state wealth; and

-- Whereas the private sector has been the foundation and vitality of the American Democratic and economic system; and

-- Whereas the Alaska State Legislature lacks a policy regarding the burgeoning telecommunications system;

Be it resolved that the Alaska State Legislature should take the following into account to serve as guidelines when considering telecommunications appropriations:

-- When and where possible, the state Divisions of Telecommunications should procure services from private enterprise or certified and franchised utilities and contract for the construction, management, operation and maintenance of telecommunications systems.

-- When and where possible, the state Divisions of Telecommunications should reduce or eliminate airwave interference of state owned or financed stations with privately owned and operated cable television stations.

-- Artificial regulatory and government barriers for growth and development of new and innovative services by the private sector should be removed.

-- Companies owned and operated by Alaska residents and based in Alaska should be given a competitive edge over Outside interests.

-- Alaska's villages should have the opportunity to own, operate and maintain their own satellite earth stations.

-- In-state programming or Bush programming can be beneficial to sectors of the Alaskan community. However, the Divisions of Telecommunications should not only assure that such programs are cost effective, but production of these programs should be available to the private sector on a contract or bid basis.

-- No commercial advertisements shall be carried in state funded or state subsidized programs or in programs transmitted by state funded or state subsidized satellite channels.

-- The Legislature should encourage commercial radio and television news coverage of the legislative sessions by making equipment, space and satellite time available to the private sector. This would serve as a meaningful and efficient and non-controversial method of communicating legislative affairs to the public.

Billy, the committee would like a draft of the resolution by January 1, so that copies can be available to the various parties interested in this legislation.

Thanks for your help.

"WHO'S KIDDING WHOM?" AWARD GOES TO TANANA

Tanana Valley Community College has been awarded the 1981 "Who's Kidding Whom?" award in education for the most imaginative courses strictly for survival of the institution.

In presenting the award, state Rep. Terry Martin, R-Anchorage, said TVCC barely edged out other community colleges with such creative non-credit course offerings as "Make-up for The Contemporary Woman," "Disco Partner Dancing," "Brandies, Liquors & Cordials," and a "Seminar on Menopause."

"I have presented this award only to demonstrate that post-secondary institutions have gone to extremes to justify their existence," said Martin, a member of the state House Finance Sub-committee on the University of Alaska's budget last session.

Martin this week released a report outlining what he calls the unnecessary competition among the state's community colleges for students and money.

Community colleges, in part, are allocated funds based on how many students they can attract to their respective campuses.

-- More --

"The recent change in laws in 1978 that allows the University to count persons taking non-credit courses offered under its umbrella, only to obtain a higher count of students, has most offensively been misused -- to gain more money to feed a bloated monster that seems to strive to reach all the citizens of Alaska under various disguises," Martin said.

For example, courses in "Fortune Telling" and "Corn Husk Dolls" were offered at Matanuska-Susitna Valley Community College during the 1979-80 school year. At Kodiak Community College, courses were given in "Furniture Arrangement," "Knives & Scissors, How to Sharpen," and "Pinata Workshop." And in Anchorage, "Principles of Occult Theory" and "Wines of The World" were offered.

"And the list goes on and on," Martin said. "The point is that courses offered at community colleges should be for students preparing for a four-year baccalaureate degree or for those preparing for a career requiring certain technical skills."

The Anchorage legislator said it would be more appropriate to offer such entertainment type courses through the community schools system or REA.

"The prestige of the University system of Alaska deteriorates in direct proportion as it becomes more involved with non-essential academic issues and activities," Martin said.

"Common understandings of the terms 'university' and 'community college' are severely strained when one re-evaluates the course offerings . . ."

MARTIN UNVEILS PLANS FOR UAA STUDENT HOUSING

The University of Alaska, Anchorage campus would get its first 300 units of student housing under plans disclosed today by Representative Terry Martin, vice chairman of the House Health, Education and Social Services Committee.

Martin said he will introduce legislation in January calling for $15 million in housing construction that could begin as early as next summer.

The on-campus units could be leased, operated and maintained by the private sector, he said, eliminating the need to put more employees on the University payroll. The student dining area could be catered.

"The lack of student housing on the Anchorage campus is causing a multitude of problems in the community," Martin said.

High rent in the open market, for example, adds a great deal to a student's educational costs and, in many cases, forces him to attend a college or university outside the state, he said.

And students renting off campus place an additional burden on an already tight Anchorage housing market.

"So far this year, some 300 students have dropped out of UAA, and they cite a lack of programs and housing as primary reasons for leaving," Martin said. "It is impossible to calculate the number of prospective UAA students forced to enroll in other schools because of the lack of housing at the Anchorage campus."

-- More --

Students who attend the Fairbanks campus pay $325 per semester (four months) while students who attend college in Alaska's largest city pay $400 to $450 per month for an apartment off campus.

"It costs a student nearly $6,000 a year to attend the University's Anchorage campus, while at the Fairbanks campus, where there is student housing, it costs about $3,600 a year," Martin said.

Martin said student housing would have additional benefits.

It would cut down on the automobile traffic in the University area. Students would save on fuel costs.

Reduced rental costs also would result in smaller student loans, freeing up loan money for students who need to borrow.

"Now is the time to appropriate funds for the long over due needs of student housing at the UAA campus," Martin said.

Rep. Martin warns of rebate fraud

Times 11-26-81

Rep. Terry Martin warned Anchorage residents to be on guard against soliciters out to make a fast buck off the state of Alaska.

The state contribution rebate program is a lucrative target for hucksters masquerading as candidates, or for solicitors seeking cash for "worthwhile" political action groups, Martin said.

Refundable campaign contributions recently increased from $50 to $100 per individual. The state doled out nearly $1 million in cash and tax credits to 22,284 claimants in 1979 and 1980. Although no statistics are available for this year, the state revenue department expects to pass out $5 million in cash rebates to 50,000 claimants, about one quarter of Alaska's registered voters.

"Not only do we now have the state bank-rolling campaigns, but the entire rebate program lends itself to widespread fraud and abuse," Martin said. He also noted that next year will be a particularly "hot" political season, with the pending election of the governor, lieutenant governor, U.S. Representative and many state House and Senate members.

Not only can voters receive a refund from the state for up to $100 for a political contribution, they can receive an additional $25 from the federal government for the same contribution, making it possible to actually makes a $25 profit from a $100 contribution.

Martin noted that at a time when the public is critical of the high cost of campaigns, the state rebate program encourages prospective candidates to get into the race early for the sole purpose of "double-dipping" into the state treasury.

Double-dipping is a term used to describe candidates who file before Jan. 1 in order to collect $100 from individuals in each of two calendar years. (Individuals are allowed a $100 refundable contribution per year.) "This obviously ups the ante and encourages everyone to file early," Martin said.

Martin said he became concerned about the double-dipping after several prospective House candidates encouraged him to file early in order to take advantage of the rebate program.

He said there is strong support among House coalition members and Senate conservatives to repeal the rebate law.

Martin said that a contributor can claim a state refund only if the candidate or political action group receiving the funds is registered with the Alaska Public Offices Commission.

Before contributing, Martin said individuals should:

— Be sure the person you give to has officially filed for elective office and that the political action committee you give to is certified by the commission.

— Make sure the person you are contributing to is a serious candidate. Commission records show candidates have used political contributions for non-campaign expenses.

— Don't let anyone deceive you into believing that the state will refund more than $100.

— Never give cash without a receipt if you expect a refund.

— Be wary of professionals.

— Don't give if you are opposed to state money being used to finance political campaigns.

HIGHWAY PROJECTS TO GET AIRING

Proposed highway and road projects for the Mountain View and Russian Jack Springs areas will be discussed during a community hearing at Clark Junior High School, Room 108, at 7:30 p.m. Tuesday, December 8.

State Representative Terry Martin, who represents the area (District 8), said today community councils in the area have been invited to attend the meeting in an effort to reach consensus on construction projects to be considered in the up-coming legislative session.

"Residents in the area are urged to attend the meeting," Martin said. "This may be their final opportunity to publicly address these proposals prior to the session."

Projects to be discussed include upgrading of Glenn Highway, Bragaw Street, Mountain View Drive and the proposed Boniface interchange and other projects proposed in the Anchorage Metropolitan Area Transportation Study (AMATS).

Martin added that the State Department of Transportation and Public Facilities will be on hand to give a presentation and answer questions regarding the AMATS recommendations.

House coalition lists priorities for new session

by Sean Hanlon 12-4-81
Times Writer

The coalition of Republicans, Democrats and Libertarians which took control of the Alaska House of Representatives last year will be dusting off some old bills — many in the crime prevention field — when the Legislature convenes in January.

The legislative program emerged from a caucus of about 20 coalition members held in Anchorage Wednesday. Specific priorities will be set the week before the session, when the coalition will caucus in Juneau.

House Speaker Joe Hayes, R-Anchorage, who replaced Jim Duncan, D-Juneau, as a result of the coup, said most of the coalition's legislative package is sitting in committee waiting for action.

Anti-crime legislation is a top priority of the coalition. Their program calls for election of the attorney general and consideration of bills now in the Judiciary Committee to toughen penalties for violent crime, sexual assault and drug abuse.

Ramona Barnes, R-Anchorage, who was made chairman of the Judiciary Committee after the coup, said the crime package urges many of the same reforms endorsed in the recent preliminary report of the Anchorage Crime Commission.

One bill, which Barnes said "has been around in some form or another for the past six years," involves a comprehensive overhaul of Alaska drug laws to bring them in line with federal laws. This bill does not, however, provide for the re-criminalization of marijuana, which the crime commission recommended.

Another crime bill would set specific minimum penalities of between five and 99 years for persons convicted of rape. A third bill would prevent the release on bail of persons awaiting appeal on their convictions of violent crimes such as murder, rape and armed robbery.

"There's considerable public support for all these bills," Barnes said. "I would expect that you would see some action on these bills early in the session."

The coalition's outline of its legislative program also deals with tax relief, debt reduction, land disposal, tourism development and fisheries access abuse.

Property tax relief would be provided through revenue sharing or a direct grant program such as Senate Bill 168, which this year funded millions of dollars in capital projects and allowed cities to appropriate unspent money for tax relief, Hayes said.

The majority coalition's continued stability depends, in part, on the ability of the Republicans to keep the Libertarians and renegade Democrats in the fold. According to Hayes, some coalition legislation is designed to appeal to the interest of the rural Democrats who joined in the move to oust the Democratic leadership of the House.

"They're naturally interested in the improvement of the transportation infrastructure," Hayes said. "They're looking at economic development as opposed to the great number of social programs that may have been offered by the other leadership."

Al Adams, D-Kotzebue, who was named chairman of the Finance Committee after the coup, outlined the objectives of coalition Democrats.

"Our objective is we're still going to be working on basic needs in the rural areas — airports, schools, housing, education." Of particular interest, Adams said is the fate of Mt. Edgecumbe, a high school near Sitka which may soon be closed by the U.S. Bureau of Indian Affairs for budget reasons.

Adams expressed his support for the coalition and said the Democrats plan to stay with the group until the end of the session.

"As far as I'm concerned, the Democrats in the coalition support the coalition because it is necessary and is looking out for the benefits and services of all Alaskans," Adams said.

Libertarian participation in the coalition resulted from a promise that several bills introduced by Dick Randolph, L-Fairbanks, which languished for months in committee would finally be sent to the floor.

"He's got several pieces of legislation that are his pets. As a member of the majority coalition, he has reason to expect that his issues will move out of committee and have the opportunity to be debated on the floor. Of course, that doesn't mean that everyone's going to vote for them," Hayes said.

Randolph wants the state to make interest-free loans of $10,000 to every adult Alaskan and set up the permanent fund as a trust from which adult Alaskans receive yearly dividends.

Hayes hopes to limit the session to between 100 and 120 days but said the session could be extended under certain circumstances.

"The pattern which has been established of meeting for 140, 150 or 160 days is completely unacceptable, unnecessary, and unproductive," Hayes said.

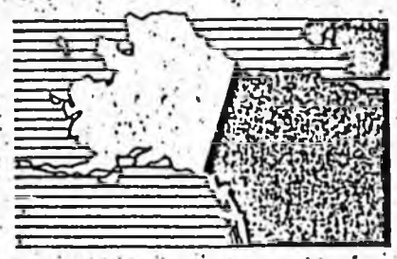
UA ills may prompt restructuring of board of regents

By STAN JONES
Daily News reporter

The structure of the University of Alaska Board of Regents should be altered to make it more responsive to the needs of individual campuses, students and legislators said Wednesday night at a public hearing on the university budget.

Representatives from student governments at Anchorage Community College (ACC) and the University of Alaska, Anchorage (UAA) complained of inadequate facilities, overcrowded classrooms, and widespread course closures caused by the failure of local campus budgets to keep pace with the growth in enrollment.

Larry Smith, student body president at UAA, said funds programmed for the 1982 summer session had to be used to meet the enrollment demands for this fall's semester, and asked the legislators for a



$150,000 supplemental appropriation to meet the looming shortfall.

Rep. Sally Smith, D-Fairbanks, suggested that such requests should be channeled through the regents, but Rep. Terry Martin, R-Anchorage, disagreed. "The students are frustrated and I'm frustrated with the board of regents and the administration," he responded. "We shouldn't cop out. We have every right to tell the board of regents they're doing it wrong."

Martin said he planned to submit legislation that would shorten the regents' terms to five years from the current eight and possibly require that they be appointed on a population basis.

Martin said he objected to some items in this year's university budget submitted by the regents, including a $22 million building in Fairbanks for the statewide university staff and a $24 million construction project at Tanana Valley Community College, also in Fairbanks. Martin said he also objected to a $55 million building program for the University of Alaska, Juneau, which he claimed has only 157 students.

Anchorage, he said, is in line for only one $20 million in 1987.

Anchorage regent John Shively said he felt the eight-year terms probably had been adopted to insulate the regents from minor political pressures, but that switching to five-year terms probably would not make much difference.

LEGISLATIVE COMMITTEE SCHEDULES FINAL HEARINGS

The State House Labor and Commerce Committee will hold a final round of interim public hearings on government permits and workers' compensation next week in Anchorage.

Hearings will be held at the Legislative Affairs Office, 1024 West 6th Avenue.

Committee Chairman Terry Martin has scheduled a hearing on proposed legislation designed to streamline the governmental permitting process from 9 a.m. to 4:30 p.m. Wednesday, December 2.

The Committee also will take public testimony on House Bill 159 regarding proposed revisions of the state workers' compensation law from 9 a.m. to noon Thursday, December 3.

Written testimony and tapes of hearings held in Anchorage in September and in Fairbanks in October are available for public review at the Committee office, 921 West 6th Avenue.

For further information, feel free to stop by the Committee office, or call 272-6922.

REP TERRY MARTIN
465-4943

NOT ALL THE FAVORABLE PUBLICITY ALASKA IS RECEIVING THIS YEAR COST $150,000 PER ISSUE, AS DID THE CONTROVERSIAL SPREAD ON VOGUE MAGAZINE A FEW WEEKS AGO. THE JUST-RELEASED "RUNNER'S GUIDE TO THE U.S.A.', BY MARTINA D'ALTON, A 400-PAGE PEDESTRIAN TRAVEL HANDBOOK, HAS AN EIGHT-SECTION ON ALASKA, FEATURING SEVERAL OF THE MORE POPULAR DISTANCE RACES HELD IN THE STATE.

REPRESENTATIVE TERRY MARTIN, HIMSELF AN AVID MARATHONER AND ORGANIZER OF THE POPULAR MAYOR'S MIDNIGHT SUN MARATHON IN ANCHORAGE, PROVIDED INFORMATION AND MAPS FOR THE PUBLICATION, WAS ENTHUSIASTIC ABOUT THE PUBLICITY IT WOULD PROVIDE FOR ALASKA. "RUNNING IS THE FASTEST-GROWING SPORT IN AMERICA, AND HAS MORE DEVOTEES THAN NEARLY ANY OTHER ATHLETIC PASTIME. THIS BOOK WILL REACH UNTOLD THOUSANDS OF PEOPLE AND IT DIDN'T COST THE ALASKAN TAXPAYERS A DIME. THERE ARE NO GLACICERS OR POLAR BEARS OR SEXY GIRLS IN THE BOOK BUT THERE IS A LOT OF ATTRACTIVE AND WORTHWHILE INFORMATION IN IT WHICH WILL CERTAINLY DRAW RUNNERS TO ALASKA." MARTIN SAID THAT HE ALREADY HAS SOME THREE DOZEN APPLICANTS FOR THIS YEAR'S MAYOR'S MARATHON, THE FARTHEST AWAY FROM SAUDI ARABIA. HE SAID THERE IS CONSIDERABLE INTEREST AMONG RUNNERS IN COMBINING AN ALASKAN VACATION WITH ONE OR MORE OF THE SUMMERTIME RACES IN THE STATE. "THEY ESPECIALLY LIKE THE CLEAN ALASKAN AIR TO RUN IN, WHICH THEY CAN'T FIND IN MANY OTHER PLACES."

"THE RUNNER'S GUIDE" IS PUBLISHED BY SUMMIT BOOKS, 1230 AVENUE OF THE AMERICAS, NEW YORK 10020, AT $6.95.

State lawmaker lashes out at non-academic college courses

Associated Press

Fairbanks — Sen. William Proxmire, D-Wis., has his "Golden Fleece" award for illustrating what he believes to be the wasteful practices in the federal government. State Rep. Terry Martin, R Anchorage, has his "Who's Kidding Whom" award for Alaska.

And this year's winner is Tanana Valley Community College.

Martin is incensed by such course offerings as "Make-up For the Contemporary Woman;" "Disco Partner Dancing;" "Brandies, Liquors and Cordials," and "Seminar on Menopause."

But those courses barely edged out Matanuska-Susitna Valley Community College's "Furniture Arrangement" and "Knives and Scissors, How to Sharpen;" Kodiak Community College's "Principles of Occult Theory," and Anchorage Community College's "Wines of the World," Martin said in a news release.

"I have presented this award only to demonstrate that post secondary institutions have gone to extremes to justify their existence," Martin said.

TVCC President Rod Enos said all non-credit courses at the school are self-supporting and wanted by the taxpayer.

"They pay for their own supplies and their own instruction" through fees and material charges, he said.

Martin said community colleges should be offering courses "for students preparing for a four-year baccalaureate degree or those preparing for a career requiring technical skills."

The problem arises, Martin said, from a change in the law in 1978 that allowed schools to count persons taking non-credit courses when calculating entitlements.

It has "most offensively been misused — to gain more money to feed a bloated monster that seems to strive to reach all the citizens of Alaska under various disguises."

He said "entertainment-type" courses could be offered more appropriately through local schools or regional education systems.

Barnes seeks third term in new district

Rep. Ramona Barnes, R-Anchorage, filed Tuesday in East Anchorage's District 14 for a third term in the state House.

Barnes, 43, filed for seat A in the double member district. Barnes is the only incumbent living in that district. No one else has filed against her or for seat B.

The only individual who has ever run from this newly carved House district was Cy Barker.

Barnes, who was first elected to the House in 1978, said she decided to get into next year's race early "because I feel it's necessary to inform (other Republican hopefuls) thinking of running so they don't file against me."

There is growing speculation that Anchorage School Board member Walt Furnace, a Republican, will file for seat B.

Barnes, who replaced Rep. Don Clocksin as chairman of the House Judiciary Committee in the aftermath of the leadership shakeup June 12, said she intends to push for early action on the violent crime bills now before her committee, especially those dealing with sexual assault.

The Anchorage Republican gained some notariety this year for her leadership roll in advocating the position of urban sportsmen on the hotly contested subsistence issue.

"The present leadership coalition is committed to conducting state business in a responsible and timely fashion," Barnes said. "And I hope to have the opportunity to bring that to pass in the next legislative session."

"They pay for their own supplies and their own instruction" through fees and material charges, he said.

Martin said community colleges should be offering courses "for students preparing for a four-year baccalaureate degree or those preparing for a career requiring technical skills."

The problem arises, Martin said, from a change in the law in 1978 that allowed schools to count persons taking non-credit courses when calculating entitlements.

It has "most offensively been misused — to gain more money to feed a bloated monster that seems to strive to reach all the citizens of Alaska under various disguises."

He said "entertainment-type" courses could be offered more appropriately through local schools or regional education systems.

Martin says Mulcahy dome isn't what he had in mind

By JIM ERICKSON
Daily News correspondent

Representative Terry Martin (R-Anchorage) says he is the "culprit" behind the move to put a dome over Mulcahy Stadium, but he contends a dome isn't what he had in mind.

A May 15 story in the Anchorage Daily News reported on the confusion surrounding a $25,000 grant made to the municipality of Anchorage during the final days of the legislative session by the Free Conference Committee. That funding called for a feasibility study on the shielding of Mulcahy Stadium from the elements, perhaps with a dome.

"I'm the culprit," Martin told the News May 16. "Basically what happened was, I had been keeping it quiet because I didn't want any opposition to it."

Martin, who was not a member of the Free Conference Committee, said that, while he had asked House minority leader Joe Hayes to put funding for the study on the special projects list, he was surprised to find it in the budget. " I had been told it was cut out... I didn't know it was there until I saw the final budget," he said.

"My main emphasis," he added, "wasn't to put a dome over Mulcahy, the baseball field... this has always been a participatory community. We did not want an elaborate stadium, we just wanted to protect it from the outside elements."

Martin stressed his intent was to provide a year-round playing field — "nothing fancy, just four walls and an arched roof" — for Anchorage residents, along the line of East coast fieldhouses.

"I don't know what it's gonna cost, but it's nowhere near the umpteen million they've talked about before," he said.

Martin said that while he probably "should have," he did not discuss the project with municipal officials before lobbying to have it put in the budget.

Free Conference Committee member Bill Sumner (R-Anchorage), who inserted the grant along with a $50,000 appropriation to pave the parking lot at Mulcahy, could not remember talking to Martin specifically about the project. "He (Martin) has been all along a supporter of athletic programs... this particular interest had parallel support (among the Free Conference Committee members)," Sumner said.

Martin did request an estimate of preliminary costs of the project from Dick Holden, Deputy Commissioner for Planning and Research in the Department of Transportion.

Holden said his department provided Martin with two estimates, one for a cursory review — " a quick and dirty feasibility study," Holden said — detailing what kind of structure might be suitable for the area. Holden said his department estimated the cost of such a study would be about $25,000.

The second estimate was for a "full-fledged feasibility study," which would cost approximately $60,000, including the cost of the cursory review, he said.

Holden added that a "schematic design" study, estimating actual cost of a specific building and including structural, ventil and seismic analysis, woul about $120,000.

Martin said he thinks the s ture could be built for a " rea ble cost," and would like t building funds budgeted for year out of the state's general f

For that to happen "we ca over one and one half, two m dollars," in building costs, he s

Delta Rep. Pappy Moss with Anchorage Republican Rep. Terry Martin, left, and Eagle River Rep. Randy Phillips, also a Republican.

Help for Chrysler?

Moss proposes loan for automaker

By The Associated Press

Worried about Alaska's image as filthy rich "blue-eyed Arabs," state Rep. Pappy Moss has suggested the state loan $400 million of its multi-billion dollar surplus to the ailing Chrysler Corp.

Moss says he's growing more and more concerned that the federal government is about to "stick its hands in our hip pocket" and grab some of Alaska's vast oil wealth.

"I want to let them know we're not blue-eyed Arabs and that we are concerned with the national interest," the Delta Junction Democrat said today. "I want to protect Alaska's image...and our future bankroll."

Moss said discussions about a possible loan are in the preliminary stages and that his staff plans to talk with Alaska's congressional delegation and legislative lawyers before deciding whether to go ahead and push for the loan.

An aide to Moss called Chrysler Corp. Wednesday to talk about a possible loan. "They're real interested," Moss said.

Chrysler Corp. isn't the only company under consideration. Moss said International Harvester or even a financially strapped city such as New York or Cleveland would be a possible borrower.

The 1981 Legislature is in the enviable position of having an unprecedented $5.5 billion to spend — more than ever before, and at least $3 billion more than is needed to run the state bureaucracy, according to Gov. Jay Hammond's budget proposal.

Moss acknowledges he is worried his suggestion will prompt a backlash of criticism from Alaskans who think the state's money should be invested in Alaska. He responds by arguing there's an increasing chance that many of the poorer states will convince Uncle Sam to reach into Alaska's treasury.

House bill allowing district jump fails

Associated Press

Juneau — Amid debate that deteriorated into sharp partisan jabs, the House has defeated a bill that an Anchorage lawmaker said would create a new breed of "sleeping bag politicians" in Alaska.

Lawmakers voted 19-21 against a measure Wednesday which would have extended by one month the deadline for declaring candidacy for the 13th Legislature.

Rep. Brian Rogers, D-Fairbanks, said the bill (HB555 am) he introduced would let candidates review final recommendations for redistricting the state's legislative seats before deciding which area they want to represent and moving if necessary.

But Rep. Fr ck Halford, R-Chugiak, said putting off from June 1, 1982 to July 1, 1982 the deadline for declaring candidacy fo: the next Legislature "allows political carpetbaggers to jump districts."

Rep. Terry Martin, R-Anchorage, said the bill "would be beneficial to the sleeping bag politician. This is a very selfish piece of legislation."

But Rogers strenuously objected to the charges, and pointed out that under proposed redistricting plans he is the only member of the Fairbanks delegation living in the district he plans to file for in 1982.

He said the reapportionment board has until June 10 to make final recommendations for redistricting legislative seats. Then Gov. Jay Hammond has 90 days to approve a final plan.

State law requires candidates to live in the districts they wish to represent for one year before filing for office. The existing deadline of June 1 would not give lawmakers enough time to review the recommended redistricting plan, and move if necessary, Rogers said.

Rep. Pappy Moss, D-Delta Junction, was one of three Democrats voting against the bill. He said the measure is "silly. If you can't fight it out in the district you are in, you shouldn't be do n here."

Delaying the filing deadline also would shorten political campaigns, said Rep. Mike Miller, D-Juneau.

'Sleeping bag' politician bill defeated in House

Amid debate that deteriorated into sharp partisan jabs, the House has defeated a bill that an Anchorage lawmaker said would create a new breed of "sleeping bag politicians" in Alaska.

Lawmakers voted 19-21 against a measure on Wednesday which would have extended by one month the deadline for declaring candidacy for the 13th Legislature.

Rep. Brian Rogers, D-Fairbanks, said the bill (HB555 am) he introduced would let candidates review final recommendations for redistricting the state's legislative seats before deciding which area they want to represent and moving if necessary.

But Rep. Rick Halford, R-Chugiak, said putting off from June 1, 1982 to July 1, 1982 the deadline for declaring candidacy for the next Legislature "allows political carpetbaggers to jump districts."

Rep. Terry Martin, R-Anchorage, said the bill "would be beneficial to the sleeping bag politician. This is a very selfish piece of legislation."

But Rogers strenuously objected to the charges, and pointed out that under proposed redistricting plans he is the only member of the Fairbanks delegation living in the district he plans to file for in 1982.

He said the reapportionment board has until June 10 to make final recommendations for redistricting legislative seats.

THE ALASKA RAILR

House kills abortion amendment

Associated Press

Juneau — House lawmakers killed an amendment Thursday night which would have blocked hospitals from receiving state funds if they perform elective abortions.

The amendment was proposed to a hospital aid bill, which won House approval following the abortion debate.

Rep. Terry Martin, R-Anchorage, proposed the amendment to prevent hospitals from collecting state funds unless the facility refused to perform abortions except when a mother's life is threatened, or if the pregnancy is the result of rape or incest.

But Rep. Don Clocksin, D-Anchorage, said the amendment would prohibit hospitals from performing abortions, a likely violation of the state constitution. Lawmakers voted 14-25 against the amendment.

The bill introduced by Rep. Ernie Haugen, R-Petersburg, would more than double revenue sharing money which pays part of the operating costs of nearly every hospital and health facility in the state.

Funding would be boosted from $75,000 to $250,000 for hospitals with more than 10 beds, and from $25,000 to $50,000 for facilities with less than 10 beds. Also, health facilities would receive double the current level of state funding.

The measure (CSHB131 HESS) would cost an estimated $2.4 million in fiscal 1982.

Rep. Russ Meekins, D-Anchorage, said he "reluctantly" voted for

Martin's amendment because he objects to abortions in some cases. But in a speech from the House floor, he said "doctors should make decisions on a moral basis, not an economic basis . . . This kind of amendment works like a financial club."

Meekins said he would prefer to handle the abortion issue "head on" in legislation aimed at changing abortion laws.

Voting in favor of Martin's amendment were Reps. Meekins, Martin, Mitch Abood, R-Anchorage; Charles Anderson, R-Anchorage; Ramona Barnes, R-Anchorage; Mike Beirne, R-Anchorage; Bernie Bylsma, R-Anchorage; Jim Duncan, D-Juneau; Rick Halford, R-Chugiak; Joe Hayes, Anchorage; Vern Hurlbert, D-Sleetmute; Ray Metcalfe, R-Anchorage; Mike Miller, D-Juneau, and Pat O'Connell, R-Soldotna.

In other action, the House:

— Voted 27-12 in favor of a bill (CSSSHB43 Finance) introduced by Rep. Thelma Buchholdt, D-Anchorage, which would make private, nonprofit child care facilities eligible for state loans of up to $50,000 for construction, renovation and equipment.

The bill also would allow grants to child care facilities of up $50 per month for each child to fund operating expenses. The measure would cost an estimated $1.7 million in fiscal 1982.

— Voted 36-2 for a bill introduced by Rep. Hugh Malone, D-Kenai, which would allow municipalities to exempt residential property from local taxes, when approved by voters. Existing law allows municipalities to exempt to $10,000 of the value of a home from taxes.

Minority Leader Joe Hayes, R-Anchorage, gave notice of reconsideration on his vote on the bill (HB421), which means it may come up for another vote today.

Certain volunteer fire departments could get state grants of $10 per person living in the area served by the department, under a bill introduced by Malone that was unanimously approved by the House.

Martin Optimistic Over New Bill On Moving Capital

As many as 24 members of the state House of Representatives may co-sponsor a bill which would allow the Matanuska - Susitna Borough to develop a new state capital city at Willow, according to Rep. Terry Martin.

Martin said legislators from Southcentral Alaska are to meet in Juneau today with Matanuska-Susitna mayor Don Larson to review legislation prepared by the borough.

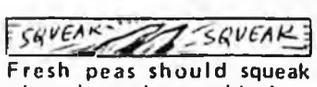
Although the estimate of 24 co-sponsors may be high, Martin said he feels the necessary 21 votes to assure passage would be gained. Support has been expressed by representatives from Bush areas, who according to Martin are not opposed to moving the capital but who do not support large expenditures of state funds which would impact Bush projects.

In other matters discussed in a recap of legislature activities, Martin said a salary increase scheduled suggested by the state salary and emoluments commission is in for rough sailing. The bill has twice been sent back for additional committee work, Martin said.

Taxpayers were saved some money this week, Martin said, when a substitute solution was suggested for connecting South Naknek with North Naknek. An appropriation of $22 million had been asked to build a bridge between the two islands. That state presently is paying $32,400 per year to fly students from one location to schools in the other.

Martin said that House Speaker Terry Gardiner suggested that instead of a bridge, the state should purchase a Hovercraft at a cost of $100,000. Such a craft is presently in use in the Ketchikan area, he said, to ferry passengers between populated areas which cannot be connected by bridge. Martin said the sponsor of the appropriation agreed with Gardiner's suggestion.

A request for $619 million to implement disposal of 50,000 acres of state land has created a furor in the House, Martin said. A request for that amount was made Monday by the state Division of Lands to fund surveys, access improvements and water and sewer programs. An appropriation of $13 million had been made last year and legislators were surprised to learn that the money had been expended in administrative work, Martin said, with no actual surveying of land accomplished.



Fresh peas should squeak when the pods are rubbed together. Store them unshelled in your refrigerator.

State House Gets Tougher On Gas Line Money Request

JUNEAU (AP) — The Alaska louse has voted overwhelmingly to xpand and strengthen its "wait and ee" approach to state financial help or the Alaska Highway natural gas ipeline.

And the Monday action erupted nto one of the legislative session's irst public debates over whether to ive any state financial assistance to lorthwest Alaskan Pipeline Cc., ponsor of the Alaska portion of the talled pipeline project.

With Resources Committee hairman Bill Miles saying it would e "absolutely irresponsible" to do therwise, the House said more in- ative approval of any revenue bond inancing plan, rather than letting he plan go into effect next year un- ess it was voted down.

Meekins cited increasing num- ers of lobbyists and financing re- ated advertising. He said his propo- al would make sure that backers would have to seek traditional af- irmative approval and "have to rove it's a good idea."

The House passed both a bill HB438), after adding the affirma- ve action amendment, and a resolu- on (HCR20) on final votes of 37-1 ormation is needed before the laska Gas Pipeline Financing uthority can move closer to issuing billion in tax-exempt revenue onds for Northwest.

The House has previously said it doesn't have enough information to act on Northwest's request for $500 million in direct state investment.

"We're still asking the same questions we were asking a year ago,' Miles said.

House Finance Committee chairman Russ Meekins proposed — and House members overwhelmingly agreed — to change part of the proposal to require affirmative legis- (Rep. Brian Rogers, D-Fairbanks, voting against) and 24-5. The financing authority was required to report back to the Legislature this year, and the measures essentially would put the question off until next year.

Looming over the issue was whether Senate failure to pass the House proposals would actually kill the bonding authority.

Miles said it was an open question but added that the Legislature's top lawyer said he doubts Senate inaction would eliminate the body. But Rogers disagreed.

Meanwhile, Congress must approve the tax exemption on the revenue bonds before they can be issued.

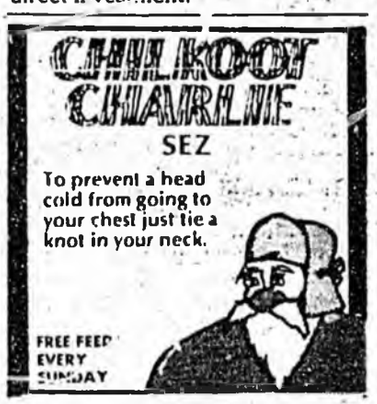
Rogers said the House bill "puts roadblocks" in the path of the financing authority and could delay financing.

Meekins, D-Anchorage, said he was "ready to say no to both the revenue bonding authority and the $500 million . . . despite the . . . advertising campaign."

Anchorage Republican Terry Martin said all legislators opposed to a Canadian pipeline should quit "kidding" and vote against all measures having to do with a Canadian line. An all-Alaska project would provide jobs "all up and down the line," he said.

Fairbanks Democrat Charlie Parr said the revenue bonds were not like the proposed direct investment. With the bonds, the state wouldn't be risking any money, and issuing the bonds could include provisions for Alaska hire, he said.

He said he didn't think there were currently two votes in the House for direct investment.



Route Issue Delays Line

Local College Center Escapes Wrath Of Legislator

Absent in a report by Rep. Terry Martin which blasts non-credit course offerings at community colleges in the state is any reference to Chugiak - Eagle River College Center, an extension of Anchorage Community College which operates as an arm of the University of Alaska.

Omission of the local college is deserved, according to its director. Of a total of 52 course offerings listed in a brochure for the Fall '81 semester, only three are non-credit. Two are adult basic education classes designed to lead to an equivalency of high school graduation. The third is a class on wine tasting and liquer selection.

All other course offerings are classes with college credit. They include bookkeeping and accounting, vocabulary development, mathematics, psychology, government, introduction to criminal justice. Three less usual classes are listed — dog mushing, fall and winter plant care and International Morse code. Credits range from one to three with the vast majority full three-credit classes.

Martin, a Republican from this district, served on a House Finance sub-committee on the University of Alaska budget. He charged that some community colleges in the state have "misused" changes in state laws to offer "creative" courses designed to lure more students merely to increase enrollment counts in order to gain more state money. He said such courses as wine tasting, furniture arrangement and corn husk doll-making should be left to community schools programs which also operate in part on grants from the state but usually use volunteer instructors.

Dr. James Irany, director of the Chugiak - Eagle River College Center, asked not to be quoted in response to Martin's report.

He did say, however, that the college center here does not compete with the local community schools program which is active. He said course offerings are coordinated between the two educational programs and "we have an excellent relationship. I find we're both doing better under that arrangement."

Irany defended the only non-credit course on his offering list, saying the wine tasting class has grown over the past years from 10 to 15 students and last year had more than 30. It is in demand, he said, as are many of the other offerings. He said this area has room enough for the dog mushing class which has drawn many students from Anchorage as well as local residents.

The Chugiak - Eagle River College Center, Irany said, is "a good example" of what a community college can do. He said it does not have the expense of a campus and offers "a good course offering" with most of those courses leading toward a degree.

Classes are offered during evening hours except for one ABE daytime class. Seven will be held at the college offices in the Parkgate Building, two will be held at Eagle River Correctional Center, two will be at Birchwood Elementary and the remainder will be in classrooms at Chugiak High School. The wine tasting class will be held at The Villa.

Registration for classes is now underway at the college office in the Parkgate Building from 9 a.m. to 6 p.m. daily. Classes begin the week of Sept. 8.

Martin Hits Non-Credit Classes As College Raid On Funding

The 1981 "Who's Kidding Whom?" award in education for "the most imaginative courses strictly for survival of the institution" has been given by Rep. Terry Martin to Tanana Valley Community College.

Announcement of the award was coupled with a report issued by Martin which blasted what he called unnecessary competition among community colleges for students and money.

Martin, a member of the House Finance Sub-committee on the University of Alaska budget last session, said community colleges have "misused" a 1973 change in state laws which allow the university to count persons taking non-credit courses in its enrollment. Many have gone far afield, he indicated, to offer non-credit courses as a means to gain a higher count of students "to gain more money to feed a bloated monster that seems to strive to reach all the citizens of Alaska under various disguises."

As examples, he cited courses in "Fortune Telling" and "Corn Husk Dolls" offered at Matanuska-Susitna Valley Community College during the 1979-80 school year. At Kodiak Community College, the legislator said course offerings included "Furniture Arrangement," "Knives & Scissors, How to Sharpen" and "Pinata Workshop." In Anchorage, he said, courses on "Principles of Occult Theory" and "Wines of the World" were offered.

It would be more appropriate, Martin said, to offer such "entertainment type' courses through the community schools system. The university's community college system, he said, "should be for students preparing for a four-year baccalaureate degree or for those preparing for a career requiring certain technical skills."

In singling out the Tanana Valley school, Martin cited "creative" courses offerings of "Make-Up for the Contemporary Woman," "Disco Partner Dancing," "Brandies, Liquors & Cordials," and a "Seminar on Menopause."

Care Of Game Meat

By Pat Aune
Extension Home Economist

The Hunter Returns is a publication written for the big game hunter. Field care of the animal (moose, deer or caribou) affects the quality of the meat. Gutting and cooling the carcass, casing the meat to protect it from insects, and field cutting for transportation are discussed.

Aging the carcass, letting it hang at temperatures between 35 degrees and 40 degrees, allows body enzymes to work on muscle tissue and tenderizes the meat. How long does an animal need to age? Large, older animals may need a week or two. Young, small animals from 36-48 hours.

Butchering at home is not easy. It requires advance planning so you have the right equipment and do a good job. Sharp meat saws and butcher knives are essential. A knife sharpener will also be needed during this process. A large flat surface at waist height

August 11, 1981

Dear Editor:

As a member of the state House Finance Subcommittee on the University of Alaska's budget last session, I feel compelled to point out a serious problem in our post-secondary educational system -- the unnecessary competition among our community colleges for students and money.

The most recent controversy springing from the closure of Chukchi Community College in Kotzebue provides a good example, a case where officials ignored two guidelines in establishing community colleges.

Senator Frank Ferguson of Kotzebue is absolutely correct in his efforts to close the college. He believes that Chukchi shouldn't be operated as a community college when the institution is not meeting the needs of the people in his area, especially when you consider Northwest Community College in Nome is nearby. When Chukchi opened, predictably, Northwest's enrollment dropped. Here you had two colleges competing for a limited number of students.

As Senator Ferguson suggests, it would be much more reasonable to return to the former system where practical extension courses were offered through the Northwest Arctic School District. Then those students who live in Kotzebue who want to go to a community college in preparation for a four-year baccalaureate degree can take a short flight to nearby Northwest Community College in Nome.

One wonders whether University of Alaska officials and the Board of Regents were so worried about competition they started Chukchi too soon, sacrificing the credibility of Northwest Community College and, in doing so, violated the two major guidelines -- that the community college should be established for an area of 12,000 residents and that community colleges should maintain at least 200 fulltime students to be viable.

A quick look at enrollment statistics at Northwest and Chukchi between 1978 and 1980 demonstrates the point. Between the Fall of 1978 and Fall of

1980, enrollment at Northwest dropped from 90 to 49 full-time students. During the same period, enrollment at Chukchi increased from 29 to 65 full-time students.

It is quite clear that Chukchi has been detrimental to Northwest's growth. It also is clear that recent statements made by Dr. Patrick O'Rourke, former chancellor of Alaska's community college system, demonstrates a double standard that has contributed to the problem.

Before a House interim committee this year, Dr. O'Rourke said that for a state of 400,000 people "thirteen separately accredited institutions of higher education are too many" and that "students whose ultimate goal is a baccalaureate degree are probably better off enrolling from the start in universities if such is available to them."

Yet in a newspaper article, O'Rourke defends the community college system by laying the blame for lack of funding on the Legislature. "I find it somewhat frustrating," O'Rourke said in the interview. "We go forward each year with requests for resources for places like Kotzebue and have the Legislature turn down our requests, and then turn around and offer three or four or five times as much money to a school district to perform a similar service. That is just a political power play in my mind."

Such statements make me wonder just who it is that's playing politics. I feel the finger is pointed at the University of Alaska administration in fighting for survival of Chukchi Community College.

I really had no intention of saying anything on this matter, but when the "guilty" finger was pointed at the legislators then I felt compelled to let the public know the facts as I see them.

Sincerely yours,

Terry Martin

UNIVERSITY OF ALASKA

POST-SECONDARY EDUCATION

"WHO'S KIDDING WHOM?"

BY

REP. TERRY MARTIN

While it is true that words are of human invention, they are not open to random use without the result of utter chaos.

Words do evolve, however, and their original meaning may become lost in subsequent use.

During the past legislative session, I was fortunate to serve on the subcommittee of the University of Alaska budget for the House Finance Committee. Although frustrated, as you will learn later, the experience in itself was quite an education.

I began this mission with an open and optimistic mind. But soon it became apparent that the system is not quite what the average person conceives a university system to be. As I progressed through the volumes of material and research papers available about the 14 institutions under the University of Alaska umbrella, I found myself in an Alice in Wonderland world, which reminds me of what Humpty Dumpty said about words.

"When I use a word," Humpty Dumpty said, in a rather scornful tone, "it means just what I choose it to mean -- neither more nor less."

"The question is," said Alice, "whether you can make words mean so many different things."

"The question is," Humpty Dumpty said, "which is to be the master -- that's all."

Words and phrases are frequently used throughout various university and college reports to justify their existence (and quite often compete with other public and private institutions).

There are some 30 categories under the title of Post Secondary Education -- everything from university, college and community college, to extra-curricular activities, instructional television, educational innovation, senior citizens education, hobbies and leisure time activities.

There are enough of them to support a statement by Mr. Michael Moorman of Douglas, Alaska, in testimony to a committee on community colleges. He quotes a long-time observer of the university system:

"The growth of the University of Alaska into a statewide system had more to do with securing voter approval for more buildings at Fairbanks than any well thought out plan for delivery of higher education. To get massive support, the University of Alaska is trying to be everything to everyone."

Oh, how painfully true this becomes when one studies the University of Alaska operating and capital budgets for fiscal year 1982.

There are tremendous battles for the dollars -- each local area seems to want to justify a community college for the positive image it gives to a community. There seems to be a serious inferiority complex over other higher populated areas, so there is the very real emotional cries for more money for building, instruction and administrators. Then there is the battle to be different for self-preservation, to induce local citizens to come through their doors, to be head-counted to justify more money from the state.

Following are some of the community service courses and one-time programs offered at community colleges during the 1979-1980 academic year.

Aikido classes were offered at Tanana Valley Community College. At Ketchikan, Mat-Su and Prince William Sound, a student could take beginning belly dancing. In Ketchikan, you could move up to intermediate belly dancing if you so chose, but you had to travel to Prince William Sound to take advanced belly dancing.

A course in beginning boxing was offered at Kenai. Or how about a course in brandies, liquors & cordials -- tasting recipes, at Tanana Valley, or a course in childbirth and caesarean section, at the same school.

And the list goes on and on.

At Mat-Su: corn husk dolls, fortune telling; at Kodiak, furniture arrangement, knives & scissors sharpening, a neighborhood slide show, pinata workshop; in Anchorage, disco dancing, every woman her own historian, principles of occult theory, and wines of the world.

The community college system also seems to be getting into the day-care business. For example, introduction to preschool and songs and activities for 2-3 year olds were offered at Tanana Valley, as well as magic classes, monsters & mythical beasts and sewing for kids.

And there are courses for the teens, too, including aviation for juniors, dancing for young people, it's no fun being shy, and young teen modeling.

There are many good and meaningful courses taught at community colleges. But there are extremes.

Statistics show the Anchorage Community College produces the most credit hours for the fewest dollars. The public certainly gets its money's worth from this institution.

However, as any layman can readily see, the Tanana Valley Community College, for example, is really going to extremes to justify its existence.

In the fight for survival, we see that between FY 79 and FY 80 budget requests, community colleges received an 87 percent increase in general fund dollars, while the university, statewide administration, or research combined received a 65.4 percent increase, a difference of 21.4 percent.

The recent change in laws in 1978 that allows the university to count persons taking non-credit courses offered under its umbrella, only to obtain a higher count of "students," has most offensively been misused -- to gain more money to feed a bloated monster that seems to strive to reach all the citizens of Alaska under various disguises.

The prestige of the University of Alaska deteriorates in direct proportion as it becomes more involved with non-essential academic issues and activities. Common understandings of the term "university" and "community college" are severely strained when one re-evaluates the course offerings I mentioned earlier.

Post-secondary education to me means that higher level courses offered to one after completion of high school -- 12 years of formal education with the object of obtaining a baccalaureate degree or higher degree. To compete with the local community to serve the public in other entertaining or developing educational activities is detrimental to the University's image.

Alaska is five times above the U.S. average of dollars spent per credit hours earned.

Freedom of inquiry, freedom of discussion, and freedom of teaching -- without these a university cannot exist. A university exists to find and to communicate the truth.

I do believe in academic freedom, but not at the price of $228 million coupled with low productivity in credit hours.

How afar has the University of Alaska strayed from the traditional concept of an institution of higher learning which grants degrees and offers instruction in arts and sciences and learned professions?

To demonstrate my point, I have decided to issue the annual "Who's Kidding Whom?" award in education to Tanana Valley Community College for the most imaginative community college courses strictly for survival of the institution.

Courses like: "An Adventure In Coffeeland"; "Decorating My Home - Where Do I Begin?"; "Disco Partner Dancing"; "Dungeons And Dragons"; "Expression Through Adult Excercise"; "Is Your Heart Killing You or Are You Killing Your Heart"; "Make-up For The Con-Temporary Woman"; and "A Seminar on Menopause."

In all, Tanana Valley Community College claimed an enrollment of 4,872 in FY 80. At Tanana, as well as at many other community colleges, such courses can be conducted through the REA or community schools.

I firmly believe the administration and Board of Regents should resist pressures from within and without and put major emphasis on building the university system and not compete with other regional educational agencies to rationalize expansion.

I also believe the University of Alaska has ignored its own guidelines for establishing community colleges: that a community college should be established for an area of at least 12,000 residents and that community colleges should maintain at least 200 full-time students to be viable.

No where is this more clearly demonstrated than at Chukchi Community College in Kotzebue and Northwest Community College in Nome.

Senator Frank Ferguson of Kotzebue was absolutely correct in his efforts to close Chukchi. He believes, as I do, that Chukchi shouldn't be operated as a community college, especially when you consider that Northwest in Nome is nearby. When Chukchi opened, predictably, Northwest's enrollment dropped. Here you had two colleges competing for a limited number of students.

As Senator Ferguson suggests, it would be much more reasonable to return to the former system where practical extension courses were offered through the Northwest Arctic School District. Then those students who live in Kotzebue who want to go to a community

college in preparation for a four-year baccalaureate degree can take a short flight to nearby Northwest Community College in Nome.

One wonders whether University of Alaska officials and the Board of Regents were so worried about competition they started Chukchi too soon, sacrificing the credibility of Northwest Community College, and, in doing so, ignored the two major guidelines.

A quick look at enrollment statistics at Northwest and Chukchi between 1978 and 1980 demonstrates the point. Between the Fall of 1978 and Fall of 1980, enrollment at Northwest dropped from 90 to 49 full-time students. During the same period, enrollment at Chukchi increased from 29 to 65 full-time students.

It is quite clear that Chukchi has been detrimental to Northwest's growth. It also is clear that recent statements made by Dr. Patrick O'Rourke, former chancellor of Alaska's community college system, demonstrates a double standard that has contributed to the problem.

Before a House interim committee this year, Dr. O'Rourke said: "In a state of only 400,000 people, thirteen separately accredited institutions of higher education are too many, and there are arbitrarily decided turf boundaries which, rather than assisting the delivery of higher education services, have a tendency to create too parochial a view, sometimes at the expense of students. Students whose ultimate goal is a baccalaureate degree are probably better off enrolling from the start in universities if such is available to them. Community colleges must provide students with options -- we should not try to hamper them in their goals by coercing them

into other institutions if their needs can be better served elsewhere."

Yet in a newspaper article, O'Rourke defends the community college system by laying the blame for lack of funding on the Legislature. "I find it somewhat frustrating," O'Rourke said in the interview. "We go forward each year with requests for resources for places like Kotzebue and have the Legislature turn down our requests, and then turn around and offer three or four or five times as much money to a school district to perform a similar service. That is just a political power play in my mind."

Such statements make me wonder just who it is that's playing politics. I feel the finger is pointed at the University of Alaska administration in fighting for survival of Chukchi Community College, as well as other like institutions.

I really had no intention of saying anything on this matter, but when the "guilty" finger was pointed at the legislators then I felt compelled to let the public know the facts as I see them.

January 22, 1982

BILL COULD RESULT IN SPECIAL LEGISLATIVE SESSIONS STATEWIDE

Special legislative sessions could be held in Anchorage, Fairbanks, or anywhere else in the state if a bill introduced by State Representative Terry Martin becomes law.

House Bill 184 would authorize a statewide vote to decide whether legislators can conduct special sessions at any location in the state, rather than restricting the meeting place to Juneau.

The bill is scheduled for hearing before the House State Affairs Committee on Thursday, January 28, at 1:15 P.M. ~~EST~~ PST.

"It is extremely costly for legislators to return to Juneau for special sessions," Martin said. "Most legislators have to travel to Anchorage or Fairbanks in order to connect flights to Juneau. The extra expense of traveling to Southeast Alaska is unnecessary. We could meet in Anchorage, conduct our business, and adjourn in a day."

The East Anchorage Republican stressed that special sessions are emergency meetings of the legislature. "Juneau could be the emergency," said Martin. "A major landslide or avalanche in Juneau might be the reason for calling a special session."

January 12, 1982

Gentlemen:

Recent federal budget cuts are forcing the closure of many of this state's Job Service employment offices. In view of Alaska's high unemployment rate, it is obvious to me that some type of employment referral is necessary to enable the unemployed to find work. I believe the private business sector can fill this need.

I am proposing legislation which would turn this function over, in part, to private employment agencies. This system is being utilized successfully in several other states. I have enclosed a packet of information you may find interesting in that regard.

I am extremely interested in your comments, and would also welcome your testimony when this bill comes to hearing. I look forward to your response.

Sincerely,

Terry Martin

From: Representative Terry Martin, Chairman
House Labor & Commerce Committee

Subject: Potential Alaska Private Employment Voucher Program

Many of us are concerned about the recent federal cuts in public employment programs and the immediate affect it has upon the State of Alaska's unemployment problem. Most individuals or agencies directly responsible for helping the unemployed usually suggest increasing the staff and appropriations to meet the expected demands. Others suggest legislation and appropriations to "pick up" the federally-funded jobs and carry them under state or municipal agencies. Either solution would seriously hamper the administration's and legislature's efforts to hold the line on the state operating budget and state employment.

It has recently come to my attention that there is an alternative that is currently being used in Pennsylvania, California and Michigan which may well work for Alaska's unemployed. At least it seems worthy of consideration. Thus I have decided to send you the attached for your valued consideration and input.

At this time, I am also asking Mr. Bill Berrier to start a work draft for a bill titled:

> "A bill to require State employment offices to use private employment services to locate jobs for unemployed individuals."

I would be most appreciative of any support and information you can give to this effort in trying to decrease our high rate of unemployed in Alaska.

Yours very truly,

Terry Martin

Representative Terry Martin

Congressional Record

PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, FIRST SESSION

Vol. 127 WASHINGTON, WEDNESDAY, OCTOBER 14, 1981 No. 145

HELP FOR UNEMPLOYED

(Mr. FINDLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FINDLEY. Mr. Speaker, I am today introducing legislation to amend the Wagner-Peyser Act to require that State employment offices use a portion of their existing budget to utilize the private sector of the employment service profession to locate jobs for unemployed individuals and public assistance recipients.

This legislation is vital to millions of Americans seeking jobs. Now that the Government is engaged in meeting the challenge of budget cutting to bring us to a hoped-for sound economic base, it is of pressing importance that we rely once again on free enterprise and the private sector to assume that which it historically does faster, better, and more cost effectively than government.

It is critically important that we deal promptly with the current annual unemployment rate of over 8 percent, a rate which forecasters predict will not diminish within the foreseeable future.

In proposing this bill, I ask that we consider all the various costs to the Nation when 8 percent of the work force is without jobs. An 8 percent rate of unemployment adds enormously to expenditures by Federal, State, and local governments for unemployment compensation, welfare, and other forms of public assistance. It reduces tax revenues and decreases business and industry productivity.

The greater cost to a nation, however, is what unemployment breeds—discouraged, aimless young people, rising crime and vandalism, and enormous social, economic, psychological, and physiological pressures on the jobless and their families. This suffering, and the loss of individual dignity and self-worth, cannot be measured in monetary terms. It is, in the ultimate, devastating to the entire social fabric of our country.

Unfortunately, the public agencies charged with finding jobs for the unemployed have been less than successful. Even more unfortunately, the private sector of the employment services profession has been virtually shut out of our Nation's efforts to reduce unemployment.

The bill I am introducing today would change that. It would require that States which receive money under the Wagner-Peyser Act set aside a specified portion of their funds for private employment service placement efforts. A private employment service would be paid its customary charge, up to a reasonable amount specified in the bill, if it found a job for an individual referred by a State employment office. The private agency would not retain full payment of its charge unless the individual stayed on the job for at least 100 days. The private agency would have to return 1 percent of its compensation for each day, under 100, that the individual for whom it found a job failed to stay employed by the same employer.

Although it would be up to each State to decide how to implement this program, a minimum of paperwork should be necessary. I would urge that a simple voucher system be used. Under such a system, a State employment service would provide each eligible individual with a voucher to present to a private employment service. If and when that service found a job for the individual, the voucher would be presented for payment to the appropriate State agency.

In order to insure that State and private agencies fully cooperate, the bill requires that: First, a set percentage of the State agencies funds be used for the program and second, the State agencies refer individuals to the private service on a proportionately representative basis. In other words, the State agency must refer a fair sampling of its clientele, not just those whom the public agency cannot place.

The bill also makes clear that States are not limited to using Wagner-Peyser Act funds in making use of private employment services. A State may use any funds properly available to it for obtaining jobs for individuals who receive Government benefits or assistance to secure the aid of private employment services.

Mr. Speaker, the Wagner-Peyser Act was written in 1933, in the depths of the Great Depression, when the widespread unemployment of that era directly affected one-third of the population of the United States. This act created the U.S. Employment Service and a Federal-State partnership to establish what was in effect an emergency network of State-run employment offices to find jobs for the unemployed.

No one could foresee, in the dire straits of the Depression of 1933, that the U.S. Employment Service created by the Wagner-Peyser Act would prolong itself almost 50 years, involve itself in activities far exceeding its original mandate, and render its original purpose—to find jobs for the unemployed—one of its lesser activities.

In the past decade, the number of people actually placed in jobs by the USES has declined drastically. Placements dropped from 6.6 million in 1966 to less than 4 million last year. Of perhaps equal significance is a Government Accounting Office report on USES which observes that the bulk of these placements were not permanent positions, and many were of a temporary nature.

In the mid-1970's, while job service files were filled with the names of millions of unemployed, USES turned to recruiting job candidates at managerial levels, using radio, television, newspapers, and the yellow pages, seeking to place attorneys at $50,000 a year, engineers at $40,000, machinists at $20,000—all people then currently employed.

In the last decade the U.S. Employment Service opened offices in affluent suburbs, close to a skilled work force and managerial-level job candidates. Obviously, such actions fail to serve the jobless of the inner city. The State of Colorado Divison of Employment came under fire in recent years for failing to help the jobless and disadvantaged. A former president of the Colorado Labor Council served as a consultant in an investigation of that State's employment service, and, according to the Rocky Mountain News, said that the Colorado Employment Service has been inefficient in helping minority and first-time applicants in finding jobs and training.

The investigation of the Colorado Job Service stemmed from a suit filed in 1973 by the AFL-CIO and several community organizations, among them the NAACP. The suit charged that the employment service obtained $48.7 million in Federal money over 5 years to run a program for poor and disadvantaged persons but never seriously did so. This suit was settled out of court when the Labor Department promised to investigate, and several top Colorado Employment Service officials resigned.

Failure to place long-term unemployed in satisfactory numbers has led to the severe depletion of several States unemployment trust accounts.

The record just reviewed is not an indictment of the U.S. Employment Service per se, or of its staffs, which contain many earnestly committed and effective people. Rather, it is an example of a Government agency no longer able to perform the task for which it was originally established. Times have changed. Employers today view USES' job placement offices as unemployment offices and too often refuse to use them.

The failure of USES to find jobs for the unemployed led, in 1972, to the in-

volvement of the private sector employment services in California in a pilot program called the California Private Employment Project II. The State of California contracted with private employment services to find jobs for able-to-work welfare recipients—saving, in the process, $300,000 in unemployment and welfare payments. Approximately 54 percent of the individuals placed by private employment services stayed on the job 90 days or more. This success gave the State of California a 3-to-1 return on its investment.

A similar program was successful in Michigan where six Oakland County private employment services were involved in a federally funded project to find jobs for State aid to dependent children clients. The purpose of this experimental project was to reduce the welfare rolls through utilization of private enterprise. Using private employment services to interview in depth, motivate and place these people in gainful employment, Michigan demonstrated that the service charge paid to the private employment offices saved vast sums when compared with montly and yearly State public assistance payments.

Unfortunately, the pilot projects in Michigan and California met a predictable amount of resistence within State governments. State employees were not particularly cooperative with plans to enlist the help of the private sector. A scarcity of referrals to private employment services developed when the pilot projects were finally activated. States were slow in processing possible job candidates. When public assistance recipients were finally referred to private employment offices, the candidates were not well motivated, nor well informed about the project, even though many of them proved willing to have the private employment offices look for jobs for them.

In 1980, the Department of Welfare of the Commonwealth of Pennsylvania studied the results of the Michigan and California pilot programs and started the Pennsylvania employables program to use private employment services to find jobs for able-to-work welfare recipients. The Pennsylvania program has been so successful that it was renewed for the year 1981. A bill in the Pennsylvania legislature now proposes to make the program permanent.

The private employment agencies in Pennsylvania placed, as of June 31, 1981, 20 percent of the candidates referred to them versus 11 percent for the State employment agencies, and were paid on a contingency basis a total sum of under $300,000. The State saved over $1.5 million in cash assistance payments.

Although the State of Pennsylvania had originally authorized over $645,000 to pay the private sector employment services' charges in 1980, less than 10 percent of that sum was used that year due to delays in departmental processing, and the resulting low numbers of job applicants referred by the Department of Welfare. However, in a survey at the end of 1980, over 90 percent of the private employment services participating in the Pennsylvania employables program desired to continue.

The savings in these programs are not just in State and Government funds, but also in human values—in regular wages and restored dignity for the worker, in renewal of hope for individuals and families and alleviation of suffering.

Mr. Speaker, the Wagner-Peyser Act was our Nation's response 50 years ago to a major crisis in our history. We face a crisis again today as we seek to reduce Government in many areas, and to cut spending so that our Nation may not only survive—but grow. We truly should not and cannot continue to provide and pay for Government services where the private sector can do the job more effectively and at less cost. The challenge we face today is different—different in scope, different in quantity, and different in terms of the solution needed. The bill I have introduced today can meet today's employment problems in a realistic and cost-effective manner. I urge my colleagues to study it and I welcome their support.

Text of the bill follows:

H.R. 4738

A bill to amend the Wagner-Peyser Act to require State employment offices to use private employment services to locate jobs for unemployed individuals, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

FINDINGS

SECTION 1. The Congress finds and declares that—

(1) the Nation has suffered substantial and unacceptable unemployment and underemployment imposing numerous varied and escalating economic and social costs including—

(A) increased expenditures by Federal, State, and local governments for unemployment compensation, public assistance and other transfer payments as well as reduced tax revenues;

(B) decreased business and industry productivity and increased tax burdens; and

(C) exposure of many families to economic, social, psychological and physiological costs, including disruption of family life and loss of individual dignity;

(2) the private employment service profession has over 10,000 offices, many in locations not served by State employment offices, and over 50,000 professional employment counselors available on a contingency basis to assist the unemployed in quickly finding permanent employment;

(3) government at all levels has failed to use adequately the resources of private employment services in accordance with government policies to increase reliance on the private sector, including Office of Management and Budget Circular A-76, despite the proven cost-effectiveness of such services and the great need to find employment for the Nation's unemployed;

(4) the State programs which have used the resources of private employment services to find jobs for the unemployed have been proven successful; and

(5) government at all levels should make use of private employment services in order to aid unemployed persons and to reduce unemployment in the States.

PURPOSE OF THE ACT

SEC. 2. The purpose of this Act is to require States to use private employment services to aid the unemployed in finding jobs in the most cost-effective manner possible.

AMENDMENT

SEC. 3. Section 8 of the Act of June 3, 1933 (29 U.S.C. 498), popularly known as the Wagner-Peyser Act, is amended—

(1) by inserting "(a)" after "SEC. 8."; and

(2) by adding at the end thereof the following new subsection:

"(b)(1) Any State desiring to receive funds under this Act for any fiscal year beginning on or after October 1, 1982, shall, by the agency designated to cooperate with the United States Employment Service, submit to the Director such amendments to the plan submitted under subsection (a) as may be necessary to insure that not less than 25 percent of the funds made available under this Act during any such year will be used for the purpose of securing the assistance of private employment services to obtain jobs for unemployed individuals in accordance with the requirements of this subsection. The amendments submitted by the State agency shall insure that individuals referred by that agency to private employment services proportionately represent, on the basis of job skills and experience, the individuals served by such agency. If such amendments are reasonably appropriate and adequate to carry out such purposes, they shall be approved by the Director and due notice of such approval shall be given to the State agency. The Director shall, to the extent feasible, take final action on all amendments within 60 days of the date of their submission.

"(2) The amendments submitted by the State agency shall describe the nature of the contracts into which it intends to enter for the purposes of this subsection. Such contracts shall provide for compensation to private employment services on the basis of the success of such service in obtaining employment for unemployed individuals. Such compensation shall not exceed an amount equal to of the lesser of—

"(A) that employment service's normal placement charge, or

"(B) a rate of one percent per thousand dollars of the first year's earnings of the individual so placed in employment, not to exceed 25 percent.

"(3) An employment service shall be entitled to full payment of the compensation computed under paragraph (2) only if the individual for whom such service has secured a job remains in the employ of the employer to whom the individual was referred for at least 100 calendar days. If an eligible individual leaves such employ after less than 100 calendar days, the private employment service shall be entitled to an amount equal to one percent of such compensation for each day the individual remained on the job.

"(4) No payment made in accordance with a contract which complies with the requirements of this section shall be deemed to violate section 211 of title 18, United States Code.

"(5) Such placements as shall be made by private employment service under this subsection may be statistically credited, for employment purposes, to the State agency.

"(6) A State may use funds properly available to it for obtaining jobs for individuals who receive government benefits or assistance to secure the assistance of private employment services for such purpose.

"(7) For the purpose of this subsection—

"(A) the term 'private employment service' means any person or entity regularly undertaking for compensation to procure employees for an employer or to procure for employees opportunities to work for an employer and includes an agent of such person or entity; but shall not include any agency or service of the United States, any State, or political subdivision thereof; and

"(B) the term 'State' includes the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands.".

EFFECTIVE DATE

SEC. 4. The provisions of this Act shall take effect 30 days after the date of its enactment.

COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF PUBLIC WELFARE
HARRISBURG, PENNSYLVANIA 17120

Tel. 783-2874

DEAR PRIVATE EMPLOYMENT AGENCY:

Thank you for expressing interest and agreeing to participate in the Department of Public Welfare's Private Employment Agency Voucher Program.

I am enclosing for your information the instructions we have developed for the use of the voucher as well as the name, address, and telephone number of those County Assistance Offices involved in the initial distribution of the voucher.

Vouchers have been distributed to the counties, and the screening process of clients has begun. The first clients will be receiving vouchers within the week.

We have high hopes that this cooperative venture between the Department of Public Welfare and the Private Employment Industry will prove to be of significant benefit to our Public Assistance clients.

The Voucher Program is an experiment as such, we are interested in any comments which will help it work more efficiently. Please feel free to contact me with any suggestions or questions.

Sincerely,

Craig E. Ford, Staff
Employment Programs Unit
Office for Family Assistance

PENNSYLVANIA EMPLOYABLES PROGRAM (PEP)

(FOR GA CLIENTS ONLY)

The Pennsylvania Employables Program represents two elements as legislated in 1976: (1) it requires the registration of all non-exempt recipients (other than those already provided for under WIN), and (2) mandates the Department of Public Welfare to conduct pilot programs to explore various methods of moving clients into employment and training. It is this second element which is known as the PEP program as currently operated. Following are the 3 major components which may be translatable to other states:

1. Private Employment Agencies

The law creating PEP specified that among the pilot programs to be conducted must be a linkage with private employment agencies, based on the premise that the private market will be more successful in placing hard-core unemployed people into jobs than government agencies have been. We implemented this component by contacting all licensed private employment agencies in PEP counties, offering them participation through the use of a voucher system. Local public assistance offices select appropriate employable clients, present them with a voucher which they, in turn, present to the employment agency of their choice for a maximum of $1,000 per job placement (see attached material for details).

2. Office of Employment Security

The Department has entered into an agreement with the State's Office of Employment Security to employ special staff in three pilot counties to deal exclusively with PEP clients. This is based on the premise that OES does not have the resources to deal with the hard-core unemployed, particularly in times of high unemployment. It is important that an effective information feedback system is in place to allow the two agencies to deal promptly with matters of cooperation and support services.

3. The PEP Direct Component

We regard this as the most interesting and most effective method currently at our disposal. Local assistance office participation is on a voluntary basis at this time since little or no additional staff resources are made available for the operation of this component. The premise is that local staff are frustrated because of what appears a slow movement of their clients through other systems once a referral is made and the lack of feedback and follow-up on action taken. Participating local offices are permitted to waive the standard ES registration of those clients they deem appropriate to work with directly, using whatever community resources are available without having to rely on another agency for accountability of action. Without acting as an employment agency, our local offices use any resources available to them in the community to require selected clients to cooperate in taking advantage of such resources. If there is non-cooperation, the local office has immediate authority to act without having to gather information from other sources.

Because of federal restrictions on AFDC, the PEP program currently serves only the totally state-funded general assistance population. This, in turn, gives the State internal flexibility to gear its own policy towards shifting the burden of responsibility onto the client for cooperation. In other words, to be successful, the program must have a sound and workable sanction and adjudicated policy to draw from. Current Welfare Reform legislation pending in this State provides for revision in our sanction policy which will put further emphasis on client responsibility. It is for this reason that the attached material is still in the draft stage, even though we have been operating with it since November of 1979.

I am also attaching a copy of our Monthly Report, Page 2 of which gives a summary of the first full year's operation, while the other sheets represent the activities of the month of October 1980.

Please be aware that many other elements enter into the development of this program, dealing with political and fiscal realities and, foremost, with a variety of attitudes which can be found throughout a vast system such as ours. To us, PEP represents one initial stepping-stone to reverse the notion that the application and receipt of public assistance is simply another resource to the individual rather than the last resort after all other personal efforts have been exhausted. The frustration of our local workers, which I mentioned earlier, is based on the knowledge that a certain segment of their clients has become accustomed to public dependency as a way of life and that a certain skill and cynicism has been

developed among those clients to "play the system" and its regulatory structure which, to date, puts the burden of proof and effort on society, as represented by the system, rather than on the person who is seeking the system's support.

In addition to the figures shown on our Reports, which indicate maximum return from a small investment, we are clearly learning that if a program such as this keeps itself to a minimum paper operation and a maximum clarity on policy, much of the sense of helplessness which has developed among local staff over the last two decades can be reversed, resulting in greater productivity and reduction of dependency.

Should you have any questions regarding further detail, please feel free to contact Mr. Willy F. Groninger, Director, Division of Employment Programs, Bureau of Employment Programs, Office of Income Maintenance, Department of Public Welfare, P.O. Box 2675, Harrisburg, Pennsylvania 17120, telephone: Area Code 717 - 783-2874.

WFG:bjc
3-19-81

FACT SHEET

Of 9 million unemployment compensation recipients in 1980, over half (5 million) were never placed in jobs. Average length of time collecting unemployment compensation - 17 weeks (approx. 4 months).

Unemployment compensation benefits, total paid nationwide: 15 billion.

Annual rate of unemployment, October, 1981: 7.5 million, and accelerating.

In the last six months (1981) the Pennsylvania Employables Program paid over $300,000 to private sector employment services and saved (for the state) over 1.5 million in benefits. (On a national basis - a projected saving in public assistance payments of over $2 billion per annum.)

An AFL-CIO report states that for every 1% reduction in unemployment, the national treasury could save 25-30 billion dollars.

GAMOT - Gate Applicant Master Order Technique allows USES Job Service to set up desks in employer offices to screen and interview applicants. This service rendered gratis by Federal government. But millions of inner-city unemployed failed to be placed in jobs by USES.

Test programs in Michigan and Pennsylvania showed average placement rates, by private employment services, of 20%, utilizing AFDC recipients and UC recipients.

Plus points for private sector emoloyment services:

House Bill #4738 proposes a voluntary program - you do not have to participate if you do not wish to.

But participation by our profession will give it the national recognition it deserves.

Private sector employment services in California, Michigan and Pennsylvania indicated they were willing to continue participation.

USES/Job Service will need to direct its priorities, staff, etc to the unemployed, and modify or eliminate advertising, management recruitment, etc.

CAN THE PRIVATE SECTOR HANDLE 9 MILLION UNEMPLOYMENT COMPENSATION RECIPIENTS?

If just 25% of the private employment service offices participate in the Private Sector Employment Service Program the number of job offices available to the nation's unemployed will have been doubled. The number of placement counselors will have been tripled, approximately, since in the private sector nearly everyone involved is in a placement capacity.

The private sector has the capacity and the expansion potential to handle an added load, not being subject to procedural delays, authorizations and paperwork as found in government agencies.

Processing of the job applicant in the private sector is more efficient because the private employment service offices do not specialize in counseling sessions, special group studies, evaluations and liasons, organization of community support agencies or employer visitations. All interviewing and consultations are geared for one thing - finding the applicant a job promptly.

IS THE USES/JOB SERVICE PLACEMENT ACTIVITY MORE COST-EFFECTIVE THAN PLACEMENTS BY THE PRIVATE SECTOR?

The private sector would be pleased to provide a comparison of our per capita cost placement figures, which are demonstrably accurate, with that of the USES, if the USES figures can clearly and accurately be determined by anyone.

Until 1979, USES figures for budgetary requirements were based on "transactions," which included counseling, interviews, numbers of job applicants sent on interviews with or without resulting job placement, etc. Budgetary allocations are still based on formulae for these years. Placements are now counted in three ways: Those lasting 3 days, called temporary, equivalent to private sector temporary help services. Two categories are called permanent: those from 3 to 150 days, and those over 150 days. These definitions are based on the Job Service interviewers' assessment of the length of employment.

TO WHAT EXTENT WILL THE PRIVATE SECTOR REQUIRE MANAGEMENT ASSISTANCE, FORMS, PROCEDURES INSTRUCTION, ETC. FROM THE GOVERNMENT?

In pilot programs in California, Michigan and Pennsylvania, paperwork was kept to a minimum. A simple voucher system, issued by the local USES office, is suggested.

Time is of the essence. We face a national emergency with an unemployment rate at 8% and many state unemployment funds bankrupted. House Bill HR 4738 needs to be effected swiftly in order to put the unemployed back to work.

SOME QUESTIONS AND ANSWERS ABOUT HR 4738, THE PRIVATE SECTOR EMPLOYMENT SERVICE BILL

HOW WILL THE OPERATION OF THE USES AND STATE JOB SERVICES BE AFFECTED BY A 25% BUDGET TRANSFER?

Undoubtedly there will be a realignment of USES and Job Service duties and priorities. One outcome could be a reduction, if not elimination, of funds spent on advertising in newspapers, Yellow Pages, radio and television, direct mail, etc. This money could be applied to retaining qualified personnel. Curtailment of management-level recruiting, and interviewing and screening of job applicants for the employer at the employer's place of business, the reduction of paperwork and like procedures, would allow for further savings to be applied to USES operations.

WILL THE HARD-TO-PLACE (LAST HIRED, FIRST FIRED) BE HELPED?

Test cases in California, Michigan and Pennsylvania have shown good-to-excellent results. In the latest Pennsylvania Employables Program, the private sector employment services participating in this program placed 27% of referrals; an average of 20% were placed in July and August. Private employment services were paid $100,000, while savings to the State were $250,000.

WILL THERE BE AN OPPORTUNITY FOR FAVORITISM AMONG PRIVATE SECTOR EMPLOYMENT SERVICES PARTICIPATING IN THE PROGRAM?

Unemployment Compensation recipients and others being referrred to the private sector of the employment service profession will be given a list of private employment service offices in their county, city or local vicinity, and will choose from these.

SHOULD THE PRIVATE SECTOR EMPLOYMENT SERVICES PARTICIPATING IN THE PROGRAM GIVE A SPECIAL RATE OR DISCOUNT TO THE GOVERNMENT?

An upper limit on service charges has been described in House Bill HR 4738 that is both reasonable to the private sector and protective of the government. Placement of unemployment compensation recipients and others is essentially not an easy undertaking; private employment services should not be expected to take less than their usual service charges, especially when finding jobs for these applicants will result in considerable savings to the Government.

(The maximum service charges are: 1% per thousand to a maximum of 25%. For example, an individual placed at $7,000 per year would require a service charge of $495 [7% of $7,000]. If placed at $9,000 a year it would be 9% of $9,000 or $810.)

In Pennsylvania, private employment services participating in the PEP program were offered $75 for each individual they "counseled" whether or not that individual was ever placed in a job. They unanimously rejected this offer, preferring to be paid only when the applicant was found employment.

The livelihood of the private sector employment services depends on referrals from satisfied jobseekers and client companies. They are obligated therefore to work in an ethical and satisfactory manner.

PRIVATE EMPLOYMENT AGENCY VOUCHER PROGRAM

Act 202, Section 405.1, indicates that Private Employment Agencies, along with other resources, shall be experimented with, in order that bona fide full-time employment be secured for non-exempt general assistance recipients. An experimental program, using a voucher to secure the services of a Private Employment Agency, will be instituted in Allegheny County (Southeast District), Blair County, Crawford County, Lehigh County, Luzerne County, Lycoming County, Montgomery County, Philadelphia County (Boulevard District).

Additional counties may be phased in if funds are found to be sufficient to permit expansion.

The use of Private Employment Agencies to locate jobs for general assistance clients is intended to be an augmentation to other efforts of the CAO to obtain employment for their clients. It is not to be the sole resource of the employment unit.

All licensed Private Employment Agencies in the State have been contacted to determine their willingness to participate in the program. These agencies, and only these agencies, may be used by DPW clients. (Attachment #1. The list of participating agencies will be updated as necessary).

Instructions for Use of Voucher

The Pennsylvania Employables Program Services Voucher (PA 279-11-79) will consist of six copies; each copy marked as to distribution, and will be controlled by the voucher number found in the upper right hand corner of the form. (Appendix II)

Initial Preparation:

1. Client is selected by the Employment Coordinator. Determination of appropriate clients should be based on the employability plan, with emphasis given to clients who have employment skills, but who need assistance in selling themselves.

2. Section I of the form is completed by the CAO. Each blank should be completed as indicated, with particular attention given to the correct date of issue and authorized signature (usually the Employment Coordinator).

3. Client is oriented on the use of the form, provided with the list of participating employment agencies, and informed of his responsibilities and possible sanctions for refusing a job or failure to report to a job, and is given a basic understanding of the operation of Private Employment Agencies.

4. The entire voucher (six copies) is presented to the client to be taken to the participating employment agency of his choice.

5. The Employment Coordinator will maintain a log of issued vouchers and follow up at least bi-weekly on the client's progress in securing employment.

Private Employment Agency:

1. Client proceeds to the Private Employment Agency of his choice.

2. Upon securing employment, the recipients will give voucher to agency who will complete Section II and have the recipient complete Section III.

3. The Private Employment Agency sends copies 1 through 4 to the County Assistance Office.

The agency retains the last two copies.

4. Private Employment Agency prepares an invoice on their billhead, sends the original and two copies with one copy of the voucher to:

Comptroller's Office
Pre-Audit Division
Department of Public Welfare
Box 2675
Harrisburg, PA 17120

CAO Verification:

1. County Assistance Office receives four copies of Voucher from Private Employment Agency. Checks with client to confirm starting date of job, employer, and rate of pay.

2. Completes Section IV of Voucher and sends three copies of voucher to:

Employment Programs Unit
Office for Family Assistance
Dept. of Public Welfare
234 Health & Welfare Building
Harrisburg, PA 17120

10-Week Follow-Up

Ten weeks from the agreed to starting date of the job, a Follow-up Employment Verification Form will be distributed to the Private Employment Agency to determine the final result of the placement. Instructions for the completion of this form will be contained in a separate document.

A COMPREHENSIVE PLAN FOR PUBLIC ASSISTANCE CLIENT EMPLOYMENT

INTRODUCTION

The purpose of this Plan is to reduce economic dependency among employable public assistance recipients by moving them off the welfare rolls into productive employment.

The Department of Public Welfare has in the past been involved in various aspects of Federal and State funded manpower programs. The Department's interests are focused on two specific issues:

a) Its role as an employer and trainer, with Departmental installations having an ongoing need for auxiliary manpower;

b) Its mandate to promote self-support and self-sufficiency for its Public Assistance clients through coordinated use of community employment and training resources.

To date, effective coordination between the various programs has not taken place. It is the purpose of this Plan to develop such coordination through the implementation of a two-step program:

First Step: Distribute existing programs and their fiscal resources to strategically selected counties based on local criteria (see 3 below).

Second Step: Following a thorough evaluation of Step One, integrate all available resources at the local level into a single CEA employment unit, establishing a model which could then be applied to all 67 counties.

DRAFT

2. THE ISSUE

Both the Labor Market and public and private employment agencies have traditionally been geared towards the labor exchange principle; i.e., matching skilled workers with employment needs.

In order to bring the Public Assistance client to an equal footing with the average job seeker, the following elements are necessary:

a) assessment of the individual client, recognizing social, medical and other problems which may be barriers to training and employment;

b) mobilizing the social service resources to remove barriers;

c) advocacy for the client with public and private employment agencies, employers and trainers;

d) a structural follow-up system, which includes a uniform and fair sanction policy;

e) a realistic minimum administrative process;

f) a central administrative capacity for policy development, planning, evaluation, resource development, and accountability.

In its role as an employer of its own clients, the Department will give preference to those clients in all training and employment opportunities. This principle will be promoted with other public and private agencies with which the Department works.

THE PLAN -- STEP ONE

At present, a variety of mandated and optional programs are either operating or available to the Department. The mandated programs are:

a) WIN, mandated by Title IV-C of the Social Security Act, operating in 27 counties requiring certain ADFC clients to register for training or employment.

DRAFT

4. THE PLAN - STEP TWO

An extensive evaluation by professional non-program researchers of all ongoing programs described in Step One will be undertaken, forming the base for the implementation of Step 2. At this time, we hypothesize that such an evaluation will point towards a total & comprehensive integration of programs and funding streams for a centralized employment unit at each CEA.

In addition to the functions described in Item 2 above, this Unit will:

a) be the single intake point for all new Public Assistance applicants, to provide initial employability and trainability screening. All clients found employable or trainable will be referred immediately to available resources. Client claims of unemployability will be verified through existing procedures, and appropriate referral for IM will be made or denied;

b) be notified by IM of any client status changes, relating to potential employability or trainability, upon re-determination, using the same procedure described in a) above.

5. ADDITIONAL CONSIDERATIONS

The entire employment unit effort will depend largely on the expanded utilization of already available Title XX and WIN Social Service support funds. For many clients, willingness to work or be trained for work is not the problem, but rather the ability to remove barriers such as child care, transportation, physical problems, mental problems, and certain artificial legal barriers. It will be the responsibility of each CEA employment unit to maintain a catalogue of available in-house and community-based social service resources to remove employment barriers.

DRAFT

There will be an ongoing effort to minimize internal and inter-agency paper flow, without jeopardizing total accountability.

Knowledge gathered from the evaluation of the private employment agency contracts will be utilized in developing new contracts of this nature, applying the principles developed in this Plan.

6. RECOMMENDATION FOR THE UTILIZATION OF PEP FUNDS AND INITIAL FUNDING OF A LIMITED "PENNA. CAREERS PROGRAM"

Under the Governor's Special Grant and the prime sponsor arrangements, a total of $366,000 of non-PEP, federal money will be generated covering eight counties. When combined with nine PEP counties to be covered by Private Agencies and BES, a total of 17 counties results receiving new PEP or federal funds. In addition, most of the 10 counties which operated in-house programs under PEP II have gathered so much positive experience and enthusiasm that they are willing to continue to operate PEP without additional resources. This would increase the total to at least 24 counties of full PEP operations. In other words, nine PEP funded counties would be complimented by an additional 15 non-funded counties carrying out the same program.

Our recommendation for the most effective use of the $1,086,000 PEP appropriation is as follows:

8 PEA's and one BES (9 counties)	$645,000
Evaluation	30,000
Headquarters Administration	45,000
Penna. Careers Program	366,000
	$1,086,000

The amount of $366,000 equals that of the federal funds becoming available through the CETA activities outlined above. This amount would generate approximately 36 trainee level positions which would be filled by Public Assistance recipients under the new "Penna. Careers Program". These

DRAFT

positions could be strategically allocated among all counties carrying PEP programs, giving clerical and sub-professional support to the PEP units while preparing encumbents for unsubsidized employment. It is sound policy to have our own offices involved in training of their own clients in addition to using outside public and private resources.

From. Rep Terry Martin - Chairman House L_ & C_ Comm.

Subj. Potential Alaska Private Employment Voucher Program.

Many of us have become quite concerned as to the recent Federal cuts in public employment programs and the immediate effects it has upon the State of Alaska's unemployment problem. Most individuals or agencies directly responsible for helping the unemployed usually suggest increasing the staff and appropriations to meet the expected demands. Others suggest legislation and appropriations to "pick up" the ~~so~~ federally funded jobs and carry under State or Municipal agencies. Either solution would seriously hamper the Administration and Legislatures efforts ~~at~~ to hold the line on State operation budget and State employment.

It has recently come to my attention that there is a alternative that is currently being used in Pennsylvania, California and Michigan and may well work for Alaska's unemployed. At least it seems worthy of consideration. Thus I have decided to send you the attached for your valued consideration and input.

At this time I am also asking Mr. Bill Berrier to start a work draft for a bill titled:

"A bill to require State employment offices to use private employment services to locate jobs for unemployed individuals."

I would be most appreciative of any support and information you can give to this effort ~~to~~ trying to decrease our high rate of unemployed in Alaska.

Yours very truly

Terry Martin

Honorable Terry Martin
Pouch V
Juneau, AK 99811

Dear Representative:

This letter is being written to you to request your assistance to support legislation that would maintain Alaska's Job Service staffing at it's present level.

Even more importantly and as a result of planned staffing cutbacks, eleven or more Vietnam Veterans will be released from the Anchorage Employment Office. Proportionate numbers of Vietnam Veterans will be released from other State employment offices in Juneau, Ketchikan, Kenai, Fairbanks, Kodiak, Wasilla, etc.

When these men are released, the effectiveness of my program in Anchorage, Fairbanks, Wasilla, and Kenai will be drastically affected. My program's responsibility is directed toward the readjustment of Vietnam Veterans who have already been subjected to many inequities. Without the assistance of Job Service employees, who are Vietnam Veterans and who can understand and can assist with readjustment, the Vet Centers (Vietnam Veterans Outreach Program) will have limited referral for jobs. Vietnam Veterans without jobs appear to have more difficulty readjusting than those who have steady jobs.

Therefore, I appeal to you to assist with this problem. I am available to answer any questions you may have. Please feel free to call me.

Sincerely,

Wm Oleson

William C. Oleson, Director

MEMORANDUM

TO: All Interested Parties December 14, 1981

FROM: Ray Tyson, administrative assistant RT
House Labor and Commerce Committee

Subj: Telecommunications

Attached is a copy of a memorandum sent to Billy Berrier of the state Division of Legal Services requesting a draft of a House Concurrent Resolution spelling out the committee's policy on statewide telecommunications.

Keep in mind that the committee is only requesting a draft, not the final legislation which will be introduced early next session. The draft can be altered or expanded. Hopefully, the draft will be available for public review prior to January 1.

The committee feels the attached memo reflects concerns expressed by the public during hearings held in Anchorage and Fairbanks during the interim.

If you have any additional requests, please put them in writing and send them to the committee office prior to January 1. The address: 921 West 6th Avenue, Suite 250, Anchorage, Ak., 99501.

MEMORANDUM

December 14, 1981

TO: Billy Barrier, director
Division of Legal Services

FROM: Representative Terry Martin, chairman
House Labor and Commerce Committee

Subj: Telecommunications

I am requesting that your office draft a House Concurrent Resolution spelling out our policy on statewide telecommunications. The sponsor is the House Labor and Commerce Committee.

Please incorporate the following in the Resolution:

-- Whereas a significant and increasing amount of public funds is being invested in telecommunications systems; and

-- Whereas it should be the role of state government to encourage and not compete with the private sector; and

-- Whereas the private sector which deals in Alaska telecommunications faces a crowding out by government in the wake of increasing state wealth; and

-- Whereas the private sector has been the foundation and vitality of the American Democratic and economic system; and

-- Whereas the Alaska State Legislature lacks a policy regarding the burgeoning telecommunications system;

Be it resolved that the Alaska State Legislature should take the following into account to serve as guidelines when considering telecommunications appropriations:

-- When and where possible, the state Divisions of Telecommunications should procure services from private enterprise or certified and franchised utilities and contract for the construction, management, operation and maintenance of telecommunications systems.

-- When and where possible, the state Divisions of Telecommunications should reduce or eliminate airwave interference of state owned or financed stations with privately owned and operated cable television stations.

-- Artificial regulatory and government barriers for growth and development of new and innovative services by the private sector should be removed.

-- Companies owned and operated by Alaska residents and based in Alaska should be given a competitive edge over Outside interests.

-- Alaska's villages should have the opportunity to own, operate and maintain their own satellite earth stations.

-- In-state programming or Bush programming can be beneficial to sectors of the Alaskan community. However, the Divisions of Telecommunications should not only assure that such programs are cost effective, but production of these programs should be available to the private sector on a contract or bid basis.

-- No commercial advertisements shall be carried in state funded or state subsidized programs or in programs transmitted by state funded or state subsidized satellite channels.

-- The Legislature should encourage commercial radio and television news coverage of the legislative sessions by making equipment, space and satellite time available to the private sector. This would serve as a meaningful and efficient and non-controversial method of communicating legislative affairs to the public.

Billy, the committee would like a draft of the resolution by January 1, so that copies can be available to the various parties interested in this legislation.

Thanks for your help.

need telecommunications ~~for~~ commission because:

- federal govt (FCC) is deregulating many areas & turning authority over to state govt
  - state has shown itself to be less than responsible, as exhibited last summer in approving broadcast authority for public broadcasting stations over existing commercial channels
  - state needs an agency to make policy decisions in other areas ~~currently~~ delegated by FCC

Notes for press release / summary

- state of the art is ~~rapidly~~ becoming more ~~technical~~ technical & encompassing more areas (computer systems, audio/~~video~~ visual, image transmission); legislature ~~staff~~ does not have technical & expertise to knowledgably regulate these areas.

- Supreme Court decision barring monopolistic awards (by local govt agencies) to of telecommunications services providers

- to provide a "check" on administration's telecommunications & data supply systems for protection of the State's people

ACTION NARRATIVE

Tape #001
Recording
Number 0001

The meeting of the House Labor & Commerce Committee was called to order by Chairman Martin at 1:08 p.m. Committee members present were: Representatives Martin, Bylsma, Randolph, and Rogers. Representative Gardiner was absent.

Number 0090

Edmund Orbeck, Commissioner of the Department of Labor, spoke of the impact of federal budget cuts. He discussed employment security; remedies for budget shortages; Job Service functions; and fish negotiations. Rep. Rogers asked what methods were being used to cut back expenditures. Director Zellig and Commissioner Orbeck explained probable and known federal plans to cut back Job Service, and the need for additional funding. Chairman Martin (meter no. 321) asked about a voucher system making use of private employment agencies as an alternative to Job Service. Considerable discussion ensued.

Number 0567

Commissioner Orbeck gave an introduction to Workers Compensation. Director McClintock came forward to expand on subject. She predicted no impact on agency if budget was not increased, as long as there were no new requirements (meter no. 650). Director McClintock, during a discussion of new and vacant positions, said there is a vacancy factor of six months after resignation of an employee. Comm. Orbeck said it is easier to create a new position than fill an existing position. Rep. Rogers raised the possibility of abolishing the Division of Personnel (meter no. 683); Chairman Martin took that suggestion under advisement. Dir. McClintock discussed computer service and advantages. When questioned by Chairman Martin as to workload, Dir. McClintock gave figures and an explanation. There were questions by the committee. Chairman Martin asked why workers compensation rates were increasing. Comm. Orbeck responded (meter no. 804). Rep. Rogers observed that 1975-76 changes in benefits and action by Division of Insurance to allow price fixing may have caused cost increases up to 50%.

Number 0816

Comm. Orbeck gave overview of Division of Labor Standards & Safety. In response to questions by Rep. Rogers, Comm. Orbeck explained media campaign, and responded to Rep. Rogers that Don Williams was individual handling fraudy ads for job placement. There was discussion between Comm. Orbeck, Chairman Martin, and Rep. Rogers regarding non-Alaska residents looking for work in Alaska.

Number 0928

Dale Cheek, Director of Labor Standards & Safety, told what would be [illegible] impact on his staff and services if his budget is not increased. Cheek told how he could use his staff more efficiently. Comm. Orbeck and Dir. Cheek discussed OSHA budget.

Number 0998

John Post, Director of the Division of Administrative Services, described reports given to the legislature last year and elaborated on that information: population information; unemployment handbook; evaluation of Lower Yukon-Kuskokwim labor market; and gave an estimate of budget impact if division funding was not increased.

Number 1085 — Judy Knight, Special Assistant to the Commissioner, explained the influx of job seekers from Lower 48. She described brochures printed with job information for Alaska, and use of the brochures by various agencies and individuals. She stated that fifty percent of the people applying for services were from outside the state. Copies of the study were requested by the committee. There was some discussion of using the news media as another means of getting information dispersed. Knight explained the impact of employment security without fully-funded Job Service.

Number 1170 — Glenn Lundell, Deputy Commissioner, spoke of problems still existing with resident hire. Lundell addressed public opinion that union leaders give jobs to out-of-state residents. Comm. Orbeck suggested contacting unions.

Number 1230 — As there were no further items to come before the committee at this time, the Chairman adjourned the meeting at 2:48 p.m.

COMMITTEE MINUTES
COMMITTEE House Labor & Commerce
HEARING DATE January 13, 1982
TAPE NO. 1, Side A

The meeting was called to order by Chairman Martin at 1:08 p.m., in the House Labor & Commerce Committee Room, Behrends Building, Juneau, Alaska. Committee members present in addition to the Chairman were Representatives Bylsma, Randolph and Rogers. Committee staff in attendance were Mary Isaacs and Joan Mathews. Representative Gardiner was absent.

The committee schedule called for an overview presentation by the State Department of Labor. Testifying before the committee were: Commissioner Edmund Orbeck; Glenn H. Lundell, Deputy Commissioner; Judy G. Knight, Special Assistant; Dale Cheek, Director, Division of Labor Standards and Safety; A.G. Zillig, Director, Division of Employment Security; Jacquelyn McClintock, Director, Division of Workers Compensation; and John Post, Director, Division of Administrative Services.

Commissioner Orbeck spoke of impact of federal budget cuts. Discussed employment security (meter no. 090); remedies for budget shortages (meter no. 132); Job Service functions (meter no. 170); fish negotiations (meter no. 220). Representative Rogers asked what methods were being used to cut back expenditures. Director Zellig and Commissioner Orbeck explained probable and known federal plans to cut back job service, and need for additional funding. Chairman Martin (meter no. 321) asked about a voucher system making use of private employment agencies as an alternative to Job Service. Considerable discussion ensued (through meter no. 561).

Commissioner Orbeck gave an introduction to Workers Compensation (meter no. 567). Director McClintock came forward to expand on subject. She predicted no impact on agency if budget was not increased, as long as there were no new requirements (meter no. 650). Dir. McClintock,during a discussion of new and vacant positions, said there is a vacancy factor of 6 months after resignation of an employee. Comm. Orbeck said it is easier to create a new position than fill an existing position. Rep. Rogers raised the possibility of abolishing the Division of Personnel (meter no. 683); Chairman Martin took that suggestion under advisement.

McClintock discussed computer service and advantages (meter no. 708). When questioned by Chairman Martin as to workload, Dir. McClintock gave figures and an explanation. There were questions by Rep. Bylsma (meter no. 765), Rep. Rogers (meter no. 773), and Chairman Martin (meter no. 787). Chairman Martin asked why workers compensation rates were increasing. Comm. Orbeck responded (meter no. 804). Rep. Rogers (meter no. 820) observed that 1975/76 changes in benefits and change by Division of Insurance to allow price fixing may have caused cost increases up to 50%.

House Labor & Commerce
Committee Minutes
Meeting of 1/13/82

Comm. Orbeck gave overview of Division of Labor Standards & Safety (meter no. 826). In response to questions by Rep. Rogers, Comm. Orbeck explained media campaign (meter no. 871), and responded to Rep. Rogers that Don Williams was individual handling fraudy ads for job placement. There was discussion between Comm. Orbeck, Chairman Martin, and Rep. Rogers regarding non-Alaska residents looking for work in Alaska.

Dale Cheek, Director of Labor Standards & Safety (meter no. 928), told what would be the impact on his staff and services if his budget is not increased. Cheek (meter no. 965) told how he could use his staff more efficiently. Comm. Orbeck and Dir. Cheek (meter no. 991) discussed OSHA budget.

John Post, Director of the Division of Administrative Services (meter no. 998) described reports given to legislature last year, and elaborated on that information: population information (meter no. 1015); unemployment handbook (meter no. 1024); evaluation of Lower Yukon-Kuskokwim labor market (meter no. 1032); and gave an estimate of budget impact if division funding was not increased.

Judy Knight, Special Assistant (meter no. 1085), explained influx of job seekers from Lower 48. She described brochures printed with job information for Alaska, and use of the brochures by various agencies and individuals. She stated (meter no. 1115) that 50% of the people applying for services were from outside the state. Copies of the study were requested by Reps. Rogers and Martin. There was some discussion of using the news media as another means of getting information dispersed (meter nos. 1135-1164). Knight explained (meter no. 1165) the impact of employment security without fully funded Job Service.

Glenn Lundell, Deputy Commissioner (meter no. 1170) spoke of problems still existing with resident hire. Lundell addressed (meter no. 1196) public opinion that union leaders give jobs to out-of-state residents. Comm. Orbeck suggested (meter no. 1219) contacting unions.

As there were no further items to come before the committee at this time, the Chairman adjourned the meeting at 2:48 p.m.

State of Alaska

EMPLOYMENT SECURITY DIVISION

TO: Jerry Reinwand
Executive Assistant
Office of the Governor

DATE: January 7, 1982

FILE NO: AK (FIM 9-1)

TELEPHONE NO: 465-2712

FROM: A. G. Zilliq, Director
Employment Security Division

SUBJECT: Federal Budget Cuts

John a copy for u - for notes M.L.

In the absence of additional funding, and since the federal funding cuts are retroactive October 1, 1981, the Employment Security Division will be required to significantly reduce staff as shown by the following data:

		ES	UI	AS&T	TOTAL
1)	Average annual PS/PB rate	$ 37,345	$ 37,345	$ 37,345	$ 37,345
2)	Earliest date layoff can be effected	1/31/82	1/31/82	1/31/82	1/31/82
3)	PS/PB cuts	1,299,607	261,415	224,070	1,785,092
4)	PS/PB cuts adjusted to 6/30/82	974,705	196,061	168,053	1,338,819
5)	Adjusted average annual PS/PB rate to five months (2/1/82 to 6/30/82)	15,560	15,560	15,560	15,560
6)	Reduction in staff (line 4 ÷ line 5)	63	13	11	87
7)	Estimated loss of non-personal services (NPS) funds for FFY 82	336,000	69,329	58,663	463,992
8)	Adjusted loss of NPS to 6/30/82	252,000	51,997	43,997	347,994
9)	Reduction in staff to accommodate loss of NPS funds	16	3	3	22
10)	Total cuts adjusted to 6/30/82 (line 4 ÷ line 8)	1,226,705	248,058	212,050	1,686,813
	(line 6 ÷ line 9)	79	16	14	109

Additional funds in the amount of $1,686,813 will allow the Employment Security Division to maintain the level of services as planned in our Federal Plan of Service to June 30, 1982, with all offices remaining operational.

Option #1

Provide additional state funding in the amount of $1,124,500 to maintain staffing at present levels until March 31, 1982; thereby giving the State Legislature and and Congress an opportunity to address the problem. If additional funding is not appropriated, reduce offices to five -- Anchorage, Fairbanks, Juneau, Ketchikan, and Kenai -- as of April 1, 1982.

Option #2

Since the 12% reduction is for the entire federal fiscal year 1982, $754,334 must be absorbed in the five months remaining in the state fiscal year. Even with $754,000 in state aid, it will still require a layoff of 36 positions in order to stay within the federal funds granted, which were just made known as of January 7, 1982.

Option #3

A $250,000 less funding level from Option #2 would require an additional layoff of 16 staff, making a total of 52. The diminution of funding disproportionately reduces the ability to provide direct services to the public because of fixed costs and program requirements.

Option #4

No additional state funding. Lay off staff and cover shortfall with existing funds. This would require closure of all offices except Anchorage, Juneau, Fairbanks, and Ketchikan, which would remain open at considerably reduced levels. Place all claimants except those at above locations on mail claim basis.

cc: Susan Green, Special Assistant
Office of the Governor

EMPLOYMENT SECURITY DIVISION

TO: Jerry Reinwand
Executive Assistant
Office of the Governor

DATE: January 5, 1982

FILE NO: AK (FIM 9-2)

TELEPHONE NO: 465-2712

FROM: A. G. Zillig, Director
Employment Security Division
Department of Labor

SUBJECT: Reduction in Federal Receipts to Fund ES and UI

Attached for your information is a copy of a memorandum dated January 5 to Commissioner Edmund Orbeck that further expands upon the information provided in my memorandum to you dated December 13, 1981.

Although we still have not received notification of the reduction in writing, I have been informed by telephone by Don Balcer, Regional Administrator, Employment & Training Administration, that the cut will be 12% of the total grant, with 80% of the amount to be applied to the Employment Service and 20% to the Unemployment Insurance program.

MEMORANDUM State of Alaska

TO: Edmund N. Orbeck
Commissioner of Labor

DATE: January 5, 1982

FILE NO: AK (FIM 9-2)

TELEPHONE NO: 465-2712

FROM: A. G. Zilling
Director

SUBJECT: Proposed Staff Reduction Due to 12% Cut in Federal Funds

In response to your request that I outline the impact of the twelve percent cut to ES and UI grants for operation of the Employment Service and Unemployment Insurance programs, I have prepared the following information.

We still have not received the amount of the reduction to Alaska in writing from the Employment and Training Administration so it was necessary to develop this plan based on the most recent information available by telephone. The information received is that the cut will be twelve percent of the total grant with eighty percent of that amount being applied to the Employment Service programs and twenty percent applied to the Unemployment Insurance program. The twelve percent reduction is for the entire FFY 1982, but must be absorbed in the nine months remaining. Dedicated funds for special programs now conducted by ES such as Monitor Advocate, and LMI will be eliminated.

This plan is also developed on the basis that reductions in fixed non-personal services cannot be achieved in time to significantly impact this years outlays so most if not all the reductions must be absorbed in the personal services category.

The following chart reflects the proposed overall reductions:

Total Budget FP-3 1982 PBP		$15,603,436	
Mandated Cut		12%	
Total dollars to be cut Retroactive to 10/1/81		$1,872,412	
Administrative Services Division			
Indirect Budget for FFY 1982		$1,544,250	
Less 12% Cut	(A)	185,310*	Eq Pos 6.6
Revised Budget FFY 1982		$1,358,940	
LMI Budget for FFY 1982		$244,460	
Eliminate the Program	(A)	183,345*	Eq Pos 5.1
Revised Budget FFY 1982		$61 125	
Direct UI Funding - R&A & Fiscal Budget for FFY 1982		$169,85	
Less Allocated Cut		44,758*	Eq Pos 1.3
Revised Budget FFY 1982		$125,095	
Total Reduction Administrative Services Division		$413,413*	Eq Pos 13.0

Employment Security Division		
Employment Service		
Budget FFY 1982	$6,730,923	
Less 80% of (12% Cut Less (A) $368,655)	1,203,005*	Eq Pos 42.95
Revised Budget FFY 1982	$5,527,918	
Additional Reduction necessary to fund Accrued Leave and delayed layoff	$196,063*	Eq Pos 7.00
Unemployment Insurance		
Budget FFY 1982	$8,872,513	
Less 20% of (12% Cut Less (A) $368,655)	300,752*	Eq Pos 10.41
Revised Budget FFY 1982	$8,571,761	
Additional Reduction necessary to fund Accrued Leave and delayed layoff	$144,340*	Eq Pos 5.0
Total Reduction ESD	$1,844,160*	Eq Pos 65.36
Labor Standards & Safety Division*		
UI Investigations		
Budget FFY 1982	$245,805	
Less Allocated Cut	110,612*	Eq Pos 3.0
Revised Budget FFY 1981	$135,193	
*Inter-Agency Transfer non add		
Grand Total all Cuts	$2,368,185	Eq Pos 78.36

The amount to be cut may vary slightly from program to program when the final allocation from ETA is received. But the adjustment will be minimal when related to the overall cut.

In the absence of additional federal funding we can only maintain the following offices with federal funds beyond July 1, 1982,

Anchorage
Fairbanks
Juneau
Kenai
Ketchikan

making it necessary to close twelve offices at that time and sharply reduce employment services in the above offices.

The attached exhibits reflect where the positions will be cut by section and local office.

Governor

From: Wilson L. Condon
Attorney General

Re: Attached bill on consolidation of building regulation functions
Our file: J-77-031-82

Attached is a bill which will consolidate the primary building regulation functions, presently scattered among three departments, into the Department of Labor. This project has been a priority of the Regulatory Reform program in the Office of Special Projects and has been the subject of meetings including representatives from the Departments of Labor, Public Safety and Commerce and Economic Development. Such a consolidation is intended to assure that a single agency will be responsible to both public and professionals for plan review, technical assistance and inspections.

A draft transmittal letter to the legislature is also attached.

WLC:bap:KMK

cc w/enc.: Honorable Edmund N. Orbeck
Commissioner
Department of Labor

Honorable William Nix
Commissioner
Department of Public Safety

Honorable Charles Webber
Commissioner
Department of Commerce & Economic Development

DRAFT

Under the authority of art. III, sec. 18, of the Alaska Constitution, I am transmitting a bill relating to the consolidation of existing building regulation functions.

Various building inspection functions are currently housed in the Department of Public Safety, division of fire prevention (AS 18.70.010 -- 18.70.300 and AS 18.72.010 -- 18.72.060), and in the Department of Commerce and Economic Development (contractor licenses [AS 08.18.011 -- 08.18.171] and the Board of Electrical Examiners [AS 08.40.005 -- 08.40.200]). The bill would move these functions to the Department of Labor, which would also retain its jurisdiction over boiler and pressure vessel inspection; certificates of fitness for electricians and plumbers; refrigerator inspection; elevator inspection; the electrical code; the plumbing code; and safety glazing.

This bill is the result of consultation with the three departments affected. It is intended to assure that a single agency will be responsible to the public, industry, and local governments for existing state services for plan reviews, technical assistance, and inspections.

Sincerely,

Jay S. Hammond,
Governor

IN THE HOUSE

BY THE RULES COMMITTEE BY REQUEST OF THE GOVERNOR

HOUSE BILL NO.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to consolidation of building regulation functions."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.18.011 is amended to read:

Sec. 08.18.011. REGISTRATION REQUIRED. It is unlawful for a person to submit a bid or work as a contractor until he has been issued a certificate of registration by the Department of Labor [COMMERCE]. A partnership or joint venture shall be considered registered if one of the general partners or venturers whose name appears in the name under which the partnership or venture does business is registered.

* Sec. 2. AS 08.18.121(f) is amended to read:

(f) If the commissioner [OF LABOR] determines that a person is acting as a contractor in violation of this chapter, he shall give written notice prohibiting further action by the person as a contractor. The prohibition continues until the person has submitted evidence acceptable to the commissioner [OF LABOR] showing that the violation has been corrected.

* Sec. 3. AS 08.18.121(g) is amended to read:

(g) A person affected by an order issued under this chapter may seek equitable relief preventing the commissioner [OF LABOR] from enforcing the order.

* Sec. 4. AS 08.18.131 is amended to read:

Sec. 08.18.131. INJUNCTION. In an action instituted in the superior court by the commissioner [OF LABOR] or his representative, a

person acting in the capacity of a contractor in violation of this chapter may be enjoined from doing so.

* Sec. 5. AS 08.18.171(1) is amended to read:

(1) "commissioner" ["COMMISSIONER", UNLESS THE TEXT READS OTHERWISE,] means the commissioner of the Department of Labor [COMMERCE AND ECONOMIC DEVELOPMENT];

* Sec. 6. AS 08.18.171 is amended by adding a new paragraph to read:

(4) "department" means the Department of Labor.

* Sec. 7 AS 08.40.010 is amended to read:

Sec. 08.40.010. CREATION AND MEMBERSHIP OF BOARD. There is created in the Department of Labor a Board of Electrical Examiners consisting of three members, two of whom are licensed electrical administrators and one of whom is a public member. The public member of the board may not:

(1) be an electrical administrator;

(2) be associated by legal contract with an electrical administrator except as a consumer of the services provided by an electrical administrator; or

(3) have a direct financial interest in an electrical administration business.

* Sec. 8. AS 08.40.040 is amended to read:

Sec. 08.40.040. BOARD MEETINGS. The board shall hold a regular annual meeting. The board may hold special meetings at the call of the chairman with prior approval of the governor. Two members constitute a quorum. The board shall notify the department of its meeting dates at least 15 days before the meeting.

* Sec. 9. AS 18.40.200 is amended by adding a new paragraph to read:

(6) "department" means the Department of Labor.

* Sec. 10. AS 18.70.010 is amended to read:

Sec. 18.70.010. GENERAL FUNCTION OF DEPARTMENT OF LABOR [PUBLIC SAFETY] WITH RESPECT TO FIRE PROTECTION. The Department of Labor [PUBLIC SAFETY] shall foster, promote, regulate, and develop ways and means of protecting life and property against fire, explosion, and panic.

* Sec. 11. AS 18.70.020 is amended to read:

Sec. 18.70.020. DUTIES OF DEPARTMENT OF LABOR [PUBLIC SAFETY]. The Department of Labor [PUBLIC SAFETY] shall aid in the enforcement of all laws and ordinances and the rules and regulations adopted under AS 18.70.010 -- 18.70.100 and all other laws relating to fires or to fire prevention and protection, and shall encourage the adoption of fire prevention measures by means of education, and shall prepare or have prepared for dissemination information relating to the subject of fire prevention and extinguishment.

* Sec. 12. AS 18.70.030 is amended to read:

Sec. 18.70.030. INVESTIGATION OF FIRES RESULTING FROM CRIME. If there is reason to believe that a fire has resulted from crime or that crime has been committed in connection with a fire, the Department of Labor [PUBLIC SAFETY] shall report that fact in writing to the district attorney of the judicial district in which the fire occurred. If the fire occurred in an incorporated city with a regularly organized fire department, the investigation and report shall be made in conjunction with the fire official of that area.

* Sec. 13. AS 18.70.040 is amended to read:

Sec. 18.70.040. COOPERATION WITH FIRE INSURANCE COMPANIES. The Department of Labor [PUBLIC SAFETY] may assist, receive assistance from, and otherwise cooperate with an investigator or agent employed by a fire insurance company licensed to do business in the state, or with an investigator or agent employed by an association of insurance companies licensed to do business in the state.

* Sec. 14. AS 18.70.050 is amended to read:

Sec. 18.70.050. POWER OF DEPARTMENT TO INSPECT BUILDINGS. The Department of Labor [PUBLIC SAFETY] may enter any building subject to regulation under AS 18.70.080 during reasonable hours for the sole purpose of inspecting the property or abating a fire hazard.

* Sec. 15. AS 18.70.060 is amended to read:

Sec. 18.70.060. REMOVAL OF PROPERTY FROM FIRE. During a fire and in the absence of the owner or claimant, the Department of Labor [PUBLIC SAFETY] may protect personal property affected by removing it. If the owner or claimant does not take charge of the property within 24 hours the Department of Labor [PUBLIC SAFETY] may store it at the owner's or claimant's expense.

* Sec. 16. AS 18.70.070 is amended to read:

Sec. 18.70.070. ABATEMENT OF FIRE HAZARDS. The Department of Labor [PUBLIC SAFETY] may require the owner of a commercial business or public property to abate a fire hazard which exists in violation of law or regulations, and the Department of Labor [PUBLIC SAFETY] may take appropriate action to assure such abatement.

* Sec. 17. AS 18.70.080 is amended to read:

Sec. 18.70.080. REGULATIONS. The Department of Labor [PUBLIC SAFETY] shall adopt [RULES AND] regulations for the purpose of protecting life and property from fire and explosion by establishing minimum standards for

(1) fire detection and suppression equipment;

(2) fire and life safety criteria in commercial, industrial, business, institutional or other public building, and buildings used for residential purposes containing four or more dwelling units;

(3) any activity in which combustible or explosive materials are stored or handled in commercial quantities;

(4) conditions or activities carried on outside a building described in (2) or (3) of this section likely to cause injury to persons or property.

* Sec. 18. AS 18.70.081 is amended to read:

Sec. 18.70.081. APPROVAL OF FIRE PROTECTION SYSTEMS. Before October 30 of each year the Department of Labor [PUBLIC SAFETY] shall prepare and make available a list of approved fire protection systems to the Department of Community and Regional Affairs, the Department of Commerce and Economic Development, and the public.

* Sec. 19. AS 18.70.090 is amended to read:

Sec. 18.70.090. ENFORCEMENT OF REGULATIONS. The Department of Labor [PUBLIC SAFETY] and the chief of each city fire department and their authorized representatives in their respective areas may enforce the regulations adopted by the Department of Labor [PUBLIC SAFETY] for the prevention of fire or for the protection of life and property against fire or panic. All state peace officers may assist the Department of Labor [PUBLIC SAFETY] in the enforcement of AS 18.70.010 -- 18.70.100 and the regulations adopted under it. The authority conferred in AS 18.70.010 -- 18.70.100 extends to the enforcement of the provisions of AS 11.46.400 -- 11.46.430.

* Sec. 20. AS 18.70.100 is amended to read:

Sec. 18.70.100. VIOLATION. (a) A person who violates any provision of AS 18.70.010 -- 18.70.100 or the published [RULES AND] regulations or orders adopted under it from which no appeal has been taken within 30 days after the issuance of a final order is, severally, for each violation, guilty of a class B misdemeanor [, AND IS PUNISHABLE BY A FINE OF NOT MORE THAN $500, OR BY IMPRISONMENT FOR NOT MORE THAN SIX MONTHS, OR BY BOTH]. A person aggrieved by a final order of the Department of Labor [PUBLIC SAFETY] may appeal to the superior court within 30

days after the issuance of the order. The imposition of one penalty f
a violation does not excuse the violation and a person guilty of a
violation shall correct the violation within a reasonable time. When
not otherwise specified, each 10 days that a prohibited condition is
maintained is a separate offense.

(b) The application of the penalty prescribed in (a) of this sec-
tion does not prevent the Department of Labor [PUBLIC SAFETY] from
enforcing the removal of the prohibited conditions.

* Sec. 21. AS 18.72.050(2) is amended to read:

(2) "fire safety code" means the fire safety code of the state adopted and administered by the [DIVISION OF FIRE PREVENTION OF THE] Department of Labor [PUBLIC SAFETY];

* Sec. 22. AS 08.01.010(7) is repealed.

ALASKA INDUSTRIAL DEVELOPMENT AUTHORITY

February 28, 1982

The Honorable Terry Martin
Chairman
House Labor and Commerce Committee
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

RE: House Resolution No. 17

Dear Representative Martin:

Regarding the above-referred resolution, AIDA as a secondary investor has no information in its files concerning race or national origin of the borrowers. We refer you to the Federal Reserve System Equal Credit Opportunity Regulation B, Section 202.5(d)(5) which states:

> "A creditor shall not request the race, color, religion, or national origin of an applicant or any other person in connection with a credit transaction. A creditor may inquire, however, as to an applicant's permanent residence and immigration status."

Additionally, our records would not reflect the applications that are declined at the originating lender level and, therefore, never even come to our office for consideration.

For these reasons, we are making no fiscal note request for appropriation at this time. If we can further assist you in this matter, please advise.

Sincerely,

H.A. Hoffman
Executive Director

HAH:ZJ:ty

ENC: ECOA Reg. B, Section 202.5 (d)

1577 "C" STREET • SUITE 304 • ANCHORAGE, ALASKA 99501-5177 • (907) 274-1651

tising or otherwise, to applicants or prospective applicants that would discourage on a prohibited basis a reasonable person from making or pursuing an application.

(b) General rules concerning requests for information. (1) Except as otherwise provided in this section, a creditor may request any information in connection with an application.[4]

(2) Notwithstanding any other provision of this section, a creditor shall request an applicant's race/national origin, sex, and marital status as required in section 202.13 (information for monitoring purposes). In addition, a creditor may obtain such information as may be required by a regulation, order, or agreement issued by, or entered into with, a court or an enforcement agency (including the Attorney General or a similar State official) to monitor or enforce compliance with the Act, this Part, or other Federal or State statute or regulation.

(3) The provisions of this section limiting permissible information requests are subject to the provisions of section 202.7(e) regarding insurance and sections 202.8(c) and (d) regarding special purpose credit programs.

(c) Information about a spouse or former spouse. (1) Except as permitted in this subsection, a creditor may not request any information concerning the spouse or former spouse of an applicant.

(2) A creditor may request any information concerning an applicant's spouse (or former spouse under (v) below) that may be requested about the applicant if:

(i) the spouse will be permitted to use the account; or

(ii) the spouse will be contractually liable upon the account; or

(iii) the applicant is relying on the spouse's income as a basis for repayment of the credit requested; or

(iv) the applicant resides in a community property State or property upon which the applicant is relying as a basis for repayment of the credit requested is located in such a State; or

(v) the applicant is relying on alimony, child support, or separate maintenance payments from a spouse or former spouse as a basis for repayment of the credit requested.

(3) A creditor may request an applicant to list any account upon which the applicant is liable and to provide the name and address in which such account is carried. A creditor may also ask the names in which an applicant has previously received credit.

(d) Information a creditor may not request. (1) If an applicant applies for an individual, unsecured account, a creditor shall not request the applicant's marital status, unless the applicant resides in a community property State or property upon which the applicant is relying as a basis for repayment of the credit requested is located in such a State.[5] Where an application is for other than individual, unsecured credit, a creditor may request an applicant's marital status. Only the terms "married," "unmarried," and "separated" shall be used, and a creditor may explain that the category "unmarried" includes single, divorced, and widowed persons.

(2) A creditor shall not inquire whether any income stated in an application is derived from alimony, child support or separate maintenance payments, unless the creditor appropriately discloses to the applicant that such income need not be revealed if the applicant does not desire the creditor to consider such income in determining the applicant's creditworthiness. Since a general inquiry about income, without further specification, may lead an applicant to list alimony, child support, or separate maintenance payments, a creditor shall provide an appropriate notice to an applicant before inquiring about the source of an applicant's income, unless the terms of the inquiry (such as an inquiry about salary, wages, investment income, or similarly specified income) tend to preclude the unintentional disclosure of ali-

[4] This subsection is not intended to limit or abrogate any Federal or State law regarding privacy, privileged information, credit reporting limitations, or similar restrictions on obtainable information. Furthermore, permission to request information should not be confused with how it may be utilized, which is governed by section 202.6 (rules concerning evaluation of applications).

[5] This provision does not preclude requesting relevant information that may indirectly disclose marital status, such as asking about liability to pay alimony, child support, or separate maintenance; the source of income to be used as a basis for the repayment of the credit requested, which may disclose that it is a spouse's income; whether any obligation disclosed by the applicant has a co-obligor, which may disclose that the co-obligor is a spouse or former spouse; or the ownership of assets, which may disclose the interest of a spouse, when such assets are relied upon in extending the credit. Such inquiries are allowed by the general rule of subsection (b)(1).

mony, child support, or separate maintenance payments.

(3) A creditor shall not request the sex of an applicant. An applicant may be requested to designate a title on an application form (such as Ms., Miss, Mr., or Mrs.) if the form appropriately discloses that the designation of such a title is optional. An application form shall otherwise use only terms that are neutral as to sex.

(4) A creditor shall not request information about birth control practices, intentions concerning the bearing or rearing of children, or capability to bear children. This does not preclude a creditor from inquiring about the number and ages of an applicant's dependents or about dependent-related financial obligations or expenditures, provided such information is requested without regard to sex, marital status, or any other prohibited basis.

(5) A creditor shall not request the race, color, religion, or national origin of an applicant or any other person in connection with a credit transaction. A creditor may inquire, however, as to an applicant's permanent residence and immigration status.

(c) **Application forms.** A creditor need not use written applications. If a creditor chooses to use written forms, it may design its own,[6] use forms prepared by another person, or use the appropriate model application forms contained in Appendix B. If a creditor chooses to use an Appendix B form, it may change the form:

(1) by asking for additional information not prohibited by this section;

(2) by deleting any information request; or

(3) by rearranging the format without modifying the substance of the inquiries; provided that in each of these three instances the appropriate notices regarding the optional nature of courtesy titles, the option to disclose alimony, child support, or separate maintenance, and the limitation concerning marital status inquiries are included in the appropriate places if the items to which they relate appear on the creditor's form. If a creditor uses an appropriate Appendix B model form or to the extent that it modifies such a form in accordance with the provisions of clauses (2) or (3) of the preceding sentence or the instructions to Appendix B, that creditor shall be deemed to be acting in compliance with the provisions of subsections (c) and (d).

[6] A creditor also may continue to use any application form that complies with the requirements of the October 28, 1975 version of Regulation B until its present stock of those forms is exhausted or until March 23, 1978, whichever occurs first. The provisions of this Part shall not determine and are not evidence of the meaning of the requirements of the previous version of Regulation B.

SECTION 202.6—RULES CONCERNING EVALUATION OF APPLICATIONS

(a) **General rule concerning use of information.** Except as otherwise provided in the Act and this Part, a creditor may consider in evaluating an application any information that the creditor obtains, so long as the information is not used to discriminate against an applicant on a prohibited basis.[7]

(b) **Specific rules concerning use of information.** (1) Except as provided in the Act and this Part, a creditor shall not take a prohibited basis into account in any system of evaluating the creditworthiness of applicants.[8]

(2)(i) Except as permitted in this subsection, a creditor shall not take into account an applicant's age (provided that the applicant has the capacity to enter into a binding contract) or whether an applicant's income derives from any public assistance program.

(ii) In a demonstrably and statistically sound, empirically derived credit system, a creditor may use an applicant's age as a predictive variable, provided that the age of an elderly applicant is not assigned a negative factor or value.

(iii) In a judgmental system of evaluating creditworthiness, a creditor may consider an applicant's age or whether an applicant's income derives from any public assistance program only

[7] The legislative history of the Act indicates that the Congress intended an "effects test" concept, as outlined in the employment field by the Supreme Court in the cases of *Griggs* v. *Duke Power Co.*, 401 U.S. 424 (1971), and *Albemarle Paper Co.* v. *Moody*, 422 U.S. 405 (1975), to be applicable to a creditor's determination of creditworthiness. See Senate Report to accompany H.R. 6516, No. 94-589, pp. 4-5; House Report to accompany H.R. 6516, No. 94-210, p. 5.

[8] This provision does not prevent a creditor from considering the marital status of an applicant or the source of an applicant's income for the purpose of ascertaining the creditor's rights and remedies applicable to the particular extension of credit and not to discriminate in a determination of creditworthiness. Furthermore, a prohibited basis may be considered in accordance with section 202.8 (special purpose credit programs).

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
January 14, 1982
1:10 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma
Rep. Gardiner
Rep. Randolph

Members Absent: Rep. Rogers

COMMITTEE CALENDAR

Teleconference to consider possible minority discrimination in the financial community.

WITNESS REGISTER

Senator Arliss Sturgulewski
Alaska State Senate
Pouch V
Juneau, Alaska 99811
465-3818
Position Statement: Sat in on committee hearing.

Louis Overstreet
Minority Business Assistance Center
street address not given
Anchorage, Alaska
phone not given
Position Statement: Spoke of problems minorities have getting funds.

Tom Stoner
self
4543 Lake Otis Pkwy., #112
Anchorage, Alaska
277-5882
Position Statement: Outlined his grievances with AHFC.

G.A. "Buzz" Hoffman
Alaska Industrial Development Authority
1577 C Street
Anchorage, Alaska
274-1651
Position Statement: Gave background on AIDA programs and minority statistics.

Harry F. Goldbar
Alaska Housing Finance Corporation
235 East 8th

Anchorage, Alaska
276-5599
Position Statement: Spoke about equal credit opportunity act and record-keeping.

Ed Wesley
National Association for the Advancement of Colored People (NAACP)
PO Box 405
Anchorage, Alaska 99510
274-4319
Position Statement: Gave brief history of need for this teleconference meeting.

Willie Ratcliff
Alaska Minority Task Force
835 Nelchina Avenue
Anchorage, Alaska
277-3733
Position Statement: Gave his position about funds being made available to black community.

Mary Afcan
NAACP Economic Development Committee
PO Box 405
Anchorage, Alaska 99510
274-4319
Position Statement: Spoke about AHFC and AIDA lending practices.

Future Rice
small businesswoman
325 West 6th Avenue
Anchorage, Alaska
276-1793
Position Statement: Spoke of her frustration.

Dean DeCloin
no affiliation given
address not given
Anchorage, Alaska
phone not given
Position Statement: Gave his views of use of minority statistics by lending institutions.

Phillip Pleasant
no affiliation given
address not given
Anchorage, Alaska
phone not given
Position Statement: Commented on worsening situation for blacks.

Willis Kirkpatrick, Executive Director
Division of Banking & Securities
Pouch D
Juneau, Alaska 99811

no phone given
Position Statement: Outlined function of division and explained system for bringing complaints.

Samuel Banks
NAACP
1679 23rd Avenue
Fairbanks, Alaska 99701
452-5614
Position Statement: Spoke of wanting a place in the "gap".

Barry Best
no affiliation given
no address given
Fairbanks, Alaska
no phone given
Position Statement: Asked to have legislation introduced to fund study of minorities' problems in financial community.

Pete W. Aiken
small businessman
1085 Steese Highway
Fairbanks, Alaska 99701
456-7523
Position Statement: Gave specifics of problems borrowing money from Alaska State Bank.

Adelheid Herrmann
Bering Sea Fisherman's Association
no address given
Dillingham, Alaska
no phone given
Position Statement: Went over difficulties with the Fisherman's Mortgage Note program.

Phil Moreno
self
General Delivery
Sitka, Alaska 99835
747-6720
Position Statement: Spoke of difficulty of obtaining housing loans.

Bill Morran, President
Alaska Bankers Association
no address given
Ketchikan, Alaska
no phone given
Position Statement: Spoke of recognizing the potential for discrimination and federal efforts to avoid this.

Jeff Senate, Development Coordinator
City of Saxman
no address given
Saxman, Alaska (through Ketchikan LTN)
no phone given
Position Statement: Suggestions for various programs.

Nora DeWitt, Clerk
City of Saxman
no address given
Saxman, Alaska
no phone given
Position Statement: Spoke of housing problems.

Mathilda Kushnik
self
no address given
Ketchikan, Alaska
no phone given
Position Statement: Commented on constitutional rights.

PREVIOUS ACTION

Not applicable.

ACTION NARRATIVE

Tape #001-002 Recording Number 1238	The meeting was called to order by Chairman Martin at 1:10 p.m. The committee schedule called for the consideration of possible minority discrimination in the financial community. No bills were before the committee; the purpose of the hearing was to encourage "clearing the air" between representatives of financial institutions and minorities.
Number 1273	ED WESLEY, of NAACP in Anchorage, gave a brief history of the need for this meeting.
Number 1294	HARRY GOLDBAR, of AHFC in Anchorage, spoke about equal credit opportunity act; notification of adverse action and maintenance of records; and the federal home mortgage disclosure act. Senator Sturgulewski questioned him about the disclosure act and EEO act.
Number 1348	BUZZ HOFFMAN, of AIDA in Anchorage, gave background on AIDA programs and how meetings

are noticed and held. He gave statistics on minority employment within AIDA. He gave an overview of authority and dispersal of funds. Senator Sturgulewski commended public outreach efforts of the program. Hoffman promised a breakdown of last year's loan activity would be provided to the legislature.

Number 1390 — BILL MORRAN, president of the Alaska Bankers Association, Ketchikan, spoke of recognizing the potential for discrimination and federal efforts to avoid this. He outlined compliance with regulations and recourse of individuals who feel they are discriminated against.

Number 1427 — WILLIS KIRKPATRICK, Executive Director of the State Division of Banking and Securities, outlined the function of his division, and explained the system for bringing complaints. He told what is looked for in joint examinations, and went over new FDIC program on discrimination. Chairman Martin asked who to contact with complaints, and Kirkpatrick gave this information, adding that complaints need to be expressed in writing.

Number 1525 — ADELHEID HERMANN, representing the Bering Sea Fisherman's Association, Dillingham, went over difficulties with the Fisherman's Mortgage Note program. She noted that the cost of entry into the market is too high.

Number 1563 — LOUIS OVERSTREET of the Alaska Minority Business Assistance Center in Anchorage spoke of problems minorities have getting funds. Senator Sturgulewski said she had attended an NAACP meeting wherein these problems had been discussed; she said that several agencies she had contacted had pointed out the need for specific information in order to deal with accusations of discrimination.

Number 1598 — ED WESLEY, of NAACP in Anchorage, spoke again to express his concern that lending agencies don't have data to prove they are not discriminating against minorities. He felt these institutions were discriminating, de facto. He said the system doesn't work, and that the State has a poor affirmative action program. Chairman Martin asked if a

voluntary effort by the black community in listing their race on loan forms could help provide data. Wesley said the burden should not have to be put on individual citizens when legislators have been informed of the problem.

Number 1639 — J.P. JONES, President, NAACP, Fairbanks, illustrated minority problems by describing difficulty in finding out from lending institutions precisely what information they needed to determine award of loans. He said the Governor had been requested to investigate whether discrimination existed, and that the Governor had found no cases of discrimination. Jones outlined recourse according to federal regulations.

Number 1665 — PETE AIKENS, a Fairbanks small businessman, claimed that most state loan officers were former bank officers. He gave specifics of his problems borrowing money from Alaska State Bank, saying it took over a year for him to get a loan. Chairman Martin asked, and Aikens responded to, questions about loan procedures and complaint follow-through.

Number 1714 — PHIL MORENO of Sitka said he found it hard to obtain housing loans.

Number 1743 — WILLIE RATCLIFF of the Alaska Minority Business Task Force, as well as candidate for State Senate, Anchorage, felt a portion of banks' loan funds should be allocated to the black community. Chairman Martin asked the possibility of the black community drawing up a plan they feel is fair addressing legislative funds. Ratcliff said the resources were not available for such a task, and that it was not their responsibility.

Number 1823 — MARY AFCAN, Economic Development Committee, NAACP, Anchorage, said that in the first month of AHFC lending, no home loans were made to blacks. She said that when AHFC found out that the bond market was concerned about bonds susceptible to attack, AHFC attitude changed, which change was communicated to the private market. AIDA is staffed by former bankers. She claimed attempts were made to take property away from blacks in order to ruin their economic

stability. Chairman Martin commented on this.

Number 089, Tape 2 — SAMUEL BANKS of NAACP in Fairbanks spoke of wanting a place in the "gap".

Number 0165 — BARRY BEST, Fairbanks, wants legislation introduced funding a study of minorities' problems in the financial community.

Number 0179 — JEFF SENATE, development coordinator for the City of Saxman, suggested a look at national participants' programs to develop citizens participations rights policy for the state. He made suggestions for community development programs, loan programs, and local housing authority.

Number 0310 — NORA DEWITT, Clerk for the City of Saxman, noted their community has a large native population. She said the area is losing a large part of their youth population due to lack of housing. She said the community is being denied funds because of a road to Ketchikan.

Number 0358 — FUTURE RICE, a small businesswoman from Anchorage, said she felt frustrated, and did not think Wesley responded to the problem, but instead addressed procedures.

Number 0396 — TOM STONER, Anchorage, outlined his grievances with AHFC.

Number 0476 — DEAN DECLOIN of Anchorage commented on agencies with the potential to provide information who don't do so. He said agencies should be required to collect and use minority information. He expressed support of lending programs.

Number 0585 — PHILLIP PLEASANT, Anchorage, commented on the worsening situation for blacks.

Number 0610 — MATHILDA KUSHNIK, Ketchikan, commented on constitutional rights.

Number 0655 — BUZZ HOFFMAN, AIDA, Anchorage, once again outlined his agency's outreach programs.

Number 0687 — HARRY GOLDBAR, AHFC, Anchorage, spoke regarding statistics on loan applicants.

Number 0725 — There being no further testimony, and no

further items to come before the committee at this time, Chairman Martin adjourned the meeting at 3:23 p.m.

COMMITTEE MINUTES
COMMITTEE: House Labor & Commerce
HEARING DATE: January 14, 1982
TAPE NO. 1 and 2, sides A

The meeting was called to order by Chairman Martin at 1:10 pm in the House Labor & Commerce committee room, Behrends Building, Juneau, Alaska. Committee members present in addition to the Chairman were Representatives Bylsma, Randolph, and Gardiner. Representative Rogers was absent. Committee staff in attendance were Jeff Barry, Mary Isaacs, and Joan Mathews. Also attending was Senator Arliss Sturgulewski; both she and Representative Randolph left approximately one-half hour into the teleconferenced meeting. Meeting was teleconferenced statewide.

The committee schedule called for the consideration of possible minority discrimination in the financial community. No bills were before the committee; purpose of the hearing was to encourage "clearing the air" between representatives of financial institutions and minorities.

First to testify was Ed Wesley, of NAACP in Anchorage (meter no. 1273). He gave a brief history of the need for this meeting.

Harry Goldbar of Anchorage (meter no. 1294) spoke about equal credit opportunity act; notification of adverse action (meter no. 1322) and maintenance of records; and the federal home mortgage disclosure act (meter no. 1327). Senator Sturgulewski questioned him (meter no. 1337) about the disclosure act and EEO act.

Buzz Hoffman of AIDA in Anchorage (meter no. 1348) gave background on AIDA programs and how meetings are noticed and held. He gave statistics (meter no. 1359) on minority employment within AIDA. He gave an overview (meter no. 1369) of authority and dispersal of funds. Senator Sturgulewski (meter no. 1374) commended public outreach efforts of the program. Mr. Hoffman (meter no. 1383) promised a breakdown about last year's loan activity would be provided to the legislature.

Bill Morran of Ketchikan, president of the Alaska Bankers Association (meter no. 1390) spoke of recognizing the potential for discrimination and federal efforts to avoid this. He outlined (meter no. 1405) compliance with regulations, and (meter no. 1409) recourse of individuals who feel they are discriminated against.

Willis Kirkpatrick, Executive Director of the State Division of Banking and Securities (meter no. 1427), outlined the function of his division, and explained the system for bringing complaints. He told (meter no. 1486) what is looked for in joint examinations, and went over (meter no. 1492) new FDIC program on discrimination. Chairman Martin (meter no. 1503) asked who to contact with complaints, and Kirkpatrick gave his information, adding (meter no. 1513) the complaints need to be expressed in writing.

Adelheid Herman of Dillingham, representing Bering Sea Fisherman's Association, (meter no. 1525) went over difficulties with the Fisherman's Mortgage Note program. She noted that the cost of entry into the market is too high.

Louis Overstreet of the Alaska Minority Business Assistance Center in Anchorage (meter no. 1563), spoke of problems minorities have getting funds. Senator Sturgulewski (meter no. 1584) said she had attended an NAACP meeting wherein these problems had been discussed; said that several agencies she had contacted had pointed out the need for specific information in order to deal with accusations of discrimination.

Ed Wesley of NAACP in Anchorage (meter no. 1598) spoke again to express his concern that lending agencies don't have data to prove they are not discriminating against minorities. He felt these institutions were discriminating, de facto. He said the system doesn't work, and that the State has a poor affirmative action program. Chairman Martin (meter no. 1621) asked if a voluntary effort by the black community in listing their race on loan forms could help provide data. Wesley (meter no. 1630) said the burden should not have to be put on individual citizens when legislators have been informed of the problem.

J.P. Jones, President of NAACP, Fairbanks (meter no. 1639), illustrated minority problems by describing difficulty in finding out from lending institutions precisely what information they needed to determine award of loans. He said the Governor had been requested to investigate whether discrimination existed, and that the Governor had found no cases of discrimination. Jones outlined recourse according to federal regulations (meter no. 1662).

Pete Aikens, a Fairbanks small businessman (meter no. 1665), claimed that most state loan officers were former bank officers. He gave specifics (meter no. 1680) of his problems borrowing money from Alaska State Bank, saying it took over a year for him to get a loan. Chairman Martin asked (meter no. 1698), and Aikens responded to (meter no. 1707), questions about loan procedures and complaint follow-through.

Phil Moreno of Sitka (meter no. 1714), said he found it hard to obtain housing loans.

Willie Radcliff of the Alaska Minority Business Task Force (meter no. 1743) as well as candidate for State Senate, Anchorage, felt a portion of banks' loan funds should be allocated to the black community. Chairman Martin (meter no. 1808) asked the possibility of the black community drawing up a plan they feel is fair addressing legislative funds. Radcliff (meter no. 1815) said the resources were not available for such a task, and that it was not their responsibility.

Mary Afcan of NAACP Economic Development, Anchorage (meter no. 1823), said that in the first month of AHFC lending, no home loans were made to blacks. She said that when AHFC found out that the bond market was concerned about bonds susceptible to attack, AHFC attitude changed, which change was communicated to the private market. AIDA is staffed by former bankers. She claimed (Tape 2, meter no. 056) attempts were made to take property away from blacks in order to ruin their economic stability. Chairman Martin (meter no. 083) commented on this.

Samuel Banks of NAACP in Fairbanks (meter no. 089) spoke of wanting a place in the "gap".

Barry Bess, Fairbanks (meter no. 165), wants legislation introduced funding study of minorities' problems in financial community.

Jeff Senate, development coordinator for the City of Saxman (meter no. 179), suggested look at national participants' programs to develop citizens participation rights policy for the state. He made suggestions for community development programs, loan programs, and local housing authority.

Nora DeWitt, Clerk for the City of Saxman (meter no. 310), noted their community has a large native population. She said the area is losing a large part of their youth population due to lack of housing. She said the community is being denied funds because of a road to Ketchikan.

Future Rice, a small businesswoman from Anchorage (meter no. 358), said she felt frustrated, and did not think Wesley responded to the problem, but instead addressed procedures.

Tom Stoner, Anchorage (meter no. 396), outlined his grievances with AHFC.

Dean DeCloin of Anchorage (meter no. 476), commented on agencies with the potential to provide information who don't do so. He said (meter no. 524) agencies should be required to collect and use minority information. He expressed support of lending programs.

Phillip Pleasant, Anchorage (meter no. 585), commented on the worsening situation for blacks.

Mathilda Kushmik, Ketchikan, commented on constitutional rights (meter no. 610).

Buzz Hoffman, AIDA, Anchorage (meter no. 687), once again outlined his agency's outreach programs.

Harry Goldbar, Anchorage (meter no. 687), spoke regarding statistics on loan applicants.

There being no further testimony, and no further items to come before the committee at this time, Chairman Martin adjourned the meeting at 3:23 p.m.

Dear Legislators

In follow up to our teleconference testimony regarding the precieved inequities in Alaska State Loan Programs and Commercial lending practices toward minorities, we have researched and will make available to our clients the "Equal Credit Opportunity" policy of several Anchorage banks.

These policies are taken directly from Federal requirements. Thus far we have not been able to ascertian the various entities levels of effort to address the perceptions that inequities exist. A part of the problem is one of communications, or the lack there of. As a legislator, you may choose to informally bring to the attention of state loan program administrators, bank officals and lending officers the need for increased sensitivity in this area.

While our primary charge is to provide technical (estimating, bidding) assistance our office is willing to provide any support they may be requested from the Alaska Business Development Center, whose primary charge is one of providing financial planning assistance in the preparation of loan request packages. Further we will continue to research the issue and advise our clients to request information on lending policies whenever they apply for loans.

We will keep you advised of further developments or responses as they come to our office. If our office may be of further assistance to you on this issue, please do not hesitate to call.

Sincerely,

E. Louis Overstreet

FOR IMMEDIATE RELEASE

MINORITIES TO AIR FRUSTRATION WITH LOAN PROGRAMS

Concerned minorities and women who feel they are being denied access to or participation in the economic community are invited to testify before the House Labor & Commerce Committee. A statewide teleconference will be held by the Committee on Thursday, January 14, at 1 PM Juneau time. Representatives of Alaska Housing Finance Corporation (AHFC), Alaska Industrial Development Authority (AIDA), banking institutions, and several minority groups will be present to testify.

Anchorage Republican Terry Martin, state representative for House District 8 will chair the hearing. Representative Martin participated in a meeting of the National Association for the Advancement of Colored People at Anchorage in mid-December, where members expressed concerns and grievances about not having equal access to the economic community in Alaska. Representative Martin stressed, "This hearing is aimed at clearing the air between minorities and financial institutions. No legislation has been introduced at this time. I intend for the Committee to act as a sounding board for those who have grievances to express." Martin's district includes the significant minority population in the Muldoon and Mountain View areas of Anchorage.

More...

Public participation is invited by the Committee. For more information, contact Labor & Commerce Chairman Terry Martin in Juneau at 465-3784, or call your Legislative Information Office at 465-4648.

People attending in Juneau:

Harry F. Goldbar, Executive Director, AHFC

H.A. Hoffman, Exec Dir, AIDA
└ may send Wayne Williams, Deputy of Credit

Edward Wesley, President, NAACP

~~[redacted]~~

Wes Coiner, banking institutions lobbyist

11 am Alaska

① Write PSA
② Check w/ Ray re whether to do an actuality for radio stns
③ release to papers, TV & radio statewide

---

① check w/ Sturgelewski & see if she'll attend
② ck LAA to see when teleconf is scheduled; make sure participation is invited statewide
③ request participation of all minority groups who feel they are being denied access to & participation in the economic community.

call Deborah back & tell her names of any people who'll definitely be testifying

contacted ~~Rick~~ Sen. Sturgelewski's ofc (Betty) who said Sen. is out of town, but put the hrg on her calendar. Call back & check Mon afternoon if no word.

The borrower must not own assets exceeding two times their maximum income figure. A borrower (or any one of the borrowers) who is 65 or over must not own assets exceeding three times their maximum income figure.

Owner-occupied single family residences, condominiums, and PUD's constitute eligible property. Mobile Homes and Duplexes are not permitted.

A.) Neither the sales price nor the appraised value of the home shall exceed $80,000.

B.) The minimum down payment requirement is 5%.

C.) The maximum loan amount is $76,000.

The maximum term of the loan is 30 years, with a minimum term of 20 years.

.....

AHFC also offers a special rural housing program and a program for the financing of mobile homes. For further information on all AHFC programs, please contact your lender.

Alaska Housing Finance Corporation

Considering home ownership?

Having difficulty qualifying for a mortgage?

PERHAPS AHFC CAN HELP!

Alaska Housing Finance Corporation provides residential real estate financing to all areas of Alaska by operating as a secondary mortgage market for loans originated and serviced by private lending institutions. The commitment of AHFC is to provide a stable source of funding for credit-worthy, eligible borrowers at the lowest possible cost.

AHFC Mortgage Interest Rates

AHFC's financing programs make it possible to provide mortgage interest rates at a level far below those generally available from other sources. Mortgage interest rates are based on the interest rate for AHFC bonds and other factors. Therefore, mortgage rates will change from time to time.

How To Find Out About AHFC Home Mortgages

Ask any participating lender listed in this pamphlet for information.

How To Secure An AHFC Mortgage

The lender will determine if you are eligible for home mortgage financing and if your income is sufficient to make the monthly mortgage payment. All mortgages are originated for AHFC by participating lenders; AHFC does not make direct mortgage loans.

Those loan requests that are to be insured or guaranteed by the FHA or VA require the approval of these federal agencies before submission to AHFC. The seller/servicer then submits the loan to AHFC for approval of property and credit.

Housing Eligible For Mortgage Financing

AHFC finances only permanent mortgages on new or existing homes (single family or duplex). All housing financed must be owner-occupied.

Maximum Mortgage Amounts

The maximum mortgage amount that AHFC will consider is the LESSER of the following:

1.) The amount listed below, or

2.) The amount the borrower(s) can afford, based on his/her income.

Single Family Residence (Includes Condominium or Planned Unit Development):

Conventional-Maximum loan of $147,750 with maximum financing of 95%.

*FHA-$101,250 *VA-$110,000

*Down payments required for FHA or VA loans vary. Check with your lender for details.

Two Family Residence (Duplex):

Conventional-Maximum loan of $189,000 with maximum financing of 95%

*FHA-VA down payments vary. Check with your lender for details.

Lenders are permitted to charge an "origination fee" to borrowers for program loans.

Loans To Refinance for Home Improvement

The maximum loan on a single family residence ($147,750) or two family residence (Duplex: $189,000) cannot exceed the amount of the existing indebtedness plus the actual cost of improvement.

A cost budget plus a descriptive narrative of improvements must be submitted to the lender for prior approval by AHFC. The proposed improvements must increase the present value by not less than 10% or $10,000.

The maximum Loan-To-Value Ratio is 80%; with a maximum loan term of thirty years.

Criteria For Graduated Payment Mortgages (Pledged Amount Mortgages)

A "PAM" is a conventionally amortizing (level monthly payment) loan in which all or part of the purchaser's down payment funds are placed in a savings account which is pledged to the lender as additional collateral and as a source of contributions toward the payments.

The maximum Loan-To-Value Ratio is 95%.

The "net mortgage amount" cannot at any time exceed 95% of the original value (the lesser of the purchase price or appraised value).

The total down payment of the borrower(s), including that portion placed in the pledged savings account, will be approximately 10%.

Eligible property includes single family residences, condominiums and PUD's. Duplexes are not permitted. Property must be owner-occupied.

All "PAM" loans will have private mortgage insurance if at anytime the net Loan-To-Value Ratio exceeds 80%.

Maximum Term of 30 years.

Loans With Special Assistance for Low and Moderate Income Buyers

The Home Ownership Fund subsidizes a portion of the borrower's monthly mortgage payment. This subsidy will not be paid direct, but rather through the lender.

Payments may be subsidized by the Home Ownership Fund in an amount not to exceed the lesser of:

1.) The payment reduction which would occur if such loan were made at a rate of 6% interest, or

2.) A subsidy payment that shall reduce the mortgage loan payment of principal and interest to 20% of the mortgagor's adjusted gross income.

Eligibility For Home Ownership Fund

Lower-to-moderate income borrowers are defined to be persons with gross income per family not exceeding the income limits set forth below:

Family Size	Income Limit
1	25,650
2	26,650
3	27,650
4	28,650
5	29,650
6	30,650
7	31,650
8 or more	32,650

Family for these purposes is considered to be those persons residing in a household on a year-round basis.

NAME OF PROGRAM

Alaska Housing Finance Corporation (AHFC)
Rural Housing Mortgage Purchase Program

DEPARTMENT/DIVISION RESPONSIBLE

AHFC is both an independent public corporation and an instrumentality within the Department of Revenue

STATUTE REFERENCE

Developed in 1979

PURPOSE AND/OR CONDITIONS

Increase the housing available to communities with 4,500 or fewer inhabitants located outside areas with road or rail access to Anchorage and Fairbanks.

QUALIFIED USERS

Beneficiary must live in town or village of 4,500 or fewer, without access by road or rail to Anchorate or Fairbanks; dwelling, or one unit of duplex, must be occupied by its owner; no income limit for borrowers.

LOAN TERMS

see back

LENDING MECHANISM

see back

Loan Terms

Single-family Dwelling:

MAXIMUM AMOUNT:	$147,750
DOWN PAYMENT:	5%
MAXIMUM TERM:	30 years
INTEREST:	8.75%
FEES:	.5% commitment fee (refundable)

Owner-occupied Duplex:

MAXIMUM AMOUNT:	$189,000
DOWN PAYMENT:	10%
MAXIMUM TERM:	30 years
INTEREST:	8.75%
FEES:	.5% commitment fee (refundable)

Lending Mechanism

Because there are few banks available in rural areas, Regional Housing Authorities have been designated to act as intermediate lenders, originating and servicing the loans. AHFC buys the mortgages from the Regional Housing Authories, which retain a .5% servicing fee in addition to the 1% origination fee.

NAME OF PROGRAM

Alaska Housing Finance Corporation (AHFC)
Mobile Home Loan Purchase Program

DEPARTMENT/DIVISION RESPONSIBLE

AHFC is an independent public corporation and an instrumentality within the Department of Revenue

STATUTE REFERENCE

AS 18.56.090-098

PURPOSE AND/OR CONDITIONS

Provide low-cost financing for mobile homes in Alaska

QUALIFIED USERS

Eligible mobile homes may contain not less than 600 square feet of gross living area; no refinancing permitted; borrower must live in the mortgaged mobile home; no income limit for borrowers.

DESIGNED AND PRODUCED BY MYSTROM ADVERTISING, INC.

A. through AIDA!

That's great but who or what is AIDA?

The Alaska Industrial Development Authority. We were set up by the State of Alaska to help creditworthy businesspeople secure long-term financing for capital projects. To accomplish this, a lot of thoughtful planning was put in by the Governor, the Lieutenant Governor and the Legislature before AIDA was created.

But we're not a state agency. We're an independent body dedicated to a smooth-running, quick-approval loan program, in cooperation with Alaska's lending institutions.

Here's how the program works, in a nutshell.

AIDA sells bonds on the national money market. With the proceeds from these sales we purchase portions of loans made by lenders to businesspeople. Now, here's the good part. Because the interest paid on AIDA's bonds is exempt from Federal Income Tax, the bonds bear relatively low interest rates. These low interest rates are passed on to you, through your lending institution.

We want to help businesspeople with good credit standing obtain long-term financing. AIDA has programs for loans under a million and for loans from one to ten million dollars.

This is a brief summary of how AIDA works. The following sections answer questions most often asked about AIDA's different programs.

Questions you probably have about loans under a million dollars:

Q. *Who can qualify for this program?*

A. Any small business enterprise with good credit who desires permanent financing up to $1 million. Also two individual commercial fishermen may apply for loans of $500,000 each. There is no minimum loan amount.

Q. *What types of projects qualify?*

A. Loans are made for new construction, new additions or expansions, new equipment, or for acquisition of existing plant or equipment when seller and buyer are unrelated.

Q. *If AIDA commits to purchase part of my loan from a lender, how long does that commitment last?*

A. For up to a year. This allows you time to complete your plans.

Q. *Will AIDA give me a break if there's a bad business or fishing season?*

A. Yes, you can get an extension, if both the lender and AIDA agree.

Q. *And some people say that the fees are pretty steep. True?*

A. No, your non-refundable fees will never exceed $600. In fact, we're working to lower the fees even more.

Q. *If I have a good season and can pay off the loan early, will AIDA penalize me?*

A. No, there is no penalty for an early payoff.

Q. *How long after my lender agrees to make my loan will it take AIDA to commit to participate?*

A. Usually five days seldom over ten.

Q. *How long after AIDA's commitment will I have the money?*

A. Usually within 48 hours, a time acceptable to AIDA and your lender.

Q. *Can I refinance?*

A. No, AIDA's program is only for purchase or acquisition of capital assets or improvements.

Questions about bigger loans (1-10 million dollars):

Q. *What's the major difference between loans under and over 1 million dollars?*

A. While loans over a million dollars are still financed through tax exempt bonds, the cost to the borrower is more and the borrower must have considerable financial strength.

Q. *What is AIDA's role in these loans?*

A. We can help you arrange, through a nationally recognized firm, issuance of tax exempt bonds for your project. If a national firm can't be found, we will try to obtain funds through other financial institutions.

Questions lenders ask us most often:

Q. *Won't dealing with AIDA cause the lender a lot of headaches?*

A. No, AIDA will participate in a loan of up to 75% of the cost of borrower's project. We can purchase up to 90% of the loan if you carry 10%. We make it easier to lend to your customers at lower interest rates.

Q. ***What restrictions apply to the lenders who originate these loans?***

A. AIDA's participation must be serviced within Alaska by a regulated financial institution.

Q. ***But there's a lot of special forms we have to fill out, right?***

A. Not at all. AIDA will accept your loan forms.

Q. ***Do I have to sell 90% of my loan to AIDA?***

A. No, you may sell any portion as long as it doesn't exceed 90%. And you may sell up to 90% of your portion to another regulated financial institution. You could have as little as 1% in the loan.

Q. ***Is AIDA a direct lender?***

A. No, we serve only as a secondary financing market. The use of AIDA is controlled by you, the lender, working with your client.

Directors of AIDA
Lance Anderson, *Chairman*
Thomas K. Williams, *Vice Chairman*
L. C. Coffman
Charles R. Webber
Lee McAnerney
H. A. "Buzz" Hoffman, *Executive Director*

Well you've certainly answered our questions about AIDA!

If you have further questions, please contact your lender, or call us at 274-1651.

NAME OF PROGRAM

ALASKA INDUSTRIAL DEVELOPMENT AUTHORITY (AIDA)

DEPARTMENT/DIVISION RESPONSIBLE

Prior to July 1, 1981, also Small Business Loan program was handled by the Division of Business Loans. AIDA now handles this program. AIDA is a public corporation and an instrumentality of the Department of Commerce and Economic Development, with a legal existence separate from and independent of the State.

STATUTE REFERENCE

AS 44.88.010-220

PURPOSE AND/OR CONDITIONS

Promote, develop, and advance the general prosperity and economic welfare of the people of Alaska, to relieve problems of unemployment and to create additional employment by providing means of financing industrial, manufacturing, small business, tourism, mining, and commercial fishing enterprises.

QUALIFIED USERS

AIDA may finance any project it approves as long as the project conforms to IRS guidelines for use of proceeds of tax-exempt bond sales. Tax-exempt bonds may be used to finance only new construction or plants; no refinancing is eligible.

LOAN TERMS

see back

LENDING MECHANISM

Public bond sales. State appropriations, fees and charges. Secondary.

LOAN TERMS

Major Industry

Amounts, terms, and interest rates vary and are determined by AIDA.

Umbrella (Small Business, Tourism, Mining, and Commercial Fishing Enterprises)

MAXIMUM AMOUNT:	$ 6 million for Tourism $ 1 million for Mining or Small Business $ 500,000 for commercial fishing May not exceed 75% of cost of project unless excess if insured.
MAXIMUM TERM:	25 years or 75% of estimated life of project, whichever is less
INTEREST:	Variable
FEES:	$100 pre-application fee (non-refundable) $500 application fee (non-refundable) $4,000 or 2% of the amount of loan, whihever is greater, commitment fee (refundable)

copies to Dist 1 House member + Sen Dist A. member rcd 1-27-81

Jan 14, 1982

Anchorage Republican Terry Miller:

Dear Sir.

I listened to the Teleconference for women and minorities in the Alaska economic picture and would like to speak for women.

In 1967 I came to Ketchikan from Yakutat Island south of Sitka, with teenage children, an illness which had escaped diagnosis and almost unlimited financial credit. I was desperate for a plan to leave my children in care & wasn't around to take care of them

My children found a small marina - they thought they could handle and it was for sale. The owner and I drew up an earnest agreement + left it at the bank which held his mortgage

Two months later the bank called for me to sign the papers. They had changed my name and marital status and I could either sign or forfeit the deal. We were living it and running the Marina by that time so I signed in desperation thinking I could clear it up with a Will and court.

I was wrong. The judge refused to hear any thing I said I never got to court. The news finally published that I had asked for divorce but in the meanwhile my "husband" was given free access to everything. The bank even loaned him money on my credit. I was principled by a bank which

had almost nothing to gain except 8% of $6,000 for 7 years. We had no protection. I was beaten insensible + suffered a stroke. My daughter was Calypso We were robbed. It was 18 months before I got to the hospital + my health turned around. The State took the harbor and put us out of business. (a Ketchikan man) Part of the property was taken by a State engineer for a parking lot. No survey or remuneration. My "husband" gave the property to a buddy by quit claim which I have no doubt the court will be glad to honor when I contest it.

When we ask for help we were told A woman has no right to disagree with a family in Alaska

Sorry this is so long but I am the one who knows about Women and the economic detention in Alaska. They are Pinepecked by it.

HB612

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
January 18, 1982
1:20 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Randolph
Rep. Gardiner

Members Absent: Rep. Rogers

COMMITTEE CALENDAR

HB 612 — An act relating to public contracts for architectural and engineering services.

HB 600 — Re/Civil Liability/Architects/Engineers

WITNESS REGISTER

Tom Sofo
LAA Legal Services
Pouch Y
Juneau, Alaska 99811
465-3867
Position Statement: Compared committee substitute workdraft and discussion drafts.

Charles E. Torkko, President
Consulting Engineers Council of Alaska
1351 Virginia Court
Anchorage, Alaska 99501
278-2551
Position Statement: Supports legislation ensuring selection made on the basis of professional qualifications and competence, not price bids.

PREVIOUS ACTION

HB 600 — No previous action to record.

Chairman Martin asked the committee to defer action on HB 600 indefinitely; committee agreed unanimously.

HB 612 — No previous action to record.

Rep. Randolph moved to accept workdraft of committee substitute for HB 612. Rep. Gardiner seconded motion; motion passed

unanimously.

ACTION NARRATIVE

Tape #002
Recording
Number 000

Meeting was called to order by Chairman Martin at 1:20 p.m. Committee members present were Reps. Martin, Bylsma, Randolph, and Gardiner. Rep. Rogers was absent.

Number 0734

Chairman Martin gave a brief history of HB 612 and presented the final workdraft.

Number 0746

TOM SOFO, of Legislative Legal Services, compared the committee substitute workdraft and discussion drafts. He said the drafts share the goal of changing contracts criteria from considering only the lowest bidder. Recent drafts look at "best qualified...on the basis of professional competence." The difference lies in the words used to specify qualifying criteria. He felt there was room for argument over distinguishing criteria, as all applicants may be capable and qualified; agencies may always end up with the same pool of qualified contractors and may be forced to choose one who is "best". Sofo said the legislation may be left to a layman's interpretation of what the legislation means. He said the difference between capable and qualified and best qualified are the differences in the versions of the bill. Sofo said he would need more material if he was to review the bill further.

Number 0817

CHARLES E. TORKKO, president of Consulting Engineers Council of Alaska, said he supports legislation ensuring selection made on the basis of professional qualifications and competence, not price bids. (NOTE: Mr. Torkko left a copy of his prepared testimony with the committee; this is available for review.) He compared selection of an engineer or architect to selecting a doctor or lawyer by who gave the lowest bid. Torkko said that skill and experience must be considered before awarding a bid; then negotiate for a fair and reasonable price. He expanded on quality versus cost; premature bids often result in poorer quality or cost overruns. Torkko said the generally accepted method of bidding is to

select qualified bidders, then negotiate a price; as an example, he said the federal government uses this method. He said the State Board of Architects, Engineers and Land Surveyors prohibits architects and engineers from soliciting or giving fee bids. Torkko said this legislation would apply only to architects, engineers, and land surveyors. It would ensure highest quality of service while retaining flexibility.

Number 0924 — There was committee discussion about how it is determined who is best qualified, questions about price negotiation, cost estimates, and rating firms, with Torkko responding.

Number 1038 — There being no further testimony, Rep. Randolph moved to accept the workdraft of committee substitute for HB 612. Rep. Gardiner seconded the motion. Motion passed unanimously.

Number 1051 — Chairman Martin said groups had requested deferrment of consideration of HB 600; the committee agreed, and HB 600 was deferred indefinitely.

Number 1055 — As there were no further items to come before the committee at this time, the Chairman adjourned the meeting at 1:53 p.m.

COMMITTEE MINUTES
COMMITTEE HOUSE LABOR & COMMERCE
HEARING DATE January 18, 1982
TAPE NO. 2, Side A

The meeting was called to order by Chairman Martin at 1:20 p.m. in the Labor & Commerce Committee Room, Behrends Building, Juneau, Alaska. Committee members present in addition to the Chairman were Representatives Bylsma, Randolph, and Gardiner. Representative Rogers was absent. Committee staff in attendance were Mary Isaacs, Jeff Barry, and Joan Mathews.

The committee schedule called for the consideration of the following items: House Bill 612 and House Bill 600. Testifying before the committee regarding HB 612 were Tom Sofo, counsel from Legislative Legal Services, and Charles E. Torkko, President, Consulting Engineers Council of Alaska.

Chairman Martin (meter no. 0734) gave a brief history of HB 612 and presented the final workdraft.

Tom Sofo of Legislative Legal Services (meter no. 0746) compared the committee substitute workdraft and discussion drafts. He said (meter no. 0759) the drafts share the goal of changing contracts criteria from considering only the lowest bidder. Recent drafts (meter no. 0766) look at "best qualified...on the basis of professional competence." The difference lies (meter no. 0722) in the words used to specify qualifying criteria. He felt there was room for argument (meter no. 0783) over distinguishing criteria, as all applicants may be capable and qualified; agencies may always end up with the same pool of qualified contractors and may be forced to choose one who is "best". Sofo said the legislation (meter no. 0800) may be left to a layman's interpretation of what the legislation means. He said (meter no. 805) the difference between capable and qualified and best qualified are the differences in the versions of the bill. Sofo said (meter no. 811) he would need more material if he was to review the bill further.

Charles E. Torkko, president of Consulting Engineers Council of Alaska (meter no. 0817) said he supports legislation ensuring selection made on the basis of professional qualifications and competence, not price bids. (Note: Mr. Torkko left a copy of his prepared testimony with the committee; this is available for review.) He compared selection of an engineer or architect to selecting a doctor or lawyer by who gave the lowest bid (meter no. 0846). Torkko said (meter no. 0850) that skill and experience must be considered before awarding a bid; then negotiate for a fair and reasonable price. He expanded on quality versus cost; premature bids (usually low) often result in poorer quality or cost overruns. Torkko said (meter no. 0884) the generally accepted method of bidding is to select qualified bidders, then negotiate a price; as an example, he said the federal government uses this method. He said (meter no. 0893) the State Board of Architects, Engineers and Land Surveyors prohibits architects and engineers from soliciting or giving fee bids.

Torkko said (meter no. 0914) this legislation would apply only to architects, engineers, and land surveyors. It would ensure highest quality of service while retaining flexibility.

Rep. Randolph (meter no. 0924) asked how it is determined who is best qualified, and whether this procedure would not create the opportunity for "less than proper determinations". Torkko responded (0929) that price competitions does not eliminate this, and that selection by qualification is traditional, competing with qualifications and skills on a fair basis rather than articifical procedures with sketchy data.

Rep. Bylsma (meter no. 0948) asked, if two or three firms appear equal, how is selection made. Torkko responded (meter no. 0950) that any number might do an adequate job; the process in analyzing "subject specificity" results in a "level of comfortability", and establishes trust and confidence. He said (meter no. 962) it is common to have equally qualified firms ranked differently due to different approaches, personalities, etc.

Rep. Bylsma asked (meter no. 0970), if price is negotiated after selection, would that have a bearing on the fee. Torkko (meter no. 0973) didn't think so. He said the development of a contract is a difficult project; some agencies have a budget, which may or may not be revealed; larger agencies do checks on workscope. The major difference is what is included in the contract. He added (meter no. 0989) that the owner has leverage--if the price is unsuitable, they can terminate the negotiations.

Chairman Martin (meter no. 0995) asked if this procedure could help state and municipal governments better estimate final costs. Torkko said (meter no. 1002) that, by hiring skilled people, estimates should be as skillful as humanly possible. Budgets are often made up with little information. That, and construction cycles beyond control, can distort figures.

Rep. Bylsma (meter no. 1021) asked if it would not help a firm's ratings if they were accurate in their estimates, and vice versa. Torkka said it would.

There being no further testimony, Rep. Randolph (meter no. 1038) moved to accept the workdraft of committee substitute for HB 612. Rep. Gardiner (meter no. 1042) questioned exactly which draft was being referred to, and then seconded the motion. Motion passed unanimously (meter no. 1047).

Chairman Martin (meter no. 1051) said groups had requested deferrment of consideration of HB 600; the committee agreed, and HB 600 was deferred indefinitely.

As there were no further items to come before the committee at this time, the Chairman adjourned the meeting at 1:53 p.m.

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to public contracts for architectural and engineering services."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 35.15 is amended by adding a new section to read:

Sec. 35.15.055. CONTRACTS FOR ARCHITECTURAL AND ENGINEERING SERVICES. (a) The department may award a contract for architectural or engineering services only to a person or firm that the department determines is capable and qualified. Notwithstanding AS 35.15.050, after selecting a capable and qualified contractor for architectural or engineering services the department shall establish a reasonable fee for the services through negotiations with the contractor. The fee shall be based on the scope and complexity of the services required.

(b) A person or firm that provides architectural or engineering services may annually submit to the department a statement of qualifications and performance data. Before awarding a contract under (a) of this section, the department shall review the statements of qualifications and performance data on file with the department together with statements of qualifications and performance data submitted by others in response to an advertisement or request for bids under AS 35.15.030.

HOUSE LABOR & COMMERCE COMMITTEE

HEARING DATE: _____

1/15/82

TESTIMONY OF MR. CHARLES E. TORKKO
President, Consulting Engineers Council of Alaska

Mr. Chairman and members of the Committee, my name is Charles E. Torkko. I am the President of the Consulting Engineers Council of Alaska. The Council is an association of active engineering firms dedicated to advancing the quality of engineering in Alaska. I would like to speak today in support of legislation ensuring that the selection of registered professional architects, engineers, and land surveyors for public projects will be made on the basis of professional qualifications and competence and not on premature fee or price bids. To assist the Committee, I have prepared copies of my remarks which I would like to leave with you, Mr. Chairman, at the conclusion of my testimony.

Traditionally, the selection of architects, engineers, and land surveyors--like many other learned professions--has been conducted through an evaluation process based on demonstrated competence and professional qualifications to perform the specific work that is desired. In this regard the selection of an engineer differs form the selection of a vendor for parts or supplies and from selection of construction contractors in that the choice of a vendor or contractor is generally based on detailed specifications and a quoted price, and contracts are generally awarded on a "low-bid" basis. The reason for this difference lies in the fact that the

professional architect or engineer offers a service that calls for applying state-of-the-art techniques to problems which are invariably unique and result in procurement specifications for vendors and construction contractors. I have been a professional engineer for over 20 years, and I can represent to this Committee that in those years I cannot remember solving the same design problem twice. Given these circumstances, the sole consideration in selecting an architect or engineer for a project must be whether the education, skills, and experience represented are best suited to the specific design problems of a proposed project.

No one in this room today--if he or she were ill--would think of asking for bids from physicians and expecting the low bidder to cure a person's illness while restricting the physician's resources. Nor would anyone with a particular complex legal problem--let's say an antitrust matter--ask for bids from the entire legal profession hoping that the most qualified attorney will just happen to submit the cheapest price. Similarly, in the design of a building or other public project, the first and foremost consideration must be the relative skill and experience of persons proposing to do the work. Only after a person or firm has been selected as the best qualified, and after the full requirements of the job have been assessed, should an attempt be made to negotiate a fair and reasonable price for the desired work. I stress the terms "fair" and "reasonable" because I do not mean to suggest that the cost of professional services should be ignored. It must always be the duty of the state or local official responsible for a public project to ensure that fees for professional

architectural or engineering services are amply justified. However, the only time that such a determination can properly be made is after the full scope and complexity of the project are understood, through negotiation. The selected firm must often be given clarifying assistance in the development of the project's objectives.

Many of you might ask what is wrong with requesting preliminary fee bids or estimates of charges for architectural and engineering services. Who loses if a contract is awarded based on, or substantially influenced by, such fee bids?

First and foremost--it is the public who loses--as the ultimate consumer for the proposed project. The public loses in that a few dollars saved at the critical design stage through shortcuts or unimaginative design solutions will result in increased construction costs and--more importantly--in increased operating, maintenance, and other life-cycle costs for the project over the many years of its useful life.

The public loses again in terms of receiving less than maximum value or utility from the project. A "bargain" price is no bargain if the item purchased does not do the job or does it at reduced efficiency.

Second, the professions of architecture and engineering suffer. Human nature being what it is, if fee bids or price estimates are injected prematurely into a competition process, the temptation to "lowball" the bid

will often be irresistible. A job obtained through a "bare bones" bid will produce one of two results. Either the client, and in this case the public, gets a less than optimal project and pays manyfold for the few dollars saved in design costs, or the design costs are later escalated upward through change orders as the client discovers the true cost of quality, professional work. This is, of course, unfair to others in the competitive process who may have refused to sacrifice professional quality for price.

The concept that I have outlined for you today, and which is represented in the legislation before this Committee, is neither new nor radical. As I mentioned at the beginning of my remarks, the generally accepted method for selecting architects and engineers has been to defer negotiation of fee until after a selection has been made based on qualifications. The federal government recognized the need to ensure that this concept is protected by passage of the Brooks Act in 1972. Many other states have followed this precedent and have enacted similar legislation. I have attached a list of these jurisdictions to my written remarks for the information of the Committee. Also, the American Bar Association, after years of effort, has adopted its Model Procurement Code, which calls for competitions to be based on qualifications and for the best qualified person or firm to be selected before fee or price is negotiated. Finally, the Alaska State Board of Registration for Architects, Engineers and Land Surveyors, established under Title 8 of the Alaska Statutes, has adopted, as a regulation with the force of law, 12 AAC 36.230, which prohibits registered professional architects and engineers from soliciting

or submitting proposals for services based on fee or price bids.

Although the substantial majority of public contracts for architectural and engineering services in Alaska are presently being advertised and awarded in accordance with the concept I have described, there have, unfortunately, been cases in which, either intentionally or inadvertently, registered professionals have been requested to submit fee bids. When a registered architect or engineer is faced with such a request, he or she must either decline to submit a proposal for the public job or be placed in a situation which violates the code of professional conduct established by regulation. The legislation which the Consulting Engineer's Council of Alaska supports would specify that for contracts with registered architects or engineers issued by the state or a political subdivision, the initial selection of a person or firm must be made on the basis of professional qualifications and demonstrated competence to perform the desired work. I would, however, like to stress that the state or local official would, under this proposal, be free to establish whatever procedures or criteria they deem best in selecting a qualified person or firm. The only requirement under the proposed bill is that an attempt be made to negotiate a fair and reasonable fee with a person or firm selected as best qualified to perform the needed work. If negotiations with that person or firm are unsuccessful, state or local officials remain free to negotiate with other qualified applicants or to reject all or part of the remaining proposals. The recommended legislation would only apply to contracts with registered professional architects, engineers, and land

surveyors and would not affect bids for construction or other types of services or supplies by the state or its local governments. Also, contracts awarded in response to an emergency condition would be exempt from provisions of the bill.

By adopting the proposed bill, Alaska will join with many other states in ensuring that the public receives the highest possible quality of architectural and engineering services while preserving flexibility for state and local officials. I urge this Committee to act favorably on the proposed bill, and I will be happy to attempt to answer any questions. Thank you for the opportunity of testifying before the Committee today, and I thank you for your consideration of the proposed bill.

H L&C

1/18/82

(0734) Ch. M. explained history of bill; presented final workdraft

(0746) Sojo – compared CS workdraft & discussion drafts.
(759) drafts share goal of taking chng contracts criteria fm only lowest bidder (inc. other criteria).
(766) recent drafts look at "best qualified ... on basis of professional competence." (772) difference is words used to specify qualifying criteria. Most recent drafts look at "best" qualified – distinguishes 2 drafts. (781) went over items Burns had in his draft that we did not include. (783) – room for argument over distinguishing criteria – all applicants may be capable & qualified; may end up with same pool of qualified contractors, & may be forced to choose 1 who is "best." (800) left to layman's interpretation of what bills mean. (805) Diff bet cap & qual & best qual are diffs in bill.
(811) Need more mat'l to row further.

(817) Charles E. Torko Pres Consulting Engrs Council of Ak. Supports legis ensuring selection made on basis of prof'l qualifns & competence, not price bids (left cy of prepared testimony)
(846) Compared to selecting doctor or lawyer by lowest bidder.
(850) skill & experience must be considered; then negotiate fair & reasonable price. Expanded on quality v. cost; prematurely pricing bids (low) w/ resulting poorer quality or higher-than-bid cost. Unfair to qualified bidders.
(884) generally accepted method of bidding is to select qualified bidders, then ~~fix~~ negotiate price. Federal govt does this. (893) State Board of Archs & Engrs prohibits archs & engrs fm soliciting or giving fee bids.

(914) wd only apply to arch's, engrs & LS's. ~~It~~
Wd ensure highest ~~quality~~ of service while retaining flexibility (~~under~~ 0723)

924 Randolph - how do you determine best ~~qualified~~?
Can't this open up "less than proper determinations"?

937 Torko - price competition does not eliminate this; this type of selection (by qualifns) is traditional; competing w/ quals & skills on fair basis rather than artificial procedure w/ sketchy data.

~~944 R~~

948 Bylsma - if 2 or 3 firms equal - what is procedure?

950 Torko - Any # might do adequate job; process in analyzing "subject specificity" results in "level of comfortability" — establishes trust & confidence. 962 - common to have equally ~~qualified~~ firms ranked differently due to different approaches, personalities, etc.

970 B — if firms equal, pick one firm, then negotiate — wd that have bearing on fee?

973 T — ~~no~~ doesn't think so; dropl of contract different project; some agencies have budget, which is or isn't revealed; larger agencies do checks on workscopes. major diff of what is inc. in contract. 987 ~~those~~ owner has leverage — if price is unacceptable, they can terminate negn.

995 Ch. M — ~~can~~ for state & muni govt — can procedure like this help better estimate costs?

1002 T — by hiring skilled people, estimates shd be as skillful as humanly possible. Budgets often made up w/ little info. That a const cycles ~~put out~~ beyond control can distort figures.

rot* ~~Randolph~~

1021 Bylsma – Won't it put firm closer to top if accounts in estimates, & vice versa.

1025 T – yes.

1034 – no further test.

1038 – Randolph moved to ~~pass~~ accept committee ~~draft~~ substitute HB 612

1042 ~~xx~~ q'stn by Gardiner as to which draft; second by Gardiner

1047 passed unanimously

~~2:53~~ HB 600

1051 Ch. M. said gps had requested deferment of consideration

~~2:53~~ 3:53 adjourned

1-19-82

HB 640

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
January 19, 1982
1:[illegible] p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Rogers
Rep. Gardiner
Rep. Randolph

Members Absent: No members absent.

COMMITTEE CALENDAR

TELECONFERENCE HEARING

HB 623 — An act relating to games of chance and contests of skill; and providing for an effective date.

HB 640 — An act relating to games of chance and contests of skill; and providing for an effective date.

WITNESS REGISTER

Representative Grussendorf
Alaska State Legislature
Pouch V
Juneau, Alaska 99811
465-3824
Position Statement: Sponsor of HB 623. Gave reasons he felt legislation is needed.

Representative Vaska
Alaska State Legislature
Pouch V
Juneau, Alaska 99811
465-4914
Position Statement: Co-sponsor of HB 623. Said constituents in his district support this legislation.

Joe Donohue, Deputy Commissioner of Taxation
Department of Revenue
Pouch S
Juneau, Alaska 99811
465-2302
Position Statement: Gave governor's position and background of use of pull tabs and punch boards.

Marie Reynolds

VFW Ladies Auxiliary
Bethel, Alaska
Position Statement: Supports legislation.

Kathy Ward
Bristol Bay Native Association
Dillingham, Alaska
Position Statement: Supports legislation.

K.C. Jackson
Volunteer, Senior Citizen Program
Bristol Bay Native Association
Dillingham, Alaska
Position Statement: Supports legislation.

Laura Schroeder, Manager
City of Dillingham
Dillingham, Alaska
Position Statement: Supports legislation.

LeRoy Whittich, President
Elks Club Alaska Association
Kodiak, Alaska
Position Statement: Supports legislation.

Merle Snider
American Legion, Jack Allman Post
Kodiak, Alaska
Position Statement: Supports legislation.

Edward Hoffman, Sr.
Kuskokwim Native Valley Association
Bethel, Alaska
Position Statement: Supports legislation.

Andy Edge
self
Bethel, Alaska
Position Statement: Supports legislation.

Arnold Brower, Jr.
Post Commander, VFW
Barrow, Alaska
Position Statement: Supports legislation.

Phil R. Holdsworth, Chairman
Government & Public Relations Committee
Alaska State Elks Association
Juneau, Alaska 99801
Position Statement: Suggestions.

Mark Beltz
self
Anchorage, Alaska

Position Statement: Wanted to speak about another subject; was asked to address committee at another time.

[illegible]ry Feldmann
[illegible]gles
Fairbanks, Alaska
Position Statement: Supports legislation.

Barrow, Alaska

Position Statement: Supports legislation.

Priscilla Sage, Vice President
Mothers Club
Barrow, Alaska
Position Statement: Supports legislation.

Jim Thompson
Midnight Sun Lions Club
Fairbanks, Alaska
Position Statement: Supports legislation.

Mary Caywood
Alano Club
Fairbanks, Alaska
Position Statement: Supports legislation.

Vern Kugzruk
Arctic Native Brotherhood
Nome, Alaska
Position Statement: Supports legislation.

Howard Farley
Vice President
Nome Kennel Club
Nome, Alaska
Position Statement: Supports legislation. Problem with wording in bill.

John Pullock
King Island Native Community
Nome, Alaska
Position Statement: Supports legislation.

Leo Land
Vice President
Alaska Native Brotherhood
Haines, Alaska
Position Statement: Supports legislation.

PREVIOUS ACTION

HB 623 — No previous action. Statutory Ref: AS 05.15. No action taken on this bill.

HB 640 — No previous action. Statutory Ref: AS 05.15.

Amendments Formally Considered: Rep. Rogers moved amendment to page 1, line 24. Motion passed unanimously.

Rep. Gardiner moved that bill, as amended,

be passed as Labor & Commerce committee substitute with do-pass by unanimous consent. There was objection. Rep. Gardiner reworded motion to pass out of committee with individual recommendations. Motion passed unanimously. CSHB 640 L&C was passed out of committee. Next committee of referral is House Judiciary.

ACTION NARRATIVE

Tape #003
Recording
Number 0000

The meeting was called to order by Chairman Martin at 1:05 p.m. All committee members were present. Other legislators attending the hearing were Reps. Grussendorf and Vaska. Rep. Adams sent written testimony. Committee hearing was teleconferenced statewide.

Number 0022

After an introduction to the teleconference by moderator Jack Sanderson, Chairman Martin gave a summary of the bills and noted the difference in the two bills.

Number 0046

REPRESENTATIVE GRUSSENDORF, sponsor of HB 623, gave background on why he felt legislation was needed. He described pull tabs, or Nevada cards, and the types of organizations who had contacted him concerned over the State banning these games. He said he became concerned that the interpretation of the game ' legality rested with the Department of Revenue. He said that countless organizations rely ' ull tabs and pur hboards for their fu Rep. Grussendorf said he had no objecti o Rep. Randolph's version of the bill (HB 640) which puts a limit on how much can be charged for the games ($1 limit). Rep. Bylsma pointed out that, as HB 640 was worded, the dollar limit would apply to raffles and other games, as well as the punchboards and pulltabs. Chairman Martin said that the Governor, in his state of the state address, felt legalizing these games is a moral issue, and asked whether Rep. Grussendorf would oppose amending the bill to go to a referendum vote. Rep. Grussendorf said there is a general tendency on the part of elected officials to cop out on issues facing them; that the ballot will

already be crowded; and that he did not think this issue should go on the ballot. Rep. Gardiner agreed that the problem should be rectified. He said the only person he knew of opposed to the legislation is the Governor. As no members of the public had requested the question to go to referendum vote, he felt the committee should hear testimony and take action. Rep. Randolph concurred. He said that, as chairman of the Regulation Review Committee, he held hearings in Fairbanks and Anchorage, where testimony was unanimously supportive of corrective legislation maintaining the games. He said he felt limiting the cost of pull tabs to $1 might alleviate the governor's concern about liberalizing gambling laws, and said he plans to amend his bill to be sure this dollar limitation does not apply to bingo, raffles, etc.

Number 0280

REPRESENTATIVE VASKA said constituents in his district supports continuing these activities. He said he co-sponsored HB 623 because of the benefits of this type of fundraising. He supports the bill and supports expediting it.

Number 0311

JOE DONOHUE, Deputy Commissioner of the State Department of Revenue, said the governor is prepared to veto legislation like HBs 623 and 640 unless the legislation contains a provision allowing a vote by the people. He said investigators discovered the use of the pulltabs, which had gone on unknown by the Department for several years, and that the Department had notified permittees that pulltabs were illegal. The Department then received petitions and requests for reconsideration asking the Department to expand regulations to include the use of pulltabs. The governor decided to utilize emergency regulations to allow organization to deplete stocks and to give notice that, as of 1/1/82, pulltabs and punchboards were illegal, and that othe fundraising activities should be found. Rep. Rogers asked, in reference to the governor's philosophical difficulties, if the governor's opinion extended to Permit #81-519, the Hammond for Governor raffle and lottery permit. Rep. Gardiner asked if the Department had assessed how many pulltabs were being used, and the volume of money.

Donohue said they had no data except letters and petitions saying that, in some cases, substantially more than 50% of some organizations' income was from punchboards and pulltabs. Donohue said he would give the committee copies of their annual reports.

Number 0425 — MARIE REYNOLDS, of the VFW Ladies Auxiliary, Bethel, spoke in favor of pulltabs. She said their income had dropped to less than 40% of what they were receiving before the pulltabs were deemed illegal. She said her group uses the money well to help others with scholarships, camp, and in disasters.

Number 0455 — KATHY WARD, director of the Senior Citizens Program in Dillingham, favored pulltabs because they are easy for seniors to play. She felt playing the cards was voluntary, no one was being forced. She opposed a statewide vote, and said much harm would be done by not reinstating the games.

Number 0485 — K.C. JACKSON, of the Bristol Bay Native Association's Sr. Citizens Program, Dillingham, said the games provide the seniors with recreation in a wholesome atmosphere where no alcohol is served; he said the only option is going to bars.

Number 0510 — LAURA SCHROEDER, Manager of the City of Dillingham, said the city council recommends pulltabs be permitted. She pointed out that applicants have to get council recommendation before getting a state permit for games, so the communities maintain authority. She said that, with cuts in federal revenue sharing, programs must find other means of support. She felt getting funds in this manner was healthier than asking the government for money.

Number 0538 — LE ROY WHITTICH, president of the Elk's Club Alaska Association, Kodiak, said the president of the United States had asked lodges to renew voluntary efforts to help those in need. He feels it's their duty to respond to this. He said without pulltabs for obtaining funds, local and state funds will suffer (more government funds will have to be allocated).

Number 0560 — MERLE SNIDER, American Legion Jack Allman

Post, Kodiak, favors the bills. He said his organization raised $29,324 last year for donations to charity through the use of pulltabs and punchboards. He is forwarding a list of donations to charity and community service organizations. He said the Post would be hurt if denied this source of funds. Rep. Martin asked if Snider objected to the money limit on pulltabs; Snider said no, but he felt $5 limit might be better. Rep. Bylsma asked if his organization had other sources of funding; Snider said they held twice-weekly bingo, Fourth of July boosts, and some other revenue. Games of chance comprised about 60% of their money raised.

Number 0605 — EDWARD HOFFMAN, SR., Bethel, said it should be up to the people, who pay Internal Revenue. He said everybody wants donations to buy a coffin and send kids down to Juneau. He felt Internal Revenue should dig out of their pockets.

Number 0628 — ANDY EDGE, Bethel, had no objection to HB 64 as written, but would object to raising the limit beyond $1. He doesn't want to sanction gambling. He felt, however, that the games in question do good in the community and will continue to do so. He does object to making it big business by raising the $1 limit.

Number 0649 — ARNOLD BROWER, JR., Post Commander, VFW, Barrow, said his Post has members from Barter Island to Point Hope. His Post supports HB 640. He felt Governor Hammond should either look at their side of the issue (in using punchboards and pulltabs to raise funds) or subsidize their programs. He felt the regulations banning the games were detrimental to their existence as a community. He wants legislation as soon as possible, and urged legislators to override the governor's anticipated veto. He doesn't care about the dollar amount in the bill; felt it should be up to the community to limit or not limit games.

Number 0707 — PHIL HOLDSWORTH, chairman of the Government and Public Relations Committee of the Alaska State Elks Association, Juneau, suggested, to clarify the interpretation of HB 640, that a comma be placed at the end of line

24. He noted that contributions of working hours should also be taken into consideration when speaking of funds raised.

Number 0731 — MARK BELTZ, Anchorage (testifying in Juneau) wanted to talk about minority discrimination. He was asked to address the committee at another time.

Number 0750 — GARY FELDMANN, Eagles, Fairbanks, said his group has a membership of 600. Last year they raised $36,000, including $10,000 in scholarships. He said they also support sports programs (baseball, basketball and hockey). He said his group lost 70% of their revenue without the pulltabs. With regard to the issue going to statewide vote, he said voter approval is given when a group applies for their license at city hall, and she felt making the games illegal was another infringement on a person's rights.

Number 0772 — MARTHA JOHNSON, USO chairman, Fairbanks, said without the sale of pulltabs, their organization will have to shut down. All their budgets were cut. USO provides overnight lodging and transportation to servicemen. She desperately urged passing the legislation.

Number 0787 — NORMAN BOUFFIOUX of the Lions Club, Fairbanks, said his group gave over $100,000 to a park and over $36,000 to the hospital for a laser eye machine. He said they need the legislation; there is nothing wrong with the games; and the revenue from the games is needed.

Number 0800 — CHARLES BUSBEE, Elks, Fairbanks, takes exception to the wording in the bills about raffles before 1959. He felt a $5 limit would not be objectionable. he said the loss of monies for charities would be substantial if legislation were not passed. Busbee and Rep. Randolph discussed wording of the bill.

Number 0849 — RAYMOND PERKINS, American Legion, Sitka, said their main source of revenue is from pulltabs. He favored Grussendorf's bill, but did not oppose Randolph's bill. He named several programs his group sponsors several community-oriented programs, but noted that they are costly. He felt

pulltabs are vital.

Number 0872 — EARL ARNOLD, Moose Lodge, Sitka, said his group relies on pulltabs. His group puts out scholarships, sponsors little league, provides disaster funds, help needy families and the pioneers home, purchases TVs for hospitals, gives money to schools, drill teams, and special olympics. He favors both bills, and had no qualms about a money limit.

Number 0889 — BOB REDDY, manager and secretary of Moose Lodge, Sitka, favors HB 623 and a $5 limit. He said they need the revenue from pulltabs.

Number 0902 — DEL CHILDRESS, secretary of the Elks Lodge, Sitka, said his group's charitable contributions run into thousands of dollars, much of which is from the sale of pulltabs. He noted that the cost of activities have gone up; with inflation, inorder to continue their activities, they need the gaming situation. He favors both bills, anything to keep going.

Number 0920 — CHESTER BALLOT, of the Lions Club, Kotzebue, supports HB 640. He said his organization supports thirteen different groups, from the senior center to little league, with pulltabs. He said the Kotzebue Dog Mushers also support the legislation.

Number 0930 — CHARLOTTE BROWER, president of the Mothers Club, Barrow, said their primary fundraising is with bingo and pulltabs. Their Club has raised funds for the needy, scholarships, and churches; they sponsor a women's shelter, alcohol programs, youth alternative program, basketball, Jesse Owens, and many other groups and functions. Eliminating pulltabs would take away their primary source of funds. She felt local cities have control and can monitor abuse of games.

Number 0970 — PRISCILLA SAGE, vice president, Mothers Club, Barrow, supports HB 640. She noted that, if this main source of funding is eliminated, they would have to cut back on their charitable functions.

Number 0986 — JIM THOMPSON, Midnight Sun Lions Club, Fairbanks, heartily supports HB 640. Without pulltabs, they cannot go ahead with

their plans. Eliminating the pulltabs caused them to lose 40% of their funding, without which they will have to drastically cut back programs. He recommended the $1 limit.

Number 1015 — MARY CAYWOOD, Alano Club, Fairbanks, said they desperately need pulltabs, and supported HB 640. She said the Moose also support HB 640. She said Alano is paying for a new building for Alcoholics Anonymous.

Number 1030 — VERN KUGZRUK, of the Arctic Native Brotherhood (a non-profit organization), Nome, favored HB 640; he objected to lines 16-20 and did not like 1959 date. He said, without the income from pulltabs, several of their functions (scholarship fund, firefighting equipment) are in jeopardy. He said pulltabs and bingo support these as well as get together and dog mushing (including in Nome, Teller, and other communities). He said the funds are needed to keep dog mushing alive. He said he enjoys bingo and doesn't mind paying for pulltabs because the funds go to a good cause. He said if the state authorizes ice classics, it should authorize pulltabs and punchboards. He felt the alternative was to go to bars or stay home drinking. The functions provide a chance for people to socialize and enjoy an evening of bingo and pulltabs. He favors HB 640 except for the 1959 date.

Number 1075 — HOWARD FARLEY, vice president of the Nome Kennel Club, Nome, which, he pointed out, is the oldest dog mushing club in the world, supported HB 640, except for the 1959 date. Rep. Randolph clarified what the 1959 date in the bill stood for.

Number 1094 — JOHN PULLOCK, King Island Native Community, Nome, supported HB 640. He said attendance has dropped almost 50% since eliminating pulltabs (at their fundraising events).

Number 1104 — LEO LAND, vice president of Alaska Native Brotherhood, Haines, said if pulltabs are taken away, they will have to close their doors and end their charitable work. He saw no problem with a $5 limit, regardless of the governor. He said 50-70% of their funds comes from pulltabs, and that people can

afford a $5 limit.

Number 1131

At this point, public testimony was ended and the bills went before the committee for consideration. Representative Rogers moved an amendment to HB 640 on page 1, line 24; Rep. Randolph seconded the motion and, there being no objection, the amendment passed. Rep. Gardiner moved that HB 640 as amended be moved out of committee as a Labor & Commerce committee substitute, with a do-pass recommendation by unanimous consent. There being objection, he changed his motion to move the bill out of committee with individual recommendations. Motion passed, and CSHB 640 I&C was directed to House Judiciary committee. Rep. Randolph directed further testimony on the bill be given to Rep. Barnes, Judiciary Committee chairman.

Number 1171

As there were no further items to come before the committee at this time, the Chairman adjourned the meeting at 2:49 PM.

COMMITTEE MINUTES
COMMITTEE: House Labor & Commerce
HEARING DATE: January 19, 1982
TAPE NO. 3, Side A

The meeting was called to order by Chairman Martin at 1:05 PM in the Labor & Commerce Committee Room, Behrends Building, Juneau, Alaska. Committee members present in addition to the Chairman were Representatives Bylsma, Randolph, Rogers, and Gardiner. Committee staff in attendance were Jeff Barry, Joan Mathews, and Mary Isaacs. Other legislators attending the hearing were Representatives Grussendorf and Vaska. Representative Adams sent written testimony.

The committee schedule called for the consideration of the following items: House Bills 623 and 640, relating to games of chance and contests of skill. The committee hearing was teleconferenced statewide.

After an introduction to the teleconference by moderator Jack Sanderson (meter no. 022), Chairman Martin (meter no. 028) gave a summary of the bills and noted the difference in the two bills.

REPRESENTATIVE GRUSSENDORF (meter no. 046), sponsor of HB 623, gave background on why the legislation was needed. He described pull tabs, or Nevada cards (meter no. 100), and the types of organizations who had contacted him concerned over the State banning these games. He said he became concerned that the interpretation of the games' legality rested with the Department of Revenue. He said that countless organizations rely of pull tabs and punchboards for their funds. Rep. Grussendorf said he had no objection to Rep. Randolph's version of the bill, which puts a limit on how much can be charged for the games ($1 limit). Rep. Bylsma pointed out that, as HB 640 was worded, the dollar limit would apply to raffles and other games, as well as the punchboard and pull tabs. Chairman Martin said that the Governor, in his state of the state address, felt legalizing these games is a moral issue, and asked whether Rep. Grussendorf would oppose amending the bill to go to a referendum vote. Rep. Grussendorf said there is a general tendency on the part of elected officials to cop out on issues facing them; that the ballot will already be crowded; and that he did not think this issue should go on the ballot. Rep. Gardiner agreed that the problem should be rectified. He said the only person he knew of opposed to the legislation is the Governor. As no members of the public had requested the question to go to referendum vote, he felt the committee should hear testimony and take action (meter no. 191). Rep. Randolph concurred. He said (meter no. 220) that as chairman of the Regulation Review Committee, he held hearings in Fairbanks and Anchorage, where testimony was unanimously supportive of corrective legislation maintaining the games. He said he felt limiting the cost of pull tabs to $1 might alleviate the governor's concern about liberalizing gambling laws, and said he plans to amend his bill to be sure this dollar limitation does not apply to bingo, raffles, etc.

REPRESENTATIVE VASKA (meter no. 280) said constituents in his district supported continuing these activities. He said he co-sponsored HB 623 because of the benefits of this type of fundraising. He supports the bill and supports expediting it.

JOE DONAHUE, Deputy Commission of the state Department of Revenue (meter no. 311) said the governor is prepared to veto legislation like HB 623 and HB 640 unless the legislation contains a provision allowing a vote by the people. He said investigators discovered the use of the pull tabs, which had gone on unknown by the Department for several years, and that the Department had notified permittees that pulltabs were illegal. The Department then received petitions and requests for reconsideration asking the Department to expand regulations to include the use of pulltabs. The Governor decided to utilize emergency regulations to allow organizations to deplete stocks and to give notice that, as of 1/1/82, pull tabs and punchboards were illegal and that other fund raising activities should be found. Rep. Rogers asked, in reference to the governor's philosophical difficulties, if the governor's opinion extended to Permit #81-519, the Hammond for Governor raffle and lottery permit. Rep. Gardiner asked if the Department had assessed how many pull tabs were being used, and the volume of money (meter no. 372). Donahue said they had no data except letters and petitions saying that, in some cases, substantially more than 50% of some organizations income was from punchboards and pulltabs. Donahue said he would give the committee copies of their annual reports.

MARIE REYNOLDS, of the VFW Ladies Auxiliary, Bethel (meter no. 425), spoke in favor of pulltabs. She said their income had dropped to less than 40% of what they were receiving before the pulltabs were deemed illegal. She said her group uses the money well to help others with scholarships, camp, and in disasters.

KATHY WARD, director of the Senior Citizens Program in ~~Bethel~~ Dillingham (meter no. 455), favored pull tabs because they are easy for seniors to play. She felt playing the cards was voluntary, no one was being forced. She opposed a statewide vote, and said much harm would be done by not reinstating the games.

K.C. JACKSON of the Bristol Bay Native Association's Sr. Citizens Program (meter no. 0485), ~~Bethel~~ Dillingham, said the games provide the seniors with recreation in a wholesome atmosphere where no alcohol is served; he said the only other option is going to bars.

LAURA SCHROEDER, Manager for the City of Dillingham (meter no. 510), said the city council recommends pull tabs be permitted. She pointed out that applicants have to get council recommendation before getting a state permit for games, so the communities maintain authority. She said that, with cuts in federal revenue sharing, programs must find other means of support. She felt getting funds in this manner was healthier than asking the government for money.

LE ROY WHITTLE, president of the Elks Club Alaska Association, Kodiak, (meter no. 538) said the president of the United States had asked lodges to renew voluntary efforts to help those in need. He feels it's their duty to respond to this. He said without pull tabs for obtaining funds, local and state funds will suffer (more government funds will have to be allocated).

MERLE SNEIDER, American Legion Jack Allman Post, Kodiak (meter no. 560), favors the bills. He said his organization raised $29,324 last year for donations to charity through the use of pull tabs and punchboards. He is forwarding a list of donations to charity and community service organizations. He said the Post would be hurt if denied this source of funds. Rep. Martin asked if Sneider objected to the money limit on pulltabs; Sneider said no, but he felt $5 limit might be better. Rep. Bylsma asked if his organization had other sources of funding (meter no. 589); Sneider said they held twice-weekly bingo, Fourth of July boosts, and some other revenue. Games of chance comprised about 60% of their money raised.

EDWARD HOFFMAN, SR., Bethel (meter no. 605) said it should be up to the people, who pay Internal Revenue. He said everybody wants donations to buy a coffin and send kids down to Juneau. He felt Internal Revenue should dig out of their pockets.

ANDY HEDGE, Bethel (meter no. 628), had no objection to HB 640 as written, but would object to raising the limit beyond $1. He doesn't want to sanction gambling. He felt, however, that the games in question do good in the community and will continue to do so. He does object to making it big business by raising the $1 limit.

ARNOLD BREWER, JR., Post Commander, VFW, Barrow (meter no. 649), said his Post has members from Barter Island to Point Hope. His Post supports HB 640. He felt Governor Hammond should either look at their side of the issue (in using punchboards and pulltabs to raise funds) or subsidize their programs. He felt the regulations banning the games was detrimental to their existence as a community. He wants legislation as soon as possible, and urged legislators to override the governo'r anticipated veto. He doesn't care about the dollar amount in the bill; felt it should be up to the community to limit or not limit games.

PHIL HOLSWORTH, chairman of the Government and Public Relations Committee of the Alaska State Elks Association (meter no. 707), Juneau, suggested, to clarify the interpretation of HB 640, a comma be placed at the end of line 24. He noted that contributions of working hours should also be taken into consideration when speaking of funds raised.

MARK BELTZ, Anchorage (testifying in Juneau)(meter no. 731) wanted to talk about minority discrimination. He was asked to address the committee at another time.

GARY FELDMAN, Eagles, Fairbanks (meter no. 750), said his group has a membership of 600. Last year they raised $36,000, including $10,000 in scholarships. He said they also support sports programs (baseball, basketball and hockey). He said his group lost 70% of their revenue without the pull tabs. With regard to the issue going to statewide vote, he said voter approval is given when a group applies for their license at city hall, and he felt making the games illegal was another infringement on a person's rights.

MARTHA JOHNSON, USO chairman, Fairbanks (meter no 772), said without the sale of pulltabs, their organization will have to shut down. All their budgets were cut. USO provides overnight lodging and transportation to servicemen. She desperately urged passing the legislation.

NORMAN BOUFFIOUX of the Lions Club, Fairbanks (meter no. 0787), said his group gave over $100,000 to a park and over $36,000 to the hospital for a laser eye machine. He said they need the legislation; there is nothing wrong with the games; and the revenue from the games is needed.

CHARLES BUSBEE, Elks, Fairbanks (meter no. 800), takes exception to the wording in the bills about raffles before 1959. He felt a $5 limit would not be objectionable. He said the loss of monies for charities would be substantial if legislation were not passed. Busbee and Rep. Randolph discussed wording of the bill.

RAYMOND PERKINS, American Legion, Sitka (meter no. 849) said their main source of revenue is from pulltabs. He favored Grussendorf's bill, but did not oppose Randolph's bill. He named several programs his group sponsors several community-oriented programs, but noted that they are costly. He felt pulltabs are vital.

EARL ARNOLD, Moose Lodge, Sitka (872), said his group relies on pull tabs. His group puts out scholarships, sponsors little league, provides disaster funds, help needs families and the pioneers home, purchases TVs for hospitals, gives money to schools, drill teams, and special olympics. He favors both bills, and had no qualms about a money limit.

BOB ~~KEDING~~ Kedony manager and secretary of Moose Lodge, Sitka (meter no. 889), favors HB 623 and a $5 limit. He said they need the revenue from pulltabs.

DEL CHILDRESS, secretary of the Elks Lodge, Sitka (meter no. 902) said his group's charitable contributions run into thousands of dollars, much of which is from the sale of pulltabs. He noted that the cost of activities have gone up; with inflation, in order to continue their activities, they need the gaming situation. He favors both bills, anything to keep going.

CHESTER BALLOT, of the Lions Club, Kotzebue (meter no. 920), supports HB 640. He said his organization supports thirteen different groups, from the senior center to little league, with pulltabs. He said the Kotzebue Dog Mushers also support the legislation.

CHARLOTTE BROWER, president of the Mothers Club, Barrow (meter no. 930), said their primary fundraising is with bingo and pulltabs. Their Club has raised funds for the needy, scholarships, and churches; they sponsor a women's shelter, alcohol programs, youth alternative program, basketball, Jesse Owens, and many other groups and functions. Eliminating pulltabs would take away their primary source of funds. She felt local cities have control and can monitor abuse of games.

PRISCILLA SAGE, vice president, Mothers Club, Barrow (meter no. 970), supports HB 640. She noted that if this main source of funding is eliminated, they would have to cut back on their charitable functions.

JIM THOMPSON, Midnight Sun Lions Club, Fairbanks (meter no. 986), heartily supports HB 640. Without pull tabs, they cannot go ahead with their plans. Eliminating the pulltabs caused them to lose 40% of their funding, without which they will have to drastically cut back programs. He recommended the $1 limit.

MARY CAYWOOD, Alano Club, Fairbanks (meter no. 1015) said they desperately need pulltabs, and supported HB 640. She said the Moose also support HB 640. She said Alano is paying for a new building for Alcoholics Anonymous.

VERN KUGZRUK, of the Arctic Native Brotherhood (non-profit organization), Nome (meter no. 1030), favored HB 640; objected to lines 16-20 and did not like 1959 date. He said without the income from pulltabs, several of their functions (scholarship fund, firefighting equipment) are in jeopardy. He said pulltabs and bingo support these as well as get togethers and dog mushing (including in Nome, Teller, and other communities). He said the funds are needed to keep dog mushing alive. He said he enjoys bingo and doesn't mind paying for pulltabs because the funds go to a good cause. He said if the state authorizes ice classics, it should authorize pulltabs and punchcards. He felt the alternative was to go to bars or stay home drinking. The functions provide a chance for people to socialize and enjoy an evening of bingo and pulltabs. He favors HB 640 except for the 1959 date.

HOWARD FARLEY, vice president of the Nome Kennel Club (meter no. 1075), which, he pointed out, is the oldest dog mushing club in the world, supported HB 640, except for the 1959 date. Rep. Randolph clarified what the 1959 date in the bill stood for.

JOHN PULLOCK, King Island Native Community, Nome (meter no. 1094), supported HB 640. He said attendance has dropped almost 50% since eliminating pulltabs (at their fundraising events).

LEO LAND, vice president of Alaska Native Brotherhood, Hained (meter no. 1104), said if pulltabs are taken away, they will have to close their doors and end their charitable work. He saw no problem with a $5 limit, regardless of the governor. He said 50-70% of their funds comes from pulltabs, and that people can afford a $5 limit.

At this point, public testimony was ended and the bills went before the committee for consideration (meter no. 1131). Representative Rogers moved an amendment to HB 640 on page 1, line 24; Rep. Randolph seconded the motion and, there being no objection, the amendment passed. Rep. Gardiner moved that HB 640 as amended be moved out of committee as a Labor & Commerce committee substitute with a do-pass recommendation by unanimous consent. There being objection, he changed his motion to move the bill out of committee with individual recommendations. Motion passed, and CSHB 640 L&C was directed to House Judiciary committee. Rep. Randolph directed further testimony on the bill be given to Rep. Barnes, Judiciary Committee chairman.

As there were no further items to come before the committee at this time, the Chairman adjourned the meeting at 2:49 PM (meter no. 1171).

IN THE HOUSE BY RANDOLPH,MOSS AND O'CONNELL

HOUSE BILL NO. 640

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to games of chance and contests of skill; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 05.15.100 is amended to read:

Sec. 05.15.100. COMMISSIONER OF REVENUE MAY ISSUE PERMITS. The commissioner of revenue may issue a permit to a qualified organization. The permit gives the organization the privilege of conducting games of chance and contests of skill including bingo, raffles and lotteries, ice classics, rain classics, dog mushers' contests, and fish derbies [AND CONTESTS OF SKILL].

* Sec. 2. AS 05.15.180(b) is amended to read:

(b) With the exception of games of chance [RAFFLES, LOTTERIES AND RAIN CLASSICS], no activity may be licensed under this chapter unless it existed in the state in substantially the same form and was conducted in substantially the same manner before January 1, 1959.

* Sec. 3. AS 05.15.210 is amended by adding a new paragraph to read:

(22) "game of chance" means a game in which the skill and experience of the player is secondary to purely fortuitous or accidental circumstances incidental to the game and includes ~~raffles and lotteries and~~ pull-tab and punchboard games in which the price of each chance is $1 or less, and raffles and lotteries.

* Sec. 4. Sections 1 - 3 of this Act are retroactive to January 1, 1982.

* Sec. 5. This Act takes effect immediately in accordance with AS 01.10.-070(c).

The Honorable Terry Martin
Chairman, House Labor and
Commerce Committee
and
All Committee Members

Dear Colleagues:

I am unable to attend today's teleconference on games of chance and skill. However, I would like to express my concern over a recent Attorney General's opinion which found that pull tabs are illegal under current state law. Pull tabs are commonly used in rural areas at bingo games to raise money for various civic and charitable organizations and functions. These range from the Lions' Club, Veterans of Foriegn War, and the Senior Citizens' Program in Dillingham which provides a ride service and hot meal service to the elderly. In addition, money from pull tabs is used to by food and coffins for poor people in the Bethel area.

I am unfamiliar with the use of pull tabs in urban areas of Alaska but, I can vouch for their importance in rural areas, where there are often few alternatives for raising money for charitable purposes.

Because of the importance of pull tabs in rural communities I urge the committee to legalize their use. Governor Hammond warned us in his state of the state address not to liberalize gambling laws, as this would result in an immigration of riff raff and low life to Alaska. I am sure he did not have pull tabs in mind when he made this statement, as pull tabs are not associated with low life, but with the highest motives of human nature, those of giving and sharing.

I therefore support House Bills 623 and 640, and I am not particularly concerned with the minor difference between them.

Sincerely,

Representative
Albert P. Adams

Leo Nunley, Quartermaster
Wasilla VFW
Box 2000
Wasilla, Alaska 99687

Dear Mr. Nunley:

I received word from the Legislative Information Office in Wasilla that you would like information about the "games of chance" teleconference which was heard before this committee on January 19. I have enclosed minutes of that meeting, as well as a copy of the bill as it was passed out of committee.

There were two near-identical bills before the committee dealing with games of chance: HB 623, sponsored by Rep. Grussendorf of Sitka; and HB 640, sponsored by Rep. Randolph of Fairbanks. Both bills were designed to statutorily legalize games such as pull-tabs (Nevada cards) and punchboards. The only difference between the two bills was that HB 640 put a limit of $1 on the amount which could be charged for these games.

House Bill 640 was amended to clarify that this dollar limit would not apply to raffles, lotteries, and the like. The bill was approved by the Labor & Commerce Committee, and passed to House Judiciary Committee. Rep. Ramona Barnes is chairman of Judiciary, if you are interested in contacting her to give testimony or with any questions.

As you can see from the minutes, public testimony taken from around the state was overwhelmingly in support of this legislation. You should be aware, however, that Governor Hammond has already informed the legislature that he plans to veto any legislation which, in his definition, would broaden Alaska's gambling laws.

If you have any questions or would like more information, don't hesitate to contact me, by phone at 465-3657, by mail at the above address, or through the Legislative Information Office.

Sincerely,

Joan Mathews

HB 640
(Labor and Commerce)

This bill proposes to amend three sections of AS 05.15.

The effect of these proposed changes is to considerably broaden the privileges granted with the issuance of a games of chance and skill permit. The original language of AS 05.15.100 limited the games of chance to only those activities listed (i.e., bingo, raffles, lotteries, ice classics, rain classics, dog mushers' contests and fish derbies). New games of chance would have to then be allowed under one of those listed. The proposed language removes that limitation and taken in context with sections 2 and 3 of the bill, would allow any game of chance which could be contrived where the element of chance and luck is foremost, regardless of whether those games of chance existed in Alaska prior to statehood. Since the original intent of the legislation was to permit continuance of those gaming activities after statehood which existed in territorial days, this change is a considerable divergence.

The only remaining limitation would be the limitation on use of gambling implements found in AS 05.15.180(a). This would presumably prevent the introduction of casino type hardware and coin operated video games as games of chance, but would not prevent the legal introduction of games of chance such as can be contrived by profit-seeking individuals and nonprofit organizations striving to maximize their take in an <u>extremely</u> competitive industry.

If the author's intent is simply to legalize pull-tabs, I would recommend this bill to legal counsel to arrive at a simpler way of accomplishing that goal without opening Pandora's box.

January 13, 1982

"GAMES OF CHANCE" LAWS UNDER FIRE

"Games of chance and contests of skill" will be the topic of discussion at a January 19 hearing of the State House Labor & Commerce Committee. Recent state policy decisions have caused some confusion as to what qualifies as a game of chance.

Last year, the State Department of Revenue suspended regulations allowing the use of pull-tabs and punchboard games. Public outcry caused the reinstatement of those regulations last summer, but on January 1 of this year, the regulations were once again suspended. House bills 623 (Grussendorf) and 640 (Randolph), which would clarify statutes dealing with such games, have been scheduled for a statewide-teleconferenced hearing because so many service organizations have expressed concern that cutting off this means of funds would reduce or eliminate many of their charitable programs.

Committee chairman Representative Terry Martin said that many private charitable groups have expressed to him that games such as raffles, bingo and pull-tabs provide a good, low-overhead method of fundraising. The East Anchorage Republican said, "These games are used to raise a good deal of the money that enables such organiza-

--more--

tions as the Elks Club, American Legion, Kiwanis Clubs, and National Brotherhood & Sisterhood Associations to fund sports programs, special events, and other community-service functions."

A statewide teleconference hearing is scheduled for Tuesday, January 19, at 1:00 pm Juneau time. Those interested in participating should contact the Legislative Information Office or House Labor & Commerce Committee chairman Terry Martin at 465-3873.

Susan Green, special asst to the Gov.
1981 Dept of Rev prohibited

early fall, came to Gov ofc abt
what pull tabs + pandaboards not technically
covered by statute. Determined might
be possible to legalize by dept regulatory action
that might approximate ~~approving~~
liberalizing gambling (one armed
bandit). Gov felt this mapping.
Since charity type orgs had been
using, he permitted extension (180 days)
of emergency use regs.** Indicated
to legis that if they wished to
liberalize laws, shd go to vote.
~~Promised to veto, unless 2/3 majority,~~
~~any legis'n legislature passed~~
~~allowing~~ →

* difficult to distinguish bet pull tabs & one armed bandits

** by statute, possible to adopt emergency regs allowing games to continue 180 days to allow them to find other sources of funding; runs out Dec 30 or 31

Dep. Comm. Joe Donahue
X 2301

Told legis. that if they passed legislation allowing these, they should be sure they had 2/3 majority required to override his veto, because he would veto legislation.

HB 595	Referred to committee 5/26/81; no previous action. No action taken by committee this date.

ACTION NARRATIVE

Tape #003 Recording Number 1190	The meeting was called to order by Chairman Martin at 1:10 p.m. All members were present. The committee schedule called for the consideration of HB 595 and HB 146. Testifying before the committee regarding both bills was Representative Fred Brown, prime sponsor.
Number 1201	Rep. Brown, sponsor of HB 595 and HB 146, gave background on both bills. Chairman Martin limited further testimony and committee consideration to HB 595.
Number 1259	Nick Coti, Division of Occupational Licensing, Department of Commerce and Economic Development, spoke from prepared testimony in favor of continuing the Board of Welding Examiners.
Number 1371	Donald Lockman, of the Testing Institute of Alaska and the State Board of Welding Examiners, testified in favor of HB 595. Rep. Rogers questioned Lockman about his testimony.
Number 1634	Ken Lomax, of ARCO Oil and Gas Company, testified in favor of the bill, and presented written statements and letters to

the committee.

Number 1710	Louie Rousseau, of Weldir , Application-Methods, a technical services business in Anchorage, testified against the bill.
Number 0136, Side B	Erwin Long, of Arctic Foundations, Inc., a manufacturer of pressure vessels and geo-tech equipment, also testified against the bill. He said he does contract work for the Corps of Engineers, and finds the State Board of Welding examinations and certifications to be in conflict with federal requirements that certification must be done according to the American Society of Mechanical Engineers (ASME) code.
Number 0312	Donald Lockman gave rebuttal testimony in favor of the State Board of Welding Examiners.
Number 0348	No action was taken on HB 595, and the Chairman adjourned the meeting at 3:00 p.m. Hearing on HB 595 will be continued in February.

COMMITTEE MINUTES
COMMITTEE House Labor & Commerce
HEARING DATE January 20, 1982
TAPE NO. 3, Sides A and B

The meeting was called to order by Chairman Martin at 1:10 p.m. in the Labor & Commerce Committee Room, Behrends Building, Juneau, Alaska. Committee members present in addition to the Chairman were Representatives Bylsma, Randolph, Rogers and Gardiner. Committee staff in attendance were Jeff Barry and Mary Isaacs.

The committee schedule called for the consideration of the following items: HB 595 and HB 146. Testifying before the committee regarding both bills was Representative Fred Brown, prime sponsor. Testifying before the committee regarding HB 595 were Nick Coti, Don Lockman, Ken Lomax, Louie Rousseau, and Erwin Long.

Rep. Brown, sponsor of HB 595 and HB 146, gave background (meter no. 1201) on both bills. Chairman Martin (meter no. 1248) limited further testimony and committee consideration to HB 595.

Nick Coti, of the Department of Commerce and Economic Development, Division of Occupational Licensing, spoke (meter no. 1259), from prepared testimony in favor of continuing the Board of Welding Examiners.

Donald Lockman of the Testing Institute of Alaska and the State Board of Welding Examiners testified (meter no. 1371) in favor of HB 595. Rep. Rogers (meter no. 1512) questioned Lockman about his testimony.

Ken Lomax of ARCO Oil and Gas Company (meter no. 1634) testified in favor of the bill, and presented written statements and letters to the committee.

Louie Rousseau of Welding Application-Methods, a technical services business in Anchorage (meter no. 1710) testified against the bill.

Erwin Long of Arctic Foundations, Inc., a manufacturer of pressure vessels and geo-tech equipment, (meter no. 0136, side B) also testified against the bill. He said he does contract work for the Corps of Engineers, and finds the State Board of Welding examinations and certifications to be in conflict with federal requirements that certification must be done according to the American Society of Mechanical Engineers (ASME) code.

Don Lockman (meter no. 0312) gave rebuttal testimony in favor of the State Board of Welding Examiners.

No action was taken on HB 595, and the Chairman adjourned the meeting at 3:00 p.m. Hearing on HB 595 will be continued in February.

MINUTES REVIEWED AND APPROVED:

Representative Terry Martin, Chairman
House Labor & Commerce Committee

TESTIMONY BEFORE THE HOUSE LABOR & COMMERCE COMMITTEE

ON HB 595

January 20, 1982

By Nicholas Coti, Management Analyst
Division of Occupational Licensing

Thank you for the opportunity to comment on HB 595. The department would like to take this opportunity to indicate what it sees to be key issues with respect to the sunsetting of the Board of Welding Examiners and to provide this committee with relevant information that may assist it in determining whether it is in the public interest to continue the board and the licensing process.

The first issue I would like to address is: Is the welding inspector system set up under the present statutes and regulations necessary to protect the public from the effects of unsafe weldments.

The answer to this question appears to be yes. Under the present system, the board licenses welding inspectors who certify welders. This certification is a prerequesite for a welder to work on a job where weldment failure might pose a public hazard to life or property. This procedure seems reasonable and is the preferred approach by industry as evidenced by the operations of the American Welding Society and by comments of nonboard member professionals. While this approach seems to be necessary, it is not clear whether it is adequate to properly protect the public. The department would urge the committee to encourage comments from knowledgeable professionals on whether this system is indeed adequate.

The second issue that we feel is key is: Given the fact that the system of certifying welders by welding inspectors is accepted as necessary by the industry and that an independent certification process is available through American Welding Society's welding inspector program, is it necessary to make the certification of welders a legal requirement or can we rely on industry (specifically the purchasers of welding services) to regulate themselves?

The Division of Legislative Audit has indicated that it feels that industry can adequately regulate itself in this area, while the board has indicated the present level of regulation is appropriate and desirable.

With respect to this issue, the department would like to make the following points for the committee's consideration:

- Contractors, not welding inspectors, are generally held liable for the consequences of weldment failure. Contractors are already licensed by the State. The welding inspectors who are presently licensed by the State are at least twice removed from responsibility for the consequences of weldment failure (the welder and the contractor). In other words, there are no sanctions relating the welding inspector's performance to actual events of damage to the public.

- Similarly, the present statutes do not provide a system in which there are any realistic ways of identifying abuses by welding inspectors. For example, there is really no way of determining whether a welder who has been certified by a welding inspector has actually taken and/or passed the test.

Both of the above points underline enforcement weaknesses in the present system that should be evaluated during the sunset process. This also explains in part why there haven't been complaints of a public protection nature brought before the board...a point made by the Division of Legislative Audit in arguing that there is no need for a board.

The following comments address problems with the present statutes and regulations and address the performance of the board. These comments assume that the welding inspector system should be a legal requirement.

The first issue I would like to raise here is: Is the present set of procedures for licensing welding inspectors adequate?

The present regulations and statutes define two basic procedures whereby someone can become licensed as a welding inspector in Alaska. These can be identified as the AWS route to licensure and the board testing route to licensure (cf. AAC 72.065).

I would like to briefly discuss both these routes to licensure, noting first that only the AWS route to licensure has been actually operationalized.

The AWS Route to Licensure: Under the present set of regulations, a person will receive a license if he/she has a current welding inspector certificate from the American Welding Society and submits proof of having previously passed an all position welding qualification test in at least one welding process. One problem with the AWS route to licensure is that it places Alaskan applicants at the mercy of an outside organization over which the State, the board and the applicant have no control. Applicants dissatisfied with a determination made by the AWS have no means of appeal.

Two applicants actually encountered this problem this year when their applications for AWS certification were unjustly obstructed and temporarily denied by AWS. The Division of Occupational Licensing interceded in this case, contacted the AWS and after a series of interactions, was able to assist in getting the AWS decisions reversed. The actual problem was determined to be an obstinate AWS employee who was acting counter to instructions from the AWS Qualifications Committee. While this particular incident is by no means typical of our past interaction with AWS (which has been good), it does highlight the fact that under a system which relies soley on AWS certification, there is no appeal guaranteed to the applicant. Therefore, if you determine that licensing is in the public interest, the above is an argument against the position recommended by the Division of Legislative Audit that we rely on AWS certification for licensure.

Some benefits of the AWS system should also be noted: It is a generally workable system that represents standards recognized by the industry as valid; its independence from the board reduces the potential for conflicts of interest between board members and applicants who may be potential competitors; and it is a readily available method.

The board testing route to licensure: Under this route to licensure, the applicant should be tested directly by the board according to criteria specified in the existing regulations. In fact, the regulations describe this as the normal route to licensure and the AWS route is an alternative. As noted above, procedures for implementing these regulations have not been developed and the board has relied exclusively on the AWS route.

For the reasons discussed above, if the present statutes, regulations and board are retained, the Legislature would urge the board to establish the necessary procedures so that applicants could be tested directly by the board if necessary.

It should be noted that while the board has been remiss in developing these procedures, there is no record of the board being urged to do so by the department or the Division of Legislative Audit which has done two performance audits on this board in the last three years. The board has a good record of positively responding to constructive criticism and recommendations from the Division of Legislative Audit. If the present licensing system is continued, the department will make every effort to assist the board in developing these regulations.

In closing, I would like to note that the board has an excellent record of licensing qualified applicants who follow the existing procedures. There are presently 219 welding inspectors licensed by the board, 136 of which are currently in active status. This is substantially more than is reported in either of the Division of Legislative Audit's reports and reflects the board's efforts to licerse qualified people.

It is also worthy to note that in the past the board has delegated routine licensing functions to the licensing examiner in an effort to expedite the licensing process. The board instructed the licensing examiner how to evaluate the AWS certification documents and routine all position welding documentation. The licensing examiner was then allowed to issue licenses under these strict guidelines. The system worked well and allowed for expeditious licensing, a major goal of the Division of Occupational Licensing. This practice came under criticism in one audit report and was discontinued in deference to the criticism. The department would urge the committee to encourage this type of expeditious licensing if it decides that licensing of welding inspectors is in the best interest of the public.

FROM: Nick Coti, Management Analyst
Division of Occupational Licensing

SUBJECT: HB 595

Attached for your review is a copy of HB 595, relating to the continuation of the Board of Welding Examiners. I would appreciate receiving your comments on this bill. Please respond on this memorandum, or on an attached sheet, and mail it to me as soon as possible, Thank you.

COMMENTS:

3 Jun 81

Yes, I do support passage of HB 595. I feel that the Board has has been effective in increasing the quality of welding within the State of Alaska.
I do not feel however, that the Board has not been as effective as it could have been in the last couple of years since so much effort has been spent in replying to Sunset requirements. If HB 595 was passed the Board could devotedfull time to serving the public in requards to the welding industry.
The Board has managed to effectively operate on what I feel is a very minimal budget. A great service has been provided to the taxpayers of this State at a very low cost. I see no reason that this low level of funding would not be sufficient to addequately meet the publics needs in the future.
I am adamantly opposed to the creation of a bureaucracy, such as a Welding Bureau to over see the welding industry in the State. The cost would be enormous and would probably be no more effective than the present Board.
Please forgive the typos, I had to do this myself.

Don H. Delk

Don H. Delk
Secretary,
Board of Welding Examiners

COMMENTS:

Dear Mr. Coti:

I feel the continuation of the Board of Welding Examiners is essential to the construction and Petro-Chemical Industry in Alaska.

As a supervisor for a major oil company I have had an opportunity to see positive results from the licensing of welding inspectors. Of course, as with any licensing requirement, there are some rough edges to smooth over but that is what the board is for. I think the board should have the opportunity to finish what it started several years ago when the laws were still in the draft form.

Thank you for the opportunity to speak out.

Sincerely,

Kenneth C. Lomax

KENNETH C. LOMAX
Quality Assurance Supervisor

COMMENTS:

I am in favor of HB 595 to continue the Board of Welding Examiners. Our state is in its infancy of an oil and mineral revolution in which welding will play a dramatic roll for both public and environmental safety. Our state can not afford to relax the requirements of quality at the expense of safety. The Welding Board has made tremendous strides compared to other states where legislation has not been enacted to insure the public's protection, and if continued, will be improving on the existing regulations to be more meaningfull to both public and industry.

Donald M. Lockman, Chairman
Board of Welding Examiners

COMMENTS: I believe the Board of Welding Examiners is worth continuing. The cost has been very, very minimal to the state especially when compared to the accomplishment of the Board. Alaska by far leads the nation for the number of certified welding inspectors per capita as a result of regulations adopted by the Board. There is no doubt in my mind that liscensig welding inspectors whom moniter welders has upgraded welding throughout the state all of which has been accomplished with very little cost to the state.

PREVIOUS ACTION

HB 634 — No previous action. Statutory reference: AS 09.65. No amendments formally considered during this hearing.

ACTION NARRATIVE

Tape #004
Recording
Number 0075

The meeting of the House Labor & Commerce Committee was called to order by Vice-Chairman Bylsma at 1:14 p.m. Committee members present were Representatives Bylsma, Gardiner, Rogers, and Randolph. Chairman Martin was absent. Also attending for various portions of the hearing were Representatives Fuller, Vaska, Halford, and Malone. This committee hearing was teleconferenced statewide. The committee schedule called for the consideration of HB 634.

Number 0083

REPRESENTATIVE JACK FULLER, as prime sponsor of HB 634, gave an introduction to the bill and why it is needed. He introduced this legislation to relieve commercial air carriers from the high cost of insurance, which is forcing many air carriers out of business.

Number 0127

KENT WOODMAN, executive vice president of Alaska Airmens Association, Inc., and regional representative of Aircraft Owners and Pilots Organization (AOPA), supported the bill. He explained that most aviation insurance is placed in London (Lloyd's), and gave a synopsis of how policies are sold. Woodman felt that individuals wanting excessive insurance should take out their own policies and not put the burden on the flight service. He warned against legislating different damage limits for commercial and private operators. Rep. Rogers asked if carriers should be required to notify passengers of liability limits; Woodman felt this would not change the situation drastically. Rep. Rogers also expressed concern that "vending machine" and other easily obtainable insurance was not

available at many air carrier locations; he asked if the Association would consider selling flight insurance or providing names of agents, in order to protect consumers. Woodman said this could be easily accommodated. Rep. Rogers felt some type of protection should be provided for passengers.

Number 0335 — BILL DE CREEFT of Katchemak Air Service in Homer (testifying via LTN from Hawaii), wanted to be sure air taxis were included in legislation.

Number 0351 — WADE COTHRAN of Air Center, Mt. Edgecumbe, representing Southeast Alaska Aviation Association, favors HB 634 with reservations that the private sector and flight schools are not addressed.

Number 0385 — RAND DAWSON, an Anchorage attorney, pilot, and member of AOPA and Alaska Airmens Association, testified as an individual and as an attorney who has had the opportunity to see the impact of litigation. He explained the costs (often very high) incurred by the victim of an aircraft accident. He said the impact of this bill is an attack on the jury system of Alaska; the effect will be to deny victims the right to seek compensation for injuries they did not cause. He felt the bill tries to establish a limit without factual data. He said the impact of this legislation would be felt by victims with catastrophic injuries. Dawson said he failed to see the correlation between insurance premiums and personal injury settlements. He feels the Committee has an obligation to potential victims to provide more information before reaching a decision on this legislation. Rep. Rogers asked if Dawson felt the limitation on payments in Workers Compensation statutes also has catastrophic impact. Dawson said the premise behind Workers Compensation is different and is designed to protect the victim. He said many victims receive additional compensation through third party actions. Rep. Bylsma requested a copy of Dawson's testimony.

Number 0525 — CHUCK WEIR, Alexander & Alexander Insurance Brokers, Anchorage, addressing Rep. Halford, asked if research indicated it would be

unconstitutional to limit legislation to air carriers; he felt it ought to extend to all operators and carriers, as well as to all personal injury actions statewide. He went on to say the $250,000 limitation would increase awards, as most air taxis now insure for only $100,000 per seat. He said HB 634 would more than double insurance costs for most carriers. He noted that the international award limitation is $50,000. Rep. Halford responded that initial research indicated there could be constitutional problems if legislation is limited to air carriers. Weir said that, in reference to Workers Compensation, if an employee felt there was gross negligence on the part of the, the employee could refuse the Workers Compensation and sue the employer. Weir felt this could be written into HB 634. Rep. Randolph said premiums are high because awards are high; Weir disputed this. Rep. Randolph and Weir agreed that, in cases of gross negligence, the air carrier should not be protected. Rep. Gardiner asked if juries generally award to the limit of insurance; Weir said they generally do. Discussion continued between Reps. Randolph and Gardiner, and Weir.

Number 0727

CINDY ANDRECHECK, of Executive Air Taxi and Charter, Bethel, gave a specific breakdown on increases in insurance rates for the past five years. She said the air taxi businesses would not be able to stand these increases if they continued, and reiterated that nothing is preventing individuals from providing themselves extra coverage.

Number 0950

PAUL KARKECK, commercial pilot and flight instructor in Fairbanks, said he doesn't believe the bill will solve their problems as it doesn't address the real causes of outlandish insurance rates; it doesn't affect other aspects of air travel in the state; and the rights of the public and victims would be impaired. He felt the high accident rate is the major culprit of high insurance rates in Alaska. Karkeck stated that 75-80% of all air carrier accidents in the U.S. occur in Alaska. He felt the cost could also be traced to state law, and said laws need to be changed to encourage competition among insurance agencies to bring costs down. He was also concerned

that the bill doesn't address the needs of other aircraft owners; eg, private pilots, flight schools, instructors. He urged the committee to vote against the bill and to create a panel of aviators to study needs. Rep. Randolph requested a letter giving specifics of how Karkeck felt the problem should be approached.

Number 0940 — LEE DANIELS, Delta Aviation air taxi operator, Fairbanks, supported the bill. He would like to see the committee follow IATC guidelines, and said carriers should notify passengers of liability limitations and give them the option to purchase additional insurance or find alternate means of transportation.

Number 0979 — KEN WARD, Ward Air, Juneau, went over increases in costs over the past few years.

Number 1029 — DON KOCH, Chief, Market Surveillance, State Division of Insurance, said the Division has taken a neutral position with regard to HB 634. He was unsure whether or not the legislation would affect insurance rates. He said it might be possible to use the Workers Compensation approach outlined by statute, which might attract workers compensation carriers to the aviation insurance market. Rep. Rogers asked if group insurance would be possible; Koch said it would be statutorily possible. Rep. Gardiner asked what kind of information the Division has on the aviation industry; Koch replied they had very little. Rep. Gardiner felt more information was needed on whether HB 634 would actually reduce insurance rates. Rep. Halford said that an insurance broker in Alaska has no incentive not to write a policy for a bad risk client, because losses are spread evenly and everyone's rates are affected. He asked Koch if it would be possible to institute procedures that would require premiums and losses to be made public through the Division of Insurance, in order to encourage a more fair allocation of costs. Koch said the Division has a reporting system, but accurate loss figures have not been available. He said there are not that many syndicates participating.

Number 1235 — JON LARSON, an attorney speaking for the

local Bar Association in Nome, opposed the bill. He said it doesn't address the real cause (lack of safety), and protects carriers at the expense of the public. He felt the burden of this legislation would be borne by victims of accidents.

Number 1282

No action was taken on HB 634, and the teleconferenced meeting was adjourned by Vice-Chairman Bylsma at 3:02 p.m.

COMMITTEE MINUTES
COMMITTEE House Labor & Commerce
HEARING DATE January 21, 1982
TAPE NO. 4, Side A

The meeting was called to order by Vice-Chairman Bylsma at 1:14 pm in the Labor & Commerce Committee Room, Behrends Building, Juneau, Alaska. Committee members present in addition to Vice-Chairman Bylsma were Representatives Randolph, Rogers, and Gardiner. Chairman Martin was absent. Committee staff in attendance were Joan Mathews, Jeff Barry, and Mary Isaacs. Also attending for various portions of the hearing were Representatives Fuller, Vaska, Halford, and Malone. This committee hearing was teleconferenced statewide.

The committee schedule called for the consideration of HB 634 regarding Air Taxi Insurance. Prime sponsor of this legislation was Rep. Fuller. Legislators testifying before the committee were Rep. Fuller and Rep. Halford.

REP. FULLER (meter no. 0083), as sponsor of HB 634, gave an introduction to the bill and why it is needed. He introduced this legislation to relieve commercial air carriers from the high cost of insurance, which is forcing many air carriers out of business.

KENT WOODMAN (meter no. 0127), executive vice president of Alaska Airmens Association, Inc., and regional representative of Aircraft Owners and Pilots Organization (AOPA), supported the bill. He explained that most aviation insurance is placed in London (Lloyd's), and gave a synopsis of how policies are sold. Woodman felt that individuals wanting excessive insurance should take out their own policies and not put the burden on the flight service. He warned against legislating different damage limits for commercial and private operators. Rep. Rogers (meter no. 0284) asked if carriers should be required to notify passengers of liability limits; Woodman felt this would not change the situation drastically. Rep. Rogers also expressed concern that "vending machine" and other easily obtainable insurance was not available at many air carrier locations; he asked if the Association would consider selling flight insurance or providing names of agents, in order to protect consumers. Woodman said this could be easily accommodated. Rep. Rogers felt some type of protection should be provided for passengers.

BILL DE CREEFT of Katchemak Air Service in Homer(testifying via LTN from Hawaii, meter no. 0335), wanted to be sure air taxis were included in legislation.

WADE COTHRAN of Air Center, Mt. Edgecumbe (meter no. 0351), representing Southeast Alaska Aviation Association, favors HB 634 with reservations that the private sector and flight schools are not addressed.

RAND DAWSON, an Anchorage attorney, pilot, and member of AOPA and Alaska Airmens Association (meter no. 0385), testified as an individual and as an attorney who has had the opportunity to see the impact of litigation. He explained the costs (often very high) incurred by the victim of an aircraft accident. He said the impact of this bill is an attack on the jury system of Alaska; the effect will be to deny victims the right to seek compensation for injuries they did not cause. He felt the bill tries to establish a limit without factual data. He said the impact of this legislation would be felt by victims with catastrophic injuries.

(Dawson testimony, continued.) Dawson said he failed to see the correlation between insurance premiums and personal injury settlements. He feels the Committee has an obligation to potential victims to provide more information before reaching a decision on this legislation. Rep. Rogers asked if Woodman felt the limitation on payments in Workers Compensation statutes also has catastrophic impact (meter no. 0477). Dawson (meter no. 0490) said the premise behind Workers Compensation is different and is designed to protect the victim. He said many victims receive additional compensation through third party actions. Rep. Bylsma requested a copy of Woodman's testimony.

CHUCK WEIR of Alexander & Alexander Insurance Brokers, Anchorage (meter no. 0525), addressing Rep. Halford, asked if research indicated it would be unconstitutional to limit legislation to air carriers; he felt it ought to extend to all operators and carriers, as well as to all personal injury actions statewide. He went on to say the $250,000 limitation would increase awards, as most air taxis now pay only $100,000 per seat. He said HB 634 would over double insurance costs for most carriers. He noted that the international award limitation is $50,000. Rep. Halford responded that initial research indicated there could be constitutional problems if limited to air carriers. Weir said that, in reference to Workers Compensation, if an employee felt there was gross negligence on the part of the employer, the employee could refuse the Workers Compensation and sue the employer. Weir felt this could be written into HB 634. Rep. Randolph said premiums are high because awards are high; Weir disputed this. Rep. Randolph and Weir agreed that in cases of gross negligence, the air carrier should not be protected. Rep. Gardiner asked if juries generally award to the limit of insurance; Weir said they generally do. Discussion continued between Reps. Randolph and Gardiner, and Weir (through meter no. 0684).

CINDY ANDRECHECK of Executive Air Taxi and Charter, Bethel (meter no. 0727), gave a specific breakdown on increases in insurance rates for the past five years. She said the air taxi businesses would not be able to stand these increases if they continued, and reiterated that nothing is preventing individuals from providing themselves extra coverage.

PAUL KARKECK, commercial pilot and flight instructor in Fairbanks (meter no. 0850), said he doesn't believe the bill will solve their problems: it doesn't address the real causes of outlandish insurance rates; doesn't affect other aspects of air travel in the state; and the rights of the public and victims would be impaired. He felt the high accident rate is the major culprit of high insurance rates in Alaska. Karkeck stated that 75-80% of all air carrier accidents in the U.S. occur in Alaska. He felt the cost could also be traced to state law, and said laws needed to be changed to encourage competition (among insurance agencies) to bring costs down. He was also concerned that the bill doesn't address the needs of other aircraft owners; eg, private pilots, flight schools, instructors. He urged committee to vote against bill and create a panel of aviators to study needs. Rep. Randolph requested a letter giving specifics of how Karkeck felt problem should be approached.

LEE DANIELS, Delta Aviation (meter no. 0940), air taxi operator, supported bill. He would like to see the committee follow IATC guidelines, and said carriers should notify passengers of liability limitations and give them the option to purchase additional insurance or find alternate means of transportation.

KEN WARD, Ward Air, Juneau (meter no. 0979), went over increases in costs over past few years.

DON KOCH, Chief, Market Surveillance, State Division of Insurance (meter no. 1029) said the Division has taken a neutral position with regard to HB 634. He was unsure whether or not the legislation would affect insurance rates. He said it might be possible to use the Workers Compensation approach outlined by statute, which might attract workers compensation carriers to aviation insurance market. Rep. Rogers asked if group insurance would be possible; Koch said it would be statutorily possible. Rep. Gardiner asked what kind of information the Division has on the aviation industry; Koch replied they had very little. Rep. Gardiner felt more information was needed on whether HB 634 would actually reduce insurance rates. Rep. Halford said that an insurance broker in Alaska has no incentive not to write a policy for a bad risk client, because losses are spread evenly and everyone's rates are affected. He asked Koch if it would be possible to institute procedures that would require premiums and losses to be made public through the Division of Insurance, in order to encourage a fairer allocation of costs. Koch said the Division has a reporting system, but accurate loss figures have not been available. He said there are not that many syndicates participating.

JON LARSON, an attorney speaking for the local Bar Association in Nome (meter no. 1235), opposed the bill. He said it doesn't address the real cause (lack of safety), and protects carriers at the expense of the public. He felt the burden of this legislation would be borne by victims.

No action was taken on HB 634, and the teleconferenced meeting was adjourned by Vice-Chairman Bylsma at 3:02 p.m.

MEMO

From: Rep. Terry Martin, Chairman
House Labor & Commerce Committee

To: Interested Parties

Date: February 19, 1982

Subject: Teleconference regarding Air Taxi Insurance

The House Labor & Commerce Committee has scheduled a teleconference hearing on HB 634, which deals with air taxi insurance. The teleconference will be held on February 26, 1982, at 1:00 PM PST (Juneau time). This will be the second time this bill has been heard by this committee. We have scheduled this second teleconference because of the great interest expressed by people throughout the state. This hearing will allow additional public input before the committee acts on the bill.

The intention of HB 634 is to lower the insurance rates of commercial air carriers by limiting the amount of damages which may be awarded for personal injury or death in an action brought against an ATC-registered air carrier. Previous public testimony dealt with the impact of liability limits on litigation, whether to include private operators and flight schools, and actual impact on insurance rates and carriers.

If you are interested in testifying or listening in on this teleconference, please contact your local Legislative Information Office, or contact the House Labor & Commerce Committee at 465-3657. Copies of the bill and minutes of the previous teleconference meeting are available.

FOR IMMEDIATE RELEASE

AIR TAXI INSURANCE SUBJECT OF TELECONFERENCE

Air taxi insurance will be the subject of a teleconference hearing of the House Labor & Commerce Committee on Friday, February 26, at 1:00 p.m. PST (Juneau time).

This is the second time House Bill 634 has been heard by the committee. Testimony was taken on the legislation in late January, but not all those who wished to testify were able to because of time limitations. This hearing will allow additional public input before the committee acts on the bill.

The intention of HB 634 is to lower the insurance rates of commercial air carriers by limiting the amount of damages which may be awarded for personal injury or death in an action brought against an ATC-registered air carrier. Previous public testimony dealt with the impact of liability limits on litigation, whether to include private operators and flight schools, and actual impact on insurance rates and carriers.

Those interested in testifying or listening in on this teleconference should contact the local Legislative Information Office, or contact the House Labor & Commerce Committee at 465-3657. Copies of the bill and minutes of the previous teleconference meeting are available.

GOOD DAY TO YOU!

COMMITTEE MINUTES
COMMITTEE House Labor & Commerce
HEARING DATE January 21, 1982
TAPE NO. 4, Side A

The meeting was called to order by Vice-Chairman Bylsma at 1:14 pm in the Labor & Commerce Committee Room, Behrends Building, Juneau, Alaska. Committee members present in addition to Vice-Chairman Bylsma were Representatives Randolph, Rogers, and Gardiner. Chairman Martin was absent. Committee staff in attendance were Joan Mathews, Jeff Barry, and Mary Isaacs. Also attending for various portions of the hearing were Representatives Fuller, Vaska, Halford, and Malone. This committee hearing was teleconferenced statewide.

The committee schedule called for the consideration of HB 634 regarding Air Taxi Insurance. Prime sponsor of this legislation was Rep. Fuller. Legislators testifying before the committee were Rep. Fuller and Rep. Halford.

REP. FULLER (meter no. 0083), as sponsor of HB 634, gave an introduction to the bill and why it is needed. He introduced this legislation to relieve commercial air carriers from the high cost of insurance, which is forcing many air carriers out of business.

KENT WOODMAN (meter no. 0127), executive vice president of Alaska Airmens Association, Inc., and regional representative of Aircraft Owners and Pilots Organization (AOPA), supported the bill. He explained that most aviation insurance is placed in London (Lloyd's), and gave a synopsis of how policies are sold. Woodman felt that individuals wanting excessive insurance should take out their own policies and not put the burden on the flight service. He warned against legislating different damage limits for commercial and private operators. Rep. Rogers (meter no. 0284) asked if carriers should be required to notify passengers of liability limits; Woodman felt this would not change the situation drastically. Rep. Rogers also expressed concern that "vending machine" and other easily obtainable insurance was not available at many air carrier locations; he asked if the Association would consider selling flight insurance or providing names of agents, in order to protect consumers. Woodman said this could be easily accommodated. Rep. Rogers felt some type of protection should be provided for passengers.

BILL DE CREEFT of Katchemak Air Service in Home (testifying via LTN from Hawaii, meter no. 0335), wanted to be sure air taxis were included in legislation.

WADE COTHRAN of Air Center, Mt. Edgecumbe (meter no. 0351), representing Southeast Alaska Aviation Association, favors HB 634 with reservations that the private sector and flight schools are not addressed.

RAND DAWSON, an Anchorage attorney, pilot, and member of AOPA and Alaska Airmens Association (meter no. 0385), testified as an individual and as an attorney who has had the opportunity to see the impact of litigation. He explained the costs (often very high) incurred by the victim of an aircraft accident. He said the impact of this bill is an attack on the jury system of Alaska; the effect will be to deny victims the right to seek compensation for injuries they did not cause. He felt the bill tries to establish a limit without factual data. He said the impact of this legislation would be felt by victims with catastrophic injuries.

(Dawson testimony, continued.) Dawson said he failed to see the correlation between insurance premiums and personal injury settlements. He feels the Committee has an obligation to potential victims to provide more information before reaching a decision on this legislation. Rep. Rogers asked if Woodman felt the limitation on payments in Workers Compensation statutes also has catastrophic impact (meter no. 0477). Dawson (meter no. 0490) said the premise behind Workers Compensation is different and is designed to protect the victim. He said many victims receive additional compensation through third party actions. Rep. Bylsma requested a copy of Woodman's testimony.

CHUCK WEIR of Alexander & Alexander Insurance Brokers, Anchorage (meter no. 0525), addressing Rep. Halford, asked if research indicated it would be unconstitutional to limit legislation to air carriers; he felt it ought to extend to all operators and carriers, as well as to all personal injury actions statewide. He went on to say the $250,000 limitation would increase awards, as most air taxis now pay only $100,000 per seat. He said HB 634 would over double insurance costs for most carriers. He noted that the international award limitation is $50,000. Rep. Halford responded that initial research indicated there could be constitutional problems if limited to air carriers. Weir said that, in reference to Workers Compensation, if an employee felt there was gross negligence on the part of the employer, the employee could refuse the Workers Compensation and sue the employer. Weir felt this could be written into HB 634. Rep. Randolph said premiums are high because awards are high; Weir disputed this. Rep. Randolph and Weir agreed that in cases of gross negligence, the air carrier should not be protected. Rep. Gardiner asked if juries generally award to the limit of insurance; Weir said they generally do. Discussion continued between Reps. Randolph and Gardiner, and Weir (through meter no. 0684).

CINDY ANDRECHECK of Executive Air Taxi and Charter, Bethel (meter no. 0727), gave a specific breakdown on increases in insurance rates for the past five years. She said the air taxi businesses would not be able to stand these increases if they continued, and reiterated that nothing is preventing individuals from providing themselves extra coverage.

PAUL KARKECK, commercial pilot and flight instructor in Fairbanks (meter no. 0850), said he doesn't believe the bill will solve their problems: it doesn't address the real causes of outlandish insurance rates; doesn't affect other aspects of air travel in the state; and the rights of the public and victims would be impaired. He felt the high accident rate is the major culprit of high insurance rates in Alaska. Karkeck stated that 75-80% of all air carrier accidents in the U.S. occur in Alaska. He felt the cost could also be traced to state law, and said laws needed to be changed to encourage competition (among insurance agencies) to bring costs down. He was also concerned that the bill doesn't address the needs of other aircraft owners; eg, private pilots, flight schools, instructors. He urged committee to vote against bill and create a panel of aviators to study needs. Rep. Randolph requested a letter giving specifics of how Karkeck felt problem should be approached.

LEE DANIELS, Delta Aviation (meter no. 0940), air taxi operator, supported bill. He would like to see the committee follow IATC guidelines, and said carriers should notify passengers of liability limitations and give them the option to purchase additional insurance or find alternate means of transportation.

KEN WARD, Ward Air, Juneau (meter no. 0979), went over increases in costs over past few years.

DON KOCH, Chief, Market Surveillance, State Division of Insurance (meter no. 1029) said the Division has taken a neutral position with regard to HB 634. He was unsure whether or not the legislation would affect insurance rates. He said it might be possible to use the Workers Compensation approach outlined by statute, which might attract workers compensation carriers to aviation insurance market. Rep. Rogers asked if group insurance would be possible; Koch said it would be statutorily possible. Rep. Gardiner asked what kind of information the Division has on the aviation industry; Koch replied they had very little. Rep. Gardiner felt more information was needed on whether HB 634 would actually reduce insurance rates. Rep. Halford said that an insurance broker in Alaska has no incentive not to write a policy for a bad risk client, because losses are spread evenly and everyone's rates are affected. He asked Koch if it would be possible to institute procedures that would require premiums and losses to be made public through the Division of Insurance, in order to encourage a fairer allocation of costs. Koch said the Division has a reporting system, but accurate loss figures have not been available. He said there are not that many syndicates participating.

JON LARSON, an attorney speaking for the local Bar Association in Nome (meter no. 1235), opposed the bill. He said it doesn't address the real cause (lack of safety), and protects carriers at the expense of the public. He felt the burden of this legislation would be borne by victims.

No action was taken on HB 634, and the teleconferenced meeting was adjourned by Vice-Chairman Bylsma at 3:02 p.m.

FOR IMMEDIATE RELEASE

AIR TAXI INSURANCE SUBJECT OF TELECONFERENCE

Air taxi insurance will be the subject of a teleconference hearing of the House Labor & Commerce Committee on Friday, February 26, at 1:00 PM AST.

Testimony was taken on the legislation, HB 634, in late January. Many people were not able to testify because of committee scheduling conflicts. As there was so much interest expressed in the bill, both for and against, Labor & Commerce Chairman Terry Martin scheduled another teleconference hearing to allow additional public input before the committee acts on the bill.

House Bill 634 is designed to relieve commercial air carriers from the high cost of insurance, which is forcing many air carriers out of business. Previous public testimony dealt with the impact of liability limits on litigation, whether to include private operators and flight schools, and actual impact on insurance rates and insurance carriers.

Chairman Martin invites anyone interested in testifying to contact the nearest Legislative Information Office or the House Labor & Commerce Committee at 465-3657 for details and a copy of the legislation or minutes of the previous meeting.

Dear Mr. Woodman:

I wanted to let you know that our committee will again be taking testimony on HB 634, the air taxi insurance bill introduced by Rep. Fuller. The hearing will be teleconferenced statewide to allow input by those who didn't have a chance to testify last time.

This second hearing will be on Friday, February 26, at 1:00 PM AST. If you would like more information, please contact our office. I have enclosed a copy of the press release we sent out, for your information.

Sincerely,

Joan Mathews

~~Due to~~

The House Labor & Commerce Committee will hold another teleconferenced hearing on HB 634 regarding air taxi insurance on Friday, Feb 26, at 1 pm PST. Response to the first ~~teleconference~~ hearing on HB634 was over-whelming

COMMITTEE MINUTES
COMMITTEE House Labor & Commerce
HEARING DATE January 21, 1982
TAPE NO. 4, Side A

The meeting was called to order by Vice-Chairman Bylsma at 1:14 pm in the Labor & Commerce Committee Room, Behrends Building, Juneau, Alaska. Committee members present in addition to Vice-Chairman Bylsma were Representatives Randolph, Rogers, and Gardiner. Chairman Martin was absent. Committee staff in attendance were Joan Mathews, Jeff Barry, and Mary Isaacs. Also attending for various portions of the hearing were Representatives Fuller, Vaska, Halford, and Malone. This committee hearing was teleconferenced statewide.

The committee schedule called for the consideration of HB 634 regarding Air Taxi Insurance. Prime sponsor of this legislation was Rep. Fuller. Legislators testifying before the committee were Rep. Fuller and Rep. Halford.

REP. FULLER (meter no. 0083), as sponsor of HB 634, gave an introduction to the bill and why it is needed. He introduced this legislation to relieve commercial air carriers from the high cost of insurance, which is forcing many air carriers out of business.

KENT WOODMAN (meter no. 0127), executive vice president of Alaska Airmens Association, Inc., and regional representative of Aircraft Owners and Pilots Organization (AOPA), supported the bill. He explained that most aviation insurance is placed in London (Lloyd's), and gave a synopsis of how policies are sold. Woodman felt that individuals wanting excessive insurance should take out their own policies and not put the burden on the flight service. He warned against legislating different damage limits for commercial and private operators. Rep. Rogers (meter no. 0284) asked if carriers should be required to notify passengers of liability limits; Woodman felt this would not change the situation drastically. Rep. Rogers also expressed concern that "vending machine" and other easily obtainable insurance was not available at many air carrier locations; he asked if the Association would consider selling flight insurance or providing names of agents, in order to protect consumers. Woodman said this could be easily accommodated. Rep. Rogers felt some type of protection should be provided for passengers.

BILL DE CREEFT of Katchemak Air Service in Home (testifying via LTN from Hawaii, meter no. 0335), wanted to be sure air taxis were included in legislation.

WADE COCHRAN of Air Center, Mt. Edgecumbe (meter no. 0351), representing Southeast Alaska Aviation Association, favors HB 634 with reservations that the private sector and flight schools are not addressed.

RAND DAWSON, an Anchorage attorney, pilot, and member of AOPA and Alaska Airmens Association (meter no. 0385), testified as an individual and as an attorney who has had the opportunity to see the impact of litigation. He explained the costs (often very high) incurred by the victim of an aircraft accident. He said the impact of this bill is an attack on the jury system of Alaska; the effect will be to deny victims the right to seek compensation for injuries they did not cause. He felt the bill tries to establish a limit without factual data. He said the impact of this legislation would be felt by victims with catastrophic injuries.

(Dawson testimony, continued.) Dawson said he failed to see the correlation between insurance premiums and personal injury settlements. He feels the Committee has an obligation to potential victims to provide more information before reaching a decision on this legislation. Rep. Rogers asked if Woodman felt the limitation on payments in Workers Compensation statutes also has catastrophic impact (meter no. 0477). Dawson (meter no. 0490) said the premise behind Workers Compensation is different and is designed to protect the victim. He said many victims receive additional compensation through third party actions. Rep. Bylsma requested a copy of Woodman's testimony.

CHUCK WEIR of Alexander & Alexander Insurance Brokers, Anchorage (meter no. 0525), addressing Rep. Halford, asked if research indicated it would be unconstitutional to limit legislation to air carriers; he felt it ought to extend to all operators and carriers, as well as to all personal injury actions statewide. He went on to say the $250,000 limitation would increase awards, as most air taxis now pay only $100,000 per seat. He said HB 634 would over double insurance costs for most carriers. He noted that the international award limitation is $50,000. Rep. Halford responded that initial research indicated there could be constitutional problems if limited to air carriers. Weir said that, in reference to Workers Compensation if an employee felt there was gross negligence on the part of the employer, the employee could refuse the Workers Compensation and sue the employer. Weir felt this could be written into HB 634. Rep. Randolph said premiums are high because awards are high; Weir disputed this. Rep. Randolph and Weir agreed that in cases of gross negligence, the air carrier should not be protected. Rep. Gardiner asked if juries generally award to the limit of insurance; Weir said they generally do. Discussion continued between Reps. Randolph and Gardiner, and Weir (through meter no. 0684).

CINDY ANDRECHECK of Executive Air Taxi and Charter, Bethel (meter no. 0727), gave a specific breakdown on increases in insurance rates for the past five years. She said the air taxi businesses would not be able to stand these increases if they continued, and reiterated that nothing is preventing individuals from providing themselves extra coverage.

PAUL KARKECK, commercial pilot and flight instructor in Fairbanks (meter no. 0850), said he doesn't believe the bill will solve their problems: it doesn't address the real causes of outlandish insurance rates; doesn't affect other aspects of air travel in the state; and the rights of the public and victims would be impaired. He felt the high accident rate is the major culprit of high insurance rates in Alaska. Karkeck stated that 75-80% of all air carrier accidents in the U.S. occur in Alaska. He felt the cost could also be traced to state law, and said laws needed to be changed to encourage competition (among insurance agencies) to bring costs down. He was also concerned that the bill doesn't address the needs of other aircraft owners; eg, private pilots, flight schools, instructors. He urged committee to vote against bill and create a panel of aviators to study needs. Rep. Randolph requested a letter giving specifics of how Karkeck felt problem should be approached.

LEE DANIELS, Delta Aviation (meter no. 0940), air taxi operator, supported bill. He would like to see the committee follow IATC guidelines, and said carriers should notify passengers of liability limitations and give them the option to purchase additional insurance or find alternate means of transportation.

KEN WARD, Ward Air, Juneau (meter no. 0979), went over increases in costs over past few years.

DON KOCH, Chief, Market Surveillance, State Division of Insurance (meter no. 1029) said the Division has taken a neutral position with regard to HB 634. He was unsure whether or not the legislation would affect insurance rates. He said it might be possible to use the Workers Compensation approach outlined by statute, which might attract workers compensation carriers to aviation insurance market. Rep. Rogers asked if group insurance would be possible; Koch said it would be statutorily possible. Rep. Gardiner asked what kind of information the Division has on the aviation industry; Koch replied they had very little. Rep. Gardiner felt more information was needed on whether HB 634 would actually reduce insurance rates. Rep. Halford said that an insurance broker in Alaska has no incentive not to write a policy for a bad risk client, because losses are spread evenly and everyone's rates are affected. He asked Koch if it would be possible to institute procedures that would require premiums and losses to be made public through the Division of Insurance, in order to encourage a fairer allocation of costs. Koch said the Division has a reporting system, but accurate loss figures have not been available. He said there are not that many syndicates participating.

Alaska Air Carriers Association

TESTIMONY
OF
TULINDA DEEGAN
PRESIDENT

ALASKA AIR CARRIERS ASSOCIATION

on

House Bill 634 - An Act to Limit Awards
for Personal Injury or Death in Aircraft Accidents
Before the
House Labor and Commerce Committee

January 21, 1982

4790 Business Park Boulevard • Suite 4 • Anchorage, Alaska 99503 • (907) 272-9933

The Alaska Air Carriers Association (AACA), founded in 1966, represents air carriers engaged in the transportation of passengers, cargo and mail. The membership includes certificated air carriers, commuter and air taxi operators.

The AACA wholly endorses House Bill 634. The AACA Board of Directors passed the following resolution at their November 14, 1981 meeting:

> WHEREAS, the Alaska air carrier industry is facing escalating insurance premiums;
>
> BE IT RESOLVED, that the AACA endorses legislation to limit liability in the event of wrongful death or injury.

The members of this committee are well aware of the importance of aviation in Alaska. Air transportation is essential to Alaska. Outside of the major population centers there are virtually no roads. Almost everything that is needed for survival, including food, clothing and medicine, must be brought in by air.

Escalating Insurance Costs

The air carrier industry has been faced with skyrocketing insurance premiums. In 1980, air carriers could purchase $5 million single limit liability insurance for $600 per seat. Air carriers renewing insurance today are facing between $3,000 and $4,000 per seat for the same coverage. In the last quarter of 1981, 19 air carriers suspended operation because they could not afford the insurance premiums. None of these carriers have a history of suspended operations during the winter months when business generally is slow.

Accident Rate Is Steady: Liability Limit Needed

AACA has found that the Alaskan aviation accident rate has remained fairly steady over the past five years. The chart below shows that the industry had 11 fatal accidents last year compared with 10 fatal accidents in 1980. In both years, the industry suffered 30 fatalities.

GENERAL AVIATION	12 Months 1981	12 Months 1980	5 Yr. Avg.
TOTAL ACC	236	236	257.4
FATAL ACC	38	30	36.8
FATALITIES	94	66	82.6

FATALITIES	30	30	29.6

Source: FAA

Clearly, our accident rate does not warrant the steady escalation in insurance premiums. The million dollar awards in the Alaskan aviation accident cases have contributed to the high cost of insurance.

Consumer Hurt

AACA estimates that 15% of air carrier rates charged the public goes to pay the insurance bill. Two years ago only 3% of the rates charged went to insurance payments.

Although it is hard to be dispassionate about the loss of life, it is difficult to understand why the loss of life in an aircraft accident is worth over $1 million, while the loss of life in other accidents depend upon the extent of an individual's own insurance. AACA doubts that the individuals who have received high awards carried more than a few thousand dollars in life insurance.

Limit of Liability Is Needed

The provisions of House Bill 634 will help to put a stop to the skyrocketing cost of insurance. AACA has been assured by several insurance brokers and underwriters that insurance premiums would be reduced by 15% to 40%, if House Bill 634 is enacted.

In 1949, Alaska had a law limiting the amount recovered when the death of a person is caused by the wrongful act or omission of another. This limit was set at $10,000. The claimants had two years to commence such action and the amount recovered was to be exclusively for the benefit of the decedent's husband or wife and children.

In 1959, the limit was raised to $55,000. In 1960, the Alaska State Legislature eliminated the dollar amount and revised the statute to allow the courts to determine the amount to be awarded.

Attached is the existing law, the 1959 law and the 1949 law.

Federal Actions

The large air carriers and aircraft manufacturers are promoting similar legislation and hope to have it introduced in Congress early in the year. The basic thrust of this legislation is to establish uniform federal law applicable to air crashes and to limit and apportion the damages resulting from such crashes. The proposed bill would add a new Title XIV to the Federal Aviation Act. Some of the highlights of the bill are as follows.

It would only apply to any occurrence which results in the death or hospitalization of five or more persons. Commuter flights, defined as flights on an aircraft with 30 or fewer seats and a payload capacity of 7,500 pounds or less, would be excluded from coverage by the bill. Although there would be no monetary ceiling on compensation under the bill, the types of damages which could be claimed would be limited.

Litigation would be divided into two rounds. Victims would present their claims on a no-fault basis in round one and the liability of persons who may have caused the accident would be determined and apportioned in round two. Interim payments for lost salaries or medical expenses and other expenses would be part of the system. Also, no contingent fees for lawyers would be permitted. The court would make a separate award of the attorney's fee which would be in addition to the compensation otherwise awarded. In round one, the victim would show the connection between the accident and the victim's claimed losses and the amount of the losses. The amount of damages awarded would be limited in various ways. No punitive damages would be allowed. The victim could recover for loss of earnings, cost of medical and rehabilitation services, and expenses incurred in replacing services which would otherwise be provided by an injured person or a decedent. Governmental payments to the victim would be deducted from the award and the recovery for loss of prospective earnings would take account of the fact that such earnings would be subject to income tax whereas the recovery will not be subject to income taxes. Pain and suffering of a decedent prior to death would not be recoverable, nor would recovery on account of emotional distress of a decedent's family be permitted. Recovery for pain and suffering would be permitted for a survivor of the accident if there is a serious and permanent disfigurement or injury or more than 90 days of total disability.

On an interim basis, until the liability was apportioned in the second round, the airline and airframe manufacturer would advance out-of-pocket losses to the victims on a 50-50 basis. If more than two companies were involved, these payments would be divided accordingly. Prior to the conclusion of round two when the damages would be finally apportioned among

the defendants, there could be a preliminary hearing to decide on a temporary apportionment on other than a pro rata basis. If one party were ultimately determined to have made excess payments, the would be entitled to interest on the excess amounts paid.

Air carriers would be required to provide financial protection (either through their own financial resources or insurance) against liability in amounts equal to the amount of insurance determined by the Secretary of Transportation to be available on reasonable terms in the private market. There would be for any given accident an aggregate limit on the liability of all persons who might be legally responsible for the accident. This limit would be equal to the highest amount of financial protection required of any air carrier involved in the accident. Above this limit, funds for compensation of accident victims would be provided by a Surcharge Advances Facility established in the Department of Transportation. This fund would be financed through surcharges imposed by the Secretary of Transportation on the carriage of passengers or freight in domestic commercial air transportation. Thus, the ultimate costs of accidents in excess of private coverage would be distributed among all users.

jury alone does not raise a presumption of the physician's or dentist's negligence. (§ 1 ch 49 SLA 1967)

Legislative committee report.—For report on ch. 49, SLA 1967 (CSSB 142), see 1967 House Journal, p. 492.

Article 7. Actions by or Against Deceased Persons.

Section
570. All causes of action survive
580. Action for wrongful death

Sec. 09.55.570. All causes of action survive. All causes of action by one person against another, whether arising on contract or otherwise, except those involving defamation of character, survive to the personal representatives of the former and against the personal representatives of the latter, but this shall not be construed so as to abate an action for a wrong where any party has died after the verdict or to defeat or prejudice the right of action given by AS 09.15.010. The personal representatives may maintain an action thereon against the party against whom the cause of action accrued, or, after his death, against his personal representatives. (§ 4 ch 78 SLA 1972; am § 34 ch 56 SLA 1973)

Revisor's note (1972).—This section was taken from former AS 09.55.530 which, in turn, was taken from § 61-7-1, ACLA 1949, as amended.

Effect of amendment. — The 1973 amendment substituted "personal representatives" for "executors or administrators" in the second sentence.

Legislative committee report.—For report on ch. 56, SLA 1973 (HCS SB 100), see 1973 Senate Journal Supplement No. 9; 1973 House Journal, p. 919.

Legislative intent. — The intent of the legislature inferred from the 1973 amendment to this section, is that actions no longer abate when the wrongdoer dies, but do abate when the injured party succumbs from noncausually connected matters. O'Dey v. Matson, 17 Alaska 763 (1958).

Section 43-3-10, ACLA 1949, did not repeal by implication this section and AS 13.20.310. Andersen v. Pacific S.S. Co., 8 Alaska 291 (1931).

Am. Jur. reference. — 1 Am. Jur., Abatement and Revival, § 68 et seq.

Sec. 09.55.580. Action for wrongful death. (a) When the death of a person is caused by the wrongful act or omission of another, the personal representatives of the former may maintain an action therefor against the latter, if the former might have maintained an action, had he lived, against the latter for an injury done by the same act or omission. The action shall be commenced within two years after the death, and the damages therein shall be such damages as the court or jury may consider fair and just, and the amount recovered, if any, shall be exclusively for the benefit of the decedent's husband or wife and children when he or she leaves a husband, wife or children, him or her surviving, or other dependents. When the decedent leaves no husband, wife or children surviving him or her or other dependents, the amount recovered

Supplement

shall be administered as other personal property of the deceased person but shall be limited to pecuniary loss. When the plaintiff prevails, the trial court shall determine the allowable costs and expenses of the action and may, in its discretion, require notice and hearing thereon. The amount recovered shall be distributed only after payment of all costs and expenses of suit and debts and expenses of administration.

(b) The damages recoverable under this section shall be limited to those which are the natural and proximate consequence of the negligent or wrongful act or omission of another.

(c) In fixing the amount of damages to be awarded under this section, the court or jury shall consider all the facts and circumstances and from them fix the award at a sum which will fairly compensate for the injury resulting from the death. In determining the amount of the award, the court or jury shall consider but is not limited to the following:

(1) deprivation of the expectation of pecuniary benefits to the beneficiary or beneficiaries, without regard to age thereof, that would have resulted from the continued life of the deceased and without regard to probable accumulations of what the deceased may have saved during his lifetime;

(2) loss of contributions for support;

(3) loss of assistance or services irrespective of age or relationship of decedent to the beneficiary or beneficiaries;

(4) loss of consortium;

(5) loss of prospective training and education;

(6) medical and funeral expenses.

(d) The death of a beneficiary or beneficiaries before judgment does not affect the amount of damages recoverable under this section.

(e) The right of action granted by this section is not abated by the death of a person named or to be named the defendant. (§ 4 ch 78 SLA 1972)

I. General Consideration.
II. Nature of Right Conferred by Section.
III. Parties.
IV. Negligence.
V. Damages.

I. GENERAL CONSIDERATION.

Editor's note. — This section was taken from former AS 13.20.340 which, in turn, was taken from § 61-7-3, ACLA 1949, as amended.

Section 61-7-3, ACLA 1949, was taken from the Oregon Code. Kreidler v. Ketchikan Spruce Mills, 10 Alaska 365 (1943).

Authority of Oregon decisions. — Where there is no surviving husband, wife or children, then this section may be and has been construed to the same effect as the Oregon law. But the authority of the Oregon decisions ends there. Dralle v. Steele, 13 Alaska 680 (1952).

Any decision based upon the Oregon law, as it existed on June 4,

allegedly acknowledging a mortgage debt were not recorded, they cannot revive any time-barred remedies based on a deed of trust, which is an "instrument affecting real estate" within the meaning of this section. Walker v. White, Sup. Ct. Op. No. 2196 (File No. 4574), 618 P.2d 561 (1980).

Sec. 09.10.220. When nonresident's cause of action barred.

NOTES TO DECISIONS

Creditor's efforts to enforce money judgment obtained in state of Washington were not time barred. — See Hamilton v. Seattle Marine & Fishing Supply Co., Sup. Ct. Op. No. 1401 (File No. 2695), 562 P.2d 333 (1977).

Sec. 09.10.230. Certain actions relating to real property.

NOTES TO DECISIONS

Cited in United States v. Pucee, 564 F.2d 306 (9th Cir. 1977).

Sec. 09.10.240. Commencement of action after dismissal or reversal.

NOTES TO DECISIONS

Dismissal of claim without prejudice. — An action was not time-barred when brought within one year after a timely action on the same claim was dismissed without prejudice. Atlas Enterprises, Inc. v. Consolidated Constr. Co., Sup. Ct. Op. No. 1526 (File No. 2982), 572 P.2d 68 (1977).

Chapter 15. Parties.

Section

10. Parents or guardian may sue for injuries or death to child
20. Parents or guardian may sue for seduction of child
30. [Repealed]

Sec. 09.15.010. Parents or guardian may sue for injuries or death to child.

A parent may maintain an action as plaintiff for the injury or death of a child below the age of majority. A guardian may maintain an action as plaintiff for the injury or death of his ward. (§ 30.01 ch 101 SLA 1962; am § 62 ch 127 SLA 1974)

Effect of amendments. — The 1974 amendment substituted "parent" for "father or, in case of his death or desertion of his family, the mother" in the first sentence.

NOTES TO DECISIONS

This section is a mere procedural device allowing the parent to bring an action on behalf of the estate of the child and creates no independent right of recovery in the parent. State Farm Mut. Ins. Co. v. Wainscott, 439 F. Supp. 840 (D. Alas. 1977).

Applied in Macey v. United States, 454 F. Supp. 684 (D. Alas. 1978).

Sec. 09.15.020. Parents or guardian may sue for seduction of child. A parent may maintain an action as plaintiff for the seduction of a child below the age of majority. The guardian may maintain an action as plaintiff for the seduction of a ward. The action may be maintained even though the child or ward is not living with or in the service of the plaintiff at the time of the seduction or afterwards and there is no loss of service. (§ 30.02 ch 101 SLA 1962; am § 63 ch 127 SLA 1974)

Effect of amendments. — The 1974 amendment substituted "parent" for "father or, in the case of his death or desertion of his family, the mother" in the first sentence and "child" for "daughter" in the first and third sentences.

Sec. 09.15.030. Unmarried females may sue for seduction.

Repealed by § 64 ch 127 SLA 1974.

Editor's notes. — The repealed section derived from § 30.03, ch. 101, SLA 1962.

Chapter 16. Contribution Among Joint Tortfeasors.

NOTES TO DECISIONS

Chapter is remedial in nature. — AS 09.16.010 — 09.16.060 are remedial in nature, designed to provide a remedy where none existed before. City of Juneau v. Alaska Elec. Light & Power Co., Sup. Ct. Op. No. 2265 (File No. 4795), 622 P.2d 954 (1981).

Application of chapter. — AS 09.16.010 — 09.16.060 are intended to apply where two or more parties inadvertently become joint tort-feasors. Nothing in it evidences an intent to preclude parties from contracting, in good faith, as to contribution or indemnification liability. City of Juneau v. Alaska Elec. Light & Power Co., Sup. Ct. Op. No. 2265 (File No. 4795), 622 P.2d 954 (1981).

Contract providing for indemnity liability not precluded. — A contract executed in good faith, providing for a measure of indemnity liability, is not precluded by this section. City of Juneau v. Alaska Elec. Light & Power Co., Sup. Ct. Op. No. 2265 (File No. 4795), 622 P.2d 954 (1981).

Cited in Kastner v. Toombs, Sup. Ct. Op. No. 2087 (File No. 4119), 611 P.2d 62 (1980).

Article 7. Actions by or Against Deceased Persons.

Sec. 09.55.570. All causes of action survive.

NOTES TO DECISIONS

Joinder of parents as third party defendants. — In an action for the wrongful death of a minor without dependents brought by the parents of the minor in their representative capacity, the parents could be joined in the individual capacity as third party defendants and were liable for their negligent supervision of the child. Macey v. United States, 454 F. Supp. 684 (D. Alas. 1978).

No portion of settlement attributable to survivorship claim. — The superior court correctly determined that no portion of the total settlement should be attributed to the survivorship claim for relief where there was nothing in the record which indicated that any pain and suffering which decedent may have suffered was other than momentary. Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 739 (1977).

Applied in Anderson v. Edwards, Sup. Ct. Op. No. 2274 (File No. 4586), 625 P.2d 282 (1981).

Cited in Larman v. Kodiak Elec. Ass'n, Sup. Ct. Op. No. 950 (File No. 1827), 514 P.2d 1275 (1973); State Farm Mut. Ins. Co. v. Wainscott, 439 F. Supp. 840 (D. Alas. 1977).

Sec. 09.55.580. Action for wrongful death.

NOTES TO DECISIONS

VI. Beneficiaries.

I. GENERAL CONSIDERATION.

History of section. — See In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Model for statute. — The Alaska wrongful death statute is closely modeled after the precursor of most wrongful death statutes, Lord Campbell's Act, 9 & 10 Vict. Ch. 93 (1846). State Farm Mut. Ins. Co. v. Wainscott, 439 F. Supp. 840 (D. Alas. 1977).

The Alaska Wrongful Death Statute was adopted substantially from the Oregon statute. Macey v. United States, 454 F. Supp. 684 (D. Alas. 1978).

Purpose of wrongful death action. — Examination of this section and its statutory predecessors suggests that the purpose of creating the action was primarily to compensate those who had suffered direct losses as a result of decedent's death. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

The primary purpose of the wrongful death statute is to compensate those who suffer a direct loss. Haakanson v. Wakefield Seafoods, Inc., Sup. Ct. Op. No. 1943 (File Nos. 3428, 3492), 600 P.2d 1087 (1979).

Strict construction. — Actions, like wrongful death, which arise by legislative fiat are to be strictly construed. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Limitation period in wrongful death statute construed in pari materia with general limitations provisions. — See Haakanson v. Wakefield Seafoods Inc., Sup. Ct. Op. No. 1943 (File Nos. 3428, 3492), 600 P.2d 1087 (1979).

AS 09.10.070 and this section compared. — See Haakanson v. Wakefield Seafoods, Inc., Sup. Ct. Op. No. 1943 (File Nos. 3428, 3492), 600 P.2d 1087 (1979).

The disability of a minor statutory beneficiary tolls the running of the two-year time limit for commencing a wrongful death action until the disability is concluded. Haakanson v. Wakefield Seafoods, Inc., Sup. Ct. Op. No. 1943 (File Nos. 3428, 3492), 600 P.2d 1087 (1979).

Cross-claim relating back to original answer not barred. — Cross-claim filed more than two years after the cause of action arose but less than two years after the original answer was filed related back to when the original answer was filed and was not barred by this section. Estate of Thompson v. Mercedes-Benz, Inc., Sup. Ct.

Op. No. 952 (File No. 1672), 514 P.2d 1269 (1973).

Joinder of parents as third party defendants. — In an action for the wrongful death of a minor without dependents brought by the parents of the minor in their representative capacity, the parents could be joined in the individual capacity as third party defendants and were liable for their negligent supervision of the child. Macey v. United States, 454 F. Supp. 684 (D. Alas. 1978).

Cited in Larman v. Kodiak Elec. Ass'n, Sup. Ct. Op. No. 950 (File No. 1827), 514 P.2d 1275 (1973).

III. PARTIES.

Under this section, only the personal representative may institute a wrongful death action on behalf of the deceased person. While under some circumstances the action might benefit only the estate's creditors, this result is not necessarily inconsistent with the legislative scheme. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Personal representative sustains, etc.

While the personal representative is the party who brings suit for wrongful death in Alaska, he or she is a nominal party only and holds any recovery as trustee for the statutory beneficiaries. Hankanson v. Wakefield Seafoods, Inc., Sup. Ct. Op. No. 1943 (File Nos. 3428, 3492), 600 P.2d 1087 (1979).

Administrator as nominal party.

If the decedent is survived by a spouse, child or dependent, the action is brought on behalf of the statutory beneficiary and damages are measured by the loss to the survivors. The personal representative is then a nominal party only and holds the recovery in trust. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977); State Farm Mut. Ins. Co. v. Wainscott, 439 F. Supp. 840 (D. Alas. 1977).

And as real party.

If the deceased is not survived by the beneficiaries named in the statute, the personal representative is the real party in interest in the wrongful death action. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977); State Farm Mut. Ins. Co. v. Wainscott, 439 F. Supp. 840 (D. Alas. 1977).

Metlakatla Indian Community. — Congress, by virtue of its enactment of 28 U.S.C. § 1360(a), did not waive the sovereign immunity of the Indian tribes and consequently, the Metlakatla Indian Community has sovereign immunity with respect to wrongful death action on the reservation. Atkinson v. Haldane, Sup. Ct. Op. No. 1495 (File No. 2981), 569 P.2d 151 (1977).

IV. NEGLIGENCE.

Joinder of parents as third party defendants. — See note under this catchline under analysis line I, "General Consideration."

V. DAMAGES.

The correct measure of damages.

Under Alaska's wrongful death statute damages are required to be assessed according to the loss suffered by each statutory beneficiary. Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 722 (1977).

Where the deceased leaves no wife or children, etc.

Where the deceased is not survived by the beneficiaries named in the statute, damages are limited to the loss to the estate and are distributed as other personal property of the deceased. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

An action for wrongful death of a child below the age of majority may be commenced by the parents of the child or the personal representative of the child. When the child leaves no husband, wife, children or other dependents the measure of damages is limited to pecuniary loss and must be administered as other personal property of the deceased. State Farm Mut. Ins. Co. v. Wainscott, 439 F. Supp. 840 (D. Alas. 1977).

Where the deceased is not survived by the statutory beneficiaries, damages are limited to the loss to the estate. Macey v. United States, 454 F. Supp. 684 (D. Alas. 1978).

Subsection (c) does not apply to actions by minors without dependents. Macey v. United States, 454 F. Supp. 684 (D. Alas. 1978).

If subsection (c) of this section applied to persons without statutory dependents the court would be required by the term "shall" to consider noncompensable items. The only sensible manner to avoid this result is to conclude that subsection (c) of this section does not apply to those without dependents. This reading of the statute is supported by the use of the term "benefit" in subsection (c) of this section when referring to the distribution to dependents and the use of similar terms in subsection

(c)(1) of this section. Macey v. United States, 454 F. Supp. 684 (D. Alas. 1978).

Thus, net accumulations theory may be used. — Under Alaska law, damages in a wrongful death action brought on behalf of the estate of a minor with no dependents are determined under a net accumulations theory. Macey v. United States, 454 F. Supp. 684 (D. Alas. 1978).

Wage tables for the year in which a trial occurs may be utilized to calculate probable net accumulations in an action for wrongful death on behalf of a minor with no dependents. Macey v. United States, 454 F. Supp. 684 (D. Alas. 1978).

Reduction of damages to present value. — Under Alaska law, damages in a wrongful death action on behalf of a decedent with no beneficiaries are not reduced to present value when assessed against a private party; such damages are reduced to present value as against the United States in an action based upon the Federal Tort Claims Act, 28 U.S.C. § 1346. Macey v. United States, 454 F. Supp. 684 (D. Alas. 1978).

In calculating damages in an action for wrongful death on behalf of a decedent with no dependents, the award will not be reduced to present value and general inflationary trends will not be considered. Macey v. United States, 454 F. Supp. 684 (D. Alas. 1978).

Superior court may order distribution of the proceeds of a wrongful death recovery. Engebreth v. Moore, Sup. Ct. Op. No. 1472 (File No. 3120), 567 P.2d 305 (1977).

No error in refusing to distribute according to intestate succession laws. — The superior court did not err in refusing to distribute the proceeds of the wrongful death settlement in accordance with Alaska's laws of intestate succession. Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 722 (1977).

The legislature intended that damages in a wrongful death case are to be assessed according to the actual losses of each qualified surviving beneficiary. It is illogical to infer that the legislature further intended that distribution of such damages was to be based on the fortuitous application of Alaska's laws controlling inheritance of intestate estates. Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 722 (1977).

Only one instance where damages administered as part of decedent's estate. — Alaska's Wrongful Death Act explicitly provides for only one instance, namely, when there are no statutory beneficiaries, where the damages recovered are to be administered as part of the decedent's estate. Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 722 (1977).

Awards to surviving beneficiaries to be separate. — In determining awards under the Wrongful Death Act, the trier of fact should make a separate award for each surviving beneficiary. Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 722 (1977).

Although section is silent on that issue. — Alaska's wrongful death statute is silent as to whether or not the trier of fact should determine the loss suffered by each surviving beneficiary and then make a separate award for each, or calculate the loss suffered by each beneficiary, total such losses, and then enter a lump sum verdict. Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 722 (1977).

Court to make allocations. — When confronted with allocation problems arising in the context of a settlement of a wrongful death claim the court should make the necessary allocation. Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 722 (1977).

Subsection (c)(1) provides for consideration of deprivation of pecuniary benefits to the beneficiaries without regard to their ages. Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 722 (1977).

Formula. — In making allocations of wrongful death settlements under certain circumstances, the supreme court has approved the use of a formula whereby appropriate proportions can be arrived at by totaling the number of years of reasonably expectable dependency or loss suffered by all beneficiaries. This figure is to be used as the denominator and the proportionate share of each beneficiary is that fraction of the proceeds which is arrived at by using each beneficiary's individual years of reasonably significant loss or dependency as the numerator. Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 722 (1977).

Such formula does not conflict with subsection (c)(1). — Application of the allocation formula totaling number of years of reasonably expectable dependency or loss suffered by all beneficiaries was not in irreconcilable conflict with the "without regard to age" phraseology of subsection (c)(1), since there is an adequate rationale for, as well as flexibility embodied in, the

formula to reconcile it with the provisions of subsection (c)(1). Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 722 (1977).

Since the legal obligation to support children ordinarily terminates at approximately the age of majority and because the reasonable expectations of a child for pecuniary contributions from his parents terminates under ordinary circumstances at about the same time, the formula's employment as the years of significant damages for a child only those years between the age of the child at the time of his parent's death and the age of majority has a rational basis. Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 722 (1977).

If there is evidence of circumstances indicating a longer period of dependency or evidence furnishing a basis for finding a continued expectation of pecuniary contributions beyond the age of majority, then the formula can be adjusted or, if necessary, abandoned. Horsford v. Estate of Horsford, Sup. Ct. Op. No. 1394 (File No. 2653), 561 P.2d 722 (1977).

VI. BENEFICIARIES.

No provision for direct recovery by those who would take by intestate succession. — Although the wrongful death statutes of some states specifically provide for direct recovery of the proceeds of the action by those who would take by intestate succession, Alaska's does not. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Purpose of 1960 amendment of former § 61-7-3, ACLA 1949. — In 1960 the statute (then former § 61-7-3, ACLA 1949) was amended to its present form. At that time, the legislature added "other dependents" to the class of statutory beneficiaries. Considering the history and purposes of the statute, this amendment appears designed to protect the interest of those who, like children and spouses, will suffer financial loss. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977); Greer Tank & Welding, Inc. v. Boettger, Sup. Ct. Op. No. 2065 (File Nos. 4457, 4495), 609 P.2d 548 (1980).

An action may be brought directly on behalf of the surviving parent. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

But only if she shows that she is also a dependent. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Dependency is question of fact. — The term "dependent" provides for all persons who will suffer financial loss without creating either an excessively narrow or an overboard classification. Thus, dependency is a question of fact. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977); Greer Tank & Welding, Inc. v. Boettger, Sup. Ct. Op. No. 2065 (File Nos. 4457, 4495), 609 P.2d 548 (1980).

"Dependent" does not include those who can show they would have been dependent on the deceased had he survived. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Necessary showing. — The legislature, by adding "other dependents" to the categories of spouse and children, intended to embrace those who occupy a position similar to those in the specified classes and who were actually dependent upon the decedent for support at the time of his death. A showing must be made of actual dependency for significant contributions of support over a sufficient period of time to justify the assumption that such contributions would have continued. Greer Tank & Welding, Inc. v. Boettger, Sup. Ct. Op. No. 2065 (File Nos. 4457, 4495), 609 P.2d 548 (1980).

Where the mother of the deceased was the sole surviving heir and was not dependent on the deceased at the time of death, the proceeds of a statutory wrongful death action pass into the estate and are subject to the control and distribution of the court and to the claims of general creditors. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Mother of decedent did not have the right to receive directly the proceeds of the wrongful death action as a statutory beneficiary by virtue of AS 25.20.030, which requires each child to maintain his parents when they are poor and unable to work and maintain themselves. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Although AS 25.20.030 establishes a duty running between parent and child under specific factual circumstances, it does not create a right of action in the parent against a third-party tort-feasor. Nor does it establish dependency as a matter of law. In re Estate of Pushruk, Sup. Ct. Op. No. 1398 (File No. 2974), 562 P.2d 329 (1977).

Step children. — Because of the lack of precision in the language of this section, the status of stepchildren as potential beneficiaries is not clear. Brown v. Estate of Jonz, Sup. Ct. Op. No. 1808 (File Nos. 3216, 3228) 591 P.2d 532 (1979).

Superior court's ruling excluding the nonadopted stepchildren from recovery was not plainly erroneous, and therefore supreme court did not review the court's instruction, unobjected to at trial, that the word "heir" included deceased's widow and daughter, with no mention of the stepchildren. Brown v. Estate of Jonz, Sup. Ct. Op. No. 1808 (File No. 3216, 3228), 591 P.2d 532 (1979).

Decedent's divorced wife and nonadopted stepson were "dependents" under this section where the factual findings of the trial court which were supported by the evidence not only indicated the close familial relationship of the wife and stepson to the deceased, but also their actual dependency upon him for support. Greer Tank & Welding, Inc. v. Boettger, Sup. Ct. Op. No. 2065 (File Nos. 4457, 4495), 609 P.2d 548 (1980).

Article 8. Removal of Disabilities of a Minor.

Section

590. Removal of disabilities of minority

Sec. 09.55.590. Removal of disabilities of minority. (a) A minor who is a resident of this state and is at least 16 years of age, who is living separate and apart from his parents or guardian, capable of self-support and of managing his own financial affairs, may petition the superior court to have the disabilities of minority removed for limited or general purposes.

(b) A minor may institute this petition under this section in his own name.

(c) The petition for removal of disabilities of minority must state:

(1) the name, age, and residence address of the petitioner;

(2) the name and address of each living parent;

(3) the name and address of the guardian of the person and the guardian of the estate, if any;

(4) the reasons why removal would be in the best interest of the child; and

(5) the purposes for which removal is sought.

(d) The petitioner must obtain the consent of each living parent or guardian having control of the person or property of the petitioner. If the person who is to consent to the petition is unavailable or his whereabouts are unknown, or if a parent or guardian unreasonably withholds consent, the court, acting in the best interest of petitioner, may waive this requirement of consent as to that parent or guardian.

(e) The court may appoint an attorney or a guardian ad litem to represent the interests of the petitioner at the hearing.

(f) The court may remove the disabilities of minority as requested in the petition if found to be in the best interest of the petitioner, after a hearing. The removal may be for general purposes or the limited purposes specified in the decree.

(g) Except for specific constitutional and statutory age requirements for voting and use of alcoholic beverages, a minor whose disabilities are

NOTES OF DECISIONS

1. In General.
2. Nature of Action.
3. Defenses.
4. Damages.
5. Parties.
6. Pleadings.
7. Limitations.

1. IN GENERAL

This section was taken from the Oregon Code. Kreidler v Ketchikan Spruce Mills (1943) 10 A 365.

Where plaintiff's decedent had been aboard a schooner towed by a steamer in Alaskan waters, the tow-line parted, and the schooner was wrecked on the Alaskan shore, the cause of decedent's death was not the parting of the tow-line but the steamer's continuing failure to come to the relief of the schooner, and the breach of duty occurred within the Territory of Alaska regardless of whether the vessels were within or beyond the three-mile limit when the steamer abandoned her tow. Alaska Com. Co. v Williams (CCA9th 1904) 128 F 362, 63 CCA 92.

Where decedent's widow and administratrix of his estate failed in an action seeking damages for the destruction of decedent's property, and a special finding negatived defendant's negligence, the judgment was not res judicata in a second action against the same defendant to recover for decedent's death in the same occurrence. Koski v Alaska Juneau G. M. Co. (1921) 6 A 334.

2. NATURE OF ACTION

A wrongful death action is purely statutory; there was no such civil action at common law. Koski v Alaska Juneau G. M. Co. (1921) 6 A 334.

The right of action is given to the administrator or executor in his representative capacity, and is in the nature of an asset of the estate; heirs have no interest in the recovery on account of any right of action for a pecuniary injury sustained by them, and no common-law right of action is available to them. The Princess Sophia (DC, WD Wash ND 1929) 35 F2d 736.

3. DEFENSES

The contributory negligence of the deceased is a defense to an action under this section in whatever court such action may be prosecuted. Kimball S. S. Co., In re (DC, ND Calif 1903) 123 F 838.

4. DAMAGES

Where the deceased leaves no wife or children, the amount recoverable by his personal representatives is for the benefit of the estate, and the damage to the estate is the value of the life to the estate, measured by the earning capacity, thriftiness, probable length of life of the deceased, and the consequent amount of probable accumulations during such life expectancy. Jennings v Alaska Treadwell G. M. Co. (CCA9th 1909) 170 F 146, 95 CCA 388.

The true measure of damages in actions brought under this section is the pecuniary loss suffered by the estate, without any solatium for the

Alaska Compiled Laws Annotated, Supplement 1959

CHAPTER 7
ACTIONS BY OR AGAINST EXECUTORS OR ADMINISTRATORS

Article 1
Generally

§ 61-7-1. Survival of cause of action arising out of injury to person or death after death of wrongdoer. Causes of action arising out of personal injury or death, caused by the wrongful act or negligence of another, shall not abate upon the death of the wrongdoer, and the injured person or the personal representatives of one meeting death, as above stated, shall have a cause of action against the executor, administrator or trustee of the estate of the deceased wrongdoer. [am L 1949, ch 102, § 1, p 260, app Mar. 24, 1949.]

Amendments. L 1949 amended section generally.

§ 61-7-3. Action for wrongful death: Disposition of amount recovered. When the death of a person is caused by the wrongful act or omission of another, the personal representatives of the former may maintain an action therefore against the latter, if the former might have maintained an action, had he lived, against the latter for an injury done by the same act or omission. Such action shall be commenced within two years after the death, and the damages therein shall not exceed fifty thousand dollars, and the amount recovered, if any, shall be exclusively for the benefit of the decedent's husband or wife and children when he or she leaves a husband, wife or children, him or her surviving; and when he or she leaves no husband, wife or children, him or her surviving, the amount recovered shall be administered as other personal property of the deceased person. When the plaintiff prevails, the trial court shall determine the allowable costs and expenses of the action and may, in its discretion, require notice and hearing thereon. The amount recovered shall be distributed only after payment of all costs and expenses of suit and debts and expenses of administration.

The damages recoverable under this section shall be limited to those which are the natural and proximate consequence of the negligent or wrongful act or omission of another.

section, the Court or jury shall consider all the facts and circumstances and from them fix the award at such sum as will fairly compensate for the injury resulting from the death. In determining the amount of the award, the Court or jury shall consider but is not limited to the following:

(1) Deprivation of the expectation of pecuniary benefits to the beneficiary or beneficiaries, without regard to age thereof, that would have resulted from the continued life of the deceased and without regard to probable accumulations or what the deceased may have saved during his lifetime.

(2) Loss of contributions for support.

(3) Loss of assistance or services irrespective of age or relationship of decedent to the beneficiary or beneficiaries.

(4) Loss of consortium.

(5) Loss of prospective training and education.

(6) Medical and funeral expenses.

The death of a beneficiary or beneficiaries before judgment shall not affect the amount of damages recoverable hereunder.

The right of action hereby granted shall not be abated by the death of a person named or to be named the defendant. [am L 1949, ch 89, § 1, p 222, app Mar. 23, 1949; L 1955, ch 153, § 1, p 315, app Mar. 28, 1955; L 1957, ch 6, § 1, p 7, app Feb. 20, 1957.]

Amendments. L 1957 amended provisions relating to distribution when decedent leaves no spouse or children surviving, so that the amount recovered will be administered as other personal property instead of for the benefit per capita of the child or children of decedent's child or children, if any, and the surviving parent or parents of the decedent.

L 1955 amended section generally.

L 1949 changed maximum amount that may be recovered under section from $10,000 to $15,000.

1. **Construction.** This statute is not a survival statute, but creates a new cause of action. Ishmael v City Electric of Anchorage (1950) 12 A 721, 91 F Supp 688.

2. **Generally.** A deceased employee's heir, such as daughter not included among the beneficiaries listed in the Workmen's Compensation Act, has no cause of action under this statute for employee's death from injury covered by Compensation Act. McKenna v Evans-Jones Coal Co. (1950) 12 A 692.

The decision of the Alaska Industrial Board in a proceeding for compensation for the death of an employee, as to which of three companies was the decedent's employer, was binding in widow's subsequent death action against one of them. Hazel v Alaska Plywood Corporation (1957) 16 A 642.

Under this statute the measure of damages where the decedent was survived by a spouse and children was the pecuniary loss to the survivors, and not the loss to the decedent's estate. Wier Alaska Airlines v Simmonds (1957) 16 A 679, 241 F2d 57.

every hair seal inhabiting the inland waters and all water adjacent to the southern coast of Alaska east of the 152nd Meridian, and the waters of Bristol Bay and the coastal waters within three miles off the Mainland from Cape Newenham to Cape Krusenstern, inclusive, a bounty of $3.00, such sum to be paid in accordance with the provisions following.

Sec. 2. **Effective Date.** This Act shall become effective retroactive to January 1, 1960, upon its passage and approval or upon its becoming law without such approval.

Approved April 22, 1960

CHAPTER 163

AN ACT

Relating to damages in actions for wrongful death; and amending the first paragraph of Sec. 61-7-3, ACLA 1949, as amended by Ch. 89, SLA 1949, Ch. 153, SLA 1955, and Ch. 6, SLA 1957.

(H.B. 329)

Be it enacted by the Legislature of the State of Alaska:

Section 1. The first paragraph of Sec. 61-7-3, ACLA 1949, as amended by Ch. 89, SLA 1949, Ch. 153, SLA 1955, and Ch. 6, SLA 1957, is amended to read as follows:

Sec. 61-7-3. **Action for Wrongful Death: Disposition of Amount Recovered.** When the death of a person is caused by the wrongful act or omission of another, the personal representatives of the former may maintain an action therefore against the latter, if the former might have maintained an action, had he lived, against the latter for an injury done by the same act or omission. Such action shall be commenced within two years after the death, and the damages therein shall, be such damages as the court or jury may deem fair and just and the amount recovered, if any, shall be exclusively for the benefit of the decedent's husband or wife and children when he or she leaves a husband, wife or children, him or her surviving or dependents; and when he or she leaves no husband, wife or children, him or her surviving, or other dependents, the amount recovered shall be administered as other personal property of the deceased person but shall be limited to pecuniary loss. When the Plaintiff prevails, the trial court shall determine the allowable costs and expenses of the action and may, in its discretion, require notice and hearing thereon. The amount recovered shall be distributed only after payment of all costs and expenses of suit and debts and expenses of administration.

Approved April 22, 1960

CHAPTER 164

AN ACT

Relating to the furnishing of return transportation by employers upon termination of employment; amending Sec. 1, Ch. 67, SLA 1949 as amended by Ch. 136, SLA 1959; and providing for an effective date.

(H.B. 348)

Be it enacted by the Legislature of the State of Alaska:

Section 1. Sec. 1, Ch. 67, SLA 1949, as amended by Ch. 136, SLA 1959, is amended to read as follows:

Section 1. Any employer who furnishes, finances, or agrees to furnish or finance, or who in any way provides transportation for any person from the place of hire to any point within or

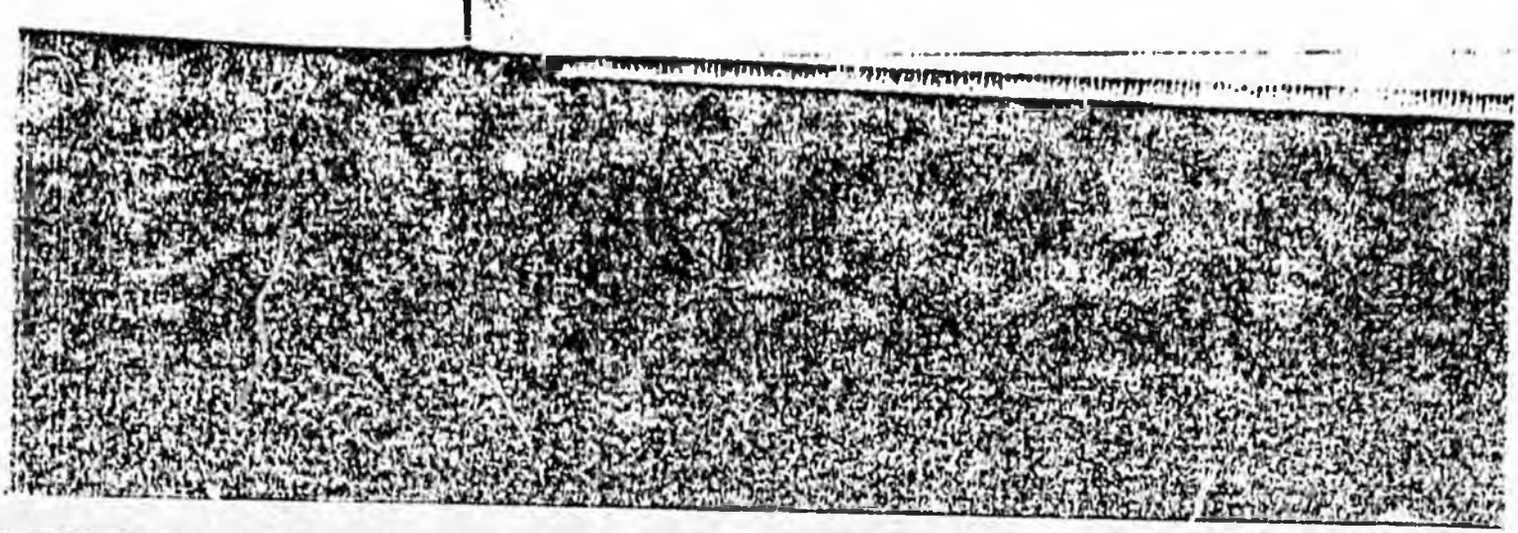
INTRODUCTION AND FIRST READING OF HOUSE BILLS



The question being: "Shall HOUSE JOINT MEMORIAL NO. 59 pass?" On voice vote HOUSE JOINT MEMORIAL NO. 59 passed and was referred to the Committee on Engrossment and Enrollment for engrossment.

HOUSE CONCURRENT RESOLUTION NO. 50 was read.

The question being: "Shall HOUSE CONCURRENT RESOLUTION NO. 50 pass?" On voice vote HOUSE CONCURRENT RESOLUTION NO. 50 passed and was referred to the Committee on Engrossment and Enrollment for engrossment.

HOUSE CONCURRENT RESOLUTION NO. 51 was read.

The question being: "Shall HOUSE CONCURRENT RESOLUTION NO. 51 pass?" On voice vote HOUSE CONCURRENT RESOLUTION NO. 51 passed and was referred to the Committee on Engrossment and Enrollment for engrossment.

HOUSE CONCURRENT RESOLUTION NO. 54 was read.

The question being: "Shall HOUSE CONCURRENT RESOLUTION NO. 54 pass?" On voice vote HOUSE CONCURRENT RESOLUTION NO. 54 passed and was referred to the Committee on Engrossment and Enrollment for engrossment.

HOUSE MEMORIAL NO. 13 was read.

The question being: "Shall HOUSE MEMORIAL NO. 13 pass?" On voice vote HOUSE MEMORIAL NO. 13 passed and was referred to the Committee on Engrossment and Enrollment for engrossment.

SECOND READING OF HOUSE BILLS

HOUSE BILL NO. 329 was read the second time.

The Committee on Judiciary offered the following amendment:

Page 1, lines 23 and 24: Strike "be determined on the basis of the proof adduced at the trial"; substitute "not exceed one hundred thousand dollars"

Mr. Fisher moved and asked unanimous consent that the amendment be adopted. There being no objection, the amendment to HOUSE BILL NO. 329 was adopted.

Mr. Hansen moved and asked unanimous consent that HOUSE BILL NO. 329 as amended be considered engrossed, advanced to third reading and placed on final passage. There being no objection, it was so ordered.

concur in the Senate's amendments to COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 307 as amended. There being no objection, it was so ordered.

A message was ordered sent to the Senate advising that the House concurred in the Senate's amendments to COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 307 as amended. Thereupon the Speaker and Chief Clerk signed COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 307 as amended by the Senate and it was referred to the Committee on Engrossment and Enrollment for enrollment.

A message from the Senate, dated March 25, 1960, stating that the Senate passed HOUSE BILL NO. 329 as amended with the following amendments; was read:

Page 1, Line 23: Strike "not exceed (FIFTY) Thousand dollars" and add "be such damages as the court or jury may deem fair and just"

Page 1, Line 27: After word "surviving" insert words "or dependents"

Page 1, Line 28: After word "surviving," insert words "or other dependents"

Page 1, Line 28: After word "surviving," insert words "or other dependents,"

Page 2, Line 1: After word "person" insert "but shall be limited to pecuniary loss"

Mr. Fisher moved that the House concur in the Senate's amendments to HOUSE BILL NO. 329 as amended. Mr. Greuel seconded. On voice vote the motion carried and the House concurred in the Senate's amendments to HOUSE BILL NO. 329 as amended.

A message was ordered sent to the Senate stating that the House concurred in the Senate's amendments to HOUSE BILL NO. 329 as amended. Thereupon the Speaker and Chief Clerk of the House signed HOUSE BILL NO. 329 as amended by the Senate and it was referred to the Committee on Engrossment and Enrollment for enrollment.

A message from the Senate, dated March 25, 1960, stating that the President and Secretary signed the enrolled copies of HOUSE BILL NO. 258, HOUSE BILL NO. 461, HOUSE BILL NO. 288, COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 271 as amended, HOUSE BILL NO. 325, HOUSE BILL NO. 410, HOUSE BILL NO. 464 as amended by the Senate, HOUSE BILL NO. 457, COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 320, COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 318 as amended by the Senate, COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 251 as amended by the Senate, SENATE COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 223 as amended and COMMITTEE SUBSTITUTE FOR HOUSE BILL NO. 300 as amended by the Senate and they were ordered transmitted to the offices of the Governor and Secretary of State.

REPORTS OF STANDING COMMITTEES

The Engrossment and Enrollment Committee to whom was referred HOUSE COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 149 reported to the Senate they had compared the same with the original bill and found it correctly enrolled. The report was signed by Senator Metcalf, Chairman and concurred in by Senator Bradshaw.

The enrolled copy of HOUSE COMMITTEE SUBSTITUTE FOR SENATE BILL NO. 149 was ordered sent to the House for the signatures of the Speaker and Chief Clerk.

Senator Moody moved and asked unanimous consent that HOUSE BILL NO. 424, as amended, be considered at this time. There being no objection, it was so ordered.

HOUSE BILL NO. 424, as amended, was considered again in second reading.

There being no amendments, Senator Moody moved and asked unanimous consent that HOUSE BILL NO. 424, as amended, be advanced to third reading and final passage. There being no objection, it was so ordered.

HOUSE BILL NO. 424, as amended, was read the third time.

The question being, "Shall HOUSE BILL NO. 424, as amended, pass the Senate?" The roll was called with the following result:

Yeas: 7 - Buckalew, McNabb, Metcalf, Orbeck, Ryan, Weise, Mr. President.

Nays: 9 - Bradshaw, Emonson, Hopson, Logan, McNealy, Moody, Nolan, Smith, Stewart.

Absent: 4 - Coghill, McNees, Owen, Peratrovich.

And so HOUSE BILL NO. 424, as amended, failed to pass the Senate.

Senator Moody asked for the personal privilege of the floor, and informed members of the Senate the House had agreed to meet with the Senate in a majority party caucus at 4:30.

HOUSE BILL NO. 325, as amended, was considered again.

Senator McNealy offered the following amendment:

Page 1, line 17: after word "surviving" insert words "or dependents"

Page 2, line 1: after word "person" insert "but shall be limited to pecuniary loss"

Senator McNealy moved for the adoption of the amendment. Senator Bradshaw seconded. On voice vote the amendment was adopted.

Senator Buckalew offered the following amendment:

Page 1, line 23: strike NOT EXCEED one hundred FIFTY THOUSAND DOLLARS and add be such damages as the court or jury may deem fair and just

Senate Journal 1960

Senator Buckalew moved for the adoption of the amendment, and asked unanimous consent. Senator McNealy objected and seconded.

Senator Stewart asked unanimous consent for a short recess. There being no objection, it was so ordered.

AFTER RECESS

Senator Buckalew asked unanimous consent for the adoption of his amendment. There being no objection, it was so ordered.

There being no further amendments, Senator Moody asked the concurrence of the Senate to advance HOUSE BILL NO. 329, as amended in the Senate, to third reading and final passage. There being no objection, it was so ordered.

HOUSE BILL NO. 329, as amended in the Senate, was read the third time.

The question being, "Shall HOUSE BILL NO. 329, as amended in the Senate, pass the Senate?", the roll was called with the following result:

Yeas: 16 - Bradshaw, Bronson, Buckalew, Hopson, Logan, McNabb, McNealy, Metcalf, Moody, Nolan, Orbeck, Ryan, Smith, Stewart, Weise, Mr. President.

Nays: 0

Absent: 4 - Coghill, McNees, Owen, Peratrovich.

And so HOUSE BILL NO. 329, as amended in the Senate, passed the Senate.

HOUSE BILL NO. 329, as amended in the Senate, was referred to the Committee on Engrossment and Enrollment for engrossment.

Senator Moody asked unanimous consent for a recess until the call of the Chair. There being no objection, it was so ordered.

AFTER RECESS

The Senate reconvened at 3:30 p.m.

Without objection, the Senate reverted to

COMMUNICATIONS

Telegram of March 24, 1960 to President Beltz from Clarence King, President, Ketchikan Chamber of Commerce urging enactment of bonding authority bills, was read and referred to the State Affairs Committee.

Letter of March 24, 1960 to the President of the Senate, from Mrs. Eugene O. Roguszka, Secretary Democratic South Central District Committee, advising that John A. Burns, former Delegate in Congress from Hawaii, would be the keynote speaker for the Second Session of the Democratic State Convention to be held in Anchorage on April 2 and 3, was read.

IN THE HOUSE BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 159 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to workers' compensation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Sec 66 P44

* Section 1. AS 18.80.220(a)(4) is amended to read:

(4) an employer, labor organization or employment agency to discharge, expel or otherwise discriminate against a person because he has

(A) opposed any practices forbidden under AS 18.80.200 - 18.80.280; [OR BECAUSE HE HAS]

(B) filed a complaint, testified or assisted in a proceeding under this chapter; or

(C) filed a claim for workers' compensation benefits under AS 23.30;

Sec 13 P13

* Sec. 2. AS 23.30.025 is amended by adding a new subsection to read:

(c) An insurer may issue a policy of insurance insuring the payment of benefits under this chapter which provides for a deductible amount to be paid by the employer. A policy with a deductible provision must be approved by the director of insurance and must provide that the deductible amount be paid by the insurer to the employee on behalf of the employer. After payment of the deductible by the insurer, the insurer may recover the deductible amount from the employer. The failure of an employer to reimburse an insurer for the deductible amount does not relieve the insurer from any other obligation it may have under the policy of insurance. An insurer is not required to apply for a deviation

under AS 21.39.070 in order to issue a policy under this subsection. This subsection does not apply to a policy of excess insurance purchased by a self-insurer.

Sec 17 P17

* Sec. 3. AS 23.30.045(c) is amended to read:

(c) For a person eligible for vocational rehabilitation service under this chapter or AS 23.15.080 [AND] who is placed with an employer for service [WITHOUT WAGES] at the request of the board or the division [OFFICE] of vocational rehabilitation to give him on the job training, work readiness, [OR] work therapy experience [,] or work sampling, the liability set out in (a) of this section applies to the state rather than to the employer.

Sec 26 P 22

* Sec. 4. AS 23.30.080 is amended by adding a new subsection to read:

(d) If an employer fails to insure or provide security as required by AS 23.30.075, the board may issue a stop order prohibiting the use of employee labor by the employer until the employer insures or provides security as required by AS 23.30.075. If an employer fails to comply with a stop order issued under this section, the board shall assess a civil penalty of at least $1,000 per day. The employer may not obtain a public contract with the state or any of its political subdivisions for one year following the violation of the stop order.

Sec 30 P 23

* Sec. 5. AS 23.30.095(a) is amended to read:

(a) The employer shall furnish medical, surgical, and other attendance or treatment, nurse and hospital service, medicine, crutches, and apparatus for the period which the nature of the injury or the process of recovery requires [, NOT EXCEEDING TWO YEARS FROM AND AFTER THE DATE OF INJURY TO THE EMPLOYEE. HOWEVER, IF THE CONDITION REQUIRING THE TREATMENT, APPARATUS, OR MEDICINE IS A LATENT ONE, THE TWO-YEAR PERIOD RUNS FROM THE TIME THE EMPLOYEE HAS KNOWLEDGE OF THE NATURE OF HIS DISABILITY AND ITS RELATIONSHIP TO HIS EMPLOYMENT AND AFTER-DISABLEMENT.

IT SHALL BE ADDITIONALLY PROVIDED THAT, IF CONTINUED TREATMENT OR CARE OR BOTH BEYOND THE TWO-YEAR PERIOD IS INDICATED, THE INJURED EMPLOYEE HAS THE RIGHT OF REVIEW BY THE BOARD. THE BOARD MAY AUTHORIZE CONTINUED TREATMENT OR CARE OR BOTH AS THE PROCESS OF RECOVERY MAY REQUIRE]. When medical care is required, the injured employee may designate a health care provider [LICENSED PHYSICIAN] inside the state to render the care except in cases where, in the judgment of the board, care or treatment or both can best be administered by the selection of another health care provider [PHYSICIAN]. Upon procuring the services of a health care provider [PHYSICIAN], the injured employee shall give proper notification of his selection to the employer within a reasonable time after first being treated. [IF FOR ANY REASON DURING THE PERIOD WHEN MEDICAL CARE IS REQUIRED THE EMPLOYEE WISHES TO CHANGE TO ANOTHER PHYSICIAN, HE MAY DO SO IN ACCORDANCE WITH RULES PRESCRIBED BY THE BOARD.]

* Sec. 6. AS 23.30.095(b) is amended to read:

(b) If the employee is unable to designate a health care provider [PHYSICIAN] and the emergency nature of the injury requires immediate medical care, or if he does not desire to designate a health care provider [PHYSICIAN] and so advises the employer, the employer shall designate the health care provider [PHYSICIAN]. Designation under this subsection, however, does not prevent the employee from subsequently designating a health care provider [PHYSICIAN] for continuance of required medical care.

→ Sec 31 P24+25

* Sec. 7. AS 23.30.095(c) is amended to read:

(c) No claim for medical or surgical treatment is valid and enforceable as against the employer unless, within 20 [TWENTY] days following the first treatment ~~and following the time set by the board for notice of subsequent treatments~~, the ~~health care provider~~ [PHYSICIAN] giving the treatment or the employee receiving it furnishes to the

employer and the board notice of the injury and treatment, preferably on a form prescribed by the board. The board shall [MAY], however, excuse the failure to furnish notice within 20 days when it finds it to be in the interest of justice to do so, and it may, upon application by a party in interest, make an award for the reasonable value of the medical or surgical treatment so obtained by the employee.

Sec 32 P24

* Sec. 8. AS 23.30.095(e) is amended to read:

(e) The employee shall, after an injury, at reasonable times during the continuance of his disability if requested by his employer or, when ordered by the board, submit himself to an examination by a health care provider [PHYSICIAN OR SURGEON] authorized to practice [MEDICINE] under the laws of the state in which the employee may be found, furnished and paid for by the employer. [THE EMPLOYEE HAS THE RIGHT TO HAVE A PHYSICIAN, PAID FOR BY THE EMPLOYER, PRESENT AT THE EXAMINATION OR EXAMINATIONS.] No fact relative to the injury or claim communicated to or otherwise learned by a health care provider [PHYSICIAN OR SURGEON] who may have attended or examined the employee, or who may have been present at an examination is privileged, either in the hearings provided for in this chapter or an action to recover damages against an employer who is subject to the benefits [COMPENSATION] provisions of this chapter. If an employee refuses to submit himself to any examination provided for in this section [HEREIN], his rights to compensation shall be suspended until the obstruction or refusal ceases, and his compensation during the period of suspension may, in the discretion of the board or the court determining an action brought for the recovery of damages under this chapter [HEREUNDER], be forfeited. The board in any case of death may require an autopsy at the expense of the party requesting the autopsy. No autopsy may be held without notice first being given to the widow or widower or next of kin if they reside in the

state or their whereabouts can be reasonably ascertained, of the time and place of the autopsy and reasonable time and opportunity given the widow or widower or next of kin to have a representative present to witness the autopsy. If no adequate notice is given, the findings from the autopsy may be suppressed on motion made to the board or to the superior court, as the case may be.

Sec 36 P 26

* Sec. 9. AS 23.30.105(a) is amended to read:

(a) The right to benefits [COMPENSATION FOR DISABILITY] under this chapter is barred unless a claim for them [IT] is filed within two years after the employee has knowledge of the nature of his disability and its relation to his employment and after disablement. The [HOWEVER, THE MAXIMUM TIME FOR FILING THE CLAIM IN ANY EVENT OTHER THAN ARISING OUT OF AN OCCUPATIONAL DISEASE SHALL BE FOUR YEARS FROM THE DATE OF INJURY, AND THE] right to benefits [COMPENSATION] for death is barred unless a claim for benefits [THEREFORE] is filed within one year after the death. If [, EXCEPT THAT IF] payment of compensation has been made without an award on account of the injury or death, a claim may be filed within two years after the date of the last payment. It is additionally provided that, in the case of a latent injury [DEFECTS PERTINENT TO AND CAUSING COMPENSABLE DISABILITY], the injured employee has full right to claim as shall be determined by the board, time limitations notwithstanding.

Sec 40 P 30

* Sec. 10. AS 23.30.110(c) is amended to read:

(c) The board shall make the investigation which it considers necessary in respect of the claim, and upon application of an interested party shall order a hearing on it. If a hearing on a claim is ordered, the board shall give the claimant and other interested parties at least 10 days' notice of the hearing, served personally upon the claimant and other interested parties or sent by registered mail, and shall, within 30 [20] days after the hearing is held [HAD], by order, reject the claim

or make an award in respect to it. If a hearing is continued by the board, additional notice under this subsection is not required. [IF NO HEARING IS ORDERED WITHIN 20 DAYS AFTER NOTICE IS GIVEN AS PROVIDED IN (b) OF THIS SECTION, THE BOARD SHALL BY ORDER REJECT THE CLAIM OR MAKE AN AWARD IN RESPECT TO IT.]

Sec 45 P 33

* Sec. 11. AS 23.30.155(j) is amended to read:

(j) If an employer has made advance payments or overpayments of compensation, he is entitled to be reimbursed, after approval by the board, out of any unpaid installment or installments of compensation due.

Sec 46 P 33

* Sec. 12. AS 23.30.155 is amended by adding new subsections to read:

(n) Compensation owed to an injured employee in the state shall be paid by a check or draft that may be cashed on the first banking day after it is received by the employee and on any succeeding banking day.

(o) If the board determines that it is in the interest of an injured employee and that a substantial hardship will not be imposed on the employer, the liability of the employer for all or part of compensation payable under AS 23.30.190 may be discharged by the payment of a lump sum.

Sec 51 P 36

* Sec. 13. AS 23.30.175(b) is repealed and reenacted to read:

(b) After June 30 and before December 1 of each year, the commissioner shall adopt and publish the average weekly wage for each jurisdiction for the preceding calendar year as published by the United States Secretary of Labor for the purposes of unemployment insurance. In determining the rate of compensation the commissioner shall use the average weekly wage figure for each jurisdiction, including Alaska, for which the Secretary of Labor computes an average weekly wage. These figures are the applicable average weekly wages for those jurisdictions for the following calendar year.

Sec. 52 P 36&37

* Sec. 14. AS 23.30.175(c) is repealed and reenacted to read:

(c) The following rules apply to recipients who do not reside in Alaska:

(1) The weekly rate of compensation shall be calculated by multiplying the recipient's average weekly wage times the ratio of the average weekly wage of the jurisdiction in which the recipient resides to the average weekly wage of Alaska. The rate is based on the average weekly wages in effect when the recipient leaves Alaska and shall be adjusted annually upon publication of the average weekly wages for all jurisdictions.

(2) The calculation required by this subsection does not apply if the recipient is absent from Alaska for medical or rehabilitation services not reasonably available in Alaska.

(3) If the average weekly wage of the recipient and the resulting compensation rate is determined under AS 23.30.220(2) the calculation required by this subsection applies to only those wages earned in Alaska.

(4) Application of this subsection may not result in a reduction of the weekly compensation rate to less than $65 a week except as provided in (a) of this section.

Sec 53 P 37

* Sec. 15. AS 23.30.175(d) is repealed and reenacted to read:

(d) In a jurisdiction for which no average weekly wage is computed by the United States Secretary of Labor for the purposes of unemployment insurance, the average weekly wage shall be as determined by the commissioner.

Sec 55 P 38,39,40

* Sec. 16. AS 23.30.190(a)(20) is amended to read:

(20) in all other cases in this class of disability the compensation is 66-2/3 percent of the difference between his average weekly wages and his wage-earning capacity after the injury in the same

employment or otherwise, payable during the continuance of the partial disability, but subject to reconsideration of the degree of the impairment by the board on its own motion or upon application of a party in interest; [WHENEVER THE BOARD DETERMINES THAT IT IS IN THE INTEREST OF JUSTICE, THE LIABILITY OF THE EMPLOYER FOR COMPENSATION, OR ANY PART OF IT AS DETERMINED BY THE BOARD, MAY BE DISCHARGED BY THE PAYMENT OF A LUMP SUM;]

Sec 56 P40

* Sec. 17. AS 23.30.191 is repealed and reenacted to read:

Sec. 23.30.191. EXPENSES FOR REHABILITATING INJURED EMPLOYEES. An employee, who, as a result of injury, is or may be expected to be totally or partially incapacitated for his normal occupation and who, under the direction of the board, is being rehabilitated to engage in a remunerative occupation, may receive compensation necessary for his rehabilitation of 66-2/3 percent of his average weekly wage subject to the maximum payable under AS 23.30.175.

Sec 58 P41

* Sec. 18. AS 23.30.215(a)(1) is amended to read:

(1) reasonable and necessary funeral expenses not exceeding $2,500 [$1,000];

Sec 59 P41, 42

* Sec. 19. AS 23.30.220(2) is amended to read:

(2) the average weekly wage is [THAT MOST FAVORABLE TO THE EMPLOYEE] calculated by dividing 456 [52] into the total wages earned, including self-employment, in the highest paid three consecutive years out of [ANY ONE OF] the five [THREE] calendar years immediately preceding the injury;

Sec 63 P43

* Sec. 20. AS 23.30.250 is amended to read:

Sec. 23.30.250. PENALTY FOR MISREPRESENTATION. A person who willfully makes a false or misleading statement or representation for the purpose of obtaining a benefit or payment under this chapter is guilty of theft as defined in AS 11.46.100(3) and is punishable as provided in

AS 11.46.120 - 11.46.150 [A MISDEMEANOR, AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT MORE THAN $1,000, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH].

Sec 68 P45

* Sec. 21. AS 23.30.265(16) is amended to read:

(16) "medical and related benefits" includes but is not limited to physicians' fees, nurses' charges, pain clinic services, hospital services, hospital supplies, medicine and prosthetic devices, physical rehabilitation, and treatment for the fitting and training for use of such devices as may reasonably be required which arises out of or is necessitated by an injury, and transportation charges to the nearest point where adequate medical facilities are available;

Sec 70 P45,46

* Sec. 22. AS 23.30.265(20) is amended to read:

(20) "wages" means the money rate at which the service rendered is recompensed under the contract of hiring [IN FORCE AT THE TIME OF THE INJURY,] and includes the reasonable value of board, rent, housing, lodging, or similar advantage received from the employer, and gratuities received in the course of employment from other [OTHERS] than the employer;

Sec 71. P45,46

* Sec. 23. AS 23.30.265 is amended by adding new paragraphs to read:

(29) "benefits" means compensation and medical and related benefits;

(30) "health care provider" means a chiropractor licensed under AS 08.20; a dental hygienist licensed under AS 08.32; a dentist licensed under AS 08.36; a nurse licensed under AS 08.68; a dispensing optician licensed under AS 08.71; an optometrist licensed under AS 08.72; a pharmacist licensed under AS 08.80; a physical therapist licensed under AS 08.84; a physician licensed under AS 08.64; a podiatrist; a psychologist and a psychological associate licensed under AS 08.86; and a hospital as defined in AS 18.20.130, including a governmentally owned

or operated hospital; a corporate entity covered under AS 21.88.050-(b)(12); an employee of a health care provider acting within the course and scope of his employment; and persons comparably licensed in other jurisdictions to provide health care;

(31) "in the course of employment" includes travel to and from a remote job site but does not include activities outside of working hours off a site provided by the employer that are not under the supervision or control of the employer.

Sec 72 P46

* Sec. 24. AS 23.30.095(g), 23.30.125(b), 23.30.175(e) and (f), and 23.30.225(b) are repealed.

Sec 72 P 46

* Sec. 25. This Act takes effect July 1, 1982.

Department of Education
9170 Glacierwood Drive
Juneau, Alaska 99801
586-6500
Position Statement: Overview of function of vocational rehabilitation; answered questions.

PREVIOUS ACTION

HB 159 — No previous action. No amendments formally considered this date.

Statutory reference: AS 18.80; AS 23.30.

ACTION NARRATIVE

Tape #005
Recording
Number 0004 — The meeting was called to order by Chairman Martin at 1:20 p.m. All committee members were present. Chairman Martin introduced Jeff Barry, administrative aide to the Committee, and Tom Sofo of LAA Legal Services. Chairman Martin gave a brief recap of work completed so far, and went over the week's agenda. He was hopeful that the committee would be ready for final action on HB 159 by the week of 2/14-18.

Number 0118 — TOM SOFO, LAA Legal Services, went over the workdraft committee substitute for HB 159. He said all references to self-insurance are omitted from this workdraft. He noted that the bill contains a parallel section to each section of the governor's bill, HB 659, and compared the workdraft to the governor's bill section by section.

Section 1 (of HB 159): Includes form for ascertaining discrimination.

Section 2: Deals with insurance matters; allows insurers to use deductible. This was

taken from the last version of HB 159. Sofo noted that almost all amendments in this draft have appeared in prior drafts.

Number 0190 — Section 4: Speaks to employer penalties and stop order authority. There was some clarification by Don Koch, Division of Insurance, and Jackie McClintock, Division of Workers Compensation.

Number 0210 — Section 5: Regards furnishing of medical care. One thing introduced is the concept of "health care provider" to include a broader range of services and care. Sofo noted that the last portion of the bill defines health care providers.

Number 0242 — There was discussion about reporting times. Rep Rogers preferred the draft committee substitute version of reporting times over those in the last version. Jeff Barry noted that when people don't show up for scheduled appointments for treatment, the health care provider notifies the Workers Compensation Board (under the draft CS).

Number 0279 — Sofo said that, in Section 5, the draft bill removes the two-year limitation on employer furnished medical services.

Number 0307 — Rep. Rogers noticed that, in Section 8, which appears on line 20, pg 4 of the draft bill, the word "benefits" replaces the word "compensation". He saw nothing wrong with that, but felt it should be consistent throughout the bill. Sofo pointed out that the Workers Compensation Act didn't consistently use the words "benefits" and "compensation". He tried to clarify the difference between the two.

Number 0346 — Sofo said that, in Section 10 of the draft CS, there appeared language new to the bill: AS 23.30.110(c) notice requirements are changed from 20 days to 30 days, and if a noticed hearing is not held, no additional notice is required.

Section 19: Sofo said that, on page 8, Section 19 of the bill, regarding weekly wage, they had tried to look at a compromise method of determining compensation by taking the three highest years' wages of the

preceding five years.

Number 0378 — There was discussion between Rep. Rogers and Sofo regarding clarifying the distinction between "compensation" and "benefits". Sofo felt there was also a problem with the definition of what is meant by "in the course of employment".

Number 0425 — There was discussion among Rep. Rogers, Sofo, and McClintock regarding scheduled and unscheduled payments.

Number 0443 — Section 23: Sofo said this section includes new definitions, the most controversial of which would probably be the definition of "in the course of employment".

Number 0456 — Committee discussion: Sofo said the greatest substance deleted in the draft version is self-insurance. Rogers noted that another new change is the repeal of AS 23.30.225(b). Sofo spoke to social security offset, saying the section didn't interact correctly with federal regulations, so to correct this discrepancy, language was deleted.

Number 0515 — Rep. Rogers noted that three factors must be met for a worker not to be considered performing "in the scope of employment": 1) outside working hours; 2) off site; and, 3) not under the supervision of the employer. Considerable discussion ensued regarding what activities fell under this definition.

Number 0570 — Sofo then addressed the five proposed amendments to the workdraft. He said they were deleted from the new workdraft for ease in dealing with the legislation.

Number 0595 — Rep. Rogers did not understand why people should be denied medical benefits on the basis of how many job referrals they received; he felt the language should perhaps be changed to job "offers". There was discussion of this point between Reps. Rogers and Martin.

Number 0672 — Sofo addressed the second proposed amendment, which requires injured employees to report wages earned or lose their benefits. He said this stands as a reporting requirement. Barry said the

question could be raised as to whether an additional insurance policy, such as loan insurance, could be construed as earnings. Rogers pointed out that the amendment specifically addresses reporting "wages", which are defined as something received from an employer.

Number 0701 — Koch asked what the Division of Insurance would be expected to do with information when it is received. McClintock added that her division hears claims, but doesn't adjust them. Sofo said this was discussed before, and that the workdraft does not give guidelines as to what the information will be used for.

Number 0721 — Sofo addressed the third proposed amendment, which referred to compensation for permanent partial disability. He said the language seems to delete the amount of time compensation could be collected, and lowers some benefits. Reps. Randolph and Rogers asked if lowering the benefit amounts had any affect on premiums, and asked the reasons for this action. Rep. Martin thought John Lewis, a consultant scheduled to give testimony later in the week, might be able to clarify this point. Barry pointed out that the effect would be that the lowest paid people would lose benefits. Rep. Rogers felt that, if low paid people were affected and higher paid people unaffected, they should look at the number of dollars, not the number of weeks. He said it would seem they would want to help the lower wage earners.

Number 0778 — Sofo said the fourth proposed amendment addresses unemployment compensation. There was discussion among the committee, Sofo, and Koch.

Number 0825 — Sofo said the fifth proposed amendment ensures that a worker eligible for workers compensation can't collect sick pay and workers compensation in a total amount that is more than 100% of a worker's normal pay. This provides incentive to return to work. Barry added that an example is a worker drawing holiday pay, vacation pay, and workers compensation. He noted that abuses have come in areas of non-compensable sick pay. There was discussion between the

committee and Barry.

Number 0883 — Jack Thompson, of WCCA/ACE, asked if a non-union employer gets a benefit a union employer would not. Barry said no; there was discussion between Barry, Thompson, and Koch on this point.

Number 0910 — Rep. Martin asked M.C. Morgan, of the Division of Vocational Rehabilitation, to address the committee.

Number 0932 — M.C. Morgan said that, in this legislation, Vocational Rehabilitation is one of the primary deliverers of services to people drawing workers compensation. During the year, 500-600 disabled will be placed in employment, 40% of whom are severely disabled. Approximately 5% of those clients are under workers compensation. He gave rehabilitation statistics, breakdowns, and observations on the differences between their general caseload and the workers compensation cases. He said that disincentives to returning to work were eligibility for workers compensation on the basis of permanent injury; greater extent of injuries; and greater extent of benefits. He said it is difficult for a vocational rehabilitation counselor to motivate a client when the client knows this could damage his claim. He said this helps to explain the longer timeframe and higher cost to rehabilitate a workers compensation client.

Number 1026 — At Rep. Martin's request, Morgan said he would draw up a list of suggestions, particularly suggestions to eliminate disincentives to return to work. He noted that 44% of the workers compensation referrals come 9-12 months after the injury; and 30% come 18 months after injury. He said these long referral times reduce the chances of rehabilitating the injured person. There was discussion between Martin and Morgan.

Number 1045 — Rep. Rogers said that, at a December meeting with the Workers Compensation Board, it was suggested that there should be separate methods of calculating average weekly wage for permanent and partial disabilities, the temporary disability rate being based on

recent employment, and the permanent disability figured over a longer term. Rep. Martin said they should wait for John Lewis's input on this subject.

Number 1058

As there was no further business to come before the committee, the meeting was adjourned at 2:47 p.m.

To: All concerned about Alaska's Workers Compensation --an addition to report of December 17, 1981

From: Representative Terry Martin

Ref: More points of view to consider for Alaska's Workers Compensation legislation--HB 159, 1981

Changes have taken place in our state which now result in a number of claimants drawing excessively large benefit amounts or drawing benefits when they should not be entitled to them at all. An effort should be made to seek alternatives that would eliminate oversized, unearned benefits while still protecting the vast majority of the workforce. Necessary changes should result in compensation large enough for most claimants to survive on during time of recuperation and rehabilitation of injury suffered while on the job, and during period of temporary unemployment, while at the same time not reducing or eliminating the incentive to return to work.

Current policies and lack of regulations or laws result in very large benefit amounts when compared to some individuals' complete work histories. An example of this phenomena is the part-time and seasonal worker. The number of part-time/seasonal workers has grown dramatically in the past years and the projections are that the part-time/seasonal work force will continue to grow faster than the total work force. In Alaska, many seasonal and part-time workers seem to get injured in the closing days of their current jobs. For claimants

with a history of short working periods on an annual basis, a percentage of full-time workers compensation should be considered as to percentage of time worked in the immediate calendar year. The current policy is unfair to workers with full-time, long history of working, and also to employers. A strong duration formula will help to offset the adverse effects of a liberal benefit formula. Furthermore, support of persons only marginally in the labor force should be a welfare function and not a function of worker compensation.

Disqualification. Claimants should be disqualified for willful misconduct connected with work.

Gross misconduct may include acts of dishonesty, violation of safety rules, assault and battery, and destruction of employer's property as assessed by the Workers Compensation Board. The Board may also evaluate a percentage of workers compensation for willful misconduct connected with work. This would include willful acts which do not warrant a disqualification under the gross misconduct provision.

Job Refusal. Claimants may be disqualified by the Workers Compensation Board for refusal of suitable work after release by proper medical authority. Suitable work may be limited to jobs that had approximately the same pay as employment at time of injury.

Vacation Pay. The Workers Compensation Board may consider if vacation pay should postpone the individual from receiving workers compensation benefits for the weeks the vacation pay would cover. Worker compensation is designed to be a wage-lost replacement program, therefore the feeling that the employee is receiving continual wages, so it would not be appropriate to allow the individual to draw both benefits.

Unemployment Compensation. Normally an individual receiving workers compensation for any week would not be able to work, and therefore would not qualify for unemployment compensation. There are situations, however, where the person could be able to work but cannot perform his old job because of the disability. If he is receiving unemployment compensation for any such week, the worker compensation should reduce dollar for dollar any unemployment benefit the individual could otherwise receive.

Eliminate "socialized cost" of workers compensation from employers' premium rates. Rates assigned to employers should be designed to try and recoup from most employers the loss of employees wages and medical cost of injury. In many states, there has been a tendency to recognize that the cost of benefits of certain types should not be charged to individual employers; thus, the legislature should address the question of separating the socialized cost from workers compensation premiums paid by employers, and make the cost--eg, retraining and rehabilitation--the responsibility of proper State agencies. This switch in financing social cost would certainly make State agencies more consciencious of expenditures associated with so-called "retraining programs", when State revenues are used to support their non-controlled advocacies of social benefits, rather than a distant third or fourth party paying the bill, that has virtually no control over social cost of workers compensation. In evaluating the current rate formula in Alaska, the premiums may result in recouping more for socialized costs than what is necessary or fair to the employer. Since 1975, there has been an interplay where there was a large increase in benefit payments which are not recouped fast enough through the normal rate schedule.

The State legislature readily sees other factors that increase the cost of premiums for workers compensation that should be immediately addressed. These changes would reverse the incentives of staying on compensation rather than returning to work as soon as possible. For instance, the compensation formula should not result in an individual drawing more income monthly while on compensation than he or she took home while fully employed. Thus the formula should exclude from wages payments by the employer of the employee's tax for federal old age and survivors insurance, and payments from or to certain special benefits funds by employers. For monthly payments, other income from food stamps, medicaid, medicare, child care, unemployment compensation, and other social services should be not allowed or deducted.

In the state of Alaska, an employer should be subject to certain interest or penalty payments for delay or default in payments of

contributions and incur penalties for failure or delinquency in making reports of proper coverage for employees. The Workers Compensation Division or Department of Labor should be allowed authority to immediately close a business until there is proof that employees are covered for injuries received on the job and the premiums are paid up to date. It should be mandatory that insurance carriers notify the Division of Insurance within ten days when an employer has failed to pay premiums or suspended insurance policy.

Original employers, especially self-insured employers who will not for any reason rehire an employee who is re-seeking work, should be somewhat responsible to contribute to the second injury fund covering an ex-employee who is off workers compensation and working for a new employer. Such a policy may encourage reemployment by the original employer or encourage a new employer to hire previously injured or handicapped workers.

2216 Post Road
Anchorage, Alaska 99501
Position Statement: Comments.

PREVIOUS ACTION

HB 159 — No previous action. No action taken this date.

Statutory Reference: AS 18.80; AS 23.30.

ACTION NARRATIVE

Tape #005
Recording
Number 1058 — The meeting was called to order by Chairman Martin at 1:07 p.m. He introduced Zee Jackson, who had prepared a study for presentation to the committee.

Number 1070 — Zee Jackson, rehabilitation consultant from Anchorage, presented the preliminary findings of a comprehensive study of vocational rehabilitation in the Alaska Workers Compensation Program. She went over the abstract prepared. Jackson noted that workers are not timely referred for rehabilitation, and Workers Compensation is not advising workers of their potential entitlement to vocational rehabilitation because of a lack of staff.

Number 1092 — Jackson gave her recommendations and an overview of rehabilitation in workers compensation (see page 10 of her report). Her recommendations were: 1) early identification of injured workers who potentially need rehabilitation; 2) use of competent rehabilitation providers; 3) provide opportunities for return to direct employment; 4) maintenance of atmosphere conducive to rehabilitation; and, 5) provide incentives and remove disincentives to rehabilitation. She said that getting people back to work is the crux of rehabilitations.

Number 1160 — Jackson referred to page 14 of her report, and presented a summary and interpretation of data. She said the primary sources of data were the state Division of Rehabilitation; two private rehabilitation firms; records of the Division of Workers Compensation; hearing testimony; and meetings of system participants, attorneys, medical community, insurers, and others. She pointed out the limitations of the data, such as different meanings to different people of some terms (eg, "successfully

rehabilitated worker").

Number 1199 — Jackson went over comparisons of public and private agency rehabilitations data (pages 18-19 of report). She explained comparison data for four workers compensations acts with provisions for rehabilitation benefits (Alaska, Idaho, and two federal programs)(p. 22 of report).

Number 1280 — Rep. Randolph had questions about actual costs of rehabilitation (see table 1, p. 18). There was discussion between the committee and Jackson regarding figures. Don Koch, of the state Division of Insurance, gave figures for insured workers compensation programs last year.

Number 1336 — Jackson referred to p. 16 of her report regarding findings and recommendations. She said there is no rule about when an injured worker is referred for rehabilitation. Many agencies use a timeframe based on injuries received, but referral generally runs 60-120 days from the date of injury. She said catastrophic injuries are referred right away. Jackson suggested instituting a reporting requirement for sending injury reports to Division of Workers Compensation. She also recommended the Division screen reports to ensure services are provided, and to notify injured workers of their rehabilitation rights. She referred to p. 17 of her report, and questioned counselors' qualifications to evaluate clients; she felt counselors may misperceive their roles; eg, advising people to settle cases or by giving advice to the Board, which is beyond the counselors' expertise. She felt the plans presented by counselors don't contain enough information (eg, specific goals, progress reporting timeframes). She said the problem exists because there are no guidelines or definitive procedures.

Number 1398 — Jackson said there seems to be a lack of understanding of roles in the system. There should be standards of time for evaluation, how long to implement plan, length of programs. She said counselors should be required to report consistently, and contents of report should be defined.

Number 1412 — Jackson noted that there is not much effort

on the part of employers to take injured workers back. She said there is a need to develop return to work programs with employers and injured workers. Rep. Randolph said if an employer puts an injured worker back to work, he is putting someone else out of work. There was discussion between the committee and Jackson about back-to-work programs.

Number 1476 — Rep. Martin asked Jackson which parties she had evaluated in her study; Jackson explained.

Number 1491 — Jackson went over the elements needed to maintain an atmosphere conducive to rehabilitation. She referred to page 24 of her report, and explained the need to provide incentives and remove disincentives to putting injured workers back to work. She gave examples of incentives and disincentives.

Jackson felt that putting a dollar limit on the second injury fund creates difficulties because the upper limit becomes a "goal" for people; they come to expect $10,000 worth of rehabilitation. She said the injured worker's right to money must be tied to the worker's need. She suggested rewording to leave a dollar amount and replace with language such as "all necessary costs". She felt this would not increase the cost of the program if properly managed.

Number 1625 — Jackson said the Workers Compensation Board needs to have unquestioned authority.

Number 1637 — Jackson discussed the risks of premature compromise and release settlements. She said self-employment plans often do not work. She felt settlements should be the exception rather than the rule. She went on to say that excessive litigation can impede successful rehabilitation. Jackson felt that attorneys don't really have a place in the system. She saw the need for a well-defined procedural mechanism for delivering rehabilitation to avoid excessive litigation. She felt that a major reason for litigation is a lack of information available to the worker. She said that void can be filled if there is a rehabilitation delivery system that sets the tone for a

positive rehabilitation program which, early on, lets the worker know his rights and responsibilities. She said this system has to have remedies when one party is not cooperating or not playing by the rules.

Number 1724 — Jackson went over commonly expressed concerns on the part of physicians, counselors, injured workers, insurer/employer, and attorneys (see p. 30 of report).

Number 1737 — Rep. Rogers said these were good suggestions, but only three or four required legislative action. He said that most of her suggestions could be within the administration, or in the self-interest of insurers and employers. Jackson responded that legislators could help. She said the primary ingredient is the ability of the administrative agency to provide assistance which all parties will need. She felt the Division doesn't currently have the staffing or background, and said they need a person with a good understanding of how to construct a program.

Number 1772 — Rep. Martin asked how far the state is from a reasonable program. Jackson replied that she was surprised no one was monitoring rehabilitation. She added that, as a counselor, she would never attempt to work with a client with an attorney present. She said the Board encounters resistance when trying to deliver assistance, and was surprised the Board's authority is taken so lightly. She saw a high element of "outlaw mentality". Jackson said the authority is in the law, but is not used. She felt that, because roles and procedures are not defined, it is hard for the Board to exercise authority. She said the state needs a defined procedures manual. She also noted that counselors are not given, and probably would not take, directions.

Tape 6, Side A,000 — Jim Robison, of W/C District Council of Laborers and the Alaska State AFL-CIO, commented on Jackson's presentation.

Number 0017 — Barbara Grisson, of Pacific Marine Insurance in Anchorage, said one incentive not mentioned is a 6% saving on Second Injury Fund tax when an employer re-employs an

injured worker.

Number 0036 — Jack Thompson, of WCCA, Anchorage, felt there were economics people don't realize.

Number 0050 — Jackson again reiterated the need for regulations to define the Board's authority.

Number 0090 — As there was no further business to come before the committee, the meeting was adjourned at 2:50 p.m.

Presentation of Preliminary Findings of a Comprehensive Study of Vocational Rehabilitation in the Alaska Workers' Compensation Program

Presented by

Zee Pamplin Jackson
Rehabilitation Consultant
P.O. Box 3130
Anchorage, Alaska 99510
(907) 264-2460

January 26, 1982

Abstract, Summary of Recommendations, Overview

ABSTRACT

This study was conducted to determine the effectiveness of the delivery system for rehabilitation benefits to injured workers covered by the Alaska Workers' Compensation Act. Factors examined in evaluating the system included the average time from the date of injury to the date of referral to rehabilitation, the percentage of lost-time cases receiving rehabilitation benefits, the percentage successfully rehabilitated, the average time spent in rehabilitation programs, and the average cost of such programs. The primary sources of information and data were the state Division of Vocational Rehabilitation and one of the private rehabilitation firms doing business in Alaska. Another source of data was a survey of injured workers who had previously participated in rehabilitation programs, and of workers who had signed compromise and release agreements in which the right to participate in such programs as part of the compensation system was waived. The rehabilitation programs used in two other state workers' compensation systems were evaluated, in order to show examples of the potential savings to be derived from a properly structured and managed system, and to examine procedures to be considered in developing an effective delivery system for rehabilitation. Gathering quantifiable data from all sources was difficult, due to the incomplete nature of the available records.

The study found that the delivery system is not providing timely and adequate rehabilitation services to a substantial number of those workers who could benefit from them, for two primary reasons. First, the system does not afford prompt referral of appropriate cases to rehabilitation facilities. Second, the Division of Workers' Compensation is not consistently advising workers of their potential entitlement to these services, nor is it monitoring the services being provided, primarily due to a lack of resources and trained personnel, as well as the absence of established guidelines and procedures for monitoring the system.

SUMMARY OF RECOMMENDATIONS

RECOMMENDATION 1

That insurers/employers report to the Division of Workers' Compensation:

a. All injured workers who experience continuous time loss of 90 to 120 days from the date of injury, depending on the staffing level of the Division, and

b. All acutely injured workers where an immediate determination can be made that the worker will not likely be able to return to the job held at the time of injury.

RECOMMENDATION 2

That the Workers' Compensation Division screen reports no later than 5 working days from the date each report is received.

RECOMMENDATION 3

That subsequent to, or during the screening process, the Workers' Compensation Division contact each reported worker. The purpose for contact is to explain the benefits to which the worker may be entitled, and to set the tone for a positive rehabilitation outcome by explaining the objective of rehabilitation, the worker's rights and responsibilities in the rehabilitation effort.

RECOMMENDATION 4

That the Workers' Compensation Division establish and publish the procedural mechanism to support the reporting, screening and contact activities.

RECOMMENDATION 5a

That pursuant to the adoption of regulations on vocational rehabilitation, (See Exhibit 1) the Workers' Compensation Division establish, publish and distribute guidelines for providers of rehabilitation services in accordance with recommendation 5b through 5e, and the following time frames:

- Completion of Vocational Evaluation and Plan Recommendation - 6 weeks
- Complete Development of Plan - 6 weeks
- Direct Placement Program - 3 months
- On-The-Job Training - 3 to 6 months, depending on the skills to be acquired coupled with the skill level of the injured worker.
- Vocational Training - 52 weeks (extensions subject to prior approval by the Board)

RECOMMENDATION 5b

That rehabilitation providers issue a report within 30 days of initial contact with an injured worker. Background information regarding the worker's age, education, work history, and general medical condition, as well as a summary of activities conducted during the 30 day period should be included in the report. Information regarding the next immediate plan of action should also be included.

RECOMMENDATION 5c

That plans submitted for approval contain pertinent information as outlined in proposed regulations on Vocational Rehabilitation 8 AAC 47.040(b)(1) through (9).

RECOMMENDATION 5d

That subsequent to implementing plans, rehabilitation providers issue monthly progress reports sufficient in content and scope to inform all interested parties of the progress being made toward achieving the vocational goal of the plan.

RECOMMENDATION 5e

That approval by the Board must be obtained prior to amendment, suspension or termination of an approved rehabilitation plan.

RECOMMENDATION 6

That insurers provide assistance to employers in developing programs for re-employment of injured workers.

RECOMMENDATION 7

That insurers/employers arrange for counselor services to include on-site-job analyses and assistance in modification of jobs to enhance reemployment opportunities of an employer's injured employees.

RECOMMENDATION 8

That the Workers' Compensation Division encourage the development and implementation of reemployment programs by providing positive monitoring/ endorsement of the efforts of parties.

RECOMMENDATION 9

That contractual agreements be negotiated for reemployment/rehabilitation of injured union members.

RECOMMENDATION 10

That insurers/employers increase their efforts to effectively and timely communicate with injured workers by contacting them as soon after the injury as possible to explain their entitlement to benefits and the procedure for securing these benefits.

RECOMMENDATION 11a

That in the case of workers experiencing time loss, who may need rehabilitation services, insurers/employers assign a counselor to contact the worker as soon as this determination can reasonably be made.

RECOMMENDATION 11b

That insurers/employers consider hiring a rehabilitation professional to enhance their ability to effectively communicate with, and timely provide services for injured workers.

RECOMMENDATION 12a

That insurers assist employers by providing loss control services to assure appropriate rating consistent with their safety record and reemployment practices.

RECOMMENDATION 12b

That to supplement the loss control services provided by insurers, employers seek the assistance of the States Division of Insurance in rating matters and methods.

RECOMMENDATION 13

That counselors enhance their efforts to place injured workers by informing employers of Targeted Jobs Tax Credit provisions and by providing assistance necessary to facilitate employer participation in the program.

RECOMMENDATION 14

That language in AS 23.30.040(e) be changed to remove the dollar amount and provide for necessary costs of rehabilitation services subject to Board approval.

RECOMMENDATION 15

That the Workers' Compensation Division increase employer awareness and encourage employer use of the Second Injury Fund in employment of industrially injured workers. Increased publicity and eligibility interpretation will enhance this effort.

RECOMMENDATION 16

That cooperative agreements involving transfer of Second Injury Fund monies to the Division of Vocational Rehabilitation be discontinued.

RECOMMENDATION 17

That criteria for development, recommendation and implementation of rehabilitation plans, in accordance with recommendations 5a through 5e, be applied to all providers of vocational rehabilitation services to injured workers covered by the state compensation laws.

RECOMMENDATION 18

That as a general policy, the Board deny settlement of claims, prior to an injured worker's completion of a supervised rehabilitation program.

RECOMMENDATION 19

That the Division of Workers' Compensation acquire the necessary staff to develop and implement a workers' compensation rehabilitation program designed to administer and monitor the rehabilitation benefits of industrially injured workers covered by the Alaska Workers' Compensation Act.

OVERVIEW OF REHABILITATION

IN WORKERS' COMPENSATION

A. HISTORY OF REHABILITATION PROVISIONS FOR INDUSTRIALLY INJURED WORKERS.

Rehabilitation in workers' compensation programs in the United States has been paid increasing attention over the past 10 years following publication of the 1972 Report of the National Commission on State Workmen's Compensation Laws. However, the realization that workers' compensation laws should include provisions of rehabilitating industrially injured workers was manifested by the Massachusetts Industrial Accident Board as early as 1914, when a member of that board went to study the German program. Pursuant to that study, and a meeting in 1916 of the International Association of Industrial Accident Boards and Commissions (IAIABC), during which the delegates were advised that a primary goal of workers' compensation programs would be the rehabilitation of disabled workers, the first state vocational rehabilitation law was enacted in 1918 in Massachusetts. The law, administered by the Industrial Accident Board, covered only those persons disabled by industrial accidents and occupational diseases. Following Massachusetts' lead, other states enacted laws with similar rehabilitation provisions. Congress, through the passage of Public Law 236 in 1920, created the State/Federal Vocational Rehabiliation Program. Its statement of purpose provided for the promotion of vocational rehabilitation of industrially disabled workers. Thus, persons with occupational disability were the prime target for vocational rehabilitation services. Subsequent Congressional mandates, however, shifted the attention to other specific disability groups and resulted in obscuring the focus on industrially injured workers. This shift in focus, coupled with the existence of the common law tort liability in the compensation system with its inherent litigation, resulted in the failure of both systems to adequately provide rehabilitation services to the industrially disabled: a condition which still exists today, according to the report of the National Commission (National Commission on State Workmen's Compensation Laws, 1972) and Larson, who suggests that one-half of 1% of industrially injured workers are rehabilitated under the federal/state programs. Larson further suggests that 10% of workers currently being injured could benefit from vocational rehabilitation services. (Larson, 1980).

B. REHABILITATION DEFINED.

The increased emphasis on the inclusion of rehabilitation benefits in a modern workers' compensation system has prompted attempts by those in the system to define rehabilitation. A noteworthy observation is made by Sawyer in this regard, wherein he makes a distinction between the philosophical differences in rehabilitation of the workers' compensation system and the state/federal program. He observes that the objective of workers' compensation rehabilitation is to restore the industrially injured worker to a state of employability equal to, or as near as possible to that of his pre-injury status, through the provision of only those services necessary to achieve this objective. On the other hand, Sawyer notes, the state vocational program seeks to rehabilitate disabled persons to their maximum potential through the provision of

educational and other services deemed necessary by the disabled worker to achieve a chosen vocational objective. (Sawyer, 1978).

A further distinction can be made through examination of the primary funding source of each program. The state vocational rehabilitation program is supported by federal and state funds, while the cost of rehabilitation in a workers' compensation system is borne by private industry through contributions to a special or second injury fund and direct payment to private rehabilitation providers. The employer further contributes to the rehabilitation of industrially injured workers through payment of compensation benefits during the period of rehabilitation.

A third distinction, perhaps more revealing than the first two, is the difference in population served by each system. As was previously discussed, Congressional mandates have directed the focus of the state/federal program to give priority to specific disability groups classified as severely disabled. These include developmental disabilities, congenital, orthopedic and neurological conditions, and catostrophic injuries resulting in paraplegia and quadriplegia. The bulk of individuals in these disability categories are adolescents and young adults, most of whom have never participated in the world of work. Therefore, the process employed in making them work ready is habilitation, as opposed to rehabilitation. Since their backgrounds do not include significant work experience which would have imparted marketable skills, their plans usually include long-term pre-vocational and vocational preparation centered around academic training toward a specific career goal chosen by the individual. Contrast this to the industrially injured group, who for the most part, have not been severely disabled by their injuries according to state/federal guidelines, and whose pre-injured work experiences have imparted skills which can usually be marketed in the workplace. On the whole, their natural orientation is not likely to be toward academic or classroom training, as they did not choose this method to enter the world of work to begin with, and they have not usually chosen to engage in academic pursuits at any point in their work life prior to the injury and subsequent visits to the state vocational rehabilitation office. It is reasonable to conclude that the approach taken in assisting them to return to the workplace will differ considerably from that taken for the other group.

The socially underlying concept of rehabilitation embraced by rehabilitation professionals is the intrinsic dignity of man, his feeling of self-worth and his right to life, liberty and the pursuit of happiness. In a workers' compensation system, this concept cannot realistically exist independent of economic wisdom. The timely return of an industrially injured worker to a safe employment status, commensurate with that held at the time of injury, through the investment of necessary resources, is a logical goal in a workers' compensation system. The end result is an economic as well as a social asset to the injured worker, the compensation system and society. Well-managed, cost-effective rehabilitation will enable many disabled workers to return to productive jobs and thus reduce compensation costs.

C. THE APPROPRIATENESS OF REHABILITATION IN A WORKERS' COMPENSATION SYSTEM.

In 1976, the Rehabilitation Committee of the International Association of Industrial Accident Boards and Commissions conducted research on rehabilitation in state compensation agencies. The Committee called for the inclusion of rehabilitation services in all state workers' compensation programs and went

on to submit a model program of medical care and rehabilitation which was adopted by the IAIABC in 1977. The stated purpose of the model program was the assurance and coordination of efficient and timely delivery of services necessary to restore the industrially disabled employee to optimum physical and vocational well-being. (Ross, 1976).

The need for rehabilitating injured workers was stressed in the 1977 report of the President's Interdepartmental Workers' Compensation Task Force. The report which stressed reemployment, advocated increased private rehabilitation efforts by employers and insurance companies. (Interdepartmental Workers' Compensation Task Force, 1977).

The Insurance Rehabilitation Study Group is an organization whose purpose is to provide a forum for members of the insurance industry to explore and develop concepts and programs of rehabilitation and medical administration applicable to all phases of insurance. The group undertook a project to develop guidelines and language dealing with rehabilitation and subsequently published a report which in part stated:

> While insurance losses and benefits are usually stated in monetary terms, the full consequences of human disability cannot be measured by money alone. Earnings lost due to accident or sickness can be replaced and medical expenses can be reimbursed, but there is no meaningful way to financially translate the value of an arm or a leg, or the personal dignity of being able to contribute to society as a useful member rather than merely existing disabled and dependent.
>
> The study group went on to state that:
>
> If insurance is to protect against these human losses, it must do more than provide financial compensation alone. It must also strive to restore such losses. Insurance should provide the means for disabled workers to return to gainful employment whenever possible, and to regain as much functional independence as they can, even if they cannot return to work. Compensation cannot accomplish these goals without rehabilitation. (Insurance Rehabilitation Study Group, 1975).

The Study Groups' report included its model rehabilitation program.

Based on the cited research and studies conducted by recognized authorities in workers' compensation, it is clear that the consensus among those in the compensation system supports the premise that rehabilitation is an effective tool which should be included in workers' compensation if the system is to fulfill its total responsibility to the industrially injured worker and to society within the economy.

D. WHO SHOULD FUND REHABILITATION IN WORKERS' COMPENSATION

Leading insurance companies, employers and other members of the workers' compensation community support the belief that all costs of the system should

be borne by the employer and not by the general public. Sawyer suggests:

> While some individual insurers and self-insured employers still approach the subject of rehabilitation with varying degrees of acceptance, the matter of involvement is no longer an option. Through a tion of either basic legislative changes or administrative regulation, the responsibilities of carrier" and employers to provide rehabilitation service, specifically directed toward returning injured workers to suitable gainful employment are spreading to all jurisdictions. (Sawyer, 1981.)

E THE ROLE OF THE STATE WORKERS' COMPENSATION AGENCY IN REHABILITATION.

The National Commission on State Workers' Compensation Laws suggested that a state agency has six primary obligations in a workers' compensation program. Those obligations are applicable to rehabilitation and will be used for the purpose of this discussion.

First, the agency must ensure that the basic objective of rehabilitation is met by taking the initiative to administer the laws relative to rehabilitation.

Second, the agency must continually review the performance of the rehabilitation program and make procedural changes to improve the program when change is indicated.

Third, the workers' compensation agency is obliged to advise workers of their rights and obligations under the law and to assure that they receive the rehabilitation benefits to which they are entitled.

Fourth, the agency should apprise employers and carriers of their responsibilities and rights under the law. Physicians and attorneys must also be informed of their obligations in the rehabilitation process.

Fifth, the agency should assist in voluntary and informal resolution of rehabilitation issues and assure that such resolutions are consistent with the law.

Sixth, in the absence of voluntary resolutions, the workers' compensation agency must make adjudicatory decisions to resolve issues affecting rehabilitation.

The compensation agency must have sufficient authority and staff to fulfill these six obligations. Moreover, the skills and background of the staff must be consistent with the functions to be served and the tasks to be performed.

PART ONE

Five Specific Goals of Rehabilitation

in a

Workers' Compensation Program

PART ONE

Five Goals of Rehabilitation in a Workers' Compensation Program

I. Early Identification of Injured Workers Who Potentially Need Rehabilitation

Workers who may not be able to return to regular employment after suffering job related injuries should be referred to rehabilitation as soon as this determination has been made or can be reasonably predicted. Proponents of the early involvement theory share the common realization that time can be a deadly enemy to successful rehabilitation. Benign neglect of what originally may be a minor disability can result in a protraction of the condition to the point where an unwholesome outlook regarding return to work becomes permanent and fixed, and the psychological hurdle required to overcome this is extremely difficult if not impossible to achieve.

Needs:

1. A funding source (employer/insurer)
2. A non-adversary approach (employer/carrier)
3. Effective administration by workers' compensation
   a. Screen reports
   b. Contact workers
   c. Monitor services
   d. Settle disputes

II. Use of Competent Rehabilitation Providers

The unusual characteristics of workers compensation and the different approach required for successful rehabilitation, as this report has previously elaborated, are strong arguments for the use of counselors trained in industrial rehabilitation. While this training does not require an intimate knowledge of the law, it should include the ability to recognize the needs of the industrially injured population and the compensation community alike. The backgrounds of most rehabilitation professionals include formal training in rehabilitation or a behavioral science. However, institutions have traditionally failed to include substantial courses on workers' compensation in rehabilitation programs. Thus, the degree of competence required to achieve success in a workers' compensation rehabilitation program has generally been acquired through well designed, in-service programs and practical hands on training.

Critical Elements Needed:

1. Sound background in basic rehabilitation principles
2. Ability to work with multiple parties
3. Willingness to deliver according to needs of the system
   - direct placement approach
   - on-the-job training
   - appropriate evaluation (timely and limited)
   - timely developed training (as needed only)
   - timely issued reports (information)
4. Respect for, and responsive to Board authority

III. Provide Opportunities for Return to Direct Employment

The success of rehabilitation in a workers' compensation program rests on the attainment of one of its most critical goals: the earliest possible return of workers to direct employment. Members of the workers' compensation community share the widely held belief that the fewer changes made in the life of an injured worker in the rehabilitation process, the more successful that process is likely to be. Conversely, a more complex rehabilitation plan requiring numerous changes in the life of the injured worker, and requiring a proportionate period of time to implement, diminishes the chance of a successful outcome.

Needs:

1. Employer Responsibility
   - modify old job
   - offer new job
     (Use on-site job analysis)
2. Employee Responsibility
   - cooperate w/employer efforts
   - timely accept job offer
   - maintain flexibility
3. Union Support and Involvement
   - go to bat for member (negotiate)
   - negotiate contract agreements to support light duty and rehabilitation

4. Counselor Role

   - consult physician for sound work restrictions
   - perform on-site job analysis
   - counsel worker toward accepting job
   - keep all interested parties informed

5. Attorney Obligation (for both parties)

   - remain on side line and advise respective clients to cooperate

6. Workers' Compensation Agency

   - advise, assist, monitor

7. Board

   - settle disputes

IV. Maintenance of Atmosphere Conducive to Rehabilitation

Rehabilitation is a process which does not occur in isolation. The conditions and atmosphere surrounding this process are primary determinants of its eventual outcome. The screening and early identification of injured workers who potentially need rehabilitation services will not necessarily result in a successful outcome if the process is fraught with hostilities, mistrust and excessive litigation. Certain elements which may be conveniently termed the "Four C's" must be present to ensure successful rehabilitation.

1. Concern - employer/carrier for worker
2. Communication - employer/carrier - worker - workers' compensation agency - counselor - physician - attorney
3. Coordination - counselor
4. Commitment/Cooperation -- all parties

V. Provide Incentives, Remove Disincentives to Rehabilitation

A rehabilitation program which makes early identification of workers needing rehabilitation, provides for early return to direct employment, uses competent rehabilitation providers and maintains an atmosphere conducive to rehabilitation, may fall short of fully achieving the primary objective of a workers' compensation system unless it maintains sufficient incentives and removes disincentives in its rehabilitation program. Caution must be exercised so that expectations regarding rehabilitation are not solely based on the premise that good faith efforts will spontaneously occur. There must be a realization that basic human nature usually requires the existence or application of stimuli necessary to create sufficient incentives before actions are taken to achieve a desired goal.

A. Incentives

1. Proper Rating of Employers.

Authorities in workers' compensation have suggested that internalizing the costs of workers' compensation by properly rating small, as well as large employers would provide an incentive for reemploying injured workers.

a. Experience Rating - provides for a before the fact look at safety and reemployment record for recent years. A good record results in credit toward future premium.

b. Retro Rating - employer pays advance premium based on classification rate times estimated payroll. Losses are assessed after period of months (pre-determined). Depending on experience, employer may get reimbursed.

2. Targeted Jobs Tax Credit

- Incentive for private employers who hire certain targeted groups (vocational rehabilitation clients included)

50% of first $6000 wages for first year

25% of first $6000 wages for second year

3. Second Injury Fund

- Widely publicized
- Adequate eligibility interpretation
- Effectively managed - guard against abuse

4. Additional maintenance for extra expense during rehabilitation

5. Monitoring by workers' compensation agency

B. Removal of Disincentives

1. Prevention of premature and inappropriate compromise and release settlements

2. Eliminate excessive litigation

C. Other Stimuli

1. Penalty for non-cooperation (Both Parties)

2. PPD determination should reflect non-cooperation

PART TWO

Findings, Conclusions, Recommendations

SUMMARY AND INTERPRETATION OF DATA

The primary providers of vocational rehabilitation services to injured workers in Alaska are the state vocational rehabilitation agency and two private rehabilitation firms. The state agency and one of the private firms, offered data retrieved from their automated data systems. Collection of data from the other private firm was precluded due to incomplete records which lacked essential information pertinent to the study. Limitations do exist for the purpose of comparing data collected from the two sources.

First, data for the state rehabilitation program reflects a three year period from FY 78 through FY 81. Data supplied by the private rehabilitation firm is for the FY 81 period.

Second, terms common to rehabilitation of disabled persons have several definitions for the purposes of statistics, depending on who collects the data. For example, a workers' compensation rehabilitation program, for purposes of closure statistics, defines a successfully rehabilitated worker as one who has 1) maintained paid employment for at least sixty days; 2) in a job consistent with the restrictions imposed by the disabling condition. The state rehabilitation program defines a successfully rehabilitation person as one who has completed a rehabilitation program and has 1) maintained paid employment for at least 60 days in a job which may or may not be consistent with restrictions imposed by the disabling condition; or 2) has not returned to work, but has been restored to an optimum level of function as an unpaid home maker. In this case, the private rehabilitation firm describes a successful case as one in which the injured worker 1) returned to paid employment in a job which may or may not be consistent with restrictions imposed by the disabling condition; or 2) whose claim was closed or denied as a result of the involvement of the rehabilitation firm. Again, it is important to keep these limitations in mind when making comparisons between data presented for the two sources.

Tables 1 and 2 present data received from the state vocational rehabilitation program. Tables 3 and 4 present data received from the private rehabilitation firm.

Although data limitations do not allow us to make any unequivocal conclusions concerning workers' compensation rehabilitation in Alaska, several widely accepted ideas are supported by the figures presented here. For both the state/federal program and the private sector rehabilitation firm, the earliest referrals become, on average, the least expensive cases. While there is an anomaly in the trend at 19-24 months (where both providers experienced an unexplainable dip in cost), the general direction is one of increased costs as the time between date of injury and date of referral increases. There do appear to be differences between the state program and the private firm in terms of average cost. In Table 3a, the private rehabilitation firms shows 75% of the sample cases with costs below $2500. The comparable figure for the state is 64% below $2500, seen in Table 2a. This difference can be explained several ways. First, as seen in Table 1, the average time between date of injury and date of referral for the state/federal program is 16.8 months. A similar figure for the private firm is 11.8 months. Given the relationships expressed in Tables 2b and 3b, one would then expect the state program's average costs to be higher. A second factor affecting costs is the average time spent in the rehabilitation

process. Table 1 shows the state program's clients spending 27 months, on average, in rehabilitation in FY 80. A similar figure from the private firms was 7.4 months, on average, between referral and closure. A third explanation for cost differences between the State program and the private firm is found in Table 1 which shows a significant percentage of the state/federal program's cases received college training in FY 80. While no similar figure exists for the private rehabilitation firm, meetings and discussions revealed that very few of their clients received college training. Given rising tuition costs, this would clearly add significant expense to the State program's services.

Table 1 shows that as the percent of clients receiving college training has decreased since FY 78, the percent of clients successfully rehabilitated has increased. This inverse relationship supports studies which have been conducted outside Alaska and concluded that shorter, less expensive programs tend to be more successful than longer and more expensive rehabilitation plans.

Table 1 also shows 54% of DVR's eligible referrals experienced successful outcomes in FY 80, although it is not known how many unpaid homemakers, or workers whose jobs were not consistent with restrictions imposed by the disabling condition, were included in this figure. A similar figure in the private firm's survey, seen in Table 4, is 55%. However, it is important to note that in the private firm survey, 34 cases were closed "via cash settlement/account denies coverage," and were classified as "successful" even though it was not known whether these persons returned to productive employment consistent with restrictions imposed by the disability. Subtracting these cases from the total number of successful cases then, reduces the success factor to 20.7%.

While many inferences and suggestions can be drawn from the data presented in Tables 1-4, one must remember that the percentage of clients involved in rehabilitation with respect to the total number of time-loss cases is quite small. For FY 81, the Second Injury Fund officer estimated 200-250 cases were determined eligible for second injury rehabilitation funds. From FY 78 - FY 80, the Workers' Compensation Division processed an average of 6838 time-loss cases. Because of the referral time lag mentioned earlier, it cannot be stated that a certain percentage of time-loss cases from a given year will receive rehabilitation. However, an estimated 3 to 4 percent of time-loss cases in a given year, eventually become eligible for rehabilitation. The Second Injury Fund officer has also reported that in a recent purge of 45 active rehabilitation files, only 17 (38%) had completed a program and returned to work. He cited the signing of compromise and release agreements as a major reason for workers dropping out of a program. In fact, the survey of 142 workers eligible for rehabilitation found almost 70% of them had signed compromise and release agreements, and most of these were after rehabilitation had begun.

What conclusions do these figures suggest? Because they represent such a small number of injured workers, a pure statistician could take any one piece of data mentioned here and find it is not statistically valid. But when all pieces are considered together, the data begins to support itself. Early referrals should cost less, and they do in Alaska. A longer period between injury and referral should raise costs, and it appears to do so for both programs.

GOAL I

Early Identification of Injured Workers Potentially Needing Rehabilitation.

CONCLUSION

There is no universally accepted, hard and fast rule regarding the point at which an injured worker should be referred to rehabilitation. Among the workers compensation agencies with organized rehabilitation units, the range is 60 to 120 days of continuous time loss from the date of injury. Immediate reporting is encouraged for workers with acute or catostrophic injuries.

Based on available data, it appears that the average time from the date of injury to referral of injured workers to rehabilitation is 14.3 months in Alaska. (See Tables 1 & 3) In light of the existing trends among those agencies with organized rehabilitation units, coupled with the results of two of the units discussed in the main report, it appears that the Alaska system could benefit from changes which would enhance its efforts to achieve the early identification goal.

RECOMMENDATION 1

That insurers/employers report to the Division of Workers' Compensation:

a. All injured workers who experience continuous time loss of 90 to 120 days from the date of injury, depending on the staffing level of the Division, and

b. All acutely injured workers where an immediate determination can be made that the worker will not likely be able to return to the job held at the time of injury.

RECOMMENDATION 2

That the Workers' Compensation Division screen reports no later than 5 working days from the date each report is received.

RECOMMENDATION 3

That subsequent to, or during the screening process, the Workers' Compensation Division contact each reported worker. The purpose for contact is to explain the benefits to which the worker may be entitled, and to set the tone for a positive rehabilitation outcome by explaining the objective of rehabilitation, the worker's rights and responsibilities in the rehabilitation effort.

RECOMMENDATION 4

That the Workers' Compensation Division establish and publish the procedural mechanism to support the reporting, screening and contact activities.

GOAL II

Provision of Rehabilitation Services by Competent Counselors

CONCLUSION

Counselors presently providing rehabilitation services to injured workers covered by the Act are presumed to have sound backgrounds in basic rehabilitation principles. However, a review of rehabilitation plans, reports and correspondence, as well as views expressed by these counselors, raises questions regarding whether the remaining three critical elements are sufficiently present to meet the objective of a workers' compensation rehabilitation program. (See discussion of Critical Elements Needed Under Goal II in Part One). First, some counselors appear not to understand their roles as they attempt to interpret laws regarding a worker's entitlement to rehabilitation benefits to the Board and they inappropriately make recommendations to the Board regarding settlement of workers' claims.

Second, it appears that some counselors are unable/unwilling to deliver services in a manner consistent with supporting the objective of the system. Services are not timely delivered (six months to complete a vocational evaluation and make recommendations). Training plans are developed prior to pursuing opportunities for direct return to employment. Some plans do not clearly define the vocational objective of the worker, or provide information regarding the type, scope and time frames within which services are to be provided. In cases where the vocational goal is defined, subsequent reports do not reflect specifically what has been accomplished toward achieving the goal.

Third, some counselors believe the system should afford a "pure" environment within which rehabilitation services can be provided to workers: They should not be required to interact with insurance adjusters, attorneys or the Board, as this interferes with their ability to effectively deliver services.

Finally, some counselors seem unprepared/unwilling to accept the Board's authority to make decisions regarding the rehabilitation of injured workers covered by the Act. Board requests for information in support of recommended plans are questioned and in some cases ignored. In some instances, attempts to coerce Board approval of second injury fund expenditures are made simultaneous to the counselor's overt resistance to Board requests for information needed to support a plan recommended by the counselor.

Clearly, the lack of regulations, definitive procedures and guidelines for vocational rehabilitation, has affected the performance of counselors providing services to injured workers covered by the Act.

RECOMMENDATION 5a

That pursuant to the adoption of regulations on vocational rehabilitation, (See Exhibit 1) the Workers' Compensation Division establish, publish and distribute guidelines for providers of rehabilitation services in accordance with recommendation 5b through 5e, and the following time frames:

- Completion of Vocational Evaluation and Plan Recommendation - 6 weeks

TABLE 1

DVR[1/]

	Eligible Cases Closed	Avg. Time in Rehab. Process	% College Training	Successful Rehabs.	Avg. Cost Per Eligible Case	Avg. Cost/ Successful Case
FY80	61	27(mos.)	21%	33 (54%)	$2280	$3505
FY79	50	23	36%	22 (44%)	1615	2821
FY78	48	32	38%	20 (42%)	1468	3021

* Through 7/1/81 -
Average time between date of injury and date of referral (includes cases still open): 16.8 Months.

1/ Table 1 is data received from DVR off the R-300 form.

TABLE 2

DVR[2/]

For 72 Eligible Closed Cases Referred through 7/1/80:

a. Cost	#	
0-500	18	
500-1000	9	
1000-1500	9	64% below $2500
1500-2000	7	
2000-2500	3	
2500-3000	3

Lack of Cooperation by One of the Involved Parties	11	6.0
Company Requests Closure - Costs Not Warranted	38	20.0
Other	20	10.0

- Complete Development of Plan - 6 weeks

- Direct Placement Program - 3 months

- On-The-Job Training - 3 to 6 months, depending on the skills to be acquired coupled with the skill level of the injured worker.

- Vocational Training - 52 weeks (extensions subject to prior approval by the Board)

RECOMMENDATION 5b

That rehabilitation providers issue a report within 30 days of initial contact with an injured worker. Background information regarding the worker's age, education, work history, and general medical condition, as well as a summary of activities conducted during the 30 day period should be included in the report. Information regarding the next immediate plan of action should also be included.

RECOMMENDATION 5c

That plans submitted for approval contain pertinent information as outlined in proposed regulations on Vocational Rehabilitation 8 AAC 47.040(b)(1) through (9).

RECOMMENDATION 5d

That subsequent to implementing plans, rehabilitation providers issue monthly progress reports sufficient in content and scope to inform all interested parties of the progress being made toward achieving the vocational goal of the plan.

RECOMMENDATION 5e

That approval by the Board must be obtained prior to amendment, suspension or termination of an approved rehabilitation plan.

GOAL III

Provide for Early Return to Direct Employment

The extent to which injured workers are provided opportunities for return to direct employment is a primary determinant of the ultimate success of rehabilitation in a workers' compensation program. Administrators of rehabilitation programs for the Idaho Industrial Commission and the Office of Workers' Compensation Programs (OWCP) as well as others in the industrial rehabilitation community, support this premise. The Idaho program states as its primary goal: the earliest possible return of the injured worker to meaningful safe work. (See Exhibit 2). The OWCP, in an effort to improve its rehabilitation program has developed/endorsed return to work programs for injured workers covered by the Longshoremen's and Harbor Worker's (LHCA) and the Federal Employee's Compensation Acts (FECA). According to information received from the OWCP, 763 injured workers were successfully rehabilitated under the FECA for FY 81. Sixty eight percent of these workers were reemployed by their previous employers. Savings in compensation payments alone totaled 7½ million dollars. During the same fiscal year, 368 workers were successfully

rehabilitated under the LHCA, resulting in actual savings of 3½ million dollars in compensation payments. Twenty-three percent of these rehabilitated workers were reemployed by their previous employers. (See Table 5 for comparative figures on the rehabilitation programs of the Federal Acts, the States of Idaho and Alaska Compensation Acts)

Insurance companies can be exceedingly instrumental in helping their insureds develop reemployment programs. A carrier for a large employer covered under the LHCA reports services provided the employer in establishing a reemployment program approved by the OWCP, resulted in the employer rehiring 18 injured workers over a nine month period during FY 82. A 1½ million dollar savings in projected compensation payments resulted from this effort. Additionally, the employer reported higher morale and reduction in suspected fraudulent claims as additional payoffs. That tremendous benefits are derived by the reemployment of injured workers by employers at the time of injury is too obvious for further elaboration.

CONCLUSIONS

There is little evidence in support of Alaska employers providing measurable opportunities for reemployment of injured workers. Only one self-insured reported having an organized return-to-work program. Figures to substantiate this effort were not afforded. The risk manager of a major employer indicated an extensive feasibility study has been conducted over the past year in preparation for developing a comprehensive reemployment program. A precious few employers reported a limited effort of temporarily assigning employees to light duty. On the whole, employers readily proclaimed the nature of their business precludes rehiring their injured employees: Their operations simply cannot accommodate workers with less than full body integrity. Insurer's comments contributed little to modify or change the complexion of this proclamation. Neither party admitted to having particular knowledge on how to improve this present state of affairs, although the suggestion of some insurers regarding performance of on-site-job analyses in cases of reemployment, dispells the notion of complete unawareness in this matter.

RECOMMENDATION 6

That insurers provide assistance to employers in developing programs for re-employment of injured workers.

RECOMMENDATION 7

That insurers/employers arrange for counselor services to include on-site-job analyses and assistance in modification of jobs to enhance reemployment opportunities of an employer's injured employees.

RECOMMENDATION 8

That the Workers' Compensation Division encourage the development and implementation of reemployment programs by providing positive monitoring/ endorsement of the efforts of parties.

A few union representative claimed favorable dispositions to contractual agreements providing for reemployment of injured workers. However, previous

TABLE 5

4/ Federal Employees' Compensation Act
5/ Longshoremens Harbor Workers' Compensation Act

efforts in this regard were reportedly rebuffed by management and were thus abandoned by labor. Trust fund sponsored, on-the-job training programs are provided for injured union members.

RECOMMENDATION 9

That co ractual agreements be negotiated for reemployment/rehabilitation of injured union members.

GOAL IV

Maintenance of Atmosphere Conducive to Rehabilitation

CONCLUSIONS

The element of concern is sufficiently intangible to render itself unmeasurable in a quantifiable way. It is therefore difficult to present an elaborate discussion on the extent to which insurers/employers are concerned about their injured employees during the course of their claims. This would require a detailed examination of randomly selected files maintained by carriers, with particular notations made of such items as timeliness of first and subsequent compensation payments, timely and adequate provision of medical and rehabilitation services, the extent to which claimants were advised of their entitlement to benefits, etc. Moreover, the quality of contacts between the injured worker and the insurer/ employer would be difficult if not impossible to capture. The elements of communication, coordination and commitment lend themselves to more discussion, particularly in regards to rehabilitation.

In general, the extent and timeliness of communication with injured workers seem inadequate for the purpose of supporting a successful rehabilitation program. First, the lag between date of injury to date of referral as previously noted, supports the conclusion that injured workers are not timely contacted and advised of their entitlement or potential need for rehabilitation services. Second, rehabilitation reports and other correspondence reflect communication is sporadic and generally inadequate to ensure the rehabilitation effort of a successful and cost effective outcome. Progress in rehabilitation plans is not timely monitored or timely reported. Concurrently, coordination of activities necessary to develop realistic return to work plans is insufficient, so that inordinate delays and interruptions occur to the detriment of injured workers, the rehabilitation program and the compensation system alike.

As to the extent of commitment to rehabilitation in the Alaska system, the time lag from date of injury to referral for services, and the percent of time-loss workers provided services, (approximately 5.4), coupled with the percent of time-loss workers successfully rehabilitated, (approximately 1.1%) indicate this element too, is woefully inadequate to support a rehabilitation program.

RECOMMENDATION 10

That insurers/employers increase their efforts to effectively and timely communicate with injured workers by contacting them as soon after the injury as possible to explain their entitlement to benefits and the procedure for securing these benefits.

RECOMMENDATION 11a

That in the case of workers experiencing time loss, who may need rehabilitation services, insurers/employers assign a counselor to contact the worker as soon as this determination can reasonably be made.

There is a developing trend among leading insurance companies to hire a rehabilitation staff member who serves as a communication link between the injured worker and insurance company, as well as other appropriate parties in the system. This staff member assists in creating an atmosphere conducive to an early return to work and facilitates coordination and development of rehabilitation plans for those workers who may not be able to return to direct employment.

RECOMMENDATION 11b

That insurers/employers consider hiring a rehabilitation professional to enhance their ability to effectively communicate with, and timely provide services for injured workers.

GOAL V

Provision of Incentives, Removal of Disincentives

CONCLUSIONS

Incentives

A. Experience and Retro Rating

The extent to which these methods are used in rating Alaska employers is unknown and is beyond the presentation of this report. Their suggested use by authorities in workers' compensation has been sufficient to present them as incentives for employers to reemploy their injured workers.

RECOMMENDATION 12a

That insurers assist employers by providing loss control services to assure appropriate rating consistent with their safety record and reemployment practices.

RECOMMENDATION 12b

That to supplement the loss control services provided by insurers, employers seek the assistance of the States Division of Insurance in rating matters and methods.

B. Targeted Jobs Tax Credits

According to the Division of Employment Security, Alaska employers rarely take advantage of this tax credit when employing the industrially injured worker. Several factors, such as eligibility criteria and employer awareness may be influencing this. Whether counselors adequately advise employers of this incentive when attempting to place injured workers is unknown.

RECOMMENDATION 13

That counselors enhance their efforts to place injured workers by informing employers of Targeted Jobs Tax Credit provisions and by providing assistance necessary to facilitate employer participation in the program.

C. Additional Maintenance

Injured workers undertaking a rehabilitation program can receive up to two hundred dollars in additional maintenance to defray extra expenses incurred during their rehabilitation program. This provision appears to be adequately serving the purpose for which it was established.

D. Second Injury Fund

The Alaska Workers' Compensation Act has provisions for a Second Injury Fund to be administered in accordance with orders and awards of the Board. AS 23.30.040(a). Subsection (e) authorizes expenditures for rehabilitation expenses and maintenance during the period of rehabilitation which may not exceed $10,000 for one person. When it comes to placing limitations on rehabilitation benefits in a workers' compensation system, there is an inherent problem in stating these limitations in monetary terms: Expectations and rehabilitation plans are designed around the upper limits of the dollar amount, rather than around what services are actually needed to make the injured worker employable. The worker believes his is an undeniable right to a program which costs $10,000, even though a less expensive program may be more appropriate to restore his employability. The counselor views the $10,000 as the worker's personal account which he has a right to exhaust by charging the costs of items and services superfluous to his rehabilitation program. In settlement negotiations, the attorney seeks to include $10,000 in the total figure for rehabilitation benefits, which he argues is his client's right.

All parties appear to have forgotten a basic tenet in a workers' compensation rehabilitation program: An injured worker's <u>right</u> to rehabilitation services coexists with the <u>need</u> of the worker for such services. The type, scope and duration of a rehabilitation program will vary with each injured worker, depending on such factors as skill level, education, age and extent of disability. It is therefore, a reasonalbe assumption, that the costs of services will vary for individual programs. Provisions for rehabilitation should be made with this in mind which is the current practice in most state compensation programs.

RECOMMENDATION 14

That language in AS 23.30.040(e) be changed to remove the dollar amount and provide for necessary costs of rehabilitation services subject to Board approval.

This provision would enhance continual efforts of the Board to provide necessary expenditures for workers seeking to rehabilitate themselves back to the work place and at the same time, protect the investment of insurers/employers who support the Fund.

There appears to be a lack of employer awareness regarding the existence or purpose of the Second Injury Fund and its provision for pre-existing conditions, under AS 23.30.205. This incentive will not realize its basic purpose if employers are not aware of its nature or not encouraged to use it.

RECOMMENDATION 15

That the Workers' Compensation Division increase employer awareness and encourage employer use of the Second Injury Fund in employment of industrially injured workers. Increase publicity and eligibility interpretation will enhance this effort.

Provisions also exist for the Board to make cooperative arrangements with insurance companies, private organizations and institutions, and state or federal agencies to provide rehabilitation services to injured workers covered by the Act. Through the end of FY 81, the Board maintained a cooperative agreement with the Alaska Division of Vocational Rehabilitation. The agreement permitted transfer of lump sum funds from the Second Injury Fund on a fiscal year basis, to the Division of Vocational Rehabilitation, for the provision of rehabilitation services to injured workers in the compensation system. Currently, a cooperative agreement does not exist between the two agencies due to unresolved differences surrounding the Board's authority to approve rehabilitation plans submitted by counselors of the Division of Vocational Rehabilitation requiring Second Injury Fund expenditure. The wisdom of transferring lump sum Second Injury Funds to the agency, and attempting to renew a cooperative agreement between the two agencies is questionable for at least three reasons.

First, the traditional basis for forming cooperative agreements between a compensation and state rehabilitation agency may no longer exist. During the formative years of no fault workers' compensation, the sole provider of vocational rehabilitation services to the disabled population was the state vocational rehabilitation agency. However, the National Commission, as well as other authorities in workers' compensation, has detailed the past failures of state programs in general, to meet the needs of the workers' compensation system due to the philosophical differences of the two agencies. Additionally, there has been an emergence of private rehabilitation providers, who appear more able to gear their services to the needs of the compensation system. In view of these factors, cooperative agreements between the two agencies may well be obsolete.

Second, removal of Second Injury Fund monies from the administration of the Commissioner of Labor, by transferring them to another agency which has no administrative oversight in the workers' compensation system, undermines the commissioner's ability to effectively administer the Fund in accordance with the orders and awards of the Board.

The last reason has legal implications. As the law clearly assigns the administrative responsibility of the Fund to the commissioner, and transfer of monies from the Fund undermines the commissioner's ability to discharge that responsibility, it would appear that meeting the requirement of the law is precluded by a cooperative agreement. This issue is of particular

importance in view of the reluctance of the Division of Vocational Rehabilitation to respect the Board's authority to approve rehabilitation plans submitted by its counselors requiring expenditure of Second Injury Fund monies.

RECOMMENDATION 16

That cooperative agreements involving transfer of Second Injury Fund monies to the Division of Vocational Rehabilitation be discontinued.

RECOMMENDATION 17

That criteria for development, recommendation and implementation of rehabilitation plans, in accordance with recommendations 5a through 5e, be applied to all providers of vocational rehabilitation services to injured workers covered by the state compensation laws.

Disincentives

A. Premature Compromise and Release Settlements

Larson and other authorities in workers' compensation, are strong opponents to settlements which prematurely preclude an injured worker's participation in a supervised rehabilitation program. There is real concern for the worker who settles his claim and releases his rehabilitation benefits. He may quickly exhaust his settlement funds and find himself with inadequate skills to earn a living.

That workers submit applications for settlements to fund proposed self employment ventures, in lieu of participation in a supervised rehabilitation program, is common knowledge. Almost equally as common, and particularly disturbing in the Alaska system, and probably elsewhere, is the recommendation for such plans, without adequate documentation to support the soundness or feasibility of the proposals. The parties involved have varying motivations for this unfounded recommendation.

The injured worker views it as an opportunity to do what he has always wanted to do: Besides, he will not have to work as hard if he can work at his own pace.

The insurer/employer suggests it as a mutual agreement which affords an equitable solution toward the disposition of the claim: It will also relieve the insurer/employer of any future liability related to compensation and rehabilitation benefits.

Claimant's attorney argues it will allow his client to get on with resuming a normal life: It will also afford the attorney an immediate appreciable fee.

The rehabilitation counselor opines that: Given the workers vocational evaluation results, his interests and motivation to succeed, the proposed venture will afford him a realistic vocational goal: It will also provide the counselor with much needed relief from the task of developing a sound

rehabilitation plan, which has been difficult if not impossible to achieve in light of the worker's resistence to any plan other than the self employment venture.

In instances such as this, all parties seem to lose sight of the end goal of rehabilitation: The return of the injured worker to productive employment by restoring his ability to earn a living. The injured worker's desire to start his own business is inappropriately equated with the goal of rehabilitation. A self employment plan may restore the worker to productive employment which will afford him a livable wage, and thus is a means to an end. However, an unsound plan may not afford him a sufficient income and thereby fails to achieve the end goal of rehabilitation.

This is not to suggest that all self employment plans are unsound and thus should not be considered, or that all workers must participate in an approved rehabilitation plan before a claim can be settled. It is suggested however, that each plan must be carefully evaluated for its soundness and potential for successfully returning the worker to productive employment. In cases not involving self employment plans, claims should be settled only after a determination has been made that to do so is in the best interest of justice.

RECOMMENDATION 18

That as a general policy, the Board deny settlement of claims, prior to an injured worker's completion of a supervised rehabilitation program.

B. Excessive Litigation

Rehabilitation professionals providing services to inured workers in Alaska, readily attest to the activities of both the plaintiffs' bar and defense attorneys, as interfering in the rehabilitation process. Indeed this seems to be borne out by testimony during public hearings on Workers' Compensation and in the claims files of injured workers. Excessive litigation serves little if any useful purpose in the rehabilitation process and if allowed to exist, will undermine the primary objective of rehabilitation. It causes the focus to shift from restoring the worker's competative earning ability to highlighting his disability. In the ensuing process, rehabilitation is not used as an effective, productive tool for the long range benefit of the injured worker. It becomes a bargaining stick employed by the claimant's attorney in his quest to obtain his client's pot of gold, and it is simultaneously used as a trade-off carrot by the defense attorney to limit the employer's/insurer's future liability. To an appreciable extent, the Board can provide a remedial solution to this problem. Regulations, guidelines and well defined procedures regarding rehabilitation, will remove much of the need and opportunity to litigate issues surrounding the rehabilitation process. (See recommendations 1 through 5e).

C. Other Stimuli

Parties who refuse to cooperate or who sabotage the rehabilitation effort by passive-aggressive means, should be encouraged to cooperate through the application of remedial penalties acting upon both the insurer/employer and

the injured worker similarly. The Board has the authority to apply such remedies. A review of its more recent decisions and orders reflects an increased effort to make sufficient applications in support of the rehabilitation objective.

Delivery of Rehabilitation in Alaska's Workers' Compensation System

The Alaska Workers' Compensation program must have an effective rehabilitation delivery system if it is to meet its six obligations as outlined in the overview section of this report, and achieve the five specific goals of rehabilitation. Administrative monitoring and positive assistance to injured workers and all other members of the workers' compensation community, require the adoption of the recommendations set forth in this report. Despite the on-going efforts of the Division of Workers' Compensation to improve its delivery system to the workers' compensation community, it continues to lack the resources and staff necessary to achieve a successful rehabilitation program which will ultimately reduce the cost of the compensation system.

The savings experienced in other compensation programs cited in this report, resulted from the delivery of well managed, cost effective rehabilitation benefits. These results did not occur independent of the economic wisdom of administrators for those programs, who realized that a relatively small investment of resources would yield tremendous gains in the reduction of compensation costs to employers, injured workers and society.

RECOMMENDATION 19

That the Division of Workers' Compensation acquire the necessary staff to develop and implement a workers' compensation rehabilitation program designed to administer and monitor the rehabilitation benefits of industrially injured workers covered by the Alaska Workers' Compensation Act.

PHYSICIANS' CONCERNS

1. Rehabilitation counselors should consult with treating physician before contacting injured worker. The counselor often gives advise which conflicts with physician's planned course. Physician can pave the way and make the prospects of rehabilitation less threatening if he is aware of the counselor's contact in advance.

2. Workers should be advised of benefits from day one of injury. Rights and responsibilities of worker should be spelled out. This would reduce adversary atmosphere.

3. Employers engage in inappropriate hiring practices to begin with. Thorough pre-hiring physical exam should be conducted. Conditions incompatible with physical demands of certain jobs would be detected at that time.

4. Workers' compensation should take natural aging process into account. Wear and tear process should not be financed by workers' compensation system.

5. Remedies should be more vigorously applied to workers who fail to follow doctor's orders.

6. Attorneys are too involved in the rehabilitation process. Counselor, physician and injured worker should be primary parties involved.

7. Rehabilitation benefits should be consistent and uniformly delivered. There is no control in the present system. Physician and patient need rules to play by.

8. Employer must assume more responsibility to provide light duty work until worker can resume regular job.

9. Union dispatch precludes loyalty to the employer - Union regarded as the "employer".

10. Union rules should be more flexible to support rehabilitation.

11. Unions must assure worker's who are dispatched are physically able to perform the duties of the job.

12. Professional rehabilitation providers inadequate. A more clearly defined system would encourage more providers to practice in Alaska's system.

13. Services provided by DVR are not particularly geared to industrial workers - more effective with catostrophically disabled population.

14. Insurance adjusters have inadequate backgrounds in medicine and human behavior. Inappropriate actions against claimants result in adversary behavior by claimant; (foot dragging and going against doctor's recommendations.) Adjusters must use more amiable approach.

REHABILITATION COUNSELORS' CONCERNS

1. Attorneys often interfere with rehabilitation. Some attorneys forbid their clients to see counselors, insist on being present at every counseling session, attempt to dictate what program should be developed for the injured worker, and often advise their clients not to cooperate with the counselor by using passive aggressive tactics. Counselors would like to see guidelines or regulations developed which forbid attorneys to interfere or attempt to run the rehabilitation process.

2. The workers' compensation system expects counselors to be miracle workers. Successfull rehabilitation of injured workers in the compensation system is difficult if not impossible in light of the following:

   a. Inadequate requirements of workers to cooperate with the counselor.

   b. Ineffective enforcement of the vague rules presently existing in the system when evidence clearly shows the worker has been uncooperative.

   c. Some insurance companies act in good faith in attempting to arrange rehabilitation services for workers who need them. Other companies fail to make such arrangements and may even interfere when workers seek services on their own.

   d. Those companies that support the rehabilitation effort are often penalized as the Board allows uncooperative workers too many chances to cooperate. Limitations should be placed on these chances.

3. The Workers' Compensation agency should be staffed with rehabilitation professionals who determine which agency will provide services to injured workers in disputed cases. This would reduce the level of excessive "rehabilitation shopping" by all parties which presently exists, and it would eliminate dual assignment of rehabilitation providers by both sides.

4. Counselors have too little time as it is to provide adequate services to the disabled population. Requiring counselors to appear in hearings and other judicial processes further reduces the time counselors should be devoting to rehabilitating the disabled population.

INJURED WORKERS' CONCERNS AND REACTIONS

1. The system has gotten so complex that an attorney is absolutely necessary in proceeding with many cases. Yet, some injured workers were not advised that they needed an attorney until it was too late.

2. Injured workers have reported receiving "high pressure" from carriers to settle for smaller settlements than required by law. This included threats of holding up final settlement unless the injured worker agrees to carrier's terms.

3. Injured workers who realized later that they needed rehabilitation assistance, were not given any indication that the option was available, at the time of injury.

4. Benefits are either cut-off without notice or held up as part of pressure tactics. In cases of jobs which pay by commission, an injured worker reported that benefits stopped immediately upon taking the job, although it was 4 months before he received his first commission check.

5. There were positive reactions to some insurance companies' case management, in addition to positive feelings about some injured workers' rehabilitation experience.

6. There is concern expressed that DVR does not cooperate with the injured worker's interest in rehabilitation. This point was expressed in a case where the injured worker reported the counselor stalled 6 months in getting the program started and took 2 months in getting the purchase of a calculator approved.

7. Concern has been expressed over the proper medical treatment. The use of chiropractors is more helpful in some cases, yet is discouraged by some doctors.

8. Injured workers are frustrated that some of the jobs they are retrained for are not available on the job market when the rehabilitation program is completed. They wind up returning to their old job or taking a position which has a high probability of reinjury.

INSURER/EMPLOYER CONCERNS

1. The Act requires insurers/employers to provide rehabilitation services to injured workers. Thus, the insurer/employer should be able to determine which rehabilitation agency the worker will be referred to for these services. This would eliminate the current practice of workers/attorneys shopping around to find the counselor who will recommend the longest training program.

2. Claimants' attorneys should be restricted from practicing "rehabilitation" and submitting training/rehabilitation plans for their clients.

3. Insurers/employers should not be required to provide rehabilitation services to workers who refuse reemployment offers by employers. There should be a limit placed on the time an injured worker has to accept the offer.

4. When training plans are presented for approval, the Board should make every effort to ensure the need for training before approving the plan and requiring the insurer to continue total compensation payments. Training should be approved on the basis of <u>need</u> as opposed to the <u>desire</u> of workers who merely want a new career.

5. Counselors should be used to perform on-site-job analysis to determine if the job is compatible with the worker's restrictions. Presently, the physician, who does not have sufficient knowledge of the world of work, makes this decision based on the whims of the patient, who often misrepresents physical demands of a given job.

ATTORNEYS' CONCERNS

1. Alaska has an inadequate number of competent rehabilitation counselors. Often, workers do not have a choice and must use DVR.

2. Particular counselors are inconsistent in serving injured workers; engage in power playing to control worker's life; dabble in claims and legal matters; incorrect information given worker, sometimes intentionally, if worker has not followed the counselor's "rules".

3. Present system does not have mechanism to make rehabilitation work. No one to monitor system and keep parties in line, particularly counselors who behave in questionable manner.

4. Disputes regarding rehabilitation should be promptly heard and decisions timely issued. Delays destroy motivation for rehabilitation.

5. Artifical rehabilitation hurts workers with serious injuries.
   EX: Sixty-one year old worker w/65% rating. Has fifth grade education and no work skills other than heavy labor. Ineligible for retirement by 4 years. Placed in pie shop as a part-time wrapper. Paid $4.00/hr = $60/week = approx. $200/month. Counselor issued a report of "successful rehabilitation" so worker was found PPD, thus $60,000 limit applied. Questionable whether worker will be able to continue in work force due to severity of injury, age, and limited skills. If unable to continue working, $60,000 inadequate source of income for worker's remaining lifetime. If PTD, rating is precluded by "successful rehabilitation" stamp.

6. Board should penalize insurers/employers who misrepresent the law. Failure to advise worker of entitlement to rehabilitation is misrepresentation.

APPENDIX OF EXHIBITS

CHAPTER 47

VOCATIONAL REHABILITATION

8 AAC 47.010. GOAL OF VOCATIONAL REHABILITATION. The board shall direct and provide for the vocational rehabilitation of employees entitled under the Act. Vocational plans formulated under the Act and this chapter must be designed to restore the injured employee to gainful employment. (Eff. / / , Register).

Authority: AS 23.30.005
AS 23.30.040

8 AAC 47.020. DUTIES OF THE PARTIES. (a) The employer, the self-insurer, the insurance carrier, and the employee shall promptly recognize the need for the evaluation of vocational rehabilitation and shall initiate necessary action to restore the injured employee to gainful employment as expeditiously as possible.

(b) The employee shall cooperate in all phases of vocational rehabilitation. The employee shall promptly and responsibly participate in a board-approved vocational plan when ordered to do so by the board. If the employee does not choose to enroll in a vocational plan, nothing in this chapter is to be interpreted so as to require the employee to do so. However, in cases where the employee chooses not to enroll in a vocational plan, or unreasonably refuses to complete a vocational plan, the degree of permanent partial disability will be determined as though the employee had enrolled in, and successfully completed, the vocational plan. The employee shall notify the board and the employer within 14 days of the first consultation with a vocational rehabilitation representative.

(c) The vocational rehabilitation representative shall notify the board and all interested parties within 14 days of the first consultation with an employee. Thereafter, the vocational rehabilitation representative shall file regular monthly reports with the board during the consultation period. Within 14 days of the final consultation, the vocational rehabilitation representative shall file a report of consultation which must contain the findings, conclusions and recommendations regarding vocational rehabilitation. (Eff. / / , Register).

Authority: AS 23.30.005
AS 23.30.040

8 AAC 47.030. EVALUATION ANALYSIS. (a) No vocational plan may be initiated until board approval has been secured. Board approval may be secured by any party by filing a petition for initiation of a vocational plan, accompanied by a written evaluation analysis. Copies of the petition and the evaluation analysis must be served upon all parties and the administrator of the Alaska Second Injury Fund, in accordance with 8 AAC 45.060.

CHAPTER 47
VOCATIONAL REHABILITATION

Section

10. Goal of vocational rehabilitation
20. Duties of the parties
30. Evaluation analysis
40. Vocational plans
50. Modification, suspension, or termination of vocational plans
60. Vocational rehabilitation definitions

(b) A written evaluation analysis must be accompanied by copies of all medical reports referred to in the analysis and must, in addition, include

(1) an assessment of the employee's employable skills, including a synopsis of his work history and educational background;

(2) a summary of the disabilities limiting the employee's employment opportunities; and

(3) a specific accounting of the employee's pre-injury wage and an assessment of his post-injury wage-earning capacity.

(c) After the complete, written evaluation analysis has been filed the board will review the factors discussed in the analysis and will determine whether the employee is able to return to his previous employment or to modified employment or whether, instead, direct job placement, on-the-job training or formal retraining is necessary in order to return the employee to gainful employment.

(d) If the board determines that formal retraining is necessary, it shall direct the employer or the employee, or both, to initiate a vocational plan in accordance with 8 AAC 47.040. The board will give preference to direct job placement and on-the-job training over a formal retraining program. (Eff. / / , Register).

Authority: AS 23.30.005

8 AAC 47.040. VOCATIONAL PLANS. (a) Following evaluation in accordance with 8 AAC 47.030, a vocational plan may be initiated by direction of the board or by any person. Vocational plans must be developed by a qualified rehabilitation representative designated by either the employer, the carrier, the self-insurer, the employee, or the board.

(b) Proposed vocational plans must be submitted to the board in the form of a petition by the person responsible for initiating the vocational plan. The petition must be in writing and must include

(1) the gainful employment objectives of the vocational plan, including estimated earnings and reasonable availability of gainful employment;

(2) the name and location of the educational institution, public or private vocational training agency, or company or business involved in the vocational plan;

(3) the nature, extent, and duration of services to be provided during the period of rehabilitation;

(4) the dates of commencement and expected completion of the vocational plan;

(5) a statement regarding the general financial condition of the employee;

(6) the amount of weekly income maintenance benefits, tuition, fees, and transportation costs, if any, and the time and manner of such payments to the employee during the period of rehabilitation;

(7) the employee's written acceptance of the plan, plus any comments the employee desires to make a matter of record concerning why the plan is in his best interests;

(8) the name of the rehabilitation representative who prepared the plan, a complete description of his or her qualifications, and the name and address of the representative's institution, agency, or company; and

(9) all medical, psychological, and vocational evaluation reports related to the case.

(c) Objections to a vocational plan must be filed in writing with the board within 10 days of the date of service of the plan upon the board.

(d) Upon receipt of written objections, or where it appears obvious that the employee and the employer are unable to reach agreement on the terms of the vocational plan, a prehearing conference will be scheduled. If agreement is reached at the conference, the board may approve the plan. If the differences cannot be resolved at the prehearing conference, the matter shall be set for a hearing. Hearings shall be held in accordance with the provisions of this chapter.

(e) Upon receipt of a proposed vocational plan acceptable to all parties concerned, or following a hearing, and after review the board shall approve, disapprove, or modify the plan.

(f) Implementation of the plan must begin as soon as the employee is capable of participating in the program and medical opinion indicates the employee's recovery will not be impeded by participation in the plan. The plan shall begin upon the date of board approval or the date specified in the plan, whichever occurs last.

(g) In the event

(1) a vocational plan is not offered by the employer; or

(2) an employer-offered plan or a rehabilitation agency-offered plan is not accepted by the employee; or

(3) the board finds that the employee is eligible for a plan but the proposed plans are not effective

the board, on its own motion or upon the petition of any party, shall

make a determination by means of a hearing or hearings of the services necessary to restore the employee to gainful employment. (Eff. / / , Register).

Authority: AS 23.30.005
AS 23.30.040

8 AAC 47.050. MODIFICATION, SUSPENSION, OR TERMINATION OF VOCATIONAL PLANS. Any party may petition the board for modification, suspension, or termination of a plan. The petition shall be treated as any other petition under § 050 of this chapter. The board shall order the modification, suspension, or termination if it finds

(1) satisfactory progress is not being made in the approved plan; or

(2) the plan is not likely to prepare the employee for gainful employment due to unexpected contingencies; or

(3) the employee refuses to complete the vocational plan approved by the board; or

(4) a more suitable plan becomes available. (Eff. / / , Register).

Authority: AS 23.30.005

8 AAC 47.060. VOCATIONAL REHABILITATION DEFINITIONS. As used in this chapter

(1) "Gainful employment" means employment which is reasonably attainable and which offers an opportunity to restore the employee as soon as possible to maximum self-support, due consideration being given to the employee's qualifications, physical and mental condition, interests, motivation and incentives, pre-injury earnings and future earning capacity, and the present and future labor market.

(2) "Implementation of a plan" means commencement by the employee of an actual return-to-work plan of direct job placement, on-the-job training or vocational training in accordance with an approved vocational rehabilitation plan.

(3) "Initiation of a plan" means the creation and drafting of a written vocational rehabilitation plan.

(4) "Vocational rehabilitation" means a program of services, not limited to medical services, designed to restore an injured or disabled employee to gainful employment.

(5) "Vocational rehabilitation representative" means a person who possesses the special skills, knowledge, education, training, and experience necessary to develop and implement vocational rehabilitation plans.

(6) "Vocational rehabilitation plan" means the planning and providing of services, not limited to medical services, reasonably necessary to restore an employee to gainful employment. Such services include, but are not limited to, vocational evaluation, counseling, retraining, on-the-job training, and job placement assistance. (Eff. / / , Register).

Worker Rehabilitation

Idaho
Industrial Commission
Rehabilitation Division

Exhibit 2

The Rehabilitation Division

was established by the 1978 Legislature in an effort to reduce the period of temporary disability resulting from industrial injury or disease and to aid in restoring the disabled employee to gainful employment with the least possible physical impairment.

What Are Our Goals?

- To provide for the earliest possible return of the injured worker to meaningful, safe work
- To return the injured worker to as near his pre-injury status as possible
- To reduce the period of temporary benefits paid injured workers

Who Is Eligible For Our Services?

Workers receiving Idaho Workmen's Compensation benefits for whom the Rehabilitation Division can be of assistance in reducing the period of temporary disability or aiding the worker in a return to employment compatible with his disability.

What Services Are Provided?

Services provided are those necessary to return the worker to a job with his former employer, or to a job similar to the one held prior to becoming injured.

Services available include:

- Vocational evaluation
- Job site evaluation
- Vocational counseling
- Assistance in job modification
- Training in job seeking skills
- Placement
- Follow-up
- Reporting system to those involved in the rehabilitation process

Who Benefits From Our Services?

- Disabled workers
- Employers
- Attorneys
- Physicians
- Society

Who Should Be Referred?

- Workers requiring a change of occupation.
- Cases with long periods of disability
- Injuries resulting in restrictions of function
- Cases with a potential for high financial exposure

Discussion
of
Preliminary Results
of
Survey of Injured Workers

METHODOLOGY

This survey was conducted to measure the post injury, economic status of injured workers and to examine their reactions to the delivery system of rehabilitation benefits in the Alaska Workers' Compensation System

A time frame considered to be most useful to the survey was established. Workers who sustained injured between January, 1977 and December 1980 were included in the survey. This time frame eliminated injuries occurring during the pipeline "boom" economy of the mid-seventies. It also provided an adequate stabilization period for injured workers to get back on their "economic feet."

Injured workers surveyed were divided into three groups. The first group included workers who had signed compromise and release agreements, which did not include provisions for rehabilitation benefits. The second group of injured workers were those referred to the state vocational rehabilitation agency, and the third group of injured workers were those referred to private rehabilitation firms.

Survey forms were mailed to all 142 workers in the two rehabilitation groups. For the compromise and release group, every second case was selected out of a total of 1000 cases. Surveys were mailed to 468 injured workers in this group. Thus, the total number of workers surveyed for the three groups was 610. This represents an adequate cross section of the entire universe.

Response to the Survey

Due to time constraints and problems experienced in obtaining correct addresses, the survey has not been completed. Of the 610 survey forms sent out, 180 (30%) were returned as undeliverable as the worker was either unkown at the address, or the forward had expired. Of the remaining 430 surveys, 65 (15%) have been completed and returned. In the next two weeks, telephone surveys will be conducted to complete the sample of respondants.

Preliminary Results

Of the 65 workers who responded, 26 had received rehabilitation services. In evaluating how helpful rehabilitation was in returning them to work, 14 respondant stated "very helpful", 7 chose "not helpful" and 5 chose something in between. As more surveys are returned, the responses will be correlated with the source of referral. Of the 26 rehabilitation respondents, 12 were referred to rehabilitation by a source other than the choices given in the survey. This "other" source was the doctor and 8 of these 12 found rehabilitation was "very helpful" in returning them to work. However, until more responses are received, no hard and fast conclusions or inferences can be made with any degree of validity.

Responses to questions on income from employment only, are more complete. Virtually all the workers had been injured well over two years ago. Yet in 1980, 52% of the 65 workers had incomes under $12,000. In 1981, 55% of the 65 respondants reported incomes under $12,000. For the remaining group, in 1980, only 10 respondants had incomes over $25,000, while that number rose to 15 in 1981. These figures support the beliefs of those in the workers' compensation community regarding the fate of injured workers. Unless positive steps are

taken quickly to return them to the work place, injured workers can get stuck at a level of income far below that held at the time of injury. However, due to the small percent of survey response received to date, definitive conclusions cannot be made.

The survey does allow a look at income in another way. Of the 65 respondants, 31 were employed at the time they received the survey. A comparison of pre-injury and post-injury average weekly wage (AWW) for this group shows that 12 respondants had an AWW in the same income bracket as before injury, 15 had weekly wages in a higher bracket than before injury, while only 3 had an AWW which fell into a lower bracket than before injury. These figures support another commonly held belief in the compensation system. For workers who timely return to the work place, upward, economic mobility is possible. Responses which evaluate physical demands of current jobs add another diminsion regarding employability of injured workers. Desptie the fact that 27 of the 31 employed respondants are working for wage at or above their pre-injured weekly wage, 16 or over half the group, are in positions that required less physical demand than their pre-injure jobs. In other words, an injury which results in physical limitations need not result in limiting the personal and economic achievement, afforded by productive employment.

ZEE PAMPLIN JACKSON
Rehabilitation Consultant

December 11, 1981

The Alaska State Legislature has funded a study of rehabilitation and retraining for injured workers in the state. The goal is to develop more efficient and constructive rehabilitation and retraining services in Alaska so that injured workers can receive the best help possible during their period of disability. Part of this study will compare the post-injury experience of people who have gone through rehabilitation and retraining, with the post-injury experience of people who have signed compromise and release agreements.

As someone who has signed a compromise and release agreement, you can provide useful information for the study. If you would fill out the brief enclosed questionnaire and return it in the postage paid envelope, I would greatly appreciate it.

I want to emphasize that any information you provide will remain strictly confidential. This study is in no way connected with any benefits you may have received in the past, or might received in the future. If you have any questions, please call me collect at (907) 264-2460 from 8:00 a.m. to 4:30 p.m. Alaska Standard Time.

Your help in this project could make a difference in getting better and more effective laws passed for the protection of injured workers. Thank you for your time and cooperation in returning the questionnaire as quickly as possible.

Sincerely,

Zee Jackson
Rehabilitation Consultant

WORKERS' COMPENSATION VOCATIONAL REHABILITATION SURVEY

1. When were you injured? MONTH _____ YEAR _____

2. Since your injury, have you received any rehabilitation services?

YES ☐ IF YES, ANSWER THESE QUESTIONS NEXT →

NO ☐

IF NO, CONTINUE WITH QUESTION #3

2a. Who referred you to the rehabilitation services?

Insurance Carrier ☐ Employer ☐

Division of Workers Comp. ☐

Attorney ☐ Other ☐

2b. How helpful was the rehabilitation service in returning you to work?

Very helpful ☐ Helpful ☐

A little helpful ☐ Not helpful ☐

NOW GO TO QUESTION #3

3. How long were you unable to work because of your injury?

Less than 1 month ☐ 1-3 months ☐ 4-6 months ☐ 7-12 months ☐
Over 1 year ☐

4. Are you currently employed?

YES ☐ IF YES, ANSWER THESE QUESTIONS NEXT →

NO ☐

4a. What is your usual gross weekly income?

Under $200 ☐ 100-299 ☐ 300-499 ☐ 500-800 ☐
Over 800 ☐

4b. How long have you been at your present job?

Under 1 month ☐ 1-3 months ☐ 4-6 months ☐
7-12 months ☐ Over 1 year ☐

4c. Are the physical demands of your current job
greater than ☐ less than ☐
the same as ☐
your pre-injury job? ☐

4d. Is this a seasonal job?
Yes ☐ No ☐ Other (Explain)

NOW GO TO QUESTION #5

4e. Is your work injury preventing you from working?

YES ☐ NO

5. Approximately what was your gross income from employment in 1980?

Under $12,000 ☐ 12-18,000 ☐ 18,001-25,000 ☐
25-35,000 ☐ 35,000 or over ☐

6. Approximately what do you expect to earn from employment only in 1981?

Under $12,000 ☐ 12-18,000 ☐ 18,001-25,000 ☐
25,000-35,000 ☐ 35,000 or over ☐

January 27, 1982

INTRODUCTION

The purpose of this document is to analyze the major areas of concern within the Alaska workers' compensation system. The items discussed were chosen because of their economic significance, and in some instances because of existing controversies as to their proper role in the compensation system. Although many issues remain for additional discussion, those contained in this report represent the critical questions which must be resolved in order to develop an appropriate legislative response to the current workers' compensation controversy.

THE BUNKHOUSE RULE

The major criteria for determining the compensability of an accidental injury is whether it arose out of and in the course of the employment (AOE/COE). This phrase is contained in the Alaska Workers' Compensation Act as well as 48 others. Obviously this test must be interpreted in those instances in which compensability is disputed, and as a result, there is a huge volume of case decisions from across the country, providing additional and more specific guidelines for determining when the AOE/COE test has been met. Since the Alaska Workers' Compensation Act is relatively new, it did not go through the developmental period in which these rules were structured, and simply adopted existing guidelines, in many cases selecting the most far-reaching of available options. The bunkhouse rule is one of these guidelines.

Normally an injury must occur during the hours of employment and be caused by some incident of the work to meet the AOE/COE test. However, years ago the courts determined that when a worker is required to live away from home, particularly for extended periods of time, the test should be broader. This gave rise to the bunkhouse rule. The rule has many variations, all of which to one extent or another make the point that under these circumstances, injuries outside of normal working hours can still be deemed compensable, since the requirements of the job "forced" the employee to be in the circumstances which led to the injury. Despite some very unusual results, the bunkhouse rule has never been considered enough of a threat to the integrity of the workers' compensation system in any state to justify legislative intervention. In Alaska, due to the large number of remote work sites, the relatively high number of bunkhouse rule cases and the cost of even a minor injury, some question has been raised as to the continued application of the rule in its present form. However, any attempt at statutory modification of the rule should be undertaken with caution and something less than extreme optimism, because new language means new court tests, with unpredictable results. It may well be the fear of the unknown that has led other states to accept the certainty of existing case law rather than embark on the uncertain path of legislative action and subsequent court decisions.

A major consideration is whether the magnitude of the problem is worth the legislative effort. To date it appears that bunkhouse cases, at least those that raise questions about their propriety, do not constitute a significant expense when compared to the compensation system as a whole. However, they may very well constitute a significant portion of compensation expense for a number of employers.

Another consideration is the implications of modification of the rule. Assuming that a legitimate injury occurs at a remote site, but is not compensable due to the operation of a modified bunkhouse rule, the injured party will almost certainly incur considerable expense in returning to an area where medical treatment is available. There are a number of obvious solutions to this problem, but it cannot be ignored. One should also consider the impact on employers of a modification of the bunkhouse rule. The obligation to provide workers' compensation coverage grants the employer immunity from civil action by an employee only when an injury is compensable. A significant narrowing of the bunkhouse rule will increase the possibility of civil suits, which tend to be more expensive than workers' compensation cases. Given the standards which presently govern the question of liability in civil cases, many "minor" compensation cases could become "major" civil cases. Even the lowly broken tooth suffered during mealtime could find its way to the courts, if caused by a foreign or improper object in the employee's food.

A final consideration is a virtually unverifiable opinion expressed by a number of individuals familiar with the problem that most "abuses" of the bunkhouse rule result from a desire to return to civilization for various purposes and that any solution other than a better leave policy on the part of employers will simply lead to either "abuses" of the new rule or the development of other, equally expensive ways of getting back home.

The list of alternatives is practically endless. The following is a limited range of alternatives all of which can be modified and combined with others to reach the desired conclusion.

1. Limit compensable injuries at remote sites to accidents occurring during actual working hours.

2. Limit compensable injuries to those accidents occurring on the premises of the camp, regardless of the hour of occurrence or the activity engaged in.

3. Limit compensable injuries to those accidents occurring during working hours and those resulting from a special hazard directly related to the conditions of remote site living, such as a fire or weather related incident.

4. Eliminate from the range of compensable accidents those resulting from personal activities such as eating, and/or recreational activities.

A number of concerns have been expressed, primarily by those on the employer/carrier side, over the impact on costs of the current physician selection mechanism, which leaves the choice of treating physician to the employee. On its face this is a totally appropriate method, but there are a number of competing interests which at least deserve consideration. A factor weighing most heavily in favor of employee choice, a method used by approximately half the states, is that it is the employee who is being treated, and who should be given the opportunity to select physicians he trusts. On the other hand it is the employer who is paying the bills, which leads to legitimate concerns over paying for doctors who may not be the best available, or whose primary reason for selection may be a willingness to give a high disability rating, which in turn may lead to increased compensation benefits. Obviously the employee may have reason to be equally as concerned about an employer/carrier choosing a physician primarily on the basis of a willingness to testify "properly."

Perhaps the most effective solution to this dilemma lies with the Board. Given the small number of health care providers in Alaska, the Board should be well aware of the abilities of each. If a party feels improper treatment is being provided, an expedited hearing will give the Board the opportunity to order a change in treating physician, if necessary. If a physician is consistently one-sided in his testimony, the Board should be able to take this factor into consideration in reaching decisions on questions such as causation and extent of disability. The only potential problem here is with the appellate courts, which in their decisions tend to limit the Board's authority to accept or reject testimony based upon evaluation of a witness's credibility. If the Board is to be encouraged to take steps to minimize problems in medical care, it may be necessary to provide specific legislative direction to the courts, to insure that the Board's authority is not diluted.

The use of physicians in contested cases simply because of their extreme views can also be limited by encouraging the Board to select impartial examining physicians to help resolve medical disputes, and by explicitly relying on experts in whom the Board has a high degree of faith. Once again some legislative direction may have to be given to the courts to permit the Board to accept such testimony in appropriate cases rather than that presented by the litigants. This type of action can send a message to litigants that it does not pay to use medical testimony from witnesses who are biased, and can also result in a moderation of positions taken by medical experts.

In conjunction with the foregoing, there are a number of methods of physician selection in use in various states which can be considered.

1. Pure employee selection, as presently exists in Alaska.

2. Pure employer/carrier selection, tempered by the ability of the employee to apply to the Board on an expedited basis for change.

3. Initial employee selection for a limited period of time, such as ten days, with the employer having the right to change at the end of the period.

4. Initial employer/carrier selection for a limited period, with the employee having the right to change at the end of the period.

5. Employee selection from a panel selected by the employer/carrier.

6 Employer/carrier or employee selection from a panel designated by the Board. This typically involves initial inclusion of all practitioners in the state, with removal from the panel by the Board for cause.

SECOND INJURY FUND

The sole purpose of a second injury fund is to encourage the employment of physically impaired persons, or perhaps more accurately, to minimize the disincentives to their employment. A simple example will clearly explain the theory behind the operation of second injury funds. If an employer hires a worker with no physical impairment, who then loses an eye in a compensable accident, the compensation payable in Alaska for that loss will be for a period of 140 weeks. However, if that individual had suffered the loss of one eye prior to employment, the result of loss of the remaining eye would be permanent total disability, with benefit payments continuing for life rather than 140 weeks. In order to eliminate this financial disincentive to hiring, the Second Injury Fund, as it is used in Alaska, would pay all compensation payments subsequent to the first 104 weeks of disability.

Unfortunately, attempts have been made, sometimes successfully, to use funds as tools to reduce an employer/carrier's liability after the fact, when the preexisting impairment was questionable, or the employer's knowledge of its existence doubtful. This type of improper fund use typically leads to stringent controls which in turn lead employers to question whether the fund will work in their favor even when they act properly. In the face of such uncertainty, it is doubtful that even the best intentioned employer will rely on a fund and consider its benefits when contemplating the hiring of a physically impaired worker. Alaska has suffered from this syndrome and now appears to be in the phase which makes it more difficult to obtain reimbursement from its Second Injury Fund.

If the Second Injury Fund is to serve its purpose, two elements must exist. First, benefits from the Fund must flow only to those employers who hire or retain in employment individuals with significant permanent impairments which would otherwise be an obstacle to employment. Secondly, employers must at the time of hiring be as secure as possible in the knowledge that should an injury occur they will be financially protected by the Fund. Presently, uncertainty exists in Alaska as to both elements, and as a result there is considerable doubt as to whether the existence of the Fund provides much incentive for hiring physically impaired workers.

A relatively simple change in procedure may provide the certainty needed in both areas to make the Fund an effective tool. In order to establish knowledge of the impairment at the time of hiring, the employer of a permanently impaired worker could be required to file a simple form with the Fund, settling that question without a doubt, and precluding "after the fact" attempts to prove the requisite knowledge at the time of hiring. To simplify the filing process, each individual who sustained a permanent impairment in a compensable accident could, when ready to reenter the job market, be given a simple two-part form to present to prospective employers. The form would educate the employer as to the protection offered him by the Fund and would also provide the documentation of employment to be forwarded to the Fund. In such cases the employer would be guaranteed the protection of the Fund, should a subsequent injury occur, and would thus be given the incentive to hire. If necessary, a similar mechanism could be used to provide documentation for employees whose injuries would qualify them for Fund protection in the future but were not the result of a compensable accident.

AVERAGE WEEKLY WAGE

For a number of reasons related primarily to the pipeline, Alaska uses a method of computing average weekly wage which is different than those used in the other 49 states. In determining average weekly wage, and in turn the weekly benefit, the injured employee is permitted to pick the calendar year out of the three calendar years immediately preceding the injury in which total wages were the highest, and then divide by 52 to arrive at an average weekly wage. In some cases, this can result in unfairness to one side or the other. For example, an employer with an injured worker may find himself paying weekly benefits in excess of actual wages because of a high paying job with another employer three years prior to the accident. Similarly, an employee with a new but permanent high paying job may find his weekly benefit a small fraction of wages being earned at the time of injury, because of low earnings in the prior three years. Even for those with consistent annual earnings the rule can work a hardship. For example, a worker in extremely seasonal employment who earns a substantial income while working half the year, and nothing the remainder of the year, will have his earnings based upon a 52 week average. If he is injured and is totally disabled during a portion of the season his actual income loss will be twice as high as the average weekly wage on which the benefit is based.

Due to the impact of seasonality, no solution which is even remotely equitable for all concerned can be found unless the various segments of the benefit system, such as temporary total disability and permanent partial disability, are dealt with separately. Therefore, most of the average weekly wage question will be dealt with in those sections of the report which deal with benefits.

There is one aspect of average weekly wage which can be considered independently of benefits. That is, what elements of remuneration should be considered in determining the amount of pre-injury earnings. In Alaska the major concerns in this category are room and board, and fringe benefits. Conceptually, room and board are to be considered as part of average weekly wage only to the extent that they reduce the amount an employee would have expended for these items if he was not working. For example, with regard to room, if an employee is away from home for a few days, and the employer provides living facilities, there is no reason for the value of the facility to be included in average weekly wage computations. This is because the employee was still paying for his own home or rental while away, and did not experience an increase in net income because of the employer's payments. In the case of the worker who may be at a remote site for many months, and live in a facility provided by the employer, resolution of the question is not so simple. Theoretically, the value of living facilities should be included in the wage calculation only if the employee does not maintain another residence while at the remote site, since if he continued to make mortgage or rent payments at home, there would be no net economic benefit derived from living at the employer's facility. Whether a dual system of this type is acceptable, with employees being treated somewhat differently based upon their living arrangements at home, is a matter that is of purely legislative concern, with each of the alternatives somewhat arbitrary in its application.

The question of board is much easier to deal with, at least as to the initial determination as to whether it should be included in the weekly wage at all. Since a meal provided by the employer means a meal that the employee does not have to pay for, the provision of board will always result in a net economic benefit to the employee, and thereby justifies its inclusion in the wage computation. The value of the meal, as well as the value of living facilities, is another matter.

If it is an accurate assumption that room and board cost more to provide on the North Slope than in Anchorage, the valuation of these items presents a real question. Once again on a conceptual basis, the value to the employee is not what it costs the employer to provide room and board, but rather the amount of net economic to the employee. This requires valuation on the basis of how much would have been spent for these items had the employee remained at home. Obviously theory is of little help in this instance, since applying as esoteric an economic theory as this would create an administrative nightmare. Unless the legislature is willing to leave the question of valuation to contractual agreement or litigation on a case by case basis, legislative action is required. The most efficient mechanism may be to give the Board rule making authority to establish room and board values on a statewide or regional basis, to be included in the average weekly wage computation in appropriate cases. This authority provides a great deal of flexibility, in that changes in economic conditions can be quickly reflected in the rules, and adjustments made without the need for additional legislative or court action.

A much more difficult question is how to treat fringe benefits such as hospitalization insurance and employer-funded pension plans. At the present time, almost by practice rather than case decision, these items are not included in the computation of average weekly wage in Alaska. This occurs despite the fact that a reasonable argument can be made for the proposition that the statute is broad enough to permit their inclusion. The issue is of more than academic interest. If at some point a court holds that fringe benefits must be included in the wage computation, many open cases from past years will be entitled to have the weekly benefit increased retroactively, which would result in an enormous economic impact on employers and carriers. This is in addition to the financial impact such a ruling would have on new cases, particularly in view of the high level of fringes in some employments.

From the standpoint of the worker, fringes which are not continued after injury represent an economic loss, and therefore, a basis exists for the inclusion of their value in weekly wage computation. From the standpoint of the compensation system, their inclusion creates administrative problems (which are not entirely insurmountable) and more importantly would provide most workers with weekly compensation benefits substantially in excess of their take home pay, a situation which may be considered something less than optimum in view of the disincentives which it creates. The arguments on both sides are endless, and if the legislature decides to deal with this question it will hear each and every one. Suffice it to say that virtually every other state has avoided including this type of fringe benefit in the wage computation, except on an isolated basis, and Alaska has managed to operate its compensation system without their inclusion. Unless the state is willing to take on the economic and social problems which would be created by fringe benefit inclusion, the legislature should act to clarify the law and avoid the potential for court decision.

TEMPORARY TOTAL DISABILITY

The purpose of temporary total disability benefits is quite simple. They are intended to replace lost income during the time that the injured worker is recovering and unable to return to work. In most states this is also the easiest type of loss to deal with, by simply replacing a portion of the income lost during the period of total disability, with duration measured primarily from a medical standpoint. However, the impact of seasonality on a substantial portion of the Alaska work force creates a situation which cannot be dealt with by traditional means. Therefore, the following analysis and proposed solution may very well be viewed as radical within the context of existing workers' compensation systems. It may also be the only way to establish equity for those receiving and those paying temporary total disability benefits in Alaska.

As previously discussed, the "best of three" method for determining average weekly wage, and thereby temporary total disability benefits, creates problems for all concerned. If one accepts the proposition that temporary total disability benefits are intended to replace lost income during the period of recovery, then the wage basis used to compute these benefits must reflect the income which would have been earned during this period, rather than the level of income earned three years previously. This can be accomplished more accurately by applying the traditional average weekly wage formula used in a significant number of states. The period of comparision, rather than one of the preceding three years, would be the 13 weeks immediately prior to the injury. If the injured employee was not employed for substantially the whole of 13 weeks, the wages of a similar employee who was so employed are used, and if no similar worker is available, then the average weekly wage would be based upon the contemplated full-time wages of the injured worker. Since workers in seasonal employment tend to be highly paid, use of this mechanism may also require an increase in the maximum weekly benefit, so that the higher paid worker is not deprived of adequate income replacement due to the application of an inappropriate weekly maximum.

Of course there is another side to the coin. For the seasonal worker, this level of income replacement is only proper during the period of time that income would actually have been earned. To take the extreme case, is it correct to provide temporary total disability benefits when the injury occurs on the last day of the job, and recovery takes place during a period of time when the employee would have been receiving unemployment benefits? If the answer is no, then temporary total disability benefits in Alaska should be more closely matched to periods of gainful employment, rather than merely relying on the employee's physical condition, with unemployment benefits replacing workers' compensation benefits during what normally would be a period of unemployment. Obviously this method creates new opportunities for litigation, which may make it unacceptable. The only way to determine if the cure is worth the price is through an open discussion involving those primarily concerned, employees and employers. The answer depends upon the extent to which employees are currently being deprived of proper benefits due to the operation of the existing law, the extent to which employers are currently paying what may be considered excessive benefits during periods of seasonal unemployment, and the difficulties which will have to be overcome if "income matching" is to be accomplished in a significant number of cases.

PERMANENT PARTIAL DISABILITY

In every workers' compensation system the most expensive element, and the most controversial, is that of permanent partial disability benefits. Much can and has been written about the history, development and philosophy of permanent partial disability benefits, and some of it is quite interesting. However, what is necessary at this time is simply an understanding of the various benefit alternatives available for compensating permanent partial disability, a philosophical decision as to the reasons for which Alaska wishes to provide such benefits and, based upon that decision, the development of a mechanism and formula to distribute those benefits appropriately.

Permanent partial disability results when an individual is injured and having recovered to the greatest extent possible is left with a physical problem which did not exist prior to injury. If the condition is severe enough to totally destroy the individual's ability to obtain and retain gainful employment, the result is classified as permanent total disability. What we are concerned with here is that class of cases in which a permanent physical problem exists, but the ability to earn has not been totally destroyed. At this point there are three basic criteria which can be used to determine who is to receive permanent partial disability benefits, and in what amount.

The first theory is based upon permanent physical impairment, and is often referred to as the "whole man theory." Pursuant to this theory, the amount of benefits payable for permanency is determined on the basis of the degree of permanent physical impairment suffered, a purely medical determination, without reference to its effect upon the individual's life, employment or economic status. Assuming equal average weekly wages, a lawyer and a machinist who both suffered equally serious hand injuries would receive the same amount of money for their injuries, despite the probable difference in economic impact.

The second theory deals with loss of wage earning capacity, which takes into consideration not only the degree of physical injury, but also its probable impact on the ability of the individual to earn a living. This requires that in the event of a dispute, the fact finder must predict, usually quite soon after release from active medical care, what effect the injury will have on the individual's ability to compete in the open labor market. The test does not require any economic loss to occur and in fact, because the concern is with loss of capacity, a substantial award for partial loss of that capacity is in no way inconsistent with a factual situation in which the employee remains with the same employer and on the same job track until normal retirement, with no economic loss resulting from the injury. Typically, if this prediction, which usually takes the form of an award, proves wrong, nothing can be done to modify it in the absence of a change in the employee's actual physical condition.

The final alternative for paying permanent partial disability benefits is what is commonly known as the "wage loss" method. This system involves paying benefits based solely upon actual loss of income resulting from the effects of an injury, with the amount of the loss determined as it actually occurs, rather than on a "prediction" basis as would take place under the earning capacity loss theory described above.

Alaska follows a pattern used in well over half the states, with a few unique twists, starting with a combination of the impairment theory and the earning capacity loss theory. If a permanent injury is limited to any of the extremi-

ties (fingers, toes, hand, leg, etc.) or the eye or hearing, the amount of the benefit paid is based solely upon the physical impairment sustained, which in turn is based almost solely upon medical evaluation of the loss. The actual benefit calculation is accomplished by first determining the workers' weekly benefit rate, which is 66 2/3% of his average weekly wage, subject to a maximum of $942 per week. Sec. 23.30.190 of the Act is then consulted, which contains a schedule indicating the weeks of benefits, at the rate just described, for total loss or total loss of use of the particular bodily member involved. For example, total loss of an arm results in benefits being paid for 280 weeks, at the individual's weekly benefit rate. If the loss is less than total, the worker is paid benefits for the proportionate number of weeks. For example, a 50% loss of use of the arm would result in benefits paid for 50% of 280 weeks or 140 weeks. This method of benefit computation, known as "the schedule", is used to one extent or another in most states in the manner just described, but Alaska has complicated the picture to some extent by adding another limitation, that of a maximum dollar amount. For example, while the loss of an arm is theoretically 280 weeks of compensation, it is also subject to a dollar maximum of $43,680.00. This means that anyone whose weekly benefit is in excess of $156 (over 75% of injured Alaskan workers) will not receive the full 280 weeks provided initially by the statute. In fact, the average injured worker will only receive 136.5 weeks of compensation for total loss or loss of use of an arm. The same result holds true, within a few dollars and a few percentage points, for all of the other injuries covered by the schedule.

For those injuries not covered by the schedule, primarily back and head injuries, the benefit is based upon loss of wage-earning capacity, which is determined by computing the difference between earning capacity prior to injury and after injury, and replacing 66 2/3% of the difference, on a weekly basis. Theoretically these benefits are payable for life, but in reality are subject to a maximum dollar amount of $60,000.00. Although, as previously mentioned, earning capacity loss does not require actual loss of earnings, the Alaska statute does require that determination of the amount of loss in the first instance be accomplished by considering actual post injury earnings, but if actual earnings are found not to "fairly and reasonably" represent earning capacity, other factors can be considered, and an award made which is at variance with the actual economic loss sustained. Application of this "adjustment factor" varies from time to time, primarily due to changes in the philosophy of the Board, which must determine the degree of loss in contested cases. At the present time, the Board appears to place heavy reliance on actual earnings, and in many instances applies the law in a manner approaching that of a wage loss system, with benefits determined on a weekly basis as actual loss of income occurs.

Each of these methods contains a number of flaws, in both the amount of benefits which may be paid to an individual worker, and in the problems inherent in determining the amount to be paid. From the standpoint of getting the money to the people who need it, the impairment method is the weakest of the three. Historically, workers' compensation has placed major emphasis on paying benefits to replace economic loss, and since the schedule or impairment method does not consider economic loss at all, it misses the mark in most cases. Its primary justification is ease of application, since there is supposedly very little to argue about when determining the extent of physical impairment. However, it has been found that it is relatively easy to locate doctors who will be 20 to 30 percentage points apart when evaluating the same injury, and as a result use of a schedule does not guarantee an absence of litigation.

It is possible to minimize these shortcomings in two ways. First, if guidelines are adopted for the determination of the extent of impairment, such as those published by the American Medical Association, it is relatively easy to avoid significant disagreement among medical experts. Secondly, some degree of economic reality can be incorporated in the schedule as is done in California, by modifying the weeks to be paid in a number of ways. On the assumption that the economic impact of an injury increases geometrically, rather than proportionately as severity increases, the schedule can be "stepped" so that one week of benefits may be payable for each of the first 10 points of impairment (1-10% impairment), two weeks paid for each of the next 10 points, three weeks for each of the next 10, and so on. In this manner an individual with a 10% loss of use of the arm would receive 10 weeks of compensation and someone with a 20% loss would receive 30 weeks, reflecting an assumption, of limited validity, that the economic impact of a 20% loss is more than twice as severe as that from a 10% loss.

The weeks payable can also be modified to take into consideration other factors such as age, type of occupation (physical vs. sedentary), and amount of education, with a percentage increase or decrease in the rating depending upon the answers given to relevant questions contained in a rating formula. Obviously this significantly increases the liklihood of litigation, so that a price is paid for attempting to make the schedule more economically realistic.

Use of a schedule basis raises an interesting question as to the development of average weekly wage, particularly if an unmodified schedule based totally on physical impairment is used. Since economic impact is being ignored, there is no reason to tie the amount of benefit to average weekly wage. The fact that one worker makes more than another does not mean that his arm is also "worth" more, and in fact the opposite may be true. As a result, if an impairment schedule is used, the amount of benefits to be paid can be established legislatively as a specific dollar amount for each loss, to be paid in every case regardless of the individual's earnings.

Application of an earning capacity loss system also presents a number of problems, primarily on the operational side. From a philosophical standpoint, it more closely follows the basic workers' compensation premise of dealing with economic loss, although as previously described it is entirely possible to pay benefits for loss of capacity in cases in which no actual economic loss ever occurs. In fact, the few studies which have been undertaken tend to show that only a minority of cases demonstrated significant economic loss several years after injury, although in most of those cases the loss was significant.

Another finding from these studies demonstrates a more serious problem with earning capacity loss systems. For most of the cases with significant losses, the compensation paid was totally inadequate to deal with the economic loss incurred, while in the remaining cases the amount of compensation paid was far in excess of the loss. This resulted primarily from the fact that the award must by its very nature be a prediction, and an estimate, a task which is probably beyond the ability of mere mortals. There are simply too many variables determining the effect an injury may have on a given individual, and attempts to make the award fit the case are something less than accurate. Also inherent in this uncertainty is the need for lawyers and litigation in order to arrive at a "correct" decision. Since a determination of loss of earning capacity is strictly a judgment call, a claimant would be foolish to simply accept a determination made by the employer/carrier, and would be equally foolish to go before the Board without an attorney to present his case. Unfortunately there is little that can be done to eliminate these problems without virtually switching to another benefit system.

For purposes of determining loss of earning capacity, the computation of average weekly wage should simply reflect a realistic and established preinjury earning capacity. Since in this type of system we are not concerned with matching benefit payments with actual loss of income, it is possible and preferable to base the wage on average earnings for a recent but extended period of time, such as the previous twelve months. Given a willingness to accept the opportunity for additional litigation, the Board could be given the authority to modify the figure arrived at in this manner, if it can be established that because of extraordinary circumstances the figure is significantly high or low.

The third and final alternative is a wage loss system. In its purest form, it provides benefits only in the event of actual loss of income attributable to the injury. This immediately raises a question as to its fairness, since in the extreme case an individual who suffered a loss of limb but was able to return to full employment would receive nothing in the way of benefits for his injury. While this may not be inconsistent with historical workers' compensation philosophy, it does leave a great deal to be desired when applied in real life. This problem can be cured by paying an impairment award, preferably limited to serious injuries, regardless of any wage loss benefits which may also be due.

Another problem may result from comparing preinjury wages with inflated postinjury wages, an obvious inequity. This can be limited to a great extent by adjusting the comparison to take into consideration the change in wage rates through time, although given the experience under the Longshore Act, it is questionable whether an unlimited adjustment would be acceptable.

For Alaska, use of a wage loss system would raise two very significant questions. First, a wage loss system can only be successful, from a cost standpoint, if the great majority of workers can be returned to jobs which pay the same or almost the same as those held at the time of injury. If the frequently heard statement that "there is no light duty in Alaska" is true, adoption of a wage loss system would be an economic disaster. Similarly, if union rules are so strict that a worker with a permanent injury cannot be given preferential treatment in obtaining work within his capabilities, the ability to return people to gainful employment would be greatly reduced, and the benefits of a wage loss system eliminated.

Secondly, serious consideration must be given to the system's ability to determine when an income loss is "due to the injury" rather than some other factor, such as the end of the season. As in the case of temporary total disability, use of a wage loss system depends on matching benefit payments with actual economic loss, so that factors such as end of season, a return to a state with lower wage levels, and an individual's desire to reduce his workweek must all be taken into consideration in determining wage loss. If this cannot be accomplished with a fair degree of accuracy, the system would be a total disaster.

While research is continuing in an attempt to determine the ability of Alaska employers to return injured individuals to the workplace, in the final analysis a decision on these potential problems can only be reached by joint labor/management discussions. It is doubtful that anyone else can or should determine whether this type of system can be used effectively in Alaska and without their concurrence an attempt to implement a wage loss system would probably result in economic disaster.

If a wage loss system is adopted, the computation of average weekly wage would closely follow that recommended for temporary total disability. The wage base should reflect the weekly wages actually earned during the period of employment, whether it be six months or a year, so that the comparison of pre- and post-injury wages will reflect the actual loss incurred. Therefore, a 13 week average, or something in that range, would be appropriate, with the safeguards described in the temporary total disability section.

PERMANENT TOTAL DISABILITY

Statistically, permanent total disability benefits do not constitute a significant proportion of the overall cost of workers' compensation in Alaska, although the state does rank sixth nationally in frequency of permanent total cases. This does not mean that permanent total disability does not significantly impact on the compensation system. Its importance is hidden to a great extent, because its effects are felt in the area of permanent partial disability benefits. This is due to the threat of a case becoming a permanent total, with lifetime benefits and no dollar maximum, which results in cases being settled at levels approaching their maximum permanent partial disability value, $60,000.00, instead of being litigated, and possibly resulting in a finding of total disability.

As mentioned previously, permanent total disability occurs in those circumstances in which the injury is so severe as to totally destroy, for all practical purposes, the ability of an injured worker to obtain anything other than intermittent and financially insignificant employment. In cases in which the physical injury is severe, there is usually no question as to the individual's entitlement to total disability benefits. However, of concern to the Alaska compensation system is the worker who retains relatively substantial physical abilities, but claims to be or is actually unable to work because of the limited job opportunities in the area. For example, should an injured worker who cannot find employment in Eagle, where he lives, have his workers' compensation status determined on the basis of Eagle alone, or should the availability of suitable employment in other parts of the state be considered? And if there is no suitable employment in Alaska for someone injured shortly after moving to the state, or who has indicated in some manner that working in Alaska is temporary rather than permanent, should employment opportunities in the lower 48 be considered? Again there is no correct answer, only issues that are appropriate for legislative decision on a policy basis.

At the present time the statutory provision dealing with permanent total disability, Sec. 23.30.180, provides virtually no indication of the factors to be considered in determining total disability status. This is left to the courts, and results in a great deal of uncertainty as to the possible outcome of individual cases. Although no statute can eliminate the potential for court involvement, the legislature can create a great deal more certainty by enacting amendments to Sec. 23.30.180 which provide clear policy guidelines to those who must apply the law.

HOUSE LABOR AND COMMERCE COMMITTEE

FINAL INTERIM REPORT

December 17, 1981

The House Labor and Commerce Committee has completed its interim work. Most of the Committee's priority legislation is being drafted or redrafted and will be ready for further consideration early in the second session of the 12th Alaska Legislature.

Public participation during hearings in Anchorage and Fairbanks was excellent, particularly with regard to the Committee's three primarly areas of concern -- workers' compensation, statewide telecommunications and government permits.

Additionally, Chairman Terry Martin has reviewed some 30 pieces of legislation lodged in the Committee but which were not addressed in any detail during the interim. Chairman Martin is organizing these bills and resolutions by priority so they can be expedited early next session.

A status report of interim activities is as follows:

WORKERS' COMPENSATION

Tom Sofo of the legislative legal services arm currently is preparing the final redraft of House Bill 159 dealing with revision of state workers' compensation law.

The redraft will be ready for further Committee consideration early next session.

As the Committee's top priority during the interim, much time has been spent collecting public testimony from various concerns in an effort to reach consensus on resolving this lingering problem. The Committee has explored a multitude of proposals to reduce the escalating premium rates.

While the final interim bill will address various broad concerns of the Committee, specifics regarding insurance rates and self-insurance programs will be incorporated in a separate bill shortly after the start of the second session.

The Committee feels it must await results of an in-depth study being conducted by John Lewis of Florida, a workers' compensation expert on contract with the state Division of Workers' Compensation. Mr. Lewis's findings are necessary before revision of the complicated rate structure can be addressed in any detail.

However, the final interim redraft of House Bill 159 attempts to adjust the law in ways the Committee feels will help reduce the extremely high insurance premiums Alaska businesses pay out for workers' compensation.

For one, a significant reduction in premium rates can be assured through immediate response to the needs of employees injured on the job, so that these injured workers can be returned to the labor force in the shortest period of time.

This objective can be attained, in part, by requiring injured workers expected to be on workers compensation more than 90 days to be referred to rehabilitation or pain clinics within 30 days of injury. Public testimony from experts in the field reported that months and even years pass before an injured worker is referred to a clinic. Obviously, the quicker an injured worker is rehabilitated, the quicker he can be returned to the work force. This means less compensation is paid out which, in effect, would affect the rate structure.

In regard to workers' compensation-job training and placement programs, the cost, in many cases, should be borne by the appropriate agencies such as CETA, WIN, or other government sponsored groups directly responsible for an

employee injured while on the job.

Higher educational career training, skill centers and other post secondary educational opportunities such as college should be funded through a special state grant program.

It must be emphasized that retraining costs, when figured into insurance premiums borne by the employer, is ultimately passed on to the consumer. It is the consumer who picks up the tab for the increased cost of goods and services.

Following a recent meeting with the state Workers' Compensation Board, the Committee feels the Board must be given more authority in making final determination of workers' compensation cases, in order to avoid long and costly legal fights -- all of which is reflected in the rate structure.

A goal of six months from the time of injury to settlement will result in almost no need for expensive attorney and court fees. It is felt that a decrease of 50 percent in the time spent on litigation of cases could be attained if the law were more clear on the Board's authority. The Committee feels that the Board -- comprised of lay experts in the field --deals fairly with claimants and injured workers and give them every opportunity to air their grievances.

The Committee also feels that workers' compensation premiums could be further reduced in cases where an injured worker carries health insurance, or other insurance policies that cover personal injury.

The redraft of House Bill 159 also addresses the need to tighten up the so-called "Bunkhouse Rule," which essentially holds an employer responsible for an employee's safety when he is working more than 25 miles from his home.

While the Committee recognizes the right of workers to be protected when away from home, particularly in Alaska's remote regions, it also finds abuses in the system, especially during leisure-time activities and accidents caused by intoxication.

The Committee is of the opinion that an intoxicated or drugged worker who is injured is responsible for his actions and should not be entitled to collect workers' compensation benefits. Likewise, workers who become ill or contract social diseases due to intimate sexual activities away from home should not become the responsibility of the employer.

Likewise, if a worker is injured while racing motorcycles or playing sports during his leisure hours, it is highly questionable whether the employer should be responsible for his injury, particularly when other insurance programs carried by the worker may cover the injury.

The Committee also desires a clear and concise definition of the terms "benefit" and "compensation" as they appear in House Bill 159. In either case, the term should relate only to a worker's take-home pay and medical treatment. Workers' compensation was never meant to be an open-ended benefit system. The terms "compensation" and "benefit" appear so regularly throughout House Bill 159 that anything less than a concise definition will lead to misunderstanding and confusion.

GOVERNMENT PERMITS

The Committee has placed the redraft of Senate Bill 84 on hold until the beginning of the second session.

Testimony collected during the interim shows conclusively a real need for streamlining the government permitting process. However, it is equally clear that opinion on how to accomplish this goal varies widely.

On the one hand, the Alaska Oil and Gas Association (AOGA) and its membership believes Senate Bill 84 (Second Rules) does not go far enough in facilitating

the procedure for gas and oil permits. The association would like a stronger "lead agency" clause in Senate Bill 84 and a softening of language in the bill that guarantees "any individual, irrespective of his 'standing'otherwise granted under the law, to appeal a permitting decision, and further delay resolution of the application," according to the association.

On the other hand, environmental groups -- particularly Trustees for Alaska -- feel Senate Bill 84 and proposed administrative regulations do not adequately protect local community interest in the permitting procedure.

In the middle is the state Department of Law which, under direction of the Governor, has drafted new regulations governing classification of permits -- the reported purpose being to streamline the system.

Although the Committee feels there is strong support in both the House and Senate to clean up the system, it doesn't want to work hard to pass legislation only to have it vetoed by the Governor. This is why the Committee believes participation by the administration in this legislation is vital.

The Governor's chief executive, Jerry Reinwand, feels legislative participation in this issue is important and has reportedly held up implementing regulations until after the negotiation process. That process is underway, and hopefully an accord can be reached prior to the session.

STATEWIDE TELECOMMUNICATIONS

Legal services is currently drafting a House Concurrent Resolution that will spell out what the Committee feels should be the legislative policy regarding statewide telecommunications. The resolution will be sponsored by the House Labor and Commerce Committee.

The resolution is being drafted along the following lines:

-- Whereas a significant and increasing amount of public funds is being invested in telecommunications systems; and

-- Whereas it should be the role of state government to encourage and not compete with the private sector; and

-- Whereas the private sector which deals in Alaska telecommunications faces a crowding out by government in the wake of increasing state wealth; and

-- Whereas the private sector has been the foundation and vitality of the American Democratic and economic system; and

-- Whereas the Alaska State Legislature lacks a policy regarding the burgeoning telecommunications system;

Be it resolved that the Alaska State Legislature should take the following into account to serve as guidelines when considering telecommunications appropriations:

-- When and where possible, the state Divisions of Telecommunications should procure services from private enterprise or certified and franchised utilities and contract for the construction, management, operation and maintenance of telecommunications systems.

-- When and where possible, the state Divisions of Telecommunications should reduce or eliminate airwave interference of state owned or f[illegible]ced stations with privately owned and operated cable television stations.

-- Artificial regulatory and government barriers for growth and development of new and innovative services by the private sector should be removed.

-- In-state programming or Bush programming can be beneficial to sectors of the Alaskan community. However, the Divisions of Telecommunications should not only assure that such programs are cost effective, but production of these

programs should be available to the private sector on a contract or bid basis.

-- Alaska's villages should have the opportunity to own, operate and maintain their own satellite earth stations.

-- Companies owned and operated by Alaska residents and based in Alaska should be given a competitive edge over Outside interests.

-- No commercial advertisements shall be carried in state funded or state subsidized programs or in programs transmitted by state funded or state subsidized satellite channels.

-- The Legislature should encourage commercial radio and television news coverage of the legislative sessions by making equipment, space and satellite time available to the private sector. This would serve as a meaningful and efficient and non-controversial method of communicating legislative affairs to the public.

ARCHITECTURAL AND ENGINEERING SERVICES

House Bill 612, which relates to contracts for architectural, engineering and surveying services, has been redrafted and is ready for further Committee consideration upon convening of the legislative session.

House Bill 612 clarifies the conditions under which a state contract for professional services can be awarded. It requires the state and other subdivisions of the state to determine whether a bidding firm is "capable and qualified" to do the work, rather than issuing a contract strictly based on the lowest bid. A person who provides such professional services may annually submit to the department a statement of qualifications and performance data.

House Bill 600, which lays out contractual liability of architects, engineers, surveyors and the state of Alaska, is currently in a holding pattern until an equitable formula for liability can be worked out. A final redraft of House Bill 600 is expected prior to the beginning of the session.

COMPULSORY AUTOMOBILE INSURANCE

The Committee recommends the sponsors of House Bill 346 pursue other avenues to increase the number of insured drivers.

House Bill 346 has received little support during hearings held in Anchorage and Fairbanks during the interim.

It is generally felt that compulsory automobile insurance will not attain its primary goal -- to increase the number of insured drivers in Alaska. In fact, it is counter productive in that it is thought to be unenforceable and actually may result in higher insurance rates for the already insured driver. This is because the high risk factor of those who are generally uninsured under the current situation would be spread among drivers who already are insured.

The Committee understands that sponsors of the bill are currently exploring other alternatives including stronger state financial responsibility laws.

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
January 27, 1982
1:36 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Randolph

Members Absent: Rep. Rogers
Rep. Gardiner

COMMITTEE CALENDAR

HB 159 — An Act relating to workers' compensation; and providing for an effective date.

WITNESS REGISTER

Ed Holden
North American Rehabilitation
100 E 46th
New York, New York
Position Statement: Presented film regarding rehabilitation.

Zee Jackson
Rehabilitation Consultant
PO Box 3130
Anchorage, Alaska 99510
264-2460
Position Statement: Summary of presentation (1/26) of her study.

John Lewis
Workers Compensation Consultant
PO Box 330550
Miami, Florida 33133
(305) 443-8111
Position Statement: Presented interim report on Alaska Workers Compensation System.

PREVIOUS ACTION

HB 159 — No previous action. No action taken this date.

Statutory Reference: AS 18.80; AS 23.30.

ACTION NARRATIVE

Tape #006

Recording
Number 0081

The meeting was called to order by Chairman Martin at 1:36 p.m. Members present were Representatives Martin, Bylsma, and Randolph. Members absent were Representatives Gardiner and Rogers. This meeting was a joint meeting with the Senate Labor & Commerce Committee. Senate Committee members present were: Senators Fahrenkamp, Mulcahy, and Ziegler. Rep. Martin outlined the meeting.

Number 0109

Ed Holden, of North American Rehabilitation, New York, spoke about a man who became paraplegic and then decided to make a film about rehabilitating disabled people. Holden gave an introduction to the film, and then showed it to the committee. The film was about dealing with a disability. A bookle. that accompanied the film is available from the House Labor & Commerce Committee.

Number 0546

Zee Jackson, Rehabilitation Consultant, Anchorage, gave a summary of her previous day's presentation. She outlined problems with the system, and recommendations for correcting those problems.

Number 0587

John Lewis, Worker. Compensation Consultant, Miami, Florida, presented a report the defines critical areas. Lewis said Alaska must look at problems, decide philosophy, determine feasibility, and construct legislation. He said philosophy is an integral part of workers compensation, and that the legislature must determine the state's philosophy.

Number 0645

Lewis spoke about the "bunkhouse rule", which is the court's test of whether an injury is job-related. He said courts have decided that, if people are forced to live away from home at a remote site, broader concepts apply. Lewis said Alaska has the broadest rules of any state. He went over factors the legislature should consider regarding the bunkhouse rule.

Number 0732

Lewis said options are: 1) to limit compensable injuries to working hours; 2) to limit compensable injuries to on the premises; 3) to limit compensable injuries to working hours and the special hazards of

remote living; and, 4) to limit compensable injuries to everything except those injuries resulting from personal activities.

Number 0780

Lewis went over problems regarding medical benefits. He gave the pros and cons of various methods of doctor selection, and stated that alternatives are: 1) employee selection; 2) employer selection; 3) employer selects doctor; after 10 days, employee can switch; 4) employee selects doctor; after 10 days, employer can switch; 5) permit employer to pick from a panel of doctors selected by the insurer; and 6) Board establishes panel for workers compensation cases in Alaska and retains authority to remove people from the panel.

Number 0823

Lewis said the Second Injury Fund was set up to provide employers incentive (and to avoid disincentives) to hire physically impaired people. He said the fund is sometimes abused and reimbursement becomes more difficult. He felt guidelines need to be established to ensure that employers hired employees with knowledge of the employee's impairment, and to convince the employers that they are protected from a workers compensation claim by the employee with a method such as giving the employer a form certifying the employee's impairment, and insuring protection from the fund.

Number 0870

Lewis then addressed average weekly wage. He said that, after the pipeline, this became higher in Alaska. Lewis said average weekly wage needs to be compared to the existing employment situation. Other concerns he noted were room and board value and fringe benefits. He recommended that the legislature clarify the law as to whether benefits are included in average weekly wage determination.

Number 0971

Lewis went over the various types of disabilities--temporary total disability, temporary partial disability, permanent partial disability, permanent total disability--and problems in determining the type of disability suffered by the injured employee. (See pages 9-15 of Lewis's report.)

Lewis recommended procedural changes to the

second injury fund. He requested feedback from the committee, employers, and carriers for use in further reports.

Number 1178

There being no further business to come before the committee, the meeting was adjourned at 3:14 p.m.

PREVIOUS ACTION

HB 159	No previous action. No action taken this date.

Statutory Reference: AS 17.80; AS 23.30.

ACTION NARRATIVE

Tape #006 Recording Number 1180	The meeting was called to order by Vice Chairman Bylsma. Members present were: Representatives Martin (arrived late), Bylsma, Randolph, and Rogers. Representative Gardiner was absent. The purpose of this meeting was to take testimony on HB 159.
Number 1195	William Reeves, Alaska General Contractors (AGC), Anchorage, said incentives are needed for injured employees to return to work, and for employers to rehire them. He went over disincentives. Reeves recommended: 1) go to percent of spendable income based on current wages; 2) do not include fringe benefits in wages; and, 3) Workers Compensation Board should be given authority to determine the value of room and board. He wanted to avoid unnecessary legislation. Reeves then went over the workdraft committee substitute section by section with recommendations.
Number 1420	Jack Thompson, WCCA and Alaska Conference of Employers, Anchorage, gave the committee a list of membership of both organizations he represents, and referred to the ACE report. Referring to John Lewis's report (presented 1/27), Thompson discussed the bunkhouse rule

definition in the workdraft committee substitute (p. 10, "in the course of employment"). He said employers are willing to meet litigation head-on. Thompson felt, regarding AS 23.30.095, that the Workers Compensation Board should be given more authority. He prefered that the employee be allowed to select a health care provider for a period of time, with the employer having the option to change providers after that time period. He recommended the ACE report remedy for average weekly wage, and their suggestions regarding permanent partial and permanent total disabilities. (A copy of the ACE report is available for review from the Committee.) Regarding the use of alcohol (see AS 23.30.235), Thompson recommended reinserting strong language, and again referred to the ACE report. He believes a mandated reduction in premiums should be made if workers compensation claims are reduced.

Number 1528

Don Koch, Chief, Market Surveillance Section, Division of Insurance, said pricing changes could complicate matters. He said forms are filed by a national council, not the insurer. He felt language should be changed to allow revoking and fining. He said he would present typewritten recommended changes to the committee at a later date.

Number 1589

Jim Robison, W/C District Council of Laborers and Alaska State AFL-CIO, Anchorage, felt the Division of Vocational Rehabilitation should have had the opportunity to give rebuttal testimony. He then went over the workdraft committee substitute for HB 159 section by section, giving his comments. Regarding the proposed amendments to the workdraft, Robison said he agreed with AGC that none of the amendments should be accepted. He commented on a letter distributed by Rep. Martin dated 1/25/82. Robison felt more effort on the part of the system would almost eliminate the need for attorneys. He commented on the bunkhouse rule and selection of doctors. Robison thought wages should include fringe benefits. He felt determination of degree of disability needs more study before being changed. There was discussion among the committee, Robison, Thompson, and Reeves.

Number 1762	Barbara Grisson, Pacific Marine Insurance, Anchorage, spoke to the second injury fund. She had no problem with percentages and amounts, but felt wording was needed for the Department to give procedural relief allowing minimum payment forgiveness to the Department of Labor until it is cost effective to process small checks. There was discussion of this point among Rep. Martin, Grisson, and McClintock (Division of Workers Compensation). Grisson, on behalf of her company, agreed that problems should be resolved by agencies concerned.
Number 1800	Paul Troeh, administrative law procedures specialist, Juneau, said that AS 23.30.225 repeal would repeal half of the social security offset procedure, which would then not meet federal requirements. He suggested the committee take other action. John Lewis interjected that it should be left alone until further information is available. Troeh said the courts tend to give broad coverage under the bunkhouse rule. He pointed out several discrepancies not addressed.
Tape 7, Number 0325	As there was no further business to come before the committee, the meeting was adjourned at 2:59 p.m.

IN THE HOUSE BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 159 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to workers' compensation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

Sec 66 P 44

* Section 1. AS 18.80.220(a)(4) is amended to read:

(4) an employer, labor organization or employment agency to discharge, expel or otherwise discriminate against a person because he has

(A) opposed any practices forbidden under AS 18.80.200 - 18.80.280; [OR BECAUSE HE HAS]

(B) filed a complaint, testified or assisted in a proceeding under this chapter; or

(C) filed a claim for workers' compensation benefits under AS 23.30;

Sec 13 P 13

* Sec. 2. AS 23.30.025 is amended by adding a new subsection to read:

(c) An insurer may issue a policy of insurance insuring the payment of benefits under this chapter which provides for a deductible amount to be paid by the employer. A policy with a deductible provision must be approved by the director of insurance and must provide that the deductible amount be paid by the insurer to the employee on behalf of the employer. After payment of the deductible by the insurer, the insurer may recover the deductible amount from the employer. The failure of an employer to reimburse an insurer for the deductible amount does not relieve the insurer from any other obligation it may have under the policy of insurance. An insurer is not required to apply for a deviation

under AS 21.39.070 in order to issue a policy under this subsection. This subsection does not apply to a policy of excess insurance purchased by a self-insurer.

Sec 17 P17

* Sec. 3. AS 23.30.045(c) is amended to read:

(c) For a person eligible for vocational rehabilitation service under this chapter or AS 23.15.080 [AND] who is placed with an employer for service [WITHOUT WAGES] at the request of the board or the division [OFFICE] of vocational rehabilitation to give him on the job training, work readiness, [OR] work therapy experience [,] or work sampling, the liability set out in (a) of this section applies to the state rather than to the employer.

Sec 26 P 22

* Sec. 4. AS 23.30.080 is amended by adding a new subsection to read:

(d) If an employer fails to insure or provide security as required by AS 23.30.075, the board may issue a stop order prohibiting the use of employee labor by the employer until the employer insures or provides security as required by AS 23.30.075. If an employer fails to comply with a stop order issued under this section, the board shall assess a civil penalty of at least $1,000 per day. The employer may not obtain a public contract with the state or any of its political subdivisions for one year following the violation of the stop order.

Sec 30 P 23

* Sec. 5. AS 23.30.095(a) is amended to read:

(a) The employer shall furnish medical, surgical, and other attendance or treatment, nurse and hospital service, medicine, crutches, and apparatus for the period which the nature of the injury or the process of recovery requires [, NOT EXCEEDING TWO YEARS FROM AND AFTER THE DATE OF INJURY TO THE EMPLOYEE. HOWEVER, IF THE CONDITION REQUIRING THE TREATMENT, APPARATUS, OR MEDICINE IS A LATENT ONE, THE TWO-YEAR PERIOD RUNS FROM THE TIME THE EMPLOYEE HAS KNOWLEDGE OF THE NATURE OF HIS DISABILITY AND ITS RELATIONSHIP TO HIS EMPLOYMENT AND AFTER-DISABLEMENT.

IT SHALL BE ADDITIONALLY PROVIDED THAT, IF CONTINUED TREATMENT OR CARE OR BOTH BEYOND THE TWO-YEAR PERIOD IS INDICATED, THE INJURED EMPLOYEE HAS THE RIGHT OF REVIEW BY THE BOARD. THE BOARD MAY AUTHORIZE CONTINUED TREATMENT OR CARE OR BOTH AS THE PROCESS OF RECOVERY MAY REQUIRE]. When medical care is required, the injured employee may designate a health care provider [LICENSED PHYSICIAN] inside the state to render the care except in cases where, in the judgment of the board, care or treatment or both can best be administered by the selection of another health care provider [PHYSICIAN]. Upon procuring the services of a health care provider [PHYSICIAN], the injured employee shall give proper notification of his selection to the employer within a reasonable time after first being treated. [IF FOR ANY REASON DURING THE PERIOD WHEN MEDICAL CARE IS REQUIRED THE EMPLOYEE WISHES TO CHANGE TO ANOTHER PHYSICIAN, HE MAY DO SO IN ACCORDANCE WITH RULES PRESCRIBED BY THE BOARD.]

* Sec. 6. AS 23.30.095(b) is amended to read:

(b) If the employee is unable to designate a health care provider [PHYSICIAN] and the emergency nature of the injury requires immediate medical care, or if he does not desire to designate a health care provider [PHYSICIAN] and so advises the employer, the employer shall designate the health care provider [PHYSICIAN]. Designation under this subsection, however, does not prevent the employee from subsequently designating a health care provider [PHYSICIAN] for continuance of required medical care.

→ Sec 31 P24+25

* Sec. 7. AS 23.30.095(c) is amended to read:

(c) No claim for medical or surgical treatment is valid and enforceable as against the employer unless, within 20 [TWENTY] days following the first treatment ~~and following the time set by the board for~~ notice of subsequent treatments, the ~~health care provider~~ [PHYSICIAN] giving the treatment or the employee receiving it furnishes to the

employer and the board notice of the injury and treatment, preferably on a form prescribed by the board. The board shall [MAY], however, excuse the failure to furnish notice within 20 days when it finds it to be in the interest of justice to do so, and it may, upon application by a party in interest, make an award for the reasonable value of the medical or surgical treatment so obtained by the employee.

Sec 32 P24

* Sec. 8. AS 23.30.095(e) is amended to read:

(e) The employee shall, after an injury, at reasonable times during the continuance of his disability if requested by his employer or, when ordered by the board, submit himself to an examination by a health care provider [PHYSICIAN OR SURGEON] authorized to practice [MEDICINE] under the laws of the state in which the employee may be found, furnished and paid for by the employer. [THE EMPLOYEE HAS THE RIGHT TO HAVE A PHYSICIAN, PAID FOR BY THE EMPLOYER, PRESENT AT THE EXAMINATION OR EXAMINATIONS.] No fact relative to the injury or claim communicated to or otherwise learned by a health care provider [PHYSICIAN OR SURGEON] who may have attended or examined the employee, or who may have been present at an examination is privileged, either in the hearings provided for in this chapter or an action to recover damages against an employer who is subject to the benefits [COMPENSATION] provisions of this chapter. If an employee refuses to submit himself to any examination provided for in this section [HEREIN], his rights to compensation shall be suspended until the obstruction or refusal ceases, and his compensation during the period of suspension may, in the discretion of the board or the court determining an action brought for the recovery of damages under this chapter [HEREUNDER], be forfeited. The board in any case of death may require an autopsy at the expense of the party requesting the autopsy. No autopsy may be held without notice first being given to the widow or widower or next of kin if they reside in the

state or their whereabouts can be reasonably ascertained, of the time and place of the autopsy and reasonable time and opportunity given the widow or widower or next of kin to have a representative present to witness the autopsy. If no adequate notice is given, the findings from the autopsy may be suppressed on motion made to the board or to the superior court, as the case may be.

Sec 36 P 26

* Sec. 9. AS 23.30.105(a) is amended to read:

(a) The right to benefits [COMPENSATION FOR DISABILITY] under this chapter is barred unless a claim for them [IT] is filed within two years after the employee has knowledge of the nature of his disability and its relation to his employment and after disablement. The [HOWEVER, THE MAXIMUM TIME FOR FILING THE CLAIM IN ANY EVENT OTHER THAN ARISING OUT OF AN OCCUPATIONAL DISEASE SHALL BE FOUR YEARS FROM THE DATE OF INJURY, AND THE] right to benefits [COMPENSATION] for death is barred unless a claim for benefits [THEREFORE] is filed within one year after the death. If [, EXCEPT THAT IF] payment of compensation has been made without an award on account of the injury or death, a claim may be filed within two years after the date of the last payment. It is additionally provided that, in the case of a latent injury [DEFECTS PERTINENT TO AND CAUSING COMPENSABLE DISABILITY], the injured employee has full right to claim as shall be determined by the board, time limitations notwithstanding.

Sec 40 P 30

* Sec. 10. AS 23.30.110(c) is amended to read:

(c) The board shall make the investigation which it considers necessary in respect of the claim, and upon application of an interested party shall order a hearing on it. If a hearing on a claim is ordered, the board shall give the claimant and other interested parties at least 10 days' notice of the hearing, served personally upon the claimant and other interested parties or sent by registered mail, and shall, within 30 [20] days after the hearing is held [HAD], by order, reject the claim

or make an award in respect to it. If a hearing is continued by the board, additional notice under this subsection is not required. [IF NO HEARING IS ORDERED WITHIN 20 DAYS AFTER NOTICE IS GIVEN AS PROVIDED IN (b) OF THIS SECTION, THE BOARD SHALL BY ORDER REJECT THE CLAIM OR MAKE AN AWARD IN RESPECT TO IT.]

Sec 45 P 33

* Sec. 11. AS 23.30.155(j) is amended to read:

(j) If an employer has made advance payments or overpayments of compensation, he is entitled to be reimbursed, after approval by the board, out of any unpaid installment or installments of compensation due.

Sec 46 P33

* Sec. 12. AS 23.30.155 is amended by adding new subsections to read:

(n) Compensation owed to an injured employee in the state shall be paid by a check or draft that may be cashed on the first banking day after it is received by the employee and on any succeeding banking day.

(o) If the board determines that it is in the interest of an injured employee and that a substantial hardship will not be imposed on the employer, the liability of the employer for all or part of compensation payable under AS 23.30.190 may be discharged by the payment of a lump sum.

Sec 51 P 36

* Sec. 13. AS 23.30.175(b) is repealed and reenacted to read:

(b) After June 30 and before December 1 of each year, the commissioner shall adopt and publish the average weekly wage for each jurisdiction for the preceding calendar year as published by the United States Secretary of Labor for the purposes of unemployment insurance. In determining the rate of compensation the commissioner shall use the average weekly wage figure for each jurisdiction, including Alaska, for which the Secretary of Labor computes an average weekly wage. These figures are the applicable average weekly wages for those jurisdictions for the following calendar year.

Sec 52 P 36&37

* Sec. 14. AS 23.30.175(c) is repealed and reenacted to read:

(c) The following rules apply to recipients who do not reside in Alaska:

(1) The weekly rate of compensation shall be calculated by multiplying the recipient's average weekly wage times the ratio of the average weekly wage of the jurisdiction in which the recipient resides to the average weekly wage of Alaska. The rate is based on the average weekly wages in effect when the recipient leaves Alaska and shall be adjusted annually upon publication of the average weekly wages for all jurisdictions.

(2) The calculation required by this subsection does not apply if the recipient is absent from Alaska for medical or rehabilitation services not reasonably available in Alaska.

(3) If the average weekly wage of the recipient and the resulting compensation rate is determined under AS 23.30.220(2) the calculation required by this subsection applies to only those wages earned in Alaska.

(4) Application of this subsection may not result in a reduction of the weekly compensation rate to less than $65 a week except as provided in (a) of this section.

Sec 63 P 37

* Sec. 15. AS 23.30.175(d) is repealed and reenacted to read:

(d) In a jurisdiction for which no average weekly wage is computed by the United States Secretary of Labor for the purposes of unemployment insurance, the average weekly wage shall be as determined by the commissioner.

Sec 55 P 38,39,40

* Sec. 16. AS 23.30.190(a)(20) is amended to read:

(20) in all other cases in this class of disability the compensation is 66-2/3 percent of the difference between his average weekly wages and his wage-earning capacity after the injury in the same

employment or otherwise, payable during the continuance of the partial disability, but subject to reconsideration of the degree of the impairment by the board on its own motion or upon application of a party in interest; [WHENEVER THE BOARD DETERMINES THAT IT IS IN THE INTEREST OF JUSTICE, THE LIABILITY OF THE EMPLOYER FOR COMPENSATION, OR ANY PART OF IT AS DETERMINED BY THE BOARD, MAY BE DISCHARGED BY THE PAYMENT OF A LUMP SUM;]

Sec 56 P40

* Sec. 17. AS 23.30.191 is repealed and reenacted to read:

Sec. 23.30.191. EXPENSES FOR REHABILITATING INJURED EMPLOYEES. An employee, who, as a result of injury, is or may be expected to be totally or partially incapacitated for his normal occupation and who, under the direction of the board, is being rehabilitated to engage in a remunerative occupation. may receive compensation necessary for his rehabilitation of 66-2/3 percent of his average weekly wage subject to the maximum payable under AS 23.30.175.

Sec 58 P41

* Sec. 18. AS 23.30.215(a)(1) is amended to read:

(1) reasonable and necessary funeral expenses not exceeding $\underline{\$2,500}$ [$1,000];

Sec 59 P41, 42

* Sec. 19. AS 23.30.220(2) is amended to read:

(2) the average weekly wage is [THAT MOST FAVORABLE TO THE EMPLOYEE] calculated by dividing $\underline{456}$ [52] into the total wages earned, including self-employment, in $\underline{\text{the highest paid three consecutive years out of}}$ [ANY ONE OF] the $\underline{\text{five}}$ [THREE] calendar years immediately preceding the injury;

Sec 63 P43

* Sec. 20. AS 23.30.250 is amended to read:

Sec. 23.30.250. PENALTY FOR MISREPRESENTATION. A person who willfully makes a false or misleading statement or representation for the purpose of obtaining a benefit or payment under this chapter is guilty of $\underline{\text{theft as defined in AS 11.46.100(3) and is punishable as provided in}}$

AS 11.46.120 - 11.46.150 [A MISDEMEANOR, AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT MORE THAN $1,000, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH]. Sec 68 P 45

* Sec. 21. AS 23.30.265(16) is amended to read:

(16) "medical and related benefits" includes but is not limited to physicians' fees, nurses' charges, pain clinic services, hospital services, hospital supplies, medicine and prosthetic devices, physical rehabilitation, and treatment for the fitting and training for use of such devices as may reasonably be required which arises out of or is necessitated by an injury, and transportation charges to the nearest point where adequate medical facilities are available;

Sec 70 P 45,46

* Sec. 22. AS 23.30.265(20) is amended to read:

(20) "wages" means the money rate at which the service rendered is recompensed under the contract of hiring [IN FORCE AT THE TIME OF THE INJURY,] and includes the reasonable value of board, rent, housing, lodging, or similar advantage received from the employer, and gratuities received in the course of employment from other [OTHERS] than the employer;

Sec 71. P 45,46

* Sec. 23. AS 23.30.265 is amended by adding new paragraphs to read:

(29) "benefits" means compensation and medical and related benefits;

(30) "health care provider" means a chiropractor licensed under AS 08.20; a dental hygienist licensed under AS 08.32; a dentist licensed under AS 08.36; a nurse licensed under AS 08.68; a dispensing optician licensed under AS 08.71; an optometrist licensed under AS 08.72; a pharmacist licensed under AS 08.80; a physical therapist licensed under AS 08.84; a physician licensed under AS 08.64; a podiatrist; a psychologist and a psychological associate licensed under AS 08.86; and a hospital as defined in AS 18.20.130, including a governmentally owned

or operated hospital; a corporate entity covered under AS 21.88.050-(b)(12); an employee of a health care provider acting within the course and scope of his employment; and persons comparably licensed in other jurisdictions to provide health care;

(31) "in the course of employment" includes travel to and from a remote job site but does not include activities outside of working hours off a site provided by the employer that are not under the supervision or control of the employer.

Sec 72 P46

* Sec. 24. AS 23.30.095(g), 23.30.125(b), 23.30.175(e) and (f), and 23.30.225(b) are repealed.

Sec 72 P 46

* Sec. 25. This Act takes effect July 1, 1982.

PREVIOUS ACTION

HB 159	No previous action. No action taken this date.
Statutory Reference	AS 18.80; AS 23.30.

ACTION NARRATIVE

Tape #006 Recording Number 1180	The meeting was called to order by Vice Chairman Bylsma. Members present were: Representatives Martin (arrived late), Bylsma, Randolph, and Rogers. Representative Gardiner was absent. The purpose of this meeting was to take testimony on HB 159.
Number 1195	William Reeves, Alaska General Contractors (AGC), Anchorage, said incentives are needed for injured employees to return to work, and for employers to rehire them. He went over disincentives. Reeves recommended: 1) go to percent of spendable income based on current wages; 2) do not include fringe benefits in wages; and, 3) Workers Compensation Board should be given authority to determine the value of room and board. He wanted to avoid unnecessary legislation. Reeves then went over the workdraft committee substitute section by section with recommendations.
Number 1420	Jack Thompson, WCCA and Alaska Conference of Employers, Anchorage, gave the committee a list of membership of both organizations he represents, and referred to the ACE report. Referring to John Lewis's report (presented 1/27), Thompson discussed the bunkhouse rule

definition in the workdraft committee substitute (p. 10, "in the course of employment"). He said employers are willing to meet litigation head-on. Thompson felt, regarding AS 23.30.095, that the Workers Compensation Board should be given more authority. He prefered that the employee be allowed to select a health care provider for a period of time, with the employer having the option to change providers after that time period. He recommended the ACE report remedy for average weekly wage, and their suggestions regarding permanent partial and permanent total disabilities. (A copy of the ACE report is available for review from the Committee.) Regarding the use of alcohol (see AS 23.30.235), Thompson recommended reinserting strong language, and again referred to the ACE report. He believes a mandated reduction in premiums should be made if workers compensation claims are reduced.

Number 1528

Don Koch, Chief, Market Surveillance Section, Division of Insurance, said pricing changes could complicate matters. He said forms are filed by a national council, not the insurer. He felt language should be changed to allow revoking and fining. He said he would present typewritten recommended changes to the committee at a later date.

Number 1589

Jim Robison, W/C District Council of Laborers and Alaska State AFL-CIO, Anchorage, felt the Division of Vocational Rehabilitation should have had the opportunity to give rebuttal testimony. He then went over the workdraft committee substitute for HB 159 section by section, giving his comments. Regarding the proposed amendments to the workdraft, Robison said he agreed with AGC that none of the amendments should be accepted. He commented on a letter distributed by Rep. Martin dated 1/25/82. Robison felt more effort on the part of the system would almost eliminate the need for attorneys. He commented on the bunkhouse rule and selection of doctors. Robison thought wages should include fringe benefits. He felt determination of degree of disability needs more study before being changed. There was discussion among the committee, Robison, Thompson, and Reeves.

Number 1762	Barbara Grisson, Pacific Marine Insurance, Anchorage, spoke to the second injury fund. She had no problem with percentages and amounts, but felt wording was needed for the Department to give procedural relief allowing minimum payment forgiveness to the Department of Labor until it is cost effective to process small checks. There was discussion of this point among Rep. Martin, Grisson, and McClintock (Division of Workers Compensation). Grisson, on behalf of her company, agreed that problems should be resolved by agencies concerned.
Number 1800	Paul Troeh, administrative law procedures specialist, Juneau, said that AS 23.30.225 repeal would repeal half of the social security offset procedure, which would then not meet federal requirements. He suggested the committee take other action. John Lewis interjected that it should be left alone until further information is available. Troeh said the courts tend to give broad coverage under the bunkhouse rule. He pointed out several discrepancies not addressed.
Tape 7, Number 0325	As there was no further business to come before the committee, the meeting was adjourned at 2:59 p.m.

John Scribner
Department of Transportation & Public Facilities
Juneau, Alaska
Position Statement: Opposed to HB 146 as written.

PREVIOUS ACTION

HB 146

No previous action.

Statutory Reference: AS 36

Action Taken: Amendment #1: Rep. Randolph moved, on page 1 of the Committee Substitute for SSHB 146, to delete subsection (b) (lines 16-19), and insert language recommended in memo dated 5/19/81 to Committee from Department of Labor, which reads: "The state shall initiate payment to the contractor for the amount due under the public construction or public works contract within 15 days after the contractor submits to the state a bill for materials and services with a certification issued by the Department of Labor that all employees employed on the project by the contractor and by all subcontractors have been paid not less than the established prevailing rate of pay as determined and published by the Department of Labor." There being no objection, the motion passed.

Amendment #2: Rep. Bylsma moved to delete subsection (d), lines 25-28, page 1. There being no objection, the motion passed.

Amendment #3: Rep. Randolph moved, on page 1, line 29, to insert between the words "state" and "is", the following: "or a political subdivision of the state". There being no objection, the motion passed.

Rep. Randolph moved to rescind the committee's action in adopting Amendment #1. For: Randolph. Against: Martin, Bylsma. Motion failed.

Rep. Randolph moved to pass CSSSHB 146 (L&C) from committee with individual recommendations. There being no objection, the motion passed.

HB 303

No previous action.

Statutory Reference: AS 36.

Action Taken: Rep. Randolph moved to table bill; there being no objection, motion passed.

ACTION NARRATIVE

Tape #0[illegible]
Recor[illegible]
Numbe[illegible]326

The meeting was called to order by Chairman Martin at 1:05 p.m. Members present were: Representatives Martin, Bylsma, and Randolph. Members absent were: Representatives Gardiner and Rogers. First bill considered by the committee was HB 146.

Number 0343

Jeff Barry, Labor & Commerce Committee aide, gave an overview of the bill and proposed amendments.

Number 0410

Judy Knight, Special Assistant to the Commissioner of Labor, felt the committee substitute does not address the problem. Knight presented the committee with a position paper. Specifically, she felt the term "certified payroll" was unclear, and that 15 days is too short a time for state to pay. She referred to the paper she presented to the committee for a list of suggested amendments.

Number 0451

Al Gordon, Assistant Director of the Wage & Hour Division, joined Knight in presenting testimony. There was discussion about what is a reasonable time in which to expect the state to pay contractors.

Number 0482

Knight said there needs to be clarification between the terms "certified payroll" and "payroll certified by..."

Number 0492 — There was discussion about which branches of the state government the bill should address.

Number 0540 — Knight explained the state's normal procedure for payment of contractors.

Number 0559 — Barry said the intention of the bill was that "certified payroll" would mean sworn to or attested by the contractor that employees have been paid. Gordon said that, without certification, the Department of Labor cannot enforce paying prevailing wages; the employee would have to go through a lengthy process to get his money.

Number 0588 — Sharon Mackland, Utility Contractors Association, supported the bill. She was concerned with "retainage". She felt the definition of "state" needed to be expanded. Knight suggested using words, "contracting agency", to replace word "state". Barry said he had asked legal services for a definition; they said that "state", as used, means the state or any political subdivision. There was discussion.

Number 0666 — Jean Kline, Alaska Chapter, Associated General Contractors, also wanted "political subdivision" included in the definition of "state". She had several questions about the impact of the bill; there was discussion. Kline commended DOT's handling of contracts.

Number 0715 — Ginny Chitwood, Alaska Municipal League, said there was no objection by the municipalities to interest accruing, but felt that interest on retainage destroys the function of retainage and removes incentive to complete contracts on time. She said the definition doesn't differentiate between the various types of retainage. (Chitwood spoke from prepared testimony.) Rep. Martin asked why contractors should have to compensate money withheld; Chitwood responded that retainage is to ensure a contractor finishes the work. There was discussion of retainage and various methods which could be used.

Number 0811 — John Scribner, Department of Transportation and Public Facilities, opposed the bill as written. He said it increases the risk that the contractor will not complete the job.

He felt the increased risk would increase the cost of bonding, and that increased bonding would be difficult for small contractors to obtain. He felt adequate procedures exist--bidding, bonding, and mobilization costs are paid up front; materials payments are made when materials are delivered; and progress payments are currently being made. He said the total turnaround is two weeks. He said an analysis had been done, and it was found that most payments get out quickly, but a few take as long as 30-35 days. He noted that mail sometimes takes over a week. Scribner explained retainage as it is presently being used, and the costs of retainage.

Number 0898 — Rep. Randolph moved to delete, on page 1, lines 16-19, subsection (b) of the committee substitute, and replace with language recommended by the Department of Labor in the paper they presented to the committee. There being no objection, the motion passed.

Number 0921 — Rep. Bylsma moved to delete subsection (d), lines 25-28, page 1 of committee substitute. There being no objection, the motion passed.

Number 0936 — Rep. Randolph moved to insert "or a political subdivision of the state" between the words "state" and "is" on line 29 of page 1 of the committee substitute. There being no objection, the motion passed.

Number 0942 — Judy Knight said that, in the Department's preferred amendment, when the final billing occurs, the contracting agency would contact the Department of Labor, who would send a memo verifying that wages were paid. She gave a timeframe of a couple days at most if payrolls had been submitted throughout the project. There was discussion.

Number 0965 — Rep. Randolph said the issue of the bill is to speed the flow of money; he felt the amendment passed by the committee had the potential to be a problem. He moved to rescind the adoption of amendment #1. There was discussion. On the question, Rep. Randolph voted in favor of rescinding; Reps. Bylsma and Martin opposed rescinding. The motion failed.

Rep. Randolph moved to pass the committee substitute with individual recommendations. There being no objection, the motion passed, and the committee substitute was passed from committee with amendments.

Number 1014 — Rep. Martin gave an introduction to HB 303.

Number 1020 — Judy Knight, Special Assistant to the Commissioner of Labor, said the Department of Labor, the Attorney General, and the Governor would like to give employment preference to residents. She said they had attempted to do this constitutionally. Knight explained that there is a large amount of paperwork involved, and that it is difficult to determine residence and ensure the intention to stay in the state. She said she is not sure if the cost of the legislation justifies the intent. Knight noted that people outside the state are looking to Alaska for employment. The Department of Labor is concerned about this influx of people. She said the bill addresses the issues in a positive manner, but information needed to make the bill workable is not available. There was discussion.

Number 1128 — Rep. Randolph moved to table the bill. There being no objection, the motion passed.

Number 1135 — There being no further business to come before the committee, the meeting was adjourned at 2:20 p.m.

2/1/82

Meter

0346 Call to order by Ch. Martin

0330 CS SSHB 146 (intro)

0343 Jeff Barry - overview of bill + amendments

0410 ~~Judy~~ Knight - CS does not address problem. (handed out memo to explain their position) "certified payroll" unclear term. 15 days too short a time to pay. ~~suggested~~, see memo for suggested amendment.

0451 Al Gordon, Asst Dir, Wage + Hour Div joined Ms. Knight. Knight - Want method to ensure employees have been paid,

0467 Randolph - agree w/that, but need to be sure contractor is paid in timely fashion.

0472 Knight - agree, but bill needs changes.

0481 Martin - clarification

0482 Knight - CS says "certified payroll" rather than "payroll certified by".

~~0496 Martin~~ said

0490 Martin - Knight discussed definitions of "state"

Byloma — — in this definition, wd only apply to executive branch.

0535 Byloma - suggested as not (see memo) could undermine purpose of whole bill - Dept Labor cd hold up 30-60 days.

0540 Knight - wd not intentionally. ~~State~~ went through normal procedure.

0559 Barry - intention was that certified payroll means sworn to or attested by contractor that employees have been paid.

0575 Gordon – without certification, Dept of Labor cannot enforce paying prevailing wages; employee has to go through lengthy process & sue to get his money. This way, Department monitors

0588 Sharon Mackland, Utility Contractors Assoc – supports bill. Concerned w/ "retainage". Sec E says state is liable to contractor; original bill included political subdivisions (boroughs, cities) – this version needs definition, Sec d, of State expanded or made same as on pg 3, line 9, or including "political subdivision" on pg 1 definition.
Discussion Martin/MacKland re definition of "State".

0646 Knight – suggested "contracting agency" to replace word "state."

0647 Barry – asked lawyers for definition – they said "state" as used, means State or any political subdivision.
Discussion w/Knight.

0666 Joanne Kline, At Chap, Gen Assoc Contractors – also wanted "political subdivision" included in definition. Asks about administration – AGC Contracts administered through DOT – who has chng that? Knight said Labor has nothing to do w/DOT pymts – it just monitors them. Kline asked why adda was chngd fm Title 35 to 36. Barry said this just clarifies penalties for late pymt. Commended DOT's handling of Contracts.

0715 Ginny Chitwood, Alaska Municipal League — no objection by municipalities to interest accruing, but interest on retainage destroys function of retainage; removes incentive to complete contracts on time. Definition doesn't differentiate between various types of retainage. (read from prepared testimony.)

742 Martin — why shd contractors have to ~~pay about~~ compensate money withheld? Chitwood — retainage is to ensure contractor finishes work.. Martin — prob has been that smaller subdivisions of state have been holding money after job is done. Chief Clerk felt it shd be written into contract rather than law. Martin felt contractor wd be victim in that situ. They discussed retainage & various methods.

772 — Byloma said he had to study it further

778 — Kline re retainage — money retained is contractor's money — why shdn't he rec benefits, esp if it is bearing interest.

Barry — as written, extent to monies withheld + liened won't be pd; no monies "retained" are disputed

Kline — 90 day w/holding can make or break some small contractors

0811 John Scribner, DOTPF, opposed to bill as written — increases risk that contractor wd not complete job. ~~to~~ Increased risk wd incre ~~se~~ cost of bonding; increased bonding wd be difficult for small contractors to obtain bonding. They have adequate procedures — can pay bidding, bonding & mobilization costs up front; can make mat'ls pymt when delivery is made; & they currently make progress pymts. Total turn around (pay estimate to State mailing check) is 2 wks. Mail can take over a week. Did analysis — most pymts get out quickly, a few get hung up up to 30-35 days.

0861 ~~Retainage used~~ reduce Explained retainage as they use it. Explained costs of retainage.

Martin — went over possibilities of amending bill

0898 ~~[redacted]~~ —

Randolph — moved to delete ~~replace~~ sec ~~4~~ 6 w/ CS, brief w/ language recommended by Dept Labor (#1 in memo) 5/19/81
& insert

No objection, so passed.

0921 Rep Bylsma moved to delete sec d, lines 25-28.
No objection, motion passed

Randolph moved to add "or political subdivision" on pg ——, line ——.
No obj. - passed

942 Judy Knight - re preferred amdmt, when final billing occurred, contracting agency wd contact Dept Labor, who wd send memo verifying wages were pd. Gave timeframe of a couple days at most if payrolls had been submitted throughout project.
Randolph - questions.

0965 Randolph - issue of bill is to speed flow of money; amdmt passed has potential to be problem. Moved to rescind adoption of amdmt # 1.

discussion: Byloma ~~feels~~ supports using #1 ~~removes possibility of legal answers to~~

, Martin agrees w/ Rep. Byloma

Randolph - disagreed, explained his position
Thinks amdmt thwarts reason for bill.

~~Byloma~~

Randolph - for Rep Byloma Martin - no
Motion to rescind amdmt failed.
Randolph moved to pass w/ individual recommendations; no objections.
Bill passed for committee.

Chuck Hollwell

1014 HB 303 — Martin gave intro to bill.

1020 Judy Knight, Special Asst to Commissioner, Dept Labor — Dept, AG, & Governor wd like to give employment preference to residents. Tried to do this constitutionally. Large amt of paperwork involved; hard to determine residency, ensure intention to stay. Not sure, Cost of legislation justifies intent. People outside looking to Alaska for employment. Dept of Labor concerned about this influx of people. Bill addresses issues in positive manner, but info needed to make bill workable is not available. Not sure of intent of bill.

1111 Randolph — comment (good explanation); are we ready to seriously consider issue

Knight — believe in employment preference; no answer to how to do that constitutionally. Have not found workable solution.

Randolph — comments. Moved to table bill —

no objection, motion passed

Mtg adjourned 2:30 pm

HB 146

May 19, 1981

Mr. Ken Spray
House Labor & Commerce Committee
Alaska House of Representative
Pouch V
Juneau, Alaska 99811

Dear Mr. ~~Spray~~ Ken:

My apologies for the confusion that has resulted from the hearings and conversations concerning a proposed committee substitute for House Bill 146, "An Act relating to payment procedures on certain public contracts." The confusion seems to relate to "certified" payroll as opposed to "certification." The following amendment is proposed to address the concerns expressed by members of the Department to provide security for the payment of wages to employees on public works projects.

Preferred Amendment: Delete subsection (b), lines 16-19, page 1.
Insert the following.

(b) The state shall initiate payment to the contractor for the amount due under the public construction or public works contract within 15 days after the contractor submits to the state a bill for materials and services with a certification issued by the Department of Labor that all employees employed on the project by the contractor and by all subcontractors have been paid not less than the established prevailing rate of pay as determined and published by the Department of Labor.

Alternative Amendment: Delete section (b), lines 16-19, page 1.
Insert the following.

#1

(b) The state shall initiate payment to the contractor for the amount due under the public construction or public works contract within 15 days after the contractor submits to the state a bill for materials and services and a sworn certification that all employees employed on the project by the contractor and by all subcontractors have been paid not less than the established prevailing rate of pay as determined and published by the Department of Labor.

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 146 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to payment procedures on certain public contracts."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 36 is amended by adding a new chapter to read:

CHAPTER 90. MISCELLANEOUS PROVISIONS.

Sec. 36.90.001. PUBLIC CONSTRUCTION CONTRACT PAYMENTS. (a) At the request of a contractor the state shall pay the contractor 20 percent of the amount of the contract on or before the date the state gives the contractor notice to proceed with the public construction or public work covered by the contract.

#1 (b) The state shall initiate payment to the contractor for the amount due under the public construction or public work contract within 15 days after the contractor submits a bill with a certified payroll to the state for materials or services.

(c) If the state fails to make a payment due under this section, it shall pay interest to the contractor under AS 45.45.010(a) on the amount due. If a failure to make a payment due under this section continues for 60 days or more, the state shall pay the contractor a penalty of 10 percent of the amount due plus interest.

#2 Delete — ~~(d) In this section "state" means a department, office, agency, or other organizational unit of the executive branch, except one expressly excluded by law, but does not include an agency in the judicial or legislative branches of the state government.~~ delete the section

(e) The state, or a political subdivision of the state, is liable to a contractor registered under AS 08.18

Position Statement: Supported legislation.

PREVIOUS ACTION

HCR 56 — No previous action.

Statutory Reference: None.

Action taken: Rep. Rogers moved, page 1,

lines 8-12, to delete word "increasing"; Rep. Randolph seconded. Motion passed unanimously.

Rep. Rogers moved, page 1, line 15, to delete word "incentive" and replace with word "initiative". After discussion, the motion was withdrawn.

Rep. Rogers moved, page 1, line 20, to delete word "appropriations" and insert "issues". After discussion, Rep. Rogers amended his motion to insert word "legislation" rather than "issues". Motion passed by unanimous consent.

Rep. Rogers moved, page 1, line 22, to insert before the word "services", the words "cost-effective". Motion passed by unanimous consent.

Rep. Rogers moved, page 2, line 10, to insert "public and" before word "commercial". Rep. Randolph objected. Rep. Rogers withdrew his motion.

Rep. Rogers moved, page 2, lines 11-12, to delete everything after word "sessions". There was discussion; Rep. Randolph proposed amending motion to delete everything after word "basis" on line 9. Discussion. Question was called on Rep. Randolph's amendment: For: Randolph; Opposed: Martin, Rogers, Bylsma. Amendment failed. Question was called on Rep. Rogers' amendment: For: Rogers, Bylsma, Randolph; Opposed: Martin. Motion passed.

Rep. Rogers moved, Page 2, line 8, insert after word "stations" the language, "or to contract with the private sector for operation and maintenance of the stations". Motion passed unanimously.

Rep. Rogers moved, page 2, line 2, to delete first "and" and insert "or". Motion passed unanimously.

Rep. Rogers moved, page 2, line 10, insert "public and" before word "commercial"; Rep. Randolph objected. Question: for--Martin, Rogers, Bylsma; opposed--Randolph. Motion passed.

Rep. Randolph moved, page 1, line 25, delete "to the extent possible"; and on line 26, delete "reduce or"; objection by Rep. Rogers. Amendment was withdrawn by Rep. Randolph.

Rep. Randolph moved, page 1, line 28, delete word "unnecessary", and line 29, delete words "new and innovative". Rep. Rogers moved to divide motion; he withdrew this motion. Question on Rep. Randolph's motion: for--Randolph; opposed--Bylsma, Martin, Rogers. Motion failed.

Rep. Bylsma moved, page 1, line 26, delete words "reduce or". There being no objection, the motion passed.

Rep. Randolph moved, page 1, to delete all language on lines 15 and 16; Rep. Martin objected. Question: for--Rogers, Bylsma, Randolph; opposed--Martin. Motion passed.

HB 146

See minutes for 2/1/82.

Rep. Randolph moved to rescind action in adopting amendment #1 on HB 146, and to adopt the alternate language suggested by the Department of Labor, which reads: "The state shall initiate payment to the contractor for the amount due under the public construction or public works contract within 15 days after the contractor submits to the state a bill for materials and services and a sworn certification that all employees employed on the project by the contractor and by all subcontractors have been paid not less than the established prevailing rate of pay as determined and published by the Department of Labor."; and to move the bill from committee. Motion passed unanimously.

ACTION NARRATIVE

Tape #008
Recording
Number 0001

The meeting was called to order by Chairman Martin at 1:12 p.m. Members present were: Martin, Randolph, Bylsma, Rogers. Representative Gardiner was absent. Representative Martin explained HCR 56.

Number 0022 — Alex Hills, Department of Administration, said the administration sees no conflict with the resolution.

Number 0052 — Allen Blume, Telelink Communications, Inc., supported the resolution. (He spoke from prepared testimony, which is available from the committee.) There was discussion between Blume and Rogers about possible amendments.

Number 0180 — Representative Martin explained HB 506 and outlined the proposal of creating a commission or board of telecommunications, and asked Blume for his opinion. Blume felt the dangers would be that, 1) the commission would be a "toothless monster"; and 2) that it could lead to a proliferation of regulations. He supported generally the idea of a commission, but felt it should be tailored carefully, possibly sunsetted, and should work with other agencies. There was discussion.

Number 0246 — Rep. Randolph said legislation needed to define "free enterprise", "private sector", etc. Rep. Martin asked him to do that. Rep. Rogers expressed concern.

Number 0261 — Robert Gould, Alaska Cable Television Association, supported resolution. He was concerned that the private sector be given a fair chance to deliver services now performed by the public sector. He felt this would be cost-efficient for taxpayers. He was personally concerned whether Alaskan communities need a multiplicity of television stations provided by public appropriations. He wanted to see all communications entities cooperating and communicating with each other, with the legislature, and with the administration.

Number 0360 — Rep. Martin asked Gould's opinion of a commission on telecommunications. Gould said that, in principle, it is a good idea as it is a technical area. He felt the efforts the administration have made have good potential to date. He would not necessarily want to see that replaced, but incorporating that with a new commission may be a good idea. There was discussion of how such a commission would function.

Number 0433

Gould said, regarding legislative coverage, that CTA feels that getting constituents closer to the legislature is good. He said they plan an ACE band with live, unedited coverage of the legislature; local broadcast stations could add commentary. He said they have done preliminary cost proposals that show this could be done for under $1-million equipment costs. There was discussion.

Number 0567

Rep. Rogers moved, page 1, lines 8-12, to delete word "increasing"; Rep. Randolph seconded. Motion passed unanimously.

Rep. Rogers moved, page 1, line 15, to delete word "incentive" and replace with word "initiative". After discussion, he withdrew the motion.

Rep. Rogers moved, page 1, line 20, to delete the word "appropriations" and insert word "issues". Rep. Martin suggested adding the word "issues". Rep. Rogers changed his motion to insert the word "legislation" rather than "issues". Motion passed by unanimous consent.

Rep. Rogers moved, page 1, line 22, to insert words "cost-effective" before the word "services". Motion passed by unanimous consent.

Rep. Rogers moved, page 2, line 10, to insert the words "public and" before the word "commercial". There was objection by Rep. Randolph. Rep. Rogers withdrew the amendment.

Rep. Rogers moved, page 2, lines 11-12, to delete language "by making equipment, space, and satellite time available to the private sector." Rep. Randolph said the legislature had no business encouraging coverage, and moved to amend the motion to delete everything after the word "basis" on line 9. There was discussion among the committee. Rep. Martin asked Hill for an estimate of costs; Hill said about $5-million a year is spent total on the television demonstration project, and $5-million a year on Learn Alaska.

Question was called on the Randolph amendment: Randolph voted for; Bylsma,

Martin and Rogers were opposed; and the amendment failed.

Question was called on the Rogers amendment: Rogers, Randolph, and Bylsma voted for the amendment; Martin opposed; amendment passed. Rep. Rogers moved, page 2, line 6, after the word "stations", to insert the language, "or to contract with the private sector for operation and maintenance of the stations". Motion passed unanimously.

Rep. Rogers moved, page 2, line 2, to delete first "and" and insert "or". Motion passed unanimously.

Number 0800

Rep. Rogers moved, page 2, line 10, to insert words "public and" before the word "commercial"; Rep. Randolph objected. Rep. Martin felt there was no sense re-involving public stations. Rep. Rogers argued that the language is only encouraging coverage and that it didn't mean the state would pay for it. There was discussion. Vote: Rogers, Bylsma, Martin voted for the amendment; Randolph opposed; motion passed.

Rep. Randolph moved, page 1, line 25, to delete "to the extent possible"; and on line 26, delete "reduce or"; there was objection by Rep. Rogers. Discussion. Rep. Rogers felt this could bind the state to upgrading cable system. Rep. Randolph felt the amendment makes it clear that the Division of Telecommunications will clear their own. Hill said that Rep. Rogers is correct; the language allows flexibility, but the amendment would not be possible to carry out. Rep. Randolph withdrew the amendment.

Side B, Number 005

Rep. Randolph moved, page 1, line 28, to delete the word "unnecessary"; and on line 29, to delete the words "new and innovative". Rep. Rogers moved to divide the motion. There was discussion. Rep. Rogers withdrew his motion to divide the question. Question was called: Randolph for; Bylsma, Martin, and Rogers opposed; motion failed.

Rep. Bylsma moved, page 1, line 25, to delete "reduce or". There was no objection; motion passed unanimously.

Number 0060

Rep. Randolph moved, page 1, to delete all language on lines 15 and 16. Rep. Martin objected. There was discussion. Question was called: Bylsma, Rogers, Randolph for; Martin opposed. Amendment passed.

Number 116

Rep. Randolph requested that the bill be redrafted by legal services, incorporating amendments, for discussion the following day.

Rep. Randolph moved to rescind the committee's action on HB 146 in adopting the "preferred amendment" which was proposed by the Department of Labor, and to adopt the alternate language proposed in the same document; and to pass the amended bill from committee. Motion passed unanimously. New language reads, "The state shall initiate payment to the contractor for the amount due under the public construction or public works contract within 15 days after the contractor submits to the state a bill for materials and services and a sworn certification that all employees employed on the project by the contractor and by all subcontractors have been paid not less than the established prevailing rate of pay as determined and published by the Department of Labor."

There being no further business to come before the committee, the meeting adjourned at 2:26.

HOUSE LABOR AND COMMERCE COMMITTEE

FINAL INTERIM REPORT

December 17, 1981

The House Labor and Commerce Committee has completed its interim work. Most of the Committee's priority legislation is being drafted or redrafted and will be ready for further consideration early in the second session of the 12th Alaska Legislature.

Public participation during hearings in Anchorage and Fairbanks was excellent, particularly with regard to the Committee's three primarly areas of concern -- workers' compensation, statewide telecommunications and government permits.

Additionally, Chairman Terry Martin has reviewed some 30 pieces of legislation lodged in the Committee but which were not addressed in any detail during the interim. Chairman Martin is organizing these bills and resolutions by priority so they can be expedited early next session.

A status report of interim activities is as follows:

WORKERS' COMPENSATION

Tom Sofo of the legislative legal services arm currently is preparing the final redraft of House Bill 159 dealing with revision of state workers' compensation law.

The redraft will be ready for further Committee consideration early next session.

As the Committee's top priority during the interim, much time has been spent collecting public testimony from various concerns in an effort to reach consensus on resolving this lingering problem. The Committee has explored a multitude of proposals to reduce the escalating premium rates.

While the final interim bill will address various broad concerns of the Committee, specifics regarding insurance rates and self-insurance programs will be incorporated in a separate bill shortly after the start of the second session.

The Committee feels it must await results of an in-depth study being conducted by John Lewis of Florida, a workers' compensation expert on contract with the state Division of Workers' Compensation. Mr. Lewis's findings are necessary before revision of the complicated rate structure can be addressed in any detail.

However, the final interim redraft of House Bill 159 attempts to adjust the law in ways the Committee feels will help reduce the extremely high insurance premiums Alaska businesses pay out for workers' compensation.

For one, a significant reduction in premium rates can be assured through immediate response to the needs of employees injured on the job, so that these injured workers can be returned to the labor force in the shortest period of time.

This objective can be attained, in part, by requiring injured workers expected to be on workers compensation more than 90 days to be referred to rehabilitation or pain clinics within 30 days of injury. Public testimony from experts in the field reported that months and even years pass before an injured worker is referred to a clinic. Obviously, the quicker an injured worker is rehabilitated, the quicker he can be returned to the work force. This means less compensation is paid out which, in effect, would affect the rate structure.

In regard to workers' compensation-job training and placement programs, the cost, in many cases, should be borne by the appropriate agencies such as CETA, WIN, or other government sponsored groups directly responsible for an

employee injured while on the job.

Higher educational career training, skill centers and other post secondary educational opportunities such as college should be funded through a special state grant program.

It must be emphasized that retraining costs, when figured into insurance premiums borne by the employer, is ultimately passed on to the consumer. It is the consumer who picks up the tab for the increased cost of goods and services.

Following a recent meeting with the state Workers' Compensation Board, the Committee feels the Board must be given more authority in making final determination of workers' compensation cases, in order to avoid long and costly legal fights -- all of which is reflected in the rate structure.

A goal of six months from the time of injury to settlement will result in almost no need for expensive attorney and court fees. It is felt that a decrease of 50 percent in the time spent on litigation of cases could be attained if the law were more clear on the Board's authority. The Committee feels that the Board -- comprised of lay experts in the field --deals fairly with claimants and injured workers and give them every opportunity to air their grievances.

The Committee also feels that workers' compensation premiums could be further reduced in cases where an injured worker carries health insurance, or other insurance policies that cover personal injury.

The redraft of House Bill 159 also addresses the need to tighten up the so-called "Bunkhouse Rule," which essentially holds an employer responsible for an employee's safety when he is working more than 25 miles from his home.

While the Committee recognizes the right of workers to be protected when away from home, particularly in Alaska's remote regions, it also finds abuses in the system, especially during leisure-time activities and accidents caused by intoxication.

The Committee is of the opinion that an intoxicated or drugged worker who is injured is responsible for his actions and should not be entitled to collect workers' compensation benefits. Likewise, workers who become ill or contract social diseases due to intimate sexual activities away from home should not become the responsibility of the employer.

Likewise, if a worker is injured while racing motorcycles or playing sports during his leisure hours, it is highly questionable whether the employer should be responsible for his injury, particularly when other insurance programs carried by the worker may cover the injury.

The Committee also desires a clear and concise definition of the terms "benefit" and "compensation" as they appear in House Bill 159. In either case, the term should relate only to a worker's take-home pay and medical treatment. Workers' compensation was never meant to be an open-ended benefit system. The terms "compensation" and "benefit" appear so regularly throughout House Bill 159 that anything less than a concise definition will lead to misunderstanding and confusion.

GOVERNMENT PERMITS

The Committee has placed the redraft of Senate Bill 84 on hold until the beginning of the second session.

Testimony collected during the interim shows conclusively a real need for streamlining the government permitting process. However, it is equally clear that opinion on how to accomplish this goal varies widely.

On the one hand, the Alaska Oil and Gas Association (AOGA) and its membership believes Senate Bill 84 (Second Rules) does not go far enough in facilitating

the procedure for gas and oil permits. The association would like a stronger "lead agency" clause in Senate Bill 84 and a softening of language in the bill that guarantees "any individual, irrespective of his 'standing'otherwise granted under the law, to appeal a permitting decision, and further delay resolution of the application," according to the association.

On the other hand, environmental groups -- particularly Trustees for Alaska -- feel Senate Bill 84 and proposed administrative regulations do not adequately protect local community interest in the permitting procedure.

In the middle is the state Department of Law which, under direction of the Governor, has drafted new regulations governing classification of permits -- the reported purpose being to streamline the system.

Although the Committee feels there is strong support in both the House and Senate to clean up the system, it doesn't want to work hard to pass legislation only to have it vetoed by the Governor. This is why the Committee believes participation by the administration in this legislation is vital.

The Governor's chief executive, Jerry Reinwand, feels legislative participation in this issue is important and has reportedly held up implementing regulations until after the negotiation process. That process is underway, and hopefully an accord can be reached prior to the session.

STATEWIDE TELECOMMUNICATIONS

Legal services is currently drafting a House Concurrent Resolution that will spell out what the Committee feels should be the legislative policy regarding statewide telecommunications. The resolution will be sponsored by the House Labor and Commerce Committee.

The resolution is being drafted along the following lines:

-- Whereas a significant and increasing amount of public funds is being invested in telecommunications systems; and

-- Whereas it should be the role of state government to encourage and not compete with the private sector; and

-- Whereas the private sector which deals in Alaska telecommunications faces a crowding out by government in the wake of increasing state wealth; and

-- Whereas the private sector has been the foundation and vitality of the American Democratic and economic system; and

-- Whereas the Alaska State Legislature lacks a policy regarding the burgeoning telecommunications system;

Be it resolved that the Alaska State Legislature should take the following into account to serve as guidelines when considering telecommunications appropriations:

-- When and where possible, the state Divisions of Telecommunications should procure services from private enterprise or certified and franchised utilities and contract for the construction, management, operation and maintenance of telecommunications systems.

-- When and where possible, the state Divisions of Telecommunications should reduce or eliminate airwave interference of state owned or financed stations with privately owned and operated cable television stations.

-- Artificial regulatory and government barriers for growth and development of new and innovative services by the private sector should be removed.

-- In-state programming or Bush programming can be beneficial to sectors of the Alaskan community. However, the Divisions of Telecommunications should not only assure that such programs are cost effective, but production of these

programs should be available to the private sector on a contract or bid basis.

-- Alaska's villages should have the opportunity to own, operate and maintain their own satellite earth stations.

-- Companies owned and operated by Alaska residents and based in Alaska should be given a competitive edge over Outside interests.

-- No commercial advertisements shall be carried in state funded or state subsidized programs or in programs transmitted by state funded or state subsidized satellite channels.

-- The Legislature should encourage commercial radio and television news coverage of the legislative sessions by making equipment, space and satellite time available to the private sector. This would serve as a meaningful and efficient and non-controversial method of communicating legislative affairs to the public.

ARCHITECTURAL AND ENGINEERING SERVICES

House Bill 612, which relates to contracts for architectural, engineering and surveying services, has been redrafted and is ready for further Committee consideration upon convening of the legislative session.

House Bill 612 clarifies the conditions under which a state contract for professional services can be awarded. It requires the state and other subdivisions of the state to determine whether a bidding firm is "capable and qualified" to do the work, rather than issuing a contract strictly based on the lowest bid. A person who provides such professional services may annually submit to the department a statement of qualifications and performance data.

House Bill 600, which lays out contractual liability of architects, engineers, surveyors and the state of Alaska, is currently in a holding pattern until an equitable formula for liability can be worked out. A final redraft of House Bill 600 is expected prior to the beginning of the session.

COMPULSORY AUTOMOBILE INSURANCE

The Committee recommends the sponsors of House Bill 346 pursue other avenues to increase the number of insured drivers.

House Bill 346 has received little support during hearings held in Anchorage and Fairbanks during the interim.

It is generally felt that compulsory automobile insurance will not attain its primary goal -- to increase the number of insured drivers in Alaska. In fact, it is counter productive in that it is thought to be unenforceable and actually may result in higher insurance rates for the already insured driver. This is because the high risk factor of those who are generally uninsured under the current situation would be spread among drivers who already are insured.

The Committee understands that sponsors of the bill are currently exploring other alternatives including stronger state financial responsibility laws.

IN THE HOUSE

BY THE LABOR AND COMMERCE COMMITTEE

HOUSE CONCURRENT RESOLUTION NO. 56

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

Relating to the policy of the legislature concerning telecommunications.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS a significant ~~and increasing~~ amount of public money is being invested in telecommunications systems; and

WHEREAS the private sector that deals in Alaska telecommunications has faced increasing competition from government as a result of ~~increasing~~ state wealth and expenditures for telecommunications; and

WHEREAS the private sector is the foundation and vitality of the American economic system; and

~~WHEREAS state government should encourage private enterprise and incentive; and~~

WHEREAS the Alaska State Legislature has not adopted a policy regarding the burgeoning telecommunications system;

BE IT RESOLVED that the Alaska State Legislature shall consider the following guidelines when considering telecommunications ~~appropriations~~ legislation:

(1) to the extent possible, the divisions of telecommunications should procure cost-effective services from private enterprise or certified and franchised utilities and contract for the construction, management, operation, and maintenance of telecommunications systems;

(2) to the extent possible, the divisions of telecommunications should ~~reduce or~~ eliminate airwave interference of state-owned or financed stations with privately owned and operated cable television stations;

(3) unnecessary regulatory and government barriers which impede growth and development of new and innovative services by the private sector

should be removed;

(4) companies owned ~~and~~ or operated by residents of Alaska and based in Alaska should be considered before companies from other states when telecommunications goods or services are needed from the private sector;

(5) Alaska's villages should have the opportunity to own, operate, and maintain their own satellite earth stations, or to contract with the private sector for operation and maintenance of the stations;

(6) in-state programming beneficial to both urban and rural residents should be cost effective and the production of these programs should be available to the private sector on a contract or bid basis; and be it

FURTHER RESOLVED that the legislature encourages public and commercial radio and television news coverage of the legislative sessions. ~~by making equipment, space, and satellite time available to the private sector.~~

Senate Bill No. _____ _____ _____ _____ _____

Special Orders:

2/3/88

1:12 Call to order

0001 Call to order, explanation of resolution by Martin

022 Alex Hill - gave state's position (no conflict)

052 Allen Blume, Telelink Comm, Inc (read from written testimony) - support legislation.

106 Rogers - re sec. 1 - shd contract privately if costs more than if done by state?

112 Blume - judgmt shd be made on case by case basis; give private sector access to monies being spent

Rogers - sec unclear in inconsistency - if state does construction, private enterprise will be operating state-owned facilities

Blume compared to federal Dept of Defense contracts (esp aerospace program)

Rogers - sec. 3 - any objection to deleting words "new & innovative"?

Blume - none

discussion on "new & innovative"

159 Martin explained HB 506 & outlined proposal of Commission or board of telecommunications

180 Blume - danger wd be 1) toothless monster 2) cd lead to proliferation of regulations. Support generally idea of commission, but shd be tailored carefully, possibly sunsetted, & work w/ other agencies.

Discussion

211 Blume – hard to get complete grasp; if creating new structures, must be done carefully.
Martin – ~~of~~ commission cd be advising group, but hard for legislators

246 Randolph – need to define free enterprise, private sector, etc. Martin asked him to do that. Rogers expressed concern.

361 Robert Gruth (?), Alk Cable TV Assoc. – support resolution. Concerned that private sector be given fair chance to deliver services now performed by public sector. Cost-efficient for taxpayers. Personally concerned whether Alaskan communities need "multiplicity" of TV stas provided by ~~sta~~ public appropriations. Wants to see all communications entities cooperating & communicating w/each other, legislature, & administration.
Martin – ~~wha~~ how do you feel obi bd or comm to address these issues &

360 Gruth – in addn to Div of Comm? In principle, good idea – technical area. Efforts admin has made have good ~~pot~~ potential to date. Wd not necessarily want to see that replaced, but incorporating that w/new comm. may be good idea.
Martin – div is at pleasure of governor; comm or bd more permanent; they don't have final authority. Comm cd be similar to wkrs comp, private/public
Gruth – cd be create more cooperative environment, wd allow private input.

433 Gruth - re legis. coverage - CTA (double V proc) feels that getting constituents closer to legis is good - they plan ABE band w/ live unedited coverage of legis; local broadcast stns cd add commentary. Have done prelim cost proposals - cd be done for under $1M (eqpt)

494 Martin explained inclusion of legis org in bill

Randolph - gstn

Gruth - put cameras in place in both houses & committee rms, manned to rec eqpt, no reporting, info superimposed (bio?, vote), fed live for pool to all comm. by avail distn. -

Randolph - several houses fed, & each processor cd comment?

Gruth - xmtd live or tape delayed

Randolph - can't believe anyone wd watch it for hours

Gruth - explain. - used Don Young & D2 hrgs as example

567 Rogers, line 8-12 delete "increasing" to fall w/in budget guidelines

Randolph seconded ~~Rec'd~~

line 8 - no passed unan.

Rogers

line 15, delete incentive, replace w/ initiative

w/drew amdmt.

Rogers line 20 delete "approprns" & insert "issues"
Martin - perhaps add word "issues"
Rogers - "legislation" instead of appropriations
Passed by unan. consent

Rogers line 22 insert "cost-effective" before "svcs"
Asked for unan. consent; passed

Rogers - p. 2, line 10 - insert "public and" before commercial
Objection by Randolph
Rogers w/drew amdmt

Rogers, lines 11-12 - delete "by making eqpt ... private sector" (delete everything after "sessions"). Gave explanation - incurring costs. Randolph - what does encourage mean? no business encouraging them. Proposed amending amdmt to delete everything after line 9, word "basis".
Martin - without encouraging private, with large appns to public sys, by allowing for discussion.
Rogers - eqpt already purchased costs nothing, but providing space & satellite time increases fiscal note.
Randolph - if constituents interested, will pay private sys to cover legis. Agrees shd be addressed in other legis.
Martin asked for costs fm Hill.
790 Hill - abt $5M/yr total JV demons. & $5M/yr for Seam Alaska

Martin, Randolph discussion - ~~shall be made~~ as
Byloma - favors Rogers orig'l amdmt

Randolph amdmt, delete everything after "basis", line 9
Aye Rand Opp - M, Rog, Byls — failed

Rogers amdmt - in opposed, Rog Ran Byls favor - passed

Rogers, line 6, p. 2, after "stns"
" or to contract w/ the private sector for operation
& maintenance of the stns". Passed unan.

Rogers p2 line 2 delete 1st "and," insert "or"
passed unan

p. 2

0880 Rogers line 10, insert "public and" before
commercial; Randolph objected. Martin - no
sense re-involving public stns. Rogers - only
encouraging coverage; doesn't mean we'll pay
for it at all; Discussion between Martin & Rogers.
~~Ay~~ for: 3 Opp'd - Randolph.

Randolph – p1 line 25 delete "to the extent possible"; line 26, delete "reduce or"; objection ~~by~~ by Rogers. Discussion by Randolph & Rogers.
Rogers – ~~not all~~ some interference coming fm private sector; cd bind state to upgrading cable system.
Randolph – amdmt makes clear that Div of
955 Telecomm. will clear their own. Martin discussion
966 Rogers – eg, getting interference on ch 8 & 3, which are local – ~~eg~~ cable interference. Technologically impossible.
981 Hill – Rep Rogers is correct. Language allows flexibility, but amdmt wd not be possible to carry out, wd have to cut svc.
003 Bylsma – just delete "reduce or"
~~Martin – some cable TV stns found they were~~
Randolph w/drew amdmt

Rand – elim line 28, word "unnecessary"
elim "new & innovative", line 29. Rogers moved to divide motion. Discussion. Rogers w/drew motion to divide qstn. Discussion. Randolph – for others – against failed

Bylsma – line 26, elim "reduce or"; Rogers asked unan consent; no objection, passed.

delete
060 Randolph moved to ~~clean~~ all lang, lines 15+16, p. 1;
Martin objected. Discussion.
passed, Martin no; everyone else, yes

amended
116 Randolph asked for ~~by~~ tomorrow's hearing.

Adjourned 5:26

HB3 156 (?)
Randolph moved to rescind action on ~~3rd~~ consent
last mtg & insert other ~~motion~~ /
amendment & no to pass bill passed unan

TELELINK
COMMUNICATIONS INC.

INFOCOM DIVISION

February 3, 1982

The Hon. Terry Martin
Chairman
House Labor & Commerce Committee
Pouch V
Juneau, Alaska 99811

Mr. Chairman:

My name is Allen Blume, and I represent TELELINK Communications Inc., a new, Alaska-based firm that specializes in teleconference service delivery and general telecommunications consulting. The principals in TELELINK have better than twenty years experience in technical, economic, regulatory and user applications of telecommunications.

We strongly support the provisions of HCR56, especially sections (1), (3), (4) and the legislative coverage provision. Our testimony today will focus on these points, and what we feel are competitive trade barriers that we have met in attempting to do business with the state.

Item 1: The state should secure services from private enterprise or certified and franchised utilities and contract for system operations.

We agree. In the six months that TELELINK has been operational, we have contacted at least eighty of the divisions, sections, boards and commissions of the state to offer demonstrations of our Conference Message Exchange (CMX) teleconference service.

Our service provides:

- Moderated teleconferences
- On-line user training
- Optional automated teleconferencing
- Direct-dial access from any standard telephone
- Digital facsimile, computer text and slow-scan television interconnects
- Complete interconnectability with the Legislative Teleconference Network and Learn/Alaska.

By providing working demonstrations and free half-hour blocks of time to potential users we thought to encourage examination of our product, and stimulate innovation in problem solving by the agencies.

Mr. Chairman, it is no secret that the cost of state government has gone off the map, because of increased demand for services by the public. It is also no secret that one of the greatest single costs of government, in a state as large as Alaska, is travel in support of government operations.

This year the Governor and the Alaska Legislature have made public pronouncements about their intent to "hold the line" or "cut" this runaway spending. Yet, in none of these statements is there an offer or demand to look for efficiencies that will avoid impairing the necessary delivery of programs.

It is small businesses such as TELELINK, the growing mini-computer industry and other direct providers of telecommunications goods and services that will make the budget cuts feasible, without damaging essential programs.

Sec. 1 of HCR56 is a vital first step, but it must be carried out with enthusiasm and commitment. Agencies of the executive, legislative and judicial branch should be encouraged to use contemporary communications technology and providers to evaluate their existing medium with an eye towards improvement; and where they insist on traditionally inefficient techniques - be appropriately penalized.

In this same light, and although the measure is not before this committee today, we support HB 506 appropriating $40 million to a telecommunications revolving loan fund, with some changes.

Item 3: Regulatory and government barriers should be removed.

We agree. Yesterday we requested of the Director of Legislative Affairs Agency a memoranda outlining the applicability of provisions of Executive Order 50 realigning state telecommunications services, to the operations of the Legislative Teleconference Network.

While we recognize that the legislature is an entity unto itself for certain purposes, it seems inconsistent that some levels of government would be bound by standards of fairness and economic equity, while others are not.

We would hope that the provisions of Sec. 3 would be equally applied to all branches of government.

Item 4: Alaskan firms should receive first consideration.

Again, we agree. We would not rule out use of other qualified firms, but obviously it is in the state's economic and social interest to promote local enterprise.

Legislative Coverage: In this we also concur, but would suggest that this scope of activity be broadened to encourage other technologies to enhance the operations of legislative reporting services; individual newspapers and other related community information programs.

Sincerely,

Allen D. Blume
Marketing Associate

TELELINK
COMMUNICATIONS INC.

CONFERENCE MESSAGE EXCHANGE (CMX)

TELELINK's new CMX service is an innovative approach to providing business and government with a cost-effective alternative to escalating travel expenses and lost executive productivity. CMX is a teleconferencing system reached by dialing from any standard telephone set, and, does not require the use of operator handled calling, eliminating special charges and delays. Besides helping managers to save on tight travel budgets, CMX may actually increase office productivity because of it's time saving nature.

TELELINK's CMX services are tailored to assist both large and small organizations in an easy to use, affordable manner. Our on-line telemoderator assists the customer in teleconference set-up, monitors line quality, and assures a successful conference. With TELELINK's CMX service, access to a world of new and timely methods for conducting business are as close as your telephone.

SERVICES

CONFER-CALL -- CONFER-CALL is used for general teleconferencing. It is oriented towards staff, board, committee, sales, or field office meetings needing fast, economical connections from multiple locations. CONFER-CALL is also ideally suited for special applications such as; new product promotions, political caucuses, workshops, seminars, and training sessions.

AUTO-CALL -- AUTO-CALL provides CMX users with cost saving teleconferencing during off peak hours. AUTO-CALL is for CMX users who do not require a telemoderator. Associations, professional groups or others not needing teleconferencing during the normal working day can use the fully automated CMX AUTO-CALL service.

DATA-CALL -- DATA-CALL is used to enhance an audio teleconference with computer graphics, visual materials and is especially use ful for conference notes, agendas, and records. Customers use their own data terminals, word processors or facsimile machines. DATA-CALL can be used in conjunction with other CMX services providing the hard copy needed during meetings.

RATES

CONFER-CALL -- $.380 per minute, per location with 1/2 hour minimum. Reservations are required at least 72 hours in advance. A $50 fee will be charged for cancellations within 24 hours of scheduled times.

AUTO-CALL -- $.275 per minute/per location with a maximum of 16 participants. AUTO-CALL is available from 8:00 pm PST until 6:00 am PST. Reservations are required.

DATA-CALL -- Prices for DATA-CALL are quoted separately and may vary according to the type of data equipment used.

OTHER CMX SERVICES AND RATES

RECORDING AND CONFERENCE TRANSCRIPTION -- TELELINK will provide users of CMX services with a master cassette tape or type transcriptions of teleconferences. $12 per cassette or $10 per transcribed page.

CALL-OUT CONFERENCE REMINDERS -- Teleconference reminders or conferee additions can be handled by our CALL-OUT service. $2 per call and any long distance charges.

CUSTOM TELECONFERENCE INSTALLATIONS -- TELELINK will install customized, in-house teleconference equipment selected from several types of equipment and systems. Lease or purchase options are available.

TELEPHONE COMPANY CHARGES -- TELELINK is not responsible for telephone company local or long distance charges. TELELINK has made every possible effort to configure it's CMX service so that customers telephone calling charges are minimized. On request, TELELINK will make arrangements for customers with special billing requirements.

JUNEAU EMP

"The Voice of Alaska's Capital City"

75 NO. 246 JUNEAU, ALASKA, THURSDAY, DECEMBER 17, 1981

Firm sets up phone conferences

By Empire Staff

Stuart Browne and Allen Blume say they are selling a "mechanism of efficiency" in the form of a new, direct-dial teleconferencing service for Alaska and the Pacific Northwest.

The Conference Message Exchange provided by Telelink "is specifically designed for busy executives, agency directors or citizen participants who find themselves on the road to meetings and conferences, when they need to stay at their desk doing work," Browne said.

Telelink provides a teleconferencing bridge capable of linking up to 13 separate locations into a common conversation by simply placing a direct-dial long distance or local call, said Blume. When the system is fully operational, it will have the capability to tie in 23 locations at once.

No special equipment, just a telephone is required, to be connected into the system for a teleconference call. It can work "any place in the world there's a telephone," said Blume.

The service is "not absolutely replacing travel. ... You still need eyeball-to-eyeball contact," said Blume. Use of the system, however, can greatly reduce travel time, expenses and intangibles such as employee fatigue, said Blume.

The system works much like the Legislature's teleconference system, but it does not require individual teleconference locations — just a telephone

Estimates of a teleconference cost per-port, per-hour is generally between $60 and $75 based on the long-distance tolls for the points connected. Thus, a teleconference including Anchorage, Fairbanks, Kodiak, Bethel, Kotzebue, Barrow and Juneau would cost roughly $310 in long distance tolls, plus $159.60 for Telelink's service, said Blume.

Contrast that with travel expenses that include round-trip airfare, ground transportation, hotel accomodations, meals, entertainment and factors such as lost performance in the office, missed travel connections and last minute changes in meeting locations or agendas, says Blume.

Telelink's office in the Assembly Building acts as a nerve center for the teleconferencing.

Participants call Telelink and then carry the long-distance charges themselves, said Blume.

There are limitations to the use of the teleconference system, Blume added. Those include the loss of visual cues, the need for agendas to be prepared and circulated in advance, and a need for the person presiding over the meeting to be sensitive to the participants. Blume and Browne advise that one-way presentations not exceed five minutes without some inquiry for questions and comments.

Demonstrations to state agencies and private business have been met with a "very enthusiastic response," said Blume. "We're looking at shrinking the distance in Alaska through this kind of medium."

Browne, who is president of Telelink, is a former telecommunications planner with the Department of Transportation and Public Facilities. Blume is a former legislative employee.

Special phone conference comes to Ak

Stuart Browne, president of TELELINK Communications Inc. has announced the inauguration of a direct-dial teleconferencing service for Alaska and the Pacific Northwest.

"Our new Conference Message Exchange service is specifically designed for busy executives, directors or citizens who find they need to stay at their desk doing work," Browne said.

Telelink's CMX is a state-of-the-art teleconferencing bridge capable of linking up to 25 separate locations into a common meeting point by simply placing a direct-dial long distance or local call.

"In normal use, we can offer four separate and simultaneous conferences using either voice or data as the communications medium," Brown said. "The equipment automatically compensates for low signal levels, and gives the impression that teleconferees are not hundreds of miles away but in the next room."

The firm said the service has been demonstrated to a variety of state and private sector users with favorable reactions.

"A lot of people tend to see teleconferencing as a threatening, complicated process, when it is not," Brown said.

He describes the CMX as an extension of the telephone "a most essential tool in the office.

"Instead of placing one call at a time, we offer the opportunity for you to talk to many people simultaneously, saving time, confusion and money."

Browne said the firm will continue to offer free half-hour working demonstrations of the service. He said requests should be directed to him or Allen Blume of the firm.

"We've demonstrated the service to a wide variety of state [illegible] users, and [illegible] ing one call at a time, w[illegible] the opportunity for you [illegible] to many people simulta[illegible] g time, confusi[illegible] Browne conclu[illegible] LINK is offerir[illegible] r working demo[illegible] the CMX servic[illegible] further inform[illegible] s and other T[illegible] programs, Inter[illegible] s may call Brow[illegible] Blume at 586-6[illegible]

business notebook

Conference system links 25 stations

TELELINK Communications Inc., of Juneau has inaugurated direct-dial teleconferencing services for Alaska and the Pacific Northwest. TELELINK's Conference Message Exchange (CMX©) service is a state-of-the-art teleconferencing bridge capable of linking up to 25 separate locations into a common meeting point by placing a direct-dial long distance or local telephone call.

Alaska gets teleconference service

Direct-dial teleconferencing service for Alaska and the Pacific Northwest has been inaugurated by Telelink Communications Inc. of Juneau.

Stuart Browne, president, said the new Conference Message Exchange (CMX) service is designed for executives, agency directors or citizens who find themselves on the road to meetings and conferences "when they need to stay at their desk doing work."

The service, he said, is capable of linking 25 separate locations to a common meeting point by placing a direct-dial long distance or local call.

"In normal use, we can offer four [illegible] for Ata[illegible] become [illegible] allers: joysticks, paddles and keyboards, a spokesman said.

"With the number of Atari VCS owners growing daily, we need more service centers in more places across the U.S.," said Michael J. Moone, president of the consumer electronics division.

Teleconference gets messages out quickly

by Martin Merzer
Knight-Ridder Newspapers

How can you reach a lot of people, in many cities, all at the same time and in a memorable manner?

By satellite, that's how.

The same technology that has made it possible to laugh with the Chicago Cubs and cry over the New York Mets in the privacy of your own home now offers public relations and marketing types a new vehicle for reaching thousands of people simultaneously in scores of cities.

Called "teleconferences," these closed-circuit, satellite-beamed affairs are being used by companies of all descriptions to transmit their sales-motivational sessions and promotional messages.

The programs can originate in virtually any city. Then, they are bounced off satellites (the same satellites that transmit programming to cable-TV companies) and are received in any other large or medium-sized city in the United States.

"This is the coming thing," says Steve Sinsheimer, satellite network coordinator for Jim Sant'Andrea Inc. of New York City. "It's growing and growing every day."

Sinsheimer's company, one of several that now specialize in producing these affairs, last fall handled a 59-city extravaganza for Norwegian Caribbean Lines.

The company was interested in promoting its 1982 cruise schedule and marketing programs, and more than 6,000 travel agents throughout the United States were exposed to that information simultaneously and in high style, according to Fran Sevcik, an NCL spokeswoman.

"Traditionally, a lot of cruise lines, including NCL, have done road shows, but to hit so many places would have taken months," she says. "This way, we not only were able to broadcast the information, but we also had a phone-in system so we could get questions and other feedback."

A similar two-way system was used by the Ford Motor Co. to link up 102 cities for a press conference that promoted the company's 1982 automobiles. An estimated 700 reporters attended the sessions, which were broadcast over a hook-up operated by Hi-Net Communications, a division of Holiday Inns Inc.

"This is a new technology, a new way of doing business," says Mike Davis, a Ford spokesman. "It costs a good bit of money, but we get to a lot of people."

Sinsheimer says costs vary, depending on the scope and nature of the program, but a simple show, beamed to 20 cities, can be bought for about $100,000.

In fact, he says, almost any company can afford it.

Mr. Ray Tyson
House Labor and Commerce Committee
921 West 6th Avenue, Suite 250
Anchorage, Alaska 99501

RE: Memorandum of proposals for draft resolution concerning committee policy on statewide telecommunications.

Dear Mr. Tyson:

In the memorandum dated December 14, 1981, one guideline of resolution says that no commercial advertisements shall be carried in state funded or state subsidised programs. The following guideline says the state should encourage commercial coverage of the legislative sessions by making equipment, space and satellite time available to commercial radio and television. The two guidelines appear to contradict each other. To my way of thinking making equipment, space and satellite time available is a form of subsidizing which would then prohibit commercial operations from broadcasting advertisements and thus remove their method of funding.

On another matter, as a bush resident, I find the proposal to delete commercial advertisements from programs transmitted by state funded or state subsidized programs questionable. In many bush communities, such advertising is the only way people have to learn of available goods and services, and new products. Further, the removal of the advertisements could cause the owners of the programs to charge the state more for their use and this should be weighed. It is also interesting to note that in Dillingham for the past two years residents have had major network programs broadcast both by the state project with commercials, and by the military system with out commercials. My observation has been that most people prefer watching the programs with commercials.

I hope these thoughts will be of assistance to you.

Sincerely,

Les Robinson

465-2200
Position Statement: Spoke of Division of Telecommunications.

PREVIOUS ACTION

HCR 56 — See previous day's minutes (2/3/82) for action taken on resolution. No formal action taken this date due to lack of quorum by the end of the meeting.

ACTION NARRATIVE

Tape #009
Recording
Number 0000

Meeting was called to order by Chairman Martin at 1:12 p.m. Members present were: Representatives Martin, Bylsma, and Randolph. Members absent were: Representatives Gardiner and Rogers. Representative Martin left the meeting approximately five minutes after the call to order. HCR 56, relating to the legislature's policy regarding tele communications, was before the committee, being held over from the previous day.

Number 0014

Roy Paschal, BC Cable Company, Juneau, spoke about interference between cable and local television stations. He said that, historically, UHF channels are used, but the FCC made an exception for Alaska because the lower channels were not being used. He explained local interference problems. Paschal said he wants KTOO (Juneau's public television station) to go to UHF so as not to interfere with his cable stations. After discussion by the committee of UHF and VHF channels, Paschal said that there is objection to BC Cable going to UHF. He said that if cable has to convert to UHF, it will be costly for the consumer. Rep. Bylsma asked Paschal if he would like all public television to get off the VHF channels and move to UHF. Paschal agreed.

Number 0139

Charles Northrip, Executive Director of the Alaska Public Broadcasting Commission and former general manager of KTOO in Juneau, said the specific instances Paschal spoke of in Juneau are related to the local public television station, but not to all telecommunications. He said that, elsewhere in the state, the Learn Alaska and Television Demonstration Project directly relate to the telecommunications division. Northrip pointed out that public stations in the Lower 48 are not relegated to UHF; he said approximately 50% are VHF. Northrip said these channels are assigned by the FCC. He explained that the FCC assigned certain channels to each community, making sure that the same or adjacent channels were not assigned to the same community. Certain channels were set aside for public broadcasting. For a long time in Alaska,

UHF was used for the troposcatter system (telephone); but are now available for public use. Northrip said it takes more power to get the same coverage with UHF--a main UHF transmitter for KTOO would cost about $100,000; it would use more electricity and have a higher operating expense.

Number 0230 — Northrip said that, as the channels are assigned by the FCC, it would be impossible for the Division of Telecommunications to force an independent entity to change frequency, as this is under federal jurisdiction. He explained the local situation between KTOO and the cable transmissions. Northrip said that, as long as cable and transmitters exist on the same channels, there will be interference.

Number 0285 — There was discussion between Northrip and Rep. Randolph about the practicality of switching to UHF.

Number 0300 — Rep. Bylsma asked how a compromise could be reached. Northrip suggested that the cable could carry the public station on UHF free to any consumer, except for the charges for deposits and converter box. Objections to this are a poor signal; cable doesn't reach to all areas; and, as public stations are partially state-funded, all people should have access. Northrip did not feel it was possible to completely eliminate the problem.

Number 0360 — Alex Hills, state Administration, reiterated the distinction between state-operated programs and separate entities receiving state funds. He said they have resolved interference situations in several communities. Hills said that phase locking and co-channel assignment have been used as solutions rather than UHF. Hills felt that, even without the resolution (HCR 56), the Division of Telecommunications would continue to work on these areas.

Number 0435 — As there was not a quorum, and no one else wished to testify, the meeting was adjourned by Vice-Chairman Bylsma at 1:43 p.m.

Special Orders:

2/4/82 1:12

0000 Call to order

014 Roy Pascal, re line 23, p. 1; spoke about interference bet. cable & local stns.

040 Randolph – need stronger language

045 Pascal – historically (cable?) goes on UHF channels; exception made by FCC for Alaska because lower local channels not being used. Explained interference problems

06? Randolph asked expense of switching; Pascal – $2-3,000. This change wd eliminate all interference. Wants KTOO (public stn) to go to UHF.

089 Byloma & Randolph discussed possible rewording.

100 Pascal – there is objection to going to UHF. If cable has to convert to UHF, will be costly for consumer.

128 Byloma – you wd like all public TV to get off lower & move to higher channels. Pascal agreed.

139 Charles Northrip, Exec Dir, Ak Pub Broadcasting Comm., former gen mgr KTOO, Juneau. Specific instances Pascal speaks of in June are related to local pub. TV stn, but not all telecomm. Elsewhere in state, (Kodiak, Ak, TV demons. proj.) directly relate to telecomm. div. Pub stns in lower 48 are not relegated to UHF; approx 50% are VHF. These channels are assigned by FCC; certain channels were assigned to each community – same or adjacent channels not assigned to same comm.

Certain
~~Some~~ channels were set aside for public broadcasting. For a long time in ak, UHF was used for tropospheric system (telephone); but now available for public use. Takes more pwr to get same coverage w/UHF; main xmtr for UHF for KTOO wd cost ~~as~~ abt $100,000. More electricity, higher operating expenses.

230 ~~Suggestion~~ ~~clear~~ These channels are assigned by FCC; wd be impossible for Dir of Telecomm to force independent entity to chng freq. when assigned by FCC (federal jurisdiction). Explained local situ between KTOO & cable transmissions. As long as cable & xmtrs must, on same channels there will be interference.

285 Randolph – correct that switching to UHF wd solve prob? (Yes) But difficult to get FCC appl? Northrup – yes; also expensive (at least $100,000) Not practical.

300 Byloma – how cd compromise be reached? Northrup – ~~Sec. communities, cable failed petn to do~~ cable cd carry public stn (on UHF) free to any consumer, except deposit on converter box. Objections – poor signal, some people can't hook up (cable doesn't reach); state funds for pub TV, so all shd have access.

355 Not possible to completely eliminate problem;

360 Alex Hills ~~Alec Hill~~ – ~~eg [illegible] [illegible]~~ reiterated distinction between state operated progs & ~~[illegible]~~ separate entities receiving st. funds. Have resolved interference prbs in several communities. Phase locking & co-channel assignment have been used as solutions rather than UHF. ~~[illegible]~~ Even w/o resolution, Div of Telecomm. Sv. will continue to work on these areas.

435 As there was no quorum, mtg was adjourned. 1:43.

PREVIOUS ACTION

HCR 56

See minutes of meetings on 2/3/82 and 2/4/82.

Action taken this date: Chairman Martin moved to rescind action in deleting language, p. 2, lines 11-12, "by making equipment, space, and satellite time available to the private sector." Rep. Rogers objected. Rep. Rogers withdrew his objection. Motion passed with no objection.

Rep. Randolph moved to add language, p. 2, line 11, "by making equipment and satellite time, which has already been purchased by the state, available to the private sector."

Rep. Gardiner moved to amend Rep. Randolph's amendment by inserting, after the word "to", the language, "all members of", so amendment would read "by making equipment and satellite time, which has already been purchased by the state, available to all members of the private sector". Motion passed without objection.

Rep. Randolph's amendment passed with no objection.

Rep. Rogers moved to incorporate amendments into a new committee substitute as amended, and to report bill out of committee with individual recommendations. There being no objection, motion passed.

HB 630

No previous action.

Statutory reference: AS 44; AS 18.54.070; AS 18.56.090; AS 45.89; and various loans

under AS 03; AS 16; AS 18; AS 26; AS 44; AS 34; AS 37.

Action taken: Rep. Rogers moved to refer HB 630 to Special Committee on Banking; Rep. Gardiner requested a letter be attached to referral. Motion passed without objection. Representatives Bylsma and Rogers were appointed to work with Banking Committee.

ACTION NARRATIVE

Tape #010
Recording
Number 0000

The meeting was called to order by Chairman Martin at 1:08 p.m. Members present were: Representatives Martin, Bylsma, Gardiner, Randolph, and Rogers. There were no members absent. Representative Metcalfe was present to give testimony on HB 630.

Number 0010

Chairman Martin brought HCR 56 before the committee. He moved to rescind the committee's action of 2/3/82 in deleting language, page 2, lines 11-12, "by making equipment, space, and satellite time available to the private sector." Rep. Rogers objected. There was discussion of the motion. Rep. Bylsma suggested amending to allow the private sector to use available equipment. Rep. Rogers withdrew his objection to Rep. Martin's motion; motion passed without objection.

Number 0120

Rep. Randolph moved, page 2, line 11, to amend language to read, "by making equipment and satellite time, which has already been purchased by the state, available to the private sector." Rep. Rogers asked unanimous consent. There was discussion of the motion. Rep. Randolph said it was his intention to make available only that equipment and time which has already been purchased by the state.

Rep. Gardiner moved to amend Rep. Randolph's motion by adding, on page 2, line 12, after the word "to", the language, "all members of the private sector", so language would read, "by making equipment and satellite time, which has already been purchased by the state, available to all members of the private sector." There was discussion.

On the question, Rep. Gardiner's amendment to Rep. Randolph's motion passed without objection. Rep. Randolph's motion passed without objection.

Number 0164

Rep. Rogers moved to incorporate the amendments into a committee substitute and to report CSHCR 56 from committee with individual recommendations. Motion passed without objection.

Number 0176

Chairman Martin then brought HB 630 before the committee. He went over the fiscal note and backup material.

Number 0201

Tom Sofo, LAA Legal Services, went over Commonwealth North's suggestions. There was discussion. It was noted in discussion that the bill did not cover all state loan programs.

Number 0395

Don Hostak, Director, Division of Loans and Veterans Affairs, said the bill as written would reduce their budget by over $500,000. There was discussion of how loans are obtained. Rep. Rogers questioned the need for the second step in AHFC loans (which would be added by the bill); Hostak saw no reason for it.

Number 0473

Rod Moran, Director, Administrative Services, Community & Regional Affairs, said the Loan Authority created by HB 630 would affect his department's loans. He felt the bill might confuse the public. He wasn't certain the Alaska Housing Loan Authority is the correct approach to take in consolidating loans. He felt the Authority didn't give the administration enough strength. He said HB 630 repeals the direct loan authority of the division. There were questions by the committee. When questioned by Rep. Rogers, Moran responded that there were no lending institutions who would provide interim financing on non-conforming loans.

Number 0610

Gary Jenkins, President, Specialized Professional Services, said he had compiled a guide to state loan programs. He said he also represented the National Federation of Independent Business. He said that many loan programs were not being addressed at all in the bill. He also found

inconsistencies; eg, Section 23 includes some loans that don't exist or that will not exist under the bill, such as CFAB and ARRC. He felt that the Alaska Housing Loan Authority adds another layer of bureaucracy.

Side 2, Number 001 — Jenkins commented on problems with AIDA business loans.

Number 0049 — Tom Williams, Commissioner, Department of Revenue, said there were problems with how the bill works. He felt consistent goals and purposes are needed in loan programs. He thought the bill attempted to do this, but there were problems in the method. He recommended referral to a subcommittee for further work. The committee spent some time discussing CFAB.

Number 0138 — Williams said there are also problems with housing authority programs. He said there are two types of housing--urban and rural--and unconventional situations, such as water sources, foundations, and waste disposal. He said these factors affect how the market in the Lower 48 views mortgages. He was afraid that, rather than eliminating redundancy in loan programs, the bill would create another layer of redundancy.

Number 0194 — Rep. Rogers moved to refer the bill to the Special Committee on Banking. Rep. Metcalfe had no objection. Rep. Gardiner felt the committee should draft a letter requesting the Banking Committee consider other loan programs that are not addressed in the bill, including the Alaska Power authority.

Number 0244 — Rep. Rogers felt four things should be considered: 1) including all loan programs; 2) tying loose ends on those programs being eliminated; 3) not adding another layer of bureaucracy; and, 4) consolidating social loan programs.

On the question, the motion passed without objection. Representatives Bylsma and Rogers were appointed to work with the Special Committee on Banking on HB 630.

Number 0263 — There being no further business to come before the committee, the meeting was adjourned.

HB 630 - Relating to Loan Programs

HOUSE LABOR & COMMERCE COMMITTEE

HEARING DATE: 2-8-82

0000 Call to order 1:08 All members present

010 GCSHCR56 Ch. Martin moved rescinding action deleting making eqpt, satellite, etc; Rogers objected.

Ch. Martin gave reasons for his motion

030 Rogers felt including language wd indicate state wd pay for session coverage by commercial broadcasters (besides Capital 82). Rogers & Martin discussed costs.

050 Randolph gave his position; discussion

078 Bylsma suggested amending to allow private sector to use available eqpt. Discussion.

091 Rogers - felt there is no unused space avail; ~~was said suggested~~ amdmt giving eqpt on hand & satellite time already purchased available on lottery basis. Discussion.

115 Rogers w/drew objection to rescinding no;

180 Motion to delete: Rogers w/drew no to delete. ~~moved, for using HCR 56, to say "by making~~ "(by making eqpt +) satellite time, which has already been purchased by the st avail to the private sector." Randolph

Rep Rogers asked unan consent.

Gardiner, amdmt to amdmt, line 12, after word "to" - "all members of the private sector" Discussion re equal access

Amdmt to amdmt passed. (no objection)

Amdmt - no objections - passed

164 Rogers moved to incorporate amdmts into new CC as amended & pass on unan'l recommend'n.

176 HB 630. Ch Martin went over fiscal note & backup mat'l.

201 Sofo, LAA Legal Svcs

Went over Commonwealth North's suggestions.

Explained how they went about looking at amdmts to bill.

Said "social" loan progms not addressed.

263 Rogers - so we're repealing low/moderate income housing, child care, veterans, ~~loans~~ AHFC housing dev't, economic disasters - why are we shutting these down?

Sofo - only ones repealed were those w/no activity at all. Attempt of bill is to put categories left into some kind of framework.

310 also changed area dealing w/housing loans.

363 Did not address all points raised by Commonwealth North

Gardiner - did this address every state loan progm?

Sofo - no Gardiner - mining loans? Sofo - some consolidated w/AIDA, some still out there. ~~Gardiner - want exclus~~

/Sofo - cd get more info after recvg notes

→ 395 Don Hostak (Hostak) Holstad - Dir, Sm Loans & Veterans Affairs

Bill as written wd decrease their budget over $500,000.

Banks won't service some loans (e.g., limited entry loans).

Gardiner gave explanation of limited entry permits as used.

Difficult to allow anyone but state to hold mortgage (in order to avoid corps & others from gaining control of permit holders).

Rogers - why add 2d step in AHFC loans? Hostak - sees no reason.

473 Rod Moran, CoRA (Dir, Admin Svcs) — 630 creates Ak Housing loan Auth; his depts loans wd be affected. Bill may confuse public. Not certain Ak Housing Auth is correct approach to take in consolidating loans.
authority; 1) doesn't give admin enough strength
2) CoRA can't rep'd on committee
HB 630 repeals direct loan authority of division.

546 Randolph - gotcha

564 Rogers, re direct origination — Non conforming housing loans — banks won't provide interim financing; are there banks who'do give interim financing for addns to non-conforming loans? Moran — no, no interim financing. Randolph - no way to get interim money? No.

610 Gary Jenkins, Pres, Specialized Proff'l Svcs — compiled & published guide to state loan progms; also rep's Nat'l Fed'n of Independent Businesses. Many loan progms not being addressed at all.

678 Inconsistencies — Sec 23 includes some loans that don't exist or won't exist under bill. (Seafab, ARRC)

709 Ak Housing Loan Auth adds another layer of bureaucracy.

side 2 commented on
0001 AIDA business loans — problems, difficulty of getting loans, esp to small businesses.

049 Tom Williams, Comm, Revenue; on board of AHFC, AIDA & other agencies. Problems w/ how bill works. Need consistent goals & purposes in loan progs; bill attempts to do this, but probs in method. Recommends referral to subcommittee for further work. Need to address probms of eliminating progms like ~~Sea~~ ARRC & Seafab. ~~or those~~ Gardiner (101) - gotns as stockholders in Seafab; Williams said these are issues that need to be addressed. Discussion - Gardiner, Williams re ~~Seafab~~ CFAB.

138 also prob w/ housing authority programs. 2 types of ~~loans~~ housing - urban & rural; unconventional sites - water sources, foundations, waste disposal. These factors affect how market in towns 48 views mortgages. ~~Afraid it~~ afraid that, rather than eliminating redundancy in loan progms, will create another layer of redundancy.

194 Rogers - gotn re fiscal note. Rogers thought bill shd perhaps be ~~heard before~~ referred to Banking committee before being dealt w/ by L&C. He moved to refer to Spec Comm on Banking

214 Metcalfe - no objection

216 Martin ~~moved~~ reiterated motion
Gardiner said we shd request draft ltr Banking Comm to consider other loan programs that aren't addressed in bill, inc. Ak Pwr Auth

244 Rogers - 4 things shd be considered 1) inc all loan progms 2) tie loose ends on those eliminated; 3) not add another layer of bureaucracy 4) consolidate social loan pgms.

Mo passed; Bylsma & Rogers appointed to wk w/ Comm on Banking.

263 adjourned.

LABOR AND COMMERCE COMMITTEE

To: Russ Meekins, Chairman
Special Banking Committee

From: Terry Martin, Chairman
House Labor & Commerce Committee

Date: February 8, 1982

Subject: HB 630 referral

Pursuant to hearing and discussion by this committee, the members have agreed that the Special Banking Committee should review HB 630 before action by the Labor & Commerce Committee. Areas we request your committee review are:

1) to include all state loan programs under the proposed Alaska Business Loan and Industrial Development Authority:

a) consolidation of social loan programs;

b) include the Alaska Power Authority in the loans being addressed by this legislation;

2) review contractual and constitutional rights of loan participants under those loan programs being eliminated; and,

3) evaluate the bureaucracy potentially created by this legislation.

Labor & Commerce Committee members Bylsma and Rogers have been appointed by the committee chairman to work with your committee on reviewing HB 630. After review by the Special Committee on Banking, we request HB 630 be returned to the House Labor & Commerce Committee for expedited consideration.

Terry Martin by

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE CONCURRENT RESOLUTION NO. 56 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

Relating to the policy of the legislature concerning telecommunications.

BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:

WHEREAS a significant amount of public money is being invested in telecommunications systems; and

WHEREAS the private sector that deals in Alaska telecommunications has faced increasing competition from government as a result of state wealth and expenditures for telecommunications; and

WHEREAS the private sector is the foundation and vitality of the American economic system; and

WHEREAS the Alaska State Legislature has not adopted a policy regarding the burgeoning telecommunications system;

BE IT RESOLVED that the Alaska State Legislature shall consider the following guidelines when considering telecommunications legislation:

(1) to the extent possible, the divisions of telecommunications should procure cost-effective services from private enterprise or certified and franchised utilities and contract for the construction, management, operation, and maintenance of telecommunications systems;

(2) to the extent possible, the divisions of telecommunications should eliminate airwave interference of state-owned or financed stations with privately owned and operated cable television stations;

(3) unnecessary regulatory and government barriers which impede growth and development of new and innovative services by the private sector should be removed;

(4) companies owned or operated by residents of Alaska and based

in Alaska should be considered before companies from other states when telecommunications goods or services are needed from the private sector;

(5) Alaska's villages should have the opportunity to own, operate, and maintain their own satellite earth stations or to contract with the private sector for operation and maintenance of the stations;

(6) in-state programming beneficial to both urban and rural residents should be cost effective and the production of these programs should be available to the private sector on a contract or bid basis; and be it

FURTHER RESOLVED that the legislature encourages public and commercial radio and television news coverage of the legislative sessions." by making equipment and satellite time, which has already been purchased by the state, available to all members of the private sector."

Position Statement: Opposed bill.

Jeff Barry
Committee Aide
House Labor & Commerce Committee
Pouch V
Juneau, Alaska 99811
465-3669
Position Statement: Gave results of research.

PREVIOUS ACTION

HB 597

No previous action.

Statutory Reference: AS 45.75

Action Taken During Meeting: Rep. Rogers moved, line 6, to delete word "bread" and insert word "food"; and insert, on line 11, statutes repealed, the following statutes: "AS 45.75.190(4), AS 45.75.250, AS 45.75.260, AS 45.75.270, AS 45.75.310". Representatives Martin and Bylsma objected. There was discussion of the amendment. Question was called: for--Gardiner, Rogers; opposed--Martin, Bylsma (Rep. Randolph had left the meeting at 1:30). Motion failed.

Rep. Gardiner moved to report bill from committee with individual recommendations. Motion passed unanimously.

ACTION NARRATIVE

Tape #011
Recording
Number 000

The meeting was called to order by Vice-Chairman Bylsma. Members present were: Representatives Bylsma, Randolph, Rogers, and Gardiner. Rep. Martin was absent when the meeting convened, but joined the meeting at 1:40. Rep. Randolph left the meeting at 1:30. Under consideration by the committee was HB 597 relating to the sale of bread.

Number 005

Representative Ernie Haugen, prime sponsor of HB 597, gave the reasons he felt the legislation was needed. There was discussion by the committee and Rep. Haugen of the current law and changes proposed. Rep. Bylsma asked how one could mark bread

which was unwrapped; Rep. Rogers responded.

Number 102 — Jess Garcia, Associated Grocers, Seattle, testified about why he felt the law should be repealed. (Garcia submitted written testimony in the form of a letter to the committee; this is available from the committee.) Rep. Rogers asked Garcia his opinion of repealing the law in regard to other products, such as dairy products. Garcia had no objection to that.

Number 162 — Peter Froehlich, Assistant Attorney General, on behalf of the Department of Law, said the Department had no position on the bill. He said the Law Department and Consumer Protection Agency have no problems with the repeal of the bill as long as labeling requirements are maintained. Rep. Rogers asked if consumers would still be protected if the practice of marking products is maintained. Froehlich said that was all that is necessary to protect the consumer. There was discussion among the committee. Rep. Rogers asked Rep. Haugen if he objected to extending the bill to include other sections (covering other foods); Rep. Haugen did not object.

Number 245 — Art Hammer, owner of a store in Petersburg and member of Associated Grocers, supported the bill. He said he could buy bread from one supplier if that supplier complied with Alaska law; at present, he has to buy from several suppliers. He said under the present law, he could not purchase holiday breads, as they come in various weights. Upon questioning by Rep. Bylsma, Hammer said that Washington bakers have to switch pans to conform to Alaska laws; consequently, only a few bakers supply Alaska bread. He felt the bill would open the market to other suppliers. There was discussion.

Number 333 — Ralph Woll, General Manager of Sunrise Bakery, Eagle River, opposed the bill. He said cheap bread would be the result, such as "balloon bread"--bread which has much more air in it. He said that normally, bread is made with a ratio of 9 pounds of yeast to 100 pounds of flour; but balloon bread is made with 44 pounds of yeast to 100 pounds of flour. He said this would cause the price to drop, and Alaskan bakers could

not compete. He noted that consumers get less bread for the money in such a situation, and that this would not be good for Alaska. There was discussion.

Number 385

Rep. Gardiner asked if people weren't aware of this situation (balloon bread containing a lot of air) if the weight was marked. Woll said that consumers tend to look at price, not weight. After further discussion, Woll said that Washington and Oregon are the only states which don't have laws regulating bread, and went on to say that balloon bread is illegal in Washington. Garcia, who spoke previously, pointed out that balloon bread is normally labeled differently, eg, "giant", "large", etc. He was sure Alaska consumer protection laws would protect against this. Rep. Gardiner wanted a sample of balloon bread.

Number 474

Jeff Barry, committee aide, said his research showed that current Alaska law is based on national law. He said it was tied into the Consumer Price Index. In Washington, weights dropped, but prices remained the same. He felt this could affect the Alaskan Consumer Price Index. He said the committee should also consider the effect on the Alaskan market, as they will need new sizes of bread pans, considerable cash outlay to compete.

Number 534

Rep. Rogers said he did not see how the public is served by regulating bread.

Number 555

Rep. Rogers moved to amend the bill on line 6 by deleting the word "bread" and inserting the word "food"; and to add further sections to be repealed on line 11 by inserting "AS 45.75.109(4), AS 45.75.250, AS 45.75.260, AS 45.75.270, AS 45.75.310". He said this would repeal the restriction of bread weights and butter and dairy product units. Representatives Martin and Bylsma objected.

Number 625

There was discussion on the proposed amendment. Rep. Byslma felt the amendment would require more research for people shopping for food, and would deceive the public. Rep. Martin said he objected because the amendment would make a fairly simple bill complex. There was discussion about packaging in sizes misleading to the

public.

The question was called. Voting for the amendment were Representatives Gardiner and Rogers; voting against the amendment were Representatives Martin and Bylsma. The amendment failed.

Side B, Number 010 Rep. Gardiner moved to report the bill from committee with individual recommendations. The motion passed without objection.

As there was no further business to come before the committee, the meeting was adjourned at 2:00 p.m.

Introduced: 5/29/81
Referred: Labor & Commerce

IN THE HOUSE BY HAUGEN AND ROGERS

HOUSE BILL NO. 597

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - FIRST SESSION

A BILL

For an Act entitled: "An Act relating to the sale of bread."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45.75.200 is amended by adding a new subsection to read:

(d) The marking provisions of this section do not apply to unwrapped loaves of food.

* Sec. 2. AS 45.75.250 is repealed.

AS 45.75.190(4), AS 45.75.250, AS 45.75.260, .270, .310

Special Orders:

Rep. Haugen attending.

Randolph
aft 1:30

2/9/82

000 Call to order by Bylsma (Martin absent)

005 Haugen, bill sponsor – gave reasons legislation is needed.

080 Rogers – read through law

094 Bylsma – gstn abt marking unwrapped bread
Rogers – answd

102 Jess Garcia, Assc'd Grocers – submitted ltr ~~from~~ gave reasons he feels law needs to be repealed.

145 Rogers – wondered if law shd be repealed applying to other products (dairy, etc). Garcia saw no problem w/ that.

162 Peter Fraelich, asst AG, on behalf of Dept of Law. No posn on bill; said Law Dept & Consumer Protection have no probs w/ repeal of bill as long as labeling reqmts maintained

Rogers – consumers wd still be protected if marking product is maintained? Fraelich – yes, that's all that's necessary to protect consumer.

207 Haugen - comments

Rogers - "

Bylsma - how do you label unmarked bread; is

225 it pre-weighed? Fraelich - sub (d) eliminates this issue

Rogers asked Haugen if he objected to extending to include other sections; Haugen didn't object.

245 _____ Hammer, owner of store in Petersburg & of Assoc. Grocers. Cd buy bread fm 1 supplier if complied w/ state law. Can't get holiday breads under present law. Supports bill, ~~intending an~~

276 Bylsma - goes abt how it wd affect bread on the shelf

Hammer - Wash. bakers have to switch pans to conform to Alaska laws; only a few bakers supply Alaska bread. Wd open market to other suppliers.

Bylsma - why make 15 or 16 oz loaves except to make people believe it's 16 oz.

Haugen - response

Discussion

333 Ralph Wall, Gen Mgr, Sunrise Bakery (part of ITT) - biggest bakery in Alaska. Opposes bill; eg, "balloon bread" - cheaper bread, alot of air (44# yeast to 100# flour; normal 9#: 100#). Price drops, Alaskan bakers can't compete. Less bread for the money. Not good for Alaska.

Discussion.

385 Gardiner - aren't people aware of the weight is marked?

Wall - they look at the price, not the weight.

Hanger - people can tell by looking at content.

Local bakers can't supply needs.

418 Rogers - this wdn't affect marketing balloon bread.

Cd do this under current statutes.

Wall - response; Wash & Oregon only state w/o law.

balloon bread illegal in Wash.

444 Garcia - balloon bread normally labeled as something different ("giant" "large" > etc). Sure Ak. consumer protection laws wd protect against this. Wd market same bread as sold in Wash.

Gardiner wanted sample of balloon bread.

474 Barry - results of research. Ak law based on nat'l law. Tied into CPI. In Wash, weights dropped, but prices remained the same. Cd affect Ak CPI. Shd consider affect on Alaskan market (new sizes bread pans, inability to compete).

534 Rogers - doesn't see how public is served by regulating bread, or any of the other restrictions

555 Amdmt line 6, delete bread, ins "food"

line 11 AS. 45.75.190 (4), 45.75.250, 260 .270, .3.0 are repealed. Wd repeal restriction of bread weights, butter & dairy product units

Martin & Byrsma objected.

Bylsma – this wd require more research for shopping, wd deceive the public.

625 ~~Reg~~ Discussion on amdmt.

Martin – object because will make, fairly simple bill complex. Agrees w/ idea of amdmt. Deception in pkging. Likes intent of amdmt, but feels we shd stick to bread.

~~Gardiner con~~

Discussion on packaging in sizes that wd mislead

Bylsma felt amdmt bears looking into

PREVIOUS ACTION

HB 169

No previous action.

Statutory Reference: AS 42.10.420(7).

Action Taken: Rep. Randolph moved to accept the proposed committee substitute for HB 169 for discussion. As there was no objection, the motion passed.

Rep. Randolph moved to report bill from committee. Rep. Bylsma moved to amend motion to refer bill to another committee. Rep. Martin amended motion to recommend referral to Transportation committee with a letter requesting the committee to expedite the bill and to take teleconference testimony from Anchorage and Fairbanks. Rep. Rogers objected. On the question (motion to amend): for--Martin, Bylsma; opposed--Rogers, Randolph. The motion failed. On the question (main motion to report bill from committee), for--Rogers, Randolph; opposed--Martin, Bylsma. The motion failed.

Rep. Randolph moved to report bill from committee with recommendation of referral to Transportation Committee. Motion passed without objection.

HB 586

No previous action.

Statutory Reference: AS 19.10.060.

Action Taken: Rep. Rogers moved to amend bill to add an effective date clause of July 1, 1982; seconded by Randolph. Rep. Rogers withdrew his amendment and moved to amend bill to add effective date clause of January 1, 1983. There being no objection, the motion passed.

Rep. Rogers moved to report committee substitute for HB 586, as amended, from committee. There being no objection, the motion passed.

ACTION NARRATIVE

Tape #12
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:12 p.m. Members present were: Representatives Martin, Rogers, Randolph, and Bylsma. Representative Gardiner was absent. Rep. Martin brought HB 169 before the committee for consideration.

Rep. Randolph moved to accept the committee substitute for discussion; as there was no objection, the motion passed. Rep. Randolph explained the intent of the bill: to allow a person to lease his truck to an organization, and to work for that organization as driver of the truck leased.

Number 045

Andrew Hoge, counsel for Alaska Trucking Association, said that the definition of "private carrier" prohibits what the committee substitute does. He said the bill is inconsistent with the effect of "common carrier". He spoke of complications, such as insurance and safety requirements. He commented that the bill "rips the guts out of the motor carrier act."

Number 111

Rep. Randolph said he didn't see how leasing a truck would relieve the employer of the requirements Hoge spoke of, and asked Hoge for an example. Hoge responded that a common carrier is responsible for safety and insurance. If one is talking about a common carrier, there is no need for the bill, it is provided for. He asked clarification of the intent of the bill. There was discussion. Hoge said, in response to a question by Rep. Bylsma, that the bill seems to say that a private carrier could automatically become a common carrier, without a permit. He said there is a conflict in the language, that the bill creates a class of private carriers, which may not be the intent. He asked for time to submit specific comments. He was concerned that the bill does away with the effect of a common carrier.

Number 231

Rep. Rogers introduced HB 586, of which he is prime sponsor. He gave background and the effect of the bill. He said there are inconsistencies in the manner in which the Department of Public Safety issues permits (for overweight vehicles). He referred to

letters from contractors setting out their problems. (Copies of these letters were given to the committee members, and are available from the committee.) Rep. Bylsma felt the Department of Transportation would be likely to do the same thing. Rep. Rogers responded that the Department of Transportation understands contractors' difficulties better. He said the Dept. of Public Safety seems more nit-picky. He said the bill was submitted, in part, to draw attention to the problem. There was discussion.

Number 304 — The committee took up HB 169 again for further discussion.

Number 332 — Jeff Barry, committee aide, gave the historical aspect of HB 169. He said a common carrier or contract carrier could lease a vehicle from its employees, but a private carrier could not. He said the bill was not intended to give authority for a private carrier to expand into contract carriage, but was solely for an employer/employee situation. He went over protections (insurance, etc.) and situations where the bill would apply. He suggested including a letter of legislative intent to clarify what the bill should do.

Number 412 — Larry Carpenter, Chairman of Interior Energy Corporation and a private carrier, gave his personal situation as an example. He said the bill should eliminate discrimination against a private carrier. There was discussion.

Number 652 — John Longmire, Alaska Trucking Association, said under the bill, any owner/operator would become a private carrier. He gave an example of how the bill could be abused. He said a situation could result that would create unfair competition to the common carriers. There was discussion about possible abuses and insurance problems. Carpenter said the statutes set stringent guidelines, and suggested talking to someone from the Alaska Transportation Commission regarding the likelihood of a private carrier becoming a common carrier without a permit. There was further discussion.

Side B, Number 162 — Rep. Randolph moved to pass the bill. Rep.

Bylsma asked to hear the Alaska Transportation Commission's opinion; Rep. Rogers agreed, as Labor & Commerce is the last committee of referral. He noted that he had received requests for a teleconference. Rep. Martin agreed that further testimony should be taken. He said that he was going to recommend another committee referral.

Rep. Bylsma moved to amend the motion pass the bill by requesting another committee referral. Rep. Rogers felt Labor & Commerce should take further testimony rather than requesting another committee referral. Rep. Martin said he had spoken with Rep. Cato (chairman of House Transportation Committee), who deals regularly with the ATC; he felt the Transportation Committee would have a better opportunity to take further testimony.

Rep. Martin amended the motion to recommend referral to Transportation Committee, with a letter requesting they expedite the bill and take teleconference testimony from Anchorage and Fairbanks. Rep. Rogers objected. On the question, for--Martin, Bylsma; opposed--Rogers, Randolph. The amendment failed. On the question of reporting the bill from committee, for--Randolph, Rogers; opposed--Martin, Bylsma. The motion failed.

Rep. Randolph moved to report the bill from committee with a recommendation of referral to the Transportation Committee. The motion passed without objection.

Number 252

The committee returned to consideration of HB 586.

Jean Kline, Alaska Chapter, Associated General Contractors, said HB 586 addresses a considerable problem in the construction industry. She gave background and examples of past difficulties. Kline felt that Department of Transportation has a better knowledge of the industry than the Department of Public Safety. There was discussion.

Number 356

Rep. Bylsma questioned why one department would do better than another. He pointed out that employees of the Dept. of Public

Safety are trained in law enforcement. He felt transferring powers to the Dept. of Transportation would create another enforcement entity, and he expressed concern about giving another agency that kind of power.

Number 370

Kline responded that Dept. of Commerce has enforcement powers, as do other agencies. She said the Dept. of Transportation is concerned with safety, and they set restrictions on roads and bridges. There was discussion. Rep. Bylsma said the Commissioner of Public Safety had asked the committee to take no action on the bill until his agency could testify. Rep. Rogers said the committee had the Dept. of Public Safety's testimony on a similar senate bill.

Number 452

Jeff Barry, committee aide, said that, in most other states, there is a separate division within the department of public safety which is responsible for weights and measures.

Number 493

Rep. Rogers moved to amend HB 586 to add an effective date clause of July 1, 1982; motion was seconded by Rep. Randolph. After discussion, Rep. Rogers withdrew his amendment, and moved to add an effective date clause of January 1, 1983. There being no objection, the motion passed. Rep. Rogers then moved to report the committee substitute for HB 586, as amended, from committee. Being no objection, the motion passed.

Number 523

There being no further business to come before the committee, the meeting was adjourned.

HOUSE LABOR & COMMERCE COMMITTEE

HEARING DATE: 2-10-82

2/10/82

000 1:12 Call to order by Martin

HB 169

009 Randolph re HB 169 & comm. sub.
Moved to accept CS for discussion; no objection
Explained intent of bill - person can lease vehicle & work driving the truck leased.

045 Andrew Hoge, Counsel for Ak Trucking Assoc.
Spoke of definition of "private carrier." Definition of "common carriers" prohibits what CS does. Bill nullifies effect of "common carrier" - inconsistent.
Spoke of complications - insurance & safety reqmts, etc.
"Rips the guts out of the motor carriers act."

111 Randolph - doesn't see how leasing truck wd relieve employer of reqmts Hoge spoke of. Asked for examples of problems described by Hoge.

132 Hoge - common carriers to resp for safety, insurance, ~~under this provision~~ If talking abt common carriers, no need for bill, it's provided for. If applied to any employer (not common carrier), - asked clarification.
Discussion - Randolph, Hoge

189 Bycam ~~do~~ wd bill let ~~person as~~ private carriers automatically become common carriers w/o permit?
Hoge - seems to say that. There's a conflict in language. Creates class of private carriers, which may not be intent of bill. Asked for time to submit specific comments. Concerned that bill does away with effect of common carrier.

231 HB 586 – Intro by Rogers, effect of bill. Background. Inconsistencies in way Dept Pub Safety issues permits. Referenced ltrs (~~has been to~~ given to committee) from contractors setting out their problems.

259 Bylsma – wdn't Dept of Trans be likely to do same thing

Rogers – Trans understands contractors difficulties better. Pub Safety seems more nit-picky. May not change, but existing enforcement leaves something to be desired. Bill submitted in part to draw attn. to prob

Bylsma – Trans already overburdened.

Rogers – DOT wd be less likely to nit-pick.

Discussion.

304 HB 169 Hoge – wd like to discuss w/ Assocn board; ~~wd like time~~ asked for to study bill.

Discussion.

Martin asked for Barry's comments

332 Barry – gave historical aspect of bill. Common carrier, or contract carrier cd serve for employees, but private carrier cd not. Not to give authority for private carrier to expand into contract carriage, but solely for employer/employee situ. Went over protections (ins., etc) & uses. Suggested including legislative intent w/ bill to clarify.

HB 169

412 Larry Carpenter, Clima, Interior Energy Corp – private carrier. Gave personal situ as example. Bill shd eliminate discrimination against private carrier

530 Rogers – gen – might allow private owner/operator to become common carrier by leasing/driving for different outfits.

Carpenter – suppose he could quit & go to another employer, but doesn't see what difference that wd make.

Discussion.

~~528~~ ~~Big time gotcha~~

600 Carpenter – went over points again

Randolph – reiterated reasons for bill.

Discussion.

652 John Longmayer, ——— Motor Freight, – under bill, any owner/operator will become private carrier. Gave example of how private carrier cd approach companies & offer svcs ~~Attact~~ that wd normally be obtained fm a common carrier at lower cost; unfair competition. Liability gotcha also. Not remote possibility, but very likely.

780 Rogers – agree w/ intent to solve prob raised by Carpenter; wd it be possible to limit times this cd be done;

Side 2
000 Randolph – comments (wdn't affect anything.)

Discussion – abuse, insurance

082 Carpenter – Statutes set stringent guidelines. Suggest talking to someone fm ATC regarding ~~whether~~ likelihood of private carrier becoming common carrier w/o permit.

Discussion.

108 Barry - construction industry, there is an exemption.
Bill clearly establishes that indiv'l must be legit.
employee; re ~~[illegible]~~ going fm job to job - that occurs now.

164 Randolph moved to pass bill
Bylsma asked to hear ATC's opinion; Rogers agreed as C&C is last comm. of referral; also has had requests for telecons.
Martin was going to ask for another referral & also saw need for telecons. also wd be able to have ATC testimony at that time.
Bylsma moved to amend mo to refer bill to another comm.
Rogers felt C&C shd hold telecons & not refer bill
~~Randolph~~ ~~Discussion~~. Randolph concerned abt C&C calendar.
Martin has spoken w/Cate, who has less heavy calendar & deals regly w/ATC. Felt Trans. comm wd have better opportunity.
Rogers said comm cd recommend referral.
Martin amended mo to recommend referral to Trans w/ ltr requesting expedited hrg & taking telecons test.
fm Hinc & Fox

expedite telecons Atc 714

~~Martin~~ Rogers objected

Opposed - Rogers Randolph
favor - Martin Bylsma

100 to pass bill
favor - Rogers R
opp'd Martin - Bylsma

Randolph moved to ~~refer bill~~ pass bill with recommendation of referral to Trans comm. by unan consent.

HB 586

252 Jan Cline - At Chap ATC - bicc addresses consideroc pub in const industry Have background & examples of past difficulties. DOT has better knowledge of industry than Dept PS

350 Randolph - comments

Bylsma - gotns why one dept wd do better than another - put safety trained in law enforcement; creating another enforcent entity, which gives pwr; why wd one be better than another.

310 Cline - Commerce has enforcement pwrs, as do other agencies. Trans is concerned w/safety & they set ~~axle weight~~ / ~~gross weight~~ restrictions on roads & bridges. ~~Troopers don't have~~ Discussion.

Bylsma - Comm Pub Safety has asked Comm to take no action until they can testify

Rogers - have their testimony on a similar senate bill

452 Barry - appears concerns justified - most other states, there is separate depts w/in pub safety, for weights & measures. ~~idea of splitting functions~~ ~~currently~~ ~~be~~

493 Rogers moved amdmt to add eff date clause 7/1/82; second Randolph, w/drew, & removed w/ eff 7/1/83

~~No~~ No obj, mo passed

Rogers moved to ~~pass~~ report out CS for HB 586, as amended No obj, mo passed.

523 Mtg adjourned.

PREVIOUS ACTION

HB 697	No previous action.

Statutory Reference: AS 39.25.

Action tal Rep. Bylsma moved to report SSHB 697 from committee. There being no objection, motion passed.

HB 557

No previous action.

Statutory Reference: AS 10.25.640(4).

Action Taken: No action taken. Mention was made of rescheduling bill for hearing at a later date.

ACTION NARRATIVE

Tape #13
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:07 p.m. Members present were: Representatives Martin, Bylsma, and Rogers. Members absent were: Representatives Randolph and Gardiner. Rep. Martin brought SSHB 697 before the committee.

Number 011

Rep. Bylsma, prime sponsor of HB 697, explained the intent of the bill.

Number 019

Beverly Rayon, Fish & Game, distributed a report. She spoke of problems hiring short-term, seasonal employees. She went over the high costs of benefits and of recruiting.

Number 108

Rep. Rogers said there were concerns about abuses in the Department of Fish & Game. Rayon said there had been abuses. She said longer-term positions should not come under this, but shorter-term positions should.

Number 134

Jeff Barry, committee aide, said the sponsor substitute addresses the historical context. He explained how concerns are addressed in the sponsor substitute. There was discussion. Rep. Rogers asked whether the APEA were notified; Mary Isaacs, committee aide, thought not. There was further discussion. Rayon said the APEA was represented at a hearing on the similar senate bill and offered no comment at that time.

Rep. Bylsma moved to report SSHB 697 from committee. There being no

objection, the motion passed.

Number 166 — House Bill 166 was brought before the committee. Rep. Rogers explained the bill. He said it would allow telephone cooperatives to get loans.

Number 179 — Andrew Hoge, attorney for Matanuska Electric Association, said the bill updates the definition of telecommunications. He said that REA funding was being cut by $1-billion. There was discussion about the scope of the bill.

Number 238 — Rep. Martin had questions about cable television in relation to telephone cooperatives like MTA, and possible APUC or FCC conflicts. There was discussion. Rep. Martin pointed out that the legislature is planning to pick up a good portion of the REA funding.

Number 305 — Rep. Bylsma felt the definition would mean cooperatives can control all media--radio, etc. Hoge said this is presently done.

Number 317 — Sharon Macklin, on behalf of Matanuska Telephone Association, said the bill updates the statutes to reflect processes the APUC has already certificated cooperatives to provide. She said it is also for purposes of obtaining loans. She said it does not supersede going through the APUC, and said this is the same definition APUC uses for telephone service. There was discussion. Macklin said the bill does not give monopolistic authority to cooperatives, as everyone goes through the APUC. She said it also gives corporate authority for use in applying for loans. There was discussion.

Number 456 — Barry referenced AS 10.25.010, and asked Macklin whether changing the definition will bring coops into competition with private telecommunications providers. He said it may change the full effect of the entire statute as worded.

Number 507 — Hoge explained deregulation of terminal equipment and how it interconnects with the telephone system. He said they need the capability, as common carrier, to carry various transmissions. There was discussion of the purpose of the bill, and of eminent

domain.

Number 705 — Allen Blume, Telelink Communications, Inc., had no difficulties with the definition proposed for his own needs. He asked if the service provider agency which is the end point provider would be classified as a telephone provider. Hoge said it would only affect cooperatives. There was discussion.

Side B, Number 011 — Rep. Martin said he would notify the participants of the next meeting on HB 557. He requested Jeff Barry to contact the Attorney General for further information. He predicted the first week of March as the earliest possible date of next hearing. As there was no further business to come before the committee, the meeting was adjourned at 1:5_ p.m.

HEARING DATE: 2-10-85

2/11/82

1:07 order + intro to
000 HB 697 (sponsor sub) by Bylsma
011 Bylsma - reason for bill
019 Beverly Rayon, Fish & Game - distributed report.
Spoke of problems hiring short-term (seasonal) employees.
High cost of benefits & of recruiting
108 Rogers There were concerns abt abuses in Dept of F & G
Rayon - there were abuses; longer-term posns shd not be
come under this, but shorter-term posns shd
discussion.
134 Barry - sponsor sub addresses hist. context. Explained
how concerns addressed in SS.
Discussion; Rogers asked if APEA were notified, M. Davis
thought not. Discussion. Rayon said APEA was
represented at hrg on similar Senate bill. & offered no
comment then.
Bylsma moved to pass SS HB 697
passed by unan consent

166 HB 557 Rogers explained bill - allow coops to get
loans.
179 Andrew Hoge, atty, MTA - updates defn of telecomm.
REA fndg being cut @ 18.
Discussion; Martin concerned about broader scope of defn.
Explan by Hoge.

Rogers left 1:26

238 Martin - gotus abt cable TV in relation to telephone coops (MTA) + possible APUC or FCC ~~conflicts~~ conflicts.
Discussion. Martin pointed out legis planning to pick up a good portion of REA fndg.

305 Byloma - this means coops can control all media - radio etc.
Hoge said this is presently done - using radio, etc -

317 Sharon Macklin, MTA - bill allows processes APUC has already certificated coops to provide svcs; updates statutes. Also for loans. Does not supersede going through APUC; same definition as APUC uses.
Discussion Martin elaborated on plans for telecomm. policy for state.
Macklin said bill doesn't give monopolistic authority to coops, everyone goes th/APUC; also gives corporate authority for use in applying for loans

406 Hoge - presented a newspaper clipping re REA fndg.
Discussion.

456 Barry - AS referenced 10.25.010; question of whether changing definition will bring coops into competition w/ private telecomm. providers. May change ~~end~~ full effect of entire statute as worded.

507 Hoge - explained de-regulation of terminal eqpt + how it interconnects w/telephone system. Need capability as common carriers to carry various xmsns.
Less revenue if these don't go through local coops.

560 Martin - changing meaning of word to rationalize why REA funds being decreased; quasi-monopoly enables co ops to become greater risk to lending institutions consumers will pay price.

~~Hogg~~ - Discussion.

617 Barry - w/defn in bill, gotn may come up as to eminent domain.

Discussion.

705 Allen Blume - Telelink Comm Inc - no ~~pro~~ difficulties w/ defn as propd for his needs. asked if svc provider agency which is end point provider, wd be classified as telephone provider

aide 2
000 Hogg - no, wd only affect coops.

Blume asked implications for non-coop telph svcs; does it chng defn

Hogg - no.

Martin said wd notify participants of next mtg

Requested Barry to contact ALT for further info.

Predicted 1st wk of March earliest for next hrg.

Baranof Hotel
586-1383
Position Statement: Supported passage of SB 84.

Larry Edwards
Southeast Alaska Conservation Council
Box 2158
Sitka, Alaska
586-2345
Position Statement: Requested committee to listen to Clark testimony on behalf of Alaska Logger's Association.

PREVIOUS ACTION

SB 84

Senate Action: First reading 1/15/81. Reported from Resources Committee 4/14/81. Moved from Finance to Rules by unanimous consent 4/20/81. Reported from Rules 5/5/81; taken up immediately. Resources Committee Substitute adopted by unanimous consent in second reading 5/5/81; advanced to third reading by unanimous consent. Passed in third reading with effective date vote same as passage on 5/5/81.

House Action: First reading 5/6/81. Moved from Judiciary to Finance by unanimous consent 6/21/81. Reported from Finance 6/21/81. Reported from Rules 6/22/81. Second reading 6/22/81; bill was recommitted to Rules by unanimous consent. Reported from Rules 6/23/81. Read again second time 6/23/81; postponed until 6/24/81 by unanimous consent. Read again second time 6/24/81; 2nd Rules Committee Substitute adopted; amended on floor. Failed to advance to third reading 6/24/81. Recommitted to Labor & Commerce by unanimous consent 1/11/82.

Statutory Reference: AS 44.62.

Action Taken: Rep. Bylsma moved that HCS CSSB 84 be replaced by 2d HCS CSSB 84 (L&C). There was objection by Rep. Gardiner. Rep. Bylsma withdrew the motion. No further action taken during this meeting.

ACTION NARRATIVE

Tape #14 and 15
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:15 p.m. Members present were: Representatives Martin, Bylsma, and Gardiner. Rep. Rogers arrived a few minutes after the call to order. Rep. Randolph was absent.

Number 007

Rep. Martin brought HCS CSSB 84 (2d Rls) before the committee. Rep. Bylsma moved that HCS CSSB 84 (2d Rls) be replaced by 2d HCS CSSB 84 (L&C). There was objection by Rep. Gardiner. After Rep. Rogers arrived, Rep. Bylsma withdrew the motion.

Number 068

Rep. Martin asked that, for clarity, the committee refer to the Labor & Commerce draft committee substitute.

Number 079

Wilson Condon, Attorney General, testified on behalf of the administration on the draft bill. He went over the administration's efforts to work with other groups on the bill. He said they had not been too successful with AOGA, and that AOGA members had not dealt in good faith. He went over problems they had encountered. Condon said the draft bill is the "AOGA bill". He said the governor has policy objections to the bill, and that he expects the governor to veto the bill as written.

Number 140

Condon handed out copies of eleven amendments proposed by the administration, and went over each proposed amendment in detail.

Number 620

There was discussion about the relationship between the bill and regulations. Rep. Rogers asked Condon what the administration would do in the absence of a bill at the end of session. Condon didn't know. He said

the administrative agencies had decided to work something out, not adopting regulations, but dealing directly with AOGA, as there were no problems with other industries. He said this method had not worked; hence, AOGA went to the legislature. There was further discussion.

Side B, Number 027 — Rep. Vaska expressed concern about shortening processing times, as rural areas need longer to digest and respond to the types of documents required. Condon said the administration felt it needed 85 days, rather than 65. He said the oil industry is pushing for as few days as possible, and that the administration doesn't think they can process all permits within 65 days. He said consideration of other interests is another reason to lengthen process time. Condon said he expects the legislature to consider other groups.

Number 066 — Rep. Vaska said there has to be balance in giving local governments discretion, and asked how this would be addressed. Condon referred to proposed amendment #3, which deals with how local coastal resource districts can take disagreements to court. He said that the Commissioner would have to find that consistency or inconsistency was supported by a preponderance of evidence in the record. There was discussion.

Number 103 — Rep. Gardiner asked the administration's position on the 2d Rls bill. Condon said they supported it. There was discussion of various phrases in the bill.

Number 175 — O.K. Gilbreth, Manager of Exploration and Production, AOGA, said there has been no significant change in problems obtaining permits since he gave testimony last year, but that permit approval times reduced slightly in 1981. He passed out a chart showing permit approval times, and noted that it takes up to a year for most approvals to be processed. He said that AOGA members endorse the L&C draft bill.

Number 230 — Gilbreth said the problems that the bill would alleviate are: 1) too much time required for permit approval; 2) duplication in handling of permits; 3) interlocking web of agency jurisdiction that can entangle

project; 4) employees' attitudes must reflect state policy; 5) many small problems add up to big problems; a lead agency could reduce or eliminate this; 6) state agencies are trying to design projects and set standards; 7) added costs, lost time, and lost effort mean nothing to some regulators; 8) regulators demand zero risk, which cannot be done; 9) operators are forced to accept stipulations that are unfounded, invalid, and not in the bets interests of the state. He went on to say that, philosophically, the industry needs predictability in timing in the process. The bill will determine how agencies operate. Gilbreth recommended accepting the draft committee substitute. There was discussion.

Number 329

Rep. Gardiner asked if last year's bill (the Rules committee substitute) would be better than the existing situation. Gilbreth said that several member companies felt they could live with the bill, but that, after study, most want no bill at all rather than that bill. There was discussion of the impact of the draft bill.

Number 390

Jay Nelson of Anchorage, representing himself, said he supports permit reform, but opposes the draft bill. He felt the draft was worse than the original bill. He said the point of permits is to protect the public's good, and he felt the draft bill does the reverse. He elaborated on why he felt this way. Nelson felt that uniform permit regulations was a better approach than the bill. There was discussion.

Number 500

Dave Allison, Alaska Environmental Lobby; former legislator in Indiana; lawyer; and member of the Alaska Miners Association, said that he represents a coalition of environmental groups--Sierra Club, Friends of the Earth, Southeast Alaska Conservation Council, and others.

Number 526

Allison said the environmental community takes the definite position that they favor sound and responsible development. He said the draft bill guarantees constitutional and statutory litigation. He felt the result of the bill would be delay. He criticized the oil industry's position. He said the bill disregards the interests of citizens of

local communities. He commented on the lack of notice of hearing. Allison said he would like to see administrative regulations with legislative review. He recommended trying the administrative process. There ensued a discussion of administrative policy and the power of the legislature.

Number 700 — Allison said that, if the bill is not improved, it should not be passed out of committee. He said there is not enough time for processing permits. He felt that each type of permit should have time requirements. Allison said he agreed with most of Condon's comments, but felt that, if all the proposed amendments were adopted, the bill would be worse than last year's bill.

Tape 2, Number 018 — Allison said the position of the Alaska Environmental Lobby is that the bill is unacceptable to their constituency. At Rep. Gardiner's request, Allison said he would provide the committee with a list of suggestions.

Number 100 — Rep. Gardiner felt the Department of Natural Resources' budget should be looked over as several positions involved with permit issuance are slated to be cut.

Number 140 — Mollie Dent, Alaska League of Women Voters, listed the League's concern about the permit process. (She submitted her testimony to the committee; this is available for inspection.)

Number 205 — Joyce Munson said she represented the Resource Development Council, which is a public interest group which attracts a wide range of people. She said she supports passage of SB 84. Permits are to protect the public, but are also to protect the public requesting the permit; that they have a right not to wait forever. She said that, without time limits, the waiting time depends on the efficiency of the department. She said the legislature is often at fault when developing legislation that does not give final authority to any agency. There was discussion about timeframes.

Number 428 — Mollie Dent, League of Women Voters, said that the League requested a teleconference

hearing to take additional testimony before the committee acts on the bill.

Number 465 — Larry Edwards, Southeast Alaska Conservation Council, Sitka, requested the committee listen to Clark testimony on behalf of Alaska Loggers Association. A man from the audience said that Clark doesn't speak for the Alaska Loggers Association.

Number 496 — As there was no further testimony or business to come before the committee, the meeting was adjourned at 3:25 p.m.

HOUSE LABOR & COMMERCE COMMITTEE

HEARING DATE: 2-12-82

2/12/82

1:15 Call to order

007 Intro of members, HCSCSSB 54 (dd rls); referred to packet from governor - appointments - to be on next wks calendar

017 Byforma moved HCSESSB 54 be replaced by 2d HCS CSSB 54 (~~2d rls~~ 2 & C); objection by Gardiner; asked that committee wait for Rogers, waiting (035 - 052) (Rogers arrived)

064 Byforma w/drew motion

068 Martin - ~~Afforact to~~ will refer to draft rather than CS at this time

079 Wilson Condon, AG, on behalf of admin re draft bill; went over administration's efforts to work w/ other groups ~~Re~~ on bill. AOGA - have not, not too successful w/ acronyms, dealt in good faith. ~~Great~~ Gave overview of problems. Draft is "AOGA bill". Can live with it w/ changes. ~~Policy~~ Gov has policy objections to bill. Expects gov to veto bill as written

140 Gave + elaborated on Administration changes wanted: (11 prop'd amdmts) (copy drawn out)

(REF. DRAFT BILL) #1 p 2, lines 8-12

#2 p 2 " 26-28

#3 p 4 " 6-29

#4 p 5 " 1-2

#5 p 5 3-5

#6 5 16-17 - (not satisfied w/ this amdmt; want to redraft it)

#7 5 22-23

#8 5 24

#9 6 11-13

#10 6 15-17

#11 7 12

620 feet 2 amdts wd be cont'l – dealing findings re CZM consistency ~~w~~ times & local CZM plan

661 Rogers – asked abt relationship between bill & regs – what wd admin do in absence of bill at end of session

London didn't know; debate among admin agencies – decided to try & work out something; not adopt regs & deal directly w/ AOGA (no probs w/ other industries). Didn't work – AOGA went to legislature.

715 (side 2 000) Discussion – Rogers / London

~~###~~

005 Martin – ps amdts 6 & 7 – feels amdts are redundant

019 London – bill doesn't apply to occupational licensing; gave reasons for wanting amdts

037 Uraska – local governing entities abilities to deal ~~w/~~ w/ & control development – how much time willing to give areas for response? Wants more than 30, 45 or 65 days. Rural areas take longer to digest & respond to these types of documents.

043 London – re class II permits – policy call by legislature. Admin thinks they need 85 rather than 65 days. Ori ind. pushing for as few days as possible; admin doesn't think they can do it in 65 days; consideration of other interests is another reason to go this way. Main consideration is can it be done; expect legis. to consider other ggs

066 Uraska – has to be balance in giving local govt discretion; what defn included in giving weight to local govts.

074 London - ref 1 amdt 3: ~~deals~~ deals w/how of local coastal resource district can take assgmt to court. Comm wd have to find that consistency or inconsist wd have to be supported by preponderance of evidence in record.

093 Martin - admin have regs revs & codes coming up; considerable determination that local entities have priority in considering permits

103 Gardiner - what is admin's posn on 2d res bill?

London - support it

G - p. 2, line 21 "unusually complex issues" — ~~who interprets?~~ interpreted or defined?

C - Interpreted

G - can't this be defined so no controversy arises?

C - ~~not~~ open to definition

134 G - findings of head of agency ... can be appealed by applicant Can it be/shd it be appealed by someon else?

DZ Discussion Gardiner/London whether this shd be appealable by ggs other than applicant/agency.

Discussion

164 Vaska - ~~long~~ q. re: def'n of "resource agency" def'n. ~~for resource agency.~~

175 OK Galbreth, Exploration & Production rep. AOGA — ~~recently~~ no signif chng in probs obtaining permits (since testimony last yr); however permit approval times reduced slightly in 1981. Passed out w/graph/ on permit approval time. — minimum times; noted that appl times go up to a yr

212 Members endorse draft bills

225 Agencies have lately been rejecting applications.

230 Major problems that bill wd alleviate:

1) too much time required for permit appl
2) duplicatn in handling of permits
3) interlocking web of agency jurisdiction that can endanger project
4) employees attitudes must reflect state policy
5) many small probs add up to big probs; lead agency cd reduce or eliminate this
6) all agencies trying to design projects to suit standards
7) added costs lost time lost effort mean nothing to some regulators
8) regulators demand 0 risk - can't be done
9) operators forced to accept stipns unfounded, invalid, & not in best interests of st

~~Expert bill to st~~ philosophical comment problems:

~~a)~~ industry needs predictability in timing in process

Bill will determine how agencies operate. ~~Agencies com~~ members concerned w/bill but unan agreed to back bill as compromise; recommend accepting draft.

298 Martin asked for cy of test.

301 Rogers — ~~will~~ cd time reqmts chng w/head of agency?

Hilbrecht - yes, cd.

Discussion

213 Gardiner - any reason for chng in # permits in 1977

Galbraith - corresponds w/ chngs of commissioners or directors

329 Gard - wd last yrs bill be better than existing situ

Galb - gov members cos felt they cd live w/bill, but most after study want no bill rather than that bill

Discussion

347 Gard - one thing being considered is reduction in opl budget - removing 100 posns in DNR - wd that make difference?

Galb - Wd depend on dir of div + his emphasis

367 Martin - admin doesn't know yet where cuts will be

Discussion

378 Rogers - dk w/ other industries in wkg up draft?

Galb - No substantial contact w/ other industries

390 J. Nelson, for self - Anc - supports permit reform, but opposes draft; worse than original bill. Point of permits to protect public's good; this does reverse. Spec, p 2 class I + II permits, 30 + 65 days is too rigid an approach for processing permits, not enough time

p 2 + 3 - time period extension - agrees w/ this - jointly processing permits is good, but last part of sentence eliminates this. Uniform permit regs better approach than this bill. Gave example. Wants more admin. approach.

452 Discussion abt notice of (this) mtg

469 Discussion of regulations

481 Gardiner – asked opinion of 2d reg CS

488 Nelson – latest draft worse; SB84 wrong approach.

500 Dave Allison, AK Envil Lobby, former legislator in Indiana, lawyer, member AK Miners Assoc, wkd in fisheries and dept. Represents coalition of env. grps - Sierra Clb Friends of Earth SE AK Cons. Council, & others.

526 1) Envil community takes definite posn that they favor sound & responsible dvpt. If comm wants to stop issuance of permits, ~~not effective~~ then pass bill. Bill guarantees const'l & statutory litigation. Intent is to expedite permit process, but to honest ind. person approaching permit process it's almost impossible. Result of bill will be delay. ~~Every industry~~ Criticized oil industry's position. If bill passed, disregards interests of citizens of local communities. Must determine who's going to run things. & Commented on lack of notice of hrg. Would like to see admin. regns w/ legislative review. ~~Says~~ Recommends trying administrative process.

570 Discussion of admin policy & pros of legis (Martin & Allison).

700 Allison – if bill not improved, shd not pass out of committee. If not done, wd agree that bill shd be killed.

Not enough time for processing permits. In each case, Tape 2 000 ~~did not~~ each type of permit, shd determine time needed.

Agreed w/most of London's comments but if all amdmts adopted, bill wd be worse than last yrs bill.

~~Martin – why shd admin~~

Discussion – Martin, Allison, re notification of mtgs

047 Rogers – qstn as to committee process; discussion

055 Allison, re Gilbreth stmt – other side is protection of public interest. Can't have protection w/o some restriction on people's ability to act.

068 Rep of Ak Envtl Lobby that bill is unacceptable to their constituency.

072 Gardiner – asked posn on SB 84 (2d rsr)

084 Allison – said they'd provide comm. w/ list of suggestions; suggests using codification of regulations wkd out by admin. Will send list of concerns.

100 Gardiner requested admin regulations alluded to.

Gardiner said he has analysis of effect of budget cuts in DNR – sev'l posns to be cut are people issuing permits (water permits & others). Suggested looking at those budget items. (referring to memo fm Comm. to H. Finance Comm). Wants to look at issue of permits (subcomm. recomndns) before comm. finalizes budget.

140 Molly Dent, At League of Women Voters o ~~Sierra Club Legal Defense Fund~~ – ~~presenting League testimony today.~~
League submitted test to Senate Resources, & H Cs @ last yr in Ans.
re permit reform process – concerns
1) adequate public notice
2) adequate opportunity for input by local land use authority
League has adopted progs on land use & land disposal.
Urge more flexible time network
Oppose automatic permit iss

see bill test. →

Showed comm. gov's permit reform regns that Sanders (?) requested; also offered list of kinds of permits affected by legislation. Also ~~offered~~ said she'd submit written comments.

205 Joyce Munson – for Resource Devpt Council (pub interest gp) – rep miners fishermen, homeowners, corps – wide rang of propes. Testified on SB 54 last yr as it came fm Senate; testified against gov's uniform permit procedures. Spoke of a telecons she attended last yr on gov's regns. Her committee found it had nothing to do w/ reform; wd create more st. jobs & cost more money. Actual procedure cd be stopped by a person who objected to any permit.

252 For passage of SB 84. Not talking abt prod oil co. permits.
Permits are to protect public; also to ~~not~~ protect public asking for permit – have a right not to wait forever. Without time limit, depends on efficiency of dept.
Legislature often at fault when developing legislation that does not give final authority to any agency. Someone has to be responsible.

312 Rogers asked if she'd looked at gov's amdmts
She hadn't – ~~comments~~ listened to Conlon testimony. Doesn't like idea of opening liberals (specific time w/exceptions)
Discussion, Rogers/Munson, re timeframes

Rogers – any prob w/ amdmt #9?
Munson – no problem

400 Barry informed

428 Molly (?) – on behalf of league, requested tele conf before comm. takes action;
Re notice – had requested notice in Anc + never got any.
Martin said entire state had notification of tele conf.
not possible before April, WS be deliberately delaying action

465 R. Edwards, Sitka, SE Alt Coms Council –
Requested comm. listen to Clark testimony, Alt Loggers Assoc.
Man fm audience said Clark does not speak for Alt loggers assoc.

496 adj. 3:05

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

2d HOUSE CS FOR CS FOR SENATE BILL NO. 84 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to processing of permits by state agencies, and to administration of the Alaska Coastal Management program."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS. The legislature finds that

(1) the orderly development of state resources is being unnecessarily delayed by the length of time required to obtain permits from state agencies, by the complexity of the permitting process, and by the number of agencies involved in the permitting process;

(2) the uncertainties created by the lack of specific time limits, the proliferation of agency reviews, the number of agencies involved in the permit process, and unjustified agency requirements upon the processing of permit applications have cost Alaskans millions of dollars in lost employment and higher prices;

(3) the public interest has not been advanced by protracted delay in the processing of permit applications by state agencies;

(4) by reducing the number of agencies and agency reviews involved in the permit process, and by requiring state agencies to process permit applications in an expeditious manner, the social, economic, and environmental health and well-being of Alaska citizens will be promoted; and

(5) there are many administrative orders and similar documents that have been promulgated by the executive branch relating to interagency review that conflict and overlap, retarding the permit issuing process.

* Sec. 2. AS 44.62 is amended by adding new sections to read:

ARTICLE 84. PERMIT PROCESSING.

Sec. 44.62.632. PERMIT CLASSIFICATION. (a) Each state resource agency shall by regulation classify each of the permits issued by that agency within one of the two following categories:

(1) class I permits, for which the state agency must issue a final decision within 30 days after the date of receipt of a completed permit application; and

(2) class II permits, for which, because of a necessary public notice or interagency review period, a final decision cannot be issued within 30 days. A final decision on a class II permit must be issued within 65 days after the date of receipt of a completed permit application, unless a public hearing is held on the application, in which case a final decision must be issued within 75 days after the date of receipt.

(b) Final regulations classifying its permits, and uniform procedural regulations providing for the processing of these permits, shall be adopted by each state resource agency by October 1, 1982, following appropriate notice and hearing. Permits applied for after October 1, 1982 must be issued in accordance with the time periods specified in (a) of this section, and the provisions of the implementing regulations.

Sec. 44.62.633. OTHER REGULATORY REQUIREMENTS FOR PERMIT PROCESSING. (a) Upon a finding by the head of a resource agency that a permit being considered involves unusually complex issues so that the agency cannot render a final decision within the time period specified in AS 44.62.632(a), the head of the agency may prescribe a time period within which the final decision will be made. The finding of the head of the agency may be appealed by the applicant to the superior court under the Appellate Rules of Procedure. The time period may not be extended more than 120 days beyond the time period specified in AS 44.62.632(a), unless the applicant otherwise agrees.

(b) The time period specified in AS 44.62.632(a) may be extended

if necessary to facilitate joint processing of a permit application by state and federal agencies, but only if adherence to the time periods established in AS 44.62.632(a) would cause an irreconcilable conflict with a federal statute or regulation.

(c) Subject to (a) and (b) of this section and AS 44.62.634, failure of a resource agency to make a final decision within 30 days after the receipt of a completed permit application for a class I permit, or within 65 days after the receipt of a completed permit application for a class II permit, is approval of the application. In an appeal of a permit issued by operation of this subsection, the record shall be considered in the light most favorable to the applicant, and the permit shall be accorded a presumption of regularity.

(d) A state agency may not condition the issuance of a permit upon the issuance of a permit from another governmental agency.

Sec. 44.62.634. ADDITIONAL INFORMATION. (a) If a resource agency receives a completed permit application that does not contain sufficient information concerning the project's compliance with the agency's statutes and regulations, the agency shall notify the applicant within 15 days after receipt of a completed permit application for a class I permit, and within 30 days after receipt for a class II permit.

(b) The notification must specify those particular facts or issues concerning the proposal upon which the agency requires additional information in order to determine whether the project will conform to the agency's statutes and regulations.

(c) If a timely request under (a) and (b) of this section is made, the time period specified in AS 44.62.632 is suspended from the date of request to the date of full compliance with the request. Subsequent requests for additional information may be made, but must relate only to new issues raised by the response to the initial noti-

fication. Subsequent requests do not extend the time periods specified in AS 44.62.632.

(d) Nothing in this section grants a resource agency the authority to request information beyond the authority given to it by other statutes.

Sec. 44.62.635. LEAD AGENCY. (a) There is established a lead agency that is solely responsible for issuing coastal management consistency determinations under AS 46.40 and for preparing and submitting state comments on federal permit applications. The lead agency is that resource agency that has principal responsibility for authorizing the overall activity, including instances where an activity requires permits from more than one resource agency. For classes of activities for which no agency with principal responsibility exists the governor shall designate a resource agency to be a lead agency for each class by administrative order no later than October 1, 1982. In performing its functions under this section, the lead agency shall consult with other resource agencies and with coastal resource districts under AS 46.40.

(b) Substantive consideration shall be given to the documented factual statements or data submitted by resource agencies and to the office of coastal management within their primary areas of expertise, and to the documented factual statements or data submitted by coastal resource districts made under an approved district coastal management program. The lead agency shall consider opinions, conclusions or recommendations submitted by the commenting agency, but may, in its discretion, reach contrary opinions, conclusions or recommendations according to the evidence received. The lead agency shall then balance competing factors in reaching its final decision. No resource agency other than the lead agency has primary expertise in the balancing of competing factors.

Except as otherwise required by federal law,

(c) No state agency other than the lead agency may comment to a federal permitting agency.

delete this subsection; replace with attached *(entitled Amendment 5)

~~(d) An agency's completion of a review under sec. 401 of the Clean Water Act (33 U.S.C. sec. 1341) does not constitute that agency as a lead agency under this section.~~

Sec. 44.62.636. COMMENT PERIOD. A coastal resource district or state agency that receives a request for comment in connection with a permit application or plan review being processed by a resource agency shall submit these comments in accordance with the following schedule:

(1) comments on class I permits shall be submitted within 15 days after the agency's receipt of the request;

(2) comments on class II permits and federal permits shall be submitted within 30 days after the agency's receipt of the request;

(3) when under AS 44.62.633, the requesting agency has extended the time periods specified in AS 44.62.632, that agency may extend the time period specified in this section, ~~for up to an additional 30 days.~~ However, comments submitted under this subsection shall be submitted no later than 30 days prior to the date on which the lead agency must issue a final decision.

Sec. 44.62.637. ADMINISTRATIVE APPEALS. (a) The uniform procedural regulations adopted under AS 44.62.632(b) must provide for an administrative appeal from a final decision on a permit application. The administrative appeal is to the head of the resource agency involved. Except as provided in this section the procedure is conducted under AS 44.62.330 - 44.62.630.

(b) The administrative appeal must be resolved within 45 days after the final decision on a permit application, or, if a hearing is held on the administrative appeal, within 65 days after the final decision on the permit application.

(c) An appeal taken from a decision granting a permit may, but need not, stay the issuance of the permit.

(d) The head of the agency may summarily dismiss an appeal before the time established in this section, and the dismissal is the final agency action on the matter.

(e) In an appeal from the denial or conditioning of a permit the head of the agency may, if he determines that the public interest would be served, grant the permit or remove conditions of the permit until the appeal is determined.

Sec. 44.62.638. REVIEW BY THE SUPERIOR COURT. (a) Judicial review by the superior court of a final decision issued under AS 44.-62.632 - 44.62.637 may be had by filing a notice of appeal in the superior court in accordance with the applicable Rules of Appellate Procedure. [The right to appeal is not affected by the failure to seek further review under AS 44.62.637.] The review is governed by the provisions of AS 44.62.560(b) - (e) and AS 44.62.570.

(b) An appeal taken under this section ~~has~~ should have preference on the calendar of civil actions before the court and ~~shall~~ should be decided without unnecessary delay.

* Sec. 3. AS 44.62.640 is amended by adding a new subsection to read:

(c) As used in AS 44.62.632 - 44.62.638,

(1) "date of receipt" means the date on which a state agency actually receives a completed application filed in accordance with agency regulations and at a place identified as appropriate for filing in the agency's regulations;

(2) "permit" means a permit, license, certification, consistency determination, or other authorization or approval issued by a resource agency as a written document that is required to be obtained or is solicited from a state agency before the construction or operation of a project; "permit"

(A) does not include the approval of a unit agreement,

a unit development plan, or a unit exploration plan, or conveyances of interest in state land or water;

(B) does include all authorizations and approvals, whether proprietary or regulatory, necessary to undertake a project under a previously conveyed property interest;

(3) "project" means a new activity or expansion or addition to an existing activity for which permits are required before construction or operation; "project" does not include pursuing a trade or profession, providing public health service, or operating a financial institution;

(4) "resource agency" includes the Department of Natural Resources, the Department of Environmental Conservation, and the Department of Fish and Game with respect to permits issued for the protection of fish habitat or the regulation of state sanctuaries, refuges, and critical habitat areas.

HB 477

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
February 16, 1982
1:04 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice-Chairman
Rep. Gardiner
Rep. Randolph

Members Absent: Rep. Rogers

COMMITTEE CALENDAR

HB 477 — An Act relating to the conduct of activities by labor unions in the state.

WITNESS REGISTER

Jeff Barry, Committee Aide
House Labor & Commerce Committee
Pouch V
Juneau, Alaska 99811
465-3669
Position Statement: Presented results of research.

PREVIOUS ACTION

HB 477 — No previous action.

Statutory Reference: AS 23.40

Action Taken: Rep. Gardiner moved to [illegible]le HB 477. There being no objection, mo[illegible] passed.

ACTION NARRATIVE

Tape #16
Recording
Number 000 — The meeting was called to order by Chairman Martin at 1:04 p.m. Members present were Representatives Martin, Gardiner, Bylsma, and Randolph. Rep. Rogers was absent. Before the committee was HB 477, relating to the conduct of activities by labor unions in the state.

Number 013 — Jeff Barry presented results of research on the bill. He said the bill does not do what

is intended. He gave examples of conflicts with federal law. He said similar bills have been struck down as illegal. Barry said that the Commissioner of Labor said the case of Hinckley v. Orbeck was decided on the same issue.

Number 033 — Rep. Martin said the bill is intended to solve a problem that Local 302 has in desiring a local chapter. He said they feel that the Seattle office is not giving them fair treatment regarding job placement. There was discussion.

Number 049 — Rep. Bylsma referenced a similar Kentucky law which was upheld in court as constitutional. Barry commented that the law Bylsma referred to could not have dealt with interstate commerce. There was a discussion of legality.

Number 070 — Rep. Gardiner asked if anyone had expressed interest in the bill. Rep. Martin said Local 302 had with regard to autonomy. There followed a discussion about which bills should be brought before the committee, and a discussion of HB 477.

Number 091 — Rep. Gardiner moved to table the bill. There being no objection, the motion passed.

Number 096 — As there was no further business to come before the committee, the meeting was adjourned at 1:11 p.m.

2/16/82 Tape #16

1:04 Call to order - Rogers absent
003 HB 477

013 Barry - results of research; bill doesn't do what's intended. Gave examples of conflict w/ federal law. Similar bills have been struck down as illegal. Comm. Labor exp Hinckley v. Orbeck was decided on same issue.

033 Martin - int'd to solve prob that Local 302 has; want local chapter; feel Seattle Ofc not giving fair treatment re job placement.
Discussion.

049 Bylsma - ref'd similar Kentucky law which was upheld in Ct as constitl.
Barry - cdn't deal w/ interstate commerce
Discussion of legality.

070 Gardiner asked if anyone had expressed interest
Martin - 302 w/ regard to autonomy
Discussion on which bills shd be brought before committees.
Discussion abt bill.

091 Gard moved to table bill; there being no objection, ~~motion~~ bill tabled.

096 Mtg adjourned 1:11

Statutory Reference: AS 18.80.220; AS 23.30

Action Taken: No formal action taken this date.

ACTION NARRATIVE

Tape #17 and 18
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:05 p.m. Members present were: Representatives Martin, Bylsma, Rogers, and Randolph. Rep. Gardiner was absent. Before the committee was HB 159. Chairman Martin recapped action to date, and introduced Workers Compensation Board members.

Number 051

Richard Cattanach, Vice President of Finance, Unit Company, Anchorage, said that as a result of hearing, it was realized that a better approach to workers compensation was for management and labor to work out a compromise.

Number 075

Jim Robison, W/C District Council of Labor, and Alaska State AFL-CIO, said he contacted 76 local union offices. They decided to discuss the bunkhouse rule, doctor shopping,

and spendable income. He told the results of the meeting.

Number 102 — Bill Reeves, Associated General Contractors, went over HB 159 with suggestions for changes. (He submitted a typewritten proposed committee substitute, entitled, "Labor/Management Work Draft", dated 2/13/82, which is available for inspection from the committee.) Reeves noted that Section 7 of the Labor & Commerce committee substitute should have been included in the labor/management workdraft.

Number 330 — Rep. Martin asked what security an injured employee has that the employer has forwarded a notice of injury. Jackie McClintock, Director of the Division of Workers Compensation, responded that there are penalties to employers who do not provide notice. Jeff Barry, committee aide, added that there is a problem in that area. THere was discussion of proof for the employee that the claim is forwarded.

Number 462 — Reeves resumed his testimony, going over the labor/management workdraft section by section.

Side B, Number 243 — Reeves noted that in Sec. 33, it should be added that people who have opted out of the social security program would have spendable income computed as though they had not opted out. He recommended checking some definitions and other changes that were not included in the labor/management workdraft.

Number 309 — Rep. Martin said that, during testimony taken in the interim, concern was expressed about employers being unwilling to rehire injured workers. Cattanach responded that they are concerned about that, but don't know the magnitude of the problem, or if Section 1 of the Labor & Commerce proposed committee substitute is the solution. He said he hated to see legislation that created a larger problem. There was discussion.

Number 412 — Barry referred to page 2 of the labor/management workdraft, regarding incentives and disincentives to employees, and referenced Florida law. Barry said his understanding is that, in collective

bargaining, unions do not refer people with physical impairments. Employers who are or would attempt to employ rehabilitated or injured employees could be stymied by other employers who refuse. He gave an example of this situation. He said there is no recourse, and that it shifts the liability to employers who attempt to work with injured employees. There was discussion.

Number 550 — Reeves said the real problem is that there is no incentive to the employer to hire injured workers who are not former employees. Barry said the other half of the problem is employers who won't hire because the applicant has at one time filed a workers compensation claim. He expanded on instances of this and problems created by this attitude. Cattanach said the goal is the same, the question is the means of attaining the goal. He asked the committee to give them a year to look at the problem to determine the best solution. There was discussion.

Number 650 — John Lewis, workers compensation consultant from Florida, said that Florida and other states with through the same experience. He said there were two problems: 1) rehiring an injured employee, for which there is direct incentive in Alaska; and 2) regarding not hiring people who have formerly filed a workers compensation claim, he said to look at civil court remedies, human rights commission, educational process, and rationality in the workers compensation system. Lewis said it is hard to prove that an employer is denying an applicant or former employee work on the basis of discrimination because that applicant had previously filed a workers compensation claim. He recommended waiting the year requested before taking action, if possible.

Tape 2, Number 053 — Zee Jackson, consultant from Anchorage, said you can't legislate "good faith". She said federal laws exist prohibiting employers from discriminating against handicapped workers, but one of the problems is proving discrimination. She said the process is one of education and evolution. She doesn't feel that a law such as that in section 1 of the Labor & Commerce workdraft will assist in achieving "return to work". She felt it

was an ongoing problem that requires continuous work and the efforts of everyone involved. She favors the parties working together and setting goals.

Number 118 — Martin asked if the labor/management bill addresses all the problems. Jackson responded that it is a good mechanism, and that the effort should be applauded. There was discussion.

Number 170 — Cattanach said they would not look favorably at taking parts of the labor/management bill out. Rep. Martin requested information from Don Koch, Division of Insurance, about benefits and ratings as set forth in the labor/management workdraft. Koch responded. There was discussion of cost savings.

Number 220 — As there was no further business to come before the committee, the meeting was adjourned at 2:53.

HOUSE LABOR & COMMERCE COMMITTEE

HEARING DATE: _____

2/17/82

1:05

000 START

HB 159 Call to order by Martin; recapped action to date

035 Intro of WC Board members

051 Richard Cattanach - as result of hrg, realized better approach, was for mgmt & labor to wk out compromise. ~~w out~~ Selected people to look at HB 159.

075 Jim Robinson - contacted 76 local union ofcs. Decided to discuss bunkhouse rule, dr shopping, & spendable income. Told about results of mtg.

102 Bill Reeves went over HB 159 w/ suggestions for changes & (submitted written proposed bill substitute, ~~to~~ intent. entitled "Labor/Mgmt Work Draft, 2/13/82, for CS for HB 159 (L&C)) Noted that sec. 7 of committee's CS shd have been

330 included in their draft.

405 Martin asked what security inj's employer has that employer has forwarded notice of inj.

Mr Clinton responded that there are penalties to employer Barry - mgmt ~~to~~ - & that must be forwarded; prob in that area.

432 ~~Reeves resumed testimony~~ Reeves; noted that employer is reqd to file notice

440 Discussion of proof for employer that claim is forwarded.

462 Reeves resumed testimony (their sec. 14, corresponding to L&C CS sec 10)

557 Qstns by Barry, Martin re spendable, weekly wage; discussion (Sec. 19 of their draft, p. 7)

609 Reeves resumed testimony (sec 20, 21, 22 corresponding to L&C 13, 14 & 15)

000 Side B — (at sec 29)

173 sec 33 corresponding to L&C sec 20

243 sec 33 read to add that persons who have opted out of SS progm and have spendable income computed as though they had not opted out.

285 Recommended checking some definitions & other changes that were not included in their draft CS.

309 Martin commented on presentation.

332 Martin - during testimony taken in interim, concern was expressed abt employers being unwilling to rehire rehabilitated injured wkrs.

349 Callanach - concerned abt that but don't know magnitude of prob or if this (i.e. sec 1 of WAC CS) is solution. Hate to see legislation that creates larger problem.

375 Discussion.

412 Barry - ref'd p. 2 of their draft re "incentives & disincentives to employers". Ref'd Florida law. Barry's understanding that in collective bargaining, unions no refer people w/ physical impairments. Employers who are/will attempt to employ... (injured/rehabilitated employees) could be stymied by other employers who refuse. Gave example. Also said there is no recourse; shifts liability to employers who attempt to wk w/ injured employees -- they pay add'l expense.

Martin spoke of employers he had heard of who did this, & of docs dr's testimony in that regard.

514 Cattanach - ~~not~~ think there may be a variety of approaches to problem; don't like C&C Sec 1. Need more study. ~~before~~

535 Discussion - Martin, Cattanach, Robinson, Reeves.

550 Reeves - real problem is no incentive to ~~a~~ hire injured wkrs who aren't former employers.

567 Barry - other half of prob is employers who won't hire because ~~prior~~ ~~employee~~ applicant has ~~at one time~~ filed a WC claim. Expanded on instances of this & problems created by this attitude.

626 Cattanach, goal is the same, question is means. Asking committee to give them a year to look at problem to determine best solution.

640 Discussion.

650 John Lewis - Florida & other states went th/ same experience. 2 prob - 1) rehiring ~~injured~~ employee - direct incentive (in Ak) to rehire; 2) re not hiring people who have formerly

000 Tape 2 filed W/C claim - look at civil court remedies, human rights comm, educational process, & rationality in W/C system. Hard to prove that employer is denying applicant/former employee work on basis of discrimination because of filing W/C claim. Recommended waiting the yr requested if ~~possible~~.

053 Jay Jackson - Can't legislate "good faith." Federal laws exist prohibiting employers not hiring handicapped wkrs; one of problems was proving discrimination. ~~&~~ Process is one of education & evolution. ~~can't "strong arm"~~

085 Doesn't feel a law (ref. Sec 1) will assist in achieving return to work. Ongoing problem, requires continuous work, requires efforts of everybody. Favors parties wkg together, setting goals.

118 Martin asked if their bill addresses all probs Jackson - good mechanism; outlining, delineating program positive. Effort to be applauded.

~~133 Martin asked if h Martin~~

Discussion Robinson, Martin, Barry. Barry noted new fiscal note will be needed if their bill is considered. Felt all ggps shd be given opportunity to comment on chgs; too unrealistic to look at couple wks min. for bill. There was assurance fm McClintock (ref f/n) & Lewis that info will be made available ASAP.

Discussion,

170 Cattanach said they wd not look favorably at taking parts of bill out; prefer total look.

Martin requested info fm Koch re benefits & ratings (ref new (third) draft). Koch responded. - mission re cost savings.

LABOR/MANAGEMENT WORK DRAFT

FEBRUARY 13, 1982

Original Sponsor: Rules/Legislative Council

IN THE HOUSE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 159 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to workers' compensation; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 23.30.025 is amended by adding a new subsection to read:

Sec 2 No change

(c) An insurer may issue a policy of insurance insuring the payment of benefits under this chapter which provides for a deductible amount to be paid by the employer. A policy with a deductible provision must be approved by the director of insurance and must provide that the deductible amount be paid by the insurer to the employee on behalf of the employer. After payment of the deductible by the insurer, the insurer may recover the deductible amount from the employer. The failure of an employer to reimburse an insurer for the deductible amount does not relieve the insurer from any other obligation it may have under the policy of insurance. An insurer is not required to apply for a deviation under AS 21.39.070 in order to issue a policy under this subsection. This subsection does not apply to a policy of excess insurance purchased by a self-insurer.

* Sec. 2. AS 23.30.040(e) is repealed and reenacted to read:

NEW

(e) The board may authorize payment from the second injury fund of:

(1) up to $200 per month for maintenance to an employee being rehabilitated under § 41 of this chapter who suffers an extreme financial hardship;

(2) rehabilitation expenses exclusive of costs for provider services and testing.

* Sec. 3. LEGISLATIVE INTENT. It is the intent of the legislature that an injured worker receive rehabilitation services which enhance returning to work as quickly as possible at earnings as close as possible to his gross earnings at the time of the injury. The legislature recognizes five rehabilitation goals in a workers' compensation program:

NEW

(1) Early identification of injured workers who will eventually need rehabilitation;

(2) Use of competent rehabilitation providers;

(3) Opportunities for return to direct employment;

(4) Maintaining an atmosphere conducive to rehabilitation;

(5) Providing incentives and removing disincentives to rehabilitation.

The Department of Labor shall adopt regulations in accordnce with AS 23.30.005 to accomplish these goals.

* Sec. 4. The board shall select and employ a rehabilitation administrator and

NEW

may authorize the rehabilitation administrator to select and employ rehabilitation monitors.

* Sec. 5. The rehabilitation administrator is a partially exempt service under

NEW

AS 39.25.120. The monthly salary of the rehabilitation administrator is equal to Step A, Range 22 of the salary schedule in AS 39.27.011(a) for Anchorage.

* Sec. 6 AS 23.30 is amended by adding a new section to read:

Sec. 23.30.041. REHABILITATION OF INJURED WORKERS. (a) The rehabilitation administrator shall implement the provisions of this section. The rehabilitation administrator shall continuously study the issue of rehabilitation, both physical and vocational, and shall investigate and maintain a directory of all qualified rehabilitation facilities, agencies, and providers, both public and private.

(b) When an employee suffers an injury covered by this chapter which precludes his return to suitable gainful employment, he shall be entitled to prompt rehabilitation services. The employer or carrier, at its own expense, shall provide for necessary and appropriate rehabilitation services. If rehabilitation services are not voluntarily offered, the rehabilitation

administrator, if he deems the services necessary and appropriate, may retain a rehabilitation provider at the expense of the employer or carrier.

(c) Rehabilitation services shall not exceed 37 weeks, provided, however, the rehabilitation services may be extended an additional 37 weeks if the rehabilitation administrator determines that special circumstances exist. Nothing in this subsection precludes an employer or carrier from providing rehabilitation services beyond such period on a voluntary basis. Where rehabilitation requires residence at or near a facility or institution, away from the employee's customary residence, reasonable cost of board, lodging and travel shall be paid by the employer.

(d) Temporary disability benefits paid pursuant to §§ 185 or 200 of this chapter shall include such period as may be reasonably required for training in the use of artificial members and appliances, and shall be paid throughout the rehabilitation process.

(e) The rehabilitation provider shall file a plan for approval with the rehabilitation administrator in accordance with board regulations. Within ten (10) days of the rehabilitation administrator's decision any party may seek review of the decision by requesting a hearing in accordance with § 110 of this chapter. A decision by the rehabilitation administrator is presumed valid absent a showing of clear error.

(f) Refusal by an injured employee to participate in an evaluation or a plan approved by the rehabilitation administrator shall result in a forfeiture of disability compensation for the period such refusal persists. However, if an employee commences participation in an evaluation or plan of rehabilitation within two months from the date of such refusal, and successfully completes such rehabilitation plan or evaluation by becoming employed for a period of thirty consecutive business days following the completion of the rehabilitation program, he shall receive a lump sum payment of 25% of the compensation forfeited by him. Such lump sum payment is available only once to an employee refusing rehabilitation. The rehabilitation administrator may find that an employee refuses to participate in an evaluation or vocational plan if, the employee fails to cooperate with the rehabilitation provider, or if the employee, or anyone acting on the employee's behalf, interferes with the rehabilitation process.

* Sec. 7. AS 23.30.045 (a) is amended to read:

(a) An employer is liable for and shall secure the payment to his employees of the compensation payable under §§ 41, 50, 95, 145, and 180 - 215 of this chapter. If the employer is a subcontractor, the contractor is liable for and shall secure the payment of the compensation to employees of the subcontractor unless the subcontractor secures the payment.

* Sec. 8. AS 23.30.045 (c) is amended to read:

(c) For a person eligible for vocational rehabilitation service under this chapter or AS 23.15.080 [AND] who is placed with an employer for service [WITHOUT WAGES] at the request of the board or the division [OFFICE] of vocational rehabilitation to give him on the job training, work readiness, [OR] work therapy experience [,] or work sampling, the liability set out in (a) of this section applies to the state rather than to the employer.

* Sec. 9. AS 23.30.080 is amended by adding a new subsection to read:

(d) If an employer fails to insure or provide security as required by AS 23.30.075, the board may issue a stop order prohibiting the use of employee labor by the employer until the employer insures or provides security as required by AS 23.30.075. [The failure of an employer to file evidence of compliance as required by AS 23.30.085 shall create a rebutable presumption that the employer has failed to insure or provide security as required by AS 23.30.075.] If an employer fails to comply with a stop order issued under this section, the board shall assess a civil penalty of $1,000 per day. The employer may not obtain a public contract with the state or any of its political subdivisions for three years following the violation of the stop order.

* Sec. 10. AS 23.30.095(e) is amended to read:

(e) The employee shall, after an injury, at reasonable times during the continuance of his disability if requested by his employer or, when ordered by the board, submit himself to an examination by a physician or surgeon authorized to practice medicine under the laws of the state in which the employee may be found, furnished and paid for by the employer. [THE EMPLOYEE HAS THE RIGHT TO HAVE A PHYSICIAN, PAID FOR BY THE EMPLOYER, PRESENT AT THE EXAMINATION OR

EXAMINATIONS.] No fact relative to the injury or claim communicated to or otherwise learned by physician or surgeon who may have attended or examined the employee, or who may have been present at an examination is privileged, either in the hearings provided for in this chapter or an action to recover damages against an employer who is subject to the compensation provisions of this chapter. If an employee refuses to submit himself to any examination provided for in this section [HEREIN], his rights to compensation shall be suspended until the obstruction or refusal ceases, and his compensation during the period of suspension may, in the discretion of the board or the court determining an action brought for the recovery of damages under this chapter [HEREUNDER], be forfeited. The board in any case of death may require an autopsy at the expense of the party requesting the autopsy. No autopsy may be held without notice first being given to the widow or widower or next of kin if they reside in the state or their whereabouts can be reasonably ascertained, of the time and place of the autopsy and reasonable time and opportunity given the widow or widower or next of kin to have a representative present to witness the autopsy. If no adequate notice is given, the findings from the autopsy may be suppressed on motion made to the board or to the superior court, as the case may be.

* Sec. 11. AS 23.30.095 is amended by adding a new section to read:

(j) the board shall adopt and use a schedule for determining the existance and degree of permanent impairment based upon medically or scientifically demonstrable findings.

* Sec. 12. AS 23.30 is amended by adding a new section to read:

AS 23.30.097. RELEASE OF INFORMATION. Upon request the employee shall provide written authority to the employer, carrier, rehabilitation provider and rehabilitation administrator to obtain medical and rehabilitation information relative to his injury.

* Sec. 13. AS 23.30.~~105~~100(d)(2) is amended to read:

2. If the board excuses the failure on the ground that for some satisfactory reason notice could not be given; however, when the delay in giving notice is so excused, notwithstanding the provisions of AS 23.30.120, the burden of proof as to the validity of the claim shall shift to the employee;

* Sec. 14. AS 23.30.110(c) is amended to read:

(c) The board shall make the investigation which it considers necessary with [IN] respect to [OF] the claim, and upon application of an interested party shall provide an opportunity for [ORDER] a hearing on it. If a hearing on a claim is ordered, the board shall give the claimant and other interested parties at least 10 days' notice of hearing, served personally upon the claimant and other interested parties or sent by registered mail, and shall, within 30 [20] days after the hearing record closes [IS HAD], by order, reject the claim or make an award in respect to it. If a hearing is continued by the board, additional notice under this subsection is not required. [IF NO HEARING IS ORDERED WITHIN 20 DAYS AFTER NOTICE IS GIVEN AS PROVIDED IN (b) OF THIS SECTION THE BOARD SHALL BY ORDER REJECT THE CLAIM OR MAKE AN AWARD IN RESPECT TO IT.]

* Sec. 15. AS 23.30.120(3) is amended to read:

(3) The injury was not proximately caused by the employee being under the influence of an intoxicating liquor or drugs [OCCASIONED SOLELY BY THE INTOXICATION OF THE INJURED EMPLOYEE];

* Sec. 16. AS 23.30 is amended by adding a new section to read:

Sec. 23.30.122. CREDIBILITY OF WITNESSES. The board has the sole power to determine the credibility of a witness. A finding by the board concerning the weight to be accorded any witnesses testimony, including medical testimony and reports, is conclusive even though the evidence is conflicting or susceptible to contrary conclusions. The findings of the board shall be subject to the same standard of review as a jury's finding in a civil action.

* Sec. 17. AS 23.30.155(j) is amended to read:

(j) If an employer has made advance payments or overpayments of compensation, he is entitled to be reimbursed, after approval by the board, out of any unpaid installment or installments of compensation due.

* Sec. 18. AS 23.30.155 is amended by adding new subsection to read:

(n) If the board determines that it is in the interest of an injured employee, and the parties agree, the liability of the employer for all or part of compensation payable under AS 23.30.190 (a)(1)-(19) may be discharged by the payment of a lump sum.

* Sec. 19. AS 23.30.175(a) is amended to read:

(a) The weekly rate of compensation for disability or death for a recipient residing in Alaska may not exceed the percentage of the Alaska average weekly wage in effect on the date of injury as determined by the table contained in this subsection and initially may not be less than $110 [65] a week. However, if the board determines that the employee's spendable [AVERAGE] weekly wages are less than $110 [65] a week as computed under § 220 of this chapter, it shall issue an order decreasing the weekly rate of compensation to a rate equal to the employee's spendable [AVERAGE] weekly wages, and payments made earlier in excess of the decreased rate shall be deducted from the unpaid compensation in the manner the board determines. In any case, the employer shall pay timely compensation.

On	The Rate Shall Be
July 1, 1975	80% of the Alaska Average Weekly Wage
January 1, 1976	100% of the Alaska Average Weekly Wage
January 1, 1977	133.3% of the Alaska Average Weekly Wage
January 1, 1979	166.6% of the Alaska Average Weekly Wage
January 1, 1981	200% of the Alaska Average Weekly Wage

* Sec. 20. AS 23.30.175(b) is repealed and reenacted to read:

(b) After June 30 and before December 1 of each year, the commissioner shall adopt and publish the average weekly wage for each jurisdiction for the preceding calendar year as published by the United States Secretary of Labor for the purposes of unemployment insurance. In determining the rate of compensation the commissioner shall use the average weekly wage figure for each jurisdiction, including Alaska, for which the Secretary of Labor computes an average weekly wage. These figures are the applicable average weekly wages for those jurisdictions for the following calendar year.

* Sec. 21. AS 23.30.175(c) is repealed and reenacted to read:

(c) The following rules apply to recipients who do not reside in Alaska:

(1) The weekly rate of compensation shall be calculated by multiplying the recipient's weekly compensation rate calculated in accordance with § 180, 185,190, 200 or 215 of this chapter times the ratio of the average weekly wage of the jurisdiction in which the recipient resides to the average weekly wage of Alaska. The rate is based on the average weekly wages in effect when the recipient leaves Alaska and shall be adjusted annually upon publication of the average weekly wages for all jurisdictions.

(2) The calculation required by this subsection does not apply if the recipient is absent from Alaska for medical or rehabilitation services not reasonably available in Alaska.

(3) If the spendable weekly wage of the recipient and the resulting compensation rate is determined under AS 23.30.220(2) the calculation required by this subsection applies to only those gross earnings earned in Alaska.

(4) Application of this subsection may not result in a reduction of the weekly compensation rate to less than $110 a week except as provided in (a) of this section.

* Sec. 22. AS 23.30.175(d) is repealed and reenacted to read:

(d) In a jurisdiction for which no average weekly wage is computed by the United States Secretary of Labor for the purposes of unemployment insurance, the average weekly wage shall be as determined by the commissioner.

* Sec. 23. AS 23.30.180 is amended to read:

Sec. 23.30.180. PERMANENT TOTAL DISABILITY. In case of total disability adjudged to be permanent 80 [66-2/3] per cent of the injured employee's spendable [AVERAGE] weekly wages shall be paid to the employee during the continuance of the total disability. Loss of both hands, or both arms, or both feet, or both legs, or both eyes, or of any two of them, in the absence of conclusive proof to the contrary, constitutes permanent total disability. In all other cases permanent total disability is determined in accordance with the facts.

* Sec. 24. AS 23.30.185 is amended to read:

Sec. 23.30.185. COMPENSATION FOR TEMPORARY TOTAL DISABILITY. In case of disability total in character but temporary in quality 80 [66-2/3] per cent of the injured employee's spendable [AVERAGE] weekly wages shall be paid to the employee during the continuance of the disability.

* Sec. 25. AS 23.30.190 is amended to read:

Sec. 23.30.190. COMPENSATION FOR PERMANENT PARTIAL DISABILITY. (a) In case of disability partial in character but permanent in quality the compensation is 80 [66-2/3] per cent of the injured employee's spendable [AVERAGE] weekly wages in addition to compensation for temporary total disability or temporary partial disability paid in accordance with §§ 185 or 200 of this chapter, respectively, and shall be paid to the employee as follows:

(1) arm lost, 280 weeks compensation, not to exceed $59,000 [$43,680];

(2) leg lost, 248 weeks compensation, not to exceed $54,400 [$40,320];

(3) hand lost, 212 weeks compensation, not to exceed 45,400 [$33,600];

(4) foot lost, 173 weeks compensation, not to exceed 39,700 [$28,700];

(5) eye lost, 140 weeks compensation, not to exceed $30,200 [$22,400];

(6) thumb lost, 51 weeks compensation, not to exceed $14,000 [$10,400];

(7) first finger lost, 28 weeks compensation, not to exceed $8,700 [$6,440];

(8) great toe lost, 26 weeks compensation, not to exceed $7,200 [$5,320];

(9) second finger lost, 18 weeks compensation, not to exceed $5,700 [$4,200]; third finger lost, 18 weeks compensation, not to exceed $4,700 [$3,500];

(10) toe other than great toe lost, 8 weeks compensation, not to exceed $3,000 [$2,240];

(11) fourth finger lost, 7 weeks compensation, not to exceed $2,800 ~~$2,000~~ [$2,100];

(12) loss of hearing of one ear, 52 weeks compensation, not exceeding $9,800 [$7,280]: loss of hearing of both ears, 200 weeks compensation, not to exceed $37,800 [$28,000] No benefit is payable for loss of hearing above 3,000 cycles per second;

(13) compensation for loss of more than one phalange of a digit shall be the same as for loss of the entire digit; compensation for loss of the first phalange is one-half of the compensation for loss of the entire digit;

(14) amputation between the elbow and the wrist is considered equivalent to the loss of an arm, and amputation between the knee and ankle is considered equivalent to the loss of a leg;

(15) compensation for loss of binocular vision or for 80 per cent or more of the vision of an eye is the same as for loss of the eye;

(16) compensation for loss of two or more digits, or one or more phalanges of two or more digits of a hand or foot may be proportioned to the resulting loss of use of the injured hand or foot, but may not exceed the compensation for loss of a hand or foot;

(17) compensation for permanent total loss of use of a member is the same as for loss of the member;

(18) compensation for permanent partial loss or loss of use of a member may be for proportionate loss or loss of use of the member;

(19) in addition to other allowable compensation, the board shall award proper and equitable compensation up to $10,000 for

(A) serious disfigurement of face, head and, when such disfigurement is likely to handicap the employee in securing or holding employment, for serious disfigurement of neck or limbs normally exposed, or

(B) partial or total loss of or loss of use of a part or function of the body not otherwise provided for under this section;

(20) in all other cases in this class of disability the compensation is 80 [66-2/3] per cent of the difference between his spendable [AVERAGE] weekly wages and his wage-earning capacity after the injury in the same employment or otherwise, payable during the continuance of the partial disability, but subject to modification [RECONSIDERATION OF THE DEGREE OF THE IMPAIRMENT] by the board on its own motion or upon application of a party in interest; Whenever the board determines that it is in the interest of justice, the liability of the employer for compensation, or any part if it as determined by the board, may be discharged by the payment of a lump sum;

(21) in a case in which there is a loss of, or loss of use of more than one member or parts of more than one member set out in (1) - (18) of this section, not amounting to permanent total disability, the award of compensation is for the loss of, or loss of use of, each member or part of the member, which awards shall run consecutively, except that where the injury affects only two or more digits of the same hand or foot, (16) of this section applies.

(b) Total compensation paid under (a)(20) of this section may not exceed

$75,000 [60,000].

* Sec. 26. AS 23.30.200 is amended to read:

Sec. 23.30.200. TEMPORARY PARTIAL DISABILITY. In case of temporary partial disability resulting in decrease of earning capacity the compensation shall be 80 [66-2/3] per cent of the difference between the injured employee's spendable [AVERAGE] weekly wages before the injury and his wage earning capacity after the injury in the same or another employment, to be paid during the continuance of the disability, but not to be paid for more than five years.

* Sec. 27. AS 23.30.210 is amended to read:

Sec. 23.30.210. DETERMINATION OF WAGE-EARNING CAPACITY. (a) In a case of partial disability under § 190(20) or 200 of this chapter the wage-earning capacity of an inured employee is determined by his actual spendable weekly wage [EARNINGS] if the actual spendable weekly wage [EARNINGS] fairly and reasonably represents his wage-earning capacity. If the employee has no actual spendable weekly wage [EARNINGS] or his actual spendable weekly wage [EARNINGS] does not fairly and reasonably represent his wage-earning capacity, the board may, in the interest of justice, fix the wage-earning capacity which is reasonable, having due regard to the nature of his injury, the degree of physical impairment, his usual employment, and any other factors or circumstances in the case which may affect his capacity to earn wages in his disabled condition, including the effect of disability as it may naturally extend into the future.

* Sec. 28. AS 23.30.215(a) is amended to read:

(a) If the injury causes death, the compensation is known as a death benefit and is payable in the following amounts to and for the benefit of the following persons:

(1) reasonable and necessary funeral expenses not exceeding $2,500 [$1,000];

(2) if there is a widow or widower or a child or children of the deceased, the following percentages of the spendable [AVERAGE] weekly wages of the deceased:

(A) 80 [66-2/3] per cent for the widow or widower with no children;

(B) 40 [33-1/3] per cent for the widow or widower with one child and 40 [33-1/3] per cent for the child;

(C) 25 [20] per cent for the widow or widower with two or more children and 55 [46-2/3] per cent divided equally among the children'

(D) [deleted]

(E) 80 [66-2/3] per cent for an only child when there is no widow or widower;

(F) [deleted]

(G) 80 [66-23/] per cent, divided equally, if there are two ~~more~~ or more children and no widow or widower;

(3) if the widow or widower remarries, she or he is entitled to be paid in one sum an amount equal to the compensation to which the widow or widower would otherwise be entitled in the two years commencing on the date of remarriage as full and final settlement of all sums due the widow or widower;

(4) if there is no widow or widower or child or children, then for the support of father, mother, grandchildren, brothers, and sisters, if dependent upon the deceased at the time of injury, 40 [35] per cent of the spendable [AVERAGE] weekly wage of the deceased to such beneficiaries, share and share alike, not to exceed $20,000 in the aggregate.

* Sec. 29. AS 23.30.215(b) is amended to read:

(b) In computing death benefits, the spendable [AVERAGE] weekly wage of the deceased shall be computed under § 220 of this chapter and shall be paid in accordance with § 155 of this chapter and subject to the weekly maximum limitation in the aggregate as provided in § 175 of this chapter, but the total weekly compensation may not be less than $75 [45] for a widow or widower nor less than $25 [15] weekly to a child or $50 [30] for children.

* Sec. 30. AS 23.30.220 is repealed and reenacted to read:

Sec. 23.30.220 DETERMINATION OF SPENDABLE WEEKLY WAGE. Except as otherwise provided in this chapter, the spendable weekly wage of the injured employee at the time of the injury is the basis for computing compensation, and shall be the employee's gross weekly earnings minus payroll tax deductions. The gross weekly earnings shall be calculated as follows:

(1) if at the time of the injury the employee has been in the gainful employ of the employer for the full reporting quarter immediately preceding the time of injury, the gross weekly earnings shall be computed by dividing by thirteen the gross earnings said employee earned in the employ of the employer in that reporting quarter.

(2) if at the time of the injury the employee has not been in the employ of the employer for the full reporting quarter immediately preceding the time of injury, the gross weekly earnings shall be computed by dividing 100 into the gross earnings of the employee in the two calendar years immediately preceding the injury.

(3) if the board determines that the gross weekly earnings at the time of the injury cannot be fairly calculated under (1) or (2) of this section, or cannot otherwise be ascertained without undue hardship to the employee, the gross weekly earnings for calculating compensation shall be the usual gross earnings for similar service rendered by paid employees under similar circumstances as determined by the board;

(4) if an employee is a minor or an apprentice, or a trainee, as determined by the board, when injured, and under normal conditions his wages would increase during the period of disability, this fact may be considered by the board in computing his gross weekly earnings;

(5) if the employee is injured while performing his duties as a volunteer ambulance attendant, policeman or fireman, the gross weekly earnings calculating compensation shall be the minimum gross weekly earnings paid a full-time ambulance attendant, policeman or fireman employed, at a reasonable figure previously set by the subdivision to make this determination and in no case may the gross weekly earnings for calculating compensation be less than the minimum wage computed on the basis of 40 hours work per week.

* Sec. 31. AS 23.30 is amended by adding a new section to read:

Sec. 23.30.227. OTHER BENEFITS. No compensation shall be payable to an employee under §§ 180 or 185 of this chapter for any week in which the employee receives unemployment benefits (AS 23.20).

* Sec. 32. AS 23.30.235 is repealed and reenacted to read:

Sec. 23.30.235 CASES IN WHICH NO COMPENSATION IS PAYABLE. No compensation under this chapter shall be allowed for an injury:

(1) proximately caused by the employee's willful intent to injure himself or to willfully injure another;

(2) proximately caused by the employee being under the influence of an intoxicating liquor or drugs unless such drugs are being taken in quantities prescribed by employee's physician.

* Sec. 33. AS 23.30.250 is amended to read:

Sec. 23.30.250. PENALTY FOR MISREPRESENTATION. A person who willfully makes a false or misleading statement or representation for the purpose of obtaining a benefit or payment under this chapter is guilty of <u>theft as defined in AS 11.46.100(3) and is punishable as provided in AS 11.46.120 - 11.46.150</u> [A MISDEMEANOR, AND UPON CONVICTION IS PUNISHABLE BY A FINE OF NOT MORE THAN $1,000, OR BY IMPRISONMENT FOR NOT MORE THAN ONE YEAR, OR BY BOTH].

* Sec. 34. The board shall publish Sections 32 and 33 of this Act in a booklet defining the employee's rights and obligations under the Alaska Workers Compensation Act. The booklet shall be mailed to an injured worker upon notice of an injury.

* Sec. 35. AS 23.30.265 is amended by adding new paragraphs to read:

(29) "arising out of and in the course of employment" includes employer required or supplied travel to and from a remote job site; activities performed at the direction or under the control of the employer; and employer sanctioned activities at employer provided facilities; but excludes activities of a personal nature away from employer provided facilities.

(30) "under the influence of an intoxicating liquor or drugs" means not only all well-known and easily recognized conditions and degrees of intoxication, but any abnormal mental or physical condition which is the result of indulging intoxicating liquors or drugs, and which, to an appreciable degree, deprives one of that clearness of intellect and control of himself which he would otherwise possess.

(31) "drugs" means a controlled substance or cannabis as further defined in AS. 11.`1.900.

(32) "gross earnings" means recurring payments by employer to the employee for employment before any authorized or lawfully required deduction or withholding of funds by the employer, excluding irregular bonuses, reimbursement of expenses, expense allowances, and any benefit or payment to the employee which is not taxable to the employee during the pay period. The value of room and board to the employee may be considered in determining gross earnings for those employees with gross weekly earnings which are less than the Alaska average weekly wage at the time of injury.

(33) "payroll taxes" means the following:

(a) An amount equal to the amount which would be withheld pursuant to withholding tables in effect on July 1 preceding the injury under the Internal Revenue Code of 1954, and regulations pursuant thereto, as amended, as though the employee had elected to claim the maximum number of dependants for actual dependency, blindness and old age to which the employee is entitled on the date on which he was injured; and,

(b) An amount equal to the amount required on July 1 preceding the injury by the Social Security Act of 1935 as amended to be deducted or withheld from the amount of earnings of the employee at the time of the injury as if the earnings were earned at the beginning of the calendar year in which he was injured; and,

(c) And any other legislative mandated deductions including but not limited to ESC and FUTA;

(d) The Commissioner shall annually prepare formulas which shall be used to calculate an employee's spendable weekly wage on the basis of his gross weekly earnings, number of dependants, marital status and payroll tax deducations.

(34) "reporting quarter" means one of the 3 month periods (January through March, April through June, July through September, October through December) used to report employee wages to the Internal Revenue Service.

(35) "Suitable Gainful Employment" means employment which is reasonably attainable in light of the individuals age, education, previous occupation, and injury, and which offers an opportunity to restore the individual as soon as practical and as nearly as possible to his gross earnings as determined at the time of injury.

* Sec. 36. AS 23.30.095(g), 23.30.125(b), 23.30.175(e) and (f), AS 23.30.191 and AS 23.30.265(20) are repealed.

* Sec. 37. AS 39.25.120 is amended by adding a new paragraph to read:

(20) the rehabilitation administrator of the Workers' Compensation Board.

* Sec. 38. This act takes effect July 1, 1982.

The Honorable Terry Martin
Alaska State House of Representatives
Pouch V
Juneau, Alaska 99811

Re: David Butler/Municipality of Anchorage

Dear Mr. Martin:

The attached decision from the Workers' Compensation Board is a classic example of the serious problems inherent in our current Workers' Compensation laws.

This employee, who had a minor hearing loss, basically corrected by a hearing aid, was kept on full salary through non-cashable sick leave for the period 4/1/80 through 12/8/80 while he was awaiting action on his request for retirement from the Municipality, which was subsequently granted. After he was retired and after he had received full payment in the amount of $27,658.67 from his employer for the period 4/1/80 through 12/8/80, he filed for worker's compensation for the same period of time and the Board has now ruled that the employer must also pay him compensation benefits of an additional $21,668.04 for the exact same period of time loss. The employee has therefore recovered in excess of 200% of his normal salary for a period of 9 months. Full payment by an employer, regardless of what fund it is paid from, or what they call it, should certainly satisfy the requirements of the Workers' Compensation Board.

Your comments will be appreciated.

Very truly yours,

SCOTT WETZEL SERVICES, INC.

DAVID W. bOLTER,
Employee,
Applicant,

vs.

MUNICIPALITY OF ANCHORAGE
(Self-Insured),
Employer,
Defendant.

DECISION AND ORDER
Case No. 80-04-0548.

On December 10, 1981 the defendant requested modification of the Board's November 19, 1981 Decision and Order. No opposition was submitted by the employee and the Board deemed the record closed on January 15, 1982.

Defendant alleges the Board erred in a determination of fact. The defendant asserts that employee is not entitled to compensation between April 1, 1980 and December 8, 1980 because he was being paid his full salary.

FINDINGS OF FACT AND CONCLUSIONS OF LAW

There was no mistake in a factual determination. Evidence was presented at the November 12, 1981 hearing that employee received sick leave payments in the amount of his full salary between April 1, 1980 and December 8, 1980. Evidence was also presented, and the defendant does not dispute, that employee was disabled.

There is no provision in the Alaska Workers' Compensation Act permitting for offsets of amounts received by an injured worker from any private source as a result of the same injury. A special exception is made for Social Security payments. See AS 23.30.225

In the instant case the employee was paid his full salary from his non-cashable sick leave reserve. We have no knowledge of the terms of the Municipality's sick leave program nor do we have jurisdiction over it. If sick leave payments were made to the employee in error the defendant must seek another forum for his recovery.

ORDER

Defendant's petition for Modification is denied and dismissed.

Dated at Anchorage, Alaska, this 4th day of February 1982.

ALASKA WORKERS' COMPENSATION BOARD

/s/ William F. Reeves
William F. Reeves, Designated Chairman

Ann Pittenger, Member

WFR/cw

APPEAL PROCEDURES

A compensation order may be appealed through proceedings in Superior Court brought by a party in interest against the Board and all other parties to the proceedings before the Board, as provided in the Rules of Appellate Procedure of the State of Alaska.

A compensation order becomes effective when filed in the office of the Board, and unless proceedings to appeal it are instituted, it becomes final on the 31st day after it is filed.

CERTIFICATION

I hereby certify that the foregoing is a full, true and correct copy of the Decision and Order in the matter of David Bulter, employee/applicant; vs. Municipality of Anchorage/Police Department employer; Case No. 80-04-0548; dated and filed in the office of the Alaska Workers' Compensation Board in Anchorage, Alaska, this 4th day of February 1982.

CHAPTER 1. FINANCIAL INSTITUTION GENERAL ADMINISTRATION

ARTICLE 4. GENERAL PROVISIONS

Section
905. Records; disclosure and limitation on disclosure
910. Definitions

3 AAC 01 is amended by adding one new section to read:

3 AAC 01.905. RECORDS; DISCLOSURE AND LIMITATION ON DISCLOSURE. (a) The records, reports and correspondence files of the division shall not be public documents, shall not be subject to subpoena nor shall they be open for inspection by the public. Neither the commissioner, the director nor any member of their respective staffs may disclose any information obtained in the discharge of official duties to any person not connected with the division, except that the commissioner may disclose such information:

(1) to representatives of federal agencies insuring accounts in the financial institution;

(2) to representatives of federal agencies, other states and foreign countries having supervisory authority over the activities of the financial institution or enterprises or similar financial institutions or enterprises if such representatives are permitted to and do upon request of the commissioner disclose similar information respecting those financial institutions under their supervision;

(3) to the attorney general of this state; and

(4) to a select committee of the legislature of this state appointed for the purpose of inspecting such records, but this paragraph shall not permit disclosure of information as to the condition of any particular financial institution or enterprise, or disclosure of information which has been disclosed to a financial institution or enterprise by or on behalf of any person in connection with a transaction or proposed transaction with such financial institution or enterprise.

(b) The commissioner may:

(1) disclose the fact of filing applications by financial institutions, give notice of hearings, if any, of such applications, and his actions thereon, as provided by law;

(2) prepare and circulate reports reflecting the assets and liabilities of financial institutions, including such other information considered pertinent to the purpose of each report for general statistical information; and

(3) prepare and circulate reports provided by law.

(c) Nothing in this section shall prevent any person or a financial institution covered under this chapter from access to records, reports and correspondence which apply to him or the institution to the extent that those portions of the records, reports and correspondence which do so apply are reasonably segregable from the portions of the records, reports and correspondence which do not apply to him or the institution and also to the extent that federal laws and statutes do not proscribe the disclosure. (Eff. / / , Reg.)

January 31, 1982

Dear Mr. Cottrell:

As advised by my attorney, I am submitting to you a claim for compensation forte settlement, as a former employee of the Southcentral Regional Resource Center in the amount of $7,826.63.

$4,175.32	Salary: bounced payroll check, October wages, 30 day difference in pay (from 9/80)
1,604.00	tax sheltered annuities - payroll "deduction"
603.31	attorney fees, to collect wages
336.84	T.S.A. interest @ 14.00% - Comm. Mutual
1,034.76	Salary interest @ 17.38 Merrill Lynch Ready Assets Annualized Interest Rate.
72.40	lawyers Rec. interest @ 12.00%.
$7,826.63

Terry - Although the legislature has appropriated $300,000 the most I've gotten so far is that "there isn't enough money to pay me my claim." I've been offered $4,000+ if I'll sign a release. I'm told, if I don't sign the release, I may not get any money. Since the claim in this letter, is lower

just a portion of my loss, I don't feel I should accept any less. (I wonder where all the money has gone?!?) There will be a hearing to try to settle outstanding employee claims which will be on either Feb. 18th or 19th in Anchorage. I'm ready to do battle!

Wish me luck. Do you have any other suggestions on how I can get my money?

Chris

HB159

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
February 18, 1982
1:10 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice-Chairman
Rep. Randolph
Rep. Rogers
Rep. Gardiner

Members Absent: No members absent.

COMMITTEE CALENDAR

HB 159 An Act relating to workers' compensation, and providing for an effective date.

WITNESS REGISTER

Jacquelyn McClintock, Director
Division of Workers Compensation
Department of Labor
PO Box 1149
Juneau, Alaska 99811
465-2790
Position Statement: Presented fiscal note.

Dick Block, President
Alaska National Insurance Company
PO Box 3440
Anchorage, Alaska
248-2642
Position Statement: Commented on various draft versions of HB 159.

William Reeves
Associated General Contractors
Anchorage, Alaska
276-5354
Position Statement: Comments on bill.

PREVIOUS ACTION

HB 159 See minutes of meetings of January 25-28, and 2/17.

Statutory Reference: AS 18.20.220; AS 23.30

Action Taken: No action taken during this meeting.

ACTION NARRATIVE

Tape #19
Recording
Number 005

The meeting was called to order by Chairman Martin at 1:10 p.m. Members present were: Representatives Martin, Bylsma, Gardiner, Randolph, and Rogers. There were no members absent. Before the committee was HB 159, dealing with workers compensation.

Number 013

Rep. Rogers said he was told that a Finance subcommittee was considering eliminating a position in the Division of Insurance that deals with workers compensation. He asked that the committee request the Finance subcommittee to ensure that the position is not eliminated, and gave his reasons. There was discussion.

Number 039

Rep. Martin asked Jackie McClintock, Director of the Division of Workers Compensation, to go over the fiscal note. McClintock said that approximately $320,000 was needed to fund wages, travel, and other expenses. Rep. Rogers requests costs of computer changes and printing costs. He noted that the Finance Committee may have problems with the fiscal note, and suggested the committee go over the fiscal note before referral. There was discussion.

Number 081

Rep. Martin requested of McClintock an estimate of savings in premiums and rehabilitation. Rep. Bylsma commented on the savings resulting from the bill. There was discussion. Rep. Rogers felt the immediate savings would be in rehabilitation. He thought carriers might not reduce their rates for several years. McClintock said the Workers Compensation Board supports the bill.

Number 110

Dick Block, president of Alaska National Insurance Company, commented on HB 159. He addressed his comments to the labor/management draft committee substitute (see minutes of 2/17/82).

Number 140

Block felt that Section 1 of the draft bill does not belong in the labor code, but should be in the insurance code. He said the section sets out no standards to guide the director as to allowable deductible

policies. Rep. Rogers asked if a carrier would issue a policy without checking the risk. Block felt it depended on the carrier, and reiterated the need for standards. Block said he felt the last sentence of Section 1 was unclear.

Number 195

Regarding Section 2 of the labor/management draft, Block asked for clarification of what the $200 referenced in (e)(1) was to be used for, and noted that financial hardship is not defined. William Reeves, Associated General Contractors, said the $200 is in addition to total permanent disability, and that extreme hardship is up to the discretion of the Board. There was discussion of this section.

Number 278

Block went over the rehabilitation sections. He said Section 3 sets forth appropriate guidelines, but he was concerned about Section 4, which he felt should be more specific. There was discussion. Block urged the committee to consider that the rehabilitation sections, as structured, would encourage the creation of a substantial new bureaucracy. He felt these things could be done within the existing Division of Workers Compensation. Rep. Rogers said it could have ben done by vocational rehabilitation, but based on studies, without new authority, there is no chance of getting rehabilitation. With the new authority, there should be a significant decrease in time to get people back to work. There was discussion of the roles of the Workers Compensation Board, the state government, employers, employees, etc.

Number 576

Block said that, if rehabilitation is to be effective, it is to the carrier's/self insured's best interest; also, the employee's lawyer will work toward this as well. Rep. Rogers commented that lawyers tend to work for a lump sum payment so they's get a larger award of attorney's fees. He also felt that part of the intent was to eliminate the need for attorneys to get involved. There was a discussion of lawyers in the rehabilitation process.

Number 647

There was discussion among the committee, Block, Reeves, and McClintock about overpayments.

Side B, Number 007	Block felt the amount of offset for leaving the state should be adjusted annually. He commented on average weekly wages in Alaska as compared to other places. There was discussion.
Number 103	Block said, regarding Section 31, that an employee would reject unemployment insurance and take workers compensation. Rep. Rogers pointed out that this section applies only to total disability, and that one who is totally disabled cannot draw unemployment.
Number 113	Block commented on savings versus new costs. He observed that there is a shift of responsibility from the carrier to workers compensation, which may not be in the best interest of those involved. He elaborated on his reasons for thinking this. Block said he supports the need for data, and thought this should be done through 1) notice of injury; and, 2) closing report. He said current requirements are to report any change in circumstances, which adds to administrative costs.
Number 162	There was discussion about the amendments before the committee. Rep. Martin asked Reps. Bylsma and Rogers to work with Jeff Barry on the bill.
Number 205	As there was no further business to come before the committee, the meeting was adjourned at 2:14 p.m.

1:10

HB 159

2/18/82

005 Call to order; all members present

013 Rep. Rogers - last couple yrs, tried to make sure of adequate budget (Div Ins + Div WC) for Wkrs Comp. Was told Finance subcomm considering eliminating posn in Div of Ins. Asked that comm. request Fin subcomm to ensure posn is not eliminated. Gave reasons.

Discussion.

039 Martin asked McClintock to go over fiscal note

042 McC - Approx $320,000: 4 staff members, rehab, rehab went over what this wd fund - wages, travel, expenses

062 Rogers - requested costs of computer charge, printing costs. Noted that Finance may have probs w/ fn. Suggested comm. go over note before referral. Gave reasons.

Discussion.

081 Martin requested est. of savings in premiums & rehab of McC.

085 Byloma commented on savings resulting for bill.

Discussion. Rogers felt immediate savings wd be in rehab; felt carriers might not reduce rates for sev. yrs.

107 McC said Board supports bill.

110 Dick Block, Pres, At Natl Ins Co - commented on HB 159. - addressed labor/mgmt draft CS (see yesterdays minutes).

140 Sec 1 - suggested:

1) don't belong in labor code; shd be in ins. code

156 2) no standards to guide director as to allowable deductible policies.

169 Rogers asked if carriers wd issue policy w/o ckg risk

Block - depends on carriers. Need standard.

Block, cont'd

189 3) referred to last sentence of sec 1; felt this language was unclear.

195 Sec. 2: ~~[illegible]~~ (e)(1) - unclear if $200 is addl, in lieu of, etc. Wording unclear; financial hardship not defined.

205 Reeves - in addn to TPD; extreme hardship up to discretion of board; explained language.

225 Block - ~~taking position that any~~ of making addl allowances. Legis. is providing income in excess of wages before injury, which is disincentive to rehab.

Discussion.

~~246 Statute currently provides TTD TPD 1½~~

246 Discussion of Temp Total Disability + addl $200.

(McClintock + Reeves joined Block for discussion w/ committee)

278 Block - re rehab sections

Sec 3 - sets forth appropriate guidelines. Concerned abt # 4 - ~~Obligation~~ shd be more specific

re last sentence, Sec 3 - giving tremendous latitude to Dept of Labor to develop regns; need more specific guidelines.

308 Discussion - ~~Assertion asked if to preferred it be legislated~~

~~Block responded that addl obligation imposed~~

357 Block urgd comm to consider, re secs 4, 5, & other rehab sections: was as structured, invites creation of substantial new bureaucracy. Can be done w/in existing Div of WC.

386 Rogers - CD have been done by VOC. rehab, but based on studies, w/o new auth, no chance of getting rehab; with it, there shd be signif decrease in time to get people back to work. Discussion of roles of Board, state govt, employers, employees, etc.

491 Reeves - commented on Block's position.

539 Discussion.

576 Block - if rehab is to be effective, it is in carrier's/self-insured's best interest; also, employee's lawyer will wk toward this as well. Rogers commented that lawyers tend to wk for lump sum pymt so they'd get larger attys fees. Also felt that part of intent was to eliminate need for attys to get involved.

615 Block said until there is dispute, state agency need not be involved.

Discussion of worth of lawyers in rehab.

647 Block - p. 7, Sec 17 - re overpymts - support concept, but doesn't understand need for Board's approval.

Rogers commented.

684 Discussion

698 McClintock - sometimes carriers overpays. Then stops pymt completely until excess pd up.

Reeves added that Bd has often stipulated that, in case of overpymt, a percentage is deducted until overpymt is repaid.

Side B Discussion.

007 Block - p. 8, sec 21 (1) — amt of offset for lvg state shd be adjusted annually. ~~In language~~ last sentence - "rate" shd be chngd to "ratio."
Comm ented on average wkly wages in ak compared to other places. There was general agmt that word shd be chngd (Reeves, McC, Comm)

036 Block - spendable wkly wage - not sure affect will be, intended.
Rogers commented.
Block - referred to income tax implications
Discussion.

053 Block - p. 13 Sec 30 (3) - unnecessary.
(5) - fixes salary at what paid fireman, etc, wd get; doesn't take into acct that most volunteers get other wages.
Rogers - felt subsec (5) shd be added to (3).

069 Reeves - (3) (4) & (5) are in essence frm current act. Felt (3) incorporates (4) & (5).

086 Rogers - commented; not convinced (3) takes care of prob, but allows som flexibility.
Discussion.

103 Block - p. 13, sec 31 - re unemplmt ins - felt employer wd reject unemp & take WC.
Rogers commented pointed out it only applies to total disability, can't draw unemp.

113 Block - comments on savings v. new costs. Observed that shift of responsibility frm carriers to wkr comp ~~has not~~ may not be in best interest of those involved. Expanded.

138 Supports need for data; shd be done through:

1) notice of injury

& 2) closing report

Currently required to report any change in circumstances; that explain adds to admin costs. Asked, McC, value of info. He felt reporting shd be cut off to just opening & closing report. Asked if he cd prop amdmts to address this.

102 Discuss & discussion abt amdmts before committee.

178 Martin said he was hoping to ask some of comm to form subcomm to wk w/ researcher on amdmts.

191 Martin asked Rogers & Byloma to wk w/ Barry on bill. Hope to pass bill by Thurs.

198 Barry - re reporting procedures - quotas.

Martin said to contact McC.

205 2:14 mtg adjourned.

HOUSE LABOR & COMMERCE COMMITTEE

HEARING DATE: _____

2-19-82

SB 84

Testimony by

Max D. Nalley

Exxon Company USA
February 19, 1982

before the

House Labor and Commerce Committee

regarding

2nd HCS CSSB 84 (L&C)

MR. CHAIRMAN, I AM MAX NALLEY, ALASKA PUBLIC AFFAIRS MANAGER FOR EXXON COMPANY, U.S.A. I AM PRESENTING THE COMMENTS OF MR. RICHARD H. WEAVER, EXXON'S ALASKA OPERATIONS MANAGER, WHO IS NOT ABLE TO BE HERE TODAY DUE TO A PRIOR COMMITMENT TO MEET WITH COMMISSIONER KATZ.

EXXON APPRECIATES THIS OPPORTUNITY TO COMMENT ON THIS DRAFT BILL WHICH WE VIEW TO BE OF GREAT IMPORTANCE TO THE STATE, ITS PEOPLE AND THE INDUSTRIES CONCERNED WITH RESOURCE DEVELOPMENT. EXXON SUPPORTS THE DRAFT COMMITTEE SUBSTITUTE FOR THE LATEST VERSION OF SB-84 (2nd HCS CSSB 84 (L&C)). IN THE INTEREST OF TIME, OUR COMMENTS TODAY WILL BE LIMITED TO THE SPECIFIC PORTIONS OF THE DRAFT BILL THAT RELATE TO THE TIME PERIODS REQUIRED FOR STATE RESOURCE AGENCIES TO RENDER FINAL DECISIONS ON PERMIT APPLICATIONS.

IT IS OUR BELIEF THAT THE TIME CONSTRAINTS ESTABLISHED IN THIS LEGISLATION ARE ADEQUATE AND WORKABLE. WE WOULD FURTHER OBSERVE THAT THIS LEGISLATION PROVIDES THE PROCEDURE FOR THE GOVERNMENT TO BALANCE THE LEGITIMATE INTERESTS OF THE PERMIT APPLICANT WITH THE INTERESTS OF THOSE WHO MAY BE IMPACTED BY THE ISSUANCE OF THE PERMIT. THIS LEGISLATION MAKES A REAL, CONCERTED, AND WELL DEFINED EFFORT TO INSURE THAT LEGITIMATE AND JUSTIFIABLE CONCERNS ARE CONSIDERED AND THAT THOSE CONCERNS INFLUENCE THE DECISION MAKING PROCESS.

LET ME JUST QUICKLY OUTLINE HOW THE TIME FRAMES CONTAINED IN THE BILL COULD WORK IN THE PERMITTING PROCESS:

THE DRAFT BILL REQUIRES THAT EACH STATE RESOURCE AGENCY MUST CLASSIFY THE PERMITS WITH WHICH IT DEALS INTO ONE OF TWO CLASSIFICATIONS AND ADOPT PROCEDURAL REGULATIONS RELATING TO THE PROCESSING OF EACH CLASS OF PERMITS.

CLASS I PERMITS ARE THOSE WHICH REQUIRE A FINAL DECISION WITHIN 30 DAYS, WHILE

CLASS II PERMITS - THOSE WHICH, BECAUSE OF REQUIREMENTS FOR PUBLIC NOTICE OR PUBLIC HEARING OR INTERAGENCY REVIEWS, DEMAND MORE TIME - REQUIRE A DECISION WITHIN 65 DAYS.

IT IS OUR BELIEF THAT THE GREAT MAJORITY OF PERMITS WHICH THE RESOURCE AGENCIES ISSUE ARE OF A RECURRING AND ROUTINE NATURE WITH WHICH THE AGENCIES HAVE CONSIDERABLE PRIOR EXPERIENCE. THESE PERMITS SHOULD EASILY BE PROCESSED WITHIN EITHER THE 30-DAY OR 65-DAY TIME FRAME.

ADDITIONALLY, A VERY KEY COMPONENT OF THE DRAFT BILL FOR THOSE CONCERNED THAT THE TIME FRAMES ARE TOO SHORT IS THE PROVISION THAT ALLOWS THE LEAD AGENCY TO EXTEND THE TIME PERIOD BY AS MUCH AS 120 DAYS IN THOSE INSTANCES WHERE THE PERMIT INVOLVES UNUSUALLY COMPLEX ISSUES. WE NOTE THAT THERE HAS BEEN NO ATTEMPT TO DEFINE "UNUSUALLY COMPLEX ISSUES" IN THE LEGISLATION AND THAT IS PROPER, BECAUSE THIS IS A DECISION THE AGENCY SHOULD HAVE THE AUTHORITY TO MAKE ON A CASE-BY-CASE BASIS.

THE TOTAL ELAPSED TIME FOR PERMIT DECISIONS ON COMPLEX, CLASS II APPLICATIONS CONCEIVABLY COULD THEN BECOME 185 DAYS--MORE THAN SIX MONTHS. THAT IS ENOUGH TIME, FOR EXAMPLE, FOR THE LEAD AGENCY TO SPEND ONE MONTH TO DETERMINE THAT THE PERMIT IS, IN FACT, COMPLEX; A MONTH TO GET THE INFORMATION OUT TO ANY AFFECTED COMMUNITIES AND OTHER RESOURCE AGENCIES; A MONTH TO GO OUT AND HOLD HEARINGS IN THE COMMUNITIES; ANOTHER MONTH TO COME BACK AND RECEIVE COMMENTS FROM ALL CONCERNED; AND TWO MORE MONTHS FOR THE LEAD AGENCY TO DIGEST ALL THE COMMENTS AND MAKE A DECISION ON ISSUANCE OF THE PERMIT.

WE FEEL THESE TIME FRAMES ARE ADEQUATE AND ALLOW AMPLE OPPORTUNITY FOR GATHERING INFORMATION FROM OTHER AGENCIES AND AFFECTED LOCAL AREAS, AS WELL AS TIME FOR SERIOUS CONSIDERATION BY THE PERMITTING AGENCY OF ALL THE FACTS PRESENTED, BEFORE MAKING A PERMIT DECISION.

THERE ARE TWO ADDITIONAL OBSERVATIONS WE WOULD MAKE CONCERNING THE TIME FRAME SPECIFIED IN THE DRAFT BILL:

FIRST, THE TIME CONSTRAINTS DICTATE THAT THE PERMITTEE PREPARE HIS APPLICATION IN A COMPLETE AND THOROUGH FASHION SO THAT HE HAS SOME DEGREE OF ASSURANCE THAT THE APPLICATION CAN BE REVIEWED AND APPROVED WITHIN THE TIME ALLOWED, SINCE THE ALTERNATIVE FOR THE APPLICANT IS DENIAL OF THE PERMIT

AS A MATTER OF PRACTICE, WITH CRITICAL PERMITS EXPERIENCE SHOWS THAT APPLICANTS AND AGENCIES WORK IN CONCERT LONG BEFORE THE PERMIT IS OFFICIALLY FILED TO DEFINE THE POINTS THAT NEED TO BE ADDRESSED A) TO PROPERLY COVER THEM IN THE INITIAL SUBMITTAL. THUS, THERE IS A DISCIPLINE IMPOSED UPON THE PERMITEE AS WELL AS THE AGENCY TO ASSURE THAT THE INFORMATION THAT IS PROVIDED IS ADEQUATE TO THE REQUIREMENTS FOR ISSUANCE OF THE PERMIT AND TO PRECEDE THE FORMAL PERMIT APPLICATION WITH DISCUSSIONS WITH THE APPROPRIATE RESOURCE AGENCIES IN ORDER TO STREAMLINE THE DECISION MAKING PROCESS BY THE LEAD AGENCY.

SECOND, IN RESPONSE TO WORRIES THAT HAVE BEEN RAISED THAT THIS DRAFT BILL WOULD ALLOW THE STATE TO RUN ROUGHSHOD OVER LOCAL CONCERNS, I EMPHASIZE THE DISTINCTION BETWEEN THIS BILL, WHICH RELATES TO PERMIT ISSUANCE, AND THE COMPLETELY SEPARATE PROCESS THAT ADDRESSES THE POLICY QUESTION OF WHETHER OR NOT A MAJOR PROJECT SHOULD BE UNDERTAKEN IN THE FIRST PLACE. FOR EXAMPLE, THE ISSUE OF EXPLORATION IN A PARTICULAR FRONTIER AREA WILL BE STUDIED LONG BEFORE THE FIRST PERMIT APPLICATIONIS MADE. THERE ARE REQUIREMENTS FOR STUDIES, HEARINGS AND OTHER SUCH ACTIVITIES WHICH PROVIDE INFORMATION TO AND IDENTIFY CONCERNS OF LOCAL COMMUNITIES THAT MAY BE IMPACTED BY THE PROPOSED DEVELOPMENT. FROM THE INFORMATION GAINED IN THIS LENGTHY AND DELIBERATE PROCESS

THE STATE WILL MAKE ITS POLICY DECISION REGARDING OIL AND GAS EXPLORATION AND DEVELOPMENT IN A GIVEN AREA. ONCE THAT OVERALL POLICY DECISION HAS BEEN MADE BY THE STATE, FROM THAT POINT ON THE ISSUE SHOULD BE HOW SPECIFIC PERMIT ACTIVITIES (BOTH INDIVIDUALLY AND COLLECTIVELY) AFFECT LOCAL AREAS, NOT WHETHER DEVELOPMENT IS GOING TO OCCUR. THE PERMIT PROCESS ESTABLISHED IN THIS DRAFT BILL IS NOT THE VEHICLE FOR THE STATE TO DECIDE ON BROAD POLICY QUESTIONS. RATHER IT ALLOWS FOR ORDERLY DEVELOPMENT TO PROCEED ONCE THE DEVELOPMENT QUESTION HAS BEEN RESOLVED.

IN SUMMARY, MR. CHAIRMAN, EXXON STRONGLY SUPPORTS THE DRAFT BILL BEFORE YOU TODAY. IN OUR VIEW, IT REPRESENTS A BALANCED APPROACH WHICH PROTECTS THE INTERESTS OF THE STATE OF ALASKA, ITS PEOPLE, AND THE RESOURCE INDUSTRIES. WE URGE ITS PROMPT ADOPTION.

THANK YOU VERY MUCH.

RHW/SPEECH/066/es

TESTIMONY OF

O. K. GILBRETH, JR.

BEFORE THE HOUSE LABOR AND COMMERCE COMMITTEE

February 19, 1982

Juneau, Alaska

Mr. Chairman, my name is O. K. Gilbreth and I'm representing the Alaska Oil and Gas Association. I have previously testified before this committee on SB 84. I would like to briefly point out the importance of achieving regulatory reform through legislation.

First, Mr. Chairman, I would like to clarify some misconceptions about the draft of SB 84 which is the subject of discussion of this committee. That draft has been dubbed by the Attorney General as an AOGA draft. I would like to point out that it is not an AOGA draft. There are some very important differences in what we would suggest as the best bill and what this bill contains. Realizing that most legislation represents compromises, however, the members of AOGA are willing to compromise and recommend passage of the draft in order to accomplish some type of regulatory reform.

There are imperative needs for changes to the permitting process in this state. Let us look for a moment at how this may affect the future of the state and state income.

First, you must keep in mind that we are still importing a very large portion of our nation's petroleum requirements. We are using roughly sixteen million barrels of petroleum each day in the U.S. and as of the week ending February 5, 1982 we were producing 8,628,000 barrels per day. Our nation's deficiency is great and our problems many.

Closer to home, since Alaska and its offshore areas hold from one-fourth to more than one-half of the estimated undiscovered oil and gas resources for the entire nation, it is becoming imperative that unnecessary road blocks to these resources in Alaska be removed. Testimony from many sources has indicated that the future state income will decline significantly as Prudhoe Bay production declines. There is a long lead time to bring a field on production, and the oil and gas industry is virtually helpless to accelerate and bring discoveries on line because of continuing permitting problems.

At a meeting of the Senate Resources Committee a couple of weeks ago, concerns were expressed by State senators and legislators on the revenue reductions which the state will be facing in the next few years. Illustrating their concern were several questions which were asked of DNR Commissioner Katz on how development could be accelerated to maintain state income.

Mr. Chairman, for industry to move any faster, there are changes that have to be made. For example, for a company to drill a well

into the offshore area of the Beaufort Sea, it is necessary to get about 42 permits from state and federal agencies. The operator must start to get permits a year in advance of the drilling season. He must order steel and tubular goods for the sea lift many months before his permits are approved and must commit millions of dollars before he knows whether or not he can drill as he has proposed. Any of his permits can be disapproved by any one of a myriad of state, federal and local agencies. More certainty has to be built into the system.

Let me give you one example of permit problems that delay development and delay eventual income. As you know, ~~the Kuparuk Field which is a major field by any standard, has just started production.~~ operators are trying to get all of the Prudhoe Bay Field on production. One company has an application to lay a gathering line across the Kuparuk River to carry production from one pad to another and then to a gathering center. This line would account for about 20,000 barrels per day of production. The application was filed in October 1981 and approval still hasn't been received. In the meantime, the state's income is being pushed further into the future. There is a danger of losing a complete construction season and the operator still can't get a permit approval. Mr. Chairman, the legislature should be asking the bureaucrats responsible for this delay why this has happened and what demands they have levied on the operator. It should also be determined if state agencies are trying to design installations without expertise and experience.

In the meantime, there are leases nearby that will be expiring

soon and interest in trying to develop them has waned because of of the state's delay in issuing permits for the pipelines. Wells will not be drilled and income will not be coming to the State. All of this is occurring because the regulators have thus far been able to delay these projects through the permitting process. The State must correct problems like these if state income is to be maintained in the future.

The chart marked AOGA Exhibit A shows several of the agencies that must approve just one of the 42 permits mentioned earlier. You will see evidence of multiple handling and duplication shown on this chart. This is a web of governmental handling that boggles the mind.

Too many state permitters always seem to have plenty of fears to suggest and few suggestions that will permit practical, beneficial development to proceed. I would like to point out that every penny of royalty and tax income which this state is receiving today comes from production discovered thirteen or more years ago. The more recent discoveries are being held up through a laborious permitting and political process. Nothing is moving very fast under current permits and policies.

Mr. Chairman, we have been called "mulish and obstinate" in testimony before this Committee for our steadfast position in trying to get the law changed so that we can get permits in a

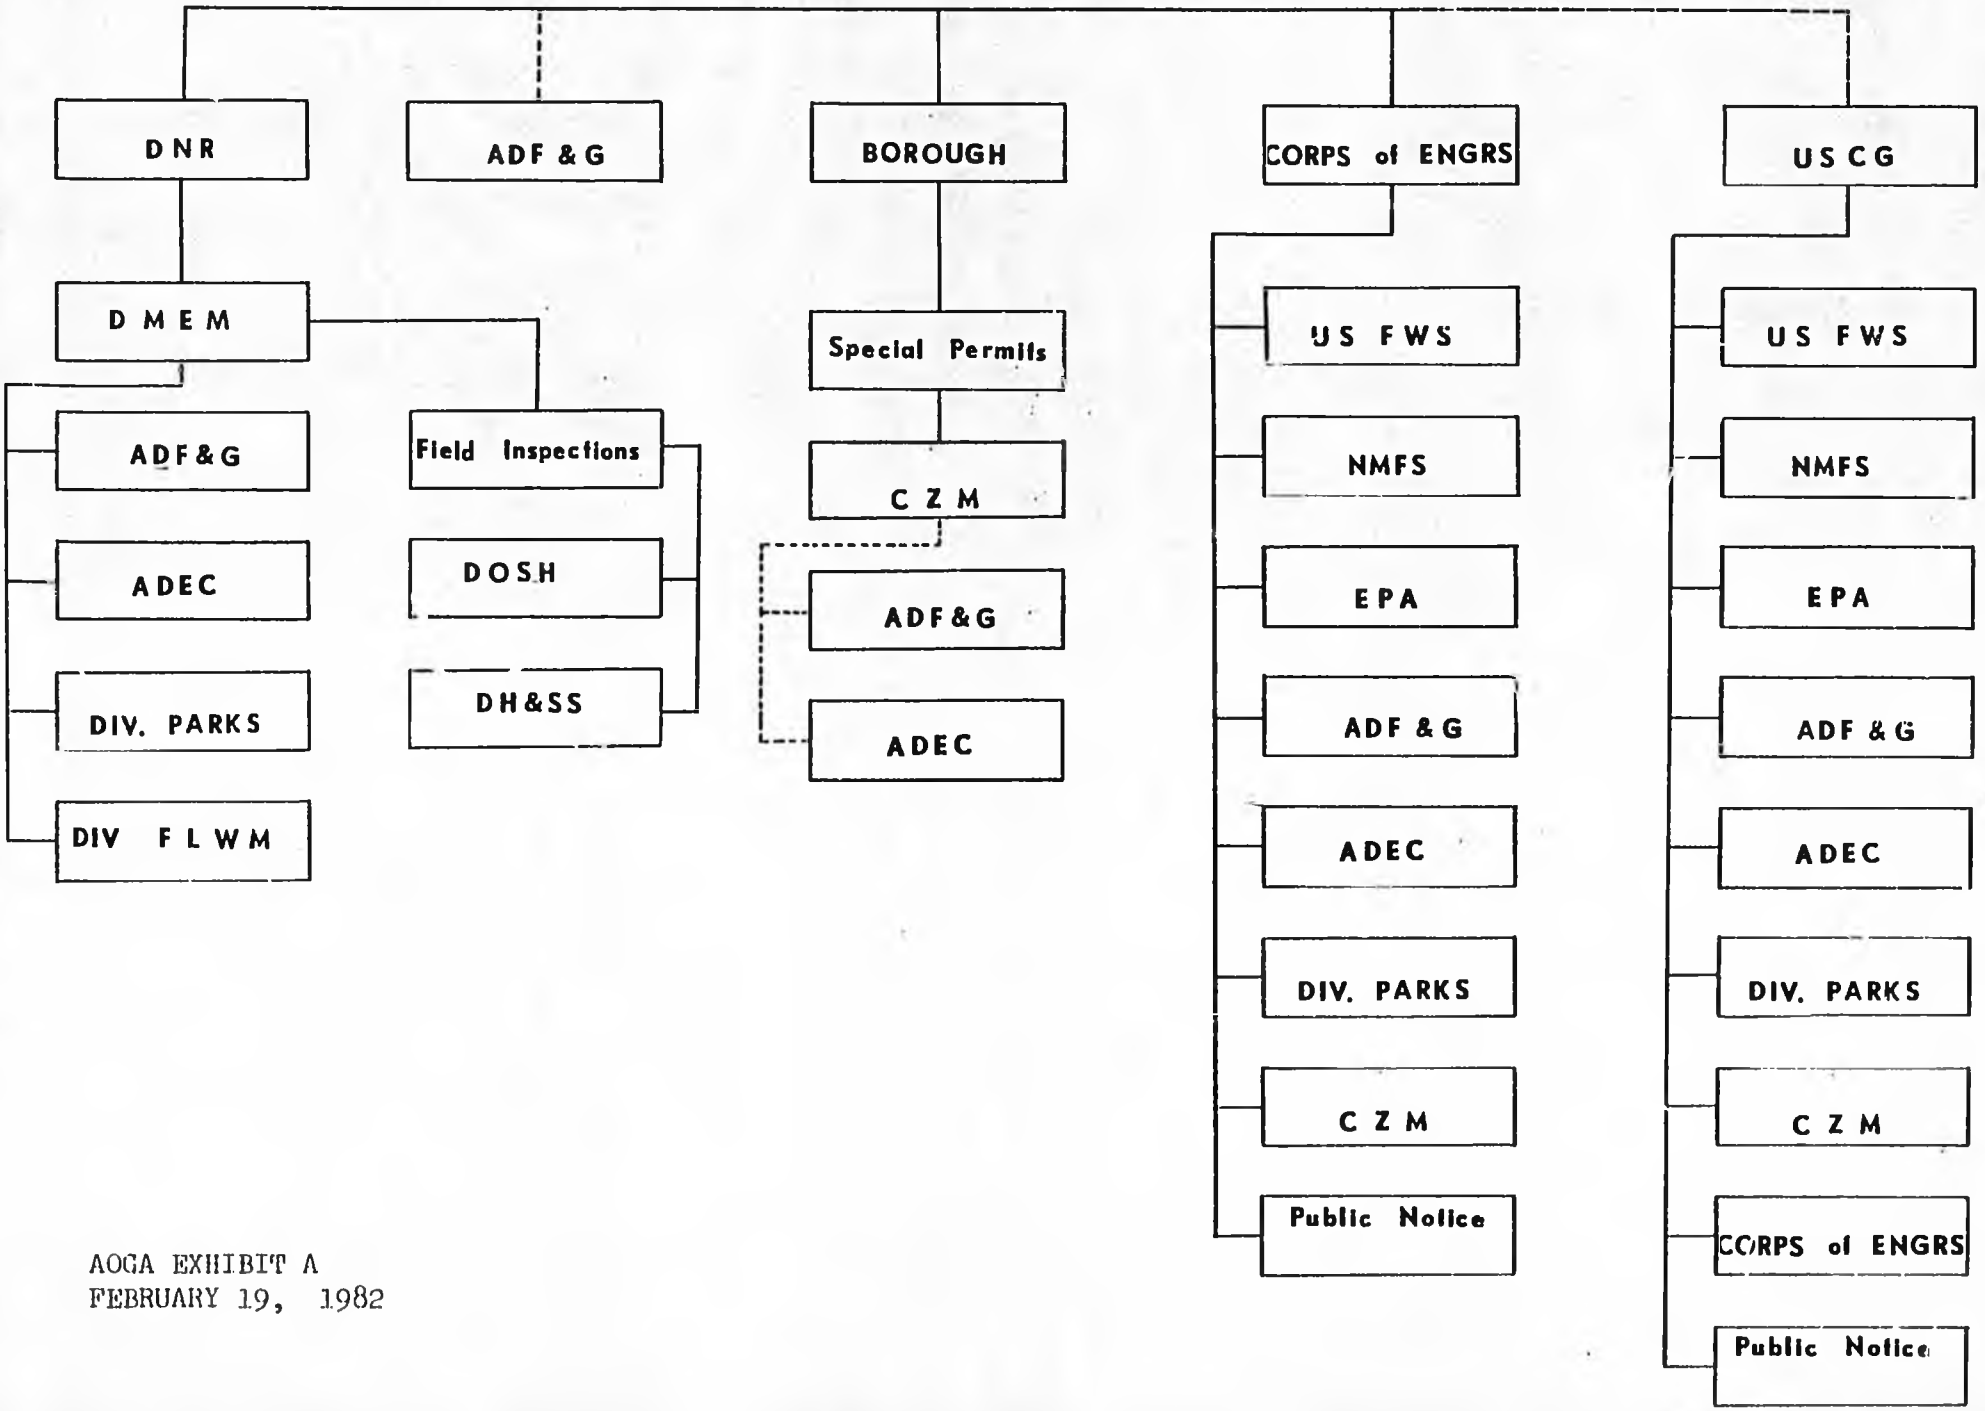
reasonable time. We have seen bills on regulatory reform before the legislature for three years in a row only to be sidetracked by the bureaucrats who don't want the system changed.

I suspect that the organized opposition to the bill before you is being orchestrated by those who want to stop or delay development. I recommend to you that you ask every opponent of this bill who testifies to describe to you how his proposal will minimize duplication and enhance permit processing.

Most of the opponents to development will be advocating more public input, more opportunity to object, longer approval periods, more appeal procedures, and no mandatory action. We have spent several years analyzing the laborious permitting process and in the main the present process represents a nonproductive and costly drain on the public which begets more and more bureaucrats. The State of Alaska and this legislature are the key to many of these problems. The members of AOGA are unanimous in urging this committee to adopt the draft of the bill before you to assure that the public can obtain permits in a reasonable time.

Mr. Marc Bond will discuss AOGA's position on changes which the Administration has recommended to the draft of SB 84 which is before you.

AGENCIES INVOLVED IN OPERATING PERMITS ON STATE LANDS



AOGA EXHIBIT A
FEBRUARY 19, 1982

SB 84 - MARATHON TESTIMONY

HOUSE LABOR AND COMMERCE COMMITTEE

HEARING

FEBRUARY 19, 1982

MR. CHAIRMAN, MEMBERS OF THE COMMITTEE, MY NAME IS JAMIE LINXWILER AND I AM PRESENTING MARATHON OIL COMPANY'S TESTIMONY IN SUPPORT OF SENATE BILL 84 (SB 84). COPIES OF THIS TESTIMONY HAVE BEEN PROVIDED TO THE COMMITTEE.

MARATHON DIRECTS ITS TESTIMONY, NOT TO THE BILL PER SE, BUT RATHER TO THE HISTORY OF SB 84. MARATHON BELIEVES THIS HISTORY IS IMPORTANT IN SETTING THE STAGE FOR THE COMMITTEE'S DELIBERATIONS.

MARATHON HAS FOLLOWED THIS LEGISLATION, NOW CALLED SB 84, SINCE ITS ORIGINAL INTRODUCTION AS SB 548 IN MARCH 1980. THE CONCEPTS DETAILED IN THE BILL ARE A DIRECT OUTGROWTH OF A SIGNIFICANT PROBLEM THAT AROSE IN 1978 AND 1979 WHEN THE CORPS OF ENGINEERS ASSERTED JURISDICTION OVER DEVELOPMENT OF STATE LANDS UNDER THEIR WETLANDS PROGRAM. AS A RESULT, THE AGENCIES PRIMARILY RESPONSIBLE FOR MANAGING DEVELOPMENT OF STATE LANDS CEASED MAKING FINAL DECISIONS ON THESE MATTERS AND OTHER STATE AGENCIES SUDDENLY BECAME CENTRAL IN THE PROCESS. WHEN ADDED TO ALREADY SIGNIFICANT PROBLEMS IN THE STATE REGULATORY ARENA, THE

RESULT WAS SIGNIFICANT DELAY, DUPLICATION, AND A LACK OF CLEAR RESPONSIBILITY IN THE STATE GOVERNMENT.

TWO PROJECTS AROSE IN RESPONSE. THE FIRST PROJECT WAS GOVERNOR HAMMOND'S REGULATORY REFORM EFFORT INITIATED IN THE SPRING OF 1979. THE SECOND PROJECT WAS A RESULT OF THE FIRST, IN THAT, THE ALASKA OIL AND GAS ASSOCIATION CREATED A SPECIAL GROUP CALLED THE REGULATORY REFORM COORDINATING COMMITTEE TO ASSIST IN AN IN-HOUSE REVIEW OF REGULATORY MATTERS AND THE GOVERNOR'S REGULATORY REFORM PROJECT.

THROUGHOUT 1979, BOTH PROJECTS REVIEWED REGULATIONS AND THE EFFECTIVENESS OF THOSE REGULATIONS IN THE REAL WORLD. DURING THE SPRING OF 1980, TWO SIGNIFICANT EVENTS OCCURRED THAT STARTED US ON OUR PATH TO TODAY'S HEARING. THE FIRST EVENT WAS THE ALASKA SUPREME COURT'S DECISION STATE V. A.L.I.V.E. VOLUNTARY, 606 P.2D 769 (ALASKA 1980). THIS DECISION EFFECTIVELY ELIMINATED THE LEGISLATURE'S RIGHT TO ANNUL REGULATIONS. THE SECOND SIGNIFICANT EVENT WAS THE LEAVING OF THE ADMINISTRATION'S REGULATORY REFORM PROJECT LEADER AND THE OUTSIDE APPEARANCE THAT THE GOVERNOR'S REGULATORY REFORM PROJECT HAD COME TO AN END.

THESE EVENTS LED TO THE REALIZATION, BY THOSE IN INDUSTRY AND GOVERNMENT INVOLVED IN THE REGULATORY REFORM EFFORT THAT DIRECT INVOLVEMENT BY THE LEGISLATURE WOULD BE REQUIRED FOR REGULATORY REFORM TO ACTUALLY OCCUR. IN REVIEWING WHAT ACTION

COULD BE TAKEN BY THE LEGISLATURE TO SOLVE SOME - NOT ALL - OF THE REGULATORY PROBLEMS, THE CONCLUSION WAS REACHED THAT A COMMON THREAD IN THESE PROBLEMS WAS THE LACK OF A TIME LIMIT ON THE DECISION-MAKING PROCESS. VIA A TIME LIMIT, ACTION WOULD BE TAKEN AND A DECISION WOULD BE MADE. FROM THIS PROSPECTIVE, YOU HAVE THE BASIC BACKGROUND IN WHICH SB 84 WAS CREATED.

AS STATED, LEGISLATION, SB 548, WAS INTRODUCTED IN THE ELEVENTH LEGISLATURE IN MARCH, 1980. IT WAS REVIEWED BY THE LEGISLATURE AND THE ADMINISTRATION, BUT FAILED TO REACH THE FLOOR OF THE HOUSE FOR FINAL LEGISLATIVE APPROVAL IN THE LAST MINUTES OF THE SESSION. DURING THE LEGISLATIVE PROCESS, THE ADMINISTRATION PLAYED AN INTEGRAL ROLE IN THE REDRAFTS OF THE LEGISLATION AND THE ADMINISTRATION'S CONCEPTS WERE CONTINUED IN WHAT CAME NEXT -- THE UNIFORM PERMITTING PROCEDURE REGULATIONS.

ON DECEMBER 5, 1980, GOVERNOR HAMMOND ANNOUNCED THE UNIFORM REGULATIONS. THE GOVERNOR STATED THESE REGULATIONS WOULD ESTABLISH FIRM, REASONABLE DEADLINES AND WOULD MAKE THE REGULATORY PROCESS CLEAR, SO THAT INDIVIDUALS OR BUSINESSES WOULD NOT WASTE TIME AS A RESULT OF PROCEDURAL DELAYS. A PRESS RELEASE IN THE DECEMBER 2 Anchorage Times STATED THE UNIFORM REGULATIONS: "ACCOMPLISHED THROUGH ADMINISTRATIVE LAW WHAT HAMMOND COULDN'T GET THROUGH THE LEGISLATURE." THAT IS,

REGULATORY REFORM LEGISLATION WAS GOING TO OCCUR THROUGH THE PROMULGATION OF REGULATIONS. IN THIS REGARD, IT IS IMPORTANT TO RECALL THAT BECAUSE OF THE A.L.I.V.E. DECISION, THE LEGISLATURE WOULD BE OUTSIDE THE PROCESS.

THE ATTORNEY GENERAL'S OFFICE ACTUALLY BEGAN DRAFTING THE UNIFORM REGULATIONS SIX MONTHS PRIOR TO THE DECEMBER 5 ANNOUNCEMENT, OR RATHER, JUST AFTER THE LEGISLATIVE SESSION HAD COME TO AN END. MARATHON BELIEVES EVERYONE INVOLVED IN THIS UNIFORM REGULATION PROCESS WORKED IN GOOD FAITH. THE UNIFORM REGULATIONS, HOWEVER, CREATED AN UNUSUAL SITUATION, IN THAT, THEY CREATED RARE AGREEMENT - BETWEEN GENERALLY DIAMETRICALLY OPPOSED GROUPS - THAT THE REGULATIONS WERE UNWORKABLE. FOR EXAMPLE, BOTH AOGA AND TRUSTEES FOR ALASKA OPPOSED THE ADOPTION OF THE REGULATIONS. TO THIS DATE, THE UNIFORM REGULATIONS ARE STILL AWAITING IMPLEMENTATION.

ABOUT THE SAME TIME AS THE GOVERNOR ANNOUNCED THE UNIFORM REGULATIONS, A COMMITTEE REPORT WAS ISSUED TO THE LEGISLATURE ON REGULATORY REFORM. THE REPORT RECOMMENDED EXTENSIVE REVISION OF THE REGULATORY PROCESS, INCLUDING, IN PARTICULAR, THE ADOPTION OF LEGISLATION ESTABLISHING PERMITTING TIME LIMITS, SUCH AS THOSE CONTAINED IN THE PRESENT VERSION OF SB 84. WITH THIS RECOMMENDATION IN MIND AND IN RESPONSE TO THE CONCERN OVER THE UNIFORM REGULATIONS, A MUCH TOUGHER VERSION OF SB 84 THAN WHAT

THE COMMITTEE HAS BEFORE IT TODAY WAS INTRODUCED LAST SESSION. THE BILL PASSED THE SENATE LAST SESSION ON A 17 TO 2 VOTE. SINCE SB 84 HAS BEEN IN THE HOUSE, AND ESPECIALLY SO DURING THE INTERIM LAST FALL, SB 84 HAS GONE THROUGH A NUMBER OF DRAFTING REVISIONS TO ANSWER THE CONCERNS OF VARIOUS GROUPS. THE BILL BEFORE YOU REPRESENTS INPUT FROM ALL AREAS OF CONCERN.

MR. CHAIRMAN, COMMITTEE MEMBERS, THIS TRACING OF THE HISTORY OF SB 84 NOW BRINGS US TO THIS HEARING. SB 84 INCORPORATES A NUMBER OF THE RECOMMENDATIONS MADE TO THE LEGISLATURE IN THE DECEMBER, 1980 REGULATORY REFORM REPORT. SB 84 REPRESENTS THE LEGISLATURE'S FIRST STEP TOWARD REGULATORY REFORM AND ENSURES THE LEGISLATURE'S INVOLVEMENT IN THE REGULATORY REFORM EFFORT.

MARATHON STRONGLY SUPPORTS THE BILL AND STRONGLY RECOMMENDS COMMITTEE APPROVAL.

STATEMENT OF JAMES K. BARNETT

ATTORNEY FOR

SOHIO ALASKA PETROLEUM COMPANY

TO

HOUSE LABOR AND COMMERCE COMMITTEE

FEBRUARY 19, 1982

My name is James K. Barnett, Attorney for Sohio Alaska Petroleum Company. As you know, Sohio Alaska Petroleum Company has been intimately and continuously involved in various proposals for State permit reform over the past several years. Last year Tim Bradner and Roger Herrera of our offices testified before your committee on our company's concern regarding permit reform. Today I would like to bring you up to date on our general position.

Each member company in the Alaska Oil and Gas Association probably has a slightly different emphasis on the State permit reform effort. Sohio's major concern has always been with a lead agency portion of the bill, as we believe this concept will streamline and simplify decision making among the various State agencies in Coastal Zone Management consistency determinations and on comments made by the State concerning a federal permit application.

Tim and Roger spoke to you last year about the time delays experienced and what we call "the Saga of Sag 7 and 8." This situation arose in 1980 when Sohio sought Corps of Engineer permits for the construction of two gravel islands in the Beaufort Sea. In that case, conflict between State agencies pursuing their legitimate, legislatively prescribed interests, led to extensive delays in developing an overall State policy on the construction of these islands. The delays were so extensive that it took a longer time for the final permits to be issued than it did for us to drill the wells on the islands once the islands were constructed!

We at Sohio do not want to single out any one agency or any one person for criticism or concern. We are certain that each individual involved in the permitting decisions then and now excersized his own best judgment in making a good faith decision about the permit applications based on the laws surrounding his agency's existence. The difficulty is that no one person or agency has been given the legislative mandate to speak for the State. Instead, consistency determinations sometimes are concluded only after lengthy dis ussion between a variety of concerned agencies and, in some cases, the applicant becomes responsible to mediate differences to bring a consistency determination to a prompt conclusion.

Further, when a federal permit action is under consideration, besides the mandatory requirement of a State consistency determination, a federal agency like the Corps of Engineers may also receive

separate comments from individual State agencies. In some cases in the past, these comments have been issued from State agencies entirely separate from the State consistency determination, and have included different and more stringent comments and recommendations than those issued in the formal consistency determination. This of course can cause even further delay and, once again, the applicant assumes a large role in mediating differences between agencies, and sometimes this requires that the applicant accept harsher permit stipulations than the State consistency determination might require.

This permit reform legislation will correct these problems through the lead agency process. In the cases most relevant to Sohio, the Department of Natural Resources will be designated as the lead agency for review of all State agency comments in anticipation of a consistency determination and the issuance of formal State comments to the Corps of Engineers. The Department of Natural Resources will accept comments from all relevant agencies and local municipalities with approved coastal mangement plans or, where such plans do not exist, from the Office of Coastal Management. These comments must be given to the Department in a specified time, and the Department in turn must issue them in a further specified time. Delays experienced in the past will therefore be held to a minimum.

Much has been said about the role of local governments in this process. We believe the State's coastal zone law has established a good mechanism for viable local government input, and the draft permit reform legislation before you today gives much credence to the comments of the local coastal resource districts established pursuant to this law. In the draft bill, "substantive consideration" is given by the Department of Natural Resources to all factual statements issued, not only from the various commenting State agencies, but also from the comments of the local coastal resource districts. If no local resource district has yet been established in the locality, then such substantive consideration is given to the Office of Coastal Management, the State body which speaks for the local governments pursuant to the State's coastal zone management law if there is no approved plan in that locality.

The Department of Natural Resources cannot arbitrarily reject the factual statements or recommendations of the agencies or local governments. Instead the draft bill gives significant credence to those comments. However, as the "lead agency", the Department of Natural Resources does have the final say in balancing all the comments in reaching the overall premitting decision. This is essential to avoid lengthy delay and cumbersome permitting processes which have been experienced by Sohio and others in previous situations.

The Saga of Sag 7 and 8 occured two years ago and I would like to tell you that the situation has markedly improved. In most

cases it has and I must continue to emphasize that we believe that each person and each agency exercises their best judgment in making a good faith determination about our permit applications based on the law that they must enforce. But even today Sohio has had a permit application pending since September 1981 dealing with the West End development of the Prudhoe Bay oil field. This permit needs a State consistency determination, and as of today, February 19--five months later--it's still has not been issued. It is admittedly a controversial permit, and we have been assured by the relevant agency that the consistency finding will soon issue. But this permit reform legislation, if it were in effect, would have required a more expeditious process than we are now experiencing.

I thank you for the opportunity to comment. In closing, I would like to add Sohio's full endorsement to the latest draft of Senate Bill 84 now before your Committee. We urge the passage of this bill today to the full House so that it may become law as soon as possible.

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
February 19,1982
1:07 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice-Chairman
Rep. Rogers
Rep. Randolph

Members Absent: Rep. Gardiner

COMMITTEE CALENDAR

SB 84 An Act relating to processing of permits by state agencies, and to administration of the Alaska Coastal Managements program.

WITNESS REGISTER

O.K. Gilbreth
AOGA
Anchorage, Alaska
Position Statement: Clarifications regarding draft committee substitute.

Jamie Linxwiler
Marathon Oil Company
Anchorage, Alaska
Position Statement: Gave history of SB 84.

Max D. Nalley
Alaska Public Affairs Manager
Exxon Company USA
Anchorage, Alaska
Position Statement: Supported draft committee substitute.

James K. Barnett, Attorney
Sohio Alaska Petroleum Company
Anchorage, Alaska
Position Statement: Gave position on permit reform.

Ethel Nelson
Exploration Land Representative
Texaco, Inc.
Anchorage, Alaska
Position Statement: Supported bill.

Marc Bond, Attorney
Chevron USA
Anchorage, Alaska
Position Statement: Discussed proposed amendments to SB 84.

PREVIOUS ACTION

SB 84

See minutes of 2/12/82.

Statutory Reference: AS 44.62

Action Taken: Rep. Randolph moved to accept 2d HCS CSSB 84 (L&C) for amendment.

Rep. Rogers moved to accept 2d HCS CSSB 84 (L&C) with all the governor's proposed amendments. Question, Rogers motion: for--Rogers, Gardiner; opposed--Randolph, Bylsma, Martin. Motion failed.

Rep. Rogers moved to amend the main motion by accepting the governor's proposed amendment #4. Motion passed unanimously.

Rep. Rogers moved to amend the main motion by accepting the governor's proposed amendment #11. On the question: for--Rogers, Gardiner; opposed--Bylsma, Martin, Randolph. Motion failed.

Rep. Rogers moved to amend the main motion by accepting the governor's proposed amendment #10. Rep. Bylsma objected, and withdrew his objection. Motion passed unanimously.

Rep. Rogers moved, page 6, lines 12-13, to amend the main motion by deleting the sentence "right to appeal ...637". There was objection. On the question: for--Rogers, Gardiner, Bylsma; opposed--Randolph, Martin. Motion passed.

Rep. Rogers moved to amend the main motion by adding, on page 5, line 24 "except when applicable, due process rights...within 45 days" (see governor's proposed amendments). On the question: for--Rogers, Gardiner; opposed--Martin, Bylsma, Randolph. Motion failed.

Rep. Rogers moved to amend motion on page 5, lines 16 and 17, by deleting "for up to an additional 30 days." and inserting, after word "section", the language: ". However, comments submitted under this subsection shall be submitted no later than 30 days prior to the date on which the lead agency must issue a final decision." Motion passed

without objection.

Rep. Rogers moved to amend motion on page 2, line 12, after word "application.", by deleting the period, and inserting: ", unless a public hearing is held on the application, in which case a final decision must be issued within 75 days after the date of receipt." On the question: for--Rogers, Gardiner, Bylsma; opposed--Randolph, Martin. Motion passed.

Rep. Rogers moved to amend motion on page 2, line 26, by adding: ", unless the applicant otherwise agrees." Motion passed unanimously.

Rep. Rogers moved to amend motion on page 4, line 6, by deleting the first sentence and inserting the first sentence of the governor's proposed amendment #3. On the question: for--Rogers, Gardiner; opposed--Randolph, Martin, Bylsma. Motion failed.

Rep. Rogers moved to amend motion by accepting the governor's proposed amendment #3. On the question: for--Gardiner, Rogers; opposed--Randolph, Martin, Bylsma. Motion failed.

Rep. Rogers moved to amend motion on page 5, lines 3-5, by deleting subsection (d), and inserting new subsection (3). There being no objection, the motion passed.

Rep. Rogers moved to amend motion on page 5, lines 22-23, by accepting the governor's proposed amendment #7, as revised. On the question: for--Rogers, Gardiner; opposed--Martin, Bylsma, Randolph. Motion failed.

Rep. Rogers moved to rescind the committee's action in failing to adopt the amendment. Rep. Rogers withdrew the motion after discussion.

Rep. Gardiner moved to amend motion on page 1, line 11, by deleting word "being" and inserting "many times". On the question: for--Rogers, Gardiner; opposed--Bylsma, Randolph, Martin. Motion failed.

Rep. Gardiner moved to amend motion on page 1, line 15, by deleting all of line 15 and

inserting "the unjustified delay of permits by". After discussion, Rep. Gardiner withdrew the motion.

Rep. Gardiner moved to amend motion on page 1, line 15, by beginning the sentence with the language, "The unjustified delay of permits caused by". On the question: for--Rogers, Gardiner; opposed--Martin, Bylsma, Randolph. Motion failed.

Rep. Gardiner moved to amend motion on page 1, line 20, by deleting word "protracted" and inserting word "unnecessary". On the question: for--Gardiner; opposed--Bylsma, Randolph, Martin.

Rep. Randolph moved to report 2d HCS CSSB 84 (L&C) out of committee. He withdrew that motion.

On the question on the main motion to adopt 2d HCS CSSB 84 (L&C): for--Martin, Bylsma, Randolph; opposed--Gardiner. Motion passed.

Rep. Randolph moved to report 2d HCS CSSB 84 (L&C), as amended, out of committee. There being no objection, motion passed.

ACTION NARRATIVE

Tape #20 and 21
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:07 p.m. Members present were: Representatives Martin, Bylsma, Randolph, Gardiner, and Rogers. There were no members absent. This meeting was a continuation of the hearing on SB 84. The committee was considering the draft Labor & Commerce committee substitute, and amendments proposed by the administration. Rep. Martin limited testimony to ten minutes.

Number 031

O.K. "Easy" Gilbreth, Alaska Oil & Gas Association (AOGA), wanted to clarify misconceptions of the draft committee substitute. (Gilbreth spoke from prepared testimony, which is available from the committee.) Gilbreth said the Attorney General called it the "AOGA draft", but it isn't. He said it's a compromise AOGA can accept. Gilbreth said there is a need for

changes. He spoke of the future of the state and the state's income. He passed out a chart dated 2/19/82 which showed agencies an operator must go through to get a permit on state land. He felt the present permit process to be non-productive. There was discussion.

Number 142

Jamie Linxwiler, Marathon Oil Company, said they support SB 84. He spoke of the history of the bill, and past attempts at permit reform. (Linxwiler spoke from prepared testimony, which is available from the committee.) He said SB 84 incorporates a number of recommendations made in past regulation reform attempts.

Number 241

Max D. Nalley, Alaska Public Affairs Manager, Exxon Company USA, said they supported the draft committee substitute. (Nalley spoke from prepared testimony, which is available from the committee.) He said the time constraints established in the bill are workable. He felt it makes a real effort to ensure justifiable concerns are considered. Nalley went over how the proposed timeframes would work. He felt the timeframes are adequate to obtain and evaluate all input before making decisions. He said the bill also addresses local concerns through the public hearing process, studies, etc. There was discussion.

Number 397

James Barnett, attorney for Sohio Alaska Petroleum Company, gave their general position. He said their major concern is with the lead agency portion of the bill. (Barnett spoke from prepared testimony, which is available from the committee.) Barnett spoke of time delays experienced in the past. He said the difficulty is that no one person or agency has been given legislative mandate to speak for the state. He said the applicant assumes a large role in mediating differences between agencies. Barnett felt this legislation would correct those problems through the lead agency process. He felt local coastal zone laws establish a good mechanism for viable local government input. He gave an example of a permit processing problem. There was discussion about various aspects of the bill.

Side B, Number 048 — Ethel Nelson, Exploration Land Representative, Texaco, Inc., supported the bill. She said comments made in the past have been selectively ignored by the administration. Regarding the governor's amendments, she said that some do not promote orderly development. She said they are willing to accept the bill as drafted as a good faith compromise. She said she agreed with the testimony that would be given by Marc Bond. Nelson went over the impact of the bill. She said that Alaska's wealth is almost entirely dependent on production of natural resources.

Number 104 — Marc Bond, attorney for Chevron USA, and also representing AOGA, supported the Labor & Commerce committee substitute. He discussed the governor's proposed amendments and gave comments on each amendment. He felt, in proposed amendment #1, that the extra 20 days is not needed. He said it is the opinion of AOGA that 65 days is more than enough time. There was discussion.

Number 252 — Bond said that the lead agency is the key provision of the bill. He felt the lead agency must have the authority to make decisions, and said that non-lead agencies should not be allowed to give input to federal agencies. He opposed amendment #3. There was discussion about who should make decisions, what data would be considered, and how decisions should be handled.

Number 529 — Bond said, regarding proposed amendment #4, that he believed federal law requiring comments of an agency would override this provision. He supported the section.

Number 560 — Rep. Randolph moved to accept 2d HCS CSSB 84 (L&C) for discussion. Rep. Rogers moved to amend Rep. Randolph's motion to accept the draft with all the governor's proposed amendments. On the question on Rep. Rogers' motion: for--Rogers, Gardiner; opposed--Martin, Bylsma, Randolph. Motion failed.

Number 575 — Rep. Rogers moved the governor's proposed amendment #4 as an amendment to Rep. Randolph's motion. Motion passed unanimously.

Number 613 — Rep. Rogers moved to amend the main motion

by accepting the governor's proposed amendment #11. On the question: for--Rogers and Gardiner; opposed--Randolph, Bylsma, Martin. Motion failed.

Number 624 — Rep. Rogers moved to amend the main motion by accepting the governor's proposed amendment #10. Rep. Bylsma objected. There was discussion. Motion passed unanimously.

Number 700 — Rep. Rogers moved to amend the main motion, on page 6, lines 12-13, by deleting sentence "right to appeal...637". There was objection. Discussion followed. On the question: for--Rogers, Gardiner, Bylsma; opposed--Randolph, Martin. Motion passed.

Tape 21, Number 030 — Rep. Rogers moved to amend the main motion, on page 5, line 24, by adding "except when applicable, due process rights...within 45 days." (See governor's proposed amendment #8). There was discussion. On the question: for--Rogers, Gardiner; opposed--Randolph, Bylsma, Martin. Motion failed.

Number 050 — Rep. Rogers moved to amend the main motion, on page 5, lines 16 and 17, by deleting language "for up to an additional 30 days." and inserting: ". However, comments submitted under this subsection shall be submitted no later than 30 days prior to the date on which the lead agency must issue a final decision." He asked unanimous consent. There being no objection, the motion passed.

Number 091 — Rep. Rogers moved to amend the main motion, on page 2, line 12, by adding a comma and inserting the governor's proposed amendment #1, with one change: delete 85 and insert 75. There was discussion. On the question: for—Bylsma, Rogers, Gardiner; opposed--Martin, Randolph. Motion passed.

Number 151 — Rep. Rogers moved to amend the main motion, page 2, line 26, by adding, ", unless the applicant otherwise agrees." There being no objection, the motion passed unanimously.

Number 172 — Rep. Rogers moved to amend the main motion, page 4, line 6, by deleting the first sentence and inserting the first sentence of the governor's proposed amendment #7. On the question: for--Rogers, Gardiner;

opposed--Randolph, Martin, Bylsma. Motion failed.

Number 188 — Rep. Rogers moved to amend the main motion by adopting the governor's proposed amendment #3. On the question: for--Rogers, Gardiner; opposed--Martin, Bylsma, Randolph. Motion failed.

Number 190 — Rep. Rogers moved to amend the main motion, page 5, lines 3-5, by deleting subsection (d) and inserting new subsection (d), using language from governor's proposed amendment #5. Rep. Randolph asked unanimous consent. There being no objection, the motion passed.

Number 210 — Rep. Rogers moved to amend the main motion, page 5, lines 22-23, by accepting the governor's proposed amendment #7, as revised. Rep. Gardiner asked unanimous consent. On the question: for--Gardiner, Rogers; opposed--Randolph, Bylsma, Martin. Motion failed.

Number 233 — Rep. Rogers moved that the committee rescind its action in not adopting the previous amendment. There was discussion. Rep. Rogers withdrew the motion.

Number 303 — Rep. Gardiner moved to amend the main motion, page 1, line 11, by deleting the word "being" and inserting "many times". There was discussion. On the question: for--Gardiner, Rogers; opposed--Bylsma, Martin, Randolph. Motion failed.

Number 335 — Rep. Gardiner moved to amend the main motion, page 1, line 15, by deleting all of line 15 and inserting "The unjustified delay of permits by". There was discussion. Rep. Gardiner withdrew the amendment.

Number 365 — Rep. Gardiner moved to amend the main motion, page 1, line 15, by beginning the sentence with: "The unjustified delay of permits caused by". On the question: for--Rogers, Gardiner; opposed--Martin, Bylsma, Randolph. Motion failed.

Number 375 — Rep. Gardiner moved to amend the main motion, page 1, line 20, by deleting the word "protracted" and inserting the word "unnecessary". There was discussion. On the question: for--Gardiner; opposed--

Randolph, Bylsma, Martin. Motion failed.

Number 441 — Rep. Randolph moved to pass 2d HCS CSSB 84 (L&C) from committee. He withdrew that amendment.

Number 447 — On the question of the main motion by Randolph to accept 2d HCS CSSB 84 (L&C): for--Randolph, Bylsma, Martin; opposed--Gardiner.

Number 459 — Rep. Randolph moved to report 2d HCS CSSB 84 (L&C), as amended, from committee. There being no objection, motion passed.

Number 474 — There being no further business to come before the committee, the meeting was adjourned at 3:13 p.m.

Amendment #8

Rep. Rogers moved, p. 2, line 12, after word "application.", delete period, and insert ", unless a public hearing is held on the application, in which case a final decision must b3e issued within 75 days after the date of receipt." Discussion.
For: Rogers, Gardiner, Bylsma Against: Randolph, Martin
Amendment passed.

Amendment #9

Rep. Rogers moved, p. 2, line 26?, add, ", unless the applicant otherwise agrees."
No objection.
Motion passed unanimously.

Amendment #10

Rep. Rogers moved, p. 4, line 6, delete first sentence and insert, after (a), "There are established lead agencies which are solely responsible for issuing coastal management consistency determinations under AS 46.40 and for preparing and submitting state comments on federal permit applications for all projects which involve the disposal of an interest in state land or water or a least one class II permit."
For: Gardiner, Rogers Against: Randolph, Martin, Bylsma
Motion failed.

Amendment #11

Rep. Rogers moved the governor's proposed amendment #3.
For: Gardiner, Rogers Against: Bylsma, Randolph, Martin
Motion failed.

Amendment #12

Rep. Rogers moved, p. 5, lines 3-5, to delete subsection (d) and insert new subsection (d), using language from governor's proposed amendment #5. Rep. Randolph asked unanimous consent.
No objections.
Motion passed unanimously.

Amendment #13

Rep. Rogers moved, p. 5, lines 22-23, to accept the governor's proposed amendment #7, as revised (see sheet entitled Changes to Proposed Administration Amendments to SB 84): Delete language "Except as provided in this section the procedure is", and insert "Administrative appeals" conducted under "this section are not subject to the procedures in" AS 44.62.330-44.62.630. Rep. Gardiner asked unanimous consent.
For: Rogers, Gardiner Against: Bylsma, Martin, Randolph
Motion failed.

Amendment #14

AMENDMENTS PROPOSED DURING HL&C COMMITTEE MEETING 2/19/82

Re: SB 84

Amendment #1

Main motion (amendment)

Rep. Randolph moved to amend SB 84 by accepting the draft entitled 2d House CS for CS for Senate Bill No. 84 (L&C).

Amendment #2

amendments to amendment

Rep. Rogers moved to amend the amendment to accept the bill with all the governor's proposed amendments.
For: Rogers, Gardiner Against: Martin, Bylsma, Randolph
Amendment failed.

Amendment #3

Rep. Rogers moved to accept the governor's proposed amendment #4. (p. 5, lines 1-2)
Motion passed unanimously.
Amendment adopted.

Amendment #4

Rep. Rogers moved to accept the governor's proposed amendment #11.
For: Rogers, Gardiner Against: Martin, Bylsma, Randolph
Amendment failed.

Amendment #5

Rep. Rogers moved to accept the governor's proposed amendment #10, Rep. Bylsma objected. Discussion. (p. 6, lines 15-17)
Motion passed unanimously.
Amendment adopted.

Amendment #6

Rep. Rogers moved, p. 6, lines 12-13 of draft CS, delete sentence, "The right to appeal is not affected by the failure to seek further review under AS 44.62.637." There was objection. Discussion.
For: Rogers, Gardiner Against: Martin, Bylsma, Randolph
Amendment ~~failed~~ passed

Amendment #7

Rep. Rogers moved, p. 5, lines 16 and 17, delete "up to an additional 30 days." and insert, after word "section", ". However, comments submitted under this subsection shall be submitted no later than 30 days prior to the date on which the lead agency must issue a final decision." Asked unanimous consent.
No objection.
Amendment passed.

Rep. Rogers moved the committee rescind its action in failing to adopt previous amendment. Discussion.
Rep. Rogers withdrew his motion.

Amendment #15

Rep. Gardiner moved, p. 1, line 11, the delete word "being" and insert "many times". Discussion.
For: Gardiner, Rogers Against: Bylsma, Randolph, Martin
Motion failed.

Amendment #16

Rep. Gardiner moved, p. 1, line 15, delete all of line 15 and insert "the unjustified delay of permits by". Discussion.
Rep. Gardiner withdrew his amendment.

Amendment #17

Rep. Gardiner moved, p. 1, line 15, begin sentence with language, "The unjustified delay of permits caused by".
For: Gardiner, Rogers Against: Martin, Bylsma, Randolph
Motion failed.

Amendment #18

Rep. Gardiner moved, p. 1, line 10, delete word "protracted", insert word "unnecessary". Discussion.
For: Gardiner Against: Randolph, Bylsma, Martin
Motion failed.

Amendment #19

Rep. Randolph moved to pass 2d HCS CSSB84 (L&C) out of committee; motion was withdrawn.

Amendment #20

main amendment Question was called on main amendment to accept 2d HCS CSSB 84 (L&C) as amended by committee.
For: Martin, Bylsma, Randolph Against: Gardiner
— Motion passed.

Amendment #21

motion Rep. Randolph moved to pass 2d HCS CSSB 84 (L&C) out of committee. Rep. Gardiner asked unanimous consent.
There was no objection.
— Motion passed unanimously.

AMENDMENT 5

Page 5, ls. 3-5.

Delete existing subsection (d) and insert the following:

(d) For activities involving both a disposal of interest in land, or plan of operations approval under a previous disposal, and a certification under sec. 401 of the Clean Water Act (33 U.S.C. sec. 1341), the lead agency shall be the Department of Natural Resources.

375 Gard - p. 1 line 10 delete "protracted", ins "unnecessary"

Discussion. (405) G for, B & Ra M opp'd

406 ~~Gardner~~ Discussion of general language in bill.

441 Rand moved to pass out of comm 2d CS CSSB 84 (L & C); w/drew

447 main amdmt to accept 2d HCSCSSB 84 L & C

opp'd: Gard fav: M, B, Ra

459 Rand moved to pass HCSCSSB 84 out of comm.

Gard asked unan consent.

No objection, & no passed. Bill was to be passed fm comm w/ amdmts passed.

474 Adj. 3:13

2/19/82

SB 84

Gardiner absent

000 START

1107 Call to order; continuation of hrg on SB84 - considering draft of L& . CS, + amdmts prop'd by admin. Limited testimony to 10 minutes.

022 Rogers asked abt xcrpt of Clark testimony & prop's regs for comm. use

031 OK Galbraith, Ak Oil + Gas Assoc,

& clarify misconceptions of draft CS; AG called it AOGA draft, but it isn't. It's a compromise AOGA can accept. Need for changes; spoke of future of state + state's income. (spoke fm prepared testimony.) Passed out chart dated 2/19/82 showing agencies operator must go th/ to get permit on state land.

Present permit process non-productive.

135 Galbraith said Mark Bond wd speak to amdmt.

Discussion.

142 Jamie Zinkewicher, Marathon Oil Co - support SB84. Spoke of history of bill & attempts at permit reform. (Spoke fm prepared testimony.) SB 84 incorporates a number of recommendations made in past leg reform attempts.

241 Max D. Malley, Ak Pub Affairs Mgr, Exxon Co USA -- supports draft CS. (Spoke fm prepared testimony) Time constraints estab'd in bill are workable. Makes real effort to ensure justifiable concerns are considered. Went over how prop'd time frames wd work. Time frames are adequate to obtain + go over all input before making decision. Bill also addresses local concern th/ public hrg process, studies, etc.

Vaska joined mtg around 1:30. (observed) former legislator Red Swanson in audience.

330 Rogers asked what permits he wd classify as complex

334 Dalley said most arent, but it wd be up to agency

Discussion.

356 Gardiner - re gstns chart passed out previously

Linnaville - wetlands are approx 1/2 N. Slope & require fed permit; expanded on problems dealing w/Corps of Engineers; legislation wd address this prob.

377 James Barnett, Atty for Sohio, Alaska Petroleum Co — general posn. Major concern is w/ lead agency portion of bill (spoke from prepared testimony.) Spoke of time delays experienced in past. Difficulty is no one person or agency has been given legis. mandate to speak for the state. Applicant assumes large role in mediating differences bet. agencies. This Legislation will correct these problems through lead agency process. Went through process. Felt local coastal zone laws establish good mechanism for voice local govt input. Gave example of permit processing prob.

512 Gardiner asked him to give specifics of the problem.

Discussion.

529 Resumed testimony - Sohio supports bill.

537 Rogers asked went over differences in gov's amdmts w/ respect to lead agency. Asked if 1 lead agency or 1 for ~~each~~ all projects — Barnett felt shd be 1 lead agency for each class of activity.

Rogers — next diff is gstn of how stnds or data submitted by coastal resource dists are handled — draft gives substantive consideration; gov's doesn't say. ~~same~~

Barnett — data should be given consideration; gives local govts plenty of input.

Discussed

618 ~~Rogers~~ gov's ~~also supp~~ provisions in case of conflict w/ local CZM recommendns.

(Rogers/Barnett) Rogers felt w/o gov's amdmts, gov wd veto bill.

If can't compromise, bill shd be moved fm comm.

673 Randolph so moved, Rog asked unan consent. R w/drew mos, Rog w/d unan consent

690 Gardiner asked Barnett, if Corps is causing prob, how can State law affect Corps regmt?

~~Barnett~~ Discussion - Barnett said Corps expanded jurisdiction; they're spending time trying to affect resolution w/ Corps; being wkd on in Cong. Need lead agency; also, Corps asks everyone for input in permit process; want this funneled thr/ lead agency.

Side B
000

010 Rogers - then you like lead agency, to solve consistency determination is most imp pt of bill - more imp than time limits?

Barnett - yes

R asked which permits are most complex

B - eg, Waterflood project

R - so one class is ~~first time~~ case where there's no precedent - waterflooding, gas pipeline

B - yes

R - a e which permits wd you class as Class I & II classes

B - II defined here is for ins where pub hrgs req'd plan of operations permit is example of one that doesn't require pub hrgs.

043 Martin - comments

048 Ethel Nelson, exploration land rep, Texaco Inc - ~~has been in past~~ supports bill. Comments made in past have been selectively ignored by admin. Re amdmts: some do not promote orderly development. Willing to accept bill as drafted as good faith comp. Agree w/ testimony that will be given by Mark Bond. Went over impact of bill - opp to implement uniform permit process; gives local research agencies right to be heard & input considered by st; processing time & employees needed will be reduced. Alas wealth almost entirely dependent on production of nat'l resources. Will leave copy of testimony w/ Cates.

104 Mark Bond, atty on behalf of Chevron USA; today rep'g AOGA. Support 2d HCS CS SB 84 (1 & c). Discussing amdmts:

Amdmt #1 185 days for class II permit) - ~~same to H~~ this provision unnecessary & unwarranted, don't need 185 days

134 Rogers - 65 days cd be difficult, not enough time - gave example

155 Bond - opinion of AOGA that 65 days more than enough time. Cd get extension if they have problems. ~~Permit to obtain]~~ #1 w/ 65 day limit

169 Yard - if agencies have situ Rogers described, bureaucracy may be forced to hold things on everything to avoid getting into time-crunch situ. Gave reasons this may be true in ~~Alaska~~ order for bureaucracy to protect itself.

190 Bond - depends on how long you want to determine if pub hrg is necess.

196 Martin - ~~can't~~ can't agencies/industry usually initially tell which ones wd need hrg process; Bond thought so.
Martin spoke of comm. system in state, didn't agree w/ extension provision
Bylsma - first prob dealt w/ by agency shd be pub hrg optn
Also felt ext, lang shd not be in bill

035 # 2 (?) do not want extension expressly stated in bill.
Discussion, Rogers/Bond

Bond
252 #3 lead agency - key provision of bill. Went over objectives of section. Lead agency must have authority to make decisions; non-lead agencies shdn't be allowed to give input to fedl agencies.
Went over problems w/ amdmt & effects. (See written testimony)
Oppose this amdmt.

333 Rogers - don't understand diff bet / lead agency for CZM & consis - tency determinations, & having various agencies give determ depending on class of activity
Bond - w/ either, variety of agencies wd give input
R. - agree "comments" not defined; shd be chgd to "documented comments" or supported," & add that "conjectural info wd not be considered"
B - not adequate solution. Gave reasons

371 R - Rogers gave example of possible sitn & how it wd be dealt with; ~~gave ex. of possible sitn of decisions required & suggestions, & by an agency; went~~

B - commented on how he saw the sitn.

400 Discussion about who makes decisions, & what data wd be considered, how decisions shd be handled.

432 Martin - don't need to research every sitn; developmt has been going on for abt 20 yrs now, most data needed exists.

450 Gardiner - better example re Borax mine - happened in BC, didn't work out well. State is looking at, better method instead of just saying project won't work. Somebody will have to make a judgment that is a prediction; not provable irrefutably. Issue is what agency is most likely to have best info.

485 Bond - bill doesn't lock out considering conjectural info; agreed that all decisions can't be made based on facts.

496 Gardiner ~~exp~~ clarified his example of how the facts cd ~~preclude~~ force negative decision on the mine, where predictions wld allow it.

523 Bond - commented. ~~Thanked~~

529 #4 allowing agency other than lead agency to comment to a federal agency - bc fed law requiring comments of an agency wd override this. Support ~~amdmt~~ section.

560 Randolph prop'd accepting draft CS for wkg amdmts.
So moved (to accept 2d HCS CSSB 84 l.o.c)
Rogers moved to amend to accept w/ all of govs amdmts.

575 Question - ~~on~~ Rogers amdmt: for: Rog Gard
against: Paul, Byrsma Martin

603 ~~Roll call~~: Rogers mvd gov amdt 4 as amd to amd accepted unan.

613 Rog mod gov #11: R & G for, BM & R against

624 " " " " 10: Bylsma objected.

Rogers said amdmt has effect of changing rules of ct, & wd require 2/3 vote & amdmt of bill title. Legis shd not tell ct what cases have preference; unwarranted interference in ct affairs

Discussion.

Qstn: No objections, passed unan.

700 Rog mod p 6, lines 12-13 (on Randolph no)

delete sentence - "right to appeal . . . .637" ; objection.

701 Rogers - section has effect of requiring more litigation & more delay in process. Puts more policy govts in ct than w/ lead agency.

000 Tape 2

Discussion.

026 Qstn Oppd Ran, Martin for - R, G, & Bylsma - passed

030 Rogers - p. 5, line 24 - add "except when applicable due process rights.. within 45 days." (See gov's amdmts #8)

036 Discussion

043 Qstn: For: Rog, G Against: Ran, M, B

050 Rogers: p. 5, lines 16+17: delete "up to .. 30 days" & insert ", if the time period is extended, the extension should leave at least 30 d. ". However, Comments submitted under this subsec"

086 Asked unan consent. No objection, amdmt passed.

091 Rogers moved ~~gov amdt #~~, p. 2, line 12, add comma
← same as gov amdt #1 except delete 85, ins 75

115 ~~Randolph opposed~~ discussion

146 for: Bylsma, Rog, Gard
against: M, Rand

listen to record here

151 Rogers moved p 2 lines 26, " "unless the applicant otherwise agrees."

169 passed unan.

172 Rog - p. 4 6
delete 1st sent + insert 1st sent of gov #2 and 3
for G, Rog against Ran M B

188 Rog moved Gov #3
for R G against B, Ra, M

190 Rog p 5, 3-5, moved gov # 5 (delete subsec (d) & insert new (d)) Rand asked unan consent

206 no objections, passed

210 Rog moved # 7, revised p. 5, lines 22-23; Gard asked unan consent

226 vote for: G, Ro against: B, M, Ra

233 Rog moved to rescind action in failing to adopt amdt.

241 Discussion

283 Rog w/drew mo.

AMENDMENTS PROPOSED DURING HL&C COMMITTEE MEETING 2/19/82

Re: SB 84

Amendment #1

Main motion (amendment)

Rep. Randolph moved to amend SB 84 by accepting the draft entitled 2d House CS for CS for Senate Bill No. 84 (L&C).

Amendment #2

amendments to amendment

Rep. Rogers moved to amend the amendment to accept the bill with all the governor's proposed amendments.
For: Rogers, Gardiner Against: Martin, Bylsma, Randolph
Amendment failed.

Amendment #3

Rep. Rogers moved to accept the governor's proposed amendment #4. (p.5, lines 1-2)
Motion passed unanimously.
Amendment adopted.

Amendment #4

Rep. Rogers moved to accept the governor's proposed amendment #11.
For: Rogers, Gardiner Against: Martin, Bylsma, Randolph
Amendment failed.

Amendment #5

Rep. Rogers moved to accept the governor's proposed amendment #10; Rep. Bylsma objected. Discussion. (p. 6, lines 15-17)
Motion passed unanimously.
Amendment adopted.

Amendment #6

Rep. Rogers moved, p. 6, lines 12-13 of draft CS, delete sentence, "The right to appeal is not affected by the failure to seek further review under AS 44.62.637." There was objection. Discussion.
For: Rogers, Gardiner Against: Martin, Bylsma, Randolph
Amendment failed.

Amendment #7

Rep. Rogers moved, p. 5, lines 16 and 17, delete "for up to an additional 30 days." and insert, after word "section", ". However, comments submitted under this subsection shall be submitted no later than 30 days prior to the date on which the lead agency must issue a final decision." Asked unanimous consent.
No objection.
Amendment passed.

Amendment #8

Rep. Rogers moved, p. 2, line 12, after word "application.", delete period, and insert ", unless a public hearing is held on the application, in which case a final decision must b3e issued within 75 days after the date of receipt." Discussion.
For: Rogers, Gardiner, Bylsma Against: Randolph, Martin
Amendment passed.

Amendment #9

Rep. Rogers moved, p. 2, line 28, add, ", unless the applicant otherwise agrees."
No objection.
Motion passed unanimously. should be after line 28

Amendment #10

Rep. Rogers moved, p. 4, line 6, delete first sentence and insert, after (a), "There are established lead agencies which are solely responsible for issuing coastal management consistency determinations under AS 46.40 and for preparing and submitting state comments on federal permit applications for all projects which involve the disposal of an interest in state land or water or a least one class II permit."
For: Gardiner, Rogers Against: Randolph, Martin, Bylsma
Motion failed.

Amendment #11

Rep. Rogers moved the governor's proposed amendment #3.
For: Gardiner, Rogers Against: Bylsma, Randolph, Martin
Motion failed.

Amendment #12

Rep. Rogers moved, p. 5, lines 3-5, to delete subsection (d) and insert new subsection (d), using language from governor's proposed amendment #5. Rep. Randolph asked unanimous consent.
No objections.
Motion passed unanimously. ~~Should be line 1 d, subsection (e)~~

Amendment #13

Rep. Rogers moved, p. 5, lines 22-23, to accept the governor's proposed amendment #7, as revised (see sheet entitled Changes to Proposed Administration Amendments to SB 84): Delete language "Except as provided in this section the procedure is", and insert "Administrative appeals" conducted under "this section are not subject to the procedures in" AS 44.62.330-44.62.630. Rep. Gardiner asked unanimous consent.
For: Rogers, Gardiner Against: Bylsma, Martin, Randolph
Motion failed.

Amendment #14

Rep. Rogers moved the committee rescind its action in failing to adopt previous amendment. Discussion.
Rep. Rogers withdrew his motion.

Amendment #15

Rep. Gardiner moved, p. 1, line 11, the delete word "being" and insert "many times". Discussion.
For: Gardiner, Rogers Against: Bylsma, Randolph, Martin
Motion failed.

Amendment #16

Rep. Gardiner moved, p. 1, line 15, delete all of line 15 and insert "the unjustified delay of permits by". Discussion.
Rep. Gardiner withdrew his amendment.

Amendment #17

Rep. Gardiner moved, p. 1, line 15, begin sentence with language, "The unjustified delay of permits caused by".
For: Gardiner, Rogers Against: Martin, Bylsma, Randolph
Motion failed.

Amendment #18

Rep. Gardiner moved, p. 1, line 10, delete word "protracted", insert word "unnecessary". Discussion.
For: Gardiner Against: Randolph, Bylsma, Martin
Motion failed.

Amendment #19

Rep. Randolph moved to pass 2d HCS CSSB84 (L&C) out of committee; motion was withdrawn.

Amendment #20

main amendment

Question was called on main amendment to accept 2d HCS CSSB 84 (L&C) as amended by committee.
For: Martin, Bylsma, Randolph Against: Gardiner
Motion passed.

Amendment #21

motion

Rep. Randolph moved to pass 2d HCS CSSB 84 (L&C) out of committee. Rep. Gardiner asked unanimous consent.
There was no objection.
Motion passed unanimously.

AMENDMENTS PROPOSED DURING HL&C COMMITTEE MEETING 2/19/82

Re: SB 84

Amendment #1

Main motion (amendment)

Rep. Randolph moved to amend SB 84 by accepting the draft entitled 2d House CS for CS for Senate Bill No. 84 (L&C).

Amendment #2

amendments to amendment

Rep. Rogers moved to amend the amendment to accept the bill with all the governor's proposed amendments.
For: Rogers, Gardiner Against: Martin, Bylsma, Randolph
Amendment failed.

Amendment #3

Rep. Rogers moved to accept the governor's proposed amendment #4. (p.5, lines 1-2)
Motion passed unanimously.
Amendment adopted.

Amendment #4

Rep. Rogers moved to accept the governor's proposed amendment #11.
For: Rogers, Gardiner Against: Martin, Bylsma, Randolph
Amendment failed.

Amendment #5

Rep. Rogers moved to accept the governor's proposed amendment #10; Rep. Bylsma objected. Discussion. (p. 6, lines 15-17)
Motion passed unanimously.
Amendment adopted.

Amendment #6

Rep. Rogers moved, p. 6, lines 12-13 of draft CS, delete sentence, "The right to appeal is not affected by the failure to seek further review under AS 44.62.637." There was objection. Discussion.
For: Rogers, Gardiner Against: Martin, Bylsma, Randolph
Amendment failed.

Amendment #7

Rep. Rogers moved, p. 5, lines 16 and 17, delete "for up to an additional 30 days." and insert, after word "section", ". However, comments submitted under this subsection shall be submitted no later than 30 days prior to the date on which the lead agency must issue a final decision." Asked unanimous consent.
No objection.
Amendment passed.

Amendment #8

Rep. Rogers moved, p. 2, line 12, after word "application.", delete period, and insert ", unless a public hearing is held on the application, in which case a final decision must b3e issued within 75 days after the date of receipt." Discussion.
For: Rogers, Gardiner, Bylsma Against: Randolph, Martin
Amendment passed.

Amendment #9

Rep. Rogers moved, p. 2, line 28, add, ", unless the applicant otherwise agrees."
No objection.
Motion passed unanimously. should be after line 28

Amendment #10

Rep. Rogers moved, p. 4, line 6, delete first sentence and insert, after (a), "There are established lead agencies which are solely responsible for issuing coastal management consistency determinations under AS 46.40 and for preparing and submitting state comments on federal permit applications for all projects which involve the disposal of an interest in state land or water or a least one class II permit."
For: Gardiner, Rogers Against: Randolph, Martin, Bylsma
Motion failed.

Amendment #11

Rep. Rogers moved the governor's proposed amendment #3.
For: Gardiner, Rogers Against: Bylsma, Randolph, Martin
Motion failed.

Amendment #12

Rep. Rogers moved, p. 5, lines 3-5, to delete subsection (d) and insert new subsection (d), using language from governor's proposed amendment #5. Rep. Randolph asked unanimous consent.
No objections.
Motion passed unanimously. ~~should be [illegible], subsection (c))~~

Amendment #13

Rep. Rogers moved, p. 5, lines 22-23, to accept the governor's proposed amendment #7, as revised (see sheet entitled Changes to Proposed Administration Amendments to SB 84): Delete language "Except as provided in this section the procedure is", and insert "Administrative appeals" conducted under "this section are not subject to the procedures in" AS 44.62.330-44.62.630. Rep. Gardiner asked unanimous consent.
For: Rogers, Gardiner Against: Bylsma, Martin, Randolph
Motion failed.

Amendment #14

Rep. Rogers moved the committee rescind its action in failing to adopt previous amendment. Discussion.
Rep. Rogers withdrew his motion.

Amendment #15

Rep. Gardiner moved, p. 1, line 11, the delete word "being" and insert "many times". Discussion.
For: Gardiner, Rogers Against: Bylsma, Randolph, Martin
Motion failed.

Amendment #16

Rep. Gardiner moved, p. 1, line 15, delete all of line 15 and insert "the unjustified delay of permits by". Discussion.
Rep. Gardiner withdrew his amendment.

Amendment #17

Rep. Gardiner moved, p. 1, line 15, begin sentence with language, "The unjustified delay of permits caused by".
For: Gardiner, Rogers Against: Martin, Bylsma, Randolph
Motion failed.

Amendment #18

Rep. Gardiner moved, p. 1, line 10, delete word "protracted", insert word "unnecessary". Discussion.
For: Gardiner Against: Randolph, Bylsma, Martin
Motion failed.

Amendment #19

Rep. Randolph moved to pass 2d HCS CSSB84 (L&C) out of committee; motion was withdrawn.

Amendment #20

main amendment

Question was called on main amendment to accept 2d HCS CSSB 84 (L&C) as amended by committee.
For: Martin, Bylsma, Randolph Against: Gardiner
Motion passed.

Amendment #21

motion

Rep. Randolph moved to pass 2d HCS CSSB 84 (L&C) out of committee. Rep. Gardiner asked unanimous consent.
There was no objection.
Motion passed unanimously.

Amended – see pages 2, 5, 6

Original sponsors: Bennett, Parr and Fahrenkamp

IN THE SENATE

BY THE LABOR AND COMMERCE COMMITTEE

2d HOUSE CS FOR CS FOR SENATE BILL NO. 84 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to processing of permits by state agencies, and to administration of the Alaska Coastal Management program."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. FINDINGS. The legislature finds that

(1) the orderly development of state resources is being unnecessarily delayed by the length of time required to obtain permits from state agencies, by the complexity of the permitting process, and by the number of agencies involved in the permitting process;

(2) the uncertainties created by the lack of specific time limits, the proliferation of agency reviews, the number of agencies involved in the permit process, and unjustified agency requirements upon the processing of permit applications have cost Alaskans millions of dollars in lost employment and higher prices;

(3) the public interest has not been advanced by protracted delay in the processing of permit applications by state agencies;

(4) by reducing the number of agencies and agency reviews involved in the permit process, and by requiring state agencies to process permit applications in an expeditious manner, the social, economic, and environmental health and well-being of Alaska citizens will be promoted; and

(5) there are many administrative orders and similar documents that have been promulgated by the executive branch relating to interagency review that conflict and overlap, retarding the permit issuing process.

* Sec. 2. AS 44.62 is amended by adding new sections to read:

ARTICLE 8A. PERMIT PROCESSING.

Sec. 44.62.632. PERMIT CLASSIFICATION. (a) Each state resource agency shall by regulation classify each of the permits issued by that agency within one of the two following categories:

(1) class I permits, for which the state agency must issue a final decision within 30 days after the date of receipt of a completed permit application; and

(2) class II permits, for which, because of a necessary public notice or interagency review period, a final decision cannot be issued within 30 days. A final decision on a class II permit must be issued within 65 days after the date of receipt of a completed permit application, , unless a public hearing is held on the application, in which case a final decision must be issued within 75 days after the date of receipt.

(b) Final regulations classifying its permits, and uniform procedural regulations providing for the processing of these permits, shall be adopted by each state resource agency by October 1, 1982, following appropriate notice and hearing. Permits applied for after October 1, 1982 must be issued in accordance with the time periods specified in (a) of this section, and the provisions of the implementing regulations.

Sec. 44.62.633. OTHER REGULATORY REQUIREMENTS FOR PERMIT PROCESSING. (a) Upon a finding by the head of a resource agency that a permit being considered involves unusually complex issues so that the agency cannot render a final decision within the time period specified in AS 44.62.632(a), the head of the agency may prescribe a time period within which the final decision will be made. The finding of the head of the agency may be appealed by the applicant to the superior court under the Appellate Rules of Procedure. The time period may not be extended more than 120 days beyond the time period specified in AS 44.62.632(a), unless the applicant otherwise agrees.

(b) The time period specified in AS 44.62.632(a) may be extended

if necessary to facilitate joint processing of a permit application by state and federal agencies, but only if adherence to the time periods established in AS 44.62.632(a) would cause an irreconcilable conflict with a federal statute or regulation.

(c) Subject to (a) and (b) of this section and AS 44.62.634, failure of a resource agency to make a final decision within 30 days after the receipt of a completed permit application for a class I permit, or within 65 days after the receipt of a completed permit application for a class II permit, is approval of the application. In an appeal of a permit issued by operation of this subsection, the record shall be considered in the light most favorable to the applicant, and the permit shall be accorded a presumption of regularity.

(d) A state agency may not condition the issuance of a permit upon the issuance of a permit from another governmental agency.

Sec. 44.62.634. ADDITIONAL INFORMATION. (a) If a resource agency receives a completed permit application that does not contain sufficient information concerning the project's compliance with the agency's statutes and regulations, the agency shall notify the applicant within 15 days after receipt of a completed permit application for a class I permit, and within 30 days after receipt for a class II permit.

(b) The notification must specify those particular facts or issues concerning the proposal upon which the agency requires additional information in order to determine whether the project will conform to the agency's statutes and regulations.

(c) If a timely request under (a) and (b) of this section is made, the time period specified in AS 44.62.632 is suspended from the date of request to the date of full compliance with the request. Subsequent requests for additional information may be made, but must relate only to new issues raised by the response to the initial noti-

fication. Subsequent requests do not extend the time periods specified in AS 44.62.632.

(d) Nothing in this section grants a resource agency the authority to request information beyond the authority given to it by other statutes.

Sec. 44.62.635. LEAD AGENCY. (a) There is established a lead agency that is solely responsible for issuing coastal management consistency determinations under AS 46.40 and for preparing and submitting state comments on federal permit applications. The lead agency is that resource agency that has principal responsibility for authorizing the overall activity, including instances where an activity requires permits from more than one resource agency. For classes of activities for which no agency with principal responsibility exists the governor shall designate a resource agency to be a lead agency for each class by administrative order no later than October 1, 1982. In performing its functions under this section, the lead agency shall consult with other resource agencies and with coastal resource districts under AS 46.40.

(b) Substantive consideration shall be given to the documented factual statements or data submitted by resource agencies and to the office of coastal management within their primary areas of expertise, and to the documented factual statements or data submitted by coastal resource districts made under an approved district coastal management program. The lead agency shall consider opinions, conclusions or recommendations submitted by the commenting agency, but may, in its discretion, reach contrary opinions, conclusions or recommendations according to the evidence received. The lead agency shall then balance competing factors in reaching its final decision. No resource agency other than the lead agency has primary expertise in the balancing of competing factors.

Except as otherwise required by federal law,

(c) No state agency other than the lead agency may comment to a federal permitting agency.

delete this subsection; replace with attached * (entitled Amendment 5)

~~(d) An agency's completion of a review under sec. 401 of the Clean Water Act (33 U.S.C. sec. 1341) does not constitute that agency as a lead agency under this section.~~

Sec. 44.62.636. COMMENT PERIOD. A coastal resource district or state agency that receives a request for comment in connection with a permit application or plan review being processed by a resource agency shall submit these comments in accordance with the following schedule:

(1) comments on class I permits shall be submitted within 15 days after the agency's receipt of the request;

(2) comments on class II permits and federal permits shall be submitted within 30 days after the agency's receipt of the request;

(3) when under AS 44.62.633, the requesting agency has extended the time periods specified in AS 44.62.632, that agency may extend the time period specified in this section. However, comments submitted ~~for up to an additional 30 days~~ under this subsection shall be submitted no later than 30 days prior to the date on which the lead agency must issue a final decision.

Sec. 44.62.637. ADMINISTRATIVE APPEALS. (a) The uniform procedural regulations adopted under AS 44.62.632(b) must provide for an administrative appeal from a final decision on a permit application. The administrative appeal is to the head of the resource agency involved. Except as provided in this section the procedure is conducted under AS 44.62.330 - 44.62.630.

(b) The administrative appeal must be resolved within 45 days after the final decision on a permit application, or, if a hearing is held on the administrative appeal, within 65 days after the final decision on the permit application.

(c) An appeal taken from a decision granting a permit may, but need not, stay the issuance of the permit.

(d) The head of the agency may summarily dismiss an appeal before the time established in this section, and the dismissal is the final agency action on the matter.

(e) In an appeal from the denial or conditioning of a permit the head of the agency may, if he determines that the public interest would be served, grant the permit or remove conditions of the permit until the appeal is determined.

Sec. 44.62.638. REVIEW BY THE SUPERIOR COURT. (a) Judicial review by the superior court of a final decision issued under AS 44.62.632 - 44.62.637 may be had by filing a notice of appeal in the superior court in accordance with the applicable Rules of Appellate Procedure. The right to appeal is not affected by the failure to seek further review under AS 44.62.637. The review is governed by the provisions of AS 44.62.560(b) - (e) and AS 44.62.570.

(b) An appeal taken under this section ~~has~~ should have preference on the calendar of civil actions before the court and ~~shall~~ should be decided without unnecessary delay.

* Sec. 3. AS 44.62.640 is amended by adding a new subsection to read:

(c) As used in AS 44.62.632 - 44.62.638,

(1) "date of receipt" means the date on which a state agency actually receives a completed application filed in accordance with agency regulations and at a place identified as appropriate for filing in the agency's regulations;

(2) "permit" means a permit, license, certification, consistency determination, or other authorization or approval issued by a resource agency as a written document that is required to be obtained or is solicited from a state agency before the construction or operation of a project; "permit"

(A) does not include the approval of a unit agreement,

a unit development plan, or a unit exploration plan, or conveyances of interest in state land or water;

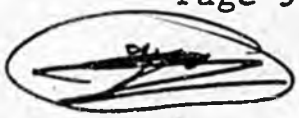
(B) does include all authorizations and approvals, whether proprietary or regulatory, necessary to undertake a project under a previously conveyed property interest;

(3) "project" means a new activity or expansion or addition to an existing activity for which permits are required before construction or operation; "project" does not include pursuing a trade or profession, providing public health service, or operating a financial institution;

(4) "resource agency" includes the Department of Natural Resources, the Department of Environmental Conservation, and the Department of Fish and Game with respect to permits issued for the protection of fish habitat or the regulation of state sanctuaries, refuges, and critical habitat areas.

AMENDMENT 5

Page 5, ls. 3-5.



Delete existing subsection (d) and insert the following:

(d) For activities involving both a disposal of interest in land, or plan of operations approval under a previous disposal, and a certification under sec. 401 of the Clean Water Act (33 U.S.C. sec. 1341), the lead agency shall be the Department of Natural Resources.

AMENDMENT 3 - Replace with the following:

Page 4, ls. 6 - 29

Delete all of sec. 44.62.635(a) and (b) and insert following in its place:

(a) There are established lead agencies which are solely responsible for issuing coastal management consistency determinations under AS 46.40 and for preparing and submitting state comments on federal permit applications for all projects which involve the disposal of an interest in state land or water or at least one class II permit. The lead agency may vary for classes of activities, but shall be that agency which has principal responsibility for authorizing the overall activity. For classes of activities for which no agency with principal responsibility exists the governor shall designate a lead agency by administrative order no later than October 1, 1982.

(b) In performing its function under this section, the lead agency shall consult with other resource agencies and with coastal resource districts under AS 46.40. The lead agency shall consider facts, data, opinion, conclusions or recommendations submitted by the commenting agency and the coastal resource districts within their areas of expertise. The lead agency shall then balance competing factors in reaching its final decision. No resource agency other than the lead agency has primary expertise on the balancing of competing factors.

(c) In its consideration of the comments of other resource agencies, the lead agency shall give substantive consideration to the facts and data, and to the (opinions, conclusions or recommendations substantiated by said facts and data) which are submitted by commenting agencies within their primary areas of expertise. An opinion, conclusion or recommendation is adequately substantiated under this subsection if it is based on facts or data reasonably relied upon by experts in the field.

(d) If a coastal resource district with an approved and applicable district coastal management program appeals the lead agency's consistency determination, AS 44.62.560 -- 44.62.570 govern judicial review. However, notwithstanding AS 44.62.570(c), abuse of discretion is established if the reviewing court determines that the consistency determination is not supported by a preponderance of evidence in the administrative record.

Action Taken: No action taken during this meeting.

ACTION NARRATIVE

Tape #22
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:08 p.m. Members present were: Representatives Martin, Bylsma, Randolph, and Rogers. Representative Gardiner was absent. Also in attendance were Representatives Cato and Zharoff. Before the committee were House Bills 619, 698, and 705. Rep. Martin said that the prime sponsor of HB 619, Rep. Metcalfe, had asked that the committee delay hearing on HB 619.

Number 013

Rep. Cato, prime sponsor of HB 705, testified regarding the need for the bill, and gave a history of prior legislation. She said the bill does not increase the teacher's contribution. It sets guidelines to determine the increase each age group receives, cost of living eligibility, and survivor's benefits. She feels this needs to be addressed. Rep. Rogers inquired about the fiscal note; Rep. Cato responded. There was discussion of the fiscal note and impact.

Number 147

Rep. Zharoff, prime sponsor of HB 698, said a sponsor substitute for the bill should have been given to the committee. He said if the committee would adopt his proposed sponsor substitute as a committee substitute, it would help for clarification. Rep. Zharoff gave background on the bill and explained the fiscal note. He said, if the committee preferred, he would give them suggested amendments in lieu of adopting the sponsor substitute.

Number 200

There was discussion by the committee of the differences in HB 698 and HB 705.

Number 240

Bob Cooksey, NEA-Alaska, said they favored both bills, and encouraged adopting Rep. Zharoff's sponsor substitute. He went over the impact of both bills, and gave his reasons for supporting the legislation. At Rep. Rogers' request, Cooksey went over HB 698, section by section.

Number 415 — Rep. Martin asked if there is enough money in the pension fund to cover cost of living allowances in the future, or if this would be paid out of the general fund. There was discussion of the pension fund and investments. Rep. Rogers gave background of investment powers.

Number 403 — Bob Manners, NEA-Alaska, gave background supporting the need for HB 619. He gave their concept of need for arbitration in collective bargaining, and the affect. Manners said, regarding the intent of the legislation, that arbitration is good. He went over portions of the bill they're concerned about, section by section.

Number 694 — Bob Greene, Alaska School Board, testified regarding HB 619. He said the school boards support the first section dealing with mediation. He said current law gives direction to the federal government, but the federal government uses its own laws. He said a provision should be added to allow mediation to be used more than once in a bargaining period. Greene commented on other sections of the bill.

Side B, Number 077 — There was discussion of the right to strike, alternative arbitration, and accelerated bargaining.

Number 209 — Regarding HB 698, Greene commented on the change in function of the teacher retirement board. He said the school boards oppose this unless there is a change in composition of this board. He said that, if the board can make policy decisions, the members should represent all parties affected. He said no provision is made for school board input. There was discussion.

Number 269 — Greene spoke of the increase in employer contributions. He proposed that either the local employer contribution be frozen at the same contribution as the employee's; or that all parties contributing (employer, employee, state) be treated the same. He suggested the state accept the responsibility for paying for the increased costs. He agreed that a post-retirement benefit would be helpful.

Number 359 — Fred Muller, Deputy Commissioner, Department

of Administration, testified regarding both HB 705 and HB 698. Muller said that HB 705 provides an automatic cost of living adjustment. He elaborated on how these adjustments are made, and their future impact. Muller said HB 705 recognizes that older people have more difficulty living on a pension than younger retirees. He said no adjustment is made for those people under 55 years old. Muller said that continuing to fund ad hoc increases will put the retirement system in a position similar to the federal social security system. He said the funds needed will be billions of dollars per year in the future. He supported yearly funding. Muller said HB 705 does not take into account the employee contribution. He felt employees should contribute to benefits they will receive.

Number 468 — There was a discussion of costs and investments.

Number 536 — Regarding HB 698, Muller said it was the same as former HB 121, only it was related just to teachers. Muller explained the investment decisions made by the Department of Revenue. Muller went over changes they would recommend to HB 698. There was discussion of how the program would be funded.

Tape 23, Number 015 — Marilyn Miller, Alaska Municipal League, said they would like to see the increase in benefit costs borne by the employees.

Number 025 — Cherie Shelley, APEA, supported the cost of living increases. She said the problem with HB 698 is that it addresses only teachers. She felt this would upset employees in the PERS system, and felt the bill should cover both groups.

Number 057 — Rep. Martin said that the bills would be heard again at a later time. Jeff Barry, committee aide, said the attorney general had requested more time on HB 557; Rep. Martin explained why they had requested more time.

Number 076 — There being no further business to come before the committee, the meeting was adjourned at 2:45 p.m.

Gardiner] absent
~~Randolph~~

Cato, Zharoff attending

1:08 2/22/82

000 Call to order

HB619 Sponsor requested hrg be delayed

013 HB 705 - Betty Cato - gave reason for legislation
& history of prior legis.. Bill does not increase
teachers contrib contribution. Sets guidelines to
determine increase each age group recvs, COLA eligibility,
disability & ~~spouse of deceased~~ survivors benefit. Feels this
needs to be addressed.

066 Rogers inquired about fiscal note, Cato responded.
Discussion of note & impact.

109 Martin said it seemed we're mandating increase
(ref'd secs. 2 & 3); discussion of where funds
will come fm (revenue funds, pension plan funds, etc).

147 Rep. Zharoff - HB698 - prime sponsor. Said sponsor
substitute shd have been in packets - it's being revised
for final submission. Said if comm. w/d adopt his
sponsor sub as a comm. sub, w/d help for clarification.
~~Rogers was not~~ (This was not formally done.) Gave background on bill & explained
fiscal note. Said he'd give. Gave suggested amdmts in lieu of
adopting ~~the~~ sponsor sub.

200 Martin, Rogers discussed differences in 698 & 705.
Discussion.

040 Bob Cooksey ANEA (?) Alaska - favored both bills;
encouraged adopting Rep Z's CS. Went over what
Cato's bill does & what Zharoff's bill does; gave
reasons for supporting legislation.

~~Senate~~ Spoke of what teacher board wd do.

285 Rogers requested he go over sections of HB698.

291 Cooksey ~~a~~ did so, section by section (draft CS/SS)

366 ~~Discussion~~. Recognize cost; if, in long run, continue as presently set up, will eventually be more costly than this legislation

385 Randolph asked status of administrative option; Cooksey said it has been implemented for present yr. Implementn depends on funds (?). Gave history of this option.

~~405 Discussion~~.

415 Martin asked if there is enough ~~funds~~ money in pension fund to cover cola's in future, or if wd be pd out of general fund. Discussion of pension fund & investments.

439 Rogers gave background of investment powers.

447 Rogers asked abt testimony on labor relations bills - discussion.

463 Bob Manners, NEA Alaska, re HB 619 - gave their concept of need for arbitration in collective bargaining & affect. Gave background supporting need for HB 619. Said, re intent of legis, arbitration is good. Went over portions of bill they're concerned about - p. 2-4, strike section

533 p. 2, l. 23-27 - ~~court order shd carry order to use arbitrat~~

p. 3 - right to strike - concerned abt how right to strike is arrived at.

p. 4 - arbitration procedure - ambiguity in Sec A.

p 4 - para C - selection of arbiter - shd be latitude

p 5 - para E - arbiters award shd be dealt with item by item rather than total pkg.

637 Cost of arbitration - hopefully state wd assist in cost. Not all school districts can afford it.

last p., sec 14 - discrepancy in bill

677 Rogers - asked if theys prefer the bill or current law.

Manners said finality is important process

694 Bob Green, ak School Board - re HB 619 - school boards ~~one incentive to take new~~ support first section dealing w/mediation. Current law gives direction to fed govt; feds use their own laws.

Side B

Shd add provision to allow mediation to be used more than once in bargaining period.

020 Sec 14.20.580 - fed mediation svc will not provide reports; suggested deleting reference to reports.

Sec 2 - difficulty w/ref to lockout.

053 Rogers asked clarification; discussion

077 Green - sec 3, right to strike determined by election - concerned abt impact in rural community.

096 Rogers - ~~pud~~ school who he rather have decision (strike/arbitration)

Green - feel this wd be handled at statwide level; wd rather see determination by local govt agency, even borough or city govts.

129 ~~Doug~~ Rogers - if teachers don't have right to strike & mediation unsuccessful, what alternative do teachers have?

Green - advisory arbitration; good collective bargaining will result in agmt. Things can be done to speed process. Don't support third party arbitrator in any case. Thinks too much time spent in process is problem. Spoke of accelerated bargaining & other options to speed process.

209 Green - re retirement bills

HB 698 - ref to chng in function of teacher retirement bd: school boards oppose this unless there is chng in makeup of this bd. If board can make policy decisions, members shd represent all parties affected. No provision made for school bd input.

14.25.035-252 Rogers - then include ? to clarify what they want.

260 Green - cost of bill causes abt 5% increase of employer contribution (Randolph/Rogers clarified - presently 8.45% of wages; will go to 12.27%, which is close to 50% increase in contribution). Concerned. Proposed either local empr cont'n be frozen at same as employees cont; or all parties ~~cont'g~~ contributing (empe, empr, state) be treated the same. Significant amt of money. ~~If increasing teacher benefits~~ Suggested state accept responsibility for paying for the change increasing ~~over that~~ costs already known. Agreed post-retirement benefit wd be helpful.

359 Fred Mullen, dep comm, dept admin, re HB 705 & 698.

HB 705 bill provides automatic cola adjustment - elaborated on how cola adjustments are made, & future impact. [Cost ~~not~~ of new benefits is not actuarily funded.] 705 provides cola adjustment recognizing that older people have more difficulty living on pension than youngers. No adjustments for those under 55. Continuing to fund ad hoc increases will put retirement system in prob similar to Soc. security. Funds needed will be billions per yr in future. Support fndg each yr.

448 HB 705 doesn't take into account employer contribution; employees shd contribute to benefits they will receive. Agreed w/ Rogers that this wd reduce fiscal note.

468 Rogers request 1 cost, assuming 4% ad hoc, actuarial cost.

480 Martin said he had assumed investments were made to take care of bene. increases; asked how it works.

491 Muller — Comm of Dep of Admin makes that decision. ~~Actuarial estimates~~ Explained how system works, factors considered. Said no state funds from general revenues.

536 Rogers asked when decisions for ad hoc increases are made; Muller ~~stated~~ explained.

Discussion.

HB 698

0553 Muller said 698 is same as former ~~121~~ 121, only related just to teachers.

HB 705

564 Martin asked abt HB 705, sec 2, increasing benef. payts. Muller explained bill. Said mandatory increase is easier to budget.

Discussion. Muller explained investment decisions by Dept. Revenue

HB 698

611 Recommended chgs —

p. 4, l. 14 (orig bill) — word "membership" be chgd to "credited"

p. 7, l. 5 — last word "state" shd be chgd to "employer-sponsored"

, l. 6 — first word " " " " "

overall — tried to address probs (in 121) in administering system; 698 only addresses prob w/ teachers, doesn't address PERS. Admin wd prefer to see total prob treated.

672 Randolph asked opinion of 1/0 cost sharing (empr, empe)

085 Muller - ~~Employer determines benefit Equal Sharing~~
Doesn't address major problems, like automatic Cola
Discussion. Randolph had questions abt program.

729 Muller explained. Retirement determined by wages & length of svc.
Tape 2
Discussion.

015 Marilyn Miller, AK Municipal League - ~~Hrgs~~ ~~don't recognize~~
would like to see, in benef. increases, costs be borne by employees.

026 Sherry Shilley, APEA (PERS & TERS system) - support Cola increases -
~~concepts to be~~ prob. w/ 698, in it addresses post teachers; would upset
other employees (PERS) - shd cover both groups.

042 Martin asked Muller for fiscal note on HB 698 to include PERS as well as TERS.
Martin said thinking of bringing bills up again Thurs.

057 Will wk on WC & these bills Thurs.

063 Barry said AG requested more time on HB557.

066 Martin explained why AG needed more time.
Went over agenda.

076 Adjourned. 1:45.

HR 17

HB 662

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
February 23, 1982
1:10 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Rogers
Rep. Randolph
Rep. Gardiner

COMMITTEE CALENDAR

HR 17 — Requesting AHFC, AIDA, and the Department of Community and Regional Affairs to obtain and analyze statistical data on unlawful discrimination in state loan programs.

HB 662 — An Act relating to occupational licensing fees; and providing for an effective date.

WITNESS REGISTER

Harry D. Treager
Division of Occupational Licensing
Juneau, Alaska 99811
465-2534
Position Statement: Available to answer questions.

Peter Froehlich
Assistant Attorney General
Department of Law
Juneau, Alaska 99811
465-3600
Position Statement: Available to answer questions.

Wayne Jensen
Board of Architects, Engineers, and Land Surveyors
Box 310
Juneau, Alaska 99801
586-1070
Position Statement: Expressed concerns about HB 622.

PREVIOUS ACTION

HR 17 — No previous formal action. See minutes of House Labor & Commerce teleconference meeting of 1/14/82.

Statutory Reference: none.

Action Taken: Rep. Martin moved to accept a Labor & Commerce committee substitute. Motion passed unanimously.

Rep. Martin moved to report CSHR 17 from committee. On the question: for--Martin, Rogers, Randolph; opposed--Bylsma. Motion passed.

HB 662

No previous action.

Statutory Reference: AS 08.01; AS 08.04; AS 08.13; AS 08.18; AS 08.20; AS 08.32; AS 08.36; AS 08.40; AS 08.42; AS 08.48; AS 08.54; AS 03.62; AS 08.64; AS 08.68; AS 08.70; AS 08.71; AS 08.72; AS 08.80; AS 08.84; AS 08.86; AS 08.98; AS 08.99.

Action Taken: No action taken.

ACTION NARRATIVE

Tape #2
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:10 p.m. Members present were: Representatives Martin, Bylsma, and Rogers. Representatives Randolph and Gardiner arrived later in the meeting.

Number 011

Representative Martin gave the background of HR 17 (a meeting before session with NAACP, and a teleconference held by the House Labor & Commerce Committee on 1/14/82 regarding possible discrimination in the financial community).

Number 033

Rep. Martin moved to accept the Labor & Commerce committee substitute. Rep. Bylsma objected. After discussion, Rep. Bylsma removed his objection. Committee substitute for HR 17 was adopted.

Number 039

There was discussion of the intent of the resolution. Rep. Bylsma did not think it appropriate for departments to investigate themselves. Rep. Rogers suggested that legislative subpoena could be used if there are problems getting information. The committee discussed means of acquiring information.

Number 080

Rep. Martin said part of the reason for the

resolution was to assure minorities that action is being taken.

Number 091 — Rep. Martin moved to report CSHR 17 from committee. On the question: for--Rogers, Martin, Randolph; opposed--Bylsma. Motion passed.

Number 122 — Rep. Martin brought HB 662 before the committee.

Number 125 — Harry Treagor, Division of Occupational Licensing, and Peter Froehlich, Assistant Attorney General, came before the committee to answer questions. Froehlich went over HB 662.

Number 146 — Froehlich said the bill is similar to legislation introduced in 1979. He said the principle of the authorizing agency to set fees has been followed recently. He used corporate filings as an example. Froehlich said advantages are that setting fees by regulation makes fees more flexible and easier to adjust. He said uniformity was another advantage. Currently, there are 19 boards with 88 licensing categories. Each board sets fees, in most cases. Froehlich said this bill would accomplish uniformity, as the same entity would set fees for all boards who license people. He said this could more closely match the cost of licensing a program to each program. He noted that the bill also includes some housekeeping changes.

Number 190 — Rep. Rogers had questions. Rogers said the department ends up setting fees in case of disagreement between the department and the board. He noted that most boards and comissions are subject to sunset review, so the fees could change every four years as an inclusion in sunsetting bills. He said that many boards and commissions license only a few people. He felt that charging the costs to the departments involved might be expensive. Rep. Rogers asked for input from the affected departments. There was a discussion of costs, and of consolidating boards.

Number 309 — Rep. Gardiner said that a policy decision has been made that boards exist and agencies regulate. He said the legislature

appropriates funds for these boards. He asked who should pay the budget with this system. He felt it has always been easier to take money from general funds than to raise fees. Gardiner said a policy decision needs to be made as to who pays what share of the burden.

Number 348 — Rep. Rogers said a problem could arise if an agency has an empire-builder on staff who wants to increase staff. He felt it would be easy for a division to raise fees and add employees without being questioned by the legislature. He agreed that some fees need adjusting, but felt it should be done by statute rather than regulation. Rep. Rogers felt some portion of the costs should be borne by the regulated industries, some by the public.

Number 412 — Treagor agreed with Rep. Rogers regarding sunsetting. He gave his reasons for supporting the bill.

Number 441 — Rep. Gardiner requested a proposed fee schedule from the Division of Occupational Licensing. There was discussion of the need for this information.

Number 462 — Rep. Rogers felt another concern to be addressed with making the industry bear costs, especially in a field such as medical, is that there is dislike and dissention within the field. It could happen that one profession would increase the fees of another (dentists increase fees of dental hygienists, for example). If legislative review of regulations was clearly established as constitutional, he would be less concerned.

Number 505 — Wayne Jensen, Board of Architects, Engineers, and Land Surveyors, was concerned that regulations have in the past been established by boards, and it appears the Department of Commerce would establish regulations that will cover boards (under the provisions of the bill). He felt there appears to be little advantage to doing this. Jensen thought fees were often viewed more as a tax than as a cost. He said the Board directly receives no more than 15-20% of the fees generated. He would prefer that the board should establish fees and

procedures, and the Department of Commerce should assist the board. Jensen said that boards are not intended to serve departments.

Number 656 — In response to a point Jensen brought up in explaining his position regarding HB 662, Rep. Randolph felt that professional associations should provide funds for travel to participate in national and regional conferences.

Number 720 — No action was taken on HB 662. There being no further business to come before the committee, the meeting was adjourned at 1:55 p.m.

ACTION NARRATIVE

Tape #24
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:10 p.m. Members present were: Representatives Martin, Bylsma, and Rogers. Representatives Randolph and Gardiner arrived later in the meeting.

Number 011

Representative Martin gave the background of HR 17 (a meeting before session with NAACP, and a teleconference held by the House Labor & Commerce Committee on 1/14/82 regarding possible discrimination in the financial community).

Number 033

Rep. Martin moved to accept the Labor & Commerce committee substitute. Rep. Bylsma objected. After discussion, Rep. Bylsma removed his objection. Committee substitute for HR 17 was adopted.

Number 039

There was discussion of the intent of the resolution. Rep. Bylsma did not think it appropriate for departments to investigate themselves. Rep. Rogers suggested that legislative subpoena could be used if there are problems getting information. The committee discussed means of acquiring information.

Number 080

Rep. Martin said part of the reason for the

resolution was to assure minorities that action is being taken.

Number 091 — Rep. Martin moved to report CSHR 17 from committee. On the question: for--Rogers, Martin, Randolph; opposed--Bylsma. Motion passed.

Number 122 — Rep. Martin brought HB 662 before the committee.

Number 125 — Harry Teagor, Division of Occupational Licensing, and Peter Froehlich, Assistant Attorney General, came before the committee to answer questions. Froehlich went over HB 662.

Number 146 — Froehlich said the bill is similar to legislation introduced in 1979. He said the principle of the authorizing agency to set fees has been followed recently. He used corporate filings as an example. Froehlich said advantages are that setting fees by regulation makes fees more flexible and easier to adjust. He said uniformity was another advantage. Currently, there are 19 boards with 88 licensing categories. Each board sets fees, in most cases. Froehlich said this bill would accomplish uniformity, as the same entity would set fees for all boards who license people. He said this could more closely match the cost of licensing a program to each program. He noted that the bill also includes some housekeeping changes.

Number 190 — Rep. Rogers had questions. Rogers said the department ends up setting fees in case of disagreement between the department and the board. He noted that most boards and comissions are subject to sunset review, so the fees could change every four years as an inclusion in sunsetting bills. He said that many boards and commissions license only a few people. He felt that charging the costs to the departments involved might be expensive. Rep. Number 309 — Rep. Gardiner said that a policy decision has been made that boards exist and agencies regulate. He said the legislature

appropriates funds for these boards. He asked who should pay the budget with this system. He felt it has always been easier to take money from general funds than to raise fees. Gardiner said a policy decision needs to be made as to who pays what share of the burden.

Number 348

Rep. Rogers said a problem could arise if an agency has an empire-builder on staff who wants to increase staff. He felt it would be easy for a division to raise fees and add employees without being questioned by the legislature. He agreed that some fees need adjusting, but felt it should be done by statute rather than regulation. Rep. Rogers felt some portion of the costs should be borne by the regulated industries, some by the public.

Number 412

Treagor agreed with Rep. Rogers regarding sunsetting. He gave his reasons for supporting the bill.

Number 441

Rep. Gardiner requested a proposed fee schedule from the Division of Occupational Licensing. There was discussion of the need for this information.

Number 462

Rep. Rogers felt another concern to be addressed with making the industry bear costs, especially in a field such as medical, is that there is dislike and dissention within the field. It could happen that one profession would increase the fees of another (dentists increase fees of dental hygienists, for example). If legislative review of regulations was clearly established as constitutional, he would be less concerned.

Number 505

Wayne Jensen, Board of Architects, Engineers, and Land Surveyors, was concerned that regulations have in the past been established by boards, and it appears the Department of Commerce would establish regulations that will cover boards (under the provisions of the bill). He felt there appears to be little advantage to doing this. Jensen thought fees were often viewed more as a tax than as a cost. He said the Board directly receives no more than 15-20% of the fees generated. He would prefer that the board should establish fees and

procedures, and the Department of Commerce should assist the board. Jensen said that boards are not intended to serve departments.

Number 656 — In response to a point Jensen brought up in explaining his position regarding HB 662, Rep. Randolph felt that professional associations should provide funds for travel to participate in national and regional conferences.

Number 720 — No action was taken on HB 662. There being no further business to come before the committee, the meeting was adjourned at 1:55 p.m.

2/23/82 HL&C HB 662
HR 17

Absent: ~~Gardiner~~, ~~Randolph~~

000

1:10 Call to order by Martin

011 HR17 & CS – gave history of legislation (mtg w/NAAC 1½ & gen telecons)

~~033~~ ~~HB~~

033 Martin moved to accept CS & asked unan consent; objection by Byloma; removed; CS adopted.

039 Byloma doesn't think appropriate for depts to investigate themselves.

Discussion of intent of resolution. Rogers suggested legislative subpoena cd be used if there are problems getting info. Martin ~~said~~ gave his thoughts abt getting info; Byloma felt info wd not be unbiased.

Discussion of means of getting info.

080 Martin said part of the reason was to assure ~~of~~ minorities that action is being taken.

091 Martin moved to pass resol. out of comm. As Rep. Randolph just arrived, he asked explanation of resolution.

Question for, Martin, Rogers, Randolph Opp. Byloma

~~Not~~ CSHR17 passed fm Committee.

HB662

122 ~~In~~ Martin intd HB 662

125 Harry Treagor, Dir Occ'l Licensing, & Peter Knoblich, ACT ofc, said they're avail to answer questns.

1:25 Martin left

136 Treagor - said ~~bill was to b~~ requested revising fee structure

146 Peter Faelich, Asst AG -

- ~~#~~ similar to legislation intd in 1977
- principle of authorizing agency to set fees has been followed recently. Have example (corporate filing).
- Advantages
  1) Setting fees by regn makes fees more flexible, easier to adjust.
  2) Uniformity. Currently 19 bds w/ 88 licensing categories - each bd setting fees in most cases. This bill wd accomplish uniformity - same entity wd set fees for all bds who license people.
  3) More closely match cost of licensing pgm to each ~~pgm~~ pgm.

Bill also includes some housekeeping things.

190 Rogers - gotcha

- dept ~~sets~~ sets up setting fees in case of disagmt bet dept & bd.
- most bds & comms subject to sunset law, so fees can change every 4 yrs in bills to sunset orgns.
- Many bds & comms don't license that many people. Chging costs to depts might be expensive. Wants depts input.

Discussion of costs w/ Treagor.

Rogers - sometimes creating boards increases costs in situs that don't warrant a board.

Discussion of consolidating bds.

267 Rogers asked why dept rather than bd shd set fees.

270 Treagor - uniformity, & awareness, & experience to base fees. Agreed w/Rogers concerning small bds not always being necessary.

285 Discussion.

294 Randolph - went over problems he foresees

309 Gardiner -- policy decision has been made that bds exist & agencies regulate. Legis approp's funds for these bds. Who shd pay the budget with this system. Felt it has always been easier to take money fm gen'l funds than to raise fees. Policy decision needs to be made on who pays what share of the burden.

348 Rogers - Problem - if agency has an empire-builder on staff who wants to increase staff, wd be easy for division to raise fees & add people w/o it being gotnd by Legislature. Agreed some fees need adjusting, but feels it shd be done by statute rather than regn. Feels some portion of costs shd be borne by regl'd industries, some by public

396 ~~Randolph - either, reduce # of bds~~ Discussion.

409 Bylsma re-directed committee to getting witnesses

412 Treagor - agd w/Rogers re sunsetting. Gave his reasons for supporting bill.

441 Gardiner requested a prop'd fee schedule fm Occ'l Licensing. Discussion of need for this info.

462 Rogers – another concern w/ making industry bear cost, esp in medical field, for example, there is dislike or dissention w/in field. Cd happen that one profession wd increase fees of another (dentists increase dental hygienists, eg). If legis rev of regns were clearly established as const'l, wd be less concerned.

505 Wayne Jensen, Bd Arch, Engrs & Land Surveyors – concerned

1) regns ~~that~~ have in past been est'd by bds; appears that Commerce will establish regs that will cover bds. Appears to be little advantage to doing this. ~~Concerned that revenues generated for registration~~ All 3 types of members ~~ok in conjunction bds~~ participate w/ ~~federal~~ national committee to provide uniformity.

Thinks fees are often viewed more as a tax than as a cost. Bd directly recvs no more than 15-20% of fees generated. Wd prefer that bd shd establish fees & procedures & Dept of Commerce shd assist bd. Bds not intended to serve dept.

656 Randolph – ~~rather than have state decide allowable expenses~~, professional assoc. shd provide funds for travel to participate in national/regional confs (in response to a point Jensen brought up in explaining his posn).

Discussion.

720 Mtg adjourned 1:55. No action.

HOUSE LABOR & COMMERCE COMMITTEE

HEARING DATE: 2-23-82

POSITION PAPER
HOUSE BILL 662

Department of Commerce and Economic Development. "An Act relating to occupational licensing fees and providing for an effective date."

AMENDING LICENSING FEES

This bill would give the Department of Commerce and Economic Development the authority to establish licensing fees by regulation. It centralizes the responsibility of setting fees which accurately reflect the cost of licensing and examination services for the various professions licensed through the Division of Occupational Licensing.

This bill also amends inconsistencies in existing language throughout Title 8.

FISCAL IMPACT ANALYSIS

The attached fiscal note reflects the need for a research aide (contractual basis) to assist the regulations specialist in assessing the various costs incurred by the State in the licensing and examination processes for 88 licensing categories. It is anticipated that once the fee regulating project is outlined, the necessary research should be completed by the research aide within eight months. The staggering of established renewal periods and recent changes in legislation may affect the commencement of this project. This could occur in FY '83, FY '84 or the beginning of FY '85.

Once the initial research has been completed, the research aide's contract will be terminated and the department's regulation specialist will consult the respective licensing boards and proceed with the regulation adoption process pursuant to the Administrative Procedures Act.

RECOMMENDATION

The department strongly supports the passage of this bill.

Recommended by: Harry D. Treager

PREVIOUS ACTION

Executive Order 52 — No previous action.

Statutory Reference: AS 18.60; AS 23.10.075.

Action Taken: Rep. Rogers moved that the committee write a letter to Speaker Hayes stating that the committee had reviewed EO 52 and found it to be of benefit to the administration, and note changes (correction of clerical errors). Motion passed without objection.

HB 641 — No previous action.

Statutory Reference: AS 45.

Action Taken: Rep. Rogers moved to delete Section 1. There was objection by Rep. Randolph. On the question: for--Rogers, Martin, Bylsma; opposed--Randolph. Motion passed.

Rep. Rogers moved, page 2, line 26, to add subsection (3): "makes an application for the loan on or before August 24, 1982." Rep. Bylsma objected. Rep. Rogers withdrew the motion and restated it, changing the date to November 1, 1982. On the question:

for--Rogers, Randolph; opposed--Bylsma, Martin. Motion failed.

Rep. Rogers moved, page 2, line 10, insert after the word "for", the words "up to". On the question: for--Rogers, Randolph, Bylsma; opposed--Martin. Motion passed.

Rep. Rogers moved, page 2, line 5, to insert a new sentence, to read, "If funds appropriated to this program are insufficient to fully fund all loan applications, the Commissioner shall reduce the maximum amount of the loan to an amount which would allow all loans to be made." On the question: for--Rogers, Randolph; opposed--Bylsma, Martin. Motion failed.

Rep. Rogers moved to incorporate the amendments into a new committee substitute for HB 641. On the question: for--Rogers, Randolph; opposed--Martin, Bylsma. Motion failed.

Rep. Bylsma moved, page 2, line 26, to delete subsection (2). Rep. Randolph objected, and withdrew his objection. Motion passed without objection.

Rep. Randolph moved to rescind the committee's action in not adopting Rep. Rogers' amendment to page 2, line 5. On the question, for--Rogers, Randolph; opposed--Martin, Bylsma. Motion failed.

Rep. Randolph moved to report the bill from committee with individual recommendations. On the question: for--Rogers, Randolph; opposed--Martin, Bylsma. Motion failed.

Rep. Randolph moved to rescind the committee's action in not reporting the bill from committee. On the question: for--Rogers, Randolph; opposed--Martin, Bylsma. Motion failed.

1 42 Resources Committee added Labor & Commerce Committee referral by unanimous consent. Bill was moved from Resources to Labor & Commerce 1/12/82.

Statutory Reference: AS 37.

Action Taken: No formal action taken. Rep.

Rogers requested forming a subcommittee to review bill. Rep. Martin said he wished to discuss composition of a subcommittee with the House leadership before appointing a subcommittee.

ACTION NARRATIVE

Tape #25
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:12 p.m. Members present were: Representatives [illegible]n, Bylsma, Rogers, and Randolph. Representative Gardiner was absent.

Number 010

Rep. Martin brought Executive Order 52 before the committee for consideration. He asked Judy Knight and Dale Cheek, both from the Department of Labor, to come before the committee to give an overview of the Order.

Number 014

Judy Knight said Dale Cheek would be the director of the proposed Labor Standards & Safety. She gave background of the need for the order, and went over how the new name was selected, based on the functions of the agency. In response to a question by Rep. Martin, Knight explained the new draft which was given to the committee was needed because of incorrect statutory citations. The changes were discussed, and changes adopted.

Number 070

There was discussion about what action to take on the order. Rep. Rogers moved that the committee write a letter to the Speaker of the House stating that the committee had reviewed EO 52 and found it to be of benefit to the administration. Motion passed without objection.

Number 094

Rep. Martin brought HB 642 before the committee, and said that Legal Services wished to testify. Rep. Martin noted that HJR 81 is similar to HB 642.

Number 111

Rep. Randolph, prime sponsor of HB 642 and HJR 81, spoke of the purpose of the legislation, which he said was to take a percentage of resource development income, aside from taxes income, and create a trust, of which every Alaskan would be a

beneficiary. For his motivation, he said he believes the wealth belongs to the people of the state, and should be shared equitably. He said this legislation would affect 25-30% of the total income from resource extraction. He expanded on this, and recommended appointing a subcommittee to examine the bill.

Number 148

Rep. Rogers, co-sponsor of HB 642, said he believes this can be done without a constitutional amendment. He concurred with Rep. Randolph that the bill should be worked on by a subcommittee.

Number 169

Rep. Martin said he is concerned this is similar to a bill by Senator Gravel (which would have created AGSOC, Alaska General Stock Ownership Corporation). Rep. Randolph explained the difference, and said it would have the opposite effect. Rep. Rogers noted the similarity--transferring money from the state to individuals--but felt the trust is just a vehicle to transfer funds, not to conduct business. He gave examples of similar royalty trusts. Rogers said the advantage of a trust is that there are good precedents of similar trusts. Rep. Randolph went into the justification for a trust.

Number 236

Rep. Martin said the constitution already says the natural resources wealth belongs to all the people. Rep. Randolph responded that the federal and state governments have made agreements with development companies (oil companies) to the exclusion of individual participation. He said oil companies are given a favored position. Randolph said the people of the state have derived a significant share, but the money belongs to the people equally. He felt there is no justification for giving one segment more than another.

Number 275

Rep. Martin asked for a timeframe if a special subcommittee is appointed. Rep. Randolph felt that a good bill could be drafted by the end of session. Rep. Martin asked if members of the Resources Committee could be allowed on the subcommittee. Rep. Randolph felt Labor & Commerce had expertise, and suggested appointing Representatives Rogers, Gardiner, and himself.

Number 303 — Rep. Martin said Phillip Woll requested to be allowed to give input. There was discussion of fiscal notes. A gentleman from the audience said he had written a fiscal note.

Number 319 — Anselm Staack, Comptroller, Division of Treasury, said three fiscal notes were necessary: 1) the amount of revenue reduction to the general fund unrestricted amounts. He said this excluded conservation and severance tax monies; it appeared these may have been addressed in the bill, but not in the resolution. Rep. Rogers said the intent is income derived from being owners as opposed to being a sovereign taxation authority. Rep. Rogers requested a revision be prepared to match the revenue forecast. Staack referred to other fiscal notes: 2) a fiscal note reflecting administrative costs with investment money management; and, 3) administrative costs controlling share certificates, dividend distribution, etc.

Number 407 — Rep. Martin said, regarding a constitutional amendment, that the Attorney General's position on amendments and initiatives on the ballot had been unpredictable, and asked Billy Berrier, director of LAA Legal Services, to clarify. Berrier said a constitutional amendment clearly goes on the ballot. Rep. Rogers asked if the legislature could put an advisory vote on the ballot. Berrier said the legislature could do that, but he couldn't say if it has clear power to do so. Rep. Martin went over past experiences.

Number 632 — Rep. Bylsma asked why people would pay loans back if there is no security required. Rep. Randolph explained it would be similar to banks giving signature loans which require no security. The committee discussed problems with collection and the possibility of people coming to Alaska just to take advantage of "giveaway" money. Rep. Randolph said he sees the loan program taking place only once; after that, the royalty trust would come into effect.

Side B, Number 006 — Rep. Martin expressed concern about constitutionality and funding. Rep. Randolph said there is no question of constitutionality with the loan. Discussion

continued.

Number 033

Rep. Rogers recommended eliminating the sentence referring to estimated income. He expressed his feelings about participation in the program. Rep. Bylsma said he felt the first sentence of the intent section was just an opinion.

Number 059

Lynette Clark, CJ Mining, Inc., Fairbanks, said she supported the bill. She gave her views and examples of how the bill could benefit people She felt the trickle-down effect would benefit everyone. She thought many grants could be eliminated with this type of program.

Number 122

Committee discussed funding of the program. Staack answered questions posed by the committee. Rep. Rogers asked him to go ahead and figure lower costs if they can see modifications to reduce administrative costs.

Number 460

Rep. Martin said he would like to discuss composition of a subcommittee with the House Leadership before appointing a subcommittee.

Number 480

HB 641 was brought before the committee. Rep. Randolph explained the purpose of the bill. He said it is an attempt to establish a program to get money to Alaskans quickly with the least tax problems. It establishes a loan program to allow adult Alaskans to apply for a $10,000 loan, with forgiveness of 20% for each of five years after the loan is acquired for each year of residency. He asked the committee to expedite the bill in order to get it to Finance.

Number 551

Rep. Rogers said he is concerned, first, whether forgiveness makes the loan subject to taxation; and second, although he likes the idea of the loans, it seems only certain people get state loans, and probably the same people will get these new loans. He feels people should have a choice between personal loans, housing, agriculture, mining, or other loans. He said this might cut the cost while serving the same purpose.

Number 590

Rep. Randolph agreed that the loans are taxable, but thought that, with inflation, it would be advantageous. He agrees with

which would allow all loans to be made." There was discussion of availability of funds. On the question: for--Rogers, Randolph; opposed--Bylsma, Martin. Motion failed.

Number 480 — Rep. Rogers moved to incorporate amendments into a committee substitute for HB 641. On the question: for--Rogers, Randolph; opposed--Bylsma, Martin. Motion failed.

Number 488 — Rep. Bylsma said he wanted to add, page 2, line 24, that residency must be verified. There was discussion.

Number 512 — Massey explained the certification used in the veterans program. He said it would be easy to make a form for people to sign verifying residency and establishing penalties for making false statements. Rep. Randolph felt administrative procedures could be easily established. There was discussion of verifying residency and the potential for groups of people to falsely verify each others' residency statements.

Number 592 — Rep. Bylsma moved, on page 2, line 26, to delete subsection (2). There was objection by Rep. Randolph. Rep. Randolph withdrew his objection. Motion passed without objection.

Number 725 — Rep. Randolph moved that the committee rescind its action in not accepting Rep. Rogers' motion to amend page 2, line 5, regarding proration. There was objection by Rep. Martin. On the question: for--Rogers, Randolph; opposed--Martin, Bylsma. Motion failed.

Side B, Number 010 — Rep. Randolph moved to report HB 641 from committee with individual recommendations. On the question: for--Randolph, Rogers; opposed--Martin, Bylsma. Motion failed.

Number 015 — Rep. Randolph moved that the committee rescind its action in not accepting the motion to report the bill from committee. There was discussion. On the question: for--Rogers, Randolph; opposed--Martin, Bylsma. Motion failed.

Number 026 — There being no further business to come before the committee, the meeting was

adjourned at 2:46 p.m.

~~Natural Resources~~ Comm H. Labor & Commerce
Exec Order 52, HB 641, HB 642

1:12 pm

000 START; Call to Order by Ch. Martin

Announced that Bylsma wired chair tom, as well as on his teleconf

010 Exec Order 52 - asked Knight & Cheek-Dir wage for overview

014 Judy Knight - said Cheek wd be dir of prop'd Labor Standards & Safety.
Gave background of need for order. Went over how new name was selected, based on functions of agency.

035 Cheek - agreed w/Knight.

044 Martin requested clarification abt new draft.
- Knight explained new draft was needed because of incorrect stat. citation.
- Martin - quest p2 l. 15; Knight said same error

065 ~~Martin~~ Bylsma moved to accept amdmt to correct p. 2, l. 15
No obj, amdmt passed.

070 Discussed what action to take on order
Rogers mvd comm write ltr to speaker stating comm rcvd EO 52 & find it to be of benefit to admin.

094 HB 642 - Martin noted legal svcs wishes to testify.
Noted HJR 81 is similar to bill.

111 Randolph, prime sponsor of both 642 & HJR 81. Spoke of purpose of legislation - take percentage of resource dept income, aside from tax income, & create trust of which every Alaskan wd be a beneficiary. Motivation - bl~~w~~s wealth ~~abt~~ belongs to people of the state, which shd be shared equitably. affects ~25-30% of total income from resource extraction. Explained; recommended appointing subcommittee to examine bill.

HB 642, cont'd

148 Rogers - co-sponsor - believes this can be done w/o const'l amdmt. Would be xfrg asset & not funds to be rcvd. Concurs w/Randolph that bill shd be worked on by subcommittee.

169 Martin concerned this is similar to a bill by Sen. Gravel (ACOSOC). Randolph explained difference - opposite effect.
Rogers ~~xx~~ noted similarity - xfrg money fm state to indivs - but felt trust ~~was~~ is just a vehicle to xfr funds, not to conduct business. Gave examples of similar royalty trusts. Said advantage of trust is there are good ~~examples~~ precedents of similar trusts. Randolph expanded on justification for trust.

236 ~~Rand moved to ratify~~
Martin - said constitution already says natl resources wealth belongs to all the people. Randolph responded. Govts (fed & state) have made agmts w/dmstic cos (oil cos) to the exclusion of individual participation. Oil companies given favored posn; people of state have derived signif share, but money belongs to people equally. No justification for giving one segment more than another.

275 Martin asked for timeframe of special comm. appointed. Randolph felt by end of session good bill cd be drafted. Martin asked if members of Resource comm cd be allowed in subcomm. Randolph felt L+C had expertise in comm. ~~xx~~ Suggested Rogers, Gardiner & self.

303 Martin said Phillips Wall requested to be allowed to give input; there was discussion of fiscal notes. Gentleman fm audience said he had written fn.

319 Anselm Stock, Comptroller, Treas. Said 3 fn's necessary:

1) ant revenue reduction to gen fnd unrestricted amts
- ~~cater~~ excluded conservation & severance tax monies; appears this may be addressed in bill, but not in resolution.

Rogers - intent is income derived fm being owners as oppd to being sovereign tax'n auth.

- Stock - #s are in millions of $; figures fm 1984-87.
- Rogers requested preparing revision / match revenue forecast.

Stock
2) (fn) admin costs w/ investmt money mgmt

3) admin costs controlling share certificates, dividend distn, etc.

Explained administration fiscal notes. (how figures were arrived at).

~~AGR~~ # 3) - This will be higher, Wall preparing it now; will be higher.

407 Martin, re const'l amdmt - AG's ofc posn on amdmts/ initiatives on ballot ~~has~~ has been unpredictable. Asked Berrier to clarify.

422 Berrier - const'l amdmt clearly goes on ballot.

Rogers - can legis put advisory vote on ballot? Berrier said legis. cd, but can't say ~~they have~~ it has clear power.

Martin went over past experiences.

630 Bylsma - why wd people pay loans back if there's no security
Randolph explained ~~it~~ eg, banks giving signature loans,
collection procedures, etc.
Committee discussion of collection problems & possible problem
w/ people coming up just to take advantage of ~~free~~ giveaway money.
Randolph sees the loan pgm as a one-time deal; royalty
trust wd come into effect after that.
Martin expressed concern abt constitutionality & funding.

Side B

006 Randolph said no qstn of constitutionality w/ loan; people under
18 can't legally contract loans; also, other loan pgms exist.
Discussion continued.

033 Rogers recommended eliminating sentence referring to estimated
income. Gave his feelings abt participation in pgm.

052 Bylsma - felt first sentence of ~~bill~~ intent was just an opinion.

059 Wrote to Clark - CJ Mining Inc, Fox, & retailer - ~~read letter~~
~~from them~~ Supported bill. Gave her views & examples
of how bill could benefit people. Felt trickle-down effect
wd also benefit everyone. Thought many grants cd be
eliminated w/ this type pgm.

102 Resumed committee discussion. Martin asked abt fn fm dept of
revenue. Rogers felt no cost to dept of revenue, fn correct.
Rogers asked what wd be done if ~~too~~ not enough money approp'd
to meet need - first come first serve, or pro ration. Randolph
thought prob'ly pro-rated.

450 Stock smrized. Rogers asked him to go ahead & figure fwr costs if they can see modifications to reduce admin. costs.

460 Martin said he'd like to discuss subcomm. membership w/ leadership.

HB 641

450 Randolph – explained purpose of bill; similar to HB 23. Attempt to est pgm to get money to Alaskans quickly w/ least tax problems. Est's loan pgms to allow adult Alaskans to apply for $10,000 loan; forgiveness of 20% for each of 5 yrs after loan acquired for each yr of residency. Asked committee to expedite bill in order to get it to Finance.

551 Rogers concerned – 1) forgiveness makes it subject to taxation. – 2) likes idea ~~of Alaskans~~ ~~factor~~ seems only certain people get loans, & prob'y same people will get these loans. Feels people shd have choice bet. personal loans, housing, ag, mining, or other loans. Might cut cost while serving same purp.

570 Randolph – agrees loans are taxable, but w/inflation, wd be advantageous.

Re getting loans more than once – agrees w/concept; however such a loan pgm cd eliminate need for many other loan pgms. Efficient way to get money, power, & control back to people.

Rogers

430 p. 2, l. 5 — insert new sentence: If funds appropriated to this pgm are insufficient to fully fund all loan applications, the commissioner shall reduce the max amt of the loan to an amount which wd allow all loans to be made.

seconded by Rand.

Discussion of availability of funds.

PREVIOUS ACTION

HB 634

See minutes of teleconference meeting of 1/21/82.

Statutory Reference: 09.65.

Action Taken: No action taken during meeting.

ACTION NARRATIVE

Tape #27
Recording
Number 000

The meeting of was called to order at 1:12 p.m. by Vice Chairman Bylsma, who chaired this meeting at Rep. Martin's request.

Members present were: Representatives Martin, Bylsma, Rogers, and Randolph. Rep. Gardiner was absent. The committee hearing was teleconferenced statewide. The committee schedule called for the consideration of HB 634.

Number 009

L. AMES LUCE, attorney and pilot, chairman of Alaska Action Trust (a consumer rights group), Anchorage, said the problem of high insurance rates results from the safety record of air taxis. He introduced a National Transportation Safety Board study, AAS 83, "Air Taxi Safety in Alaska". He said the study shows that there are 500% more accidents caused in Alaska, per hours flown, than in the Lower 48, and 200% more deaths. Luce said the FAA compiled statistics, which showed that 14 Alaska operators were responsible for 48 of 81 accidents. He gave the names of specific operators he said were causing most of the accidents. (Luce gave copies of the study to the committee; these are available for inspection from the committee.) Luce said that northwest bush communities have repeated problems with air safety. He felt that eliminating these operators would probably reduce insurance rates by fifty percent. Luce said that the effect of HB 634 would be to deprive the consumer public from compensation. He said it would probably discriminate against Alaska Natives in the Bush. Luce said the bill would not promote air safety or affect insurance rates. He said it would help subsidize major intrastate carriers by permitting them to be self-insured. Luce thought the bill was probably unconstitutional, and did not address the air safety problem.

Number 122

Rep. Rogers said some of Luce's arguments were valid--eg, safety--but to say the bill discriminates against Natives is questionable. Rogers said the bill, if anything, would discriminate against all residents of that part of the state. Rogers also felt that eliminating the operators that Luce said were causing most of the accidents does not address the question. Rep. Rogers felt it is difficult to fly in some areas of the state, and said that air commerce, in some areas of the state, may be an inherent risk. Rogers asked Luce's

opinion of making excess flight insurance available to consumers; limiting liability except in cases of gross negligence; and going to a system similar to Workers Compensation, with a schedule of liability limits.

Number 171

Luce said he could not respond unless they agreed that the bill actually lowers insurance rates, and Luce did not feel that it did. He said that giving people the option to buy additional insurance did not address the problem, which is high insurance rates. Luce said there are air taxi operators in northwest Alaska that have outstanding safety records, and that study showed a small percentage to be responsible for that area's overall bad safety record. Luce said, in regard to taking a workers compensation approach to liability, that it would reduce the amount of compensation received by the injured or survivors of victims. He said adequate and fair compensation won't be found in a workers compensation-type system rather than the fault system.

Number 227

KENT WOODMAN, representing AOPA and Alaska Airmens Association, (testifying from Washington DC LIO), said he wished to correct some errors in testimony taken at the January teleconference. He said, in regard to testimony by Weir of Alexander and Alexander that raising the limit would raise awards: the insurance company's records would not show a settlement that was for more than the insurance limit. For example, if a pilot settles a case for $250,000, and the insurance company pays only $100,000, that $100,000 will be all the insurance company's records will reflect. Woodman went on to say that, of 18,000 underwriters in Lloyd's, only about 6 will establish a lead in Alaska. He said underwriters are investors; when a broker requests coverage, the underwriter obligates a portion of his reserves. Woodman said that, if Alaska has a $250,000 limit, those who have needed more coverage previously will buy small policies, which increases the capacity of the underwriters, which reduces the insurance rate. Woodman said, regarding Luce's testimony, that Luce was correct that the bill would not cure the problem, but Woodman

felt it would provide relief from the symptoms. Woodman said the Alaska Aviation Safety Foundation, AOPA, Alaska Airmen, and others are working on safety programs. This bill would prevent carriers from going out of business. Woodman said, regarding Luce's comment that carriers operating in marginal financial situations deserve to go under: that is unjust. Many operators with no accidents still can't get ahead due to the high costs of insurance.

Number 366

Woodman said he is leaning toward a limit lower than $250,000. He said the purpose of the coverage is not to provide for survivors for the rest of their lives. Woodman said, 1) a liability limit of some sort is required; 2) it must cover all aircraft, not just commercial operators; 3) a proper limit would increase market capacity; and, 4) $75,000 is the current limit on international travel, and adding an increase for cost of living, $97,000, more or less, is a reasonable limit. Woodman said only one other state (Colorado) has a similar provision ($45,000 for wrongful death). He said other states are working on legislation. Woodman said that, constitutionally, the primary difficulty is bodily injury limit. He said a constitutional amendment might get around this. He thought it might be possible to word the legislation to cover medical expenses and make a provision for pain and suffering and defense of claim. Woodman stressed that a bill like this is needed. He said the amounts of claims need to be limited, but it also needs to cover out of pocket costs, reasonable litigation fees, and pain and suffering. Woodman asked Luce if anyone else in his organization is anything but a plaintiff's attorney. Woodman said that all Luce's comments were negative, and that Woodman had never had any input from Luce in support of safety programs.

Number 500

TULINDA DEEGAN, President, Alaska Air Carriers, and Executive Director, Safety Foundation, said that the accident rate in Alaska is not as bad as it seems. She said that, over the past five years, the accident rate has remained steady. She spoke of safety programs being developed, and said

the Association is working on the issue of insurance. Deegan felt the bill would lower premiums. She said the bill has received support from air carriers and private pilots, and opposition from attorneys. She proposed amending the bill to make excess insurance available (she said the Air Carriers will help work toward that); and she said that air carriers agree the limit should not apply to gross negligence; also that attorney's fees should be awarded by the court rather than being on a contingency fee basis.

Number 626 — ROBERT JUDY, Van Dusen Air, Inc., Anchorage, felt a limit is imperative. He said the cost of insurance is ridiculous. He was concerned that the cost would force carriers out of business. He said the opposition comes from lawyers. Judy said placing a limit won't increase or decrease the accident rate; this must come from other sources, and should be explored.

Number 669 — STEPHAN WILBUR, Vice President, Wilbur's, Inc. (Wilbur's Flight Operations), Anchorage, went over increases in the cost of insurance for his business. He said his operation has one of the best safety records in the state, but that if insurance rates keep rising, he will not be able to stay in business much longer. Wilbur said he supported the bill.

Side B, Number 000 — CHUCK LA PAGE, Valdez, said his rates were quadrupled when he went to renew. He said legislation to reduce liability is vitally necessary. He said insurance rates force small operators out, and said he supported the bill.

Number 024 — BOB BIELEFELD, Soldotna, said he had to lower his limits in order to get an affordable premium. He felt private operators and flight schools should be included in the legislation. He said there is no distinction in rates on the basis of safety records. He felt that big operators get lower rates with more coverage than small operators.

Number 042 — LINDA SLAEGER, Trailways Flying Service, Soldotna, went over insurance rate increases for the past several years. She said the

rising costs had forced them to fly without hull insurance, to drop seat capacity, and to close operations for the winter because they had to cancel insurance during the winter. She said, because of that, the area has no air service in the winter. She said the situation creates "bandit" air taxi operators, who fly without ratings or insurance. Slaeger noted that Trailways has had no accidents since beginning operations, but the present system will force them to close.

Number 079

CECIL MC CLAIN, Chairman of the Transportation Committee, Sitka Chamber of Commerce, was concerned about rates. He said present rates are having an adverse impact to the point that many can't adequately insure their aircraft. He favored HB 634, but was not sure if the limit was correct; he thought it should possibly be lower. McClain said many people carry their own insurance. If a limit was placed on liability and posted in offices, with a plaque advising travelers that additional insurance is available, then people would be willing to buy additional insurance. He said the traveling public pays the bill for high insurance rates, which tends to decrease the number of people using air services. He said this hurts the traveling public as well as operators. He said relief is needed or there will be a severe impact on flying in the state. McClain urged the bill be adopted.

Number 140

MIKE IVERS, air taxi operator, Yakutat, went over his insurance rates and increases in the past few years. He said he has to fly 150 hours just to pay for the insurance. He wanted any kind of relief, and said he would appreciate anything that could be done.

Number 205

JOYCE GALLEHER, Munz Northern Airlines, Nome, said bush carriers are faced with destructive insurance rates. She said premiums are the biggest single cost for most small carriers. She said these costs are caused by runaway awards for air crash victims. She felt that attorneys and the courts created the problem. She felt the award should go to victims, not attorneys. She strongly endorsed a limit on wrongful death award.

Number 235

JIM ROWE, President, Bering Air, Inc., Nome, said there is only one possible beneficiary in an aircraft accident: the victim's attorney. He said the state requires an operator to carry only $100,000 insurance. He said the limit would give underwriters more control, and would protect the public. He said subsidies are not needed. If the legislature imposes a reasonable limit of liability, a traveler can decide if he wants unlimited liability or a reasonable limit. If a traveler is aware of the limit and feels it inadequate, he can purchase additional coverage. Rowe strongly supported the bill.

Number 333

MILLARD INGRAHAM, attorney in general private practice in Fairbanks, said he has no direct economic interest in the legislation. He said he opposes the bill; felt it is probably unconstitutional; and opposed it on the basis of policy. He said he is opposed to government intervention to help one group with a problem. He said that, if the government did intervene, their subsidy should not come from another group (namely, widows, orphans, maimed and injured). It should be the obligation of the entire state. He said another problem is that there is no way a consumer could protect himself with additional insurance, as he doesn't think it is available. He said one can buy life or medical insurance, but can't buy liability insurance. Ingraham asked, if air taxis had a limit, what would prevent truckers, doctors, lawyers, and others from doing the same. He said this would set a bad precedent. He added, regarding lawyers being the only group opposing the bill, that only air taxi operators support it. Ingraham recommended another approach to the problem, such as group insurance.

Number 440

PETE HAGGLAND, Haggland Aviation, Fairbanks, said insurance rates are atrocious. He cited an example. He said flying is not as hazardous as it's made out. He pointed out that various organizations are beginning safety programs. He felt there was room for improvement, but said there is definite need for a liability limit.

Number 490

LEE DANIELS, Delta Aviation, Inc.,

Fairbanks, gave a breakdown of his insurance costs on a Cessna 185. He said the general public cannot afford to fly. He said that as utilization of the flight services goes down, the cost goes up. He said if insurance and interest keep going up, the operations must have cheaper maintenance and crews, which will lower safety factors. Daniels said this erodes the industry. He said he is being legislated into an outlaw. Regarding attorneys, Daniels felt their attitude was understandable, as attorneys also oppose deregulation. He agreed that maybe a limit is needed on all liability. People need to take care of themselves rather than depending on the state or the bar association.

Number 620 — WILLIAM NELMES, Department of Aviation Technology, Tanana Valley Community College, said it is a good idea to keep operators in business, but beseeched the legislature to promote safety education. He referred to the Alaska Aviation Safety Foundation project.

Number 645 — DON COGGER, Alaska Air Guides, Anchorage, said that he has been in business over six years; he has had no accidents or claims, yet his insurance increased 875% in three years. He said people with good safety records should not have to pay for people who have poor records. Cogger said that if air taxi operators are put out of business, the public will suffer. He said he couldn't afford insurance through another winter.

Tape 28, Number 000 — DAVE DIAMOND, president and general manager, Southcentral Air, Soldotna, supported the bill. He said it doesn't matter who the broker is, they have a London underwriter. Diamond said there are only 3-5 lead underwriters in London, so there is no competition in the market. He said that premiums have increased drastically. He was forced to drop hull insurance in order to maintain adequate seat liability. He said little or no consideration is given for good safety records.

Number 041 — Rep. Bylsma said there has been a subcommittee appointed which will work on the bill next week. He requested written comments.

Number 050

EVERETT LONG, private pilot, Fairbanks, said HB 634 is a step in the right direction, but he felt the limit was too high. He said Alaska law now requires $100,000 liability limit, and that setting it higher would increase rates. He took exception to excluding costs and attorney's fees. He felt this should be removed from the bill. He could not accept writing a law that protects attorney's fees.

Number 108

CINDY ANDRECHEK, Executive Air Taxi and Charter, Bethel, thanked Kent Woodman for his comments and research. She addressed comments Luce made about Executive Air Taxi and Charter. She said critics of HB 634 look at it as a cure for all the industry's problems. She said that isn't the purpose of the bill. There are steps being taken to address safety through various programs. She said there seems to be a mystique surrounding flying. She said in 1978, the death rate in motor vehicle accidents was four times the rate of aircraft accidents. She said passengers don't discriminate between good and poor operators, they just look at the price, which encourages poor operators.

Number 178

DENNIS GUNDER, Delaire Charter Service, Bethel, said some compensation should be made for those with proven safety records. He felt $250,000 was a fair limit. He felt doctors, lawyers, etc., should all have liability limits. He felt it only reasonable to have rates comparable to a common carrier in ground transportation.

Number 227

As there was no further testimony to be taken, and no further business to come before the committee, the meeting was adjourned at 3:02 p.m.

Absent: Gardiner

2/26/82 Teleconf - Air Taxi Ins (HB 634)

1:10

Intro by Jack

000 ~~Called~~ Call to order by Byloma ~~no quorum~~, but began taking testimony.

009 Anesa Luce, Anc, atty & pilot, chmn of Alaska Action Trust - (people concerned w/ consumer rights). ~~To address~~ prob of high ins co safety record of air taxis. Intd NTSB study AAS 83, "Air Taxi Safety in Alaska". Study shows:

1) 500% more accidents caused in Ak per hrs flown than in lwr 48

2) 200% more deaths

Gen'l aviation 200% & 30%, respectively to above (in Ak)

re People causing prob w/in air taxi industry — FAA compiled statistics - 14 operators responsible for 48 of 81 accidents. (6.5% operators cause 50+ % accidents): (gave names of specific operators causing accidents) Committee has copies of study..) NW Bush communities have repeated problems w/ air safety. Eliminating these operators wd reduce ins rates prbly 50%.

Effect of legis - deprive consumers public for compensation. Will discriminate against natives in bush. Will not promote air safety. Will not affect ins. rates.

Will help subsidize major intrastate carriers by permitting them to be self insured. ~~Will~~

Bill prbly ~~the~~ unconstitutional. ~~No similar bill ever withstood~~

Bill does not address air safety problem.

122 Rogers - said some arguments are valid (safety) - but to say discriminates against natives is questionable: wd discriminate, if anything, against all residents of that part of state. Also point abt eliminating 140b operators doesn't address question. ~~Also~~ He feels it is difficult to fly in some areas of the state; air commerce in some areas of it may be inherent risk

What abt: ① making efforts for ins available to consumers
② limit liability except in case of gross negligence
③ go to system similar to WC w/ schedule of liability limits.

171 Lucc: ~~Doesn't be~~ Can't respond unless they agree that bird actually lowers ins rate. He doesn't feel it does.

~~If~~ giving person choice of ins doesn't address problem -- high ins rates.

There are air taxi ops in NW AK that have outstanding safety record; study shows small % age responsible for bad safety record. Rogers said other ops are paying for the small % of bad operators. Not sure bill answers prob, but wants feelings abt options

206 Lucc - WC approach - if this wd lwr premium, it wd reduce amt of comp recd by injured or survivors. Adequate + fair comp won't be found in WC system rather than fault system.

227 Kent Woodman, (testifying in Wash DC) – AOPA + Ak Airmen's Assoc –
Comments to correct errors intd in January.

1) Re matl intd by Weir that Alexander showed settlements at limit; that raising limit wd raise claims. There is problem in that; gave example – if a pilot settles a case for $50,000 + ins co pays only 100,000, that 100,000 will be all ins co records show.

2) Of 18,000 underwriters in Lloyds, only abt 6 will establish a load in Ak. Underwriters are investors; when broker requests coverage, underwriter obligates portion of reserves. If Ak has $50 000 limit, those who have needed more coverage previously will buy smaller policies, which increases capacity of underwriters, which reduces ins.

~~Compared to~~

3) Re Nome bar ~~as~~ atty in Jan, + Juce ~~comments to~~

1) correct that bill doesn't cure problem; but it does provide relief fm symptoms. Ak Av Safety Foundn, AOPA, Ak Airmen, & others are working on safety programs. This bill will prevent carriers fm going out of business

2) carriers aren't getting rich; bill won't "line pockets" of operators. will help more stay in business.

3) carriers operating in marginal fnl situn deserve to go under is unjust; many operators w/no accidents still can't get ahead due to high costs.

366 Leaning toward lower limit than $250,000. Purpose of coverage is not to provide for survivors for the rest of their lives.

1) Liability limit of some sort is required.

2) Must cover all aircraft, not just comm'l operators

3) Proper limit wd use max market capacity

4) $75,000 is current limit on international travel; adding inc for cost of living is $7,000+.

Only one other state (Colo.) has similar provision ($45,000 for wrongful death. Other states wkg on legion.

Constitutionally primary difficulty is bodily injury limit. Const'l limit might get around this w/ Const'l amdmt to st const'n.

~~Support bill category~~. Possible to word legis to cover medical expenses & make provision for pain & suffering = defense of claim.

Need bill like this; need to limit amts of claims, but also need to cover out of pocket costs, reasonable litigation fees, & pain & suffering.

Asked Luce if anyone else in his org in anything but a TP's atty. Also, all his comments negative. Never had any input in support of safety pgms from him.

500 Anchorage:

Tulinda Deegan, Pres, Ak Air Carriers + Exec Dir Safety Foundn.

1) accident rate in Ak not as bad as it seems; over past 5 yrs, accident rate remained steady.
2) consumer cost - ~~pay~~ 15-20% of fare goes to pay for insurance.
3) safety pgms being developed
4) Assn wkg on issue of insurance
~~5) Cases~~
3) there have been similar laws in this state as well as other states
4) limit will lower premiums
5) ~~opposition~~ support fm air carriers + private pilots, Oppn fm attys
6) urged anyone interested to send comments to comm.
7) prop'd amdmts
   a) making efforts to avail - air carriers will help work toward that
   b) air crs agree limit shd not apply to gross negligence w/ atty fees awarded by ct rather than contingency fees.

626 Anc - Robert Judge, Van Dusen Air Inc -

limit is imperative. Cost of ins is ridiculous. Concerned cost will force carriers out of business. Oppn comes fm lawyers. Placing limit won't inc or dec accident rate; this must come fm other sources, + shd be explored to reduce accident rate.

Vdz
Sold
Swd

Anc
Stephan
669 Steven Wilbur, VP Wilbur's Inc, (Wilburs Flt Opn). Estb 20 yrs ago. During preceding 6 yrs, ins costs:

1977 $90,000

presently $165,000 increase

One of best records in State. If trend keeps up (100% inc fm '81 to '82) wlrs not be able to stay in business much longer. Support bill.

720 Bylsma gave committee's address.
Side B
000 Valdez: Chuck La Page – rates were quadrupled when then went to renew. Legislation to reduce liability vitally necessary. Ins rates force small operators out. ~~Smallops~~ Supports bill

004 Soldotna

Bob Fulapel (?) – had to lwr limits to get affordable premium. Private ops + flt schools shd be included. No distinction in rates on basis of safety records. Big operators get lwr rates w/more coverage than small operators. ~~Stay~~

Seward

042 ~~Ludwig~~ Linda Slaegers Trailways Flying Svc – began opg 1978 ins $5,600/yr for 2 planes. Quoted rate for 1981 – $15,000 for 1 plane. Forced them to fly w/o hull ins + drop seat capacity, + to close operations for winter. Had to cancel ins. Not feasible to stay open in winter, so area has no air svc. Sith creates "bandit" ins taxi operators w/o rating or ins. Trailways has had no accidents since beginning operations. Present system will force them to close.

079 Sitka

Cecil McLean, Chmn Xptn Comm, Sitka Chamber of Commerce.
Concerned abt rates. Present rates having adverse impact
to point that many can't adequately ins a/c. Favor HB634;
unsure if limit is correct. Possibly shd be lower.
Many people carry their own ins; if limit was placed on
liability & pooled in offices & plaque advising add'l ins avail,
people wd be willing to buy add'l ins. Traveling public
pays brkf for ins ~~[illegible]~~. Tends to decrease # p · e using air
svcs; hurting traveling public as well as operators. Need
relief or there will be severe impact on flying in the state.
Urge bill be adopted.

140
~~150~~ ~~Petersburg:~~ Yakutat

Mike Divers, air taxi — ~~[illegible]~~ Lucee ~~Divers~~ said they were
one of the risky a/c operators; they had only 1 accident, it
was on the ground, no people & involved. Since 1979, ins
went up 275%. Gave figures. ~~for [illegible]~~ Have to fly 150
hrs just to pay for ins. Want any kind of relief; resents being
classed as a high risk. $33,775-ins for this yr. Wd
appreciate anything that cd be done.

205 Nome

Joyce ~~Gallagher~~ Gallcher - Munz Northern Airlines - Both carriers faced w/ destructive ins rates. Premiums are biggest single cost for most small carriers. Costs caused by runaway awards for air crash victims. Attys & courts created problem. Award shd go to victims, not attys. Strongly endorse limit on wrongful death award

235 Jim ~~Roe~~ Rowe, Pres, Bering Air Inc, Nome. Only one possible beneficiary in a/c accident: victim's atty. State requires operator to carry only $100,000. Limit wd give underwriters more control; wd protect public. Don't need subsidies &. Legislation imposes reasonable limit of liability. Traveler must decide if he wants unlimited liability or reasonable limit. If traveler is aware of limit & feels it inadequate, he can purchase add'l coverage. Re Knee testimony — how can you fairly compare co operating many a/c who have 2 accidents w/ an operator w/ only 1 or 2 a/c & 2 accidents.

Bering Air has had no liability accidents. Of 5 fatal accidents in Nome in last 10 yrs, only 2 were Nome based air carriers; the rest were large air carriers. Strongly support bill.

Fairbanks

333 Millard Ingraham, a thyr-gen'l private practice in Fbx — no direct economic interest in legis. Opposes bill — probly uncons'tl — & opposed on basis of policy. Opposed to govt intervention to help one group w/a problem. If govt did intervene, subsidy shd not come fm another group (of widows, orphans, maimed, & injured). Shd be obligation of entire state.

Another prob — no way consumer cd protect himself w/addl ins — doesn't think it's available. Can buy life & medical, but can't buy liability ins. Spoke of one man he knew of w/medical bills for $100,000. If air taxis get limit, what wd prevent truckers, drs, lawyers fm doing same — bad precedent.

Re only lawyers opposing — mainly only air taxi operators support it.

~~Shd~~ Shd use another approach, such as gp ins.

440 ~~Mr~~ > Fbx — Pete Hagg[land] Hagglund, akland Aviation — ~~left as soon as~~ flying 24 yrs, comml 14 yrs. Ins rates atrocious — gave example (Supercub — 2 pass. — $4250). Flying not as hazardous as it's made out. Oprgns are beginning safety prgms. Room for improvement, but definitely need liability limit

Hbx

490 Lee Daniels, Delta Aviation Inc – breakdown on costs

C185

hourly breakdown based on 500 hours per year

	1976	1981	
aircraft	21.12	59.82	+36.8%
ins	4.60	26.24	+94 %
eng reserves	5 66	7 33	6 %
maint	2 50	6 00	29 %
~~HRS~~ crew	15	30	
fuel	———		10 %

~~By 1985~~ General public can't afford to fly. As utilization goes down, cost goes up. If ins & interest keeps going up, must have cheaper maintenance & crews, which ~~does~~ brings safety down. Erodes industry. Being legislated into an outlaw. Re attys – understandable; attys also opp'd to de-regln, ins. cap – ~~subdistrict~~ agrees maybe we need to put limit on all liability. People need to take care of themselves rather than depending on state or bar assn

640 William Knowns, Nelnes Dept of Aviation Tech. Tana Valley Comm College
Good idea to keep operators in business, but beseached legis to promote safety education. Ref'd Ak Aviation Safety Foundation project.

645 Anc:
Don Cogger Cotter, Ak Air Guides - ~~people getting~~ in business over 6 yrs, no accidents or claims, increase of 875% in 3 yrs. Inc in liability 62% no accidents. People w/ good safety records shd not have to pay for people who don't. If put air taxi ops out of business, public will suffer. Can't afford ins through winters.

~~700~~

Tape 2
Side A

~~Seward~~
Soldotna -
Dave ~~Dyman~~ Diamond - pres & gen mgr, Southcentral Air - support bills. Doesn't matter who brokers is, London underwriters. Only 3-5 lead underwriters in London; no competition in market. Premiums have increased drastically. Forced to drop hull ins to maintain adequate seat liability. Little or no consideration for good safety records.

~~Kotzebue~~

Bethel
~~Cindy~~ + Dennis Gunder
Cynthia Andrechek

041 Bylsma said there has been a subcomm appointed; will wk on it next wk; requested written comments.

Fbx
050 Everett Long, Esther – private pilot for self. 634 step in right direction; doesn't agree w/ limit – too high.
AK law requires $100,000 limit now; setting higher will increase rates. Takes exception to excluding costs & atty fees. This shd be removed fm bill. Can't accept writing law that protects atty fees.

~~Dillingham~~ Bethel:

108 Cindy Andrechek – thanked Woodman for comments & research. Addressed Luce's comments on Epic Charter Svc (placed them in bad risk category) – had only 2 accidents – one was 1st injury in 5 yrs, is pending claim & has not affected rates to date. Past rates have increased over 600%. ~~Sea plane~~
Critics of 634 look at it as cure for all industry's problems: doesn't & won't supposed to do that. There are steps being taken to address safety thr/ various prgms. High priority.
Seems to be misperceptions surrounding ~~flying~~ flying.
1978 death rate in MV accidents 4 times the rate of A/C accidents. Passengers don't discriminate bet/ good & poor operators, they just look at price, which encourages poor operators.

Delaire Charter Service

178 Dennis Gunder, Bethel, air taxi operator:

Some compensation shd be made for thos w/ proven safety record. $250,000 is fair limit. Drs, lawyers, etc, shd all have liability limits. Only reasonable to have rates comparable to common carrier in ground xptn.

~~215 217~~

A LIMIT NEEDED ON AVIATION ACCIDENTS -- NOT THE RIGHTS OF VICTIMS

by L. Ames Luce

(Mr. Luce is a private pilot, being involved in private aviation for a period in excess of twenty years, and having been involved in Alaska aviation since 1966. He is a practicing trial lawyer and a member of the firm of Kelly & Luce, specializing in personal injury and products liability litigation, and has been deeply involved and concerned with all aspects of aircraft safety).

During the last ten (10) days, I, along with all of those in Alaska who are involved in both commercial and private aviation, have been shocked at the news that has confronted us daily regarding aircraft safety in Alaska. Each day as we pick up the newspaper or listen to the news, we are confronted with another assault on our sensitivities and realize the appalling pain, suffering and grief that the aircraft accidents as reported are inflicting upon the lives of fellow Alaskans. A Beaver stalls while attempting a formation take-off at Lake Hood, with devastating injuries to its occupants; a 207 enters a box canyon near Ruth Glacier and all persons involved are killed; a C119 crashes when an engine fire burns off part of the tail, and miraculously no one was injured; a DC4 crashes when an engine fire burns through its wing, with the loss of all occupants; a King Air with 8 on board crashes and all are lost, while making an approach in adverse weather conditions to King Cove; and a 207 is involved in a midair collision with another aircraft near Naknek, and all occupants are lost.

These accidents all have certain commonalities. They involve commercial or air taxi operations, and continue an appalling pattern of poor safety practices, which have been well documented by both private and federal concerns for the past ten years. If the frequency of accidents continues as have occurred so far during this year, I have been assured by personnel at the National Transportation Safety Board that a record will be set - one that no one wants - establishing the worst accident record in Alaska aviation history. We can be assured that our insurance premiums will reflect this experience.

The NTSB has been involved for more than a year in a special study regarding the Air Taxi Operators within Alaska. (See NTSB-AAS-80-3, dated September 16, 1980) This report reveals the following statistics regarding commercial aircraft safety:

1) Air taxi operators in Alaska had 15.20 nonfatal accidents per one hundred thousand hours flown. This was over <u>five times</u> the similar nonfatal accident experience in the rest of the United States.
2) Air taxi operators in Alaska experienced 2.75 fatal accidents per one hundred thousand hours flown, which was approximately <u>double</u> the fatal accident experience incurred in air taxi operations in the rest of the United States.
3) Private or general aviation experience shows that nonfatal accidents occurred in Alaska more than <u>twice</u> as often as in the rest of the United States, and that fatal general aviation accidents occurred

one-third more often in Alaska than in the rest of the United States.

The conclusions that can be drawn from these statistics are that while general aviation in Alaska does not measure up well against its counterpart outside, the air taxi operators' record for safe operation is disastrous, and upon their shoulders must rest the responsibility, in great measure, for the insurance premiums we are required to pay in order to insure ourselves for aircraft operation.

In a recent article in "Air Alaska," Mr. Woodman suggests that the Alaska Air Carriers and Air Taxi Operators are in general agreement that some limits need to be placed upon aviation accident liability recovery, which would thus work to reduce our aviation insurance premiums at the expense of the maimed, the injured and the survivors of those killed in Alaska aviation accidents. The inescapable conclusion from such reasoning is that aviation in general, and air taxi operators in particular, are entitled to be treated differently for their negligent acts than the butcher, the baker or the candle-stick maker. This is apparently so because of their inability to prudently and safely operate aircraft within the State of Alaska, and because of this failure, the persons who should bear responsibility are the ones least able to protect themselves - namely, the victims.

Mr. Woodman is right in his conclusion that substantial opposition to such an outrageous proposition will be found in the halls of our legislature. Mr. Woodman further indicates

that "insurance scandal and fraud are big business in other places; we have accomplished it in court as jurors, as plaintiffs and as attorneys". Such a comment by someone presumably as well versed in aviation accident history and causation as Mr. Woodman must have other motivation. This is reflected daily in other insurance industry propaganda, which in effect amounts to institutionalized jury tampering.

Accident awards in Alaska are higher than those experienced outside, but not disproportionately so. They do reflect the difference in Alaska's cost of living, the cost of obtaining medical care, and the general wage earning capacity which is enjoyed by all Alaskans. That awards should thus be greater here than in the lower 48 is not only reasonable but also mandated under our system of jurisprudence. What does not occur, as suggested by Mr. Woodman in his article but subsequently admitted to be a figment of his imagination, are awards of $250,000 or $300,000 for the loss of a little toe or finger.

I pay insurance premiums for liability insurance for two aircraft. I have been alarmed at the fact that the premiums have more than doubled in the last three years, since I have never filed a claim and never have been involved in an incident or an accident in my more than 20 years of involvement in general aviation. The insurance underwriters should be required to examine more critically the risks posed by various operators and to place specific requirements upon those who have appalling accident rates and thus constitute poor insurance risks, making them conduct their operations in such a manner as to minimize their accident experience and thus reduce the risk to the general

16. Abstract

This report details the results of a National Transportation Safety Board study of air taxi accidents which occurred in Alaska from 1974 through 1978. Accident data from the Safety Board's automated aviation accident data system for that period were analyzed by means of frequency distributions. Safety Board staff also visited Alaska and met with officials of the Federal Aviation Administration, the National Weather Service, the Alaska Department of Transportation and Public Facilities, the Alaska Air Carriers Association, and 17 air taxi operators. The data revealed that the nonfatal air taxi accident rate (per 100,000 flying hours) in Alaska is almost five times higher, and the fatal rate more than double, the air taxi accident rate in the rest of the United States.

The Safety Board study concluded that there are three major factors responsible for the high air taxi accident rate in Alaska: (1) the "bush syndrome," (2) inadequate airfield facilities and inadequate communications of airfield conditions, and (3) inadequate weather observations, inadequate communications of the weather information, and insufficient navigation aids.

Five recommendations for corrective action were made to the State of Alaska, four to the Federal Aviation Administration, and one to the Alaska Air Carriers Association.

AIR TAXI SAFETY IN ALASKA

INTRODUCTION

Alaska has many unique characteristics. Probably Alaska's most striking characteristics are its vast size and small population. Alaska covers 586,412 square miles, making it the largest State. On the other hand, it has the smallest population of any State with only slightly over 400,000 inhabitants. Outside of population centers, roads connecting all but a few cities are rare, and there are virtually no roads in western Alaska. Almost everything that is required for survival, including food, clothing, medicine, consumer products, and in some cases heating oil, must be supplied by air transportation to many rural communities. Therefore, flying is a necessary way of life. Alaska has more licensed pilots and aircraft per capita than any other State.

The Civil Aeronautics Board has determined that 233 communities in Alaska, including 102 in western Alaska, are entitled to a minimum level of air transportation service. This essential service is supplied primarily by the air taxi industry which includes commuter air carriers and on-demand air taxi operators. Air taxi aircraft in Alaska account for about 10 percent of the total air taxi flying hours in the United States.

Alaska, however, has an air safety problem. From 1974 through 1978, the general aviation 1/ accident rate (based on 100,000 hours flying time) for Alaska was more than double the rate for the rest of the United States. More importantly, about 30 percent of all air taxi accidents in the United States occurred in Alaska, and their rate of occurrence was four times that of the accident rate for air taxis in the rest of the United States.

Numerous factors could be affecting the safety of air taxi operations in Alaska. They include the unique terrain and weather; the extent of and condition of airway and airport facilities (en route and terminal navigation aids, landing strips, airfield lights, and weather reporting stations); the quality of the air taxi operators (experience of their pilots, adequacy of and maintenance level of their aircraft, and attitudes of the operators and pilots toward safety); and the interaction of the Federal and State authorities with the aviation community. The purpose of this special study was to determine the factors which most significantly affect the safety of air taxi operations in Alaska and to formulate recommendations designed to improve that safety record.

1/ The Safety Board classifies general aviation kinds of flying as air taxi, instructional, pleasure, business, and corporate/executive.

Data about air taxi accidents that occurred from 1974 through 1978 were analyzed by means of frequency distributions. The data were obtained from the National Transportation Safety Board's (NTSB) automated aviation accident data system. Staff from the Safety Board's Washington headquarters and Alaska field office observed the conditions under which the air taxi community operates, the community's attitudes and needs, and the community's interaction with Federal and State agencies. The Safety Board staff met with officials of the Federal Aviation Administration, the National Weather Service, the Alaska Department of Transportation and Public Facilities, the Alaska Air Carriers Association, and 17 air taxi operators.

This report explores the background information on the State of Alaska and its air taxi industry necessary for the analysis of the data collected in the study. Analysis of the Safety Board data on air taxi accidents in Alaska and findings of the survey of conditions in Alaska also are presented. Based on this analysis, conclusions regarding the factors affecting aviation safety in Alaska have been drawn, and recommendations which the Safety Board believes will promote safety have been made to appropriate organizations.

ALASKA AND ITS AIR TAXI INDUSTRY

About Alaska

Alaska is indeed a very large State. It is more than twice the size of Texas and is larger than the States of Washington, Oregon, California, Arizona, and Nevada combined. The distance from the southern panhandle of Alaska to the tip of the Aleutian Island chain equals the distance from the east to the west coasts of the contiguous 48 States of the United States.

The State's topography varies enormously. Alaska contains the highest mountain in North America, Mt. McKinley at 20,320 feet. It contains 18 other mountains over 14,000 feet high. There are thousands of rivers, streams, and lakes, vast areas of flat, rambling tundra, massive forests, active volcanoes, and many glaciers. Its more than 33,000 miles of shoreline are dotted with islands, and there is an extensive system of waterways.

Climatic conditions across this vast area vary as much as the topography. Precipitation ranges from a low of 5 to 10 inches annually in the arctic regions to over 200 inches annually in the coastal regions of southeastern Alaska. Temperatures range from almost 100° F in the summer to more than 70° below zero F in the winter in the interior of the State. In most of the State, the waterways and ground surfaces are frozen and covered with snow or ice in the winter. During the spring and early summer, much of the land is water-saturated tundra. Summer days have 24 hours of sunlight in the north and almost 20 hours of sunlight in the southcentral part of the State. Winter days have 24 hours of darkness in the most northern parts of the State and only about 4 hours of daylight in the southern areas. About one-third of the State is above the Arctic Circle.

Weather hazards for aviators include fog, icing, and turbulence. Whiteout, an optical or visual effect during which all depth perception is lost, is another hazard.

Whiteout, which cannot be forecast, is not a weather phenomenon, but it occurs only under certain weather conditions. Whiteout is unique to the polar regions, and thus, among the United States, it is found only in Alaska.

Scattered throughout this enormous State are cities, towns, villages, and settlements ranging in size from Anchorage, Alaska's largest city with a population of over 200,000, to villages with a population of 25 or less. Alaska's population of about 403,000 2/ includes about 70,000 natives—Indians, Aleuts, and Eskimos. Almost one-third of Alaska's population (and almost 70 percent of its native population) lives outside of its handful of major urban centers. The socioeconomic conditions range from the urban atmosphere of Anchorage to an informal lifestyle in much of southeast Alaska to a harsh, subsistence existence in many remote villages in western Alaska and much of the arctic regions of the State.

Alaska has only three major cities: Anchorage; Fairbanks, the second largest city with a population of over 30,000; and Juneau, the State capital, with a population of about 20,000. Other important centers include Ketchikan, south of Juneau in Alaska's panhandle, Bethel in the southwest, and Nome in the northwest. The locations of these cities and other centers serving as regional hubs in the aviation transportation system of Alaska are shown in figure 1.

Aviation in Alaska

Air transportation is essential to Alaska to an extent that is difficult for those in other States to comprehend. The considerable distances between the State's larger population centers, the remoteness of hundreds of small villages, the dearth of highways or even crude roadways, and the freezing of many waterways during much of the year have made air transportation indispensable to Alaska. In fact, traveling by airplane is as ordinary and routine to most Alaskans, especially those in rural Alaska, as traveling by car is to most residents of other States. Adults travel by air to larger cities to shop or to visit friends and relatives. Children are flown to schools, medical clinics, sporting events, or other activities to which children in other States routinely would be transported by automobile or schoolbus.

Freight and mail, especially in the rural areas of Alaska, are moved almost exclusively by air during most of the year, and totally by air when the waterways are frozen. Mail often includes food, medicine, clothing, and other essentials for life. Oil for heating houses is often shipped by air in the winter to supplement the supply transported by barge when the waterways are open. Sometimes the waterways are not open long enough to transport even the basic supplies needed for a small village to survive the winter. The remaining necessities must be transported by air.

Table 1, based on Federal Aviation Administration (FAA) data for 1978, illustrates the extent of general aviation activity in Alaska in relation to that in the rest of the United States. In 1978 there were almost 16 times as many active aircraft, and almost 8 times as many pilots, per 1,000 inhabitants in Alaska as there were in the rest of the United States. Further, the number of general aviation hours flown annually per 1,000 inhabitants in Alaska was nearly 16 times that of the rest of the United States.

2/ 1978 estimate.

Figure 1.--Geographic areas of Alaska.

Table 1.--U.S. General Aviation Activity, 1978.

	Alaska		United States (excluding Alaska)	
	Total	per 1,000 1/	Total	per 1,000 2/
Active aircraft	6,616	16.4		
Pilot certificates	10,914	27.0		
General aviation hours flown 3/	1,137,000	2,820.0	38,272,000	180.00
Air taxi hours flown	485,000	1,200.0	4,013,000	17.00

1/ Estimated 1978 population: 403,000.
2/ Estimated 1978 population: 217,662,000.
3/ Including air taxi hours flown.

The 233 Alaskan communities which are entitled to a minimum level of air transportation service according to a January 1980 Civil Aeronautics Board (CAB) decision are served primarily by Alaska's air taxi industry. In 1978, air taxi flying accounted for almost 43 percent of all general aviation flying hours in Alaska compared with about 10 percent in the rest of the United States. Further, in 1978, the number of hours flown by air taxi operators in Alaska per 1,000 inhabitants was 1,200. This was more than 70 times the rate of 17 hours per 1,000 inhabitants for the rest of the United States.

As of July 1980, there were 218 air taxi operators in Alaska 3/ operating 1,496 aircraft. Sixty-nine of these operators have authority to fly multiengine aircraft. Thirty-five of the 218 air taxi operators are commuter air carriers.

Airports

In 1978, Alaska had 756 airport facilities on record according to the FAA. 4/A comparison of the airport facilities in Alaska and in the rest of the United States by type of facility is shown in table 2. A high percentage of Alaskan facilities are seaplane bases because early in Alaska's aviation history there were few airfields and most general aviation flying was done in seaplanes. Even today in some parts of Alaska, such as the southeast panhandle area, most general aviation flying, including air taxi flying, is done in seaplanes.

Most airports in Alaska are publicly owned or located on publically owned land, while most airports in the other States are privately owned. (See table 3.) 5/

	Alaska		United States (excluding Alaska)	
	Facilities	Percentage	Facilities	Percentage
Public Ownership	537	71.0	4,183	30.4
Private Ownership	219	29.0	9,586	69.6
Total	756	100.0	13,769	100.0

Most of the 756 airport facilities of record are not often used, and little or nothing is known about them. The Department of Transportation and Public Facilities (DOT/PF) of the State of Alaska estimates that the State is responsible for about 320 airport facilities and that it actively maintains about 260 of these facilities. 6/ According to the July 1979 FAA Alaska Region Ten Year Plan for fiscal years 1981 through 1990, the current airport system in Alaska consists of 277 existing and projected facilities. Thirty-eight are major air carrier and general aviation airport facilities, and 239 are existing and projected airport facilities in rural communities with less traffic. Some 230 of these 277 locations are on the CAB's list of essential service determination. One of the 38 major facilities is a seaplane base, and 52 of the 239 lesser facilities are seaplane bases. Another 13 of the 277 total facilities are future facilities, including one major facility. Thus, of the 277 total facilities, 211 are existing, landbased airports.

Of these 211 landbased airports, 125 have a runway length of 3,000 feet or less, 41 have a runway length of 3,001 to 4,999 feet, 42 have a runway length of 5,000 to 10,000 feet, and 3 have a runway length of over 10,000 feet. 7/ Of the 211 runways, 38 have a paved surface, 132 have a gravel or partial gravel surface, 39 have a dirt or turf surface, and 2 have other surfaces.

6/ These figures were given by the DOT/PF Director of Central Division Planning and Research. However, other DOT/PF personnel cited different statistics. One DOT/PF employee indicated that the State owned about 250 airports and maintained 229 of them.

7/ Data from the July 1979 FAA Alaska Region Ten Year Plan.

Navigation Aids

The Alaska Region of the FAA lists about 90 FAA-owned and -operated, en route navigation aids (navaids) in Alaska including 54 NDBs 8/ (including 3 NDB/DMEs 9/), 7 VORs 10/ (including 4 VOR/DMEs), and 26 VORTACs. 11/ In addition, there are 70 to 75 non-FAA-owned navaids of various types. The FAA owns and operates over 2,000 en route navaids in the rest of the United States; half of the navaids are VORs or VORTACs and slightly less than half are NDBs. There are about 1,000 additional en route navaids in the other States not owned and operated by the FAA. The 54 NDBs and 33 VOR/VORTACs in Alaska are spread over an area of about 586,000 square miles. In comparison, the more than 2,000 NDB and VOR/VORTAC facilities in the other States are spread over 3.7 million square miles

Terminal navaids in Alaska include 28 ILSs 12/ and LOCs 13/ compared with over 700 in the rest of the United States. Most of the 36 existing, landbased, major airports in Alaska are serviced by some type of en route and terminal navaids. However, only 22 of the 175 landbased airports serving Alaska's rural communities have any navaids. These include 18 airports with NDBs (including two privately owned), 3 airports with VORs, and 1 airport with an NDB/DME.

While it is not feasible to compare in detail the entire system of navaids in Alaska with the system in the rest of the United States, it is possible to compare a geographical subarea for each. For example, Bethel, Alaska, and Des Moines, Iowa, have similar weather characteristics and topography. Both have weather with better than 1,000-foot ceilings and 3-mile visibility approximately 85 percent of the year, and both have relatively flat terrain. The number of air taxi operations per year at Bethel is more than 50,000 14/ but only 12,816 at Des Moines. 15/ Within a 100-nmi radius, the Bethel area has only 1 VORTAC and 2 NDBs while the Des Moines area has 12 VORTACs and 33 NDBs. The Bethel area has approximately 600 nm of airways and Des Moines has over 1,300 nmi. The Bethel area has only 3 airports with any terminal navaids for instrument approaches while Des Moines has 45.

8/ Nondirectional radio beacon--a low- or medium-frequency radio beacon that transmits nondirectional signals with which a pilot of aircraft equipped with a receiver can determine his bearing and "home in" on the station.

9/ Distance measuring equipment--a device that indicates how far the aircraft is from the ground station.

10/ Very high frequency omnidirectional range--a line-of-sight electronic navigational guidance aid considered superior to the NDB.

11/ VOR with tactical area navigational capability--a combined aircraft and ground base electrical system which provides a visual presentation of azimuth and distance for the pilot.

12/ Instrument landing system--an electronic system which provides the pilot with an approach path for exact alignment and descent of the aircraft.

13/ Localizer facility--provides course guidance during descent; can be used separately or in combination with an ILS.

14/ Estimated by the Alaska Region of the FAA.

15/ FAA Air Traffic Activity, 1978.

In addition to the system of navaids discussed, there is another system of NDBs which was installed in western Alaska by Wien Air Alaska, one of the two major Alaskan air carriers. This en route system, which is still in place, was deactivated in 1978 when Wien stopped flying in the area and subcontracted its service to air taxi operators. The Wien system included a total of 13 NDBs located at rural village airfields in western Alaska, from Platinum in southwest Alaska (about 125 miles south of Bethel) to Kobuk, 600 miles north (about 100 miles east of Kotzebue). Two of the NDBs were located on St. Lawrence Island (at Gambel and Savoonga) about 175 miles west of Nome. The current condition of the equipment in this system is not known.

Airfield Lighting

Most of the 36 existing, landbased, major airports in Alaska are lighted. Of the 45 airports in Alaska with runways of 5,000 feet or more in length, 40 have some form of lighting. Twelve of the 24 airports with runways of 4,000 to 5,000 feet in length have some form of lighting. The remaining 154 landbased airports have no lighting.

Weather Reporting

To service the weather information needs of the aviation community, there were a total of 122 weather observation stations in Alaska as of January 1980. 16/ These included 42 contracts with persons in rural communities to observe and report the weather regularly using government-furnished equipment. These National Weather Service (NWS) trained and certificated observers are paid on the basis of the number of observations they make. Also included were 19 supplemental aviation weather reporting stations (SAWRS), 18 FAA and 18 NWS manned weather stations. In addition, there were 25 other various reporting facilities including 18 automated weather observation stations.

The NWS in Alaska also airs an early evening television show. This daily program gives aviation weather forecasts for the next day. The show can be seen throughout Alaska. Furthermore, the FAA is experimenting with weather observations using remote television cameras. A camera is located on the airport at Unalakleet and another camera is located in the waterway narrows at Valdez. The Unalakleet information is transmitted to a television screen at the Nome FAA flight service station (FSS), and the information at the Valdez narrows is transmitted to the Cordova FSS and the Valdez tower.

FACTORS AFFECTING SAFETY

Safety is important in any transportation system, but because of the extreme dependence of Alaska on its air taxi industry, a high level of safety is particularly important. Alaskans should be provided an air taxi system which is as safe as that enjoyed by their fellow citizens in other parts of the United States. The Safety Board expressed its concern for the level of safety of the commuter air carrier segment of the air taxi industry in the United States at its January 1980 hearing on

16/ These data were obtained from the National Weather Service, Anchorage, Alaska.

the safety of the commuter segment of the air taxi industry, and in its July 1980 special study report on commuter airline safety nationwide. 17/ Statistics derived from the files of the Safety Board's automated aviation accident data system clearly indicate that the Alaskan air taxi system is not as safe as the air taxi system of the rest of the United States.

The annual trend of total and fatal air taxi accidents in Alaska for the 10-year period 1969-1978 18/ is presented in figure 2. The annual number of total accidents and fatal accidents varied considerably over the period with an increasing trend since 1972. During the most recent 5-year period for which data is available, 1974-1978, there were 311 air taxi accidents in Alaska, of which 266 were nonfatal and 45 were fatal. During the same period, there were 753 air taxi accidents, 562 nonfatal and 191 fatal, in the rest of the United States.

The rate of occurrence of nonfatal air taxi accidents in Alaska per 100,000 hours of air taxi flying between 1974 and 1978 was almost five times, and the fatal accident rate more than double, that of the rest of the United States. (See table 4.) Thus, air taxi operators in Alaska are experiencing accidents (per 100,000 hours of flying) considerably more often than their counterparts in the rest of the United States.

To identify the factors that contribute to the high rate of occurrence of air taxi accidents in Alaska, statistical data and actual accident cases from Safety Board aviation accident investigations were analyzed. Safety Board staff members interviewed a number of owners, pilots, and mechanics in Alaska who were asked for their views on why the air taxi accident rates in Alaska were so much higher than in the rest of the United States and on what is needed to improve safety. The Safety Board staff members also flew on several air taxi flights into remote village airstrips in rural southwest Alaska. The Alaska Air Carriers Association was also asked for its views.

FAA personnel in the FAA's Alaska Region headquarters, controllers and supervisors at the Anchorage Air Route Traffic Control Center, personnel at the Anchorage TRACON and tower, and Principal Operations and Maintenance Inspectors at the Anchorage General Aviation District Office (GADO) discussed air taxi safety with the Safety Board staff. The Bethel FSS and Nome FSS were also visited. NWS personnel in Anchorage provided data on the existing weather information system and on the future plans for the system. The Alaska DOT&PF staff and Mr. Walt Parker of Parker Associates of Anchorage, consultants to the House Committee on Finance of the Alaska State Legislature, discussed the State involvement in aviation transportation.

The Safety Board's aircraft accident data were analyzed extensively in an effort to identify any consistent problem areas. The types of accidents, the phases of operation during which the accidents occurred, the Safety Board-determined probable causes and contributing factors, the types of aircraft involved, the location, terrain, and weather of the accident sites, and the experience level of the pilots were all examined.

17/ "Special Study--Commuter Airline Safety," July 22, 1980 (NTSB-AAS-80-1).
18/ The latest year for which complete accident and exposure data were available at the time of this study was 1978.

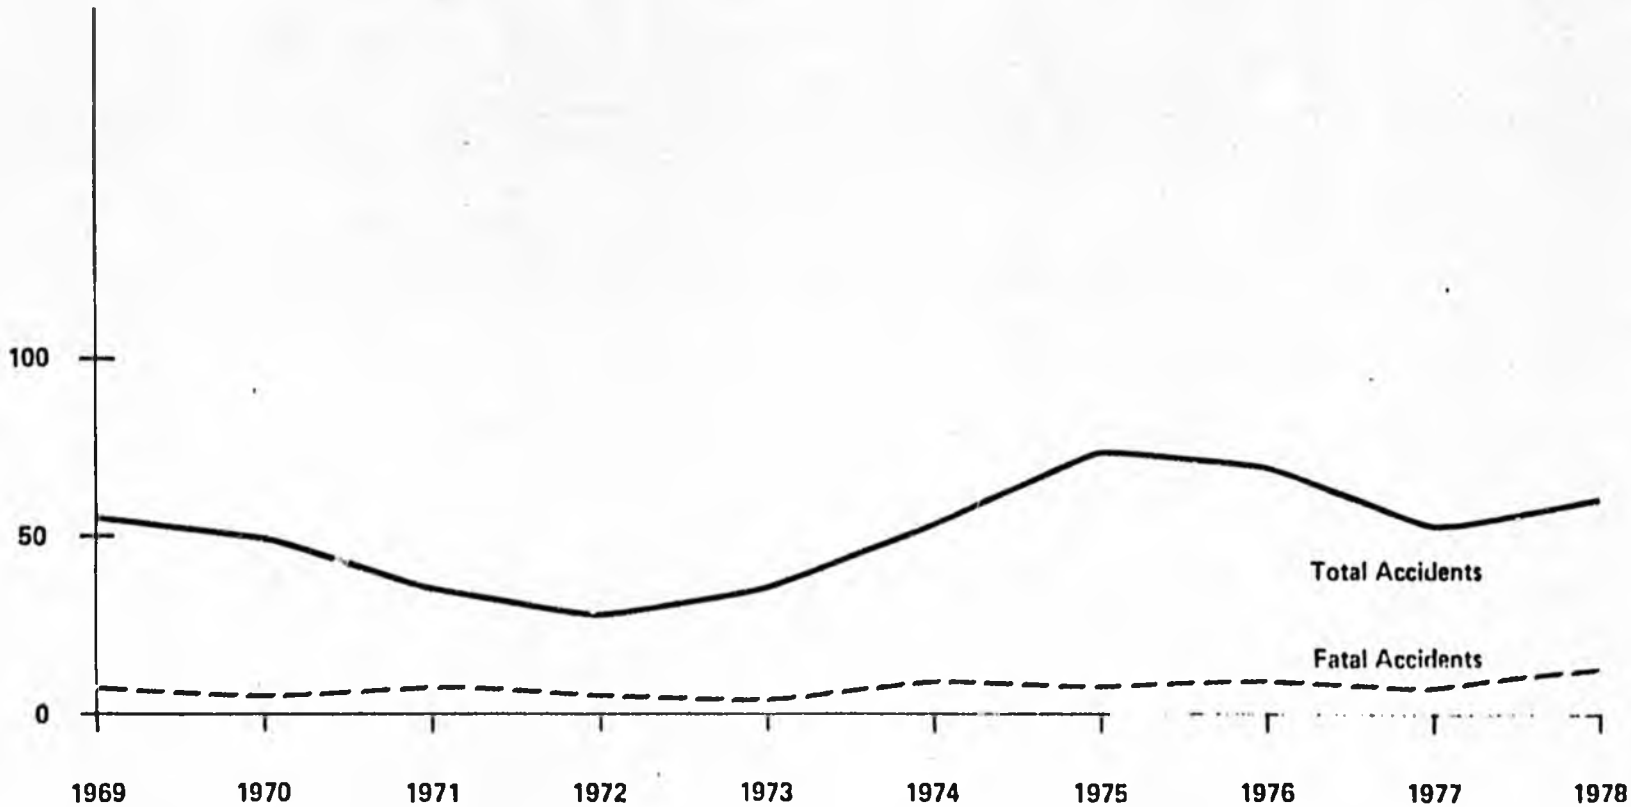

Figure 2.--Total and fatal Alaskan air taxi accidents, 1969-1978.

Table 4.--Comparison of air taxi accident rates for 1974-1978.

	Alaska		United States (excluding Alaska)	
	Total	Per 100,000 hours 1/	Total	Per 100,000 hours 1/
Nonfatal general aviation accidents	1,083	23.54	18,041	10.74
Fatal general aviation accidents	168	3.65	3,594	2.14
Nonfatal air taxi accidents	266	15.20	562	3.29
Fatal air taxi accidents	45	2.57	191	1.11

1/ Flight hours, obtained from the FAA, were (in 100,000 hours):

	Alaska	United States (excluding Alaska)
General aviation	46.0	1,679.6
Air taxi	17.5	170.9

Hours were not available for Alaska for 1977 and had to be estimated from the data for 1974-1976 and 1978. All data are subject to some error. The estimate of air taxi hours in Alaska for 1978 is subject to the largest standard error--12.8 percent. Overall, the errors are believed to be considerably less for the 5-year totals. More importantly, the small magnitude of the errors is believed to have a minimal effect on the comparisons shown above.

Table 5 presents data about the types of air taxi accidents which occurred in Alaska from 1974 through 1978 and the phase of operation during which they occurred. Similar data for air taxi accidents in the rest of the United States are presented in table 6. The data show that air taxi accidents in Alaska involve a slightly larger percentage of landing types of accidents, particularly noseover and rollover accidents, than air taxi accidents in the rest of the United States. Alaska has a larger percentage of collisions with obstacles, collisions with ground or water, and stalls, but has fewer engine failures or malfunctions.

A significantly larger percentage of air taxi accidents occur during the takeoff phase of operation in Alaska than in the rest of the United States. Table 5 also shows that takeoff and landing types of accidents and accidents involving collisions with obstacles occurring during the takeoff and landing phases of operation accounted for 46 percent of all air taxi accidents in Alaska. Table 6 shows that the same type of accidents occurring during the takeoff and landing

Table 5.--Total Air Taxi Accidents in Alaska, 1974-1978

1/ The difference in totals is due to four collisions between eight occupied aircraft.

phases of operation account for only 34 percent of the air taxi accidents occurring in the rest of the United States. Thus, it appears that accidents involving takeoff and landing are more of a problem in Alaska.

The distribution of air taxi accidents on a monthly basis as a percentage of the total for Alaska and for the rest of the United States are shown in figure 3. These data show that the percentage of air taxi accidents that occur during the summer months in Alaska is larger than that in the rest of the United States. Also, the percentage of accidents that occur during the winter months is lower in Alaska than that in the rest of the United States. One reason for this may be drawn from figure 4, which presents the 5-year (1974-1978) cumulative monthly distribution of accidents for Alaska and for the rest of the United States. Figure 4 also presents the distribution of Alaskan air taxi accidents involving amphibious aircraft and aircraft equipped with hulls or floats (seabased aircraft). These data show that the number of air taxi accidents in Alaska peaks during the summer months of June through September as does the number of such accidents involving seabased aircraft. This peak of accidents involving seabased aircraft obviously reflects the significantly increased use of such aircraft in Alaska during these months. The monthly accident distribution for the rest of the United States, while varying significantly from month to month, does not exhibit the marked seasonal fluctuation of the Alaskan accident distribution.

A comparison of the percentages of accidents involving a given type of landing gear-equipped aircraft in Alaska with those of the rest of the United States is shown in table 7. The data show a much larger percentage of air taxi accidents in Alaska involve aircraft equipped for water landing and ski-equipped aircraft. The data further show that a larger percentage of air taxi accidents in Alaska involve aircraft with tailwheels (combined fixed and retractable gear). These facts indicate the extent of the waterbased and rough-field operations in Alaska.

Table 7.--Comparison of Accidents by Landing-gear Type

Landing Gear Type	Alaska (percentage)	United States (excluding Alaska) (percentage)
Hull/Float	19.29	4.22
Amphibious	3.22	3.03
Ski	6.43	1.06
Skid	15.11	10.82
Tricycle Gear Retractable	13.83	46.83
Tricycle Gear Fixed	17.68	17.41
Tail Wheel Retractable	2.57	14.38
Tail Wheel Fixed	21.22	1.72
Other/Unknown	0.64	0.53

Also, about 20 percent of the accidents in Alaska involve rotary-wing aircraft (helicopters) compared with about 15 percent in the rest of the United States. This fact reflects the higher use of rotary-wing aircraft by air taxi

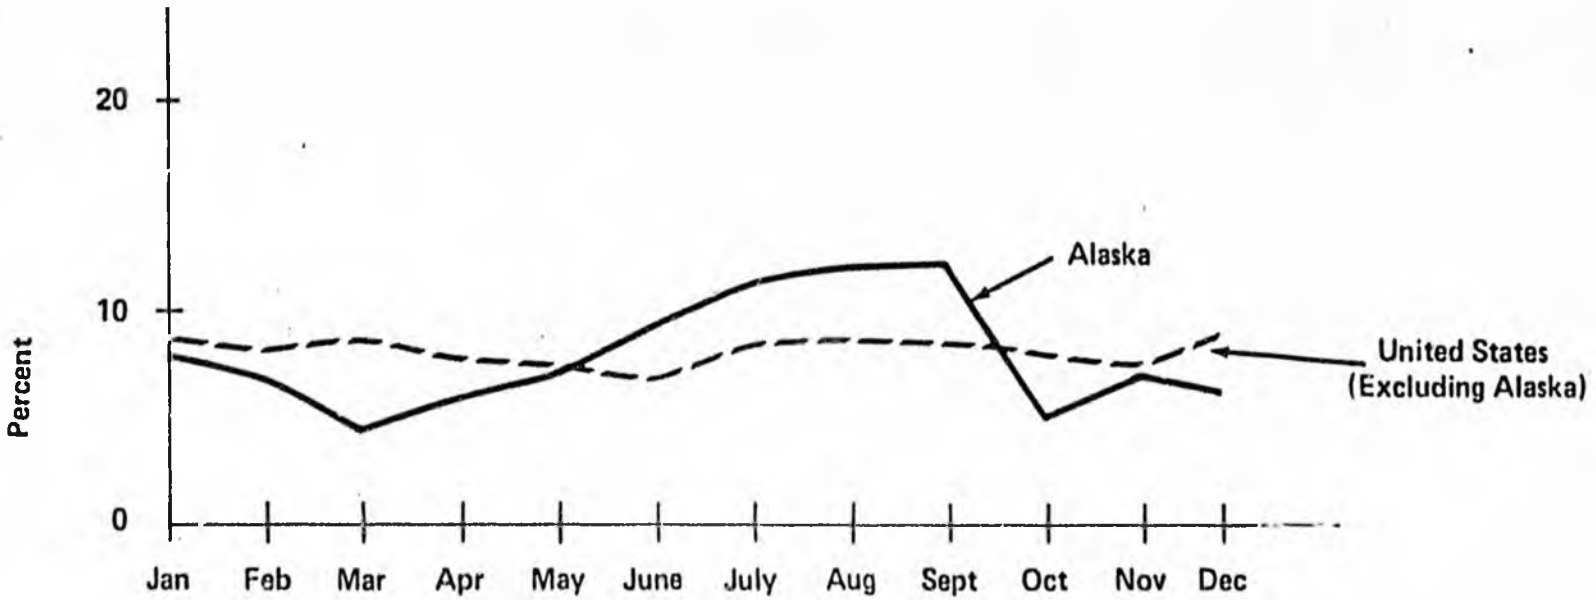

Figure 3.—Percentage of annual accidents occurring monthly.
Data from 1974-1978 for Alaska and the U.S. (excluding Alaska).

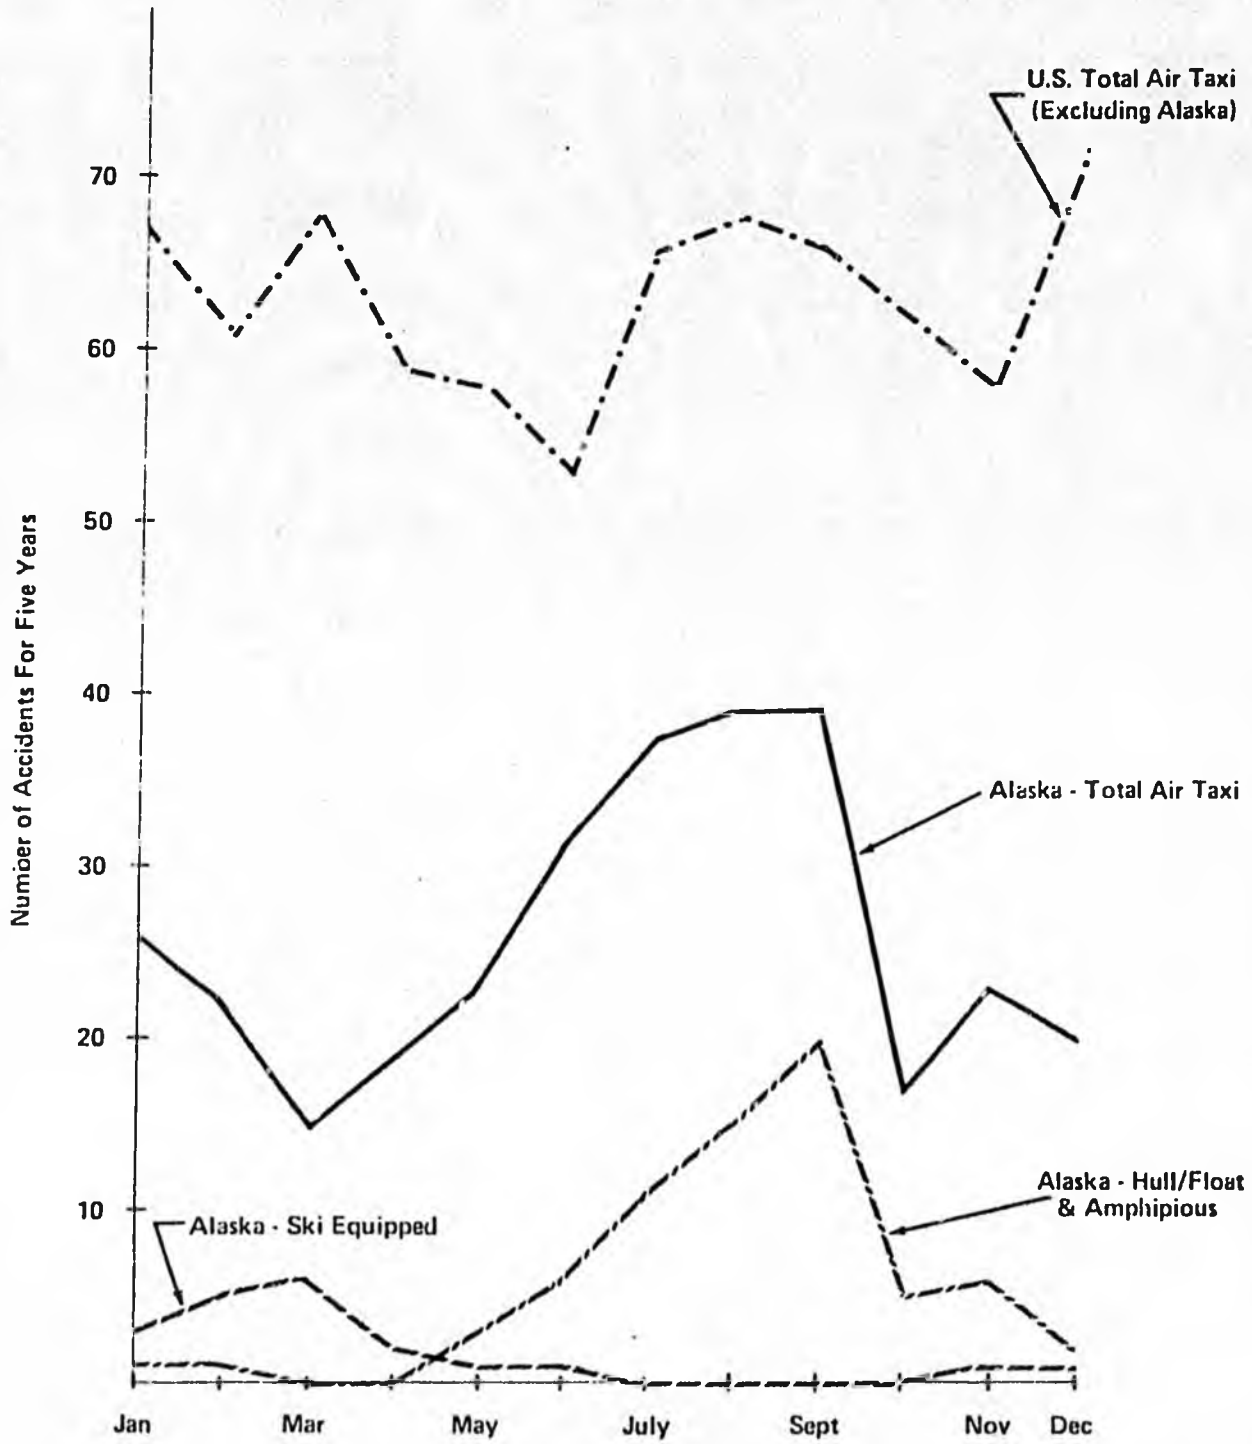

Figure 4.—Air taxi accidents for 1974-1978 on monthly basis. Comparison of Alaska with U.S. (excluding Alaska).

operators in Alaska 19/ due, in part, to the less developed conventional airport system.

In carrying out its Congressional mandate to determine the probable causes of all aircraft accidents that occur on United States territory, the Safety Board has established 13 broad categories of cause/factors. 20/ The broad categories have been subdivided further into numerous detailed cause/factors. For example, the broad category of cause/factor could be cited as the "pilot," and the detailed cause/factor could be that the "pilot continued VFR [visual flight rules] flight into adverse weather." Furthermore, a single accident could have more than one cause/factor assigned to it. In some cases, where the aircraft is never located or insufficient facts are available, the Safety Board is unable to determine a probable cause.

Of the 266 nonfatal air taxi accidents in Alaska from 1974 to 1978, the cause of 1 was undetermined because the aircraft was not located. Of the 45 fatal Alaskan air taxi accidents, the aircraft involved in 1 accident was never found, and 3 accident investigations developed insufficient data, for a total of 4 accidents in which the probable cause was not determined. Of the 562 nonfatal air taxi accidents in the rest of the United States, the probable cause could not be determined for 31 accidents, and of the 191 fatal air taxi accidents, 5 resulted in an undetermined probable cause.

A comparison of the broad categories of cause/factors assigned by the Safety Board to air taxi accidents in Alaska and to air taxi accidents in the rest of the United States is presented in table 8. While this comparison does not unequivocably identify the factors contributing to the higher accident rates in Alaska, there are several differences in the distribution of causal assignments that provide direction in the search for these factors.

Table 8 shows that the pilot is cited as a cause/factor in a larger percentage of all air taxi accidents in Alaska than in accidents in the rest of the United States. The assignment of "personnel" as a broad cause/factor is less in Alaskan accidents. Airports/airways/facilities are cited in a slightly larger percentage of all air taxi accidents in Alaska. Terrain is cited as a cause or related factor substantially more often in Alaska than it is in the rest of the United States. Mechanical causes such as powerplant, landing gear, and systems are cited considerably less often in Alaska. Weather is the assigned factor in the same percentage in both.

19/ Over 25 percent of the air taxi fleet in Alaska are rotary-wing aircraft; about 12 percent of the air taxi fleet in the rest of the United States is rotary-wing aircraft.

20/ The 13 broad categories of cause/factors are: pilot, personnel, airframe, landing gear, powerplant, systems, instruments/equipment and accessories, rotorcraft, airport/airways/facilities, weather, terrain, miscellaneous, and undetermined.

Table 8.—Comparison of Air Taxi Accidents
By Broad Cause/Factor Categories

	Alaska		United States (excluding Alaska)	
	Accidents	Percentage[1/]	Accidents	Percentage[2/]
Pilot	263	85.1	518	70.4
Personnel	39	12.6	156	21.2
Mechanical[3/]	57	18.4	228	31.0
Rotorcraft	10	3.2	20	2.72
Airport/Airways/Facilities	44	14.2	88	12.0
Weather	92	29.8	219	29.8
Terrain	101	32.7	155	21.1
Miscellaneous	5	1.62	36	4.9
Undetermined	5	1.62	36	4.9

1/ Based on 309 air taxi accidents, some of which had more than one cause/factor assigned, for which probable cause was determined.
2/ Based on 736 air taxi accidents, some of which had more than one cause/factor assigned, for which probable cause was determined.
3/ "Mechanical" is not a Safety Board broad category of cause/factors. It is a consolidation, used here only for convenience, of the Safety Board broad categories of airframe, landing gear, powerplant, systems, and instruments/equipment and accessories.

A review of the geographical distribution of the air taxi accidents within Alaska shows that accidents occur fairly uniformly throughout the State, but with an apparent bias toward those areas which are known to have more air taxi operations. The percentages of air taxi accidents that occurred in Alaska from 1974 to 1978 by geographical areas within the State (see figure 1) were:

Area	Percentage
Southwest	25
Northwest	11
Arctic Circle	19
Central Interior	7
Southcentral	16
Southeast	14
Aleutians and Kodiak Islands	8

The southwest area, where Bethel is the most important transportation hub, has the highest percentage of accidents. This area has a substantial amount of air taxi activity. The combined areas of western Alaska have over one-third of all air taxi accidents within the State. This area also has very few navaids and many poorly maintained runways.

The area above the Arctic Circle also has a significant portion of the accidents. It too has substantial air taxi activity and few navaids. The southeast, in which the air taxi flying involves significant float operations, also has a substantial portion of the State's accidents. This area has over 160 inches of rainfall each year, and the air taxis operate almost solely under visual flight rules. The southcentral area, with Anchorage at its center, is the most congested area and involves a mixture of landbased and seabased operations.

Although the perspectives of the air taxi operators and pilots and Federal and State government agency personnel interviewed during this study varied widely and their emphasis on particular aspects of problems affecting safety was slightly different, a review of the opinions expressed, coupled with an analysis of the accident data, revealed three recurring problem areas. They are: (1) pilot/operator/passenger attitude ("bush syndrome"), (2) inadequate airfield facilities/communications, and (3) inadequate weather information/communications/navaids.

Pilot/Operator/Passenger Attitude--"Bush Syndrome"

One comparison that particularly stands out, especially in light of the opinions gathered in Alaska, is the larger percentage (86 percent to 72 percent) of all air taxi accidents in Alaska in which the pilot was cited as a cause/factor. Further examination of the pilot involvement in these accidents was prompted by both the large percentage of accidents in which the pilot was assigned as a cause/factor, and by the fact that it was cited more often in Alaska.

A review of the total hours of flight time, flight time flown in the accident type of aircraft, and certificates and ratings held revealed that the majority of the pilots involved in air taxi accidents in Alaska were experienced pilots. Almost all pilots involved in these accidents had more than 1,000 hours of total flight time and approximately 80 percent of those pilots had more than 2,000 hours of total flight time. Approximately 80 percent of those pilots for whom the number of hours flown in the accident type of aircraft could be determined had more than 100 hours in type. About 20 percent had airline transport pilot certificates in addition to their commercial certificates, and almost 80 percent of the pilots had instrument ratings.

Although these pilots generally had considerable flight experience, it is not known how much of their experience was gained in Alaska. Unfortunately, these data are difficult to obtain and generally are not collected. Obviously, if the flight experience of these pilots was not obtained in Alaska where many unique flying problems exist, then the "effective" level of their experience would not be as high as it appears to be.

While these statistics illustrate the extensive involvement of the pilot in the accidents, they do not identify specific problem areas. However, statements from operators, pilots, and regulatory personnel in the Alaskan aviation community suggest that the "bush pilot syndrome" may be an integral factor not only in the high pilot involvement but also in the high accident rate in Alaska.

Descriptions of the "bush pilot syndrome" range from a pilot's casual acceptance of the unique hazards of flying in Alaska to a pilot's willingness to take

unwarranted risks to complete a flight. In Alaska, it is not uncommon for pilots to fly in extremely poor weather or to attempt to land on runways that are in bad condition or off the airport on snow-covered strips or frozen lakes marginally suited for landing. Stories abound about pilots who have been involved in numerous accidents and have survived. These pilots have become near legends and are spoken of almost reverently by some young pilots, especially those who have arrived only recently in Alaska. Taking chances is considered a part of flying in Alaska by many Alaskans--not just the pilots, but also the passengers. Passengers affected by the "bush syndrome" demand to fly even in hazardous weather conditions, and if one pilot or operator will not fly, the passengers will go to another operator; occasionally they find one who will fly in hazardous weather conditions.

The "bush syndrome" goes beyond the realm of poor judgment compounded by pressures and into the area of unreasonable risk-taking. Although the "bush syndrome" apparently exists, it cannot be unequivocably demonstrated by statistical data. However, it is clear that most operators, pilots, and others associated with Alaskan aviation believe that it does exist. The review of accident cases further supports the contention. The following case history helps to illustrate the "bush syndrome" attitude.

In November 1978, two persons asked to be flown from McGrath to Tatalina. They asked one air taxi operator who refused because it was a "pitch dark night" and the dirt strip at Tatalina was not lighted. A pilot for another operator agreed to take the flight even though he did not have the operator's permission. Immediately after takeoff, the aircraft, a Piper PA-32, entered a steep right bank and descended into trees approximately 1 mile from the McGrath airport.

The accident pilot had already been involved in three other accidents, and on the day of the accident he had argued with another pilot about not getting his share of the flying. On this flight, he violated Federal Aviation Regulations (FARs) because he did not have an air transport rating or an instrument rating required to fly 14 CFR 135 flights at night. This case illustrates the "bush passenger" attitude of wanting to fly under any conditions and the "bush pilot" attitude of total disregard for rules and safe operating practice.

Although the pilot is cited in a higher percentage of air taxi accidents in Alaska, that statistic does not tell the entire story and may even be misleading. The Safety Board determinations of detailed cause/factors in air taxi accidents in Alaska were compared with the determinations for accidents in the rest of the United States. This comparison indicated that when the pilot was cited as the broad cause/factor, several detailed cause/factors pointing to two general problem areas frequently appeared. These problem areas are: (1) inadequate airfield facilities and inadequate communications of airfield conditions, and (2) inadequate weather observations, inadequate communications of the weather information, and insufficient navaids.

Airfield Facilities and Communications

Observations from participants in the Alaskan air taxi system indicate that inadequate airfield facilities and communications are a significant factor in the air taxi accidents in Alaska. A close look at the detailed cause/factor of "pilot selection of unsuitable terrain" reveals that although this detailed cause/factor

may be the result of poor pilot judgment, it is, in part, a manifestation of the problems of inadequate airfield facilities and communications in Alaska.

Selection of unsuitable terrain was cited as a cause/factor in over 13 percent of all air taxi accidents in Alaska in which the pilot was cited as the broad cause/factor, but in less than 4 percent of such accidents in the rest of the United States. Further review reveals that pilot selection of unsuitable terrain is almost always associated with nonfatal accidents and almost never associated with a forced landing due to an engine failure or malfunction. Of the 43 Alaskan air taxi accidents in which unsuitable terrain was cited, 42 were nonfatal accidents. Only one accident involved an engine failure or malfunction. It is apparent that those accidents in which the pilot was cited for selection of unsuitable terrain involved an intentional effort by the pilot to either take off or land.

There was virtual unanimity of opinion among operators and pilots that runway conditions present a problem in much of rural Alaska. Inadequate runway length and width, inferior runway surface construction, poor surface condition, and a lack of lighting often make takeoffs and landings difficult, if not dangerous. This problem of runway conditions was cited time after time not only by operators and pilots but also by FAA personnel and even by State DOT/PF staff personnel.

Many runways are either too narrow or too short, or both, and cannot handle safely the aircraft needed to adequately serve the villages near the airport/strip. The State has established a minimum length of 3,000 feet and a minimum width of 100 feet. Unfortunately, the geography and topography of many villages physically preclude the construction of a runway of minimum size.

Gravel is considered to be the best surface composition for use in rural Alaska because of the weather and terrain, but gravel is expensive and difficult to obtain. Therefore, almost half of the rural runways have little or no gravel covering the dirt surface. Thus, the surfaces often become a quagmire of mud during rain or during the spring breakup, when the tundra thaws and the ice melts. Many of these dirt strips have ruts and potholes.

The problem most consistently cited by operators, pilots, and the FAA, however, is that of inadequate maintenance of the runway surfaces. Removal of snow and grading of the dirt surfaces after rain are often inadequately performed and occasionally not done at all. If snow is not plowed completely from an already short and/or narrow runway, it leaves a runway of even more marginal dimensions, often with patches of snow, soft snow, or ice still remaining on the surface.

It is under these conditions that the Alaskan air taxi pilot functions. The pilot must decide whether to attempt a takeoff or landing or lose a revenue-producing flight. If the trip is not completed satisfactorily, the operator will not receive revenue. There are many pressures on the pilot to attempt a landing, including those from passengers on board or waiting at the destination airport; those from the local villagers awaiting food, mail, or medicine; or those from the operator. Decisions have to be made, and pressure can affect the pilot's judgment, sometimes distorting his assessment of the runway conditions. Analysis of the accidents in which the pilot was cited for selection of unsuitable terrain shows that the condition of the airfield may be more significant in these runway-related accidents than poor pilot judgment or attitude.

Many of these accidents resulted from taking off or landing on runways that were either snow- or ice-covered because they were inadequately cleared. The following case history helps to illustrate this point. The pilot, a certified flight instructor with over 2,200 hours of total flight time and over 45 hours in the type aircraft, a Cessna 185, successfully landed his aircraft at 1340. During landing the pilot noticed that the runway was covered by 6 to 7 inches of loosely packed snow. The pilot requested that the runway be plowed and a caterpillar tractor made two passes on the runway and packed down approximately 2,000 feet of its length. At 1545, during the attempted takeoff, the aircraft was unable to obtain liftoff speed because too much snow still covered the runway and the aircraft ran off the runway into a snow bank.

Many of the accidents involve intentional off-airport takeoffs and landings, often on frozen waterways or on snow/ice strips, because of inadequate runways or poor runway conditions. The following case history illustrates this point. In December 1978, a wheel-equipped Cessna U-206 was dispatched on an air taxi flight from Bethel to Sheldon's Point with a cargo of supplies needed by the village. The pilot had approximately 1,000 hours of total flight time and over 100 hours in the Cessna U-206. Upon reaching his destination, the pilot landed on the frozen lake adjacent to Sheldon's Point because the runway/landing area was not maintained. The landing was uneventful even though the lake was covered by 6 inches of snow. During the takeoff from the snow-covered and frozen lake, the aircraft struck a snowdrift after an unsuccessful attempt to obtain flying speed. While skis may have been better suited for this terrain, wheels were better suited for the home base of Bethel.

Adequate maintenance of airfields is a difficult problem for Alaska. According to the State DOT/PF officials, sufficient funds are not available for full-time State employees to maintain rural airports. Therefore, the State generally contracts with a local villager to operate the State-supplied equipment and maintain the runways. Sometimes the work is not performed adequately. The runway-related air taxi accidents already discussed show the magnitude of this problem.

Another example of an accident during an intentional off-airport landing, where the Safety Board cited pilot selection of unsuitable terrain, involved a ski-equipped Cessna 180 aircraft. The pilot, with over 1,500 hours total flight time and over 1,500 hours in type, successfully landed at a ski strip near Kwigillingok. During the attempted takeoff about 1 hour later, the aircraft never obtained sufficient speed because of the wet, sticky snow. Similar accidents have involved float-equipped aircraft landing on shallow waterways and then running into sandbars or submerged debris. In one accident, a float-equipped Cessna 185 flown by a pilot with over 18,000 hours in type struck a submerged log during landing.

A greater percentage of nonfatal air taxi accidents in Alaska than in the rest of the United States involved collisions with obstacles on takeoff or landing. In fact, almost 19 percent of the nonfatal accidents in Alaska are of this type compared with less than 10 percent in the rest of the United States. It also should be noted that pilot selection of unsuitable terrain is often cited in these accidents. These statistics support the contention that many of these accidents occur because operators use float- and ski-equipped aircraft, in part, to compensate for the lack of adequately maintained runways.

Operators and pilots also stated that the lack of airfield lights at most rural airports contributes to the high accident rate. Since much of Alaska is shrouded in darkness, or near darkness, for several months of the year, operations at unlighted airfields are hazardous and often illegal. The installation of lights is a problem, but the maintenance of lighting at airports is even more of a problem. Lights are sometimes accidently plowed out during snow removal or occasionally shot out by local villagers engaging in target practice.

Information on runway conditions is occasionally inaccurate, often untimely for operator and pilot needs, and sometimes not available at all. Villagers who are in desperate need of supplies or who must make a trip out of the village will sometimes optimistically report conditions to be better than they really are. This problem is further compounded by an inadequate communications system. The following two accident cases highlight this information reporting/communications problem.

The first accident, which occurred in January 1978, involved a wheel-equipped Cessna 180 flown by a pilot with over 5,000 hours total time and over 350 hours in that type aircraft. In preparation for the flight to Kipnuk, the pilot learned that there was a 20-knot crosswind at Kipnuk and there was poor braking action on the runway. The air taxi operator called Kipnuk and was informed by villagers that the lake surface was satisfactory for landing. Upon arriving at Kipnuk the pilot flew over the lake at 250 feet, and again at 50 feet, to check the surface. The pilot did not observe any shadows or definitions of snow berms (a protruding shelf or ledge of snow) because of overcast skies. However, upon landing, the aircraft struck a snow berm and flipped over. The information communicated to the pilot concerning the landing area's condition was incorrect.

The second accident also occurred in January 1978. This accident involved a Piper PA-31 Navajo that was flown by a pilot with over 500 hours of multiengine flight time and 50 hours in the PA-31. The pilot was unable to learn the condition of a runway. The aircraft touched down on its destination airstrip within 100 feet of the threshold. However, the 2,800-foot runway was very icy and the pilot was unable to stop the aircraft. It finally went off the end and struck a large frozen outcropping while the pilot was attempting to go around. Once again, inadequate communication of information to the pilot was a factor in an accident.

Weather Observation/Communications/Navaids

Certain detailed cause/factors related to accidents in adverse weather conditions and whiteout were assigned in a greater percentage of air taxi accidents in Alaska than in the rest of the United States. (See table 9.)

Based on the 309 total air taxi accidents in Alaska and the 736 such accidents in the rest of the United States for which the Safety Board determined probable causes, these weather- and whiteout-related detailed cause/factors were assigned more than twice as often (24.3 vs. 10.1 percent) in air taxi accidents in Alaska. These cause/factors could be a manifestation of poor pilot judgment or the "bush pilot syndrome" discussed previously. However, these detailed cause/factors might also reflect, in part, inadequacies in weather observations, communications, and the navaid system.

Table 9.—Comparison of Accidents by Detailed Cause/Factors Related to Certain Adverse Weather Conditions and Whiteout

	Alaska	United States (excluding Alaska)
Whiteout	19	0
Continued VFR into adverse weather	33	47
Initiated flight into adverse weather	9	12
Spatial disorientation	9	11
Became lost or disoriented	5	4
	75	74

There is general agreement that the current system of en route and terminal navigational aids serving the major hubs of Anchorage, Fairbanks, and Juneau and the regional hubs such as Bethel, Nome, Kotzebue, McGrath, and Ketchikan is satisfactory. However, partly because of the scarcity of navaids, flights between the regional hubs and the outlying villages operate almost completely on VFR flight plans and thus are severely limited by weather. Weather in many areas of Alaska is poor much of the time and often causes delays resulting in frustration on the part of operators, pilots, and passengers. Typical of this weather is constant rain, fog, or low clouds often found in southeast Alaska, Kodiak Island, and the Aleutian Peninsula or island chain; fog, low clouds, snow, or whiteouts in rural western Alaska; and the snow and whiteout conditions of the arctic region.

During the interviews in Alaska, the lack of navaids and inadequate weather reporting and inadequate communications of the weather information were repeatedly cited by operators and pilots flying in the more rural areas as being significant factors in weather-related accidents. The pilots in western Alaska stated that the installation of navaids would greatly enhance their ability to cope with the unanticipated low ceiling and poor visibility often encountered during whiteouts or when weather suddenly deteriorates. Also, navaids would reduce the number of accidents that occur when attempting, in marginal weather conditions, to fly into villages that are in desperate need of air service.

VFR flight in adverse weather is not uncommon in Alaska. Many operators stated that they did not want their VFR flights flown in adverse or even marginal weather, but, at times, the pressures of operating in rural areas did result in such operations. The risk of losing unrecoverable business often results in pressure on the operator or pilot to fly when good judgment dictates otherwise. Occasionally, poor decisions are made and unwarranted risks are taken. The accident involving the flight on a "pitch black night" into an unlighted dirt strip by a noninstrument-rated pilot after another operator had refused to make the flight is a glaring example of the pressures which many operators claim they have to face.

Another point made by many operators was that the lack of FAA inspectors permanently on site at the regional hub airports--FAA inspectors are permanently stationed only in Anchorage, Fairbanks, and Juneau--does little to discourage these unwarranted and often illegal flights. There is no one of authority available to discourage or stop those operators or pilots with a "bush mentality" from flying when others choose not to do so.

The interviews revealed that relations between the FAA General Aviation District Office and the air taxi operators and pilots involve considerable mutual distrust. The FAA appears to believe that the most serious safety problem is operator and pilot attitude, and the operators and pilots seem to feel that the FAA, rather than working with them to solve their problems, is "violation" oriented. Evidence of friction in this relationship was found in most areas of the State, but it was more pronounced in rural areas.

Although State and Federal officials placed greater emphasis on operator and pilot attitude and less on the physical infrastructure, they did agree that improvements in weather reporting and additional navaids were needed.

Another problem which the operators and pilots face is inadequate reporting of weather conditions. The problem is twofold and involves both inadequate official weather observations and inadequate communication of the observations. Many operators believe that the official weather reporting system set up by the NWS, using certified weather observers, has deteriorated over the years. Almost all agreed that some improvements are necessary and that a system based only on actual human observation of weather would be satisfactory. Remote automated weather observation stations were considered by the operators as being inadequate to satisfy the needs of air taxi pilots for timely observation of actual local conditions.

Communications of the weather observations are often poor. In villages where weather observations are taken by an NWS-certified observer, usually the only method to communicate this information from the village to the NWS and the flight service station (FSS) is by telephone. A significant problem can develop because there is generally only one telephone in the smaller villages and another villager may be using the telephone or it may not be functioning. Therefore, the weather observer in some cases is delayed or prevented from relaying the current weather to the NWS or the FSS.

To alleviate the communication problem and the lack of a certified weather observer in a particular village, many operators have set up their own weather observation and communications networks. These operators supply a high frequency (HF) radio with frequencies used in ground-to-ground communications to a villager who is paid to supply weather information to the operator. This villager not only provides unofficial weather reports to the operator but also supplies information on runway conditions. Operators have a HF radio at their home base and even have installed some in their aircraft. However, even this private system is not perfect. Communication equipment often malfunctions or the villager responsible for observing and communicating the weather is not available. Sometimes weather conditions and runway conditions are reported as being significantly better than they are.

The NWS and FSS facilities do not have HF radios with the same frequencies used in the operator network, so information from this operator network often does not get into the official FAA/NWS system. Further, the weather observers usually are not trained or certified by the NWS. Thus, the flights based on these weather data are often in violation of Federal Aviation Regulations. This system has been tolerated because of the lack of an alternative system.

According to the NWS, while the official NWS system needs to be improved, its observer network has not really deteriorated. The NWS argues that demands of the system have increased and its resources have not been increased accordingly. In support of its contention that the system has not deteriorated, the NWS pointed out that in January 1970, there were only 16 weather observation stations under NWS contract (contract stations) and 18 supplemental aviation weather reporting stations (SAWRS) in Alaska. By February 1980, there were 42 contract stations and 19 SAWRS. Further, in October 1974, there were only 1,500 contract weather observations per week in Alaska, and by February 1980, the number of observations per week had reached 3,427.

Following is a brief summary of an accident which occurred in Alaska in January 1978. It is typical of many air taxi accidents in Alaska involving adverse weather or whiteout conditions. A Britten-Norman BN-2A Islander on a nonscheduled air taxi/cargo flight departed Bethel on a VFR flight plan for Tanunak. Before departure the pilot received a weather briefing for the local area. No official weather reporting facility exists for Tanunak or Toksook Bay, and no weather information on these areas was available to the pilot at the time of departure because attempts to contact the destination village by radio failed. Bethel weather was 1,500 feet overcast, visibility 7 miles in light snow, and wind 220° at 17 knots. The station agent at Bethel received weather information on Tanunak about 20 minutes after the Islander departed. Tanunak weather was reported as 1,000-foot ceiling and overcast with 10- to 15-mile visibility. Two other aircraft departed Bethel for the same general destination area about the same time as the Islander, one probably slightly before and the other about 5 minutes after the Islander. A third aircraft departed Bethel for the same area about 2 hours later. The pilot of the first aircraft stated that Bethel weather was good at departure and that en route weather was generally good with ceiling and visibility variable, occasionally down to 500 feet and 1 mile, respectively, but that he maintained visual contact with the ground. The pilots of the second and third aircraft both reported that the weather en route deteriorated rapidly. The pilot of the second aircraft stated that VFR flight eventually became impossible and he landed his aircraft on a frozen lake and waited 30 minutes until weather conditions improved. The pilot of the third aircraft (2 hours later) encountered ceilings of 500 feet with visibility of less than 1 mile and whiteout conditions. He aborted his flight and returned to Bethel. The Islander aircraft wreckage was found several hours later that day in the area where the second flight landed to wait out the storm and near the area where the third flight was aborted.

The pilot of the Islander had a commercial pilot certificate, with single- and multiengine land and sea ratings and was instrument rated. He had a total of 1,783 flight hours--179 hours in the Islander, and 7 hours in the last 24 hours.

This accident illustrates a number of problems facing Alaskan air taxis, especially those operating in rural western Alaska. The attempt to contact the destination village for a report on weather conditions failed. Existing conditions provided no indication or forewarning of potential weather problems. Weather conditions en route deteriorated rapidly and severely; no navaids were available. These conditions, which are typical of rural Alaska, are certainly conducive to an accident.

CURRENT EFFORTS TO IMPROVE SAFETY

In the July 1979 update of its Ten Year Plan for Alaska, the Alaska Region office of the FAA recommended major improvements to the aviation infrastructure, including the navaid system, weather observation and reporting system, and the airport system. Most operators interviewed for this study believed the recommended improvements in navaids to be adequate for their needs but they were concerned about the long lead time in the implementation of the improvements to the system. In its Ten Year Plan, the FAA has proposed the installation of 10 TVORs (terminal-area VORs) and 17 NDBs. Funding has been committed for four TVORs and seven NDBs. The TVORs are attractive because approaches to several neighboring villages often can be made from one well-located TVOR. Obviously, the installation of the funded and the planned TVORs would be of significant benefit to the air taxi system.

Some air taxi operators have applied to the FAA for an exemption which will allow them to use the radar on board their aircraft to assist in making instrument approaches at lower minimums. During the interviews, the operators serving western Alaska repeatedly stated that they need navaids now and suggested that the existing beacon system that was installed and operated by Wien Air Alaska be reactivated immediately.

In June 1980, the State Legislature of Alaska enacted Chapter 50, containing the Fiscal Year 1981 Budget. Chapter 50, SLA 1980 contained appropriations of $51,357,600 for further development of the State aviation system. Amounts appropriated by development category are:

Airport lighting	$ 4,719,000
Navigational aids	2,775,000
Rural airport runway improvement	35.247,000
Southwest air transportation and facilities 21/	6,137,600
Airport weather reporting equipment	300,000
Airport terminal and storage buildings	1,950,000
Air-to-ground radios	199,000
Emergency medical supplies	30,000
	$ 51,357,600

This appropriation package is unprecedented for this or any other State. In comparison, Federal Airport Development Aid Program (ADAP) funding for general aviation in Alaska was less than $4 million for FY 1979.

21/ Includes runway improvement, runway lighting, navaids, weather reporting, airport terminal and storage buildings, air-to-ground radios, and emergency medical supplies for 22 villages in the southwestern part of the State.

Funding allocations for aviation in rural Alaska in Chapter 50, SLA 1980 were based on recommendations provided to the 1980 State legislature by Parker Associates of Anchorage, aviation transportation consultants to the State. These recommendations were the result of a 1979 study of the problems of air service to rural Alaska. 22/

Chapter 50, SLA 1980 incorporated a number of conditions on the use of the appropriated funds. For example, runways constructed with the funds must meet, where possible, the minimum State standard for runways of 3,000 feet in length by 100 feet in width. Another requirement is that runway lighting must have a power source that complies with a State DOT/PF design document. 23/ Perimeter lighting and marking systems must also meet certain requirements.

Among other conditions specified by Chapter 50, SLA 1980 there is a requirement under the appropriations for navaids that "Beacon installation plans shall be implemented immediately for those villages where Wien Air Alaska has agreed to turn over its existing frequencies and licenses to the State." Implementation of this requirement would be an immediate response to some of the needs and desires of the air taxi operators serving rural Alaska. Further, Chapter 50, SLA 1980 appropriates money for the installation of considerably more navaids than are proposed overall in the FAA Alaska Region's Ten Year Plan. Similarly, Chapter 50, SLA 1980 appropriates funds for establishing significantly more weather reporting stations than the NWS projected in the near future.

Chapter 50, SLA 1980 apparently appropriates sufficient funds to make a significant improvement in the airport and airway facilities serving Alaska's air taxi industry. In combination with the FAA Ten Year Plan, the improvements could have a substantial impact on the safety of Alaska's aviation system, depending on the application of the State funds and the implementation of the FAA Ten Year Plan.

An improvement in safety would require the development of a program for application of the funds based on a well-designed plan coordinated with the FAA, the NWS, and the users of the system. Further, implementation of even the best-designed program will produce the maximum safety benefits only if the managers, regulators, and users of the system do so with the proper attitude toward safety. The improved system must be maintained adequately by the State and the FAA, and the air taxi operators and pilots who use the system must improve their adherence to sound safety practices. Finally, the regulators of the system, primarily the FAA, must work together with the managers and users to enforce safe operation within the system.

Presently, the NWS and the FAA are working together in the area of weather observations. The NWS is recruiting and training 50 additional observers and the FAA is supplying the funds for equipment. This is an excellent example of an interagency cooperative effort that will help to alleviate the problem of inadequate weather observations. The Safety Board believes this type of effort should continue.

22/ "Air Service to Rural Alaska, A Study in Inadequacy," Parker Associates, October 20, 1979.
23/ "Feasibility Report and Design Guide for Remote Airport Lighting Systems," Alaska DOT/PF.

Although the experimental remote TV cameras for weather observation at Unalakleet and Valdez have not been completely successful, the concept merits further work. The FAA and the NWS are presently exploring the possibility of using "meteor burst" technology to relay weather observations to a central receiving antenna. It would then be automatically transmitted within seconds to all FAA and NWS teletype machines in Alaska and would eliminate many of the problems with current methods of disseminating weather observations. The exploration of these two new technologies is clearly worthwhile and should yield valuable results.

As one of its contributions to improving air safety in Alaska, the Alaska Air Carriers Association (AACA) has an ongoing safety program aimed at management, operations, and maintenance. Inspection teams are sent to various air taxi operators to point out areas where improvements are warranted. The AACA also holds a safety seminar at its annual conference.

SAFETY CONCERNS YET TO BE RESOLVED

Discussions with State DOT/PF personnel, with Federal officials, and with Mr. Walt Parker of Parker Associates suggested that the State of Alaska does not yet have in place an organization which is adequate to implement the apparent intent of the State legislature for application of the fiscal year 1981 funds appropriated for improvements in the aviation transportation system. The State DOT/PF has divided the planning and programming of its transportation system into three regions, which are responsible for all modes of transportation. While it appears that there are efforts to coordinate and work together, to the extent possible, in planning for the use of the funds and for developing a comprehensive program, there appears to be a lack of overall control of the process. No comprehensive program for an aviation system in Alaska was available from the DOT/PF when the Safety Board staff met with DOT/PF staff officials in Alaska. It is not clear that a complete, up-to-date inventory of airports in Alaska exists. Further, effective coordination between the DOT/PF and the State legislature in developing the appropriations bill seemed to be missing.

Recently, the FAA held hearings in several areas of rural Alaska to learn the needs of the users of the aviation system. Much of the information has been incorporated in FAA planning policy in Alaska, including the most recent update of the Ten Year Plan. While a dialogue exists between the FAA and the State DOT/PF, the degree of coordination among the State and Federal agencies (particularly the FAA and the NWS) does not appear to be sufficient to develop and implement an adequate aviation infrastructure.

An action plan for implementation of Chapter 50, SLA 1980 is being developed by the State DOT/PF. However, the time and resources available make it unlikely that this action plan will be an adequate substitute for the development of a comprehensive plan for the Alaskan aviation system. A central organization with complete and exclusive authority and responsibility for the aviation portion of transportation is needed in the Alaska DOT/PF. Coordination between the DOT/PF and the State legislature, the FAA, the NWS, and the user community is necessary to develop such a comprehensive program.

Inadequate maintenance of existing airfield facilities continues to be a problem. The State must determine how to improve the quality and reliability of its current runway maintenance. In addition, the State, in cooperation with the FAA, must develop and implement an effective maintenance program for newly installed navaids, weather reporting facilities, and communications facilities. Failure to do so could lead to a further degradation in safety rather than providing anticipated improvements in safety, because pilots and operators will come to depend on the newly installed facilities, and inadequte maintenance could result in accident-producing system errors.

Another problem which must be resolved is that of the attitude toward safety of some participants in the system. Elimination of the "bush syndrome" exhibited by pilots, operators, and passengers must accompany the improvements in airway and airfield facilities. This is perhaps the most important facet in terms of its potential contribution to safety, and is probably the most difficult area in which to achieve success. Further, the Safety Board recognizes that the "bush syndrome" is, in part, a manifestation of the deficiencies in the aviation system infrastructure (such as inadequate runways and insufficient aids to navigation and weather observation stations) and that the correction of these deficiencies would likely result in the elimination of a part of the "bush syndrome" problem.

Operators and pilots, especially those young pilots who are relatively new to Alaska, should be reminded continually of the hazards of flying in Alaska. They should also be reminded that the results of not respecting those hazards are accidents and violations of the Federal Aviation Regulations. The FAA must relate to the operators and pilots in an atmosphere of trust and respect. Operators must view the FAA not only as enforcers of the regulations but also as being helpful to them in accomplishing their mission of providing safe air service for Alaskans. Friction and antagonism between the FAA and the operators and pilots is often found in Alaska. This does not create an environment conducive to safety.

The permanent relocation of FAA principal operations and maintenance inspectors from the Anchorage, Fairbanks, and Juneau offices of the FAA to the regional hubs such as Bethel, Nome, McGrath, Ketchikan, and Kotzebue undoubtedly would be effective in reducing some of the unwarranted flying in adverse weather conditions and would relieve some of the pressure on the majority of operators who would prefer not to operate under such conditions. It may be difficult to find FAA inspectors who are willing to live in the conditions found in the rural areas. However, it is not an impossible task; FAA flight service station personnel are assigned to these areas now.

Federal and State officials must also develop programs to impress upon the village inhabitants, especially the youth, the importance of the air taxi service to them and the relevance of operating that service safely. They must be helped to understand the significance of the pressures that are often put on operators and pilots and the dangers associated with these pressures. They also must be helped to clearly understand the need to respect the airport facilities provided for them, including runway lights and communications equipment. This task will not be easy, but the Safety Board believes it to be absolutely necessary.

The NWS must reevaluate the usefulness of the automated weather observation stations for aviation purposes in Alaska. Operators and pilots believe this system to be inadequate and often misleading. It is apparent that the current

state-of-the-art of these systems is not sufficient to warrant the replacement of human observers.

CONCLUSIONS

1. The State of Alaska is heavily dependent on its air taxi industry to transport food, medicine, mail, and many other necessities of life to rural villages.

2. The nonfatal air taxi accident rate in Alaska is almost five times higher than the nonfatal air taxi accident rate in the rest of the United States, and the fatal air taxi accident rate in Alaska is more than double the fatal air taxi accident rate in the rest of the United States.

3. Air taxi flying in Alaska is unique because of a number of factors, such as, whiteouts, very rapid changes in weather, a scarcity of navaids that cause most air taxi operations to be made under visual flight rules (VFR), and the large number of off-airport takeoffs and landings in float-equipped and ski-equipped aircraft.

4. The three major factors which probably contribute most to the high air taxi accident rate in Alaska are: (1) the "bush syndrome," (2) inadequate airfield facilities and inadequate communications of airfield conditions, and (3) inadequate weather observations, inadequate communications of the weather information, and insufficient navigation aids.

5. The "bush syndrome" is an attitude on the part of air taxi operators, pilots, and passengers in Alaska that ranges from a casual acceptance of risks to a willingness to take unwarranted risks.

6. The State owns and operates most of the active airports in Alaska, and many of its runways are inadequately maintained.

7. The collection and dissemination of weather information and current runway condition information is hampered by a shortage of trained personnel and by an inadequate communications system in rural Alaska.

8. The State of Alaska has recently appropriated through Chapter 50, SLA 1980 substantial funds for the improvement of the State aviation system, including capital outlays for improvements of runways and for the installation of navaids, weather reporting equipment, and communications equipment.

9. A comprehensive State aviation system plan adequate to implement the intent of Chapter 50, SLA 1980 does not appear to exist. Further, centralized control over and authority for developing such a comprehensive aviation plan does not appear to exist within the State DOT/PF.

10. The relationship between the State's air taxi operators and the FAA appears to be strained. Furthermore, because of a lack of permanent FAA inspectors at the rural hubs, there is insufficient opportunity for the FAA to provide guidance to the air taxi operators.

11. Cooperation among the State of Alaska, the FAA, the NWS, and the air taxi operators must be increased if the State is to develop and implement an adequate aviation system plan.

RECOMMENDATIONS

Based on the results of this study, the National Transportation Safety Board recommended:

— to the State of Alaska:

Coordinate with the Federal Aviation Administration and the National Weather Service to facilitate the rapid implementation of the air transportation projects contained in Chapter 50, SLA 1980. (Class I, Urgent Action) (A-80-96)

Improve the level of maintenance of the runway facilities at the rural villages within the State airport system. (Class II, Priority Action) (A-80-97)

Centralize authority and responsibility for planning, operating, and maintaining the State's aviation facilities. (Class II, Priority Action) (A-80-98)

Develop, in cooperation with the Federal Aviation Administration and the system users, a comprehensive aviation system plan and a program for the implementation of the plan. (Class II, Priority Action) (A-80-99)

Establish, in cooperation with the Federal Aviation Administration and the air taxi operators, a program to impress upon the public, particularly those living in rural villages, the importance of respecting and properly maintaining airfield facilities. (Class II, Priority Action) (A-80-100)

-- to the Federal Aviation Administration:

Evaluate, in cooperation with the State of Alaska and the National Weather Service, the feasibility of equipping its flight service stations and the NWS-certified weather observers in rural villages with high-frequency transceivers that have the appropriate frequencies to facilitate the ground-to-ground communication of weather and runway conditions. (Class II, Priority Action) (A-80-101)

Locate and maintain permanently a Principal Operations Inspector and a Principal Maintenance Inspector at Nome, Bethel, Ketchikan, and at as many other regional hubs as possible. (Class II, Priority Action) (A-80-102)

Continue to develop, in cooperation with the National Weather Service, the concept of "meteor burst" technology for transmission of weather observations from rural villages to regional aviation hubs in Alaska. (Class II, Priority Action) (A-80-103)

Continue to develop and improve, in cooperation with the National Weather Service, the technology of the television weather observation system in Alaska. (Class II, Priority Action) (A-80-104)

-- to the Alaska Air Carriers Association:

Extend its safety program to reiterate the hazards of air taxi operations in Alaska and to overcome, in particular, the "bush pilot syndrome." (Class II, Priority Action) (A-80-105)

HB 722

HB 704

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
March 1, 1982
1:07 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Rogers
Rep. Randolph
Rep. Gardiner

Members Absent: No members absent.

COMMITTEE CALENDAR

HB 704 — An Act continuing the existence of the Real Estate Commission; and providing for an effective date.

HB 722 — An Act relating to landlord remedies.

WITNESS REGISTER

Representative Metcalfe
Alaska State Legislature
Pouch V
Juneau, Alaska 99811
465-4947
Position Statement: Prime sponsor of HB 722; explained bill.

Lance Youngquist, Chairman
Real Estate Commission
195 South Franklin
Juneau, Alaska 99801
586-1612
Position Statement: Offered suggestions for changes to HB 704.

PREVIOUS ACTION

HB 704 — No previous action.

Statutory Reference: AS 08.03.010(c)(18). After amendments during meeting, references also include AS 08.88.221; AS 08.88.401.

Action Taken: The committee adopted portions of a document entitled, "Proposed Statutory Changes in AS 08.88 Presented to the House Labor and Commerce Committee by the Alaska Real Estate Commission, March 1, 1982"; specifically:

Rep. Rogers moved, on page 1 of the proposed changes, referring to Sec. 08.88.241: to change statutory reference to read, "AS 08.88.221"; and after the word "FEES", to delete the remainder of the first line and insert "(a) The following fees shall be charged a", and to add, after the word "applicant" on the second line, the words "when applicable:", and to delete the third line; and to add fees to the subsections as follows: (1) $50; (2) $100; (3) $100; (4) $100; (5) $50; and to add a new subsection (b), which would correspond to subsection (d) of existing statutes.

Rep. Randolph moved to amend Rep. Rogers motion by deleting subsection (6). There being no objection, both motions passed.

Rep. Rogers moved to repeal and reenact AS 08.88.401, as set forth on pages 2 and 3 of the proposed changes, and add a new subsection (e). Motion passed without objection.

Rep. Rogers moved to incorporate the amendments into a draft committee substitute and bring the bill before the committee at the earliest possible time. Rep. Rogers amended his motion, on page 1, line 10 of HB 704, to delete "1984" and insert "1986". There being no objection, the motions passed.

HB 722

No previous action.

Statutory Reference: AS 34.03

Action Taken: Rep. Rogers moved to delete everything after page 1, line 27. He withdrew the motion.

Representatives Bylsma and Gardiner were appointed to a subcommittee. Rep. Rogers moved the bill be reported back to the committee only by unanimous vote of the subcommittee. There being no objection, the motion passed.

ACTION NARRATIVE

Tape #29
Recording

Number 000

The meeting was called to order by Chairman Martin at 1:07 p.m. Members present were: Representatives Martin, Bylsma, Randolph, and Rogers. Representative Gardiner arrived later in the meeting. Representative Metcalfe was attending to testify on HB 722.

Number 008

Rep. Metcalfe, prime sponsor of HB 722, went over changes the bill would make to the landlord/tenant act.

Number 064

Rep. Rogers said he was concerned about the section dealing with disturbances. Rep. Martin felt there were other remedies--police, etc. As Rep. Metcalfe had to leave the meeting, Rep. Martin said he would delay action until Rep. Metcalfe could return to give further testimony.

Number 095

HB 704 was brought before the committee. Lance Youngquist, Chairman of the Real Estate Commission, went over the commission's history and past dealings regarding sunset provisions. He told of the committee's activities: seminars, educational booklets, newsletter. He spoke of problems such as the surety fund and investigations (see Legislative Audit Report) and resolutions of problems. He gave a list of proposed statutory changes to the committee which he asked the committee to consider. He went over these proposed changes, section by section. There was discussion.

Number 174

Rep. Rogers said he was concerned about fees, and asked Youngquist for clarification. There was discussion of fees and status (active and inactive).

Number 454

Rep. Rogers moved, on page 1 of the proposed changes, referring to Sec. 08.88.241, to change the statutory reference to read, "AS 08.88.221"; and after the word "FEES", to delete the remainder of the first line and insert "(a) The following fees shall be charged a", and to add after the word "applicant" on the second line, the language "when applicable:", and to delete the third line; and to add fees to the subsections as follows: (1) $50; (2) $100; (3) $100; (4) $100; (5) $50; and to add a new subsection (b), which would correspond to subsection (d) of existing statutes. There was

discussion.

Number 556 — Rep. Randolph moved to amend the motion to delete subsection (6). There being no objection, both motions passed.

Number 575 — There was discussion of fees to charge for inactive licenses.

Number 727 — Rep. Rogers moved and asked unanimous consent to repeal and reenact AS 08.88.401, as set forth on pages 2 and 3 of the proposed changes, and to add a new subsection (e). The motion passed without objection.

Side B, Number 030 — Rep. Rogers moved to incorporate these changes into a draft committee substitute and bring the committee substitute before the committee at the earliest possible time. Rep. Rogers amended his motion, on page 1, line 10 of HB 704, to delete "1984" and insert "1986". There being no objection, the motions passed.

Number 079 — HB 722 was brought back to the committee's attention. Rep. Rogers moved, page 1, to delete everything after line 27 (including all of page two). There was discussion. Rep. Rogers withdrew the motion. He then suggested appointing a subcommittee. There was discussion of what to do with bills and problems of landlords/tenants.

Representatives Bylsma and Gardiner were appointed to a subcommittee to consider the bill. Rep. Rogers moved the bill be reported back to the committee only by unanimous vote of the subcommittee. There being no objection, the motion passed.

Number 150 — Rep. Rogers reported on progress on HB 159 and the fiscal note. He said the bill would be back to the committee early the next week.

Number 165 — There was discussion of HB 641 and HB 642. No action was taken.

Number 187 — There being no further business to come before the committee, the meeting was adjourned at 2:08 p.m.

3/1

Amendments to HB 704

Please incorporate the following amendments into a draft committee substitute for HB 704.

Amendment #1:
Line 10--Change "1984" to "1986".

Additions to bill:

See attached document which was entitled "Proposed Statutory Changes in AS 08.88 presented...by the Alaska Real Estate Commission".

Sections to be incorporated, with changes noted, are marked by yellow highlighter running along the margin. Please note one change which may be confusing; that is, p. 1, last change says to add sub (b) which is the same as old sub (d). This is referring to present AS 08.88.221(d), which will now become AS 08.88.221(b).

If you have any questions, please contact me at 465-3657. You may prepare this as a draft committee substitute, as there may be other changes.

Joan Mathews
Committee Secretary

HOUSE LABOR & COMMERCE COMMITTEE

HEARING DATE: 3/1/82

Absent:

1:07 3/1/82

Metcalfe present

000 Call to order

HB 722 — Intro to bill

008 Metcalfe, prime sponsor - minor amdmts to landlord/tenant act. went over changes & examples of situations bill would remedy.

064 Rogers - concerned abt section dealing w/disturbances - what is unreasonable; ~~he~~ concerned that 1/2 the neighbors in a duplex is just one person.

Metcalfe said he had no objection to ~~per~~ excluding landlord from this.

Martin felt there were other remedies - police, etc.

Metcalfe said this does not cover recovery of property.

Chmn said he wd delay action until Rep. Metcalfe ed return to give further testimony. (Metcalfe had to leave for another mtg)

075
HB 704 Lance Youngquist, Chmn, Real Estate Commission went over his commission's history & past dealings re sunset provisions. Told of the commission's activities - seminars, educational booklets, newsletter. Spoke of problems - surety fund & investigations (see Legislative Audit Report) - & resolutions of problems. Requested statutory changs (see handout given to committee)

.091 - want authority to charge printing costs of manuals, etc

.101 - wd like to set by regn when renewals occur; having problems w/Dec. renewals, prefer 1/31

.201 - clarification

.221 - want to set fees by regn.

174 Rogers requested clarification of who wd set fees - Occ'l Licensing or Commission.

~~Discussion~~ Youngquist explained reason

.251 – chng inactive status to 2 yrs – same as lapsed license

.361 – add "or fee" because many use fees rather than commission

.401 – clarification

.401(b) – clarification

.401(c) – "

(d) – gives authority to issue stop orders

211 Rogers – concerned alt fees issue; asked Youngquist which fees he wants chngd

Y – renewal fees for active & inactive both $100

244 Randolph said cost is same, but svc recd isn't same.

Discussion.

243 Y – want salesmen & brokers both to pay $100 ~~rather than fix~~

Rand suggested reducing brokers to $50 (same as salesmen) rather than raising salesmen

Y said they wanted to increase their funds.

Discussion.

275 Rogers – under (d) – there are other sections of that section which ~~they~~ refer to fees of testing svcs – requested clarification of wherein. This wd be repealed.

Y – explained procedure

Rogers said keeping this procedure in wd require amdmt. [221(c)]

320 Martin gotmd fees

Y explained statuses of licensed – lapsed, inactive

feel both shd have same re-testing reqmts (2 yrs for both)

341 Martin asked how many of the 4,000 licenses are inactive

Y thought abt 1,000.

Discussion.

359 Bylsma – 88.251 – asked what inactive person wd pay to become active; Y said only fee wd be $5 for changing license.

373 Martin felt this wd encourage everyone to remain active

Y said this is not so – liability is a factor, didn't think money was important consideration

Discussion. Y said broker had to hire them before they cd go active.

400 Rogers asked for clarification of deletion of .261; Y said shd have been done 1980; housekeeping.

409 Rogers noted conflict w/new sec (8-) 40:. (d); said

(435?) we shd repeal & reenact all of .401. Shd add new (e): a person who violates any prov of this act or art 16 of this Chapter is guilty of a Class A (?) misdemeanor

454 Rogers – p.1 shd read AS 08.88.221 [241]

Fees – after FEES – delete word

(a) The following fee shall be chgd a-

after applicant

add (b), which wd be old (d)

520 Discussion of what to chg for amending or xfring license, or whether to chg anything.

Rand moved to amend mo to delete (6); Rogers asked unan
556 consent; no objection; passed

575 Discussion of fees to chg for inactive license.

636 Martin - re "30 days before renewal" language - said this had come up before, was found to be cumbersome & complicated. Y said intent is to move renewal date to 1/31 for everyone; no plans to stagger.

678 Bylsma - asked clarification of licensing dates & methods of determining status

727 Rogers - re .401 - moved & asked unan consent to repeal & reenact .401 (as set out) adding new (e)
side B motion passed w/o objection

005 Martin requested further clarification of activ/inactiv status.

030 Rogers moved to inc these chgs into a draft CS & bring bill before committee at ~~earliest~~ earliest possible time.

036 Rogers moved p. 1, ln 10, (of bill) delete 1984, insert 1986. No obj, mo passed.

048 Barry requested clarification - wondered if legis. audit findings cd be inc'd into report to (spkr?); Rogers said there is problem w/that.

069 Rogers asked unan consent; no obj; mo passed to have CS drafted to be brought before comm at later date.

079 HB 722

Rogers - landlord/tenant act is to provide balance - not sure bill does this.

p. 1, ln 28, delete sec. .227 (bottom p. 1, all of p. 2)

095 Gardiner commented on unresolvable bills.

100 Rogers w/drew motion. Suggested appointing subcommittee. Discussion of what to do w/bills & of problems of landlords/tenants.

~~HB Bycoma Disc~~

Gardiner & Bycoma were appointed to subcom.

Rogers moved bill be reported back to comm only by unan vote of subcomm; no obj.

150 Rogers reported on HB 159 & fiscal note; said bill would be back to committee Tues or Wed.

165 Discussion of HB 641(?) & 642. No action taken.

PROPOSED STATUTORY CHANGES IN AS 08.88 PRESENTED TO HOUSE LABOR AND COMMERCE COMMITTEE BY THE ALASKA REAL ESTATE COMMISSION, MARCH 1, 1982:

* Sec. 08.88.091 is amended by adding a new paragraph to read:

(3) The commission may make available to the public manuals, texts or other materials prepared with funds from the surety fund. When these materials are made available the commission may make a reasonable charge for them designed to recover the actual costs of the item provided. Funds collected under this section shall be paid at least once a month into the general fund. These payments shall be credited to the real estate surety fund.

* Sec. 08.88.101 (11) is repealed and reenacted to read:

(11) print and distribute duplicate license certificates to replace lost certificates;

* Sec. 08.88.101 (12) is amended to read:

(12) send notice 30 days before (, BEFORE DECEMBER 1 OF EACH YEAR,) the date that licenses must be renewed;

* Sec. 08.88.201 is repealed and reenacted to read:

08.88.201. REEXAMINATION. A person who fails an examination may apply for a subsequent examination, but shall pay the examination fee each time he applies.

AS 221
* ~~Sec.~~ 08.88.~~241~~ is repealed and reenacted to read:

08.88.221. FEES. (a) the following fees shall be charged ~~Fees for the following categories for~~ a real estate broker, associate broker, or salesman licensee or applicant when applicable: ~~are established by regulations adopted under AS 08.01.065:~~

(1) examination; $50
(2) reciprocity; $100
(3) initial license; $100
(4) renewal of an active license; $100
(5) renewal of an inactive license; $50
~~(6) amending or transferring a license;~~ 25

(b) — old subsection (d)

(b) pymt of fees or commissions: does this cover gov citizen? If so, is this a knowing violation (~~does gov~~ ~~knowingly~~ is person guilty of misdemeanor if he doesn't know whether broker is licensed or not?)

Diane Colvin
2450

* Sec. 08.88.251 is amended to read:

(c) A person who is inactive may become active by applying for an active license and paying the required fees. In the application form he shall state the date on which he intends to become active. His active status begins on the date stated. The commission shall send him a license certificate. A person is entitled to change from an inactive to an active status without examination if he has not been inactive more than two (THREE) years. If he has been inactive more than two (THREE) years, he is required to take an examination.

* Sec. 08.88.261 is repealed:

* Sec. 08.88.361 is amended to read:

Sec. 08.88.361. WHEN COMMISSION IS EARNED. A commission or fee is earned when the real estate broker fulfills the terms of a written personal services contract.

AS 08.88.401 is repealed + reenacted to read

* ~~Sec.~~ AS 08.88.401 ~~(a) is repealed and reenacted to read:~~

Sec. 08.88.401 (a) a licensee may not in any way represent that he holds or has been awarded any degree or designation to which he is not entitled nor may he represent himself as being a member or affiliate of any professional organization to which he does not belong.

* ~~Sec. 08.88.401 (b) is repealed and reenacted to read:~~

~~Sec. 08.88.401~~ (b) commissions or fees for performance of acts specified in Section 161 of this chapter may be paid only to a licensed Alaska real estate broker except when a real estate broker properly licensed in another state assists an Alaskan real estate broker, the out-of-state broker's commission or portion of the commission may be paid directly to the out-of-state broker by the seller or escrow holder. Commissions or portions of commissions paid to a licensed real estate salesman must be paid by the broker or under the authorization of the broker with whom the real estate salesman is licensed.

* ~~Sec. 08.88.401 (c) is amended to read:~~

(c) knowlingly make, authorize, direct or aid in the publication of a false statement or misrepresentation concerning land or a subdivision of other real estate offered for sale or lease;

~~* Sec. 08.88.401 is amended by adding a new paragraph to read:~~

(d) The commission or its executive director may issue a stop order to any person or firm who is or appears to be about to pay a commission or fee for acts specified in Section 161 of this chapter to a person who is not a licensed real estate broker in another state authorized to receive commissions under part (b) of this section.

covered by sec. 037

(e) a person who violates any provision of this section or Section 161 of this chapter is guilty of a Class A misdemeanor.

PROPOSED STATUTORY CHANGES IN AS 08.88 PRESENTED TO THE HOUSE LABOR AND COMMERCE COMMITTEE BY THE ALASKA REAL ESTATE COMMISSION, MARCH 1, 1982:

* ~~Sec.~~ AS. 08.88.091 is amended by adding a new paragraph to read:

(3) The commission may make available to the public manuals, texts or other materials prepared with funds from the surety fund. When these materials are made available the commission may make a reasonable charge for them designed to recover the actual costs of the item provided. Funds collected under this section shall be paid at least once a month into the general fund. These payments shall be credited to the real estate surety fund.

* ~~Sec.~~ AS. 08.88.101 (11) is repealed and reenacted to read:

(11) print and distribute duplicate license certificates to replace lost certificates;

* ~~Sec.~~ AS. 08.88.101 (12) is amended to read:

(12) send notice 30 days before (, BEFORE DECEMBER 1 OF EACH YEAR,) the date that licenses must be renewed;

* ~~Sec.~~ AS. 08.88.201 is repealed and reenacted to read:

08.88.201. REEXAMINATION. A person who fails an examination may apply for a subsequent examination, but shall pay the examination fee each time he applies.

* ~~Sec.~~ AS 08.88.221 is repealed and reenacted to read:

08.88.221. FEES. ~~Fees for the following categories for a~~ (a) The following fees shall be charged a real estate broker, associate broker, or salesman licensee or applicant ~~are established by regulations adopted under AS 08.01.065:~~ when applicable

(1) examination; 50

(2) reciprocity; ~~50~~ 100

(3) initial license; 100

(4) renewal of an active license; 100

(5) renewal of an inactive license; ~~50~~ 50

~~(6) application for transfer from a license~~

(b) — old (d)

* ~~Sec.~~ AS 08.88.251 is amended to read:

(c) A person who is inactive may become active by applying for an active license and paying the required fees. In the application form he shall state the date on which he intends to become active. His active status begins on the date stated. The commission shall send him a license certificate. A person is entitled to change from an inactive to an active status without examination if he has not been inactive more than two (THREE) years. If he has been inactive more than two (THREE) years, he is required to take an examination.

* ~~Sec.~~ AS 08.88.261 is repealed.

* ~~Sec.~~ AS 08.88.361 is amended to read:

Sec. 08.88.361. WHEN COMMISSION IS EARNED. A commission or fee is earned when the real estate broker fulfills the terms of a written personal services contract.

* ~~Sec.~~ AS 08.88.401 ~~(a) is repealed and reenacted to read:~~

Sec. 08.88.401 (a) a licensee may not in any way represent that he holds or has been awarded any degree or designation to which he is not entitled nor may he represent himself as being a member or affiliate of any professional organization to which he does not belong.

~~* Sec. 08.88.401 (b) is repealed and reenacted to read:~~

~~Sec. 08.88.401~~ (b) Commissions or fees for performance of acts specified in Section 161 of this chapter may be paid only to a licensed Alaska real estate broker except when a real estate broker properly licensed in another state assists an Alaskan real estate broker, the out-of-state broker's commission or portion of the commission may be paid directly to the out-of-state broker by the seller or escrow holder. FOR IMMEDIATE RELEASE

REGULATION OF CONTRACTORS SUBJECT OF TELECONFERENCE

The House Labor & Commerce Committee has scheduled a statewide teleconference hearing of HB 832 on Tuesday, March 23, at 1:00 pm PST (Juneau time).

House Bill 832 addresses problems that some consumers have had in their dealings with home contractors and specialty home contractors, as well as concerns of legitimate contractors that a small minority of contractors are giving the entire industry a bad name. The bill was originally requested by the Consumer Protection Agency.

The bill would expand registration requirements of general home or specialty home contractors to include construction experience and business history. This information would be available for public inspection.

The bill would also create a home construction surety account. A person who has a complaint against a home contractor for loss of money, personal property, or real property could file a claim for loss against this fund.

Claims could be made for loss resulting from misrepresentation; nonpayment to materialmen, subcontractors, or laborers; defective

--more--

materials, or negligent workmanship, among other things.

Terry Martin, chairman of the House Labor & Commerce Committee, said the teleconference hearing had been scheduled after several groups and individuals had indicated they wished to give additional testimony.

"We're hearing a lot of horror stories about problems consumers have had with builders," Martin said. "Many builders, as well, are concerned that a few bad contractors might undermine the reputations of all builders. We hope this bill will resolve some of those problems."

Persons interested in testifying should contact the House Labor & Commerce Committee in Juneau, or call their local Legislative Information Office.

3/2/82

HB 595
HB 832
HB 159

1:08

000 Call to order. Gave brief intro to both bills

004 Rogers added that HB159 is also ready to pass fm committee;
Rogers moved to adopt CS HB 159 & report bill out of comm.; w/drew
HB 595 ~~595~~ to wait till end of mtg when comm can rw bill.

018 Martin moved not to continue WB; send ltr to spks & gov
(listen to tape) necessary corres be xmtd to approp people.
Rogers objected; trying to get more info before taking action.
Discussion; Martin noted that all corres. wd be forwarded
with bill when reported fm committee.
Vote: for Randolph Bycoma Martin Opposed - Rogers
Mo passed.

HB 832
053 Martin asked Barry for overview.

056 Barry - bill is technically deregulation.
first act says contractors will register; says what type work
they will be in business to perform.
also ~~gives~~ registers. officers of company as public
Sets forth surety fund ~~for~~ so people have redress for damages;
& establishes mechanism making of responsible for taking
approp. action.

093 Terry Dale - Reg Reform Pgm, Ofc of Special Projects, Gov —
identified problem areas bet contractors & cud's;
went over past attempts to rectify problems, & ~~status~~ progress
to date, & what they had planned at time bill
was int'd. Think bill is in right direction, but may
have problems.

130 Rogers asked if his ofc helped draft bill; Dale said partly. Discussion of some sections of bill Rogers foresees difficulties with.

155 Connie Sikes, Asst AG, Consumer Protection - have handled cases such as those addressed in bill. Went over examples. Drafted bill for gov's consideration, but took it out in Dec. Spoke with people affected, got suggestions. Concern about surety fund - gave examples. ~~Most~~ Some (Anc) builders, supported testing concept, some even on statewide basis, rather than surety fund. ~~Dept~~

203 Dept of Revenue had gotten re surety fund; said this well, Dept Rev, shd speak to that.

230 Feels bill is step in right direction, but might need further work, more input. Supports ideas of bill, especially public information portions. Industry feels there shd be more involvement of lending instns, perhaps AHFC — they have interest in seeing homes are well-built. Feel, except on owner-built home, certification of licensing, bonding, etc, shd be done by [illegible].

1) certificates of occupancy
2) proof of licensure of contractor/subcontractor
3) certn by contractor that home is built to code

280 Rogers - concerned abt bill, but more concerned abt alternatives suggested. Next to impossible to devise state-wide rules dealing w/homes that take into account regional building differences. A test might make sense in larger cities, but local govts shd do that. Gave examples of other problems.

300 ~~Discussion~~ Response by Sikes - clarified what surety fund wd cover. Discussion of surety fund, & funding of fund. Rogers suggested setting fund up similar to medical malpractice (?) fund.

360 Gardiner asked how this wd affect owner-built homes. Sikes felt it shd not directly affect them. Saw possible abuse if owner built home every summer & sold it every winter. Discussion of possible situs.

395 Rogers concerned that defn of contractor means building more than one house per yr. Gave example of situs.
Martin asked abt some kind of bond to be posted at time of sale. Talked about options.

457 Joe Guthrie - had difficulties w/contractor last yr. ~~Commit~~ Think bill is excellent; will help people solve serious problems. Need regulation. Problem probably can't be remedied by testing; product of bad faith, poor negligence, cutting corners, misrepresentation, extortion, etc.

500 Referred to sections dealing w/ ~~public~~ customer evaluations - p. 2, l 14-15 shd have stmt that customer complaints & evaluations shd be kept in file; shd not be limited to incidents arising after date of act; shd apply to previous experiences as well.

571 re p. 4, l. 17 re liens - feels ~~that [illegible] home const~~ contractors & those wkg ~~for contractors~~ (materialmen, subcontractors & laborers) ~~shd~~ not be allowed to file mechanics liens - ~~failure~~ of contractors to pay is one I had problems w/ owner paying for liens filed by materialmen, subcontractors, & laborers. Owner has no control over contractor paying them.

640 p. 7, l 4-7, re contractor not required to furnish waiver until dispute is settled; one is unable to get permanent financing w/ mechanics lien efects against home. Contractors use this to force pymt; ~~[illegible]~~ used as extortion.

704 p. 7, l. 22 re estimated date of completion - this shd be a definite date.

p. 8, l. 2 - there shd be some kind of agmt between parties re wk chngs necessary

Side B
005 p. 9, 9-15 - doesn't solve problem where dispute concerns quality of work.

083 Gardiner - wants assessment of how widespread these problems are. Guthrie said Sikes might have more info; thought area worthy of study. Discussion.

086 Rogers asked abt good contractors independently assessing themselves $1,000 & advertising. Builders wd keep bad apples out; self-regulating. Wd eliminate need for laws. Guthrie felt that was ~~[illegible]~~ best solution.

124 Martin said he'd like to set up telecony w/Ariz & Flx & allow addl time for public input.

138 Paul Troch — p. 3, Sec. 5 (2) — all for requiring WC ins for contractors; however, discreet problem — can't get comp ins unless you have an employee. One can be a contractor & have no emp's at all. Rogers asked if this cd be corrected by chng "as" to "if".

186 Jim Mc Conegy — Pres, Jnr Homebuilders Assoc — (spoke fm prepared testimony ✓; first spoke to comm. qstns) — Almost never have satisfied customer because of misplaced expectations & human nature.

216 (fm sheet:) Said most builders only make 4-5% profit. HB 833 attempts to control crooks in homebuilding industry. Local homebuilders want this, too. High % of local builders participate in national educational pgms. Don't get much assistance fm banks, govt entities.

1) new classes of gen & specialty contractors unnecessary & undesirable.

2) listing supervisory employees not sensible; chng freqly & have no interest

3) p. 2, l. 16 — oppose

4) new fee schedule shd apply to all classes of contractor

5) 08.18.002 (p. 3, l. 15) — commented

6) p. 8, l. 16 — compared to maintaining similar types of records for politicians in effort to show that this wd be unfair to builder.

322 Requested committee not pass bill.

329 Discussion of [redacted]
builder's problems & consumers complaints.

410 Rogers asked if Homebuilders assn wd consider coordinating
statewide w/other assns to self-insure & try to keep
out undesireable types.
———— felt they wd, & spoke of past attempts to do such
things. Rogers felt that wd eliminate need for surety
fund in legislation. Discussion re. ———— wasn't sure
how that wd work w/o ins backing them.

496 Martin said again they'd set up telecon
Rogers suggested homebuilders meet w/AG to discuss
possibility of setting up self-insured type of pgm.
———— asked we contact him.

H3159
525 Rogers moved to adopt & report out CSHB 157 L&C
w/ FN adopted - $32,000 GF and $450,000 2d Inj' Fnd
No obj; Asm — passed unanimously.

House Bill No. 595 832 159 _____ _____

Senate Bill No. _____ _____ _____ _____ _____

Special Orders:

MR. CHAIRMAN,
Members of the Committee;

One of the few things that I remember from my college education is that you should always proceed from the known to the unknown. With that in mind I am going to make a few statements that may, at first glance, appear to be unrelated to the matter before this group, but please bear with me and I will try to reach the main point quickly.

There are many things that <u>everyone</u> knows. For example:

1. Everyone knows that all Puerto Ricans and Cubans are dope smugglers.
2. Everyone knows that all teenagers are no good rebels that should either be drafted or placed in reform school.
3. Everyone knows that all bureaucrats are drones and parasites.
4. There is a growing concensus that all politicians are "on the take".
5. And certainly everyone knows that all homebuilders are not only incompetent but are outright cheats and frauds.

After all the current Reader's Digest states on page 81, (<u>Building Your Own Home Makes Sense</u>), "But even those who just act as contractors and finish the insides of their homes can save from 30 percent to 45 percent of what a developer built home would cost."

Let me digress a moment. The real truth revealed in a nation wide study is that less than 10% of all builders are able to exceed a 10% profit margin. The vast majority are in the 4 to 5 percent profit margin. One well known local real estate agent told me that he was not in the side line of building homes because, "it would be stupid to invest that much money for a 3 month period then have to stand behind the product for at least 1 year for no more than a real estate commission." Now I will return to my theme.

House Bill No. 832, before you today, is an effort to control all of the crooks in the home building business. I assure you that the local Homebuilders Association as well as the State and National groups are in sympathy with that objective over the last 4 or 5 years. We have consistently urged enforcement of the existing

regulations
~~legislation~~ because we believe that the out-of-state fly-by-night builder is not good for the local business man; he is not good for the consumer; and he is not good for the state. Generally he does not even buy a vehicle license, but takes all wages and profits back outside with him while leaving everyone else with the problems. Beyond our opposition to the unlicensed builders we have continously striven for adherence to a strict code of ethics and business practice among the licensed contractors. A very high percentage of our local builder members partici pate in the nationwide education programs.

To date our pleading has met with very little response. The City and Borough flatly refuses to even ask for the contractors license number on a building permit application. The banks have been no help whatsoever. The Juneau office of the Department of Occupational Licensing does not have adequate staff; occasionally when inspectors are brought in from Anchorage, they do nothing but check on contractors that are already licensed. Therefore, we are glad to see some thought being given to our problems.

In making a few specific comments on HB832 I would observe the following;

a.) The new classifications of "general home contractor" and "specialty home contractor" are not necessary because the current classifications are adequate, The new classifications, are not desirable because of the vast amount of paper work and staff required to establish and maintain the distinction. There is probably an organization chart already in existence that shows a Director and Assistant Director of the Division of Home Contracting.

b.) The listing of "supervisory employees" to obtain the construction experience and history of the applicant make no sense to me as these people change constantly and have no financial stake in the business apart from their day to day jobs.

c.) Line 16 of page 2 indicates that the applicants file will be more of a matter of public record and open to more public inspection than is normal for such information.

d.) If the new fee schedule is valid for General Contractors because of increased cost of administration it should be valid for all classifications. Again, I do not believe that the new classifications are justified.

e.) It would be easy to discuss the proposed Section 08. 18. 102 for at least an hour, but I will limit myself to 3 comments:

1. There is no protection given the consumer that he does not already have under existing contract law. The new feature is that he does not have to use due process of law to prove damages, and collect money
2. In view of the over all intent of the legislation, I suppose we should be thankful for the nice after thought at line 17 on page 5 where the contractor shall be given an opportunity to present evidence in opposition to the claim.
3. May I rephrase the requirements of paragraph 6 on page 8 in terms that you might identify with more closely?

SECTION 08, 18, 107 REQUIRED PRACTICES FOR STATE LEGISLATORS

6) provide to a prospective voter a brochure which the opposition party shall prepare providing the following information:

(A) a statement that the candidicacy of the politician is not an endorsement or an evaluation of that candidates qualifications.

(B) an evaluation form (to be filled out after 2 years).

(C) the address and phone number of at least two party offices where all voter opinions, complaints and accusations regarding the candidate are maintained and routinely circulated to the press.

(D) an explanation of complaint procedures, including instructions on how to tap the political surety account established by AS 08. 18. 102.

Ladies and gentlemen, the point is this: If you watched the McNeil Lehrer Report last night you must realize that the American Home Builder is currently an endangered species ———— please do not put a $20,000 bounty on his hide.

It has often been said that it is impossible to make a silk purse out of a sow's ear. Likewise, it is impossible to make House Bill No. 832 into legislation that is acceptable to the Home Builders Association. We respectfully request a strong "do not pass" endorsement from this committee. Thank you.

Bill No. House Bill 832

Date March 2, 1982

Title "An Act Relating to the Regulation of Contractors; and providing for an effective date."

Contact: Judy Knight 465-2700

The Department of Labor supports the proposed addition to AS 08.18.101, which would require contractors to provide evidence of Workers' Compensation insurance coverage before a certificate of registration is issued. While there are triggers in the Workers' Compensation Act to provide for the department to be notified when an employer cancels or fails to renew his Workers' Compensation insurance coverage, historically it has been difficult to identify those employers who do not initially secure the required insurance. The provision proposed in House Bill 832 in this regard will assist the department in identifying uninsured employers and in enforcing the provisions of AS 23.30.045.

The department also supports the concept of a single agency assuming responsibility for both contractor licensing and enforcement functions. The existing separation of these functions is confusing to the public and creates a variety of administrative barriers which hamper effective enforcement of the licensing requirements. A lack of funding has prevented the department from developing an enforcement plan for contractor's licensing; however, the department's inspectors and investigators do enforce contractor licensing in connection with other inspections or investigations.

POSITION PAPER/Department of Labor

CENTRALIZED LICENSING ACT, AS 08.01

MISCELLANEOUS PROVISIONS, AS 08.02

TERMINATION, CONTINUATION AND REESTABLISHMENT

(13) Board of Veterinary Examiners;
(14) Board of Psychologist and Psychological Associate Examiners;
(15) Collection Agency Board;
(16) Board of Welding Examiners;
(17) Board of Marine Pilots;
(18) Board of Dispensing Opticians;
(19) Guide Licensing and Control Board;
(20) State Physical Therapy Board. (Sec 1 ch 59 SLA 1966; am Sec 2 ch 136 SLA 1967; am Sec 2 ch 101 SLA 1968; am Sec 6 ch 143 SLA 1968; am Sec 2 ch 151 SLA 1968; am Sec 1 ch 106 SLA 1970; am Sec 6 ch 32 SLA 1971; am Sec 4 ch 179 SLA 1972; am Sec 2 ch 45 SLA 1973; am Sec 14 ch 65 SLA 1973; am Sec 1 ch 43 SLA 1975; am Sec 1 ch 43 SLA 1977; am ch 159 SLA 1980)

Effect of amendments.—The first 1973 amendment added paragraph (18).
The second 1973 amendment inserted "and Psychological Associate" in paragraph (14).
The 1975 amendment added paragraph (19).
The 1977 amendment added paragraph (20).
The 1980 amendment created the Board of Barbers and Hairdressers.

Sec. 08.01.020. Board organization. Unless otherwise provided, all board members are appointed by the governor and serve at his pleasure. Unless otherwise provided, the governor shall designate the chairman of the board, and all other officers shall be elected by the board members. (Sec 1 ch 59 SLA 1966)

Sec. 08.01.025. Public members. No public member of a board may:

(1) be engaged in the occupation which the board regulates;

(2) be associated by legal contract with a member of the occupation which the board regulates except as a consumer of the services provided by a practitioner of the occupation; or

(3) have a direct financial interest in the occupation which the board regulates. (Sec 1 ch 258 SLA 1976)

Sec. 08.01.030. Quorum. A majority of the membership of a board constitutes a quorum unless otherwise provided. (Sec 1 ch 59 SLA 1966)

Sec. 08.01.040. Transportation and per diem. A board member is entitled to transportation expenses and per diem as set out in AS 39.20.180. (Sec 1 ch 59 SLA 1966)

Sec. 08.01.050. Administrative duties of department. (a) The department shall provide the following administrative and budgetary services when appropriate:

(1) collect fees and issue receipts;

(2) maintain records and files;

(3) issue and receive application forms;

(4) notify applicants of acceptance or rejection of applicants as determined by the board;

(5) designate dates examinations are to be held and notify applicants;

(6) public notice of examination;

(7) arrange space for holding examinations;

(8) notify applicants of results of examinations;

(9) issue licenses and certificates or temporary licenses or certificates as authorized by the board;

(10) except as otherwise provided in this title, issue duplicate licenses or certificates upon proof by the licensee of loss of the original and payment by the licensee of a fee of $2;

(11) notify licensees of renewal dates at least 30 days before the expiration date of their licenses;

(12) compile and maintain current a register of licenses;

(13) answer routine inquiries;

(14) maintain files relating to individual licensees;

(15) arrange for printing and advertising;

(16) purchase supplies;

(17) employ secretarial help when needed;

(18) perform other services which may be requested by the board;

(19) provide investigative services to the boards established under (AS 08.13) AS 08.20, AS 08.36, AS 08.64, AS 08.68, AS 08.71, AS 08.72, AS 08.80, AS 08.84, and AS 08.86, for the purpose of assisting those boards in matters of professional discipline.

(b) The form and content of a license, authorized by a board listed in Sec. 10 of this chapter, including any document evidencing renewal of a license, shall be determined by the department after consultation with and consideration of the views of the board concerned. (Sec 1 ch 59 SLA 1966; am Sec 1 ch 102 SLA 1976; am Sec 39 ch 218 SLA 1976; am Sec 2 ch 258 SLA 1976; am ch 49 SLA 1980)

Sec. 08.01.060. Application for license. All applications for examination or licensing to engage in the business or profession covered by this chapter shall be made in writing to the department. (Sec 1 ch 59 SLA 1966)

Sec. 08.01.070. Administrative duties of boards. Each board shall perform the following duties in addition to those provided in its respective law.

(1) keep minutes and records of all proceedings;

(2) hold a minimum of one meeting each year;

(3) hold at least one examination each year;

(4) request, through the department, investigation of violations of its laws and regulations;

(5) prepare and grade examinations;

(6) pass on qualifications of applicants for examination and license;

(7) forward minutes of meetings to the department within 20 days;

(8) forward results of examinations to the department;

(9) notify the department of meeting dates at least 15 days before meeting. (Sec 1 ch 59 SLA 1966)

Sec. 08.01.080. Department regulations. The department shall adopt regulations to carry out the purposes of this chapter including but not limited to describing

(1) how an examination is to be conducted;

(2) what is contained in application forms;

(3) how a person applies for an examination or license. (Sec 1 ch 59 SLA 1966)

Sec. 08.01.087. Powers and duties of department. (a) The department may, upon its own motion, conduct investigations to determine whether any person has violated a provision of this chapter or a regulation adopted under it or a provision of a charter in this title dealing with one of the boards listed in Sec. 10 of this chapter or a regulation adopted by one of those boards, or to secure information useful in the administration of this chapter.

(b) If it appears to the commissioner that a person has engaged in or is about to engage in an act or practice in violation of a provision of this chapter or a regulation adopted under it, or any of the laws pertaining to or regulations adopted by the boards listed in Sec. 10 of this chapter, he may, if he considers it in the public interest, and after notification to all board members by telephone or telegraph of a proposed order or action unless a majority of the members of the board object within 10 days;

(1) issue an order directing the person to stop the act or practice; however, reasonable notice of and an opportunity for a hearing must first be given to the person, except that the commissioner may issue a temporary order before a hearing is held; a temporary order remains in effect until a final order affirming modifying, or reversing the temporary order is issued or until 15 days after the person receives the notice and has not requested a hearing by that time; a temporary order becomes final if the person to whom the notice is addressed does not request a hearing within 15 days after receiving the notice; the commissioner or his designee shall be the hearing officer at the hearing and shall issue a final order within 10 days after the hearing;

(2) bring an action in the superior court to enjoin the acts or practices and to enforce compliance with this chapter, a regulation adopted under it, or an order issued under it, or any of the laws pertaining to or regulations adopted by the boards listed in Sec. 10 of this chapter;

(3) examine or have examined the books and records of any person whose business activities require licensure by a board listed in Sec. 10 of this chapter and he may require that person to pay the reasonable costs of the examination; and

(4) issue subpoenas for the attendance of witnesses, and the production of books, records and other documents. (Sec 3 ch 258 SLA 1976)

Sec. 08.01.090. Applicability of the Administrative Procedure Act. The Administrative Procedure Act (AS 44.62) applies to regulations adopted and proceedings held under this chapter, except those under AS 08.01.087(b). (Sec 1 ch 59 SLA 1966; am Sec 4 ch 258 SLA 1976)

Sec. 08.01.100. License renewal, lapse and reinstatement. (a) Except as otherwise provided in this title, licenses shall be renewed biennially on the dates set by the department with the approval of the respective board.

(b) A registration, license, permit or certificate requiring renewal to continue effective must be renewed on or before the date set by the department or it will lapse. A penalty of $10 shall be charged in addition to all delinquent renewal fees for reinstatement for a registration, license, permit or certificate which remains lapsed for more than 60 days. (Sec 1 ch SLA 1966; am Sec 2 ch 94 SLA 1968)

Sec. 08.01.105. Penalty for improper payment. An applicant shall pay a penalty of $10 each time a negotiable instrument is presented to the department in payment of an amount due and payment is subsequently refused by the named payor. (Sec 3 ch 258 SLA 1976)

Sec. 08.01.110. Definitions. In this chapter

(1) "board" includes the boards and commissions listed in Sec. 10 of this chapter;

(2) "department" means the Department of Commerce and Economic Development;

(3) "commissioner" means the commissioner of commerce and economic development;

(4) "license" means any license, certificate, permit, or registration or similar evidence of authority issued by one of the boards listed in Sec. 10 of this chapter;

(5) "licensee" means any person who holds a license;

(6) "occupation" means any of the trades or professions for which licensure is required by one of the boards listed in Sec. 10 of this chapter. (Sec 1 ch 59 SLA 1966; am Sec 40 ch 218 SLA 1976; am Sec 5 ch 258 SLA 1976)

Section
10. Professional designation requirements
20. Limitation of liability for members of licensing boards

Sec. 08.02.010. Professional designation requirements. (a) A person licensed in the state as a chiropractor as defined in AS 08.20.220, a dentist as defined in AS 08.36.360, a medical practitioner or osteopath as defined in AS 08.64.380, a professional nurse as defined in AS 08.68.410, an optometrist as defined in AS 08.72.300(3), a registered pharmacist under AS 08.80, a registered physical therapist under AS 08.84, or a psychologist under AS 08.86, shall professionally identify himself by the use of appropriate letters or a title after his name which represents his specific field of practice. The letters or title shall appear on all signs, stationery or other advertising in which the person offers or displays his professional services to the public. In addition, a person engaged in the practice of medicine or osteopathy under AS 08.64.380(2), or a person engaged in any manner in the healing arts who diagnoses, treats, tests, or counsels other persons in relation to human health or disease and identifies himself by using the letters "M.D." or the title "doctor" or "physician" or any other title which tends to show that the person is willing or qualified to diagnose, treat, test or counsel another person, shall clarify the letters or title by adding the appropriate specialist designation, if any, such as "dermatologist," radiologist," "audiologist," "naturopath," or the like.

(b) A person subject to (a) of this section who fails to comply with the requirements of (a) of this section shall be given notice of his noncompliance by his appropriate licensing board. If, after a reasonable time, with opportunity for a hearing, his noncompliance continues, the board may suspend or revoke his license or registration, or administer other disciplinary action which in its determination is appropriate. (Sec 1 ch 6 SLA 1973)

Sec. 08.02.020. Limitation of liability for members of licensing boards. No person is liable for damages or other relief in an action by reason of his performance of a duty, function, or activity as a member of a licensing board or by reason of a recommendation or action of the board when the person acts in the reasonable belief that his action or recommendation is warranted by facts known to him or to the board after reasonable efforts to ascertain the facts upon which the action or recommendation is made. (Sec 45 ch 102 SLA 1976)

CHAPTER 03
TERMINATION, CONTINUATION AND REESTABLISHMENT OF REGULATORY BOARDS

Under Sec. 08.03.010, the following boards have the following termination dates:

Guide Licensing and Control Board	June 30, 1980
Collection Agencies	June 30, 1980
Board of Welding Examiners	June 30, 1981
Board of Psychologist and Psychological Associate Examiners	June 30, 1982
Board of Electrical Examiners	June 30, 1982
Board of Dental Examiners	June 30, 1982
Real Estate Commission	June 30, 1982
Board of Marine Pilots	June 30, 1983
State Medical Board	June 30, 1983
Board of Nursing	June 30, 1983
Architects, Engineers and Land Surveyors	June 30, 1984
Board of Pharmacy	June 30, 1984
Board of Optometry	June 30, 1984
Board of Public Accountancy	June 30, 1984
Board of Barbers and Hairdressers	June 30, 1984
Board of Chiropractic Examiners	June 30, 1984
Board of Dispensing Opticians	June 30, 1985
Board of Veterinary Examiners	June 30, 1985
Board of Nursing Home Administrators	June 30, 1986
Physical Therapy Board	June 30, 1986

Section 08.03.020. Procedures governing termination, transition and continuation. (a) Upon termination, each board listed in AS 08.03.0 0 shall continue in existence until June 30 of the next succeeding year for the purpose of concluding its affairs. During this period, termination does not reduce or otherwise limit the powers or authority of each board. One year after the date of termination, a board not continued shall cease all activities.

(b) The termination, dissolution, continuation or reestablishment of a regulatory board shall be governed by the legislative oversight procedures of AS 44.66.050.

(c) A board scheduled for termination under this chapter may be continued or reestablished by the legislature for a period not to exceed four years unless the board is continued or reestablished for a longer period under AS 08.03.010. (Sec 2 ch 74 SLA 1979; am ch 42 SLA 1980)

CHAPTER 99
BOARD OF WELDING EXAMINERS

Section
10. Creation and membership of board
20. Term of office
30. Source of appointments
40. Removal from office
50. Qualifications of board members
60. Meetings
70. Quorum
80. Powers and duties of the board
90. Applicability of Administrative Procedure Act
100. Expenses
110. Codes
120. Penalty

Section 08.99.010. Creation and membership of board. There is created the Board of Welding Examiners, consisting of seven members appointed by the governor. (Sec 1 ch 151 SLA 1968)

Sec. 08.99.020. Term of office. Board members serve a term of five years. However, of the members first appointed, one shall be appointed for a term of one year, one for two years, one for three years, one for four years, and three for terms of five years. (Sec 1 ch 151 SLA 1968)

Sec. 08.99.030. Source of appointments. The governor shall appoint board members from a list of persons prepared by the Alaska Chapter of the American Welding Society and the Alaska Society of Professional Engineers and submitted at least 30 days before the expiration of a term and not more than 60 days after a vacancy occurs in an unexpired term. The list shall contain not less than two recommended candidates for each appointment. The governor shall make appointments within 30 days after receiving the list. (Sec 1 ch 151 SLA 1968; am Sec 1 ch 151 SLA 1970)

Sec. 08.99.040. Removal from office. Each member holds office at the pleasure of the governor notwithstanding the member's term. (Sec 1 ch 151 SLA 1968)

Sec. 08.99.050. Qualifications of board members. Each member of the board shall be a citizen of the United States and a resident of the state. At least three members shall be persons with engineering degrees or registration as an engineer and each engineer member shall have at least five years engineering experience. All members shall have extensive experience in welding. (Sec 1 ch 151 SLA 1968; am Sec 2 ch 151 SLA 1970)

Sec. 08.99.060. Meetings. The board shall meet at least once a year. (Sec 1 ch 151 SLA 1968)

Sec. 08.99.070. Quorum. A majority of the board constitues a quorum. (Sec 1 ch 151 SLA 1968)

Sec. 08.99.080. Powers and duties of the board. (a) The board shall

(1) establish and promulgate rules and regulations concerning certification of welders in the state;

(2) establish and define certification tests as they apply to various types and categories of work done in or for the state;

(3) work with federal and private agencies and specifying engineers to establish uniform testing and certifying methods for all welders throughout the state;

(4) work with federal agencies and the agencies of other states to establish reciprocity agreements;

(5) set up criteria and define experience and documentary requirements which may be accepted in lieu of physical certification tests in the state;

(6) set the fees for the welder certification tests;

(7) examine, certify, and renew the certification of qualified applicants;

(8) keep a record of its proceedings, and submit annual reports to the governor and the legislature;

(9) promulgate regulations concerning the quality of welds and qualifications of welders required in specific areas of industry and contruction and designate reporting procedures necessary to certify compliance with these quality standards;

(10) designate and approve persons qualified to administer welding tests, and designate and approve persons qualified to administer welding tests, and designate and approve shops, laboratories, or other establishments qulified for testing coupons and weldments.

(b) The board may request technical personnel from the Department of Labor for the purpose of reviewing and analyzing reports and may request field inspection by the department for the purpose of assuring compliance with, and enforcement of the regulations, rules and orders promulgated under Secs. 10—110 of this chapter. (Sec 1 ch 151 SLA 1968; am Secs. 3—5 ch 151 SLA 1970)

Sec. 08.99.090. Applicability of Administrative Procedure Act. The board shall comply with the Administrative Procedure Act (AS 44.62). (Sec 1 ch 151 SLA 1968)

Sec. 08.99.100. Expenses. Members of the board are entitled to the per diem and travel expenses allowed by law. (Sec 1 ch 151 SLA 1968)

Sec. 08.99.110. Codes. The United States of America Standards Institute Codes listed below are established as the piping codes for the state:

(1) B 31.1.0 — 1967 power piping;

(2) B 31.2 — 1968 fuel gas piping;

(3) B 31.8 — 1968 gas transmission and distribution piping system;

(4) B 31.3 — 1966 petroleum refining piping;

(5) B 31.4 — 1966 and B 31.4a — 1968 liquid petroleum transportation piping systems. (Sec 6 ch 151 SLA 1970)

Sec. 08.99.120. Penalty. A person who violates a regulation adopted under Secs. 10—110 of this chapter is guilty of a misdemeanor and upon conviction is punishable by a fine of not more than $500. (Sec 7 ch 151 SLA 1970)

30. (Repealed)
35. Welder qualification certificate issued
40 (Repealed)
45. Requirements for maintaining a current welder qualification certificate

12 AAC 72.015. WELDER QUALIFICATION CERTIFICATE REQUIRED. A person may not perform a welding operation in the state for compensation, in which the failure would involve hazard to life or property or cause economic loss unless he or she holds a current, valid welder qualification certificate in the appropriate rating. (Eff. 8/21/78, Reg. 67; am 12/10/81, Reg. 80)

Authority: AS 08.99.080(a)(1), (2), (5), and (9)

12 AAC 72.020. Repealed 8/21/78.

12 AAC 72.025. REQUIREMENTS FOR WELDER QUALIFICATION CERTIFICATE. (a) Testing of welders shall be done under the direct supervision of a licensed welding inspector.

(b) An applicant for a welder qualification certificate or a company desiring to have a welder qualified shall

(1) submit to the welding inspector the welding procedure specifications or the welding performance specifications, or both when indicated, for the appropriate rating; and

(2) complete the welding test for the appropriate rating according to the terms of the welding procedure specifications or the welding performance specifications, or both when indicated.

(c) Prequalified procedure specifications may be used for test administration according to applicable codes. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(1), (2), (5) and (9)

12 AAC 72.030. Repealed 8/21/78.

12 AAC 72.035. WELDER QUALIFICATION CERTIFICATE ISSUED. The welding inspector shall issue the welding qualification certificate in the appropriate rating to the applicant or company upon the applicant's successful completion of the examination. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(1), (7) and (10)

12 AAC 72.040. Repealed 8/21/78.

12 AAC 72.045. REQUIREMENTS FOR MAINTAINING A CURRENT WELDER QUALIFICATION CERTIFICATE. (a) A welder qualification certificate is valid if it is kept current in compliance with the code under which it is issued unless stated other-

wise in the job specification. (Eff. 8/21/78, Reg. 67; am 12/10/81, Reg. 80)

Authority: AS 08.99.080(a)(1), (5) and (10)

12 AAC 72.050. Repealed 8/21/78.

12 AAC 72.055. WELDING INSPECTOR LICENSE REQUIRED. A person may not test a welder for the purpose of issuing a welder qualification certificate or inspect a welding operation in the state in which weldment failure would involve hazard to life or property or cause economic loss unless he or she holds a current, valid welding inspector license. (Eff. 8/21/78, Reg. 67; am 12/10/81, Reg. 80)

Authority: AS 08.99.080(a)(7) and (10)

12 AAC 72.060. Repealed 8/21/78.

12 AAC 72.065. REQUIREMENTS FOR WELDING INSPECTOR LICENSE. (a) An applicant for a welding inspector license must

(1) be a high school graduate or hold a state or military approved high school equivalency diploma;

(2) have no less than five years's experience at the technical level in an occupational function that directly involved

(A) design experience such as preparation of plans and drawings for weldment construction according to a code, standard or specification;

(B) construction experience such as actual construction or fabrication and erection of weldments in accordance with a code, standard, specivication or drawing;

(C) maintenance experience such as detection and measurement of weld inadequacies or discontinuities in accordance with specified procedures; and

(D) repair experience such as repair or replacement of welds that were determined inadequate or defective by reference to a code, standard, specification or drawing;

(3) be familiar with and understand the fundamentals of shielded metal arc welding, stud arc welding, submerged arc welding, flux cored arc welding, electroslag welding, oxyfuel gas welding, brazing, thermal cutting and mechanical cutting;

(4) be capable of writing clear and concise reports and maintaing records;

(5) pass an eye examination to prove natural or corrected near distance acuity for reading J-1 letters at a distance of not less than 12 inches on Jaeger's standard test type chart for near vision, or equivalent test, and natural or corrected far distance acuity of 20/40 as evidenced by a written, signed statement from a physician or an optometrist;

(6) pass a closed book test on welding inspection fundamentals such as welding processes, nondestructive testing methods, and interpretation;

(7) pass an open book test on general code or standard requirements such as fabrication tolerances and preheat requirements;

(8) pass a demonstration of competance in the use of tools, gauges, and instruments pertaining to weld inspection; and

(9) submit evidence of having previously passed on all position welding qualifiation test in at least one welding process.

(b) The requirements of (a)(1)—(8) of this section will be waived for an applicant possessing a current walding inspector certificate issued by the American Welding Society in accordance with AWS QC 1-78 "Standard for Qualification and Certification of Welding Inspectors."

(c) An applicant may substitute up to two years of post-high-school education for two years of the five-year experience relevant to any of the functions covered by (a)(2) of this section and approved by the board. (Eff. 8/21/78, Reg. 67; am 7/22/79; Reg. 71)

Authority: AS 08.99.080(a)(5) and (10)

12 AAC 72.070. Repealed 8/21/78.

12 AAC 72.075. APPLICATION FOR WELDING INSPECTOR LICENSE. Application for a welding inspector license must be made to the department on a form provided by the department and must be accompanied by a fee of $50. (Eff. 8/21/78, Reg. 67; am 12/10/81, Reg. 80)

Authority: AS 08.99.080(a)(6) and (10)

12 AAC 72.080. Repealed 8/21/78.

12 AAC 72.085. EXAMINATION FOR WELDING INSPECTOR LICENSE. Examinations for welding inspector licenses will be conducted four times a year. Additional examinations may be conducted if the applicant furnishes all necessary facilities and pays all expenses incurred by the examiners. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(1), (2), (7) and (10)

12 AAC 71.090. Repealed 8/21/78.

12 AAC 72.095. WELDING INSPECTOR LICENSE ISSUED. The department will issue a welding inspector license to an applicant who meets the requirements of Sec. 65 of this chapter. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(7) and (10)

12 AAC 72.105. WELDING INSPECTOR LICENSE EXPIRATION AND RENEWAL. (a) A welding inspector license is valid until March 1 of each even-numbered year unless revoked for reasons stated in 12 AAC 72.125 or unless the license lapses under (d) of this section.

(b) Application for renewal of a welding inspector license must be made to the department on a form provided by the department no later than March 1 of each even-numbered year and must be accompanied by a fee of $50.

(c) An application for renewal of a welding inspector license must contain

(1) proof of a current welding inspector certificate issued by the American Welding Society as specified in 12 AAC 72,065(b); or

(2) evidence of compliance with the requirement of 12 AAC 72.065(a); and

(3) evidence of employment as a welding inspector in the form of

(A) a signed statement of an employer;

(B) payroll records indicating the position held; or

(C) affidavits of two fellow employees attesting to employment activity of the applicant.

(d) A license issued to a welding inspector on the basis of American Welding Society QCI certification under 12 AAC 72.065(b), or renewed on that basis under (c)(1) of this section, lapses 60 days after the

date of expiration of the inspector's American Welding Society certification unless before that date the inspector provides proof to the department of renewal of that certification.

(e) Application for renewal of a welding inspector license that has lapsed for any reason is considered a new application. (Eff. 8/21/78, Reg. 67; am 12/10/81, Reg. 80)

Authority: AS 08.99.080(a)(7) and (10)

12 AAC 72.115. DUTIES AND RESPONSIBILITIES OF A WELDING INSPECTOR. (a) A welding inspector shall, when applicable

(1) keep the department advised of his current address for the mailing of renewal notices;

(2) verify that the work inspected conforms to the requirements of the applicable codes, standards and job specifications;

(3) verify that the base materials and consumable welding materials conform to the specification requirements and that the specified welding filler metals are used on each base metal or combination of base metals;

(4) verify that the welding equipment to be used for the work is that which is specified in the welding procedure and has the capability to produce the specified welds;

(5) verify that the welding procedures are as specified, and are qualfied and available to the welders for reference;

(6) verify that the welds have been properly qualified in accordance with the applicable codes and standards and that their qualification authories them to use the welding procedures specified for the work;

(7) observe the qualification tests when qualifying welders;

(8) verify that only specified and properly qualified welding procedures are used for the work;

(9) verify that the joint preparation and fit-up meets the requirements of the welding procedure and drawings;

(10) verify that the specified filler metals are used and that the filler metals are maintained in proper condition for use as specified;

(11) observe the technique and performance of each welder;

(12) examine the work for conformance to the requirements of the applicable codes, standards, specifications and drawings;

(13) identify the work inspected with specified marking methods or appropriate records;

(14) perform the necessary visual inspections;

(15) verify that the required visual and other nondestructive examinations have been performed by qualified personnel in the specified manner and review the resulting information to assure that the results are complete;

(16) perform nondestructive examinations that are specified, if he or she is qualified in accordance with the specified requirements;

(17) prepare clear and concise reports and keep necessary records of the welding procedure, the welding procedure qualifications, the welder qualifications, the control of welding materials and the results of inspection and tests;

(18) act with complete integrity in professional matters and be forthright and candid to the board or its representative on matters pertaining to this standard;

(19) to preserve the health and well-being of the pyblic by performing the duties required of weld inspection in a conscientious and impartial manner to the full extent of his or her responsibilities and qualifications;

(20) undertake and perform assignments only when qualified by training, experience, and capability;

(21) be objective, thorough and factual in any written report, statement or testimony of the work and include all relevant or pertinent information in such communiques or testimonials;

(22) sign only for work that he or she has inspected, or for work over which he or she has personal knowledge through direct technical control; and

(23) conscientiously avoid conflict of interests with the employer or client and diclose any business association, interests, or circumstances that might be so considered.

(b) If there is evidence that the welder's work does not conform to the requirements of the applicable code, standard or specification, the welding inspector may require requalification of the welder. The welding inspector shall require a requalification of a welder if that person's qualification is not current by the requirements of the applicable codes, standards or specifications.

(c) If the welding inspector is to perform nondestructive examinations other than visual, and there are no specified qualification requirements, he or she must be qualified and certified in accordance with the Recommended Practice No. SNT-TC-1A, "Personnel Qualification and Certification for Nondestructive Testing, " June 1975. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(7), (9) and (10)

12 AAC 72.125. PROHIBITED CONDUCT OF WELDING INSPECTOR. (a) A welding inspector licensed under this chapter is prohibited from performing acts including

(1) signing a blank welder qualification certificate;

(2) issuing a welding qualification certificate to a welder not tested under his or her direct supervision;

(3) delegating his or her responsibility in testing of welders;

(4) paying, soliciting, or offering directly or indirectly, any bribe or commission for professional employment with the esception of the usual commission required by employment agencies;

(5) falsifying, exaggerating, or indulging in the misrepresentation of personal academic and professional qualifications, past assignments, accomplishments, and responsibilities or those of his or her associates;

(6) issuing statements, criticisms, or arguments on weld inspection matters connected with public policy which are solicited or paid for by an interested party or parties, without first identifying the party and the speaker and disclosing any possible pecuniary interest;

(7) expressing an opinion on a weld inspection subject unless it is founded upon adequate knowledge of the facts in issue, upon a background of technical competence pertainent to the subject and upon honest conviction of the accuracy and propriety of the statement;

(8) accepting compensation, financial or otherwise, from more than one party for services on the same project, or for services pertaining to the same project, unless the circumstances are fully disclosed and agreed to by all interested parties or their authorized agents;

(9) soliciting or accepting gratuities, directly or indirectly, from any party or parties dealing with the client or employer in connection with the welding inspector's work; and

(10) associating with or knowingly participating in a fraudulent or dishonest venture.

(b) The board will suspend, refuse renewal of or revoke the welding inspector's license, place the license holder on probation, or repreimand the holder if he or she is found to have engaged in prohibited conduct. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(7), (9) and (10)

ARTICLE 4
GENERAL PROVISIONS

Section
899. Weld qualifier license
900. Definitions

12 AAC 72.899. WELD QUALIFIER LICENSE. A weld qualifier license issued under the authority of this chapter as it existed between August 2, 1978 and the effective date of this section is valid until six months after the effective date of this section and may not be renewed. (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(7)

12 AAC 72.900. DEFINITIONS. (a) In this chapter

(1) "appropriate rating" means that rating which is required by the specific code designated in the job specifications; when there is no job specification or a specific code is not designated in the job specification, appropriate rating is not less than the all-position certification issued in accordance with the current ediction of the American Welding Society Code;

(2) "board" means the Board of Welding Examiners;

(3) "code" means nationally recognized welding, nondestructive testing or engineering principles or rules published as guides or requirements or both by societies or agencies charged with establishing such guidelines;

(4) "continuous employment" means employment without interruption of more than 90 consecutive days unless otherwise specified in the code under which the certificate is being renewed;

(5) "coupon" means a piece of metal cut and sectioned for testing;

(6) "cutting process" means a process in which the severing or removing of metals is effected;

(7) "department" means the Department of Commerce and Economic Development;

(8) "direct supervision" means being physically present at the work site and in personal charge of the work being performed;

(9) "job specifications" means the written document setting out the specific construction standards to be adhered to for the project;

(10) "rating" means a particular skill level in the art of welding;

(11) "responsibility" means being accountable to the board or its agents or both for one's action relating to the requirements of this chapter;

(12) "standards" means minimum acceptable guidelines established by societies or agencies or both charged with the responsibility for promulgating such guidelines;

(13) "technical level" means a level of work in welding using mathematics and science such as would require at least two years of post-high-school study at an accredited engineering school or technical institute or equivalent study;

(14) "valid" means having legal force and properly executed and binding under the law and is in compliance with the appropriate code, standard or specification;

(15) "weld testing methods" means the destructive or nondestructive means of evaluating the integrity of the weld metal or heat affected zone of the base material or both;

(16) "welder" means welder, welding operator and tacker;

(17) "welding" means the metal joining process used in making welds;

(18) "welding inspector" means a person meeting the requirements of Secs. 55—125 of this chapter;

(19) "welding performance specification" means a document required before testing, setting the criteria for demonstration of a welder's ability to produce welds meeting prescribed standards;

(20) "welding procedure" means a written document specifying the essential variables as listed in the appropriate welding or engineering code or both;

(21) "welding procedure specification" means a document required before welding on any structure, specifying the parmeters and requirements which control the quality of the welding for that structure;

(22) "welding process" means the method of application of heat or filler metal or both to complete the joining process;

(23) "welding qualification certificate" means a certificate issued under the authority of the board by a licensed welding inspector to a person verifying that he or she has successfully performed one or more of the specific welding tests required for a certification to a particular welding or engineering code;

(24) "weldment" means an assembly whose component parts are joined by welding.

(b) Terms not defined in this section shall be construed in accordance with American Welding Society A3.0-76, "Terms and Definitions." (Eff. 8/21/78, Reg. 67)

Authority: AS 08.99.080(a)(1) and (9)

3-3-82

HB 703

HB 741

TELELINK
COMMUNICATIONS INC.

INFOCOM DIVISION

March 3, 1982

Rep. Terry Martin
Chairman
House Labor & Commerce Committee
Pouch V
Juneau, Alaska 99811

Dear Rep. Martin:

Thank you for the opportunity to testify on HB703. We appreciate the work that you and your staff have done on this bill, and hope that it will receive favorable consideration by the full legislature, this year.

TELELINK Communications, Inc. is seeking passage of this bill, to permissively expand the capacities of state agencies to act on matters that otherwise require expensive, time-consuming, face-to-face meetings.

While the use of electronic communications will not completely replace travel and the need to "press the flesh", we believe that contemporary advances in communications technology will imitigate the loss of productivity and revenues engendered by the need to be physically present during rate and tariff proceedings; employment security appeals and the like.

We believe that it is in the public interest to permit persons in remote corners of the state to enter opinions and matters of fact into the public record, without the requirement that they spend hundreds or thousands of dollars traveling away from home to interact with the policy makers.

The Legislature's substantial success with the Legislative Teleconference Network, and the Department of Education's Learn/Alaska network are examples of the gains that positively benefit Alaskan society.

HB703 will act to further expand the information collection and decision-making capability of the state whether through increased participation in Public Utility Commission hearings; Regional Fish and Game advisory board meetings; DOT/PF bid awards; or consultant bidder's conferences.

Sincerely,

Allen D. Blume
Marketing Associate

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF LAW

OFFICE OF THE ATTORNEY GENERAL

POUCH K–STATE CAPITOL
JUNEAU, ALASKA 99811

March 2, 1982

Hon. Terry Martin, Chairman
Labor and Commerce Committee
House of Representatives
Alaska State Legislature
Pouch V
Juneau, Alaska 99811

Re: HB 703 (use of communications media under APA)

Dear Representative Martin:

A member of your staff called this afternoon to ask for a "position paper" on this bill, for your committee's consideration tomorrow. Here are some quick comments:

1. The basic purpose of the bill appears to be the recognition of technological advances in communications and the promotion of the use of that technology in conducting the state's business for the benefit of the public. We support that.

2. I am unable to predict the fiscal impact of this, and can only observe that technology usually costs money.

3. The amendment in sec. 1, allowing an agency to accept matter presented by any form of communication, when following the regulation-adoption procedures, is good.

4. (A) The amendment in sec. 2, amending the basic "open meeting" statute (AS 44.62.310), looks good to the extent that it might increase the possibility of public participation. However, the statute being amended in sec. 2 of the bill covers many different kinds of meetings and hearings. In some of them, it is important for the members of the agency conducting the hearing to be able to actually see the witness, and, in others, it is important for public participants to see each other. Your definition of "communications media" in sec. 7 of the bill is not limited to video technology; in fact, it is not limited to any of

the more advanced methods of communication; the definition leads off with the word "includes." Without getting into the various rules of construction that would be applied to interpret your definition, I will simply observe that that definition could cause problems in applying the amendment in sec. 2.

(B) In addition, since "communications media" includes telephones, there is the potential for people to disrupt an otherwise orderly meeting or hearing, unless it is made clear in the statute that the body conducting the meeting or hearing may establish reasonable ground rules for the use of whatever media are to be employed. This is especially important in light of AS 44.62.310(f), which says that action taken contrary to AS 44.62.310 is void.

(C) One additional point: The amendment only refers to "[p]ublic attendance and participation" at meetings. It says nothing about the agency members themselves being able to conduct a meeting through communications media (which is especially important in emergency situations). This omission in the bill should be corrected, since not dealing with the permissibility of agencies themselves conducting meetings through communications media may be interpreted by the courts as an implied prohibition on such meetings.

5. The statement of intent in sec. 3, regarding broad dissemination of information, is good. However, in mentioning only the "convenience of the public," it overlooks the legitimate needs of the governmental bodies involved to get on with the business of the public as a whole. The interests and convenience of various segments of the public will often conflict with each other. The bill should be amended in this regard too.

6. The amendment in sec. 4 relates to hearings in the course of administrative adjudication. Speaking of the "mutual convenience of the parties" is okay, but it overlooks the constitutional right to due process and to confront and cross-examine witnesses against an individual. The statute should not appear to give an agency the right to consider the

convenience of perhaps its own staff and of a witness, while disregarding the rights of a central figure in the hearing. Consider, for example, a license revocation hearing for which the complaining witness would find it more convenient to phone in from his home. The hearing officer or administrative law judge would not be able to observe the demeanor of the witness, and the accused party would be seriously hindered in his questioning of the witness.

7. Basically, the amendment in sec. 5, allowing voting by communications media, in an administrative adjudication, is okay, especially since agency members are currently authorized to vote by mail (which, actually, under your definition of "communications media," could be considered as included in the new term). However, the sentence being added to AS 44.62.600 only requires recordation of the vote in a manner that identifies each person who has voted. That is a good point to cover, but nothing is said about recording how each person voted (not by what means, but on which side of the issue). This additional point should be covered; it would be consistent with the next-to-last sentence of the current AS 44.62.310(a).

8. The catch-all provision in sec. 6 of the bill is okay, but should also say something about the protection of constitutional and statutory rights of individuals. The variety of meetings and hearings covered by the Administrative Procedure Act must be borne in mind.

Thank you for the opportunity to comment on this bill. It would be very helpful to us if you could provide a bit more advance notice, however.

Yours truly,

WILSON L. CONDON
ATTORNEY GENERAL

IN THE HOUSE

BY THE LABOR AND COMMERCE COMMITTEE

CS FOR HOUSE BILL NO. 741 (L&C)

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to certificates of fitness."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 18.62.010 is amended to read:

Sec. 18.62.010. CERTIFICATE OF FITNESS REQUIRED. A person may not perform, nor may a person employ another person to perform, work [IN CONNECTION WITH WORK PERFORMED] subject to the standards established in AS 18.60.580 and 18.60.705 [, A PERSON MAY NOT BE EMPLOYED] without a valid certificate of fitness to perform the work, except that a certificate of fitness may not be required of employees of an electric utility which does not have within its service area any portion of a city, borough, or unified municipality having more than ~~2,500~~ 1,000 population.

* Sec. 2. AS 18.62.030 is amended to read:

Sec. 18.62.030. FEE. An applicant shall pay a [AN INITIAL] fee of $50 at the time of [$15 WITH HIS] application.

* Sec. 3. AS 18.62.040 is amended to read:

Sec. 18.62.040. DURATION OF CERTIFICATE. The department may cancel a certificate for cause. A certificate is valid for five (5) years from the date of issuance. ~~Certificates, if not cancelled for cause, are renewable upon payment of a [AN ANNUAL RENEWAL] fee of $15 once every three years [$5].~~

* Sec. 4. AS 18.62.060 is amended to read:

Sec. 18.62.060. POWER OF THE DEPARTMENT. The department shall issue orders [, RULES] and adopt regulations necessary to carry out the purposes of this chapter.

* Sec. 5. AS 18.62.070 is amended by adding a new section to read:

Sec. 18.62.075. EXEMPTION FOR WORK ON RESIDENCE. Nothing in this chapter prohibits a person from performing electrical or plumbing work on that person's single-family residence. ~~if the work is performed in accordance with the standards established in AS 18.60.580 and in AS 18.60.705.~~

* Sec. 6. AS 18.62.050(b) is repealed.

ALASKA

STATE LEGISLATURE

MEMORANDUM

To: Legal Services
Fm: House Labor & Commerce
Date: 3/4/82
Subj: HB 741

Please prepare a final CSHB 741 (L&C), incorporating the changes marked on the workdraft. We will return the original bill (or whatever you need back) when we receive the C.S.

Thanks for your help. Please contact me if you have questions.

Absent: ~~Rogers Davidson~~

3/3/82 HB 703
HB 741

1:10

000 Call to order; ~~HB~~ Intro to HB 741
HB 741
009 Dale Cheek, Dir, Labor Standards & Safety.
West over bill & changes, section by section
058 ~~Dale~~: Gave statistics on # of certificates of fitness processed by dept
065 Randolph asked if they had objection to not charging fees as required in Sec 3 (AS 18.62.040). Cheek said they needed the funds. ~~Randolph wondered if, Alaska~~
There was discussion of whether the fees are justified, & whether ~~fees~~ certificates need to be renewed. Cheek felt certificates should be renewed for record-keeping purposes.

~~HB~~ 260

:07 Dwight Perkins, Bus Mgr, Plumbers & Pipefitters Union Local 262, Juneau. Agrees that certificates of fitness shd be req'd. Felt $50 was reasonable fee, wd even agree to raising fee. Also felt $15 for renewal every 3 yrs was reasonable; especially if a person has been out of touch w/ codes for a time, felt the renewal was valuable. Also ~~felt~~ agreed that Sec 6 shd be repealed.

~~HB~~

149 Tom Cashen, rep for Intl Brotherhood of Electrical Wkrs — support bill. No objection to fee being raised.
157 Rogers — p. 1, l 13-16 - asked if there was any reason to exempt people; Cashen thought prbly cost of flying people out was reason for exemption, but agreed that all shd be req'd to be qualified.

176 Check said in 1980 some small cos. had non-qualified people doing elec work; they cited them; & amendment resulted.

Randolph said cost & difficulty of getting expertise in small communities.

Rogers expressed concern that this cd be abused in boroughs that aren't unified.

206 ~~220~~ Roger Samms – business rep, Local 1547, IBEW – re utility exemption – he has prob w/ wording, also. No objection to changing that section.

Supports bill. Good pgm; wd like to see it continue.

230 F.F. Cameron – retail store owners – no objection to fees, but (he has fitness card) – in dealing w/ public, ~~many~~ abt 19 out of 20 don't have fitness cards. They are (his outfit) repeatedly asked to show cards; but many others are working w/o them. Also don't have AK bus licenses or specialty licenses.

No prob w/ fee, but many people don't get cards. Wd like to see more stringent enforcement.

~~278 Martin~~

289 Martin asked Check if bill wd help; Check said it would.

They have 5 inspectors, did over 2,000 inspections last yr; ~~increase to~~ there were 1500 more certificates issued last yr than yr before.

306 Bylsma asked if the people cd be wkg on their homes; Cameron said no, they put job names on the sales slips.

320 Randolph suggested turning them in.

335 Cameron said certificate # or business license # shd be on building permits.

Rogers felt local govts shd decide if they want to include this in their building codes.

352 Rogers asked Check – certificate applies to plumbing & electrical codes; does code apply to all buildings?

Check – all except those under 2500 pop'n & on private property.

There was discussion to clarify laws.

380 Rogers questioned exemption, p. 2, l. 3. ~~Moved to~~ Suggested eliminating language after word "residence."

396 Bylsma asked what wd happen if license was not renewed, if certificate was for life. Check thought wd be more difficult to ascertain current employment & to be sure person keeping up on trade. Bylsma asked how they knew anyway if they didn't test again. Felt this was bookkeeping for nothing.

406 Martin felt uncomfortable w/ giving certificate for life.

436 Randolph noted that certificate cd be canceled for cause. &

446 Rogers - ~~if person loses certificate~~ may be argument for competency testing periodically, but as long as there's not, sees no reason to require renewal.

460 Knight felt this was a good point. Recommended going to 5 yr certificate & raising fee, & retesting at end of 5 yrs.

485 Randolph, + Rogers commented.

~~485 Roge~~

500 Ran - Moved to strike, l. 22-24, p. 1

Discussion. Gardiner felt they shd consider adding continuing education requirement for re-certification. Randolph felt that was too broad an issue to address. Rogers thought putting 5 yr time limit on license wd give Dept authority to use different criteria to evaluate applicant. Bylsma said Dept shd be asked if how wkload wd be impacted.

Check said they cd ck employment & ascertain qualifications fairly easily.

Rogers asked unan consent; Gardiner objected.

for: Bylsma, Martin, Ran, Rogers. Opp'd - Gardiner. Motion passed.

Rogers moved,

610 p. 1, l. 22 insert "a certificate is valid for 5 yrs from the date of issuance." Randolph objected w/o further study.

Discussion.

for: Rog, Gard, Martin, Bylsma Opp'd: Randolph

Amdmt passed.

Rogers moved

730 p. 2, l. 3, add period + delete lang after "residence"

(side B) 000 discussion.

~~for~~: No passed unan.

Rogers moved

070 p. 1, l. 13, after "work", insert period + delete rest of sentence (through l. 16).

Randolph objected.

Discussion.

for: Gardiner, Rogers opp'd - Martin, Bylsma, Rand.

motion failed.

Rogers moved

100 p. 1, l. 15 after "city", insert comma "borough"

Randolph objected.

Discussion.

for: Rog, Gard, Martin, Bylsma. Opp'd Randolph

No. passed

165 Gardiner, p. 1, l. 16, move to chng figure "2500" to "1,000".

Discussion.

~~Opp~~ for: Gard, Rogers, Martin, Bylsma opp'd: Randolph

No. passed.

230 Gard, p. 1, l. 22, after "cause", insert "or if the person fails to submit proof of attending eight hours of continuing education wde workshops approved by the Department every 5 years."

Gard w/drew amdmt.

Discussion. Check suggested various ways the Dept. cd enforce continuing edu reqmts.

325 Rog moved to report out CSHB741 L&C as amended.
No obj, so passed.

HB 703

338 Allen Peterson, Asst Atty Gen'l; Dept of Law supports bill, but contains legal probs. (He referred to ltr presented to committee which sets out probs.)

1)– cost

2)– sec. 1 unnecessary but expresses good points

3) – sec 2 has problems –

A)– addressing basic open meeting statute raises qstns

a) – sometimes needs to be in person

~~b)~~ defn of comm. media does not limit to video comm. media

b) raising possibility of intrusion into mtg by phone calls

Rogers had qstns; compared to any interruption by a person in any meeting.

c) implies that agency can't conduct mtgs by comm. media.

4) sec 3 –

neglect to mention needs of govt.

5) sec 4 –

possible constitutional conflict

6) sec. 5 –

doesn't cover "how" member voted (which side of issue)

7) sec 6 –

shd ~~mention~~ make clear not intent to curtail const'l & statutory rights

547 Martin asked if suggested amdmts were available.
Peterson said no.
Rogers had comments

567 Allen Burne – Telelink Comm – marketing associate –
supports bill; encourages state depts to move into ~~[illegible]~~
field of communications technology. ~~[illegible]~~ (Submitted
prepared testimony). Referred to sheet comparing
costs of teleconferencing v. costs of travel. Rogers noted
savings cd be even higher than shown.
No objections to Peterson's comments; expect to see each agency
will have to set refined guidelines as to when to use communication
media, & what types can be used.

688 Peterson said he had no amdmts to offer; just posn paper. Said
he'd work w/staff on amdmts.
Rogers felt leg. legal staff cd do that.

711 Barry said bill was prepared by Sofo; most of Peterson's points have been
addressed. Noted that, in various instances, courts allow
videotaping.

Tape 2

~~000~~ Harry Treagor, Dir, Occ'l Licensing - feels wd be asset to Div & cost saving to state.

Gardenier asked if this cd increase attendance.

Treagor said normally low attendance; have found people tend to give more verbal than written testimony.

020 Sioux Plummer - Dir, Div Telecomm Svcs - Peterson addressed concerns of legality. Support telecon'g; currently compiling study as directed by exec order; shd soon have final report to recommend to legis. Supportive of idea & will have add'l statistics & comments a result of study.

~~Boge asked if there wd be fee~~

045 Martin asked if there wd be need to hold up legion for study results; Plummer said no.

053 Peterson asked Plummer if ~~a~~ telecony can be limited to certain sites. Plummer said it's up to agency conducting mtg. Plummers said they'd recommend ~~a~~ network similar to CTN, w/ even more flexibility.

076 Martin requested staff look at bill, taking to AG's recommdns into consideration, & draw up for showings savings.

2:48 Adjourned.

PREVIOUS ACTION

HB 703 — No previous action.

Statutory Reference: AS 44.62

Action Taken: No action taken.

HB 741 — No previous action.

Statutory Reference: AS 18.62

Action Taken: Rep. Randolph moved, page 1, lines 22-24, to strike language. Rep. Gardiner objected. On the question: for--Bylsma, Martin, Randolph, Rogers; opposed--Gardiner. Motion passed.

Rep. Rogers moved, page 1, line 22, to insert, "a certificate is valid for five years from the date of issuance." Rep. Randolph objected. On the question: for--Rogers, Martin, Gardiner, Bylsma; opposed--Randolph. Motion passed.

Rep. Rogers moved, page 2, line 3, to add a period and delete language after the word, "residence". Motion passed without objection.

Rep. Rogers moved, page 2, line 13, to insert a period after the word, "work", and to delete the remainder of the sentence (through line 16). Rep. Randolph objected. On the question: for--Gardiner, Rogers; opposed--Randolph, Martin, Bylsma. Motion failed.

Rep. Rogers moved, page 1, line 15, after the word "city", to insert ", borough". Rep. Randolph objected. On the question: for--Rogers, Gardiner, Martin, Bylsma; opposed--Randolph. Motion passed.

Rep. Gardiner moved, page 1, line 16, to change figure "2,500" to "1,000". On the question: for--Gardiner, Rogers, Martin, Bylsma; opposed--Randolph. Motion passed.

Rep. Gardiner moved, page 1, line 22, after "cause", to insert "or if the person fails to submit proof of attending eight hours of continuing education code workshops approved by the Department every 5 years." After discussion, Rep. Gardiner withdrew the motion.

Rep. Rogers moved to report CSHB 741 (L&C), as amended, out of committee. There being no objection, the motion passed.

ACTION NARRATIVE

Tape #31
Recording

Number 000

The meeting was called to order by Chairman Martin at 1:10 p.m. Members present were: Representatives Martin, Bylsma, Randolph, and Rogers. Rep. Gardiner arrived later in the meeting. There were no members absent. Rep. Martin turned the committee's attention to HB 741.

Number 009

Dale Cheek, Director of Labor Standards & Safety, went over the bill and changes, section by section. He gave statistics on the number of certificates of fitness processed by the department.

Number 065

Rep. Randolph asked if Cheek had objection to not charging fees, as required in Section 3 (AS 18.62.040). Cheek said they needed the funds. There was discussion of whether the fees are justified, and whether certificates need to be renewed. Cheek felt certificates should be renewed for record-keeping purposes.

Number 107

Dwight Perkins, business manager for Plumbers & Pipefitters Union, Local 262, of Juneau, agreed that certificates of fitness should be required. He felt $50 was a reasonable fee, and said they would even agree to raising the fee. He also felt $15 for renewal every three years was reasonable, especially if a person has been out of touch with codes for a time. He agreed that Sec. 6 should be repealed.

Number 149

Tom Cashen, representative for International Brotherhood of Electrical Workers (IBEW), supported the bill. He had no objection to fees being raised.

Number 157

Rep. Rogers asked, in reference to page 1, lines 13-16, if there was any reason to exempt people. Cashen thought probably the cost of flying people out was the reason for the exemption, but agreed that all should be required to be qualified.

Number 176

Cheek explained that, in 1980, some small companies had non-qualified people doing line work; they were cited, and the amendment was the result. There was discussion.

Number 206

Roger Sams, business representative for IBEW Local 1547, said, regarding the utility

exemption, that he has problems with the wording also. He had no objection to changing that section. He supported the bill. Sams said it was a good program, and that he would like to see it continued.

Number 230

F.F. Cameron, retail store owner in Juneau, had no objection to fees. He said, in dealing with the public, that about 19 out of 20 of his customers don't have fitness cards. He said he and his employees are repeatedly asked to show their cards, but that there are many people working without them. He said these people also don't have Alaska business licenses or specialty licenses. He would like to see more stringent enforcement.

Number 289

Rep. Martin asked Cheek if the bill would help with enforcement; Cheek felt it would. He said they have five inspectors who did over 2,000 inspections last year. He said 1,500 more certificates were issued last year than the year before.

Number 306

Rep. Bylsma asked Cameron if those people could be working on their homes. Cameron replied that they were not; that they were charging supplies to projects on the sales slips. Rep. Randolph suggested turning them in.

Number 335

Cameron said certificate numbers or business license numbers should be on building permits. Rep. Rogers felt local governments should decide if they want to include this in their building codes. There was discussion.

Number 396

Rep. Bylsma asked what would happen if certificates were issued for life, without renewal. Cheek thought it would be more difficult to ascertain current employment and to be sure the applicant is keeping up in his trade. Rep. Bylsma asked how they knew anyway, if they didn't retest people renewing their certificates. He felt this was bookkeeping for nothing. Rep. Martin was uncomfortable with giving certificates for life. Rep. Randolph noted that a certificate could be canceled for cause. Rep. Rogers said that may be an argument for competency testing, but as long as there is no retesting, he saw no reason to require

renewal. Judy Knight, Department of Labor, felt this was a good point. She recommended going to a five-year certificate and raising the fee, and retesting at the end of five years. There was discussion.

Number 500

Rep. Randolph moved to stroke lines 22-24, page 1. There was discussion. Rep. Gardiner felt they should consider adding a continuing education requirement by recertification. Rep. Randolph felt that was too broad an issue to address. Rep. Rogers thought putting a five year time limit on the license would give the Department authority to use different criteria to evaluate a renewal applicant. Rep. Bylsma said the Department should be asked how their workload would be impacted by this. Cheek said they could check employment and ascertain qualifications fairly easily. Rep. Rogers asked unanimous consent; Rep. Gardiner objected. On the question: for--Bylsma, Martin, Randolph, Rogers; opposed--Gardiner. Motion passed.

Number 610

Rep. Rogers moved, page 1, line 22, to insert "a certificate is valid for five years from the date of issuance." Rep. Randolph objected without further study. There was discussion. On the question: for--Rogers, Gardiner, Martin, Bylsma; opposed--Randolph. Motion passed.

Number 730

Rep. Rogers moved, page 2, line 3, to add a period and delete the language after the word "residence". There was discussion. There being no objection, the motion passed unanimously.

Side B, Number 070

Rep. Rogers moved, page 1, line 13, after the word "work", to insert a period and delete the rest of the sentence (through line 16). Rep. Randolph objected. There was discussion. On the question: for--Gardiner, Rogers; opposed--Martin, Bylsma, Randolph. Motion failed.

Number 100

Rep. Rogers moved, page 1, line 15, after the word, "city", to insert ", borough". Rep. Randolph objected. There was discussion. On the question: for--Martin, Rogers, Bylsma, Gardiner; opposed--Randolph. Motion passed.

Number 230	Rep. Cardiner moved, page 1, line 22, after the word "cause", to insert, "or if the person fails to submit proof of attending eight hours of continuing education code workshops approved by the Department every 5 years." There was discussion. Cheek suggested various ways the Dept. could enforce continuing education requirements. Rep. Gardiner withdrew the motion.
Number 325	Rep. Rogers moved to report CSHB 741 (L&C), as amended, out of committee. There being no objection, the motion passed.
Number 338	House Bill 703 was brought before the committee. Art Peterson, assistant attorney general, said the Department of Law supports the bill, but the bill has legal problems. He referred to a letter presented to the committee which sets out the problems. (This letter is available from the committee for review.) Peterson went over each of the problems they foresaw. There was discussion.
Number 567	Allen Blume, Telelink Communications, supported the bill. He encouraged state departments to move into the field of communications technology. (Blume submitted prepared testimony, which is available for review from the committee.) He referred to a sheet comparing the costs of teleconferencing to the costs of travel. Rep. Rogers noted that savings could be even higher than Blume's comparison showed. Blume said he had no objections to Peterson's comments. He expects to see each agency having to set refined guidelines as to when to use communications media, and what types can be used.
Number 688	There was discussion.
Tape 32, Number 000	Harry Treager, Director of the Division of Occupational Licensing, felt it would be an asset to the division and cost saving to the state. Rep. Gardiner asked if this bill could increase attendance. Treager said attendance is normally low, and that they have found people tend to give more verbal than written testimony.
Number 020	Sioux Plummer, Director, Division of Telecommunications Services, said Peterson

had addressed their concerns of legality. She said her division supports teleconferencing. She said they are currently compiling a study, as directed by executive order, which should soon be finalized and reported to the legislature. Plummer was supportive of the idea, and said she would have additional statistics and comments as a result of the study. Rep. Martin asked if there would be a need to hold up the legislation for the study results; Plummer said there would be no need.

Number 053 — Peterson asked Plummer if a teleconference can be limited to certain sites. Plummer said it is up to the agency conducting the meeting. Plummer said she would recommend a network similar to the legislative teleconference network, with even more flexibility.

Number 076 — Rep. Martin requested staff look at the bill, taking the attorney general's recommendations into consideration, and draw up a fiscal note showing savings.

Number 089 — There being no further business to come before the committee, the meeting was adjourned at 2:48 p.m.

HB 863

No previous action.

Statutory Reference: AS 23.20.526

Action Taken: Bill was not taken up this date. No action.

ACTION NARRATIVE

Tape #33
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:14 p.m. Members present were: Reps. Bylsma, Gardiner, Martin, Randolph, and Rogers. There were no members absent. Rep. Martin brought HB 726 before the committee for consideration.

Number 020

Dave Stancliff, administrative assistant to Rep. Ramona Barnes, presented HB 726 on her behalf. He explained the intent of the bill, and referred to a House Research report, which was given to the committee, for figures on the financial impact. (Stancliff spoke from prepared testimony.)

Number 060

Rep. Gardiner asked why the bill was introduced. Stancliff said it was for philosophical reasons. There was discussion. Rep. Randolph said he had no objection to using HB 726 as a vehicle, as it is almost identical to his bill (HB 863).

Number 082

Art Zillig, director, Employment Security Division of the Department of Labor, said the amendment would not impact the ability to conform with federal law. He had no recommendation on the bill. There was discussion. Rep. Martin asked the revenue impact; Zillig had no estimate. There was discussion of impact on FUTA taxes.

Number 126

Rep. Rogers was concerned about the stock ownership plan and its impact on employees. He was concerned that, if employees owned 25% of a class of voting securities, the employer could remove those employees from unemployment security.

Number 158

Ed Hein, attorney with LAA Legal Services, said he drafted the bill, and that the intent was to provide optional exemption from unemployment insurance. In drafting the legislation, he made efforts to check for conflicts with federal laws, and he was

satisfied there would be no conflicts. He could not say conclusively if there were conflicts with other portions of Title 23.

Number 194

Rep. Rogers again raised his concern about an employer exempting employees through a stock ownership plan. Hein said he didn't think that was the intent. He said this was meant to refer to someone with a controlling interest in the corporation. There was discussion. Hein said the language would seem to allow exempting employees. Rep. Rogers suggested deleting the language, "any class of", and inserting "the" on line 16, and suggested deleting the language, "the power to vote". There was discussion.

Number 278

Gary Jenkins, small business owner and member of the National Federation of Independent Business, supported the concept of the bill, but supported amending language. He suggested exempting corporate office, similar to a provision in the Workers Compensation Act. There was discussion. Rep. Rogers said there was a substantial difference between the workers compensation provisions and the provisions in the bill. He felt possibly redefining eligibles as officers of the corporation would solve the problem. Rep. Gardiner brought up the question of partnerships. Jenkins thought partnerships were already exempted, and suggested using the term, "executive officer of the corporation". Hein said other states provide for this. He noted that the state of Washington uses the term, 'corporate officers", and said he supports this concept. There was discussion of how to amend the language.

Number 480

Jeff Barry said he did not question the concept, but thought it may conflict, especially in the construction industry, with prevailing wage. He cited examples. Rep. Rogers felt subsection (d) would cover this. There was discussion.

Number 568

Rep. Rogers moved to strike subsection (c) and replace with a new (c): "the employee is an executive officer of the corporation and owns, directly or indirectly, 25% or more of the voting securities of the corporation; and". Rep. Bylsma objected. There was discussion. The committee asked

Zillig to estimate the fiscal impact; Zillig said it would be difficult to determine. He said there would be no impact on the general fund. Rep. Bylsma removed his objection; there being no objection, the motion passed.

Number 639 — Rep. Rogers moved to report CSHB 726 (L&C), as amended, out of committee. Motion passed without objection.

Number 655 — Rep. Martin turned the committee's attention to HB 831. He referred to information sent by Senator Stevens regarding self-regulation by states of many functions previously handled by the FCC. He gave the reasons for and intent of the bill.

Side B, Number 040 — Alex Hills, Deputy Commission of Administration responsible for telecommunications, suggested it is premature to judge the Telecommunications organization at this time. He believes the intention is to take over the functions of APBC, and to create oversight authority of various functions. Hills submitted a copy of their annual report, which he felt should be considered. (Hills also submitted written testimony; both these documents are available from the committee for inspection.) Hills said he was concerned about introducing another layer of bureaucracy, and about asking members of industry to make state-level decisions that would impact the private sector. He felt there was a potential conflict of interest. Hills recommended the bill not be passed as written.

Number 135 — Rep. Martin asked the committee if it would like to have a special meeting with Hills regarding federal legislation.

Number 150 — Charles Northrip, Executive Director, APBC, felt the impact of the bill on public broadcasting would set back progress by several years. (Northrip spoke from prepared testimony, which is available for review from the committee.) He explained the background of the Commission, and told why he felt the bill was premature.

Number 213 — Gordon Zerbetz, Alascom, had no official stand on the bill as they hadn't had time to review the bill thoroughly. He said it was

apparent there would be overlap between the Telecommunications Division and the new commission. He had no time yet to evaluate the new division, as it had not been geared up long enough yet. He felt a coordinated effort was important. He said the bill causes him concern about the creation of an agency comingling a developmental entity and a regulatory entity. He was apprehensive about the commission have both authorities. He spoke to particular sections of the bill which caused him concern. There was discussion. Zerbetz said Alascom is committed to the establishment of a focal agency to develop telecommunications policy. He said the system created by EO 52 had not been in place long enough to determine if it fills this need.

Number 333

Zerbetz said, regarding appeal powers, that if the board is an appellate board for APUC or other agencies, the committee should consider addressing, by statute, the qualifications of people on the board. Rep. Rogers asked if the commission would be quasi-judicial or promotional. He said the state should not have an agency that does both. Rep. Martin responded that he had no real concept in mind.

Number 379

Jeff Barry, committee aide, said section 4 defines telecommunications. He pointed out that one area not addressed that should be is the area of computer security. He said the public needs protection. Barry felt this concept is a holistic approach to the entire industry. Barry said there are three factions to consider: public, industry, and government. He said the intention is to limits the courts' ability to rule to law, not policy. The commission would be an appellate body to hear the concerns of the three factions. There was discussion.

Number 450

Hills said they do have an awareness of computer privacy issues. He said Bruce Carlson, office of Information Management, would meet with staff. He said Sen. Parr had introduced a resolution which would ask them to investigate this area. There was discussion.

Number 479

Rep. Martin went over the next week's agenda. There being no further business to

come before the committee, the meeting was adjourned at 2:35 p.m.

Testimony of Charles Northrip On HB 831
Before the House Labor and Commerce Committee
March 4, 1982

Mr. Chairman, and members of the Committee, my name is Charles Northrip. I am the Executive Director of the Alaska Public Broadcasting Commission. I appreciate the opportunity to testify on this bill today. I also appreciate the prompt and courteou. notice that the Committee staff provided me of the introduction of the Bill.Unfortunately my testimony will be negative with regard. to the Bill. I feel its impact on public broadcasting would set back its progress several years.

Executive Order No. 50, now incorporated in Alaska Statute 44.21.256 - 290 recognized the need to centralize planning, coordination and operation of State telecommunications activities, and created a Deputy Commissioner and two divisions within the Department of Administration to do just that. The Order also transferred the Alaska Public Broadcasting Commission from the Department of Education to the Department of Administration so it would operate out of the same administrative home as the two new telecommunications divisions. The Order did not, however, abolish the APBC nor place public broadcasting in the chain of command linked directly to the State executive hierarchy. I do not believe those portions of the order were adopted without due deliberation, primarily in consideration of the dangers of government control or influence over programming. By leaving the APBC within the Department of Administration, but outside the direct line organization of the telecommunications divisions, the Order puts as much

distance as possible between the State hierarchy and programming, since the Commission is an independent agency governed by nine citizens who are not State employees. In further support of this concept, the APBC leaves program judgements to independent local licensees, who are in turn governed by local citizen boards.

Before Executive Order 50, the APBC was involved with the State satellite TV project, the video tape delay center, and the provision of commercial programming. Those activities detracted from the main purpose of the Commission, which is the encouragement and support of public broadcasting in Alaska. Those activities, however, also put the Commission in the posture of "meddling" in areas best left to the private sector. The Executive Order divested the APBC of all such activity, and gave the agency its single primary focus in the support of public broadcasting throughout the State. The Commission, thanks to the Executive Order, now has a clear focus for its activities.

There are many areas touched on by HB 831 that require additional comment, not the least of which is the proposed new Commission serving as a watchdog over Department of Administration telecommunications activities. I'll leave that topic to Dr. Hills and others from the Department. I can say, however, that the current Alaska Public Broadcasting Commission has no desire to undertake that role. In fact, the full Commission unanimously approved the Executive Order No. 50 approach last spring.

My major criticism of the Bill is that it is too much, too soon. Executive Order No. 50 has been in effect less than a year. The staffs of the new Divisions have had even less time to come to grips with the state's telecommunications priorities. The APBC has had its new, more pointed, focus for that same period of time. The APBC's first edition of its long-range plan is only now at the printers. Similar efforts in other areas of telecommunications are in various stages of completion in the telecommunications divisions.

The Governor's Executive Order should be given time to work before new approaches are attempted. If the Legislature feels the need for countervailing expertise, it should hire telecommunications professionals to advise the cognizant committees as they exercise their rightful oversight responsibilities of the work of the telecommunications divisions and the APBC each year. That approach is certainly open to any committee.

If, over time, Executive Order No. 50 proves inadequate to the task, the Department of Administration, I'm sure, will be the first to propose changes in the law. Now, however, is not the time to make such changes, when our new system is less than a year old.

STATEMENT OF ALEX HILLS

DEPUTY COMMISSIONER FOR TELECOMMUNICATIONS

DEPARTMENT OF ADMINISTRATION

ON HOUSE BILL 831

PROVIDED TO HOUSE LABOR AND COMMERCE COMMITTEE

The Alaska Communication Commission proposed in House Bill 831 would have two kinds of functions. The Commission would oversee public broadcasting, as the APBC presently does, and would, in addition, have oversight powers with respect to the two telecommunications divisions located in the Department of Administration. The functions of the APBC will continue to be required and should be provided for in the future. Issues related to these functions will be addressed in a separate statement by Dr. Charles Northrip, Executive Director of the APBC.

Our two telecommunications divisions, and my own position, were instituted on July 1, 1981, when Executive Order 50 became effective. Executive Order 50 was the result of a lengthy process that involved a great deal of effort by members of both the Administration and the Legislature. The new telecommunications organization has been in existence for less than nine months. Although most interested parties appear to be satisfied with its performance so far, the new organization certainly needs more time to prove itself. I would suggest that it is premature to judge the new divisions at this time.

I believe that the primary intent of HB 831 is to provide oversight of all State telecommunications activities. Accordingly, I am submitting a copy of our Telecommunications Annual Report, which has

been recently completed. As the Report shows, the divisions are involved in a wide range of statutorily required activities. I believe that any new telecommunications legislation should consider these activities.

As I understand the proposed Commission, it would be a new layer of bureaucracy involved in the telecommunications decision-making process. I believe that such an arrangement would not only increase the size of State government but would also make the decision process unnecessarily cumbersome.

Finally, I am concerned about asking members of the telecommunications industry to make State government decisions that affect the private sector. The Department of Administration actively seeks advice and input from the private sector. We consider this input as we make decisions designed to serve the public interest and State government needs. The proposed arrangement, on the other hand, would have industry representatives making decisions that affect the State's procurement of goods and services from their own industry.

In summary, for the reasons I have explained, I do not recommend that this bill be passed out of Committee. I further suggest that our present telecommunications organization be evaluated during the next legislative session at the earliest.

000 Call to order

~~010 Intro to HB 863 by Rep. Ramona Barnes~~

HB 726
020 ~~Rep~~ Dave Stancliffe AA to Ramona Barnes — ~~intro to~~ explained intent of HB 726. Referred to House Research report, which was given to committee, for figures on financial impact. ~~Advantage to people can~~ (Spoke fm prepared testimony)

060 Gardiner asked why bill was introduced; Stancliffe said it was for philosophical reasons. Discussion

078 Randolph said he had no objection to using HB 726 as vehicle, as his bill is almost identical (HB 863)

082 Art Zillig, DOL, ESC, Dept Labor — amdmt wd not impact ability to conform w/ fed'l law; no recommendation on bill.

097 Gardiner asked how many people wd be eligible; Zillig had no figures.

Discussion:

Martin asked revenue impact; Zillig had no estimate. Region X said if poor ~~is~~ covered by fed'l FUTA tax, FUTA wd be increased. Stancliffe said FUTA is calculated in report; ~~DOL~~ see figures.

126 Rogers — asked re: stock ownership plan - impact on employees — if emp's own 25% of ~~stock~~ a ~~portion~~ class of voting securities; concerned that employer cd remove employees fm. unemployment

158 Ed Hein — LAA leg svcs — drafted bill — intent was to provide optional exemption for unemp ins. In drafting legis'n, made efforts to ck for conflicts w/ fed'l laws — satisfied there wd be no conflicts. Can't say conclusively if there are conflicts w/other portions of Title 23.

194 Rogers asked abt he again raised his concern abt an empr exempting employees through a stock ownership plan. Hein said he didn't think so, that wasn't intent; meant to refer to someone w/ controlling interest in corp. Discussion. Hein said language wd seem to allow exempting employees.

257 Rogers suggested deleting "any class of" & insert "the" (l. 16), & suggested deleting "the powers to vote" — discussion

278 Gary Jenkins — Nat'l Fed of Independent Business & small bus owner — supported concept. Supported amending lang. Suggested — exempting corporate officers — similar to provn in Wkr Comps Act. Discussion. Rogers said there was a substantial difference between the Wkr Comps provisions & the bill. Felt possibly redefining eligibles as officers of the corporation. Gardiner brought up question of partnerships — Jenkins thought partnerships were already exempted. Jenkins suggested using term "executive ofcr of the corpn."

446 Hein said other states provide for this; Washington uses term "corporate officers" — goes along w/ this concept.

1:50
Gardiner

Discussion of how to amend.

The employee is an executive ofcr of the corp'n, & owns 25% or more of the corporation.

480 Barry - gotn not concept, that's good, but may conflict, esp in const industry, w/ prevailing wage. Cited examples. Purposes different fm Fedn of Businesses. Area of gotn in in const ind, under prevailing wage act, doing work as wage earner, potential conflict. Rogers felt (d) would cover this. Discussion.

568 Rogers moved strike (c) & replace w:

"(c) the employee an exec ofcr of the corp & owns, directly or indirectly, 25% or more of the voting securities of the corp'n; and "

Objection by Byloma; discussion. Asked Billig to estimate fiscal impact; Billig said it wd be difficult to determine. No general fund impact. Knight felt there wd be no significant impact.

~~Gotn. for~~ ~~qq to~~

No objection, so carried.

639 Rogers moved to report out CS HB 726 as amended

~~Attorney~~
10:58:17

655 Intro to HB 831 by Ch. Martin. Referred to info sent by Sen Stevens re self-regn by states of many functions FCC ~~had~~ previously handled. Gave ~~under~~ reasons for & contents of bill.

side B

027 _____ clarified a point Martin made. Discussion.

040 Alex Hills, ~~Deputy~~ Comm of Admin responsible for telecomm (~~read~~ spoke fm & spared testimony.)

~~Exec order 50~~ Gave background of telecomm orgn.

~~Feels~~ Suggested it is premature to judge orgn at this time.

Believes intention is to

1) take over func of APBC

2) create oversight of various functions

Submitted cy of annual report, which he felt shd be considered.

~~He Hdq His orgn~~ his Noted that orgn is wkg on many areas Martin spoke of being concerned abt.

Hills was concerned abt introducing another layer of bureaucracy. Concerned abt asking members of industry to make state-level decisions that wd impact private sector. Potential conflict of interest.

Recommended bill not be passed as written.

135 Martin asked if committee wd like to have special mtg w/Hills regarding fed's legis'n, possibly 3/24.

Rand
2:30

150 Charlie Northrip, Exec Dir, APBC. (Spoke fm prepared testimony:) Felt impact of bill on pub. bdcstg wd set back progress several yrs. Explained ~~why he felt this was~~ background of commission & why he felt bill was premature.

213 Gordon Zerbetz, Alascom — no official stand yet as they haven't had time to rev thoroughly.

Apparent there wd be overlap bet Telecom Div & the new commission. No time yet to ~~determine~~ evaluate new division — not geared up long enough yet.

Coordinated effort is important.

Bill causes him concern abt creation of agency comingling developmental entity & regulatory entity. Apprehensive abt comm having both authorities.

Re appeal pwrs, p. 3, Secs 5 & 6 — re APUC — ~~Sec~~ exemption in Sec 6 — comm issues many other types of orders of interest to telecomm. industry. Sec 5 (8) — validity of regs — APUC has function of issuing telecomm-oriented regs.

297 Rogers pointed out Zerbetz was on APUC abt 15 yrs. Rogers asked if APUC had own attys; Zerbetz said an asst AG assigned to them. Rogers said AG wd be person bringing & person defending an action under that sec.

315 Zerbetz - Alascom committed to establmt of focal agency to develop telecomm policy. Sys tem created by EO 50 not in place long enough to determine if it does this.

333 ~~Barry~~ Zerbetz - re appeal pwrs - re board - if it is appellate bd for APUC or other agencies, shd consider qualifs of people on bd; shd perhaps be addressed in statute.

352 Rogers - asked if comm wd be quasi-judicial or promotional. Said it shdn't have agency that does both.

Martin responded no real concept in mind. Needed think tank. Developing ideas for legis'n.

379 Barry - sec 4 defines telecomm.

One area not addressed that shd be is ~~secur~~ computer security. Public needs protection. Concept is holistic approach to entire industry.

1) public
2) industry
3) govt

} 3 factions to consider

Intention is to limit courts ability to rule to law, not policy. Comm. wd be appellate to hear concerns of 3 factions.

430 Martin referred to a previous bill which wd have caused problems; w/o technical knowledge

450 Hills - do have awareness of computer privacy issues - Bruce Carlson, Ofc of Info Mgmt. Offered to meet w/staff. Pass onto resolu which wd ask them to investigate this area.

Discussion.

470 ~~Rogers~~

Position Statement: Supported HB 835.

PREVIOUS ACTION

HB 694

No previous action.

Statutory Reference: AS 39.25.120; AS 44.85

Action Taken: Rep. Rogers moved, page 3, line 3, to add a new Section 5, adopting the amendment proposed by Community & Regional Affairs, but increasing the figure to $200-million. Motion passed unanimously.

Rep. Gardiner moved to add an immediate effective date. Motion passed unanimously.

Rep. Gardiner moved CSHB 694 (I&C) be reported out of committee, as amended. Motion passed unanimously.

HB 835

No previous action.

Statutory Reference: AS 18.60

Action Taken: Rep. Gardiner moved, page 1, line 14, to change "13" to "9"; line 16, to change "6" to "4"; line 20, to delete (3); line 22, to delete (5); and page 2, line 29, to change "13" to "9"; and page 3, line 1, to change "6" to "4".

Rep. Rogers moved to amend Rep. Gardiner motion to delete, on page 1, subsection (4) and insert (5). Rep. Rogers withdrew his amendment. Rep. Gardiner withdrew his motion.

Rep. Gardiner moved, page 2, after line 26, to add a new subsection (5): "make recommendations on methods to reduce Alaska's high rate of aircraft accidents." Rep. Rogers asked unanimous consent. Motion passed without objection.

Rep. Rogers moved, page 2, line 3, to delete "his" and insert "the commissioner's" Motion passed by unanimous consent.

Rep. Rogers moved to amend the title and insert a new Section 3 at the end of the bill. Rep. Rogers withdrew the motion.

Rep. Rogers moved to report HB 835 out of committee with amendments attached. There being no objection, motion passed.

HB 882

No previous action.

Statutory Reference: AS 09.65

Action Taken: No action taken; Rep. Bylsma said the bill would not be heard as another bill had been passed which does what HB 882 would do.

ACTION NARRATIVE

Tape #34
Recording
Number 000

The meeting was called to order by Vice Chairman Bylsma at 1:09 p.m. Members present were: Reps. Bylsma, Gardiner, Randolph, and Rogers. Chairman Martin was absent. Rep. Bylsma said HB 882 would not be heard, as another bill had been passed which accomplishes what HB 882 would do. Rep. Bylsma directed the committee's attention to HB 694.

Number 011

Lee McAnerney, Commissioner of Community & Regional Affairs, and Chairman of the Alaska Municipal Bond Bank Authority, said she supported the bill. She recommended increasing the $150-million figure to $180-million, and proposed adding a new section.

Number 026

Rep. Gardiner asked if municipalities continue to use the bond bank. McAnerney said they do, and gave examples.

Number 036

There was discussion of raising the figure to $180-million, and of Bond Bank Authority functions. Rep. Rogers questioned whether the $1-million limit for the revolving loan fund was enough. McAnerney said it was, and that $180-million would be satisfactory. Rep. Rogers felt it should be higher so the limit did not need to be changed so frequently. McAnerney said $200-million was the figure she originally planned to use, but she said at this time they don't need more than $180-million.

Number 098

Rep. Rogers moved, page 3, line 3, to add a new section 5, adopting the amendment

proposed by Community & Regional Affairs, but increasing the figure to $200-million, so new section would read: "AS 44.85.180(c) is amended to read: (c) Notwithstanding the provisions of (a) and (b) of this section, the total amount of bond bank authority bonds and notes outstanding at any one time, except bonds or notes issued to fund or refund bonds or notes, may not exceed $200,000,000." Motion passed unanimously.

Number 107 — Rep. Gardiner moved to add an immediate effective date. Motion passed unanimously.

Number 113 — Rep. Gardiner moved CSHB 694 (L&C), as amended, be reported out of committee. Motion passed unanimously.

Number 138 — Rep. Bylsma brought HB 835 before the committee.

Number 141 — Jeff Barry, committee aide, said the bill sponsors had asked him to explain the bill. He gave background. Barry said an advisory council once existed, He believes everyone recognizes, after hearing testimony on HB 159, the value of labor and management working together. The bill would bring industry, labor, and government together at a low cost to discuss safety and health matters.

Number 168 — Glenn Lundell, Deputy Commissioner, Department of Labor, said he and Commissioner Orbeck were pleased that industry and labor wanted this bill enacted. He felt it would be a useful interchange of information. The department welcomes and endorses the bill, and looks forward to working with industry and labor in this endeavor.

Number 192 — Rep. Rogers felt 13 members was a big group. Rep. Bylsma questioned the need for the council. Lundell said the bill provides basis for considerable effort, and can serve as a catalyst for a safety conference. He mentioned the past efforts of the public in forming a council, which was disbanded because of a lack of interest on the part of state government. Bylsma felt that the former method might be better than involving a bunch of government employees. Lundell said there would be only one representative

of state government, one federal government representative, and one local government person involved, and that the other ten are from the public.

Number 235 — Rep. Bylsma asked if OSHA didn't cover what the council would do. Lundell felt the function was somewhat different. He said an advisory group could reflect the state attitude toward federal regulations.

Number 254 — Jean Kline, Alaska Chapter, Associated General contractors, said, regarding having 13 members on the council, that the prior committee was large, but extremely effective. She said the necessity of having government represented, keeping the labor input, and covering a broad cross-section of industry were the reasons for such a large committee. She asked that they keep the four labor representatives if they do pare the size of the committee. She said AGC supports the council because trade associations were requested by the President to take part in voluntary programs of safety compliance. She said an accident prevention program depends on the cooperation and support of labor and management groups, and she felt $20,000 was a cheap price to pay for such an effort.

Number 314 — Kline said that Tom Cashen, of IBEW, had asked her to relay his support of the bill, also.

Number 320 — Rep. Bylsma felt that the various facets of industry would not be covered, even with a large council. Kline felt that safety programs for many groups are the same. There was discussion.

Number 353 — Dwight Perkins, business manager, Plumbers & Pipefitters Union, Local 262 (representing Southeast Alaska), supported the bill. He thought that, with advertising, smaller groups would be represented and would be aware that they could comment to the council. He said the bill is needed, and he supported it.

Number 380 — Rep. Gardiner agreed with Rep. Rogers that the council was too big, and would not be efficient. He felt a smaller, more efficient group could better deal with

issues. He recommended appointing smaller, more specialized committees for specific problems.

Number 399 — Rep. Gardiner moved, page 1, line 14, to change "13" to "9"; line 16, to change "6" to "4"; line 20, to delete (3); line 22, to delete (5); and page 2, line 29, to change "13" to "9"; and page 3, line 1, to change "6" to "4". There was discussion. Lundell conferred with Kline--they felt it important that local government be involved, as they are not normally covered in programs relating to safety and health. He felt it more important to have local than state government represented.

Number 450 — Rep. Rogers moved to amend the motion to delete (4) and insert (5) on page 1. There was discussion. Rep. Rogers withdrew his motion to amend.

Number 494 — Jeff Barry, committee aide, said it is critical that the federal government be represented there. He said they have access to information and are willing--have even requested--to participate. He suggested looking at the labor aspect if they feel the number of council members is too large. He said the function is to recognize problems as they develop and suggest changes.

Number 534 — Rep. Gardiner withdrew his motion.

Number 540 — Rep. Gardiner moved, page 2, after line 26, to add: "(5) make recommendations on methods to reduce Alaska's high rate of aircraft accidents." Rep. Rogers asked unanimous consent. Motion passed without objection.

Number 580 — Rep. Rogers moved, page 2, line 3, to delete "his" and insert "the commissioner's". Motion passed without objection.

Number 588 — Rep. Rogers moved to amend the title and insert a new Section 3 at the end of the bill. There was discussion. Rep. Rogers withdrew the amendment.

Number 735 — Rep. Rogers moved to report HB 835 out of committee with amendments attached. Motion passed without objection.

Side B, Number 011 There being no further business to come before the committee, the meeting was adjourned at 1:56 p.m.

Absent: 3/8/82 HB 694 HB 882 HB 835 Tape # 34

1:09

000 Call to order by Byforna; said HB 882 won't be heard as another bill has been passed which does what 882 does

HB 694

011 Lee McAnerny, Comm, CHRA, & Chmn, At Muni Bond Bank Auth. Support bill except want $180M figure rather than $150M

44.85.180 (c) - add new section.

026 Gardiner asked if municipalities continue to use Bond Bank; McA said they do, & cited examples.

036 Discussion of raising figure to $180M & of Bond Bank functions

~~McAnerny said original intent of bill was [illegible] explained orig'l intent of bill~~

064 Rogers gotnd $4M ~~figure~~ limit for revolving loan fnd was enough; McA said it was, & that $180M will be satis. Rogers felt it shd be higher so ~~it~~ limit did not need to be changed so frqly. McA said $200M was figure she originally planned to use, but don't at this time need more than $180M.

098 Rogers mvd, p3. l.3, add new sec 5, adopt amdmt prop'd by CHRA, but inc. figure to $200M. Passed unan.

107 Gardiner ~~at~~ moved to add immediate eff. date. passed unan.

113 Gard moved CSHB694 (L&C) be reported out of comm. Passed unanimously.

HB 835

138 Byforna brings HB 835 before comm.

141 Jeff Barry said sponsors asked him to explain bill. Gave background - Advisory council once existed, ~~but~~ Believes everyone recognizes, after hearing testimony on HB 159, value of labor & mgmt working together. Bill wd bring industry, labor, & govt together at a low cost

to discuss safety & health matters.

168 Glenn Lundell, Dep Comm, Dept Labor — he & Orbeck were pleased and & labor wanted this bill enacted. Useful interching of info. Dept welcomes & endorses bill, & looks forward to wk w/ ind & labor in this endeavor.

192 Rogers felt 13 members was a ~~t~~ big group.

198 Bylsma questioned need for Council
Lundell said bill provides considerable effort & can serve as catalyst for a safety conference. Mentioned past efforts of public ~~to~~ in forming council, which disbanded because of lack of interest by govt. Bylsma felt might be better that former method might be better than involving a bunch of govt emp's. Lundell said only 1 fm st, 1 fed, & 1 local govt people involved; other 10 are fm public.

235 Bylsma asked if OSHA didn't cover what council wd do. Lundell felt function was somewhat different; advisory grp can reflect state attitude on fed's regns.

254 Jan Kline, Atty, AGC — re a reading 13 members — prior committee was large (went over composition of prev. comm) — comm was extremely effective. Necessity of having govt, ~~Ref~~ keeping labor input, & broad X-section of industry ~~to~~ were reasons for such a lge comm. Asked they keep 4 labor reps if they do pare size of comm. trade assns were requested by President to take part in AGC supports because a voluntary pgm of safety compliance ~~Safe~~ Accident prevention pgm depends on coop'n & support of labor & mgmt grps. $20,000 cheap price to pay for such an effort.

314 Tom Cashen, IBEW, asked Les to relay his support, also.

330 Bylsma, re representtn – 6 fm industry – various facets of ind may not be covered. Kline felt safety pgms for many are much the same.
Bylsma felt, re labor ~~rep~~ representation, that many small businesses (non-union) wd be ignored.

353 ~~Don~~ Dwight Perkins, Wrangell, Plumbers & Pipefitters Union Local 262 (SE AK) – supports bill. Thought with advertising, smaller ~~com~~ gps wd be represented & wd be aware of Council to bring comments to. Bill is needed & they support it.

380 Gard – agreed w/Rogers re size of comm (being too big) – not efficient. Smaller, more efficient gp can better deal w/issues; can appoint smaller, specialized committees for specific problems.

Gardiner

399 ~~Lockard~~ moved:

p. 1	l. 14	Chng 13 to 9
	l. 16	6 to 4
	.20	delete (3)
	22	delete (5)
p. 2	l. 29	Chng 13 to 9
3	l. 1	6 to 4

421 Discussion.

Tunnell conferred w/ Kline – important that local govt be involved as they aren't normally covered in pgms relating to safety & health. More imp to have local than state govt rep'd.

450 Rogers mvd to amd amdmt to delete (4) & insert (5) (p. 1)

Discussion. Rogers w/drew amdmt to amdmt.

494 Barry – critical that fed govt rep be there – NIOSH & MESA ~~roga~~ roga. also impact state (aside fm OSHA) – have access to info & are willing, even have requested, to participate. Suggested looking at labor aspect if they feel it is too large. Function is to recognize probs as they develop & suggest chngs.

534 Gard w/drew amdmt.

Gardiner moved,

540 p. 2 l 26 + 27, add:

(5) make recommendations on methods to reduce Alaska's high rate of aircraft accidents

Rogers asked unan consent; passed.

580 Rogers p 2, l. 3, delete "his", insert "the commissioner's" passed by unan consent

Rogers moved to

588 Amend title + insert sec 3 at end of bill

Discussion. Rogers went over action he brought to his attn that needs correcting by statute.

726 Rogers w/drew amdmt.

735 Rogers moved to report out HB 835 with attached amdmt.

Side B

006 passed w/o objection with amendments.

011

IN THE HOUSE

BY THE RULES COMMITTEE BY
REQUEST OF THE GOVERNOR

HOUSE BILL NO. 694

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the Alaska Municipal Bond Bank Authority."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 39.25.120 is amended by adding a new paragraph to read:

(20) employees and agents, other than the executive secretary and legal counsel, of the Alaska Municipal Bond Bank Authority.

* Sec. 2. AS 44.85.070 is amended to read:

Sec. 44.85.070. STAFF. The bond bank authority shall employ an executive secretary who may with the approval of the bond bank authority select and employ additional staff as necessary. Employees and agents of the bond bank authority other than legal counsel and the executive secretary are in the partially exempt [CLASSIFIED] service under AS 39.-25. In addition to its staff of regular employees, the bond bank authority may contract for and engage the services of the bond counsel, consultants, experts, and financial advisors the bond bank authority considers necessary for the purpose of developing information, or conducting studies, investigations, hearings or other proceedings.

* Sec. 3. AS 44.85.100(b) is amended to read:

(b) The bond bank authority shall include in the report required by (a) of this section an estimate of the amount of revenue bonds of the bond bank authority to be issued during the fiscal year following the fiscal year in which the report is submitted [12-MONTH PERIOD]. The bond bank authority may not issue revenue bonds, other than refunding bonds, in excess of $50,000,000 during any 12-month period beginning after

amendments

June 30, 1981, unless the legislature, by law, approves the estimate required by this subsection for that 12-month period.

* Sec. 4. AS 44.85 is amended by adding a new section to read:

Sec. 44.85.165. MUNICIPAL BOND BANK REVOLVING LOAN FUND ESTABLISHED. There is established in the Department of Revenue a municipal bond bank revolving loan fund. The municipal bond bank revolving loan fund consists of money appropriated to it by the legislature. Principal payments on a loan made under this section shall be returned to the bond bank revolving loan fund. Interest payments on a loan made under this section shall be transferred to the general fund as provided by AS 37.-10.050 -- 37.10.060. The bond bank authority may make loans to municipalities from the municipal bond bank revolving loan fund. A loan made under this section

(1) may be used only for

(A) expenditures authorized to be paid from revenues of a municipal bond issue if the bonds have been authorized as required by law but have not been sold;

(B) expenditures authorized under a grant from the state or federal government made after the grant is authorized but before it is received; or

(C) expenditures authorized by a municipal governing body in anticipation of tax revenues expected to be received during the period of the loan;

(2) shall be for a period of one year or less;

(3) may not exceed an amount which, when added to the borrower's outstanding aggregate municipal bond bank revolving loan fund balance, totals $1,000,000, and

(4) shall bear interest at a rate which is approved by the bond bank authority by resolution and which is not less than the market

rate which the authority would have to pay at the time of the loan for notes issued for a similar purpose.

— add new Sec. 5 — see attached

— add immediate effective date.

HB 704

SB 353

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
March 10, 1982
2:38 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Randolph

Members Absent: Rep. Gardiner
Rep. Rogers

COMMITTEE CALENDAR

CSHB 704 (L&C) — An Act continuing the existence of the Real Estate Commission and amending the statutes relating to the commission's responsibilities; and providing for an effective date.

HB 866 — An Act establishing a special investment tax credit; and providing for an effective date.

SB 513 — An Act relating to the athletic commission; and providing for an effective date.

WITNESS REGISTER

George Krusz, President
Alaska State Chamber of Commerce
310 2nd Street
Juneau, Alaska 99811
586-2323
Position Statement: Supported concept of HB 866; suggested changes.

PREVIOUS ACTION

CSHB 704 (L&C) — See minutes of 3/1/82 (bill was amended and committee substitute drafted).

Statutory Reference: AS 08.03.010(c)(18); AS 08.88.221; AS 08.88.401.

Action Taken: Rep. Randolph moved CSHB 704 (L&C) be adopted and reported out by unanimous consent. There being no objection, motion passed.

HB 866 — No previous action.

Statutory Reference: AS 43.20.036

Action Taken: No action taken.

SB 513

Senate Action: First reading 4/24/81; reported out of Senate Labor & Commerce 2/10/82 with letter of intent. Reported out of Rules 2/15/82. Taken up immediate on Senate floor 2/15/82; Labor & Commerce letter of intent adopted in second reading. Advanced to third reading by unanimous consent. Passed Senate 2/15/82, with effective date vote same as passage.

House Action: Referred to Labor & Commerce 2/16/82.

Statutory Reference: AS 05.05.010(a)

Action Taken: No action taken. Rep. Randolph suggested putting bill aside until Administration explains need. Committee agreed.

ACTION NARRATIVE

Tape #35
Recording
Number 000

The meeting was called to order by Chairman Martin at 2:28 p.m. Members present were: Reps. Martin, Bylsma, and Randolph. Members absent were: Reps. Rogers and Gardiner.

Number 010

Rep. Martin directed the committee's attention to CSHB 704 (L&C). Amendments were approved individually by committee members. Rep. Martin requested the committee adopt the committee substitute and report the bill out by unanimous consent. Rep. Randolph so moved. There was discussion. There being no objection, the motion passed.

Number 046

HB 866 was brought before the committee for consideration.

Number 051

George Krusz, president, Alaska State Chamber of Commerce, gave background on the Chamber--membership, geographic representations, etc. He supported the concept of the bill, but felt the bill should not be limited to exclude the oil and gas industry and other Alaska businesses.

He supported the bill, but wanted participation of all Alaska businesses. Rep. Randolph asked if Krusz had prepared a recommended amendment. Krusz said he had not.

Number 091

Jeff Barry, committee aide, said the Department of Revenue opposed the bill, and that they had prepared a financial statement that showed a $22-million fiscal impact this year. He said their objections were that currently, credit allowed is 18% of federal tax credit, up to $20-million; this could totally eliminate taxes for large corporations.

Number 125

Rep. Randolph requested figures for including other industries, separately and as a whole. There was discussion of fiscal impact.

Number 160

Rep. Martin brought SB 513 before the committee, and explained the bill. He said, regarding the fiscal note, that the Alaska baseball organization wanted money to travel. Rep. Randolph suggested putting the bill aside until the Administration explains the need. The committee agreed.

Number 192

There being no fur ner business to come before the committee, the meeting was adjourned at 2:45 p.m.

HB795

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
March 11, 1982
1:48 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Gardiner

Members Absent: Rep. Rogers
Rep. Randolph

COMMITTEE CALENDAR

HB 794 — An Act relating to sales practices of motor vehicle dealers.

HB 795 — An Act relating to motor vehicle rustproofing services; and providing for an effective date.

WITNESS REGISTER

Jim Welch
Rust Control
2529 Scott Drive
Juneau, Alaska 99811
Position Statement: Testified about impact of HB 795 on his business.

Ralph Bennett
testified on his own behalf
c/o House Finance Committee
Pouch V
Juneau, Alaska 99811
465-3877
Position Statement: Went over problems he foresaw with HB 795.

Robert Evans
Consumer Protection Agency
Department of Law
1049 West 5th Avenue
Anchorage, Alaska
279-0428
Position Statement: Suggested amendments to HB 795.

PREVIOUS ACTION

HB 794 — No previous action.

Statutory Reference: AS 45.45; AS 45.50

Action Taken: No action taken.
Teleconference hearing set for March 30.

HB 795

No previous action.

Statutory Reference: AS 45.45; AS 45.50

Action Taken: No action taken.
Teleconference hearing set for March 30.

ACTION NARRATIVE

Tape #36
Recording
Number 000

Rep. Martin began taking testimony at 1:25 p.m., but meeting was not called to order until 1:48 p.m. for lack of a quorum. When Rep. Rogers arrived at 1:48, meeting was called to order. Members present were: Reps. Martin, Bylsma, and Rogers. Members absent were: Reps. Randolph and Gardiner. At the time of call to order, testimony was being taken on HB 795.

Number 012

Jim Welch, owner of Rust Control, Juneau, went over problems he had with the bill. (Welch submitted written testimony, which is available for review from the committee.) He felt requirements for warranties were not specific enough. He did not like the provision regarding warranting rustproofing on used cars. He said he had never run across a provision such as the one providing for claims service in case a business is terminated. There was discussion.

Number 135

Welch suggested warranting rustproofing on a vehicle sold by the original owner by charging a fee to transfer the warranty. Welch went over the bill, section by section, listing problems he found with the bill.

Number 300

Rep. Rogers arrived, and the meeting was formally called to order.

Number 322

Welch resumed testimony. He discussed the impact of the bill.

Number 443

Jeff Barry gave a sectional analysis of HB 795. He said rustproofing is an $11-billion a year industry. The problem is that many times, businesses who claim to be doing

rustproofing are not actually providing that service. He gave the example of new car dealers requiring consumers to purchase rustproofing with a faulty warranty. He spoke of needing a clear warranty on rustproofing of used cars. Barry went through the purpose of the bill. There was discussion of the definition of rustproofing and of undercoating.

Number 677 — Barry went over how the warranty periods were arrived at. He said, regarding liability amount, that the consumer would be recompensed for the amount of damage, not the amount paid for the service. He said the basis of the bill is to protect people in the market from "fly by night" outfits, and to protect the consumer. There was discussion.

Side B, Number 016 — Ralph Bennett, representing himself, said, regarding indemnification, that he thinks this is intended to use the past problem with mobile homes as a model. He thought the part dealing with used vehicles was bad legislation. He felt the inspection portion under (c)(2) was put in because of past car manufacturers warranties that required the consumer to spray wheel wells, which was found in court to be unreasonable. Rep. Rogers said this section came from the attorney general's office, because of a problem with businesses requiring consumers to come in on exact warranty inspection dates.

Number 084 — Bennett said there should be nothing in a warranty voiding the warranty after a claim has been made. Rep. Rogers commented on this point in a sample of a warranty which was passed out to the committee. There was discussion.

Number 105 — Robert Evans, Consumer Protection Agency, said, regarding used cars being impossible to protect, that he is not sure that is so, but at least rustproofers should be required to notify consumers they can't guarantee rustproofing. He referred the committee to the memo written by the Consumer Protection Agency, which contained suggested amendments (this memo is available for inspection from the committee).

Number 144

Rogers asked about the wording, "from the inside out" in one of the proposed amendments. He felt this was too vague. There was discussion. Rep. Rogers suggested possibly saying, "non-painted side to the painted side", or "form the side of the metal to which the rustproofing is applied". Evans went over the proposed amendments. The committee discussed the proposed amendments.

Number 311

Rep. Bylsma asked where the complaints are coming from. Evans said they have been involved in industrywide investigation--contacted other states, found where problems are occurring. They want to be prepared for problems as the industry grows in Alaska. He said the complaints come from people within the rustproofing industry who are concerned with maintaining quality, and from agencies in other states. Evans said there have been no substantial consumer complaints yet, but that salt and calcium, which induce rust, have not been used on roads for long.

Number 354

Rep. Martin directed the committee's attention to HB 794. Evans suggested modifications which involve deleting some language. He said that, unless amended, the bill would apply to specially ordered vehicles. He felt the intent of the bill is to prevent option loading by a dealership prior to purchase by the consumer. He said that when a dealership has the option to add accessories without checking with the purchaser, the purchaser is put in an unfair position. He said the problem exists because, in other places, consumers have an alternative--they can go to another dealer. But in Alaska there is generally no other place in the market area to go. He said a second effect, because option loading injures other competitors, is that this would open the market. The bill as drafted narrowly limits the effect of option loading; it only applies to the consumer who special orders a vehicle and has it delivered to him. Evans went over suggested changes.

Number 549

Rep. Bylsma asked about charging for dealer preparation. There was discussion as to what that is (no one knew). Bennett said Article 6, section (2) "applicable federal

laws" needs to be clarified. He said dealer preparation is often not specified, or the dealer is not made aware what is being provided. He said this needs clarification. There was discussion.

Number 645

Rep. Martin announced a night meeting to discuss HB 832. He asked committee staff to set a teleconference hearing on House Bills 794 and 795, and to notify all new auto dealers of the hearing.

Number 726

There being no further business to come before the committee, the meeting was adjourned at 2:58 p.m.

March 11, 1982

To: Rep. Terry Martin, Chairman, House Labor and Commerce Committee

From: Philip C. Blackstone, President
Endrust of Alaska, Inc.
4651 Stuart Way
Anchorage, AK 99503 279-3061 (w)

Dear Rep. Martin:

In talking with your office this morning, we are surprised to say the least that HB 795 is up for discussion in your committee today. We found out about this pending legislation late yesterday afternoon and quite by accident at that. One would think that with only three or four companies in the state of Alaska that are in the business of rustproofing vehicles, we would be advised as to possible legislation and asked for our comments and input.

We would be most agreeable to appear before your committee in person or via a teleconferenced hearing, but because of the lack of notice, please accept the following and make it part of the record.

I understand that this legislation is at the request of the Consumer Protection Bureau. Our company has been rustproofing vehicles in Anchorage for almost three years and I have no knowledge of any complaints filed with Consumer Protection. They, Consumer Protection, or any of our customers have never taken exception to our warranty policy, our free annual check-ups, our full repair and unlimited claims, and our grace period for the no-charge yearly cleaning and touch-up.

This bill as written imposes a lesser warranty in some cases than we currently offer. In other areas it imposes restrictions which would be impossible for any rustproofing company, in good conscience, to stand behind. Of the approximately sixty rustproofing companies nationally, there is not one company that does not require annual inspections. If a vehicle is rustproofed, and then driven on all the rock and gravel roads in Alaska, it only follows that the rustproofing material in the wheel wells is going to be torn apart over time and needs to be touched up periodically. This service we offer all of our customers -- and at no charge. We have never charged anyone for an annual inspection.

Again, we are very surprised by this pending legislation. We believe there are facts that need to be presented to your committee before this legislation is voted upon. And we are that with such a small population of companies offering this rustproofing service in Alaska that we have not been notified that this legislation was being considered.

Sincerely,

Philip C. Blackstone, President

cc: Rep. Joe Hayes
Rep. Joe Montgomery

March 9, 1982

Gentleman:

As owner and operator of Rust Control which is a complete automobile and truck Rustproofing Service here in Juneau, I feel I must present to you how House Bill No. 795 would affect a small business such as mine.

I will respond to only Section 45.45.241.

(b) 2
I believe the supplier should be liable for a rust-out condition but only to the extent of the Consumers Total Investment in Rustproofing. Also there are many vehicles which have structural defects (such as a brace welded inside a fender) and there is no possible way to rustproof an area like this.

The length of a warranty for new cars should be left to the discretion of the applying dealer. The consumer is not obligated to deal with a supplier whose warranty he doesn't approve of.

It would be suicidal for our business to warranty all used vehicles. This would depend on where the vehicle came from, how long it has been there, how much it was driven, where it's been kept (garage or outdoors) and how old the vehicle is. Occasionally we rustproof a vehicle which is already starting to rust-out. The customer is usually aware of this and if not we bring it to his attention. His usual comment is "I just want to get another year or two out of it."

This would eliminate a large part of our used vehicle business because we would be unable to determine just how close many of them are to a rust-out condition, especially in hidden or boxed in areas.

(b) 4
What does a consumer do if any small business goes out of business for any reason? Also Consumer Protection is a great avenue.

If the Rustproofing industry has to state procedures for claims service etc. I propose "all" automotive related business's such as; Service Stations who have Mechanics on duty, small garages and small independent Car Dealers be subject to the same.

(b) 5
Who is deciding business policy for a business? The Businessman or the State? I repeat, if the consumer does not agree with our warranty he is not obligated to use our service.

(c) 1
I feel the limit or number of claims should not exceed the total investment of the rustproofing.

(c) 2
We require a vehicle on warranty be inspected at 2 years or 20,000 miles as this gives us a chance to respray any areas which the material may have been scraped off underneath and check all areas of the vehicle. Also if there is any sign of rustout we can make the necessary repairs before the damage is extensive.

(d) a
The consumer knows when he receives his warranty what the conditions are. It is his responsibility to bring the vehicle back on the proper date for his inspection.

(g)
Most small business's DO NOT HAVE $5000.00 to just put in an interest bearing account.

If rustproofing services should be subjected to this, all automotive related business's should be included.

Again; Consumer Protection is fully capable of taking action in the consumers behalf if he has a legitimate complaint.

Jim Welch

MEMORANDUM State of Alaska

TO: Terry Martin
Chairman
House Labor and Commerce
Committee
Juneau

DATE: March 10, 1982

FILE NO:

TELEPHONE NO: 279-0428

SUBJECT: House Bill 795
Motor Vehicle Rustproofing

FROM: Connie J. Sipe
Assistant Attorney General
Chief, Consumer Protection
Section
AGO/Anchorage

The Consumer Protection Section of the Office of the Attorney General strongly supports House Bill 795, and urges this committee to give it a "do pass" recommendation. The bulk of our testimony submitted today suggests some important technical and language changes which would make this an even better bill. The changes are meant to clear up areas of ambiguity. With those changes, the office believes the bill is a good one.

The Consumer Protection Office supports the bill because, although consumer problems with rustproofing of vehicles has not yet been a major problem within the State of Alaska, and although there are only two or three retailers now representing major rustproofing companies within the state, rustproofing or related services have had and will have an increasingly important economic impact on Alaskans.

It is the belief of both this office and the industry representatives to whom we have talked, that more and more sellers will be entering the rustproofing market, and that more and more Alaska consumers will opt to purchase rustproofing. As consumers become aware that salt and/or liquid calcium are being used on winter roads in the Anchorage and Juneau areas, and as they become more sensitive to their own economic need to retain a new automobile for a longer period of time, we believe more consumers will be purchasing rustproofing.

Major rustproofing representatives only started selling in Alaska in the last three to five years; therefore, it is not unusual that we have not had great numbers of problems reported by consumers to date. However, we do believe there may be some deceptive advertising of warranties of rustproofing services going on at the present time, but consumers will not be aware of these problems unless the application to their vehicle proves defective and they must make a claim on their warranty in the years to come.

Alaska is not alone in its concern about rustproofing. Other cold weather, snow-belt and coastal states have examined rustproofing problems and the rustproofing industry in depth, and I would refer the committee to the pamphlet called "Rust Never Sleeps" put out by the Maine Attorney General's Office. This pamphlet gives an excellent discussion of the industry and of consumer concerns.

These other states have found that most problems in the rustproofing area are related to, and perhaps the crux of the entire problem is, the warranty given by a rustproofing seller. When our office looked into the rustproofing industry in Alaska, we found evidence that some of these potential warranty problems exist here.

The warranty on rustproofing service is the essential value of the service. The reason for which a consumer pays a sum of money to get his or her car rustproofed is not for the first immediate service, but for the protection offered by the warranty which will repair or replace any portion of the car which rusts out. Therefore, these warranty-related problems go to the very essence of the commercial value of a rustproofing service.

The major problems that have been found in rustproofing warranties, which problems are addressed by this bill, include:

1. Deception regarding warranties, such as the advertising of warranties as being "lifetime" when in fact the warranties are not transferable to a second owner, or the warranty is good only for one repair. In fact, it is interesting to note that in the fine print of several national rustproofing warranties, the consumer is in a double-bind. He is required to bring the vehicle in for repair upon the first small spot indicating rust, but in another paragraph, he will be excluded from any second repair once the first small spot has been fixed, despite the fact that the initial advertisement claimed that this was a "lifetime" warranty against rust.

House Bill 795 attempts to cure this problem by placing a reasonable limit on the period of time and the transferability of an auto rustproofing warranty. An industry representative has given us his professional opinion that, at least in the current state of technology, a claim that a rustproofing process (other than some new alloy which may be developed in the future by auto manufacturers) cannot reasonably guarantee that it can rustproof a car any longer than seven years. Similarly, any company which could not guarantee against major rust when applied to new automobiles for at least three years, is not fairly competing in the "rustproofing" industry.

2. Unreasonable warranty conditions. Many of the national warranties require consumers to fulfill certain conditions to keep their warranty valid, such as requring the consumer to bring

the auto back on exactly the one-year anniversary date of the first rustproofing application; or giving the sloppy applier a loophole because the warranty proclaims that it only is good as to those sections of the car where the rustproofing sealant was "actually applied." In other words, if the applier skipped a wheel-well altogether, the consumer's warranty does not cover the rusted-out wheel-well.

Maine, New York and other states, as well as some industry representatives, have told us that they have heard that some rustproofers may use a poorer quality or a diluted sealer compound, but misrepresent that they are using a national brand-name rustproofing compound of a certain chemical quality or characteristic. Also, there are often problems with poor application of the sealant to all of the necessary areas of the automobile.

3. Finally, our office has seen evidence in Alaska of deception by auto dealers and sellers of other processes that are clearly not rustproofing. During an industry-wide investigation of the Alaska motor vehicle sales industry over the last two years, our office has found that many dealers apply an "undercoating" to the bottom surface of all their motor vehicles, before they are placed on the showroom for sale. (This will be also discussed in conjunction with House Bill 794.)

The undercoating is a tarry or plastic substance, which is spread on the bottom of the vehicle, and which can be scratched off the metal, as it does not actually bond to the metal like a rust-proofing compound. Also, the undercoating is not actually a rust inhibiter, except to the extent that it covers the metal. If the undercoating surface is scratched, cracked or broken, rust can actually get started under the undercoating and spread, causing a worse condition than if the undercoating had never been applied. It was the experience of the Consumer Protection Office that dealers and their sales people often misrepresent, whether deliberately or negligently, that the undercoating is a "kind of rustproofing," or represent that the customer still has the option of having their new car rustproofed without disclosing that the already applied undercoating will prevent full rustproofing.

It has been the experience of other states that the rustproofing industry is an easy market to enter, and that a bond or some way of tracing legal responsibility to the supplier of rustproofing who claims that the services will guarantee against rust "for the life of the car" might be necessary. For this reason, the bonding provisions were included. However, even without the bonding provisions, we believe that the rest of the act would assure that the rustproofing industry in this state and other sellers of related auto products deal fairly with the Alaska public.

The committee will probably note that the bill suggest that enforcement of the rustproofing act be accomplished by incorporating the rustproofing act as an unfair and deceptive trade practice or unfair method of competition, under AS 45.50.471. Our office feels that we can handle that sort of enforcement, as we already are the agency to which such complaints are directed; and the type of deceptive advertising prohibited, whether directly deceptive or deceptive by omission of material facts, is within our area of experience and expertise. We do not believe that we would need any additional staff to enforce this law, especially as our auto repair investigator position is filled by a person who is familiar with these problems and can work on any large-scale enforcement action.

SUGGESTED LANGUAGE CHANGES

We urge the following amendments to the current bill:

1. The bill should be amended throughout so that the word "supplier" is replaced with the words "retail seller." The bill is meant to apply to retail sellers of rustproofing services, not to the wholesale supplier of the rustproofing compound to the rustproofing franchisee (the actual retail seller who applies the material to the auto).

2. Section 45.45.241(a) should be amended to read as follows:

> (a) A retail seller of motor vehicle rustproofing service shall warrant to the consumer that the service will prevent rust or corrosion, from the inside out, in the portions of the motor vehicle covered by the rustproofing warranty.

This change clears up some problems with the present language which requires that the warranty cover those portions of the motor vehicle to which the rustproofing service "is applied." This is a loophole for sloppy retail sellers who simply don't "apply" the rustproofing service to crucial parts of the vehicle. Also, this amendment clarifies that rustproofing is meant to be rustproofing from the inside out. In other words, rust rarely eats all the way through the metal when the rust starts on the outside of the vehicle, and since rustproofers do not apply any materials to the outside of the vehicle, they are not warranting against rust from the outside to the inside of a door panel. Rather, what the rustproofer is warranting is that the materials sprayed up inside the door panel will prevent rust from starting inside the door panel, where moisture does accumulate, and rusting through to the outside of the door panel.

3. The definition section, 45.45.241(h) should be amended to add a definition of "retail seller of rustproofing services," specifically:

> a person who adds rustproofing service to a vehicle other than at the point of manufacture of the particular vehicle.

Such a definition would make it clear that the bill does cover dealerships or regional distributors (who distribute cars to local dealerships). The bill should include these folks if they add rustproofing before they sell a vehicle. The bill should not try to regulate or in any way discourage rustproofing that is now being provided by some national manufacturers as "factory supplied" rustproofing.

4. The bill should be amended by adding a new section which requires that on the face of each warranty, the retail seller shall specify, by manufacturer's name and product identification number, the rustproofing sealant actually used on each customer's vehicle. (This provision would enable the customer who has a dispute over a rusting vehicle, or the auto repair investigator, to determine by a chemical analysis, whether the retail seller used the brand-name chemical compound advertised. We have received reports, both in this state and from other places, that some shops may substitute a different, perhaps less expensive, rustproofing compound.)

5. The bill should be amended by expanding Section (2) to read::

> AS 45.50.471(b) is amended by adding two new paragraphs to read:
>
> (26) failing to comply with AS 45.45.241.
>
> (27) any person to represent, in connection with the sale of new motor vehicles, that a particular vehicle is rustproofed, or has been given any type of rust or corrosion protection, unless such representation is substantiated by a manufacturer's rustproofing warranty or the retail seller of the motor vehicle is a retail seller of rustproofing services as defined in AS 45.45.241 who offers a rustproofing warranty in compliance with that section.

6. Section (1), AS 45.45.241(c)(2) could probably be stricken altogether since Section (d) is probably enough protection against unreasonable demands on the consumer who is trying to keep his warranty valid.

7. Section 45.45.241(c)(2) should be replaced with:

> (a) require that the motor vehicle be inspected to validate the warranty unless any cost of inspection or pre-inspection preparation to the vehicle is conspicuously disclosed before the service is purchased as well as in the written warranty.

8. Section 45.45.241(b)(2) should be amended by changing the word "indemnification" to the word "reimbursement."

9. Section 45.45.241(b)(3) should be amended to read:

> include "all motor vehicle body sheet metal, structural members, frame components and appropriate suspension components."

10. A change is necessary at Section 45.45.141(h)(3), the definition of rustproofing services, to clarify that the bill is talking about a warranty both on the rustproofing process or services itself, and on the chemical sealant or the "goods" (as the law defines them) that are used in the service. I would suggest the insertion of a clause so that the definition reads:

> (3) "rustproofing service" means a service or process, incuding the goods used in that service or process, that is represented to be for the purpose of preventing, inhibiting, or retarding rust or corrosion of any part of a motor vehicle;

11. Section 241(g), the section on bonding, should be amended to delete the word "performance" wherever it appears. When George Cada discussed this with the insurance companies, the companies said it was unlikely they would issue such a "performance" bond. The section should be amended to refer to the bond as a "rustproof supplier's bond," or similar language. Apparently the bonding industry is willing to bond a "dealer's" bond, just not a "performance" bond.

12. One last concern, for which we did not make any suggested language change, is whether or not a provision should be included that protects the small local retail seller, the franchisee who perhaps gets sent defective rustproofing sealant by the national manufacturer. If the committee wishes to do so, we agree that it

would be reasonable to provide some kind of indemnification for the local dealership against the manufacturer who misrepresents the quality, properties, or chemical composition of any of the sealant which it supplies, on a wholesale level, to the retail seller of rustproofing goods and services.

Meeting officially called to order 1:48 pm

3/11/82 HB 794 HB 795

Tape #36

1:25

000 ~~Call to order~~ Began taking testimony; not formally called to order for lack of quorum.

HB 795

010 Jim Welch — submitted written testimony. Went over problems he had with bill. Felt requirements for warranties were not specific enough. Did not like provision regarding rustproofing warranting. on used cars.

078 Bylsma asked if it were not possible to be unaware of some rusted places on used cars. Welch said it was.

095 Welch said he'd never run across a provision such as the one providing for claims service in case of business is terminated.

Discussion, Bylsma - Welch

135 Welch ~~felt a better way of~~ suggested warranting rustproofing on a vehicle ~~as~~, sold by the original owner ~~to be~~ by to charging a fee to transfer warranty.

Went over bill section by section listing problems in bill.

300 (Rep. Rogers arrived 1:48) Meeting formally called to order

317 Ralph Bennett offered his comments after Welch is finished.

322 Welch resumed testimony. Discussion of impact of bill.

443 ~~Robert Evans, Dept of Law~~ Jeff Barry – sectional analysis of bill.

$118/yr industry. Prob is that many times businesses who claim to be doing rustproofing aren't. eg, new car dealers — consumer required to purchase rustproofing with faulty warranty. Spoke of needing clear warranty on rustproofing of used cars.

~~Purpose of this is to~~ Went through purpose of bill.

~~Rogers had~~ Discussion of definition of rustproofing. Discussion of definition of undercoating.

677 Barry ~~said Underwriters to consumers~~ went over ~~chart~~ how warranty periods were arrived at. Amt of money – if ~~w~~ purchased this, they are recompensed for amt of damage, not amt pd for svc.

Side B

005 Basis of bill is to protect people in market fm "fly by night" outfits, & to protect consumer.

Discussion.

016 Ralph Bennett, rep'g self, ~~Assn of Unification~~ Ct Stat – thinks ~~of~~ Litchfield to use past mobile homes problem as model. (Went over that prob.)

040 thinks Part dealing w/used vehicles is bad legislation.

058 Inspection portion under (c)(d) was put in because of past car mfrs warranties that required consumer to spray wheel wells. This was found in ct to be unreasonable. Rogers said, AG came bfr us, with ~~people~~ business requiring consumer to come in on specified warranty dates.

084 Bennett Re – shd be notice in warranty voiding warranty after a claim has been made.

Rogers commented on this point in a warranty passed out to the committee Discussion.

105 Robert Evans, Dept of Law – re used cars being impossible to protect – not sure that's so, but at least rustproofers shd be req'd to notify consumer they can't guarantee rustproofing. Referred to state's memo (written by Consumer Protection Agency) which had suggested amdmts.

144 Rogers asked abt wording, "fm the inside out" in one of the prop'd amdmts; felt this was too vague. There was discussion. Rogers ~~suggested~~ possibly "non painted side to the painted side" or "from the side of the metal to which the rustproofing is applied"

Evans went over the prop'd amdmts. Committee discussed ~~Rep Byrd~~ these proposals.

311 Rep Byrd asked where complaints are coming fm. Evans said they have been involved in industrywide investigation – contacted other states, found where probs occurring; want to be prepared for problems as industry grows in Alaska. Complaints come fm people w/in rustproofing industry concerned w/ maintaining quality; fm agencies in other states; & no substantial consumer complaints yet, but sacf & calcium have not been used for long.

HB 794

354 Rep Martin turned to HB 794.

360 Evans – Suggested modifications which involve deleting some language. As amended, bill wd apply to specially ordered vehicles. Intent of bill is to prevent option loading by dealership prior to purchase by consumer.

When
Dealership has option to add accessories w/o ckg w/ purchaser, purchaser put in unfair posn. Prob exists because, ~~in~~ in other places, consumers have alternativ~~s~~ ~~to dlrs~~ can go to another dealer. In Alaska, no ~~place~~ other place in market area to go. ~~Bill is~~ Second effect - because option loading injures other competitors, this wd open market.
Bill as drafted ~~is~~ narrowly limits effect of option loading — only applies to consumer who special orders vehicle & has it delivered to him.

461 Went over suggested changes.

549 Bylsma asked abt charging for dealer preparation. There was discussion as to what that is (no one knew). Bennett said Article 6, sec (2) "applicable fed'l laws" needs to be clarified. Dealer prep is often not specified, or dealer is not made aware what's being provided. Needs clarification. Discussion.

645 Rep Martin announced next mtg Mon 3/15(?) 7pm.
Set telecons for Jnu, Anc, Fbx; circ prop'd amdmts in wkdrft; send wires to all new auto dealers re on HB 794.
Set telecons after 3/23

BY THE LABOR AND COMMERCE COMMITTEE BY REQUEST

HOUSE BILL NO. 794

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to sales practices of motor vehicle dealers."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 45.45 is amended by adding new sections to read:

ARTICLE 6. REGULATION OF MOTOR VEHICLE DEALER SALES PRACTICES.

Sec. 45.45.300. PROHIBITED MOTOR VEHICLE SALES PRACTICES. (a) A dealer may not require a purchaser ~~who orders~~ of a new motor vehicle ~~for delivery~~, as a condition of the sale, to

(1) purchase a special feature, appliance, piece of equipment, part, or accessory refused by the purchaser that is not included as standard equipment by the manufacturer of the vehicle provided (see note); or

(2) pay transportation costs in excess of those disclosed under applicable federal laws, except for delivery costs actually incurred and paid by the dealer.

(b) Violation of a provision of this section is a deceptive trade practice under AS 45.50.471.

+ new Sec 3.

Sec. 45.45.390. DEFINITIONS. In AS 45.45.300

(1) "dealer" means a person or an agent, broker, or salesman of a person who is engaged in buying, selling, or dealing in new motor vehicles;

(2) "motor vehicle" means a vehicle that is self-propelled, except for a vehicle that is propelled by human or animal power, and includes an automobile, truck, tractor, or semi-tractor.

* Sec. 2. AS 45.50.471(b) is amended by adding a new paragraph to read:

(26) failing to comply with AS 45.45.300.

Members Absent: Rep. Rogers

COMMITTEE CALENDAR

HB 757 — An Act relating to unemployment insurance; and providing for an effective date.

HB 849 — An Act relating to voting by members of electric and telephone cooperatives.

WITNESS REGISTER

Representative Bettisworth
Alaska State Legislature
Pouch V
Juneau, Alaska 99811
465-4967
Position Statement: Sponsor of HB 849; explained purpose of bill.

Dave Hutchins, Executive Director
Alaska Rural Electric Cooperative Association
no address or phone given
Position Statement: Endorsed HB 849.

Harry Sturrock, Assistant Director
Unemployment Insurance, Employment Security Division
Department of Labor
Box 3-7000
Juneau, Alaska 99811
465-2712
Position Statement: Explained need for HB 757; went over bill section by section.

PREVIOUS ACTION

HB 757 — No previous action.

Statutory Reference: AS 23.20

Action Taken: No action taken. Quorum was

not present at end of meeting.

HB 849

No previous action.

Statutory Reference: AS 10.25.120; AS 10.25.190

Action Taken: Rep. Randolph moved to report HB 849 out of committee. There being no objection, motion passed.

ACTION NARRATIVE

Tape #37
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:10 p.m. Members present were: Reps. Martin, Bylsma, Randolph, and Gardiner. Rep. Rogers was absent. Rep. Martin brought HB 849 before the committee for consideration

Number 009

Rep. Bettisworth, sponsor of HB 849, explained the purpose of the bill: to allow members of electrical and telephone cooperatives to vote by mail. Rep. Bylsma pointed out it had to be provided in the bylaws, and asked if the districts would pass bylaws. Rep. Bettisworth said they would. There was discussion by the committee.

Number 044

Dave Hutchins, executive director, Alaska Rural Electric Cooperative Association, said the statewide association unanimously endorsed the bill. He said Homer presently uses mail ballots, but attorneys have found no statutory authority.

Number 061

Rep. Randolph inquired about ballots. Hutchins said the bill would allow coops to make decisions about what is on the ballots. He said once an organization reaches 10,000 membership, it is difficult to get enough people to come to the meetings.

Number 080

Rep. Randolph moved to report HB 894 out of committee. There was discussion. There being no objection, the motion passed.

Number 110

Rep. Martin introduced HB 757 for the committee's consideration.

Number 112	Harry Sturrock, Assistant Director, Unemployment Insurance, Employment Security Division, explained that the bill is needed to stay in conformity with federal law; for housekeeping; and the incorporate department recommendations. He said they had received letters from the federal government commenting on the law, and recommending changes.
Number 138	Sturrock went over the changes needed to conform with federal law, and passed out charts and tables supporting this need. There was discussion of the fiscal notes.
Number 216	Rep. Martin asked Sturrock to go over the bill section by section, which Sturrock did.
Number 651	There was discussion of back pay awards.
Side B, Number 050	As there was no longer a quorum, the meeting was adjourned at 2:00 p.m.

HB 849

009 Bettisworth, sponsor of HB 849, explained purpose of bill. — to allow members of elec. & phone coops to vote by mail. Bylsma asked pointed out it had to be provided in bylaws & asked if districts wd pass bylaws. Bettisworth said they wd. Committee discussion.

044 Dave Hutchins, exec dir, ak Rural Electric Coop Assn — statwide assoc unanimously endorsed bill. Said Homer presently uses mail ballot, but attys found no statutory authority.

061 Randolph had gotno abt ballots. Hutchins said bill wd allow coops to make decisions abt what to on ballots. Hutchins said once an orgn reaches 10,000 membership it is difficult to get enough people to come to mtgs.

motion

080 Randolph moved to report out HB 849. Discussion (Bylsma had gotus); Bettisworth explained. No objection; motion passed.

HB 757 Martin

110 Int'd bill

112 Harry Sturrock, Asst Dir, Unemp. Ins, ~~EE~~ emp security Div — explained why bill is needed — to remain in conformity w/fed'l law; housekeeping; & dept recommendns.

Read ltrs fm fed govt commenting on law, & suggesting chngs.

138 Sturrock went over changes needed to conform w/ fed'l law. Passed out chart showing unemployment allocations by state.

195 Martin referred to fiscal notes (3); Knight said there shd be 2 fn's. Knight said the Ø fn ~~xx~~ showed impact on food stamps.

216 Martin asked Sturrock to go over bill section by section.

218 Sturrock Sec 1 — deals w/ confidentiality of info, & release of info to food stamp admin; ~~also extends employees~~.

265 Sec 2 — re unauthorized disclosure of info

274 Sec 3 — referred to Cost yrs SB 50 re empe refunds of excess fnds pd in, with interest. Want this taken out, unless empr is late filing schedules; and deleting redundant language.

305 Sec 4 - amending ratable payroll table.

319 Sec 5 - housekeeping; needed to include all persons person can be disqualified fm.

331 Sec 6 — housekeeping; disqualifying provns; & add that "all interested parties" can appeal (rather than just "employee".

343 Sec 7 - increase in benefits.

Sturrock passed out 2 charts showing affect. Qstns by Gardiner re inflation.

Randolph
left abt 1:40
martin left abt 1:40 too.

Sturrock, cont'd

395 Sec 8 - amending duration formula for receipt of benefits. Provides compar w/39 wks of wk recvd max duration, & raises minimum duration to 18.

~~Sec 9~~ Passed out duration chart. Gardiner had gotns

438 abt employer costs. Discussion Gardiner, Sturrock, Knight

478 Sec 9 - provn regarding deductible income; ~~redraft~~ Sturrock explained difference fm current law.

498 Sec 10 - completes list of disqualifying statutes

504 Sec 11 - clarifies able & available provision of law.

524 Sec 12 - recodifies 83.00.350(6)

546 Sec 13 - ~~to~~ federal conformity ~~requirt~~ provns for secs 6 & 8.

599 Sec 14 - relates to labor disputes; corrects typing error in 1980 amendments.

637 Sec 5 - Chngs appeal periods to allow 15 days to appeal.

651 Sec 16 - adds new section re back pay awards.

Rep Bjorsma had gotns & asked for an example of such a actn.

Side B

000 Barry said this provn may not be legal, & gave examples. There was discussion of wording of this section. Barry felt employer shd be responsible for paying back award in order to avoid legal conflicts. Knight interjected her interpretation

2:00

050 Mtg recessed for lack of quorum

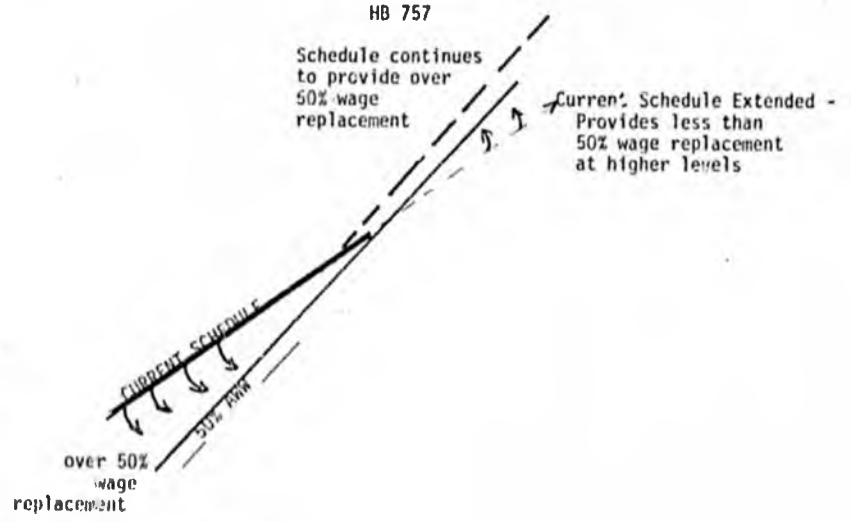
Q. Why increase maximum WBA to $166 when the maximum was just increased to $150 in 1980?

A. The 1980 Alaska legislature provided 2/3 of Alaskan claimants with at least 50% of their average weekly wage (AWW).

Rapid inflation has eroded the maximum so that only 60% of eligible claimants now actually receive at least 50% wage replacement. A new maximum of $166 would again provide 2/3 of eligible claimants with at least 50% wage replacement.

Q. Why does the proposed schedule increase at a higher rate beginning at $15,000 in base period earnings, instead of just continuing in the same increments as the current schedule?

A. If the current schedule were extended to $166 (at $2.00 increments for every $250 in base period earnings) then many claimants earning over $15,500 would not receive 50% wage replacement. The current schedule provides higher wage replacements for low wage claimants and approaches 50% wage replacement at the maximum for claimants with base period wages of $15,500. Changing the increments at $15,000 ensures that all claimants eligible for less than the new maximum would receive at least 50% wage replacement, while still providing the same schedule for lower wage claimants.



HOUSE BILL NO. 757

BILL ANALYSIS

Section 1. Federal conformity requirement of P.L. 96-249. Must be effective in state laws by January 1, 1983. Amends AS 23.20.110 as follows:

1. Adds subsection (f) to require the sharing of unemployment insurance claims informaiton with a state or federal agency which administers the Food Stamp program under the Food Stamp Act of 1977.

2. Adds subsection (g) to extend the requirements of AS 23.20.110 to any officer or employee of a state or federal agency which is provided information by the department.

Section 2. Federal conformity requirement (P.L. 96-249). Amends AS 23.20.115 to conform with AS 23.20.110(g) by adding state or federal employees to the list of those subject to prosecution for unauthorized disclosure of information.

Section 3. Housekeeping. Amends AS 23.20.165(e) as follows:

1. Excludes, from refunds of excess employee contributions, any interest paid by the employer on those contributions. Since only the employer pays interest on past due contributions (including the contributions he has deducted form his employee's wages) it is not equitable to make interest refundable to the employee.

2. Makes clear that employee deductions in excess of those required by AS 23.20.005 through 23.20.535 will be refunded. AS 23.20.165(e) currently specifies that only deductions in excess of the wages subject to contributions will be refunded.

Section 4. Housekeeping. Corrects the table under AS 23.20.290(c) by deleting the figure "100" on the last line of the table. To constitute a full one-twentieth of the total ratable payroll, rate class 20 under column A must include the remaining 5% of ratable payroll over 95%.

Section 5. Housekeeping. Amends AS 23.20.340(d) to completing the list of statutes under which a claimant may be disqaulified.

Section 6. Housekeeping. Amends AS 23.20.340(f) to complete the list of statutes under which a claimant may be disqualified, and in addition specifies that all interested parties are entitled to appeal nonmonetary determinations.

Section 7. Departmental recommendation. Amends AS 23.20.350(d) to increase the weekly benefit schedule to a maximum of $166. The increase in maximum weekly benefit amount is proposed to provide approximately 2/3 of claimants with replacement of 50 percent of their average weekly wage. Data since October 1, 1980, when the current schedule became effective, indicate that approximately 40 percent of claimants are receiving the maximum benefit amount and that most of those claimants are not receiving 50 percent wage replacement. Federal guidelines call for 80 percent of claimants receiving 50 percent wage replacement; however, Alaska's eligibility provisions make application of the federal guidelines prohibitively costly. The proposed weekly benefit schedule would increase benefit outlay by approximately four percent.

Section 8. Departmental recommendation. Amends AS 23.20.350(e) to increase potential duration by two weeks for 90 percent of claimant's eligible for regular benefits. The federal government has tightened eligibility for extended benefits so that fewer claimants will be eligible for EB, and the claimants most likely affected are claimants eligible for less than 26 weeks under the current formula. Giving these claimants an additional two weeks of regular benefits will increase the average duration for regular benefits by about one week. This is expected to increase regular benefits outlay by 6.4 percent.

The net effect of the benefit amount and duration increases and the restrictive language of the EB provisions should be that the total benefit payment will remain within two percent of current outlays. Employer costs should increase by four to six percent. The above legislation would phase some EB weeks (which are 50-50 state-federal) back to regular weeks (which are 100 percent state-funded).

Section 9. Housekeeping. Redrafts AS 23.20.360 to make the provision clearer. The current provision reads that the allowance for dependents in excluded from the amount paid to the claimant, and that is clearly not intended, in view of the requirments of AS 23.20.350. The revised provision correctly excludes dependents allowance only from the amount of benefits subject to reduction.

Section 10. Housekeeping. Amends AS 23.20.375(a) to complete that list of statutes under which a claimant may be disqualifed.

Section 11. Housekeeping. Clarifies AS 23.20.378(a) by combining paragraphs (1) through (4) under a single new paragraph and designating paragraph (5) as paragraph (2). The context of the current provision implies that paragraph (5) was intended to be a necessary condition of paragraphs (1) through (3), but that is not how the provision reads.

Section 12. Housekeeping. Recodifies the current AS 23.20.350(b) as subsection (g) under AS 23.20.381. This requalifying requirement is mandated by Sec. 3304(a)(7) of the Internal Revenue Code, but it is not a monetary requirement and should not appear under AS 23.20.350. A benefit year is established for any claimant who meets the qualifying requirements of AS 23.20.350(a) (at least $1000 in earnings in the base period, with at least $100 outside the quarter of highest earnings), and an eligible monetary determination is issued, whether or not the claimant has actually worked since last establishing a benefit year. A claimant who has not had work and earnings since last establishing a benefit year is simply not payable on his current benefit year until the requalifying requirement is met.

Section 13. Federal conformity requirement. Required in all state laws by Section 236(a)(2) of the Trade Act, as amended by P.L. 97-35, and must be effecive by October 31, 1982. Amends AS 23.20.382 by adding subsections (b) and (c) to prohibit disqualification of an individual attending training approved under the Trade Act of 1974. A housekeeping change was made to the current Sec. 382 and it was designated as subsection (a).

Section 14. Housekeeping. Clarifies AS 23.20.383(b) by restoring it to its original meaning prior to the 1980 amendments. Before the 1980 amendments an individual who was unemployed because of a labor dispute could escape disqualification if he was not involved in the dispute and was not a member of the grade or class of workers who were involved. However, if the labor dispute was caused by an employer's failure to comply with a working agreement or applicable law, the employee escaped disqualification regardless of his involvement. The 1980 amendments recodified the old AS 23.20.380(9) as AS 23.20.383 with minor changes. However, at that time the three "exception" provisions were made conjunctive, so that (as the provision currently reads) a claimant is disqualified unless (1) he is not involved in the dispute and (2) the dispute was caused by the employer's failure to comply with the law or a working agreement. These two circumstances would occur together so seldom that the "exception" provisions are virtually meaningless at present.

Section 15. Housekeeping. Amends AS 23.20.390(e) to provide a 15-day period for appeal from notices of liability. This same 15-day period applies to all other determinations under the Act and we see no reason to restrict liability appeals to 10 days.

Section 16. Departmental recommendation. Adds Sec. 392 to provide authority to collect from an employer the amount he deducts from a backpay award to an employee. This provision would apply only when the deduction is made because the employee has already received unemployment insurance benefits during the period covered by the award and has been found ineligible for those benefits because of the back pay

award. It does not seem correct to substitute the award made by the employer with benefits paid from the trust fund, when the employee is going to be held liable for repaying the benefits.

Section 17. Federal conformity requirement of P.L. 97-35 and must be included in state laws not later than October 31, 1982. Adds Sec. 401 to provide for interception of benefits due a claimant who owes child support obligations.

Section 18. Federal conformity requirment of P.L. 97-35 which must apply to weeks of unemployment which begin after September 25, 1982 and must be included in state laws by October 31, 1982. The federal amendment requires at least 20 weeks of full-time insured employment, or the equivalent in insured wages, in order to qualify for extended benefits. The "equivalent in insured wages" specified by the federal law is earnings of 40 times weekly benefit amount or 1-1/2 times highest quarter earnings in the base period. The 40 x WBA option is recommended as the most liberal qualifying requirement.

Section 19. Federal conformity requirement (P.L. 97-35). Must be included in state laws by October 31, 1982. Adds subsection (c) to AS 23.20.407 to reduce weeks of extended benefits by any weeks of trade readjustment allowance received during the applicable benefit year.

Section 20. Federal conformity requirement (P.L. 97-35). Must be included in state laws by October 31, 1982. Amends AS 23.20.408(a) to remove the reference to national "on" and "off" indicators for the purpose of establishing an extended benefit period. The national trigger was repealed by P.L. 97-35, and extended benefits will be payable only when an extended benefit period is triggered on by a state indicator.

Sections 21-22. Federal conformity requirements (P.L. 97-35). Must apply to weeks beginning after September 25, 1982. Amend AS 23.20.408(f) and (g) by adding one percentage point to the insured unemployment rate necessary to trigger an extended benefit period on or off.

Section 23. Federal conformity requirement (P.L. 97-35). Must apply to weeks beginning after September 25, 1982. Amends AS 23.20.408(h) to exclude extended benefits payments from the calculation of the insured unemployment rate.

Section 24. Federal conformity requirement (P.L. 97-35). Must be included in state laws by October 31, 1982. Amends AS 23.20.409(1) to exclude the national EB trigger from the definition of "extended benefit period".

Section 25. Departmental recommendation. Defines "applicable benefit year" in accordance with the definition contained in 20 CFR 615.2(c)(2). The term is used in various places in the extended benefit provisions.

Section 26. Housekeeping. Amends AS 23.20.505(a) as follows:

1. Makes AS 23.20.505(a) consistent with AS 23.20.530 by substituting the term "wages" for "remuneration". "Wages" is already defined in Sec. 530 as remuneration for services. The use of the term "remuneration" in Sec. 505(a) is therefore redundant.

2. Corrects the "excess earnings" computation in AS 23.20.505(a) to specify that an individual's wages for a week must be less than 1 1/2 times the weekly benefit amount plus $50, in order to qualify for benefits for that week. The current provision is inconsistent with AS 23.20.360.

Section 27. Housekeeping. Amends the definition of "training or retraining course" in AS 23.20.520(26) as follows:

1. Changes the term defined in the provision to read "vocational training or retraining course", for consistency with AS 23.20.382.

2. Deletes the term "entry level" from the definition. We do not recommend restricting approvable training to entry level training only. For example, some union-sponsored training is not "entry level" but is nevertheless required for continued employment in the occupation.

Section 28. Housekeeping. Amends the definition of "institution of higher education" in AS 23.20.520(24) to include institutions in other states. The definition of "training or retraining course" in AS 23.20.520(26) excludes instruction intended for a degree from an institution of higher education. It is therefore not recommended that the definition of "institution of higher education" be limited to Alaska schools.

Section 29. Housekeeping. Amends AS 23.20.526(a) to exclude service as a juror from the definition of "employment." It is assumed that this was the intent of the Legislature when it excluded compensation received for jury duty from the definition of "wages" under AS 23.20.530(b)(12). However, if "wages" means all remuneration from whatever source, excluding jury pay from "wages" means it is not deductible from benefits. We recommend excluding jury duty from the definition of "employment", but do not recommend excluding jury pay from "wages". The exclusion of jury pay from "wages" is repealed in Section 32 of the bill.

Section 30. Housekeeping. Clarifies the definition of "wages" in AS 23.20.350(a) and corrects minor errors in the provision, as follows:

1. Makes clear that "wages" means remuneration from any source. It is recommended that the definiton of "wages" refer to remuneration received from any employment, whether or not insured. The definition would then clearly apply both to determinations of insured status (initial determinations) under AS 23.20.350(a), and to the deduction of earnings from the weekly benefit amount, under AS 23.20.360 for a week in which a claimant is employed. Applying the definition of "wages" in this way would simplify the administration of these provisions and agrees with the way the definition of wages was intended in the federal draft provision which was used as a basis for AS 23.20.530(a).

2. Includes back pay as wages, regardless of whether the back pay was "awarded under a statute of this State or the United States." We do not recommend language which requires back pay awards to be compelled by force of law in order to be considered wages. This would exclude many back pay awards which are clearly intended as wages, for example where an employer freely negotiates a back pay award to an employee as the result of a wage dispute.

3. Requires allocation of back pay and irregular wage payments to the week in which the pay was earned, regardless of the purpose for the allocation. It is recommended that these payments be allocated both for initial determinations under AS 23.20.350(a) and for deductions from benefits under AS 23.20.360.

Section 31. Housekeeping. Adds paragraph (13) to AS 23.20.530(b) to exclude, from the definition of "wages", any compensation received for inactive National Guard duty. This provision was simply transferred from AS 23.20.505(c).

Section 32. Repeals the following provisions:

1. AS 23.20.350(b). Housekeeping. This provision was recodified as AS 23.20.381-(g) under section 12 of the bill.

2. AS 23.20.408(d) through (e). Repeal of these provisions is a requirement for conformity with P.L. 97-35. The definition of national "on" and "off" indicators is unecessary because the national indicators were repealed by P.L. 97.35.

3. AS 23.20.505(b). Housekeeping. This definition of "remuneration" is not necessary, since Section 26 of the bill substitutes the term "wages" for the term "remuneration" in AS 23.20.505(a), and "wages" is already defined in AS 23.20.-530(a).

4. AS 23.20.505(c). Housekeeping. This provision currently excludes National Guard pay from "remuneration", and it is no longer necessary since National Guard pay has been recodified as an exclusion from "wages" under AS 23.20.530-(b)(13) in Section 31 of the bill.

5. AS 23.20.530(b)(11). Housekeeping. Repeal of this provision would allow remuneration received from fishing to be treated as wages. Section 3121(b)(20) of the Internal Revenue Code excludes service by individuals engaged in certain fishing operations from the definition of "employment", and AS 23.20.526(20) already excludes this service from coverage, in conformity with the federal law. However, excluding fishing earnings from the term "wages" goes further than required by the federal provision and prohibits deduction of this remuneration from benefits during a week in which a claimant is fishing.

6. AS 23.20.530(b)(12). Housekeeping. Repeal of this provision would include jury pay as wages and permit deduction of jury pay from benefits otherwise due for a week. Jury duty would be excluded from insured coverage by excluding it from the definition of "employment" under AS 23.20.526(a)(21), as proposed in Section 29 of the bill.

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
March 17, 1982
1:08 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Randolph
Rep. Gardiner

Members Absent: Rep. Rogers

COMMITTEE CALENDAR

HB 806 — An Act relating to hazardous or toxic substances.

HB 886 — An Act relating to financial statements of corporations.

WITNESS REGISTER

Nancy Lord
Representative Brian Rogers
Pouch V
Juneau, Alaska 99811
465-4925
Position Statement: Presented HB 806 on Rep. Rogers' behalf.

Pete Hellstrom, Environmental Coordinator
ARCO Alaska, Inc.
PO Box 360
Anchorage, Alaska 99510
265-6176
Position Statement: Requested changes in HB 806.

Richard Arab
Division of Occupational Safety & Health
Department of Labor
Box 1149
Juneau, Alaska 99811
465-4856
Position Statement: Favored HB 806.

Ernst Mueller, Commissioner
Department of Environmental Conservation
Pouch U
Juneau, Alaska 99811
465-2600
Position Statement: Supported concept of HB 806.

E.S. Rabeau, M.D.

Division of Public Health
Department of Health & Social Services
Juneau, Alaska 99811
465-3090
Position Statement: Supported passage of HB 806.

Jake Wills, legislative intern
Representative Adams
Pouch V
Juneau, Alaska 99811
465-3706
Position Statement: Presented letter from Rep. Adams regarding HB 886.

PREVIOUS ACTION

HB 806

No previous action.

Statutory Reference: AS 18.60

Action Taken: No action taken. Bill was set aside to wait for further information.

HB 886

No previous action.

Statutory Reference: AS 10.05.825

Action Taken: Rep. Randolph moved to report HB 886 from committee. There being no objection, the motion passed.

ACTION NARRATIVE

Tape #38
Recording
Number 000

The meeting was called to order by Vice-Chairman Bylsma at 1:08 p.m. Members present were: Reps. Martin, Bylsma, Randolph, and Gardiner. Rep. Rogers was absent. Rep. Martin left immediately after the call to order. Rep. Bylsma brought HB 806 before the committee.

Number 012

Nancy Lord, staff to Rep. Rogers, presented HB 806, which was sponsored by Rep. Rogers. She introduced a workdraft committee substitute dated 3/15/82; a sectional analysis; and fiscal notes. She explained the reason for the bill, and said there was particular concern about the petrochemical industry in Alaska. Lord explained each section, and listed groups of employees who

might be affected by the legislation.

Number 095 — There was discussion of the draft committee substitute compared to the original bill, and of some of the wording in the bills.

Number 130 — Pete Hellstrom, environmental coordinator for ARCO Alaska, Inc., said ARCO has been developing a position paper for distribution to employees which follows the intent of the bill. He wanted changes in the bill. He believed the bill is similar to legislation enacted by other states in recent months. He was disappointed, as OSHA is developing similar information--writing enabling regulations to ensure the same type of information on the national level. He recommended the committee delay action to allow OSHA to develop their regulations. Hellstrom wanted a modification in the language to limit the degree of burden on the employer (of having to submit the same information to employees annually). Rep. Gardiner asked if he meant the employer was not required to given information unless the employee requested it. Hellstrom said yes, that the employer should not be required to redistribute information annually. Rep. Gardiner asked how an employee would know to ask if he wasn't aware of the information. There was discussion.

Number 207 — Hellstrom said the advantage in delaying the bill is so the Alaska Division of Occupational Safety and Health can work with federal OSHA, then the state could enact legislation or regulations to fill in the gaps applying to Alaska. He said the disadvantage to this would be the priority of concerns, but he felt emergency enabling regulations could fill this gap.

Number 229 — Hellstrom commented on the bill section by section. He felt the scope is too broad, and explained his position. He wanted to be able to report, for example, crude oil as crude oil, not crude oil from Prudhoe Bay, broken down into all the chemical properties. Rep. Gardiner asked where this was addressed in the bill. Hellstrom said it was unclear. Rep. Bylsma recommended Hellstrom submit his proposed changes in writing, as well as sending a copy of his testimony.

Number 283 — Hellstrom said ARCO had determined that the bill was burdensome to the employer. He felt it should exclude exploration and production of oil, noting that this exemption was granted by the federal government. He continued his comments on each section of the bill.

Number 413 — Rep. Gardiner asked if ARCO, in conferring with other companies, found problems in other states. Hellstrom said his comments applied to this bill, not to legislation in other states. This was discussed.

Number 473 — Rep. Bylsma asked Hellstrom to document his objections to the bill.

Number 485 — Richard Arab, Division of Occupational Safety & Health, Department of Labor, referred to their position paper. He favored the bill, as it would provide the employee with the right to know of hazardous and toxic substances he is working with. He felt the best part of the bill is the part requiring informing the employee of substances he is working with, and giving safety training. Arab spoke of OSHA enabling regulations.

Number 539 — Ernst Mueller, Commissioner of the Department of Environmental Conservation, supported the concept of the bill. He felt, from an employer standpoint, that more specificity in definitions would be appreciated. He thought some paperwork could be eliminated. Mueller suggested allowing the Department of Labor the ability to establish small quantities of substances which are exempt from the information clause. There was discussion of definitions.

Number 676 — Dr. Rabeau, Division of Public Health, Department of Health and Social Services, supported passage of the bill. He thought statutes should be broader, because regulations can be more specific. He referred to the H&SS position paper, which lists department recommendations. He thought the bill imposed reasonable guidelines, and that it would be easy to put specific substances in regulations.

Side B, Number 000 — Rep. Randolph asked clarification regarding

the crude oil industry. Rep. Bylsma asked about refined products. Mueller said this would need to be considered more carefully. This was discussed.

Number 037 — Rep. Gardiner said there is a question of what OSHA will or won't do. He said it might be possible, to avoid future implications, that someone would have the authority to provide exemption, if areas were addressed adequately by federal standards.

Number 054 — Jeff Barry, committee aide, explained the state's role in the OSHA act. He said if a state has more stringent laws, the state laws supersede federal laws, so there would be no duplication. He said access of records is the basis of the bill, and that the question is whether or not it is in the public interest to make employees aware of risks There was discussion.

Number 086 — Rep. Bylsma set the bill aside until the committee could obtain further information.

Number 095 — The committee took up HB 886. Jake Wills, legislative intern in Representative Adams office, explained why Rep. Adams could not testify about HB 886 (which Rep. Adams sponsored), and presented the committee with a memo from Rep. Adams explaining why the bill is needed.

Number 106 — Barry said, as a bill analysis, that the bill does exactly what it says: defines requirements.

Number 141 — Rep. Randolph moved to report HB 886 out of committee. As there was no objection, the motion passed.

Number 145 — There being no further business to come before the committee, the meeting was adjourned at 2:08 p.m.

Absent: Rogers

HB 886

Tape #38

1:08

000 HB 806 Call to order by ~~Martin~~ Bylsma (Martin left) right after call to order; brought HB 806 before committee.

012 Nancy Lord, Rep. Rogers' ofc, presents on HB 806 (sponsored by Rogers); intd 3/15 work draft, sectional analysis, & fiscal notes. Explained reason for bill. Particularly concerned abt pc chemical industry in state. Explained each section. ~~Where~~ She listed groups of employees who might be affected by the legislation.

095 Bylsma commented he had not received the draft that morning & he had no chance to review bill.

103 Lord offered to compare the draft CS to the original bill.

107 Randolph asked why to put "known" toxic or hazardous substance in the bill; ~~felt it might be reason~~

116 Lord said they wd only be liable for informing workers of known health hazards & precautions; she referred to definitions in bill; said emphasis is on most recent avail info.

130 Pete Hellstrom, Arco Alaska Inc, Environmental Coordinator; Arco has been developing prin paper for distrib to empes which follows intent of bill. Want change in bill. Bliss bill is targeted toward "employee info right to know" to ensure employee's safety. Said bill is similar to legislation enacted by other states in recent months. Disappointed, as OSHA is developing similar info-writing enabling regs to ensure same type of info on natl level. Recommended comm. delay action to allow OSHA to develop regs;

wanted modn in language to limit degree of burden. (Submitting annually same info)

186 Gardiner asked if he meant the empr was not req'd to give info unless empe requested. Helstrom said yes; empr shd not be req'd to resist. info annually. G asked how empe wd know to ask if he wasn't aware of the info. Discussion.

207 Helstrom said adv in delaying bill is so AK Div Occ Safety & Health to w/ w/ fed'l OSHA; then state cd fill in gaps applying to AK. Disadv to this wd be priority of concerns. Thought emergency enabling regs cd fill this gap.

229 Section by section comments:

— scope is too broad; explained his pos'n. Want to be able to report, eg, Crude as crude, not Crude oil from Prudhoe w/ breakdown of chemical properties.

270 Gardiner asked where this was addressed in bill; Helstrom said it was unclear. Byesma recommended submitting prop'd changes in writing, as well as cy of his testimony.

283 Helstrom said they (Arco) determined that the bill was burdensome to empr; shd exclude exploration & production of oil (said this exemption was granted by feds);

commented on each section of bill

310 Sec .051 — want to list products generically, rather than breaking down

.052 —

.071 — wd require posting for each substance — wd be more reasonable to have this info at place empes report to wk rather than at each wk cntr. Agree w/training upon empmt or when new substances introduced, thereafter at empe rqst.

.072 - overly burdensome & costly. Will result in no increase in wkr safety. Request modn or deletion of sec.

.105 - want chng in defns of (10) mfr (11) hazardous substances (12) toxic substances

413 Gardiner asked if Area, in conferring w/ other cos, found probs in other states. H said comments applied to this bill, not region in other states. ~~Did not ha~~ Discussion.

473 Pyroma asked H to document objections to bill, what chngs wanted, & why.

485 Richard Arvb, Dept Labor, Occ Safety & Health — referred to posn paper. Favrs bill as it wd provide empe with right to know of hazardous & toxic substances they're wkg with. Best part of bill is part reg'g empe of substances & giving safety training. ~~Said Abra~~ Spoke of enabling OSHA, regns. Reagan w/drew propls; ~~but~~ oppsn fm industry.

539 Ernest Muller, Comm., Env Conservation — supports concept. Fm empr standpoint, wd appreciate specificity in definitions. Felt some paperwork cd be eliminated. Suggested allowing Dept of Labor ability to establish small qtys of substances which are exempt fm info. clause.

618 Randolph said, re ~~of~~ defns, p. 5 "hazardous substances" elim (b) & elim (c) under "toxic wastes", wd not harm bill. Muller agreed & said DOL cd add to list

~~Randolph~~ Discussion.

676 Dr. Rabkin, Dept H&SS, Div- Public Health - support passage of bill. ~~RE~~ Think statutes shd be broader, regns can be more specific. Referred to posn paper, which lists dept. recommendations. Thinks the bill imposes reasonable guidelines; wd be easy to put specific substances in regns.

Side B

006 Randolph asked clarification regarding crude oil industry. Bylenga asked abt refined product; Muller said this wd need to be considered more carefully. Discussion.

037 Gardiner said there is a gray area of what OSHA will or won't do; said it might be possible, to avoid future implications, that someone wd have authority to provide exemption if addressed adequately by federal standards.

054 Barry explained state's role in OSHA act - if state has more stringent laws, state laws ~~are enforced over~~ supersede federal; WD not be duplication. Access of records is basis of bill. Issue is whether or not it is in the public interest to make emps aware of risks; & what true affects are rather than conjectured affects.
Discussion.

086 Bylsma set bill aside to wait for further info.

HB 886

095 Jake Wells, legis intern, Adams ofc, said Adams Cd not attend (conflict w/ another mtg), but sent ltr over

106 Barry said, as bill analysis, that bill does exactly what it says — defines regmts.
Discussion.

141 Randolph moved to pass HB 886 fm comm. Mo passed unan.

145 Adjourned 2:08

March 10, 1982

Honorable Terry Martin
House of Representatives
Chairman - Labor and Commerce Committee
State of Alaska
Pouch V, Mail Stop 3100
Juneau, Alaska 99811

Dear Mr. Martin:

I am writing to you in support of House Bill 886. House Bill 886 amends the profit corporation statutes to specifically define the phrase "financial statements of the corporation." Why is this definition needed?

"Financial statements of the corporation" is a key phrase in determining a director's defense against personal liability for dividend payments. AS 10.05.219(1). Yet the phrase is ambiguous. This ambiguity creates unnecessary risks for directors attempting to comply with statutory requirements. Clarity would serve to protect directors from ex post facto definitions and liability.

The definition of "financial statements of the corporation" in House Bill 886 contains two basic concepts. The first is that the financial statements will be prepared according to generally accepted accounting principles then applicable. The second is that the statements will be consolidated, where appropriate. Both of these concepts are basic to the published financial statements required by the Securities Exchange Commission to be sent to all shareholders. Both concepts have also been incorporated by the Code Revision Commission, in its working draft of the corporation statutes. The American Institute of Certified Public Accountants, the SEC and the Code Revision Commission, all endorse these concepts because they produce economically meaningful data and because they protect shareholders and creditors from the manipulation of financial data.

In short, I support the definition because it will protect directors and it will protect creditors and shareholders as well.

Very truly yours,

Elizabeth B. Johnston
General Counsel

cc: Representative Al Adams

HOUSE BILL 886

Alaska corporate law makes directors of a profit corporation jointly and severally liable for excessive dividend payments. AS 10.05.216(a). However, this same law also provides a defense or a safe harbor. A director is not liable for excessive dividends if he in good faith relied on the financial statements of the corporation for his analysis of a legal dividend source. AS 10.05.219(1).

The problem is that the scope of this defense is ambiguous. The meaning of "financial statements" is unclear and therefore, creates unnecessary risks for directors as they try to comply with dividend requirements.

The solution is to define the "financial statements of the corporation." The definition proposed in House Bill 886 includes, where appropriate, consolidated balance sheets and income statements prepared according to generally accepted accounting principles. While other financial documents are useful for other corporate purposes, only the preceding are useful for an analysis of a legal source for dividends under AS 10.05.219(1).

POSITION PAPER/Department of Health & Social Services

POSITION PAPER
CS for House Bill No. 806 (L&C)

(Bill attached)

"An Act relating to hazardous or toxic substances."

House Bill No. 806 requires the manufacturer and seller of hazardous or toxic substances to provide to the purchasers of these substances complete information as to the characteristics and precautions required when using. Any employer utilizing a substance included under this act must post a copy of the information for the employees to review plus provide training and safety gear. The employer must file with the Department of Labor annually, complete disclosures with regards to his activities and usage of the hazardous and toxic substances.

This bill imposes reasonable guidelines concerning handling of toxic and hazardous substances in manufacture and selling.

Minor recommendations include the following:

1) Under Section 18.60.051 consider adding "significant levels of toxic impurities if they exist in a mixture."

2) Under Section 18.60.071 consider change of mandatory requirements depending on size of employer e.g. less than ten.

3) Under Section 18.60.105 consider substances manufactured outside of the State and shipped in.

4) Under Section 18.60.073c the confidentiality of medical records may be breached if it is left that the Department may "require."

The Department supports the passage of this Bill.

III. ANALYSIS (See Fiscal Note Preparation Instruction, Section III)

All inflation at 10%

This fiscal note covers the travel costs, training seminars, commodities and testing equipment that must be utilized by our Epidemiologists in investigating the effects of exposure in humans. As the petrochemical industry develops in Alaska more and more problems will develop, very little of the acute and chronic health effects will be known and when the risks are known they tend to be understated. As problems develop it will be incumbent upon the Epidemiologist to do in depth investigations.

The fiscal impact of this bill on the Department of Health and Social Services is due to the fact that the Department of Labor uses the epidemiological section of this department as a consultant on the hazards of toxic substances.

Draft CS for HB 806 (L&C)

Sectional Analysis

HB 806 was drafted to conform with model "right-to-know" legislation from other states. The basis for the legislation is that Alaskan workers have the right to know about hazardous or toxic substances with which they work and that it is an employer's responsibility to supply that information.

18.60.051 requires an in-state manufacturer of a hazardous or toxic substance to make available certain information including the name of the substance, its hazards, proper handling procedures, and health risks.

18.60.052 requires a seller of a hazardous or toxic substance to provide the same information.

18.60.071 requires an employer to post in the workplace where a hazardous or toxic substance is present the same information, and to provide training at his own expense about the potential hazards and proper handling of the substances.

18.60.072 requires manufacturers, sellers, and employers to file annual reports with the Department of Labor. Trade secrets are protected.

18.60.073 allows past, present, and future employees access to reports filed with the department and to exposure measurements. The department may require employees to furnish health and exposure records pertinent to an investigation. Regulations shall be adopted to ensure that an employee has ready access to all relevant information about hazards and exposure.

18.60.074 allows for the department to disclose to the public information about hazardous and toxic substances and the circumstances under which the public might be affected.

Section 2 provides definitions.

MONDAY BRIEFING

National

Joint space labs possible

Cocoa, Fla. — The administrator of the American space program says the United States may join with Japan and Europe within the next five years to build an orbiting space station. James Beggs of the National Aeronautics and Space Administration told the newspaper Cocoa TODAY in an interview published Sunday that the station would use European Space Agency technology in building spacelabs and Japanese computer expertise. He said habitable modules connected by steel beams would be designed at the Johnson Space Center in Houston and launched piece-by-piece from the Kennedy Space Center in Florida.

Nuclear sub protest planned

Tacoma, Wash. — A Roman Catholic archbishop says he will take part in a blockade designed to prevent a Trident nuclear submarine, the USS Ohio, from reaching the Bangor Naval Base. Raymond Hunthausen, archbishop of Seattle, said at a rally Sunday he would participate this summer in the effort to keep the submarine out of the the Kitsap Peninsula base west of Seattle.

Boat house collapses

Gilford, N.H. — Boats drawn out of Lake Winnipesaukee to protect them from winter ice fell victim to heavy snow when a boathouse collapsed on 169 pleasure craft valued at $3 million. Gerald Fagan, owner of the Gilford Marina building which collapsed Friday night, said it would take up to six weeks to remove the boats that were stored five-high on racks. Damage to the 300-foot metal shed was estimated at $700,000.

Car crashes into bus

Los Angeles — When a bus was struck in the rear by a car, bystanders in southwest Los Angeles jumped onto the Rapid Transit Authority vehicle and claimed to be injured, police say. The driver of the car, Shelton Eugene Knight, 32, was arrested Saturday for investigation of felony driving under the influence of drugs. Sgt Roger Lindsay said the injury count, which jumped to 26 when bystanders jumped on the bus, dropped to nine when they found out the bus driver was not at fault.

Factories emit cancerous gas

Akron, Ohio — There are no regulations to stop tire manufacturers from emitting thousands of pounds a year of a cancer-causing gas, a lobbying group says. The National Clean Air Coalition said in a report Sunday that Goodyear and B.F. Goodrich plants in Akron release more than 350,000 pounts of acrylonitrile a year. The companies acknowledged the substance is emitted from their plants, but said they were in compliance with all federal, state and local law.

000 Call to order by Bylsma

005 – HB885

007 Steve Hilland, VP & gen counsel, Cook Inlet Region Inc – intent of bill was to provide clarification of 20 yr exemption of ad velorem taxation of property until developed or leased to third parties. Problems resulted because of defns of "developed" & "leased", & inconsistency of interpretn between boroughs. Went over options to clarify these defns.

064 ~~Holly Beck~~ Kellus Sewell, Cape Fox Corpn – feel that ~~shd~~ full issue of devpt shd be ~~considered~~ addressed. Shdn't pay until they can afford to pay. Wd rather be taxed after income derived. Comm & legis shd consider other things than taxes: environmental credits, tax incentives, tax limitations.

Feel that a sound economic base shd be established & promote diversification, not just look at a tax which may be a deterrent. Wd like to be involved in any rewrites.

111 Patrick Anderson, MOA, ~~n~~dm – originally intended that native lands not be taxed; concern in Anc is w/ lands being subdivided & developed. Bill ~~include~~ attempts to define point at which subd becomes developed property & subject to tax. ~~Congressional~~ Need to define that point; he's not sure it can be decided by anything except litigation. Discussed attempts to define & impact of defns.

1:30 Randolph left

175 Rogers asked when suggested rewrites cd be avail.
Anderson thought early next wk.
R asked which bill (CSSB 803 or HB 885); A responded ± with probs he foresaw w/each bill.

198 Barry, at Adams' request – since Adams requested adopting wkdrft CS HB 885.

218 Norman Staton, Sealaska – wkd w/ CoRA, CINA, + others to arrive at defn of developed. Said both bills essentially the same; somewhat ambiguous, but needs to be. Support either bill; however wkdrft leaves out provn (s. 29 "forest lands, p. 1 – HB) that was in the HB. Will submit amdmt to correct this. Provn exempts timber land fm municipal tax'n; feel that muni real property tax is not approp for timber; shd be taxed on severance tax basis. Feel state wd benefit by uniform severance tax. Willing to wk w/ legis + state in est'ing severance tax. Want timberlands provn left in bill.

281 Rogers – no objection to allowing municipal severance tax rather than real prop tax?
Staten preferred state severance tax.

Loescher

294 Bob ~~Looker~~, VP Resource Mgmt, Sealaska – passed out prepared testimony. Also handed out proposed amdmts to draft bill – substituting 2 paras for lang in HB, l. 29, p. 1 – p. 2, l 1-3. ~~How~~ ~~State~~ Explained. Amdmt says conversion for any use except forest land becomes developed land. Forest resources dept have no formal tax structure; Wonder asked if bill inadvertently establishes forest tax pgm. Wd like to wk w/ legis to establish more formal policy on taxn of forest lands rather than doing it as part of this bill.

380 Second amdmt says state govt will retain pwr to tax forest land; second section deals w/ delegn of tax purs to local govt.

391 Kie Campbell, ~~state~~ staff to S CL+RA – involved in drafting CS. Gave background on how they arrived at CS. Tried to draft bill that closely follows intent of ANCSA so it will be upheld in any future litigation. Did not feel bill shd address broad resource taxation issues.

455 Rep Bylsma said bill wd be held, as there was no quorum.

462 — ~~HB 846~~ was brought before comm in lieu of HB 846.
CS SB 798

chief, Market surveillance Sec

485 Don Koch, Dir of Ins — support bill. Refused to post'n paper, requesting amdmts which were inc'd into CS. Said there is prob w/ Sec 5 & 6 (drafting error).

500 Rogers said prob came up in Fbx; asked if bill addressed it.

Koch said most title ins wk is done when preparing title report; insurance follows report. Prob comes up in rate files. Said bill allows rating orgns, doesn't require them.

569 Rogers requested staff to redraft bill, deleting sec. 6.

578 Bylsma had qstns abt granting license in part or in (p. 6, l. 22) whole. Koch said conceivably dir may wish to limit role of rating orgn.

617 Koch said need to remove current sec 6 from CS.

630 Bylsma p. 6, line 27 (1) — qstn on whether there was technical error in subsection. Koch clarified intent of section.

670 Bylsma, on old bill, p 4 l. 8 ~~a man~~ p. 5, l. 22 — had qstns. Koch explained.

(meter 714)
0:03 Randolph returned)

723 Rogers moved to report HCS SB798 (L&C) consisting of SB, minus sec 6 of SB. Mo passed w/o objection.

Side B 006

HB862 Bylsma referred comm to HB 862

009 Lorraine McGregory — gave her personal history & told how bill would ~~impact~~ help her.

063 Rogers asked clarification.

068 Kent Humphries, CJS, Dep Dir, Div of Retirement Benefits — thinks it's a good bill to accomplish purpose. Concern w/ bill is whether that's all bill would accomplish. Elaborated.

097 Rogers asked how actns such as McGregory's wd be administratively handled. Humphries said lump sum, less lump o pymt, ~~plus~~ with interest on both.

115 Humphries suggested adding intent to bill. Discussion of impact.

130 Barry said it isn't uncommon to limit repeal to those actns that won't pyramid mo'l benefits. Discussion.

140 Rogers moved to add secs 2 — end of HB 151 to end of bill. for - Rogers opp'd - Randolph, Bylsma

157 Rand l. 10 remove period after 1968 & add

Rogers asked unan consent.
There was discussion.
Rogers w/drew request for unan consent.
Rand w/drew mo

178 Rogers moved to add ltr of intent to limit to circumstances described & not to allow pyramiding of
Discussion of alternate methods to accomplish purpose of bill.
Mo passed w/o objection.

CAPE FOX CORPORATION TESTIMONY ON SENATE BILL 802
March 9, 1982

My name is Kellus Sewell, the Governmental Affairs Representative for Cape Fox Corporation (CFC). Cape Fox Corporation, as many of you may know, is a small village corporation in Saxman, Alaska near Ketchikan.

As evidenced in the Alaska Native Claims Settlement Act (ANCSA) and as amended by the Alaska National Interest Lands Conservation Act (ANILCA), the twenty year tax moratorium was granted to free the Native community from burdens of federal taxation until a period of time elasped that was considered necessary to allow them to "get their feet on the ground." Let me emphasize that the exemption was not for a short period of time but for "twenty years".

We hope that as you review the matter of state and local taxing of these private resources, many owned by small corporations, that you also recognize the need to support tax exemptions, credits, and incentives until a sound economic base is established.

The Cape Fox Corporation strongly feels that development of "renewable" and "nonrenewable" resources ought to be encouraged yet only if adequate time is allowed for proper planning. Consequently, we encourage the administration and the legislature to consider the following:

(1) Exempting the Native entity from taxation until development results in the actual "generation" of income;

(2) Providing for tax incentives (i.e. similar to H.B. 866) to stimulate more diversified development;

(3) Allowing for environmental credits related to investments to guarantee sound development of our most valuable natural resources; and

(4) Establishing a tax limitation that will not erode profits or revenue from potential development but result in placing us in a "fair" competitive advantage with timber marketed from state or federal lands.

Therefore, we support Senate Bill 802 and House Bill 885 as long as the "forest" language (line 29, page 1 through line 3, page 2) exempts forest resources from taxation until the concerns mentioned above are adequately addressed.

We again emphasize that we strongly encourage the legislature to adopt a definition of "developed" property that will encourage sound development and one which does not result in taxes until the developed property actually generates income. If the state elects to allow local governments to develop their own taxing mechanisms,

we would hope that the state would see fit to establish a "taxing framework" that would promote sound development through uniform treatment of tax exemptions, credits, incentives, and limitations.

We hope that we will be included in any future deliberations on this issue and thank you for the opportunity to allow Cape Fox Corporation to present its concerns.

TO: Reprsentative Terry Martin, Chairman
House Labor and Commerce Committee

FROM: Representative Albert P. Adams, Chairman
House Finance Committee

DATE: March 18, 1982

SUBJ: HB 885, "An Act relating to tax exemptions; and providing for an effective date"

I have introduced this bill to clarify the term "developed," which is not explicitly defined in the ANCSA Act of 1971, or the amndments made to it by ANILCA of 1980. Passage of this bill is very important to Native corporations and local governments. If this issue is not settled through legislation, it will be resolved in court, at great expense to all concerned.

Section 21(d) of ANCSA, as amended, provides a tax moratorium on ANCSA lands for a period of twenty years. However, this exemption is lost when the land is "developed." Since the term "developed" is not defined in the act, different definitions are being used by different local tax assessors. Cook Inlet Native Corporation, for example, has land in both the Municipality of Anchorage and the Mat-Su Borough, and is taxed differently by each.

Some assessors claim that ANCSA lands are subject to local taxation when conventional developments such as construction of roads, surveying, and the provision of utilities are made on the lands. Congressional intent holds that taxation does not become effective until some form of economic development which produces income from the land is made. The legislative history of ANCSA and ANILCA shows that Congress intended the taxability of ANCSA lands to be linked to the generation of income, thereby providing the revenues necessary to pay property taxes without risking loss of the lands. I believe this bill defines the term as closely to Congressional intent as possible.

A committee substitute has been drafted by the Senate Community and Regional Affairs Committee, to be considered later this afternoon. I would propose that this committee substitute be accepted by House Labor and Commerce. The substitute rephrases section 1 (1) and deletes reference to platting and to forest lands.

STATE OF ALASKA

JAY S. HAMMOND, GOVERNOR

DEPARTMENT OF COMMERCE &
ECONOMIC DEVELOPMENT

DIVISION OF INSURANCE

POUCH D
JUNEAU, ALASKA 99811
PHONE: 465-2515

LEGISLATIVE POSITION PAPER
SB 798 and HB 846
March 8, 1982

SB 798 and HB 846 are identical proposals relating to title insurance rating organizations. The proposal would permit the use of a title insurance rating organization by title insurance companies doing business in this state. Current Alaska law regulating title insurance (AS 21.66) derives from a model law drafted by the American Land Title Association which includes a provision for title insurance rating organizations. This provision was not included when the current Alaska title insurance law was adopted in 1974. This was due primarily to the objections of this division. It was felt that rating organizations for title insurance would not be in the best interest of the Alaska insuring public.

Rating organizations typically develop anf file rates, rules, rating plans, statistical plans, contract forms and endorsements on behalf of member and subscriber companies. They enable companies to act together in these issues and provide a broader base of experience and credibility for the rates used as well as reduce insurance company expenses by avoiding duplication of some rate development functions. Insurers are able to act in this fashion because of enabling Federal legislation, namely, the McCarran-Ferguson Act (Public Law No. 15, 79th Congress, 1st Session 1945, 59 Stat. 33, 15 U.S.C. Secs. 1011-1015). This approach has been used in property, casualty, surety and marine lines of insurance for most of this century. Rating organizations have been viewed as anti-competitive devices in the property, casualty, surety and marine field and indeed some modification of their role in those markets should be and is being considered.

The marketing of title insurance is distinctly different from property, casualty, surety and marine kinds of insurance. Competition is structured differently. This is due in part to the fact that title insurance is almost always an incidental part of a transaction involving real estate. It is also due in part to the fact that while most other kinds of insurance are based on a rate making methodology that reflects

risk assumption and distribution, title insurance is based on a methodology that looks to risk avoidance or risk elimination. There is no one way to establish and support rates for title insurance in this state. In fact the principal method currently is to follow the leader. We have concluded that the best way to develop a rate-making methodology with all that is needed to support such a system is to enable a rating organization for title insurance. It would admittedly provide a rating system with uniform rates, but we have rates that are uniform now. It would provide a vehicle for developing supportive statistics and distributing information to the public. We believe that a title insurance rating organization could provide a positive and favorable force in this state and assist the division to effectively meet its responsibilities under the insurance law of Alaska.

We have one principal concern with the bill. That concern is that current problems with the divisions procedures for disapproving a filing relating to title insurance would be compounded with passage of this proposal. AS 21.66.400 now provides that the division can only disapprove a filing after a hearing has been held. We would propose that the authority to disapprove a filing without first holding a hearing be granted. Our proposal would still provide for a hearing when it is requested by the person which made the disapproved filing. This approach is currently incorporated in the property, casualty, surety and marine rate law (AS 21.39.120). Given this change (proposed language attached) we support the enabling authority for a title insurance rating organization proposed in SB 798 and HB 846.

Suggested amentments to SB 798 and HB 846

In both bills, remove the material on page 3, lines 5 through 29 and page 4, lines 1 through 15 and replace with the following:

CURRENT LAW	PROPOSED LAW	COMMENTS
Sec. 21.66.400. Disapproval of filings. (a) Upon the review at any time by the director of a filing, he shall, before issuing an order of disapproval, hold a hearing upon not less than 10 days written notice, specifying in reasonable detail the matters to be considered at the hearing. Notice of the hearing shall be given to each title insurance company which made a filing, and if, after the hearing, the director finds that the filing or a part of the filing does not meet the requirements of this chapter, he shall issue an order specifying how it is deficient, and when, within a reasonable period thereafter, the filing or a part of it is considered no longer effective. if the filing or a part of it has become effective under the provisions of sec. 370 of this chapter. A title insurance company has the right at any time to withdraw a filing or a part of a filing. Copies of the order issued under this section shall be sent to every title insurance company affected. The order does not affect a contract or policy made or issued before the expiration of the period set out in the or ler.	Sec. 21.66.400. DISAPPROVAL OF FILINGS. (a) If within the waiting period provided for in sec. 370(c) of this chapter, the directdr finds that a filing does not meet the requirements of this chapter, he shall send to the title insurance dompany or title insurance rating organization which made the filing, written notice of disapproval of the filing specifying in what respects he finds the filing fails to meet the requirements of this chapter and stating that the filing shall not become effective. (b) If at any time subsequent to the applicable review period provided for in sec. 370(c) of this chapter, the director finds that a filing does not meet the requirements of this chapter, he shall, before issuing an order of disapproval, hold a hearing upon not less than 10 days written notice, specifying in reasonable detail the matters to be considered at the hearing..Notice of hearing shall be given to each title insurance company or title insurance rating organization which made the filing, and if, after the hearing, the director finds that the filing or a part of the filing does not meet the requirements of this chapter, he shall issue an order specifying how it is deficient, and when, within a reasonable period thereafter, the filing or a part of it in considered no longer effective. A title insurance company of title insurance rating organization has the right to withdraw a filing or a part of a filing. Copies of the order issued under this section shall be sent to every title insurance company and title insurance rating organization affected. The order does not affect a contract or policy made or issued before the expiration of the period set out in the order.	The proposed law splits the current subsection (a). The new subsection (a) allows disapproval of a title filing,when done within the waiting period, without a hearing. The new subsection (d) provides for a hearing in such cases when requested. This procedure is the same as is now being used for property, casualty, surety and marine insurance regulated under AS 21.39. The new subsection (b) is the same procedure applied to filings to be disapproved after the filing has become effective. The only difference basically is the added language for title insurance rating organizations.

CURRENT LAW	PROPOSED LAW	COMMENTS
(b) A person or organization aggrieved with respect to a filing which is in effect, may make written application to the director for a hearing on the filing. The title insurance company that made the filing may not proceed under this subsection. The application shall specify in reasonable detail the grounds to be relied upon by the applicant. If the director finds that the application is made in good faith, and that the applicant would be aggrieved if his grounds are established, and that his grounds otherwise justify holding such a hearing, he shall within 30 days after receipt of the application, hold a hearing upon not less than 10 days written notice to the applicant and to each title insurance company which made such a filing. If, after the hearing, the director finds that the filing or a part of it does not meet the requirements of this chapter, he shall issue an order specifying how the filing or a part of it fails to meet the requirements of this chapter, stating when, within a reasonable period after the order is issued, the filing or a part of it is considered no longer effective. Copies of the order shall be sent to the applicant and to every such title insurance company. The order does not affect a contract or policy made or issued before the expiration of the period set out in the order.	(c) A person or organization aggrieved with respect to a filing which is in effect may make a written application to the director for a hearing on the filing. The title insurance company or title insurance rating organization that made the filing may not proceed under this subsection. The application shall specify in reasonable detail the grounds to be relied upon by the applicant. If the director finds that the application is made in good faith, and that the applicant would be aggrieved if his grounds are established, and that his grounds otherwise justify holding a hearing, he shall, within 60 days after receipt of the application, hold a hearing upon not less than 10 days written notice to the applicant and to each title insurance company or title insurance rating organization which made such a filing. If, after the hearing, the director finds that the filing or a part of it does not meet the requirements of this chapter, he shall issue an order specifying how the filing or a part of it fails to meet the requirements of this chapter, stating when, within a reasonable period after the order is issued, the filing or a part of it is considered no longer effective. Copies of the order shall be sent to the applicant and to every affected title insurance company or title insurance rating organization. The order does not affect a contract or policy made or issued before the expiration of the period set out in the order.	Current subsection (b) is the same as proposed subsection (c) except that title insurance rating organizations have been reflected and the period for granting a hearing under the subsection has been extended from 30 days to 60 days. The real effect is to require notice of hearing within 50 days rather than 20 days.

CURRENT LAW	PROPOSED LAW	COMMENTS
NONE	(d) A title insurance company or title insurance rating organization to which the director has issued an order made without a hearing may, within 30 days after notice to it of the order, make a written request to the director for a hearing. The director shall hear the party or parties within 60 days after receipt of the request and shall give not less than 10 days written notice of the time and place of the hearing. Within 15 days after the hearing the director shall affirm, reverse or modify his previous action, specifying his reasons. Pending the hearing and decision the director may suspend or postpone the effective date of his previous action.	This subsection has been noted in the discussion relating to the splitting of current subsection (a).
NONE	(e) A hearing under this section is not required to observe formal rules of pleading or evidence.	This is a new subsection and is selfexplanatory.
(c) No filing or modification of a filing may be disapproved if the rates in connection with the filing meet the requirements of this chapter.	(f) No filing or modification of a filing may be disapproved if the rates in connection with the filing meet the requirements of this chapter.	Current subsection is identical to proposed subsection (f).

PREVIOUS ACTION

HB 832 See minutes of 3/2/82.

Statutory Reference: AS 08.01.010; AS 08.18

Action Taken: This was a special night meeting to allow Juneau area residents the opportunity to testify outside normal working hours. No formal action was taken.

ACTION NARRATIVE

Tape #40
Recording
Number 000

The meeting was called to order by Chairman Martin at 7:15 p.m. Members present were: Reps. Martin, Bylsma, Randolph, Rogers. Rep. Gardiner was absent. The purpose of the meeting was to allow Juneau area residents the opportunity to testify on HB 832 outside their normal working hours.

Number 017

Joe Guthrie said, since the last meeting, it seems there's an emerging consensus that elements of the bill will be enacted, but there is some doubt whether the surety fund will remain in the bill. He still supports the surety fund, but thinks the objective can be achieved in other ways. He has heard some contractors maintain that they should not have to pay for someone else's mistakes, but they carry other kinds of insurance, so this fund is not a novel idea. He felt the legislature has the prerogative to require it. He said there is a real need for some kind of risk pool.

Number 062

Guthrie said he has also heard contractors say problems would be solved if the existing laws were enforced. Guthrie felt that many problems have been caused by licensed contractors. He said many people are careful consumers. In many cases, the people injured have taken every precaution, but they often suffer losses because of gross negligence on the part of the contractor. He related his personal experience. Guthrie said the surety fund is really needed to protect consumers.

Number 120

Rep. Martin asked if small claims court could not clear up many of the problems Guthrie spoke of. Guthrie said the bill would provide for an adjudicator to hear claims cheaply and expeditiously, and said the courts aren't set up to provide this

quick, inexpensive service.

Number 150 — The committee discussed Guthrie's particular situation. Rep. Bylsma noted there is no time limit provided in which claims can be brought. He said one could wait twenty years to make a claim, in some cases. This was discussed.

Number 175 — George Imbsen told of his experience with a contractor. He began building a house, and hired a framing contractor. The contractor hired a subcontractor to do the roofing. The contractor then came to Imbsen for funds to pay the subcontractor; took the funds; never paid the subcontractor; and left town.

Number 227 — Edith Brand said she had, over a period of time, had three houses constructed. She had no problems with the first contractor. On the second house, the contractor did not put in enough pilings. The house settled and warped (doors would not shut, etc.). She got a judgment against the piledriver, but still lost money. The house would have been worth $90,000, but the Borough assessed it at only $42,000. She contracted a third house to be built. Six months after the contractor began building, he presented her with a bill. She refused to pay a portion of the bill because he had not complete all the work. He refused to do the work she wanted; she refused to pay. The bank refused to finance the house because the contractor put a lien against it, so she had to pay construction loan interest for a year while the matter was in court.

Number 312 — Rep. Rogers did not see how the bill would address Brand's situation. There was discussion. Rep. Rogers said, as provided in the bill, the process in a dispute would be the same as now exists--the matter would go to court, or, if the bill were enacted, might go before the administrative arbitrator. Rep. Bylsma suggested contacting the Consumer Protection Agency. Rep. Martin had questions about how Brand went about selecting her contractors.

Number 385 — Phil Morris had a home built which was finished about a year ago June. The contractor estimated the house would cost $100,000. Morris was paying the contractor

as work was being completed; by the time he had paid $90,000, the house was not even fully framed. He lost money on the deal. Morris felt part of the problem was that, as a contractor's business grows, he spends less time personally supervising construction. He was also concerned that contractors aren't required to bond high enough to cover costs.

Number 471

Rep. Rogers said that was a good point, but that the problem with bonding for a small or new contractor was that bonding is not available. He said increasing bond requirements would be a barrier to new people getting into the business, because, as they cannot get bonds, they would have to put up cash, which most new or small businesses don't have. Rep. Rogers asked Rep. Randolph if there was any way to make it easier for new contractors to get bonding, so that the bonding limit could be raised. Rep. Randolph said the cost would be prohibitive, thousands of dollars per year. Jeff Barry, committee aide, suggested that basing the bond on the percentage of business the contractor does might be easier. Rep. Randolph felt the best approach was to have an effective, efficient, and economical arbitration system. He thought the arbitration process which might be established by the bill would be more efficient than the court system.

Number 585

Rep. Rogers suggested setting up a loan program for homebuilders associations to set up their own surety funds. This would give people the option of going to the homebuilders association, where they had some security in their investment, or of choosing a "fly-by-night" contractor. Rep. Randolph thought that was a great idea. Also, each association could set their own criteria, which would benefit the consumer.

Number 635

Jim McConaghy, president of Juneau Homebuilders Association, said the association would be represented at the teleconference, and would present formal recommendations and resolutions for the committee's consideration. In response to previous testimony, McConaghy said he would like figures on how many problems are caused by licensed contractors. He said he met

with the Department of Commerce and another agency, who indicated that the majority of problems were with unlicensed contractors. McConaghy gave examples. He wondered how far the state should go in protecting people from themselves. There was discussion.

Side B, Number 008 As there was no further business to come before the committee, the meeting was adjourned at 8:04 p.m.

HOUSE LABOR & COMMERCE COMMITTEE

HEARING DATE: _____

H. Labor & Commerce 3/18/82

Absent: Gardiner

HB 832 — Special night mtg Tape #40

7:15

000 Call to order; intd HB 832

017 Joe Guthrie — since last mtg, seems there's emerging consensus, elements of bill will be enacted, but some doubt whether surety fund will remain in bill. Still supports surety fund, but thinks objectives can be achieved in other ways. Has heard contractors maintain they shdn't have to pay for someone else's mistakes, but they carry other kinds of insurance, so this fund is not a novel idea, & legis has prerogative to require it. Real need for some kind of risk pool.

060 Has also heard contractors say probs wd be solved if existing laws were enforced; he thinks many probs have been caused by licensed contractors.

071 Many people damaged are careful consumers. In many cases, people injured take every precaution. Often suffer loss because of gross negligence. ~~wanton or willful~~ Gave an example of his personal experience.

116 Surety fund is really needed; it's not the consumer's fault.

120 Martin asked if small courts claim cd clear this up. Guthrie said they are going to ct, but bill wd provide for adjudicator to hear claims cheaply & quickly. Courts aren't set up to handle these problems expeditiously & cheaply.

150 ~~Bylsma ask~~ Discussion of Guthrie's particular sitn. Bylsma noted no time limit for claims; could wait 20 yrs to make a claim in some cases.

175 George ~~Jmason~~ Imbson – related personal experience. Began bldg house 5 yrs ago; hired framing contractor. One thing in contract was job shd be done in a timely manner. Contractor subbed roofing to another contractor; Contractor then asked for money to pay roofer, got it, & never paid roofer; subsequently left town.

227 Edith Brand – Contractor didn't put enough pilings in house; house settled & warped (doors wdn't shut, etc) Got judgment against piledriver, but still lost money. Wd have been $90,000 house, but only worth $60,000 w/ foundn prob. Borough assessed it at $42,000.

– Built another house, contracted out. 6 mos after he began bldg, he presented bill; she wdn't pay a portion of bill because he hadn't completed everything. He refused to do work she wanted, she wouldn't pay. Bank wdn't finance house because he liened it. Had to pay construction loan % for a yr while matter was in court.

318 Rogers didn't see how bill wd address this; ~~Jmason~~ Brand said, p 9, item b, wd cover it. Discussion Rogers said, dispute process in a wd be same as process now – court (or, in bill, administrative arbitrator). Bylsma suggested CPA.

390 Martin asked how she selected contractors — 1st house, she knew guy; second house, went to Capp Homes; third house she bid.

385 Phil Morris — had home built, finished abt a yr ago June. Estimated $100,000; at $90,000, house was not fully framed (he was paying contractor on demand). Had to put out $50,000

Felt part of prob was, as contractors business grows, he spends less time personally supervising construction.

Also concerned contractors aren't reqd to bond high enough to cover costs

471 Rogers said that's a good point, but prob w/ bonding for small, new contractor is it's not available. Barries to new people getting into business, as, especially if bond reqmt is raised, because small businesses have to put up cash, & they don't have it.

503 Rogers asked Randolph if there was any way to make it easier for new contractors to get bonding, so that bonding limit can be raised.

Randolph said cost of 30-40,000 bond wd be prohibitive (thousands per yr.)

Barry said basing bond on % age of business might be easier. Randolph felt best approach was to have effective efficient clerical arbitration system. Thought arbitrn process cd be established thought wd be more efficient than ct system.

585 Rogers suggested setting up loan pgm for homebuilders, to assn set up their own surety fund. This wd give people the option of going to assn or a fly by night operation. Randolph thought that was a great idea; each assn could set their own criteria, which wd benefit consumer.

635 Jim McConaghy, pres, gnw Homebuilder — Assn will attend telecons w/ formal recommdns & resolutions.
Comments on tonights testimony — re "lots of pblms caused by licensed contractors" — he'd like figures on that.
Met w/dept of Commerce, who said majority of prob were with unlicensed contractors. ~~Checked on some other most problems — one, per Phil Wolfson~~ Gave examples. Wondered how far state shd go in protecting people fm themselves.

~~743 Randolph had gotten~~. Discussion

Position Statement: Took part in discussion of HB 639.

Jim Dodson, Secretary
Alaska Aviation Safety Foundation
519 West Fourth Avenue
Anchorage, Alaska

Position Statement: Discussed HB 634; requested support for his group's programs.

PREVIOUS ACTION

HB 634

See minutes of 1/21/82 (teleconference); and 2/26/82.

Statutory Reference: AS 09.65

Action Taken: Rep. Rogers moved to adopt a committee substitute which would increase taxes on aviation gas and jet fuel for a three-year period, with a letter of intent requesting increased fees go to the Alaska Aviation Safety Foundation, and recommending a Finance referral. Rep. Rogers withdrew motion.

Rep. Rogers moved to send a letter to the House Finance Committee recommending they increase the taxes, as proposed above, and add a letter of intent to a bill that is in their committee. There being no objections, the motion passed.

Rep. Rogers moved to table HB 634. There being no objection, the motion passed.

HB 639

No previous action.

Statutory Reference: AS 39.30.150

Action Taken: Rep. Rogers moved to delete subsection (d), on page 1, line 10-12, and replace with a new subsection (d). Motion passed by unanimous consent.

Rep. Rogers moved, page 1, line 24, to add section 2 through the end of SCS CSHB 121 to HB 639. There was objection. On the question: for--Rogers, Gardiner; opposed--Randolph, Martin, Bylsma. Motion failed.

Rep. Randolph moved to report CSHB 639 out of committee. Motion passed without objection.

Rep. Randolph moved the committee rescind its action on HB 639 for purposes of discussion. There was objection. Rep. Randolph withdrew his motion.

ACTION NARRATIVE

Tape #41
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:45 p.m. Members present were: Representatives Martin, Bylsma, Gardiner, Randolph, and Rogers. There were no members absent. SSHB 639 was brought before the committee for consideration.

Number 018

Rep. Randolph, prime sponsor of the bill, explained that he introduced the bill to maximize the employee's latitude with what they can do with their contribution to the supplemental benefits system upon termination.

Number 040

Paul Arnoldt, Director of the Division of Retirement, said currently, if there is more than $1,000 in the employee's account, the money must remain in the account until age 55. The bill makes a distinction between the monies in the system (the employee's and the employer's). He said if the money isn't considered employee money, it is no longer tax sheltered. He felt subsection (d) should be changed to say, "on behalf of the employee", and that "under the terms of the State of Alaska Supplemental Annuity Plan" should be added to the end of that sentence. He then went over the history of the legislation and of the annuity fund.

Number 116

Rep. Rogers noted that the bill would leave the decision up to the employee. Rep. Rogers asked Rep. Randolph if it was his intent to pay one-half the amount in the employee's fund to the employee; Rep. Randolph said it was.

Number 130

Cherie Shelley, APEA, favored keeping the SBS program. She supported the concept of the bill and the amendments proposed. Rep. Rogers asked her opinion of other amendments to include optional methods to pay the money back to the employee, and making a provision for paying interest. Shelley agreed with those ideas. Arnoldt elaborated on how the IRS views the funds and how to provide various options to the employee.

Number 200

Rep. Rogers asked clarification about how the system would actually work, and gave an

example of a situation. Arnoldt explained and suggested different language for amendments. There was discussion.

Number 248

Rep. Rogers questioned whether the employee's decision about the money had to be made upon termination. Arnoldt said the employee can: 1) take the money on termination; or, 2) defer payment to some later date. He clarified the term, "constructive receipt". Ken Humphreys, Department of Administration, gave an example of a situation. There was discussion.

Number 306

Rep. Rogers moved to delete subsection (d) and replace with new language. Upon discussion, he withdrew the amendment and moved to delete subsection (d) and replace with: "(d) Upon termination of employment by an employee, the amount held on behalf of the employee in the Supplemental Annuity Account may be paid to the employee under the terms of the State of Alaska supplemental annuity plan upon application by the employee." The motion passed by unanimous consent.

Number 330

Rep. Rogers moved to add to page 1, line 24, of the bill, sections 2-end of SCS CSHB 121. There was objection. Rep. Rogers elaborated on his reasons for moving the amendment. Rep. Martin felt this could be better addressed later. Rep. Gardiner felt time was critical, given the fact that the session will soon be drawing to a close. On the question: for--Gardiner, Rogers; opposed--Randolph, Bylsma, Martin. Motion failed.

Number 383

Rep. Randolph moved to report CSHB 369 (L&C) from committee. Motion passed without objection.

Number 408

Rep. Randolph moved to rescind the committee's action on HB 639 for purposes of discussion. Rep. Gardiner objected. Rep. Randolph explained his reasons for moving to rescind. Rep. Rogers explained why the committee had acted correctly. Rep. Randolph withdrew the motion.

Number 433

The chairman then turned the committee's attention to HB 634. Rep. Rogers said he

felt the existing bill is unconstitutional, and that the only solution he had found was one he did not favor.

Number 454 — Jim Dodson, secretary of Alaska Aviation Safety Foundation, testified regarding HB 634. He also introduced a letter to Jack Fuller from Tulinda Deegan, president of Alaska Air Carriers Association. He read Deegan's letter to the committee elaborating concerns with the bill.

Number 530 — Rep. Rogers asked if there had been discussion of state-funded insurance or of the state working with an organization that wished to offer insurance. Dodson said state insurance was not favored. He said the approach they are working on is the Alaska Aviation Safety Foundation attempting to come up with a certification program.

Number 562 — Rep. Gardiner said there had been discussion of self-insuring through a fund. Dodson said there had been discussion, but no action. He felt the air carriers did not have a large enough pool to self-insure. Dodson said they currently have a workers compensation group insurance, but that the plan was less than a year old, so they were not yet sure how it would work.

Number 602 — Rep. Gardiner said the fishing industry had encountered the same problem of high insurance rates. He said they set up insurance pools, and that it had worked well. Rep. Gardiner noted that his insurance rate had dropped by half. He explained how the fishermen had set up their program. Gardiner felt a governmental entity could not legally disallow people access to such a pool the way private groups can; a private group could refuse to allow those with poor safety records. He recommended this method in the "best unwashed Libertarian tradition".

Number 665 — Rep. Rogers agreed with Rep. Gardiner. He explained how he visualized this working. He said if Lloyd's would not fund it, perhaps the state should fund it until the insurance brokers do. He agreed with limiting attorney's fees. He recommended writing a letter to the Finance Committee urging funding of the Alaska Aviation Safety

Foundation.

Number 718 — Rep. Randolph agreed that the government should step in and get into the insurance company business in a big way. He spoke of pilots' relationship to the great Alaskan tradition.

Side B, Number 006 — Rep. Gardiner wondered about limiting attorney's fees--he was not sure the state could tell a citizen what he could do in terms of paying for anything. Rep. Randolph agreed.

Number 014 — Dodson said he would greatly appreciate discussion in Finance for continued funding of the Alaska Aviation Safety Foundation. He elaborated on a resolution passed by the Foundation and spoke of work done by the Foundation. He said they had unanimously asked the state to increase the tax on aviation gas and jet fuel in order to fund the Safety Foundation. He felt the tax should last for three years, after which they expect to be self-supporting.

Number 050 — Rep. Rogers moved to adopt a committee substitute for HB 634, which would contain a provision for increasing aviation gas tax to 4-1/2¢ and jet fuel tax to 2-1/4¢ for a three year period, with a letter of intent asking that the increased fees go to the Alaska Aviation Safety Foundation, and to encourage forming group insurance. Rep. Martin said he had assumed a bill was being used to do this. Rep. Rogers recommended doing it anyway. Rep. Rogers recommended requesting a Finance referral, as well.

Number 074 — Rep. Randolph preferred to send a letter of intent, rather than amend HB 634. Rep. Rogers said a letter of intent can't be done unless there is a bill. He suggested an alternative would be the committee sending a letter to House Finance recommending they add a letter of intent to a bill they have in committee, and he so moved. There being no objections, the motion passed.

Number 089 — Rep. Rogers moved to table HB 634. There being no objection, the motion passed.

Number 092 — Rep. Martin went over the committee's calendar. There was some discussion of

bills coming up.

Number 102 — There being no further business to come before the committee, the meeting was adjourned.

House of Representatives

LABOR AND COMMERCE COMMITTEE

To: Representative Al Adams, Chairman
House Finance Committee
From: Representative Terry Martin, Chairman
House Labor & Commerce Committee
Date: March 30, 1982
Subject: HB 37 relating to the motor fuel tax.

On behalf of this committee, I urge you to adopt an amendment to HB 37, which is currently in your committee. We ask that you increase taxes on certain aviation fuels for a period of three years, specifically: increase the aviation gas tax to 4-1/2¢, and increase the jet fuel tax to 2-1/4¢. We further request that the additional tax monies be used to fund the Alaska Aviation Safety Foundation, and to encourage pilots to form group insurance plans. The Foundation feels that the tax needs to be collected for a period of only three years, after which they believe they will be self-supporting.

We believe the work of the Alaska Aviation Safety Foundation to be in the interest of public safety. After extensive hearings, we also believe that the pilots of our state need a viable alternative to existing insurance programs, and would like to encourage them to form group insurance plans. Many air taxi operations and other air carriers are in danger of having to go out of business, due in large part to the high insurance rates they are forced to pay.

We appreciate your consideration of this request. If you desire further information or assistance, don't hesitate to contact my office.

Terry Martin

HB 634
SS HB 639

Tape # 41

1:45

000 Call to order by Martin; int'd SSHB 639

~~SSHB 639~~
SS HB 639

018 Randolph – sponsor – explained why he int'd bill: To maximize employee's latitude w/ what they can do w/ their contr, upon termination to Supp. Benefits Syst

040 Paul Arnoldt, Dir, Dev Retirement — Currently, if more than $1,000 in acct, money must remain in acct until age 55. Bill makes distinction between monies – employer's & employee's. If money isn't considered empe money, it is no longer tax sheltered. Sec 2 (d) shd be changed to "on behalf of emple" & "under the terms of the St Ak Suppl Annuity Plan" added to end of that sentence.
Gave history of legis'n & of annuity fund.

116 Rogers – then bill wd be it up to empe ~~what is~~ asked Randolph, if amdmts were made, wd his intent be to pay 1/2 the amt? R.. yes

130 Cherie Shelley, APEA, ~~said majority~~ favor keeping SBS program. ~~Want~~ support concept & amdmts proposed.
Rogers asked abt other amdmts. – ~~shd they be allow~~ optional ways to pay money back to empe, & provision for paying interest. Shelley agreed.

162 Arnold elaborated on how IRS views the funds & how to provide various options to empe.

200 Rogers gave example of a sctn & asked clarification abt how system wd work. Arnold explained & suggested different language for amdmt. Discussion.

248 Rogers had more gotns — whether decision abt money has to be made upon termination. Arnold: 1) take on termination o/ defer to some date. Clarified term "constructive receipt." ~~Ken Humphreys~~ (guy with pipe) gave example of sctn. Discussion.

306 Rogers moved:

Upon termination

w/drew amdmt.

317 Rogers moved:

Upon termination

Motion passed by unan consent

330 Rogers moved p. 1, l. 24 to add sections 2 through end of SCSCSHB121

There was objection. Rogers elaborated on his reasons for moving amendment. Martin felt this cd be better addressed later. Gardner felt time was critical. ~~Rogers~~ On gotn: for: Rog, Gard opp'd: Rand, Bylsma, Martin

383 Randolph moved CSHB 369 be reported; passed w/o objection.

408 Rand moved to rescind action on HB 639 for discussion; Gardiner objected; Randolph explained -- felt "shall" shd be used rather than "may". Rogers explained it was to deal w/IRS. Randolph w/drew mo.

HB 634

433 HB 634 was brought before comm.

Rogers said existing bill is unconstitutional; only solution he found was one he did not favor.

454 Jim Dodson, secretary, Ak Aviation Safety Foundn; also brought ltrs fm Tulinda Deegan, pres, Ak Air Carriers, to get matter. He read Deegan's ltr to committee. Pointed out Air Carriers & Safety Foundn appreciated efforts on their behalf.

Concerns with bill

530 Rogers asked if there was discussion of state funded insurance, or state wkg w/an agn wanting to offer ins.

Dodson said state insurance was not favored. Approach they're wkg on is ak aviation Safety Foundn - attempting to come up w/ certification program.

562 Gardiner - there was discussion of self insuring through a fund.

Dodson said there had been discussion, but no action. Not big enough pool to self-insure. Currently have a wkrs comp group insurance - less than a yr old, so don't know how it will work.

602 Gardiner said fishing industry had same problem; they set up ins. pools; has wkd well; dropped his ins. by half. Explained how the fishermen did it. Government entity does can't legally disallow people the way private groups can. Recommended this in the best "unwashed" libertarian tradition.

665 Rogers agreed w/ Gardiner. Explained how he visualized this working. Said if Lloyd's wdn't do it, perhaps state shd fund it until ins. brokers do. Agree w/ limiting atty's fees. Recommended writing ltr to Fin Comm urging fndg of Av. Safety Foundn.

718 Randolph agreed govt shd step in & get into ins. business in big way. Spoke of pilots' relationship to the great Alaskan tradition.

Side B
006 Gardiner wondered abt limiting atty fees - whether state can tell citizen what they can do in terms of paying for anything. Randolph agreed.

014 Dodson - wd greatly appreciate discussion in Fin for cont'd fndg of Av Safety Foundn. Elaborated on a resolution passed by the Foundn & work done by the Foundn. Ulmer asked state to increase tax on av gas & jet fuel to fund the Av Safety Foundn. Tax shd last for 3 yrs, when they expect to be self-supporting.

~~Rep Rogers Martin~~

050 Rogers moved to adopt CS HB 634 which wd contain inc av gas 4½¢ & on jet fuel to 2¼¢ for a 3 yr period w/ ltr of intent asking increased fees ~~monies~~ to go to Av Safety Foundn, & to encourage group ins. Martin said he had assumed a bill was being used to do this. Rogers recommended doing it anyway.

072 Rogers said to also recommend fin referral.
Randolph preferred ltrs of intent. Rogers said ltrs of intent can't be done unless there's a bill. alternative wd be comm sending ltrs to fin recommending they add ltrs of intent. Moved that. No objections, bier passed.

089 Rogers moved to table HB 634. No obj, mo passed.

092 Martin went over comm. calendar

102 Rep Rand asked abt HB642; comm decided to act on it at beginning of tomorrow's mtg.

Please insert new subsection (d) — see attached —
prepare a final copy of CS SSHB 639 (L&C).

SPONSOR SUBSTITUTE FOR HOUSE BILL NO. 639

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to supplemental employee benefits; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 39.30.150 is amended by adding a new subsection to read:

~~(d) Upon termination of employment by an employee, the amount~~ contributed by the employee ~~that was~~ used to purchase supplemental ~~annuities may be refunded to the employee on application by the employee.~~

* Sec. 2. The plan administrator of the State of Alaska Supplemental Annuity Plan shall apply to the United States Internal Revenue Service for a ruling that an amendment to the plan to allow participants to receive an annuity benefit as provided in AS 39.30.150(d) at any age will not adversely affect the deferral of taxes and, on receipt of a favorable ruling, shall amend the plan in accordance with the provisions of this Act.

* Sec. 3. Section 1 of this Act takes effect on amendment of the plan by the plan administrator after receipt of a favorable tax ruling by the United States Internal Revenue Service.

* Sec. 4. Section 2 of this Act takes effect immediately in accordance with AS 01.10.070(c).

(d) Upon termination of employment by an employee, the amount held on behalf of the employee in the Supplemental Annuity account may be paid to the employee under the terms of the State of Alaska supplemental annuity plan upon application by the employee.

Alaska Air Carriers Association

March 19, 1982

Representative Jack Fuller
Pouch V
Juneau, Alaska 99811

Dear Mr. Fuller:

The Alaska Air Carriers Association appreciates you efforts to help control the escalating aviation insurance premiums.

Last week the air carriers met in Anchorage for the 1982 AACA Annual Convention and Trade Show. At the Convention we had a round-table discussion on the issue of insurance. Mr. Micheal E. Charlesworth, a lead underwriter for Alaska aviation insurnace at Lloyd's of London, Mr. Ian Lewis, a London Broker, Mr. Micheal J. Hall, a domestic underwriter, and Ken Moore, Direc. Division of Insurance participated in the discussion.

Mr Charlesworth advised the members of AACA that the enormous increase in insurance premiums was the result of the business practices of Lloyd's of London. Historically, Lloyd's has grouped Alaskan operators with all aviation in the United States. Lloyd's has found that the losses in Alaska have exceeded those in the lower 48 states.

The general consensus of the insurance representatives was that a limit of $250,000 would raise premiums, because the limit would become the standard payment for claims in Alaska. Smaller operators who only carry the $100,000 minimum insurance required by the Alaska Transportation Commission, would face increase insurance costs.

The insurance representatives recommended the following:

1. Continue the work of the Alaskan Aviation Safety Foundation
2. Develop a schedule of payments similar to Worker's Compansation
3. Limit attorney fees
4. Educate Alaskan juries that high awards are passed on to air taxi operators

The AACA stands ready to work with you to develop legislation to lower insurance premiums.

Sincerely,

Tulinda Deegan
Executive Director

HB832

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
March 23, 1982
1:05 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Gardiner
Rep. Randolph
Rep. Rogers

Members Absent: No members absent.

COMMITTEE CALENDAR

TELECONFERENCE HEARING

HB 832 An Act relating to the regulation of contractors; and providing for an effective date.

WITNESS REGISTER

Connie Sipes
Consumer Protection Agency
Anchorage, Alaska
Position Statement: Went over bill in detail, recommending changes as well as areas they support.

Bob Evans
Consumer Protection Agency
Anchorage, Alaska
Position Statement: Gave statistics about complaints filed regarding problems with contractors.

Jim Wilkins
Box 259
Wasilla, Alaska 99687
376-2324
Position Statement: Objected to bill.

Dave Gruenke
SRB, Box 7481
Palmer, Alaska 99645
Position Statement: Disagreed with portions of bill.

Harold Stocker
Box 2457
Sitka, Alaska
747-5110
Position Statement: Disagreed with bill.

Mary Lou Vilandre
Box 1420
Sitka, Alaska
747-8006
Position Statement: Opposed bill.

William Novcaski
Box 896
Sitka, Alaska
747-8966
Position Statement: Opposed bill.

Lorin M. Walker, Jr.
Walker Construction
Box 2580
Fairbanks, Alaska 99707
488-2346
Position Statement: Opposed bill.

Hans F. Hingst
North Pole Electric
SR Box 80430
Fairbanks, Alaska 99701
488-2967
Position Statement: Pointed out problems with bill.

Roland Stanton
3817 Fairview Avenue
Ketchikan, Alaska
225-3406
Position Statement: Objected to whole bill.

William McNall
attorney
Anchorage, Alaska
Position Statement: Supported bill; made recommendations.

Michael Stilley
Vice President, Construction Loans
United Bank of Alaska
Anchorage, Alaska
Position Statement: Felt bill needs work.

N.C. "Clay" Porter, President
Alaska Homebuilders Association
118 East International Airport Road
Anchorage, Alaska
276-3713
Position Statement: Commented on bill.

Beverly McClintock, President
Fairbanks Homebuilders Association
PO Box 81042
Fairbanks, Alaska

456-7421
Position Statement: Problems with bill.

Tom Hall
contractor
Haines, Alaska
Position Statement: Opposed bill.

Tom Bodett
general contractor
Petersburg, Alaska
Position Statement: Opposed bill.

Ken Helem
Sitka Electric
Box 1609
Sitka, Alaska 99835
747-8752
Position Statement: Agreed consumer protection necessary; proposed alternatives.

Paul Persinger
Persinger Homes, Inc.
Box 270
Wasilla, Alaska 99687
376-3800
Position Statement: Commented on bill and alternatives.

Dick Rorher
Box 2219
Kodiak, Alaska 99615
486-5835
Position Statement: Commented on bill.

Pat Verdugo
Little Lambs Day Care
315 Noyes Street
Fairbanks, Alaska
456-4465
Position Statement: Told of a problem she had with a contractor.

Robert Haines
Greater Anchorage Builders Council
Anchorage, Alaska
Position Statement: Requested amendments to bill.

Earl Carlyle
Anchorage, Alaska
Position Statement: Suggestions for amendments to bill.

Michael Ryman
consumer
Box 4222
Mt. Edgecumbe, Alaska 99835

Position Statement: Felt surety fund amount was not enough.

Breen Gaughan
State Home Building Industry
3220 Sleeping Lady Loop
Anchorage, Alaska
276-4470
344-1997
Position Statement: Commented on statistics introduced.

Joe Guthrie
attorney
Juneau, Alaska
Position Statement: Gave his views about bill; made suggestions.

Alan Eaker
d/b/a Great Land Interiors
PO Box 554
Wasilla, Alaska 99687
376-5947
Position Statement: Felt bill's intent was misdirected.

PREVIOUS ACTION

HB 832

See minutes of 3/2/82 and 3/18/82 meetings.

Statutory Reference: AS 08.01.010; AS 08.18

Action Taken: No formal action. Purpose of hearing was to take teleconference testimony statewide.

ACTION NARRATIVE

Tape #42
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:05 p.m. Members present were: Representatives Martin, Bylsma, Rogers, Randolph, and Gardiner. Rep. Martin left shortly after the call to order. Before the committee was HB 832. This hearing was teleconferenced, and testimony taken, statewide.

Number 015

CONNIE SIPES, Consumer Protection Agency, Anchorage, analyzed the bill after contacting affected parties. She said she would forward copies of this analysis. Sipes said the CPA found the projected rate of new home starts for 1982 to be 4,000-4,500 in the Anchorage area.

Sipes said the Consumer Protection Agency supports most of HB 832. Sipes went over the bill point by point, making recommendations. There was discussion by the committee at times throughout this testimony.

Number 498

BOB EVANS, CPA, Anchorage, presented statistics to the committee. He said there were 97 consumer complaints filed in the Anchorage office since 1979. In 1981, 55-60 more were received on the phone, but no formal complaints were filed. In 1980, the highest number of complaints were received, and that year, there were over 1,000 housing starts. He said most complaints resulted in: 1) no contractor response; 2) contractor had disappeared or absconded with the money (he said this accounted for 1 of every 4 complaints); 3) partial correction or adjustment by the contractor to the consumer; 4) there was a dispute in factual information, in which case the complaints were referred to the legal system. Evans said he would forward a copy of his report to the committee.

Number 607

Rep. Rogers had several questions regarding the statistics presented. Evans attempted to clarify.

Side B, Number 039

JIM WILKINS of Wasilla objected to three points: 1) the surety account, which he felt makes good contractors pay for the actions of poor contractors; 2) AS 08.18.107, dealing with subrogation rights--Wilkins objected to listing his costs as it would show the profit a contractor makes and would restrict profit; and 3) AS 18.18.125, Wilkins disagreed that one man (the Commissioner of Labor) should have power over every contractor in the state.

Number 086

DAVE GRUENKE of Palmer disagreed with the bill. He did agree with two year registration, but strongly disagreed with the surety fund. He felt providing a materials and labor invoice made no sense, would be a lot of work, and would allow the buyer to know what everyone is making.

Number 111

HAROLD STOCKER of Sitka disagreed because most complaints are registered from people who probably hire unlicensed contractors.

He felt the bill would create a wider gap of competition between the licensed and unlicensed contractors, as it would cost the licensed contractor more for bonding. He said unlicensed contractors don't have costs licensed contractors have. Stocker said the state doesn't enforce current licensing and registration requirements enough.

Number 137 — MARY LOU VILANDRE, a specialty contractor in Sitka, opposed the bill. She said consumers do need protection, but another way to do this is needed.

Number 153 — WILLIAM NOVCASKI, Sitka, wondered how much this would add to the cost of a new home. He believes in free enterprise and local enforcement. Novcaski felt higher bonding wouldn't insure that houses are built to higher standards. He said most houses in Sitka are built by self-builders, and the bill doesn't insure the person won't build a sloppy house and sell it the next year. He felt having to list name brands of materials used was ridiculous, and noted that builders often have to substitute brands due to unavailability of some brands.

Number 189 — LORIN WALKER of Fairbanks opposed the bill. He felt the majority of homebuilders and specialty contractors in the Fairbanks area are unlicensed. He said his prices are already higher than an unlicensed contractors. He was opposed to the surety account. He said the money would have to come from the consumer, who can't afford prices now. He agreed with Stocker's testimony. Walker said unlicensed contractors is where the problem comes from.

Number 211 — HANS HINGST, North Pole Electric, Fairbanks, said he deals in residential writing. He said Sipes is incorrect in her statement that one does not need a license or bond for work done for under $10,000. Hingst said the major cause of consumer complaints is unlicensed contractors. He said the reason is that electrical inspectors have little or no authority over single family homes; they can only check the workman's license, but can't check his work. Hingst said a licensed contractor can't compete financially with an unlicensed contractor. He suggested giving inspectors more

authority over single family dwellings: permits and inspections, certificates of occupancy, more inspectors; or eliminate all licenses, inspections, permits, and let him compete with the unlicensed contractor.

Number 275

ROLAND STANTON of Ketchikan found the number of complaints projected by the CPA very small. He objected to the whole bill. He agreed with objections offered by others testifying. He said he already has to have a bond which is in effect five years after going out of business, and that there are many other remedies, such as liens, codes, court, insurance, and arbitrators. Stanton said a contractor has his whole net worth on the line on every job. He said if one wants to see a contractor's license, one has only to ask for it, as it is a wallet-sized card. Stanton saw no need to change registration to two years. He said the surety account increased the costs of getting into business, and doesn't increase consumer protection at all. He pointed out there is no provision for the size of the contractor's operation. He felt it would set up a new bureaucracy in an already heavily regulated business. Stanton said laws already exist. He opposed the bill. Contractors are already overburdened, and the bill won't help.

Number 364

WILLIAM MC NALL, an attorney practicing in Anchorage and living in Eagle River, said his practice as a lawyer is with defective housing litigation, and he deals mainly with contractors. He said some consumer protection is required. McNall felt the statistics were fascinating. He said that in December of 1981, he received one case a day in the office, and referred another 1-2 a day for about two weeks around Christmas. He said he receives more complaints than the Consumer Protection Agency. McNall said, from a consumer point of view, it is a good bill. He said the industry needs enforced building codes, enforced by inspectors. He referred to the situation in Eagle River, where contractors oppose the codes. McNall said that contractors are uncooperative, dishonest, and shirking responsibility. He was unimpressed with the building industry and its ethics.

Number 436

McNall said the $5,000 bond is too small. He felt it needed to be raised to $50,000. He said if a contractors can't afford the bond, he can't stand behind his warranties. McNall suggested: 1) adopt the bill and bar contractors from court unless they're licensed; and, 2) make the lender responsible to make sure the builder is licensed or bonded.

Number 468

MICHAEL STILLEY, Vice President of Construction Loans, United Bank of Alaska, said the bill needs work. He said builders need protection. Licensing needs to be more difficult to obtain to keep shoddy builders out of the market. He said testing may be an answer. Stilley said work should be effected through a media task force. He said those in the industry are ethical and trying to do a good job. He felt a surety fund is inequitable. Stilley said the bill makes an escape clause for the builder building only one house. He felt if the builder sells the house, the law should apply. Stilley said a distinction should be made between a speculation builder and a builder who contracts with a buyer. Stilley said building inspectors are funded by the building permits issued. Building inspection is public safety. He felt the departments should be funded, and that there should be consistent policy.

Number 553

There was discussion between Stilley and the committee.

Number 654

CLAY PORTER, president of the Alaska State Homebuilders Association, said the bill has problems, but also has positive points. He said there needs to be more protection and improved contractor licensing law. The existing law has split authority between the Department of Commerce and the Department of Labor, and this should be changed. He agreed there should be a task force set up. He said existing laws need better enforcement. Porter thought bank verification and AHFC verification of licensed contractors is good. He noted that banks rarely ask for a license from a contractor. Porter said maintenance contractors have no license at all. He said Anchorage is dealing with a law enacting testing and licensing review requirements.

He said there are other methods of local enforcement, such as land use permits, well and septic permits, and inspections. He felt complaints, should be monitored in detail. Porter felt the builder should also be protected. He said the costs contractors would incur under the bill are too high. At Rep. Rogers request, Porter agreed to send the committee a copy of his testimony.

Tape 43, Number 050 — BEVERLY MC CLINTOCK, president of Fairbanks Homebuilders Association, said, although the bill was meant well, there are questions. She said the bill creates a surety fund which is the homeowner's warranty. She said if there is a need, the cost of the fund should be borne by the owner rather than the contractor. As it is set up, the fund is a first resort when it should be a last resort. She said a task force is needed. McClintock said banks, Alaska Housing, and city inspectors should have a great part in checking licenses and setting up consumer protection. She felt the biggest problem with the bill is that good contractors pay for bad ones.

Number 095 — TOM HALL, contractor from Haines, said the surety fund would affect him badly. He felt it should be scaled according to number of homes built. He doesn't want to report his actual costs. He said licensed contractors would pay more than unlicensed contractors.

Number 111 — TOM BODETT, a general contractor in Petersburg, said most of his points have already been brought up. He was not sure the surety fund would make a difference in his bonding costs. He said if the fund is set up, the legislature should repeal the statute requiring bonds for five years after work is completed. He said much of his business is on the honor system. The bill would require disclosures the consumer may not want. He felt perhaps informing the consumer of his rights would be enough. He said the restrictions could hinder small builders.

Number 153 — KEN HELEM, and electrical contractors in Sitka, agreed that consumer protection is necessary, but felt that better enforcement and reviewing the contractor's records for licensing could alleviate the problem. He

said more regulations will reflect on the consumer eventually. He said the bill should be geared to the number of houses built.

Number 167 — PAUL PERSINGER of Wasilla asked what determines a complaint, and asked how costs are determined. He wondered how many boards would be required to hear complaints. He said some builders have purchased a warranty program. He felt local homebuilders could mediate.

Number 190 — DICK RORHER of Kodiak agreed that consumers need protection, but thought the surety fund wouldn't do it. He said $500,000 is too low if the fund were used. He thought increasing bonding may be a good suggestions. He said an insurance agent told him that he, nor about five other builders he knew, could get a $25,000 bond. He said enforcing building codes is an area needing improvement. Rorher is an unlicensed contractor, but felt he does good work. He said he builds 1 speculation house per year. He said he stakes his reputation against any licensed contractor in Kodiak, and felt the exception should remain.

Number 233 — PAT VERDUGO, day care center operator in Fairbanks, said she recently dealt with a contractor. She paid him in full on December 10, although work was not completed. She said state inspectors found electrical and plumbing violations. The general contractor would not repair these defects, and would not finish the work he had not completed. She could find no way to attach his bond. She said attorneys don't want to handle the case. She found that the plumber and contractor were unlicensed. She said she can't get relief. She did not know if the bill was the answer, but said the the contractor's history was on file, it could keep others from having the same problem.

Number 281 — Rep. Rogers questioned Verdugo about her specific complaint. There was discussion.

Number 331 — ROBERT HAINES of the Greater Anchorage Builders Council said he wants parts of the bill amended and parts added to existing law. These were: public information; contracts making both parties aware of

building industry procedures; and the posture of prevention adopted. He said the problem lies with qualified contractors, not just licensing, as anyone can get a license. He was not opposed to raising the bonding limit.

Number 371 — EARL CARLYLE of Anchorage said the surety account was unacceptable. He wanted HB 740 adopted and attached to the bill. He would also like something done about fly-by-nights. He said fifty percent of the advertisements in the papers are fly-by-nights.

Number 395 — MICHAEL RYMAN, a consumer in Sitka, said he had a custom home built. He felt all contractors should not pay for the bad ones. He said he is presently in a lawsuit over a home he had built. Ryman said the amount stated for the surety account is not enough. He felt perhaps a portion of bank funding should be held for a period after a home has been lived in.

Number 462 — BREEN GAUGHON, Alaska Home Builders Industry, was amazed that 3-5% of all people who might be damaged can hold 95-97% of the industry liable.

Number 502 — JOE GUTHRIE, attorney in Juneau, had a different interpretation of the statistics offered by the Consumer Protection Agency. He felt that the 3-5% of the people who have notified CPA of complaints should indicate that CPA does not have effective remedies for dealing with problems. He offered his own statistics. Guthrie said the bonds are not enough for someone to maintain a lawsuit. He said the expense incurred exceed what could be realized from a bond, so actions aren't filed. He felt two things would help solve the problem: 1) amend the loan bill to require AHFC not lend on homes built by unlicensed contractors; and 2) add a paragraph on page 2, line 13, to require the state keep on file sworn complaints, judgments, findings by arbitrators, etc. He said this would be helpful to be able to go to a central file and see what experiences other consumers have had with a builder.

Number 616 — ALAN EAKER of Wasilla felt the bill was misdirected in intent. He said existing

laws could be utilized to solve the problems the industry has. He said competency testing before licensing is an option, and the Department of Commerce looking into complaints of unlicensed contractors could aid enforcement.

Number 659

There being no other people wishing to testify, and no other business to come before the committee, the meeting was adjourned at 3:22 p.m.

TELECONFERENCE

1:05

000 Call to order; introduced HB 832. Martin left 5 minutes after call to order

015 Lonnie Site, CPA, Anchorage – analyzed bill after contacting affected parties. Will forward copies.

CPA found projected rate of new home starts 4,000 - 4,500 ~~[illegible]~~ in Anc area. CPA supports most of HB 832, specifically:

1) .010 chng to registration rather than licensing
2) .08.01.021 appln for regs (maint by Dept of Comm of pub info file) especially (a)(5)
3) – suggests new subsection saying any member of public can submit documents against contractor to go in file
3) .031 – 2 yr registration
4) .041 – fees biennial
– might add provn that pay 1 fee to do other kinds of contracting as long as other reqmts are met (bonding, ins)
5) .101 – ins, wks comp
6) .102-.103 – surety fund; they like idea, but might need to be chngd or delayed; if no fund, support equivalent of malpractice ins or homeowners warranty fund.

Urg raising bonds, retain .071 if no surety this yr.

112 ($10,000 / $5,000)

111 also support regional arbitration boards

Urg comm pass Sec. 107 (p.6) – reg'd practices for home contractors; shd possibly be expanded to all contractors. Suggest deleting sub (5). Support passing sec. 108 – prohibited practices.

140 Urge adding to .108 making it a violation to do business in any name other than registered contractor name.

.109 — gives new enforcement tools. Easier for attys to handle cases. Would make state enforcement easier — injunctive powers.

.121 — support.

.125 - temp orders

(Secs .107-.108 tie in to .125)

Sec. 131 - support - injunctive pwrs

.171 — defns shd be put into effect, as present statutes lack this. suggest chng "homes" to "structures"

"home contractors" & "general contractors" need to be defined.

See II →

08.18.071 shd not be repealed if surety fnd not established, but shd be chngd to raise bonds & chng priorities against bonds (reverse priority)

253 Support more enforcement against unlicensed contractors.

Need better pub info & records on contractors.

Important to get these into effect this yr, especially in S. Central.

272 Rogers - re surety acct - this will be delayed; raise bonding 2,000 specialty, 10,000 general — wonders who will build info of new small cos, who can't afford bonding - who will build?

Shis not certain bonds are not available. (Referred to Terry Dale, Gov rep, to ask abt this). She wasn't sure people who can't afford this or time certificate of deposit belonged in business.

Rogers responded coming up w/capital for eqpt & tools, as well as $10,000 bond/certificate difference for many but lg contractors.

323 Site said contractor who does job under $10,000 is not req'd to be licensed. Supports financial commitment by contractor to back their work.

340 Rogers re .107 - req'd practices - concerned p. 7, l. 12 written contract —

esp: l. 18 matls to be used - time-consuming & lengthy process; signif cost in developing these figures; cd this be req'd only if customer suggests?

Site said, if matls are specified, it shd be written, not verbal. Cd be chngd to say any matls specifically agreed on re specified in contract.

388 Rogers - est. date of completion - so many things can delay completion, that are beyond contractor's control - late ferry, strike - what wd happen?

Site - go to arbitration bd or ct to look at reasonableness of delay. Cd be specified in Cavins; i cd also encourage contractor to add 30 days to estimat for completion.

435 Rogers, re affect on existing lien structure - sec. 107 req'd practices, p. 6, l. 29 - recalled other attempts to modify this law - difficult for legislature, unwilling to tamper. W/o survey find, how is this affected.

Site - shd not affect system, shd affect home contractor - before closing, will make sure liens aren't filed against purchaser. Puts burden on Drakes contractor, who is resp for lien.

498 Bob Evans - CPA, Anc - 97 consumer complaints filed since 1977 in Anc ofc; in 1981, 55-60 more recd on phone, no formal complaint filed. 1980, highest # complaints: 1,000 housing starts that yr. Projections for '82 indicate 33% increase over 1981. Possibly 35-40% increase this yr in housing starts. Most complaints resulted in:

1) no contractor response
2) cont had disappeared or absconded w/money (25 of 97 comps) (1 out of every 4)
3) partial correction or adjustment by cont to consumer
4) dispute in factual info; these were referred to legal system.

10% successful resolution rate in this area, compared to 40% of general complaints.

59% complaints major or serious nature.

Will forward memo.

607 Rogers asked if there are regional patterns in diffs in kinds of complaints. Evans hasn't compared to rest of state; broken down into MOA, Mat Su, Kenai. 74 of 97 were in Anc area. Rogers requested they compare to rest of state.

634 Brylowa asked - 10% resolved - what is meant? Evans - in 40% of all cases, are able to reach settlement satis to both parties. Only 10% resolution bet consumer & home contractor. Otherwise goes to ct, or remains unresolved.

Clarification of statistics. Evans responded.

669 Rogers - ~~did not~~ asked ~~if 5th was high or low complaint level~~.

Side B

039 Mat Su

Jim Wilkins, Wasilla - objects to 3 points:

1) surety acct 08.18.102 - makes good contractors pay for actions of poor contractors. Not opposed to increasing bond level, however thinks 10,000 & 25,000 excessive

2) .107 subrogation rights - 1.5 provide customer cy of dated invoice for mat'ls & labor - ~~does~~ objects to listing bidrs cost as opposed to retail cost. Would show profit contractor makes & will restrict profit.

3) 08.18.05 - ~~Comm of Labor has pwr to~~ Comm of Labor has pwrs ~~he~~ Wilkins disagrees with. Excessive man pwr over every contractor in state.

086 Dave Grenke, Palmer - disagrees w/ bill; agrees w/d cy registration. Strongly disagrees w/ surety fund & p. 8, # 5 - providing mat'ls & labor invoice - makes no sense, a lot of work & buyer knows what everyone is making.

~~Cut~~

Sitka

111 Harold Stocker – disagrees because most complaints are registered for people who hire prob'ly unlicensed contractors. This wd make wider gap of competition bet licensed & unlicensed; wd cost licensed cont more for bonding. Unlicensed cont's don't have costs licensed contrs have. Also, state doesn't enforce current licensing & registration reqm'ts enough.

Vilandre

137 Mary Lou ~~Vilandry~~ - specialty contr – opposed bill. Consumers do need protection, but need another way to go abt it.

Novcaski

153 William ~~Aotastky~~ – wonders how much this will add to cost of new home; believes in free enterprise & local enfcmt. Higher bonding won't insure houses are built to higher standard. Most houses in Sitka built by self-builders; doesn't insure person won't build sloppy house & sell it the next yr.

– l. 18, p. 7 ridiculous (listing brand names, etc); often have to substitute brands.

Fairbanks

189 Lorin Walker — opposed bill; majority of homebuilders & specialty contrs are unlicensed. His prices are already higher than unlicensed. Opposed to surety acct; money will have to come fm consumer, who can't afford prices now. Agrees w/ Stockes of Sitka. Unlicensed contractor is where prob comes fm.

Hingst

211 Hans ~~Hinkst~~ — N. Pole Electric - deals in residential wiring. Site is incorrect in not needing license or bond for work under $10,000. Major cause of consumer ~~cost~~ complaints is unlicensed contractor. Reason is state electrical inspectors have little or no authority on single family homes; can only check workman's license, but can't ck work. ~~Cost~~ Licensed contractor can't compete financially w/ unlicensed contractor. Suggested giving inspectors more authority in single family dwellings; permits & inspections; certificates of occupancy; more inspectors; or eliminate all licenses, inspections, permits, & let him compete w/ unlicensed contractor.

Ktn

275 Roland Stanton – funds # of complaints projected by CPA very small. Objects to whole bill; agrees w/other objections; also, already have bond which is in effect 5 yrs after going out of bus; liens; codes; court; UHs; arbitrators; many remedies. Contractor has whole net worth on the line on every job. If you want to see contr's license, you just ask for it. No need to chng registn to 2 yrs. Surety acct ~~xxx~~ increases costs of getting into business & doesn't increase cons. protn at all. No proven for size of operation. Sets up new bureaucracy in already heavily reg'd business. Laws already exist.

RE $5,000 gen contr bond – Need to increase; ~~need~~ state bond shd cover local work or state work; shdn't have to buy another bond. Opposed bill. Already overburdened. Bill won't help.

~~xxxxxxxx~~ Anc

364 ~~364 Post~~ William McNall, atty practicing in Anc, lives in E. River – practice as lawyer is w/defective housing litigation, deals mainly w/contractors. Some cons. protn reg'd. Statistics are fascinating. In Dec 1981, recd 1 case a day in ofc & referred 1-2/day for 2 wks around Xmas. ~~He~~ Recvd more complaints than CPA. Fm consumer pt of view, good bill. Industry needs enforced building codes, enforced by inspectors. Referred to Seth in Eagle R where contractors oppose codes. Contractors uncooperative, dishonest, & shirking responsibility. Unimpressed w bldg industry & ~~w~~ its ethics.

Ane

436 $5,000 bond too small. Needs to be raised to $50,000. If he can't afford bond, he can't stand behind his warranties.

Suggested

1) adopt bill + bar contrs from ct unless they're licensed
2) make lender resp to make sure bldr licensed or bonded.

468 Michael ~~Stilley~~ Stilley — VP Const Loans, United Bank of Ct — bill needs work. Bldrs need protection; licensing needs to be more difficult to obtain to keep ~~the~~ shoddy bldrs out of market. Testing may be an answer. Work shd be effected thr/ media task force. Those in industry are ethical + trying to do good job. Surety bond is inequitable. Bill makes escape clause for bldr bldg only 1 house; if he sells it, law shd apply. Distinction shd be made bet spec bldr + bldr who contracts w/ consumer. Re public safety — ~~the~~ they're funded by bldg permits issued; bldg inspection is public safety; depts shd be funded, consistent policy.

553 Rogers — diff bet spec + custom built homes in terms of involvement of consumer in bldg — might need different rules. Thought creating task force to work on this over interim is excellent idea. ~~Fees~~ Having banks resp for licensed contractors on anything financed w/ state money is good + wd be easy to legislate.

598 Stilley — re registry for contractors — wd like to have agency monitoring registered bldrs + complaints.

Juneau

654 Clay Porter, pres, AK State Homebuilders Assn —
bill has probs, but also positive points
1) needs to be more protn + improved cont. licensing law.
Existing law has splet authority bet Dept Comm & Dept Labor.
Shd be changed
2) Agree there shd be task force set up.
3) Existing laws need better enforcement
4) Bank verification & AHFC verifn of licensed contrs is good.
Banks rarely ask for license.
5) Maint contrs have no license at all.
6) Anc ~~bas~~ is dealing w/ law on test + licensing new reqmts; also ~~to~~ local enfcmt
on other ways (land use permits, well + septic permits/
inspections)
7) Have proper monitor in detail re # + nature of complaints
8) ~~Ref~~ beds shd also be protected. Costs contrs wd incur, under bill are too
high.

Tape 2
045 Rogers requested cing of stmt.

050 Beverly McClintock, pres, AK Homebuilders Assn — although law
was meant well, there are gaps
1) creates surety fnd which is homeowners warranty.
If there is need, cost of fnd shd be borne by owner
rather than contrctr. As set up, it's a first resort fnd;
shd be last resort.

June

070 McC, cont'd

2) need task force

3) banks, at Hog & city inspectors shd have great part in ckg licenses + setting up consumer protn.

Biggest prob w/ bill is good contrcts pay for bad ones.

Haines

075 Tom Hall – contrcts – surety fnd will affect him badly. Shd be scaled according to # homes built. Doesn't want to report actual costs. Licensed contractors will pay more than unlicensed.

Petersburg

111 Tom Bodett – gen contrcts – most points already brought up. Not sure surety fnd will make diff in his bonding costs. If fnd set up, shd repeal statute req'g bonds for 5 yrs after wk completed. Much of his bus is on hons system; bill wd require disclosures the consumer may not want. Perhaps informing consumer of rights wd be enough. Restrictions would hinder small bldrs.

Sitka
Ker Helem
153 ~~Kent Hellem~~, elect. contrcts – agrees cons. protn necessary. Better enforcement + moving cntr's records for licensing cd alleviate prob. More regs will reflect on consumer eventually. Shd be geared to # houses built.

That Sh

167 Paul Persinger - what determines complaint, + how are costs determined. Wondered how many boards wd be req'd to hear complaints. Some bldrs have purchased warranty pgm; local home builders mediate.

Kodiak

190 Dick Rorher Roar — agree that cons needs protn, but surety fnd won't do it. $500,000 too low if fnd were used. Increasing bonding may be good suggn. Ins agent told him probly neither, he nor abt 5 other bldrs he's talked w/ca ~~$50,000~~ get $25,000 bond. Enforcing bldg codes is an area needing improvemt. He's an unlicensed contractor — feels he does good work (builds 1 spec house per yr). Stakes his reputation against any licensed cntr in Kodiak, + feels exemption shd remain.

Hoonah

233 Pat Verdugo Perdueo — recently dealt w/ contractor. Paid him in full 10/10, though wk was not completed. State inspectors found elect + plumbing violations; gen'l contractor won't repair these, + won't complete wk he didn't finish. Can't find any way to attach his bond; attys don't want to handle case; plumber + contractor unlicensed. Can't get relief. Doesn't know if bldr is answer, but if cntrs history was on file, cd keep others from having same prob.

281 Rogers asked if she had asked if contr was licensed. She said he reg'd & believed himself to be. Licensed now, but wasn't at that time (& license app was lost or not sent). Electrician ~~wasn't~~ wasn't licensed. Called state elect. & plumbing inspectors to do inspections. One vindication was so bad they were on the verge of the fire.

326 Rogers suggd not paying until all work completed.

Anc

331 Robert ~~Haines~~ Haines, Greater Anc Bldrs Council — want parts of bill amended & parts added to existing law: pub. info; contracts ~~putting~~ making both parties aware of bldg industry procedures; & protection of prevention adopted. Prob lies w/ qualified contractors, not just licensing, as anyone can get license. Not against raising bond limit.

371 Earl ~~Eardale~~ Carlisle — surety acct unacceptable. Wants HB 240 adopted & attached to bill. Would also like something done about fly by nights. 50% of advertisements in papers are fly by nighters.

Sitka

395 Michael Reyman — consumer — had custom home built. All contractors shouldn't pay for bad ones. Presently in lawsuit over home he had built. Amt stated for surety acct not enough. Perhaps a portion of bank fndg shd be held for a period after home has been lived in.

446 Sanderson checked sites – that Su had one

Jeneane Gaughon

462 Breen ~~Gore~~, homebldg industry of ~~ST~~ to – amazed that 3-5% of all people who might be damaged can hold, 95-97% industry liable.

502 Joe Guthrie, atty – different interpretn of stats –, that 3-5% of people have notified CPA shd indicate CPA does not have effective remedies for dealing w/ probs. Called Occl Licensing; bet 1/1/80 & 1/30/81 3,576 specialty & gen contractr licensed; 45 people satisfd jdgmts against gen'l contractrs, 20 against specialty. Low percentage indicates how ineffective system is. Bonds aren't enough for someone to maintain lawsuit. Expense incurred exceeds what can be realized from bond, so actions aren't filed.

Two things wd help solve prob

1) amend loan bill to require AHFC not purchase licenses not built by licensed contractors
2) ~~adopt recom~~ add para on pg 2 l. 13 to require state keep on file sworn complaints, jdgmts, findings by arbitrator, etc. Wd be helpful to be able to go to central file & see what experiences other consumers have had.

Mat Su

616 ~~Atler~~ Alan Eaker ~~Ecker~~ – Wasilla – bill misdirected in intent. Existing laws cd be utilized to solve probs industry has. Competency testing before licensing ~~examination~~ is an option, & Dept Comm looking into complaints of unlicensed contractors cd aid enforcement.

IN THE HOUSE

BY THE LABOR AND COMMERCE COMMITTEE

HOUSE BILL NO. 832

IN THE LEGISLATURE OF THE STATE OF ALASKA

TWELFTH LEGISLATURE - SECOND SESSION

A BILL

For an Act entitled: "An Act relating to the regulation of contractors; and providing for an effective date."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. AS 08.01.010 is amended by adding a new paragraph to read:

(24) regulation of general contractors, specialty contractors, general home contractors, and specialty home contractors.

* Sec. 2. AS 08.18.021 is amended to read:

Sec. 08.18.021. APPLICATION FOR REGISTRATION. (a) An applicant for registration as a contractor shall submit an application under penalty of perjury [OATH] upon a form to be prescribed by the commissioner and which shall include the following information pertaining to the applicant:

(1) employer social security number;

(2) type of contracting activity, whether a general, [OR] a specialty, a general home, or a specialty home contractor and if a specialty or a specialty home contractor [THE LATTER], the type of specialty;

(3) the name and address of each partner if the applicant is a firm or partnership, or the name and address of the owner if the applicant is an individual proprietorship, or the name and address of the corporate officers, registered [AND STATUTORY] agent, and person actually responsible for the supervision of the contracting activity [IF ANY,] if the applicant is a corporation;

(4) if the applicant is a general home or specialty home con-

tractor, the construction experience and business history of the applicant, including

(A) the name of any officer, principal, partner, or supervisory employee of the applicant who is, or who was, registered or licensed as a contractor;

(B) the states or jurisdictions in which a person named under (A) of this paragraph is, or was, licensed or registered, and the dates of licensure or registration; and

(C) whether a license or registration named under (B) of this paragraph is, or was, suspended or revoked, and the reasons for suspension or revocation;

(5) all other names under which the applicant is registered, or has ever been registered, as a contractor.

(b) The information contained in the application shall be maintained by the department in that applicant's file and shall be a matter of public record and open to public inspection.

* Sec. 3. AS 08.18.031 is amended to read:

Sec. 08.18.031. CERTIFICATE OF REGISTRATION -- ISSUANCE, DURATION, RENEWAL. A certificate of registration shall be renewed biennially and lapses as provided by AS 08.01.100 [EXPIRES ON JUNE 30 OF EACH YEAR FOLLOWING THE DATE OF ISSUANCE OR RENEWAL AND SHALL BE RENEWED UNDER THE SAME REQUIREMENTS AS FOR AN ORIGINAL REGISTRATION]. The commissioner shall issue to the applicant a certificate of registration upon compliance with the registration, insurance, and surety requirements of this chapter, unless registration is denied as provided by AS 08.18.125.

* Sec. 4. AS 08.18.041 is amended to read:

Sec. 08.18.041. REGISTRATION AND RENEWAL FEES. The applicant shall pay to the commissioner a registration or renewal fee as follows:

(1) general contractor.....$200 [$100]

Need time limit for claims? 1 yr - 3 yrs etc.!!!

(2) specialty contractor.....$100 [50]

(3) general home contractor.....$100

(4) specialty home contractor.....$50

* Sec. 5. AS 08.18.101 is amended to read:

Sec. 08.18.101. INSURANCE REQUIRED. Each applicant, at the time of applying for registration, shall file with the commissioner satisfactory evidence that the applicant has in effect

(1) public liability and property damage insurance covering his contracting operations in the sum of not less than $20,000 for damage to property, $50,000 for injury, including death, to any one person and $100,000 for injury, including death, to more than one person;

(2) workers' compensation insurance as required by AS 23.30-045 - 23.30.095.

* Sec. 6. AS 08.18 is amended by adding new sections to read:

Sec. 08.18.102. HOME CONSTRUCTION SURETY ACCOUNT. (a) The home construction surety account is established as a special account in the general fund to carry out the purposes of this chapter. The account consists of surety fees paid by registered general home and specialty home contractors under this section. The department may spend money in the account to satisfy claims filed under this chapter. The department may also spend money in the account, in an amount not to exceed $25,000 annually, for home construction educational purposes. "Home construction educational purposes", as used in this section, includes

(1) production and distribution of educational materials and programs for home contractors and consumers; and

(2) development and distribution of forms for contractors, customer evaluation, and complaints.

(b) A general home contractor, when applying for or renewing his registration, shall pay to the department, in addition to the registra-

tion fee, a surety fee not to exceed $1,000. A specialty home contractor, when applying for or renewing his registration, shall pay to the department, in addition to the registration fee, a surety fee not to exceed $500. A surety fee shall be paid for each name under which a contractor registers to do business as a home contractor. When the amount paid into the home construction surety account reaches $500,000, the department shall by regulation adjust the surety fees so that the account is maintained at a level of approximately $500,000. All surety fees collected by the department shall be paid at least once a month by the department into the general fund. These payments shall be credited to the home construction surety account.

Sec. 08.18.103. CLAIMS. (a) A person who has a complaint against a home contractor for loss of money, personal property, or real property may file a claim with the department. Claims may be made for a loss resulting from the following actions:

(1) misrepresentation;

(2) nonpayment to materialmen, subcontractors, or laborers;

(3) defective materials or negligent workmanship;

(4) conversion of interim construction loan funds;

(5) violation of this chapter;

(6) an unfair or deceptive act or practice under AS 45.-50.471 - 45.50.561.

(b) A claim shall be made on a form furnished by the department and shall be executed under penalty of perjury. The person making the claim shall supply the following information:

(1) the name and last known address of the home contractor;

(2) the amount of the loss;

(3) the date or period of time during which the loss occurred;

(4) the date upon which the loss was discovered;

(5) the name and address of the claimant; and

(6) a description of the transaction that resulted in the loss claimed.

(c) A copy of a claim filed with the department under this section shall be sent to the last known address of the home contractor against whom the claim is filed.

(d) Upon receipt of a claim filed under this section, the department may

(1) take and hear evidence on the claim;

(2) administer oaths and affirmations;

(3) compel, by subpoena, the attendance of witnesses and the production of books, papers, and documents;

(4) hire an investigator, accountant, contractor, or other expert;

(5) hold a hearing, in accordance with the Administrative Procedure Act (AS 44.62), on the claim.

(e) The home contractor shall be given an opportunity, within 20 days after receipt of notification of a claim filed under this section, to file a written statement and to present evidence in opposition to the claim.

Sec. 08.18.104. FINDINGS AND AWARD. At the conclusion of its consideration of a claim filed under AS 08.18.103, the department shall make written findings and conclusions. If the department finds that the claimant has suffered a loss in a transaction as a result of an action described in AS 08.18.103(a)(1) - (6) by a home contractor, the department may award a claimant an amount out the home construction surety account not to exceed $20,000 on a claim against a general home contractor and not to exceed $10,000 on a claim against a specialty home contractor.

Sec. 08.18.105. MAXIMUM LIABILITY AND PAYMENT PRIORITY. (a) The maximum liability of the home construction surety account for claims filed in each biennial registration period may not exceed $60,000 for one general home contractor or $30,000 for one specialty home contractor. This maximum liability amount applies to all names under which a person is registered to do business as a home contractor.

(b) If the maximum liability of the home construction surety account as provided in (a) of this section is insufficient to pay in full the valid claims of all persons who have filed claims against one home contractor, the maximum liability amount shall be distributed among the claimants on a pro rata basis. Distribution shall be made among the claimants without regard to the order of time in which the claims were filed.

(c) If the balance of the home construction surety account is insufficient at a given time to satisfy a claim that has been granted by the department, the department shall, when additional amounts have been deposited in the account, satisfy unpaid claims in the order that the claims were originally filed, plus interest at the rate of 10 percent a year.

Sec. 08.18.106. SUBROGATION RIGHTS. When the department has made a payment to a claimant from the home construction surety account, the department shall be subrogated to all of the rights of the claimant and the claimant shall assign all of his rights in that portion of the claim to the department. Amounts subsequently realized by the department on the claim shall be deposited in the home construction surety account.

Sec. 08.18.107 REQUIRED PRACTICES FOR HOME CONTRACTORS. Each home contractor, registered or required to be registered under this chapter, shall

(1) pay all subcontractors and materialmen so that no liens

are filed against the customer's property, and furnish the customer, upon request, waivers of liens from all subcontractors and materialmen within 30 days of completing a job or within 30 days of notice of a lien, unless the subcontractor's or materialman's claim is the subject of a bona fide dispute; in that case, the contractor is not required to furnish a waiver until the dispute is settled;

(2) furnish to the customer, at the time of signing, a copy of all written documents signed by the customer;

(3) notify the department, within 10 days, of any change in ownership or management control or of change of address or business name;

(4) provide the customer with a written contract, if the total contract price for materials, labor, and service exceeds $200, containing the following information:

(A) total contract price or a statement of the hourly labor charge and an estimate of total cost;

(B) a description of work to be done;

(C) materials to be used, described by brand name, weight, size and color;

(D) any guarantee or warranty made to the owner, and any exclusions, exceptions, and limitations;

(E) the estimated date of completion;

(F) a payment schedule;

(G) an agreement to restore or repair any part of the customer's home or personal property destroyed or damaged as a result of the acts of the home contractor, his agent, or subcontractor; and

(H) the signatures of the customer and the home contractor and the registered business name, address and telephone number

of the home contractor;

(5) provide to the customer, at the time the work is completed, a copy of a dated invoice listing the costs of all materials and labor;

(5) provide to a prospective customer a brochure which the department shall prepare providing the following information:

(A) a statement that the department's registration of a contractor is not an endorsement or an evaluation of that contractor's qualifications;

(B) an evaluation form;

(C) the address and phone number of at least two of the department's offices where copies of all customer home contractor evaluations, complaints, and claims regarding the contractor are maintained and open to public inspection;

(D) an explanation of complaint procedures, including a description of the home construction surety account established by AS 08.18.102.

Sec. 08.18.108. PROHIBITED PRACTICES. (a) A home contractor may not misrepresent, directly or by implication,

(1) the cost of construction or repair authorized by the customer;

(2) the terms or conditions of a warranty;

(3) that construction, repairs, or alterations are necessary if they are not necessary;

(4) that construction, repairs, or alterations have been made if they have not been made; or

(5) that the home is in a dangerous condition or in a condition not in compliance with building codes.

(b) A home contractor may not collect or attempt to collect for

(1) construction, repairs, or alterations not authorized either orally or in writing by the customer;

(2) unnecessary construction, repairs, or alterations;

(3) construction, repairs, or alterations that have not been made.

(c) A home contractor who warrants his work may not refuse to repair a home in accordance with the terms and conditions of the warranty.

(d) A home contractor may not file a lien on a customer's home because the customer has refused to pay for unauthorized construction, repairs, or alterations, or because the customer has refused to pay construction, repair, or alteration charges in excess of the price authorized in the written work agreement, if the customer pays the authorized price for authorized construction, repairs, or alterations.

(e) A home contractor may not alter any part or fixture of a home with intent to create a condition requiring repairs.

(f) A home contractor may not make a material misrepresentation in the procurement of a home construction contract, or make a false promise likely to influence, persuade, or induce a customer to enter into a home construction contract.

(g) A home contractor may not gain entry or access into a prospective customer's home or onto his property under the guise of a governmental inspection, right or duty, or under the guise that the home contractor or his agent is a government or public utility inspector or representative.

(h) A home contractor may not ask or require a customer to sign a completion form before the work or job is completed in accordance with the provisions of the construction contract.

(i) A home contractor may not advertise that the advertised price

or offer includes delivery or installation, if delivery or installation is not included.

(j) A home contractor may not fraudulently execute or alter a building contract, mortgage, promissory note, or other document made in connection with a home contracting transaction.

(k) A home contractor may not perform work or use any materials in violation of the building, housing, sanitary, health, or fire laws or ordinances of the state or the local jurisdiction in which the home is located.

(l) A home contractor may not transact business under any name other than the one under which he is registered.

(m) A home contractor may not alter plans or specifications made in a home construction contract in any material respect without prior written consent of the customer.

(n) A home contractor may not display a false or forged registration.

Sec. 08.18.109. UNFAIR METHODS OF COMPETITION AND UNFAIR AND DECEPTIVE TRADE PRACTICES. An act or practice by a home contractor that does not comply with the requirements of this chapter constitutes an unfair method of competition and an unfair and deceptive act or practice for the purposes of AS 45.50.471 - 45.50.561.

* Sec. 7. AS 08.18.121 is amended to read:

Sec. 08.18.121. SUSPENSION AND REVOCATION OF REGISTRATION. (a) If the insurance required by [IN] AS 08.18.101 ceases to be in effect, the registration of the contractor shall be suspended until the insurance has been reinstated.

[(b) IF A FINAL JUDGMENT IMPAIRS THE LIABILITY OF THE SURETY UPON THE BOND OR DEPLETES THE CASH DEPOSIT SO THAT THERE IS NOT IN EFFECT A BOND UNDERTAKING OR CASH DEPOSIT IN THE FULL AMOUNT PRESCRIBED IN

AS 08.18.071, THE REGISTRATION OF THE CONTRACTOR INVOLVED SHALL BE SUSPENDED UNTIL THE BOND LIABILITY IN THE REQUIRED AMOUNT, UNIMPAIRED BY UNSATISFIED JUDGMENT CLAIMS, HAS BEEN FURNISHED.

(c) IF A BONDING COMPANY CANCELS ITS BOND OF A CONTRACTOR THE CONTRACTOR'S REGISTRATION SHALL BE REVOKED. HE MAY AGAIN OBTAIN REGISTRATION BY COMPLYING WITH THE REQUIREMENTS OF THIS CHAPTER.]

(d) If a registered [LICENSED] contractor fails to fulfill his obligations under this chapter [AS SET OUT IN AS 08.18.071] his registration [LICENSE] shall be suspended for a period of time the commissioner determines is appropriate. After two [THREE] suspensions his registration [LICENSE] may be permanently revoked.

(e) Proceedings to suspend or revoke a registration [LICENSE] issued under this section [CHAPTER] are governed by the Administrative Procedure Act (AS 44.62).

[(f) IF THE COMMISSIONER OF LABOR DETERMINES THAT A PERSON IS ACTING AS A CONTRACTOR IN VIOLATION OF THIS CHAPTER, HE SHALL GIVE WRITTEN NOTICE PROHIBITING FURTHER ACTION BY THE PERSON AS A CONTRACTOR. THE PROHIBITION CONTINUES UNTIL THE PERSON HAS SUBMITTED EVIDENCE ACCEPTABLE TO THE COMMISSIONER OF LABOR SHOWING THAT THE VIOLATION HAS BEEN CORRECTED.

(g) A PERSON AFFECTED BY AN ORDER ISSUED UNDER THIS CHAPTER MAY SEEK EQUITABLE RELIEF PREVENTING THE COMMISSIONER OF LABOR FROM ENFORCING THE ORDER.]

* Sec. 8. AS 08.18 is amended by adding a new section to read:

Sec. 08.18.125. TEMPORARY ORDERS. (a) If the commissioner has reasonable cause to believe that a contractor has engaged in or is about to engage in an act or practice in violation of this chapter or a regulation adopted under it, he may, if he considers it in the public interest,

(1) issue a temporary order directing the contractor to stop the act or practice;

(2) issue a temporary order denying, suspending, limiting, or conditioning the contractor's registration;

(3) bring an action in the superior court to enjoin the act or practice and to enforce compliance with this chapter, a regulation adopted under it, or an order issued under it;

(4) examine the books and records of the contractor;

(5) issue subpoenas for the attendance of witnesses, and the production of books, records and other documents.

(b) A temporary order under (a)(1) or (a)(2) of this section may be issued without written or oral notice to the contractor if the commissioner believes that immediate and irreparable injury, loss, or damage will result if the order is delayed. If an order is issued without notice, the order shall define the injury, describe why the injury is irreparable, and explain why the order was issued without notice. The order shall also state the date and hour of issuance, and prescribe a place and time within five days of issuance for a hearing by the commissioner or his designee to determine whether the temporary order should be continued. The commissioner shall place in his file at the time he issues the order a memorandum that describes the evidence on which he bases his belief for issuing the order without notice.

(c) The commissioner or his designee may extend the time for a hearing under (b) of this section an additional five days on his own motion or may shorten or extend the time before hearing at the request of the contractor.

(d) A temporary order under (a)(1) or (a)(2) of this section expires unless continued by the order of the commissioner or his designee at a hearing under (b) of this section. At the hearing, whether

or not the contractor appears, the commissioner or his designee may continue the order in effect for up to one year or until a hearing is held under the Administrative Procedure Act (AS 44.62), whichever is earlier.

(e) The commissioner or his designee shall be the hearing officer at the hearing under (b) of this section. If the commissioner or his designee designates a person to serve as hearing officer, the person must have the qualifications prescribed by AS 44.62.350(c).

* Sec. 9. AS 08.18.131 is amended to read:

Sec. 08.18.131. INJUNCTION. In an action instituted in the superior court by the commissioner, [OR LABOR OR] his representative, or the attorney general, a person acting in the capacity of a contractor in violation of this chapter may be enjoined from doing so.

* Sec. 10. AS 08.18.171 is amended by adding new paragraphs to read:

(4) "a construction trade" means a skill or craft commonly used in the construction, repair, or alteration of homes, including electrial work, heating and plumbing, carpentry, masonry, paving, sheetrocking, excavation, painting, roofing, fencing, landscaping, well-drilling, and septic or sewage system installation;

(5) "department" means the Department of Commerce and Economic Development;

(6) "general home contractor" means a general contractor as defined in (2) of this section who builds or offers to build, for hire or for sale, a home or homes, except that a contractor who builds for hire or for sale no more than one home in each calendar year is not a general home contractor;

(7) "home" means a one-to-four family residence or dwelling and the real property on which the residence is located;

(8) "specialty home contractor" means a specialty contractor

as defined in (2) of this section, who for hire, constructs, alters, repairs, demolishes, paints, roofs, landscapes, paves, or fences a home or any part of a home, but whose business operations require the use of no more than two distinct construction trades; a contractor who performs this type of work for hire on no more than one home in each calendar year is not a specialty home contractor.

* Sec. 11. The following laws are repealed: AS 08.18.061, 08.18.071, 08.18.081, 08.18.091, 08.18.111, and 08.18.141.

* Sec. 12. This Act takes effect July 1, 1982.

3-24-82

FEDERAL

SB 898

HB 757

HOUSE LABOR & COMMERCE
STANDING COMMITTEE
March 24, 1982
1:20 p.m.

Members Present: Rep. Martin, Chairman
Rep. Bylsma, Vice Chairman
Rep. Rogers
Rep. Randolph

Members Absent: Rep. Gardiner

COMMITTEE CALENDAR

HB 757 — An Act relating to unemployment insurance; and providing for an effective date.

Federal SB 898 — Telecommunications Competitions and Deregulation Act of 1981.

WITNESS REGISTER

Judy Knight, Special Assistant
Department of Labor
PO Box 1149
Juneau, Alaska 99811
465-2700
Position Statement: Went over HB 757 section by section and explained fiscal notes.

Harry Sturrock, Assistant Director
Unemployment Insurance
Division of Employment Security
Department of Labor
PO Box 1149
Juneau, Alaska 99811
465-2712
Position Statement: Assisted Knight in explaining HB 757.

Alex Hills
Deputy Commissioner
Division of Telecommunications
Department of Administration
Pouch C
Juneau, Alaska 99811
465-2200
Position Statement: Explained impact of federal SB 898.

PREVIOUS ACTION

HB 757 — See minutes of 3/16/82.

Statutory Reference: AS 23.20

Action Taken: No formal action taken. Committee requested department to develop additional figures and information before taking action.

Federal SB 898

No previous action. This is a federal senate bill.

Action Taken: Impact and intent of bill was explained to the committee by Alex Hills, State Division of Telecommunications.

ACTION NARRATIVE

Tape #44
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:20 p.m. Members present were: Representatives Martin, Bylsma, Randolph, and Rogers. Rep. Gardiner was absent. The chairman brought HB 757 before the committee for consideration.

Number 013

Judy Knight, Special Assistant, Department of Labor, asked Sandy Sturrock, Assistant Director of Unemployment Insurance to join her. Knight went over the bill section by section, and explained the fiscal notes.

Number 035

Rep. Rogers requested clarification of what information that is released to other agencies will be used for, and objected to violating the constitutional right to privacy.

Number 046

Knight resumed testimony. Rep. Rogers questioned changes in Section 3 (page 2). Knight picked up her testimony at Section 4.

Number 085

There was discussion of "interested parties" (page 4, line 13). Rep. Rogers wanted to set out specifically who could appeal; eg, claimant, employer, and division. Sturrock said "interested party" is defined in regulations.

Number 108

Knight resumed testimony at Section 7. She explained changes to the table. Rep. Rogers noted this would increase the top end of the benefits scale. He said the law had been written to take advantage of federal

extended benefits sooner than previous law. He asked how this would take effect. Knight explained how state benefits interact with federal benefits. Rep. Rogers explained his concern that the federal government might change extended benefits provisions. He said he would rather have more weeks benefits could be collected rather than raising benefit amounts. There was discussion of the impact on workers, how the benefits system work, and the cost of the program to Alaska.

Number 252 — Knight resumed testimony at Section 8.

Number 256 — Rep. Rogers explained how the earnings ratio is calculated and why he felt it did not work. Knight agreed the system was not perfect, but did not believe the majority of workers have the option to work one months of each calendar quarter (which is how a worker could collect more weeks of benefits than someone working four successive months). There was discussion.

Number 319 — Knight continued her testimony at Section 9.

Number 349 — There was discussion of wording in Section 11, and how availability for work is defined. Rep. Martin asked about people drawing unemployment insurance and workers compensation simultaneously. There was discussion. Knight said, to her knowledge, it is not a problem.

Number 425 — Sturrock explained Sections 12 and 13. There was discussion of the impact of changes to Section 14. Knight said this issue would be decided in court shortly.

Number 498 — Knight resumed testimony at Section 15.

Number 556 — Rep. Rogers asked, in reference to Section 17, why the department didn't just publish unemployment insurance information, as it is released to so many agencies. He said we are extending the violation of privacy every year. Knight said Congress passed the law. There was discussion.

Number 623 — Knight continued with Section 18, and passed out to the committee a recommended amendment to this section. Rep. Rogers said this would affect those who need extended

benefits the most--low income and those with children. There was discussion of the actual impact on Alaskans. Rep. Rogers requested the department develop language allowing the state to pick up extended benefits on those affected by this section. Rep. Martin asked if the department would also analyze what categories of people would be affected--people with children, and those with income over $1,000 and under $15,000.

Side E, Number 056 — Rep. Rogers suggested saying an individual not eligible for extended benefits under subsection (1) is eligible for another eight weeks extended benefits. There was discussion. Rep. Martin asked for an estimate of how many students are filing for employment benefits. This was discussed.

Number 083 — Knight said the department has many federal conformity requirements, and explained how the department addresses those requirements. She said she would have the department draft language requested by the committee.

Number 112 — Rep. Rogers referred to sections 7 and 8, previously addressed, regarding extending the schedule, and asked the fiscal impact. The impact was estimated at $2.5-million. Rogers said passing Section 8 would give to the "haves" and less to the "have-nots" by denying funds under Section 18.

Number 138 — Knight continued testifying at Section 19. She said Sections 20-24 deal with "off" and "on" triggers. Rep. Rogers requested an explanation of the affect of triggers on the extended benefits program.

Number 171 — Rep. Martin asked about benefits to people living out of state. Knight said it was not possible to give different benefits to those out of state. Rep. Rogers elaborated on how the system was set up. Rep. Martin asked if there had been any studies; Sturrock said there had been one done. This data was discussed.

Number 206 — Knight resumed her testimony at Section 25.

Number 232 — There was discussion of amendment to Section 28 regarding training in or out of the state.

Number 240

Knight picked up her testimony at Section 29. There was discussion of the definition of "wages" in Section 30. Knight said they would check into the definition. She continued testifying at Section 31. There was discussion of effective dates.

Number 347

Rep. Martin said the bill would be heard again. He asked others wishing to testify on the bill if they could return at a later date. Rep. Rogers requested an estimate of the cost to the Unemployment Insurance Trust Fund and example of affect on employer.

Number 367

The committee took up discussion of Federal Senate Bill 898. Rep. Martin asked Alex Hills, Deputy Commissioner of the Division of Telecommunications, to come before the committee to testify.

Number 377

Hills introduced Max Clements of Matanuska Telephone Association, and Stu Brown of Telelink, to the committee. Hills said the issues in S 898 are some of the most critical telecommunications issues facing the stat .

Number 403

Hills said the issue has been around since the 1950s. He went over telecommunications decisions that have been historically made: the "hushaphone" decision and the "carterphone" decision. He said the competitions issue is not new in the telephone industry. He said the present problem is how the industry can be structured in order to accommodate competition. Hills said this is a double sided problem: maintaining the level of service, while providing for competition. Hills said there are three arenas where these decisions are made: 1) courts (AT&T antitrust suit); 2) FCC (the Computer II case, which deregulates customer premises equipment and enhanced services, and the MTS-WATS market structure, making long distance telephone service competitive); and 3) Congress (communications rewrite legislation, which rewrites the communication: act of 1934. He referred to S 898 and HR 5158).

Number 560

Hills said the provisions affecting Alaska relate to television.

Number 570 — Hills said that telephone service has been cross subsidized: the urban payer supports the rural, and the long distance user supports the local caller. This is designed to keep costs low to everyone, but particularly to keep local and rural rates at reasonable levels. Hills said this was possibly in a monopoly situation. He said support for local and rural rates is being withdrawn, so a mechanism is needed to prevent drastic increases in local and long distance rates.

Number 652 — Hills said universal services is a national goal. This is the availability of telephone services at a reasonable rate. He said not using the network degrades national service.

Number 674 — Rep. Rogers asked what costs are to the consumer if this philosophy is not followed. Hills said at least a 200-300% increase. He felt the costs would be much higher in rural Alaska.

Tape 45, Number 022 — Hills said HR 5158 talks about how funds would be structured, and how and in what situations payments would be made. He said it contains local rate support, but does nothing about long distance rates.

Number 037 — Hills said cable TV is no longer addressed in HR 5158, but S 898 contains a couple brief sections: one addressed cross-ownership (whether phone companies can provide cable TV service); he said it specifies that phone companies may not except in rural areas. Regarding cable TV rates, Hills said S 898 deregulates rates, except for required government, public or educational access channels, and when no reasonably available alternative media exist.

Number 077 — Hills said HR 5158 is presently in the House. He said if it passes, both bills will go to conference committee.

Number 080 — Rep. Martin asked, regarding new satellites, if they are required to look at all fifty states. Hills said Senator Stevens introduced language requiring all satellites within our service area orbital positions reach all fifty states. He said this is favorable to our state. Hills said now the

RCA satellites reach us, but that many others could. There was discussion of requesting other satellite owners to serve us.

Number 116

There being no further business to come before the committee, the meeting was adjourned at 3:02 p.m.

Absent: Gardiner

HB 757

federal SB 898

1:26

000 Call to order, introduction of members.

HB ~~215~~ 757

008 HB ~~215~~ 757 brought before comm..

013 Judy Knight, Spec asst, DOL; asked Sandy Sturrock, asst dir, unemp ins, to join her. & Went over bill sect by section, & explained fiscal notes

035 Rogers, requested clarifn of ~~Clearfied~~ what info will be used for & ~~objected~~ objected to ~~concern~~ abt violating constl right to privacy.

046 Knight resumed testimony.

057 Rogers, re Sec. 3, (p.2) gotnd changes

070 Knight resumed testimony (Sec. 4)

085 There was discussion of "interested parties" (p. 4, l. 13); Rogers wants to set out specifically who may appeal; eg, claimant, employer, & division. Sturrock said "intd party" is defined in regs.

108 Knight resumed test'y at Sec 7. Explained chngs to table. Rogers noted this wd increase top end of benefits scale. Said law had been written to take adv of fed'l extended benefits sooner than prev law. He ~~understands~~ asked abt how this takes effect. Knight explained how state benefits interact w/ fed'l. Rogers explained his concern that fed'l govt might chng extended benefits provns. Wd rather have more weeks benefs cd be collected, rather than raising benef amts. Discussion of impact on workers — how benefits system works & cost of prgm to Alaska.

252 Knight resumed test'y at Sec 8.

256 Rogers explained how earnings ratio is calculated & why he felt it didn't work. Knight agreed system was not perfect, but didn't believe majority of wkrs ~~co~~ have the option to work 1 month of each calendar quarter (which is how a worker cd collect ~~much~~ more weeks of benefits than someone working 4 successive months). Discussion

319 Knight cont'd w/ Sec 9.

349 Discussion of wording in Sec. 11 & how availability for work is defined. Rep. Martin asked abt people drawing unemp & wkrs comp simultaneously. Discussion. Knight said to her knowledge it was not a prob.

425 ~~Sec 12~~ Sturrock explained Sec. 12, 13, ~~14~~

There was discussion of the impact of change to Sec. 14. Knight said this wd be decided in concert shortly.

498 Knight resumed testy at Sec 15.

556 Rogers asked, in re Sec 17, why dept didn't just publish unemp ins info, as it's released to so many agencies. Extending violation of privacy every year. Knight said Congress passed the law. There was discussion.

603 Knight cont'd at Sec. 18; passed out recommended amdmt.

~~Then w~~ Rep Rogers said this wd affect those who need extended benefits most — low income & those w/ children. There was discussion of actual impact on Alaskans. Rogers req'd dept develop lang allowing state to pick

Side B up extended benefits or those affected by this section. Martin asked if dept wd also analyze what ~~dat~~ categories of people wd be affected — people w/kids & those w/ income over $1,000 & under $15,000.

suggested savings for extended benefits

056 Rogers, ~~said~~ indic not eligible, under (l.) is eligible for another 8 wks extended benefits. Discussion. Martin asked for estimate of how many students are filing for unemplmt benefits. There was discussion.

083 Knight said dept has many fed'l conformity reqmts & explained how dept addresses those reqmts.

104 Knight said she wd have dept draft lang.

112 Rogers referred to, ~~new sec & asked~~ prevld addressed sec 7 & 8 re extending schedule & asked fiscal impact (2.5-million). Said, this is giving more to haves & less to have-nots by passing sec 8 & ~~add~~ by denying funds under sec. 18.

138 Knight resumed testy at sec. 19. Secs 20-24 deal w/ "off" & "on" triggers. Rogers req'd explanation of triggers to extended benefits pgm.

171 Martin asked abt benefits to people living out of state. Knight said it wasn't possible to give different bennies to those out of state. Rogers elaborated on how system was set up. Martin asked if any studies were done; Sturrock said one had been done. ~~Those~~ This data was discussed.

206 Knight resumed testy at sec. 25.

232 Discussion of amdmt to sec. 28 regarding training in & out of state.

240 Knight resumed at sec. 29. There was discussion of definition of "wages" in sec. 30. Knight said they would check into defn.

278 Resumed at sec. 31.

There was discussion of effective dates.

347 Martin said bill wd be heard again; asked witnesses if they cd return at a later date. Rogers requested est of cost to UI Trust Fund & ~~example~~ example of affect on empyr.

367 Brought fed SB 898 before committee. Asked Hills for overview of affect of bill.

377 Alex Hills, Dep. Comm., Div of Telecomm, DO admin. Int'd Max Clements, MTA, & Stu Brown, Telelink. Hills said issues are, some of most critical telecomms issue facing state. telecommunications

403 Issue has been around since 1950s. Went over decisions that have been historically made: "hushaphone" decision; "carterphone" decision & Competition issue not new in telephone industry. Present p'blm is ~~not~~ how industry can be structured in order to accommodate competit. Double sided prob'm: maintaining level of svc ~~wh~~ while providing competition.

3 arenas:

1) Court: AT+T antitrust suit

2) FCC – a) computers II case (deregulates customer premises equip)
b) MTS - Watts market structure - making long distance & enhanced svcs phone svc competitive

3) Congress – communications rewrite legis – rewrites communications act of 1934. S898 + HR 5158 (?) – devoted to structure of AT+T corp.

560 Said affecting Ak
~~Explains~~ provns, relating to television.

570 Phone svc has been cross-subsidized. ~~Long~~ Urban payer supports rural, & long distance user supports local, to keep costs low. Keeps local & rural rates at reasonable levels. This was possible in monopoly situ.
Support for local & rural rates is being w/drawn, ~~so~~ so need to prevent drastic increases in local & long distance rates.

652 Universal svcs is a national goal – availability of ph svcs at reasonable rate. Not using network degrades national service.

674 Rogers asked what costs to consumer of this philosophy is not followed. Hills said at least 2-300%; probably much higher in rural Alaska

719 Hills mechanism wkd out on nat'l level is "nat'l telecomm fund" – wd be admin'd by carriers from surcharges on interconnect pymts. Wd target assistance to high cost companies (above 110% of nat'l average). Urban ratepayers wd subsidize urban in name of universal svcs. Wd accommodate competit while keeping rates at reasonable levels.

Tape 2
022 HR 5158 talks abt how fnds wd be structured, & how & in what situ pymts wd be made. Contains local rate support, but does nothing abt long distance rates.

037 Cable TV – no lang in 5158, but in SB, a couple brief sections: 1 address X-ownership (whether ph cos can provide cable TV svc); specifies ph cos may not except in rural areas.

Re cable TV rates: S898 deregs rates, except ~~rural~~ not dereg'd for reg'd govt ~~access~~, public, or educational access channels, & when no reasonably avail alternative media are available.

077 HR5158 presently in House; if it passes, both bills will go to conf comm.

080 Martin asked, on new satellites, must go to all 50 states. Hills said Stevens int'd lang reg'g all satellite w/in our svc area orbital posns reach all 50 states. Favorable to our state. Hills said now there ~~are~~ ~~serving Alaska~~ RCA satellites reach us, but many cd. Discussion of requesting other satellites owners to serve us.

116 3:00 adjourned.

MEMORANDUM State of Alaska

TO: Sandy Sturrock
Asst. Director UI

DATE: March 15, 1982

FILE NO:

TELEPHONE NO: 465-4519

FROM: Elfrieda Mullin
Labor Economist

SUBJECT: Estimate of New Ineligible Claimants for EB Under Alternatives 1 and 2 of New Federal Legislation

The federal restrictions under the newly passed Budget Reconciliation Act (H.R. 3982) require that an individual may not be eligible for extended compensation unless the individual had 20 weeks of full-time employment in base period employment. For states not collecting weeks of work information, two alternative paragraphs may be substituted for calculation of the "equivalent".

Alternative 1: A claimant must have 1.5 times his high quarter earnings in order to be eligible for extended benefits.

Under our current law, claimants with a ratio under 1.5 are eligible for a potential duration of 16 weeks.

For Calendar year 1981, out of a total of 39,017 reported eligible claimants, 6,162 were eligible for 16 weeks duration.

6162/39017 = 16%

Thus, approximately 16% of claimants would not be eligible for extended benefits under Alternative 1.

Alternative 2: A claimant must have 40 times his Augmented WBA in his base period in order to be eligible for extended benefits.

All low income claimants with base period earnings less than $1,440 (entitled to $34 or $36 WBA) would be ineligible under this alternative. This affects 1.2% of eligible claimants. In addition to these, certain claimants with base period earnings between $1,440 and $6,000, primarily those with dependents, would be ineligible because 40 X their augmented WBA does not exceed their base period earnings. An additional 2.2% of currently eligible claimants would be affected by this for a total of 3.4%.

3.4% of 39,017 = 1,327 claimants.

PREVIOUS ACTION

SB 611	Senate Action: First reading 1/11/82. Reported from Labor & Commerce 2/9/82. Reported from Judiciary 2/25/82. Reported from Rules 3/1/82. Taken up immediately; went into second reading 3/1/82. Advanced to third reading by unanimous consent. Passed third reading 3/1/82. House Action: First reading 3/1/82. Labor & Commerce Committee referral added 3/5/82. Statutory Reference: AS 02.30.040; AS 03.35.120 Action Taken: No action taken. Bill scheduled for further hearing on 4/14/82.
SB 771	Senate Action: First reading 2/16/82. Reported from Labor & Commerce 3/11/82. Reported from Rules 3/12/82. Taken up immediately; advanced to second reading 3/12/82. Labor & Commerce Committee Substitute adopted by unanimous consent. Amendment adopted by unanimous consent. Advanced to third reading by unanimous consent. Passed third reading with effective date vote same as passage on 3/12/82. House Action: First reading 3/15/82. Assigned to Labor & Commerce committee.

Rep. Sutcliffe, referred to HB 744, which is a similar bill. She said they support SB 771. Regarding the cash buyer situation, she gave an example of a situation that could be harmful to a fisherman.

Number 177 — Roger Painter, United Fisherman of Alaska, supported the bill. He said it will make it easier to have a small scale market for fresh fish, and will also promote seafood consumption in Alaska.

Number 229 — Rep. Rogers asked clarification of primary fish buyer. There was discussion.

Number 266 — Don Magnusson, Alaska Retail Association, totally supported the bill. He said it would make the purchase and sale of raw fish much simpler.

Number 286 — Rep. Randolph moved that CSSB 771 (L&C) am be reported out of committee by unanimous consent. There being no objection, the motion passed.

Number 302 — The chairman brought HB 611 before the committee.

Number 305 — Rep. Rogers explained why the bill was introduced. He said most pilots are unaware there are any state laws regarding aviation except for the emergency provisions law. He said the laws are so closely related to federal laws that they are difficult to legislate.

Number 355 — Rep. Martin said he wished to better publicize the bill and bring it back before the committee. He said interested parties would be contacted, and the bill scheduled for rehearing on April 14.

Number 384 — Rep. Rogers went over other portions of the statute which he feels need changes, for instance, references to airmen rather than pilots. He said he would draft proposed amendments in advance of the next hearing. Rep. Martin asked that John Hartle, administrative assistant to Rep. Rogers, work with Kent Woodman of AOPA and Alaska Airmen's Association, on the bill.

Number 413 — HB 642 was brought before the committee. Rep. Randolph, prime sponsor of the bill,

explained the intent of the bill and how the trust would work.

Number 482 — Rep. Rogers said he does not completely agree with the findings, but supported it for purposes of expediting the bill.

Number 490 — Rep. Martin had questions about resolution and about the fiscal note. Rep. Rogers suggested putting a one-year delay on the effective date.

Number 511 — There was discussion of the state's tax structure and how state government could continue if the trust went into effect. Rep. Randolph said the money would come from royalty revenues and bonus sales, not from taxes.

Number 552 — Rep. Rogers explained the affect of the fund: decreasing people in state assistance programs, and reducing the need for capital projects funding.

Number 586 — Rep. Bylsma said it would amount to people being forced to again pay income taxes. Rep. Randolph felt those wanting services should pay for them. He explained alternatives to income tax. Rep. Bylsma said people would flock to the state. Rep. Rogers said if they weren't residents at the time of enactment, they could not receive benefits of the trust until there was another source of funding of the trust. Rep. Bylsma reiterated that people would move here for the money. Rep. Randolph agreed, but said our social programs draw in just as many. Rep. Rogers disagreed, saying the biggest increase in migration is for the number of jobs created by capital projects, high paid state jobs, and subsidized loan programs.

Number 716 — Jim Lear, LAA Legal Services, said the bill was drafted by Tom Sofo, who said the bill was used as a "vehicle", so Lear felt changes may be needed. He said the bill has constitutional problems. He felt that restricting benefits to people who are residents on a date certain and denying those who become residents after that was unconstitutional.

Side B, Number 008 — Rep. Rogers disagreed with Lear, as the

state would be distributing an asset. He said this does not create a class of people. Lear said resources provide the funds on an ongoing basis, now and in the future, so future residents would be deprived.

Number 026 — Rep. Randolph said he had spoken with several attorneys, and he is certain there are ways to get around this. He said that if there weren't, the past homesteading laws of the entire country would be invalid. He said this bill would give a share, just as though it were a piece of land, which would belong to the people, and the income derived from the share would also belong to them.

Number 046 — Rep. Rogers felt the "public purpose" was an even bigger issue. He explained his position about how the issue should be addressed. There was discussion.

Number 104 — Rep. Randolph felt these constitutional issues should be looked at by the Judiciary Committee.

Number 106 — Rep. Randolph moved to pass HB 642 to the next committee of referral. On the question: for--Randolph, Rogers; opposed--Bylsma, Martin. Motion failed.

Number 118 — There being no further business to come before the committee, the meeting was adjourned at 2:06 p.m.

AIRCRAFT OWNERS AND PILOTS ASSOCIATION

THE HONORABLE RAMONA L BARNES
Chairperson, House Judiciary Committee
The Capitol Building, Room 122
Pouch V, Juneau, Alaska 99811

Atten: Mr Dave Stancliff

064-22

Dear Dave,

05 March 1982

This letter, with attachments, will confirm our several conversations, and provide the input to SB 611 from both the Alaska Airmen's Association (the largest general aviation organization in the State of Alaska, representing the interests of over 12,500 pilots) and the AOPA (the largest general aviation organization in the world).

We were alarmed by press reports of some of the impact of SB 611 on certain Alaskan flying operations, and this caused the research. First let me tell you that that research into Title 2 of Alaska Statutes was an eye-opener for me, a pilot in Alaska for over 20 years! Virtually every pilot I have spoken to had absolutely no knowledge of Alaskan flying regulations with the exception of 02.35.110; Emergency rations and equipment.

As it turns out, the Associated Press coverage of the intent and effects of the bill were incorrect, but we completed our researches in any event, with the idea of allowing this opportunity to present a complete review of the Statute and to update and fix it all in one shot. Attached to this letter are two documents:

a. A proposed amendment to SB 611, containing all the "repairs" we feel are required to update.

b. A description sheet providing all the rationale' and references for each of the proposed changes.

Thank you so much for the opportunity of visiting with you on the bill. It would be our pleasure to participate in teleconference, in-person testimony on the bill and/or subcommittee efforts to complete proper language for a substitute. Please be advised that we feel strongly enough about these provisions to lobby as required, and this is not casual input. After you have reviewed the materials herein, please comment on the timing and appropriateness of releasing it to the Senate sponsors so that they may be ready for joint committee. We intend to go public with the positions as required.

IN THE SENATE

BY RAY AND DANKWORTH

HOUSE COMMITTEE SUBSTITUTE
FOR
SENATE BILL NO. 611

IN THE LEGISLATURE OF THE STATE OF ALASKA
TWELFTH LEGISLATURE - SECOND SESSION
BILL

For an Act entitled: "An Act revising the criminal penalties for unlawful operation of an aircraft."

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

* Section 1. STATEMENT OF INTENT CONCERNING CHAPTERS 30 & 35 OF TITLE 2, ALASKA STATUTES. It is recognized by the Legislature, that from time to time certain Statutes require revision in order that they comply with Federal provisions, state of the art and public concern and safety. For these reasons, the intent of the Legislature in this bill is to make those revisions to the two above noted Chapters of Alaska Statutes which will at once cause them to operate in concert with applicable Federal Aviation Regulations, actual operating characteristics of the aircraft and aircrews involved, and to focus attention on the several areas of violation which the Legislature perceives as areas of major public concern. The Legislature recognizes that Air Commerce is an invaluable portion of the activities of the State, but that safety and operations of those aircraft so involved are such that without a high degree of professionalism and carefully prepared and enforced controls, the public is hopelessly at the mercy of the various operators. Therefore the following provisions are hereby enacted to provide workable statutes which do not provide duplication of penalties without genuine purpose.

* Section 2 AS 02.30.010 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 3. AS 02.30.030 (a) is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 4. AS 02.30.030 (b) is amended to read:

Sec. 02.30.010 (a) No person may operate an aircraft occupied by a crew member [or passenger] who is obviously under the influence of intoxicating intoxicating liquor or [habit-forming] drugs.

* Section 5. AS 02.30.030 (c) is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 6. AS 02.30.030 (d) is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 7. AS 02.30.040 is repealed and reenacted to read:

Sec. 02.30.020. PENALITIES A person violating AS 02.30.010 shall be guilty of a class B misdemeanor.

* Section 8. AS 02.35.010 is amended to read:

Sec. 02.35.010. Federal law followed. It is declared that the policy, principals, and practices established by the United States Air Commerce Act of 1958 [1926], and all amendments to it are adopted and extended and made applicable to cover all air traffic in this state, so far as not covered by federal law.

* Section 9. AS 02.35.020 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 10. AS 02.35.030 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 11. AS 02.35 040 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 12. AS o2.35.050 is repealed effective June 1. 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 13. AS 02.35.060 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 14. AS 02.35.070 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 15. AS 02.35.080 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 16. AS 02.35.090 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 17. AS 02.35.100 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 17. AS 02.35.110 is amended to read:

Sec. 02.35.020. Emergency rations and equipment. (a) No airman may make a flight inside the State with an aircraft unless emergency equipment is carried as follows:

(1) The minimum equipment to be carried during the summer months is as follows:

(A) food for each occupant sufficient to sustain life for two weeks;

(B) one axe or hatchet;

(C) One first aid kit <u>with capacity for each passenger and crewmember carried, as stated by the kit manufacturer</u>;

(D) one pistol, revolver, shotgun or rifle, and ammunition for same <u>in the following minimum quantities: pistol or revolver: 50 rounds shotgun or rifle: 20 rounds</u>;

(E) one small gill net, and an assortment of tackle such as hooks, flies, lines, sinkers etc.;

(F) one knife <u>with a blade at least 5" long</u>;

(G) [two small boxes of matches] <u>two waterproof containers of matches each containing at least 25 matches, or equal</u>;

(H) one mosquito headnet for each occupant;

(I) [two] four small signaling devices [such as] to include 2 colored smoke bombs, [railroad fuses] and 2 colored rocket or flare devices or Very pistol shells, in sealed metal containers, accompanied by the appropriate pistol or launching device.

(2) In addition to the above, the following must be carried as minimum equipment from October 15 to April 1 of each year:

(A) one pair of snowshoes or one pair of cross country skis with proper bindings, poles and boots;

(B) one sleeping bag;

(C) one wool blanket for each occupant over four years of age, for whom a sleeping bag is not provided;

(b) However, operators of multi-engine aircraft licensed to carry more than 15 passengers need carry only the food, mosquito nets and signalling equipment at all times other than the period from October 15 to April 1 of each year, when two sleeping bags, and one blanket for every two passengers shall be carried. All of the above requirements as to emergency rations and equipment are considered to be minimum requirements which are to remain in full force and effect, except as further safety measures may be from time to time imposed by the department, in the form of published regulations.

* Section 18. AS 02.35.115 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 19. AS 02.35.120 is repealed and reenacted to read:

Sec. 02.35.030. Penalties for violation of this chapter. A person who violates a provision of this chapter shall be guilty of a class B misdemeaner.

* Section 20. AS 02.35.130 is repealed effective June 1, 1982 and will hereinafter be referred to the applicable Federal Aviation Regulation in accordance with AS 02.35.010.

* Section 21. AS 02.35.140 is amended by changing its identification to AS 02.35.040.

* Section 22. AS 02.35.150 is amended by adding a second paragraph to read:

AS 02.35.050 (b) "AIRCRAFT" is defined in this chapter means a device that is used or intended to be used for flight in the air, and includes helicopters, gyrocopters, airplanes, sailplanes and gliders.

RATIONALE' AND EXPLANATION

SEC. 02.30.010. Two-way radios required.

Inasmuch as this section refers to "Commercial" aircraft operations with passengers, the applicable portions of the FAR's are found in Part 135. We note that those commercial operations that do not carry passengers, are not covered in the present language, thus allowing training flights with crew or ferry flights in uncontroled airspace, and we feel that this is correct and needs no attention.

Part 135.157, however, provides that:

> *(a) No person may operate, under VFR, an aircraft carrying passengers at night, in a control zone or, except as provided in paragraph (c) of this section, over-the-top unless that aircraft has two-way radio communications equipment able, at least in flight, to transmit to, and receive from, ground facilities 25 miles away.*

This part goes on with additional, similar language for other conditions, as shown in parts (b) and (c), but they are redundant for these purposes.

RATIONALE': The FAR is much more comprehensive and far better wording. The State statute is vague and sloppy. As one simple example, almost no aircraft radio will work 50 miles on the ground, and no other provision is allowed in the State language. Inasmuch as Sec. 02.35.010 Specifically adopts all the FAR's for State compliance, there is no need to lay this additional one on and attempt to enforce it.

Finally, the effect of SB 611, as written, would add CRIMINAL penalties to what is basically a technical equipment area of concern. As a practical matter, all part 121 (airline) aircraft always comply. Additionally, it would be a rare situation to find a part 135 (air-taxi/Charter) operator without at least one such aircraft radio; they often have 2 or more!

SEC. 02.30.030. (a) Reckless operation.

This section is also found, almost verbatum in several FAR's, and is redundant.

Part 91.8, provides:

> *No person may assault, threaten, intimidate, or interfere with a crewmember in the performance of the crewmember's duties aboard an aircraft being operated.*

Part 91.9, provides:

> *No person may operate an aircraft in a careless or reckless manner so as to endanger the life or property of another.*

RATIONALE': The FAR's more than adequately cover the problem and provide penalties for violation. Inasmuch as Sec. 02.35.010 Specifically adopts all the FAR's for State compliance, there is no need to lay this additional one on and attempt to enforce it.

If the desire is to provide stiffer penalties, then this may be accomplished by simply making reference to the specific FAR and provide Class A or B misdemeaner status.

Sec. 02.30.030 (b) (liquor or drugs)

The Alaska Airmen's Association and AOPA both heartily agree that aircrew members who violate this or parallel FAR's are a serious threat to public safety and are a discredit to an honorable profession. We have no objection to the State tacking on Criminal penalties to his portion.

We do however, have problems with the language of the present section, wherein

> *"No person may operate an aircraft occupied by a crew member --- ---*

Part 91.11, provides:

(a) No person may act as a crewmember of a civil aircraft-

(1) Within 8 hours after the consumption of any alcoholic beverage;
(2) While under the influence of alcohol; or
(3) While using any drug that effects his faculties in any way contrary to safety.

(b) Except in an emergency, no pilot of a civil aircraft may allow a person who is obviously under the influence of intoxicating liquors or drugs (except a medical patient under proper care) to be carried in that aircraft. (emphasis added)

Part 135.115, provides:

(a) No person may drink any alcoholic beverage aboard an aircraft unless the certificate holder operating the aircraft has served that beverage.

(b) No certificate holder may serve any alcoholic beverage to any person aboard its aircraft if that person appears to be intoxicated.

(c) No certificate holder may allow any person to board any of its aircraft it that person appears to be intoxicated.

(d) Each certificate holder shall, within 5 days after the incident, report to the Administrator the refusal of any person to comply with paragraph (a) of this section, or any disturbance caused by a person who appears to be intoxicated aboard any of its aircraft. (emphasis added)

RATIONALE': Inasmuch as the FAR's are explicit and more comprehensive than the current State statute section, recommend they be the controling directive; especially in light of Sec. 02.35.010 Specifically adopting the FAR's for State compliance.

We do however, have difficulty in making it a CRIMINAL offence as relates to the passengers. Terms such as "obviously under the influence" also include those suffering a hangover from the previous night, and they do not offer a threat to the Public traveling aboard an aircraft. As a matter of fact, they are docile. Terms such as "appears to be intoxicated" and the like are often used in this context. We submit that rigid enforcement of this portion would, as a practical matter, cut air commerce in this State in half over night.

Recommend that the FAR's be adopted and that the more severe penalty for Air Crew members be adopted on its own.

Sec. 02.30.030 (c) (over water)

This section is more than adequately covered in the FAR's, with little confusion and excellent language:

Part 91.33 (11) provides:

If the aircraft is operated for hire over water and beyond the power-off gliding distance from shore, approved floatation gear readily available to each occupant, and at least one pyrotechnic signaling device. (is required)

Part 91.79 (a) provides:

Except when neccessary for takeoff or landing, no person may operate an aircraft lower than the following altitudes:

(a) ANYWHERE. An altitude allowing, if a power unit fails, an emergency landing without undue hazard to persons or property on the surface.

Part 135.167 provides:

No person may operate an aircraft in extended overwater operations unless it carries:

(note: This section is extremely long, and contains all manner of specific relations to rafts, floatation and signalling devices and the like. None of that is required here to make the point that there is no reference to any specific distances from land; only equipment

RATIONALE': To begin with, the current State language, if enforced, would halt approximately 50% of the air commerce in the State immediately. Here are several obvious examples:

1. A single-engine land plane flying from Anchorage to Kodiak. (not uncommon)

To comply with this part, the aircraft would need to fly higher than 25,000 feet! Only those aircraft equipped with both turbochargers and pressurization could possibly comply.

2. A single-engine land plane flying from Anchorage to Juneau or Ketchikan. (not uncommon)

After Yakutat, heading southeasterly, the beach rapidly ends, replaced by beautiful mountains, covered with large trees, ending in rocks and surf. There is no beach; no "landing" is possible. One ditches in the Gulf of Alaska near shore and wades ashore with survival gear.

We feel that the Federal regulations more than adequately cover this contingency, with far better language, in all instances. Inasmuch as Sec. 02.35.010 adopts the FAR's for compliance by the State, it is redundant and confusing to establish still another, poorly worded criteria.

Finally, we feel that enforcement of this regulation is more than adequately covered by the FAA and no CRIMINAL record needs be developed, and no more severe penalties need be applied to this section of the code than is already provided.

Recommend deleting the section.

Sec. 02.30.030 (d) (snow and ice)

This section is more than adequately covered by FAR's:

Part 135.85, provides:

(a) No pilot may take off an aircraft that has-

(1) Frost, snow, or ice adhering to any rotor blade, propeller, windshield, or powerplant installation, or to an airspeed, altitimeter, rate of climb, or flight attitude instrument system;

(2) Snow or ice adhering to the wings, or stabilizing control surfaces; or

(3) Any frost adhering to the wings, or stabilizing control surfaces, unless that frost has been polished to make it smooth.

(there are additional sections, but they are redundant for these purposes)

Part 91.209 provides virtually identical text.

RATIONALE': The FAA language is far more comprehensive. Inasmuch as Sec. 02.35.010 adopts the FAR's for State compliance, it is redundant and confusing to establish yet another, less comprehensive and confusing standard.

Finally, we feel that enforcement of this regulation is more than adequately covered by the FAA and no CRIMINAL record needs to be developed, and no more severe penalties need be applied to this section of the code than is already provided.

Recommend deletion of this section.

Sec. 02.35.010 Federal law followed

This is an excellent section, and would and is referred to above and in other sections not herein noted. Unfortunately the United States Air Commerce Act of 1926 has been void since it was replaced with the 1958 edition. Recommend adoption of the current one.

Sec 02.35.040 Registration of Aircraft

This section provides that all the registration and documentation already required by applicable FAR's, and already on file with the FAA in Oklahoma City, and already available to the public upon request, and already printed in a government circular at least semi-annually, also be duplicated and filed with the Department of Transportation and Public Facilities.

We are unaware of <u>any</u> general aviation pilot who is aware of this provision or complies. We are unaware of any attempts by DOTPF to implement this section. We are unaware of any requirement for it. Recommend its deletion as an unnecessary, expensive and duplicating bureaucratic requirement with no valid requirement.

Sec. 02.35.050, Registration of Airmen

See section 02.35.040 above. Recommend deletion of this ineffective portion as well for the same reasons.

Sec. 02.35.060, 070 & 080.

See items above. Recommend deletion of these sections, which provide administrative control of the previous sections.

COMMENT: Inasmuch as these four (4) sections appear to have been in Public Law since 1949, and no attempt to comply has ever been initiated to our certain knowledge, this fact alone attests to the lack of requirement.

Sec. 02.35.090 License and permit to be exhibited on reque t.

Part 61.3, provides:

> *(a) No person shall act as pilot in command or in any other capacity as a required pilot flight crew member of a civil aircraft of United States reg stry unless he has in his personal possesion a current pilot certificate issued to him under this part.*
>
> *(h) Each person who holds a pilot certificate, flight instructor certificate, medical certificate, authorization, or license required by this part shall present it for inspection upon request of the Administrator, an authorized representative of the National Transportation Safety Board, or any Federal, State, or local law enforcement officer.*

Part 91.27, provides:

> *(a) Except as provided in part 91.28 (foreign aircraft), no person may operate a civil aircraft unless it has the following.*
>
> > *(1) An appropriate and current airworthiness certificate. Each U.S. airworthiness certificate used to comply with this subparagraph (except a special flight permit, a copy of the applicable operations specifications issued under 21.197(c) of this chapter, appropriate sections of the air carrier manual required by parts 121 or 127 of this chapter contianing that portion of the operations specificatiojs under 21.187(c), or an authorization under 91.45), must have on it the registration number assigned to the aircraft under part 47 of this chapter. However, the air worthiness certificate need not have on it an assigned special identification number before 10 days after that number is first affixed to the aircraft. A revised airworthiness certificate having on it an assigned special identification number, that has been affixed to an aircraft, may only be obtained upon application to an FAA flight standards district office.*
>
> > *(2) a Registration Certificated issued to its owner.*
>
> *(b) No person may operate a civil aircraft unless the airworthiness certificate required by paragraph (a) of this section or a special flight authorization issued under 91.28 is displayed at the cabin or cockpit*

RATIONALE' Obviously the Federal language more than adequately covers the entire situation and others not even dreampt of by State officials. Recommend deleting it and relying on Sec. 02.35.010 for application of the FAR's in Alaska.

Sec. 02.35.100 Temporary permit.

This entire section covers an area expressly preempted by the Federal Government. There simply is no legal way for the State of Alaska to license pilots under any circumstances. This is 100% an FAA matter.

As a practicle matter, here is what would happen should there be an earthquake, major fire, flood or other State emergency: The authorized State official on the scene (Civil Defense Director, member of the National Guard etc), invoking whatever emergency authority may be available under other statutes, would notify the pilot/owner of an aircraft that it was required for service to say, send a generator to Bethel, evacuate something, haul medicine or supplies or the like. At that moment, the operator of the aircraft is under control and contract of the State of Alaska, and may operate any aircraft with no licenses at all.

He or she is operating in what is called the PUBLIC SERVICE, much the same as FAA pilots, military pilots, and even State pilots.

Recommend deletion of this entire section.

Sec. 02.35.110 Emergency rations and equipment.

This is an important part of the aviation Safety field in Alaska, and it should remain. There are, however, two (2) items which require updating:

1. Item (2) (A) requires showshoes. We recognize that a pair of cross-country skis, poles and boots are superior to snowshoes for survival travel, and recommend addition of the skis as shown on the attached proposed amended bill.

2. Item (1)(D) requires a firearm and ammunition. While this is an excellent suggestion, there are two (2) problems with the provision:

   a. In most cases a hand-gun is not a suitable survival weapon. Of far more value would be a lightweight shotgun and a supply of slugs and shot. We will not, however, offer this as an amendment at this time, as we have been counseled that it may be a controversial enough issue to bog down passage of the more important safety items. We urge consideration, however.

   b. There is no specified amount of ammunition, and one round could qualify. Recommend a minimum amount such as 25 or 50 rounds.

Sec. 02.35.115 Downed aircraft transmitting devices. (ELT's)

Sec. 91.52, provides

(a) Except as provided in paragraphs (e) and (f) of this section, no person may operate a U.S. registered civil airplane unless it meets the applicable requirements of paragraphs (b), (c) and (d) of this section.

(b) To comply with paragraph (a) of this section, each U.S. registered civil airplane must be equipped as follows:

(1) For operations governed by the supplemental air carrier and commercial operator rules of part 121 of this chapter, or the air travel club rules of part 123 of this chapter, there must be attached to the airplane an automatic type emergency locator transmitter that is in operable condition and meets the applicability requirements of TSC-C91;

operable condition and meets the applicable requirements of TSO-C91;

(3) For operations governed by Part 135 of this chapter, there must be attached to the airplane an automatic type emergency locator transmitter that is in operable condition and meets the applicable requirements of TSO-C91; and

(4) For operations other than those specified in subparagraphs (1), (2) and (3) of this paragraph, there must be attached to the airplane a personal type or an automatic type emergency locator transmitter that is in operable condition and meets the applicable requirements of TSO-C91.

(Note: there are 2 more pages of technical details that are not required to demonstrate sufficiency here.)

RATIONALE' There is obviously very complete and thorough Federal regulation to cover the installation, maintenance and operation of ELT's in all aircraft operations in this state; commercial and private. This is an area over which the state has no authority whatsoever, and where the state regulations CONFLICT with the appropriate Federal regulations.

Additionally, and as a much more practicle matter, one notes that under the FAR's, such ELT is inspected each year during the annual inspection of the aircraft under FAA criteria, and the aircraft is grounded if the ELT is not present, not in proper order or has an expired battery date. There is no such inspection system established or required under State authority.

Recommend that the item be deleted in its entirety and that reference to the FAR's via Sec. 02.35.010 for application in Alaska be sufficient.

Sec. 02.35.120, Penalties for violation of Chapter

This section will be reduced in scope by the actions above. The only requirement for the section remaining in in those areas which the State desires to inflict CRIMINAL penalties on top of Federal penalties. These re reflected in the attached, proposed substitute bill.

Sec. 02.35.130, Penalty for violation of 90 or 110 of this chapter.

Same as above.

Sec. 02.35.150, Deffinitions

Because of difficulties in interpretation, we suggest that "aircraft" and "airplane" be defined here precisely as they are in FAR's.

AIRCRAFT means: a device that is used or intended to be used for flight in the air, and when used in air traffic control terminology, may include the aircrew. (includes aircraft, helicopters, gyrocopters and all other heavier-than-air equipment, as well as gliders and sail planes)

AIRPLANE means: a divice such as above, but not including helicopters or gyrocopters.

GENERAL: Penalties under the FAR's are found in two (?) areas:

Sec. 609: wherein the Administrator has authority to revoke, suspend, or modify certificates. This includes pilot certificates, aircraft certificates and operator certificates. This is considered severe and serious penalty authority, and exceeds anything the State is empowered to do.

Sec. 901; wherein the FAA may impost Civil Penalties. Such penalties are limited in current law to $1,000 for each violation.

SEC. 02.30.010. Two-way radios required.

Inasmuch as this section refers to "Commercial" aircraft operations with passengers, the applicable portions of the FAR's are found in Part 135. We note that those commercial operations that do not carry passengers, are not covered in the present language, thus allowing training flights with crew or ferry flights in uncontroled airspace, and we feel that this is correct and needs no attention.

Part 135.157, however, provides that:

> *(a) No person may operate, under VFR, an aircraft carrying passengers at night, in a control zone or, except as provided in paragraph (c) of this section, over-the-top unless that aircraft has two-way radio communications equipment able, at least in flight, to transmit to, and receive from, ground facilities 25 miles away.*

This part goes on with additional, similar language for other conditions, as shown in parts (b) and (c), but they are redundant for these purposes.

RATIONALE': The FAR is much more comprehensive and far better wording. The State statute is vague and sloppy. As one simple example, almost no aircraft radio will work 50 miles on the ground, and no other provision is allowed in the State language. Inasmuch as Sec. 02.35.010 Specifically adopts all the FAR's for State compliance, there is no need to lay this additional one on and attempt to enforce it.

Finally, the effect of SB 611, as written, would add CRIMINAL penalties to what is basically a technical equipment area of concern. As a practical matter, all part 121 (airline) aircraft always comply. Additionally, it would be a rare situation to find a part 135 (air-taxi/Charter) operator without at least one such aircraft radio; they often have 2 or more!

SEC. 02.30.030. (a) Reckless operation.

This section is also found, almost verbatum in several FAR's, and is redundant.

Part 91.8, provides:

> *No person may assault, threaten, intimidate, or interfere with a crewmember in the performance of the crewmember's duties aboard an aircraft being operated.*

Part 91.9, provides:

> *No person may operate an aircraft in a careless or reckless manner so as to endanger the life or property of another.*

RATIONALE': The FAR's more than adequately cover the problem and provide penalties for violation. Inasmuch as Sec. 02.35.010 Specifically adopts all the FAR's for State compliance, there is no need to lay this additional one on and attempt to enforce it.

If the desire is to provide stiffer penalties, then this may be accomplished by simply making reference to the specific FAR and provide Class A or B misdemeaner status.

Sec. 02.30.030 (b) (liquor or drugs)

The Alaska Airmen's Association and AOPA both heartily agree that aircrew members who violate this or parallel FAR's are a serious threat to public safety and are a discredit to an honorable profession. We have no objection to the State tacking on Criminal penalties to his portion.

We do however, have problems with the language of the present section, wherein

> *"No person may operate an aircraft occupied by a crew member or passenger who is obviously under the influence of intoxicating liquor or habit-forming drugs." (emphasis added)*

Part 91.11, provides:

(a) No person may act as a crewmember of a civil aircraft-

(1) Within 8 hours after the consumption of any alcoholic beverage;
(2) While under the influence of alcohol; or
(3) While using any drug that effects his faculties in any way contrary to safety.

(b) Except in an emergency, no pilot of a civil aircraft may allow a person who is obviously under the influence of intoxicating liquors or drugs (except a medical patient under proper care) to be carried in that aircraft. (emphasis added)

Part 135.115, provides:

(a) No person may drink any alcoholic beverage aboard an aircraft unless the certificate holder operating the aircraft has served that beverage.

(b) No certificate holder may serve any alcoholic beverage to any person aboard its aircraft if that person appears to be intoxicated.

(c) No certificate holder may allow any person to board any of its aircraft it that person appears to be intoxicated.

(d) Each certificate holder shall, within 5 days after the incident, report to the Administrator the refusal of any person to comply with paragraph (a) of this section, or any disturbance caused by a person who appears to be intoxicated aboard any of its aircraft. (emphasis added)

RATIONALE': Inasmuch as the FAR's are explicit and more comprehensive than the current State statute section, recommend they be the controling directive; especially in light of Sec. 02.35.010 Specifically adopting the FAR's for State compliance.

We do however, have difficulty in making it a CRIMINAL offence as relates to the passengers. Terms such as "obviously under the influence" also include those suffering a hangover from the previous night, and they do not offer a threat to the Public traveling aboard an aircraft. As a matter of fact, they are docile Terms such as "appears to be intoxicated" and the like are often used in this context. We submit that rigid enforcement of this portion would, as a practical matter, cut air commerce in this State in half over night.

Recommend that the FAR's be adopted and that the more severe penalty for Air Crew members be adopted on its own.

Sec. 02.30.030 (c) (over water)

This section is more than adequately covered in the FAR's, with little confusion and excellent language:

Part 91.33 (11) provides:

If the aircraft is operated for hire over water and beyond the power-off gliding distance from shore, approved floatation gear readily available to each occupant, and at least one pyrotechnic signaling device. (is required)

Part 91.79 (a) provides:

Except when neccessary for takeoff or landing, no person may operate an aircraft lower than the following altitudes:

(a) ANYWHERE. An altitude allowing, if a power unit fails, an emergency landing without undue hazard to persons or property on the surface.

Part 135.167 provides:

No person may operate an aircraft in extended overwater operations unless it carries:

(note: This section is extremely long, and contains all manner of specific relations to rafts, floatation and signalling devices and the like. None of that is required here to make the point that there is no reference to any specific distances from land; only equipment required when flying off shore.)

RATIONALE': To begin with, the current State language, if enforced, would halt approximately 50% of the air commerce in the State immediately. Here are several obvious examples:

1. A single-engine land plane flying from Anchorage to Kodiak. (not uncommon)

To comply with this part, the aircraft would need to fly higher than 25,000 feet! Only those aircraft equipped with both turbochargers and pressurization could possibly comply.

2. A single-engine land plane flying from Anchorage to Juneau or Ketchikan. (not uncommon)

After Yakutat, heading southeasterly, the beach rapidly ends, replaced by beautiful mountains, covered with large trees, ending in rocks and surf. There is no beach; no "landing" is possible. One ditches in the Gulf of Alaska near shore and wades ashore with survival gear.

We feel that the Federal regulations more than adequately cover this contingency, with far better language, in all instances. Inasmuch as Sec. 02.35.010 adopts the FAR's for compliance by the State, it is redundant and confusing to establish still another, poorly worded criteria.

Finally, we feel that enforcement of this regulation is more than adequately covered by the FAA and no CRIMINAL record needs be developed, and no more severe penalties need be applied to this section of the code than is already provided.

Recommend deleting the section.

Sec. 02.30.030 (d) (snow and ice)

This section is more than adequately covered by FAR's:

Part 135.85, provides:

(a) No pilot may take off an aircraft that has-

(1) Frost, snow, or ice adhering to any rotor blade, propeller, windshield, or powerplant installation, or to an airspeed, altitimeter, rate of climb, or flight attitude instrument system;

(2) Snow or ice adhering to the wings, or stabilizing control surfaces; or

(3) Any frost adhering to the wings, or stabilizing control surfaces, unless that frost has been polished to make it smooth.

(there are additional sections, but they are redundant for these purposes)

Part 91.209 provides virtually identical text.

RATIONALE': The FAA language is far more comprehensive. Inasmuch as Sec. 02.35.010 adopts the FAR's for State compliance, it is redundant and confusing to establish yet another, less comprehensive and confusing standard.

Finally, we feel that enforcement of this regulation is more than adequately covered by the FAA and no CRIMINAL record needs to be developed, and no more severe penalties need be applied to this section of the code than is already provided.

Recommend deletion of this section.

Sec. 02.35.010 Federal law followed

This is an excellent section, and would and is referred to above and in other sections not herein noted. Unfortunately the United States Air Commerce Act of 1926 has been void since it was replaced with the 1958 edition. Recommend adoption of the current one.

Sec 02.35.040 Registration of Aircraft

This section provides that all the registration and documentation already required by applicable FAR's, and already on file with the FAA in Oklahoma City, and already available to the public upon request, and already printed in a government circular at least semi-annually, also be duplicated and filed with the Department of Transportation and Public Facilities.

We are unaware of <u>any</u> general aviation pilot who is aware of this provision or complies. We are unaware of any attempts by DOTPF to implement this section. We are unaware of any requirement for it. Recommend its deletion as an unnecessary, expensive and duplicating bureaucratic requirement with no valid requirement.

Sec. 02.35.050, Registration of Airmen

See section 02.35.040 above. Recommend deletion of this ineffective portion as well for the same reasons.

Sec. 02.35.060, 070 & 080.

See items above. Recommend deletion of these sections, which provide administrative control of the previous sections.

COMMENT: Inasmuch as these four (4) sections appear to have been in Public Law since 1949, and no attempt to comply has ever been initiated to our certain knowledge, this fact alone attests to the lack of requirement.

Sec. 02.35.090 License and permit to be exhibited on request.

Part 61.3, provides:

> *(a) No person shall act as pilot in command or in any other capacity as a required pilot flight crew member of a civil aircraft of United States registry unless he has in his personal possesion a current pilot certificate issued to him under this part.*
>
> *(h) Each person who holds a pilot certificate, flight instructor certificate, medical certificate, authorization, or license required by this part shall present it for inspection upon request of the Administrator, an authorized representative of the National Transportation Safety Board, or any Federal, State, or local law enforcement officer.*

Part 91.27, provides:

> *(a) Except as provided in part 91.28 (foreign aircraft), no person may operate a civil aircraft unless it has the following.*
>
> *(1) An appropriate and current airworthiness certificate. Each U.S. airworthiness certificate used to comply with this subparagraph (except a special flight permit, a copy of the applicable operations specifications issued under 21.197(c) of this chapter, appropriate sections of the air carrier manual required by parts 121 or 127 of this chapter contianing that portion of the operations specificatiojs under 21.187(c), or an authorization under 91.45), must have on it the registration number assigned to the aircraft under part 47 of this chapter. However, the air worthiness certificate need not have on it an assigned special identification number before 10 days after that number is first affixed to the aircraft. A revised airworthiness certificate having on it an assigned special identification number, that has been affixed to an aircraft, may only be obtained upon application to an FAA flight standards district office.*
>
> *(2) a Registration Certificated issued to its owner.*
>
> *(b) No person may operate a civil aircraft unless the airworthiness certificate required by paragraph (a) of this section or a special flight authorization issued under 91.28 is displayed at the cabin or cockpit entrance so that it is legible to passengers or crew.*

RATIONALE' Obviously the Federal language more than adequately covers the entire situation and others not even dreampt of by State officials. Recommend deleting it and relying on Sec. 02.35.010 for application of the FAR's in Alaska.

Sec. 02.35.100 Temporary permit.

This entire section covers an area expressly preempted by the Federal Government. There simply is no legal way for the State of Alaska to license pilots under any circumstances. This is 100% an FAA matter.

As a practicle matter, here is what would happen should there be an earthquake, major fire, flood or other State emergency: The authorized State official on the scene (Civil Defense Director, member of the National Guard etc), invoking whatever emergency authority may be available under other statutes, would notify the pilot/owner of an aircraft that it was required for service to say, send a generator to Bethel, evacuate something, haul medicine or supplies or the like. At that moment, the operator of the aircraft is under control and contract of the State of Alaska, and may operate any aircraft with no licenses at all.

He or she is operating in what is called the PUBLIC SERVICE, much the same as FAA pilots, military pilots, and even State pilots.

Recommend deletion of this entire section.

Sec. 02.35.110 Emergency rations and equipment.

This is an important part of the aviation Safety field in Alaska, and it should remain. There are, however, two (2) items which require updating:

1. Item (2) (A) requires showshoes. We recognize that a pair of cross-country skis, poles and boots are superior to snowshoes for survival travel, and recommend addition of the skis as shown on the attached proposed amended bill.

2. Item (1)(D) requires a firearm and ammunition. While this is an excellent suggestion, there are two (2) problems with the provision:

   a. In most cases a hand-gun is not a suitable survival weapon. Of far more value would be a lightweight shotgun and a supply of slugs and shot. We will not, however, offer this as an amendment at this time, as we have been counseled that it may be a controversial enough issue to bog down passage of the more important safety items. We urge consideration, however.

   b. There is no specified amount of ammunition, and one round could qualify. Recommend a minimum amount such as 25 or 50 rounds.

Sec. 02.35.115 Downed aircraft transmitting devices. (ELT's)

Sec. 91.52, provides

(a) Except as provided in paragraphs (e) and (f) of this section, no person may operate a U.S. registered civil airplane unless it meets the applicable requirements of paragraphs (b), (c) and (d) of this section.

(b) To comply with paragraph (a) of this section, each U.S. registered civil airplane must be equipped as follows:

(1) For operations governed by the supplemental air carrier and commercial operator rules of part 121 of this chapter, or the air travel club rules of part 123 of this chapter, there must be attached to the airplane an automatic type emergency locator transmitter that is in operable condition and meets the applicability requirements of TSC-C91;

(2) For charter flights governed by the domestic and flag air carrier rules of Part 121 of this chapter, there must be attached to the

operable condition and meets the applicable requirements of TSO-C91;

(3) For operations governed by Part 135 of this chapter, there must be attached to the airplane an automatic type emergency locator transmitter that is in operable condition and meets the applicable requirements of TSO-C91; and

(4) For operations other than those specified in subparagraphs (1), (2) and (3) of this paragraph, there must be attached to the airplane a personal type or an automatic type emergency locator transmitter that is in operable condition and meets the applicable requirements of TSO-C91.

(Note: there are 2 more pages of technical details that are not required to demonstrate sufficiency here.)

RATIONALE' There is obviously very complete and thorough Federal regulation to cover the installation, maintenance and operation of ELT's in all aircraft operations in this state; commercial and private. This is an area over which the state has no authority whatsoever, and where the state regulations CONFLICT with the appropriate Federal regulations.

Additionally, and as a much more practicle matter, one notes that under the FAR's, such ELT is inspected each year during the annual inspection of the aircraft under FAA criteria, and the aircraft is grounded if the ELT is not present, not in proper order or has an expired battery date. There is no such inspection system established or required under State authority.

Recommend that the item be deleted in its entirety and that reference to the FAR's via Sec. 02.35.010 for application in Alaska be sufficient.

Sec. 02.35.120, Penalties for violation of Chapter

This section will be reduced in scope by the actions above. The only requirement for the section remaining in in those areas which the State desires to inflict CRIMINAL penalties on top of Federal penalties. These are reflected in the attached, proposed substitute bill.

Sec. 02.35.130, Penalty for violation of 90 or 110 of this chapter.

Same as above.

Sec. 02.35.150, Deffinitions

Because of difficulties in interpretation, we suggest that "aircraft" and "airplane" be defined here precisely as they are in FAR's.

AIRCRAFT means: a device that is used or intended to be used for flight in the air, and when used in air traffic control terminology, may include the aircrew. (includes aircraft, helicopters, gyrocopters and all other heavier-than-air equipment, as well as gliders and sail planes)

AIRPLANE means: a divice such as above, but not including helicopters or gyrocopters.

GENERAL: Penalties under the FAR's are found in two (2) areas:

Sec. 609: wherein the Administrator has authority to revoke, suspend, or modify certificates. This includes pilot certificates, aircraft certificates and operator certificates. This is considered severe and serious penalty authority, and exceeds anything the State is empowered to do.

Sec. 901; wherein the FAA may impost Civil Penalties. Such penalties are limited in current law to $1,000 for each violation.

Absent: Gardiner

3/25/82 H. Labor & Commerce Tape # 46

SB 771 HB 642
SB 611

Senator Eliason

1: 10

000 Call to order

CSSB 771 / Sen. Eliason — effort to strike a blow for uncle liberties.
006 Went over situations which this bill wd alleviate.

044 Rogers said he supported bill. Saw other problems with bonding statute, such as buyer being req'd to post a bond when he pays cash.
Discussion.

068 Martin asked why grocery stores were included. Sen Eliason said stores are legit. businesses that have assets, so shdn't have to post bond.
Discussion.

097 Judy Knight, DOL — dept supports passage of bill, & explained their posn

115 Rogers had gotns; there was discussion of cash payments & what people shd be included in the law.

143 Martin asked clarification abt f/n

159 Beth Robinson, AA to Sutcliffe; req'd HB 744, which is similar. Support SB 771. Re cash buyer situ, gave example of situ that cd be harmful to fisherman.

177 Roger Paynor, UFA — supported bill; will make easier to have small scale market for fresh fish; wd also promote seafood consumption in Alaska.

229 Rogers asked clarification of primary fish buyer. Discussion.

266 Don Magnusson, Alaska Retail Assn — totally support bill. Wd make purchase & sale of raw fish much simpler.

Apr. 14 (?)

Jim Lear
Legal svcs

286 Randolph moved ~~SCS~~ SB 771 (2 & C) am be reported out by unan consent. Mo passed w/o objection.

302 ~~Rogers~~ HB 611 was brought before comm.

305 Rogers explained why bill was intd. Rogers said most pilots are unaware there are state laws except the ~~emer~~ emergency provisions law. Laws so closely related to federal laws; difficult to legislate.

355 Martin said he would better publicize the bill & bring it back before committee. Said to wire people & to schedule bill for 4/14.

384 Rogers went over other portions of the statutes which he feels need chng, eg ref to airmen rather than pilot. Said he would draft prop'd amdts in advance of next hrg. Martin asked that John Hartle work w/ Woodman on bill.

413 HB 642; Randolph explained content of bill & how trust would work.

482 Rogers said he doesn't completely agree w/ findings, but supports it for purposes of expediting bill.

490 Martin had gotns abt resolution & abt f/n. Rogers suggested putting 1 yr delay on effective date ~~how~~ wd continue if state govt.

501 There was discussion of the state's tax structure & ~~how~~ whether ~~money for the~~ trust ct went into effect. Randolph said money wd come from royalty revenues & bonus sales, not taxes.

557 Rogers explained effects of the fund – decreasing people in state assistance pgms; read for some capital projects wd be reduced.

586 Byloma ~~felt~~ said it wd amt to people being forced to again pay income taxes. Randolph felt those wanting services shd pay for them. He explained alternatives to income tax. Byloma said people wd flock to the state. Rogers said if they weren't residents at the time of enactment, they could not receive benefits of the trust until there was another source of funds. Byloma reiterated that ppl's wd move here for the money. Randolph agreed, but said our social pgms draw just as many. Rogers said biggest increase in migration is # jobs created by capital projects, state jobs, & subsidized loan pgms.

716 Jim ~~Lehr~~ Lear, LAA Legal Svcs – said bill was drafted by Soto, who said bill was used as "vehicle" so changes may be needed. Said bill has constl probs – restricting benefits to people who are residents on date certain & denying those who become residents after that.

Side B

008 Rogers disagreed as it wd distribute an asset. Doesn't create a class of people. Lehr said resources provide funds on an ongoing basis, now & in the future, so future residents wd be deprived.

026 Randolph spoke w/ sev attys & is certain there are ways to get around this. If there weren't, the, just homesteading laws of the entire ~~gov~~ country wd be invalid. This is giving a share, just as though it were a piece of land; belongs to people & income that share derives belongs to them.

046 Rogers felt "public purpose" was even bigger issue. Explained his posn abt how the issue shd be addressed. Discussion.

104 Randolph felt these constl issues shd be looked at by Judiciary.

106 Rand moved to pass bills to next comm of referral
for - R, R opp'd Byloma, Martin
Motion failed

Juneau, Alaska 99811
465-3867
Position Statement: Answered questions about legality of bill.

PREVIOUS ACTION

HB 866

See minutes of 3/10/82.

Statutory Reference: AS 43.20.036

Action Taken: Rep. Randolph moved to report bill out of committee. He withdrew that motion. There was discussion. Rep. Randolph again moved to report bill out of committee. There being no objection, the motion passed. Bill was reported out with individual recommendations.

ACTION NARRATIVE

Tape #47
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:14 p.m. Members present were: Representatives Martin, Bylsma, Rogers, and Randolph. Rep. Gardiner was absent. Rep. Rogers left immediately after the call to order. HB 866 was before the committee.

Number 009

R.R. Kesel, Director of Audit, Department of Revenue, opposed the bill. He said it does not accomplish its intended purpose. He addressed three hypothetical situations to illustrate his point of view. He said the bill would benefit only those companies with large incomes, and would be costly to the state.

Number 072

Phil Holdsworth, Alaska Miners Association, suggested an amendment to prevent transferral of tax credits. He said he understands the Department of Revenue's concerns. He said a more reasonable percentage would still be beneficial to the Alaska mining industry. Rep. Martin asked Holdsworth questions about the proposed amendment.

Number 105

George Krusz, president of the Alaska State

Chamber of Commerce, supported the principal of the bill, but felt it was conceptually discriminatory because it excludes a number of industries. He proposed an amendment which would allow all industries to take advantage. He said he was sympathetic to the Department of Revenue's concerns. (Krusz passed out his proposed amendment to the committee; this is available for inspection.) There was discussion.

Number 141

Roy Huhndorf, president of Cook Inlet Region, Inc., strongly supported the concept of the bill. He said it could help strengthen and broaden the economy. He said the state should adopt the bill to encourage diversification of the economy. He said the tax credit policy would encourage early development of natural resources on native-owned land. He felt it would also make investment by third parties in native-owned resources more attractive. He said more money would be invested in the state's economy, and that more year round and diverse employment opportunities would be created, which would help the economy. There was discussion. Rep. Martin felt this singled out special corporations. Huhndorf though those industries were selected for their potential large development, which would provide jobs and a revenue base. He felt the size of the tax credit and the transferability were both important in creating this economic base. Huhndorf said limiting this to Alaska would inhibit the bill somewhat. He said he would like to see the general concept embodied in a bill.

Number 265

Lance W. Anderson, vice president of Finance, Cook Inlet Region, Inc., rebutted the 3/9/82 written testimony offered by Stevens of the Department of Revenue. He felt the fiscal impact figures were incorrect, and presented his own figures to back his position. He recommended the bill be passed. Rep. Martin asked what the impact would be this year. Anderson said it would be minor. He said it would not affect smaller operations, but that it is vital to larger projects. Anderson said the impact would be several years down the line. The impact today is in determining the feasibility of projects. He said it enhances marginal investments.

Number 371

Rep. Randolph asked the ratio of tax credit to investment required. Anderson said it was 10% of the qualified investment (tangible personal property). There was discussion. Anderson said he felt there was no constitutionality question. There was discussion of the legality of the bill. Anderson said he would provide a legal opinion.

Number 431

Rep. Randolph said he thought the bill was good, and that it should be moved. He moved to report the bill out of committee. Rep. Martin felt the proposed amendments should be considered first. Rep. Randolph withdrew his motion.

Number 454

Rep. Martin asked P.A. Bradley, LAA Legal Services, if there were legal questions with the bill. Bradley said he was not asked to achieve a purpose in drafting the bill, so he did not know if the goal was achieved. He thought there were no constitutional problems, as tax laws are different.

Number 478

Rep. Martin asked for motions on the amendments so legal opinion could be obtained. He explained the Chamber of Commerce's amendment to delete reference to specific industries. Anderson said he opposed the amendment. He said the reason for the bill is to encourage long-term development of four base industries in Alaska. He said the fiscal impact of the amendment would be detrimental to passage of the bill. Anderson said of the second proposed amendment, regarding sale of credits, that the federal decision to allow sale of investment tax credits is excellent philosophy. He said the same situation exists in Alaska, that the state needs to encourage investment. He recommended neither amendment be included in the bill. Rep. Randolph agreed, due to the shortness of the session. Krusz agreed with Randolph, that if the amendments would kill the bill, he withdrew their proposed amendments and supported the bill. Kesel said he was led to believe much of the mining industry investment would be subject to investment tax credit. He read a definition of "qualified investment". There was discussion of qualified investments.

Number 698	Rep. Randolph moved to report the bill out of committee. There being no objection, the motion passed. Bill was reported out with individual recommendations. Rep. Martin recommended the Department of Revenue do a better tax evaluation, and said the committee would have the other amendments evaluated.
Number 725	There being no further business to come before the committee, the meeting was adjourned at 1:59 p.m.

000 Call to order; Rep. Rogers left imm. after call to order.

HB 866

069 R.R. Kesel, Dir of Audit ~~Kesselt~~, Dept. Revenue — opposed bill; doesn't accomplish intended purpose. Addressed 3 hypothetical situs to illustrate his point of view. Wd benefit only those companies with large incomes; wd be costly to the state.

072 Phil Holdsworth ~~Holsworth~~, Ak Miners Assocn — suggested amdmt to prevent xfrad of tax credits. Understands to Dept. Revenue's concerns. More reasonable percentage wd still be beneficial to Ak mining industry.

100 Astns — Martin — re prop'd amdmt.

105 George Kreeg, Pres, Ak St Chambers of Commerce — supports principle of bill; conceptually, discriminatory because it excludes a # of industries. Prop'd amdmt which wd allow all industries ~~is~~ to be advantage. Sympathetic to Revenue's concerns. (Gave prop'd bill to comm.) Discussion.

141 Roy Hunndorf ~~Handorf~~, pres., Cook Inlet Region Inc — strongly supports concept. Can help strengthen & broaden economy. State shd adopt this to encourage diversification of the economy. Tax credit policy will encourage early devpt of nat resources on native-owned land. Also makes investment by third parties in native owned resources more attractive. More money wd be invested in state's economy. More yr round & diverse emplmt opps wd be created, which wd help economy. Discussion —

184 Martin felt this singled out special corpns. Handorf felt those industries were selected for their potential large devpt, which wd provide jobs & revenue base.

Handorf -

215 felt size of tax credit & xfr ability were both important in creating this economic base. Limiting to ak wd inhibit bill somewhat. Wd like to see general concept embodied in bill; ~~not particularly concerned with~~

265 Lance W. Anderson, VP Finance, Cook Inlet Region Inc - rebuttal of 3/9/82 Dept Revenue w/Hse testimony by Stevens. Felt fiscal impact figures were incorrect. Presented figures to back his position. Recommended bill be passed.

343 Martin asked impact this yr; Anderson said it wd be minor. Wd not affect smaller operations, but is vital to larger projects. Impact several yrs down the line. Impact today is in determining feasibility of projects. Enhances marginal investments.

371 Randolph - asked ratio of tax credit to investment req'd. Anderson - 10% of qualified investment (tangible personal property). Discussion.

395 Martin asked his specialty; Anderson - tax mgmt. - felt there was no constitutionality question. Discussion of legality of bill. Said he'd provide legal opinion.

431 Randolph felt bill was good & that it shd be moved. Moved to report bill out.

440 Martin felt amdmts shd be considered first. Randolph w/drew motion.

454 Martin asked Bradley, Legal Svcs, if there were legal gotchas w/bill. Bradley said he was not asked to achieve a purpose, so doesn't know if goal was achieved. Thought there were no constl probs as tax laws are different.

478 Martin asked for motions on the amendments so legal opinion cd be obtained. Explained Chamber of Commerce amdmt (delete ref to specific industries).

~~533~~ Amdmt #1 by Chamber before the comm.

539 Anderson – oppose amdmt. Reason for bill is to encourage long term devpt of 4 base industries in Alaska. Fiscal impact wd be detrimental to passage.

Re ~~second~~ amdmt – sale of credits – ~~allowing~~ federal decision to sale of investment tax credits is excellent philosophy; same with AK, need to encourage investment. Recommended neither amdmt be included in bill.

610 Randolph agreed, due to shortness of session.

618 Kruse – agree w/Randolph; if amdmts wd kill bill, withdraw their amdmts & support bill.

632 Kessell – ~~don't think~~ led to believe much of mining industry investment wd be subject to investment tax credit. Read a definition of qualified investment. Discussion of qualified investments.

698 Randolph moved to report bill out. No objection, so passed, w/ind'l recommendations. Martin recommended Dept Revenue do better tax evaluation & ~~comm~~ said comm wd have other amdmts evaluated.

1:59
725 Mtg adjourned.

definition of qualified investment according to R.R. Kessell of dept. of revenue.

U.S. Master Tax Guide, referring to what is Section 38 property.

"The investment credit is available only for expenditures on Section 38 property. Section 38 property is either recovery property or other depreciable or amortizable property having a useful life of 3 yrs or more; that is,

1) tangible personal property;
2) other tangible property used as an integral part of mfg, extraction, production.

Position Statement: Felt both HB 794 and HB 795 superfluous.

PREVIOUS ACTION

HB 794 — See minutes of 3/11/82.

Statutory Reference: AS 45.45; AS 45.50.

Action Taken: Committee considered workdraft committee substitute. Testimony was heard; no formal action taken.

HB 795 — See minutes of 3/11/82.

Statutory Reference: AS 45.45; AS 45.50.

Action Taken: Committee considered workdraft committee substitute. Testimony was heard; no formal action taken.

HB 642

See minutes of 2/24/82 and 3/25/82.

Statutory Reference: AS 37.

Action Taken: Rep. Randolph moved to pass HB 642 out of committee with individual recommendations. On the question: for--Rogers, Randolph, Gardiner; opposed--Bylsma, Martin. Motion passed.

ACTION NARRATIVE

Tape #48
Recording
Number 000

The meeting was called to order by Chairman Martin at 1:09 p.m. Members present were: Representatives Martin, Bylsma, Gardiner, Randolph, and Rogers. There were no members absent. This meeting was a teleconference hearing which included the sites of Anchorage, Fairbanks, Kodiak, Ketchikan, and Juneau. Testimony was taken on HB 794 and HB 795, and the workdraft committee substitutes.

Number 015

Phil Blackstone, Endrust of Alaska, Anchorage, opposed both bills. He saw no need for the legislation. He said there have been no complaints about rustproofers. He said the bill does not limit competition, if that is the aim. He questioned how the law would actually work in various situations. He had problems with terminology and definitions. He forewar problems with warranties, accidents, inspections, and conflicts with national warranties. He thought HB 794 would end up costing consumers more. He said it is cheaper to install accessories on a mass production basis at the factory. He said it will cost the consumer more if the dealer has to specify options or install them himself. He said the industry can balance itself and take care of itself.

Number 117

George Cada, Arctic Service Rustproofing, Anchorage, said he is a deale· with Ziebart International. In order to protect the Alaska corporation, he supported HB 795. He

said it would protect the auto dealer, as well as the general public.

Number 134 — Rep. Martin explained that the Consumer Protection Agency had initiated the request for legislation.

Number 145 — Max Hodel, Alaska Sales & Service, Anchorage, said HB 794 is unnecessary. He said it asks for dealer restriction, and then eliminates the restriction in section (b). He felt it was an impractical and unneeded bill. He said for a dealer to maintain inventory in Alaska and offer a choice of product, he must commit to the supplier as much as six months ahead. He said the consumer is given a wide choice of options, and the bill won't help the consumer.

Regarding HB 795, Hodel said he has never had a consumer problem dealing with rust on autos. He said rust inhibitors have been very effective. He did not feel legislation should be passed that gives the idea that rustproofing is necessary in Alaska. Hodel said, compared to other areas of the United States, we have a much less serious problem. He wanted an interpretation of warranty on rustproofing to be equated to the proper use of undercoating. He said they have all vehicles undercoated when the come to Alaska. He said there is a high degree of consumer acceptance, and some benefit as rustproofing.

Number 253 — Rep. Rogers said he appreciated Hodel's comments on HB 794. He felt there may be a legal problem with the dealer misrepresenting the actual cost of transportation. Hodel said the laws covered this.

Number 271 — Rep. Rogers said the committee had been given copies of rustproofing warranties which appeared not to cover the product. He asked if a standard should be established. Hodel said this goes against his philosophy. He said it is not necessary for the government to impose details. He would be surprised if the auto industry would be willing to accept such language. He said, as a dealer, he would not want to be injected into this chain of supply. Rep.

Rogers thought his concerns were good, but he assumed there must be a problem in Anchorage, or the legislation would not have been introduced. Rep. Martin commented on materials before the committee about rustproofing problems in other areas of the country.

Number 371

Jack Mann, franchise Toyota and Chrysler products dealer in Kodiak, testified regarding HB 795. He was concerned about the effect on several suppliers outside the state providing services to Alaska dealers. He wondered about the effect on those companies and what good bonding would do. He asked how it would apply to auto manufacturers. He said there is a problem with rust in Kodiak and other coastal areas. He felt passing legislation would raise the cost to Alaska consumers, and would be a particular hardship on dealers in small communities. He said the Consumer Protection Agency should confine itself to areas where there are consumer complaints. Mann said small communities are being legislated against. He said the high bond will either raise the cost to consumers, or be affordable only to those dealers in larger communities. Rep. Martin commented on Mann's testimony.

Number 443

Richard Sims, Berg Motors, Kodiak, said that HB 794 would be a detriment to the consumer because they do require people to buy certain features; he used as examples winterizing and positraction. He said the dealer, knowing the area, can do a better job of ordering than the consumer. Regarding HB 795, Sims said this would be a problem, especially in rural areas. He explained situations where rustproofing cannot work, such as when a vehicle is being immersed in salt water daily to launch boats. Rep. Bylsma asked if cars come from the manufacturer with the degree of antifreeze needed for protection. Sims said they have a small degree of protection, but not enough to withstand minus-forty-degree weather such as is encountered on the shipping vessels.

Number 538

Rep. Randolph moved to report HB 642 out of committee with individual recommendations. On the question: for--Rogers, Randolph,

Gardiner; opposed--Bylsma, Martin. Motion passed.

Number 560

Dick Silberer, Universal Motors, Anchorage, supported Hodel's statements and those of others opposed to HB 795. He said the real cause of rust was brought about by the state's and municipalities' treatment of roads. He said the legislation should inhibit the use of salt and calcium on streets. He could not support the bill as drafted.

Regarding HB 794, Silberer asked if an individual could request a dealer to remove rustproofing or accessories the individual did not want on a car. He went on to ask if there was a list of complaints signed by people requesting the bills. Rep. Martin said they did have some testimony regarding problems, and that Connie Sipe of CPA had more. He said there was not much, but that the feeling is that prevention is cheaper than cure. Rep. Martin agreed with Silberer's statement regarding governmental entities evaluating the materials being put on roads.

Number 683

Fred Morino, Eero Volkswagen, Anchorage, said the other witnesses had expressed his concerns. He said auto dealers do the best job they can. He considered rustproofing a form of insurance, similar to the tiles on the exterior of the space shuttle. He was opposed to either bill, as dealers are doing a good job and being responsive to needs.

Side B, Number 013

Rep. Martin asked if it is possible for an individual to buy a stripped down version of a car, without undercoating, and other options. Morino said a consumer can be provided with any vehicle he requests, with or without options, by ordering from the factory.

Number 035

Bahne Martenson, Continental Motor Company, Anchorage, responded to the letter he had sent to the committee. He said he does not require a consumer to purchase anything. He said the average retail price he pays for undercoating is $75-100, and that it is a good option. He said rustproofers are trying to get a share of the automobile business through referral commissions. He

said he does not make referrals because he cannot vouch for the quality of the work. Martensen said rustproofing retails for an average of $295 for an economy car. He said HB 795 would take away the consumer's option to buy undercoating. He felt it should be left up to the customer to read and evaluate warranties and to choose the product he wants to buy.

Number 095

Connie Sipe, Consumer Protection Office, Anchorage, testified about HB 795. She said the CPA has been given the power and duty to respond to general complaints brought by people without a specific complaint. She said CPA conducts independent investigations, which they have done in the areas covered by both bills. She said the workdraft committee substitute covers situations the witnesses spoke to. She said the bill would not apply to a dealer selling a car with a manufacturer warranty, but would apply to a dealer selling a service.

Number 131

Sipe said her concern with undercoating is that their staff had been told by dealers that undercoating is rustproofing. She said the bill is to eliminate such misrepresentation. Sipe said the CPA is interested in preventive legislation. She said CPA would support the bill even without the bond provision. She said they want to do away with potentially deceptive warranty terms. Sipe said the law would apply to Seattle suppliers. She said dealers should not be injected into a chain unless they provide a rustproofing service or represent undercoating as rustproofing.

Number 208

Rep. Martin said the bonding provision might be deleted from the bill.

Number 220

Bob Evans, Consumer Protection Office, Anchorage, testified regarding HB 794. He gave examples of situations illustrating the need for the law. He said dealerships wield substantial power in stating the conditions under which consumers will purchase vehicles. He said the interest if consumers, of secondary competitors, and of dealers will be served by the bills. He said that the result of "shopping" the Anchorage area is that the shoppers were told that vehicles were not available

without options.

Number 325 — John Beard, counsel for Continental Motors, Anchorage, said he was a lawyer in private practice, and that he had experience representing auto sales dealers. Beard said he was testifying at the request of Martensen. Beard said both bills are superfluous. He said what is prohibited in the bills is unfair practices. Beard said the definition of unfair practices is too broad; that even the Supreme Court could not define it. Beard said this is determined by a variety of items, and that people trying to comply with the law have no way to determine what is lawful under the statute.

Number 386 — Regarding HB 794, Beard said a person must order a new vehicle for delivery. He said if this is intended to mean "when a purchaser offers to buy", it could lead to problems. He gave an example. Beard said the state is managing a dealer's inventory if it disallows him the option of ordering accessories he feels the public wants to buy. Beard attempted to discern the bill sponsor's intent.

Regarding HB 795, Beard said the effect of the bill would be, by the definition of rustproofing, to make the same standards applicable to products not intended as rustproofing, but that do inhibit rust.

Number 545 — Rep. Martin asked Beard to work with the Consumer Protection Office on legislation. Beard said he would.

Number 580 — The Anchorage LTN moderator said she had been asked to convey that Steppe and Yaeger wished to go on record in opposition to both bills.

Number 598 — Jack Mann, Kodiak, responded to Sipe's testimony regarding rustproofing provided by secondary companies by asking about rustproofing provided by manufacturers. He said, regarding options and secondary suppliers, that in rural communities there are no secondary suppliers. Rep. Martin replied.

Number 640 — Rep. Martin said no further action would be taken at this time. He said if any action

was considered, the participants in the teleconference would be notified.

Number 653

There being no further business to come before the committee, the meeting was adjourned at 2:37 p.m.

HB 794
HB 795

Make copy of tape for Mat-Su

1:09

000 Call to order; intro of members; referred to bills.

both bills Anchorage Cada Holden

015 Phil Blackstone, — opposed both bills. Sees no need for legislation: ~~Does~~ there have been no complaints abt rustproofers; bill does not limit competition, if that is the aim. ~~Does~~ ~~not~~ question ~~does~~ how law wd actually work in various situs. Problems with terminology & definitions. Foresaw probs w/ warranties, accidents, inspections, & ~~other situs~~ conflicts w/ national warranty. Thought HB 794 wd end up costing consumers more. Cheaper to install accessories on mass production basis at factory; will cost customer more if dealer has to specify options, or install them himself. Industry can balance itself & take care of itself.

HB 795
117 George Cada, Arctic Svc Rustproofing — dealer w/ Zubart Int'l — in order to protect Ak cosm, support HB 795. Wd protect auto dealer as well as gen'l public.

134 Martin explained that CPA originated request for legislation.

HB 794
145 Max Holden (Hodel?), Ak Sales & Svc — HB 794 — bill unnecessary - asks for dealer restriction & then eliminates restriction in section (b). Impractical & unneeded bill. For dealer to maintain inventory in Alaska & offer choice of product, must commit to suppliers as much as 6 mos. ahead. Consumer is given wide choice of options. Bill won't help consumer.

HB 795 Re HB 795 — he has never had consumer prob dealing w/ rust on autos. Rust inhibitors have been very effective. Doesn't feel we shd pass legisn that gives idea rustproofing is necessary in Ak

Anc

Hodel

~~Holden~~, cont'd — compared to other areas of U.S., we have much less serious prob. Wants interpretation of warranty on rustproofing to be equated to proper use of undercoating. They undercoat all vehicles when they come to Alaska; high degree of consumer acceptance & some benefit in rustproofing.

253 Rogers — appreciated comments on 794; may be legit prob with dealer misrepresenting actual cost of xptn. Hodel felt other laws covered this. ~~Rogers~~

271 Rogers said comm. had been given cpy of rustproofing warranties which appeared not to cover product; asked if standard shd be established. Hodel said this goes against his philosophy; not necessary for govt to impose details. Wd be surprised that auto industry wd be willing to accept such language. As a dealer, wd not wanted to be injected into this chain of ~~process~~ supply.

331 Rogers thought his concerns were good. Assumed there must be a prob in Anc or there legsn wd not have been intd.

343 Martin commented on mails before committee about rustproofing probs in other areas of the country.

Kodiak

371 Jack Mann, franchise Toyota & Chrysler products dealer — re HB 795 — concerned that out suppliers outside state provide svce to Ak dealers: curious abt affect on these companies & what good bonding will do; how it will apply to auto mfrs. Prob w/rust in Kodiak & other coastal areas — passing legs will raise cost to Ak consumers; particular hardship on dealers in small communities. CPA shd confine itself to areas where there are consumer complaints.

Mann, cont'd – small comm. being legislated against. High bond will either raise cost to consumers or be affordable only to those dealers in larger communities.

Martin commented on Mann's testimony.

443 Richard ~~Simms~~ Sims, Berg Motors, Kodiak – re both bills – HB 794 wd be detriment to consumer because they do require people to buy certain features – gave examples: winterizing, protraction. Dealer, knowing area, can do better job of ordering than consumer.

480 HB 795 – prob, esp in rural areas – situations where rustproofing can't work, such as when vehicle is being immersed in salt water daily to launch boats.

508 Bylsma – ~~Sims~~ re winterizing – don't cars come from mfr w/ degree of antifreeze needed for protection? Simms said they have small degree of protection, but not enough to w/stand -40° weather such as is encountered on the shipping vessels.

HB 642

538 Randolph moved to pass HB 642 out of comm w/ ind'l recommendn.

Question: for – Rog Rand, Gard opp'd – Bylsma, Martin.

passed.

~~Sen~~ Anchorage Dist ~~Spielberg (Silver?)~~ Silberer, Universal Motors – supported Hidel's stmts + others opp'd to HB 795. Real cause of rust brought abt by state + municipality's treatment of rds. Shd inhibit use of salt + calcium on streets. Bill as Cd not support bill as drafted.

560 Re HB 794 – asked if ind'l cd request dealer to remove rustproofing or accessories ind'l did not ~~want~~ apply to purchase car.

Ane, cont'd –

Asked if there was a list of complaints signed by people requesting bills.

642 Martin said they did have some testimony re proba, & Sipes, CPA, has more. Not much, but feeling is prevention is cheaper than cure. Agreed w/ govts evaluating materials being put on roads.

683 Fred Morino – Ford Exec VW – other witnesses expressed his concerns. ~~Also concerned~~ They do best job they can. He considers rustproofing a form of insurance, similar to tiles on exterior of space shuttle. Opposed to either bill as dealers are doing good job & being responsive

Side B to needs.

013 Martin asked if it's possible for indiv to buy ~~the~~ stripped down version of car – w/o undercoating & other options. Morino said consumer can be provided w/ any vehicle he requests, with & w/o options, by ordering fm factory.

035 Bahne ~~Martenson~~ martensen, Continental Motor Co – both bills – referred to Ltr he sent to comm. ~~How~~ He doesn't require consumers to purchase anything. Average retail price they pay for undercoating is $75-100 – good option. Rustproofers are trying to get share of automobile business, through referral commissions. They don't make referrals because they can't vouch for quality. Rustproofing retails av of $295 for an economy car. HB 795 wd take away consumer's option to buy undercoating. ~~This~~ It shd be left up to customer to read & evaluate warranties & choose product he wants to buy.

Anc, contd

095 Connie Sipes, CPA office — re HB 795 — CPA has been given pwr + duty to respond to complaints given by people w/o specific complaint. They conduct independent investigations, which they have done in areas covered by both bills. CS covers ~~cases~~ situations witnesses ~~dealers~~ spoke to. ~~Theirs~~ Bill wd not apply to dealer selling car w/ mfr warranty, wd apply to dealer selling svc.

131 Concern w/ undercoating is — their staff had been told by dealers that undercoating is rustproofing. Bill is to ~~assure~~ eliminate such misrepresentation. ~~CPA~~ CPA is interested in preventive legislation. CPA wd support bill even w/o bond provision. Want to do away w/ potentially deceptive warranty terms. Wd apply to Seattle suppliers.

Dealers shd not be injected into a chain unless they provide rustproofing svc or represent undercoating as rustproofing.

208 Martin said bonding might be deleted from bill.

Anc –

020 Bob Evans, CPA – re HB 794 – re options; gave examples of sites illustrating need for law. Dealerships wield substantial pwr in stating conditions under which consumers will purchase vehicles. Interests of consumers, secondary competitors, & dealers will be served by bills. Result of "shopping" Anc areas is that shoppers were told vehicles were not available w/o options.

325 John Beard, Conte Motors – lawyer in private practice – has had exper repg auto sales dealers -- there at request of Martinson – bills are superfluous. What is prohibited is unfair practice -- definition ~~is~~ is too broad, Supreme Ct can't define it. Determined by variety of items. People trying to comply w/ law have no way to determine what is lawful under the statute.

386 HB 794 – person must order new vehicle for delivery; if this is intended to mean "when purchaser offers to buy", ed lead to problems. Gave examples. ~~Wd dealer be obliged to remove options consumer doesn't want? And must consumer Asked if dealer violates law if he refuses to remove~~ State is managing dealer's inventory if it disallows him the option of ordering accessories he feels public wants to buy. ~~&~~ Beard attempted to discern bill sponsor's intention.

HB 795 – effect of bill wd be, by defn of rustproofing, to make same standards applicable to products not intended as rustproofing, but that do inhibit rust.

545 Martin asked him to work w/CPA on legislation.
Beard said he would.

580 Steppe + Yaeger went on record in opposition to both bills, per Anne LTN.

598 Kodiak - Jack Mann - re Sipes testimony re rustproofing provided by dairy companies - what abt r/proofing provided by mfrs. Also, re options & secondary suppliers - in rural communities, where are no secondary suppliers. Martin replied.

640 Martin said no further action wd be taken at this time; said if any action was considered, participants wd be notified.

653 1:37 Mtg adjourned.

TO ALL SITES (EXCEPT JNU, FBK, KTN, KODIAK)
I WANT TO LET YOU KNOW OF A TELECONFERENCE THIS COMMITTEE HAS SCHEDULED FOR MARCH 30 ON HB 794 AND HB 795. I HAVE ASKED ANCHORAGE, FAIRBANKS, KODIAK, AND KETCHIKAN OFFICES TO NOTIFY AUTO DEALERS AND RUSTPROOFERS IN THEIR AREAS OF THIS HEARING. HOWEVER, IF YOU HAVE THESE BUSINESSES IN ANY OF YOUR AREAS, PLEASE CONTACT THEM WITH THE MESSAGE I WILL PRINT ON THE NEXT PAGE (YOU CAN JUST XEROX IT OR PHONE IT). WE ARE NOT LIMITING THE TELECONFERENCE TO THE SITES I MENTIONED, BUT WE ARE NOT AWARE OF AUTO DEALERS/RUSTPROOFERS IN OTHER AREAS. IF YOU HAVE THESE BUSINESSES IN OTHER AREAS, OR IF YOU HAVE QUESTIONS, PLEASE CONTACT ME AT PRINTER LJHY OR AT 465-3657.

I PLAN TO SEND OUT A SHORT PRESS RELEASE SOMETIME THIS WEEK.

THANKS...JOAN

RE: HOUSE BILL NO. 795
MOTOR VEHICLE RUSTPROOFING

Dear Fred,

Enclosed are copies of House Bill No. 795, a Master Shield rustproofing warranty booklet and brochure.

As I stated in our phone conversation, the passing of this bill, particularly the portions stating what the warranty will be and the bonding requirements, are unduly repressive and restrictive and repress free trade within the State. Warranty requirements are already spelled out in the federal Moss-Magnusen Warranty Act.

If this Bill is passed, it would restrict all but the largest dealers in metropolitan areas from applying rustproofing. If all companies and businesses that offer warranties were required to post a bond of this size or a cash deposit, there would be very few businesses operating in Alaska.

The Chrysler Corporation's rustproofing warranty is the best in the automotive field. It is issued through Chrysler Corparation and backed by a major American insurance company. The American Standards Testing Bureau reported that Master Shield Rust Protection gave "superior results," "full compliance" and "exceeded the requirements" of the very demanding U.S. Military Specification for a corrosion-preventive compound.

The end result of this Bill's passage would be legislating rustproofing out of existance in small Alaska communities— a service which is sorely needed as evidenced by the number of vehicles on the road with serious rust damage.

KODIAK AUTO CENTER, INC.
P. O. BOX 788
KODIAK, ALASKA 99615

I solicit your support in defeating House Bill NO. 795 and if I can provide you with any further information concerning the rustproofing process, please feel free to write or call.

Sincerely,

Jack E Mann

Jack E. Mann

MASTER SHIELD

RUST PROTECTION

PRESERVES APPEARANCE...

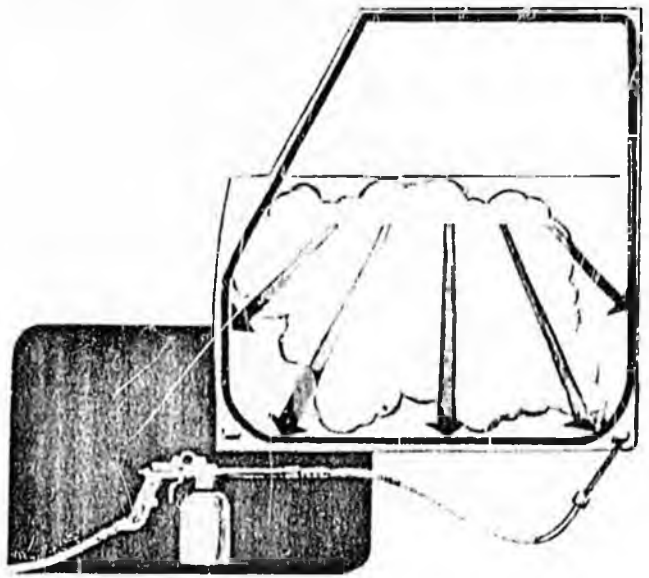
MAINTAINS VALUE...

PROTECTS YOUR INVESTMENT

REVOLUTIONARY NEW COMPOUND PENETRATES... COVERS...SEALS

An advanced-technology combination of waxes and rust-inhibiting chemicals is sprayed on all rust-prone metal surfaces and crevices, forming an electrochemical bond and a clear, hard coat that resists cracking, chipping, breaking or peeling. Tested and proved in military, industrial and automotive applications worldwide, this protection is now approved and recommended by Chrysler Engineering. Master Shield Rust Protection gives you extra assurance against natural and man-made corrosive elements that can start rust from the inside out.

THE INVISIBLE BARRIER OF MASTER SHIELD



Master Shield compound is applied in an atomized fog which covers all inner surfaces and creeps into all seams and crevices. It then forms a clear, waterproof, acid-resistant seal against the corrosive elements that could attack the metal from inside. Because it's a clear, odorless chemical compound, there's no smell, no mess, no cleanup. And Master Shield resists the formation of rust so well it carries a Lifetime Limited Warranty.

MASTER SHIELD RUST PROTECTION CAN PAY DIVIDENDS

Too often, when it's time to trade or sell, rust damage can reduce the value of your vehicle by hundreds of dollars. So Master Shield Rust Protection is not only a sensible precaution, it may return far more than its cost when you sell, and the Lifetime Limited Warranty is transferable, too. It may be the best investment you make when buying your new car.

CHECK THE REASONS YOU SHOULD HAVE MASTER SHIELD RUST PROTECTION

- ✓ *American Standards Testing Bureau* reported that Master Shield Rust Protection gave "superior results," "full compliance" and "exceeded the requirements" of the very demanding U.S. Military Specification for a corrosion-preventive compound.
- ✓ Master Shield Rust Protection's Lifetime Limited Warranty is backed by one of America's largest insurance companies.
- ✓ Master Shield Rust Protection guards against interior rust in hidden areas—rust-through damage is covered by the Warranty up to $2,000.
- ✓ No limit on transfer of the Warranty. No limit on mileage.
- ✓ Master Shield Rust Protection treatment includes FREE inspections every two years.
- ✓ Master Shield Rust Protection is applied only by Chrysler Corporation Dealers' factory-trained technicians.

MASTER SHIELD RUST PROTECTION
LIFETIME LIMITED WARRANTY
(New Vehicles)

The effectiveness of Master Shield Rust Protection compound is warranted by its manufacturer for the REGISTERED LIFETIME OF THE VEHICLE and is applied to new vehicles, within the first three months of first registration date.

If, within the registered life of the vehicle, the rusting-through of parts originally treated with Master Shield Rust Protection should occur (exhaust systems excluded as well as load areas of commercial vehicles) the damaged areas will be repaired or replaced under this Lifetime Limited Warranty at no cost to the owner, up to two thousand U.S. dollars ($2,000) per vehicle.

This Lifetime Limited Warranty does not apply to surface rust; rust caused by external damage from dents, scratches or chipped paint, fair wear and tear attributed to normal driving conditions, manufacturing defects and defects covered under manufacturer's new-car warranty, unless otherwise covered by this Warranty.

There is no limit to the number of transfers of this Warranty to subsequent owners.

THIS LIFETIME LIMITED WARRANTY IS THE ONLY EXPRESS WARRANTY APPLICABLE TO CORROSION PERFORATION ON THIS VEHICLE. ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS APPLICABLE TO CORROSION PERFORATION ON THIS VEHICLE IS LIMITED IN DURATION TO THE DURATION OF THIS WRITTEN WARRANTY.

Some states or provinces do not allow the exclusion or limitation of incidental or consequential damages or limitations on how long an implied warranty lasts, so the above limitation or exclusions may not apply to you.

This warranty gives the owner specific legal rights and the owner may also have other rights which vary by state.

MASTER SHIELD RUST PROTECTION
LIFETIME LIMITED WARRANTY

Conditions

The following conditions must be met for this Lifetime Limited Warranty to remain valid:

1. Inspections (NO CHARGE)—The vehicle must be presented for inspection to an authorized Master Shield Rust Protection dealer every 24 months (30 days before or after due date). These inspections must be recorded on the Coupons in the Warranty Book and mailed to the Master Shield Protection Center.
2. Warranty Registration—Immediately after Master Shield Rust Protection has been applied, dealer and owner must complete the Registration Coupon in the Owner's Warranty Booklet and mail it to the Master Shield Protection Center. The Booklet is the owner's record of Warranty, and remains valid as long as all Warranty conditions are complied with.
3. Accident Damage—Any treated parts damaged through accident must be retreated with Master Shield Rust Protection (at the owner's expense) and such treatment recorded on the Coupon provided and mailed to the Master Shield Protection Center.
4. Vehicle Registration—The protected vehicle must be continuously registered for road use. Any lapse of such registration will invalidate this Warranty.
5. Transfer of Warranty—There is no limit to the number of transfers to subsequent owners, provided such transfers are recorded on the Coupon provided and mailed to the Master Shield Protection Center. Previous owners must have complied with all conditions of the Warranty for such transfers to be valid. There is NO CHARGE for these transfers for the first six years from date of Master Shield Rust Protection treatment. A $25 transfer fee must accompany notice of transfer if the transfer date is more than six years from date of treatment.
6. Warranty Claims—A Damage Claim form must be completed by an authorized Master Shield Rust Protection dealer within 30 days of first knowledge of damage covered by the Lifetime Limited Warranty. Covered damage requiring less than $500 in repair charges will be repaired by the dealer at the owner's convenience. Damage requiring more than $500 in repair charges must be reported to the Master Shield Protection Center, and written approval must be received before repairs are made.

MASTER SHIELD RUST PROTECTION FOR USED VEHICLES, TOO.

AVAILABLE ONLY THROUGH AUTHORIZED DEALERS OF

THE NEW CHRYSLER CORPORATION

To: All Interested Parties
From: Terry Martin, Chairman
House Labor & Commerce Committee
Date: March 17, 1982
Subject: Teleconference

House Bill 794, relating to sales practices of motor vehicle dealers, and House Bill 795, relating to motor vehicle rustproofing services, will be the subject of a teleconference hearing of the House Labor & Commerce Committee on Tuesday, March 30, at 1:00 PM PST (11:00 AM AST). You are invited to participate in this teleconference through your local legislative information office. Copies of the bills may be obtained from the information office, as well.

If you desire more information, contact the House Labor & Commerce Committee at 465-3669.

Terry Martin

Terry Martin, Chairman
House Labor & Commerce Committee

To: Rep. Terry Martin, Chariman, House Labor and Commerce Commitee

We the undersigned franchised automobile and truck dealers representing in excess of 50% of the annual sales in Alaska oppose House Bill # 794 and # 795 as drafted and if any further action is to be considered, we request a teleconference with the committee and further request written notification in advance of any further action regarding these two bills so representation from the franchise dealers could be present. # NOTE ↔

Pouch K
Juneau, Alaska 99811
465-3600
Position Statement: Explained his role in providing legal advice to APA.

Commissioner Ernst W. Mueller
Department of Environmental Conservation
and
Vice Chairman, Board of Directors
Alaska Power Authority
Pouch O
Juneau, Alaska 99811
465-2600
Position Statement: Defended Board's decision to use net of insurance.

PREVIOUS ACTION

There were no bills before the committee. This was an informational meeting.

ACTION NARRATIVE

Tape #49
Recording
Number 000 The meeting was called to order by Chairman

Martin at 1:07 p.m. Members present were: Representatives Martin, Bylsma, Gardiner, and Rogers. Rep. Randolph was absent. Representatives Cotten, Sutcliffe, Grussendorf, and Haugen also attended the meeting. Rep. Martin explained the purpose of the meeting, which was to explore policy decisions regarding sole contract of insurance by the Alaska Power Authority.

Number 015 — Dick Pettinger, Alaska Chapter, Associated General Contractors, said his association represented 675 construction-related firms. He said the Chapter opposes the Alaska Power Authority wrap-up insurance program known as APCOP. Pettinger said that, nationally, the association has been opposed to this type of insurance program for years. He described stands taken by the AGC in the past.

Number 040 — Pettinger asked why regulation or statute permitted a wrap-up insurance program. He asked why APA instituted the program. He said that all bids on the Tyee project included insurance costs, and asked why APA did not notify the public of their intent before imposing the program on the project. He said APA said this program would be cost saving to the rate payer.

Number 054 — Pettinger said one of the contractor's tools is removed by this type of insurance program. He explained how safety factors affect the cost of insurance. He said a company with a better safety factor would normally submit a lower bid. Pettinger said APCOP penalizes the safety-conscious contractor. He said that APA assuming insurance means the contractor would not be held responsible for claims. He questioned the ability of APA to ensure proper safety procedures. He questioned the savings as a result. (Pettinger promised to provide the committee with a copy of his written testimony.)

Number 084 — Pettinger said major disadvantages are that owner controlled programs are disliked by most contractors. He said administration is a disadvantage due to the length of the project and turnover of personnel. He felt insurance company agents' interests may be diverse, hence there could be a conflict of interest with one company serving all

parties. He felt this could lead to claims control problems and legal difficulties, as well. He spoke about consolidating policies. Pettinger said the true cost of insurance is often not determined for 5-7 years after completion of a project. Pettinger felt with wrap-up insurance, the owner often becomes involved in many insurance disputes that normally take place between the general contractor and the subcontractor.

Number 123 — Pettinger said the best incentive for risk control lies with self insurance programs. He felt APCOP would result in the opposite. He objected to government intervention into the private sector. He requested immediate elimination of APCOP.

Number 135 — Rep. Martin asked when the situation first came to his attention; Pettinger responded that it was early in November, and added that the contract was let in August. There was discussion.

Number 165 — Eric Yould, Director of Alaska Power Authority, and John Haywood, Director of the Division of Risk Management, then came before the committee. Yould said that APA had two options with respect to insurance: 1) bidding under normal procedures, with the contractor providing his own insurance; or, 2) bidding net of insurance (also referred to as a wrap-up program). Yould said the Division of Risk Management provided information that indicated benefits to APA in keeping the cost of insurance premiums down if they provided their own insurance. He said it is their intent to proceed with an owner-insured program. He said the Division of Risk Management used the state's present insurance brokers to provide coverage; AGC then objected to the program.

Number 216 — Yould said at the last board meeting on March 21, the issue was reviewed. Division of Risk Management came before the board and indicated advantages to the state to take part in the program. The AGC opposed this, and Jeff Barry, Labor & Commerce committee aide, posed questions. He said many of the questions presented by Barry on behalf of the Committee should have been addressed to Risk Management, and said that Risk

Management had assisted in answering the questions.

Number 238

Yould said the next project is Terror Lake. He said bid opening is planned for April 26. He said APA would request two bids from each contractor--one reflecting costs with net of insurance, and one with the owner providing his own insurance. He said the board would then decide which type of insurance to use.

Number 250

Rep. Rogers asked when bid opening for Tyee Lake occurred; Yould responded it was September 25, and that the board met on October 2. Rep. Rogers asked if the bids were for net of insurance or if they included costs of insurance; Yould responded the bids included insurance, and that they subsequently requested the winning contractor to remove insurance costs from his bid. Rep. Rogers asked if the other bidders had an opportunity to respond to the bid as modified; Yould said they did not. Rep. Rogers suggested this might have created a different lowest responding bidder. Yould said there was litigation against the bid award for another reason, and that no one else litigated. He said the board went forward with the bid on October 2, but did not sign the agreement until December 2. There was discussion to clarify the dates. Haywood said the program was in place at the time the bidder was asked to back out his insurance costs. He said the contractor voluntarily agreed to back out insurance costs. After that, at Risk Management's recommendation, they felt it would make sense to draft a memorandum of agreement, but the program was in effect at the time.

Number 319

Rep. Rogers said that the state is managing the contractor's risks. Haywood said they were talking about a situation where the state has a joint interest in workers compensation, general liability, and builders risk. He said the workers compensation statute has proven that state entities are liable in the event of a claim without adequate insurance. He said that since World War II, most major public construction authority programs have been handled by wrap-up programs. Rep. Rogers referred to the statute which requires a

contractor to submit proof of workers compensation insurance at the time of bid.

Number 360

Rep. Martin said Harrison Western was the fourth lowest bidder, and that they did not comply with the law in submitting proof of insurance. Haywood said he wasn't involved in opening of the bids, but he understood that Harrison Western was the second lowest bidder. He said at the time the insurance certificates came in, the decision had been made to go with the APCOP program. Yould said he understood Harrison Western did have insurance at the time of the bid. Rep. Rogers asked if they required notice of current coverage of workers compensation prior to awarding bids. Yould wasn't certain.

Number 402

Rep. Rogers was concerned about a couple issues where APA appeared to be circumventing or violating law. He asked if interim financing had been arranged for both Swan Lake and Tyee. Yould said it was. Rep. Rogers asked what would happen if revenue bonds could not be sold and the legislature did not make an appropriation. Yould said advisors and underwriters advised that long term bonds could be issued if necessary. Rep. Rogers asked what the obligation of the state would be if bonds went to 20%. Yould said APA is liable, but that the state would not let its credit be impaired. Rep. Rogers was concerned about an agency of the state making obligations on behalf of the legislature. He asked if there would be a capital reserve account. Yould said there would be, with bond proceeds. Rep. Rogers asked if Swan Lake had received complete legislative authorization. Yould said it had. Rep. Rogers asked if it was the same interim financing issue. Yould said there was a straight bank loan. Rep. Rogers said the Authority said it wouldn't incur debt service that would make the power provided more expensive than diesel. He asked now the APA could ensure this. Yould said the legislature could change the program.

Number 480

Rep. Rogers said current law speaks to a uniform power rate. He asked, if the rate goes above the ceiling, how both the law and the contractual obligation could be met.

Yould said it was not the intent of the legislature to increase the cost of power. Rep. Rogers said the legislature required 10% of the capital costs annually unless there was $5-billion appropriated. Yould said the cost would still be lower than the cost of diesel. He said this was analyzed, and they do not foresee a situation where the cap will come into play. He said people will always have to remain in the system to pay their share of the debt service. Rep. Rogers asked if Yould was agreeing there is a ceiling. Yould said at least on their portion of the debt service. Rep. Rogers requested clarification. Yould responded that in the event the bond market goes, up, it is questionable whether revenue bonds could be sold to cover the program.

Number 554

Rep. Rogers asked if APA has an attorney. Yould responded that Ken Vassar, Department of Law, did legal work for them. He said Vassar doesn't review all the contracts, that they have other attorneys. He said the contract was reviewed by the Department of Law under the Transportation Section, but was primarily reviewed by private counsel.

Number 575

Rep. Martin asked if Division of Insurance had been consulted. Haywood said yes. He said owner wrap-up is a common way of handling major construction projects all over the country for the past 25 years. He said Alyeska was an owner wrap-up program. He said they met with the Division of Insurance several times before going into the program. Haywood said there had been a question of whether special regulations would need to be adopted, and that it had been decided they were not. He said they set the cutoff at $50-million projects for a wrap-up program.

Number 614

Rep. Martin asked if Commissioner Hudson had given permission for a wrap-up program. Haywood said the risks of the state of Alaska would tap a majority of the world-wide marketplace capacity. He said the contract was on the basis of professional services, and would be kept in effect for 3-5 years. He said this was done early in 1981, and that Marsh & McLennan and Coroon & Black/Dawson were selected.

Number 654

Rep. Martin asked why these companies should get paid for an insurance program when the memorandum of agreement was dated three months after the insurance coverage went into effect. Haywood said the insurance was there by October 15. Rep. Martin asked if that was when they decided Harrison Western did not have coverage. Haywood responded that their lack of insurance was not an issue, and that they did not meet other specifications. Rep. Martin asked at what time the Commissioner signed the sole source contract. Haywood said the contract was put together for Tyee Lake insurance. He said insurance is a contract of "utmost good faith". He compared it to car or homeowner's insurance that is ordered by telephone. He said this was the same situation--the coverage was put into place as of 10/1, contracts followed. He said this is standard practice.

Number 734

Rep. Martin said he understood the contractor could not get insurance because they were a high insurance risk. He pointed out, in addition, that it was not a $50-million contract. Haywood said it would be a $90- to $100-million contract when it was done. He said Terror Lake, with one prime contract for a $175-million project, was a better example than Tyee, which was bid in three phases.

Side B, Number 005

Rep. Rogers asked if Coroon & Black would then get the insurance contract on Tyee, Terror Lake, and Susitna. Haywood said they didn't have a contract like that. Rep. Rogers asked if they could extend the contract to all projects. Haywood said it was part of the selection process.

Number 027

Haywood said they need four to five months lead time to give the broker time to put together the program needed. He said they now have two projects on-line: Terror Lake and Tyee. He said this is a Risk Management service, it is not separate.

Number 042

Rep. Rogers asked, since the contractor bears no cost of insurance, what is the incentive for a good safety program. Haywood says statistics show they run safer jobs. He said they build safety specs into the project, centralize safety coordinating

and facilities on the job, and report losses to the National Safety Council, so insurance modification factors continue to run. There was discussion of incentive for a good safety program.

Number 076 — Haywood said the state isn't forcing safety on the contractor. He said statistics show these jobs are run safely. He said Rep. Rogers was missing the humanism. He said there are so many hidden costs related to an injury that no well-managed contractor would risk that. Rep. Rogers pointed out that a poorly-managed contractor might.

Number 111 — Rep. Martin asked what public entities use wrap-up programs. He noted that it seems that private agencies are moving away from it. Haywood said wrap-ups are going as strong now as ever. He said the cutback in federal funds is slowing down major wrap-up programs. He passed out a partial list of owner-controlled programs and documented savings. (This list is available for inspection from the committee.)

Number 130 — Rep. Martin asked if Commissioner Hudson signed a document to authorize this. Haywood said it went through contract review in the Department of Administration. Rep. Martin said the insurance was done after the fact. He said that, by regulation, the company selected was not qualified as it had no insurance included in the bid. Haywood said insurance was included in the bid.

Number 148 — Rep. Bylsma said, in the contract with the insurance company, they provide APA and prime contractors with a safety incentive formula prior to conception. He asked how they could do this if the job was contracted before the insurance was in force. Haywood said the intention of the agreement is that language for policy be in the contract. He said it is designed for a project where language is included in the bid specification. Rep. Bylsma asked what the safety incentive formula is. Haywood responded that APA got a return of $100,000 to use on other projects, and $200,000 to use as incentive programs with contractors on the basis of good performance. Rep. Bylsma asked if the contractor and APA split that money. Haywood said the incentive is

based on losses.

Number 195 — Rep. Bylsma said that, on 10/2, premium return was mentioned. He said he was led to believe it would come back to the state, not the contractor.

Number 215 — Daryl Cody, president of Daryl A. Cody Company, a business consulting firm with offices in Anchorage and Washington state, said one of his specialties is assisting contractors in the acquisition of surety bonds and construction insurance. He listed his qualifications.

Number 250 — Cody described wrap-up programs that were attempted to be instituted in Washington state in the 1960s that were stopped because what they suggested as savings was over anything they could justify. He said he has been injured by the action of APA, as they took insurance out of one of his clients' hands. He said he is co-chairman of the Insurance Taxing and Bonding Committee of the Alaska Chapter of AGC, and that he holds an office in the national AGC.

Number 280 — Cody said he favors the free enterprise system. He is opposed to anything unnecessary, which is his first reason for opposing APCOP. He said it takes the normal insurance buying process away from the contractor. He said cost of insurance is a major consideration in putting bids together.

Number 297 — Cody was opposed to government involvement in business where no need or purpose is served, as in this case. He said the state and the APA are in the private sector, where they aren't wanted or needed. Cody said in APA's public relations program, they said they would save money. He saw no way they could save money over the way general contractors buy their own insurance. He commented on the document which was passed out to justify use of a wrap-up plan. He said they went back 25 years to find 25 projects. He referred to one project showing a 38% savings. He said these savings have no credibility, as the base used to show savings was subject to question. He did not feel the statistics were credible. He said wrap-ups don't save

money; he believed it would cost more.

Number 360 — Cody referred to APA's inference that money would stay in Alaska. He said they hired two of the largest brokers in the world, and that all the effort has been centered around the Seattle offices of those firms. Cody felt these firms could be considered non-Alaskan firms. Cody said the net of insurance does not save costs; it interferes with contractors' normal insurance buying processes; that contractual liability becomes confused because of the grey areas created by the net of insurance. He said the state is exposing itself beyond the protection of insurance, which is an additional cost.

Number 409 — Rep. Sutcliffe asked if the state has liability by providing the wrap-up. Cody said they assumed a risk greater than they were insuring. There was discussion. Rep. Rogers asked if the builders risk could be larger than the state is insured for. Cody said, if for any reason coverage is denied by the carrier, the state is liable. He said the state is acting as an insurance intermediary. Rep. Bylsma asked if that would be different if the general contractor had private insurance. Cody said yes, the contract specifies the contractor is liable.

Number 470 — Cody referred to exhibits attached to his prepared testimony.

Number 500 — Rep. Rogers tried to clarify the order of events. Cody said the tone of the message to the contractor regarding the change order (after the court battle) was: "Here is the contract. We'll sign it if you sign the change order."

Number 550 — Rep. Bylsma asked what law Washington had passed regarding wrap-up insurance. Cody said the committee has a copy of the law on file. The law prohibits an agency of state or local government in directing the purchase of surety bonds on a state or local project. He said the law was passed in 1967 or 1968.

Number 584 — Rep. Sutcliffe asked, if the state of Washington had built and owned projects as Alaska will, if there was a wrap-up

insurance program and if the state couldn't totally fund the project, would there be any implication that the insurance companies would pay out so m[illegible]t would reflect back on the state? Cody [illegible]uld not think of a situation where overall financial feasibility of projects could be affected. He believed brokers and Risk Management people capable of handling risk and risk management. He questioned their right to involve state government in private business, and the right of the contractor to protect himself as he wishes to be protected.

Number 625 — Rep. Martin asked who paid for the public relations firm hired, and asked if there was any relationship between any of the board members of APA and the public relations firm hired. Cody assumed APA paid for the services. He said that, as of ten days ago, the firm was still working on the project.

Number 642 — Rep. Martin announced that the hearing would be continued on Friday, when a bill or resolution might be introduced.

Number 645 — Don Koch, Chief of Market Surveillance, Division of Insurance, and Ken Moore, Director of the Division of Insurance, came to testify before the committee. Moore said formal hearings were held in 1971 regarding the pipeline. Two years ago, when the pipeline was out and running, private enterprise approached them about having a wrap-up. As of August 26, the Division had published a worksheet of guidelines.

Tape 50, Number 003 — Koch said he contacted other states to find out their attitudes toward wrap-up programs. He got very little response, and said that some did not know what it was. He commenced work last summer because of a potential wrap-up on the pipeline and on other projects. Rep. Martin said he understood there was a wrap-up on the marine ferries. Koch said there had been only one that he was aware of: the Alyeska pipeline, a private project.

Number 030 — Rep. Martin asked Koch what advice he had given Risk Management and APA. Koch recalled discussions of self-insurance and wrap-up insurance. He said the discussion

was fairly general, and that he had given no advice.

Number 044 — Rep. Martin asked if Koch foresaw the state being solely responsible for paying workers compensation claims. Koch was not sure. He believed that should be considered.

Number 058 — Rep. Martin asked if the Division of Insurance had any overview responsibility, or if Risk Management was independent. Moore said Division of Insurance had no responsibility at all over Risk Management. Koch said they regulate provider coverage.

Number 071 — Rep. Martin asked if they had evaluated the program. Koch said they had not. He said if they were directed to look at it, all they would be required to say is whether or not it covers workers. He said they don't have the expertise to say if it is an appropriate program for those circumstances; that this is not one of the Division's roles.

Number 093 — Rep. Bylsma asked what effect elimination of wrap-up would have on workers compensation (he used Washington state as an example). Moore said it could have an effect. Koch said that whether compensation was a prime consideration when the legislation was created would be a factor.

Number 110 — Rep. Martin asked if the Division could evaluate the policy--percentage of risk and true value to the state. Koch said they did not have the expertise, and that they would have to contract that out if they were requested to provide such an evaluation.

Number 125 — Ken Vassar, attorney in the Department of Law, came before the committee. Rep. Rogers asked if he had reviewed the power sale agreement. Vassar had not. He responded to Rep. Rogers that he had not reviewed the interim financing agreement, either. Vassar said the APA has outside counsel, and he believed they had reviewed the documents in question. Rep. Rogers asked if Vassar had reviewed any of the insurance issues discussed. Vassar said he had. Rep. Rogers went over the occurrence of events:

07/27 APA met with Marsh & McLennan

08/06 Response of Marsh & McLennan with details
08/11 Bids come in
Aug/Sep APA chooses bidder
10/02 APA board meets & approves concept of APCOP
10/06 Change order issued
11/09 Press release regarding APCOP
11/23 and 12/02--sign memorandum of agreement

Vassar said this was not standard procedure. He was not familiar with the timeline. He said the decision to use the program was entered after the bid. He said this constitutes a change of circumstances. Vassar said the details came to the attention of the executive director after the bids were opened. There was discussion. Rep. Rogers asked if they were planning to review the sales agreement with Ketchikan and the interim financing agreement. Vassar said yes.

Number 190

Commissioner Ernst Mueller, vice chairman of the Board of Directors of Alaska Power Authority, said APA is a business in competition with private facilities. He feels it is his responsibility to investigate cost-cutting avenues. He said the only way to keep a cap on costs is to hire experts. Risk Management is one of their agencies used. He said decisions are rightfully in the hands of the Board. Mueller said that, at the meeting, there was sufficient justification to approve this approach. He said information to date has not changed his mind. He said the disadvantages of wrap-up insurance to general contractors are the same in the entire field of wrap-up programs, public and private. He said any decisions made about wrap-up programs should cover public and private contracts. Mueller said information to date indicates it is a good program.

Number 242

Rep. Rogers said, looking over the partial transcript of an APA board meeting, that Commissioner Webber had asked questions about board action and legislative approval, and that others had asked questions about liability, safety incentive, higher policy cost, and workers compensation; but that the Board had taken no action on these questions. Mueller said the Board could have delved more deeply into legal ramifications, and that there was no doubt

that this was an unusual procedure. He said it should have gone to bid differently, but the Attorney General did not seem to think it illegal. There was discussion.

Number 288

Rep. Rogers asked, regarding interim financing, if Mueller had ever seen the same situation (of the legislature being in a position to allow APA to default on interim financing, or approving funds to cover the financing). Mueller said he had not seen the same form. He said those building projects can't wait for a favorable bond market to do work. He said the Department of Revenue gives them money out of the general fund. He said one would have to speak to the APA Bond Council as to the processes involved. There was discussion of bonding. Rep. Rogers pointed out that there has been no legislative oversight of this project. Mueller agreed.

Number 358

Rep. Rogers asked if there were any inconsistencies in the Ketchikan power sales agreement in the ceiling versus statewide wholesale power cost rate. Mueller said they had asked Vassar to look at that to see if it conflicts with law.

Number 374

Rep. Bylsma said that, in the transcript of the 10/2 meeting, Slagle and Webber were talking about insurance when the Commissioner asked if the legislation was there. Slagle said he could not answer, "but we do it". Bylsma asked Mueller if he had questioned that. Mueller said they relied on the attorneys. There was discussion.

Number 400

Rep. Martin asked who was attending the 10/2 board meeting. Yould said he could provide a list of those attending.

Number 417

Rep. Martin noted, regarding a $9-million contract to a Japanese firm, that $570,000 was in advance. He asked if these monies had been authorized yet. Yould responded that they received bids to put in the submarine cable portion of Tyee. The Japanese firm was the lowest bidder. Insurance premiums have been provided for this portion of the program. Martin said this goes against the advertisement about keeping money in Alaska. He questioned

APA's procedure of insuring leased equipment but not insuring owned equipment, which would ensure that APA would get outside contractors because Alaskan contractors would own their equipment. Yould said this was to ensure that leased equipment would be insured. He said owned vehicled are already insured by the owner. Haywood said it was to insure items the owner has the greatest interest in. He said that owned equipment, vehicles, and aircraft are the contractor's responsibility. Martin said that was true, unless the contractor leases it. Haywood said to look at Tyee; they were concerned about someone grabbing a private plane or boat, crashing, and having no insurance. He said this could come back to the owner. Rep. Rogers said then it would make sense to rent or lease equipment, and that this would have an impact on future bids. He said there would be no reason to use one's own equipment, because the bid would be higher because of insurance on the equipment. Mueller disagreed, saying it would depend on the individual situation. Haywood said Tyee was not handled like a normal project. He said there was perhaps a valid concern regarding the conflict with competitive bid contracts. He referred to a companion program in place for contractors to use if they wished; the attorneys were not sure if insurance would affect low bids, so they elected to include subcontractors. He said they are not including aviation and watercraft coverage on future projects. There was discussion.

Number 597

Rep. Martin asked if the Japanese firm owned its equipment for cable laying. Haywood said it was leased on a time charter. Rep. Martin asked if the insurance covered them to and from the job. Haywood said it would cover marine exposure while bringing the cable to the jobsite.

Number 619

Rep. Bylsma questioned the length of the insurance contract. Haywood said there was no date because they were not sure when the exposure would end. Rep. Bylsma asked asked if they were insuring for the length of the program. Haywood said yes, that it was the same situation as when asking for a fixed price bid. He said change orders could increase or decrease the costs.

Number 654	Rep. Rogers said, regarding bids on various projects, that the difference between leased or owned equipment could make a difference in lowest bidder.
Number 678	Rep. Martin asked Mueller and Yould to clarify what legislation is needed to clarify this situation and make it legal. He said committee staff would prepare the opposite point of view. Yould said nothing precludes entering this type of program in Alaska. Vassar said the authority is broad enough under present law. Rep. Martin requested citation of specific authority. Vassar said nothing in the law expressly authorizes it; that it is general authority. There was discussion. Mueller said they asked many questions, wanting to clarify in their minds and ascertain if they had authority. There was more discussion.
Side B, Number 008	Rep. Martin had announced that the hearing would be continued on Friday, April 2, and as there were no further witnesses wishing to testify, the meeting was adjourned at 3:35 p.m.

Tape # 49 & 50

1: 07

000 Call to order / purpose of mtg - policies on sole contract of insurance

015 ~~Rod~~ Dick Pettinger, AK Ch, AGC - 675 const-related firms - Chapter opposes APA wrap up ins pgm known as APCOP. Nationally, have been opp'd to this for yrs. went over past stands taken.

040 Asked what reg or statute that permits wrap-up ins pgm. Why did APA institute pgm? All bids on Tyee included ins. Why did APA not notify pub of intent before imposing pgm on the project. They says its to save money to rate payer.

054 One of contractors tools is removed by this. Explained how safety factors affect cost. Co w/ better safety factor wd normally submit lower bid. APCOP penalizes safety-conscious contractor. APA assuming ins ~~or~~ means contractor wd not be held responsible for claims. Questions ability of APA to ensure proper safety procedure. Questions savings as a result.

081 Promised to provide written testimony tomorrow.

084 Major disadvantages:

- owner controlled pgms disliked by most contractors
- admin is disadvantage due to length of project & turnover of personnel.

— ins. co agents interests may be diverse; hence conflict of interest serving all parties; claims control probs also. legal difficulties

— better to write w/one policy (auto liability + _____); separate policies lend themselves to abuse.

4 true cost of ins often not determined for 5–7 yrs after project.

116 — owner becomes involved in many ins disputes that normally take place bet gen contr & subcontr.

123 Best incentive for risk control lies w/ self insurance pgms. APCOP will result in opposite. Object to govt intervention into private sector. Requested immediate elimination of APCOP

135 Martin asked when first came to his attn; - early in Nov (Pettinger) contract let in August

Rogers - clarification; asked if state provided ins on any other project. Pettinger said no.

Martin asked if this makes st resp for WC claims, bondag, etc. Pettinger said st assumes liability of prime contractor

15

165 Eric Gould & John Haywood — Gould Chronology of events.
Dir, APA Dir, Risk Mgmt

APA had 2 options
1) bidding under normal proc — const provide own ins
2) bidding net of insurance (wrap up pgm)

Div Risk Mgmt provided info that indicated benefits to APA to keep cost of ins premiums down if they provided own ins. Their intent to proceed w/ owner-insured pgm. Div RM used state's present ins brokers to provide coverage.

AGC then objected to pgm.

216 At last board mtg (3/21), ~~the~~ had issue rwd — Div RM came before bd & indicated advs to state to ~~s~~ take part in pgm; AGC opposed; Barry posed qstns. Many qstns raised shd be addressed by RM; they assisted in ans'g qstns.

238 Next project is Tenor Lake; bid opening 4/26. Will request 2 bids fm each contr — 1 net ins, 1 owner ins. Bd will then decide to which type ins to case.

250 Rogers asked when bid opening for Tyce

Y – ~~Aug~~ Sep 25 ; bd mtg 10/2 ; ~~Bd Awd~~'d

Rogers – net of ins or ins ins?

Y – ins ins; subly requested winning cntr to remove ins fm bid.

R – others had no oppty to respond as modified?

Y – correct

R – that might have created diff lowest resp & bidder

Y – had litigation against award for other reason; as one circ sued.
10/2 went fwd w/ bid, but didn't sign agmt until 12/2.
Clarification of dates.

Haywood – pgm was in place at time bidder was asked to back out ins. ~~Had to~~ Cntr voluntarily agreed to back out ins costs. after that, since RM's recomdn, felt it wd make sense to draft memo of agmt, but pgm ~~was~~ was in effect.

319 R – state is ~~Mng~~ managing cntr's risks.

H – talking abt situ where st has joint interest in wks comp, gen liab, & bldrs risk. WC Statute has proven that st entities are liable in event of claim w/o adequate ins. Since WW II, most major pub const auth pgms have been handled by wrap up pgm.

Rogers indicated statute saying cntr must s/mit proof of W/C ins at time of bid.

360 Martin said Harrison Western was 4th lowest bid, + did not comply w/ law in submitting proof of ins.

H- wasn't involved in opening of bids; understood they were 2nd lowest. At time ins certificates came in, decision had been made to go w/ APCOP pgm. Yoneo understood they did have ins at time of bid.

390 R- Do you require notice of current coverag of WC prior to awarding bids; Yoneo wasn't certain.

402 R- 2 concerned on. couple issues where APA is ~~stating~~ circumventing or violating law

Interim financing- has it been arranged for both Swan Lake & Tyee?

- Yes. R- what wd happen if rev. bonds cd not be sold & legis did not make appn?

Yoneo- fine advisors & underwriters advised long term bonds cd be issued ~~to~~ if necessary.

R- what is ob'n of state if bonds went up to 20%?

Y- APA ~~State~~ is liable, but state wd not let its credit be impaired.

R- concerned dot agency if state making obligns on behalf of legis. Will there be capital reserve acct? Y- yes, w/ bond proceeds.

R- Swan Lake- recd complete legis auth'n? Y- yes.

R- same interim fin'g issue? Y- straight bank loan.

R- the Auth says it won't incur ~~any~~ debt svc that wd make pwr more expensive than diesel. How can you ensure this?

Y- ~~APA~~ legis can chng pgm.

480 R- current law says uniform pwr rate; if rate goes above ceiling, how can both law + contractual ob'n be met?
Y- not intent of legis to increase cost of pwr
R- legis said 10% of capital costs annually unless $5B in.
Y- cost will still be lower than cost of diesel. Analyzed - don't foresee situ where cap will come into play. People will always have to remain in system to pay their share of debt svc.
R- then you say yes there's a ceiling - Y- at least their portion of debt svc.
R- ~~Same~~ requested clar'n. Y responded - in event bond ~~to be~~ ~~are can't be had~~ market goes up, gotable whether revenue bonds cd be sold to cover pgm.
554 R- APA has atty? Y- Vassar. Doesn't rw all contracts; have other attys. Contract was rwd by dept law under xptn sec, but primarily rwd by private counsel.
R- uniform rate w/ cap tied to diesel rate in their area for all projects? Y- yes.
575 Martin asked if consulted w/ Div Ins H. - yes. Owners wrap up common way of handling major const projects all over country for last 25 yrs. Alyeska was owner wrap up. Met w/ Div Ins several times before going into pgm. ~~Asked~~
Qstn if special reg wd need to be adopted; decided no.
Set cutoff at $50M projects for wrap up pgm.

614 M - did Comm Hudson give permission

H - Risks of st of ak top majority of world wide marketplace capacity. Contract on basis of profit secs, kept in effect 3-5 yrs. This was done early 1981. Marsh + McClennon & Caroon + Black were selected.

654 M - why shd they get pd for ins pgm when memo of agmt was dated 3 months after ins coverage went into effect.

H - insurance was there by 10/15

M - that's when you decided Harrison Western did not have coverage.

H - their lack of ins was not an issue; didn't meet other specifics.

M - at what time did Comm. sign sole source contract?

H - contract was put together for Tyee Lake ins. This is contract of utmost good faith. Compared to car or homeowners ins ordered by phone. Said same setup - put coverage into place as of 10/1, contracts followed. Standard practice.

>311 M - understood Contr can't get ins because they were high risk. also, not a $50M contract.

Side B H - $90-100M contract when done.

005 Terror Lake w/one prime contr for a $175M project better example than Tyee, which is bid in 3 phases.

R - so Caroon & Black can get ins contract on Tyee, Terror, Susitna?

H - they don't have a contract like that.

R - you can extend contract to all projects?

H - part of selection process.

027 H- we need 4-5 mo lead time to give brokr time to put together pgm needed. Now have 2 projects on line - Terra Lake & Tyee. This is a risk mgmt svc, not separate.

042 R- since cntr bears no cost of ins, what is incentive for good safety pgm?

H- statistics show they run safer jobs. Build safety specs into project, centralize safety coord's & facilities on job, & still report losses to rate safety council so ins modn factor continues to run. By cntrs have self-ins or captive ins cos that are basically pure self-ins.

068 Discussion of incentive for good safety pgm.

076 H- state can't forcing safety on cntr. Stats show these jobs are run safety. Missing humanistic. So many hidden costs on injury, no well mgd cntr will risk that.

R- & but poorly mgd cntr will.

091 M asked who pays safety audit

R- comes out of ins premium; ~~factoring does not affect~~ bc/ breaking svcs ins co wd normally provide into component parts & subcontracting them.

105

~~105~~ ~~H- letter doc~~ Discussion of contracts.

111 M – you said private & public industries do wrap ups – What public ones do? & it seems private are moving away fm it.

H - going as strong now as ever; cut back in fed'l funds slowing down major wrap up pgms.

Passed out partial list of owner-controlled pgms & documented savings.

130 M - did Hudson sign doc to auth this?

H - went th contract rev in Dept Admin.

139 M – we're doing this ins after the fact; by your rego, this co was not qualified as it had no ins included in the bid.

H - Ins was in bid.

148 Byloma – in contract w/ins co, they provide APA & prime contrs w/ safety incentive formula prior to conception; now co they of contracted before ins. was in force?

H - ~~Had~~ an intention agmt is that language for policy be in contract. Designed for project where lang is included in bid specification.

B - what is safety incentive formula?

H – ~~determined~~ APA got a return of $100,000 to use on other projects, & $200,000 to use as incentive pgms w/contrs on basis of good performance.

B- contr & APA split that?

H- incentive based on losses

195 B – on 10/2 ~~at [illegible]~~ premium return was mentioned; led to blw it wd come back to State, not cntrs.

208 Martin said mtg wd be cont'd Friday.

215 Darrell Cody, pres, Darrell A Cody Co, business consulting firm (201 Danner, Anc): One specialty is assisting cntrs in acqn of surety bonds & const ins. Listed his qualifns.

250 Two pgms were attempted to be instituted in 1960s that they were able to stop because what they suggested as savings was over anything they cd justify. Also involved in many major hydro projects in West & Ore, almost none had public wrap up pgm. Said he's been injured by actions of APA since they took ins out of ones of his clients' hands. Also co-chmn of Ins Taping & Bonding Comm of AGC, also holds natl offs in AGC. Washington st. in

280 Favors free enterprise system. Opp'd to anything unnecessary. ~~Also~~ First reason for opp'g APCOP. Takes normal ins buying process away fm cntr. Cost of ins major consideration in putting bids together.

297 Opp'd to govt involved in business where no need or purpose served, as in this case. State & APA in private sector, where they aren't wanted or needed.

In pub relations pgm, said they'd save money. Sees no way they can save money over the way gov cntrs buy their ins.

Commented on wrap-up doc handed out by H (Y?). Said they went back 25 yrs to find 25 projects. Referred to one project showing 38% savings - a great deal of that pgm was marine work. At that time, marine const had surcharge of 56% on W/C rates. At same time, had marine cntrs wkg on same type work; they pd 100%, not 156%. These savings have no credibility. Have to start at same base to determine savings. Doesn't feel statistics are good are credible. Don't save money. Believes it will cost more.

360 Also say dollars will stay in Ak. B They hired 2 of the best brokers in the world; all the effort has been centered around Seattle offs of those firms.

All ~~they did~~ firms cd be considered outside firms.

specific
objections

1) doesn't save costs

2) interfere w/ cnties normal ins buying processes

3) grey areas bet parties re contl liabilities, section become confused because of the grey areas created by net of ins. State exposing itself beyond profits of insurance, which is add'l cost.

409 Sutcliff — by st providing ins/wrap-up, state has liability?

Cody — they assumed risk greater than they are insuring.

Discussion.

R — bldrs risk may be larger than w/ be insured for?

C — anything if for any reason coverage is denied by carrier, state is liable. State acting as ins. intermediary.

B — wd that be diff if gen cntr had private ins?

C — yes; contract specifies cntr is liable.

470 Cody — has enclosed exhibits w/ prepared testimony.

He described exhibits

500 Rogers tried to clarify order of events.

Cody — tone of mtg to cntr re change order (after court battle) was — here's contract; we'll sign it if you sign chng order.

550 Byfoma – mentioned Wash passed law re wrap-up – what was it?
Cody – comm has on file cy of that; prohibits agency of st or local govt in directing purchase of surety bonds on st or local project; was done in 1967 or 68.

574 B – client was connected w/Tyee Lake? C – yes B – you cost insurance w/cnts? C – Cost consulting svc on contract.

584 Sutcliffe – if st of Wash had built + owned projects as AK will, if there was wrap up + if state can't totally find proj, there wd be no implication the cos wd pay out so much it wd reflect back on st?
Cody can't think of situation where, overall feasibility of projects ca be affected. Bkr brokers + RM people capable of handling risk + RM. Discuss their right + involvement of st govt in private bus, + right of cnts to protect himself as he wishes to be protected.

605 ~~Cody~~ M – you mentioned fact PR firm was hired – who paid for this? Any relationship bet APA bd + Co?
C – assumes APA pd for it; as of 10 days ago, they were still wkg on project.

642 M announced hearings be cont'd Fri, where bill or resolution may be drafted.

645 Don Koch, Market Surveillance, Dv of Ins & Moore, Dir, Dv of Ins

Moore - ~~was~~ formal hrgs held 1971 re pipeline - then dies Bill Fritz issued order. Went th; then 2 yrs ago when pipeline out + running, approached by private enterprise at + having wrap ups. As of 8/76, published

Tape 2 guidelines (worksheet).

003 Koch - contacted other States to find out their attitude toward wrap up; very little response; many didn't know what it was. Commenced at last summer because of pot'l wrap up on gas pipeline & other projects.

M - understood there was wrap up on marine ferries

K - only one he was aware of was on Alyeska pipeline - private.

030 M - what advice did you give on this pgm?

K - recalled there were discrs of

1) self-ins — didn't see how cd be done legally

2) wrap-up - dish dealt w/ criteria they had at that point.

Discussion was fairly genl; no advice given.

044 M - concern at wcb or solely resp for paying WC claims. Do you foresee that?

K - no opinion; not sure. Bus shd be considered

058 M - any div of Ins coverages responsible, or is risk mgmt independt?

~~Ko~~ Moore - do resp at all

Koch - ~~Atty~~ regular provider coverage

071 M - have you evaluated pgm?

K - no; if they were directed to look at it, wd be reg's to say whether or not it covers wks. Don't have expertise to say if it's appropriate pgm for those circumstances. Not one of division's roles.

093 B - % of wash carries own WC; wdn't ~~Not tend to b~~ elimination of wrap up have effect on WC?

Moore - could have.

K - whether comp was prime consideration when legisn enacted ~~shd be consid~~ wd be factor.

110 M asked if they cd evaluate policy - % of risk & true value to state

K - don't have expertise; wd have to contract it out.

125 Ken Vasser, ~~Dept of Law~~ atty for APA fm Dept of Law -

R asked if he'd rec'd pur sale agmt? no
interim financing agmt? no
V- APA has outside counsel; b/c they rec'd these.
R - rec'd any env issues discussed? Yes
R Timeline - 7/27 APA met w/ Marsh + McC
8/6 respons M+M w/ details
8/11 bids come in
Aug - Sep APA chooses bidder
10/2 APA bd meets + approves concept APCOP
10/6 change orders re
11/9 press release APCOP
11/23 + 12/3 sign memo of agmt -
after that - policy.
V- not standard procedure. Wasn't familiar w/ timeline.
Decision to use pgm was entered after bid; constitutes
chang of circumstances; details came to attn of
Exec Dir after bids opened.
R - clarified timeline. V - unfamiliar
R - planning to rec sales agmt w/ Ken + ent fcmt agmt?
V - yes.

186 R asked if APA bd members present.

190 Comm Ernie Mueller, V. Chm, Bd Dir, APA —

re his feelings abt APCOP — APA is a business in competition w/private facilities. He feels its his resp to investigate cost cutting avenues. Only way to keep cap on costs is to hire experts. RM is one of their agencies used. Decisions rightfully in hands of bd. At mtg, there was sufficient justification to approve this approach. Info to date hasn't changed his mind. Disadvantages to gas cntrs are to entire field of wrap up pgms, not just public ones. If there are disado's, any decisions should cover public & private contracts. Info to date indicates it's a good pgm.

242 R — looking over xcript — Comm Webber asked qstns abt bd action, legis appl; Schrer re liability; Wheadon re safety incentive; Chm Conway re hughes policy; qstns abt WC; but no action by bd on this.

Mueller — ~~staff bad~~ asked same kinds of qstns as AGC. Bd cd have delved more deeply into legal ramifications, no doubt unusual procedure. Bd have gone to bid diff'ly but AG doesn't seem to think illegal.

280 R. — qstns.

Mul - most bi' members change over summer.

288 R - interim fin'g - any pblm w/ putting legis in posn of allowing APA to default on int pmts or appl's fnds - ever ~~seen~~ ~~or~~ same situ before?

Mu - not same form. Those bldg projects can't wait for favorable bond market to do work. Dept Revenue gives money out of gen fund. ~~If bond market [illegible]~~ Have to speak to APA bond council as to processes involved.

325 R - gen obl'n bonds are voted on, rev bonds are for project.

Mu - responded. People fin'g looking to state's moral obligh, but no legal obligh.

R - want legislative appl'n on bonds because of past bad experience. There has been no legislative oversight of this project.

Mu agreed.

358 R - Kth pwr sales agmt - ceiling vs. statewide wholesale pwr cost rate - inconsistencies?

Mu - we asked Ken to look at that to see if it conflicts w/ law

374 B - in xcript of 10/3 mtg - Slagle, ~~Mu~~ & Webber talking abt mtg, Comm asked if legis'n was there; Slagle said he can't answer, "but we do it." Didn't you get that?

Mu - rely on a Hyp.

397 Discussion.

400 M – 10/2 first mtg as bd member?

Mm – thought so

M – anyone else there besides bd of APA & RM?

Mm – yes. Upuld said cd provide list of people.

M – requested cys of ads.

417 M – re another contract – $9M to Japanese firm, $50,000 in adv – monies auth'd yet?

Upuld – rcvd bids to put in submarine cable portion of Tyee; Japanese firm lowest bidder; ins premiums have been provided for this portion of pgm.

M – goes against ad act keeping money in AK; also, you insure lease eqmt but not owner eqpt, which ensures you'll get outside carrs because AK carrs have eqpt.

Y – was to ensure that leased eqpt wd be insured; owned vehicles already ins'd by owner.

H – to insure items owner has greatest interest in. Owned eqpt, vehicles & a/c are carrs resp.

M – unless he leases it.

H – look at Tyee; concerned abt someone grabbing private plane or boat, crash, no ins. Cd come back to owners. ~~Don't want~~

R – Wd main reason to rent or lease, then will chng impact of future bids. No reason to use one's own eqpt, because bid will be higher because of ins.

Mueller dis agreed. Depends on cnd's situ.

H – Type not handled like normal project. Perhaps valid concern re conflict w/ competitive bid contracts.

~~Wanted~~ Had companion pgm in place for cntrs to use if they wished. Attys weren't sure if cns wd affect low bids; then elected to include subcontractors.

Not including av & watercraft coverage on future projects.

Discussion.

597 M – assuming Jay firm for cable laying – vessels, everything. Do they own eqpt?

H – leased on time charters.

M – cover them to & fm job?

H – cover marine exposure while bringing cable.

619 B – ~~ca~~ what is otak paying for?

H – no date because not sure when exposure will end.

B – cns for length of pgm?

H – yes; same situ when asking for fixed price bid; change orders cd increase or decrease costs.

654 R – re bids on various projects – diff bet leased or owned eqpt cd make diff in lowest bidder.

678 M asked Mueller & Yonld to clarify what legsn is needed to clarify this & make legal; said staff wd prepare opposite pt of view.
Yonld – nothing precludes entering this type pgm in Alc.
Vasser – ~~authority~~ statt is broad enough under present law.
M requested specific authority.
V – nothing in law expressly authorizes it; general authority.
Discussion.

740 Mu – we asked many qstns – wanted to clarify in our minds & ascertain if we had authority.
Discussion.

ALASKA POWER AUTHORITY

Partial Transcript of Board Minutes
of
October 2, 1981

Mr. Yould: The final action under Tyee has to do with Insurance. Normally, - one shouldn't say normally, but what we have anticipated with the Tyee Project, - what has been normally done within the State on large projects such as this is to require that the contractor provide his own insurance for, to protect against various contingincies that would come up during construction. However, Terry McGuire has been working with the state's Risk Management section which has indicated that the Power Authority might find it desirable to enter into a wrap-up insurance program whereby the Power Authority would request that the civil contractor, Southeast-Harrison Western, allow us to secure the necessary insurance on his behalf. The advantage being that that insurance alone is going to cost somewhere in the neighborhood of, we're just guessing, $3 million for the various programs and policies that he is going to have to be taking out. But based on a proration of what we anticipate the insurance claims will actually be should this be a normal project we can anticipate a premium return of somewhere in the neighborhood of 30 to 50%. This is something that can come back to the state and be offset against the project rather than relinquishing the contractor. That's why in dealing with Risk Management we feel that it's a very desirable thing to do. If you would like to I think all we want to do is make you aware of this technique and this procedure and let you ask questions which you might have. But we do have a gentleman from Risk Management, and Mr. McGuire has been working on this particular technique.

Comm. Webber: I'd sure like to hear that one.

(voices interacting are inaudible for this space)

Mr. McGuire It was not until late July, early August (inaudible) some bills were passed or signed into law or passed into law that we knew that we had the insurance requirements associated with certain contracts during construction and we did not come to a decision based upon discussions with Risk Management that it would be advantageous to establish wrap-up policy until early in August. At that time we had considered sending out an adendum to that major civil contract, but it was getting so close to the bid date of August 11th that we felt it would confuse the bidding process and we decided we could actually, if we

instituted this type program after evaluation, we could go to the contractor early on, say don't put your insurance in force. You don't have to have to worry about losses above your experienced level, which would impact your rates in the future, or we will provide the insurance, we can probably provide a greater degree of course possibly for a lower rate since it's a wrap-up policy and we would issue a change order to your existing contract to effect this and reduce the contract amount by the value that he had anticipated paying for insurance. What you have, what I just handed out is a letter from John Haywood the Director of Risk Management. That's the initial letter, and then there's a brief statement, brief, some articles covering wrap-up policies that gives you a little idea of where they stand in the industry. And then there's another copy of the August 6, 1981 letter which is also in your Board packet from Marshell McClennen. We have here with us today Mr. Tom Slagle, who is an assistant to John Haywood, both he and I will be able to answer any questions, I think, that you have. Some additional advantages of this program are: in a project where you are having eight to ten or eleven, even, major contracts, plus you'll have sub-contractors for those prime contractors, you're constantly having to establish for each individual contract insurance limits and they must meld with each other and we have to get certification of that coverage for all contractors and sub-contractors and it comes somewhat of an administrative burden in some respects. And, as Mr. Yould stated, should the losses associated with the program or the claims associated with, that could be filed during the construction phase of the project associated with professional liability, general liability, workmen's compensation, and so on, the loss activity is low, well actually the contractors are going to obtain the premiums that, you know, a rebate on premiums in some respects, whereas the Power Authority and the state can achieve that rebate on premiums. If the experience factor is high the advantage to the contractors is their loss would have been high, well then it is not impacting their ability to get future contracts because their individual firm's insurance premiums. So that there are some advantages to both contractors and to the state. We feel there will be a cost savings by instituting this wrap-up program. Another advantage is that when you have each contractor buying their own individual insurance you're going to have many parties involved and if there are claims sometimes they'll be many people involved in a suit. There can be claims against both. Contractors can make claims both the owner, design engineers, and so on, construction management firm. It becomes extremely complicated. And with a wrap-up program with all parties having the same coverage with the same policy the resolution of the claims is handled by that one broker.

You're not having insurance companies having high expense trying to recover losses associated with their insurance programs with each other. You're dealing mainly with one broker who basically is covering insurance areas and coverage for that individual project. Another advantage is that this can be expanded and it will be accomplished initially just on this Lake Tyee project. We anticipate trying to expand it to our overall program, our overall construction program. The reasons we are looking at Marsh and McLennan right now is that the Division of Risk Management in the past year had sent out RFP's to all the major national brokerage firms and had selected Marsh and McLennan to provide coverage in this area for the state and Corroon/Black and Dawson had been selected to buy coverage in that area of property insurance, and other areas too. They felt due to the time constraints the desire to get this wrap-up policy, possibly in place, for this one project, we should not go out with a RFP which could take three months, possibly, to evaluate. It could be a very complex RFP to prepare, could be a complex RFP to evaluate and we would not be able to institute the program and save the state possibly some money unless we went to Marsh and McLennon for this coverage initially on the Lake Tyee project. Sometime in the next few months we are going to be sending out a RFP that will outline what our insurance requirements will be on a program basis, not just on the Lake Tyee project, but on a program basis, and we'll be working closely with Risk Management in the development of that RFP and in an ultimate evaluation and we may end up having oral presentations before the Board at some future Board meeting by the top, what we consider, on the written submissions, the top firms to make oral presentations to the Board at some future meeting. That's where we stand, it was both Risk Management and ourselves, wanted the Board to have the opportunity to ask some questions, to understand what we are approaching here, what this program is. We desire to institute it, I don't know if it requires any formal blessing of the Board or not. We don't know definitely that we'll be able to even instituted for the Lake Tyee project, because if we can't get the contractor to accept a change order to reduce basically his contract by the value of what he would have been paying for insurance, well then we would have to look at the option of just doing it for the Transmission line and substation contracts yet to be awarded and treat that somewhat as a separate project for insurance purposes if the brokers would accept that.

Chrm Conway: Questions from the Board members?

Mr. McGuire: Tom Slagle is right there.

Dr. Lehr: Would you use part of yourself insurance pool to cover

this, to make a saving that are potential or would it be 100%, no deductible?

Mr. Slagle: Yeah, we've used part of it, especially in the excess part. Ten million on up. We have an umbrella with the state program on any cash loss type claims. We invisioned this program as being probably the first ten million and again, going into the state's program, on any excess insurance.

Dr. Lehr: Is there any potential that the state could all of sudden find themselves in a horrible lawsuit that our coverage wouldn't cover? I mean, would the dam, I don't know, the thing could break or something like that, is there a chance we could all of a sudden find ourselves in a billion dollar lawsuit?

Mr. Slagle: I think the potential is there. I think our coverages are probably as broad as you're going to get in the insurance industry. The potential is always there for that type of lawsuit, yes.

Mr. McGuire: To expand on that, we have discussed with John Haywood the fact that this program that we're talking about here is insurance during construction and we also want to investigate what transpires nationally relative to coverage of projects in operation. The problem is that very few of them are privately owned. Many of them are owned by local governments, state governments, and federal government predominately. But we are going to investigate that in an area of property insurance, loss of operations insurance and so on for individual projects and a system as soon as we can.

Dr. Weeden: I guess I tend to be too simple minded about these things, but it seems to be right now when the contractor carries the insurance he benefits from a low number of claims. If the state carries the insurance the contractor does not benefit from a low number of claims.

Mr. McGuire: That's correct.

Dr. Weeden: So, does that mean we'll kill more people on the operations?

Mr. McGuire: No, I don't believe it will because basically the contractor, the insurance firms and the Power Authority, and the contractors are still going to be interested in keeping any safety, insuring that construction takes place in a safe manner.

Dr. Weeden: Well, those safety nets, I guess to use a Reagan phrase, are there in accordance with law in any case, aren't they? Insurance or no insurance. In other words, if

certain OSHA and other agencies require certain fundamental, you know, features, when you back up a heavy piece of equipment it's. I guess can see that in a generalized sense the contractor, the person doing the work on the ground, handling the shovels and mixing the cement and so on, has a kind of a generalized incentive, even if the state carries the insurance, to reduce accidents. But that incentive is not as sharply focused as when the contractor, himself, could get, let's say could look forward to a substantial rebate on premiums.

Mr. McGuire: If an accident occurs, on a job site, the individual or whatever, which id going to be making a claim, is going to make his claim and if it exceeds the limits of insurance, that does not preclude any possible plaintiff from still trying to recover more than the limits of insurance coverage from parties involved. The contractor themselves, construction managers, Power Authority.

? (mostly inaudible conversation, intermixed between about three people)

Chmn. Conway: All you're saying is that you're going to wind up with a policy that's much larger because it's going to be placed through the state's own Risk Management systems and therefore tends to give you greater protection, but I'm a little bit with Dr. Weeden and I circled two points on here. One of them, Marsh and McLennan and you've answered that question as to why it's going this particular route. If you're comfortable with that original RFP and I assume are, I don't have any more questions on that point. The other one I circled was on the Workmen's comp portion of it, which is really where the incentive is. To run a job properly, is the state, for example, going to have people there? I'm not talking about the safety inspectors now, I'm talking about the insurance people. Are we going to have someone there? Who is really going to be out after the interests of that, the policy holder.

? (inaudible)

Chmn. Conway: Well (inaudible) and, it's the workmen's comp thing that I'm ..... the rest of it I can understand, there's great savings to be accrued here but the comp thing I just don't (inaudible)

Mr. Slagle I think you (inaudible), I pondered that question myself. I think you could have some incentive in the programs for the contractors (inaudible). One of the things that we're looking for on this project from their Risk Management point of view is using this as a model for loss control programs. We're going to have state people from our loss control section there, we're going to have

people from Marsh McLennan. We're hopeful that we can get some real points on this and have a continuity of loss control for other projects that come up and we

Chmn. Conway: You raised a very good point. And that would be some incentive, that would in fact accrue back to the contractor or contractors in this case, otherwise you've got two problems. One that we've been addressing is, how are you going to run the job and the other problem is, now you've raised that, is you're going to have the myriad of inspectors floating around that job. Frankly, if I was the contractor and had no incentive, I wouldn't be very hospitable to all these inspectors, they drive you nuts, but, if I'm going to get something from the benefit of their being there, I'm running a very safe job, then I'll accept the inspectors.

Dr. Weeden: You wouldn't run 'em all through the cement mixer?

? Then they'd sue you.

Chmn. Conway: Five thousand guys would come out of the woodworks and come and drink your coffee and eat your grub at lunch, and in this case you've got to take care of them because they're the inspectors. That happens all the time, but, is there a method that can be cranked back in that would return some of this which would from your scenario would be accruing back to the state and that's good. But, a portion for a good record and account therein.

Mr. McGuire: Mr. Chairman, I think that's entirely possible and I think that that's going to be something that will develop as a result of our discussions with the main civil contractor who has already been awarded the contract outside of the wrap-up policy and since he realizes that there are benefits to him by not exposing his work on this project to impact his overall loss record. But he also is possibly losing the potential benefits. And I think that we could develop some arrangement whereby the contractor receives a percentage of potential premium return based upon loss experience. I can only say that I think it is extremely possible, worth looking at anyway.

Com: Webber: One question. Did I understand that somehow the Power Authority's liability is limited by the state? Did I understand that? I don't know just how it came through but I think I heard that basically there would be a cap on the liability of the Power Authority if they utilize this insurance?

Mr. Slagle: Well, there's a cap on the insurance policy. I think we'd be extending. What we get to the contractor any claims that arose out of the activities of this project

would come under the state program on large catostrophic claims.

Com. Webber: That's what I wanted to get to. How is that funded?

Mr. Slagle: That is basically funded through the different state departments, the cost of risks are allocated back to the departments and they in turn

(inaudible interaction)

Mr. Slagle: .....Insurance Company. We send a premium notice to different departments based on their, the number of buildings they have and their loss history

Com. Webber: And in that scenario you can pick up this type of an agency and treat it as a department or any insured.

Mr. Slagle: Right.

Com. Webber: And is the legislation there to do that?

Mr. Slagel: That I can't answer but we do it.

Mr. McGuire: Basically, Commissioner, I think that for purposes of the state's basic programs it would be beneficial that the Power Authority be separated for the allocation of the insurance premiums, the variable rates from the rest of the Department of Commerce.

Com. Webber: That's I know what you're saying

Dr. Lehr: Would that adversely affect Commerce rates?

Dr. Lehr: They are semi-accruarial of how they charge their rates. Because we have a self insurance pot and then we have a, the other one's we go our for premiums on, then every year they adjust a little bit. The trouble is those won't adjust after you cut your budget numbers, but you pay some of that in your Risk Management charges. Then your department wouldn't pay much because you have a low loss whereas Fish and Game and DOT pay a whole lot

RE: Alaska Power Authority Hydro-electric Insurance
"Wrap-Up" Program

Dear Mr. Moore,

The Alaska Independent Insurance Agents & Brokers Board of Directors held their semi-annual board meeting in February. John Heywood, Risk Manager for the State of Alaska was kind enough to briefly address our group.

Mr. Heywood gave us some background information on the insurance wrap-up program for the hydro-electric projects under the direction of the Alaska Power Authority. A question and answer period followed his comments.

The board has several areas of concern dealing with the State becoming involved with private enterprise. There were no public hearings held and there were no requests for competitive bids from the insurance community for this program. The board strongly objects to these procedures and as a result of our concern we resolve the following:

WE OBJECT TO THE HYDROELECTRIC INSURANCE WRAP UP PROGRAM AS PRESENTED BY RISK MANAGER JOHN HEYWOOD ON THE BASIS OF IT BEING A POSSIBLE VIOLATION OF STATE STATUES INVOLVING RESTRAINT OF TRADE; WE FURTHER OBJECT ON THE GROUNDS THAT THE STATE IS BECOMING INVOLVED IN PRIVATE ENTERPRISE IN DIRECT COMPETITION WITH THE INSURANCE INDUSTRY TO THE DETRIMENT OF THE ALASKAN INSURANCE BUYER.

We urge your office to conduct a complete investigation into this matter and should you find that the State has wrongly involved itself in this project, issue an order prohibiting further involvement by the State on this and future projects.

In advance, we thank you for your assistance and look forward to a reply at your earliest convenience.

Sincerely,

Dianne M. Leighton
